Notice is given that the following permit was issued on _____:
(Name and address of applicant)_____
permit#_____. The project is located in _____County, Section _____, Township _____ South, Range _____ East. The permit authorizes a surface water management system on _____ acres for _____ known as _____. The receiving water body is _____.
A person whose substantial interests are or may be affected has the right to request an administrative hearing by filing a written petition with the Suwannee River Water Management District (District). Pursuant to Chapter 28-106 and Rule 40BB-1.1010, Florida Administrative Code (F.A.C.), the petition must be filed (received) either by delivery at the office of the Resource Management Business Resource Specialist at District Headquarters, 9225 CR 49, Live Oak FL 32060 or by e-mail to tjm@srwmd.org, within twenty-one (21) days of newspaper publication of the notice of intended District decision (for those persons to whom the District does not mail or email actual notice). A petition must comply with Sections 120.54(5)(b)4. and 120.569(2)(c), Florida Statutes (F.S.), and Chapter 28106, F.A.C. The District will not accept a petition sent by facsimile (fax). Mediation pursuant to Section 120.573, F.S., is not available.

A petition for an administrative hearing is deemed filed upon receipt of the complete petition by the District Clerk at the District Headquarters in Live Oak, FL during the District's regular business hours. The District's regular business hours are 8 a.m. – 5 p.m., excluding weekends and District holidays. Petitions received by the District Clerk after the District's regular business hours shall be deemed filed as of 8 a.m. on the next regular District business day.

The right to an administrative hearing and the relevant procedures to be followed are governed by Chapter 120, Florida Statutes, Chapter 28-106, Florida Administrative Code, and Rule 40B-1.1010, Florida Administrative Code. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means the District's final action may be different from the position taken by it in this notice. **Failure to file a petition for an administrative hearing within the requisite time frame shall constitute a waiver of the right to an administrative hearing. (Rule 28-106.111, F.A.C.).**

If you wish to do so, you may request the Notice of Rights for this permit by contacting the Business Resource Specialist in the Division of Resource Management (RM), 9225 CR 49, Live Oak, FL 32060, or by phone at 386.362.1001.

LEGAL DESCRIPTION

21-0297

CHW Professional Consultants

DATE: DECEMBER 14, 2023
PROJECT NAME: FLETCHER TRACE
PROJECT NO: 21-0297
DESCRIPTION FOR: PHASE 1

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING ELEVEN (11) COURSES; (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) SOUTH 41°06'51" WEST, A DISTANCE OF 160.00 FEET; (3) SOUTH 48°53'09" EAST, A DISTANCE OF 270.00 FEET; (4) SOUTH 41°06'51" WEST, A DISTANCE OF 519.84 FEET; (5) NORTH 48°53'09" WEST, A DISTANCE OF 270.00 FEET; (6) SOUTH 41°06'51" WEST, A DISTANCE OF 110.16 FEET; (7) SOUTH 60°08'30" WEST, A DISTANCE OF 52.89 FEET; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 110.00 FEET; (9) SOUTH 48°53'09" EAST, A DISTANCE OF 702.47 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE NORTHEAST, HAVING A RADIUS OF 335.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 51°07'03" EAST, 26.09 FEET; (10) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 04°27'46", AN ARC LENGTH OF 26.09 FEET TO THE END OF SAID CURVE; (11) THENCE, DEPARTING SAID CURVE, SOUTH 36°39'04" WEST, A DISTANCE OF 123.18 FEET TO THE SOUTH LINE OF AFOREMENTIONED SECTION 28; THENCE SOUTH 89°22'44" WEST, ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 1005.72 FEET TO THE **POINT OF BEGINNING**.

SUBJECT TO THE MAINTAINED RIGHT OF WAY OF COUNTY ROAD N.W. 110TH AVENUE (FORMERLY KNOWN AS COUNTY ROAD N.W. 28), ALONG THE SOUTH BOUNDARY THEREOF.

SAID TRACT CONTAINING 21.35 ACRES OF LAND, MORE OR LESS.

1.0 INTRODUCTION

Flatwoods Consulting Group Inc. (Flatwoods) was retained by Fletcher Family Companies (Client) to conduct a wetland delineation and listed species survey for the approximately 116.95-acre Fletcher Trace Subdivision Project (Aerial Map). The project site is located east of the NW County Road 235th and NW 173rd Street intersection in Alachua, Florida (Location Map). According to the Alachua County Property Appraiser, the project site is located on Parcel ID No. 03980-002-001, in Section 28, Township 8 South, and Range 16 East (Quad Map).

2.0 METHODOLOGY

The following sections describe the methods used by Flatwoods to determine the wetland limits and the potential presence and relative abundance of listed wildlife and plants within the project site.

2.1 Preliminary Review

Information on the potential presence of listed species was collected through literature and data review. Flatwoods reviewed information from the U.S. Fish and Wildlife Service (FWS), the Florida Fish and Wildlife Conservation Commission (FWC), the Florida Natural Areas Inventory (FNAI), the Suwannee River Water Management District (SRWMD), and the Florida Department of Environmental Protection (FDEP) Geographic Information System (GIS) databases regarding the occurrence of listed species and protected habitats.

To further identify which federally and state listed plant and animal species have the potential to occur within the site, upland and wetland vegetative communities were assessed to determine their plant species composition, approximate boundaries, and general condition and quality. To establish the approximate locations and boundaries of existing upland and wetland communities within the site, available site-specific data was collected and reviewed using the following resources and methods (see References for complete source information):

- Infrared and true color aerial imagery of the project area
- U.S. Department of Agriculture (USDA)/Natural Resource Conservation Service (NRCS) Soil Survey of Alachua County, Florida
- Florida U.S. Geological Survey (USGS) Topographic Quadrangle maps
- FWS Critical Habitat Portal
- FNAI Biodiversity Matrix
- Florida Department of Transportation (FDOT) Florida Land Use, Cover, and Forms Classification System (FLUCFCS)
- SRWMD Land Use Mapping
- Alachua County Interactive Map

2.2 Survey Methods

2.2.1 Wetland Delineation

Wetlands and surface waters are delineated in accordance with The Florida Wetlands Delineation Manual (Chapter 62-340, Florida Administrative Code [F.A.C.]) and the U.S. Army Corps of Engineers (USACE) 1987 Wetlands Delineation Manual, 2010 Supplement, suitable for submittal to the SRWMD, the FDEP, and Alachua County. These delineation methods are based on the identification of specific hydrologic characteristics, including the presence of hydric soils and hydric soil conditions (periodic, continuous, or saturated), a dominance of hydrophytic vegetation, and other indicators of hydrologic conditions (e.g., evidence of frequent inundation, moss collars, and the presence of muck soils). If any wetlands or surface waters were found, the landward extent of each wetland and surface water was flagged in the field. Each flag location was recorded using a sub-meter Global Positioning System (GPS). If any wetlands or surface waters are present, they are shown on the Ecological Survey Map.

2.2.2 Standard Listed Species Survey

Flatwoods conducted a listed species survey within the site in accordance with the FWC Florida Wildlife Conservation Guide. The purpose of the listed species survey was to identify presence and relative abundance of species considered Endangered, Threatened, or of Special Concern by the FWS under 50 CFR 11-12 and the FWC under Chapter 68A-27, F.A.C. Pedestrian transect surveys for listed species were conducted on the site. During these surveys, all habitats within the site were canvassed for listed species. Any observations of listed species, or of physical features that may indicate the presence of these species (tracks, scat, nests, burrows, nest cavities in trees, etc.), are shown on the Ecological Survey Map.

2.2.3 Listed Plant Survey

Flatwoods conducted a survey in all suitable habitats within the site for plant species listed by the FWS as Threatened or Endangered. If found, any observations of listed plant species were recorded using a sub-meter GPS and shown on the Ecological Survey Map.

2.2.4 15 Percent Gopher Tortoise Survey

Flatwoods conducted a 15 percent survey to estimate the density of gopher tortoise (*Gopherus polyphemus*) burrows for the site. The tortoise survey was conducted in accordance with the FWC methods as outlined in the Gopher Tortoise Permitting Guidelines April 2008 (revised July 2020). An Authorized Gopher Tortoise Agent supervised the gopher tortoise survey. Any potentially occupied burrows were flagged in the field and recorded using a sub-meter GPS. If found, any burrow locations are shown on the Ecological Survey Map.

3.0 RESULTS

Site information collected during the desktop and field review is summarized below. The field review was performed on June 7, 2022, and representative photographs of current site conditions are included in the Photo Document attached as Appendix A. The locations of the photo stations are depicted in the Photo Station Map.

3.1 Soil Descriptions

Based on the USDA/NRCS Soil Survey for Alachua County (1985), six soil types were mapped (Soil Map). According to the *Hydric Soils of Florida Handbook*, no hydric soils exist on the site.

Arredondo Fine Sand, 0 to 5 percent Slopes (3) is a near level to gently sloping, well-drained soil found in uplands. The water table is at a depth of more than 72 inches.

Millhopper Fine Sand, 0 to 5 percent Slopes (8) is a near level to gently sloping, moderately drained soil found in uplands. Most years, the water table is at a depth of 40 to 60 inches for one to four months and at a depth of 60 to 72 inches for two to four months.

Kendrick Sand, 2 to 5 percent Slopes (30) is a near level to gently sloping, well-drained soil found in rolling uplands. The water table is at a depth of more than 72 inches.

Gainesville Sand, 0 to 5 percent Slopes (35) is a near level to gently sloping, well-drained soil found in rolling uplands. The water table is at a depth of more than 72 inches.

Arredondo Fine Sand, 5 to 8 percent Slopes (69) is sloping, well-drained soil found in uplands. The water table is at a depth of more than 72 inches.

Lochloosa Fine Sand, 5 to 8 percent Slopes (72) is sloping, somewhat poorly drained soil found in uplands. Most years, the water table is at a depth of 30 to 40 inches for one to three months.

3.2 Existing Land Use Communities

Existing land use within the site was determined using a combination of the FLUCFCS descriptions, SRWMD land use mapping, and field reconnaissance (Land Use Map). The FLUCFCS represents current habitat conditions on the property.

Upland Land Use Communities

Row Crops (FLUCFCS 214)

The vast majority of this property consists of inactive row crops. This area is mostly bare soil; vegetation is sparse but consists of a few remaining corn crops (*Zea* sp.), various grasses (*Paspalum* spp., *Panicum* spp., *Digitaria* spp., *Dichanthelium* spp., *Andropogon* spp., *Cynodon* spp.), purple passionflower (*Passiflora incarnata*), and other weedy vegetation such as dog

fennel (*Eupatorium capillifolium*), amaranth (*Amaranthus* sp.), and rattlebox (*Crotalaria* sp.). Several small pockets of live oak (*Quercus virginiana*) and laurel oak (*Quercus laurifolia*) exist throughout the crop area and contain Virginia creeper (*Parthenocissus quinquefolia*), greenbriar (*Smilax* spp.), yellow jessamine (*Gelsemium sempervirens*), muscadine (*Vitis rotundifolia*), and various grasses and weeds.

Upland Hardwood Forests (FLUCFCS 420)

A small portion in the northeast section of the property, along with much of the boundary around the row crops, is most consistent with the Upland Hardwood Forests land use. The canopy consists of live oak, laurel oak, water oak (*Quercus nigra*), black cherry (*Prunus serotina*), sugarberry (*Celtis laevigata*), sweetgum (*Liquidambar styraciflua*), red maple (*Acer rubrum*), and eastern red cedar (*Juniperus virginiana*). Because of a dense canopy, groundcover was sparse but consists of Virginia creeper, greenbriar, yellow jessamine, muscadine, and grasses and weeds along the edge of the forests similar to the adjacent row crops.

Coniferous Plantations (FLUCFCS 441)

A small portion in the southwestern corner of the property consisted of a pine plantation, which has recently been harvested. This area was dominated by slash pine (*Pinus elliottii*) and also consisted of eastern red cedar, live and laurel oaks, vines, and is also mostly void of any groundcover vegetation.

3.3 Wetland Delineation Results

No wetlands or surface waters were found within the project area (Ecological Survey Map).

3.4 Listed Species Survey Results

One listed species, the gopher tortoise, was observed during the listed species survey performed on June 7, 2022 (Ecological Survey Map). In addition, Flatwoods conducted a desktop review of possible nearby wildlife species. Flatwoods reviewed the FWC Eagle Nest Locator (2016-2017 Survey) and the Audubon Florida EagleWatch Public Nest Application (2020-2021 Survey) for any known bald eagle (*Haliaeetus leucocephalus*) nests, the 1999 FWC Wading Bird Colony Database, and the FWS Wood Stork (*Mycteria americana*) Consultation Area. No bald eagle nests are located within one mile of the site. The site is not located within any wood stork Core Foraging Areas (CFAs). No wading bird colonies are present within a mile of the site (FNAI/FWC Map).

Based on the project's available habitats and location, other listed species (animals and plants) have the potential to occur. Table 1, found following this section, describes the potentially occurring species' habitat preferences, preferred survey window (breeding season or flowering time), their likelihood of occurrence, and their federal and state listing status.

3.4.1 Southeastern American Kestrel

The southeastern American kestrel (*Falco sparverius paulus*) is listed as Threatened by the FWC and not listed by the FWS. It is a resident subspecies of the American kestrel (*Falco sparverius*) and kestrels observed in Florida during the breeding season (April-August) are assumed to be resident southeastern American kestrels. They are found in upland habitats, including sandhills, flatwoods, pastures, sand pine scrub, and prairies. As cavity nesters and sit-and-wait predators, they require suitable cavity trees and perches in their territories, as well as open ground cover to see and capture their prey. Typical prey items include insects, lizards, small rodents, and small birds. It should be noted that the field review was performed during the survey season defined as April 1 – August 31. No kestrels or kestrel cavities were observed during the survey; however, suitable nesting habitat is available, and approvals from FWC may be required if kestrels are found.

3.4.2 Gopher Tortoise

The gopher tortoise is listed as Threatened by the FWC and is a candidate for listing by the FWS. Gopher tortoises are terrestrial turtles averaging nine to 11 inches in length. They are typically found in sandhill, pine flatwoods, scrub, dry prairie, coastal dunes, and other well-drained, open habitats. Gopher tortoises dig half-moon-shaped burrows that average 15 feet long and seven feet deep.

Flatwoods located five gopher tortoise burrows during the 15 percent survey (15% Gopher Tortoise Survey Map). According to the FWC Gopher Tortoise Permitting Guidelines April 2008 (revised July 2020) calculations for a 15 percent survey indicate 33 burrows (17 tortoises) are estimated for the site. Following the site review, Flatwoods is confident that no more than 10 burrows exist onsite and that a 10 or Fewer Burrows relocation permit will be required from the FWC if ground disturbance will occur within 25 feet of tortoise the burrow during construction activities. All of the burrows are located exist along the edge of row crop/forest boundaries. A 100 percent gopher tortoise survey will be required before relocation activities take place. If more than 10 burrows are found during the 100 percent survey, a Conservation Permit from the FWC will be required. No approval from the FWS regarding gopher tortoises is required.

3.4.3 Eastern Indigo Snake

The eastern indigo snake (*Drymarchon corais couperi*) is listed as Threatened by the FWC and the FWS. The indigo snake is a large, black, non-venomous snake. They are thick-bodied and muscular, with a glossy black body that in the sunlight appears iridescent blue. The chin and throat are reddish or white, and this color may extend down the body ventrally. The belly is cloudy orange to blue-gray. They are found within scrub, sandhill, and scrubby flatwoods habitats where they occur in or near gopher tortoise burrows. Flatwoods personnel did not observe any eastern indigo snakes during the survey. There is a Programmatic Effect Determination Key for the FWS. The FWS routinely concurs with a not likely to adversely affect determination for individual project effects to the eastern indigo snake when assurances are given that the Standard Protection

Measures for the Eastern Indigo Snake (FWS 2004) will be used during project site preparation and project construction.

3.4.4 Florida Pine Snake

The Florida pine snake (*Pituophis melanoleucus mugitus*) is listed as Threatened by the FWC and not listed by the FWS. The Florida pine snake is a large, stocky, tan or rusty colored snake with an indistinct pattern of large blotches on a lighter background. They have a muscular body, with keeled scales with a relatively small head, somewhat pointed snout, and four prefrontal scales. These snakes may hiss loudly and vibrate their tail when encountered. They are found in sandhill and former sandhill, including old fields and pastures, but also sand pine scrub and scrubby flatwoods with open canopies and dry sandy soils. They often coexist with pocket gophers and gopher tortoises. No Florida pine snakes were observed. No approvals from FWC are anticipated, and as a commensal to the gopher tortoise, any pine snakes found during potential future relocation efforts would be handled according to the relocation permit.

3.4.5 Listed Plants

No listed plants were observed by Flatwoods personnel during the surveys. Because the project area lacks the preferred habitat types, none of the listed plants are likely to occur.

Table 1 Protected Plants and Animals Potentially Occurring on the Fletcher Trace Subdivision Project in Alachua County, Florida

Species	Habitat of Occurrence	Preferred Survey Window[1]	Likelihood of Occurrence	Status[2]	
				Federal[3]	State[4]
BIRDS					
Antigone canadensis pratensis Florida sandhill crane	Open wetland habitats surrounded by shrubs or trees. Commonly found foraging in irrigated croplands, pastures, grasslands, or wetlands.	S – Year round B – January-June	Low: Little suitable habitat present	---	T
Aphelocoma coerulescens Florida scrub-jay	Inhabits fire dominated, low-growing, oak scrub habitat found on well-drained sandy soils. May persist in areas with sparser oaks or scrub areas that are overgrown.	S – March-October B – March-July	Low: Lack of suitable habitat present	T	FT
Athene cunicularia floridana Florida burrowing owl	Open prairies with little understory vegetation, including pastures, agriculture fields, and vacant lots.	S – Year round B – February-July	Low: Lack of suitable habitat present	---	T
Egretta caerulea Little blue heron	Shallow freshwater, brackish water, and saltwater habitats.	S - Year round B - March-July	Low: Lack of suitable habitat present	---	T
Egretta tricolor Tricolored heron	Forages in a variety of permanently and seasonally flooded wetlands, ditches, edges of ponds, and lakes. Inland nesting colonies typically found in Carolina willow dominated wetlands.	S - Year round B - March-July	Low: Lack of suitable habitat present	---	T
Falco sparverius paulus Southeastern American kestrel	Found in open pine habitats, woodland edges, dry prairies, pastures, and roadsides.	S – April-August B – April-August	Moderate: Suitable habitat present	---	T
Haliaeetus leucocephalus Bald eagle	Areas close to the coast, bays, rivers, lakes, or other bodies of water. Typically nests in live mature pines and cypress trees.	S – Year round B – October-May	Low: Lack of suitable habitat present	---[5]	---[5]
Mycteria americana Wood stork	Forages in shallow water in freshwater marshes, swamps, lagoons, ponds, tidal creeks, flooded pastures, and ditches. Nests in colonies in cypress swamps.	S – Year round B – March-August	Low: Lack of suitable habitat present	T	FT

Species	Habitat of Occurrence	Preferred Survey Window[1]	Likelihood of Occurrence	Status[2]	
				Federal[3]	State[4]
REPTILES					
Drymarchon corais couperi Eastern indigo snake	Broad range of habitats from scrub and sandhill to wet prairies, forested wetlands, and mangrove swamps. Often seeks refuge in gopher tortoise burrows in sandy uplands, but also forages in mesic and hydric habitats.	S – Year round B – November-April	Moderate: Some suitable habitat present	T	FT
Gopherus polyphemus Gopher tortoise	Found in dry upland habitats, including sandhills, scrub, xeric oak hammock, and dry prairie flatwoods; also, commonly uses disturbed habitats such as pastures, old fields, abandoned citrus groves, and road shoulders.	S – Year round B – March-October	High: Gopher tortoise burrows observed	---	T
Pituophis melanoleucus mugitus Florida pine snake	Found in sandhill and former sandhill, including old fields and pastures, but also sand pine scrub and scrubby flatwoods with open canopies and dry sandy soils. Often coexists with pocket gophers and gopher tortoises.	S - Year round B - April-February	Moderate: Some suitable habitat present	---	T
PLANTS					
Pecluma plumula Plume polypody	Wet hammocks and swamps; epiphytic on live oaks, occasionally on rocks or terrestrial.	S – Spring-Fall	Low: Some suitable habitat present		E

1 - S = Survey Window, B = Breeding Season, F = Flowering Season
2 - E = Endangered, T = Threatened, FE = Federally Endangered, FT = Federally Threatened, S/A = Similarity of Appearance
3 - U.S. Fish and Wildlife Service
4 - Florida Fish and Wildlife Conservation Commission or Florida Department of Agriculture and Consumer Services
5 - Protected under the Bald and Golden Eagle Protection Act
Table Source: Florida Wildlife Conservation Guide, Florida's Breeding Bird Atlas, FWS iPAC, and Florida Natural Areas Inventory

4.0 PROTECTED HABITATS AND WATERS

The site was evaluated for the potential occurrence of Critical Habitat as defined by the Endangered Species Act of 1973, as amended. The FWS regulates the adverse modification of the biological or physical constituent elements essential to the conservation of the listed species within Critical Habitat. There are no lands designated as Critical Habitat within or adjacent to the site. The site was evaluated for the potential occurrence of Protected Waters and Protected Lands. There are no Protected Waters or Protected Lands within or immediately adjacent to the site.

5.0 FDEP SUBSIDENCE INCIDENT REPORTS

Flatwoods searched the FDEP Map Direct Subsidence Incident Reports database. The subsidence mapping system identifies reported subsidence events and the Florida sinkhole type of the selected area. No subsidence incident reports have been recorded within or adjacent to the project site according to the FDEP mapping system (Subsidence Map). According to FDEP, the majority of the project site in is Area III, described as consisting "mainly of cohesive clayey sediments of low permeability. Sinkholes are most numerous, of varying size and develop abruptly. Cover-collapse sinkholes dominate". The southwestern corner of the project site is Area I which is described as "sinkholes are few, generally shallow and broad and develop gradually. Solution sinkholes dominate".

6.0 PERMITTING DISCUSSION

State/Federal Permitting

An individual Environmental Resource Permit (ERP) through the SRWMD may be required to develop the site. No wetlands or surface waters occur onsite; therefore, Section 404 permitting is not required.

Although five gopher tortoise burrows were observed during the 15 percent survey, Flatwoods is confident that no more than 10 burrows exist onsite due to burrows only being observed on the edges of the property and not in the row crop areas. A relocation permit will be required from the FWC if ground disturbance will occur within 25 feet of tortoise the burrow during construction activities. If more than 10 burrows are observed during the 100 percent survey, a Conservation Permit from the FWC will be required. No approval from the FWS regarding gopher tortoises is required. No other listed species were observed, and none are likely to occur.

Local Permitting

Section 406.04 of Alachua County's Land Development Regulations requires a Resource Assessment as supporting documentation for various applications. This report is sufficient to support the application for Alachua County.

Subject: Summary Report of a Geotechnical Site Exploration – Revision 2
Savannah Station, Phase 3
Alachua, Alachua County, Florida
GSE Project No. 13739A

GSE Engineering & Consulting, Inc. (GSE) is pleased to submit this geotechnical site exploration report for the above referenced project.

Presented herein are the findings and conclusions of our exploration, including the geotechnical parameters and recommendations to assist with clubhouse foundation, pavement, and stormwater management designs. This revision includes a karst evaluation of the subject site.

GSE appreciates this opportunity to have assisted you on this project. If you have any questions or comments concerning this report, please contact us.

Sincerely,

GSE Engineering & Consulting, Inc.

1.0 INTRODUCTION

1.1 General

GSE Engineering & Consulting, Inc. (GSE) has completed this geotechnical exploration for the proposed residential development located in Alachua, Alachua County, Florida. This exploration was performed in accordance with GSE Proposal No. 2021-380 dated July 12, 2021. You authorized our services on July 14, 2021.

1.2 Project Description

This project will consist of a residential development. The project will include a clubhouse, roadways, and stormwater management facilities. The site is located on the south side of C.R. 235 at the C.R. 235A intersection in Alachua, Alachua County, Florida (Figure 1).

Mr. Ryan Thompson with CHW Professional Consultants, Inc. (CHW) provided information about the project and site plans illustrating the locations of the proposed improvements. The project will consist of roadways, stormwater management facilities, and a clubhouse. We anticipate the clubhouse will be either concrete masonry unit or wood frame construction. Structural loads have not been provided but are expected to be on the order of 1 to 2 kips per foot for load bearing walls, and less than 50 kips for columns. The finished floor of the structure is anticipated to be constructed near the existing site grades.

Four stormwater management facilities are proposed that range in size from about 2.7 to 8.6 acres. Approximately 12,000 feet of roadways are proposed.

A recent aerial photograph of the site was obtained and reviewed. The preliminary site plan and aerial photograph were used in preparation of this exploration and report.

1.3 Purpose

The purpose of this geotechnical exploration was to determine the general subsurface conditions, evaluate these conditions with respect to the proposed construction, and prepare geotechnical parameters and recommendations to assist with clubhouse foundation, stormwater management, and pavement designs.

2.0 FIELD AND LABORATORY TESTS

2.1 General Description

The procedures used for field sampling and testing are in general accordance with industry standards of care and established geotechnical engineering practices for this geographic region. This exploration consisted of performing two (2) Standard Penetration Test (SPT) borings to a depth of 20 feet below land surface (bls) within the proposed clubhouse, two (2) auger borings to a depth of 10 feet bls within the proposed clubhouse, twenty-three (23) auger borings to a depth of 5 feet bls along the roadway alignments, twenty-four (24) auger borings to a depth of 15 feet within the proposed stormwater management facilities, and six (6) auger borings to a depth of 30 feet bls within the proposed stormwater management facilities.

The soil borings were performed at the approximate locations as shown on Figure 2. The borings were located at the site using the provided site plan, Global Positioning System (GPS) coordinates, and obvious site features as reference. The boring locations should be considered approximate. The soil borings were performed from August 23 to August 26, 2021.

2.2 Auger Borings

The auger borings were performed in accordance with ASTM D1452. The borings were performed with flight auger equipment that was rotated into the ground in a manner that reduces soil disturbance. After penetrating to the required depth, the auger was retracted, and the soils collected on the auger flights were field classified and placed in sealed containers. Representative samples of each stratum were retained from the auger boring. Results from the auger borings are provided in Section 5.1.

2.3 Standard Penetration Test Borings

The soil borings were performed with a drill rig employing flight auger drilling techniques and Standard Penetration Testing (SPT) in accordance with ASTM D1586. The SPTs were performed continuously to 10 feet and at 5-foot intervals thereafter. Soil samples were obtained at the depths where the SPTs were performed. The soil samples were classified in the field, placed in sealed containers, and returned to our laboratory for further evaluation.

After drilling to the sampling depth, the standard two-inch O.D. split-barrel sampler was seated by driving it 6 inches into the undisturbed soil. The sampler was then driven an additional 12 inches by blows of a 140-pound hammer falling 30 inches. The number of blows required to produce the next 12 inches of penetration were recorded as the penetration resistance (N-value). These values and the complete SPT boring logs are provided in Section 5.2.

Upon completion of the sampling, the boreholes were abandoned in accordance with Water Management District guidelines.

2.4 Soil Laboratory Tests

The soil samples recovered from the soil borings were returned to our laboratory and examined to confirm the field descriptions. Representative samples were then selected for laboratory testing. The laboratory tests consisted of twenty (20) percent soil fines passing the No. 200 sieve determinations, twenty (20) natural moisture content determinations, two (2) Atterberg Limits tests, twelve (12) constant head hydraulic conductivity tests, and three (3) Limerock Bearing Ratio (LBR). These tests were performed in order to aid in classifying the soils and to further evaluate their engineering properties. The laboratory tests are provided in Section 5.3.

3.0 FINDINGS

3.1 Surface Conditions

Ms. Cassandra R. Lindeman, E.I. with GSE initially visited the site on July 22, 2021, to observe the site conditions. Ms. Lindeman returned to the site on August 13, 2021, with Mr. Jason Kite with Jason Kite, LLC to clear lanes through the trees in the southwest corner of the site to allow the drilling equipment access to the boring locations. Representatives from GSE returned to the site on August 16, 2021, to collect soil samples for permeability testing.

The majority of the site is currently an existing crop field. The southwestern corner of the site contains planted pines, trees, and heavy brush. The entire site is outlined by trees. The site is bordered by CR 235 running southwest to northeast and by NW 110th Avenue on the south side.

The topography at the site is gently sloping. Regional topography can also be characterized as gently to moderately sloping. The Alachua County Growth Management website indicates the ground surface elevations at the site are near 86 to 102 feet.

The Alachua County Soil Survey maps a closed depression on the southern portion of the site.

3.2 Subsurface Conditions

The locations of the auger and SPT borings are provided on Figure 2. Complete logs for the borings are provided in Sections 5.1 and 5.2. Descriptions for the soils encountered are accompanied by the Unified Soil Classification System symbol (SM, SP-SM, etc.) and are based on visual examination of the recovered soil samples and the laboratory tests performed. Stratification boundaries between the soil types should be considered approximate, as the actual transition between soil types may be gradual.

The auger and SPT borings generally encountered relatively consistent soil conditions across the site.

The auger borings located in the areas of the proposed roadways typically encountered poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC) to the explored depth of 5 feet bls. Boring R-16 encountered very clayey sand (SC/CL) at 3 feet bls to the explored depth of 5 feet bls. Borings R-17, R-20, and R-23 encountered clayey sand (SC) at depths of 2, 2.5, and 4 feet bls, respectively, to the explored depth of 5 feet bls.

The auger borings located within the proposed stormwater management facilities initially encountered poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC). The sandy soils were generally underlain by clayey and very clayey sands (SC, SC/CL) with some interbedded layers of clay-rich soils consisting of sandy clay, clay with sand, and clay (CL/CH) to the explored depths of 15 and 30 feet bls. Borings P-8, P-24, and P-28 encountered limestone at 28 and 28.5 feet bls to the explored depth of 30 feet bls.

The auger and SPT borings located within the area of the proposed clubhouse encountered similar conditions to the rest of the site. Boring A-1 encountered sand with silt (SP-SM) to the explored depth of 10 feet bls. Boring A-2 encountered 2 feet of sand with silt (SP-SM) underlain by very clayey sand (SC/CL) to the explored depth of 10 feet bls. Boring B-1 initially penetrated 7 feet of sand with silt (SP-SM) underlain by 1.5 feet of very clayey sand (SC/CL), 5 feet of poorly graded sand (SP), and 6.5 feet of clayey and very clayey sands (SC, SC/CL) to the explored depth of 20 feet bls. Boring B-2 initially penetrated 7 feet of sand with silt (SP-SM) and poorly graded sand (SP) underlain by 6.5 feet of clayey sand (SC) and 6.5 feet of sand with clay (SP-SC) to the explored depth of 20 feet bls.

The sandy soils consisting of poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC) are generally in a very loose to medium dense condition with N-values ranging from 2 to 26 blows per foot. The clayey and very clayey sands (SC, SC/CL) encountered are generally in a loose to medium dense condition with N-values ranging from 5 to 21 blows per foot.

The groundwater table was not encountered in the auger and SPT borings at the time of our investigation.

3.3 Review of Published Data

The majority of the site is mapped as five soil series by the Soil Conservation Service (SCS) Soil Survey for Alachua County[1]. The following soil descriptions are from the Soil Survey.

Arredondo fine sand, 0 to 5 percent slopes – This nearly level to gently sloping, well-drained soil is in both small and large areas of uplands. Slopes are smooth to convex. The areas are irregular in shape and range from about 10 to 160 acres in size.

Typically, the surface layer is dark grayish brown fine sand about 8 inches thick. The subsurface layer is fine sand to a depth of 49 inches. The upper 23 inches is yellowish brown, and the lower 18 inches is brownish yellow. The subsoil extends to a depth of 86 inches or more. The upper 5 inches is yellowish brown loamy sand; the next 10 inches is yellowish brown sandy clay loam, and the lower 22 inches is dark yellowish brown sandy clay and sandy clay loam.

Included with this soil in mapping are small depressional areas of soils that have a very dark gray or black surface layer 8 to 24 inches thick. This layer overlies gray sandy material. These areas are shown by wet spot symbols. Also included are small areas of Fort Meade, Gainesville, Kendrick, and Millhopper soils. A few areas of this soil include Arredondo soils that have 5 to 8 percent slopes. Some areas of this soil in the western part of the county have small spots of strongly acid to medium acid soil material 40 to 70 inches deep to calcareous limestone. Limestone boulders, fragments of limestone, and sinkholes are in some areas of this soil, mainly in the limestone plain sections of the western part of the county. Most of these boulders are siliceous. The sinkholes and the boulders are shown by appropriate map symbols. Total included areas are about 15 percent.

In this Arredondo soil, the available water capacity is low in the sandy surface and subsurface layers and low to medium in the loamy subsoil. Permeability is rapid in the surface and subsurface layers and moderately slow to moderate in the loamy subsoil. Natural fertility is low in the sandy surface and subsurface layers and medium in the finer textured subsoil. Organic matter content is low. The water table in this soil is at a depth of more than 72 inches. Surface runoff is slow.

[1] Soil Survey of Alachua County, Florida. Soil Conservation Service, U.S. Department of Agriculture.

Millhopper sand, 0 to 5 percent soils – This nearly level to gently sloping, moderately well drained soil is in small and large irregularly shaped areas on uplands and on slightly rolling knolls in the broad flatwoods. Slopes are mostly nearly smooth or convex. The areas are variable in size. They range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 9 inches thick. The subsurface layer is sand or fine sand about 49 inches thick. The upper 17 inches is yellowish brown, the next 22 inches is light yellowish brown, and the lower 10 inches is very pale brown. The subsoil extends to a depth of 89 inches. The upper 6 inches is yellowish brown loamy sand that has grayish and brownish mottles; the next 22 inches is light gray, mottled sandy clay loam; and the lower 3 inches is light gray, mottled sandy loam.

Included with this soil in mapping are small areas of Arredondo, Bonneau, Fort Meade, Gainesville, Kanapaha, Lochloosa, and Sparr soils. Siliceous limestone boulders and small sinks are within some delineations. Small areas of Millhopper soils that have 5 to 8 percent slopes are also included. About 25 acres mapped as this Millhopper soil along the Santa Fe River is occasionally flooded. Total included areas are about 20 percent or less.

This Millhopper soil has a water table that is at a depth of 40 to 60 inches for 1 to 4 months and at a depth of 60 to 72 inches for 2 to 4 months during most years. The available water capacity is low in the surface and subsurface layers and is low to medium in the subsoil. Permeability is rapid in the surface and subsurface layers, moderately rapid in the upper 6 inches of the subsoil, and slow to moderately slow below this depth. Natural fertility is low. Organic matter content is low to moderately low.

Gainesville sand, 0 to 5 percent slopes – This nearly level to gently sloping, well-drained soil has sandy texture to a depth of 80 inches or more. It is in both small and large, irregularly shaped areas on the gently rolling uplands. Most areas range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 7 inches thick. The underlying layer extends to a depth of 82 inches or more. The upper 22 inches is yellowish brown sand, and the lower 53 inches is strong brown loamy sand.

Included with this soil in mapping are small areas of Arredondo, Fort Meade, Kendrick, and Lake soils. A few small areas of Gainesville soils that have 5 to 8 percent slopes are included. Total included areas are less than 15 percent.

In this Gainesville soil, the available water capacity is low, and the permeability is rapid. Organic matter content ranges from low to moderately low, and natural fertility is low. Surface runoff is slow. The water table is more than 72 inches below the surface.

Arredondo fine sand, 5 to 8 percent slopes – This is near level to sloping, well-drained soil forms in thick beds of sandy and loamy marine materials. These soils are in broad rolling areas of the upland. Slopes range from 0 to 8 percent. The water table is more than 72 inches below the surface. These soils are loamy siliceous, hyperthermic Grossarenic Paleudults.

Arredondo soils are geographically associated with Apopka, Bonneau, Candler, Fort Meade, Gainesville, Jonesville, Kanapaha, Kendrick, Lake Millhopper, and Norfolk soils. Apopka soils have less than 5 percent silt and clay in the A2 horizon, and many of the sand grains are uncoated. Bonneau soils are moderately well drained and have an A horizon 20 to 40 inches thick. Candler soils are sandy to a depth of 80 inches or more and have less than 5 percent silt and clay in their 10- to 40-inch control section.

Fort Meade and Gainesville soils are sandy to a depth of more than 80 inches. They have 10 to 15 percent silt and clay in their 10- to 40-inch control section. Fort Meade soils also have a thick, dark colored A1 horizon. Jonesville soils have underlying limestone at a depth of less than 60 inches. Lake soils are sandy to 80 inches or more. Kanapaha soils are poorly drained, and Millhopper soils are moderately well drained. Norfolk soils have an A horizon less than 20 inches thick.

Lochloosa fine sand, 5 to 8 percent slopes – This is near level to sloping, somewhat poorly drained soil that forms in thick beds of loamy marine deposits. These soils are in broad areas of the gently rolling uplands and in slightly convex areas of the flatwoods. Slopes range from 0 to 8 percent. The water table is about 30 to 40 inches below the surface for about 1 to 4 months during most years. It rises to 15 to 30 inches for about 1 to 4 weeks during most years. During most of the remained of the year it is at a depth of more than 40 inches. These soils are loamy, siliceous, hyperthermic Aquic Arenic Paleudults.

Lochloosa soils are geographically associated with Blichton, Bivans, Boardman, Bonneau, Kanapaha, Kendrick, Micanopy, Millhopper, Sparr, and Wacahoota soils. Blichton, Bivans, Boardman, Kanapaha, and Wacahoota soils are all poorly drained. Blichton soils are more than 5 percent plinthite. In addition, the Bivans soils have a clayey Btg horizon within 20 inches of the surface and contain more than 5 percent nodules and fragments of limestone. Kanapaha soils have an A horizon 40 to 80 inches thick. Wacahoota soils are more than 5 percent nodules and fragments of limestone. Kendrick soils are well drained. Micanopy soils have a clayey Bt horizon within 20 inches of the surface. Millhopper soils are moderately well drained and have an A horizon 40 to 80 inches thick. Sparr soils have a sandy A horizon 40 to 80 inches thick.

3.4 Laboratory Soil Analysis

Selected soil samples recovered from the soil borings were analyzed for the percent soil fines passing the No. 200 sieve, natural moisture content, Atterberg Limits, hydraulic conductivity, and Limerock Bearing Ratio (LBR) tests. Samples selected for laboratory testing were collected at depths ranging from 0.5 to 10 feet bls. These tests were performed to confirm visual soil classification and evaluate their engineering properties. The complete laboratory report is provided in Section 5.3.

The laboratory tests indicate the tested soils consist of poorly graded sand (SP), sand with silt (SP-SM), clayey sand (SC), and very clayey sand (SC/CL). The tested poorly graded sand (SP) contains approximately 3.5 to 4.9 percent soil fines passing the No. 200 sieve with natural moisture contents of about 5.2 to 5.3 percent. The tested sand with silt (SP-SM) contains approximately 5 to 9.5 percent soil fines passing the No. 200 sieve with natural moisture contents of about 5.8 to 8.3 percent. The tested clayey sand (SC) contains approximately 12 to 29 percent soil fines passing the No. 200 sieve with natural moisture contents of about 11 to 18 percent. The tested very clayey sand (SC/CL) contains approximately 30 to 46 percent soil fines passing the No. 200 sieve with natural moisture contents of about 18 to 24 percent.

Atterberg Limits tests indicate the tested very clayey sands (SC/CL) have Liquid Limit (LL) values of 27 and 45, Plastic Limit (PL) values of 16 and 19, and Plasticity Index (PI) values of 11 and 26. These values correspond to a material with low potential (LL < 50 and PI < 25) for expansive behavior[2].

The constant head hydraulic conductivity test results indicate the near-surface poorly graded sand (SP) has a hydraulic conductivity value of 12 feet per day. The tested sand with silt (SP-SM) has hydraulic conductivity values of 4.7 to 22 feet per day.

[2] U.S. Department of the Army USA, 1983, Foundations in Expansive Soils, TM 5-818-7, p. 4-1.

The tested clayey sands (SC) have hydraulic conductivity values of 0.6 to 11 feet per day. The tested very clayey sand (SC/CL) has a hydraulic conductivity value of 1.7 feet per day.

The Modified Proctor maximum dry density tests indicate the near surface grab samples have maximum dry densities ranging from 113.3 to 116.8 pounds per cubic foot and optimum moisture contents of 8.5 to 10.8 percent. The LBR tests indicate the soils have LBR values ranging from 34 to 67.

4.0 EVALUATION AND RECOMMENDATIONS

4.1 General

The following recommendations are made based upon our understanding of the proposed construction, a review of the attached soil borings and laboratory test data, and experience with similar projects and subsurface conditions. If plans or the location of proposed construction changes from those discussed previously, GSE requests the opportunity to review and possibly amend our recommendations with respect to those changes.

The final design of a foundation system is dependent upon adequate integration of geotechnical and structural engineering considerations. Consequently, GSE must review the final foundation design in order to evaluate the effectiveness and applicability of our initial analyses, and to determine if additional recommendations may be warranted. Without such a review, the recommendations presented herein could be misinterpreted or misapplied resulting in potentially unacceptable performance of the foundation system.

The performance of site improvements may be sensitive to their post-construction relationship to site groundwater levels, seepage zones, or soil/rock characteristics exposed at final site grades. GSE recommends that use of boring information for final design of all site improvements be predicated on proper horizontal and vertical control of borings.

In this section of the report, we present our geotechnical parameters and recommendations to assist with building foundation, stormwater management, and pavement designs as well as our general site preparation guidelines.

4.2 Groundwater

The groundwater table was not encountered in the borings at the time of our exploration. The lack of apparent groundwater table in the borings suggest the site is perforated; however, you should expect water to perch on top of the very clayey sands and clays after periods of heavy and seasonal rainfall. Estimates for the temporarily perched groundwater tables are shown on the individual boring logs.

4.3 Building Foundations

The borings located within the proposed building footprint generally encountered poorly graded sand and sand with silt underlain by interbedded layers of clayey and very clayey sand and sandy clay to the explored depths of 10 and 20 feet bls.

Based upon the soil conditions encountered and our limited understanding of the structural loads and site grading, we recommend the building be supported by conventional, shallow strip and/or spread foundations. We recommend the shallow foundations be designed for a maximum allowable gross bearing pressure of 2,000 psf. The gross bearing pressure is defined as the soil contact pressure that can be imposed from the maximum structural loads, weight of the concrete foundations, and weight of the soil above the foundations. The foundations should be designed based upon the maximum load that could be imposed by all loading conditions.

The foundations should be embedded a minimum of 18 inches below the lowest adjacent grade. Interior foundations or thickened sections should be embedded a minimum of 12 inches. The foundations should have minimum widths of 18 inches for strip footings, and 24 inches for columns, even though the maximum soil bearing pressure may not be fully developed.

Due to the mostly sandy nature of the majority of the near-surface soils, we expect settlement to be mostly elastic in nature. The majority of the settlement will occur on application of the loads, during and immediately following construction. Using the recommended maximum bearing pressure, the assumed maximum structural loads, and the field and laboratory test data which we have correlated into the strength and compressibility characteristics of the subsurface soils, we estimate the total settlements of the structure to be 1 inch or less, with approximately half of it occurring upon load application (during construction).

Differential settlement results from differences in applied bearing pressures and the variations in the compressibility characteristics of the subsurface soils. For the building pad prepared as recommended, we anticipate differential settlement of less than 1/2 inch.

Post-construction settlement of the structures will be influenced by several interrelated factors, such as (1) subsurface stratification and strength/compressibility characteristics of the bearing soils; (2) footing size, bearing level, applied loads, and resulting bearing pressures beneath the foundation; (3) site preparation and earthwork construction techniques used by the contractor, and (4) external factors, including but not limited to vibration from off-site sources and groundwater fluctuations beyond those normally anticipated for the naturally-occurring site and soil conditions which are present.

Our settlement estimates for the structure are based upon our limited understanding of the structural loads and site grading and the use of successful adherence to the site preparation recommendations presented later in this report. Any deviation from our project understanding and/or our site preparation recommendations could result in an increase in the estimated post-construction settlement of the structure.

4.4 Flexible Pavement

Overall soil conditions encountered by our borings at this site are suitable for supporting conventional limerock base and asphalt wearing surface pavements. We have not been provided the anticipated traffic loading conditions; therefore, the following pavement component recommendations should be used only as guidelines. The below recommendations are intended to be minimums. Increasing base course and asphalt thicknesses would increase the design life of the pavement.

We recommend a minimum separation of 24 inches be present between the bottom of the base course and the top of the clay-rich soils containing greater than about 25 percent soil fines. Review of the boring logs suggests this separation will likely be present along the majority of the alignment. Boring R-20 did encounter very clayey sand (SC/CL) at a depth of 2.5 feet bls and clay-rich soils approached within 24 inches of grade at boring location R-17. Clay-rich soils were encountered at borings R-16, R-20, and R-23 at depths of 3 feet bls, 2.5 feet bls, and 4 feet bls, respectively. A roadway grading plan is not available at this time. The presence of shallow clay-rich soils is expected to be sporadic and not easily predicted without a grading plan.

In areas where the minimum 24-inch separation is not able to be achieved through grading design, we recommend these soils be undercut. The undercut should extend a minimum of 24 inches beneath the bottom of the base course. The undercut should extend laterally until the clay-rich soils are no longer encountered and free-draining sandy soils have been penetrated. The undercut should be backfilled with either on-site or imported sandy free-draining soils containing less than 10 percent soil fines. The backfill should be placed in maximum 24-inch loose lifts that are compacted to a minimum 95 percent of the Modified Proctor maximum dry density (ASTM D1557). Underdrains should be considered where clay-rich soils are undercut.

4.4.1 Stabilized Subgrade

The stabilized subgrade should have a minimum Limerock Bearing Ratio (LBR) of 40, with a minimum thickness of 12 inches. The stabilized subgrade can be imported material or a mixture of imported and on-site material. If a mix is proposed, a mix design should be performed to determine the optimum mix proportions. The stabilized subgrade should be compacted to a minimum of 98 percent of the Modified Proctor maximum dry density (ASTM D1557) for soils with less than 15 percent fines content. Soils with 15 percent or greater fines content should be compacted to 100 percent of the Standard Proctor maximum dry density (ASTM D698).

4.4.2 Base Course

The base course should consist of crushed limerock having a LBR of at least 100. Limerock should be obtained from a FDOT approved source and should meet FDOT gradation requirements. The base course thickness should be a minimum of 6 inches in automobile parking areas and 8 inches in driveways. The base course should be compacted to at least 98 percent of the Modified Proctor maximum dry density (ASTM D1557).

The constructability of differing base course thicknesses may be difficult and having a uniform 8-inch-thick base course may be more practical.

4.4.3 Wearing Surface

The asphalt-wearing surface should consist of an FDOT Type SP Hot Mix Asphalt mixture. For automobile parking areas, the thickness should be a minimum of 1.5 inches. For driveway areas, the thickness should be a minimum of 2 inches. The asphalt-wearing surface should consist of an SP-12.5 mix. The asphalt should be compacted to at least 95 percent of the mix design density.

The constructability of differing asphalt thicknesses may be difficult and having a uniform 2-inch-thick asphalt wearing surface may be more practical.

4.5 Site Preparation

The soils at this site should be suitable for supporting the proposed construction using normal, good practice site preparation procedures. The following recommendations are our general guidelines for site preparation.

4.5.1 Stripping

Strip the construction limits and 10 feet beyond the perimeter of all grass, roots, topsoil, and other deleterious materials. You should expect to strip to depths of 12 or more inches. Deeper stripping will likely be necessary due to major root systems present at the site.

4.5.2 Dewatering

Temporary dewatering is not expected to be necessary for this project. However, if needed, we anticipate dewatering can be accomplished with sumps placed near the construction area, or with underdrains connected to a vacuum pump.

In any case, the site should always be graded to promote runoff and limit the amount of ponding. Localized ponding of stormwater is expected without proper grading during construction and could render previously acceptable surfaces unacceptable.

4.5.3 Proof-Rolling

Proof-roll the subgrade with heavy rubber-tired equipment, such as a loaded front-end loader or dump truck, to identify any loose or soft zones not found by the soil borings. The proof-rolling should be monitored by a geotechnical engineer or qualified technician. Undercut or otherwise treat these zones as recommended by the geotechnical engineer in this report.

4.5.4 Proof Compaction

Compact the subgrade to a density of at least 95 percent of the Modified Proctor maximum dry density (ASTM D1557). The specified compaction should be obtained to a depth of 1 foot below the foundation bottoms and the existing grade prior to placing fill. Vibratory roller equipment should not be used within approximately 100 feet of existing structures. Lighter "walk-behind" compaction equipment may be used to achieve the degree of compaction.

Should clayey sand be encountered at the bearing surface, this material should be probed and visually confirmed to be unyielding in the upper 12 inches in lieu of density testing. If the foundation excavations penetrate the clayey sand, the excavation should be performed in a manner that reduces soil disturbance. Clayey sand soils (with fines content in excess of 15 percent) that are removed and replaced or appreciably disturbed need to be re-compacted to 98 percent of the Standard Proctor maximum dry density (ASTM D698).

4.5.5 Fill Placement

Imported fill placed to raise the site grades should consist of clean sand having less than 10 percent passing the No. 200 sieve. On-site soils meeting the requirements of Section 4.9 may also be used as structural fill. The fill should be placed in maximum 12-inch loose lifts that are compacted to at least 95 percent of the Modified Proctor maximum dry density (ASTM D1557). If lighter "walk-behind" compaction equipment is used, this may require lifts of 4 inches or less to achieve the required degree of compaction.

4.6 Quality Control and Construction Materials Testing

It should be noted that the geotechnical engineering design does not end with the advertisement of the construction documents. As the geotechnical engineer of record, GSE is the most qualified to perform the construction materials testing that will be required for this project. The benefits of having the geotechnical engineer of record also perform the construction materials testing are numerous. If GSE continues to be involved with the project through construction, we will be able to constantly re-evaluate and possibly alter our geotechnical recommendations in a timely and cost-effective manner once final design and construction techniques are developed. This often results in cost savings for the project.

We recommend performing compaction testing beneath the concrete floor slab and the building foundations. We recommend one test be performed every 50 linear feet of continuous footing and every other column footing, per foot depth of fill or native material. We recommend a compaction test be performed for each 2,500 square feet of floor area or 10,000 square feet of pavement area per foot of fill or native material, or a minimum of three tests each, whichever is greater. Test all footing excavations to a depth of 12 inches at the frequencies stated above.

4.7 Stormwater Management

The soil conditions at the stormwater management facility are relatively consistent; initially penetrating poorly graded sand and sand with silt underlain by clayey to very clayey sand with interbedded layers of sandy clay, clay with sand, and clay. Limestone was encountered in borings P-8, P-24, and P-28 at depths of 28 and 28.5 feet bls.

The water table was not encountered in the auger borings at the time of our exploration. We anticipate the seasonal high groundwater table to be temporarily perched on the very clayey sands and sandy clays.

The laboratory permeability tests indicate the tested layers of poorly graded sand, sand with silt, clayey sand, and very clayey sand have hydraulic conductivity values of 0.6 to 22 feet per day. The underlying very clayey sand, sandy clay, clay with sand, and clay are expected to be confining soils.

Based upon our findings and test results, our recommended soil parameters for the stormwater management design in the explored areas are presented below. The recommended parameters consider the results of the permeability tests, wash 200 determinations, and our experience with these types of soils. The parameters below do not consider a factor of safety.

Proposed Stormwater Management Facility (P-22 to P-29)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 2.5 feet per day.
3. Horizontal hydraulic conductivity equal to 4 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-18 to P-21)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 8 feet per day.
3. Horizontal hydraulic conductivity equal to 12 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

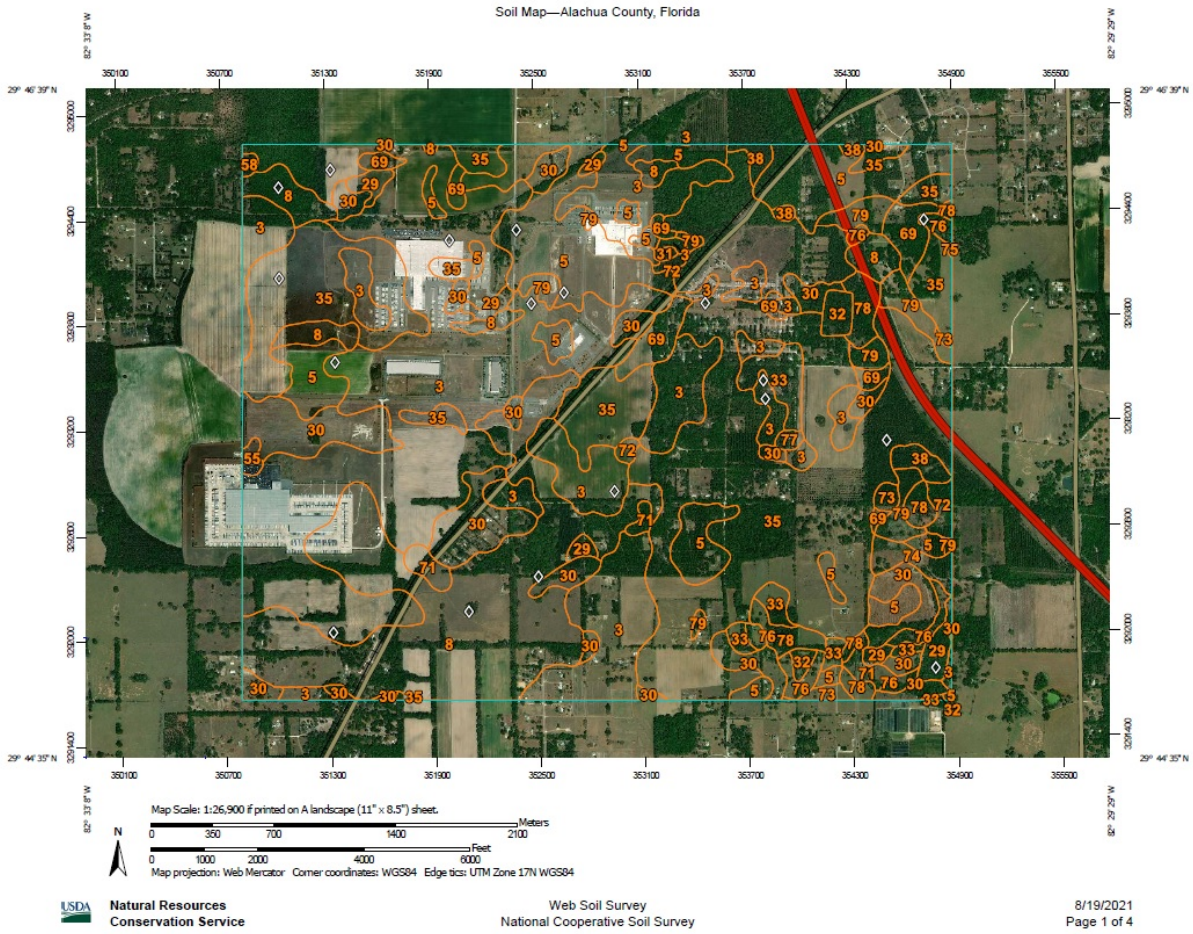
Proposed Stormwater Management Facility (P-12, P-13, A-2, B-2)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 3.5 feet per day.
3. Horizontal hydraulic conductivity equal to 5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-14, P-15)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 5 feet per day.
3. Horizontal hydraulic conductivity equal to 7.5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-1 to P-11)



1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 3.5 feet per day.
3. Horizontal hydraulic conductivity equal to 5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

In areas where clay-rich soils are present at the basin bottom, we recommend these soils be undercut a minimum of 2 feet and backfilled with the on-site sands and sands with silt (SP, SP-SM) having a maximum of 12 percent soil fines passing the No. 200 sieve. The intent of this undercutting and replacement is to provide a more uniform sand "blanket" at the basin bottom that allows the migration of water to the deeper deposits of sand. This sand blanket will also reduce the potential for clay-fines leaching out of the soils when water is present in the basin that can result in a thin layer of confining type material on the basin bottom that can reduce the effectiveness of the basin.

4.8 Karst Area Evaluation Summary

A site visit and driving tour of the immediate area surrounding the site (approximately 200-foot radius) was performed in order to confirm the absence or presence of visible potential depressional sinkhole features. In addition, readily available published information related to known and documented sinkhole features in the immediate area of the site was reviewed.

Depressional features were observed on the site. In addition, the soil survey indicates the presence of a sinkhole at the southern portion of the site. Multiple sinkholes are indicated with a diamond within a 2-mile radius of the site (See Graphic Below). In addition to the identified sinkhole, multiple closed depressions are present on the site and in the immediate vicinity. Closed depressions are not necessarily an indicator of sinkholes and could represent other landforms. However, there were no compelling indications of sinkhole activity within the depths explored by the borings.

Graphic obtained from the www.websoilsurvey.com

The FDEP Map Direct Gateway[3] website was utilized to determine if there were nearby subsidence incident reports near the subject site. One incident was noted ½ mile south of the CR 241 overpass on I-75. However, GSE knows of multiple subsidence incidents north of the site at commercial developments along CR 235A.

Historical USGS topographic maps dated 2021, 2012, 1981, 1962, and 1954 were reviewed as part of this assessment. The historical use of the site and the findings in the topographic maps indicate that the ground surface elevations at the site have remained fairly consistent at about 90 to 100 feet NGVD. The topographic maps did not encounter compelling changes in the site elevation that would warrant concern.

The karst area survey performed is considered adequate and in sufficient detail to define the hydrologic and geologic conditions at the site. One karst feature was identified on the subject site. The feature is considered a relic sinkhole and does not appear to be active.

This site is located within a highly karstic area which is prone to erosion and fissures in the limestone formations. Site development commonly changes the risk for sinkhole development in highly karstic geology. The construction of impervious surfaces (buildings and pavement) decreases sinkhole risk, as stormwater that infiltrates and erodes subsurface materials is removed.

[3] *Map Direct Gateway*. Florida Department of Environmental Protection, https://ca.dep.state.fl.us/mapdirect/

Stormwater basins commonly have an increased risk for sinkhole development, due to the concentration of stormwater in these areas. The karst geologic conditions encountered at this site are typical for this area of Alachua County, and it is our opinion the risk for sinkhole development at this site is no greater or lower than what is expected for this immediate area.

Site development should be performed in a manner that reduces the potential for sinkhole activity affecting structures. All roof runoffs should be discharged into impervious surfaces or directly into the stormwater management infiltration beneath the perimeter of the structure. The stormwater management basin should be located well away from structures because the basin will have the highest risk for sinkhole development. We wish to point out that these measures will not eliminate the risk for sinkhole activity at the site.

4.9 Fill Suitability

The soils encountered at this site within the explored depths range from sands (SP) to clays (CL/CH). A discussion of the suitability for reuse as structural fill for each soil classification according to the Unified Soil Classification System (USCS) designation is provided below.

SP, SP/SM – Sands (SP) and sand with silt (SP/SM) have less than 5 percent and 12 percent soil fines passing the No. 200 sieve, respectively, and are typically well draining soils that are suitable for reuse as structural fill. The sands with silt may require moisture conditioning (drying) to make the material more workable. These soils will require stockpiling and drying before they are reused if they are excavated from below the water table.

SM – Silty sands (SM) can have between 12 percent and 50 percent soil fines passing the No. 200 sieve. Silty sands are typically non-plastic or have low plasticity and can be reused as structural fill with precautions. Silty sands can be moisture sensitive and difficult to work and compact and can rut if the moisture content is near or above the optimum moisture content. We recommend these soils be moisture conditioned (dried) so that the moisture content during use is at or below the optimum moisture content. Aerating and exposure to the sun is typically the most effective methods of drying these soils. It may not be practical to reuse these materials during the wet season, as frequent rain showers may not allow these soils to dry to a workable moisture content. Suitable silty sands are limited to soil having less than 30 percent soil fines passing the No. 200 sieve. Silty sands with more than 30 percent soil fines are especially moisture sensitive and are not recommended for reuse as structural fill. These soils will behave more as sandy silt, and for this reason, very silty sands having more than 30 percent soil fines passing the No. 200 sieve have been assigned a dual classification of SM/ML. Silty sand soils that are excavated from below the water table are not recommended for reuse as structural fill due to the amount of time that will be required to dry these soils to a workable condition.

SC – Clayey sand (SC) soils can have between 12 percent and 50 percent soil fines passing the No. 200 sieve. Clayey sands can have a high range of plasticity, varying from a PI of 7 or greater and plotting above the A-line to highly plastic. Friable clayey sands are typically suitable for use as structural fill with precautions. Clayey sands will be moisture sensitive and difficult to work and compact and can rut during placement if the moisture content is near or above the natural moisture content. We recommend these soils be moisture conditioned (dried) so that the moisture content during use is at or below the optimum moisture content. Aerating and exposure to the sun is typically the most effective methods of drying these soils. It may not be practical to reuse these materials during the wet season, as frequent rain showers may not allow these soils to dry to a workable moisture content. Suitable clayey sands are limited to soil having less than 30 percent soil fines passing the No. 200 sieve. Clayey sands with more than 30 percent soil fines passing the No. 200 sieve are especially moisture sensitive and are typically highly plastic and are not recommended for reuse as structural fill.

These soils will behave more as sandy clay, and for this reason, very clayey sands having more than 30 percent soil fines passing the No. 200 sieve have been assigned a dual classification of SC/CH or SC/CL. Clayey sand soils that are excavated from below the water table are not recommended for reuse as structural fill due to the amount of time that will be required to dry these soils to a workable condition.

ML, MH, CL, CH – Silts and clays are not suitable materials for reuse as structural fill.

When using on-site soils as fill materials, we recommend the silty and clayey sand soils (SM, SC) be used in the lower depths of the fill. Sand and sand with silt (SP, SP-SM) should be used in the upper portions of the fill. We recommend a minimum of 2 feet of sand (SP, SP-SM) cover the silty and clayey sand fill materials to reduce the potential for soggy surface conditions due to the low permeability characteristics of the silty and clayey sand materials.

4.10 Surface Water Control and Landscaping

Roof gutters should be considered to divert runoff away from the building. The gutter downspouts should discharge a minimum of 10 feet from the structure to reduce the amount of water collecting around the foundations. Where possible, the gutter downspouts should discharge directly into the storm sewer system or onto the asphalt paved areas in order to reduce the amount of water collecting around the foundations. Grading of the site should be such that water is diverted away from the building on all sides to reduce the potential for erosion and water infiltration along the foundation.

With respect to landscaping, it is recommended that any trees and large "tree-like" shrubbery with potential for developing large root systems be planted a minimum distance of half their mature height, and preferably their expected final height, away from the structure. The purpose of this is to reduce the potential for foundation or slab movements from the growth of root systems as the landscaping matures. Consideration should also be given to using landscaping that has a low water demand, so that excessive irrigation is not conducted around the structures.

If excavations for underground utilities encounter the clay-rich soils, the excavations should be made such that they do not trap water (i.e., "swimming pool" or "bowl" effect). Sloping the excavations, installing underdrains, or extending the excavation to a more pervious area can achieve this. Allowing surface water to become trapped within utility trenches or other excavations (including footings) serves as a potential water source for the clay, which can result in shrink swell of these soils. Furthermore, during construction, surface water within the building areas must be controlled such that the water does not become trapped and represent a source of water for the underlying clay-rich soils. Mismanagement of the surface water during construction within the building footprint could result in subsequent post-construction slab movement.

The above recommendations are intended to maintain relatively consistent moisture contents within the clay-rich expansive soils encountered by the borings. The importance of proper surface water control and landscaping placement cannot be overemphasized in accomplishing this objective.

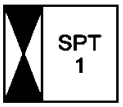
5.4 Key to Soil Classification

KEY TO SOIL CLASSIFICATION CHART

Criteria for Assigning Group Symbols and Group Names Using Laboratory Tests				SYMBOLS		GROUP NAME
				GRAPHIC	LETTER	
COARSE-GRAINED SOILS	Gravels	Clean Gravels	Cu ≥ 4 and 1 ≤ Cc ≤ 3		GW	Well graded GRAVEL
More than 50% retained on No. 200 sieve	More than 50% of coarse fraction retained on No. 4 sieve	Less than 5% fines	Cu < 4 and/or 1 > Cc > 3		GP	Poorly graded GRAVEL
		Gravels with fines	Fines classify as ML or MH		GM	Silty GRAVEL
		More than 12% fines	Fines classify as CL or CH		GC	Clayey GRAVEL
	Sands	Clean Sands	Cu ≥ 6 and 1 ≤ Cc ≤ 3		SW	Well graded SAND
	50% or more of coarse fraction passes No. 4 sieve	Less than 5% fines	Cu < 6 and/or 1 > Cc > 3		SP	Poorly graded SAND
		Sand with fines	Fines classify as ML or MH		SP-SM	SAND with silt
		5% ≤ fines < 12%	Fines classify as CL or CH		SP-SC	SAND with clay
		Sand with fines	Fines classify as ML or MH		SM	Silty SAND
		12% ≤ fines < 30%	Fines classify as CL or CH		SC	Clayey SAND
		Sand with fines	Fines classify as ML or MH		SM	Very silty SAND
		30% fines or more	Fines classify as CL or CH		SC	Very clayey SAND
FINE-GRAINED SOILS	Clays	inorganic	50% ≤ fines < 70%		CL/CH	Sandy CLAY
50% or more passes the No. 200 sieve			70% ≤ fines < 85%		CL/CH	CLAY with sand
			fines ≥ 85%		CL/CH	CLAY
	Silts and Clays	inorganic	PI > 7 and plots on/above "A" line		CL	Lean CLAY
	Liquid Limit less than 50		PI < 4 or plots below "A" line		ML	SILT
		organic	Liquid Limit - oven dried / Liquid Limit - not dried < 0.75		OL	Organic clay / Organic silt
	Silts and Clays	inorganic	PI plots on or above "A" line		CH	Fat CLAY
	Liquid Limit 50 or more		PI plots below "A" line		MH	Elastic SILT
		organic	Liquid Limit - oven dried / Liquid Limit - not dried < 0.75		OH	Organic clay / Organic silt
HIGHLY ORGANIC SOILS	Primarily organic matter, dark in color, and organic odor				PT	PEAT



CORRELATION OF PENETRATION RESISTANCE WITH RELATIVE DENSITY AND CONSISTENCY

	No. OF BLOWS, N	RELATIVE DENSITY
	0 - 4	Very Loose
	5 - 10	Loose
SANDS:	11 - 30	Medium dense
	31 - 50	Dense
	OVER 50	Very Dense

	No. OF BLOWS, N	CONSISTENCY

6.0 LIMITATIONS

6.1 Warranty

This report has been prepared for our client for his exclusive use, in accordance with generally accepted soil and foundation engineering practices and makes no other warranty either expressed or implied as to the professional advice provided in the report.

6.2 Auger and SPT Borings

The determination of soil type and conditions was performed from the ground surface to the maximum depth of the borings, only. Any changes in subsurface conditions that occur between or below the borings would not have been detected or reflected in this report.

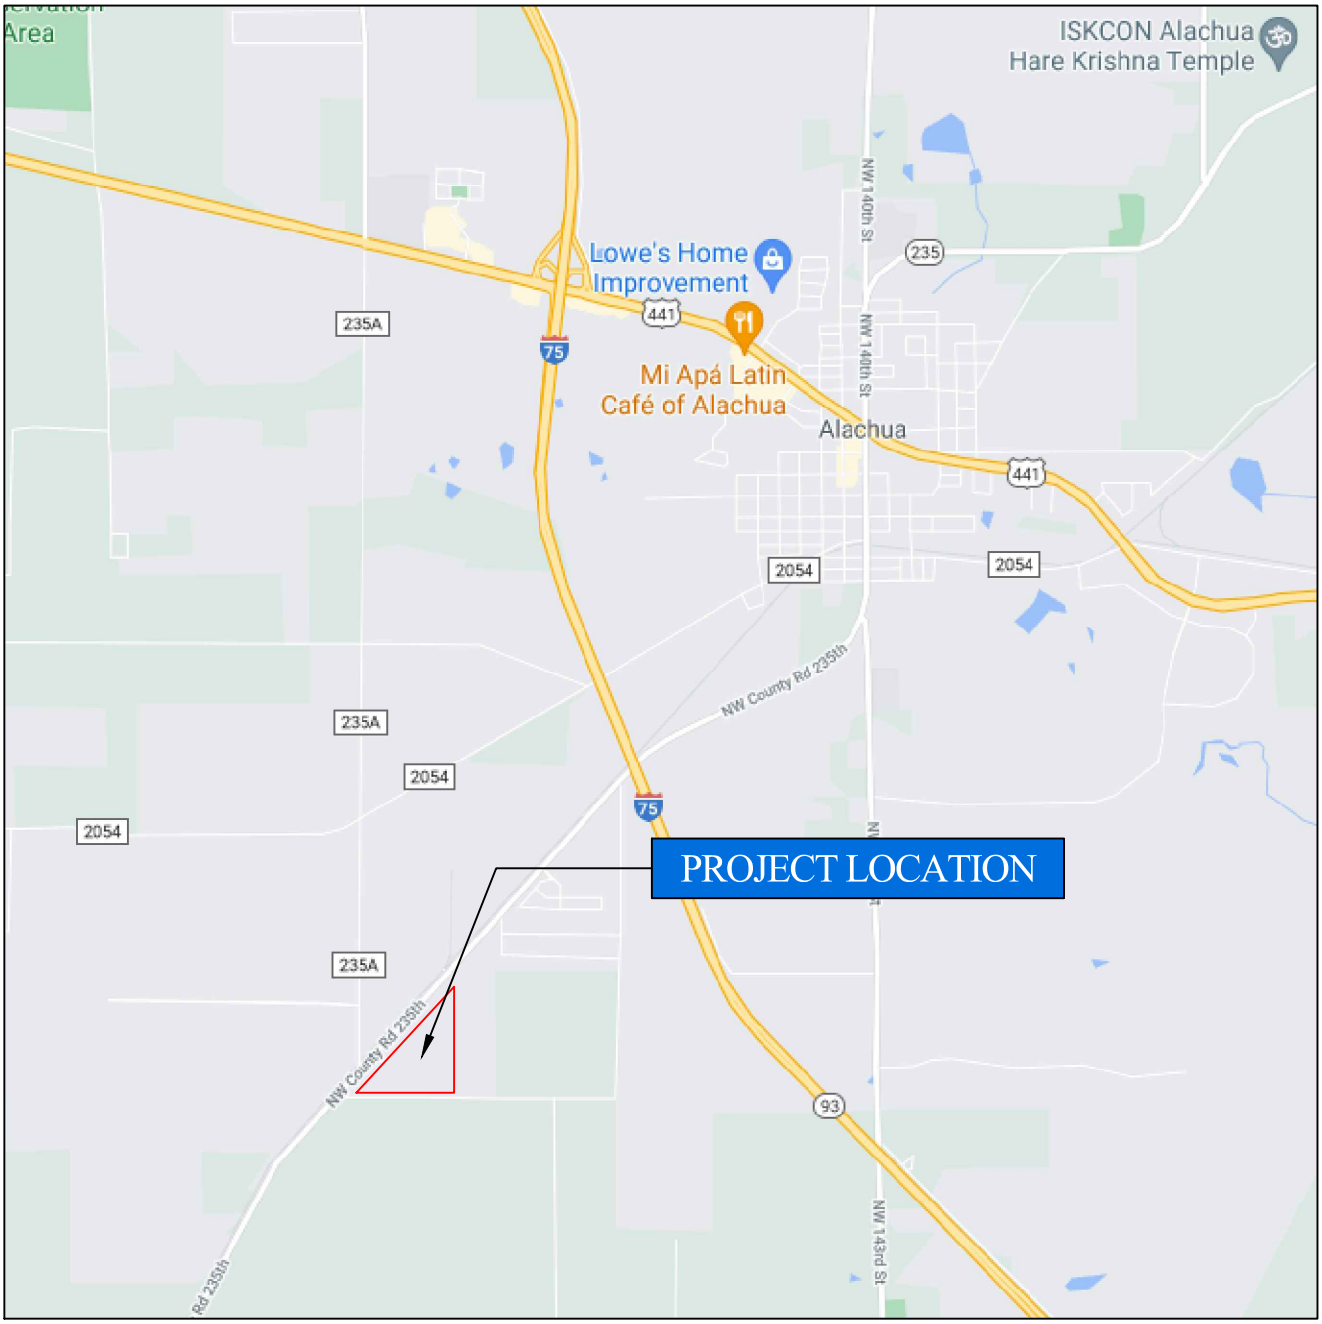
Soil classifications that were made in the field are based upon identifiable textural changes, color changes, changes in composition or changes in resistance to penetration in the intervals from which the samples were collected. Abrupt changes in soil type, as reflected in boring logs and/or cross sections may not actually occur, but instead, be transitional.

Depth to the water table is based upon observations made during the performance of the auger and SPT borings. This depth is an estimate and does not reflect the annual variations that would be expected in this area due to fluctuations in rainfall and rates of evapotranspiration.

6.3 Site Figures

The measurements used for the preparation of the figures in this report were made using the provided site plan and by estimating distances from existing structures and site features. Figures in this report were not prepared by a licensed land surveyor and should not be interpreted as such.

6.4 Unanticipated Soil Conditions



The analysis and recommendations submitted in this report are based upon the data obtained from soil borings performed at the locations indicated on Figure 2. This report does not reflect any variations that may occur between these borings.

The nature and extent of variations between borings may not become known until excavation begins. If variations appear, we may have to re-evaluate our recommendations after performing on-site observations and noting the characteristics of any variations.

6.5 Misinterpretation of Soil Engineering Report

GSE Engineering & Consulting, Inc. is responsible for the conclusions and opinions contained within this report based upon the data relating only to the specific project and location discussed herein. If others make the conclusions or recommendations based upon the data presented, those conclusions or recommendations are not the responsibility of GSE.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED made the ___ day of November, 1997, by International Business Machines Corporation, a New York corporation, hereinafter called the Grantor, to Waco, Inc., qualified to do business in Florida as Waco of Alabama, Inc., an Alabama corporation, having an address at 569 S. Edgewood Avenue, Jacksonville, FL 32205, hereinafter called the Grantee:

(Wherever used herein, the terms "Grantor" and "Grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

WITNESSETH: That the Grantor, for and in consideration of the sum of $10.00 and other good and valuable consideration, receipt and sufficiency whereof are hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the Grantee, all those certain parcels of land situated in Alachua County, Florida, and more particularly described in **Exhibit A** attached hereto and made a part hereof.

TOGETHER with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

SUBJECT TO:

1. Taxes for the year 1998 and subsequent years not yet due and payable.

2. Easements, restrictions, reservations, limitations and conditions of record, if any, provided this shall not operate to reimpose same.

3. All applicable zoning ordinances, other land use laws and regulations, and all applicable regulations and restrictions imposed by governmental authorities.

TO HAVE AND TO HOLD, the same in fee simple forever.

AND the Grantor hereby covenants with the Grantee that the Grantor is lawfully seized of said land in fee simple; that the Grantor has good right and lawful authority to sell and convey said land, and hereby warrants the title to said land and will defend the same against the lawful claims of all persons claiming by, through or under the said Grantor and none other.

IN WITNESS WHEREOF, the said Grantor has hereunto set its hand and seal the day and year first above written.

Signed, sealed and delivered
in our presence:

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 1 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 1, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 1 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $169,223, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements ($1,692,237.44) set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$183,637.07, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth ($1,836,370.73) in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer or successor shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $80,214.30 ($66,845.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $6,684.53 ($66,845.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

SHEET ONE OF TWO

DESCRIPTION

A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA. BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHWEST CORNER OF AFORESAID SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 810.93 FEET; THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT-OF-WAY); THENCE NORTH 41°36'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 908.43 FEET; THENCE SOUTH 48°23'09" EAST, DEPARTING SAID SOUTHERLY RIGHT OF WAY, A DISTANCE OF 50.00 FEET; THENCE NORTH 41°36'51" EAST, A DISTANCE OF 99.06 FEET; THENCE NORTH 48°% OF WEST, A DISTANCE OF 99.06 FEET TO THE AFOREMENTIONED SOUTHERLY RIGHT OF WAY OF COUNTY ROAD NO. 235; THENCE NORTH 41°36'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 879.87 FEET; THENCE DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING ELEVEN (11) COURSES: (1) SOUTH 48°19'09" EAST, A DISTANCE OF 295.09 FEET; (2) SOUTH 41°36'51" WEST, A DISTANCE OF 169.39 FEET; (3) SOUTH 48°19'09" EAST, A DISTANCE OF 278.66 FEET; (4) SOUTH 41°36'51" WEST, A DISTANCE OF 519.24 FEET; (5) NORTH 48°23'09" WEST, A DISTANCE OF 374.69 FEET; (6) SOUTH 41°36'51" WEST, A DISTANCE OF 118.16 FEET; (7) SOUTH 48°36'39" WEST, A DISTANCE OF 52.89 FEET; (8) SOUTH 41°36'51" WEST, A DISTANCE OF 139.00 FEET; (9) SOUTH 48°23'09" EAST, A DISTANCE OF 74.37 FEET; (10) SOUTH 41°36'51" WEST, A DISTANCE OF 280.47 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE NORTHEAST HAVING A RADIUS OF 175.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 61°07'21" EAST, 26.09 FEET; (11) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 08°32'45", AN ARC LENGTH OF 26.09 FEET TO THE END OF SAID CURVE; (12) THENCE DEPARTING SAID CURVE, SOUTH 26°39'04" WEST, A DISTANCE OF 139.18 FEET TO THE SOUTH LINE OF AFOREMENTIONED SECTION 28; THENCE SOUTH 89°20'56" WEST, ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 1065.72 FEET TO THE POINT OF BEGINNING.

PARCEL OF LAND CONTAINING 21.29 ACRES MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), WHICH HOLDS A BEARING OF SOUTH 89°20'56" WEST FOR THE SOUTH LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88), BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER D178, WITH A PUBLISHED ELEVATION OF 180.53 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1: 5,000.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT = 15'
   REAR = 5'
   SIDE = 5'
   20 FEET FACING GARAGES = 15'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL No. 12001C 0179 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORMWATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNER'S ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 2.E.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS, ASE.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (9) FLORIDA STATUTES.
8. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
9. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS ONE (1) THROUGH FORTY-TWO (42).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 1

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 1 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 32 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 8,000 gallons per day (32 lots x 250 gallons per day) of wastewater capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 8,800 gallons per day (32 lots x 275 gallons per day) of water capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 152 Average Annual Daily Trips ("AADT") and 16 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 305 Average Annual Daily Trips ("AADT") and 33 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .42 acres (2.6 persons per household x 32 units x 5 acres per 1,000 persons) of recreation capacity for the 32 units proposed in Fletceher Trace Phase 1 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 60.74 tons per year (0.73 tons per capita per year x 2.6 persons per household x 32 units) of solid waste capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 32 units proposed in Fletcher Trace Phase 1.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 2 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 2, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 2 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $59,965.35, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$599,653.52] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$16,258.29, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$162,582.89] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $60,778.99 ($50,649.16 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $5,064.92 ($50,649.16 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 2

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 2 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 42 residential lots (14 detached and 28 attached);

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 10,500 gallons per day (42 lots x 250 gallons per day) of wastewater capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 11,550 gallons per day (42 lots x 275 gallons per day) of water capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 200 Average Annual Daily Trips ("AADT") and 21 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 400 Average Annual Daily Trips ("AADT") and 43 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .55 acres (2.6 persons per household x 42 units x 5 acres per 1,000 persons) of recreation capacity for the 42 units proposed in Fletceher Trace Phase 2 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 79.72 tons per year (0.73 tons per capita per year x 2.6 persons per household x 42 units) of solid waste capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 2 (two) student stations in the Alachua SCSA for high schools, for the 42 units proposed in Fletcher Trace Phase 2.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 3 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 3, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 3 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $113,784.92, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$1,137,849.21] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$47,436.64, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$474,366.38] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $90,945.90 ($75,788.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $7,578.83 ($75,788.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

LEGAL DESCRIPTION

21-0297

CHW
Professional Consultants

DATE: DECEMBER 28, 2023
PROJECT NAME: FLETCHER TRACE
PROJECT NO: 21-0297
DESCRIPTION FOR: PHASE 3

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2192.97 FEET TO THE **POINT OF BEGINNING**; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE, NORTH 41°06'51" EAST, A DISTANCE OF 1878.44 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 827.97 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 00°14'12" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 282.21 FEET; THENCE, DEPARTING SAID WEST LINE, THE FOLLOWING NINE (9) COURSES; (1) SOUTH 64°41'49" WEST, A DISTANCE OF 69.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 185.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°50'21" WEST, 169.54 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 54°32'38", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°03'45" WEST, A DISTANCE OF 160.87 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°14'11" EAST, 35.36 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°00'00", AN ARC LENGTH OF 39.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 85.00 FEET; (6) SOUTH 89°45'49" WEST, A DISTANCE OF 420.66 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 235.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 65°26'20" WEST, 193.60 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°38'58", AN

ARC LENGTH OF 199.54 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 311.05 FEET; (9) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO THE **POINT OF BEGINNING**.

SAID TRACT CONTAINING 17.66 ACRES OF LAND, MORE OR LESS.

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2440, PAGE 1824, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 0°04'16" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 691.10 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°48'51" EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2352.87 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE NORTH 41°48'51" EAST, A DISTANCE OF 1878.34 FEET TO THE WEST LINE OF THE NORTHWEST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 297.37 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 89°04'13" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 2637.73 FEET; THENCE, DEPARTING SAID WEST LINE THE FOLLOWING NINE (9) COURSES; (1) SOUTH 84°21'49" WEST, A DISTANCE OF 68.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 180.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°40'21" WEST 189.84 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 64°17'39", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°32'46" WEST, A DISTANCE OF 190.87 FEET TO THE BEGINNING OF A CURVE, CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.50 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 41°59'13" EAST 35.74 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°09'00", AN ARC LENGTH OF 24.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°54'13" EAST, A DISTANCE OF 16.05 FEET; (6) SOUTH 41°48'51" WEST, A DISTANCE OF 420.48 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 208.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 63°36'29" WEST 189.83 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°34'56", AN ARC LENGTH OF 189.84 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°56'51" WEST, A DISTANCE OF 511.86 FEET; (9) NORTH 48°03'09" WEST, A DISTANCE OF 296.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.58 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER D578, WITH A PUBLISHED ELEVATION OF 156.40' (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1' IN 10,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   - FRONT = 15'
   - REAR = 5'
   - SIDE = 5'
   - STREET FACING GARAGE = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 548, COMMUNITY PANEL NO. "120069 0120 D", EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNERS ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 3.8.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (9) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 3

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 3 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 37 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 9,250 gallons per day (37 lots x 250 gallons per day) of wastewater capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 10,175 gallons per day (37 lots x 275 gallons per day) of water capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 176 Average Annual Daily Trips ("AADT") and 19 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 352 Average Annual Daily Trips ("AADT") and 38 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .48acres (2.6 persons per household x 37 units x 5 acres per 1,000 persons) of recreation capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 70.23 tons per year (0.73 tons per capita per year x 2.6 persons per household x 37 units) of solid waste capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 37 units proposed in Fletcher Trace Phase 3.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Mobilization (10%)					**$ 39,530.53**
Contingency (10%)					**$ 39,530.53**
TOTAL					**$ 474,366.38**

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

1. EXECUTIVE SUMMARY

CHW Professional Consultants, Inc. (CHW) has prepared the following Traffic Impact Analysis (TIA) for a development proposed on the south side of CR 235, just east of CR 235A, in the City of Alachua, Florida. The development is commonly referred to as Fletcher Trace. The concept plan for the proposed development is provided in **Appendix A**.

The purpose of this study is to identify the transportation impacts of the proposed project on the transportation network and if deficiencies are identified to recommend mitigation strategies to address the deficiencies. This TIA is required by Alachua County, and the City of Alachua. The study is being prepared for Fletcher Family Companies and is in conformance with the methodology letter submitted on May 26, 2022, see **Appendix B**.

The following developments are being proposed at this site, with an anticipated 2029 build-out:

- 344 Dwelling Units – Single-Family Detached Housing
- 128 Dwelling Units – Multifamily Housing (Low-Rise)

The following site access type and locations are being proposed:

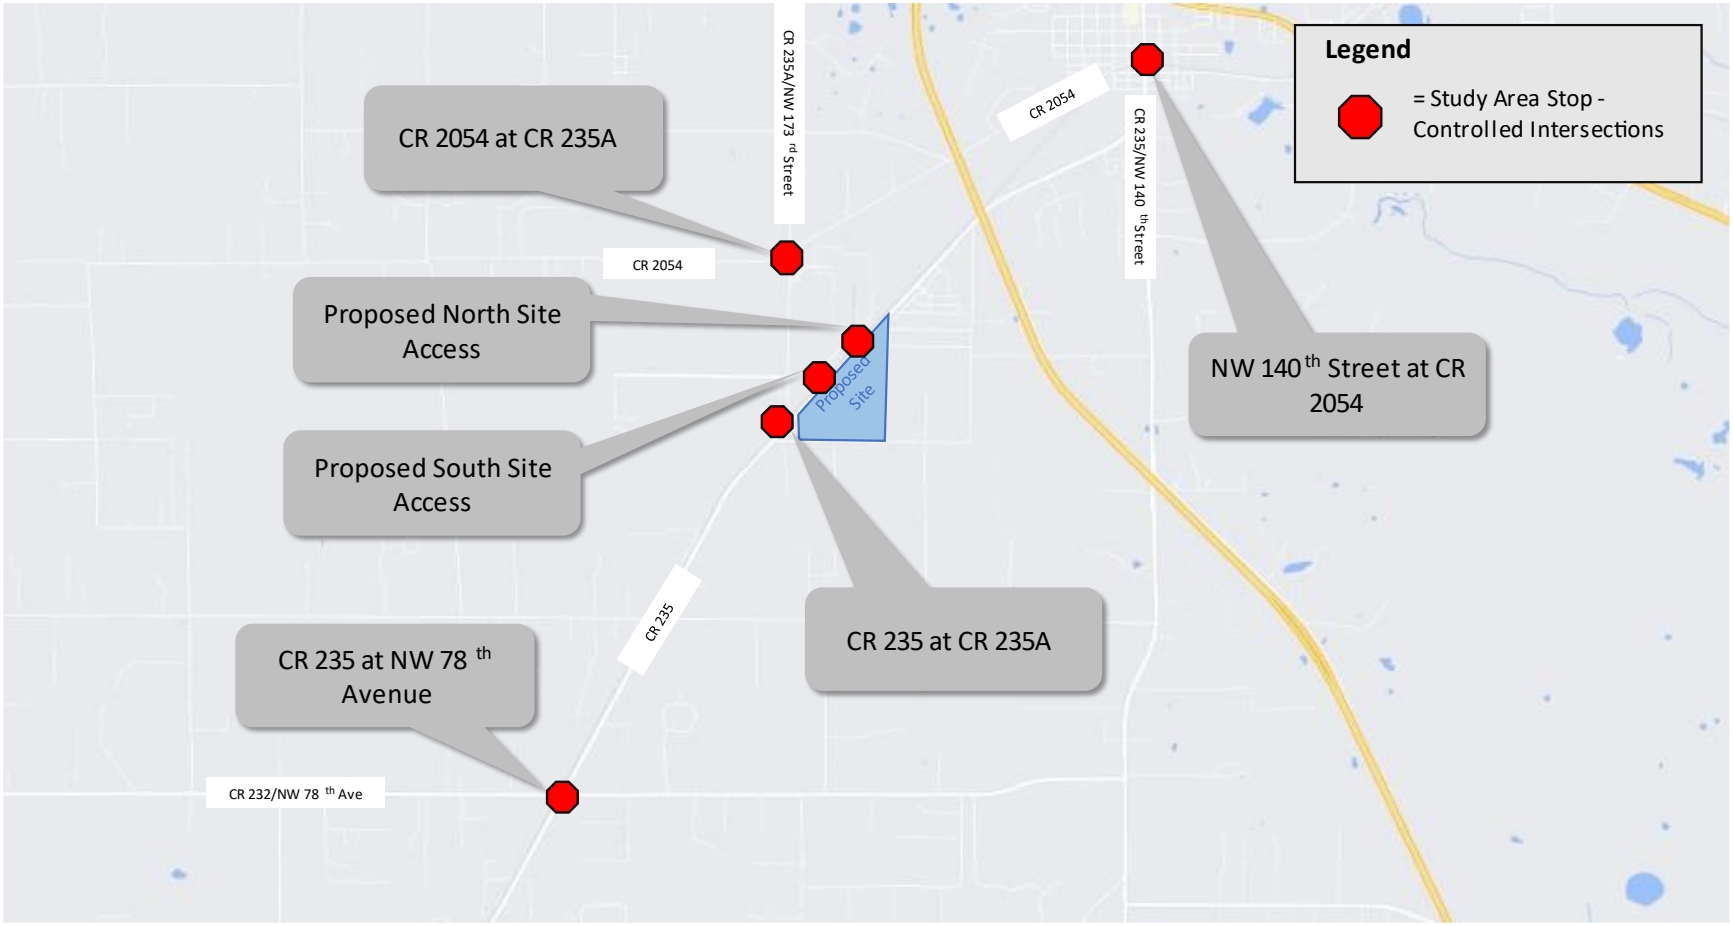
- Full access at the CR 235/Proposed North Site Access intersection; and
- Full access at the CR 235/ Proposed South Site Access intersection;

2. STUDY INTERSECTIONS AND SEGMENTS

2.1. Study Intersections

CHW, in coordination with Alachua County, and the City of Alachua and identified the following intersections to be significantly impacted by the proposed development. The study area intersections are provided in **Figure 1**.

- NW 140th Street (CR 235)/CR 2054 (Peggy Road) intersection;
- CR 235A (NW 173rd Street)/CR 2054 (Peggy Road) intersection;
- CR 235/Proposed North Site Access intersection;
- CR 235/ Proposed South Site Access intersection;
- CR 235/CR 235A (NW 173rd Street) intersection; and
- CR 235/NW 78th Avenue (CR 232) intersection.



2.2. Study Roadway Segments

CR 235 and CR 235A are 2-lane collector roads adjacent to the project that were evaluated as part of this study. If the anticipated project trip exceed 5% of the maximum service volume (MSV), the roadway was further analyzed to determine whether the build-out condition exceeds the MSV. As demonstrated in **Table 1** CR 235 from NW 143rd Place to South City limit, exceeds 5% of the maximum service volume, so an this roadway segment is studied in Section 6.3.

Table 1: Study Roadway Segments Determination

ROAD NAME	FROM	TO	Comp. Plan MSV[1]	Net New Total Daily Project Trips[2]	Trip Dist %[3]	Net New Total Project Trips	% (Net New Total Projec Trips/MSV)	Include in Study Area (> 5%) - Y/N
CR 235	NW 143RD PLACE	SOUTH CITY LIMIT	15,120		67%	2,707	17.90%	Y
CR 235A	US 441	CR 235	15,120	4,040	9%	364	2.41%	N

Figure 1 | Study Intersections

3. TRIP GENERATION

The Institute of Transportation Engineer's (ITE) Trip Generation Manual, 11th Edition was used to develop the trip generation for the site. The trip generation is provided in **Table 2**.

Table 2 | Fletcher Trace Trip Generation

Fletcher Trace Trip Generation									
Land Use	**ITE LU Code**	**Variable DU**	**Daily**	**AM Peak**			**PM Peak**		
				Total	**In**	**Out**	**Total**	**In**	**Out**
Phase 1									
Single-Family Detached Housing	210	344	3,144	229	60	169	317	200	117
Multifamily Housing (Low-Rise)	220	128	896	63	15	48	76	48	28
Total			*4,040*	*292*	*75*	*217*	*393*	*248*	*145*

4. DATA COLLECTION

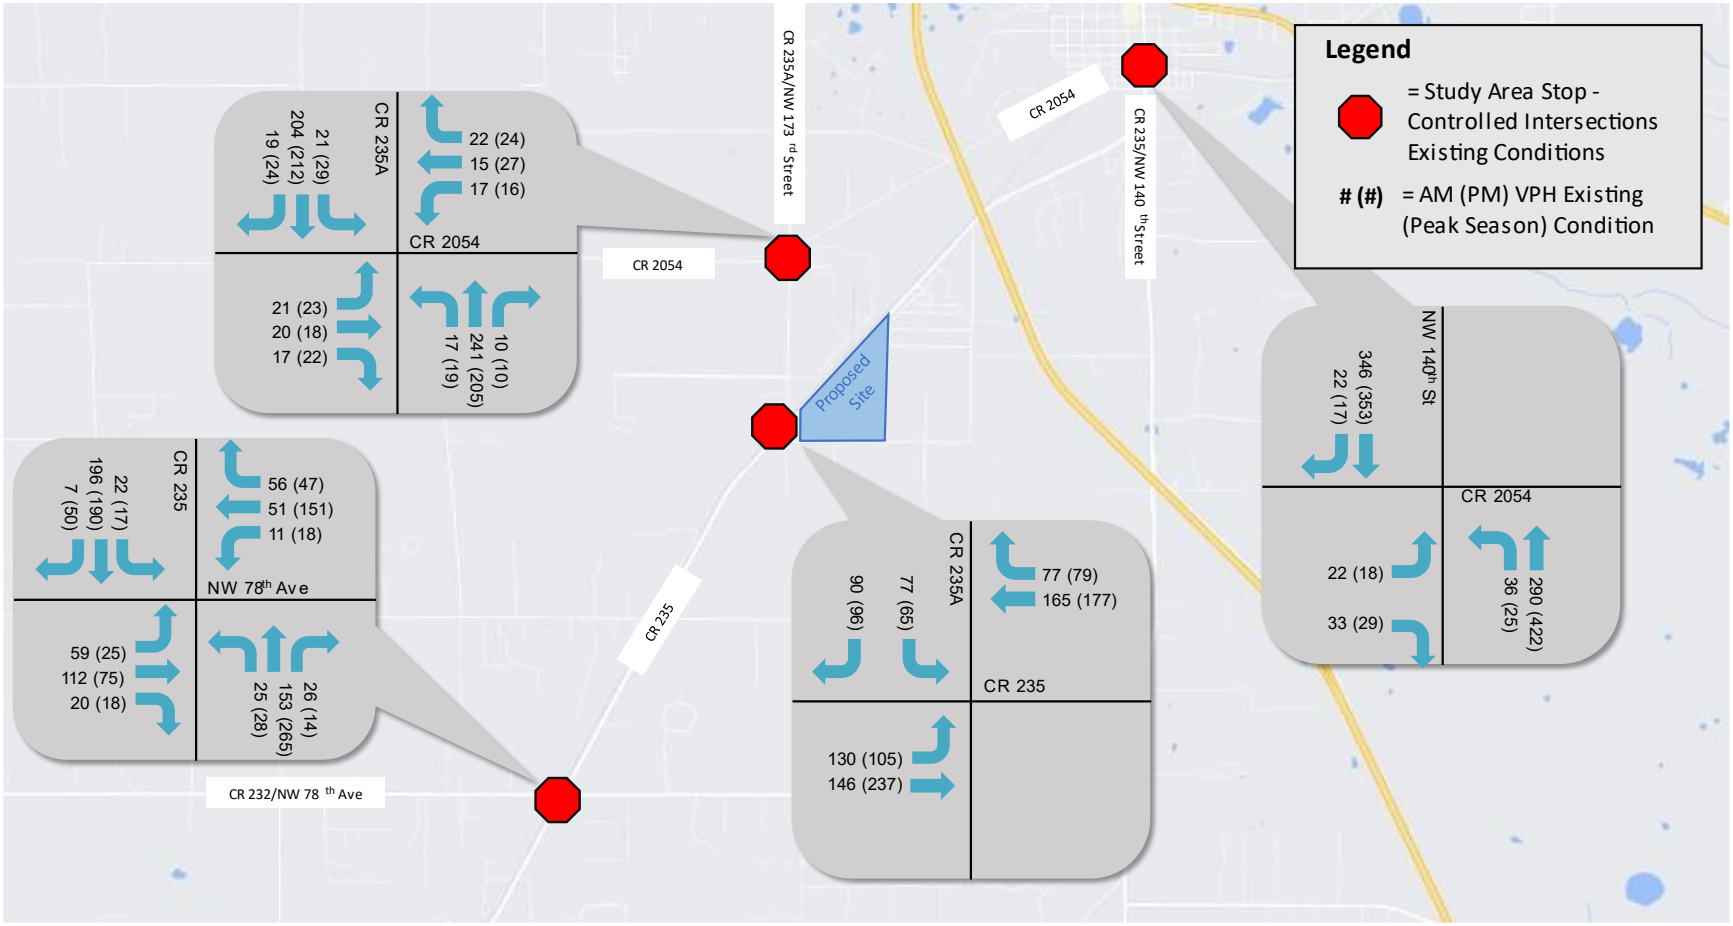
Turning movement counts were collected during the AM and PM peak hours on April 19th, 2022, for the following intersections: NW 140th Street/CR 2054 intersection, CR 235A /CR 2054 intersection, CR 235/CR 235A intersection and CR 235 at CR 232/NW 78th Avenue. The raw count data is provided in **Appendix C**.

The count data was adjusted based on the seasonal adjustment factor. **Figure 2** provides the existing (peak season) turning movements at the study intersections.

Reserved trips provided by the City of Alachua were included to the background volumes where applicable, as provided in **Appendix D**.

The project has an anticipated full build-out in 2029. Growth rates were determined based on historical ADT where available to derive the 2029 background volumes. A minimum of 1.0% yearly growth rate was used for roadways with historical growth rates less than 1.0% and 2.0% for roadways with no historical growth rates. **Appendix E** provides the data used to determine the peak season and background traffic volumes. **Appendix F** provides the peak season and background turning movements at all study intersections in tabular form. **Figure 3** illustrates the background conditions for 2029 at all study intersections.

Figure 2 | Existing (Peak Season) Turning Movements



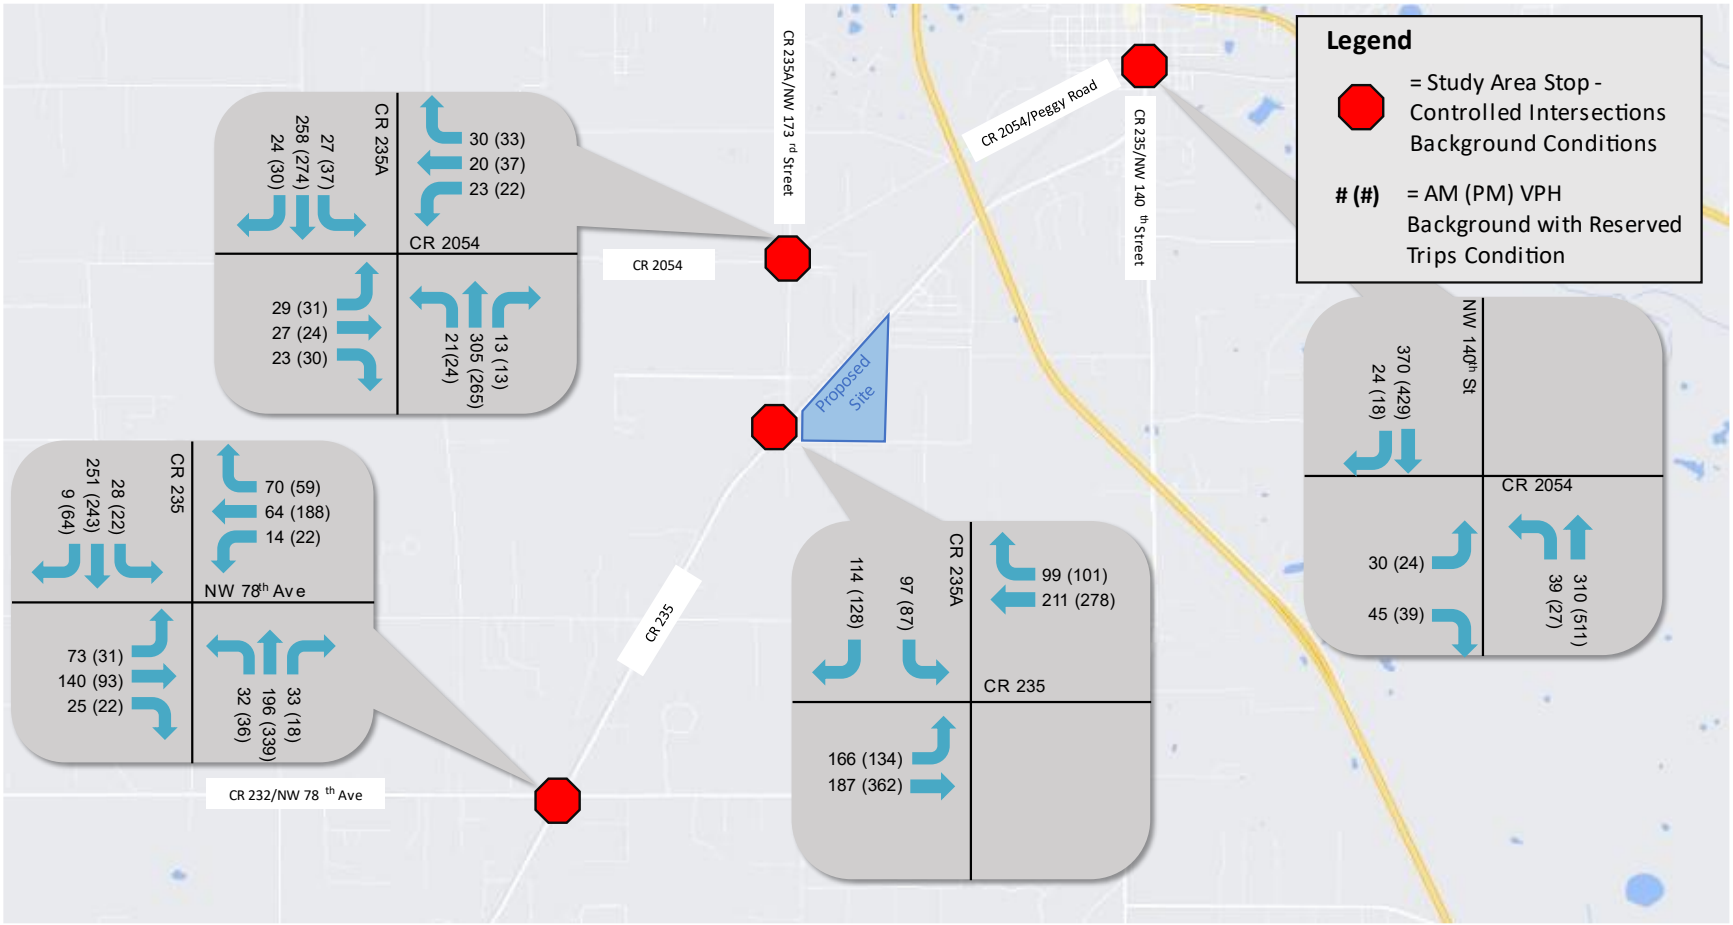


Figure 3 | Background Turning Movements

5. TRIP DISTRIBUTION

The project trip distribution for the Fletcher Trace build-out is expected to mimic the existing patterns of the Savannah Station Phase 1 project trips. A turning movement count was performed during the PM peak two hours of 4:00 to 6:00 PM at the intersection of CR 235 at NW 123rd Avenue, as provided in **Appendix G.** Based on the turning movement counts from Savannah Station Phase 1 the following project trip distribution that was utilized for this study:

- To/from north = 67%
- To/from south = 33%

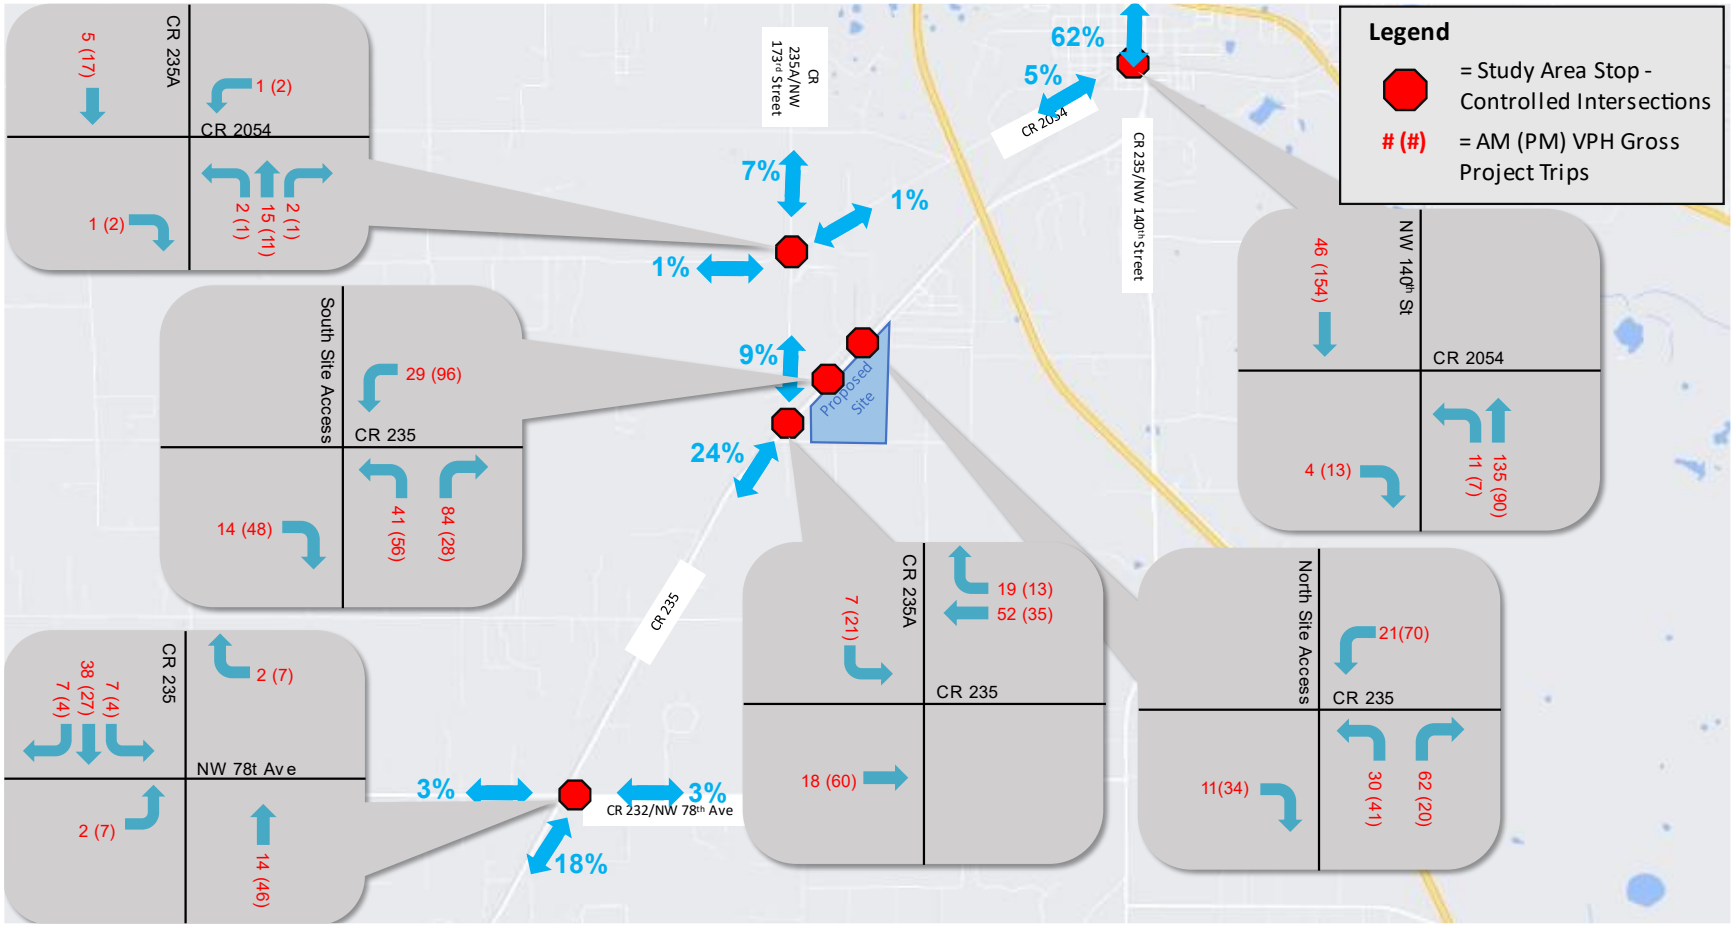
The trip distribution at all other study area intersections was be based on the turning movement count data from the intersections. For example, at the intersection of CR 235 at CR 235A the project trips will either be to/from the north on CR 235A or to/from the west on CR 235. The trip distribution to/from the north was be calculated as follows, based on the total AM and PM count volumes, as provided in **Appendix G**:

(SBL + WBR) / (EBT + WBT + SBL + WBR)

The project trip distribution at the project's connections on CR 235 are based on the layout of the project site, as shown in **Appendix G**. Approximately 50% of the multi-family housing project trips are expected to use the CR 235/Proposed North site access connection and the remaining multi-family housing trips will use the CR 235/Proposed South site access connection. Approximately 40% of the single-family detached housing will use the CR 235/Proposed North site access connection and the remaining 60% will use the CR 235/Proposed South site access connection.

The project trips are shown in **Figure 4** and the combined background with reserved trips and project trips form the build-out condition illustrated in **Figure 5.**

Figure 4 | Project Trip Turning Movements



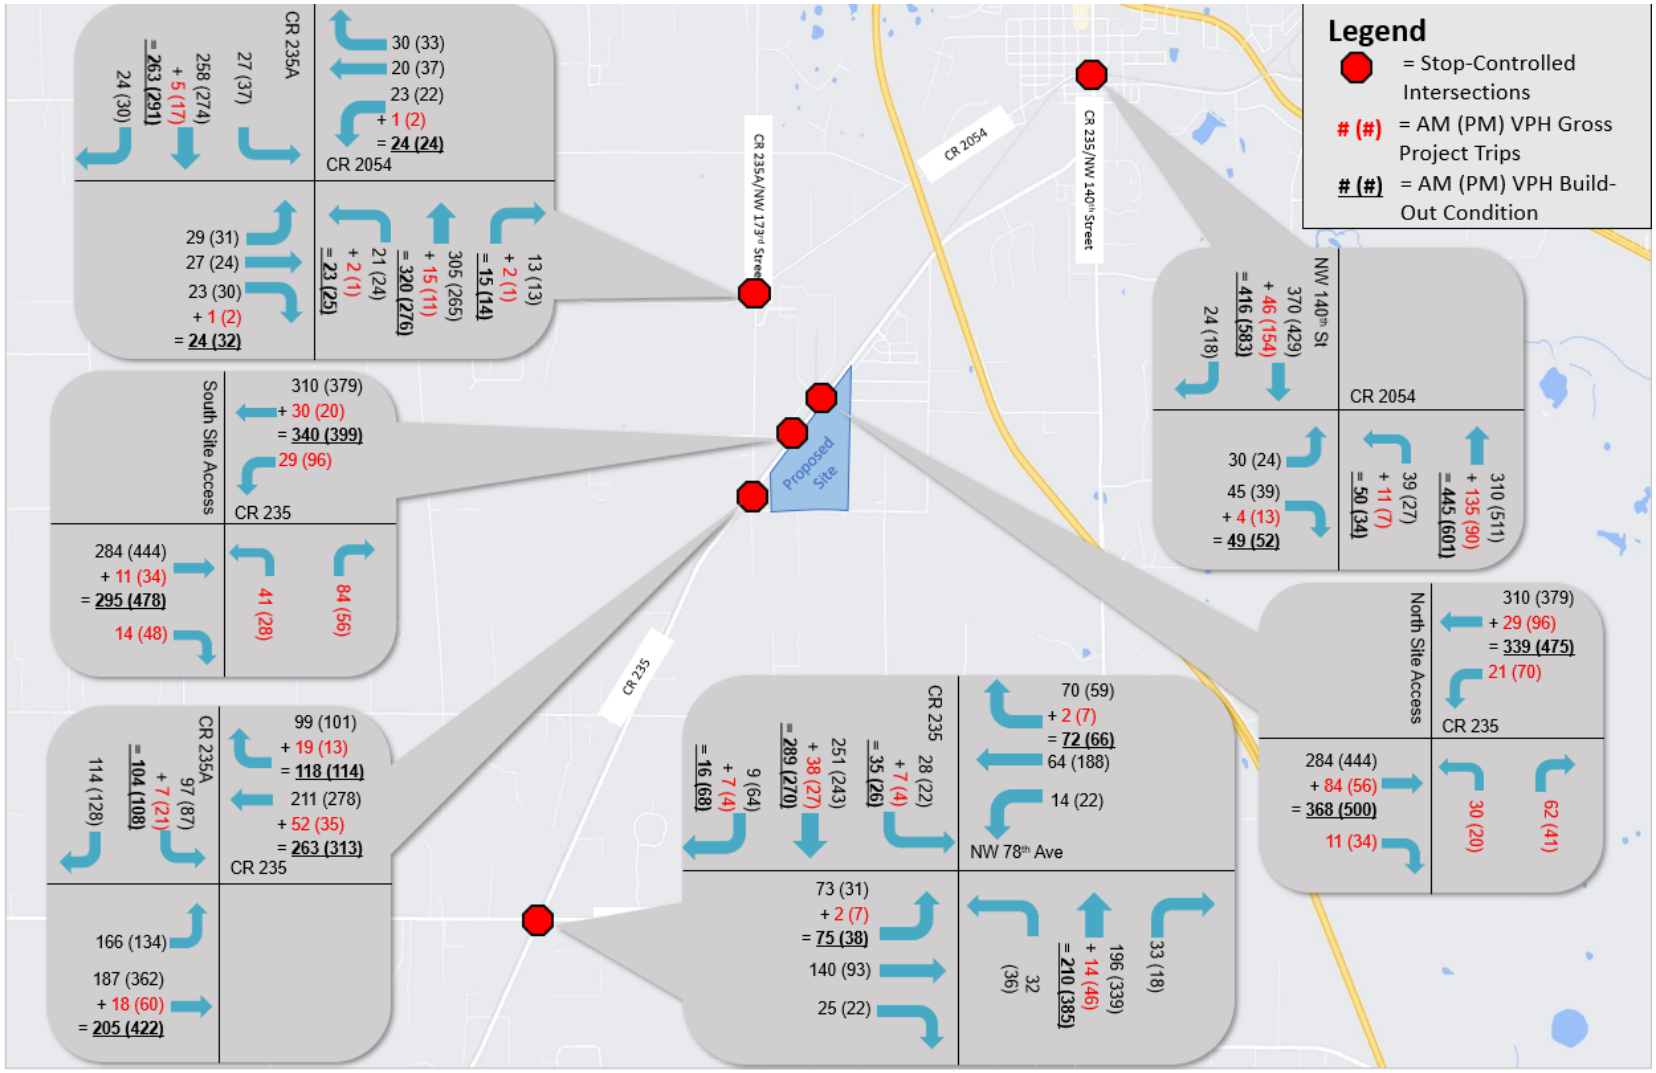


Figure 5 | Build-out Turning Movements

6. ANALYSIS

The analysis is divided into three parts: 1) analysis of intersections within the study area, 2) turn lane warrant analysis, and 3) roadway segment analysis.

6.1. Intersection Analysis

The analysis of the intersection within the study area covered three scenarios, as follows:

- Existing (Peak Season) Conditions;
- Background Conditions ; and
- Build-out Conditions.

All study intersections were analyzed during the AM and PM peak hours. The objectives of the analysis were to identify level of service or operational deficiencies and if necessary, model potential improvement to mitigate deficiencies. Resulting indicators for intersection operational performance include level of service (LOS), delay, volume to capacity (v/c) ratio, and the 95th percentile queue length.

For this analysis Highway Capacity Software 7 (HCS 7) was used to analyze stop sign controlled intersections.

The operational performance of the intersections is provided in **Table 3** and **Table 4**. The HCS reports are provided in **Appendix H**. Intersection deficiencies are highlighted in **Table 3** and **Table 4**. Deficiencies are v/c less than 1.0, 95th percentile queue lengths exceeding storage lengths, and LOS of F for the main street through movements and intersection totals.

Section 6.3 will demonstrate the left-turn lanes are recommended on CR 235 at the site access intersections. Additionally, a right-turn lane is recommended on CR 235 at the south site access and a right-turn taper is recommended at the north site access. These turn-lane improvements are included in the intersection analysis.

Yellow highlight = deficiency occurring without project traffic

Red highlight = deficiency occurs due to added project trips

*NR = Not Reported

As indicated in **Tables 3** and **Table 4** the following deficiency occurs with the addition of project trips.

The westbound movement at the intersection of CR 235 at NW 78th Avenue has volume exceeding capacity during the PM build-out. The volume of project trips forecasted to make a westbound right turn is low at only 7 vehicles per hour. During the PM background scenario, the westbound movement operates with a v/c near capacity at .98. Therefore, the background volumes and not the project trips are what cause the operational issues at this intersection. No improvements are recommended at this intersection.

6.2. Turn Lane Warrant Analysis

The Alachua County Land Development Code requires deceleration (right-turn) tapers for Class III and IV connections to a two-lane collector or arterial roadway with a design speed of 50 MPH or greater. A right turn lane is required if warranted. This site proposes a Class III connection onto CR 235 which has a design speed of 60 MPH, assuming a design speed 5 MPH over the posted speed of 55 MPH.

A right-turn lane warrant analysis, based on the guidelines of the "FDOT Access Management Guidebook", was used to determine whether a right-turn lane is warranted. The thresholds for warranting a right-turn lane range from 35 - 55 right-turns per hour, per the "FDOT Access Management Guidebook". As illustrated in build-out **Figure 4**, the maximum number of right turning vehicles at the CR 235/Proposed North Site Access intersection is 34 during the PM peak hour and at the CR 235/Proposed South Site Access intersection is 48 during the PM peak hour. Therefore, a northbound right-turn lane at the CR 235/Proposed North Site Access intersection is not warranted and not recommended to support this project however a northbound right turn taper is recommended based on the Alachua County Land Development Code requirements. A northbound right-turn lane at the CR 235/Proposed South Site Access intersection is warranted and recommended to support this project. The results are provided in **Appendix J**.

The Alachua County Unified Land Development Code requires a left-turn lane for developments with 50 or more total peak hour trips connecting to a collector or arterial road. As illustrated in build-out **Figure 4**, the maximum number of left turning vehicles at the CR 235/Proposed North Site Access intersection is 70 during the PM peak hour and at the CR 235/Proposed South Site Access intersection is 96 during the PM peak hour. Therefore, left-turn lanes are recommended at both the CR 235/Proposed North Site

Access intersection and CR 235/Proposed South Site Access intersection based on the Alachua County Land Development Code Requirements.

6.3. Roadway Segment Analysis

The study roadway segments for the future roadway segment conditions analysis were determined where the net new traffic from the proposed project is at least 5% of the maximum service volume (MSV) as provided in **Table 1**.

The future roadway segment conditions analysis was completed for roadway segments within the study area. Historic growth rates were applied to the 2022 AADT. Build-out project trips were added to the background trips and applied to each roadway segment. **Table 5** shows that none of the roadway segments in the study area had build-out volumes that exceeded the daily service volume. Therefore, no roadway segment improvements are recommended.

Table 5 | Future Conditions (2029) Roadway Segment LOS Analysis

ROAD NAME	FROM	TO	Comp. Plan MSV[1]	ADOPTED LOS STANDARD	Ex. Trips - 2022 AADT[1]	Back-ground Trips - 2029 AADT[2]	Reserved Trips-AADT[3]	Net New Total Project Trips	Build-out	Exceeds MSV/ Daily Service Volume - Y/N
CR 235	NW 143RD PLACE	SOUTH CITY LIMIT	15,120	D	6,180	7,815	1,018	2,707	11,540	N

(1) Taken from 2022 City of Alachua Annual Concurrency Status Report
(2) Calculated using Historical Growth Rate
(3) Reserved trips provided by the City of Alachua

7. CONCLUSIONS AND RECOMMENDATIONS

The following transportation improvements are recommended to support the project traffic at this site:

- Install a westbound left-turn lane on CR 235 at the south site access.
- Install a westbound left-turn lane on CR 235 at the north site access.
- Install a full-length eastbound right-turn lane on CR 235 at the south site access.
- Install an eastbound right-turn taper on CR 235 at the north site access.

Re: Fletcher Trace, City of Alachua, FL

Dear Thomas and Justin,

CHW is preparing a Traffic Impact Analysis (TIA) Methodology for the proposed Fletcher Trace development consisting of a single-family detached housing and multifamily housing (low-rise) located northeast of the intersection of CR 235 and NW 173rd Street in the City of Alachua, Florida. The project proposes a two access points from CR 235 to the project site, as illustrated in the concept plan provided in **Attachment A**.

Please review the methodology and either provide comment for the purposes of modification/ clarification or provide acceptance.

Study Area

The study area will consist of the following intersections:

- CR 235/NW 140th Street at CR 2054;
- CR 235A and CR 2054;
- CR 235 at Proposed North Site Access;
- CR 235 at Proposed South Site Access;
- CR 235 and CR 235A/NW 173rd Street; and
- CR 235 at CR 232/NW 78th Avenue.

Land Use and Trip Generation

The trip generation for the site will be based on the Institute of Transportation Engineer's (ITE) Trip Generation Manual, 11th Edition. The estimated trip generation is provided below. The TIA will estimate the trip generation based on the number of dwelling units.

Fletcher Trace Trip Generation									
Land Use	ITE LU Code	Variable DU	Daily	AM Peak			PM Peak		
				Total	In	Out	Total	In	Out
Single-Family Detached Housing	210	344	3,144	229	60	169	317	200	117
Multifamily Housing (Low-Rise)	220	128	896	63	15	48	76	48	28
Total			*4,040*	*292*	*75*	*217*	*393*	*248*	*145*

Data Collection

Turning movement counts during the AM and PM peak two hours, during a single day, will be utilized for analysis. Counts will be collected on a Tuesday, Wednesday, or Thursday. The counts will include pedestrians, bicycles, and trucks, in addition to passenger vehicles.

Turning movement counts will be performed at the following intersection:

- CR 235/NW 140th Street at CR 2054;
- CR 235A and CR 2054;
- CR 235 and CR 235A/NW 173rd Street; and
- CR 235 at CR 232/NW 78th Avenue.

The count data will be adjusted based on the seasonal adjustment factor and by the growth rate to forecast the estimated background traffic of the project build-out year 2029. The growth rate will be determined based on historical ADT where available.

Trip Distribution

The project trip distribution for the Fletcher Trace build-out is expected to mimic the existing patterns of the Savannah Station Phase 1 project trips. A turning movement count was performed during the PM peak two hours of 4:00 to 6:00 PM at the intersection of CR 235 at NW 123rd Avenue, as provided in **Attachment B**. Based on the turning movement count the Savannah Station Phase 1 project trip distribution that will be utilized for the Fletcher Trace TIS is provided below:

- To/from north = 67%
- To/from south = 33%

The trip distribution at all other study area intersections will be based on the turning movement count data from the intersections. For example, at the intersection of CR 235 at CR 235A the project trips will either be to/from the north on CR 235A or to/from the west on CR 235. The trip distribution to/from the north will be calculated as follows, based on the total AM and PM count volumes:

(SBL + WBR) / (EBT + WBT + SBL + WBR)

Analysis

The intersection analysis will be performed at the intersections provided in the study area during the AM and PM peak hours, under the following scenarios:

- Existing (peak season) conditions
- Background conditions
- Build-out conditions
- Build-out with improvements, if applicable

The intersection operation analysis will review the delay, LOS, V/C, and 95th percentile queue length of each intersection movement as well as the intersection as a whole. The non-signalized intersections will be analyzed using HCS 7. The reports will be provided in the appendices.

Left and right turn lane warrant analyses will be performed at the site access intersections. If turn lanes are warranted the turn lane lengths will be calculated.

A roadway segment level of service analysis will be provided for CR 235 and CR 235A in accordance with City of Alachua requirements.

Any needed roadway modifications based on this analysis will be identified and modeled to demonstrate that the improvement mitigates the deficiency.

Report

A draft report, including, as a minimum, the following will be submitted for review and comment.

- Study Area Map
- Existing Conditions
- Trip Generation
- Data Collection
- Trip Distribution
- Analysis
  - AM and PM Intersection LOS, Delay, V/C and 95th Percentile Queue Length Analysis
  - Left and Right Turn Lane Warrants
  - Roadway Segment Analysis
- Conclusion and Recommendations
- Appendices with Supporting Documentation

Following any revisions, based upon staff comments, we will prepare a final signed and sealed report.

Please provide acceptance if you concur with this methodology.

Thank you for your review and consideration.

Sincerely,
CHW

Brian Snyder, P.E.
Project Manager

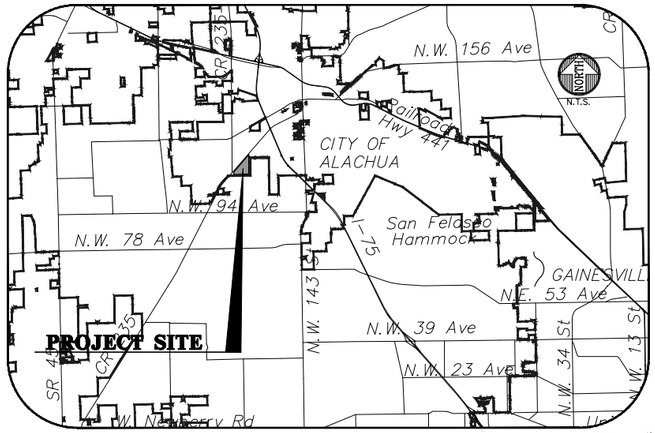
PRELIMINARY PLAT
FOR:

FLETCHER TRACE

ALACHUA COUNTY PARCELS 03905-002-000 AND 03980-002-001

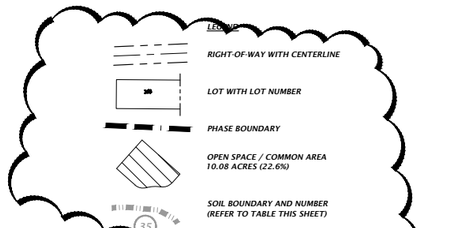
CITY OF ALACHUA, FLORIDA

SECTIONS 21 AND 28, TOWNSHIP 08 SOUTH, RANGE 18 EAST



NOT FOR FINAL RECORDING

LEGAL DESCRIPTION: (OFFICIAL RECORDS BOOK 2140, PAGE 1834)



A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT AN IRON PIPE AT THE SOUTHWEST CORNER OF THE AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST FOR THE POINT OF BEGINNING AND RUN N.00°42'43"E., ALONG THE WEST LINE OF SAID SECTION, A DISTANCE OF 402.89 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE RUN N.41°53'43"E., ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 4071.41 FEET TO A CONCRETE MONUMENT; THENCE RUN S.01°01'49"W., A DISTANCE OF 827.97 FEET TO A CONCRETE MONUMENT AT THE NORTHWEST CORNER OF THE SOUTHEAST 1/4 OF SAID SECTION 28; THENCE RUN S.00°32'41"W., ALONG THE WEST LINE OF SAID SOUTHEAST 1/4, A DISTANCE OF 2612.87 FEET TO AN IRON PIPE AT THE SOUTHEAST CORNER OF THE SOUTHWEST 1/4 OF SAID SECTION 28, THENCE RUN N.89°50'54"W., ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 2684.07 FEET TO THE POINT OF BEGINNING, CONTAINING 118.191 ACRES, MORE OR LESS.

SUBJECT TO MAINTAINED RIGHT OF WAY OF COUNTY ROAD N.W. 110TH AVENUE (FORMERLY KNOWN AS COUNTY ROAD NO. N.W 28) ALONG THE SOUTH BOUNDARY THEREOF

   DANIELY@CHW-INC.COM
5. SURVEYOR OF RECORD:
   AARON H. HICKMAN, PSM
   CHW
   11801 RESEARCH DRIVE
   ALACHUA, FL 32615
   (352) 331-1976
   AARONH@CHW-INC.COM
6. DATE OF BOUNDARY SURVEY:
   9/28/2018
7. WATER SUPPLY:
   AN 8-INCH POTABLE WATER MAIN RUNS ALONG THE CR 235 RIGHT-OF-WAY, AND A 6-INCH POTABLE WATER MAIN RUNS ALONG NW 157TH STREET. DIRECT CONNECTION IS ANTICIPATED WITHOUT THE NEED FOR JACK AND BORE OF CR 235.
8. SEWAGE DISPOSAL:
   A NEW GRAVITY SEWER SYSTEM WILL CONNECT TO THE EXISTING SANITARY LIFT STATION LOCATED ON THE DEVELOPMENT SIDE OF CR 235.
9. DRAINAGE:
   STORMWATER MANAGEMENT FACILITIES (SMF) ARE LOCATED THROUGHOUT THE DEVELOPMENT, INCLUDING ALONG CR 235, THE SITE'S LOW AREA, AND THE TOPOGRAPHIC FEATURE ADJACENT TO NW 157TH STREET. THIS PLAN ILLUSTRATES APPROXIMATELY 15% OF THE PROJECT SITE. FINAL SIZE AND LOCATION OF SMFs WILL BE DETERMINED DURING SITE PLAN REVIEW.
10. ELECTRICAL UTILITY PROVISION:
    A CITY OF ALACHUA TRANSFORMER IS LOCATED ON THE NORTHEAST CORNER OF THE NEW ENTRANCE OFF CR 235 AND WILL SUPPLY UNDERGROUND ELECTRIC TO THE DEVELOPMENT.
11. NATURAL FEATURES:
    N/A
12. ZONING/LAND USE INFORMATION:
    ZONING = PUD
    LAND USE = MODERATE DENSITY RESIDENTIAL

SETBACKS:

13. COVENANTS AND RESTRICTIONS:
    PROVIDED
14. ROADWAY TYPE: URBAN CURB AND GUTTER ROADWAY WITH STORM SEWER PIPING AND RENTAL LIGHTING FROM CITY OF ALACHUA.
15. UTILITY PROVIDERS:
    WATER: CITY OF ALACHUA
    SEWER: CITY OF ALACHUA
    ELECTRIC: CITY OF ALACHUA
    PHONE / CABLE: WINDSTREAM AND COX

* Florida Department of Transportation, District Two, Level of Service Reporting Tool 2019, accessed April 7, 2021.
** Formula: Comp Plan MSV - (Existing Traffic + Reserved Trips from Development Orders with Concurrency Reservation.)
^ County Facility AADT counts provided by Alachua County Public Works, April 2022.
^^ AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.

Appendix I
Turn Lane Warrant Analysis

When Not to Consider Exclusive Right-Turn Lanes

- Dense or built-out corridors with limited space
- Right-turn lane that would negatively impact pedestrians or bicyclists
- Vehicular movements from driveways or median openings that cross the right-turn lane resulting in multiple threat crashes
- Context classifications C2T, C4, C5, or C6

When Exclusive Right-Turn Lanes are Beneficial

There are instances when adding an exclusive right-turn lane for unsignalized driveways are beneficial to traffic operations and safety. ***Table 27*** provides some guidance for this situation based on the speed limit of the roadway and how many right turns occur per hour. Locations where the Auto and Truck Modal Emphasis is "High" may be appropriate for consideration of Exclusive Right Turn Lanes.

Table 27 – Recommended Guidelines for Exclusive Right-Turn Lanes to Unsignalized Driveway[10]

Roadway Posted Speed Limit	Number of Right Turns Per Hour
45 mph or less	80 – 125[1]
Over 45 mph	35 – 55[2]
Note: A posted speed limit of 45 mph may be used with these thresholds if the operating speeds are known to be over 45 mph during the time of peak right turn demand.	
Note on traffic projections: Projecting turning volumes is, at best, a knowledgeable estimate. Keep this in mind especially if the projections of right turns are close to meeting the guidelines. In that case, consider requiring the turn lane.	
[1] The lower threshold of 80 right-turn vehicles per hour would be most used for higher volume (greater than 600 vehicles per hour, per lane in one direction on the major roadway) or two-lane roads where lateral movement is restricted. The 125 right-turn vehicles per hour upper threshold would be most appropriate on lower volume roadways, multilane highways, or driveways with a large entry radius (50 feet or greater).	
[2] The lower threshold of 35 right-turn vehicles per hour would be most appropriately used on higher volume two-lane roadways where lateral movement is restricted. The 55 right-turn vehicles per hour upper threshold would be most appropriate on lower volume roadways, multilane highways, or driveways with large entry radius (50 feet or greater).	

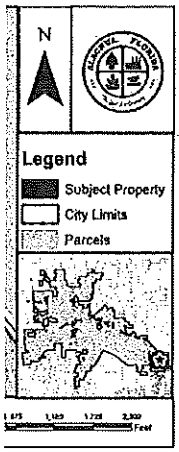
Source: NCHRP Report 420 (Impacts of Access Management Techniques)

CR 235/North Site Access
EBR
AM(PM)
11(34)

CR 235/South Site Access
EBR
AM(PM)
14(48)

These recommendations are primarily based on the research done in NCHRP Report 420, Impacts of Access Management Techniques, Chapter 4 – Unsignalized Access Spacing (Technique 1B), and Use of Speed Differential as a Measure to Evaluate the Need for Right-Turn Deceleration Lane at Unsignalized Intersections.

In the *NCHRP Report 420*, the observed high-speed roads, 30 to 40 right-turn vehicles per hour caused evasive maneuvers on 5 - 10 percent of the following through vehicles. For lower speed roadways, 80 to 110 right-turn vehicles caused 15 - 20 percent of the following through vehicles to make evasive maneuvers. The choice of acceptable percentages of through vehicles impacted is a decision based on reasonable expectations of the different roadways.



In this study, by modeling speed differentials, a better understanding of the impacts of through volume and driveway radius was discovered.

[10] May not be appropriate for signalized locations where signal phasing plays an important role in determining the need for right turn lanes.

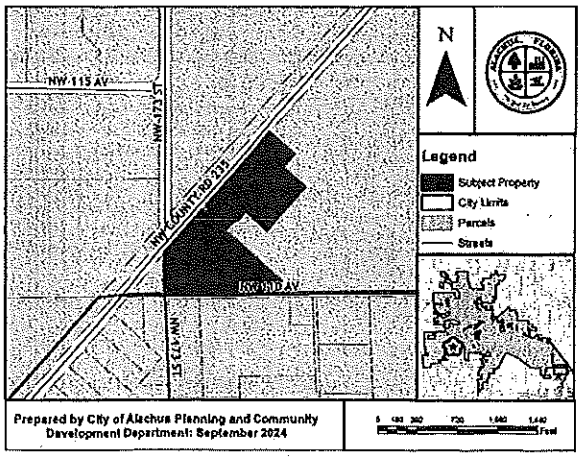
Alachua Soil and Water Conservation District will hold its January meeting on Monday, Jan. 27, 2025 at 5:30 p.m. The meeting will be at the Freddie Warmack Building, 24505 Newberry Lane in Newberry. The public is welcome to attend.

■ **Feb. 3: Spaghetti To-Go Dinner Fundraiser** – Hosted by the GFWC High Springs New Century Woman's Club. Pickup is from 4:30 - 6:30 p.m. The venue is the Woman's Club located at 23674 West U.S. Highway 27. The menu includes gluten-free or regular spaghetti with meat or marinara sauce, Caesar salad, bread and butter and dessert for $10.00. Credit cards are accepted. For information call 386-518-3276, Ext. 2. The proceeds from this fundraiser will benefit local nonprofit daycare centers.

■ **Feb. 22: The Bethlehem Methodist Episcopal Cemetery Restoration Organization** (BMECRO) will present a black history program Feb. 22, 2025 from 10 a.m. - 2:30 p.m. at the Archer Community Center, 16671 S.W. 137th Avenue in Archer. The program will include guest speaker Ida B. Booth from Tampa and a special PowerPoint presentation to show black history in Archer and beyond. Posters and pictures will be on display for all in attendance to view. The event is free and the public is invited.

■ **March 8: "Fun in the Park"** – This event is hosted by Friends of O'Leno State Park, 410 S.E. Oleno Park Road, High Springs. Exhibit hours are 11 a.m. – 3 p.m. People interested in sharing their artwork, historical and/or environmental exhibits should RSVP to events@friendsofoleno.org. Vendor fee for this event is $15.

■ **Fridays: High Springs Farmers Market** from 3 -7 p.m. at the Farmers Market Pavilion, 23517 N.W. 185th Road, High Springs. Local growers, producers and crafters. Veggies, plants, duck and chicken eggs, meats, poultry, canned goods, honey, hot food, soap, art, woodcrafts, and tie dye. For information on how to become a vendor contact Carol at 352-275-6346.



■ **Saturdays: The Newberry Farmers Market**, sponsored by the Main Street Organization. This market runs every Saturday from 8 – 12 p.m. and is located in downtown Newberry on the corner of Newberry Road and 254th Street. For further information, contact the Main Street Organization at newberrymainstreet.com

■ **Tuesdays: Archer Farmers Market** from 3 – 7 p.m. on the grounds of the Archer Railway Depot Museum, 16994 S.W. 134th Avenue, Archer. Local farmers offer fresh vegetables, herbs, fruit, honey and plants. Artisan breads and jellies will also be available. Vendors are invited to submit applications and backyard gardeners with excess produce are welcome as well. The Museum will also be open. Vendor applications are available by email request at archerhistorical@gmail.com or by contacting Linda at 352-374-8240

City of ALACHUA

NOTICE OF PUBLIC HEARING BEFORE THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on February 10, 2025 at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following: A request by Aaron Hickman, PSM, of CHW, LLC applicant and agent, for Waco Properties, Inc., property owner, for consideration of the Final Plat for Fletcher Trace Phase 1. The final plat proposes to subdivide a ±21.29-acre subject property into a total of 32 lots with associated common areas and road right-of-way. The subject property is located east of CR 235, and north of NW 110th Ave., Tax Parcel Number 03980-002-001; Future Land Use Map (FLUM) Designation: Moderate Density Residential; Zoning: Planned Development – Residential (PD-R).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

(Number of signs)

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 1 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 1, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 1 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $169,223, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements ($1,692,237.44) set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$183,637.07, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth ($1,836,370.73) in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer or successor shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $80,214.30 ($66,845.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $6,684.53 ($66,845.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

DESCRIPTION

A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA. BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 490.50 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT-OF-WAY); THENCE NORTH 41°36'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 908.43 FEET; THENCE SOUTH 48°07'09" EAST, DEPARTING SAID SOUTHERLY RIGHT OF WAY, A DISTANCE OF 50.00 FEET; THENCE NORTH 41°09'51" EAST, A DISTANCE OF 99.06 FEET; THENCE NORTH 48°50'09" WEST, A DISTANCE OF 99.06 FEET TO THE AFOREMENTIONED SOUTHERLY RIGHT OF WAY OF COUNTY ROAD NO. 235; THENCE NORTH 41°09'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 879.87 FEET; THENCE DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING ELEVEN (11) COURSES, (1) SOUTH 48°19'09" EAST, A DISTANCE OF 285.89 FEET; (2) SOUTH 41°09'51" WEST, A DISTANCE OF 169.39 FEET; (3) SOUTH 18°32'09" EAST, A DISTANCE OF 278.66 FEET; (4) SOUTH 41°09'51" WEST, A DISTANCE OF 519.24 FEET; (5) NORTH 48°50'09" WEST, A DISTANCE OF 374.69 FEET; (6) SOUTH 41°09'51" WEST, A DISTANCE OF 118.16 FEET; (7) SOUTH 48°50'09" EAST, A DISTANCE OF 50.00 FEET; (8) SOUTH 41°09'51" WEST, A DISTANCE OF 139.00 FEET; (9) SOUTH 48°50'09" EAST, A DISTANCE OF 278.66 FEET; (10) SOUTH 41°09'51" WEST, A DISTANCE OF 292.47 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE NORTHEAST HAVING A RADIUS OF 175.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 61°07'21" EAST, 76.08 FEET; (11) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 56°27'45", AN ARC LENGTH OF 29.86 FEET TO THE END OF SAID CURVE; (12) THENCE DEPARTING SAID CURVE, SOUTH 26°39'04" WEST, A DISTANCE OF 139.18 FEET TO THE SOUTH LINE OF AFOREMENTIONED SECTION 28; THENCE SOUTH 89°20'56" WEST, ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 1969.77 FEET TO THE POINT OF BEGINNING.

PARCEL OF LAND CONTAINING 21.29 ACRES MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), HEREIN HOLDING A BEARING OF SOUTH 89°33'47" WEST FOR THE SOUTH LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88), BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBERED D178, WITH A PUBLISHED ELEVATION OF 180.53 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1: 5,000.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT = 15'
   REAR = 5'
   SIDE = 5'
   20 FEET FACING GARAGES = 15'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL No. 12001C0129 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORMWATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNER'S ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 2.E.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS, ASE.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (9) FLORIDA STATUTES
8. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
9. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS ONE (1) THROUGH TWENTY-TWO (22).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 1

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 1 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 32 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 8,000 gallons per day (32 lots x 250 gallons per day) of wastewater capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 8,800 gallons per day (32 lots x 275 gallons per day) of water capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 152 Average Annual Daily Trips ("AADT") and 16 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 305 Average Annual Daily Trips ("AADT") and 33 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .42 acres (2.6 persons per household x 32 units x 5 acres per 1,000 persons) of recreation capacity for the 32 units proposed in Fletceher Trace Phase 1 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 60.74 tons per year (0.73 tons per capita per year x 2.6 persons per household x 32 units) of solid waste capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 32 units proposed in Fletcher Trace Phase 1.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 2 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 2, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 2 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $59,965.35, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$599,653.52] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$16,258.29, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$162,582.89] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $60,778.99 ($50,649.16 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $5,064.92 ($50,649.16 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

Exhibit "C"
Certificate of Concurrency Compliance

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 2

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 2 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 42 residential lots (14 detached and 28 attached);

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 10,500 gallons per day (42 lots x 250 gallons per day) of wastewater capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 11,550 gallons per day (42 lots x 275 gallons per day) of water capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 200 Average Annual Daily Trips ("AADT") and 21 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 400 Average Annual Daily Trips ("AADT") and 43 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .55 acres (2.6 persons per household x 42 units x 5 acres per 1,000 persons) of recreation capacity for the 42 units proposed in Fletceher Trace Phase 2 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 79.72 tons per year (0.73 tons per capita per year x 2.6 persons per household x 42 units) of solid waste capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 2 (two) student stations in the Alachua SCSA for high schools, for the 42 units proposed in Fletcher Trace Phase 2.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 3 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 3, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 3 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $113,784.92, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$1,137,849.21] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$47,436.64, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$474,366.38] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $90,945.90 ($75,788.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $7,578.83 ($75,788.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

SHEET ONE OF TWO

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2440, PAGE 1824, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 89°34'19" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 491.10 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°48'51" EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2352.87 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE NORTH 41°48'51" EAST, A DISTANCE OF 1870.34 FEET TO THE WEST LINE OF THE NORTHWEST QUARTER (NW 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 297.37 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 89°34'19" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTERLY QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 2637.73 FEET; THENCE, DEPARTING SAID WEST LINE THE FOLLOWING NINE (9) COURSES; (1) SOUTH 84°21'49" WEST, A DISTANCE OF 68.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST; HAVING A RADIUS OF 180.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 46°16'21" WEST 189.84 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 64°17'39", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°02'46" WEST, A DISTANCE OF 190.87 FEET TO THE BEGINNING OF A CURVE, CONCAVE TO THE SOUTHWEST; HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 41°59'13" EAST 35.74 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 99°09'09", AN ARC LENGTH OF 34.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 16.05 FEET; (6) SOUTH 41°48'49" WEST, A DISTANCE OF 420.48 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST; HAVING A RADIUS OF 208.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 63°30'39" WEST 189.83 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°34'54", AN ARC LENGTH OF 189.84 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°56'51" WEST, A DISTANCE OF 511.86 FEET; (9) NORTH 48°03'09" WEST, A DISTANCE OF 296.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.58 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 89°34'19" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER DS78, WITH A PUBLISHED ELEVATION OF 156.40' (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1' IN 10,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT = 15'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGE = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X" AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 548, COMMUNITY PANEL NO. "120060 0120 D", EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNERS ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 3.8.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (5) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 3

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 3 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 37 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 9,250 gallons per day (37 lots x 250 gallons per day) of wastewater capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 10,175 gallons per day (37 lots x 275 gallons per day) of water capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 176 Average Annual Daily Trips ("AADT") and 19 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 352 Average Annual Daily Trips ("AADT") and 38 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .48acres (2.6 persons per household x 37 units x 5 acres per 1,000 persons) of recreation capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 70.23 tons per year (0.73 tons per capita per year x 2.6 persons per household x 37 units) of solid waste capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 37 units proposed in Fletcher Trace Phase 3.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

City of Alachua
THE GOOD LIFE COMMUNITY

Commission Agenda Item

MEETING DATE: February 10, 2025

SUBJECT: Fletcher Trace Phase 2 Final Plat (PSP24-0008): A request by Aaron Hickman, PSM, of CHW, Inc, applicant and agent, for Waco of Alabama, Inc., property owner, for consideration of the Final Plat for Fletcher Trace Phase 2, which proposes to subdivide a ±5.11 acre subject property into a total of 42 single family lots (14 detached, 28 attached) with associated common areas and road right-of-way; Consisting of Tax Parcel Number 03980-002-001 (Quasi-Judicial Hearing).

PREPARED BY: Adam Hall

RECOMMENDED ACTION:

Staff recommends that the City Commission:

1. Approve the Final Plat of Phase 2 of Fletcher Trace ("Final Plat");
2. Approve the "Subdividers Agreement for Fletcher Trace Phase 2" ("Subdividers Agreement"); and,
3. Authorize the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement;

Recommended Motion:

Based upon the competent substantial evidence presented at this hearing, the presentation before this Commission, and Staff's recommendation, this Commission finds the application to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and therefore this Commission:

1. *Approves the Final Plat of Phase 2 of Fletcher Trace ("Final Plat");*
2. *Approve the "Subdividers Agreement for Fletcher Trace Phase 2" ("Subdividers Agreement"); and,*
3. *Authorizes the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement*

Summary

This application is a request by Aaron Hickman, PSM, of CHW, Inc., applicant and agent for Waco of Alabama, Inc., property owner, for consideration of the final plat of Phase 2 of Fletcher Trace subdivision, which proposes to subdivide a ±5.11 acre subject property into a total of 42 lots with associated common areas and road right-of-way.

The subject property consists of a portion of Tax Parcel 03980-002-001, and is located east of CR 235 and north of NW 110th Ave.

The proposed Fletcher Trace Phase 2 subdivision will consist of lots ranging size from ±2,200 square feet to ±5,500 square feet, with the majority of lots being ±2,200 square feet. These lots are attached units. The final plat proposes 32 single family detached residential lots. The approved Planned Development Master Plan permits a maximum of 472 residential units (311 in Development Area A, 106 in Development Area B, 28 in Development Area C, and 27 in Development Area B). The final plat proposes common areas along all boundaries of the project area. Stormwater for the proposed development will be conveyed to and treated within two (2) stormwater management facilities located in Phase 1.

One (1) vehicular access point will be provided to CR235. Development within the proposed subdivision will connect to potable water and wastewater facilities. An analysis of the development's impact on other public facilities, including transportation, potable water, sanitary sewer, solid waste, and public schools, is provided within this report.

Section 2.4.10(G)(5) of the City's Land Development Regulations (LDRs) establishes the requirements for a final plat. An analysis of the application's compliance with the applicable standards of this section has been provided within this report. The Planned Development – Residential zoning designation for the subject property were approved by the City Commission on April 25, 2022 through Ordinance 22-10. The project name at that time was Savannah Station Phase 3. The preliminary plat/ Final PD plan was approved by the City Commission on September 26, 2022.

Construction Plans were approved on April 18, 2024.

The Developer intends to complete the improvements as outlined in the approved Construction Plans before recording the plat, therefore, in accordance with Section 2.4.10 (G)(6), a surety device is not necessary to be posted. Once improvements are complete and approved by the City, the Developer must post a maintenance surety bond on which time the approved Final Plat for Fletcher Trace Phase 2 can be released for recording, and lots may be sold or transferred.

Planning & Community Development Department

Staff Report

City Commission Hearing Date: February 10, 2025
Quasi-Judicial Hearing

SUBJECT:	A request for consideration of the final plat of Phase 2 of Fletcher Trace which proposes to subdivide a ±5.11-acre subject property into a total of 42 single family lots (14 detached, 28 attached) with associated common areas and road right-of-way
APPLICANT/AGENT:	Aaron Hickman, PSM, CHW, Inc.
PROPERTY OWNER:	Waco of Alabama, Inc.
LOCATION:	East of CR 235, north of NW 110th Avenue
PARCEL ID NUMBERS:	Portion of 03980-002-001
FLUM DESIGNATION:	Moderate Density Residential
ZONING:	Planned Development – Residential (PD-R)
OVERLAY:	N/A
ACREAGE:	±5.11 acres
PROJECT PLANNER:	Adam Hall, AICP, Principal Planner
RECOMMENDATION:	Staff recommends that the City Commission: 1. Approve the Final Plat of Phase 2 of Fletcher Trace ("Final Plat"); 2. Approve the "Subdividers Agreement for Fletcher Trace Phase 2" ("Subdividers Agreement"); and, 3. Authorize the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement;
RECOMMENDED MOTION:	*Based upon the competent substantial evidence presented at this hearing, the presentation before this Commission, and Staff's recommendation, this Commission finds the application to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and therefore this Commission:* *1. Approves the Final Plat of Phase 2 of Fletcher Trace ("Final Plat");* *2. Approve the "Subdividers Agreement for Fletcher Trace Phase 2" ("Subdividers Agreement"); and,*

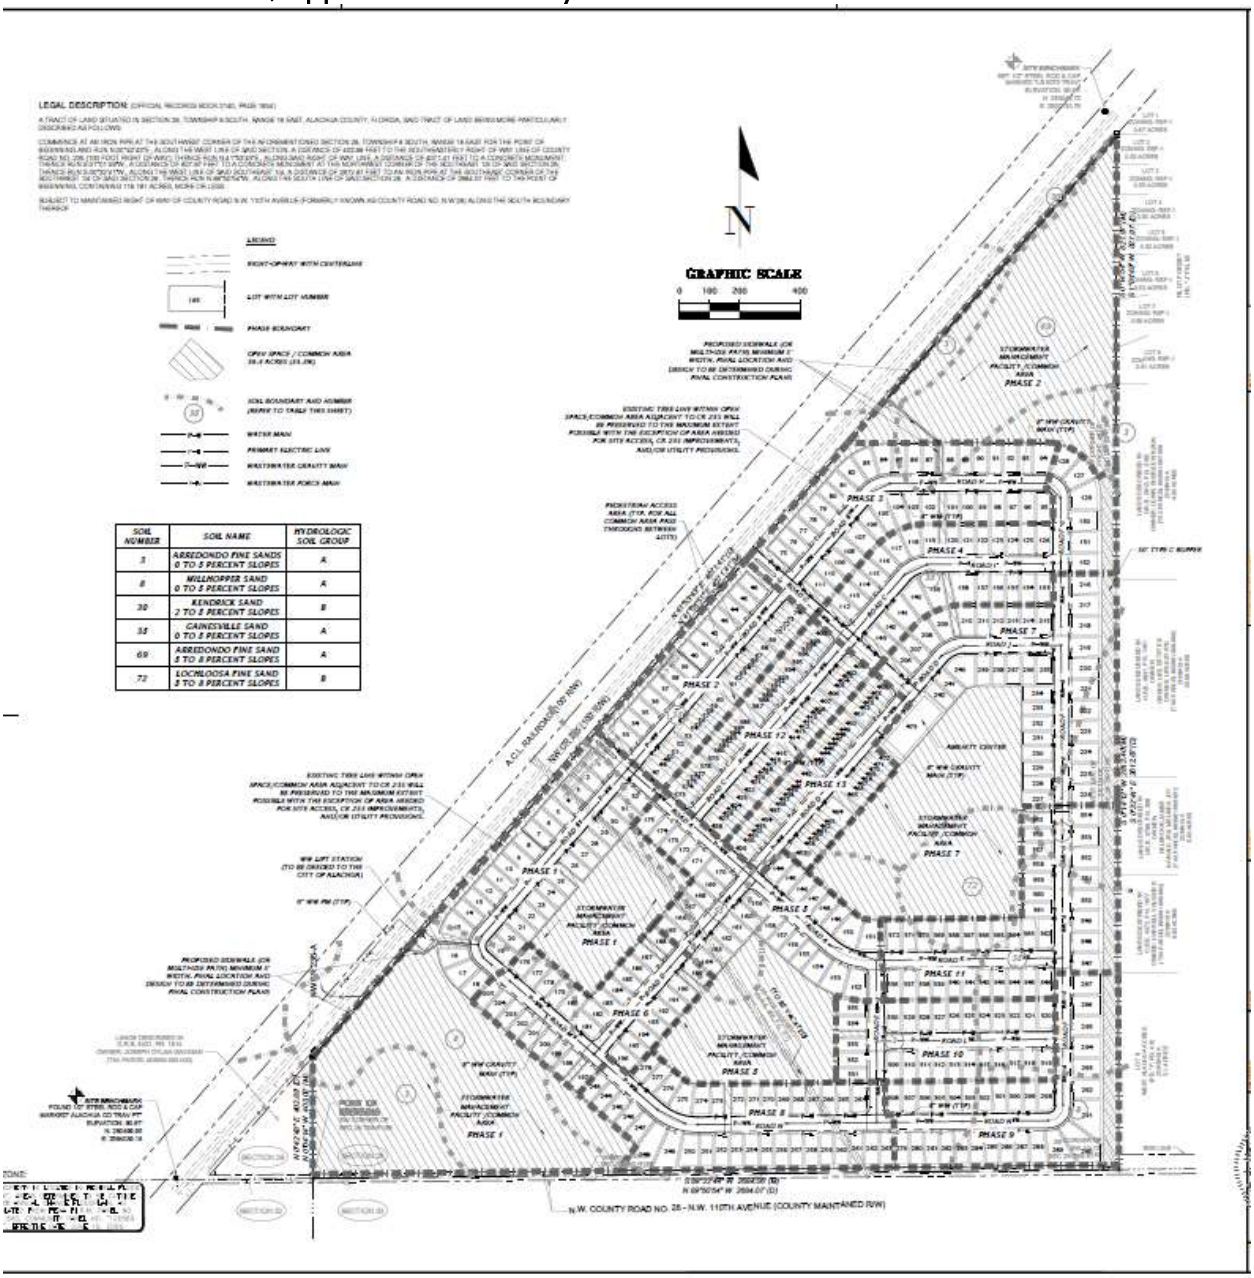
3. *Authorizes the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement;*

SUMMARY

This application is a request by Aaron Hickman, PSM, of CHW, Inc., applicant and agent for Waco of Alabama, Inc., property owner, for consideration of the final plat of Phase 2 of Fletcher Trace subdivision, which proposes to subdivide a ±5.11 acre subject property into a total of 42 lots with associated common areas and road right-of-way.

The subject property consists of a portion of Tax Parcel 03980-002-001, and is located east of CR 235 and north of NW 110th Ave.

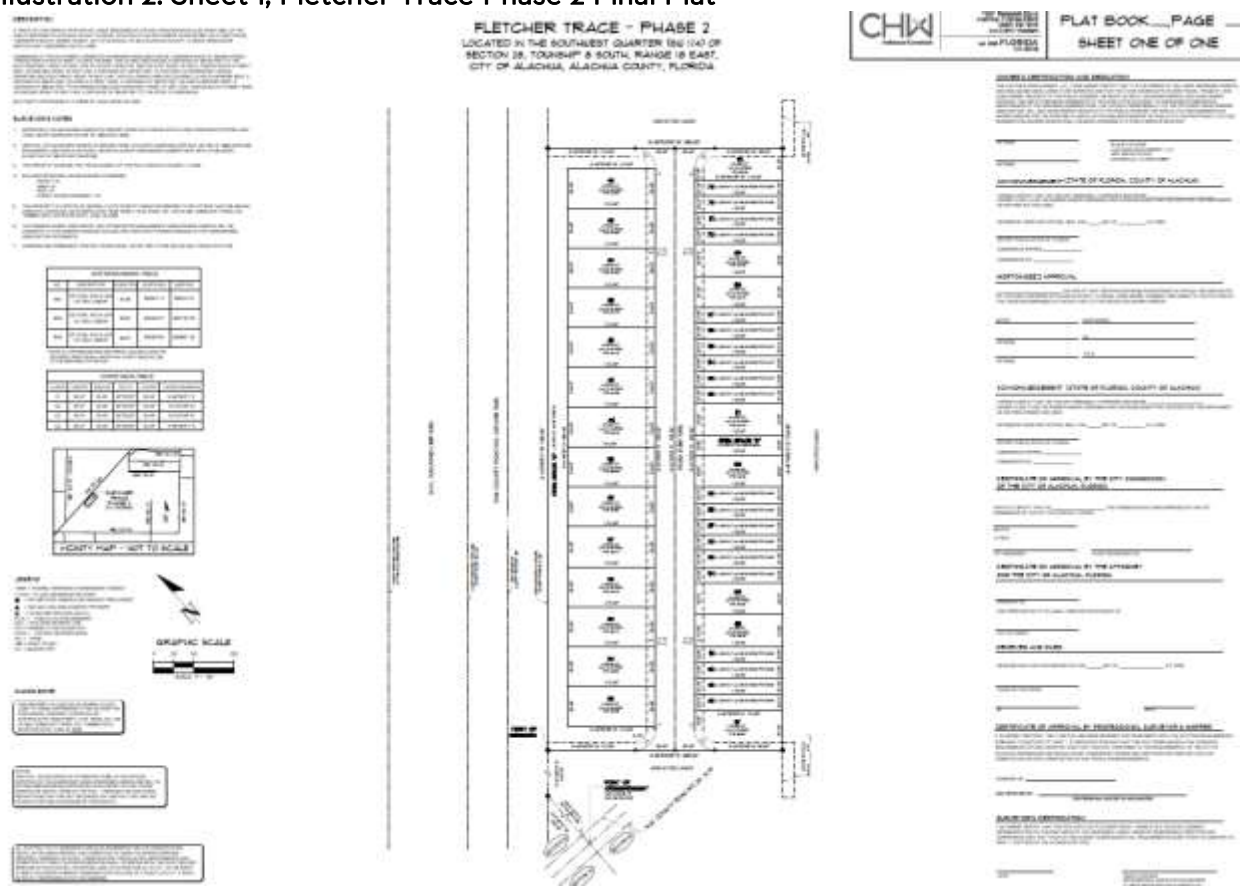
The proposed Fletcher Trace Phase 2 subdivision will consist of lots ranging size from ±2,200 square feet to ±5,500 square feet, with the majority of lots being ±2,200 square feet. These lots are attached units. The final plat proposes 32 single family detached residential lots. The approved Planned Development Master Plan permits a maximum of 472 residential units (311 in Development Area A, 106 in Development Area B, 28 in Development Area C, and 27 in Development Area B). The final plat proposes common areas along all boundaries of the project area. Stormwater for the proposed development will be conveyed to and treated within two (2) stormwater management facilities located in Phase 1.



One (1) vehicular access point will be provided to CR235. Development within the proposed subdivision will connect to potable water and wastewater facilities. An analysis of the development's impact on other public facilities, including transportation, potable water, sanitary sewer, solid waste, and public schools, is provided within this report.

Section 2.4.10(G)(5) of the City's Land Development Regulations (LDRs) establishes the requirements for a final plat. An analysis of the application's compliance with the applicable standards of this section has been provided within this report. The Planned Development – Residential zoning designation for the subject property were approved by the City Commission on April 25, 2022 through Ordinance 22-10. The project name at that time was Savannah Station Phase 3. The preliminary plat/ Final PD plan was approved by the City Commission on September 26, 2022.

Construction Plans were approved on April 18, 2024.



The Developer intends to complete the improvements as outlined in the approved Construction Plans before recording the plat, therefore, in accordance with Section 2.4.10 (G)(6), a surety device is not necessary to be posted. Once improvements are complete and approved by the City, the Developer must post a maintenance surety bond on which time the approved Final Plat for Fletcher Trace Phase 2 can be released for recording, and lots may be sold or transferred.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) Designations, and zoning districts of the surrounding area are identified in Table 1. Map 1 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. It is not intended to be all-inclusive, and may not identify all existing uses, FLUM Designations, and/or zoning districts surrounding the subject property.)

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Industrial	Industrial	IG
East	Residential	Rural/ Agriculture (Alachua County) and Moderate Density Residential	A (Alachua County)/ RSF-1
West	Industrial	Industrial	IG
South	Residential	Rural/Agriculture (Alachua County)	A (Alachua County)

Map 1. Vicinity Map

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The Goals, Objectives, and Policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

The property currently has a Future Land Use Map Designation of Moderate Density Residential, which permits up to 4 units per acre. The following Comprehensive Plan Elements have Goals, Objectives, and Policies (GOPs) that support the proposed development to the Future Land Use Map of the City of Alachua's Comprehensive Plan:

- Future Land Use Element
- Transportation Element
- Housing Element
- Recreation Element
- Community Facilities Natural Groundwater Aquifer Recharge Element
- Conservation and Open Space Element

The applicant has provided an analysis of the proposed final plat's consistency with the Comprehensive Plan. Based upon the applicant's Comprehensive Plan Consistency Analysis and information presented below, staff finds the application consistent with the Comprehensive Plan and the Goals, Objectives, and Policies (GOPs) therein.

Policy 1.2b: *Moderate Density Residential* (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. **Residential Planned Developments**; and,
8. Supporting community services such as schools, houses of worship, parks, and community centers.

Analysis of Consistency with Policy 1.2.c: The proposed final plat is part of the Fletcher Trace (Savannah Station Phase 3) Planned Development, which is a permitted use within the Moderate Density Residential land use.

Objective 2.1 establishes the standards for Planned Developments (PD), including Residential Planned Developments.

Objective 2.1: Planned Development (PD) Standards

In an effort to reduce the impacts of urban sprawl on the community and the region, the City of Alachua shall provide for a wide array of planned developments to encourage the creation of interrelated neighborhoods and districts to increase the quality of life for all residents of the City.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PDs for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.
2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.
3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.

4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.
5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Analysis of Consistency with Goal 2, Objective 2.1, and Policy 2.1.a: This application proposes a final plat in accordance with the approved PD Master Plan and PD Ordnance and Agreement. The final plat has been reviewed for compliance with these documents.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Analysis of Consistency with Objective 5.1 and Policies 5.1.a – e: The subject property has historically been used for agricultural operations. There are no known listed species, wetlands, special flood hazard areas, or other significant natural features. If any regulated plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations.

Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities and services necessary for the development.

Analysis of Consistency with Objective 5.2: The proposed final plat has been reviewed for its impacts to all public facilities monitored for concurrency, including parks and education facilities. A complete analysis of these impacts can be found in the "Public Facilities Impact" section of this Report.

GOAL 9: Water and Wastewater Service:

The City will ensure that new development within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the Comprehensive Plan, shall connect to the City of Alachua's potable water and wastewater system.

Policy 9.2: Any new residential subdivision within the corporate limits, where potable water service is available, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within either a Residential or Agriculture Future Land Use Map Designation shall connect to the City of Alachua's potable water system. Any new residential subdivision within the corporate limits, where wastewater service is available, as defined in Policy 1.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within a Residential Future Land Use Map Designation shall connect to the City of Alachua's wastewater system.

Analysis of Consistency with Goal 9 and Policy 9.2: Potable water is available to the site, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan.

<u>Housing Element</u>

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes and manufactured housing, and shall ensure that

appropriate land use designations and zoning districts exist to accommodate each type.

Analysis of Consistency with Policy 1.1.a: This project would support additional housing within the City, thereby furthering Policy 1.1.a.

Recreation Element

Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Analysis of Consistency with Policy 1.2.b: An analysis of the impacts to recreation facilities has been provided within this report.

Transportation Element

Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Analysis of Consistency with Objective 1.1: An analysis of the impacts to transportation facilities has been provided within this report. There are no transportation facilities that would be deficient as a result of this application.

Community Facilities Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which includes all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity water main exists within 100 feet of the property line of any lot with a residential land use category or an existing single family residence and wastewater service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. Gravity wastewater main exists with 500 feet of the property line of any proposed residential subdivision consisting of 5 units or less and the gravity wastewater system is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family residential development, or any commercial development, or

any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 1.2.a: The subject property is located within the wastewater service area, and any future development on the subject property will be required to connect to a wastewater system.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill	.73 tons per capita per year

Analysis of Consistency with Objective 2.1.a: An analysis of the impacts to solid waste facilities has been provided within this report.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within 100 feet of any lot within a residential land use category or an existing single family residence water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. A water main exists within 500 feet of any proposed residential subdivision consisting of 5 units or less and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 4.1.b: The subject property is located within the potable water service area, and any future development on the subject property will be required to connect to a potable water system.

Conservation and Open Space Element

OBJECTIVE 1.3: Listed Species

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.a: The City shall ensure that its ordinances, regulations and policies protect listed species and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.c: The City shall obtain data from the Florida Fish and Wildlife Conservation Commission, Alachua County Environmental Protection Department, Florida Department of Environmental Protection, to maintain a periodically updated inventory of listed species and habitats located within City limits or immediately adjacent to City limits. The City will use the Florida Natural Areas Inventory as a base inventory.

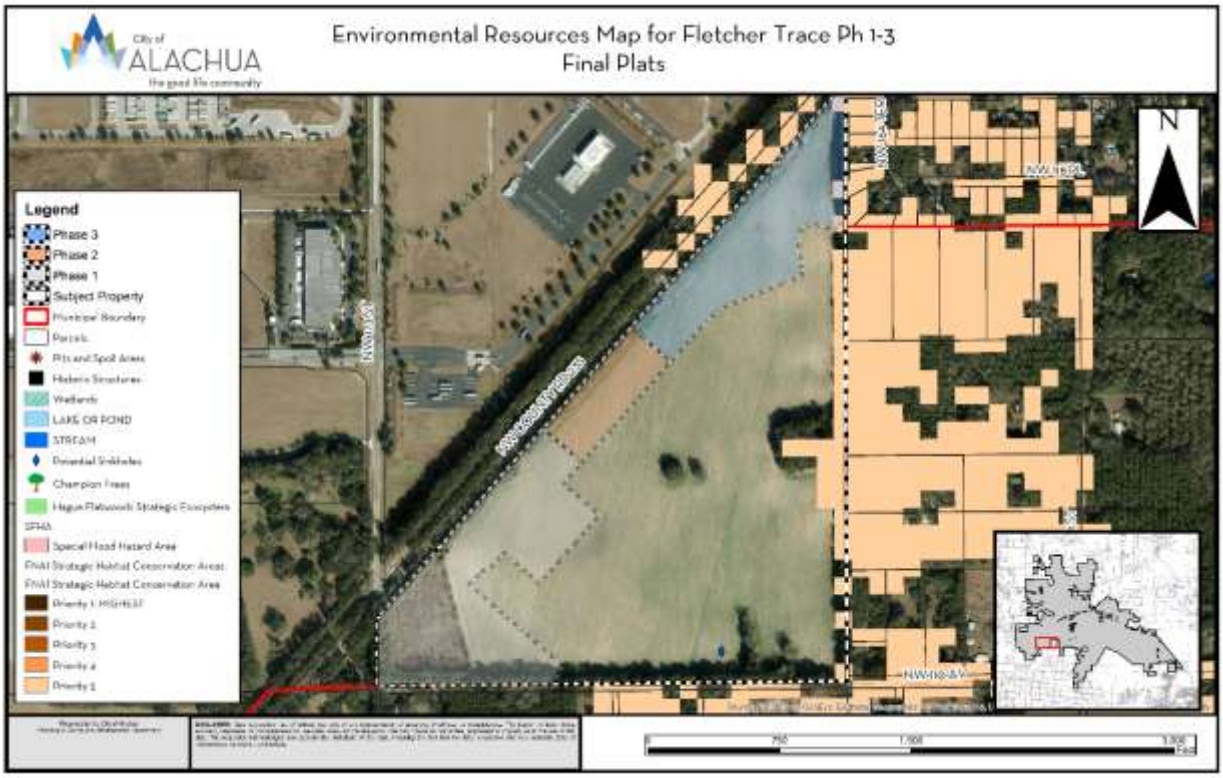
Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Analysis of Consistency with Objective 1.3 and Policies 1.3.a – e:

An environmental conditions and site suitability analysis has been provided separately in this report. Future development of the site must comply with the environmental protections established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 1.10: Wetlands



The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Analysis of Consistency with Objective 1.10:

There are no known wetlands on the subject property. If wetlands are discovered, applicable Goals, Objectives, and Policies of the City's Comprehensive Plan as well as applicable requirements of Alachua County will have to be conformed to.

ENVIRONMENTAL CONDITIONS & SITE SUITIBILITY ANALYSIS

Map 2. Environmental Conditions Map

Wetlands

According to the best available data, there are no wetlands on the subject property.

Evaluation: Applicable standards in the City's Comprehensive Plan, Land Development Regulations, and Suwannee River Water Management District (SRWMD) regulations would apply to those areas identified as wetlands. There are no identifiable wetlands on the subject property, therefore, there are no issues related to wetland protection.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1996. The purpose

of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation: The subject property is not located within or adjacent to a Strategic Ecosystem, therefore, the development will have no impact upon any Strategic Ecosystem(s) identified within the ecological inventory report.

Regulated Plant & Animal Species

The subject property is not known to contain any species identified as endangered, threatened, or of special concern, other than those described below. The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region. Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation: As required by the PD Ordinance, a listed species survey was provided with the preliminary plat/ Final PD application as part of an ecological survey report completed by Flatwoods Consulting Group. The report indicated that five gopher tortoise burrows were found on site. None were found within the area of Phase 2.

Soil Survey

Each soil type found on the subject property is identified below. The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff). There are four hydrologic groups: A, B, C, and D. “Group A” soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. “Group D” soils have very lower infiltration rates and therefore a higher runoff potential.

There are six (6) soil types found on the subject property for the Fletcher Trace Preliminary Plat:

Soil Type	Hydrologic Group	Drainage Class	Dwellings without basements	% of Subject Property (may not total to 100% due to rounding)
Arredondo fine sand, 0 to 5 percent slopes	A	Well drained	Not limited	32.8
Millhopper sand, 0 to 5 percent slopes	A	Moderately well drained	Not limited	10.8
Kendrick sand, 2 to 5 percent slopes	B	Well drained	Not limited	0.2
Gainesville sand, 0 to 5 percent slopes	A	Well drained	Not limited	46.5
Arredondo fine sand, 5 to 8 percent slopes	A	Well drained	Not limited	6.8
Lochloosa fine sand, 5 to 8 percent slopes	B	Somewhat poorly drained	Not limited	3.0

Evaluation: The soil types located within the subject property do not pose any significant limitations for development of residential dwellings.

Flood Potential

Panels 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the subject property contains areas with Flood Zone "X" designations (areas determined to be outside of the 500-year floodplain).

Evaluation: No portion of the subject property appears to be located within a special flood hazard area, therefore, no issues related to flood potential.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations. GIS Data from Alachua County indicates that a karst feature may be present on the site. As a condition of the Planned Development, additional geotechnical information was provided.

Evaluation: Additional geotechnical analysis has been provided by the applicant in accordance with the conditions of the approved PD ordinance. An additional condition has been included with this preliminary plat that will require additional analysis of stormwater in this area.

Wellfield Protection Zone

Policy 7.2.1 of the Future Land Use Element of the Comprehensive Plan establishes a 500 foot radial buffer around city-owned potable water well.

Evaluation: The subject property is not currently located within a City of Alachua wellhead protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures and Markers

The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventory.

Evaluation: The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventor, therefore, no issues related to historic structures or markers.

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Section 2.4.10(G)(5)(d) of the City's Land Development Regulations (LDRs) establishes the standards with which all final plats must be found to be compliant. The application has been reviewed for compliance with the standards of Section 2.4.10(G)(5)(d). An evaluation and findings of the application's compliance with the applicable standards of Section 2.4.10(G)(5)(d) is provided below.

2.4.10(G)(5)(d) *Final plat standards.* The final plat for subdivision shall:

(i) Comply with the standards contained in Article 7, *Subdivision Standards*;

Evaluation & Findings: The application has been reviewed for and is found to be in compliance with the applicable standards of Article 7, *Subdivision Standards*. Compliance with Article 7 is demonstrated collectively within the Preliminary Plat, Construction Plans, and Final Plat.

(ii) Be in substantial conformance with the preliminary plat, and the construction plans;

Evaluation & Findings: The application has been reviewed for and is found to be in substantial conformance with the preliminary plat and construction plans.

(iii) Be consistent with all other relevant provisions of these LDRs;

Evaluation & Findings: The application has been reviewed for and is found to be in compliance with all other applicable provisions of the LDRs, including but not limited to: Article 3, *Zone Districts*; Article 4, *Use Regulations*; Article 5, *Density, Intensity, and Dimensional Standards*; and Article 6, *Development Standards*.

(iv) Be consistent with all other relevant City ordinances and regulations;

Evaluation & Findings: An evaluation of the application's consistency with the City's Comprehensive Plan has been provided within this report. The application is consistent with all other relevant City ordinances and regulations, including the approved PD Master Plan for the Fletcher Trace (Savannah Station Phase 3) development and PD Ordinance (Ordinance 22-10).

(v) Address the provision of required public improvements in the following ways:
a. Submittal of a subdivider agreement in accordance with Subsection 2.4.10(G)(4) of this section, Subdivider agreement;
b. Provide the City with surety device in accordance with Section 7.4, Improvement guarantees for public improvements, if improvements are proposed to be completed after final plat recordation;

Evaluation & Findings: A subdivider agreement has been prepared in accordance with Subsection 2.4.10(G)(4). The subdivider agreement (included within the supporting application materials attached as Exhibit "A" to this report) establishes the requirements for the construction of infrastructure, inspection of infrastructure during construction, and the maintenance guarantee for infrastructure improvements. The foregoing provisions within the subdivider agreement meet the requirements of Sections 2.4.10(G)(4) and 7.4 of the LDRs. The subdivider intends to complete improvements prior to recording final plat in the public records of Alachua County, therefore, no surety for construction is required at this time.

(vi) Include the following certificates, which shall be signed by the subdivider and the LDR Administrator:
a. Certificate of subdivider's surveyor;
b. Certificate of City's review surveyor;
c. Certificate of approval by County Health Department, if applicable;
d. Certificate of approval by the Attorney for the City;
e. Certificate of approval by the City Commission; and
f. Certificate of filing with the Alachua County Clerk of Court.

Evaluation & Findings: The face of the plat provides all certificates as listed in Subsection 2.4.10(G)(5)(d)(vi).

PUBLIC FACILITIES IMPACT

The analysis of each public facility provided below represents an analysis of the impacts generated by the proposed Final Plat – 42 dwelling units.

At present, the total impacts generated by the Final Plat are acceptable and are not anticipated to degrade the Level of Service (LOS) of any public facility. If development is proposed in the future, the applicant will be required to provide a comprehensive analysis of the impacts generated by such development upon public facilities. Facility capacity must be available to support the proposed development prior to the issuance of a final development order.

Traffic Impact

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2, 3]	Segment Description	Lanes	Functional Classification	Area Type	LOS
11	CR 235 (from NW 143rd Place to South City Limit)	2/U	Major Collector	COMM	D
17	CR235A South (from US 441 to CR235)	2/U	Major Collector	COMM	D

1 *Source: City of Alachua Comprehensive Plan, Traffic Circulation Element.*
2 *For developments generating 1,000 trips or greater, affected roadway segments are identified as all those wholly or partially located within · mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater, and all roadway segments for which the proposed development's impacts are 5% or greater on the Maximum Service Volume (MSV) of the roadway [Section 2.4.14(H)(2)(b) of the LDRs].*
3 *FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity*

Table 4. Potential Trip Generation

	Land Use	AADT (Enter/Exit)	AM Peak Hour (Enter/Exit)	PM Peak Hour (Enter/Exit)
Fletcher Trace Ph 1	Residential [1]	400 (200/200)	32 (8/24)	43 (28/15)
Potential Trips		400 (200/200)	32 (8/24)	43 (28/15)

1 *ITE Trip Generation (ITE 210). AADT: 9.52 trips per unit = 42 x 9.52 = 400 (50% enter/50% exit). PM 1.02 trips per unit = 42 x 1.02 = 43. (64% enter/36% exit). AM: .77 trips per unit = 42 x .77=32 (26% enter/74% exit).*

Table 5. Potential Impact of Affected Comprehensive Plan Roadway Segments

Traffic System Category	11 CR 235 (from NW 143rd Place to South City Limit) [1]	17 CR235A South (from US 441 to CR235)
Maximum Service Volume[2]	15,120	15,120
Existing Traffic[3]	6,180	5,302
Reserved Trips[4]	0	3,821
Available Capacity[4]	8,940	5,997
Potential Impact Generated by Proposed Final Plat[5]	400	200
Residual Capacity after Proposed Final Plat[6]	**8,540**	**5,797**
PM Peak Hour Traffic Analysis	11 CR 235 (from NW 143rd Place to South City Limit) [1]	17 CR235A South (from US 441 to CR235)
Maximum Service Volume[2]	1,359	1,359
Existing Traffic[3]	587	504
Reserved Trips[4]	0	392
Available Capacity[4]	772	463
Potential Impact Generated by Proposed Final Plat [5]	43	22
Residual Capacity after Proposed Final Plat[6]	**729**	**441**

1 *FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity.*

2 *AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.*

3 *Florida Department of Transportation. (2024). 2023 Count Data. Accessed via Florida Traffic Online April 2024.*

4 *Source: City of Alachua January 2025 Development Monitoring Report.*

5 *Source: Applicant Submitted Concurrency Analysis Report. Assumed trip distribution Segment 11: 100%, Segment 17: 50%.*

6 *Concurrency has already been reserved for this project as part of the Final PD Plan/ Preliminary Plat.*

Evaluation: As shown no segment monitored for concurrency is shown to fall below the required minimum level of service.

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity*	2,300,000
Less Actual Potable Water Flows*	1,548,250
Reserved Capacity*	468,945
Potential Potable Water Demand from Proposed Preliminary Plat **	11,550
Residual Capacity	**271,255**
Percentage of Permitted Design Capacity Utilized	**88.21%**
Sources: ** City of Alachua January 2025 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 275 gallons/du/ day x 42 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 11,550 gallons per day at build out. This analysis is based on the development potential of 42 residential dwellings that would are proposed as part of the Final Plat. Policy 4.1.c.3, of the Community Facilities Element of the City's Comprehensive Plan requires that no development orders be issued until additional capacity becomes available or funds to increase facility capacity are committed. The City is currently working on a new well-field project that has been funded and has initiated the process to increase permitted design capacity. It is anticipated that the proposed development will not adversely affect the Level of Service ("LOS") for potable water facilities, and the impacts are therefore acceptable.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity*	1,500,000
Less Actual Treatment Plant Flows*	764,000
Reserved Capacity*	437,084
Projected Potential Wastewater Demand from Proposed Preliminary Plat **	10,500
Residual Capacity	**288,416**
Percentage of Permitted Design Capacity Utilized	**80.77%**
Sources: ** City of Alachua January 2025 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 250 gallons/du/ day x 42 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 10,500 gallons per day. This analysis is based on the practicable development potential of 42 residential dwellings that would be permitted by the proposed preliminary plat. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for sanitary sewer facilities, and the impacts are therefore acceptable.

Recreational Impacts

Table 8a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	55.08
Reserved Capacity[1]	13.84
Potential Demand Generated by Development[3]	0.55
Residual Recreational Capacity After Impacts	**66.01**

Sources:
1 *City of Alachua January 2025 Development Monitoring Report.*
2 *Bureau of Economic & Business Research, University of Florida, Estimates of Population (2021); Policy 1.2.b, Recreation Elements. Census Bureau; Policy 1.2.b, Recreation Element (Formula: 2.76 persons per dwelling x 42 dwellings / [5 acres/1,000 persons])*

Table 8b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	13.79 acres
Acreage Required to Serve Demand Generated by Development[2]	.11 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	13.90 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**39.92 %**

1 *Source: City of Alachua January 2025 Development Monitoring Report.*
2 *Formula: Recreation Demand Generated by Development (0.55 acres) x 20%.*
3 *Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)*

Evaluation: The proposed preliminary plat would increase the maximum potential demand from the development of the subject property by 0.55 recreational acres, and for passive park space by 0.11 acres. Concurrency and impacts to the City's recreation system will be reevaluated at the preliminary plat review stage. It is anticipated that the proposed preliminary plat will not adversely affect the Level of Service ("LOS") of recreational facilities; therefore, the impacts are acceptable.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Lbs Per Day	Tons Per Year
Existing Demand[1]	44,060.00	8,040.95
Reserved Capacity[2]	50,407.82	9,199.43
Projected Solid Waste Demand from Application[3]	436.82	79.72
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
1 *Bureau of Economic & Business Research, University of Florida, Estimates of Population (2023); Policy 2.1.a, CFNGAR Element*
2 *City of Alachua January 2025 Development Monitoring Report*
3 *Policy 2.1.a, CFNGAR Element (Formula: .73 tons x 42 dwellings)*
4 *New River Solid Waste Facility, April 2024*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 79.72 tons per year. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of solid waste facilities; therefore, the impacts are acceptable.

Public School Impact

At this time, it is anticipated that the proposed final plat will result in a demand of 12 total student stations (5 for elementary, 3 for middle, and 4 for high school). The School Board of Alachua County provided a determination on August 28, 2024 that the school capacity would remain sufficient at build out of this project.

Any future determination must find that the students generated by the proposed amendment can be reasonably accommodated for the five, ten, and twenty year planning periods at the elementary, middle, and high school levels.

Concurrency Summary for Phases 1, 2 and 3

As Phases 1, 2, and 3 are being considered for approval at the same time, an analysis has been generated for the cumulative impacts that all three projects will have on Public Facilities. The analysis of each public facility provided below represents an analysis of the impacts generated by the proposed final plats for Phases 1, 2, and 3 of Fletcher Trace – 111 dwelling units.

At present, the total impacts generated by the proposed plats are acceptable and are not anticipated to degrade the Level of Service (LOS) of any public facility. If development is proposed in the future, the applicant will be required to provide a comprehensive analysis of the impacts generated by such development upon public facilities. Facility capacity must be available to support the proposed development prior to the issuance of a final development order.

Traffic Impact

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2, 3]	Segment Description	Lanes	Functional Classification	Area Type	LOS

Evaluation: As shown no segment monitored for concurrency is shown to fall below the required minimum level of service.

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity*	2,300,000
Less Actual Potable Water Flows*	1,548,250
Reserved Capacity*	468,945
Potential Potable Water Demand from Proposed Preliminary Plat **	30,525
Residual Capacity	**252,280**
Percentage of Permitted Design Capacity Utilized	**89.03%**
Sources: ** City of Alachua January 2025 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 275 gallons/du/ day x 111 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 30,525 gallons per day at build out. This analysis is based on the development potential of 111 residential dwellings that would are proposed as part of the Final Plats for Phases 1, 2 and 3. Policy 4.1.c.3, of the Community Facilities Element of the City's Comprehensive Plan requires that no development orders be issued until additional capacity becomes available or funds to increase facility capacity are committed. The City is currently working on a new well-field project that has been funded and has initiated the process to increase permitted design capacity. It is anticipated that the proposed development will not adversely affect the Level of Service ("LOS") for potable water facilities, and the impacts are therefore acceptable.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity*	1,500,000
Less Actual Treatment Plant Flows*	764,000
Reserved Capacity*	437,084
Projected Potential Wastewater Demand from Proposed Preliminary Plat **	27,750
Residual Capacity	**271,166**
Percentage of Permitted Design Capacity Utilized	**81.92%**
Sources: ** City of Alachua January 2025 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 250 gallons/du/ day x 111 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 27,750 gallons per day. This analysis is based on the practicable development potential of 111 residential dwellings that would be permitted by the proposed preliminary plat. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for sanitary sewer facilities, and the impacts are therefore acceptable.

Recreational Impacts

Table 8a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	55.08
Reserved Capacity[1]	13.84
Potential Demand Generated by Development[3]	1.45
Residual Recreational Capacity After Impacts	**65.11**

Table 8b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	13.79 acres
Acreage Required to Serve Demand Generated by Development[2]	.29 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	14.08 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**40.44 %**

4 Source: City of Alachua January 2025 Development Monitoring Report.
5 Formula: Recreation Demand Generated by Development (01.45 acres) x 20%.
6 Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)

Evaluation: The proposed preliminary plat would increase the maximum potential demand from the development of the subject property by 1.45 recreational acres, and for passive park space by 0.29 acres. Concurrency and impacts to the City's recreation system will be reevaluated at the preliminary plat review stage. It is anticipated that the proposed preliminary plat will not adversely affect the Level of Service ("LOS") of recreational facilities; therefore, the impacts are acceptable.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Lbs Per Day	Tons Per Year
Existing Demand[1]	44,060.00	8,040.95
Reserved Capacity[2]	50,407.82	9,199.43
Projected Solid Waste Demand from Application[3]	1,154.47	210.69
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
5 Bureau of Economic & Business Research, University of Florida, Estimates of Population (2023); Policy 2.1.a, CFNGAR Element
6 City of Alachua January 2025 Development Monitoring Report
7 Policy 2.1.a, CFNGAR Element (Formula: .73 tons x 111 dwellings)
8 New River Solid Waste Facility, April 2024

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 210.69 tons per year. It is anticipated that the proposed

amendment will not adversely affect the Level of Service ("LOS") of solid waste facilities; therefore, the impacts are acceptable.

Public School Impact

At this time, it is anticipated that the proposed final plat will result in a demand of 30 total student stations (13 for elementary, 7 for middle, and 10 for high school). The School Board of Alachua County provided a determination on August 28, 2024 that the school capacity would remain sufficient at build out of this project.

Any future determination must find that the students generated by the proposed amendment can be reasonably accommodated for the five, ten, and twenty year planning periods at the elementary, middle, and high school levels.

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

SCHOOL CONCURRENCY SERVICE AREAS (SCSA)

Elementary Northwest Alachua **Middle** Mebane **High** Santa Fe

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

CERTIFICATION

PROJECT NAME : Fletcher Trace - Phase 2 **PROJECT #:**

This application for a determination of the adequacy of public schools to accommodate the public school students generated by the subject development has been reviewed for compliance with the school concurrency management program and in accordance with the ILA. The following determinations have been made:

☑ **Approved** based upon the following findings (see 09.14.2022 Capacity Table)

Elementary SCSA Northwest Alachua — Capacity Required 4

- ☑ Capacity Available — Available Capacity 368
- ☐ Capacity Available in 5 yrs* — Available Capacity
- ☐ Capacity Available in Adjacent SCSA — Available Capacity

Middle SCSA Mebane — Capacity Required 2

- ☑ Capacity Available — Available Capacity 406
- ☐ Capacity Available in 5 yrs* — Available Capacity
- ☐ Capacity Available in Adjacent SCSA — Available Capacity

High SCSA Santa Fe — 2

- ☑ Capacity Available — Available Capacity 142
- ☐ Capacity Available in 5 yrs* — Available Capacity
- ☐ Capacity Available in Adjacent SCSA — Available Capacity

☐ **Denial** for reasons stated

RE: Project Assistance Team (PAT) Summary: Fletcher Trace Phases 1-3 Final Plats (PSP24-0007, PSP24-0008, and PSP24-0009)

Dear Mr Hickman:

On July 24, 2024, the City of Alachua received your revised applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

The application has been reviewed by the City's Project Assistance Team (PAT). Upon review of the application and materials, the following insufficiencies must be addressed. A meeting to review these comments can be scheduled upon request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **12:00 PM** on **Tuesday, August 27, 2024**. A total of four (4) copies of the application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date.

Please address the following:

PHASE 1

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of

surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 1:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   a. The applicant must address all comments provided by the Public Services Department in a memo signed August 7, 2024 (attached).
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
2. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 2

3. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: Please provide the following information for Phase 2:

- Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)
- Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)
- Certified engineer's cost estimate for sidewalks to be placed in front of lots.

4. *Article 7, Subdivision Standards*
   d. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.
3. The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.

PHASE 3

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: Please provide the following information for Phase 3:

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   e. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
4. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

Adam Hall, AICP

Mr. Tabor,

Re: Fletcher Trace – Phase 1
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 1. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): There are Match Lines shown on Sheet 1 that are not shown on Sheet 2. (See redlined copy of Plat). In my opinion the northerly and westerly Match Lines should be eliminated.

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Tilte Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

There are offsite easements shown which are not dimensioned and have no recording Information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Mr. Tabor,

Re: Fletcher Trace – Phase 2
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 2. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.081 (2) & 177.091 (12): The owner of the lands shown in the Owner's Certification and Dedication Is different from that in the Title Opinion by Kelley D. Jones, P.A.
If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase 1 is recorded prior to Phase 2).

Note: If Phase 1 is not recorded, Phase 2 will not have access to a Public Right of Way.

There are offsite easements shown which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

FLETCHER TRACE - PHASE 2

LOCATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET TO THE POINT OF BEGINNING; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING THREE (3) COURSES: (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) NORTH 41°06'51" EAST, A DISTANCE OF 755.00 FEET; (3) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO AFOREMENTIONED SOUTHEASTERLY RIGHT OF WAY LINE; THENCE SOUTH 41°06'51" WEST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 755.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 5.11 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I7576, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.

Mr. Tabor,

Re: Fletcher Trace – Phase 3
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 3. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): In my opinion the Southeasterly and Northwesterly Match lines are not necessary and should be eliminated. The Northeasterly Match Line on Sheet 2 is mislabeled. There is no Southwesterly Match Line shown on Sheet 2. The Southwesterly Match Line on Sheet 1 will need to be moved to the Northeast (See redlined Plat).

177.091 (7): An additional P.R.M. is required on the NW boundary on Sheet 2 (as shown on Sheet 1).

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase- 2 is recorded prior to Phase 3).
Note: If Phase 1 and 2 are not recorded, Phase 3 will not have access to a Public Right of Way.

177.091 (18): Lot 107 is not numbered on Sheet 2.

177.091 (29): Include 'P.B.' in the legend.
Label the size and identity of what I assume is a concrete monument at the northwest Corner of Lot 2 of Pilot Forest and include the symbol (what it is) in the Legend.

There are offsite easements which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

PLAT BOOK __, PAGE __
SHEET TWO OF TWO

FLETCHER TRACE - PHASE 3

LOCATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA

SURVEYOR'S NOTES

1. HORIZONTAL DATUM SHOWN HEREON IS DERIVED FROM THE FLORIDA STATE PLANE COORDINATE SYSTEM, NORTH ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I75T6, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1':10,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120069 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. ALL PLATTED UTILITY EASEMENTS ARE ALSO EASEMENTS FOR THE CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION OF CABLE TELEVISION SERVICES; PROVIDED, HOWEVER, NO SUCH CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION OF CABLE TELEVISION SERVICES SHALL INTERFERE WITH THE FACILITIES AND SERVICES OF AN ELECTRIC, TELEPHONE, GAS, OR OTHER PUBLIC UTILITY. IN THE EVENT A CABLE TELEVISION COMPANY DAMAGES THE FACILITIES OF A PUBLIC UTILITY, IT SHALL BE SOLELY RESPONSIBLE FOR THE DAMAGES.
7. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
8. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.
9. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
10. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS ONE (1) THRU THIRTY-TWO (32).

RE: Project Assistance Team (PAT) Summary: Fletcher Trace Phases 1-3 Final Plats (PSP24-0007, PSP24-0008, and PSP24-0009)

Dear Mr Hickman:

On April 24, 2024, the City of Alachua received your revised applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

The application has been reviewed by the City's Project Assistance Team (PAT). Upon review of the application and materials, the following insufficiencies must be addressed. A meeting to review these comments can be scheduled upon request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **12:00 PM** on **Thursday, May 30, 2024**. A total of four (4) copies of the application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date.

Please address the following:

PHASE 1

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of

surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

2. *Article 7, Subdivision Standards*
   a. A note must be added to the plat that the HOA shall be responsible for maintenance of trees planted in rights-of-way and common areas in conformance with Subdividers Agreement and Section 7.8.1.
   b. Confirm that the placement of monuments is included in the 'surveying' line of cost estimates (or elsewhere within cost estimates).
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

3. *Concurrency*
   a. Provide revised SBAC Concurrency form for Phase 1 only.

4. *Land Rights*
   a. Title commitment states Waco of Alabama, Inc. as land owner, but Plat states Fletcher Development, LLC with mortgage held by Campus USA Credit Union. Will Fletcher Development, LLC take title and have mortgage in place prior to Public Hearing? Revised title report or letter of title opinion will be needed prior to public hearing. Off-site easement from Waco of Alabama, Inc. will be needed unless Fletcher Development, LLC will also be taking title to those portions. City staff can provide off-site easement documentation upon request. Please contact Corey King in the Compliance and Risk Management Department.

5. *Miscellaneous*
   a. 100% gopher tortoise survey required prior to commencement of land clearing activities.
   b. "Southern" misspelled on Plat on south property line.
   c. Plat will be submitted to the Alachua County Enhanced 911 office for street name assignment.
   d. Notary block on plat appears to have misspelling. Verify.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   a. The applicant must address all comments provided by the Public Services Department in a memo dated May 14, 2024 (attached).
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

PHASE 2

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

2. *Article 7, Subdivision Standards*
   a. A note must be added to the plat that the HOA shall be responsible for maintenance of trees planted in rights-of-way and common areas in conformance with Subdividers Agreement and Section 7.8.1.
   b. Confirm that the placement of monuments is included in the 'surveying' line of cost estimates (or elsewhere within cost estimates).
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

3. *Concurrency*
   a. Provide revised SBAC Concurrency form for Phase 2 only.

4. *Land Rights*
   a. Title commitment states Waco of Alabama, Inc. as land owner, but Plat states Fletcher Development, LLC with mortgage held by Campus USA Credit Union. Will Fletcher Development, LLC take title and have mortgage in place prior to Public Hearing? Revised title report or letter of title opinion will be needed prior to public hearing. Off-site easement from Waco of Alabama, Inc. will be needed unless Fletcher Development, LLC will also be taking title to those portions. City staff can provide off-site easement documentation upon request. Please contact Corey King in the Compliance and Risk Management Department.

5. *Miscellaneous*
   a. 100% gopher tortoise survey required prior to commencement of land clearing activities.
   b. Plat will be submitted to the Alachua County Enhanced 911 office for street name assignment.
   c. Notary block on plat appears to have misspelling. Verify.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   c. The applicant must address all comments provided by the Public Services Department in a memo dated May 14, 2024 (attached).

d. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

PHASE 3

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

2. *Article 7, Subdivision Standards*
   a. A note must be added to the plat that the HOA shall be responsible for maintenance of trees planted in rights-of-way and common areas in conformance with Subdividers Agreement and Section 7.8.1.
   b. Confirm that the placement of monuments is included in the 'surveying' line of cost estimates (or elsewhere within cost estimates).
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

3. *Concurrency*
   a. Provide revised SBAC Concurrency form for Phase 3 only.

4. *Land Rights*
   a. Title commitment states Waco of Alabama, Inc. as land owner, but Plat states Fletcher Development, LLC with mortgage held by Campus USA Credit Union. Will Fletcher Development, LLC take title and have mortgage in place prior to Public Hearing? Revised title report or letter of title opinion will be needed prior to public hearing. Off-site easement from Waco of Alabama, Inc. will be needed unless Fletcher Development, LLC will also be taking title to those portions. City staff can provide off-site easement documentation upon request. Please contact Corey King in the Compliance and Risk Management Department.

5. *Miscellaneous*
   a. 100% gopher tortoise survey required prior to commencement of land clearing activities.
   b. Plat will be submitted to the Alachua County Enhanced 911 office for street name assignment.
   c. Notary block on plat appears to have misspelling. Verify.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   e. The applicant must address all comments provided by the Public Services Department in a memo dated May 14, 2024 (attached).
   f. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

Adam Hall, AICP

Mr. Tabor,

Re: Fletcher Trace – Phase 1
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 1. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): Match lines are needed on Sheet 2.

177.091 (6): A bearing reference to a well established and monumented line is required.

177.061: The survey business name, LB number and address must appear under the Surveyor's Certificate.

177.081 (1): I am not reviewing for conformity to the City of Alachua ordinances and regulations.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the South boundary by Subdivision name, Plat Book and page and Unplatted.

177.091 (29): Include Sec 28-T8S-R18E in the legend.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Mr. Tabor,

Re: Fletcher Trace – Phase 2
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 2. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (6): A bearing reference to a well established and monumented line is required.

177.061: The survey business name, LB number and address must appear under the Surveyor's Certificate.

177.081 (1): I am not reviewing for conformity to the City of Alachua ordinances and regulations.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase 1 is recorded prior to Phase 2).

Note: If Phase 1 is not recorded, Phase 2 will not have access to a Public Right of Way.

177.091 (29): Include Sec 28-T8S-R18E in the legend.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Mr. Tabor,

Re: Fletcher Trace – Phase 3
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 3. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): Matchlines are required on Sheet 2.

177.091 (6): A bearing reference to a well established and monumented line is required.

177.091 (7): An additional P.R.M. is required on the NW boundary. P.R.M.s cannot be more than 1400' apart.

177.061: The survey business name, LB number and address must appear under the Surveyor's Certificate.

177.081 (1): I am not reviewing for conformity to the City of Alachua ordinances and regulations.

177.091 (14): The West line of Section 28 (North of the P.O.C.) needs to be labelled on Sheet 1.

177.091 (15): Street names (when determined) are required.

177.091 (16): P.U.E.'s need to be shown and dimensioned along the Right of Ways on Sheet 2.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase- 2 is recorded prior to Phase 3).

Note: If Phase 1 and 2 are not recorded, Phase 3 will not have access to a Public Right of Way.

177.091 (19): The bearings on the northeasterly lines of Lots 96 & 108 need to be labelled.

177.091 (29): Include 'Sec 28-T8S-R18E' and 'P.B.' in the legend.

RE: Completeness Review: Fletcher Trace Phases 1- 3 Final Plats

Dear Mr. Hickman:

On March 27, 2024 the City of Alachua received your applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that the applications are incomplete following information is needed to begin the review of the application. Please address the following deficiencies no later than **5:00 PM on Thursday, April 11, 2024**

In accordance with Section 2.2.6(B) of the LDRs, the applicant must correct the deficiencies and resubmit the application for completeness determination. *Plans and application materials may be made available for return in order to revise and resubmit as needed.*

The time frame and cycle for review shall be based upon the date the application is determined to be complete. If the applicant fails to respond to the identified deficiencies within forty-five (45) calendar days, the application shall be considered withdrawn.

Please note that if an additional completeness review is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the application.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the content of the application will be performed, and the findings of the in-depth review will be discussed at a Project Assistance Team (PAT) Meeting, which will be sent under separate cover and subsequent to a determination of completeness. In order to provide a complete application, please address the following:

PHASE 1

1. **Final Plat Application Attachment #6, Concurrency Impact Analysis Report:** Submitted report is for entire Fletcher Trace project, but must be specific to this Phase.

2. **Final Plat Application Attachment #9, Legal Descriptions and Sketches of Off-Site Public Utility Easements (PUEs):** Legal descriptions and sketches of all off-site PUEs and property to be deeded to the City have not been submitted.

3. **Final Plat Application Attachment #10, City of Alachua Public School Student Generation Form:** Submitted Public School Student Generation form is for entire Fletcher Trace project, but must be specific to this Phase.

4. **Final Plat Application Attachment #17, Alachua County Public Works access management permit.** Provide documentation of permit application or communication with Alachua County Public Works regarding proposed access.

PHASE 2

1. **Final Plat Application A. 5, Number of Units:** Confirm number of units. Application indicates 41 units, but Plat shows 42 units. Additionally, submitted application fee is for 42 units.

2. **Final Plat Application Attachment #6, Concurrency Impact Analysis Report:** Submitted report is for entire Fletcher Trace project, but must be specific to this Phase.

3. **Final Plat Application Attachment #9, Legal Descriptions and Sketches of Off-Site Public Utility Easements (PUEs):** Legal descriptions and sketches of all off-site PUEs have not been submitted.

4. **Final Plat Application Attachment #10, City of Alachua Public School Student Generation Form:** Submitted Public School Student Generation form is for entire Fletcher Trace project, but must be specific to this Phase.

5. **Final Plat Application Attachment #17, Alachua County Public Works access management permit.** Provide documentation of permit application or communication with Alachua County Public Works regarding proposed access.

6. **Final Plat Application Fee.** Submitted fee is $710, but for 41 lots this fee would be $705. Please see comment above and verify.

PHASE 3

1. **Final Plat Application Attachment #6, Concurrency Impact Analysis Report:** Submitted report is for entire Fletcher Trace project, but must be specific to this Phase.

2. **Final Plat Application Attachment #9, Legal Descriptions and Sketches of Off-Site Public Utility Easements (PUEs):** Legal descriptions and sketches of all off-site PUEs have not been submitted.

3. **Final Plat Application Attachment #10, City of Alachua Public School Student Generation Form:** Submitted Public School Student Generation form is for entire Fletcher Trace project, but must be specific to this Phase.

4. **Final Plat Application Attachment #17, Alachua County Public Works access management permit.** Provide documentation of permit application or communication with Alachua County Public Works regarding proposed access.

5. **Final Plat Application Fee.** Submitted fee is $685, but for 36 lots this fee would be $680. Please verify.

If you have any questions, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com.

A. PROJECT

1. Project Name: Fletcher Trace
2. Preliminary Plat Approval Date: 9/26/2022
3. Construction Plans Approval Date: TBD
4. Phase/Unit Number (if applicable): Phase 2
5. Number of proposed lots/dwelling units: 42
6. Housing Type (i.e., attached/detached units): Both Attached & Detached
7. Address of Subject Property: 11305 NW 173rd St, Alachua, FL
8. Parcel ID Number(s): 03980-002-001
9. Existing Use of Property: Vacant
10. Future Land Use Map Designation: Moderate Density Residential
11. Zoning Designation: PD
12. Acreage: 5.11

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ■ Agent
2. Name of Applicant(s) or Contact Person(s): Aaron Hickman, PSM Title: VP
   Company (if applicable): CHW, LLC
   Mailing address: 11801 Research Drive
   City: Alachua State: FL ZIP: 32615
   Telephone: 352-331-1976 FAX: _____ e-mail: aaronh@chw-inc.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): Waco of Alabama
   Mailing Address: PO BOX 6937
   City: JACKSONVILLE State: FL ZIP: 32236-6937

   ** Must provide executed Authorized Agent Affidavit or other acceptable documentation (as deemed acceptable by the City in its sole discretion) which authorizes the agent to act on behalf of the property owner.*

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ■ Yes ☐ No
   If yes, list names of all parties involved: Fletcher Development
2. Has the applicant discussed possible utility/infrastructure fees with the Public Services Department?
   If no, contact the Public Services Department at 386-418-6140. ■ Yes ☐ No

D. ATTACHMENTS

1. Plat, to include the following information and be prepared in accordance with the following criteria:
    a. Sheet Size: 24" X 36" with 3" left margin and ½" top, bottom, and right margins.
    b. Graphic scale, not to exceed one (1) inch equal to 50 feet.
    c. Name of subdivision shall be shown in bold legible letters, as required by Chapter 177, Florida Statutes. The name of the subdivision shall be shown on each sheet included and shall have legible lettering of the same size and type including the words "section," "unit," "replat," "amended," etc.
    d. Name and address of subdivider.
    e. North arrow, graphic scale, and date of plat drawing.
    f. Vicinity map showing location with respect to existing streets, landmarks, etc., and acreage of the subdivision. The vicinity map shall be drawn to show clearly the required information, but shall not less than one (1) inch to 2,000 feet.
    g. Exact boundary line of the property, determined by a boundary survey, giving distances to the nearest one-hundredth foot and angles to the nearest minute, shall be balanced and closed with an apparent error of closure not to exceed one in 5,000. Survey shall be signed and sealed by the surveyor, and shall be no older than two (2) years.
    h. Legal description of the property to be subdivided.
    i. Acreage of adjacent land. If adjacent land is within a subdivision, identify the subdivision name, and recording information.
    j. Location of streams, lakes, wetlands, and required buffers from such areas, and location of land designated as a special flood hazard area on FEMA FIRM panels.
    k. Bearing and distance to permanent control points on the nearest existing street lines of bench marks or other permanent reference monuments [not less than three (3)].
    l. When the City corporate limits traverse, are adjacent to, or are within 500 feet of the property, the boundary shall be accurately tied to the boundary lines of the subdivision by distance and angles.
    m. The closest lot corner shall be accurately tied to the boundary lines of the subdivision by distance and angles.
    n. Location, dimensions, and purpose of any land reserved or dedicated for public or common use.
    o. Exact locations, width, and names of all streets within and adjacent to the subdivision.
    p. Street right-of-way lines must show deflection angles of intersection, radii, and lines of tangents.
    q. Lot lines, dimensions, and bearings must be shown to the nearest one hundredth (1/100) foot.
    r. Lots must be numbered in numerical order. Additional phases of existing subdivisions shall continue numbering from previous phases.
    s. Location and description of required permanent reference monuments and markers.
    t. Building setback lines.
    u. Covenants and restrictions notice in accordance with Chapter 177.091(28), Florida Statutes.
    v. Dedication to the public by the owners of the land involved of all streets, drainage easements, and other rights-of-way however designated and shown on the plat for perpetual use for public purposes, including vehicular access rights where required.
    w. If the property is encumbered by a mortgage, the owner of the mortgage shall join in the dedication or in some other manner subordinate the mortgagee's interest to the dedication of public right-of-way.

2. Title certification as required by Chapter 177.041, Florida Statutes.

3. Draft of proposed surety instrument for all public and private infrastructure improvements in accordance with the requirements set forth in Sections 6.10 and 7.4 of the LDRs (surety instrument shall be submitted to the City upon approval of the draft document and prior to any public hearing).

4. Cost of construction for all public and private infrastructure improvements (including but not limited to earthwork, stormwater, utilities (water and sewer lines / mains, electric system infrastructure, gas lines, etc.) roadways (streets, sidewalks, etc.) and landscaping in rights-of-way and common areas), signed and sealed by a registered professional engineer.

5. Proposed covenants and restrictions, if any. If the subdivision shall be subject to existing covenants and restrictions, an amendment to such covenants and restrictions shall be provided.

6. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation (for residential development), stormwater, and public schools (for residential development) in accordance with Section 2.4.14 of the LDRs.

7. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy).

8. Legal description of the property to be platted with tax parcel number: (1) on 8.5" x 11" paper; and (2) electronic file in Word format.

9. Legal descriptions and sketches for all off-site public utilities easements and legal descriptions and sketches of all property to be deeded to the City.

10. For residential subdivisions, City of Alachua Public School Student Generation Form.

11. One (1) set of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).

12. Proof of ownership (i.e., copy of deed).

13. Proof of payment of taxes.

14. Traffic Impact Analysis or Statement, as deemed applicable to the project by the City of Alachua in its sole discretion.

15. Environmental Assessment or Study, as deemed applicable to the project by the City of Alachua in its sole discretion.

16. Environmental Resource Permit (or Letter of Exemption) from the Suwannee River Water Management District (SRWMD) or Self-Certification for a Stormwater Management System in Uplands Serving Less than 10 Acres of Total Project Area and Less than 2 Acres of Impervious Surfaces from the Florida Department of Environmental Protection pursuant to Section 403.814(12), Florida Statutes.

17. If access is from a County Road, access management permit from Alachua County Public Works.

18. If access is from a State Road, access management permit from Florida Department of Transportation.

All applicable attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

Under penalty of perjury, I/we certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

PLAT BOOK ___, PAGE ___
SHEET ONE OF ONE

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET TO THE POINT OF BEGINNING; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING THREE (3) COURSES; (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) NORTH 41°06'51" EAST, A DISTANCE OF 755.00 FEET; (3) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO AFOREMENTIONED SOUTHEASTERLY RIGHT OF WAY LINE; THENCE SOUTH 41°06'51" WEST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 755.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 5.11 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I7516, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNERS ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.

PUBLIC SCHOOL STUDENT GENERATION CALCULATION FORM

PROJECT # 21-0297 **APPLICATION DATE** 4/5/2024

NAME & DESCRIPTION OF PROJECT Fletcher Trace - Phase 2

PROJECT ADDRESS (Contact 911 Addressing @ 352.338.7361) 11305 NW 173rd St, Alachua, FL 32615

Alachua, FL 32615

Tax Parcel Numbers 03980-002-001

Acreage 5.11

DEVELOPMENT DATA (check all that apply)

☑ Single Family Number of Units 14

☑ Multi Family Number of Units 28

☐ Exempt (See exemptions on page 2)

Level of Review

☐ Pre-Application Conference ☐ Preliminary ☐ Final ☐ Revised ☐ Staff Administrative Review

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

SCHOOL CONCURRENCY SERVICE AREAS (SCSA)

Elementary Northwest Alachua **Middle** Mebane **High** Santa Fe

SINGLE FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY	14	**units X 0.12 Elementary School Multiplier**	1.68	**Student Stations**
MIDDLE	14	**units X 0.06 Middle School Multiplier**	0.84	**Student Stations**
HIGH	14	**units X 0.09 High School Multiplier**	1.26	**Student Stations**

MULTI FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY	28	**units X 0.06 Elementary School Multiplier**	1.68	**Student Stations**
MIDDLE	28	**units X 0.03 Middle School Multiplier**	0.84	**Student Stations**
HIGH	28	**units X 0.03 High School Multiplier**	0.84	**Student Stations**

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

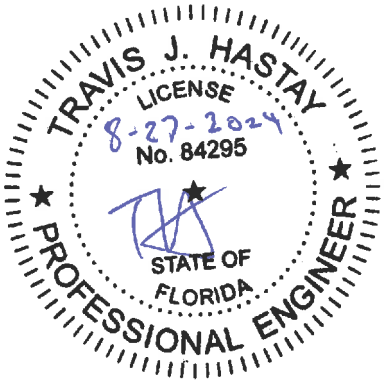
The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Phase 2 On Lot Sidewalks

Item No.	Item	Qty	Unit	Unit Cost	Cost
1	Concrete Sidewalks and Driveways, 4"	835	SY	$ 50.55	$ 42,207.63
				Subtotal	**$ 42,207.63**
				Mobilization (10%)	**$ 4,220.76**
				Contingency (10%)	**$ 4,220.76**
				TOTAL	**$ 50,649.16**



The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Phase 3 On Lot Sidewalks

Item No.	Item	Qty	Unit	Unit Cost	Cost
1	Concrete Sidewalks and Driveways, 4"	1,249	SY	$ 50.55	$ 63,156.87
				Subtotal	**$ 63,156.87**
				Mobilization (10%)	**$ 6,315.69**
				Contingency (10%)	**$ 6,315.69**
				TOTAL	**$ 75,788.25**

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Re: Fletcher Trace – Phase 2

This memorandum identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this application is consistent with each. Text from the City of Alachua is provided in normal font while consistency statements are provided in **bold**.

FUTURE LAND USE ELEMENT

Policy 1.2.a: Moderate density residential (0 to 4 dwelling units per acre): The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:

1. Single family, conventional dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments (PD-R);
8. Supporting community services, such as schools, houses of worship, parks, and community centers

This application seeks to permit Phase 2, 14 single-family detached lots and 28 single-family attached lots. Overall density shall not exceed four (4) dwelling units per acre.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PD's for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices, and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.

As shown in the adopted PD Master Plan, all onsite dwelling units shall be single-family homes, both detached and attached—consistent with Policy 2.1.a.1. of the City of Alachua Comprehensive Plan, Savannah Station, and nearby single-family developments.

2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.

No non-residential activities are being proposed.

3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.

The PD-R exceeds the minimum amount of open space required by Policy 2.5.a. of the Comprehensive Plan. This Phase is consistent with the PD Master Plan. Onsite activities for residents will include passive trails, outdoor workout facilities, and/or community gathering spaces.

4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.

The site shall be designed to support multiple methods of internal transportation by promoting pedestrian-friendly block sizes, sidewalk infrastructure, and streetlighting systems. Block lengths that exceed the maximum 600', as per LDR §7.2.3(B)(2), shall include an easement for a pedestrian way, as described in LDR §7.2.3(B)(4). In no case shall a block face exceed 1,000' in length.

5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Fletcher Trace is the logical expansion of existing City of Alachua potable water and sanitary sewer infrastructure currently serving area residential and non-residential uses.

To avoid constructing roadway infrastructure that is not necessary to enhance roadway capacity, easements for pedestrian ways are proposed on blocks that exceed 600' in length. The pedestrian ways will ensure a walkable neighborhood while the reduced roadway infrastructure will conserve materials, financial resources, and pervious surface area.

Policy 2.4.b: Landscaping: Buffering – A buffer consists of horizontal space (land) and vertical elements (plants, berms, fences, walls) that physically separate and visually screen adjacent land uses. The City shall establish buffer yard requirements that are based on the compatibility of the adjacent uses and the desired result of the buffer.

Phase 2 includes a 20'-wide landscape buffer located along CR 235, consistent with the adopted PD Master Plan.

Policy 2.5.a: There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.

Phase 2 is consistent with the PD Master Plan, which requires a minimum 10% open space. As illustrated in the adopted PD Master Plan, the proposed development far exceeds the minimum required. Onsite open spaces shall be comprised of common area, stormwater management facilities, landscaping.

Objective 4.1: Infill development shall be encouraged in order to protect the unique character of existing neighborhoods and commercial developments, provide for a safe urban environment, increase densities and intensities in a manner compatible with existing uses, provide open spaces, and restore or maintain economic vitality and cultural diversity.

The project site is located within a growing area of the City. Approval of this application will encourage urban infill development on adjacent properties with access to City of Alachua public facilities and services. The proposed residential development is consistent with the existing residential development pattern located along the CR 235 corridor and helps reduce

development pressures in the urban fringe and in more rural areas of the City not served by public facilities and services.

GOAL 5: Development Standards: The City shall include provisions through its comprehensive plan amendment process, development review process and in its land development regulations for development standards that address natural features and availability of facilities and services. These development standards will strive to protect natural resources and public facility resources while allowing for innovative and flexible development patterns.

Phase 2 arise consistent with the development standards set forth by the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

There are no onsite wetlands or flood areas that would make this project site unable to support the proposed plan.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

There are two (2) small locations on site with steep slopes (5-8%) that are utilized for stormwater management facilities.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently six (6) types of soils located onsite:

- **Kendrick Sand, 2 – 5% Slopes (Hydro Group: B)**
- **Arredondo Fine Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Arredondo Fine Sand, 5 – 8% Slopes (Hydro Group: A)**
- **Gainesville Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Lochloosa Fine Sand 5 – 8% Slopes (Hydro group: B)**
- **Millhopper Sand, 0 – 5% Slopes (Hydro Group: A)**

According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

There are no FEMA flood zone areas located on the project site.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

The subject property does not contain onsite wetland features, as evidenced by the best available desktop data and analysis. During site plan preparation, a professional environmental scientist shall review the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

No listed species are known onsite.

Objective 5.2: Availability of facilities and services: The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

The impacts this site will have on available facilities and services will not cause facilities and/or services to operate below the adopted level of service. Please see the Concurrency Analysis memo for additional detail.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools, and improved recreation in accordance with LOS standards adopted in the elements addressing these facilities.

This project will not cause City of Alachua facilities to operate below the adopted level of service.

Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Ch. 163, Florida Statutes, development agreement has commenced.

A certification of level of service compliance shall be issued during development plan review.

CONSERVATION AND OPEN SPACE ELEMENT

Objective 1.5: Soils. The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

There are currently six (6) types of soils located onsite. According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required.

Site design addresses these soil composition limitations with properly-designed drainage and stormwater management facilities.

Objective 1.10: Wetlands. The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

The subject property does not contain onsite wetland features. A professional environmental scientist has reviewed the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

To: Kathy Winburn, AICP, Planning and Zoning Director

From: Ryan Thompson, AICP, Sr. Project Manager

Date: April 17, 2024

Re: Fletcher Trace – Phase 2

The following analysis estimates potential impacts on City of Alachua public facilities that may result from the proposed **Phase 2** development**14 single-family detached lots and 28 single-family attached lots.** The following tables include data from the City of Alachua April 2024 Development Monitoring Report, as well as data obtained within the City Comprehensive Plan and Florida Administrative Code (F.A.C.).

Traffic

Trip generation: Figures are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition.

Table 1: Projected Trip Generation

Land Use[1] (ITE)	Units	Daily		AM Peak		PM Peak	
		Rate	Trips	Rate	Trips	Rate	Trips
Proposed							
Single-Family Detached Housing (ITE 210)	42	9.52	400	0.77	32	1.02	43

1. *Source: ITE Trip Generation 11th Edition*

Conclusion: Approval of this application increases the subject property's maximum development potential and thus, result in a potential net increase of daily vehicle trips generated by the site. However, approval of this application *will not* negatively impact the adopted LOS for adjacent and nearby roadways.

Affected roadways: Maximum development is estimated to generate less than 1,000 external average daily trips (ADT). LDR §2.4.14(H)(2)(a) identifies affected roadways as those located partially or wholly within one-half mile of the development's ingress/egress, or the nearest major intersection, whichever is greater. **Tables 2a and 2b** calculate projected impacts on adjacent roadways based on the proposed development.

Table 2a: Projected Impacts on Roadways, CR 235

Traffic System Category	AADT	PM
	CR 235	
	From NW 143rd Place to South City Limit	
Maximum Service Volume[1]	15,120	1,359
Existing Traffic[1]	6,180	587
Reserved Trips[1]	1,023	108
Available Capacity	7,917	664
Projected Trip Generation[2]	400	43
Available Capacity w/ Application approval	**7,517**	**621**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *NOTE: Projected trip distribution percentage is estimated to be **100%**.*

Table 2b: Projected Impacts on Roadways, CR 235A South

Traffic System Category	AADT	PM
	CR 235A South	
	From US 441 to CR 235	
Maximum Service Volume[1]	15,120	1,359
Existing Traffic[1]	5,302	504
Reserved Trips[1]	4,712	462
Available Capacity	5,106	393
Projected Trip Generation[2]	200	21
Available Capacity w/ Application Approval	**4,906**	**372**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *NOTE: Projected trip distribution percentage is estimated to be **50%**.*

Conclusion: The only affected roadways are CR 235, which the project site is directly fronting, and CR 235A South, which is estimated to receive 50% of the total projected ADT. The affected roadway segments will continue to retain sufficient roadway capacity during both ADT and PM Peak. In fact, no roadway segments will experience a failing roadway LOS because of this application's approval.

Potable Water / Sanitary Sewer / Solid Waste

The following tables evaluate potential impacts to potable water, sanitary sewer, and solid waste.

Table 3: Projected Potable Water Impacts

System Category	Gallons Per Day (GPD)
Current Permitted Capacity[1]	2,300,000
Less actual Potable Water Flows[1]	1,390,833
Reserved Capacity[1]	454,474
Residual Capacity[1]	454,693
Percentage of Permitted Design Capacity Utilized[1]	80.23%
Projected Potable Water Demand from Proposed Project[2]	11,550
Residual Capacity after Proposed Project	**443,143**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan & Chapter 64-E, F.A.C. Formula used: (# du x 275 gallons per unit per day)*

Conclusion: The project site will be served by existing City of Alachua potable water infrastructure. The potential net impacts from the intended residential development *will not* negatively impact the City's adopted LOS for potable water.

Table 4: Projected Sanitary Sewer Impacts

System Category	Gallons Per Day (GPD)
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less actual Treatment Plant Flows[1]	719,250
Reserved Capacity[1]	425,863
Residual Capacity[1]	354,887
Percentage of Permitted Design Capacity Utilized[1]	76.34%
Projected Sanitary Sewer Demand from Proposed Project[2]	10,500
Residual Capacity after Proposed Project	**344,387**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan & Chapter 64-E, F.A.C. Formula used: (# du x 250 gallons per unit per day)*

Conclusion: The project site will be served by existing City of Alachua wastewater infrastructure. The potential net impacts from the intended residential development *will not* negatively impact the City's adopted LOS for sanitary sewer.

Table 5: Projected Solid Waste Impacts

System Category	LBs Per Day	Tons Per Year
Existing Demand[1]	43,376.00	7,916.12
Reserved Capacity[1]	50,189.13	9,159.52
New River Solid Waste Facility Capacity[1]	50 years	
Solid Waste Generated By Proposed Project[2]		**79.72**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996. Formula used: (# du x 2.6 persons per du x 0.73 per capita)*

Conclusion: Solid waste facility capacity exists to adequately serve the intended residential development for the subject property. Thus, approval of this application will not negatively impact the City's adopted LOS for this system.

Public School and Recreation Impact

The City of Alachua requires all applications involving residential developments to include an estimated Public School Generation analysis. This is conducted by completing the City's Public School Student Generation Calculation Form. A completed copy of this form has been included within this application's submittal. The development's estimated impact on the City's Public School System is found in **Table 6**.

Table 6: Projected Public School Demand

Land Use (ITE)	Units	Elem.		Middle		High	
		Rate[1]	Total	Rate[1]	Total	Rate[1]	Total
Proposed							
Single-Family Residential	42	.12	5	.06	3	.09	4

1. *Source: City of Alachua School Concurrency Form*

Conclusion: Approval of this application *will not* negatively impact the Public School System.

Table 7a: Recreational Impacts

System Category	Acreage
Existing City of Alachua Acreage[1]	135.48
Acreage Required to Serve Existing Population[1]	54.22
Reserved Capacity[1]	12.17
Available Recreation Acerage[1]	69.09
Proposed Recreational Impact[2]	0.546
Residual Recreational Capacity After Proposed Development	**68.544**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: # du x 2.6 person per du x (5 acres/1,000 persons)*

Table 7b: Improved Passive Park Space Analysis

System Category	Acreage
Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	13.28
Existing Improved Passive Park Space Provided[1]	34.82
Improved Passive Park Space Utilized by Existing Population & Reserved Capacity[1]	**38.14%**
Proposed Recreational Impact[2]	0.109
Improved Passive Park Space Utilized After Proposed Development	**38.5%**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: # du x 2.6 person per du x (5 acres/1,000 persons) x 20%*

Conclusion: The City of Alachua currently possesses considerable excess acreage for local recreation activities. In addition, this subdivision will have recreational facilities onsite including, but not limited to, an amenity center and passive trails. Thus, the intended residential development is expected to have a minimal impact on the City's current recreational infrastructure.

BOUNDARY SURVEY

LOCATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA

LEGAL DESCRIPTION: (PARENT PARCEL)(OFFICIAL RECORDS BOOK 2140, PAGE 1834)

A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT AN IRON PIPE AT THE SOUTHWEST CORNER OF THE AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST FOR THE POINT OF BEGINNING AND RUN N.00°42'43"E., ALONG THE WEST LINE OF SAID SECTION, A DISTANCE OF 402.89 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE RUN N.41°53'43"E., ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 4071.41 FEET TO A CONCRETE MONUMENT; THENCE RUN S.01°01'49"W., A DISTANCE OF 827.97 FEET TO A CONCRETE MONUMENT AT THE NORTHWEST CORNER OF THE SOUTHEAST 1/4 OF SAID SECTION 28; THENCE RUN S.00°32'41"W., ALONG THE WEST LINE OF SAID SOUTHEAST 1/4, A DISTANCE OF 2612.87 FEET TO AN IRON PIPE AT THE SOUTHEAST CORNER OF THE SOUTHWEST 1/4 OF SAID SECTION 28, THENCE RUN N.89°50'54"W., ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 2684.07 FEET TO THE POINT OF BEGINNING, CONTAINING 118.191 ACRES, MORE OR LESS.

SUBJECT TO MAINTAINED RIGHT OF WAY OF COUNTY ROAD N.W. 110TH AVENUE (FORMERLY KNOWN AS COUNTY ROAD NO. N.W 28) ALONG THE SOUTH BOUNDARY THEREOF

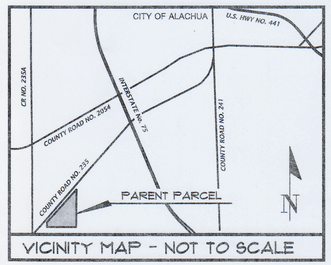
LEGAL DESCRIPTION: (SUBJECT PARCEL)(PREPARED BY THIS FIRM)

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTH-WEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET TO THE **POINT OF BEGINNING**; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING THREE (3) COURSES; (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) NORTH 41°06'51" EAST, A DISTANCE OF 755.00 FEET; (3) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO AFOREMENTIONED SOUTHEASTERLY RIGHT OF WAY LINE; THENCE SOUTH 41°06'51" WEST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 755.00 FEET TO THE **POINT OF BEGINNING.**

SAID TRACT CONTAINING 5.11 ACRES OF LAND, MORE OR LESS.

SURVEYORS NOTES:



1. HORIZONTAL DATUM SHOWN HEREON IS DERIVED FROM THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983).
2. NO UNDERGROUND INSTALLATION OF UTILITIES OR IMPROVEMENTS HAVE BEEN LOCATED EXCEPT AS SHOWN. THE SURVEYOR MAKES NO GUARANTEE THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH HE DOES CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM INFORMATION AVAILABLE. THE SURVEYOR HAS NOT PHYSICALLY LOCATED THE UNDERGROUND UTILITIES.
3. THE SURVEYOR HAS NO KNOWLEDGE OF UNDERGROUND FOUNDATIONS WHICH MAY ENCROACH.
4. FENCING, SYMBOLS AND MONUMENTATION SHOWN HEREON MAY BE EXAGGERATED FOR PICTORIAL PURPOSES ONLY AND MAY NOT BE SHOWN TO SCALE.
5. THIS SURVEY WAS PRODUCED WITHOUT THE BENEFITS OF FURNISHED TITLE WORK. NO INSTRUMENTS OF RECORD REFLECTING EASEMENTS, RIGHTS-OF-WAY, AND OR OWNERSHIP WERE FURNISHED TO THE SURVEYOR, AND NO SEARCH OF THE PUBLIC RECORDS HAS BEEN DONE BY THE SURVEYOR.
6. THE 20' EASEMENT SHOWN HEREON IS AN APPROXIMATE LOCATION. THE LOCATION IS BASED ON A SURVEY DONE BY ACLS THAT THIS OFFICE HAS ON FILE, PROJECT NUMBER 97-362, DATED 9-25-1997.
7. INFORMATION FROM FEDERAL EMERGENCY MANAGEMENT AGENCY, (F.E.M.A.) FLOOD INSURANCE RATE MAP(S), SHOWN ON THIS MAP WAS CURRENT AS OF THE REFERENCED DATE. MAP REVISIONS AND AMENDMENTS ARE PERIODICALLY MADE BY LETTER AND MAY NOT BE REFLECTED ON THE MOST CURRENT MAP.
8. IN THE OPINION OF THIS SURVEYOR, THE PERIMETER LINES AS SHOWN HEREON REPRESENT THE LOCATION OF THE BOUNDARY LINES OF THE SUBJECT PARCEL IN RELATION TO THE DESCRIPTION OF RECORD AND THOSE EXISTING LAND CORNERS FOUND TO BE ACCEPTABLE BY THIS SURVEYOR.
9. THE MAINTAINED RIGHT OF WAY LINE FOR COUNTY ROAD NO. 28 (NW 110TH AVENUE) IS SHOWN HEREON AS AN APPROXIMATE LOCATION BASED ON A SURVEY DONE BY ACLS THAT THIS OFFICE HAS ON FILE. PROJECT NUMBER 97-362, DATED 9-25-1997. THERE IS NO RECORDED RIGHT OF WAY BY MAINTANCE PER ALACHUA COUNTY.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

RE: Project Assistance Team (PAT) Summary: Fletcher Trace Phases 1-3 Final Plats (PSP24-0007, PSP24-0008, and PSP24-0009)

Dear Mr Hickman:

On July 24, 2024, the City of Alachua received your revised applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

The application has been reviewed by the City's Project Assistance Team (PAT). Upon review of the application and materials, the following insufficiencies must be addressed. A meeting to review these comments can be scheduled upon request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **12:00 PM** on **Tuesday, August 27, 2024**. A total of four (4) copies of the application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date.

Please address the following:

PHASE 1

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of

surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 1:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   a. The applicant must address all comments provided by the Public Services Department in a memo signed August 7, 2024 (attached).
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
2. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 2

3. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 2:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

4. *Article 7, Subdivision Standards*
   d. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
3. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 3

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 3:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   e. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
4. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Mr. Tabor,

Re: Fletcher Trace – Phase 1
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 1. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): There are Match Lines shown on Sheet 1 that are not shown on Sheet 2. (See redlined copy of Plat). In my opinion the northerly and westerly Match Lines should be eliminated.

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Tilte Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

There are offsite easements shown which are not dimensioned and have no recording Information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Mr. Tabor,

Re: Fletcher Trace – Phase 2
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 2. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.081 (2) & 177.091 (12): The owner of the lands shown in the Owner's Certification and Dedication Is different from that in the Title Opinion by Kelley D. Jones, P.A.
If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase 1 is recorded prior to Phase 2).

Note: If Phase 1 is not recorded, Phase 2 will not have access to a Public Right of Way.

There are offsite easements shown which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Justin Tabor -AICP Principal Planner
City of Alachua
Alachua County, Florida

Mr. Tabor,

Re: Fletcher Trace – Phase 3
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 3. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): In my opinion the Southeasterly and Northwesterly Match lines are not necessary and should be eliminated. The Northeasterly Match Line on Sheet 2 is mislabeled. There is no Southwesterly Match Line shown on Sheet 2. The Southwesterly Match Line on Sheet 1 will need to be moved to the Northeast (See redlined Plat).

177.091 (7): An additional P.R.M. is required on the NW boundary on Sheet 2 (as shown on Sheet 1).

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase- 2 is recorded prior to Phase 3).
Note: If Phase 1 and 2 are not recorded, Phase 3 will not have access to a Public Right of Way.

177.091 (18): Lot 107 is not numbered on Sheet 2.

177.091 (29): Include 'P.B.' in the legend.
Label the size and identity of what I assume is a concrete monument at the northwest Corner of Lot 2 of Pilot Forest and include the symbol (what it is) in the Legend.

There are offsite easements which are not dimensioned and have no recording information.

720 SW 2nd Avenue, South Tower, Suite 300, Gainesville, FL 32601
Phone: (352) 373-3541 • www.edafl.com

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

SUBJECT: Permit Number ERP-001-246933-1
Fletcher Trace Phases 1, 2, & 3

Dear Blake Fletcher:

Enclosed is your permit issued by the Suwannee River Water Management District on March 06, 2024. This permit is a legal document and should be kept with your other important documents. Permit issuance does not relieve you from the responsibility of obtaining any necessary permits from any federal, state, or local agencies for your project.

Noticing Your Permit:
For noticing instructions, please refer to the noticing materials in this package regarding closing the point of entry for someone to challenge the issuance of your permit. Please note that if a timely petition for administrative hearing is filed, your permit will become non-final and any activities that you choose to undertake pursuant to your permit will be at your own risk.

Compliance with Permit Conditions:
To submit your required permit compliance information, go to the District's website at https://permitting.sjrwmd.com/srepermitting/jsp/start.jsp. Click to sign-in to your existing account or to create a new account. Select the "Apply/Submit" tab, select "Submit Compliance Data", enter your permit number, and select "No Specific Date" for the Compliance Due Date Range. You will then be able to view all the compliance submittal requirements for your project. Select "the compliance item that you are ready to submit and then attach the appropriate information or form. The forms to comply with your permit conditions are available at floridaswater.com/permitting under the section "Handbooks, forms, fees, final orders". Click on forms to view all permit compliance forms, then scroll to the ERP application forms section and select the applicable compliance forms. Alternatively, if you have difficulty finding forms or need copies of the appropriate forms, please contact the Resource Management Division at (386) 362-1001.

Compliance with Other Permitting Programs:
This permit does not eliminate the necessity to obtain any required federal, state, local and special district authorizations prior to the start of any construction, alteration, operation, maintenance, removal or abandonment authorized by this permit.

The Suwannee River Water Management District did not issue a National Pollutant Discharge Elimination System (NPDES) permit for this project. If this project meets the thresholds such that a NPDES permit is required, you must apply to the Florida Department of Environmental Protection directly. More information about NPDES permits may be found online at https://floridadep.gov/water/stormwater. **Failure to obtain a NPDES permit prior to construction could subject you to enforcement action by that agency.**

For projects which involve wetlands or surface waters, the Suwannee River Water Management District did not issue a federal authorization for use or impacts to wetlands under federal jurisdiction, this project. Therefore, you must apply directly to the US Army Corps of Engineers (USACE). More information about USACE permitting may be found online at https://www.saj.usace.army.mil/. **Failure to obtain USACE authorization prior to construction could subject you to federal enforcement action by that agency.**

Transferring Your Permit:

Your permit requires you to notify the District in writing within 30 days of any change in ownership or control of the project or activity covered by the permit, or within 30 days of any change in ownership or control of the real property on which the permitted project or activity is located or occurs. You will need to provide the District with the information specified in rule 62-330.340, Florida Administrative Code (F.A.C.). Generally, this will require you to complete and submit Form 62-330.340(1), "Request to Transfer Permit".

Please note that a permittee is liable for compliance with the permit before the permit is transferred. The District, therefore, recommends that you request a permit transfer in advance in accordance with the applicable rules. You are encouraged to contact District staff for assistance with this process.

Thank you and please let us know if you have additional questions. For general questions contact us at (386) 362-1001.

Sincerely,

Tim Alexander
Deputy Executive Director

ERP Individual Permit

PERMITTEE:
Blake Fletcher
Fletcher Development, LLC
4510 NW 6th Place, 3rd Floor
Gainesville, FL 32607

PERMIT NUMBER: ERP-001-246933-1
DATE ISSUED: March 06, 2024
DATE EXPIRES: March 06, 2029
COUNTY: Alachua
TRS: S28 T8S R18E

PROJECT: Fletcher Trace Phases 1, 2, & 3

Upon completion, the approved entity to which operation and maintenance maybe transferred pursuant to rule 62-330.310 and 62-330.340 or 40B-4.1130, Florida Administrative Code (F.A.C) shall be:

Blake Fletcher
Fletcher Development, LLC
4510 NW 6th Place, 3rd Floor
Gainesville, FL 32607

Based on the information provided to the Suwannee River Water Management District (District), the subject proposed project has met the conditions of issuance as found in subsection 62-330.301, subsections 62-330.407 through 62-330.635, or subsection 40B-4.3030, F.A.C. The permit is hereby in effect for the activity description below:

This permit authorizes the construction of 10.5 acres of impervious area and the construction, operation, and maintenance of a stormwater management system to serve 33.3 acres of total impervious surfaces, of which 22.8 acres is future impervious area, on a total project area of 25.13 acres. The project shall be constructed in a manner consistent with the application package, plans, and calculations submitted and certified by Travis Hastay, P.E. of CHW on or before March 6, 2024.

As the permittee and/or operation and maintenance entity, it is your responsibility to ensure that adverse off-site impacts do not occur either during or after the construction. Any additional construction or alterations not authorized by this permit may result in flood control or water quality problems both on and off site and will be a violation of District rule.

You and any other substantially affected persons are entitled to request an administrative hearing or mediation. Please refer to the enclosed notice of rights.

1. All activities shall be implemented following the plans, specifications and performance criteria approved by this permit. Any deviations must be authorized in a permit modification in accordance with rule 62-330.315, F.A.C. Any deviations that are not so authorized may subject the permittee to enforcement action and revocation of the permit under chapter 373, F.S.

2. A complete copy of this permit shall be kept at the work site of the permitted activity during the construction phase, and shall be available for review at the work site upon request by the District staff. The permittee shall require the contractor to review the complete permit prior to beginning construction.

3. Activities shall be conducted in a manner that does not cause or contribute to violations of state water quality standards. Performance-based erosion and sediment control best management practices shall be installed immediately prior to, and be maintained during and after construction as needed, to prevent adverse impacts to the water resources and adjacent lands. Such practices shall be in accordance with the State of Florida Erosion and Sediment Control Designer and Reviewer Manual (Florida Department of Environmental Protection and Florida Department of Transportation June 2007), and the Florida Stormwater Erosion and Sedimentation Control Inspector's Manual (Florida Department of Environmental Protection, Nonpoint Source Management Section, Tallahassee, Florida, July 2008), which are both incorporated by reference in paragraph 62-330.050(9)(b)5., F.A.C., unless a project-specific erosion and sediment control plan is approved or other water quality control measures are required as part of the permit.

4. At least 48 hours prior to beginning the authorized activities, the permittee shall submit to the Agency a fully executed Form 62-330.350(1), "Construction Commencement Notice," (October 1, 2013), (http://www.flrules.org/Gateway/reference.asp?No=Ref-02505), incorporated by reference herein, indicating the expected start and completion dates. A copy of this form may be obtained from the Agency, as described in subsection 62-330.010(5), F.A.C., and shall be submitted electronically or by mail to the Agency. However, for activities involving more than one acre of construction that also require a NPDES stormwater construction general permit, submittal of the Notice of Intent to Use Generic Permit for Stormwater Discharge from Large and Small Construction Activities, DEP Form 62-621.300(4)(b), shall also serve as notice of commencement of construction under this chapter and, in such a case, submittal of Form 62-330.350(1) is not required.

5. Unless the permit is transferred under rule 62-330.340, F.A.C., or transferred to an operating entity under rule 62-330.310, F.A.C., the permittee is liable to comply with the plans, terms and conditions of the permit for the life of the project or activity.

6. Within 30 days after completing construction of the entire project, or any independent portion of the project, the permittee shall provide the following to the Agency, as applicable:

    a. For an individual, private single-family residential dwelling unit, duplex, triplex, or quadruplex — “Construction Completion and Inspection Certification for Activities Associated With a Private Single-Family Dwelling Unit” [Form 62-330.310(3)]; or

    b. For all other activities — “As-Built Certification and Request for Conversion to Operational Phase” [Form 62-330.310(1)].

    c. If available, an Agency website that fulfills this certification requirement may be used in lieu of the form.

7. If the final operation and maintenance entity is a third party:

    a. Prior to sales of any lot or unit served by the activity and within one year of permit issuance, or within 30 days of as-built certification, whichever comes first, the permittee shall submit, as applicable, a copy of the operation and maintenance documents (see sections 12.3 thru 12.3.3 of Volume I) as filed with the Department of State, Division of Corporations and a copy of any easement, plat, or deed restriction needed to operate or maintain the project, as recorded with the Clerk of the Court in the County in which the activity is located.

    b. Within 30 days of submittal of the as- built certification, the permittee shall submit “Request for Transfer of Environmental Resource Permit to the Perpetual Operation Entity” [Form 62-330.310(2)] to transfer the permit to the operation and maintenance entity, along with the documentation requested in the form. If available, an Agency website that fulfills this transfer requirement may be used in lieu of the form.

8. The permittee shall notify the District in writing of changes required by any other regulatory District that require changes to the permitted activity, and any required modification of this permit must be obtained prior to implementing the changes.

9. This permit does not:

    a. Convey to the permittee any property rights or privileges, or any other rights or privileges other than those specified herein or in chapter 62-330, F.A.C.;

    b. Convey to the permittee or create in the permittee any interest in real property;

    c. Relieve the permittee from the need to obtain and comply with any other required federal, state, and local authorization, law, rule, or ordinance; or

    d. Authorize any entrance upon or work on property that is not owned, held in easement, or controlled by the permittee.

10. Prior to conducting any activities on state-owned submerged lands or other lands of the state, title to which is vested in the Board of Trustees of the Internal Improvement Trust Fund, the permittee must receive all necessary approvals and authorizations under chapters 253 and 258, F.S. Written authorization that requires formal execution by the

Board of Trustees of the Internal Improvement Trust Fund shall not be considered received until it has been fully executed.

11. The permittee shall hold and save the District harmless from any and all damages, claims, or liabilities that may arise by reason of the construction, alteration, operation, maintenance, removal, abandonment or use of any project authorized by the permit.

12. The permittee shall notify the District in writing:

    a. Immediately if any previously submitted information is discovered to be inaccurate; and

    b. Within 30 days of any conveyance or division of ownership or control of the property or the system, other than conveyance via a long-term lease, and the new owner shall request transfer of the permit in accordance with rule 62-330.340, F.A.C. This does not apply to the sale of lots or units in residential or commercial subdivisions or condominiums where the stormwater management system has been completed and converted to the operation phase.

13. Upon reasonable notice to the permittee, District staff with proper identification shall have permission to enter, inspect, sample and test the project or activities to ensure conformity with the plans and specifications authorized in the permit.

14. If prehistoric or historic artifacts, such as pottery or ceramics, projectile points, stone tools, dugout canoes, metal implements, historic building materials, or any other physical remains that could be associated with Native American, early European, or American settlement are encountered at any time within the project site area, the permitted project shall cease all activities involving subsurface disturbance in the vicinity of the discovery. The permittee or other designee shall contact the Florida Department of State, Division of Historical Resources, Compliance Review Section (DHR), at (850)245-6333, as well as the appropriate permitting agency office. Project activities shall not resume without verbal or written authorization from the Division of Historical Resources. If unmarked human remains are encountered, all work shall stop immediately and the proper authorities notified in accordance with section 872.05, F.S. For project activities subject to prior consultation with the DHR and as an alternative to the above requirements, the permittee may follow procedures for unanticipated discoveries as set forth within a cultural resources assessment survey determined complete and sufficient by DHR and included as a specific permit condition herein.

15. Any delineation of the extent of a wetland or other surface water submitted as part of the permit application, including plans or other supporting documentation, shall not be considered binding unless a specific condition of this permit or a formal determination under rule 62-330.201, F.A.C., provides otherwise.

16. The permittee shall provide routine maintenance of all components of the stormwater management system to remove trapped sediments and debris. Removed materials shall be disposed of in a landfill or other uplands in a manner that does not require a permit under chapter 62-330, F.A.C., or cause violations of state water quality standards.

17. This permit is issued based on the applicant's submitted information that reasonably demonstrates that adverse water resource-related impacts will not be caused by the completed permit activity. If any adverse impacts result, the District will require the

permittee to eliminate the cause, obtain any necessary permit modification, and take any necessary corrective actions to resolve the adverse impacts.

18. A Recorded Notice of Environmental Resource Permit may be recorded in the county public records in accordance with section 62-330.090(7), F.A.C. Such notice is not an encumbrance upon the property.

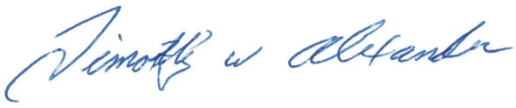
19. This permit does not authorize the permittee to cause any adverse impact to or “take” of state listed species and other regulated species of fish and wildlife. Compliance with state laws regulating the take of fish and wildlife is the responsibility of the owner or applicant associated with this project. Please refer to Chapter 68A-27 of the Florida Administrative Code for definitions of “take” and a list of fish and wildlife species. If listed species are observed onsite, FWC staff are available to provide decision support information or assist in obtaining the appropriate FWC permits. Most marine endangered and threatened species are statutorily protected and a “take” permit cannot be issued. Requests for further information or review can be sent to FWCConservationPlanningServices@MyFWC.com.

20. Operation and maintenance of the stormwater management system shall be the responsibility of the permittee until such time as those responsibilities are transferred to the approved association. Prior to the association assuming operation and maintenance responsibilities, permittee shall request transfer to operation and maintenance entity.

21. Prior to a dedication or transfer of all or any part of the common properties which is directly or indirectly related to the stormwater management system, the dedication or approval of the transfer must be authorized by the District through modification of any and all permits or authorizations issued by the District. Such modifications shall be made under the lawfully adopted rules of the District in effect at the time of application for modification.

22. The Permittee shall submit documentation demonstrating that the Articles of Incorporation have been filed with the Secretary of State, and that the corporation is in good standing, to the District prior to any request to transfer this permit to the HOA.

23. The Permittee shall submit documentation demonstrating that all stormwater management systems are located on common areas, and that the common areas are owned or controlled by the HOA, to the District prior to any request to transfer this permit to the HOA.



24. Prior to the sale of any lot or parcel, the permittee must record Declarations of Covenants and Restrictions that include a restriction on the real property pursuant to section 704.06, F.S.; prohibiting all construction including clearing, dredging, or filling, except that which is specifically authorized by Environmental Resource permit, within the conservation areas delineated on the final plans and/or mitigation proposal approved by the District.

25. Prior to the Permittee seeking to transfer the operation and maintenance to a Homeowner's Association, the Permittee must demonstrate to the reasonable satisfaction of the Suwannee River Water Management District that over twenty-four (24) consecutive months have passed since the active operation of the Homeowner's Association commenced and the Permittee shall demonstrate to the Suwannee River Water Management District's satisfaction that the Homeowner's Association is an active,

ongoing concern which the Permittee shall establish by submitting copies of all minutes of meetings of members of the Association, the board of directors, copies of all operation and maintenance expenses incurred and documentation showing that all assessments that were levied have been collected and such other documentation as the Suwannee River Water Management District may reasonably deem necessary to establish that the Homeowner's Association is an active, functioning and ongoing concern.

WITHIN 30 DAYS AFTER COMPLETION OF THE PROJECT, THE PERMITTEE SHALL NOTIFY THE DISTRICT, IN WRITING, THAT THE FACILITIES ARE COMPLETE.

AUTHORIZED BY: Suwannee River Water Management District

Tim Alexander
Deputy Executive Director

NOTICE OF RIGHTS

1. A person whose substantial interests are or may be determined has the right to request an administrative hearing by filing a written petition with the Suwannee River Water Management District (District), or may choose to pursue mediation as an alternative remedy under Section 120.569 and 120.573, Florida Statutes, (F.S.), before the deadline for filing a petition. Choosing mediation will not adversely affect the right to a hearing if mediation does not result in a settlement. The procedures for pursuing mediation are set forth in Sections 120.569 and 120.57 F.S. Pursuant to Rule 28-106.111, Florida Administrative Code, (F.A.C.), the petition must be filed at the office of the District Clerk at District Headquarters, 9225 C.R. 49, Live Oak, Florida 32060 within twenty-one (21) days of receipt of written notice of the decision or within twenty-one (21) days of newspaper publication of the notice of District decision (for those persons to whom the District does not mail actual notice). A petition must comply with Chapter 28-106, F.A.C.

2. If the Governing Board takes action which substantially differs from the notice of District decision to grant or deny the pe1mit application, a person whose substantial interests are or may be determined has the right to request an administrative hearing or may choose to pursue mediation as an alternative remedy as described above. Pursuant to Rule 28-106.111, F.A.C., the petition must be filed at the office of the District Clerk at District Headquarters, 9225 C.R. 49, Live Oak, Florida 32060 within twenty-one (21) days of receipt of written notice of the decision or within twenty-one (21) days of newspaper publication of the notice of District decision (for those persons to whom the District does not mail actual notice). Such a petition must comply with Chapter 28-106, F.A.C.

3. A substantially interested person has the right to a formal administrative hearing pursuant to Section 120.569 and 120.57(1), F.S., where there is a dispute between the District and the party regarding an issue of material fact. A petition for formal hearing must comply with the requirements set forth in Rule 28-106.201, F.A.C.

4. A substantially interested person has the right to an informal hearing pursuant to Section 120.569 and 120.57(2), F.S., where no material facts are in dispute. A petition for an informal hearing must comply with the requirements set forth in Rule 28-106.301, F.A.C.

5. A petition for an administrative hearing is deemed filed upon receipt of the petition by the Office of the District Clerk at the District Headquarters in Live Oak, Florida.

6. Failure to file a petition for an administrative hearing within the requisite time frame shall constitute a waiver of the right to an administrative hearing pursuant to Rule 28-106.111, F.A.C.

7. The right to an administrative hearing and the relevant procedures to be followed is governed by Chapter 120, Florida Statutes, and Chapter 28-106, F.A.C.

8. Pursuant to Section 120.68, F.S., a person who is adversely affected by final District action may seek review of the action in the District Court of Appeal by filing a notice of

appeal pursuant to the Florida Rules of Appellate Procedure, within 30 days of the rendering of the final District action.

9. A party to the proceeding before the District who claims that a District order is inconsistent with the provisions and purposes of Chapter 3 73, F. S., may seek review of the order pursuant to Section 373.114, F.S., by the Florida Land and Water Adjudicatory Commission, by filing a request for review with the Commission and serving a copy of the Department of Environmental Protection and any person named in the order within 20 days of adoption of a rule or the rendering of the District order.

10. For appeals to the District Courts of Appeal, a District action is considered rendered after it is signed on behalf of the District, and is filed by the District Clerk.

11. Failure to observe the relevant time frames for filing a petition for judicial review, or for Commission review, will result in waiver of the right to review.

CERTIFICATE OF SERVICE

I hereby certify that a copy of the foregoing Notice of Rights has been sent to:

NOTICING INFORMATION
Dear Permittee:

Please be advised that the Suwannee River Water Management District (District) has not published a notice in the newspaper advising the public that it has issued a permit for this project.

Newspaper publication, using the District's form, notifies members of the public of their right to challenge the issuance of the permit. If proper notice is given by newspaper publication, then there is a 21-day time limit to file a petition challenging the issuance of the permit.

To close the point of entry for filing a petition, you may publish (at your own expense) a onetime notice of the District's decision in a newspaper of general circulation within the affected area as defined in Section 50.011 of the Florida Statutes. If you do not publish a newspaper notice, the time to challenge the issuance of your permit will not expire.

A copy of the notice and a partial list of newspapers of general circulation are attached for your convenience. However, you are not limited to those listed newspapers. If you choose to close the point of entry and the notice is published, the newspaper will return to you an affidavit as proof of publication. In accordance with 40B-1.1010(4), F.A.C., a copy of the affidavit shall be provided to the District within 14 days of publication. A scanned copy of the affidavit may be forwarded to Tilda Musgrove by email at *tjm@srwmd.org* (preferred method) or send the original affidavit of publication to:

Tilda Musgrove
Resource Management
9225 CR 49
Live Oak, FL 32060

If you have any questions, please contact me at 386.362.1001.
Sincerely,

Tilda Musgrove

Tilda Musgrove
Business Resource Specialist
Resource Management

NOTICE OF AGENCY ACTION TAKEN BY THE
SUWANNEE RIVER WATER MANAGEMENT DISTRICT

Notice is given that the following permit was issued on _____:
(Name and address of applicant)_____
permit#_____. The project is located in _____County, Section _____, Township _____ South, Range _____ East. The permit authorizes a surface water management system on _____ acres for _____ known as _____. The receiving water body is _____.
A person whose substantial interests are or may be affected has the right to request an administrative hearing by filing a written petition with the Suwannee River Water Management District (District). Pursuant to Chapter 28-106 and Rule 40BB-1.1010, Florida Administrative Code (F.A.C.), the petition must be filed (received) either by delivery at the office of the Resource Management Business Resource Specialist at District Headquarters, 9225 CR 49, Live Oak FL 32060 or by e-mail to tjm@srwmd.org, within twenty-one (21) days of newspaper publication of the notice of intended District decision (for those persons to whom the District does not mail or email actual notice). A petition must comply with Sections 120.54(5)(b)4. and 120.569(2)(c), Florida Statutes (F.S.), and Chapter 28106, F.A.C. The District will not accept a petition sent by facsimile (fax). Mediation pursuant to Section 120.573, F.S., is not available.

A petition for an administrative hearing is deemed filed upon receipt of the complete petition by the District Clerk at the District Headquarters in Live Oak, FL during the District's regular business hours. The District's regular business hours are 8 a.m. – 5 p.m., excluding weekends and District holidays. Petitions received by the District Clerk after the District's regular business hours shall be deemed filed as of 8 a.m. on the next regular District business day.

The right to an administrative hearing and the relevant procedures to be followed are governed by Chapter 120, Florida Statutes, Chapter 28-106, Florida Administrative Code, and Rule 40B-1.1010, Florida Administrative Code. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means the District's final action may be different from the position taken by it in this notice. **Failure to file a petition for an administrative hearing within the requisite time frame shall constitute a waiver of the right to an administrative hearing. (Rule 28-106.111, F.A.C.).**

If you wish to do so, you may request the Notice of Rights for this permit by contacting the Business Resource Specialist in the Division of Resource Management (RM), 9225 CR 49, Live Oak, FL 32060, or by phone at 386.362.1001.

LEGAL DESCRIPTION

21-0297

Professional Consultants

DATE: DECEMBER 14, 2023
PROJECT NAME: FLETCHER TRACE
PROJECT NO: 21-0297
DESCRIPTION FOR: PHASE 2

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET TO THE **POINT OF BEGINNING**; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING THREE (3) COURSES; (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) NORTH 41°06'51" EAST, A DISTANCE OF 755.00 FEET; (3) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO AFOREMENTIONED SOUTHEASTERLY RIGHT OF WAY LINE; THENCE SOUTH 41°06'51" WEST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 755.00 FEET TO THE **POINT OF BEGINNING.**

SAID TRACT CONTAINING 5.11 ACRES OF LAND, MORE OR LESS.

1.0 INTRODUCTION

Flatwoods Consulting Group Inc. (Flatwoods) was retained by Fletcher Family Companies (Client) to conduct a wetland delineation and listed species survey for the approximately 116.95-acre Fletcher Trace Subdivision Project (Aerial Map). The project site is located east of the NW County Road 235th and NW 173rd Street intersection in Alachua, Florida (Location Map). According to the Alachua County Property Appraiser, the project site is located on Parcel ID No. 03980-002-001, in Section 28, Township 8 South, and Range 16 East (Quad Map).

2.0 METHODOLOGY

The following sections describe the methods used by Flatwoods to determine the wetland limits and the potential presence and relative abundance of listed wildlife and plants within the project site.

2.1 Preliminary Review

Information on the potential presence of listed species was collected through literature and data review. Flatwoods reviewed information from the U.S. Fish and Wildlife Service (FWS), the Florida Fish and Wildlife Conservation Commission (FWC), the Florida Natural Areas Inventory (FNAI), the Suwannee River Water Management District (SRWMD), and the Florida Department of Environmental Protection (FDEP) Geographic Information System (GIS) databases regarding the occurrence of listed species and protected habitats.

To further identify which federally and state listed plant and animal species have the potential to occur within the site, upland and wetland vegetative communities were assessed to determine their plant species composition, approximate boundaries, and general condition and quality. To establish the approximate locations and boundaries of existing upland and wetland communities within the site, available site-specific data was collected and reviewed using the following resources and methods (see References for complete source information):

- Infrared and true color aerial imagery of the project area
- U.S. Department of Agriculture (USDA)/Natural Resource Conservation Service (NRCS) Soil Survey of Alachua County, Florida
- Florida U.S. Geological Survey (USGS) Topographic Quadrangle maps
- FWS Critical Habitat Portal
- FNAI Biodiversity Matrix
- Florida Department of Transportation (FDOT) Florida Land Use, Cover, and Forms Classification System (FLUCFCS)
- SRWMD Land Use Mapping
- Alachua County Interactive Map

2.2 Survey Methods

2.2.1 Wetland Delineation

Wetlands and surface waters are delineated in accordance with The Florida Wetlands Delineation Manual (Chapter 62-340, Florida Administrative Code [F.A.C.]) and the U.S. Army Corps of Engineers (USACE) 1987 Wetlands Delineation Manual, 2010 Supplement, suitable for submittal to the SRWMD, the FDEP, and Alachua County. These delineation methods are based on the identification of specific hydrologic characteristics, including the presence of hydric soils and hydric soil conditions (periodic, continuous, or saturated), a dominance of hydrophytic vegetation, and other indicators of hydrologic conditions (e.g., evidence of frequent inundation, moss collars, and the presence of muck soils). If any wetlands or surface waters were found, the landward extent of each wetland and surface water was flagged in the field. Each flag location was recorded using a sub-meter Global Positioning System (GPS). If any wetlands or surface waters are present, they are shown on the Ecological Survey Map.

2.2.2 Standard Listed Species Survey

Flatwoods conducted a listed species survey within the site in accordance with the FWC Florida Wildlife Conservation Guide. The purpose of the listed species survey was to identify presence and relative abundance of species considered Endangered, Threatened, or of Special Concern by the FWS under 50 CFR 11-12 and the FWC under Chapter 68A-27, F.A.C. Pedestrian transect surveys for listed species were conducted on the site. During these surveys, all habitats within the site were canvassed for listed species. Any observations of listed species, or of physical features that may indicate the presence of these species (tracks, scat, nests, burrows, nest cavities in trees, etc.), are shown on the Ecological Survey Map.

2.2.3 Listed Plant Survey

Flatwoods conducted a survey in all suitable habitats within the site for plant species listed by the FWS as Threatened or Endangered. If found, any observations of listed plant species were recorded using a sub-meter GPS and shown on the Ecological Survey Map.

2.2.4 15 Percent Gopher Tortoise Survey

Flatwoods conducted a 15 percent survey to estimate the density of gopher tortoise (*Gopherus polyphemus*) burrows for the site. The tortoise survey was conducted in accordance with the FWC methods as outlined in the Gopher Tortoise Permitting Guidelines April 2008 (revised July 2020). An Authorized Gopher Tortoise Agent supervised the gopher tortoise survey. Any potentially occupied burrows were flagged in the field and recorded using a sub-meter GPS. If found, any burrow locations are shown on the Ecological Survey Map.

3.0 RESULTS

Site information collected during the desktop and field review is summarized below. The field review was performed on June 7, 2022, and representative photographs of current site conditions are included in the Photo Document attached as Appendix A. The locations of the photo stations are depicted in the Photo Station Map.

3.1 Soil Descriptions

Based on the USDA/NRCS Soil Survey for Alachua County (1985), six soil types were mapped (Soil Map). According to the *Hydric Soils of Florida Handbook*, no hydric soils exist on the site.

Arredondo Fine Sand, 0 to 5 percent Slopes (3) is a near level to gently sloping, well-drained soil found in uplands. The water table is at a depth of more than 72 inches.

Millhopper Fine Sand, 0 to 5 percent Slopes (8) is a near level to gently sloping, moderately drained soil found in uplands. Most years, the water table is at a depth of 40 to 60 inches for one to four months and at a depth of 60 to 72 inches for two to four months.

Kendrick Sand, 2 to 5 percent Slopes (30) is a near level to gently sloping, well-drained soil found in rolling uplands. The water table is at a depth of more than 72 inches.

Gainesville Sand, 0 to 5 percent Slopes (35) is a near level to gently sloping, well-drained soil found in rolling uplands. The water table is at a depth of more than 72 inches.

Arredondo Fine Sand, 5 to 8 percent Slopes (69) is sloping, well-drained soil found in uplands. The water table is at a depth of more than 72 inches.

Lochloosa Fine Sand, 5 to 8 percent Slopes (72) is sloping, somewhat poorly drained soil found in uplands. Most years, the water table is at a depth of 30 to 40 inches for one to three months.

3.2 Existing Land Use Communities

Existing land use within the site was determined using a combination of the FLUCFCS descriptions, SRWMD land use mapping, and field reconnaissance (Land Use Map). The FLUCFCS represents current habitat conditions on the property.

Upland Land Use Communities

Row Crops (FLUCFCS 214)

The vast majority of this property consists of inactive row crops. This area is mostly bare soil; vegetation is sparse but consists of a few remaining corn crops (*Zea* sp.), various grasses (*Paspalum* spp., *Panicum* spp., *Digitaria* spp., *Dichanthelium* spp., *Andropogon* spp., *Cynodon* spp.), purple passionflower (*Passiflora incarnata*), and other weedy vegetation such as dog

fennel (*Eupatorium capillifolium*), amaranth (*Amaranthus* sp.), and rattlebox (*Crotalaria* sp.). Several small pockets of live oak (*Quercus virginiana*) and laurel oak (*Quercus laurifolia*) exist throughout the crop area and contain Virginia creeper (*Parthenocissus quinquefolia*), greenbriar (*Smilax* spp.), yellow jessamine (*Gelsemium sempervirens*), muscadine (*Vitis rotundifolia*), and various grasses and weeds.

Upland Hardwood Forests (FLUCFCS 420)

A small portion in the northeast section of the property, along with much of the boundary around the row crops, is most consistent with the Upland Hardwood Forests land use. The canopy consists of live oak, laurel oak, water oak (*Quercus nigra*), black cherry (*Prunus serotina*), sugarberry (*Celtis laevigata*), sweetgum (*Liquidambar styraciflua*), red maple (*Acer rubrum*), and eastern red cedar (*Juniperus virginiana*). Because of a dense canopy, groundcover was sparse but consists of Virginia creeper, greenbriar, yellow jessamine, muscadine, and grasses and weeds along the edge of the forests similar to the adjacent row crops.

Coniferous Plantations (FLUCFCS 441)

A small portion in the southwestern corner of the property consisted of a pine plantation, which has recently been harvested. This area was dominated by slash pine (*Pinus elliottii*) and also consisted of eastern red cedar, live and laurel oaks, vines, and is also mostly void of any groundcover vegetation.

3.3 Wetland Delineation Results

No wetlands or surface waters were found within the project area (Ecological Survey Map).

3.4 Listed Species Survey Results

One listed species, the gopher tortoise, was observed during the listed species survey performed on June 7, 2022 (Ecological Survey Map). In addition, Flatwoods conducted a desktop review of possible nearby wildlife species. Flatwoods reviewed the FWC Eagle Nest Locator (2016-2017 Survey) and the Audubon Florida EagleWatch Public Nest Application (2020-2021 Survey) for any known bald eagle (*Haliaeetus leucocephalus*) nests, the 1999 FWC Wading Bird Colony Database, and the FWS Wood Stork (*Mycteria americana*) Consultation Area. No bald eagle nests are located within one mile of the site. The site is not located within any wood stork Core Foraging Areas (CFAs). No wading bird colonies are present within a mile of the site (FNAI/FWC Map).

Based on the project's available habitats and location, other listed species (animals and plants) have the potential to occur. Table 1, found following this section, describes the potentially occurring species' habitat preferences, preferred survey window (breeding season or flowering time), their likelihood of occurrence, and their federal and state listing status.

3.4.1 Southeastern American Kestrel

The southeastern American kestrel (*Falco sparverius paulus*) is listed as Threatened by the FWC and not listed by the FWS. It is a resident subspecies of the American kestrel (*Falco sparverius*) and kestrels observed in Florida during the breeding season (April-August) are assumed to be resident southeastern American kestrels. They are found in upland habitats, including sandhills, flatwoods, pastures, sand pine scrub, and prairies. As cavity nesters and sit-and-wait predators, they require suitable cavity trees and perches in their territories, as well as open ground cover to see and capture their prey. Typical prey items include insects, lizards, small rodents, and small birds. It should be noted that the field review was performed during the survey season defined as April 1 – August 31. No kestrels or kestrel cavities were observed during the survey; however, suitable nesting habitat is available, and approvals from FWC may be required if kestrels are found.

3.4.2 Gopher Tortoise

The gopher tortoise is listed as Threatened by the FWC and is a candidate for listing by the FWS. Gopher tortoises are terrestrial turtles averaging nine to 11 inches in length. They are typically found in sandhill, pine flatwoods, scrub, dry prairie, coastal dunes, and other well-drained, open habitats. Gopher tortoises dig half-moon-shaped burrows that average 15 feet long and seven feet deep.

Flatwoods located five gopher tortoise burrows during the 15 percent survey (15% Gopher Tortoise Survey Map). According to the FWC Gopher Tortoise Permitting Guidelines April 2008 (revised July 2020) calculations for a 15 percent survey indicate 33 burrows (17 tortoises) are estimated for the site. Following the site review, Flatwoods is confident that no more than 10 burrows exist onsite and that a 10 or Fewer Burrows relocation permit will be required from the FWC if ground disturbance will occur within 25 feet of tortoise the burrow during construction activities. All of the burrows are located exist along the edge of row crop/forest boundaries. A 100 percent gopher tortoise survey will be required before relocation activities take place. If more than 10 burrows are found during the 100 percent survey, a Conservation Permit from the FWC will be required. No approval from the FWS regarding gopher tortoises is required.

3.4.3 Eastern Indigo Snake

The eastern indigo snake (*Drymarchon corais couperi*) is listed as Threatened by the FWC and the FWS. The indigo snake is a large, black, non-venomous snake. They are thick-bodied and muscular, with a glossy black body that in the sunlight appears iridescent blue. The chin and throat are reddish or white, and this color may extend down the body ventrally. The belly is cloudy orange to blue-gray. They are found within scrub, sandhill, and scrubby flatwoods habitats where they occur in or near gopher tortoise burrows. Flatwoods personnel did not observe any eastern indigo snakes during the survey. There is a Programmatic Effect Determination Key for the FWS. The FWS routinely concurs with a not likely to adversely affect determination for individual project effects to the eastern indigo snake when assurances are given that the Standard Protection

Measures for the Eastern Indigo Snake (FWS 2004) will be used during project site preparation and project construction.

3.4.4 Florida Pine Snake

The Florida pine snake (*Pituophis melanoleucus mugitus*) is listed as Threatened by the FWC and not listed by the FWS. The Florida pine snake is a large, stocky, tan or rusty colored snake with an indistinct pattern of large blotches on a lighter background. They have a muscular body, with keeled scales with a relatively small head, somewhat pointed snout, and four prefrontal scales. These snakes may hiss loudly and vibrate their tail when encountered. They are found in sandhill and former sandhill, including old fields and pastures, but also sand pine scrub and scrubby flatwoods with open canopies and dry sandy soils. They often coexist with pocket gophers and gopher tortoises. No Florida pine snakes were observed. No approvals from FWC are anticipated, and as a commensal to the gopher tortoise, any pine snakes found during potential future relocation efforts would be handled according to the relocation permit.

3.4.5 Listed Plants

No listed plants were observed by Flatwoods personnel during the surveys. Because the project area lacks the preferred habitat types, none of the listed plants are likely to occur.

Table 1 Protected Plants and Animals Potentially Occurring on the Fletcher Trace Subdivision Project in Alachua County, Florida

Species	Habitat of Occurrence	Preferred Survey Window[1]	Likelihood of Occurrence	Status[2]	
				Federal[3]	State[4]
BIRDS					
Antigone canadensis pratensis Florida sandhill crane	Open wetland habitats surrounded by shrubs or trees. Commonly found foraging in irrigated croplands, pastures, grasslands, or wetlands.	S – Year round B – January-June	Low: Little suitable habitat present	---	T
Aphelocoma coerulescens Florida scrub-jay	Inhabits fire dominated, low-growing, oak scrub habitat found on well-drained sandy soils. May persist in areas with sparser oaks or scrub areas that are overgrown.	S – March-October B – March-July	Low: Lack of suitable habitat present	T	FT
Athene cunicularia floridana Florida burrowing owl	Open prairies with little understory vegetation, including pastures, agriculture fields, and vacant lots.	S – Year round B – February-July	Low: Lack of suitable habitat present	---	T
Egretta caerulea Little blue heron	Shallow freshwater, brackish water, and saltwater habitats.	S - Year round B - March-July	Low: Lack of suitable habitat present	---	T
Egretta tricolor Tricolored heron	Forages in a variety of permanently and seasonally flooded wetlands, ditches, edges of ponds, and lakes. Inland nesting colonies typically found in Carolina willow dominated wetlands.	S - Year round B - March-July	Low: Lack of suitable habitat present	---	T
Falco sparverius paulus Southeastern American kestrel	Found in open pine habitats, woodland edges, dry prairies, pastures, and roadsides.	S – April-August B – April-August	Moderate: Suitable habitat present	---	T
Haliaeetus leucocephalus Bald eagle	Areas close to the coast, bays, rivers, lakes, or other bodies of water. Typically nests in live mature pines and cypress trees.	S – Year round B – October-May	Low: Lack of suitable habitat present	---[5]	---[5]
Mycteria americana Wood stork	Forages in shallow water in freshwater marshes, swamps, lagoons, ponds, tidal creeks, flooded pastures, and ditches. Nests in colonies in cypress swamps.	S – Year round B – March-August	Low: Lack of suitable habitat present	T	FT

Species	Habitat of Occurrence	Preferred Survey Window[1]	Likelihood of Occurrence	Status[2]	
				Federal[3]	State[4]
REPTILES					
Drymarchon corais couperi Eastern indigo snake	Broad range of habitats from scrub and sandhill to wet prairies, forested wetlands, and mangrove swamps. Often seeks refuge in gopher tortoise burrows in sandy uplands, but also forages in mesic and hydric habitats.	S – Year round B – November-April	Moderate: Some suitable habitat present	T	FT
Gopherus polyphemus Gopher tortoise	Found in dry upland habitats, including sandhills, scrub, xeric oak hammock, and dry prairie flatwoods; also, commonly uses disturbed habitats such as pastures, old fields, abandoned citrus groves, and road shoulders.	S – Year round B – March-October	High: Gopher tortoise burrows observed	---	T
Pituophis melanoleucus mugitus Florida pine snake	Found in sandhill and former sandhill, including old fields and pastures, but also sand pine scrub and scrubby flatwoods with open canopies and dry sandy soils. Often coexists with pocket gophers and gopher tortoises.	S - Year round B - April-February	Moderate: Some suitable habitat present	---	T
PLANTS					
Pecluma plumula Plume polypody	Wet hammocks and swamps; epiphytic on live oaks, occasionally on rocks or terrestrial.	S – Spring-Fall	Low: Some suitable habitat present		E

4.0 PROTECTED HABITATS AND WATERS

The site was evaluated for the potential occurrence of Critical Habitat as defined by the Endangered Species Act of 1973, as amended. The FWS regulates the adverse modification of the biological or physical constituent elements essential to the conservation of the listed species within Critical Habitat. There are no lands designated as Critical Habitat within or adjacent to the site. The site was evaluated for the potential occurrence of Protected Waters and Protected Lands. There are no Protected Waters or Protected Lands within or immediately adjacent to the site.

5.0 FDEP SUBSIDENCE INCIDENT REPORTS

Flatwoods searched the FDEP Map Direct Subsidence Incident Reports database. The subsidence mapping system identifies reported subsidence events and the Florida sinkhole type of the selected area. No subsidence incident reports have been recorded within or adjacent to the project site according to the FDEP mapping system (Subsidence Map). According to FDEP, the majority of the project site in is Area III, described as consisting "mainly of cohesive clayey sediments of low permeability. Sinkholes are most numerous, of varying size and develop abruptly. Cover-collapse sinkholes dominate". The southwestern corner of the project site is Area I which is described as "sinkholes are few, generally shallow and broad and develop gradually. Solution sinkholes dominate".

6.0 PERMITTING DISCUSSION

State/Federal Permitting

An individual Environmental Resource Permit (ERP) through the SRWMD may be required to develop the site. No wetlands or surface waters occur onsite; therefore, Section 404 permitting is not required.

Although five gopher tortoise burrows were observed during the 15 percent survey, Flatwoods is confident that no more than 10 burrows exist onsite due to burrows only being observed on the edges of the property and not in the row crop areas. A relocation permit will be required from the FWC if ground disturbance will occur within 25 feet of tortoise the burrow during construction activities. If more than 10 burrows are observed during the 100 percent survey, a Conservation Permit from the FWC will be required. No approval from the FWS regarding gopher tortoises is required. No other listed species were observed, and none are likely to occur.

Local Permitting

Section 406.04 of Alachua County's Land Development Regulations requires a Resource Assessment as supporting documentation for various applications. This report is sufficient to support the application for Alachua County.

Subject: Summary Report of a Geotechnical Site Exploration – Revision 2
Savannah Station, Phase 3
Alachua, Alachua County, Florida
GSE Project No. 13739A

GSE Engineering & Consulting, Inc. (GSE) is pleased to submit this geotechnical site exploration report for the above referenced project.

Presented herein are the findings and conclusions of our exploration, including the geotechnical parameters and recommendations to assist with clubhouse foundation, pavement, and stormwater management designs. This revision includes a karst evaluation of the subject site.

GSE appreciates this opportunity to have assisted you on this project. If you have any questions or comments concerning this report, please contact us.

Sincerely,

GSE Engineering & Consulting, Inc.

1.0 INTRODUCTION

1.1 General

GSE Engineering & Consulting, Inc. (GSE) has completed this geotechnical exploration for the proposed residential development located in Alachua, Alachua County, Florida. This exploration was performed in accordance with GSE Proposal No. 2021-380 dated July 12, 2021. You authorized our services on July 14, 2021.

1.2 Project Description

This project will consist of a residential development. The project will include a clubhouse, roadways, and stormwater management facilities. The site is located on the south side of C.R. 235 at the C.R. 235A intersection in Alachua, Alachua County, Florida (Figure 1).

Mr. Ryan Thompson with CHW Professional Consultants, Inc. (CHW) provided information about the project and site plans illustrating the locations of the proposed improvements. The project will consist of roadways, stormwater management facilities, and a clubhouse. We anticipate the clubhouse will be either concrete masonry unit or wood frame construction. Structural loads have not been provided but are expected to be on the order of 1 to 2 kips per foot for load bearing walls, and less than 50 kips for columns. The finished floor of the structure is anticipated to be constructed near the existing site grades.

Four stormwater management facilities are proposed that range in size from about 2.7 to 8.6 acres. Approximately 12,000 feet of roadways are proposed.

A recent aerial photograph of the site was obtained and reviewed. The preliminary site plan and aerial photograph were used in preparation of this exploration and report.

1.3 Purpose

The purpose of this geotechnical exploration was to determine the general subsurface conditions, evaluate these conditions with respect to the proposed construction, and prepare geotechnical parameters and recommendations to assist with clubhouse foundation, stormwater management, and pavement designs.

2.0 FIELD AND LABORATORY TESTS

2.1 General Description

The procedures used for field sampling and testing are in general accordance with industry standards of care and established geotechnical engineering practices for this geographic region. This exploration consisted of performing two (2) Standard Penetration Test (SPT) borings to a depth of 20 feet below land surface (bls) within the proposed clubhouse, two (2) auger borings to a depth of 10 feet bls within the proposed clubhouse, twenty-three (23) auger borings to a depth of 5 feet bls along the roadway alignments, twenty-four (24) auger borings to a depth of 15 feet within the proposed stormwater management facilities, and six (6) auger borings to a depth of 30 feet bls within the proposed stormwater management facilities.

The soil borings were performed at the approximate locations as shown on Figure 2. The borings were located at the site using the provided site plan, Global Positioning System (GPS) coordinates, and obvious site features as reference. The boring locations should be considered approximate. The soil borings were performed from August 23 to August 26, 2021.

2.2 Auger Borings

The auger borings were performed in accordance with ASTM D1452. The borings were performed with flight auger equipment that was rotated into the ground in a manner that reduces soil disturbance. After penetrating to the required depth, the auger was retracted, and the soils collected on the auger flights were field classified and placed in sealed containers. Representative samples of each stratum were retained from the auger boring. Results from the auger borings are provided in Section 5.1.

2.3 Standard Penetration Test Borings

The soil borings were performed with a drill rig employing flight auger drilling techniques and Standard Penetration Testing (SPT) in accordance with ASTM D1586. The SPTs were performed continuously to 10 feet and at 5-foot intervals thereafter. Soil samples were obtained at the depths where the SPTs were performed. The soil samples were classified in the field, placed in sealed containers, and returned to our laboratory for further evaluation.

After drilling to the sampling depth, the standard two-inch O.D. split-barrel sampler was seated by driving it 6 inches into the undisturbed soil. The sampler was then driven an additional 12 inches by blows of a 140-pound hammer falling 30 inches. The number of blows required to produce the next 12 inches of penetration were recorded as the penetration resistance (N-value). These values and the complete SPT boring logs are provided in Section 5.2.

Upon completion of the sampling, the boreholes were abandoned in accordance with Water Management District guidelines.

2.4 Soil Laboratory Tests

The soil samples recovered from the soil borings were returned to our laboratory and examined to confirm the field descriptions. Representative samples were then selected for laboratory testing. The laboratory tests consisted of twenty (20) percent soil fines passing the No. 200 sieve determinations, twenty (20) natural moisture content determinations, two (2) Atterberg Limits tests, twelve (12) constant head hydraulic conductivity tests, and three (3) Limerock Bearing Ratio (LBR). These tests were performed in order to aid in classifying the soils and to further evaluate their engineering properties. The laboratory tests are provided in Section 5.3.

3.0 FINDINGS

3.1 Surface Conditions

Ms. Cassandra R. Lindeman, E.I. with GSE initially visited the site on July 22, 2021, to observe the site conditions. Ms. Lindeman returned to the site on August 13, 2021, with Mr. Jason Kite with Jason Kite, LLC to clear lanes through the trees in the southwest corner of the site to allow the drilling equipment access to the boring locations. Representatives from GSE returned to the site on August 16, 2021, to collect soil samples for permeability testing.

The majority of the site is currently an existing crop field. The southwestern corner of the site contains planted pines, trees, and heavy brush. The entire site is outlined by trees. The site is bordered by CR 235 running southwest to northeast and by NW 110th Avenue on the south side.

The topography at the site is gently sloping. Regional topography can also be characterized as gently to moderately sloping. The Alachua County Growth Management website indicates the ground surface elevations at the site are near 86 to 102 feet.

The Alachua County Soil Survey maps a closed depression on the southern portion of the site.

3.2 Subsurface Conditions

The locations of the auger and SPT borings are provided on Figure 2. Complete logs for the borings are provided in Sections 5.1 and 5.2. Descriptions for the soils encountered are accompanied by the Unified Soil Classification System symbol (SM, SP-SM, etc.) and are based on visual examination of the recovered soil samples and the laboratory tests performed. Stratification boundaries between the soil types should be considered approximate, as the actual transition between soil types may be gradual.

The auger and SPT borings generally encountered relatively consistent soil conditions across the site.

The auger borings located in the areas of the proposed roadways typically encountered poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC) to the explored depth of 5 feet bls. Boring R-16 encountered very clayey sand (SC/CL) at 3 feet bls to the explored depth of 5 feet bls. Borings R-17, R-20, and R-23 encountered clayey sand (SC) at depths of 2, 2.5, and 4 feet bls, respectively, to the explored depth of 5 feet bls.

The auger borings located within the proposed stormwater management facilities initially encountered poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC). The sandy soils were generally underlain by clayey and very clayey sands (SC, SC/CL) with some interbedded layers of clay-rich soils consisting of sandy clay, clay with sand, and clay (CL/CH) to the explored depths of 15 and 30 feet bls. Borings P-8, P-24, and P-28 encountered limestone at 28 and 28.5 feet bls to the explored depth of 30 feet bls.

The auger and SPT borings located within the area of the proposed clubhouse encountered similar conditions to the rest of the site. Boring A-1 encountered sand with silt (SP-SM) to the explored depth of 10 feet bls. Boring A-2 encountered 2 feet of sand with silt (SP-SM) underlain by very clayey sand (SC/CL) to the explored depth of 10 feet bls. Boring B-1 initially penetrated 7 feet of sand with silt (SP-SM) underlain by 1.5 feet of very clayey sand (SC/CL), 5 feet of poorly graded sand (SP), and 6.5 feet of clayey and very clayey sands (SC, SC/CL) to the explored depth of 20 feet bls. Boring B-2 initially penetrated 7 feet of sand with silt (SP-SM) and poorly graded sand (SP) underlain by 6.5 feet of clayey sand (SC) and 6.5 feet of sand with clay (SP-SC) to the explored depth of 20 feet bls.

The sandy soils consisting of poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC) are generally in a very loose to medium dense condition with N-values ranging from 2 to 26 blows per foot. The clayey and very clayey sands (SC, SC/CL) encountered are generally in a loose to medium dense condition with N-values ranging from 5 to 21 blows per foot.

The groundwater table was not encountered in the auger and SPT borings at the time of our investigation.

3.3 Review of Published Data

The majority of the site is mapped as five soil series by the Soil Conservation Service (SCS) Soil Survey for Alachua County[1]. The following soil descriptions are from the Soil Survey.

Arredondo fine sand, 0 to 5 percent slopes – This nearly level to gently sloping, well-drained soil is in both small and large areas of uplands. Slopes are smooth to convex. The areas are irregular in shape and range from about 10 to 160 acres in size.

Typically, the surface layer is dark grayish brown fine sand about 8 inches thick. The subsurface layer is fine sand to a depth of 49 inches. The upper 23 inches is yellowish brown, and the lower 18 inches is brownish yellow. The subsoil extends to a depth of 86 inches or more. The upper 5 inches is yellowish brown loamy sand; the next 10 inches is yellowish brown sandy clay loam, and the lower 22 inches is dark yellowish brown sandy clay and sandy clay loam.

Included with this soil in mapping are small depressional areas of soils that have a very dark gray or black surface layer 8 to 24 inches thick. This layer overlies gray sandy material. These areas are shown by wet spot symbols. Also included are small areas of Fort Meade, Gainesville, Kendrick, and Millhopper soils. A few areas of this soil include Arredondo soils that have 5 to 8 percent slopes. Some areas of this soil in the western part of the county have small spots of strongly acid to medium acid soil material 40 to 70 inches deep to calcareous limestone. Limestone boulders, fragments of limestone, and sinkholes are in some areas of this soil, mainly in the limestone plain sections of the western part of the county. Most of these boulders are siliceous. The sinkholes and the boulders are shown by appropriate map symbols. Total included areas are about 15 percent.

In this Arredondo soil, the available water capacity is low in the sandy surface and subsurface layers and low to medium in the loamy subsoil. Permeability is rapid in the surface and subsurface layers and moderately slow to moderate in the loamy subsoil. Natural fertility is low in the sandy surface and subsurface layers and medium in the finer textured subsoil. Organic matter content is low. The water table in this soil is at a depth of more than 72 inches. Surface runoff is slow.

[1] Soil Survey of Alachua County, Florida. Soil Conservation Service, U.S. Department of Agriculture.

Millhopper sand, 0 to 5 percent soils – This nearly level to gently sloping, moderately well drained soil is in small and large irregularly shaped areas on uplands and on slightly rolling knolls in the broad flatwoods. Slopes are mostly nearly smooth or convex. The areas are variable in size. They range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 9 inches thick. The subsurface layer is sand or fine sand about 49 inches thick. The upper 17 inches is yellowish brown, the next 22 inches is light yellowish brown, and the lower 10 inches is very pale brown. The subsoil extends to a depth of 89 inches. The upper 6 inches is yellowish brown loamy sand that has grayish and brownish mottles; the next 22 inches is light gray, mottled sandy clay loam; and the lower 3 inches is light gray, mottled sandy loam.

Included with this soil in mapping are small areas of Arredondo, Bonneau, Fort Meade, Gainesville, Kanapaha, Lochloosa, and Sparr soils. Siliceous limestone boulders and small sinks are within some delineations. Small areas of Millhopper soils that have 5 to 8 percent slopes are also included. About 25 acres mapped as this Millhopper soil along the Santa Fe River is occasionally flooded. Total included areas are about 20 percent or less.

This Millhopper soil has a water table that is at a depth of 40 to 60 inches for 1 to 4 months and at a depth of 60 to 72 inches for 2 to 4 months during most years. The available water capacity is low in the surface and subsurface layers and is low to medium in the subsoil. Permeability is rapid in the surface and subsurface layers, moderately rapid in the upper 6 inches of the subsoil, and slow to moderately slow below this depth. Natural fertility is low. Organic matter content is low to moderately low.

Gainesville sand, 0 to 5 percent slopes – This nearly level to gently sloping, well-drained soil has sandy texture to a depth of 80 inches or more. It is in both small and large, irregularly shaped areas on the gently rolling uplands. Most areas range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 7 inches thick. The underlying layer extends to a depth of 82 inches or more. The upper 22 inches is yellowish brown sand, and the lower 53 inches is strong brown loamy sand.

Included with this soil in mapping are small areas of Arredondo, Fort Meade, Kendrick, and Lake soils. A few small areas of Gainesville soils that have 5 to 8 percent slopes are included. Total included areas are less than 15 percent.

In this Gainesville soil, the available water capacity is low, and the permeability is rapid. Organic matter content ranges from low to moderately low, and natural fertility is low. Surface runoff is slow. The water table is more than 72 inches below the surface.

Arredondo fine sand, 5 to 8 percent slopes – This is near level to sloping, well-drained soil forms in thick beds of sandy and loamy marine materials. These soils are in broad rolling areas of the upland. Slopes range from 0 to 8 percent. The water table is more than 72 inches below the surface. These soils are loamy siliceous, hyperthermic Grossarenic Paleudults.

Arredondo soils are geographically associated with Apopka, Bonneau, Candler, Fort Meade, Gainesville, Jonesville, Kanapaha, Kendrick, Lake Millhopper, and Norfolk soils. Apopka soils have less than 5 percent silt and clay in the A2 horizon, and many of the sand grains are uncoated. Bonneau soils are moderately well drained and have an A horizon 20 to 40 inches thick. Candler soils are sandy to a depth of 80 inches or more and have less than 5 percent silt and clay in their 10- to 40-inch control section.

Fort Meade and Gainesville soils are sandy to a depth of more than 80 inches. They have 10 to 15 percent silt and clay in their 10- to 40-inch control section. Fort Meade soils also have a thick, dark colored A1 horizon. Jonesville soils have underlying limestone at a depth of less than 60 inches. Lake soils are sandy to 80 inches or more. Kanapaha soils are poorly drained, and Millhopper soils are moderately well drained. Norfolk soils have an A horizon less than 20 inches thick.

Lochloosa fine sand, 5 to 8 percent slopes – This is near level to sloping, somewhat poorly drained soil that forms in thick beds of loamy marine deposits. These soils are in broad areas of the gently rolling uplands and in slightly convex areas of the flatwoods. Slopes range from 0 to 8 percent. The water table is about 30 to 40 inches below the surface for about 1 to 4 months during most years. It rises to 15 to 30 inches for about 1 to 4 weeks during most years. During most of the remained of the year it is at a depth of more than 40 inches. These soils are loamy, siliceous, hyperthermic Aquic Arenic Paleudults.

Lochloosa soils are geographically associated with Blichton, Bivans, Boardman, Bonneau, Kanapaha, Kendrick, Micanopy, Millhopper, Sparr, and Wacahoota soils. Blichton, Bivans, Boardman, Kanapaha, and Wacahoota soils are all poorly drained. Blichton soils are more than 5 percent plinthite. In addition, the Bivans soils have a clayey Btg horizon within 20 inches of the surface and contain more than 5 percent nodules and fragments of limestone. Kanapaha soils have an A horizon 40 to 80 inches thick. Wacahoota soils are more than 5 percent nodules and fragments of limestone. Kendrick soils are well drained. Micanopy soils have a clayey Bt horizon within 20 inches of the surface. Millhopper soils are moderately well drained and have an A horizon 40 to 80 inches thick. Sparr soils have a sandy A horizon 40 to 80 inches thick.

3.4 Laboratory Soil Analysis

Selected soil samples recovered from the soil borings were analyzed for the percent soil fines passing the No. 200 sieve, natural moisture content, Atterberg Limits, hydraulic conductivity, and Limerock Bearing Ratio (LBR) tests. Samples selected for laboratory testing were collected at depths ranging from 0.5 to 10 feet bls. These tests were performed to confirm visual soil classification and evaluate their engineering properties. The complete laboratory report is provided in Section 5.3.

The laboratory tests indicate the tested soils consist of poorly graded sand (SP), sand with silt (SP-SM), clayey sand (SC), and very clayey sand (SC/CL). The tested poorly graded sand (SP) contains approximately 3.5 to 4.9 percent soil fines passing the No. 200 sieve with natural moisture contents of about 5.2 to 5.3 percent. The tested sand with silt (SP-SM) contains approximately 5 to 9.5 percent soil fines passing the No. 200 sieve with natural moisture contents of about 5.8 to 8.3 percent. The tested clayey sand (SC) contains approximately 12 to 29 percent soil fines passing the No. 200 sieve with natural moisture contents of about 11 to 18 percent. The tested very clayey sand (SC/CL) contains approximately 30 to 46 percent soil fines passing the No. 200 sieve with natural moisture contents of about 18 to 24 percent.

Atterberg Limits tests indicate the tested very clayey sands (SC/CL) have Liquid Limit (LL) values of 27 and 45, Plastic Limit (PL) values of 16 and 19, and Plasticity Index (PI) values of 11 and 26. These values correspond to a material with low potential (LL < 50 and PI < 25) for expansive behavior[2].

The constant head hydraulic conductivity test results indicate the near-surface poorly graded sand (SP) has a hydraulic conductivity value of 12 feet per day. The tested sand with silt (SP-SM) has hydraulic conductivity values of 4.7 to 22 feet per day.

[2] U.S. Department of the Army USA, 1983, Foundations in Expansive Soils, TM 5-818-7, p. 4-1.

The tested clayey sands (SC) have hydraulic conductivity values of 0.6 to 11 feet per day. The tested very clayey sand (SC/CL) has a hydraulic conductivity value of 1.7 feet per day.

The Modified Proctor maximum dry density tests indicate the near surface grab samples have maximum dry densities ranging from 113.3 to 116.8 pounds per cubic foot and optimum moisture contents of 8.5 to 10.8 percent. The LBR tests indicate the soils have LBR values ranging from 34 to 67.

4.0 EVALUATION AND RECOMMENDATIONS

4.1 General

The following recommendations are made based upon our understanding of the proposed construction, a review of the attached soil borings and laboratory test data, and experience with similar projects and subsurface conditions. If plans or the location of proposed construction changes from those discussed previously, GSE requests the opportunity to review and possibly amend our recommendations with respect to those changes.

The final design of a foundation system is dependent upon adequate integration of geotechnical and structural engineering considerations. Consequently, GSE must review the final foundation design in order to evaluate the effectiveness and applicability of our initial analyses, and to determine if additional recommendations may be warranted. Without such a review, the recommendations presented herein could be misinterpreted or misapplied resulting in potentially unacceptable performance of the foundation system.

The performance of site improvements may be sensitive to their post-construction relationship to site groundwater levels, seepage zones, or soil/rock characteristics exposed at final site grades. GSE recommends that use of boring information for final design of all site improvements be predicated on proper horizontal and vertical control of borings.

In this section of the report, we present our geotechnical parameters and recommendations to assist with building foundation, stormwater management, and pavement designs as well as our general site preparation guidelines.

4.2 Groundwater

The groundwater table was not encountered in the borings at the time of our exploration. The lack of apparent groundwater table in the borings suggest the site is perforated; however, you should expect water to perch on top of the very clayey sands and clays after periods of heavy and seasonal rainfall. Estimates for the temporarily perched groundwater tables are shown on the individual boring logs.

4.3 Building Foundations

The borings located within the proposed building footprint generally encountered poorly graded sand and sand with silt underlain by interbedded layers of clayey and very clayey sand and sandy clay to the explored depths of 10 and 20 feet bls.

Based upon the soil conditions encountered and our limited understanding of the structural loads and site grading, we recommend the building be supported by conventional, shallow strip and/or spread foundations. We recommend the shallow foundations be designed for a maximum allowable gross bearing pressure of 2,000 psf. The gross bearing pressure is defined as the soil contact pressure that can be imposed from the maximum structural loads, weight of the concrete foundations, and weight of the soil above the foundations. The foundations should be designed based upon the maximum load that could be imposed by all loading conditions.

The foundations should be embedded a minimum of 18 inches below the lowest adjacent grade. Interior foundations or thickened sections should be embedded a minimum of 12 inches. The foundations should have minimum widths of 18 inches for strip footings, and 24 inches for columns, even though the maximum soil bearing pressure may not be fully developed.

Due to the mostly sandy nature of the majority of the near-surface soils, we expect settlement to be mostly elastic in nature. The majority of the settlement will occur on application of the loads, during and immediately following construction. Using the recommended maximum bearing pressure, the assumed maximum structural loads, and the field and laboratory test data which we have correlated into the strength and compressibility characteristics of the subsurface soils, we estimate the total settlements of the structure to be 1 inch or less, with approximately half of it occurring upon load application (during construction).

Differential settlement results from differences in applied bearing pressures and the variations in the compressibility characteristics of the subsurface soils. For the building pad prepared as recommended, we anticipate differential settlement of less than 1/2 inch.

Post-construction settlement of the structures will be influenced by several interrelated factors, such as (1) subsurface stratification and strength/compressibility characteristics of the bearing soils; (2) footing size, bearing level, applied loads, and resulting bearing pressures beneath the foundation; (3) site preparation and earthwork construction techniques used by the contractor, and (4) external factors, including but not limited to vibration from off-site sources and groundwater fluctuations beyond those normally anticipated for the naturally-occurring site and soil conditions which are present.

Our settlement estimates for the structure are based upon our limited understanding of the structural loads and site grading and the use of successful adherence to the site preparation recommendations presented later in this report. Any deviation from our project understanding and/or our site preparation recommendations could result in an increase in the estimated post-construction settlement of the structure.

4.4 Flexible Pavement

Overall soil conditions encountered by our borings at this site are suitable for supporting conventional limerock base and asphalt wearing surface pavements. We have not been provided the anticipated traffic loading conditions; therefore, the following pavement component recommendations should be used only as guidelines. The below recommendations are intended to be minimums. Increasing base course and asphalt thicknesses would increase the design life of the pavement.

We recommend a minimum separation of 24 inches be present between the bottom of the base course and the top of the clay-rich soils containing greater than about 25 percent soil fines. Review of the boring logs suggests this separation will likely be present along the majority of the alignment. Boring R-20 did encounter very clayey sand (SC/CL) at a depth of 2.5 feet bls and clay-rich soils approached within 24 inches of grade at boring location R-17. Clay-rich soils were encountered at borings R-16, R-20, and R-23 at depths of 3 feet bls, 2.5 feet bls, and 4 feet bls, respectively. A roadway grading plan is not available at this time. The presence of shallow clay-rich soils is expected to be sporadic and not easily predicted without a grading plan.

In areas where the minimum 24-inch separation is not able to be achieved through grading design, we recommend these soils be undercut. The undercut should extend a minimum of 24 inches beneath the bottom of the base course. The undercut should extend laterally until the clay-rich soils are no longer encountered and free-draining sandy soils have been penetrated. The undercut should be backfilled with either on-site or imported sandy free-draining soils containing less than 10 percent soil fines. The backfill should be placed in maximum 24-inch loose lifts that are compacted to a minimum 95 percent of the Modified Proctor maximum dry density (ASTM D1557). Underdrains should be considered where clay-rich soils are undercut.

4.4.1 Stabilized Subgrade

The stabilized subgrade should have a minimum Limerock Bearing Ratio (LBR) of 40, with a minimum thickness of 12 inches. The stabilized subgrade can be imported material or a mixture of imported and on-site material. If a mix is proposed, a mix design should be performed to determine the optimum mix proportions. The stabilized subgrade should be compacted to a minimum of 98 percent of the Modified Proctor maximum dry density (ASTM D1557) for soils with less than 15 percent fines content. Soils with 15 percent or greater fines content should be compacted to 100 percent of the Standard Proctor maximum dry density (ASTM D698).

4.4.2 Base Course

The base course should consist of crushed limerock having a LBR of at least 100. Limerock should be obtained from a FDOT approved source and should meet FDOT gradation requirements. The base course thickness should be a minimum of 6 inches in automobile parking areas and 8 inches in driveways. The base course should be compacted to at least 98 percent of the Modified Proctor maximum dry density (ASTM D1557).

The constructability of differing base course thicknesses may be difficult and having a uniform 8-inch-thick base course may be more practical.

4.4.3 Wearing Surface

The asphalt-wearing surface should consist of an FDOT Type SP Hot Mix Asphalt mixture. For automobile parking areas, the thickness should be a minimum of 1.5 inches. For driveway areas, the thickness should be a minimum of 2 inches. The asphalt-wearing surface should consist of an SP-12.5 mix. The asphalt should be compacted to at least 95 percent of the mix design density.

The constructability of differing asphalt thicknesses may be difficult and having a uniform 2-inch-thick asphalt wearing surface may be more practical.

4.5 Site Preparation

The soils at this site should be suitable for supporting the proposed construction using normal, good practice site preparation procedures. The following recommendations are our general guidelines for site preparation.

4.5.1 Stripping

Strip the construction limits and 10 feet beyond the perimeter of all grass, roots, topsoil, and other deleterious materials. You should expect to strip to depths of 12 or more inches. Deeper stripping will likely be necessary due to major root systems present at the site.

4.5.2 Dewatering

Temporary dewatering is not expected to be necessary for this project. However, if needed, we anticipate dewatering can be accomplished with sumps placed near the construction area, or with underdrains connected to a vacuum pump.

In any case, the site should always be graded to promote runoff and limit the amount of ponding. Localized ponding of stormwater is expected without proper grading during construction and could render previously acceptable surfaces unacceptable.

4.5.3 Proof-Rolling

Proof-roll the subgrade with heavy rubber-tired equipment, such as a loaded front-end loader or dump truck, to identify any loose or soft zones not found by the soil borings. The proof-rolling should be monitored by a geotechnical engineer or qualified technician. Undercut or otherwise treat these zones as recommended by the geotechnical engineer in this report.

4.5.4 Proof Compaction

Compact the subgrade to a density of at least 95 percent of the Modified Proctor maximum dry density (ASTM D1557). The specified compaction should be obtained to a depth of 1 foot below the foundation bottoms and the existing grade prior to placing fill. Vibratory roller equipment should not be used within approximately 100 feet of existing structures. Lighter "walk-behind" compaction equipment may be used to achieve the degree of compaction.

Should clayey sand be encountered at the bearing surface, this material should be probed and visually confirmed to be unyielding in the upper 12 inches in lieu of density testing. If the foundation excavations penetrate the clayey sand, the excavation should be performed in a manner that reduces soil disturbance. Clayey sand soils (with fines content in excess of 15 percent) that are removed and replaced or appreciably disturbed need to be re-compacted to 98 percent of the Standard Proctor maximum dry density (ASTM D698).

4.5.5 Fill Placement

Imported fill placed to raise the site grades should consist of clean sand having less than 10 percent passing the No. 200 sieve. On-site soils meeting the requirements of Section 4.9 may also be used as structural fill. The fill should be placed in maximum 12-inch loose lifts that are compacted to at least 95 percent of the Modified Proctor maximum dry density (ASTM D1557). If lighter "walk-behind" compaction equipment is used, this may require lifts of 4 inches or less to achieve the required degree of compaction.

4.6 Quality Control and Construction Materials Testing

It should be noted that the geotechnical engineering design does not end with the advertisement of the construction documents. As the geotechnical engineer of record, GSE is the most qualified to perform the construction materials testing that will be required for this project. The benefits of having the geotechnical engineer of record also perform the construction materials testing are numerous. If GSE continues to be involved with the project through construction, we will be able to constantly re-evaluate and possibly alter our geotechnical recommendations in a timely and cost-effective manner once final design and construction techniques are developed. This often results in cost savings for the project.

We recommend performing compaction testing beneath the concrete floor slab and the building foundations. We recommend one test be performed every 50 linear feet of continuous footing and every other column footing, per foot depth of fill or native material. We recommend a compaction test be performed for each 2,500 square feet of floor area or 10,000 square feet of pavement area per foot of fill or native material, or a minimum of three tests each, whichever is greater. Test all footing excavations to a depth of 12 inches at the frequencies stated above.

4.7 Stormwater Management

The soil conditions at the stormwater management facility are relatively consistent; initially penetrating poorly graded sand and sand with silt underlain by clayey to very clayey sand with interbedded layers of sandy clay, clay with sand, and clay. Limestone was encountered in borings P-8, P-24, and P-28 at depths of 28 and 28.5 feet bls.

The water table was not encountered in the auger borings at the time of our exploration. We anticipate the seasonal high groundwater table to be temporarily perched on the very clayey sands and sandy clays.

The laboratory permeability tests indicate the tested layers of poorly graded sand, sand with silt, clayey sand, and very clayey sand have hydraulic conductivity values of 0.6 to 22 feet per day. The underlying very clayey sand, sandy clay, clay with sand, and clay are expected to be confining soils.

Based upon our findings and test results, our recommended soil parameters for the stormwater management design in the explored areas are presented below. The recommended parameters consider the results of the permeability tests, wash 200 determinations, and our experience with these types of soils. The parameters below do not consider a factor of safety.

Proposed Stormwater Management Facility (P-22 to P-29)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 2.5 feet per day.
3. Horizontal hydraulic conductivity equal to 4 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-18 to P-21)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 8 feet per day.
3. Horizontal hydraulic conductivity equal to 12 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

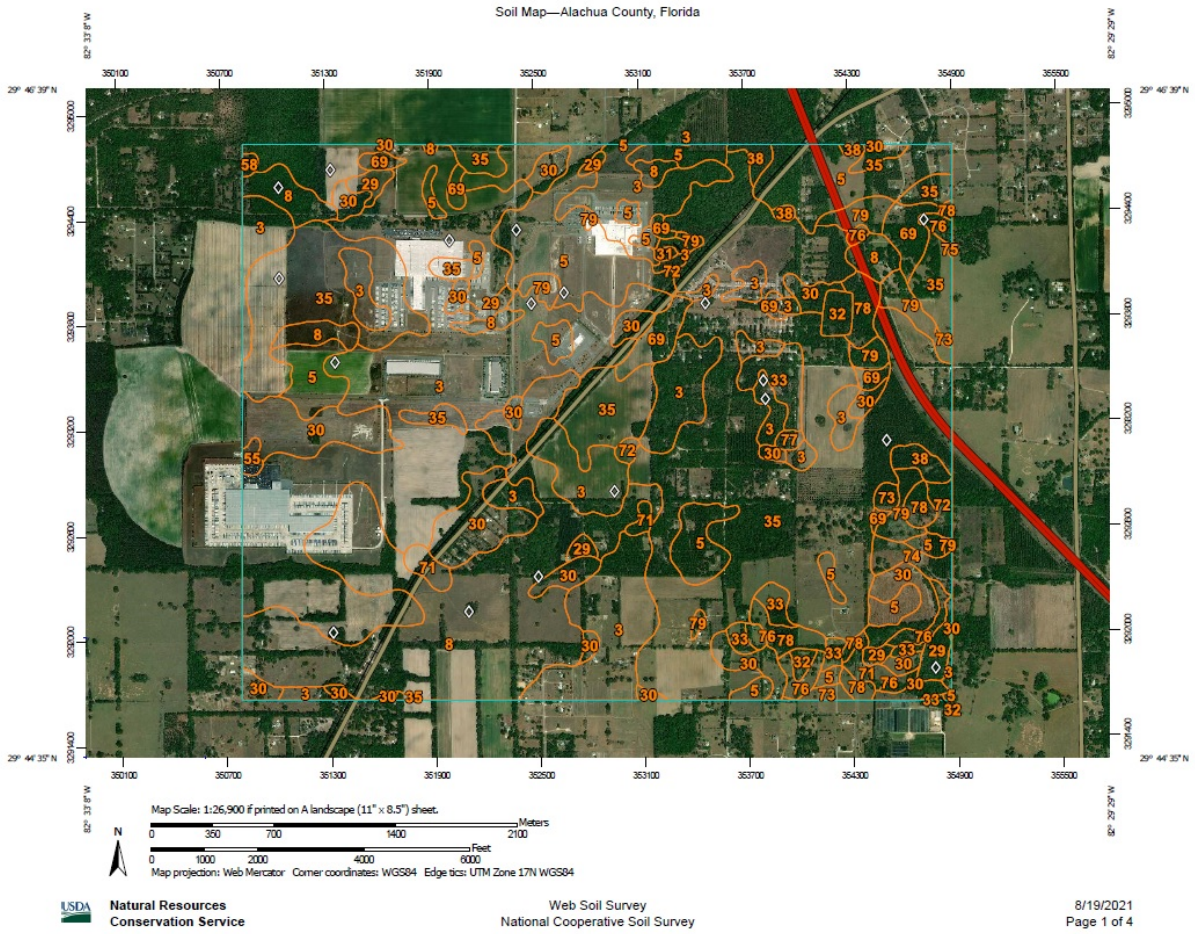
Proposed Stormwater Management Facility (P-12, P-13, A-2, B-2)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 3.5 feet per day.
3. Horizontal hydraulic conductivity equal to 5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-14, P-15)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 5 feet per day.
3. Horizontal hydraulic conductivity equal to 7.5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-1 to P-11)



1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 3.5 feet per day.
3. Horizontal hydraulic conductivity equal to 5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

In areas where clay-rich soils are present at the basin bottom, we recommend these soils be undercut a minimum of 2 feet and backfilled with the on-site sands and sands with silt (SP, SP-SM) having a maximum of 12 percent soil fines passing the No. 200 sieve. The intent of this undercutting and replacement is to provide a more uniform sand "blanket" at the basin bottom that allows the migration of water to the deeper deposits of sand. This sand blanket will also reduce the potential for clay-fines leaching out of the soils when water is present in the basin that can result in a thin layer of confining type material on the basin bottom that can reduce the effectiveness of the basin.

4.8 Karst Area Evaluation Summary

A site visit and driving tour of the immediate area surrounding the site (approximately 200-foot radius) was performed in order to confirm the absence or presence of visible potential depressional sinkhole features. In addition, readily available published information related to known and documented sinkhole features in the immediate area of the site was reviewed.

Depressional features were observed on the site. In addition, the soil survey indicates the presence of a sinkhole at the southern portion of the site. Multiple sinkholes are indicated with a diamond within a 2-mile radius of the site (See Graphic Below). In addition to the identified sinkhole, multiple closed depressions are present on the site and in the immediate vicinity. Closed depressions are not necessarily an indicator of sinkholes and could represent other landforms. However, there were no compelling indications of sinkhole activity within the depths explored by the borings.

Graphic obtained from the www.websoilsurvey.com

The FDEP Map Direct Gateway[3] website was utilized to determine if there were nearby subsidence incident reports near the subject site. One incident was noted ½ mile south of the CR 241 overpass on I-75. However, GSE knows of multiple subsidence incidents north of the site at commercial developments along CR 235A.

Historical USGS topographic maps dated 2021, 2012, 1981, 1962, and 1954 were reviewed as part of this assessment. The historical use of the site and the findings in the topographic maps indicate that the ground surface elevations at the site have remained fairly consistent at about 90 to 100 feet NGVD. The topographic maps did not encounter compelling changes in the site elevation that would warrant concern.

The karst area survey performed is considered adequate and in sufficient detail to define the hydrologic and geologic conditions at the site. One karst feature was identified on the subject site. The feature is considered a relic sinkhole and does not appear to be active.

This site is located within a highly karstic area which is prone to erosion and fissures in the limestone formations. Site development commonly changes the risk for sinkhole development in highly karstic geology. The construction of impervious surfaces (buildings and pavement) decreases sinkhole risk, as stormwater that infiltrates and erodes subsurface materials is removed.

[3] *Map Direct Gateway*. Florida Department of Environmental Protection, https://ca.dep.state.fl.us/mapdirect/

Stormwater basins commonly have an increased risk for sinkhole development, due to the concentration of stormwater in these areas. The karst geologic conditions encountered at this site are typical for this area of Alachua County, and it is our opinion the risk for sinkhole development at this site is no greater or lower than what is expected for this immediate area.

Site development should be performed in a manner that reduces the potential for sinkhole activity affecting structures. All roof runoffs should be discharged into impervious surfaces or directly into the stormwater management infiltration beneath the perimeter of the structure. The stormwater management basin should be located well away from structures because the basin will have the highest risk for sinkhole development. We wish to point out that these measures will not eliminate the risk for sinkhole activity at the site.

4.9 Fill Suitability

The soils encountered at this site within the explored depths range from sands (SP) to clays (CL/CH). A discussion of the suitability for reuse as structural fill for each soil classification according to the Unified Soil Classification System (USCS) designation is provided below.

SP, SP/SM – Sands (SP) and sand with silt (SP/SM) have less than 5 percent and 12 percent soil fines passing the No. 200 sieve, respectively, and are typically well draining soils that are suitable for reuse as structural fill. The sands with silt may require moisture conditioning (drying) to make the material more workable. These soils will require stockpiling and drying before they are reused if they are excavated from below the water table.

SM – Silty sands (SM) can have between 12 percent and 50 percent soil fines passing the No. 200 sieve. Silty sands are typically non-plastic or have low plasticity and can be reused as structural fill with precautions. Silty sands can be moisture sensitive and difficult to work and compact and can rut if the moisture content is near or above the optimum moisture content. We recommend these soils be moisture conditioned (dried) so that the moisture content during use is at or below the optimum moisture content. Aerating and exposure to the sun is typically the most effective methods of drying these soils. It may not be practical to reuse these materials during the wet season, as frequent rain showers may not allow these soils to dry to a workable moisture content. Suitable silty sands are limited to soil having less than 30 percent soil fines passing the No. 200 sieve. Silty sands with more than 30 percent soil fines are especially moisture sensitive and are not recommended for reuse as structural fill. These soils will behave more as sandy silt, and for this reason, very silty sands having more than 30 percent soil fines passing the No. 200 sieve have been assigned a dual classification of SM/ML. Silty sand soils that are excavated from below the water table are not recommended for reuse as structural fill due to the amount of time that will be required to dry these soils to a workable condition.

SC – Clayey sand (SC) soils can have between 12 percent and 50 percent soil fines passing the No. 200 sieve. Clayey sands can have a high range of plasticity, varying from a PI of 7 or greater and plotting above the A-line to highly plastic. Friable clayey sands are typically suitable for use as structural fill with precautions. Clayey sands will be moisture sensitive and difficult to work and compact and can rut during placement if the moisture content is near or above the natural moisture content. We recommend these soils be moisture conditioned (dried) so that the moisture content during use is at or below the optimum moisture content. Aerating and exposure to the sun is typically the most effective methods of drying these soils. It may not be practical to reuse these materials during the wet season, as frequent rain showers may not allow these soils to dry to a workable moisture content. Suitable clayey sands are limited to soil having less than 30 percent soil fines passing the No. 200 sieve. Clayey sands with more than 30 percent soil fines passing the No. 200 sieve are especially moisture sensitive and are typically highly plastic and are not recommended for reuse as structural fill.

These soils will behave more as sandy clay, and for this reason, very clayey sands having more than 30 percent soil fines passing the No. 200 sieve have been assigned a dual classification of SC/CH or SC/CL. Clayey sand soils that are excavated from below the water table are not recommended for reuse as structural fill due to the amount of time that will be required to dry these soils to a workable condition.

ML, MH, CL, CH – Silts and clays are not suitable materials for reuse as structural fill.

When using on-site soils as fill materials, we recommend the silty and clayey sand soils (SM, SC) be used in the lower depths of the fill. Sand and sand with silt (SP, SP-SM) should be used in the upper portions of the fill. We recommend a minimum of 2 feet of sand (SP, SP-SM) cover the silty and clayey sand fill materials to reduce the potential for soggy surface conditions due to the low permeability characteristics of the silty and clayey sand materials.

4.10 Surface Water Control and Landscaping

Roof gutters should be considered to divert runoff away from the building. The gutter downspouts should discharge a minimum of 10 feet from the structure to reduce the amount of water collecting around the foundations. Where possible, the gutter downspouts should discharge directly into the storm sewer system or onto the asphalt paved areas in order to reduce the amount of water collecting around the foundations. Grading of the site should be such that water is diverted away from the building on all sides to reduce the potential for erosion and water infiltration along the foundation.

With respect to landscaping, it is recommended that any trees and large “tree-like” shrubbery with potential for developing large root systems be planted a minimum distance of half their mature height, and preferably their expected final height, away from the structure. The purpose of this is to reduce the potential for foundation or slab movements from the growth of root systems as the landscaping matures. Consideration should also be given to using landscaping that has a low water demand, so that excessive irrigation is not conducted around the structures.

If excavations for underground utilities encounter the clay-rich soils, the excavations should be made such that they do not trap water (i.e., “swimming pool” or “bowl” effect). Sloping the excavations, installing underdrains, or extending the excavation to a more pervious area can achieve this. Allowing surface water to become trapped within utility trenches or other excavations (including footings) serves as a potential water source for the clay, which can result in shrink swell of these soils. Furthermore, during construction, surface water within the building areas must be controlled such that the water does not become trapped and represent a source of water for the underlying clay-rich soils. Mismanagement of the surface water during construction within the building footprint could result in subsequent post-construction slab movement.

The above recommendations are intended to maintain relatively consistent moisture contents within the clay-rich expansive soils encountered by the borings. The importance of proper surface water control and landscaping placement cannot be overemphasized in accomplishing this objective.

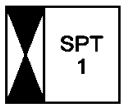
5.4 Key to Soil Classification

KEY TO SOIL CLASSIFICATION CHART

Criteria for Assigning Group Symbols and Group Names Using Laboratory Tests				SYMBOLS		GROUP NAME
				GRAPHIC	LETTER	
COARSE-GRAINED SOILS	Gravels	Clean Gravels	$Cu \geq 4$ and $1 \leq Cc \leq 3$		GW	Well graded GRAVEL
More than 50% retained on No. 200 sieve	More than 50% of coarse fraction retained on No. 4 sieve	Less than 5% fines	$Cu < 4$ and/or $1 > Cc > 3$		GP	Poorly graded GRAVEL
		Gravels with fines	Fines classify as ML or MH		GM	Silty GRAVEL
		More than 12% fines	Fines classify as CL or CH		GC	Clayey GRAVEL
	Sands	Clean Sands	$Cu \geq 6$ and $1 \leq Cc \leq 3$		SW	Well graded SAND
	50% or more of coarse fraction passes No. 4 sieve	Less than 5% fines	$Cu < 6$ and/or $1 > Cc > 3$		SP	Poorly graded SAND
		Sand with fines	Fines classify as ML or MH		SP-SM	SAND with silt
		5% ≤ fines < 12%	Fines classify as CL or CH		SP-SC	SAND with clay
		Sand with fines	Fines classify as ML or MH		SM	Silty SAND
		12% ≤ fines < 30%	Fines classify as CL or CH		SC	Clayey SAND
		Sand with fines	Fines classify as ML or MH		SM	Very silty SAND
		30% fines or more	Fines classify as CL or CH		SC	Very clayey SAND
FINE-GRAINED SOILS	Clays	inorganic	50% ≤ fines < 70%		CL/CH	Sandy CLAY
50% or more passes the No. 200 sieve			70% ≤ fines < 85%		CL/CH	CLAY with sand
			fines ≥ 85%		CL/CH	CLAY
	Silts and Clays	inorganic	PI > 7 and plots on/above "A" line		CL	Lean CLAY
	Liquid Limit less than 50		PI < 4 or plots below "A" line		ML	SILT
		organic	Liquid Limit - oven dried / Liquid Limit - not dried < 0.75		OL	Organic clay / Organic silt
	Silts and Clays	inorganic	PI plots on or above "A" line		CH	Fat CLAY
	Liquid Limit 50 or more		PI plots below "A" line		MH	Elastic SILT
		organic	Liquid Limit - oven dried / Liquid Limit - not dried < 0.75		OH	Organic clay / Organic silt
HIGHLY ORGANIC SOILS	Primarily organic matter, dark in color, and organic odor				PT	PEAT



CORRELATION OF PENETRATION RESISTANCE WITH RELATIVE DENSITY AND CONSISTENCY

	No. OF BLOWS, N	RELATIVE DENSITY
	0 - 4	Very Loose
	5 - 10	Loose
SANDS:	11 - 30	Medium dense
	31 - 50	Dense
	OVER 50	Very Dense

	No. OF BLOWS, N	CONSISTENCY
	0 - 2	Very Soft
SILTS	3 - 4	Soft
&	5 - 8	Firm
CLAYS:	9 - 15	Stiff
	16 - 30	Very Stiff
	31 - 50	Hard
	OVER 50	Very Hard

	No. OF BLOWS, N	RELATIVE DENSITY
	0 - 8	Very Soft
	9 - 18	Soft
LIMESTONE:	19 - 32	Moderately Hard
	33 - 50	Hard
	OVER 50	Very Hard

SAMPLE GRAPHIC TYPE LEGEND

Location of SPT Sample

Location of Auger Sample

PARTICLE SIZE IDENTIFICATION

BOULDERS:		Greater than 300 mm
COBBLES:		75 mm to 300 mm
GRAVEL:	Coarse -	19.0 mm to 75 mm
	Fine -	4.75 mm to 19.0 mm
SANDS:	Coarse -	2.00 mm to 4.75 mm
	Medium -	0.425 mm to 2.00 mm
	Fine -	0.075 mm to 0.425 mm
SILTS & CLAYS:		Less than 0.075 mm

LL	=	Liquid Limit, %
PL	=	Plastic Limit, %
PI	=	Plasticity Index, %
% PASS - 200	=	Percent Passing the No. 200 Sieve
MC	=	Moisture Content, %
ORG	=	Organic Content, %
k_h	=	Horizontal Hydraulic Conductivity, ft/day

6.0 LIMITATIONS

6.1 Warranty

This report has been prepared for our client for his exclusive use, in accordance with generally accepted soil and foundation engineering practices and makes no other warranty either expressed or implied as to the professional advice provided in the report.

6.2 Auger and SPT Borings

The determination of soil type and conditions was performed from the ground surface to the maximum depth of the borings, only. Any changes in subsurface conditions that occur between or below the borings would not have been detected or reflected in this report.

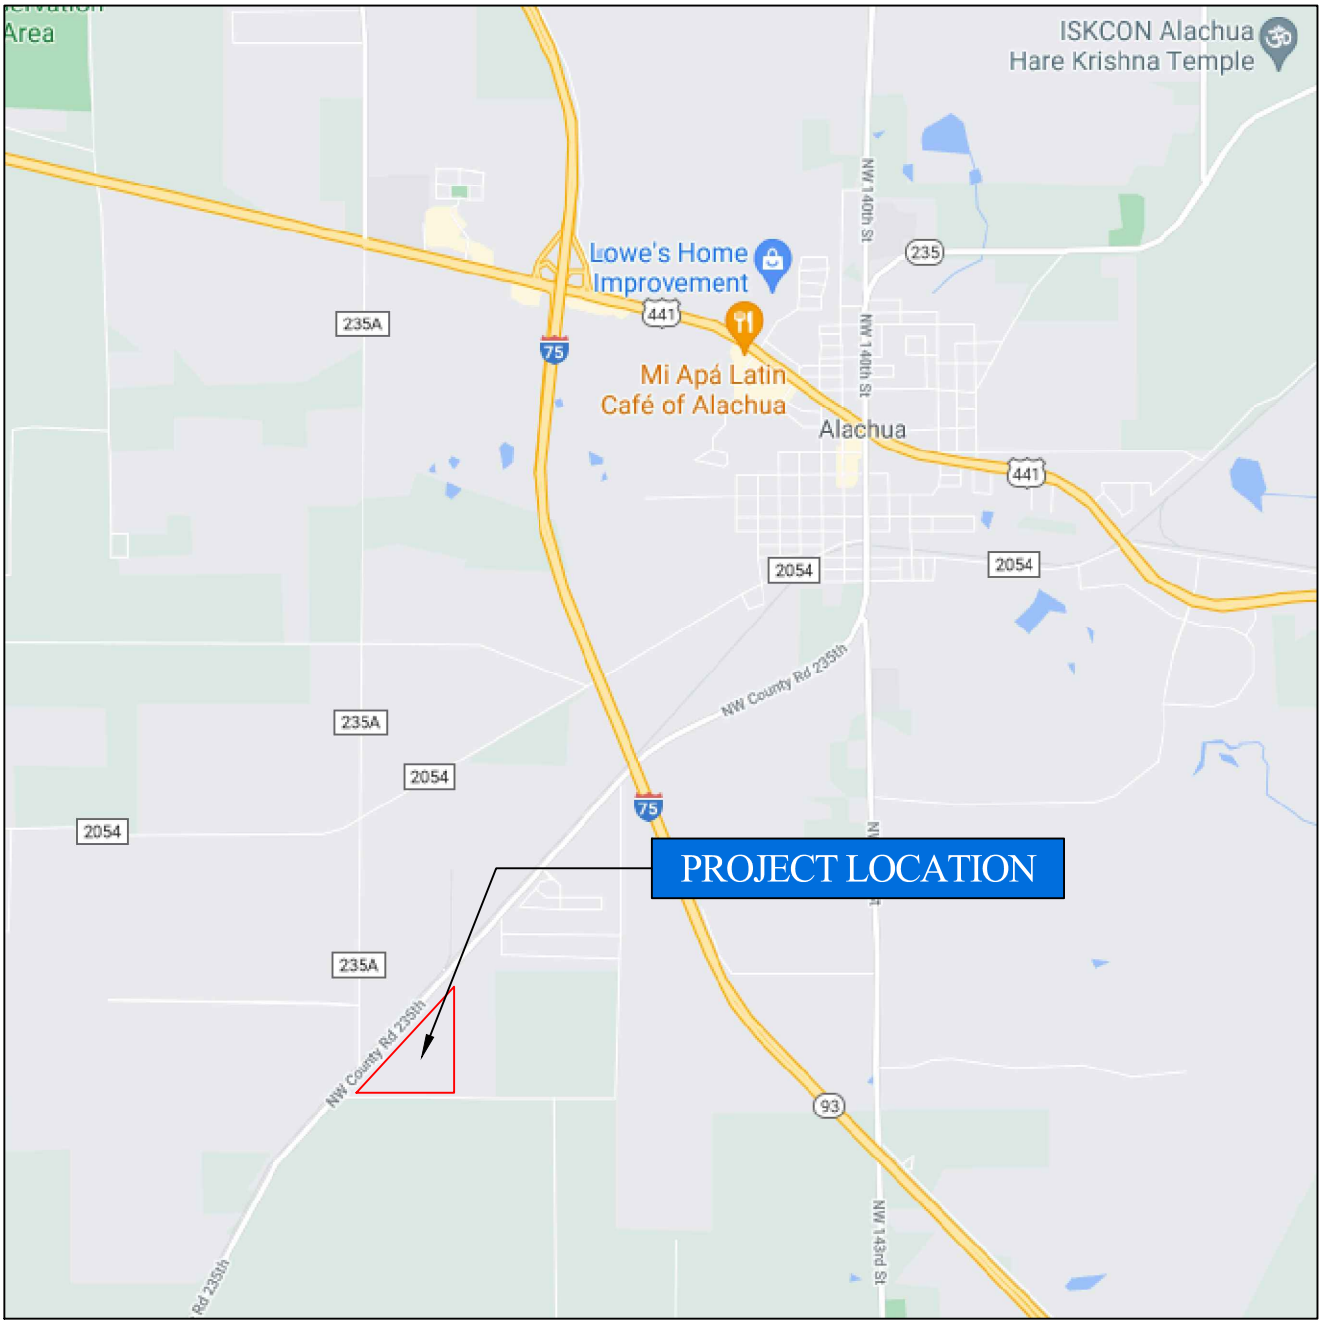
Soil classifications that were made in the field are based upon identifiable textural changes, color changes, changes in composition or changes in resistance to penetration in the intervals from which the samples were collected. Abrupt changes in soil type, as reflected in boring logs and/or cross sections may not actually occur, but instead, be transitional.

Depth to the water table is based upon observations made during the performance of the auger and SPT borings. This depth is an estimate and does not reflect the annual variations that would be expected in this area due to fluctuations in rainfall and rates of evapotranspiration.

6.3 Site Figures

The measurements used for the preparation of the figures in this report were made using the provided site plan and by estimating distances from existing structures and site features. Figures in this report were not prepared by a licensed land surveyor and should not be interpreted as such.

6.4 Unanticipated Soil Conditions



The analysis and recommendations submitted in this report are based upon the data obtained from soil borings performed at the locations indicated on Figure 2. This report does not reflect any variations that may occur between these borings.

The nature and extent of variations between borings may not become known until excavation begins. If variations appear, we may have to re-evaluate our recommendations after performing on-site observations and noting the characteristics of any variations.

6.5 Misinterpretation of Soil Engineering Report

GSE Engineering & Consulting, Inc. is responsible for the conclusions and opinions contained within this report based upon the data relating only to the specific project and location discussed herein. If others make the conclusions or recommendations based upon the data presented, those conclusions or recommendations are not the responsibility of GSE.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED made the ___ day of November, 1997, by International Business Machines Corporation, a New York corporation, hereinafter called the Grantor, to Waco, Inc., qualified to do business in Florida as Waco of Alabama, Inc., an Alabama corporation, having an address at 569 S. Edgewood Avenue, Jacksonville, FL 32205, hereinafter called the Grantee:

(Wherever used herein, the terms "Grantor" and "Grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

WITNESSETH: That the Grantor, for and in consideration of the sum of $10.00 and other good and valuable consideration, receipt and sufficiency whereof are hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the Grantee, all those certain parcels of land situated in Alachua County, Florida, and more particularly described in **Exhibit A** attached hereto and made a part hereof.

TOGETHER with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

SUBJECT TO:

1. Taxes for the year 1998 and subsequent years not yet due and payable.

2. Easements, restrictions, reservations, limitations and conditions of record, if any, provided this shall not operate to reimpose same.

3. All applicable zoning ordinances, other land use laws and regulations, and all applicable regulations and restrictions imposed by governmental authorities.

TO HAVE AND TO HOLD, the same in fee simple forever.

AND the Grantor hereby covenants with the Grantee that the Grantor is lawfully seized of said land in fee simple; that the Grantor has good right and lawful authority to sell and convey said land, and hereby warrants the title to said land and will defend the same against the lawful claims of all persons claiming by, through or under the said Grantor and none other.

IN WITNESS WHEREOF, the said Grantor has hereunto set its hand and seal the day and year first above written.

Signed, sealed and delivered
in our presence:

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 1 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 1, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 1 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $169,223, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements ($1,692,237.44) set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$183,637.07, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth ($1,836,370.73) in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer or successor shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $80,214.30 ($66,845.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $6,684.53 ($66,845.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF S 00°57'56" E FOR THE SOUTH LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER DW58, WITH A PUBLISHED ELEVATION OF 159.83 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1 : 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE):
   FRONT = 25'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 179 OF 640, COMMUNITY PANEL NO. 12001C0179 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNER'S ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN PRIVATE RIGHT-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVISION AGREEMENT AND SECTION 7.2.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (6) AND (9) FLORIDA STATUTES.
8. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
9. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (1) FOR DETAIL INFORMATION FOR LOTS ONE (1) THRU THIRTY-TWO (32).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 1

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 1 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 32 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 8,000 gallons per day (32 lots x 250 gallons per day) of wastewater capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 8,800 gallons per day (32 lots x 275 gallons per day) of water capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 152 Average Annual Daily Trips ("AADT") and 16 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 305 Average Annual Daily Trips ("AADT") and 33 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .42 acres (2.6 persons per household x 32 units x 5 acres per 1,000 persons) of recreation capacity for the 32 units proposed in Fletceher Trace Phase 1 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 60.74 tons per year (0.73 tons per capita per year x 2.6 persons per household x 32 units) of solid waste capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 32 units proposed in Fletcher Trace Phase 1.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 2 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 2, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 2 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $59,965.35, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$599,653.52] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$16,258.29, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$162,582.89] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $60,778.99 ($50,649.16 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $5,064.92 ($50,649.16 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

Exhibit "C"
Certificate of Concurrency Compliance

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 2

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 2 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 42 residential lots (14 detached and 28 attached);

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 10,500 gallons per day (42 lots x 250 gallons per day) of wastewater capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 11,550 gallons per day (42 lots x 275 gallons per day) of water capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 200 Average Annual Daily Trips ("AADT") and 21 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 400 Average Annual Daily Trips ("AADT") and 43 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .55 acres (2.6 persons per household x 42 units x 5 acres per 1,000 persons) of recreation capacity for the 42 units proposed in Fletceher Trace Phase 2 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 79.72 tons per year (0.73 tons per capita per year x 2.6 persons per household x 42 units) of solid waste capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 2 (two) student stations in the Alachua SCSA for high schools, for the 42 units proposed in Fletcher Trace Phase 2.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

1	Concrete Sidewalks and Driveways, 4"	835	SY	$ 50.55	$ 42,207.63
				Subtotal	$ 42,207.63
				Mobilization (10%)	$ 4,220.76
				Contingency (10%)	$ 4,220.76
				TOTAL	$ 50,649.16

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 3 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 3, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 3 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $113,784.92, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$1,137,849.21] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$47,436.64, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$474,366.38] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $90,945.90 ($75,788.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $7,578.83 ($75,788.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2440, PAGE 1824, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, IN SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 89°34'19" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 491.10 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°48'51" EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2352.87 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE NORTH 41°48'51" EAST, A DISTANCE OF 1878.44 FEET TO THE WEST LINE OF THE NORTHWEST QUARTER (NW 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 297.37 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 89°34'19" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 2637.73 FEET; THENCE, DEPARTING SAID WEST LINE THE FOLLOWING NINE (9) COURSES; (1) SOUTH 84°21'49" WEST, A DISTANCE OF 68.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 188.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°16'21" WEST 189.84 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 64°17'39", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°02'46" WEST, A DISTANCE OF 190.87 FEET TO THE BEGINNING OF A CURVE, CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.50 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 41°59'13" EAST 35.74 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°09'00", AN ARC LENGTH OF 24.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°54'13" EAST, A DISTANCE OF 46.95 FEET; (6) SOUTH 41°48'51" WEST, A DISTANCE OF 420.48 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 208.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 63°30'39" WEST 189.65 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°36'54", AN ARC LENGTH OF 189.84 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°56'51" WEST A DISTANCE OF 511.86 FEET; (9) NORTH 48°03'09" WEST, A DISTANCE OF 296.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.58 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 89°34'19" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER D578, WITH A PUBLISHED ELEVATION OF 156.40' (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1' IN 10,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   - FRONT = 15'
   - REAR = 5'
   - SIDE = 5'
   - STREET FACING GARAGE = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X" AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 540, COMMUNITY PANEL NO. "12001C0120 D", EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNERS ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 3.8.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (10) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 3

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 3 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 37 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 9,250 gallons per day (37 lots x 250 gallons per day) of wastewater capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 10,175 gallons per day (37 lots x 275 gallons per day) of water capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 176 Average Annual Daily Trips ("AADT") and 19 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 352 Average Annual Daily Trips ("AADT") and 38 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .48acres (2.6 persons per household x 37 units x 5 acres per 1,000 persons) of recreation capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 70.23 tons per year (0.73 tons per capita per year x 2.6 persons per household x 37 units) of solid waste capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 37 units proposed in Fletcher Trace Phase 3.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

1. EXECUTIVE SUMMARY

CHW Professional Consultants, Inc. (CHW) has prepared the following Traffic Impact Analysis (TIA) for a development proposed on the south side of CR 235, just east of CR 235A, in the City of Alachua, Florida. The development is commonly referred to as Fletcher Trace. The concept plan for the proposed development is provided in **Appendix A**.

The purpose of this study is to identify the transportation impacts of the proposed project on the transportation network and if deficiencies are identified to recommend mitigation strategies to address the deficiencies. This TIA is required by Alachua County, and the City of Alachua. The study is being prepared for Fletcher Family Companies and is in conformance with the methodology letter submitted on May 26, 2022, see **Appendix B**.

The following developments are being proposed at this site, with an anticipated 2029 build-out:

- 344 Dwelling Units – Single-Family Detached Housing
- 128 Dwelling Units – Multifamily Housing (Low-Rise)

The following site access type and locations are being proposed:

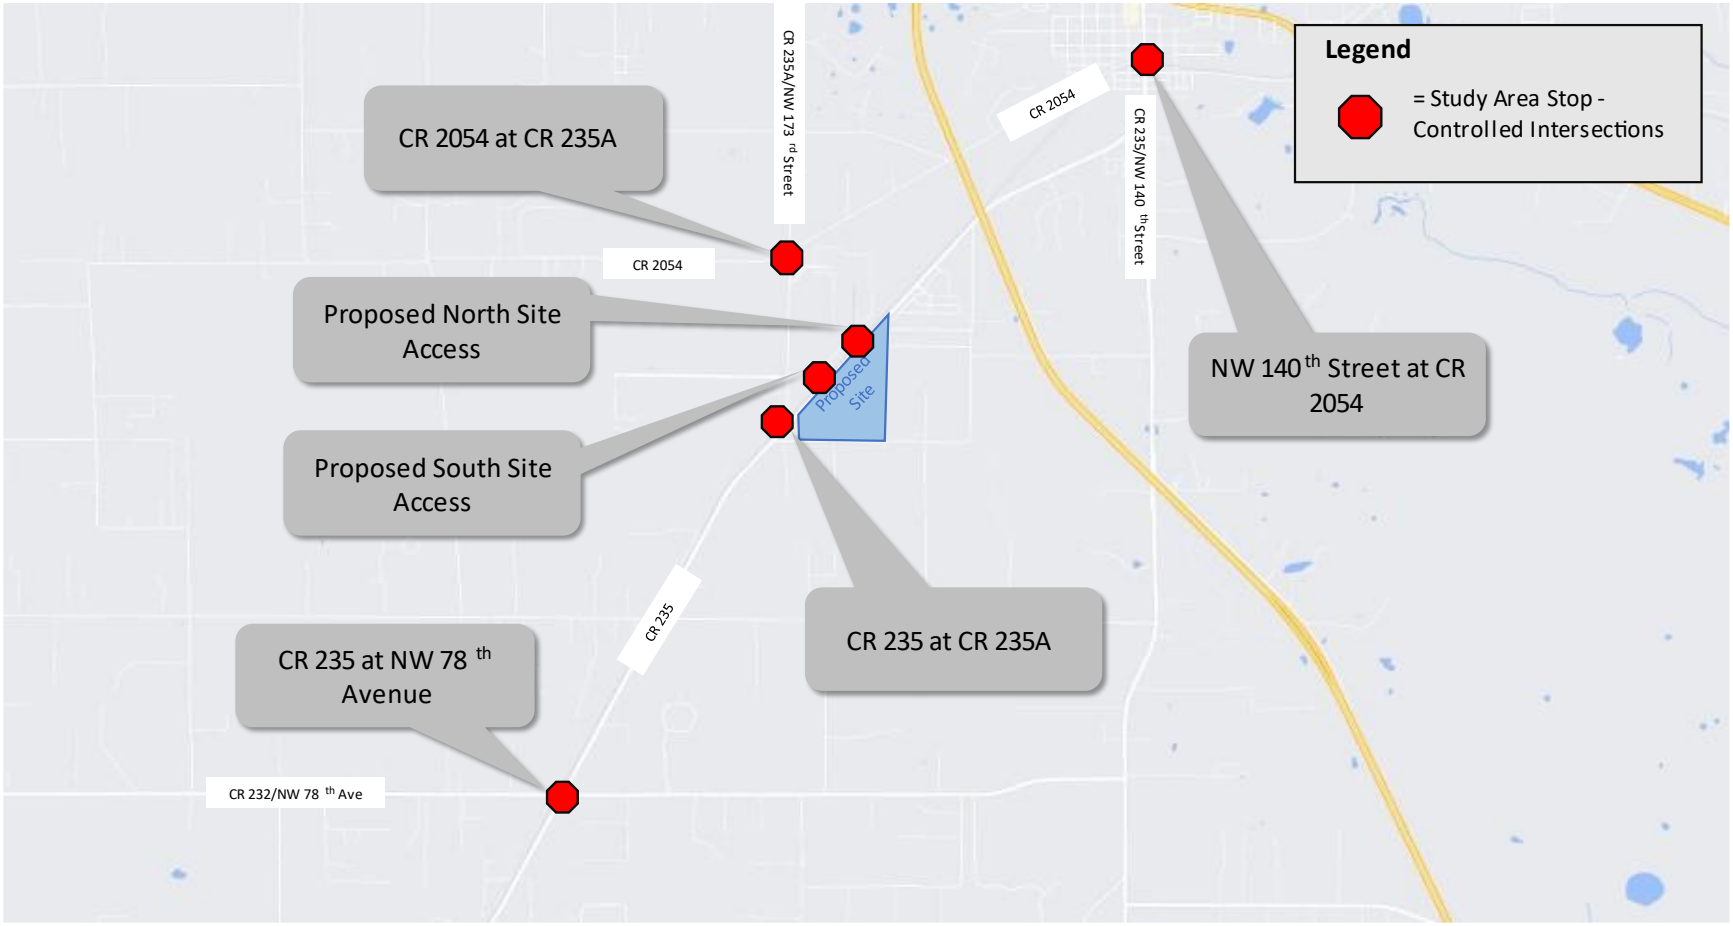
- Full access at the CR 235/Proposed North Site Access intersection; and
- Full access at the CR 235/ Proposed South Site Access intersection;

2. STUDY INTERSECTIONS AND SEGMENTS

2.1. Study Intersections

CHW, in coordination with Alachua County, and the City of Alachua and identified the following intersections to be significantly impacted by the proposed development. The study area intersections are provided in **Figure 1**.

- NW 140th Street (CR 235)/CR 2054 (Peggy Road) intersection;
- CR 235A (NW 173rd Street)/CR 2054 (Peggy Road) intersection;
- CR 235/Proposed North Site Access intersection;
- CR 235/ Proposed South Site Access intersection;
- CR 235/CR 235A (NW 173rd Street) intersection; and
- CR 235/NW 78th Avenue (CR 232) intersection.



2.2. Study Roadway Segments

CR 235 and CR 235A are 2-lane collector roads adjacent to the project that were evaluated as part of this study. If the anticipated project trip exceed 5% of the maximum service volume (MSV), the roadway was further analyzed to determine whether the build-out condition exceeds the MSV. As demonstrated in **Table 1** CR 235 from NW 143rd Place to South City limit, exceeds 5% of the maximum service volume, so an this roadway segment is studied in Section 6.3.

Table 1: Study Roadway Segments Determination

ROAD NAME	FROM	TO	Comp. Plan MSV[1]	Net New Total Daily Project Trips[2]	Trip Dist %[3]	Net New Total Project Trips	% (Net New Total Projec Trips/MSV)	Include in Study Area (> 5%) - Y/N
CR 235	NW 143RD PLACE	SOUTH CITY LIMIT	15,120		67%	2,707	17.90%	Y
CR 235A	US 441	CR 235	15,120	4,040	9%	364	2.41%	N

Figure 1 | Study Intersections

3. TRIP GENERATION

The Institute of Transportation Engineer's (ITE) Trip Generation Manual, 11th Edition was used to develop the trip generation for the site. The trip generation is provided in **Table 2**.

Table 2 | Fletcher Trace Trip Generation

Fletcher Trace Trip Generation									
Land Use	**ITE LU Code**	**Variable DU**	**Daily**	**AM Peak**			**PM Peak**		
				Total	**In**	**Out**	**Total**	**In**	**Out**
Phase 1									
Single-Family Detached Housing	210	344	3,144	229	60	169	317	200	117
Multifamily Housing (Low-Rise)	220	128	896	63	15	48	76	48	28
Total			*4,040*	*292*	*75*	*217*	*393*	*248*	*145*

4. DATA COLLECTION

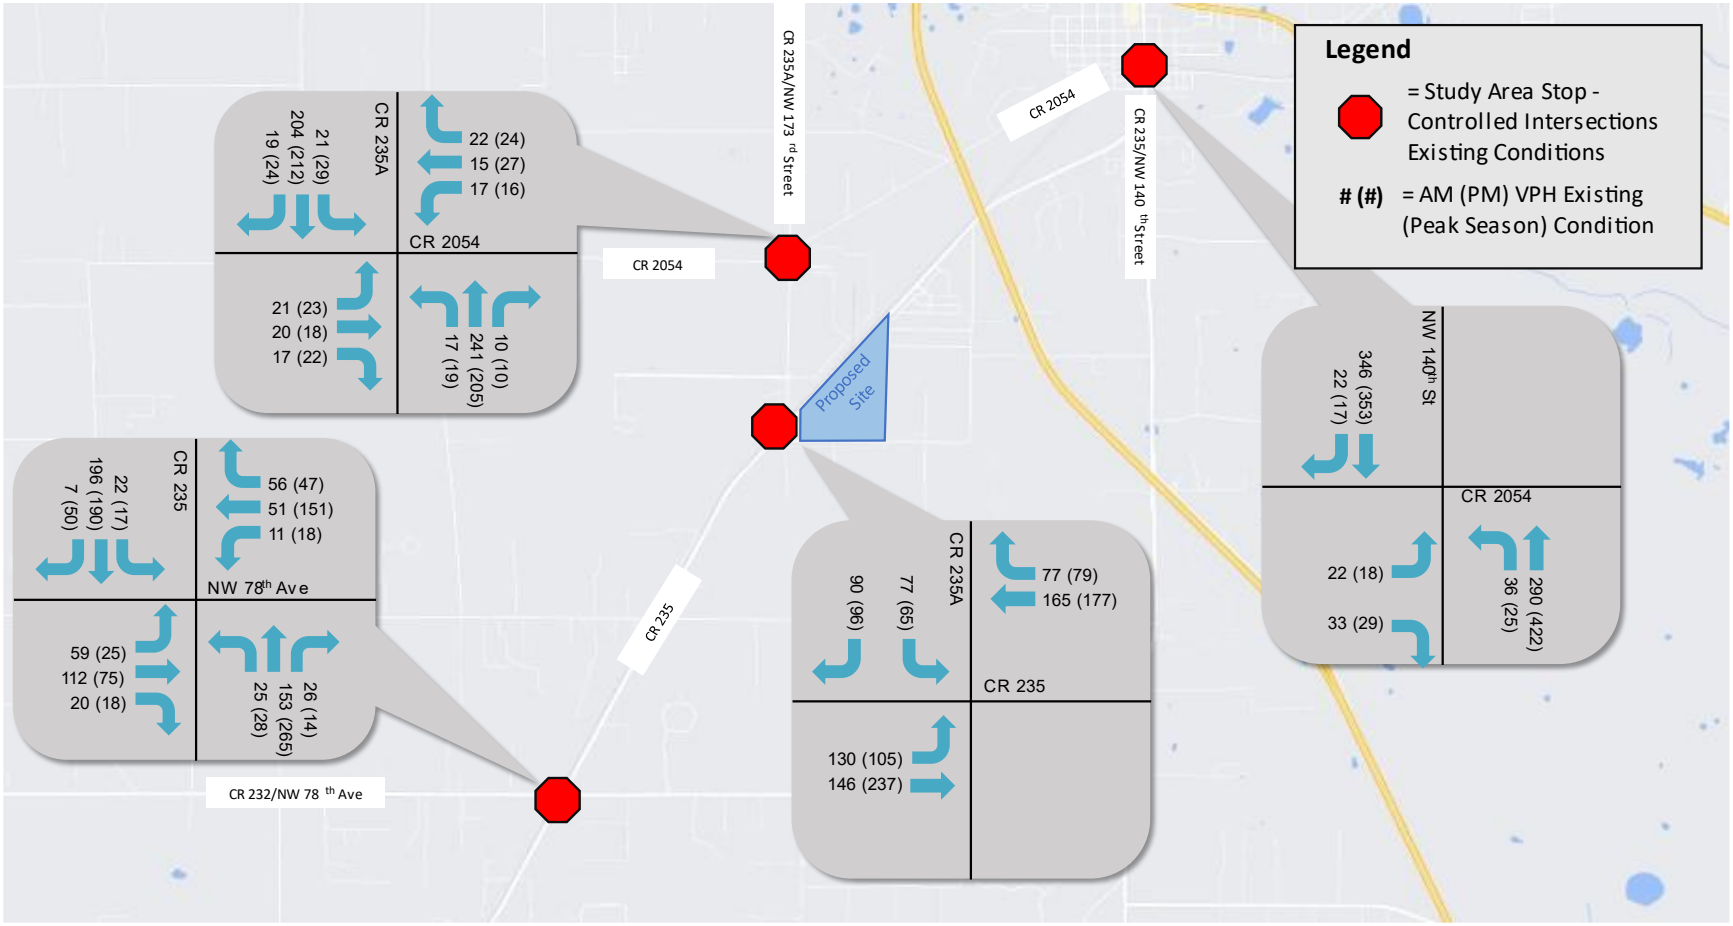
Turning movement counts were collected during the AM and PM peak hours on April 19th, 2022, for the following intersections: NW 140th Street/CR 2054 intersection, CR 235A /CR 2054 intersection, CR 235/CR 235A intersection and CR 235 at CR 232/NW 78th Avenue. The raw count data is provided in **Appendix C**.

The count data was adjusted based on the seasonal adjustment factor. **Figure 2** provides the existing (peak season) turning movements at the study intersections.

Reserved trips provided by the City of Alachua were included to the background volumes where applicable, as provided in **Appendix D**.

The project has an anticipated full build-out in 2029. Growth rates were determined based on historical ADT where available to derive the 2029 background volumes. A minimum of 1.0% yearly growth rate was used for roadways with historical growth rates less than 1.0% and 2.0% for roadways with no historical growth rates. **Appendix E** provides the data used to determine the peak season and background traffic volumes. **Appendix F** provides the peak season and background turning movements at all study intersections in tabular form. **Figure 3** illustrates the background conditions for 2029 at all study intersections.

Figure 2 | Existing (Peak Season) Turning Movements



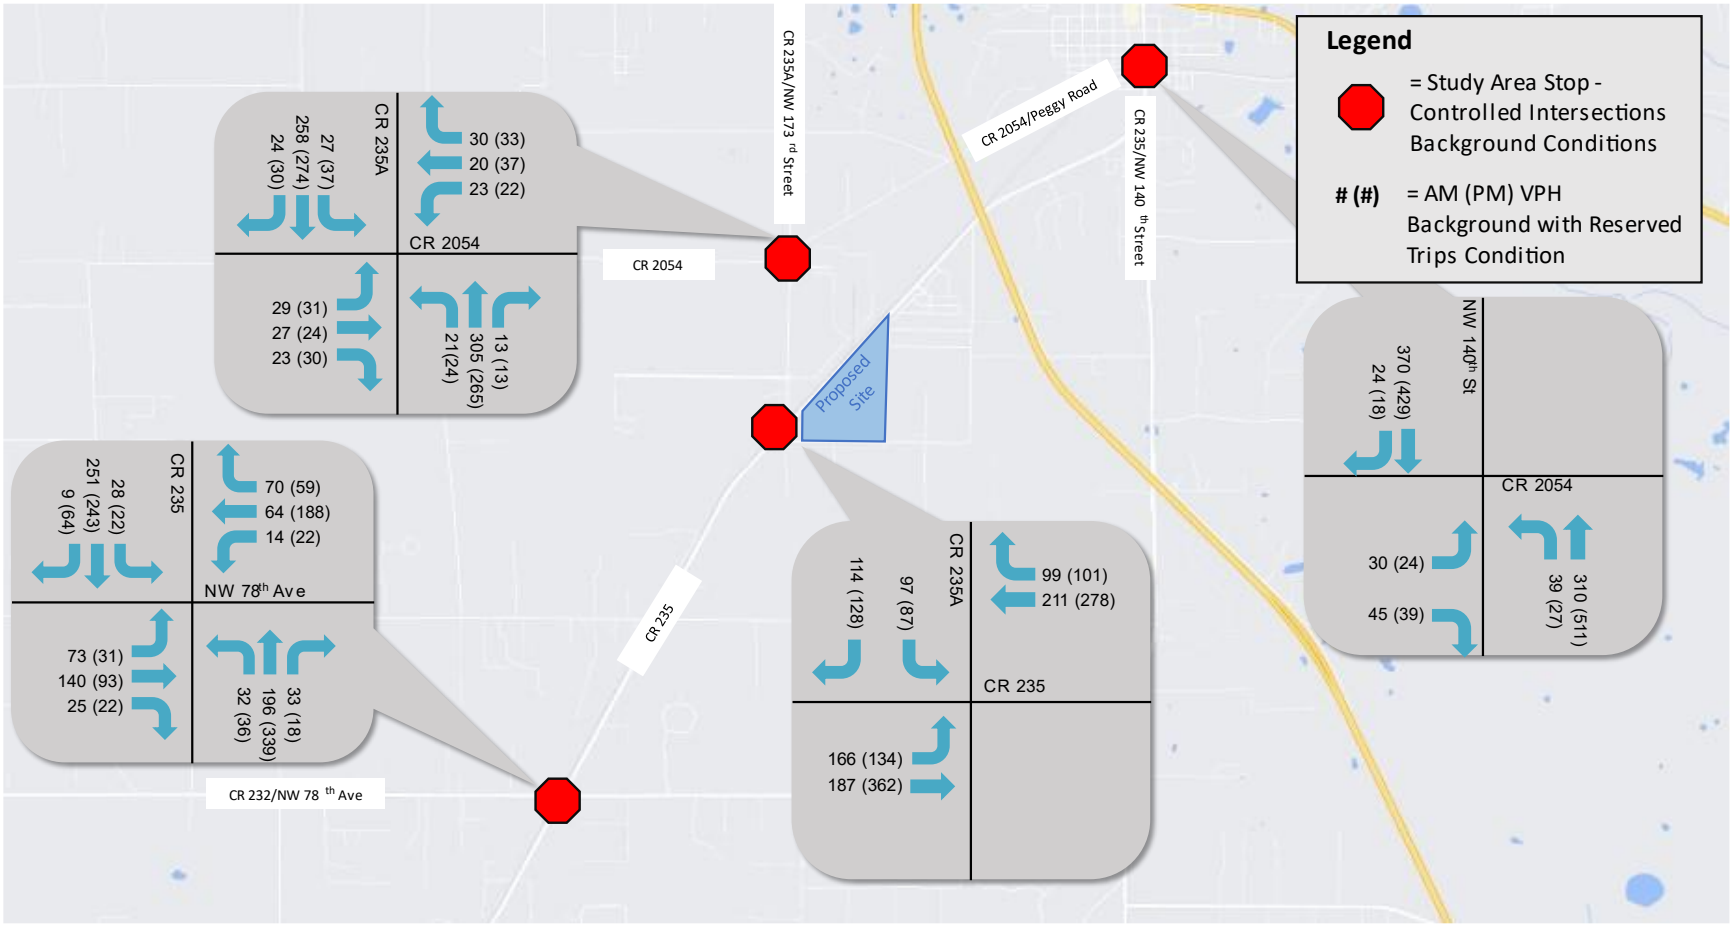


Figure 3 | Background Turning Movements

5. TRIP DISTRIBUTION

The project trip distribution for the Fletcher Trace build-out is expected to mimic the existing patterns of the Savannah Station Phase 1 project trips. A turning movement count was performed during the PM peak two hours of 4:00 to 6:00 PM at the intersection of CR 235 at NW 123rd Avenue, as provided in **Appendix G.** Based on the turning movement counts from Savannah Station Phase 1 the following project trip distribution that was utilized for this study:

- To/from north = 67%
- To/from south = 33%

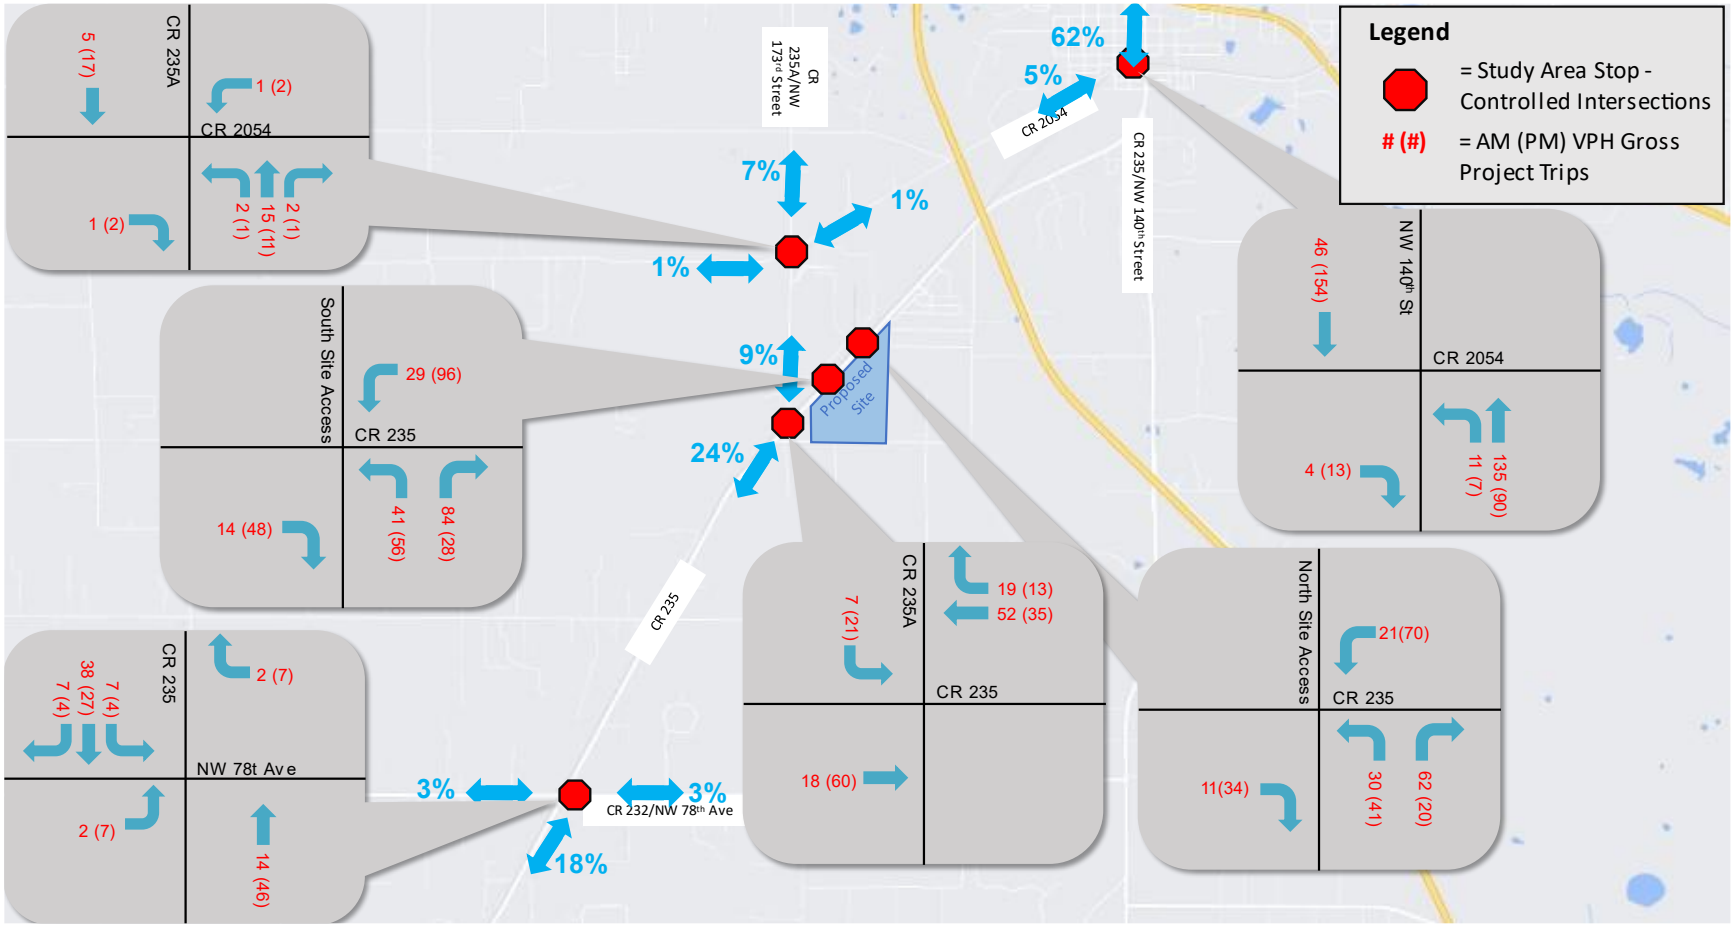
The trip distribution at all other study area intersections was be based on the turning movement count data from the intersections. For example, at the intersection of CR 235 at CR 235A the project trips will either be to/from the north on CR 235A or to/from the west on CR 235. The trip distribution to/from the north was be calculated as follows, based on the total AM and PM count volumes, as provided in **Appendix G**:

(SBL + WBR) / (EBT + WBT + SBL + WBR)

The project trip distribution at the project's connections on CR 235 are based on the layout of the project site, as shown in **Appendix G**. Approximately 50% of the multi-family housing project trips are expected to use the CR 235/Proposed North site access connection and the remaining multi-family housing trips will use the CR 235/Proposed South site access connection. Approximately 40% of the single-family detached housing will use the CR 235/Proposed North site access connection and the remaining 60% will use the CR 235/Proposed South site access connection.

The project trips are shown in **Figure 4** and the combined background with reserved trips and project trips form the build-out condition illustrated in **Figure 5.**

Figure 4 | Project Trip Turning Movements



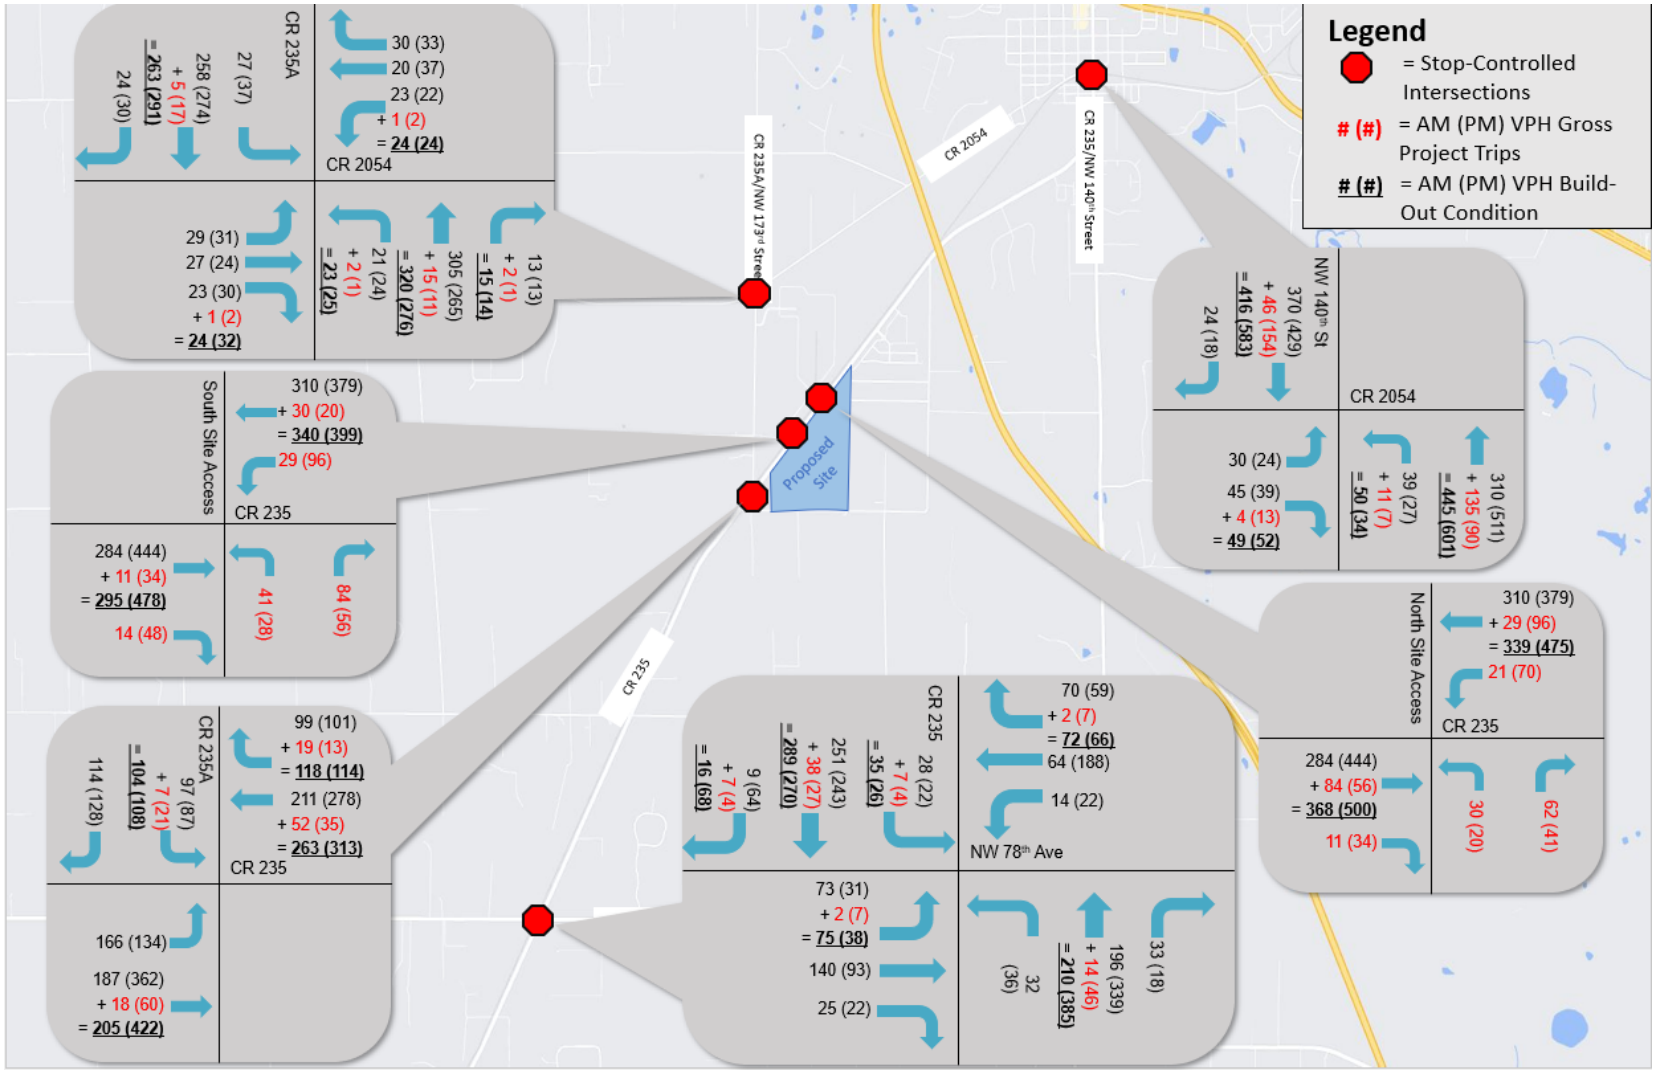


Figure 5 | Build-out Turning Movements

6. ANALYSIS

The analysis is divided into three parts: 1) analysis of intersections within the study area, 2) turn lane warrant analysis, and 3) roadway segment analysis.

6.1. Intersection Analysis

The analysis of the intersection within the study area covered three scenarios, as follows:

- Existing (Peak Season) Conditions;
- Background Conditions ; and
- Build-out Conditions.

All study intersections were analyzed during the AM and PM peak hours. The objectives of the analysis were to identify level of service or operational deficiencies and if necessary, model potential improvement to mitigate deficiencies. Resulting indicators for intersection operational performance include level of service (LOS), delay, volume to capacity (v/c) ratio, and the 95th percentile queue length.

For this analysis Highway Capacity Software 7 (HCS 7) was used to analyze stop sign controlled intersections.

The operational performance of the intersections is provided in **Table 3** and **Table 4**. The HCS reports are provided in **Appendix H**. Intersection deficiencies are highlighted in **Table 3** and **Table 4**. Deficiencies are v/c less than 1.0, 95th percentile queue lengths exceeding storage lengths, and LOS of F for the main street through movements and intersection totals.

Section 6.3 will demonstrate the left-turn lanes are recommended on CR 235 at the site access intersections. Additionally, a right-turn lane is recommended on CR 235 at the south site access and a right-turn taper is recommended at the north site access. These turn-lane improvements are included in the intersection analysis.

Yellow highlight = deficiency occurring without project traffic

Red highlight = deficiency occurs due to added project trips

*NR = Not Reported

As indicated in **Tables 3** and **Table 4** the following deficiency occurs with the addition of project trips.

The westbound movement at the intersection of CR 235 at NW 78th Avenue has volume exceeding capacity during the PM build-out. The volume of project trips forecasted to make a westbound right turn is low at only 7 vehicles per hour. During the PM background scenario, the westbound movement operates with a v/c near capacity at .98. Therefore, the background volumes and not the project trips are what cause the operational issues at this intersection. No improvements are recommended at this intersection.

6.2. Turn Lane Warrant Analysis

The Alachua County Land Development Code requires deceleration (right-turn) tapers for Class III and IV connections to a two-lane collector or arterial roadway with a design speed of 50 MPH or greater. A right turn lane is required if warranted. This site proposes a Class III connection onto CR 235 which has a design speed of 60 MPH, assuming a design speed 5 MPH over the posted speed of 55 MPH.

A right-turn lane warrant analysis, based on the guidelines of the "FDOT Access Management Guidebook", was used to determine whether a right-turn lane is warranted. The thresholds for warranting a right-turn lane range from 35 - 55 right-turns per hour, per the "FDOT Access Management Guidebook". As illustrated in build-out **Figure 4**, the maximum number of right turning vehicles at the CR 235/Proposed North Site Access intersection is 34 during the PM peak hour and at the CR 235/Proposed South Site Access intersection is 48 during the PM peak hour. Therefore, a northbound right-turn lane at the CR 235/Proposed North Site Access intersection is not warranted and not recommended to support this project however a northbound right turn taper is recommended based on the Alachua County Land Development Code requirements. A northbound right-turn lane at the CR 235/Proposed South Site Access intersection is warranted and recommended to support this project. The results are provided in **Appendix J**.

The Alachua County Unified Land Development Code requires a left-turn lane for developments with 50 or more total peak hour trips connecting to a collector or arterial road. As illustrated in build-out **Figure 4**, the maximum number of left turning vehicles at the CR 235/Proposed North Site Access intersection is 70 during the PM peak hour and at the CR 235/Proposed South Site Access intersection is 96 during the PM peak hour. Therefore, left-turn lanes are recommended at both the CR 235/Proposed North Site

Access intersection and CR 235/Proposed South Site Access intersection based on the Alachua County Land Development Code Requirements.

6.3. Roadway Segment Analysis

The study roadway segments for the future roadway segment conditions analysis were determined where the net new traffic from the proposed project is at least 5% of the maximum service volume (MSV) as provided in **Table 1**.

The future roadway segment conditions analysis was completed for roadway segments within the study area. Historic growth rates were applied to the 2022 AADT. Build-out project trips were added to the background trips and applied to each roadway segment. **Table 5** shows that none of the roadway segments in the study area had build-out volumes that exceeded the daily service volume. Therefore, no roadway segment improvements are recommended.

Table 5 | Future Conditions (2029) Roadway Segment LOS Analysis

ROAD NAME	FROM	TO	Comp. Plan MSV[1]	ADOPTED LOS STANDARD	Ex. Trips - 2022 AADT[1]	Back-ground Trips - 2029 AADT[2]	Reserved Trips-AADT[3]	Net New Total Project Trips	Build-out	Exceeds MSV/ Daily Service Volume - Y/N
CR 235	NW 143RD PLACE	SOUTH CITY LIMIT	15,120	D	6,180	7,815	1,018	2,707	11,540	N

(1) Taken from 2022 City of Alachua Annual Concurrency Status Report
(2) Calculated using Historical Growth Rate
(3) Reserved trips provided by the City of Alachua

7. CONCLUSIONS AND RECOMMENDATIONS

The following transportation improvements are recommended to support the project traffic at this site:

- Install a westbound left-turn lane on CR 235 at the south site access.
- Install a westbound left-turn lane on CR 235 at the north site access.
- Install a full-length eastbound right-turn lane on CR 235 at the south site access.
- Install an eastbound right-turn taper on CR 235 at the north site access.

Re: Fletcher Trace, City of Alachua, FL

Dear Thomas and Justin,

CHW is preparing a Traffic Impact Analysis (TIA) Methodology for the proposed Fletcher Trace development consisting of a single-family detached housing and multifamily housing (low-rise) located northeast of the intersection of CR 235 and NW 173rd Street in the City of Alachua, Florida. The project proposes a two access points from CR 235 to the project site, as illustrated in the concept plan provided in **Attachment A**.

Please review the methodology and either provide comment for the purposes of modification/ clarification or provide acceptance.

Study Area

The study area will consist of the following intersections:

- CR 235/NW 140th Street at CR 2054;
- CR 235A and CR 2054;
- CR 235 at Proposed North Site Access;
- CR 235 at Proposed South Site Access;
- CR 235 and CR 235A/NW 173rd Street; and
- CR 235 at CR 232/NW 78th Avenue.

Land Use and Trip Generation

The trip generation for the site will be based on the Institute of Transportation Engineer's (ITE) Trip Generation Manual, 11th Edition. The estimated trip generation is provided below. The TIA will estimate the trip generation based on the number of dwelling units.

Fletcher Trace Trip Generation									
Land Use	ITE LU Code	Variable DU	Daily	AM Peak			PM Peak		
				Total	In	Out	Total	In	Out
Single-Family Detached Housing	210	344	3,144	229	60	169	317	200	117
Multifamily Housing (Low-Rise)	220	128	896	63	15	48	76	48	28
Total			*4,040*	*292*	*75*	*217*	*393*	*248*	*145*

Data Collection

Turning movement counts during the AM and PM peak two hours, during a single day, will be utilized for analysis. Counts will be collected on a Tuesday, Wednesday, or Thursday. The counts will include pedestrians, bicycles, and trucks, in addition to passenger vehicles.

Turning movement counts will be performed at the following intersection:

- CR 235/NW 140th Street at CR 2054;
- CR 235A and CR 2054;
- CR 235 and CR 235A/NW 173rd Street; and
- CR 235 at CR 232/NW 78th Avenue.

The count data will be adjusted based on the seasonal adjustment factor and by the growth rate to forecast the estimated background traffic of the project build-out year 2029. The growth rate will be determined based on historical ADT where available.

Trip Distribution

The project trip distribution for the Fletcher Trace build-out is expected to mimic the existing patterns of the Savannah Station Phase 1 project trips. A turning movement count was performed during the PM peak two hours of 4:00 to 6:00 PM at the intersection of CR 235 at NW 123rd Avenue, as provided in **Attachment B**. Based on the turning movement count the Savannah Station Phase 1 project trip distribution that will be utilized for the Fletcher Trace TIS is provided below:

- To/from north = 67%
- To/from south = 33%

The trip distribution at all other study area intersections will be based on the turning movement count data from the intersections. For example, at the intersection of CR 235 at CR 235A the project trips will either be to/from the north on CR 235A or to/from the west on CR 235. The trip distribution to/from the north will be calculated as follows, based on the total AM and PM count volumes:

(SBL + WBR) / (EBT + WBT + SBL + WBR)

Analysis

The intersection analysis will be performed at the intersections provided in the study area during the AM and PM peak hours, under the following scenarios:

- Existing (peak season) conditions
- Background conditions
- Build-out conditions
- Build-out with improvements, if applicable

The intersection operation analysis will review the delay, LOS, V/C, and 95th percentile queue length of each intersection movement as well as the intersection as a whole. The non-signalized intersections will be analyzed using HCS 7. The reports will be provided in the appendices.

Left and right turn lane warrant analyses will be performed at the site access intersections. If turn lanes are warranted the turn lane lengths will be calculated.

A roadway segment level of service analysis will be provided for CR 235 and CR 235A in accordance with City of Alachua requirements.

Any needed roadway modifications based on this analysis will be identified and modeled to demonstrate that the improvement mitigates the deficiency.

Report

A draft report, including, as a minimum, the following will be submitted for review and comment.

- Study Area Map
- Existing Conditions
- Trip Generation
- Data Collection
- Trip Distribution
- Analysis
  - AM and PM Intersection LOS, Delay, V/C and 95th Percentile Queue Length Analysis
  - Left and Right Turn Lane Warrants
  - Roadway Segment Analysis
- Conclusion and Recommendations
- Appendices with Supporting Documentation

Following any revisions, based upon staff comments, we will prepare a final signed and sealed report.

Please provide acceptance if you concur with this methodology.

Thank you for your review and consideration.

Sincerely,
CHW

Brian Snyder, P.E.
Project Manager

* Florida Department of Transportation, District Two, Level of Service Reporting Tool, accessed April 14, 2022
*** Formula: Comp Plan MSV - (Existing Traffic + Reserved Trips from Development Orders with Concurrency*
^ County Facility AADT counts provided by Alachua County Public Works, April 2022.
^^AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
Reserved Trips are automatically updated from Table 8 data.

*** Formula: Comp Plan MSV - (Existing Traffic + + Projected Trips from Preliminary Development Orders with NO Concurrency Reservation +*
^ County Facility AADT counts provided by Alachua County Public Works, April 2022.
^^AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
Reserved Trips are automatically updated from Table 8 data.

* Florida Department of Transportation, District Two, Level of Service Reporting Tool 2019, accessed April 7, 2021.
** Formula: Comp Plan MSV - (Existing Traffic + Reserved Trips from Development Orders with Concurrency Reservation.)
^ County Facility AADT counts provided by Alachua County Public Works, April 2022.
^^ AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.

Appendix I
Turn Lane Warrant Analysis

When Not to Consider Exclusive Right-Turn Lanes

- Dense or built-out corridors with limited space
- Right-turn lane that would negatively impact pedestrians or bicyclists
- Vehicular movements from driveways or median openings that cross the right-turn lane resulting in multiple threat crashes
- Context classifications C2T, C4, C5, or C6

When Exclusive Right-Turn Lanes are Beneficial

There are instances when adding an exclusive right-turn lane for unsignalized driveways are beneficial to traffic operations and safety. ***Table 27*** provides some guidance for this situation based on the speed limit of the roadway and how many right turns occur per hour. Locations where the Auto and Truck Modal Emphasis is "High" may be appropriate for consideration of Exclusive Right Turn Lanes.

Table 27 – Recommended Guidelines for Exclusive Right-Turn Lanes to Unsignalized Driveway[10]

Roadway Posted Speed Limit	Number of Right Turns Per Hour
45 mph or less	80 – 125[1]
Over 45 mph	35 – 55[2]
Note: A posted speed limit of 45 mph may be used with these thresholds if the operating speeds are known to be over 45 mph during the time of peak right turn demand.	
Note on traffic projections: Projecting turning volumes is, at best, a knowledgeable estimate. Keep this in mind especially if the projections of right turns are close to meeting the guidelines. In that case, consider requiring the turn lane.	
[1] The lower threshold of 80 right-turn vehicles per hour would be most used for higher volume (greater than 600 vehicles per hour, per lane in one direction on the major roadway) or two-lane roads where lateral movement is restricted. The 125 right-turn vehicles per hour upper threshold would be most appropriate on lower volume roadways, multilane highways, or driveways with a large entry radius (50 feet or greater).	
[2] The lower threshold of 35 right-turn vehicles per hour would be most appropriately used on higher volume two-lane roadways where lateral movement is restricted. The 55 right-turn vehicles per hour upper threshold would be most appropriate on lower volume roadways, multilane highways, or driveways with large entry radius (50 feet or greater).	

Source: NCHRP Report 420 (Impacts of Access Management Techniques)

CR 235/North Site Access
EBR
AM(PM)
11(34)

CR 235/South Site Access
EBR
AM(PM)
14(48)

These recommendations are primarily based on the research done in NCHRP Report 420, Impacts of Access Management Techniques, Chapter 4 – Unsignalized Access Spacing (Technique 1B), and Use of Speed Differential as a Measure to Evaluate the Need for Right-Turn Deceleration Lane at Unsignalized Intersections.

In the *NCHRP Report 420*, the observed high-speed roads, 30 to 40 right-turn vehicles per hour caused evasive maneuvers on 5 - 10 percent of the following through vehicles. For lower speed roadways, 80 to 110 right-turn vehicles caused 15 - 20 percent of the following through vehicles to make evasive maneuvers. The choice of acceptable percentages of through vehicles impacted is a decision based on reasonable expectations of the different roadways.

In this study, by modeling speed differentials, a better understanding of the impacts of through volume and driveway radius was discovered.

[10] May not be appropriate for signalized locations where signal phasing plays an important role in determining the need for right turn lanes.

NOTICE OF PUBLIC HEARING BY CITY COMMISSION ARCHER, FLORIDA

Notice is hereby given that the proposed ordinance whose title hereafter appears, will have a second reading on the 10th day of February 2025, at the Regular City Commission meeting starting at 6:00 p.m. or as soon after as may be heard. The public is hereby notified that the City Commission will conduct an in-person public hearing on February 10, 2025, at 6:00 p.m., or as soon thereafter as the matters can be heard.

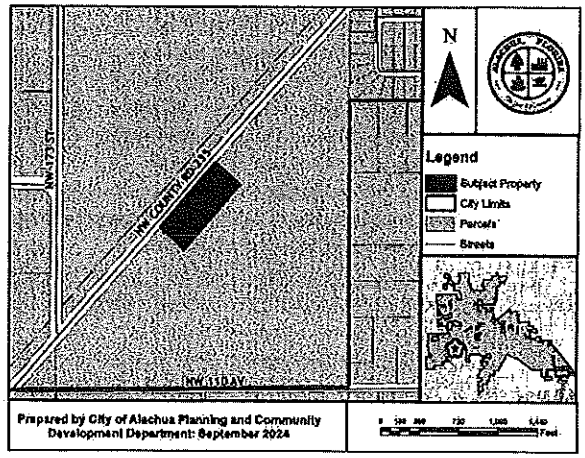
A copy of said ordinance may be inspected by any member of the public at the Office of the City Manager. All interested parties may appear and be heard with respect to the proposed ordinance.

CITY OF ARCHER, FLORIDA
ORDINANCE NUMBER 01-2025

AN ORDINANCE, CREATING CHAPTER 8, ARTICLE V, OF THE CODE OF ORDINANCES, CITY OF ARCHER, FLORIDA, TO BE ENTITLED, "REGISTRATION OF FORECLOSING MORTGAGES AND VACANT PROPERTY"; PROVIDING FOR PURPOSE, INTENT AND APPLICABILITY OF THE ORDINANCE REQUIRING THE REGISTRATION AND MAINTENANCE OF CERTAIN REAL PROPERTY BY MORTGAGEES AND VACANT PROPERTY BY OWNERS; PROVIDING FOR PENALTIES AND ENFORCEMENT, AS WELL AS THE REGULATION, LIMITATION AND REDUCTION OF REGISTRABLE REAL PROPERTY WITHIN THE CITY OF ARCHER; PROVIDING FOR SEVERABILITY, REPEALER, CODIFICATION, AND AN EFFECTIVE DATE.

All interested people are invited to attend and be heard. Written comments may be filed with the City Managers Office for consideration.

All persons are advised that, if they decide to appeal any decision made at this public hearing or meeting, they will need a record of the proceedings and, for such purpose, they may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based.



(References Section 286.015, Florida Statutes)

City of ALACHUA

NOTICE OF PUBLIC HEARING BEFORE THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on February 10, 2025 at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following: A request by Aaron Hickman, PSM, of CHW, LLC applicant and agent, for Waco Properties, Inc., property owner, for consideration of the Final Plat for Fletcher Trace Phase 2. The final plat proposes to subdivide a ±5.11-acre subject property into a total of 42 lots with associated common areas and road right-of-way. The subject property is located east of CR 235, and north of NW 110th Ave., Tax Parcel Number 03980-002-001; Future Land Use Map (FLUM) Designation: Moderate Density Residential; Zoning: Planned Development – Residential (PD-R).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

AFFIDAVIT FOR POSTED LAND USE SIGN

I ANN MULLINS, POSTED THE LAND USE
(Name)
SIGN ON 1/27/25 FOR THE Fletcher Trace Phase 2
(Date) (State type of action and project name)
LAND USE ACTION.

AS PER ARTICLE 2.2.9 D OF THE LAND DEVELOPMENT REGULATIONS.

THIS WILL BE INCLUDED IN THE STAFF REPORT.

Ann Mullins
(Signature)

Two (2)
(Number of signs)

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 2 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 2, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 2 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $59,965.35, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$599,653.52] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$16,258.29, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$162,582.89] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $60,778.99 ($50,649.16 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $5,064.92 ($50,649.16 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

Exhibit "C"
Certificate of Concurrency Compliance

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 2

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 2 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 42 residential lots (14 detached and 28 attached);

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 10,500 gallons per day (42 lots x 250 gallons per day) of wastewater capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 11,550 gallons per day (42 lots x 275 gallons per day) of water capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 200 Average Annual Daily Trips ("AADT") and 21 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 400 Average Annual Daily Trips ("AADT") and 43 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .55 acres (2.6 persons per household x 42 units x 5 acres per 1,000 persons) of recreation capacity for the 42 units proposed in Fletceher Trace Phase 2 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 79.72 tons per year (0.73 tons per capita per year x 2.6 persons per household x 42 units) of solid waste capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 2 (two) student stations in the Alachua SCSA for high schools, for the 42 units proposed in Fletcher Trace Phase 2.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

Commission Agenda Item

MEETING DATE: February 10, 2025

SUBJECT: Fletcher Trace Phase 3 Final Plat (PSP24-0009): A request by Aaron Hickman, PSM, of CHW, Inc, applicant and agent, for Waco of Alabama, Inc., property owner, for consideration of the Final Plat for Fletcher Trace Phase 3, which proposes to subdivide a ±17.66 acre subject property into a total of 37 single family detached lots with associated common areas and road right-of-way; Consisting of Tax Parcel Number 03980-002-001 (Quasi-Judicial Hearing).

PREPARED BY: Adam Hall

RECOMMENDED ACTION:

Staff recommends that the City Commission:

1. Approve the Final Plat of Phase 3 of Fletcher Trace ("Final Plat");
2. Approve the "Subdividers Agreement for Fletcher Trace Phase 3" ("Subdividers Agreement"); and,
3. Authorize the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement;

Recommended Motion:

Based upon the competent substantial evidence presented at this hearing, the presentation before this Commission, and Staff's recommendation, this Commission finds the application to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and therefore this Commission:

1. *Approves the Final Plat of Phase 3 of Fletcher Trace ("Final Plat");*
2. *Approve the "Subdividers Agreement for Fletcher Trace Phase 3" ("Subdividers Agreement"); and,*
3. *Authorizes the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement*

Summary

This application is a request by Aaron Hickman, PSM, of CHW, Inc., applicant and agent for Waco of Alabama, Inc., property owner, for consideration of the final plat of Phase 3 of Fletcher Trace subdivision, which proposes to subdivide a ±17.66-acre subject property into a total of 37 lots with associated common areas and road right-of-way.

The subject property consists of a portion of Tax Parcel 03980-002-001, and is located east of

CR 235 and north of NW 110th Ave.

The proposed Fletcher Trace Phase 3 subdivision will consist of lots ranging size from ±5,500 square feet to ±7,238 square feet, with the majority of lots being ±5,500 square feet. The final plat proposes 37 single family detached residential lots. The approved Planned Development Master Plan permits a maximum of 472 residential units (311 in Development Area A, 106 in Development Area B, 28 in Development Area C, and 27 in Development Area B). The final plat proposes common areas along all boundaries of the project area. Stormwater for the proposed development will be conveyed to and treated within one (1) stormwater management facilities located in common area.

One (1) vehicular access point will be provided to CR235. Development within the proposed subdivision will connect to potable water and wastewater facilities. An analysis of the development's impact on other public facilities, including transportation, potable water, sanitary sewer, solid waste, and public schools, is provided within this report.

Section 2.4.10(G)(5) of the City's Land Development Regulations (LDRs) establishes the requirements for a final plat. An analysis of the application's compliance with the applicable standards of this section has been provided within this report. The Planned Development – Residential zoning designation for the subject property were approved by the City Commission on April 25, 2022 through Ordinance 22-10. The project name at that time was Savannah Station Phase 3. The preliminary plat/ Final PD plan was approved by the City Commission on September 26, 2022.

Construction Plans were approved on April 18, 2024.

The Developer intends to complete the improvements as outlined in the approved Construction Plans before recording the plat, therefore, in accordance with Section 2.4.10 (G)(6), a surety device is not necessary to be posted. Once improvements are complete and approved by the City, the Developer must post a maintenance surety bond on which time the approved Final Plat for Fletcher Trace Phase 3 can be released for recording, and lots may be sold or transferred.

PLAT BOOK ___, PAGE ___
SHEET ONE OF TWO

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2192.97 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE, NORTH 41°06'51" EAST, A DISTANCE OF 1878.44 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 827.97 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 00°14'12" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 282.21 FEET; THENCE, DEPARTING SAID WEST LINE, THE FOLLOWING NINE (9) COURSES; (1) SOUTH 64°41'49" WEST, A DISTANCE OF 69.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 185.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°50'21" WEST, 169.54 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 54°32'38", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°03'45" WEST, A DISTANCE OF 160.87 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°14'11" EAST, 35.36 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°00'00", AN ARC LENGTH OF 39.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 85.00 FEET; (6) SOUTH 89°45'49" WEST, A DISTANCE OF 420.66 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 235.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 65°26'20" WEST, 193.60 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°38'58", AN ARC LENGTH OF 199.54 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 311.05 FEET; (9) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.66 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I7576, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

City of Alachua

Planning & Community Development Department

Staff Report

City Commission Hearing Date: February 10, 2025
Quasi-Judicial Hearing

SUBJECT:	A request for consideration of the final plat of Phase 3 of Fletcher Trace which proposes to subdivide a ±17.66-acre subject property into a total of 37 single family lots with associated common areas and road right-of-way
APPLICANT/AGENT:	Aaron Hickman, PSM, CHW, Inc.
PROPERTY OWNER:	Waco of Alabama, Inc.
LOCATION:	East of CR 235, north of NW 110th Avenue
PARCEL ID NUMBERS:	Portion of 03980-002-001
FLUM DESIGNATION:	Moderate Density Residential
ZONING:	Planned Development – Residential (PD-R)
OVERLAY:	N/A
ACREAGE:	±17.66 acres
PROJECT PLANNER:	Adam Hall, AICP, Principal Planner
RECOMMENDATION:	Staff recommends that the City Commission: 1. Approve the Final Plat of Phase 3 of Fletcher Trace ("Final Plat"); 2. Approve the "Subdividers Agreement for Fletcher Trace Phase 3" ("Subdividers Agreement"); and, 3. Authorize the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement;
RECOMMENDED MOTION:	*Based upon the competent substantial evidence presented at this hearing, the presentation before this Commission, and Staff's recommendation, this Commission finds the application to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and therefore this Commission:* *1. Approves the Final Plat of Phase 3 of Fletcher Trace ("Final Plat");* *2. Approve the "Subdividers Agreement for Fletcher Trace Phase 3" ("Subdividers Agreement"); and,*

3. *Authorizes the Mayor and City Attorney to sign the Final Plat and Subdividers Agreement;*

SUMMARY

This application is a request by Aaron Hickman, PSM, of CHW, Inc., applicant and agent for Waco of Alabama, Inc., property owner, for consideration of the final plat of Phase 3 of Fletcher Trace subdivision, which proposes to subdivide a ±17.66-acre subject property into a total of 37 lots with associated common areas and road right-of-way.

The subject property consists of a portion of Tax Parcel 03980-002-001, and is located east of CR 235 and north of NW 110th Ave.

The proposed Fletcher Trace Phase 3 subdivision will consist of lots ranging size from ±5,500 square feet to ±7,238 square feet, with the majority of lots being ±5,500 square feet. The final plat proposes 37 single family detached residential lots. The approved Planned Development Master Plan permits a maximum of 472 residential units (311 in Development Area A, 106 in Development Area B, 28 in Development Area C, and 27 in Development Area B). The final plat proposes common areas along all boundaries of the project area. Stormwater for the proposed development will be conveyed to and treated within one (1) stormwater management facilities located in common area.

One (1) vehicular access point will be provided to CR235. Development within the proposed subdivision will connect to potable water and wastewater facilities. An analysis of the development's impact on other public facilities, including transportation, potable water, sanitary sewer, solid waste, and public schools, is provided within this report.

Section 2.4.10(G)(5) of the City's Land Development Regulations (LDRs) establishes the requirements for a final plat. An analysis of the application's compliance with the applicable standards of this section has been provided within this report. The Planned Development – Residential zoning designation for the subject property were approved by the City Commission on April 25, 2022 through Ordinance 22-10. The project name at that time was Savannah Station Phase 3. The preliminary plat/ Final PD plan was approved by the City Commission on September 26, 2022.

Construction Plans were approved on April 18, 2024.

The Developer intends to complete the improvements as outlined in the approved Construction Plans before recording the plat, therefore, in accordance with Section 2.4.10 (G)(6), a surety device is not necessary to be posted. Once improvements are complete and approved by the City, the Developer must post a maintenance surety bond on which time the approved Final Plat for Fletcher Trace Phase 3 can be released for recording, and lots may be sold or transferred.

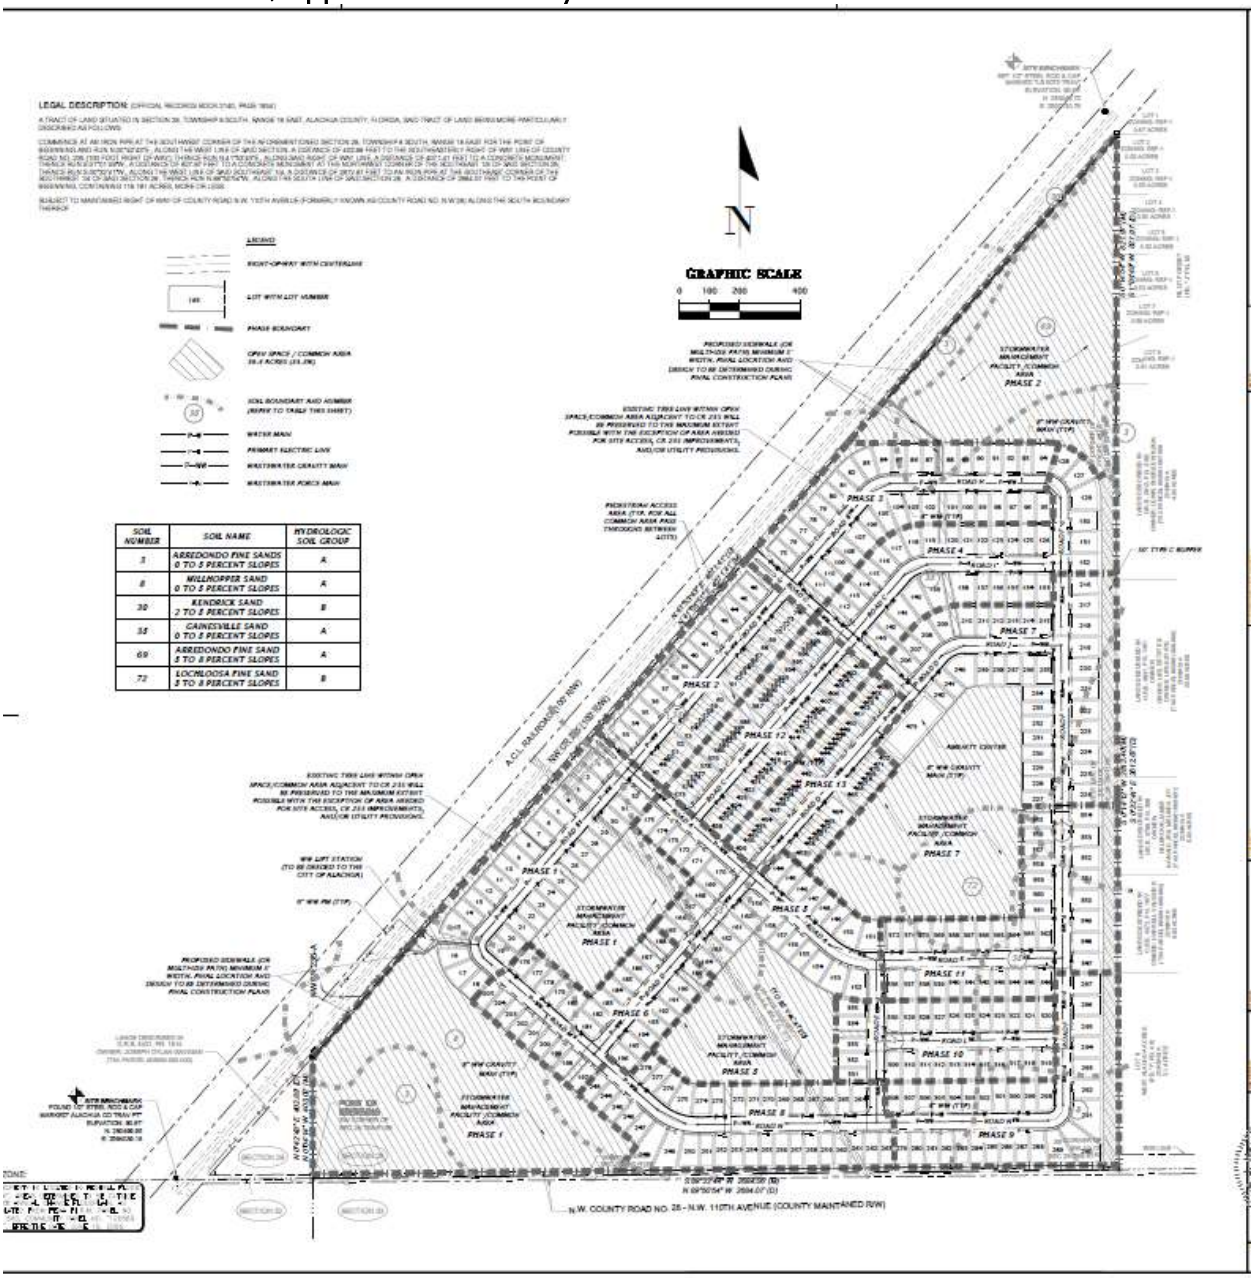

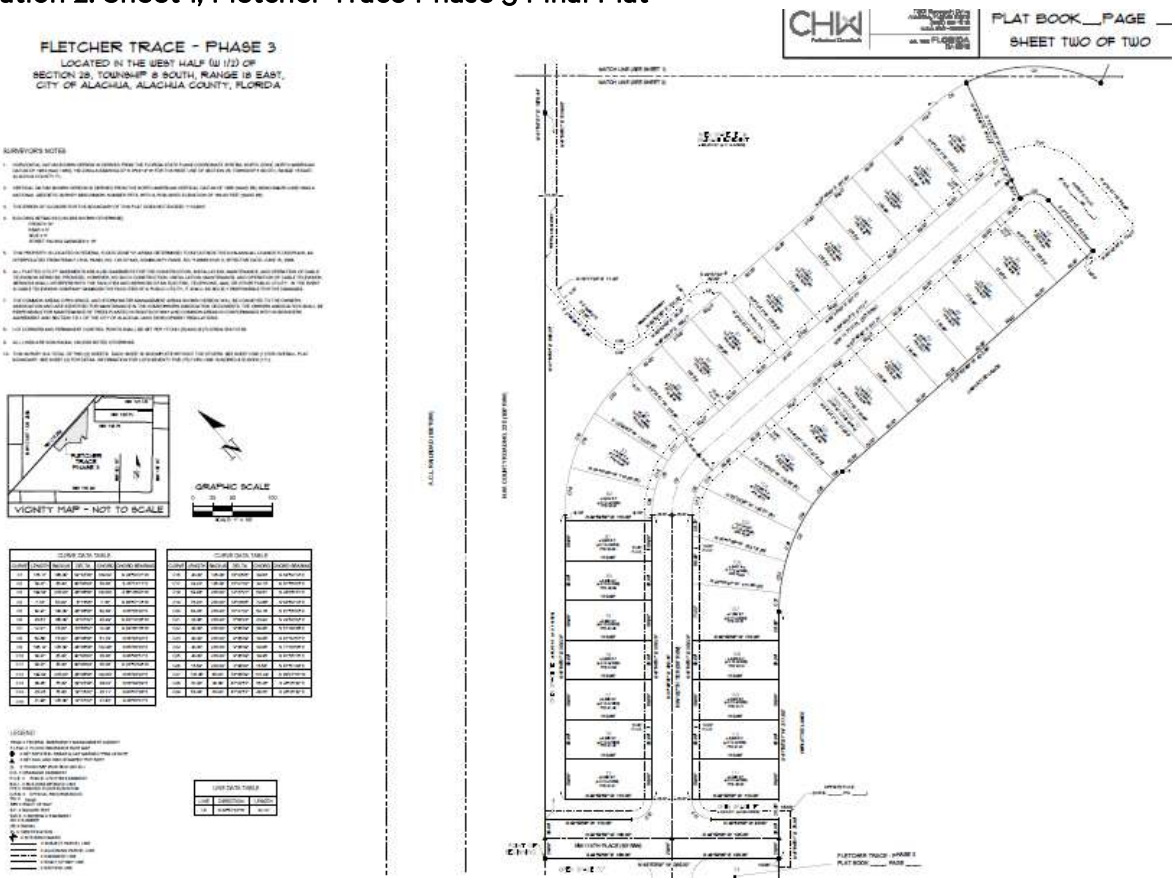

Illustration 2. Sheet 1, Fletcher Trace Phase 3 Final Plat

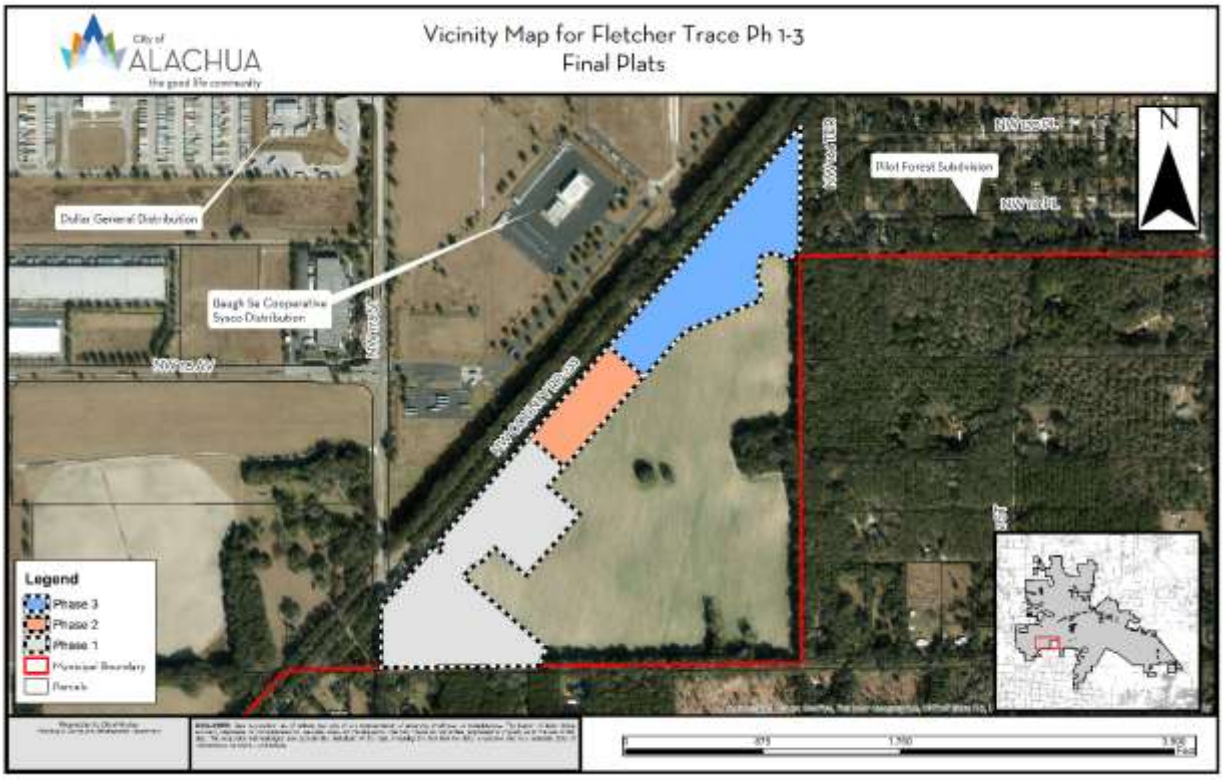


SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) Designations, and zoning districts of the surrounding area are identified in Table 1. Map 1 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. It is not intended to be all-inclusive, and may not identify all existing uses, FLUM Designations, and/or zoning districts surrounding the subject property.)

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Industrial	Industrial	IG
East	Residential	Rural/ Agriculture (Alachua County) and Moderate Density Residential	A (Alachua County)/ RSF-1
West	Industrial	Industrial	IG
South	Residential	Rural/Agriculture (Alachua County)	A (Alachua County)

Map 1. Vicinity Map

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The Goals, Objectives, and Policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

The property currently has a Future Land Use Map Designation of Moderate Density Residential, which permits up to 4 units per acre. The following Comprehensive Plan Elements have Goals, Objectives, and Policies (GOPs) that support the proposed development to the Future Land Use Map of the City of Alachua's Comprehensive Plan:

- Future Land Use Element
- Transportation Element
- Housing Element
- Recreation Element
- Community Facilities Natural Groundwater Aquifer Recharge Element
- Conservation and Open Space Element

The applicant has provided an analysis of the proposed final plat's consistency with the Comprehensive Plan. Based upon the applicant's Comprehensive Plan Consistency Analysis and information presented below, staff finds the application consistent with the Comprehensive Plan and the Goals, Objectives, and Policies (GOPs) therein.

Policy 1.2b: *Moderate Density Residential* (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. **Residential Planned Developments**; and,
8. Supporting community services such as schools, houses of worship, parks, and community centers.

Analysis of Consistency with Policy 1.2.c: The proposed final plat is part of the Fletcher Trace (Savannah Station Phase 3) Planned Development, which is a permitted use within the Moderate Density Residential land use.

Objective 2.1 establishes the standards for Planned Developments (PD), including Residential Planned Developments.

Objective 2.1: Planned Development (PD) Standards

In an effort to reduce the impacts of urban sprawl on the community and the region, the City of Alachua shall provide for a wide array of planned developments to encourage the creation of interrelated neighborhoods and districts to increase the quality of life for all residents of the City.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PDs for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.
2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.
3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.
4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.

5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Analysis of Consistency with Goal 2, Objective 2.1, and Policy 2.1.a: This application proposes a final plat in accordance with the approved PD Master Plan and PD Ordnance and Agreement. The final plat has been reviewed for compliance with these documents.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Analysis of Consistency with Objective 5.1 and Policies 5.1.a – e: The subject property has historically been used for agricultural operations. There are no known listed species, wetlands, special flood hazard areas, or other significant natural features. If any regulated

plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations.

Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities and services necessary for the development.

Analysis of Consistency with Objective 5.2: The proposed final plat has been reviewed for its impacts to all public facilities monitored for concurrency, including parks and education facilities. A complete analysis of these impacts can be found in the "Public Facilities Impact" section of this Report.

GOAL 9: Water and Wastewater Service:

The City will ensure that new development within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the Comprehensive Plan, shall connect to the City of Alachua's potable water and wastewater system.

Policy 9.2: Any new residential subdivision within the corporate limits, where potable water service is available, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within either a Residential or Agriculture Future Land Use Map Designation shall connect to the City of Alachua's potable water system. Any new residential subdivision within the corporate limits, where wastewater service is available, as defined in Policy 1.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within a Residential Future Land Use Map Designation shall connect to the City of Alachua's wastewater system.

Analysis of Consistency with Goal 9 and Policy 9.2: Potable water is available to the site, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan.

<u>Housing Element</u>

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Analysis of Consistency with Policy 1.1.a: This project would support additional housing within the City, thereby furthering Policy 1.1.a.

Recreation Element

Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Analysis of Consistency with Policy 1.2.b: An analysis of the impacts to recreation facilities has been provided within this report.

Transportation Element

Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Analysis of Consistency with Objective 1.1: An analysis of the impacts to transportation facilities has been provided within this report. There are no transportation facilities that would be deficient as a result of this application.

Community Facilities Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which includes all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity water main exists within 100 feet of the property line of any lot with a residential land use category or an existing single family residence and wastewater service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. Gravity wastewater main exists with 500 feet of the property line of any proposed residential subdivision consisting of 5 units or less and the gravity wastewater system is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be

measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 1.2.a: The subject property is located within the wastewater service area, and any future development on the subject property will be required to connect to a wastewater system.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill	.73 tons per capita per year

Analysis of Consistency with Objective 2.1.a: An analysis of the impacts to solid waste facilities has been provided within this report.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within 100 feet of any lot within a residential land use category or an existing single family residence water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. A water main exists within 500 feet of any proposed residential subdivision consisting of 5 units or less and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 4.1.b: The subject property is located within the potable water service area, and any future development on the subject property will be required to connect to a potable water system.

Conservation and Open Space Element

OBJECTIVE 1.3: Listed Species

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.a: The City shall ensure that its ordinances, regulations and policies protect listed species and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.c: The City shall obtain data from the Florida Fish and Wildlife Conservation Commission, Alachua County Environmental Protection Department, Florida Department of Environmental Protection, to maintain a periodically updated inventory of listed species and habitats located within City limits or immediately adjacent to City limits. The City will use the Florida Natural Areas Inventory as a base inventory.

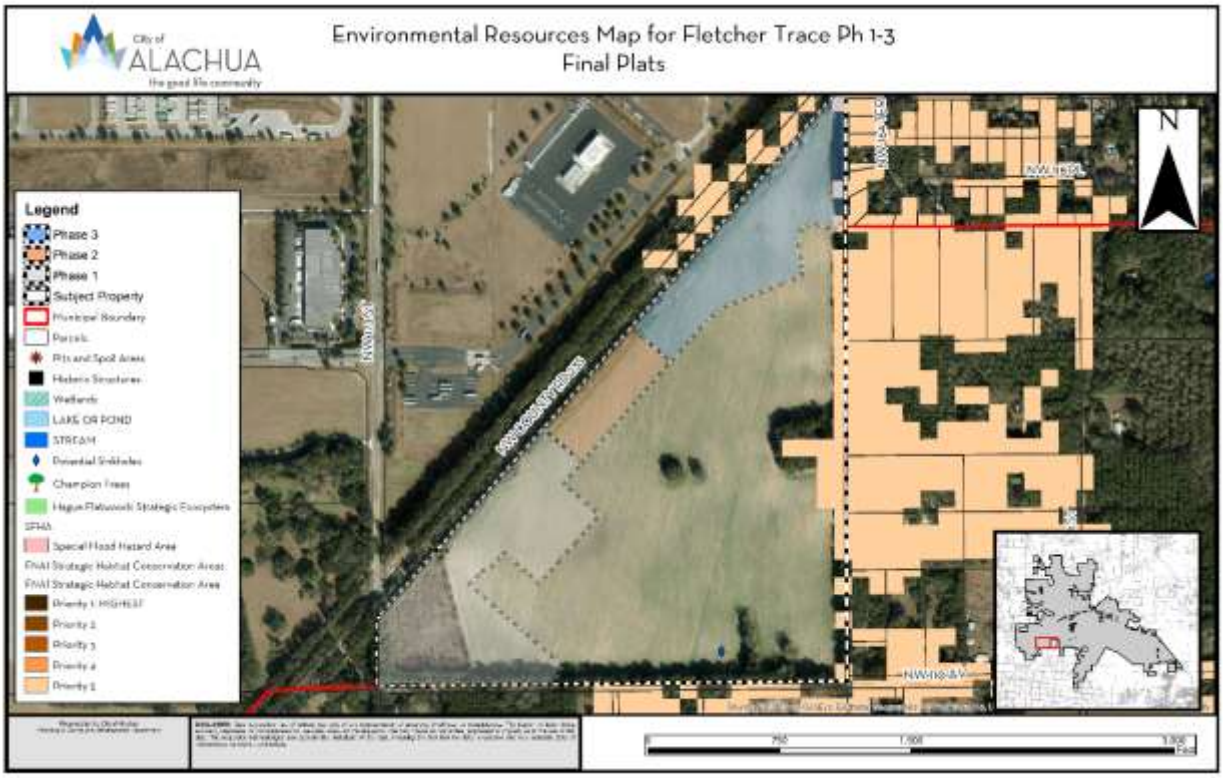
Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Analysis of Consistency with Objective 1.3 and Policies 1.3.a – e:

An environmental conditions and site suitability analysis has been provided separately in this report. Future development of the site must comply with the environmental protections established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 1.10: Wetlands



The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Analysis of Consistency with Objective 1.10:

There are no known wetlands on the subject property. If wetlands are discovered, applicable Goals, Objectives, and Policies of the City's Comprehensive Plan as well as applicable requirements of Alachua County will have to be conformed to.

ENVIRONMENTAL CONDITIONS & SITE SUITIBILITY ANALYSIS

Map 2. Environmental Conditions Map

Wetlands

According to the best available data, there are no wetlands on the subject property.

Evaluation: Applicable standards in the City's Comprehensive Plan, Land Development Regulations, and Suwannee River Water Management District (SRWMD) regulations would apply to those areas identified as wetlands. There are no identifiable wetlands on the subject property, therefore, there are no issues related to wetland protection.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1996. The purpose

of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation: The subject property is not located within or adjacent to a Strategic Ecosystem, therefore, the development will have no impact upon any Strategic Ecosystem(s) identified within the ecological inventory report.

Regulated Plant & Animal Species

The subject property is not known to contain any species identified as endangered, threatened, or of special concern, other than those described below. The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region. Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation: As required by the PD Ordinance, a listed species survey was provided with the preliminary plat/ Final PD application as part of an ecological survey report completed by Flatwoods Consulting Group. The report indicated that five gopher tortoise burrows were found on site. None were found within the area of Phase 3.

Soil Survey

Each soil type found on the subject property is identified below. The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff). There are four hydrologic groups: A, B, C, and D. “Group A” soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. “Group D” soils have very lower infiltration rates and therefore a higher runoff potential.

There are six (6) soil types found on the subject property for the Fletcher Trace Preliminary Plat:

Soil Type	Hydrologic Group	Drainage Class	Dwellings without basements	% of Subject Property (may not total to 100% due to rounding)
Arredondo fine sand, 0 to 5 percent slopes	A	Well drained	Not limited	32.8
Millhopper sand, 0 to 5 percent slopes	A	Moderately well drained	Not limited	10.8
Kendrick sand, 2 to 5 percent slopes	B	Well drained	Not limited	0.2
Gainesville sand, 0 to 5 percent slopes	A	Well drained	Not limited	46.5
Arredondo fine sand, 5 to 8 percent slopes	A	Well drained	Not limited	6.8
Lochloosa fine sand, 5 to 8 percent slopes	B	Somewhat poorly drained	Not limited	3.0

Evaluation: The soil types located within the subject property do not pose any significant limitations for development of residential dwellings.

Flood Potential

Panels 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the subject property contains areas with Flood Zone "X" designations (areas determined to be outside of the 500-year floodplain).

Evaluation: No portion of the subject property appears to be located within a special flood hazard area, therefore, no issues related to flood potential.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations. GIS Data from Alachua County indicates that a karst feature may be present on the site. As a condition of the Planned Development, additional geotechnical information was provided.

Evaluation: Additional geotechnical analysis has been provided by the applicant in accordance with the conditions of the approved PD ordinance. An additional condition has been included with this preliminary plat that will require additional analysis of stormwater in this area.

Wellfield Protection Zone

Policy 7.2.1 of the Future Land Use Element of the Comprehensive Plan establishes a 500 foot radial buffer around city-owned potable water well.

Evaluation: The subject property is not currently located within a City of Alachua wellhead protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures and Markers

The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventory.

Evaluation: The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventor, therefore, no issues related to historic structures or markers.

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Section 2.4.10(G)(5)(d) of the City's Land Development Regulations (LDRs) establishes the standards with which all final plats must be found to be compliant. The application has been reviewed for compliance with the standards of Section 2.4.10(G)(5)(d). An evaluation and findings of the application's compliance with the applicable standards of Section 2.4.10(G)(5)(d) is provided below.

2.4.10(G)(5)(d) *Final plat standards.* The final plat for subdivision shall:

(i) Comply with the standards contained in Article 7, *Subdivision Standards*;

Evaluation & Findings: The application has been reviewed for and is found to be in compliance with the applicable standards of Article 7, *Subdivision Standards*. Compliance with Article 7 is demonstrated collectively within the Preliminary Plat, Construction Plans, and Final Plat.

(ii) Be in substantial conformance with the preliminary plat, and the construction plans;

Evaluation & Findings: The application has been reviewed for and is found to be in substantial conformance with the preliminary plat and construction plans.

(iii) Be consistent with all other relevant provisions of these LDRs;

Evaluation & Findings: The application has been reviewed for and is found to be in compliance with all other applicable provisions of the LDRs, including but not limited to: Article 3, *Zone Districts*; Article 4, *Use Regulations*; Article 5, *Density, Intensity, and Dimensional Standards*; and Article 6, *Development Standards*.

(iv) Be consistent with all other relevant City ordinances and regulations;

Evaluation & Findings: An evaluation of the application's consistency with the City's Comprehensive Plan has been provided within this report. The application is consistent with all other relevant City ordinances and regulations, including the approved PD Master Plan for the Fletcher Trace (Savannah Station Phase 3) development and PD Ordinance (Ordinance 22-10).

(v) Address the provision of required public improvements in the following ways:
a. Submittal of a subdivider agreement in accordance with Subsection 2.4.10(G)(4) of this section, Subdivider agreement;
b. Provide the City with surety device in accordance with Section 7.4, Improvement guarantees for public improvements, if improvements are proposed to be completed after final plat recordation;

Evaluation & Findings: A subdivider agreement has been prepared in accordance with Subsection 2.4.10(G)(4). The subdivider agreement (included within the supporting application materials attached as Exhibit "A" to this report) establishes the requirements for the construction of infrastructure, inspection of infrastructure during construction, and the maintenance guarantee for infrastructure improvements. The foregoing provisions within the subdivider agreement meet the requirements of Sections 2.4.10(G)(4) and 7.4 of the LDRs. The subdivider intends to complete improvements prior to recording final plat in the public records of Alachua County, therefore, no surety for construction is required at this time.

(vi) Include the following certificates, which shall be signed by the subdivider and the LDR Administrator:
a. Certificate of subdivider's surveyor;
b. Certificate of City's review surveyor;
c. Certificate of approval by County Health Department, if applicable;
d. Certificate of approval by the Attorney for the City;
e. Certificate of approval by the City Commission; and
f. Certificate of filing with the Alachua County Clerk of Court.

Evaluation & Findings: The face of the plat provides all certificates as listed in Subsection 2.4.10(G)(5)(d)(vi).

PUBLIC FACILITIES IMPACT

The analysis of each public facility provided below represents an analysis of the impacts generated by the proposed Final Plat – 37 dwelling units.

At present, the total impacts generated by the Final Plat are acceptable and are not anticipated to degrade the Level of Service (LOS) of any public facility. If development is proposed in the future, the applicant will be required to provide a comprehensive analysis of the impacts generated by such development upon public facilities. Facility capacity must be available to support the proposed development prior to the issuance of a final development order.

Traffic Impact

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2, 3]	Segment Description	Lanes	Functional Classification	Area Type	LOS
11	CR 235 (from NW 143rd Place to South City Limit)	2/U	Major Collector	COMM	D
17	CR235A South (from US 441 to CR235)	2/U	Major Collector	COMM	D

1 *Source: City of Alachua Comprehensive Plan, Traffic Circulation Element.*
2 *For developments generating 1,000 trips or greater, affected roadway segments are identified as all those wholly or partially located within · mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater, and all roadway segments for which the proposed development's impacts are 5% or greater on the Maximum Service Volume (MSV) of the roadway [Section 2.4.14(H)(2)(b) of the LDRs].*
3 *FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity*

Table 4. Potential Trip Generation

	Land Use	AADT (Enter/Exit)	AM Peak Hour (Enter/Exit)	PM Peak Hour (Enter/Exit)
Fletcher Trace Ph 1	Residential [1]	352 (176/176)	28 (7/21)	38 (24/14)
Potential Trips		352 (176/176)	28 (7/21)	38 (24/14)

1 *ITE Trip Generation (ITE 210). AADT: 9.52 trips per unit = 37 x 9.52 = 400 (50% enter/50% exit). PM 1.02 trips per unit = 37 x 1.02 = 43. (64% enter/36% exit). AM: .77 trips per unit = 37 x .77=32 (26% enter/74% exit).*

Table 5. Potential Impact of Affected Comprehensive Plan Roadway Segments

Traffic System Category	11 CR 235 (from NW 143rd Place to South City Limit) [1]	17 CR235A South (from US 441 to CR235)
Maximum Service Volume[2]	15,120	15,120
Existing Traffic[3]	6,180	5,302
Reserved Trips[4]	0	3,821
Available Capacity[4]	8,940	5,997
Potential Impact Generated by Proposed Final Plat[5]	352	176
Residual Capacity after Proposed Final Plat[6]	**8,588**	**5,821**
PM Peak Hour Traffic Analysis	11 CR 235 (from NW 143rd Place to South City Limit) [1]	17 CR235A South (from US 441 to CR235)
Maximum Service Volume[2]	1,359	1,359
Existing Traffic[3]	587	504
Reserved Trips[4]	0	392
Available Capacity[4]	772	463
Potential Impact Generated by Proposed Final Plat [5]	38	19
Residual Capacity after Proposed Final Plat[6]	**734**	**444**

1 *FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity.*

2 *AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.*

3 *Florida Department of Transportation. (2024). 2023 Count Data. Accessed via Florida Traffic Online April 2024.*

4 *Source: City of Alachua January 2025 Development Monitoring Report.*

5 *Source: Applicant Submitted Concurrency Analysis Report. Assumed trip distribution Segment 11: 100%, Segment 17: 50%.*

6 *Concurrency has already been reserved for this project as part of the Final PD Plan/ Preliminary Plat.*

Evaluation: As shown no segment monitored for concurrency is shown to fall below the required minimum level of service.

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity*	2,300,000
Less Actual Potable Water Flows*	1,548,250
Reserved Capacity*	468,945
Potential Potable Water Demand from Proposed Preliminary Plat **	10,175
Residual Capacity	**272,630**
Percentage of Permitted Design Capacity Utilized	**88.15%**
Sources: ** City of Alachua January 2025 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 275 gallons/du/ day x 37 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 10,175 gallons per day at build out. This analysis is based on the development potential of 37 residential dwellings that would are proposed as part of the Final Plat. Policy 4.1.c.3, of the Community Facilities Element of the City's Comprehensive Plan requires that no development orders be issued until additional capacity becomes available or funds to increase facility capacity are committed. The City is currently working on a new well-field project that has been funded and has initiated the process to increase permitted design capacity. It is anticipated that the proposed development will not adversely affect the Level of Service ("LOS") for potable water facilities, and the impacts are therefore acceptable.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity*	1,500,000
Less Actual Treatment Plant Flows*	764,000
Reserved Capacity*	437,084
Projected Potential Wastewater Demand from Proposed Preliminary Plat **	9,250
Residual Capacity	**289,666**
Percentage of Permitted Design Capacity Utilized	**80.69%**
Sources: ** City of Alachua January 2025 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 250 gallons/du/ day x 37 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 9,250 gallons per day. This analysis is based on the practicable development potential of 37 residential dwellings that would be permitted by the proposed preliminary plat. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for sanitary sewer facilities, and the impacts are therefore acceptable.

Recreational Impacts

Table 8a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	55.08
Reserved Capacity[1]	13.84
Potential Demand Generated by Development[3]	0.48
Residual Recreational Capacity After Impacts	**66.08**

Sources:
1 *City of Alachua January 2025 Development Monitoring Report.*
2 *Bureau of Economic & Business Research, University of Florida, Estimates of Population (2021); Policy 1.2.b, Recreation Elements. Census Bureau; Policy 1.2.b, Recreation Element (Formula: 2.76 persons per dwelling x 37 dwellings / [5 acres/1,000 persons])*

Table 8b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	13.79 acres
Acreage Required to Serve Demand Generated by Development[2]	.10 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	13.89 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**39.89 %**

1 *Source: City of Alachua January 2025 Development Monitoring Report.*
2 *Formula: Recreation Demand Generated by Development (0.55 acres) x 20%.*
3 *Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)*

Evaluation: The proposed preliminary plat would increase the maximum potential demand from the development of the subject property by 0.48 recreational acres, and for passive park space by 0.10 acres. Concurrency and impacts to the City's recreation system will be reevaluated at the preliminary plat review stage. It is anticipated that the proposed preliminary plat will not adversely affect the Level of Service ("LOS") of recreational facilities; therefore, the impacts are acceptable.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Lbs Per Day	Tons Per Year
Existing Demand[1]	44,060.00	8,040.95
Reserved Capacity[2]	50,407.82	9,199.43
Projected Solid Waste Demand from Application[3]	384.82	70.23
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
1 *Bureau of Economic & Business Research, University of Florida, Estimates of Population (2023); Policy 2.1.a, CFNGAR Element*
2 *City of Alachua January 2025 Development Monitoring Report*
3 *Policy 2.1.a, CFNGAR Element (Formula: .73 tons x 37 dwellings)*
4 *New River Solid Waste Facility, April 2024*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 79.72 tons per year. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of solid waste facilities; therefore, the impacts are acceptable.

Public School Impact

At this time, it is anticipated that the proposed final plat will result in a demand of 9 total student stations (4 for elementary, 2 for middle, and 3 for high school). The School Board of Alachua County provided a determination on August 28, 2024 that the school capacity would remain sufficient at build out of this project.

Any future determination must find that the students generated by the proposed amendment can be reasonably accommodated for the five, ten, and twenty year planning periods at the elementary, middle, and high school levels.

Concurrency Summary for Phases 1, 2 and 3

As Phases 1, 2, and 3 are being considered for approval at the same time, an analysis has been generated for the cumulative impacts that all three projects will have on Public Facilities. The analysis of each public facility provided below represents an analysis of the impacts generated by the proposed final plats for Phases 1, 2, and 3 of Fletcher Trace – 111 dwelling units.

At present, the total impacts generated by the proposed plats are acceptable and are not anticipated to degrade the Level of Service (LOS) of any public facility. If development is proposed in the future, the applicant will be required to provide a comprehensive analysis of the impacts generated by such development upon public facilities. Facility capacity must be available to support the proposed development prior to the issuance of a final development order.

Traffic Impact

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2, 3]	Segment Description	Lanes	Functional Classification	Area Type	LOS

Table 8b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	13.79 acres
Acreage Required to Serve Demand Generated by Development[2]	.29 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	14.08 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**40.44 %**

4 Source: City of Alachua January 2025 Development Monitoring Report.
5 Formula: Recreation Demand Generated by Development (01.45 acres) x 20%.
6 Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)

Evaluation: The proposed preliminary plat would increase the maximum potential demand from the development of the subject property by 1.45 recreational acres, and for passive park space by 0.29 acres. Concurrency and impacts to the City's recreation system will be reevaluated at the preliminary plat review stage. It is anticipated that the proposed preliminary plat will not adversely affect the Level of Service ("LOS") of recreational facilities; therefore, the impacts are acceptable.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Lbs Per Day	Tons Per Year
Existing Demand[1]	44,060.00	8,040.95
Reserved Capacity[2]	50,407.82	9,199.43
Projected Solid Waste Demand from Application[3]	1,154.47	210.69
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
5 Bureau of Economic & Business Research, University of Florida, Estimates of Population (2023); Policy 2.1.a, CFNGAR Element
6 City of Alachua January 2025 Development Monitoring Report
7 Policy 2.1.a, CFNGAR Element (Formula: .73 tons x 111 dwellings)
8 New River Solid Waste Facility, April 2024

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 210.69 tons per year. It is anticipated that the proposed

amendment will not adversely affect the Level of Service ("LOS") of solid waste facilities; therefore, the impacts are acceptable.

Public School Impact

At this time, it is anticipated that the proposed final plat will result in a demand of 30 total student stations (13 for elementary, 7 for middle, and 10 for high school). The School Board of Alachua County provided a determination on August 28, 2024 that the school capacity would remain sufficient at build out of this project.

Any future determination must find that the students generated by the proposed amendment can be reasonably accommodated for the five, ten, and twenty year planning periods at the elementary, middle, and high school levels.

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

SCHOOL CONCURRENCY SERVICE AREAS (SCSA)

Elementary Northwest Alachua **Middle** Mebane **High** Santa Fe

SINGLE FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY	37	**units X 0.12 Elementary School Multiplier**	4	**Student Stations**
MIDDLE	37	**units X 0.06 Middle School Multiplier**	2	**Student Stations**
HIGH	37	**units X 0.09 High School Multiplier**	3	**Student Stations**

MULTI FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY		**units X 0.06 Elementary School Multiplier**		**Student Stations**
MIDDLE		**units X 0.03 Middle School Multiplier**		**Student Stations**

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

RE: Project Assistance Team (PAT) Summary: Fletcher Trace Phases 1-3 Final Plats (PSP24-0007, PSP24-0008, and PSP24-0009)

Dear Mr Hickman:

On July 24, 2024, the City of Alachua received your revised applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

The application has been reviewed by the City's Project Assistance Team (PAT). Upon review of the application and materials, the following insufficiencies must be addressed. A meeting to review these comments can be scheduled upon request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **12:00 PM** on **Tuesday, August 27, 2024**. A total of four (4) copies of the application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date.

Please address the following:

PHASE 1

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of

surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 1:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   a. The applicant must address all comments provided by the Public Services Department in a memo signed August 7, 2024 (attached).
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
2. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 2

3. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 2:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

4. *Article 7, Subdivision Standards*
   d. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
3. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 3

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 3:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   e. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
4. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Alachua County, Florida

Mr. Tabor,

Re: Fletcher Trace – Phase 1
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 1. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): There are Match Lines shown on Sheet 1 that are not shown on Sheet 2. (See redlined copy of Plat). In my opinion the northerly and westerly Match Lines should be eliminated.

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Tilte Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

There are offsite easements shown which are not dimensioned and have no recording Information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

PLAT BOOK__,PAGE __
SHEET ONE OF TWO

DESCRIPTION

A TRACT OF LAND SITUATED IN IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING ELEVEN (11) COURSES; (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) SOUTH 41°06'51" WEST, A DISTANCE OF 160.00 FEET; (3) SOUTH 48°53'09" EAST, A DISTANCE OF 270.00 FEET; (4) SOUTH 41°06'51" WEST, A DISTANCE OF 519.84 FEET; (5) NORTH 48°53'09" WEST, A DISTANCE OF 270.00 FEET; (6) SOUTH 41°06'51" WEST, A DISTANCE OF 110.16 FEET; (7) SOUTH 60°08'30" WEST, A DISTANCE OF 52.89 FEET; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 110.00 FEET; (9) SOUTH 48°53'09" EAST, A DISTANCE OF 702.47 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE NORTHEAST, HAVING A RADIUS OF 335.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 51°07'03" EAST, 26.09 FEET; (10) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 04°27'46", AN ARC LENGTH OF 26.09 FEET TO THE END OF SAID CURVE; (11) THENCE DEPARTING SAID CURVE, SOUTH 36°39'04" WEST, A DISTANCE OF 123.18 FEET TO THE SOUTH LINE OF AFOREMENTIONED SECTION 28; THENCE SOUTH 89°22'44" WEST, ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 1005.72 FEET TO THE **POINT OF BEGINNING**.

PARCEL OF LAND CONTAINING 21.35 ACRES, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF SOUTH 89°22'44" WEST FOR THE SOUTH LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I75T6, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X". AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.
8. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
9. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS ONE (1) THRU THIRTY-TWO (32).

Mr. Tabor,

Re: Fletcher Trace – Phase 2
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 2. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.081 (2) & 177.091 (12): The owner of the lands shown in the Owner's Certification and Dedication Is different from that in the Title Opinion by Kelley D. Jones, P.A.
If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase 1 is recorded prior to Phase 2).

Note: If Phase 1 is not recorded, Phase 2 will not have access to a Public Right of Way.

There are offsite easements shown which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM
State of Florida License No. LS 4239

FLETCHER TRACE - PHASE 2

LOCATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET TO THE POINT OF BEGINNING; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING THREE (3) COURSES: (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) NORTH 41°06'51" EAST, A DISTANCE OF 755.00 FEET; (3) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO AFOREMENTIONED SOUTHEASTERLY RIGHT OF WAY LINE; THENCE SOUTH 41°06'51" WEST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 755.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 5.11 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I7576, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.

Mr. Tabor,

Re: Fletcher Trace – Phase 3
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 3. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): In my opinion the Southeasterly and Northwesterly Match lines are not necessary and should be eliminated. The Northeasterly Match Line on Sheet 2 is mislabeled. There is no Southwesterly Match Line shown on Sheet 2. The Southwesterly Match Line on Sheet 1 will need to be moved to the Northeast (See redlined Plat).

177.091 (7): An additional P.R.M. is required on the NW boundary on Sheet 2 (as shown on Sheet 1).

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase- 2 is recorded prior to Phase 3).
Note: If Phase 1 and 2 are not recorded, Phase 3 will not have access to a Public Right of Way.

177.091 (18): Lot 107 is not numbered on Sheet 2.

177.091 (29): Include 'P.B.' in the legend.
Label the size and identity of what I assume is a concrete monument at the northwest Corner of Lot 2 of Pilot Forest and include the symbol (what it is) in the Legend.

There are offsite easements which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

RE: Project Assistance Team (PAT) Summary: Fletcher Trace Phases 1-3 Final Plats (PSP24-0007, PSP24-0008, and PSP24-0009)

Dear Mr Hickman:

On April 24, 2024, the City of Alachua received your revised applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

The application has been reviewed by the City's Project Assistance Team (PAT). Upon review of the application and materials, the following insufficiencies must be addressed. A meeting to review these comments can be scheduled upon request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **12:00 PM** on **Thursday, May 30, 2024**. A total of four (4) copies of the application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date.

Please address the following:

PHASE 1

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of

surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

2. *Article 7, Subdivision Standards*
   a. A note must be added to the plat that the HOA shall be responsible for maintenance of trees planted in rights-of-way and common areas in conformance with Subdividers Agreement and Section 7.8.1.
   b. Confirm that the placement of monuments is included in the 'surveying' line of cost estimates (or elsewhere within cost estimates).
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

3. *Concurrency*
   a. Provide revised SBAC Concurrency form for Phase 1 only.

4. *Land Rights*
   a. Title commitment states Waco of Alabama, Inc. as land owner, but Plat states Fletcher Development, LLC with mortgage held by Campus USA Credit Union. Will Fletcher Development, LLC take title and have mortgage in place prior to Public Hearing? Revised title report or letter of title opinion will be needed prior to public hearing. Off-site easement from Waco of Alabama, Inc. will be needed unless Fletcher Development, LLC will also be taking title to those portions. City staff can provide off-site easement documentation upon request. Please contact Corey King in the Compliance and Risk Management Department.

5. *Miscellaneous*
   a. 100% gopher tortoise survey required prior to commencement of land clearing activities.
   b. "Southern" misspelled on Plat on south property line.
   c. Plat will be submitted to the Alachua County Enhanced 911 office for street name assignment.
   d. Notary block on plat appears to have misspelling. Verify.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   a. The applicant must address all comments provided by the Public Services Department in a memo dated May 14, 2024 (attached).
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

PHASE 2

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

2. *Article 7, Subdivision Standards*
   a. A note must be added to the plat that the HOA shall be responsible for maintenance of trees planted in rights-of-way and common areas in conformance with Subdividers Agreement and Section 7.8.1.
   b. Confirm that the placement of monuments is included in the 'surveying' line of cost estimates (or elsewhere within cost estimates).
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

3. *Concurrency*
   a. Provide revised SBAC Concurrency form for Phase 2 only.

4. *Land Rights*
   a. Title commitment states Waco of Alabama, Inc. as land owner, but Plat states Fletcher Development, LLC with mortgage held by Campus USA Credit Union. Will Fletcher Development, LLC take title and have mortgage in place prior to Public Hearing? Revised title report or letter of title opinion will be needed prior to public hearing. Off-site easement from Waco of Alabama, Inc. will be needed unless Fletcher Development, LLC will also be taking title to those portions. City staff can provide off-site easement documentation upon request. Please contact Corey King in the Compliance and Risk Management Department.

5. *Miscellaneous*
   a. 100% gopher tortoise survey required prior to commencement of land clearing activities.
   b. Plat will be submitted to the Alachua County Enhanced 911 office for street name assignment.
   c. Notary block on plat appears to have misspelling. Verify.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   c. The applicant must address all comments provided by the Public Services Department in a memo dated May 14, 2024 (attached).

d. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

PHASE 3

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

2. *Article 7, Subdivision Standards*
   a. A note must be added to the plat that the HOA shall be responsible for maintenance of trees planted in rights-of-way and common areas in conformance with Subdividers Agreement and Section 7.8.1.
   b. Confirm that the placement of monuments is included in the 'surveying' line of cost estimates (or elsewhere within cost estimates).
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

3. *Concurrency*
   a. Provide revised SBAC Concurrency form for Phase 3 only.

4. *Land Rights*
   a. Title commitment states Waco of Alabama, Inc. as land owner, but Plat states Fletcher Development, LLC with mortgage held by Campus USA Credit Union. Will Fletcher Development, LLC take title and have mortgage in place prior to Public Hearing? Revised title report or letter of title opinion will be needed prior to public hearing. Off-site easement from Waco of Alabama, Inc. will be needed unless Fletcher Development, LLC will also be taking title to those portions. City staff can provide off-site easement documentation upon request. Please contact Corey King in the Compliance and Risk Management Department.

5. *Miscellaneous*
   a. 100% gopher tortoise survey required prior to commencement of land clearing activities.
   b. Plat will be submitted to the Alachua County Enhanced 911 office for street name assignment.
   c. Notary block on plat appears to have misspelling. Verify.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   e. The applicant must address all comments provided by the Public Services Department in a memo dated May 14, 2024 (attached).
   f. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

Adam Hall, AICP

Mr. Tabor,

Re: Fletcher Trace – Phase 1
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 1. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): Match lines are needed on Sheet 2.

177.091 (6): A bearing reference to a well established and monumented line is required.

177.061: The survey business name, LB number and address must appear under the Surveyor's Certificate.

177.081 (1): I am not reviewing for conformity to the City of Alachua ordinances and regulations.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the South boundary by Subdivision name, Plat Book and page and Unplatted.

177.091 (29): Include Sec 28-T8S-R18E in the legend.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Mr. Tabor,

Re: Fletcher Trace – Phase 2
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 2. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (6): A bearing reference to a well established and monumented line is required.

177.061: The survey business name, LB number and address must appear under the Surveyor's Certificate.

177.081 (1): I am not reviewing for conformity to the City of Alachua ordinances and regulations.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase 1 is recorded prior to Phase 2).

Note: If Phase 1 is not recorded, Phase 2 will not have access to a Public Right of Way.

177.091 (29): Include Sec 28-T8S-R18E in the legend.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Mr. Tabor,

Re: Fletcher Trace – Phase 3
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 3. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): Matchlines are required on Sheet 2.

177.091 (6): A bearing reference to a well established and monumented line is required.

177.091 (7): An additional P.R.M. is required on the NW boundary. P.R.M.s cannot be more than 1400' apart.

177.061: The survey business name, LB number and address must appear under the Surveyor's Certificate.

177.081 (1): I am not reviewing for conformity to the City of Alachua ordinances and regulations.

177.091 (14): The West line of Section 28 (North of the P.O.C.) needs to be labelled on Sheet 1.

177.091 (15): Street names (when determined) are required.

177.091 (16): P.U.E.'s need to be shown and dimensioned along the Right of Ways on Sheet 2.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase- 2 is recorded prior to Phase 3).

Note: If Phase 1 and 2 are not recorded, Phase 3 will not have access to a Public Right of Way.

177.091 (19): The bearings on the northeasterly lines of Lots 96 & 108 need to be labelled.

177.091 (29): Include 'Sec 28-T8S-R18E' and 'P.B.' in the legend.

RE: Completeness Review: Fletcher Trace Phases 1- 3 Final Plats

Dear Mr. Hickman:

On March 27, 2024 the City of Alachua received your applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that the applications are incomplete following information is needed to begin the review of the application. Please address the following deficiencies no later than **5:00 PM on Thursday, April 11, 2024**

In accordance with Section 2.2.6(B) of the LDRs, the applicant must correct the deficiencies and resubmit the application for completeness determination. *Plans and application materials may be made available for return in order to revise and resubmit as needed.*

The time frame and cycle for review shall be based upon the date the application is determined to be complete. If the applicant fails to respond to the identified deficiencies within forty-five (45) calendar days, the application shall be considered withdrawn.

Please note that if an additional completeness review is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the application.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the content of the application will be performed, and the findings of the in-depth review will be discussed at a Project Assistance Team (PAT) Meeting, which will be sent under separate cover and subsequent to a determination of completeness. In order to provide a complete application, please address the following:

PHASE 1

1. **Final Plat Application Attachment #6, Concurrency Impact Analysis Report:** Submitted report is for entire Fletcher Trace project, but must be specific to this Phase.

2. **Final Plat Application Attachment #9, Legal Descriptions and Sketches of Off-Site Public Utility Easements (PUEs):** Legal descriptions and sketches of all off-site PUEs and property to be deeded to the City have not been submitted.

3. **Final Plat Application Attachment #10, City of Alachua Public School Student Generation Form:** Submitted Public School Student Generation form is for entire Fletcher Trace project, but must be specific to this Phase.

4. **Final Plat Application Attachment #17, Alachua County Public Works access management permit.** Provide documentation of permit application or communication with Alachua County Public Works regarding proposed access.

PHASE 2

1. **Final Plat Application A. 5, Number of Units:** Confirm number of units. Application indicates 41 units, but Plat shows 42 units. Additionally, submitted application fee is for 42 units.

2. **Final Plat Application Attachment #6, Concurrency Impact Analysis Report:** Submitted report is for entire Fletcher Trace project, but must be specific to this Phase.

3. **Final Plat Application Attachment #9, Legal Descriptions and Sketches of Off-Site Public Utility Easements (PUEs):** Legal descriptions and sketches of all off-site PUEs have not been submitted.

4. **Final Plat Application Attachment #10, City of Alachua Public School Student Generation Form:** Submitted Public School Student Generation form is for entire Fletcher Trace project, but must be specific to this Phase.

5. **Final Plat Application Attachment #17, Alachua County Public Works access management permit.** Provide documentation of permit application or communication with Alachua County Public Works regarding proposed access.

6. **Final Plat Application Fee.** Submitted fee is $710, but for 41 lots this fee would be $705. Please see comment above and verify.

PHASE 3

1. **Final Plat Application Attachment #6, Concurrency Impact Analysis Report:** Submitted report is for entire Fletcher Trace project, but must be specific to this Phase.

2. **Final Plat Application Attachment #9, Legal Descriptions and Sketches of Off-Site Public Utility Easements (PUEs):** Legal descriptions and sketches of all off-site PUEs have not been submitted.

3. **Final Plat Application Attachment #10, City of Alachua Public School Student Generation Form:** Submitted Public School Student Generation form is for entire Fletcher Trace project, but must be specific to this Phase.

4. **Final Plat Application Attachment #17, Alachua County Public Works access management permit.** Provide documentation of permit application or communication with Alachua County Public Works regarding proposed access.

5. **Final Plat Application Fee.** Submitted fee is $685, but for 36 lots this fee would be $680. Please verify.

If you have any questions, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com.

A. PROJECT

1. Project Name: Fletcher Trace
2. Preliminary Plat Approval Date: 9/26/2022
3. Construction Plans Approval Date: TBD
4. Phase/Unit Number (if applicable): Phase 3
5. Number of proposed lots/dwelling units: 37
6. Housing Type (i.e., attached/detached units): Detached
7. Address of Subject Property: 11305 NW 173rd St, Alachua, FL
8. Parcel ID Number(s): 03980-002-001
9. Existing Use of Property: Vacant
10. Future Land Use Map Designation: Moderate Density Residential
11. Zoning Designation: PD
12. Acreage: 17.66

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ■ Agent
2. Name of Applicant(s) or Contact Person(s): Aaron Hickman, PSM Title: VP
   Company (if applicable): CHW, LLC
   Mailing address: 11801 Research Drive
   City: Alachua State: FL ZIP: 32615
   Telephone: 352-331-1976 FAX: _____ e-mail: aaronh@chw-inc.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): Waco of Alabama
   Mailing Address: PO BOX 6937
   City: JACKSONVILLE State: FL ZIP: 32236-6937

   ** Must provide executed Authorized Agent Affidavit or other acceptable documentation (as deemed acceptable by the City in its sole discretion) which authorizes the agent to act on behalf of the property owner.*

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ■ Yes ☐ No
   If yes, list names of all parties involved: Fletcher Development
2. Has the applicant discussed possible utility/infrastructure fees with the Public Services Department?
   If no, contact the Public Services Department at 386-418-6140. ■ Yes ☐ No

D. ATTACHMENTS

1. Plat, to include the following information and be prepared in accordance with the following criteria:
    a. Sheet Size: 24" X 36" with 3" left margin and ½" top, bottom, and right margins.
    b. Graphic scale, not to exceed one (1) inch equal to 50 feet.
    c. Name of subdivision shall be shown in bold legible letters, as required by Chapter 177, Florida Statutes. The name of the subdivision shall be shown on each sheet included and shall have legible lettering of the same size and type including the words "section," "unit," "replat," "amended," etc.
    d. Name and address of subdivider.
    e. North arrow, graphic scale, and date of plat drawing.
    f. Vicinity map showing location with respect to existing streets, landmarks, etc., and acreage of the subdivision. The vicinity map shall be drawn to show clearly the required information, but shall not less than one (1) inch to 2,000 feet.
    g. Exact boundary line of the property, determined by a boundary survey, giving distances to the nearest one-hundredth foot and angles to the nearest minute, shall be balanced and closed with an apparent error of closure not to exceed one in 5,000. Survey shall be signed and sealed by the surveyor, and shall be no older than two (2) years.
    h. Legal description of the property to be subdivided.
    i. Acreage of adjacent land. If adjacent land is within a subdivision, identify the subdivision name, and recording information.
    j. Location of streams, lakes, wetlands, and required buffers from such areas, and location of land designated as a special flood hazard area on FEMA FIRM panels.
    k. Bearing and distance to permanent control points on the nearest existing street lines of bench marks or other permanent reference monuments [not less than three (3)].
    l. When the City corporate limits traverse, are adjacent to, or are within 500 feet of the property, the boundary shall be accurately tied to the boundary lines of the subdivision by distance and angles.
    m. The closest lot corner shall be accurately tied to the boundary lines of the subdivision by distance and angles.
    n. Location, dimensions, and purpose of any land reserved or dedicated for public or common use.
    o. Exact locations, width, and names of all streets within and adjacent to the subdivision.
    p. Street right-of-way lines must show deflection angles of intersection, radii, and lines of tangents.
    q. Lot lines, dimensions, and bearings must be shown to the nearest one hundredth (1/100) foot.
    r. Lots must be numbered in numerical order. Additional phases of existing subdivisions shall continue numbering from previous phases.
    s. Location and description of required permanent reference monuments and markers.
    t. Building setback lines.
    u. Covenants and restrictions notice in accordance with Chapter 177.091(28), Florida Statutes.
    v. Dedication to the public by the owners of the land involved of all streets, drainage easements, and other rights-of-way however designated and shown on the plat for perpetual use for public purposes, including vehicular access rights where required.
    w. If the property is encumbered by a mortgage, the owner of the mortgage shall join in the dedication or in some other manner subordinate the mortgagee's interest to the dedication of public right-of-way.

2. Title certification as required by Chapter 177.041, Florida Statutes.

3. Draft of proposed surety instrument for all public and private infrastructure improvements in accordance with the requirements set forth in Sections 6.10 and 7.4 of the LDRs (surety instrument shall be submitted to the City upon approval of the draft document and prior to any public hearing).

4. Cost of construction for all public and private infrastructure improvements (including but not limited to earthwork, stormwater, utilities (water and sewer lines / mains, electric system infrastructure, gas lines, etc.) roadways (streets, sidewalks, etc.) and landscaping in rights-of-way and common areas), signed and sealed by a registered professional engineer.

5. Proposed covenants and restrictions, if any. If the subdivision shall be subject to existing covenants and restrictions, an amendment to such covenants and restrictions shall be provided.

6. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation (for residential development), stormwater, and public schools (for residential development) in accordance with Section 2.4.14 of the LDRs.

7. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy).

8. Legal description of the property to be platted with tax parcel number: (1) on 8.5" x 11" paper; and (2) electronic file in Word format.

9. Legal descriptions and sketches for all off-site public utilities easements and legal descriptions and sketches of all property to be deeded to the City.

10. For residential subdivisions, City of Alachua Public School Student Generation Form.

11. One (1) set of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).

12. Proof of ownership (i.e., copy of deed).

13. Proof of payment of taxes.

14. Traffic Impact Analysis or Statement, as deemed applicable to the project by the City of Alachua in its sole discretion.

15. Environmental Assessment or Study, as deemed applicable to the project by the City of Alachua in its sole discretion.

16. Environmental Resource Permit (or Letter of Exemption) from the Suwannee River Water Management District (SRWMD) or Self-Certification for a Stormwater Management System in Uplands Serving Less than 10 Acres of Total Project Area and Less than 2 Acres of Impervious Surfaces from the Florida Department of Environmental Protection pursuant to Section 403.814(12), Florida Statutes.

17. If access is from a County Road, access management permit from Alachua County Public Works.

18. If access is from a State Road, access management permit from Florida Department of Transportation.

All applicable attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

Under penalty of perjury, I/we certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

PLAT BOOK ___, PAGE ___

SHEET ONE OF TWO

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2192.97 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE, NORTH 41°06'51" EAST, A DISTANCE OF 1878.44 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 827.97 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 00°14'12" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 282.21 FEET; THENCE, DEPARTING SAID WEST LINE, THE FOLLOWING NINE (9) COURSES; (1) SOUTH 64°41'49" WEST, A DISTANCE OF 69.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 185.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°50'21" WEST, 169.54 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 54°32'38", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°03'45" WEST, A DISTANCE OF 160.87 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°14'11" EAST, 35.36 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°00'00", AN ARC LENGTH OF 39.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 85.00 FEET; (6) SOUTH 89°45'49" WEST, A DISTANCE OF 420.66 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 235.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 65°26'20" WEST, 193.60 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°38'58", AN ARC LENGTH OF 199.54 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 311.05 FEET; (9) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.66 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 0°04'14" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I7576, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

- [ ] Multi Family — Number of Units:
- [ ] Exempt (See exemptions on page 2)

Level of Review

- [ ] Pre-Application Conference
- [ ] Preliminary
- [ ] Final
- [ ] Revised
- [ ] Staff Administrative Review

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

SCHOOL CONCURRENCY SERVICE AREAS (SCSA)

Elementary Northwest Alachua **Middle** Mebane **High** Santa Fe

SINGLE FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY	37	**units X 0.12 Elementary School Multiplier**	4.44	**Student Stations**
MIDDLE	37	**units X 0.06 Middle School Multiplier**	2.22	**Student Stations**
HIGH	37	**units X 0.09 High School Multiplier**	3.33	**Student Stations**

MULTI FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

DECLARATION
OF COVENANTS, CONDITIONS AND RESTRICTIONS
FOR
FLETCHER TRACE

THIS DECLARATION, made on the date hereinafter set forth by Fletcher Development, LLC hereinafter referred to as "Declarant."

WITNESSETH

WHEREAS, Declarant is the owner of certain property in the County of Alachua, State of Florida, which is more particularly described as:

The Retention Area, Drainage Easement and Common Area, together with Lots One (1) through _____ ( ) of FLETCHER TRACE, as per plat thereof recorded in Plat Book ___, Pages ___ and ___ of the Public Records of Alachua County, Florida, together with Common Areas shown on said Plat.

NOW THEREFORE, Developer hereby declares that all of the properties above shall be held, sold, and conveyed subject to the following easements, restrictions, covenants, and conditions, which are for the purpose of protecting the value and desirability of, and which shall run with, the real property and be binding on all parties having any right, title or interest in the described properties or any part thereof, their heirs, successors and assigns, and shall inure to the benefit of each owner thereof.

ARTICLE I
DEFINITIONS

Section 1. "Association" shall mean and refer to FLETCHER TRACE HOMEOWNERS' ASSOCIATION, INC., its successors and assigns.

Section 2. "Owner" or "Member" shall mean and refer to the record owner, whether one or more persons or entities, of a fee simple title to any Lot which is a part of the Properties, including contract sellers, but excluding those having such interest merely as security for the performance of an obligation.

Section 3. "Properties" shall mean and refer to that certain real property hereinbefore described, and such additions thereto as may hereafter be brought within the jurisdiction of the Association.

Section 4. "Common Area" shall mean all real property (including the improvements thereto) owned by the Association for the common use and enjoyment to the owners.

Section 5. "Lot" shall mean and refer to any numbered plot of land shown upon any recorded subdivision map of the Properties.

Section 6. "Declarant" shall mean and refer to Fletcher Development, LLC, and its successors or assigns if they should acquire more than one undeveloped Lot from the original Declarant for the purposes of development.

Section 7. "Surface Water or Stormwater Management System" means a system which is designed and constructed or implemented to control discharges of stormwater runoff which are necessitated by rainfall events, incorporating methods to collect, convey, store, absorb, inhibit, treat, use or reuse stormwater runoff to prevent or reduce flooding, over-drainage, environmental degradation, and water pollution or otherwise affect the quantity of discharge from the system. Any reference in the Declaration to the Suwannee River Water Management District shall also include its successors if it ceases to exist.

ARTICLE II
PROPERTY RIGHTS

Section 1. Owner's Easement of Enjoyment. Every owner shall have a right and easement of enjoyment in and to the Common Area which shall be appurtenant to and shall pass with the title to every Lot, subject to the following provisions:

(a) the right of the Association to charge reasonable admission and other fees for the use of any recreational facility situated upon the Common Area;

(b) the right of the Association to suspend the voting rights and right to use of the recreational facilities by an owner for any period during which an assessment against his Lot remains unpaid; and for any period not to exceed 60 days for any infraction of its published rules and regulations;

(c) the right of the Association to dedicate or transfer all or any part of the Common Area to any public agency, authority, or utility for such purposes and subject to such conditions as may be agreed to by a majority of the voting members;

(d) The right of the Association to collect money for the maintenance and repair of stormwater management and surface water facilities.

These rights shall run with the land which is subject to this Declaration.

Section 2. Delegation of Use. Any owner may delegate, in accordance with the By-Laws, his right of enjoyment to the Common Area and facilities to the members of his family, his tenants, or contract purchasers who reside on the property.

ARTICLE III
MEMBERSHIP AND VOTING RIGHTS

Section 1. Every owner of a lot which is subject to assessment shall be a member of the Association. Membership shall be appurtenant to and may not be separated from ownership of any Lot which is subject to assessment.

Section 2. The Association shall have two classes of voting membership;

Class A. Class A members shall be all Owners and shall be entitled to one vote for each Lot owned. When more than one person holds an interest in any Lot, all such persons shall be members. The vote for such Lot shall be exercised as they determine, but in no event shall more than one vote be case with respect to any Lot.

Class B. Class B members shall be- Fletcher Development, LLC and shall be entitled to three (3) votes for each Lot owned. The Class B membership shall cease and be converted to Class A membership on the happening of either of the following events, whichever occurs earlier:

(a) Fletcher Development, LLC no longer owns property in Fletcher Trace Subdivision. At such point that Florida law requires the conversion to Class A membership.

ARTICLE IV
COVENANT FOR MAINTENANCE ASSESSMENTS

Section 1. Creation of the Lien and Personal Obligation of Assessments. The Declarant, for each Lot owned within the Properties, hereby covenants, and each Owner of any Lot, jointly and severally, by acceptance of a deed therefore, whether or not it shall be so expressed in such deed, is deemed to covenant and agree to pay to the Association: assessments or charges, and special assessments for capital improvements, such assessments to be established and collected as hereinafter provided. The assessments, together with interest, costs and reasonable attorney's fees, shall be a charge on the land and shall be a continuing lien upon the property against which each such assessment is made. The assessments, together with interest, costs and reasonable attorney's fees, shall be a charge on the land and shall be continuing lien upon the property against which each such assessment is made. The assessments shall become a lien upon adoption by the Association and may be reflected by filing a notice of such lien in the Public Records of the county where the property is located. Each such assessment, together with interest, costs and reasonable attorney's fees, shall be the personal obligation of the person who was the Owner of such property at the time when the assessment fell due. The personal obligation for delinquent assessments shall not pass to his successors in title unless expressly assumed by them.

Section 2. Purpose of Assessments. The assessments levied by the Association shall be used exclusively to promote the recreation, health, safety and welfare of the residents in the Properties and for the improvement and maintenance of the Common Area. Additionally, the Association shall maintain the landscaping of the area forward of 20 feet to the rear of the front corner of either side of a residential unit. Each of these lots shall have an irrigation system installed for such purpose which shall be maintained by the Association. Maintenance by the Association shall include periodic testing of each zone to insure proper operation; repair and replacement of broken sprinkler heads and adjustment of the watering times for each zone. Such maintenance shall not include replacement of sod, tree or shrubbery, which shall be the responsibility of the Unit Owner. The owner of each lot shall provide at the owners' expense an unrestricted water supply for the irrigation system. Maintenance of the landscaping shall include mowing, trimming, etc. No landscaping shall be added to any Lot without the prior approval of the Architectural Control Committee. Any landscaping so approved shall be accepted for maintenance by the Association.

The Association shall levy a special assessment for the purpose of defraying in whole or in part the cost of the maintenance, operation and repair of the surface water or stormwater management system and any and all other costs incurred to comply with the terms and provisions of the permit issued by the District. Such special assessments shall be levied by the Board of Directors of the Association with or without approval of the membership of the Association. Special assessments shall be due and payable within 30 days of the assessment being levied.

Section 3. Maximum Annual Assessments. Until January 1 of the year immediately following the conveyance of the first Lot to an Owner, the maximum annual assessment shall be One Thousand Two Hundred and 00/100 Dollars ($1,200.00) per Lot.

(a) From and after January 1 of the year immediately following the conveyance of the first Lot to an Owner, the maximum annual assessment may be increased each year not more than 5% above the maximum assessment for the previous year without a vote of the membership.

(b) From and after January 1 of the year immediately following the conveyance of the first Lot to an Owner, the maximum annual assessment may be increased above 5% by a vote of two-thirds (2/3) of each class of members who are voting in person or by proxy, at a meeting duly called for this purpose.

(c) The Board of Directors may fix the annual assessment at an amount not in excess of the maximum.

(d) The Board of Directors is required to establish annual assessments at a rate sufficient to cover annual maintenance. If annual assessments are insufficient, the Board of Directors shall have authority to require a special assessment sufficient to cover such shortfall.

(e) The Board of Directors shall establish the appropriate levels of maintenance.

(f) The Board of Directors may establish fees for the use of various facilities.

Section 4. Special Assessments for Capital Improvements. In addition to the annual assessment authorized above, the Association may levy, in any assessment year, a special assessment applicable to that year only for the purpose of defraying, in whole or in part, the cost of any construction, reconstruction, repair or replacement of a capital improvement upon the Common Area, including fixtures and personal property related thereto, provided that any such assessment shall have the assent of two-thirds (2/3) of the votes of each class of members who are voting in person or by proxy at a meeting duly called for this purpose. Special assessments made for the purpose of complying with the Suwannee River Water Management District permit are not conditioned on lot owner approval or limited in amount.

(a) At the closing between a builder and an initial homeowner a capital contribution assessment of Seven Hundred Fifty and 00/100 Dollars ($750.00) shall be collected and paid to Fletcher Development, LLC.

Section 5. Notice and Quorum for Any Action Authorized Under Sections 3 and 4. Written notice of any meeting called for the purpose of taking any action authorized under Section 3 or 4 shall be sent to all members not less than 30 days nor more than 60 days in advance of the meeting. At such meeting, the presence of members or of proxies entitled to cast majority of all the votes of each class of membership shall constitute a quorum.

Section 6. Uniform Rate of Assessment. Both annual and special assessments must be fixed at a uniform rate for all Lots and may be collected on a monthly basis, except that the Board may establish a lower assessment for lots for which a Certificate of Occupancy has not been issued for improvements to that lot.

Section 7. Date of Commencement of Annual Assessments: Due Dates. The annual assessments provide for herein shall commence as to all Lots on the first day of the month following the conveyance of the Common Area. The first annual assessments shall be adjusted according to the number of months remaining in the calendar year. The Board of Directors shall fix the amount of the annual assessment against each Lot at least thirty (30) days in advance of each annual assessment period. Written notice of the annual assessment shall be sent to every Owner subject thereto. The due dates shall be established by the Board of Directors. The Association shall, upon demand, and for a reasonable charge, furnish a certificate signed by an Officer of the Association setting forth whether the assessment on a specified Lot have been paid. A properly executed certificate of the Association as to the status of assessments on a Lot is binding upon the Association as of the date of its issuance.

Section 8. Effect of Non-payment of Assessments; Remedies of the Association. Any assessment not paid within 30 days of its due date shall be delinquent, and shall bear interest from the

due date at 18% per annum or such lawful rate as may be designated by the board and added as an amendment to this document until paid in full, and the Association shall have the right to file a lien in the Public Records of Alachua County, Florida to secure payment of all amounts due. The total amount due shall be a continuing lien on the real property described in the lien until paid in full, and the Association may bring a civil action to foreclose the lien. The lien of any assessment is subordinate to the lien of any first mortgage. A sale or transfer of any lot or real property encumbered by such a lien shall not affect the validity or enforcement of the lien. No owner may waive or otherwise escape liability for the assessment provided for herein by nonuse of the Common Area or abandonment of his Lot. Any homeowner who is in default shall lose the right to use the common area amenities except for those that may be required for ingress and egress to their Lot.

Section 9. Subordination of the Lien to Mortgages. The lien of the assessments provided for shall be junior and subordinate to the lien of any institutional mortgage (whenever used herein, the term "institutional mortgage" shall include mortgages held by banks, life insurance companies, savings and loan associations, mortgage companies, real estate investment trusts and other similar lending institutions or mortgage brokers originating mortgages eligible for sale on the secondary market) now or hereafter placed upon any portion of the Properties subject to the assessment. Sale or transfer of any Lot shall not affect the assessment lien. Provided, however, that upon the sale or transfer of title to a Lot pursuant to the foreclosure of an institutional mortgage, or any proceeding or conveyance in lieu of the foreclosure of such institutional mortgage, the person who acquires title to the Lot shall not be liable for the share of assessments which became due prior to such acquisition of title as a result of foreclosure. Such unpaid assessment shall be deemed to be a common expense of the Association, collectible from all other Lot Owners, including the person who acquired title to the Lot. Such acquirer of title to the Lot, including the holder of the institutional mortgage, shall be fully responsible for all assessments which become due subsequent to the acquisition of the title to the Lot.

ARTICLE V
ARCHITECTURAL CONTROL

No building, fence, wall or other structure shall be commenced, erected or maintained upon the Properties, nor shall any exterior addition to, or change or alteration therein, be made until the plans and specifications showing the nature, kind, shape, height, materials, and location of the same shall have been submitted to and approved in writing as to harmony of external design and location in relation to surrounding structures and topography by the Board of Directors of the Association, or by an architectural committee composed of three (3) or more representatives appointed by the Board. In the event said Board, or its designated committee, fails to approve or disapprove such design and location within thirty (3) days after said plans and specifications have been submitted to it, approval will not be required as this Article will be deemed to have been fully complied with. No dwelling shall be permitted on any of the lots which contains less than 1,100 square feet of heated and cooled area, exclusive of porches and garages. All lots shall have setbacks as shown on the plat.

ARTICLE VI
RESTRICTIONS ON USE OF PREMISES

In addition to the rules and regulations which may be established by the Association, the following restrictions are placed upon the Property:

(1) Each lot shall be used for residential purposes only.

(2) All driveways shall access to streets within the plat unless otherwise approved by the Architectural Control Committee.

(3) Boats, trailers, recreation vehicles, commercial trucks or other transportable personal property will not be permitted in the open parking areas or drive, but must be stored only within garages.

(4) Mechanical work on any type of vehicle must be done in the garage only. No disabled or unlicensed vehicles may be kept parked in front of any house.

(5) No motor vehicles shall be parked in the front or side yards except on an improved parking space or driveway.

(6) Access to common areas is limited to members of the Association and immediate members or their family and to those persons maintaining any drainage or public utility easements or structures within such areas.

(7) Members of the Association may bring guests into the common area provided such guests are accompanied by a member.

(8) Members who bring non-members onto the common areas are required to assume full responsibility and liability for their acts, safety, and well-being.

(9) Members who bring non-members into the common area agree to hold the Association harmless for any injuries a non-member guest receives.

(10) Persons not permitted access under 1 or 2 above are not allowed in the common areas and are to be considered trespassers on the property.

(11) The Association Board of Directors shall establish restrictions on hours of use of various parts of the common and recreation facilities.

(12) Minor age children whose parents are not members of the Association may not occupy the common areas at any time except in the company of a member of the Association who assumes guardian responsibility for all acts or injuries that might result from use of these areas.

(13) Each member of the Association and all members of their family with legal authority to use common areas must do so at their own risk. The Association cannot assume responsibility for safety and security of member(s) usage. A member of the Association does hereby waive all claim of liability against the Association and holds the association harmless for all usages members make of the common area.

(14) No swings, ropes, ladders, treehouses, or structures may be erected or attached to any trees in the common area.

(15) No one may climb trees or inflict damage to trees in the common area.

(16) No hunting, trapping or fishing is allowed in the common areas.

(17) No unauthorized removal or cutting of any plants or trees in the common area is permitted.

(18) The Association may set regulations restricting the hours when garbage cans and trash containers may be set out in front of a residence for garbage/trash collection.

(19) All fencing location, size and materials shall be allowed only with the approval of the Association which may prohibit the use of certain fencing. On the rear and side of homes fencing must follow property lines unless unable to do so at no fault of the home owner. Fences must connect to the home at least two feet in distance to the closest corner of the home. Ask Ashley:

Formatted: Highlight

(20) No satellite dishes, antennas, or such other electronic transmitting or receiving devices may be installed anywhere outside a house on a lot unless approved by the Architectural Control Committee. The Architectural Control Committee shall not approve the placement of any such device if that placement can be seen when viewing the front of the house.

(21) Outside storage buildings can only be in the back yard and subject to the architectural review of the Association.

(22) If the grass is left uncut or other yard maintenance effecting appearances of the neighborhood is left undone by any member on a private residence, or if such residence is unoccupied or in foreclosure, the Association may arrange for cutting whenever the grass is in need of maintenance done and may bill the property owner. Such bill shall become a lien against the property if left unpaid for thirty days.

(23) No signs are permitted on the private property or common areas of the property other than For Sale, Garage Sale and political candidate signs; messages are limited to necessary information only. This restriction does not supersede Article VII Section 7.

(24) The exterior or improvements on each lot must be kept in good repair at all times. If damaged by accident or the elements, repairs must be commenced within ninety (90) days and completed in a timely manner.

(25) No business that requires on-site employees, visits by clients and/or related business traffic may be operated out of any house/garage unless approved by the Architectural Control Committee.

(26) No noxious, offensive, or hazardous activity shall be maintained upon Properties, nor shall anything be allowed thereupon which may be or may become an annoyance or nuisance.

(27) No clear cutting shall be allowed on any portion of a lot which is designated on the plat as "low density buffer."

(28) No swine or poultry or fowl may be housed, kept or otherwise located on any lot or common area.

ARTICLE VII
GENERAL PROVISIONS

Section 1. Enforcement. The Association, or any Owner, shall have the right to enforce, by any proceeding at law or in equity, all restrictions, conditions, covenants, reservations, liens and charges now or hereafter imposed by the provisions of the Declaration. Failure by the Association or by any Owner to enforce any covenant or restriction herein contained shall in no event be deemed a waiver of the right to do so thereafter. The Association or any Owner incurring legal expenses or litigation costs related to successful enforcement of any covenant, restriction or above items shall be reimbursed whether decided in court or settled out of court. The local governing agency shall have the right to enforce, by a proceeding at law or in equity, the provisions contained in the Covenants, Conditions and Restrictions which relate to the maintenance, operation and repair of the surface water or stormwater management system.

The Suwannee River Water Management District shall have the right to enforce, by a proceeding at law or in equity, the provisions contained in these Conditions and Restrictions which relate to the maintenance, operation and repair of the Surface Water or Stormwater Management System and as well as any and all other provisions contained in these Covenants and Restrictions that in any way relate to the permit issued by the District. The District's right to enforce these Covenants and Restrictions by proceedings at law or in equity shall survive any dissolution of the Association and may be enforced by the District against the Association and/or the Owner(s). Should the District bring any action at law or in equity to enforce any provision of these Covenants and Restrictions and should it be determined in any

such proceeding that the Association or any Owner(s) breached any of the provisions of these Covenants and Restrictions or failed to completely and timely comply with any of these Covenants and Restrictions, the District shall be entitled to an award of the attorney's fees and costs incurred by the District in such proceedings which shall include attorney's fees and cost incurred in any administrative or appellate proceeds. The District shall have the right to file a lien in the public records of Alachua County, Florida for any such attorney's fees and cost awarded to the District by any court or administrative body.

Section 2. Severability. Invalidation of any one of these covenants or restrictions by judgment or court order shall in no way affect any other provisions which shall remain in full force and effect.

Section 3. Amendment. The covenants and restrictions of this Declaration shall run with and bind the land, for a term of twenty (20) years from the date this Declaration is recorded, after which time they shall be automatically extended for successive periods of ten (10) years. This Declaration may be amended during the first twenty (20) year period by an instrument signed by not less than sixty-seven percent (67%) of the Lot Owners, and thereafter by an instrument signed by not less than seventy-five percent (75%) of the Lot Owners. Any amendment to the Covenants, Conditions and Restrictions which alter any provision relating to the surface water or stormwater management system, beyond maintenance in its original condition, including the water management portions of the common areas, must have the prior approval of the Suwannee Water Management District and the local governing agency.

Section 4. Annexation. As long as the Declarant owns any property subject to this Declaration, Declarant by amendment to this Declaration, may submit additional property to the OAK VIEW VILLAGE Development as property subject to such Declaration. In the event Declarant no longer owns any property subject to this Declaration, additional residential property and Common Area may be annexed to the Properties with the consent of two-thirds (2/3) of the combined vote of both Class A and B members who are voting in person or by proxy.

Section 5. Surface Water or Stormwater Management System. The Association, and ultimately the Owners of real property subject to this Declaration, shall be responsible for the maintenance, operation and repair of the surface water or stormwater management system as required by the permit issued by the District and other applicable District rules. Maintenance of the surface water or stormwater management system(s) shall mean the exercise of practices which allow the systems to provide drainage, water storage, conveyance or other surface water or stormwater management capabilities as permitted by the Suwannee River Water Management District, and local government jurisdiction. The Association shall be responsible for such maintenance and operation. More specifically, said maintenance and repair for each retention facility shall include, but is not limited to, the following: mow grass, inspect the discharge structures, keep ponds free of trash and other debris, inspect berms for washout or erosion, fill and sod any washout or erosion within one week, inspect vertical volume recovery structures for sediment build up and keep free of obstruction, any fences around ponds are to be inspected for continuity and promptly repaired if necessary. Said inspections are to be done on a monthly basis. Any repair or reconstruction of the surface water or stormwater

management system shall be permitted or, if modified, as approved by the Suwannee River Water Management District, and local government jurisdiction.

Notwithstanding the foregoing, the Association shall have the power and authority to convey title to, and maintenance responsibilities for, all or such portion of the Water Management Systems as Association elects; provided, however, said conveyance may only be made to the Community Development District or such other governmental agency which may assume responsibility for the proper maintenance and care of the Water Management System; provided, however, no such conveyance may be made unless and until said conveyance has been approved in writing by the Suwannee River Water Management District; and further provided that until such time as said conveyance has been approved and occurred, the Association shall continue to maintain the Water Management System in accordance with the terms hereof and in accordance with the terms of all applicable permits.

Section 6. Flood Prone Areas. Properties which have natural ground elevations less than the 100-year flood elevation as shown on the Plat are prone to severe flooding. Development on such properties is subject to special regulation (based on the minimum standards of the Federal Emergency Management Agency, National Flood Insurance Program) by Alachua County. Any development within areas designated as flood prone is subject to all development restrictions outlined in Alachua County's Flood Hazard Area Ordinance. Such development may require special surveying; engineering or architectural design to insure that flood hazard is not increased by the development.

Properties which have ground elevations less than the 10-year flood elevation as shown on the Plat, if any is shown, are subject to common and frequent flooding (a ten percent probability of flooding in any year). Such properties may not be suitable or eligible for permits for onsite sewage disposal systems (septic tanks).

Section 7. Declarant shall have the right to erect and maintain signs or a model or models for sales purposes anywhere on the property.

Section 8. The City of Alachua does not provide liability insurance for any common areas.

ARTICLE VIII
RULES AND REGULATIONS

Section 1. Compliance. Every Owner shall comply with the restrictions and covenants set forth herein and any and all reasonable rules and regulations which may from time to time be adopted by the Board of Directors of the Association. No such rules or regulations shall vary the assessment obligation set forth in Article IV.

Section 2. Enforcement. Failure of an Owner to comply with such restrictions, covenants, rules and regulations shall be grounds for action which may include without limitation any action to recover

sums due for damages, injunctive relief or any combination thereof and the Association shall have the right to suspend the voting rights and use of the Common Areas as it shall determine.

Section 3. Fines. In addition to all other remedies in the sole discretion of the Board of Directors of the Association, a fine or fines may be imposed upon an Owner for failure of an Owner, his family, guests, invites or employees to comply with any covenant, restriction, rule or regulation providing the following procedures are followed:

(a) Notice. The Association shall notify the Owner of the infraction or infractions. Included in the notice shall be the date and time of the next Board of Directors meeting at which time the Owner shall present reasons why penalties should not be imposed.

(b) Hearing. The noncompliance shall be presented to the Board of Directors after which the Board of Directors shall hear reasons why penalties should not be imposed. Any person charged shall be entitled to cross examine witnesses and may be represented by counsel. A written decision by the Board of Directors shall be submitted to the Owner not later than twenty-one (21) days after the Board of Directors meeting.

(c) Fines. The Board of Directors may impose special assessments against the Lot owned by the Owner as follows:

(1) First non-compliance or violation: a fine not in excess of One Hundred Dollars ($100.00)
(2) Second non-compliance or violation: a fine not in excess of Five Hundred Dollars ($500.00)
(3) Third and subsequent non-compliance or violation or violations which are of a continuing nature: a fine not in excess of One Thousand Dollars ($1,000.00)

(d) Payment of Fines. Fines shall be paid not later than thirty (30) days after notice of the imposition or assessment of the penalty.

(e) Collection of Fines. All monies received from fines shall be allocated as directed by the Board of Directors.

(f) Non-exclusive Remedy. These fines shall not be construed to be exclusive and shall exist in addition to all other rights and remedies to which the Association may be otherwise legally entitled.

IN WITNESS WHEREOF, the undersigned, being the Declarant herein, has hereunto signed this Declaration this _____ day of April, 2024.

Signed, sealed and delivered
in our presence as witnesses:

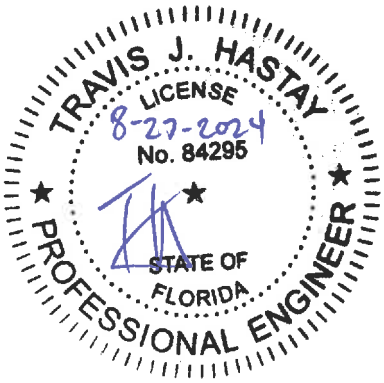
Phase 1 On Lot Sidewalks

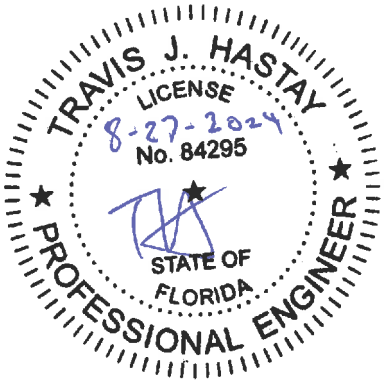
Item No.	Item	Qty	Unit	Unit Cost	Cost
1	Concrete Sidewalks, 4"	1,102	SY	$ 50.55	$ 55,704.38
				Subtotal	**$ 55,704.38**
				Mobilization (10%)	**$ 5,570.44**
				Contingency (10%)	**$ 5,570.44**
				TOTAL	**$ 66,845.25**



The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Phase 2 On Lot Sidewalks

Item No.	Item	Qty	Unit	Unit Cost	Cost
1	Concrete Sidewalks and Driveways, 4"	835	SY	$ 50.55	$ 42,207.63
				Subtotal	**$ 42,207.63**
				Mobilization (10%)	**$ 4,220.76**
				Contingency (10%)	**$ 4,220.76**
				TOTAL	**$ 50,649.16**



The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Phase 3 On Lot Sidewalks

Item No.	Item	Qty	Unit	Unit Cost	Cost
1	Concrete Sidewalks and Driveways, 4"	1,249	SY	$ 50.55	$ 63,156.87
				Subtotal	**$ 63,156.87**
				Mobilization (10%)	**$ 6,315.69**
				Contingency (10%)	**$ 6,315.69**
				TOTAL	**$ 75,788.25**

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

Date: April 17, 2024

Re: Fletcher Trace – Phase 3

This memorandum identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this application is consistent with each. Text from the City of Alachua is provided in normal font while consistency statements are provided in **bold**.

FUTURE LAND USE ELEMENT

Policy 1.2.a: Moderate density residential (0 to 4 dwelling units per acre): The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:

1. Single family, conventional dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments (PD-R);
8. Supporting community services, such as schools, houses of worship, parks, and community centers

This application seeks to permit Phase 3, 37 single-family detached lots. Overall density shall not exceed four (4) dwelling units per acre.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PD's for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices, and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.

As shown in the adopted PD Master Plan, all onsite dwelling units shall be single-family homes, both detached and attached—consistent with Policy 2.1.a.1. of the City of Alachua Comprehensive Plan, Savannah Station, and nearby single-family developments.

2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.

No non-residential activities are being proposed.

3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.

The PD-R exceeds the minimum amount of open space required by Policy 2.5.a. of the Comprehensive Plan. This Phase is consistent with the PD Master Plan. Onsite activities for residents will include passive trails, outdoor workout facilities, and/or community gathering spaces.

4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.

The site shall be designed to support multiple methods of internal transportation by promoting pedestrian-friendly block sizes, sidewalk infrastructure, and streetlighting systems. Block lengths that exceed the maximum 600', as per LDR §7.2.3(B)(2), shall include an easement for a pedestrian way, as described in LDR §7.2.3(B)(4). In no case shall a block face exceed 1,000' in length.

5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Fletcher Trace is the logical expansion of existing City of Alachua potable water and sanitary sewer infrastructure currently serving area residential and non-residential uses.

To avoid constructing roadway infrastructure that is not necessary to enhance roadway capacity, easements for pedestrian ways are proposed on blocks that exceed 600' in length. The pedestrian ways will ensure a walkable neighborhood while the reduced roadway infrastructure will conserve materials, financial resources, and pervious surface area.

Policy 2.4.b: Landscaping: Buffering – A buffer consists of horizontal space (land) and vertical elements (plants, berms, fences, walls) that physically separate and visually screen adjacent land uses. The City shall establish buffer yard requirements that are based on the compatibility of the adjacent uses and the desired result of the buffer.

Phase 3 includes a 20'-wide landscape buffer located along CR 235, consistent with the adopted PD Master Plan.

Policy 2.5.a: There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.

Phase 3 is consistent with the PD Master Plan, which requires a minimum 10% open space. As illustrated in the adopted PD Master Plan, the proposed development far exceeds the minimum required. Onsite open spaces shall be comprised of common area, stormwater management facilities, landscaping.

Objective 4.1: Infill development shall be encouraged in order to protect the unique character of existing neighborhoods and commercial developments, provide for a safe urban environment, increase densities and intensities in a manner compatible with existing uses, provide open spaces, and restore or maintain economic vitality and cultural diversity.

The project site is located within a growing area of the City. Approval of this application will encourage urban infill development on adjacent properties with access to City of Alachua public facilities and services. The proposed residential development is consistent with the existing residential development pattern located along the CR 235 corridor and helps reduce

development pressures in the urban fringe and in more rural areas of the City not served by public facilities and services.

GOAL 5: Development Standards: The City shall include provisions through its comprehensive plan amendment process, development review process and in its land development regulations for development standards that address natural features and availability of facilities and services. These development standards will strive to protect natural resources and public facility resources while allowing for innovative and flexible development patterns.

Phase 3 is consistent with the development standards set forth by the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

There are no onsite wetlands or flood areas that would make this project site unable to support the proposed plan.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

There are two (2) small locations on site with steep slopes (5-8%) that are utilized for stormwater management facilities.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently six (6) types of soils located onsite:

- **Kendrick Sand, 2 – 5% Slopes (Hydro Group: B)**
- **Arredondo Fine Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Arredondo Fine Sand, 5 – 8% Slopes (Hydro Group: A)**
- **Gainesville Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Lochloosa Fine Sand 5 – 8% Slopes (Hydro group: B)**
- **Millhopper Sand, 0 – 5% Slopes (Hydro Group: A)**

According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

There are no FEMA flood zone areas located on the project site.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

The subject property does not contain onsite wetland features, as evidenced by the best available desktop data and analysis. During site plan preparation, a professional environmental scientist shall review the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

No listed species are known onsite.

Objective 5.2: Availability of facilities and services: The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

The impacts this site will have on available facilities and services will not cause facilities and/or services to operate below the adopted level of service. Please see the Concurrency Analysis memo for additional detail.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools, and improved recreation in accordance with LOS standards adopted in the elements addressing these facilities.

This project will not cause City of Alachua facilities to operate below the adopted level of service.

Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Ch. 163, Florida Statutes, development agreement has commenced.

A certification of level of service compliance shall be issued during development plan review.

CONSERVATION AND OPEN SPACE ELEMENT

Objective 1.5: Soils. The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

There are currently six (6) types of soils located onsite. According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required.

Site design addresses these soil composition limitations with properly-designed drainage and stormwater management facilities.

Objective 1.10: Wetlands. The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

The subject property does not contain onsite wetland features. A professional environmental scientist has reviewed the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

Re: Fletcher Trace – Phase 3

The following analysis estimates potential impacts on City of Alachua public facilities that may result from the proposed **Phase 3** development, **32 single-family detached dwelling units.** The following tables include data from the City of Alachua April 2024 Development Monitoring Report, as well as data obtained within the City Comprehensive Plan and Florida Administrative Code (F.A.C.).

Traffic

Trip generation: Figures are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition.

Table 1: Projected Trip Generation

Land Use[1] (ITE)	Units	Daily		AM Peak		PM Peak	
		Rate	Trips	Rate	Trips	Rate	Trips
Proposed							
Single-Family Detached Housing (ITE 210)	37	9.52	352	0.77	28	1.02	38

1. *Source: ITE Trip Generation 11th Edition*

Conclusion: Approval of this application increases the subject property's maximum development potential and thus, result in a potential net increase of daily vehicle trips generated by the site. However, approval of this application *will not* negatively impact the adopted LOS for adjacent and nearby roadways.

Affected roadways: Maximum development is estimated to generate less than 1,000 external average daily trips (ADT). LDR §2.4.14(H)(2)(a) identifies affected roadways as those located partially or wholly within one-half mile of the development's ingress/egress, or the nearest major intersection, whichever is greater. **Tables 2a and 2b** calculate projected impacts on adjacent roadways based on the proposed development.

Table 2a: Projected Impacts on Roadways, CR 235

Traffic System Category	AADT	PM
	CR 235	
	From NW 143rd Place to South City Limit	
Maximum Service Volume[1]	15,120	1,359
Existing Traffic[1]	6,180	587
Reserved Trips[1]	1,023	108
Available Capacity	7,917	664
Projected Trip Generation[2]	352	38
Available Capacity w/ Application approval	**7,565**	**626**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *NOTE: Projected trip distribution percentage is estimated to be **100%**.*

Table 2b: Projected Impacts on Roadways, CR 235A South

Traffic System Category	AADT	PM
	CR 235A South	
	From US 441 to CR 235	
Maximum Service Volume[1]	15,120	1,359
Existing Traffic[1]	5,302	504
Reserved Trips[1]	4,712	462
Available Capacity	5,106	393
Projected Trip Generation[2]	176	19
Available Capacity w/ Application Approval	**4,930**	**374**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *NOTE: Projected trip distribution percentage is estimated to be **50%**.*

Conclusion: The only affected roadways are CR 235, which the project site is directly fronting, and CR 235A South, which is estimated to receive 50% of the total projected ADT. The affected roadway segments will continue to retain sufficient roadway capacity during both ADT and PM Peak. In fact, no roadway segments will experience a failing roadway LOS because of this application's approval.

Potable Water / Sanitary Sewer / Solid Waste

The following tables evaluate potential impacts to potable water, sanitary sewer, and solid waste.

Table 3: Projected Potable Water Impacts

System Category	Gallons Per Day (GPD)
Current Permitted Capacity[1]	2,300,000
Less actual Potable Water Flows[1]	1,390,833
Reserved Capacity[1]	454,474
Residual Capacity[1]	454,693
Percentage of Permitted Design Capacity Utilized[1]	80.23%
Projected Potable Water Demand from Proposed Project[2]	10,175
Residual Capacity after Proposed Project	**444,518**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan & Chapter 64-E, F.A.C. Formula used: (# du x 275 gallons per unit per day)*

Conclusion: The project site will be served by existing City of Alachua potable water infrastructure. The potential net impacts from the intended residential development *will not* negatively impact the City's adopted LOS for potable water.

Table 4: Projected Sanitary Sewer Impacts

System Category	Gallons Per Day (GPD)
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less actual Treatment Plant Flows[1]	719,250
Reserved Capacity[1]	425,863
Residual Capacity[1]	354,887
Percentage of Permitted Design Capacity Utilized[1]	76.34%
Projected Sanitary Sewer Demand from Proposed Project[2]	9,250
Residual Capacity after Proposed Project	**345,637**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan & Chapter 64-E, F.A.C. Formula used: (# du x 250 gallons per unit per day)*

Conclusion: The project site will be served by existing City of Alachua wastewater infrastructure. The potential net impacts from the intended residential development *will not* negatively impact the City's adopted LOS for sanitary sewer.

Table 5: Projected Solid Waste Impacts

System Category	LBs Per Day	Tons Per Year
Existing Demand[1]	43,376.00	7,916.12
Reserved Capacity[1]	50,189.13	9,159.52
New River Solid Waste Facility Capacity[1]	50 years	
Solid Waste Generated By Proposed Project[2]		**70.23**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996. Formula used: (# du x 2.6 persons per du x 0.73 per capita)*

Conclusion: Solid waste facility capacity exists to adequately serve the intended residential development for the subject property. Thus, approval of this application will not negatively impact the City's adopted LOS for this system.

Public School and Recreation Impact

The City of Alachua requires all applications involving residential developments to include an estimated Public School Generation analysis. This is conducted by completing the City's Public School Student Generation Calculation Form. A completed copy of this form has been included within this application's submittal. The development's estimated impact on the City's Public School System is found in **Table 6**.

Table 6: Projected Public School Demand

Land Use (ITE)	Units	Elem.		Middle		High	
		Rate[1]	Total	Rate[1]	Total	Rate[1]	Total
Proposed							
Single-Family Residential	37	.12	4	.06	2	.09	3

1. *Source: City of Alachua School Concurrency Form*

Conclusion: Approval of this application *will not* negatively impact the Public School System.

Table 7a: Recreational Impacts

System Category	Acreage
Existing City of Alachua Acreage[1]	135.48
Acreage Required to Serve Existing Population[1]	54.22
Reserved Capacity[1]	12.17
Available Recreation Acerage[1]	69.09
Proposed Recreational Impact[2]	0.481
Residual Recreational Capacity After Proposed Development	**68.609**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: # du x 2.6 person per du x (5 acres/1,000 persons)*

Table 7b: Improved Passive Park Space Analysis

System Category	Acreage
Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	13.28
Existing Improved Passive Park Space Provided[1]	34.82
Improved Passive Park Space Utilized by Existing Population & Reserved Capacity[1]	**38.14%**
Proposed Recreational Impact[2]	0.096
Improved Passive Park Space Utilized After Proposed Development	**38.4%**

1. *Source: City of Alachua April 2024 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: # du x 2.6 person per du x (5 acres/1,000 persons) x 20%*

Conclusion: The City of Alachua currently possesses considerable excess acreage for local recreation activities. In addition, this subdivision will have recreational facilities onsite including, but not limited to, an amenity center and passive trails. Thus, the intended residential development is expected to have a minimal impact on the City's current recreational infrastructure.

BOUNDARY SURVEY

LOCATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA

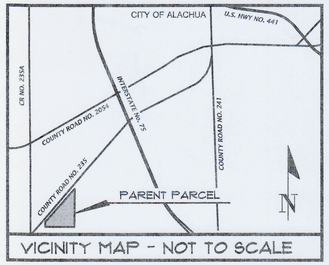
LEGAL DESCRIPTION: (PARENT PARCEL)(OFFICIAL RECORDS BOOK 2140, PAGE 1834)

A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT AN IRON PIPE AT THE SOUTHWEST CORNER OF THE AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST FOR THE POINT OF BEGINNING AND RUN N.00°42'43"E., ALONG THE WEST LINE OF SAID SECTION, A DISTANCE OF 402.89 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE RUN N.41°53'43"E., ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 4071.41 FEET TO A CONCRETE MONUMENT; THENCE RUN S.01°01'49"W., A DISTANCE OF 827.97 FEET TO A CONCRETE MONUMENT AT THE NORTHWEST CORNER OF THE SOUTHEAST 1/4 OF SAID SECTION 28; THENCE RUN S.00°32'41"W., ALONG THE WEST LINE OF SAID SOUTHEAST 1/4, A DISTANCE OF 2612.87 FEET TO AN IRON PIPE AT THE SOUTHEAST CORNER OF THE SOUTHWEST 1/4 OF SAID SECTION 28, THENCE RUN N.89°50'54"W., ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 2684.07 FEET TO THE POINT OF BEGINNING, CONTAINING 118.191 ACRES, MORE OR LESS.

SUBJECT TO MAINTAINED RIGHT OF WAY OF COUNTY ROAD N.W. 110TH AVENUE (FORMERLY KNOWN AS COUNTY ROAD NO. N.W 28) ALONG THE SOUTH BOUNDARY THEREOF

LEGAL DESCRIPTION: (SUBJECT PARCEL)(PREPARED BY THIS FIRM)



A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2192.97 FEET TO THE **POINT OF BEGINNING**; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE, NORTH 41°06'51" EAST, A DISTANCE OF 1878.44 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 827.97 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 00°14'12" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 282.21 FEET; THENCE, DEPARTING SAID WEST LINE, THE FOLLOWING NINE (9) COURSES; (1) SOUTH 64°41'49" WEST, A DISTANCE OF 69.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 185.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°50'21" WEST, 169.54 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 54°52'38", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°03'45" WEST, A DISTANCE OF 160.87 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°14'11" EAST, 35.36 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°00'00", AN ARC LENGTH OF 39.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 85.00 FEET; (6) SOUTH 89°45'49" WEST, A DISTANCE OF 420.66 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 235.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 65°26'20" WEST, 193.60 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°38'58", AN ARC LENGTH OF 199.54 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 311.05 FEET; (9) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO THE **POINT OF BEGINNING**.

SAID TRACT CONTAINING 17.66 ACRES OF LAND, MORE OR LESS.

SURVEYORS NOTES:

1. HORIZONTAL DATUM SHOWN HEREON IS DERIVED FROM THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983).
2. NO UNDERGROUND INSTALLATION OF UTILITIES OR IMPROVEMENTS HAVE BEEN LOCATED EXCEPT AS SHOWN. THE SURVEYOR MAKES NO GUARANTEE THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH HE DOES CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM INFORMATION AVAILABLE. THE SURVEYOR HAS NOT PHYSICALLY LOCATED THE UNDERGROUND UTILITIES.
3. THE SURVEYOR HAS NO KNOWLEDGE OF UNDERGROUND FOUNDATIONS WHICH MAY ENCROACH.
4. FENCING, SYMBOLS AND MONUMENTATION SHOWN HEREON MAY BE EXAGGERATED FOR PICTORIAL PURPOSES ONLY AND MAY NOT BE SHOWN TO SCALE.
5. THIS SURVEY WAS PRODUCED WITHOUT THE BENEFITS OF FURNISHED TITLE WORK. NO INSTRUMENTS OF RECORD REFLECTING EASEMENTS, RIGHTS-OF-WAY, AND OR OWNERSHIP WERE FURNISHED TO THE SURVEYOR, AND NO SEARCH OF THE PUBLIC RECORDS HAS BEEN DONE BY THE SURVEYOR.
6. THE 20' EASEMENT SHOWN HEREON IS AN APPROXIMATE LOCATION. THE LOCATION IS BASED ON A SURVEY DONE BY ACLS THAT THIS OFFICE HAS ON FILE. PROJECT NUMBER 97-362, DATED 9-25-1997.
7. INFORMATION FROM FEDERAL EMERGENCY MANAGEMENT AGENCY, (F.E.M.A.) FLOOD INSURANCE RATE MAP(S), SHOWN ON THIS MAP WAS CURRENT AS OF THE REFERENCED DATE. MAP REVISIONS AND AMENDMENTS ARE PERIODICALLY MADE BY LETTER AND MAY NOT BE REFLECTED ON THE MOST CURRENT MAP.
8. IN THE OPINION OF THIS SURVEYOR, THE PERIMETER LINES AS SHOWN HEREON REPRESENT THE LOCATION OF THE BOUNDARY LINES OF THE SUBJECT PARCEL IN RELATION TO THE DESCRIPTION OF RECORD AND THOSE EXISTING LAND CORNERS FOUND TO BE ACCEPTABLE BY THIS SURVEYOR.
9. THE MAINTAINED RIGHT OF WAY LINE FOR COUNTY ROAD NO. 28 (NW 110TH AVENUE) IS SHOWN HEREON AS AN APPROXIMATE LOCATION BASED ON A SURVEY DONE BY ACLS THAT THIS OFFICE HAS ON FILE. PROJECT NUMBER 97-362, DATED 9-25-1997. THERE IS NO RECORDED RIGHT OF WAY BY MAINTANCE PER ALACHUA COUNTY.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

RE: Project Assistance Team (PAT) Summary: Fletcher Trace Phases 1-3 Final Plats (PSP24-0007, PSP24-0008, and PSP24-0009)

Dear Mr Hickman:

On July 24, 2024, the City of Alachua received your revised applications for the Final Plats of Phase 1, 2 & 3 of the Fletcher Trace Subdivision. The Fletcher Trace PD project is comprised of 472 residential units (344 detached and 128 attached) in 13 phases and received Preliminary Plat approval from the City Commission on September 26, 2022. Phase 1 consists of 32 detached units; Phase 2 consists of 14 detached units and 28 attached; and, Phase 3 consists of 36 detached units.

The application has been reviewed by the City's Project Assistance Team (PAT). Upon review of the application and materials, the following insufficiencies must be addressed. A meeting to review these comments can be scheduled upon request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **12:00 PM** on **Tuesday, August 27, 2024**. A total of four (4) copies of the application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date.

Please address the following:

PHASE 1

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of

surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 1:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   c. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   a. The applicant must address all comments provided by the Public Services Department in a memo signed August 7, 2024 (attached).
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
2. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 2

3. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 2:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

4. *Article 7, Subdivision Standards*
   d. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
3. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

PHASE 3

1. *Surety and Subdividers Agreement*
   a. Provide separate cost estimate by project Engineer for sidewalks to be placed in front of lots.
   b. If planning to utilize the recent subdivision regulations amendment regarding provision of surety, please note that the City's subdividers agreement implementing this process is still in draft. Staff cannot provide a timeline on when it may be complete. Provision of surety in the amount of 120% of the value of improvements can still be provided in order to obtain a proposed draft subdividers agreement.

NEW COMMENT: **Please provide the following information for Phase 3:**

- **Certified engineer's cost estimate for public infrastructure (that is, infrastructure that will be turned over to the City)**
- **Certified engineer's cost estimate for private infrastructure (that is, infrastructure that will be maintained by the Developer/ Home Owner's Association)**
- **Certified engineer's cost estimate for sidewalks to be placed in front of lots.**

2. *Article 7, Subdivision Standards*
   e. Revise Declarations and Covenants to include statement that the City of Alachua does not provide liability insurance for any common areas or identify location within provided documents.

NEW COMMENT: Provide revised declarations and covenants.

6. *Public Services / Fire Rescue / Engineering Review Comments*
   b. The applicant must address all comments provided by Jared Rogers, PSM, of eda, inc. in a letter dated May 2, 2024 (attached).

NEW COMMENT: Applicant must address all comments provided by the City's Compliance and Risk Management Department provided below from Ms Corey King, Assistant Director:

1. **The dedication of the lift station to the public on the plat should be removed. The lift station will be transferred to the City via deed, thus the benefits and burdens of the City's ownership of the lift station will be contained within the terms of the deed.**
4. **The construction plans required sidewalks for access between the right-of-way on CR 235 and the sidewalks on the internal streets of the subdivision. The connecting sidewalks need to be shown on the final plat and a dedication of the sidewalks to the public needs to be included in the dedication on the plat. The sidewalks are shown on pages C1.10 and C1.12 of the construction plans.**

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

Adam Hall, AICP

Mr. Tabor,

Re: Fletcher Trace – Phase 1
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 1. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): There are Match Lines shown on Sheet 1 that are not shown on Sheet 2. (See redlined copy of Plat). In my opinion the northerly and westerly Match Lines should be eliminated.

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Tilte Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

There are offsite easements shown which are not dimensioned and have no recording Information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

DESCRIPTION

A TRACT OF LAND SITUATED IN IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 1437.97 FEET; THENCE, DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING ELEVEN (11) COURSES; (1) SOUTH 48°53'09" EAST, A DISTANCE OF 295.00 FEET; (2) SOUTH 41°06'51" WEST, A DISTANCE OF 160.00 FEET; (3) SOUTH 48°53'09" EAST, A DISTANCE OF 270.00 FEET; (4) SOUTH 41°06'51" WEST, A DISTANCE OF 519.84 FEET; (5) NORTH 48°53'09" WEST, A DISTANCE OF 270.00 FEET; (6) SOUTH 41°06'51" WEST, A DISTANCE OF 110.16 FEET; (7) SOUTH 60°08'30" WEST, A DISTANCE OF 52.89 FEET; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 110.00 FEET; (9) SOUTH 48°53'09" EAST, A DISTANCE OF 702.47 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE NORTHEAST, HAVING A RADIUS OF 335.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 51°07'03" EAST, 26.09 FEET; (10) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 04°27'46", AN ARC LENGTH OF 26.09 FEET TO THE END OF SAID CURVE; (11) THENCE DEPARTING SAID CURVE, SOUTH 36°39'04" WEST, A DISTANCE OF 123.18 FEET TO THE SOUTH LINE OF AFOREMENTIONED SECTION 28; THENCE SOUTH 89°22'44" WEST, ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 1005.72 FEET TO THE **POINT OF BEGINNING**.

PARCEL OF LAND CONTAINING 21.35 ACRES, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF SOUTH 89°22'44" WEST FOR THE SOUTH LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER I75T6, WITH A PUBLISHED ELEVATION OF 160.03 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1': 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT= 10'
   REAR = 5'
   SIDE = 5'
   STREET FACING GARAGES = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X". AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 640, COMMUNITY PANEL NO. "120669 0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 7.8.1 OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (8) AND (9) FLORIDA STATUTES.
8. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
9. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS ONE (1) THRU THIRTY-TWO (32).

Mr. Tabor,

Re: Fletcher Trace – Phase 2
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 2. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.081 (2) & 177.091 (12): The owner of the lands shown in the Owner's Certification and Dedication Is different from that in the Title Opinion by Kelley D. Jones, P.A.
If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase 1 is recorded prior to Phase 2).

Note: If Phase 1 is not recorded, Phase 2 will not have access to a Public Right of Way.

There are offsite easements shown which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Justin Tabor -AICP Principal Planner
City of Alachua
Alachua County, Florida

Mr. Tabor,

Re: Fletcher Trace – Phase 3
Surveying Review for Conformity to Chapter 177, Part I (Platting)

Thank you for the opportunity to review the subdivision plat Fletcher Trace – Phase 3. I have completed a review of the referenced subdivision plat for conformance to Chapter 177, Part I (Platting), Florida Statutes.

I find that this subdivision plat conforms to the above requirements, with the following exceptions:

177.091 (3): In my opinion the Southeasterly and Northwesterly Match lines are not necessary and should be eliminated. The Northeasterly Match Line on Sheet 2 is mislabeled. There is no Southwesterly Match Line shown on Sheet 2. The Southwesterly Match Line on Sheet 1 will need to be moved to the Northeast (See redlined Plat).

177.091 (7): An additional P.R.M. is required on the NW boundary on Sheet 2 (as shown on Sheet 1).

177.081 (2) & 177.091 (12): The owner of the lands appearing in the Owner's Certification and Dedication is different from that in the Title Opinion by Kelley D. Jones, P.A. If there is a new opinion or Title Commitment, I have not received it.

177.091 (15): Street names (when determined) are required.

177.091 (17): Identify contiguous properties along the southwesterly boundary by Subdivision name, Plat Book and page (Assuming Phase- 2 is recorded prior to Phase 3).
Note: If Phase 1 and 2 are not recorded, Phase 3 will not have access to a Public Right of Way.

177.091 (18): Lot 107 is not numbered on Sheet 2.

177.091 (29): Include 'P.B.' in the legend.
Label the size and identity of what I assume is a concrete monument at the northwest Corner of Lot 2 of Pilot Forest and include the symbol (what it is) in the Legend.

There are offsite easements which are not dimensioned and have no recording information.

Additional comments are upon the red-lined version of the subdivision plat included with this letter.

Please contact me at your convenience should you have any questions.

Sincerely,

Robert W. Graver, PSM

Gainesville, FL 32607

SUBJECT: Permit Number ERP-001-246933-1
Fletcher Trace Phases 1, 2, & 3

Dear Blake Fletcher:

Enclosed is your permit issued by the Suwannee River Water Management District on March 06, 2024. This permit is a legal document and should be kept with your other important documents. Permit issuance does not relieve you from the responsibility of obtaining any necessary permits from any federal, state, or local agencies for your project.

Noticing Your Permit:
For noticing instructions, please refer to the noticing materials in this package regarding closing the point of entry for someone to challenge the issuance of your permit. Please note that if a timely petition for administrative hearing is filed, your permit will become non-final and any activities that you choose to undertake pursuant to your permit will be at your own risk.

Compliance with Permit Conditions:
To submit your required permit compliance information, go to the District's website at https://permitting.sjrwmd.com/srepermitting/jsp/start.jsp. Click to sign-in to your existing account or to create a new account. Select the "Apply/Submit" tab, select "Submit Compliance Data", enter your permit number, and select "No Specific Date" for the Compliance Due Date Range. You will then be able to view all the compliance submittal requirements for your project. Select "the compliance item that you are ready to submit and then attach the appropriate information or form. The forms to comply with your permit conditions are available at floridaswater.com/permitting under the section "Handbooks, forms, fees, final orders". Click on forms to view all permit compliance forms, then scroll to the ERP application forms section and select the applicable compliance forms. Alternatively, if you have difficulty finding forms or need copies of the appropriate forms, please contact the Resource Management Division at (386) 362-1001.

Compliance with Other Permitting Programs:
This permit does not eliminate the necessity to obtain any required federal, state, local and special district authorizations prior to the start of any construction, alteration, operation, maintenance, removal or abandonment authorized by this permit.

The Suwannee River Water Management District did not issue a National Pollutant Discharge Elimination System (NPDES) permit for this project. If this project meets the thresholds such that a NPDES permit is required, you must apply to the Florida Department of Environmental Protection directly. More information about NPDES permits may be found online at https://floridadep.gov/water/stormwater. **Failure to obtain a NPDES permit prior to construction could subject you to enforcement action by that agency.**

For projects which involve wetlands or surface waters, the Suwannee River Water Management District did not issue a federal authorization for use or impacts to wetlands under federal jurisdiction, this project. Therefore, you must apply directly to the US Army Corps of Engineers (USACE). More information about USACE permitting may be found online at https://www.saj.usace.army.mil/. **Failure to obtain USACE authorization prior to construction could subject you to federal enforcement action by that agency.**

Transferring Your Permit:

Your permit requires you to notify the District in writing within 30 days of any change in ownership or control of the project or activity covered by the permit, or within 30 days of any change in ownership or control of the real property on which the permitted project or activity is located or occurs. You will need to provide the District with the information specified in rule 62-330.340, Florida Administrative Code (F.A.C.). Generally, this will require you to complete and submit Form 62-330.340(1), "Request to Transfer Permit".

Please note that a permittee is liable for compliance with the permit before the permit is transferred. The District, therefore, recommends that you request a permit transfer in advance in accordance with the applicable rules. You are encouraged to contact District staff for assistance with this process.

Thank you and please let us know if you have additional questions. For general questions contact us at (386) 362-1001.

Sincerely,

Tim Alexander
Deputy Executive Director

ERP Individual Permit

PERMITTEE:
Blake Fletcher
Fletcher Development, LLC
4510 NW 6th Place, 3rd Floor
Gainesville, FL 32607

PERMIT NUMBER: ERP-001-246933-1
DATE ISSUED: March 06, 2024
DATE EXPIRES: March 06, 2029
COUNTY: Alachua
TRS: S28 T8S R18E

PROJECT: Fletcher Trace Phases 1, 2, & 3

Upon completion, the approved entity to which operation and maintenance maybe transferred pursuant to rule 62-330.310 and 62-330.340 or 40B-4.1130, Florida Administrative Code (F.A.C) shall be:

Blake Fletcher
Fletcher Development, LLC
4510 NW 6th Place, 3rd Floor
Gainesville, FL 32607

Based on the information provided to the Suwannee River Water Management District (District), the subject proposed project has met the conditions of issuance as found in subsection 62-330.301, subsections 62-330.407 through 62-330.635, or subsection 40B-4.3030, F.A.C. The permit is hereby in effect for the activity description below:

This permit authorizes the construction of 10.5 acres of impervious area and the construction, operation, and maintenance of a stormwater management system to serve 33.3 acres of total impervious surfaces, of which 22.8 acres is future impervious area, on a total project area of 25.13 acres. The project shall be constructed in a manner consistent with the application package, plans, and calculations submitted and certified by Travis Hastay, P.E. of CHW on or before March 6, 2024.

As the permittee and/or operation and maintenance entity, it is your responsibility to ensure that adverse off-site impacts do not occur either during or after the construction. Any additional construction or alterations not authorized by this permit may result in flood control or water quality problems both on and off site and will be a violation of District rule.

You and any other substantially affected persons are entitled to request an administrative hearing or mediation. Please refer to the enclosed notice of rights.

1. All activities shall be implemented following the plans, specifications and performance criteria approved by this permit. Any deviations must be authorized in a permit modification in accordance with rule 62-330.315, F.A.C. Any deviations that are not so authorized may subject the permittee to enforcement action and revocation of the permit under chapter 373, F.S.

2. A complete copy of this permit shall be kept at the work site of the permitted activity during the construction phase, and shall be available for review at the work site upon request by the District staff. The permittee shall require the contractor to review the complete permit prior to beginning construction.

3. Activities shall be conducted in a manner that does not cause or contribute to violations of state water quality standards. Performance-based erosion and sediment control best management practices shall be installed immediately prior to, and be maintained during and after construction as needed, to prevent adverse impacts to the water resources and adjacent lands. Such practices shall be in accordance with the State of Florida Erosion and Sediment Control Designer and Reviewer Manual (Florida Department of Environmental Protection and Florida Department of Transportation June 2007), and the Florida Stormwater Erosion and Sedimentation Control Inspector's Manual (Florida Department of Environmental Protection, Nonpoint Source Management Section, Tallahassee, Florida, July 2008), which are both incorporated by reference in paragraph 62-330.050(9)(b)5., F.A.C., unless a project-specific erosion and sediment control plan is approved or other water quality control measures are required as part of the permit.

4. At least 48 hours prior to beginning the authorized activities, the permittee shall submit to the Agency a fully executed Form 62-330.350(1), "Construction Commencement Notice," (October 1, 2013), (http://www.flrules.org/Gateway/reference.asp?No=Ref-02505), incorporated by reference herein, indicating the expected start and completion dates. A copy of this form may be obtained from the Agency, as described in subsection 62-330.010(5), F.A.C., and shall be submitted electronically or by mail to the Agency. However, for activities involving more than one acre of construction that also require a NPDES stormwater construction general permit, submittal of the Notice of Intent to Use Generic Permit for Stormwater Discharge from Large and Small Construction Activities, DEP Form 62-621.300(4)(b), shall also serve as notice of commencement of construction under this chapter and, in such a case, submittal of Form 62-330.350(1) is not required.

5. Unless the permit is transferred under rule 62-330.340, F.A.C., or transferred to an operating entity under rule 62-330.310, F.A.C., the permittee is liable to comply with the plans, terms and conditions of the permit for the life of the project or activity.

6. Within 30 days after completing construction of the entire project, or any independent portion of the project, the permittee shall provide the following to the Agency, as applicable:

    a. For an individual, private single-family residential dwelling unit, duplex, triplex, or quadruplex — “Construction Completion and Inspection Certification for Activities Associated With a Private Single-Family Dwelling Unit” [Form 62-330.310(3)]; or

    b. For all other activities — “As-Built Certification and Request for Conversion to Operational Phase” [Form 62-330.310(1)].

    c. If available, an Agency website that fulfills this certification requirement may be used in lieu of the form.

7. If the final operation and maintenance entity is a third party:

    a. Prior to sales of any lot or unit served by the activity and within one year of permit issuance, or within 30 days of as-built certification, whichever comes first, the permittee shall submit, as applicable, a copy of the operation and maintenance documents (see sections 12.3 thru 12.3.3 of Volume I) as filed with the Department of State, Division of Corporations and a copy of any easement, plat, or deed restriction needed to operate or maintain the project, as recorded with the Clerk of the Court in the County in which the activity is located.

    b. Within 30 days of submittal of the as- built certification, the permittee shall submit “Request for Transfer of Environmental Resource Permit to the Perpetual Operation Entity” [Form 62-330.310(2)] to transfer the permit to the operation and maintenance entity, along with the documentation requested in the form. If available, an Agency website that fulfills this transfer requirement may be used in lieu of the form.

8. The permittee shall notify the District in writing of changes required by any other regulatory District that require changes to the permitted activity, and any required modification of this permit must be obtained prior to implementing the changes.

9. This permit does not:

    a. Convey to the permittee any property rights or privileges, or any other rights or privileges other than those specified herein or in chapter 62-330, F.A.C.;

    b. Convey to the permittee or create in the permittee any interest in real property;

    c. Relieve the permittee from the need to obtain and comply with any other required federal, state, and local authorization, law, rule, or ordinance; or

    d. Authorize any entrance upon or work on property that is not owned, held in easement, or controlled by the permittee.

10. Prior to conducting any activities on state-owned submerged lands or other lands of the state, title to which is vested in the Board of Trustees of the Internal Improvement Trust Fund, the permittee must receive all necessary approvals and authorizations under chapters 253 and 258, F.S. Written authorization that requires formal execution by the

Board of Trustees of the Internal Improvement Trust Fund shall not be considered received until it has been fully executed.

11. The permittee shall hold and save the District harmless from any and all damages, claims, or liabilities that may arise by reason of the construction, alteration, operation, maintenance, removal, abandonment or use of any project authorized by the permit.

12. The permittee shall notify the District in writing:

    a. Immediately if any previously submitted information is discovered to be inaccurate; and

    b. Within 30 days of any conveyance or division of ownership or control of the property or the system, other than conveyance via a long-term lease, and the new owner shall request transfer of the permit in accordance with rule 62-330.340, F.A.C. This does not apply to the sale of lots or units in residential or commercial subdivisions or condominiums where the stormwater management system has been completed and converted to the operation phase.

13. Upon reasonable notice to the permittee, District staff with proper identification shall have permission to enter, inspect, sample and test the project or activities to ensure conformity with the plans and specifications authorized in the permit.

14. If prehistoric or historic artifacts, such as pottery or ceramics, projectile points, stone tools, dugout canoes, metal implements, historic building materials, or any other physical remains that could be associated with Native American, early European, or American settlement are encountered at any time within the project site area, the permitted project shall cease all activities involving subsurface disturbance in the vicinity of the discovery. The permittee or other designee shall contact the Florida Department of State, Division of Historical Resources, Compliance Review Section (DHR), at (850)245-6333, as well as the appropriate permitting agency office. Project activities shall not resume without verbal or written authorization from the Division of Historical Resources. If unmarked human remains are encountered, all work shall stop immediately and the proper authorities notified in accordance with section 872.05, F.S. For project activities subject to prior consultation with the DHR and as an alternative to the above requirements, the permittee may follow procedures for unanticipated discoveries as set forth within a cultural resources assessment survey determined complete and sufficient by DHR and included as a specific permit condition herein.

15. Any delineation of the extent of a wetland or other surface water submitted as part of the permit application, including plans or other supporting documentation, shall not be considered binding unless a specific condition of this permit or a formal determination under rule 62-330.201, F.A.C., provides otherwise.

16. The permittee shall provide routine maintenance of all components of the stormwater management system to remove trapped sediments and debris. Removed materials shall be disposed of in a landfill or other uplands in a manner that does not require a permit under chapter 62-330, F.A.C., or cause violations of state water quality standards.

17. This permit is issued based on the applicant's submitted information that reasonably demonstrates that adverse water resource-related impacts will not be caused by the completed permit activity. If any adverse impacts result, the District will require the

permittee to eliminate the cause, obtain any necessary permit modification, and take any necessary corrective actions to resolve the adverse impacts.

18. A Recorded Notice of Environmental Resource Permit may be recorded in the county public records in accordance with section 62-330.090(7), F.A.C. Such notice is not an encumbrance upon the property.

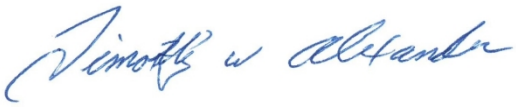
19. This permit does not authorize the permittee to cause any adverse impact to or “take” of state listed species and other regulated species of fish and wildlife. Compliance with state laws regulating the take of fish and wildlife is the responsibility of the owner or applicant associated with this project. Please refer to Chapter 68A-27 of the Florida Administrative Code for definitions of “take” and a list of fish and wildlife species. If listed species are observed onsite, FWC staff are available to provide decision support information or assist in obtaining the appropriate FWC permits. Most marine endangered and threatened species are statutorily protected and a “take” permit cannot be issued. Requests for further information or review can be sent to FWCConservationPlanningServices@MyFWC.com.

20. Operation and maintenance of the stormwater management system shall be the responsibility of the permittee until such time as those responsibilities are transferred to the approved association. Prior to the association assuming operation and maintenance responsibilities, permittee shall request transfer to operation and maintenance entity.

21. Prior to a dedication or transfer of all or any part of the common properties which is directly or indirectly related to the stormwater management system, the dedication or approval of the transfer must be authorized by the District through modification of any and all permits or authorizations issued by the District. Such modifications shall be made under the lawfully adopted rules of the District in effect at the time of application for modification.

22. The Permittee shall submit documentation demonstrating that the Articles of Incorporation have been filed with the Secretary of State, and that the corporation is in good standing, to the District prior to any request to transfer this permit to the HOA.

23. The Permittee shall submit documentation demonstrating that all stormwater management systems are located on common areas, and that the common areas are owned or controlled by the HOA, to the District prior to any request to transfer this permit to the HOA.



24. Prior to the sale of any lot or parcel, the permittee must record Declarations of Covenants and Restrictions that include a restriction on the real property pursuant to section 704.06, F.S.; prohibiting all construction including clearing, dredging, or filling, except that which is specifically authorized by Environmental Resource permit, within the conservation areas delineated on the final plans and/or mitigation proposal approved by the District.

25. Prior to the Permittee seeking to transfer the operation and maintenance to a Homeowner's Association, the Permittee must demonstrate to the reasonable satisfaction of the Suwannee River Water Management District that over twenty-four (24) consecutive months have passed since the active operation of the Homeowner's Association commenced and the Permittee shall demonstrate to the Suwannee River Water Management District's satisfaction that the Homeowner's Association is an active,

ongoing concern which the Permittee shall establish by submitting copies of all minutes of meetings of members of the Association, the board of directors, copies of all operation and maintenance expenses incurred and documentation showing that all assessments that were levied have been collected and such other documentation as the Suwannee River Water Management District may reasonably deem necessary to establish that the Homeowner's Association is an active, functioning and ongoing concern.

WITHIN 30 DAYS AFTER COMPLETION OF THE PROJECT, THE PERMITTEE SHALL NOTIFY THE DISTRICT, IN WRITING, THAT THE FACILITIES ARE COMPLETE.

Deputy Executive Director

NOTICE OF RIGHTS

1. A person whose substantial interests are or may be determined has the right to request an administrative hearing by filing a written petition with the Suwannee River Water Management District (District), or may choose to pursue mediation as an alternative remedy under Section 120.569 and 120.573, Florida Statutes, (F.S.), before the deadline for filing a petition. Choosing mediation will not adversely affect the right to a hearing if mediation does not result in a settlement. The procedures for pursuing mediation are set forth in Sections 120.569 and 120.57 F.S. Pursuant to Rule 28-106.111, Florida Administrative Code, (F.A.C.), the petition must be filed at the office of the District Clerk at District Headquarters, 9225 C.R. 49, Live Oak, Florida 32060 within twenty-one (21) days of receipt of written notice of the decision or within twenty-one (21) days of newspaper publication of the notice of District decision (for those persons to whom the District does not mail actual notice). A petition must comply with Chapter 28-106, F.A.C.

2. If the Governing Board takes action which substantially differs from the notice of District decision to grant or deny the pe1mit application, a person whose substantial interests are or may be determined has the right to request an administrative hearing or may choose to pursue mediation as an alternative remedy as described above. Pursuant to Rule 28-106.111, F.A.C., the petition must be filed at the office of the District Clerk at District Headquarters, 9225 C.R. 49, Live Oak, Florida 32060 within twenty-one (21) days of receipt of written notice of the decision or within twenty-one (21) days of newspaper publication of the notice of District decision (for those persons to whom the District does not mail actual notice). Such a petition must comply with Chapter 28-106, F.A.C.

3. A substantially interested person has the right to a formal administrative hearing pursuant to Section 120.569 and 120.57(1), F.S., where there is a dispute between the District and the party regarding an issue of material fact. A petition for formal hearing must comply with the requirements set forth in Rule 28-106.201, F.A.C.

4. A substantially interested person has the right to an informal hearing pursuant to Section 120.569 and 120.57(2), F.S., where no material facts are in dispute. A petition for an informal hearing must comply with the requirements set forth in Rule 28-106.301, F.A.C.

5. A petition for an administrative hearing is deemed filed upon receipt of the petition by the Office of the District Clerk at the District Headquarters in Live Oak, Florida.

6. Failure to file a petition for an administrative hearing within the requisite time frame shall constitute a waiver of the right to an administrative hearing pursuant to Rule 28-106.111, F.A.C.

7. The right to an administrative hearing and the relevant procedures to be followed is governed by Chapter 120, Florida Statutes, and Chapter 28-106, F.A.C.

8. Pursuant to Section 120.68, F.S., a person who is adversely affected by final District action may seek review of the action in the District Court of Appeal by filing a notice of

appeal pursuant to the Florida Rules of Appellate Procedure, within 30 days of the rendering of the final District action.

9. A party to the proceeding before the District who claims that a District order is inconsistent with the provisions and purposes of Chapter 3 73, F. S., may seek review of the order pursuant to Section 373.114, F.S., by the Florida Land and Water Adjudicatory Commission, by filing a request for review with the Commission and serving a copy of the Department of Environmental Protection and any person named in the order within 20 days of adoption of a rule or the rendering of the District order.

10. For appeals to the District Courts of Appeal, a District action is considered rendered after it is signed on behalf of the District, and is filed by the District Clerk.

11. Failure to observe the relevant time frames for filing a petition for judicial review, or for Commission review, will result in waiver of the right to review.

NOTICING INFORMATION
Dear Permittee:

Please be advised that the Suwannee River Water Management District (District) has not published a notice in the newspaper advising the public that it has issued a permit for this project.

Newspaper publication, using the District's form, notifies members of the public of their right to challenge the issuance of the permit. If proper notice is given by newspaper publication, then there is a 21-day time limit to file a petition challenging the issuance of the permit.

To close the point of entry for filing a petition, you may publish (at your own expense) a onetime notice of the District's decision in a newspaper of general circulation within the affected area as defined in Section 50.011 of the Florida Statutes. If you do not publish a newspaper notice, the time to challenge the issuance of your permit will not expire.

A copy of the notice and a partial list of newspapers of general circulation are attached for your convenience. However, you are not limited to those listed newspapers. If you choose to close the point of entry and the notice is published, the newspaper will return to you an affidavit as proof of publication. In accordance with 40B-1.1010(4), F.A.C., a copy of the affidavit shall be provided to the District within 14 days of publication. A scanned copy of the affidavit may be forwarded to Tilda Musgrove by email at *tjm@srwmd.org* (preferred method) or send the original affidavit of publication to:

Tilda Musgrove
Resource Management
9225 CR 49
Live Oak, FL 32060

If you have any questions, please contact me at 386.362.1001.
Sincerely,

Tilda Musgrove

Tilda Musgrove
Business Resource Specialist
Resource Management

NOTICE OF AGENCY ACTION TAKEN BY THE
SUWANNEE RIVER WATER MANAGEMENT DISTRICT

Notice is given that the following permit was issued on _____:
(Name and address of applicant)_____
permit#_____. The project is located in _____County, Section _____, Township _____ South, Range _____ East. The permit authorizes a surface water management system on _____ acres for _____ known as _____. The receiving water body is _____.
A person whose substantial interests are or may be affected has the right to request an administrative hearing by filing a written petition with the Suwannee River Water Management District (District). Pursuant to Chapter 28-106 and Rule 40BB-1.1010, Florida Administrative Code (F.A.C.), the petition must be filed (received) either by delivery at the office of the Resource Management Business Resource Specialist at District Headquarters, 9225 CR 49, Live Oak FL 32060 or by e-mail to tjm@srwmd.org, within twenty-one (21) days of newspaper publication of the notice of intended District decision (for those persons to whom the District does not mail or email actual notice). A petition must comply with Sections 120.54(5)(b)4. and 120.569(2)(c), Florida Statutes (F.S.), and Chapter 28106, F.A.C. The District will not accept a petition sent by facsimile (fax). Mediation pursuant to Section 120.573, F.S., is not available.

A petition for an administrative hearing is deemed filed upon receipt of the complete petition by the District Clerk at the District Headquarters in Live Oak, FL during the District's regular business hours. The District's regular business hours are 8 a.m. – 5 p.m., excluding weekends and District holidays. Petitions received by the District Clerk after the District's regular business hours shall be deemed filed as of 8 a.m. on the next regular District business day.

The right to an administrative hearing and the relevant procedures to be followed are governed by Chapter 120, Florida Statutes, Chapter 28-106, Florida Administrative Code, and Rule 40B-1.1010, Florida Administrative Code. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means the District's final action may be different from the position taken by it in this notice. **Failure to file a petition for an administrative hearing within the requisite time frame shall constitute a waiver of the right to an administrative hearing. (Rule 28-106.111, F.A.C.).**

If you wish to do so, you may request the Notice of Rights for this permit by contacting the Business Resource Specialist in the Division of Resource Management (RM), 9225 CR 49, Live Oak, FL 32060, or by phone at 386.362.1001.

1.0 INTRODUCTION

Flatwoods Consulting Group Inc. (Flatwoods) was retained by Fletcher Family Companies (Client) to conduct a wetland delineation and listed species survey for the approximately 116.95-acre Fletcher Trace Subdivision Project (Aerial Map). The project site is located east of the NW County Road 235th and NW 173rd Street intersection in Alachua, Florida (Location Map). According to the Alachua County Property Appraiser, the project site is located on Parcel ID No. 03980-002-001, in Section 28, Township 8 South, and Range 16 East (Quad Map).

2.0 METHODOLOGY

The following sections describe the methods used by Flatwoods to determine the wetland limits and the potential presence and relative abundance of listed wildlife and plants within the project site.

2.1 Preliminary Review

Information on the potential presence of listed species was collected through literature and data review. Flatwoods reviewed information from the U.S. Fish and Wildlife Service (FWS), the Florida Fish and Wildlife Conservation Commission (FWC), the Florida Natural Areas Inventory (FNAI), the Suwannee River Water Management District (SRWMD), and the Florida Department of Environmental Protection (FDEP) Geographic Information System (GIS) databases regarding the occurrence of listed species and protected habitats.

To further identify which federally and state listed plant and animal species have the potential to occur within the site, upland and wetland vegetative communities were assessed to determine their plant species composition, approximate boundaries, and general condition and quality. To establish the approximate locations and boundaries of existing upland and wetland communities within the site, available site-specific data was collected and reviewed using the following resources and methods (see References for complete source information):

- Infrared and true color aerial imagery of the project area
- U.S. Department of Agriculture (USDA)/Natural Resource Conservation Service (NRCS) Soil Survey of Alachua County, Florida
- Florida U.S. Geological Survey (USGS) Topographic Quadrangle maps
- FWS Critical Habitat Portal
- FNAI Biodiversity Matrix
- Florida Department of Transportation (FDOT) Florida Land Use, Cover, and Forms Classification System (FLUCFCS)
- SRWMD Land Use Mapping
- Alachua County Interactive Map

2.2 Survey Methods

2.2.1 Wetland Delineation

Wetlands and surface waters are delineated in accordance with The Florida Wetlands Delineation Manual (Chapter 62-340, Florida Administrative Code [F.A.C.]) and the U.S. Army Corps of Engineers (USACE) 1987 Wetlands Delineation Manual, 2010 Supplement, suitable for submittal to the SRWMD, the FDEP, and Alachua County. These delineation methods are based on the identification of specific hydrologic characteristics, including the presence of hydric soils and hydric soil conditions (periodic, continuous, or saturated), a dominance of hydrophytic vegetation, and other indicators of hydrologic conditions (e.g., evidence of frequent inundation, moss collars, and the presence of muck soils). If any wetlands or surface waters were found, the landward extent of each wetland and surface water was flagged in the field. Each flag location was recorded using a sub-meter Global Positioning System (GPS). If any wetlands or surface waters are present, they are shown on the Ecological Survey Map.

2.2.2 Standard Listed Species Survey

Flatwoods conducted a listed species survey within the site in accordance with the FWC Florida Wildlife Conservation Guide. The purpose of the listed species survey was to identify presence and relative abundance of species considered Endangered, Threatened, or of Special Concern by the FWS under 50 CFR 11-12 and the FWC under Chapter 68A-27, F.A.C. Pedestrian transect surveys for listed species were conducted on the site. During these surveys, all habitats within the site were canvassed for listed species. Any observations of listed species, or of physical features that may indicate the presence of these species (tracks, scat, nests, burrows, nest cavities in trees, etc.), are shown on the Ecological Survey Map.

2.2.3 Listed Plant Survey

Flatwoods conducted a survey in all suitable habitats within the site for plant species listed by the FWS as Threatened or Endangered. If found, any observations of listed plant species were recorded using a sub-meter GPS and shown on the Ecological Survey Map.

2.2.4 15 Percent Gopher Tortoise Survey

Flatwoods conducted a 15 percent survey to estimate the density of gopher tortoise (*Gopherus polyphemus*) burrows for the site. The tortoise survey was conducted in accordance with the FWC methods as outlined in the Gopher Tortoise Permitting Guidelines April 2008 (revised July 2020). An Authorized Gopher Tortoise Agent supervised the gopher tortoise survey. Any potentially occupied burrows were flagged in the field and recorded using a sub-meter GPS. If found, any burrow locations are shown on the Ecological Survey Map.

3.0 RESULTS

Site information collected during the desktop and field review is summarized below. The field review was performed on June 7, 2022, and representative photographs of current site conditions are included in the Photo Document attached as Appendix A. The locations of the photo stations are depicted in the Photo Station Map.

3.1 Soil Descriptions

Based on the USDA/NRCS Soil Survey for Alachua County (1985), six soil types were mapped (Soil Map). According to the *Hydric Soils of Florida Handbook*, no hydric soils exist on the site.

Arredondo Fine Sand, 0 to 5 percent Slopes (3) is a near level to gently sloping, well-drained soil found in uplands. The water table is at a depth of more than 72 inches.

Millhopper Fine Sand, 0 to 5 percent Slopes (8) is a near level to gently sloping, moderately drained soil found in uplands. Most years, the water table is at a depth of 40 to 60 inches for one to four months and at a depth of 60 to 72 inches for two to four months.

Kendrick Sand, 2 to 5 percent Slopes (30) is a near level to gently sloping, well-drained soil found in rolling uplands. The water table is at a depth of more than 72 inches.

Gainesville Sand, 0 to 5 percent Slopes (35) is a near level to gently sloping, well-drained soil found in rolling uplands. The water table is at a depth of more than 72 inches.

Arredondo Fine Sand, 5 to 8 percent Slopes (69) is sloping, well-drained soil found in uplands. The water table is at a depth of more than 72 inches.

Lochloosa Fine Sand, 5 to 8 percent Slopes (72) is sloping, somewhat poorly drained soil found in uplands. Most years, the water table is at a depth of 30 to 40 inches for one to three months.

3.2 Existing Land Use Communities

Existing land use within the site was determined using a combination of the FLUCFCS descriptions, SRWMD land use mapping, and field reconnaissance (Land Use Map). The FLUCFCS represents current habitat conditions on the property.

Upland Land Use Communities

Row Crops (FLUCFCS 214)

The vast majority of this property consists of inactive row crops. This area is mostly bare soil; vegetation is sparse but consists of a few remaining corn crops (*Zea* sp.), various grasses (*Paspalum* spp., *Panicum* spp., *Digitaria* spp., *Dichanthelium* spp., *Andropogon* spp., *Cynodon* spp.), purple passionflower (*Passiflora incarnata*), and other weedy vegetation such as dog

fennel (*Eupatorium capillifolium*), amaranth (*Amaranthus* sp.), and rattlebox (*Crotalaria* sp.). Several small pockets of live oak (*Quercus virginiana*) and laurel oak (*Quercus laurifolia*) exist throughout the crop area and contain Virginia creeper (*Parthenocissus quinquefolia*), greenbriar (*Smilax* spp.), yellow jessamine (*Gelsemium sempervirens*), muscadine (*Vitis rotundifolia*), and various grasses and weeds.

Upland Hardwood Forests (FLUCFCS 420)

A small portion in the northeast section of the property, along with much of the boundary around the row crops, is most consistent with the Upland Hardwood Forests land use. The canopy consists of live oak, laurel oak, water oak (*Quercus nigra*), black cherry (*Prunus serotina*), sugarberry (*Celtis laevigata*), sweetgum (*Liquidambar styraciflua*), red maple (*Acer rubrum*), and eastern red cedar (*Juniperus virginiana*). Because of a dense canopy, groundcover was sparse but consists of Virginia creeper, greenbriar, yellow jessamine, muscadine, and grasses and weeds along the edge of the forests similar to the adjacent row crops.

Coniferous Plantations (FLUCFCS 441)

A small portion in the southwestern corner of the property consisted of a pine plantation, which has recently been harvested. This area was dominated by slash pine (*Pinus elliottii*) and also consisted of eastern red cedar, live and laurel oaks, vines, and is also mostly void of any groundcover vegetation.

3.3 Wetland Delineation Results

No wetlands or surface waters were found within the project area (Ecological Survey Map).

3.4 Listed Species Survey Results

One listed species, the gopher tortoise, was observed during the listed species survey performed on June 7, 2022 (Ecological Survey Map). In addition, Flatwoods conducted a desktop review of possible nearby wildlife species. Flatwoods reviewed the FWC Eagle Nest Locator (2016-2017 Survey) and the Audubon Florida EagleWatch Public Nest Application (2020-2021 Survey) for any known bald eagle (*Haliaeetus leucocephalus*) nests, the 1999 FWC Wading Bird Colony Database, and the FWS Wood Stork (*Mycteria americana*) Consultation Area. No bald eagle nests are located within one mile of the site. The site is not located within any wood stork Core Foraging Areas (CFAs). No wading bird colonies are present within a mile of the site (FNAI/FWC Map).

Based on the project's available habitats and location, other listed species (animals and plants) have the potential to occur. Table 1, found following this section, describes the potentially occurring species' habitat preferences, preferred survey window (breeding season or flowering time), their likelihood of occurrence, and their federal and state listing status.

3.4.1 Southeastern American Kestrel

The southeastern American kestrel (*Falco sparverius paulus*) is listed as Threatened by the FWC and not listed by the FWS. It is a resident subspecies of the American kestrel (*Falco sparverius*) and kestrels observed in Florida during the breeding season (April-August) are assumed to be resident southeastern American kestrels. They are found in upland habitats, including sandhills, flatwoods, pastures, sand pine scrub, and prairies. As cavity nesters and sit-and-wait predators, they require suitable cavity trees and perches in their territories, as well as open ground cover to see and capture their prey. Typical prey items include insects, lizards, small rodents, and small birds. It should be noted that the field review was performed during the survey season defined as April 1 – August 31. No kestrels or kestrel cavities were observed during the survey; however, suitable nesting habitat is available, and approvals from FWC may be required if kestrels are found.

3.4.2 Gopher Tortoise

The gopher tortoise is listed as Threatened by the FWC and is a candidate for listing by the FWS. Gopher tortoises are terrestrial turtles averaging nine to 11 inches in length. They are typically found in sandhill, pine flatwoods, scrub, dry prairie, coastal dunes, and other well-drained, open habitats. Gopher tortoises dig half-moon-shaped burrows that average 15 feet long and seven feet deep.

Flatwoods located five gopher tortoise burrows during the 15 percent survey (15% Gopher Tortoise Survey Map). According to the FWC Gopher Tortoise Permitting Guidelines April 2008 (revised July 2020) calculations for a 15 percent survey indicate 33 burrows (17 tortoises) are estimated for the site. Following the site review, Flatwoods is confident that no more than 10 burrows exist onsite and that a 10 or Fewer Burrows relocation permit will be required from the FWC if ground disturbance will occur within 25 feet of tortoise the burrow during construction activities. All of the burrows are located exist along the edge of row crop/forest boundaries. A 100 percent gopher tortoise survey will be required before relocation activities take place. If more than 10 burrows are found during the 100 percent survey, a Conservation Permit from the FWC will be required. No approval from the FWS regarding gopher tortoises is required.

3.4.3 Eastern Indigo Snake

The eastern indigo snake (*Drymarchon corais couperi*) is listed as Threatened by the FWC and the FWS. The indigo snake is a large, black, non-venomous snake. They are thick-bodied and muscular, with a glossy black body that in the sunlight appears iridescent blue. The chin and throat are reddish or white, and this color may extend down the body ventrally. The belly is cloudy orange to blue-gray. They are found within scrub, sandhill, and scrubby flatwoods habitats where they occur in or near gopher tortoise burrows. Flatwoods personnel did not observe any eastern indigo snakes during the survey. There is a Programmatic Effect Determination Key for the FWS. The FWS routinely concurs with a not likely to adversely affect determination for individual project effects to the eastern indigo snake when assurances are given that the Standard Protection

Measures for the Eastern Indigo Snake (FWS 2004) will be used during project site preparation and project construction.

3.4.4 Florida Pine Snake

The Florida pine snake (*Pituophis melanoleucus mugitus*) is listed as Threatened by the FWC and not listed by the FWS. The Florida pine snake is a large, stocky, tan or rusty colored snake with an indistinct pattern of large blotches on a lighter background. They have a muscular body, with keeled scales with a relatively small head, somewhat pointed snout, and four prefrontal scales. These snakes may hiss loudly and vibrate their tail when encountered. They are found in sandhill and former sandhill, including old fields and pastures, but also sand pine scrub and scrubby flatwoods with open canopies and dry sandy soils. They often coexist with pocket gophers and gopher tortoises. No Florida pine snakes were observed. No approvals from FWC are anticipated, and as a commensal to the gopher tortoise, any pine snakes found during potential future relocation efforts would be handled according to the relocation permit.

3.4.5 Listed Plants

No listed plants were observed by Flatwoods personnel during the surveys. Because the project area lacks the preferred habitat types, none of the listed plants are likely to occur.

Table 1 Protected Plants and Animals Potentially Occurring on the Fletcher Trace Subdivision Project in Alachua County, Florida

Species	Habitat of Occurrence	Preferred Survey Window[1]	Likelihood of Occurrence	Status[2]	
				Federal[3]	State[4]
BIRDS					
Antigone canadensis pratensis Florida sandhill crane	Open wetland habitats surrounded by shrubs or trees. Commonly found foraging in irrigated croplands, pastures, grasslands, or wetlands.	S – Year round B – January-June	Low: Little suitable habitat present	---	T
Aphelocoma coerulescens Florida scrub-jay	Inhabits fire dominated, low-growing, oak scrub habitat found on well-drained sandy soils. May persist in areas with sparser oaks or scrub areas that are overgrown.	S – March-October B – March-July	Low: Lack of suitable habitat present	T	FT
Athene cunicularia floridana Florida burrowing owl	Open prairies with little understory vegetation, including pastures, agriculture fields, and vacant lots.	S – Year round B – February-July	Low: Lack of suitable habitat present	---	T
Egretta caerulea Little blue heron	Shallow freshwater, brackish water, and saltwater habitats.	S - Year round B - March-July	Low: Lack of suitable habitat present	---	T
Egretta tricolor Tricolored heron	Forages in a variety of permanently and seasonally flooded wetlands, ditches, edges of ponds, and lakes. Inland nesting colonies typically found in Carolina willow dominated wetlands.	S - Year round B - March-July	Low: Lack of suitable habitat present	---	T
Falco sparverius paulus Southeastern American kestrel	Found in open pine habitats, woodland edges, dry prairies, pastures, and roadsides.	S – April-August B – April-August	Moderate: Suitable habitat present	---	T
Haliaeetus leucocephalus Bald eagle	Areas close to the coast, bays, rivers, lakes, or other bodies of water. Typically nests in live mature pines and cypress trees.	S – Year round B – October-May	Low: Lack of suitable habitat present	---[5]	---[5]
Mycteria americana Wood stork	Forages in shallow water in freshwater marshes, swamps, lagoons, ponds, tidal creeks, flooded pastures, and ditches. Nests in colonies in cypress swamps.	S – Year round B – March-August	Low: Lack of suitable habitat present	T	FT

Species	Habitat of Occurrence	Preferred Survey Window[1]	Likelihood of Occurrence	Status[2]	
				Federal[3]	State[4]
REPTILES					
Drymarchon corais couperi Eastern indigo snake	Broad range of habitats from scrub and sandhill to wet prairies, forested wetlands, and mangrove swamps. Often seeks refuge in gopher tortoise burrows in sandy uplands, but also forages in mesic and hydric habitats.	S – Year round B – November-April	Moderate: Some suitable habitat present	T	FT
Gopherus polyphemus Gopher tortoise	Found in dry upland habitats, including sandhills, scrub, xeric oak hammock, and dry prairie flatwoods; also, commonly uses disturbed habitats such as pastures, old fields, abandoned citrus groves, and road shoulders.	S – Year round B – March-October	High: Gopher tortoise burrows observed	---	T
Pituophis melanoleucus mugitus Florida pine snake	Found in sandhill and former sandhill, including old fields and pastures, but also sand pine scrub and scrubby flatwoods with open canopies and dry sandy soils. Often coexists with pocket gophers and gopher tortoises.	S - Year round B - April-February	Moderate: Some suitable habitat present	---	T
PLANTS					
Pecluma plumula Plume polypody	Wet hammocks and swamps; epiphytic on live oaks, occasionally on rocks or terrestrial.	S – Spring-Fall	Low: Some suitable habitat present		E

1 - S = Survey Window, B = Breeding Season, F = Flowering Season
2 - E = Endangered, T = Threatened, FE = Federally Endangered, FT = Federally Threatened, S/A = Similarity of Appearance
3 - U.S. Fish and Wildlife Service
4 - Florida Fish and Wildlife Conservation Commission or Florida Department of Agriculture and Consumer Services
5 - Protected under the Bald and Golden Eagle Protection Act
Table Source: Florida Wildlife Conservation Guide, Florida's Breeding Bird Atlas, FWS iPAC, and Florida Natural Areas Inventory

4.0 PROTECTED HABITATS AND WATERS

The site was evaluated for the potential occurrence of Critical Habitat as defined by the Endangered Species Act of 1973, as amended. The FWS regulates the adverse modification of the biological or physical constituent elements essential to the conservation of the listed species within Critical Habitat. There are no lands designated as Critical Habitat within or adjacent to the site. The site was evaluated for the potential occurrence of Protected Waters and Protected Lands. There are no Protected Waters or Protected Lands within or immediately adjacent to the site.

5.0 FDEP SUBSIDENCE INCIDENT REPORTS

Flatwoods searched the FDEP Map Direct Subsidence Incident Reports database. The subsidence mapping system identifies reported subsidence events and the Florida sinkhole type of the selected area. No subsidence incident reports have been recorded within or adjacent to the project site according to the FDEP mapping system (Subsidence Map). According to FDEP, the majority of the project site in is Area III, described as consisting "mainly of cohesive clayey sediments of low permeability. Sinkholes are most numerous, of varying size and develop abruptly. Cover-collapse sinkholes dominate". The southwestern corner of the project site is Area I which is described as "sinkholes are few, generally shallow and broad and develop gradually. Solution sinkholes dominate".

6.0 PERMITTING DISCUSSION

State/Federal Permitting

An individual Environmental Resource Permit (ERP) through the SRWMD may be required to develop the site. No wetlands or surface waters occur onsite; therefore, Section 404 permitting is not required.

Although five gopher tortoise burrows were observed during the 15 percent survey, Flatwoods is confident that no more than 10 burrows exist onsite due to burrows only being observed on the edges of the property and not in the row crop areas. A relocation permit will be required from the FWC if ground disturbance will occur within 25 feet of tortoise the burrow during construction activities. If more than 10 burrows are observed during the 100 percent survey, a Conservation Permit from the FWC will be required. No approval from the FWS regarding gopher tortoises is required. No other listed species were observed, and none are likely to occur.

Local Permitting

Section 406.04 of Alachua County's Land Development Regulations requires a Resource Assessment as supporting documentation for various applications. This report is sufficient to support the application for Alachua County.

Subject: Summary Report of a Geotechnical Site Exploration – Revision 2
Savannah Station, Phase 3
Alachua, Alachua County, Florida
GSE Project No. 13739A

GSE Engineering & Consulting, Inc. (GSE) is pleased to submit this geotechnical site exploration report for the above referenced project.

Presented herein are the findings and conclusions of our exploration, including the geotechnical parameters and recommendations to assist with clubhouse foundation, pavement, and stormwater management designs. This revision includes a karst evaluation of the subject site.

GSE appreciates this opportunity to have assisted you on this project. If you have any questions or comments concerning this report, please contact us.

Sincerely,

GSE Engineering & Consulting, Inc.

1.0 INTRODUCTION

1.1 General

GSE Engineering & Consulting, Inc. (GSE) has completed this geotechnical exploration for the proposed residential development located in Alachua, Alachua County, Florida. This exploration was performed in accordance with GSE Proposal No. 2021-380 dated July 12, 2021. You authorized our services on July 14, 2021.

1.2 Project Description

This project will consist of a residential development. The project will include a clubhouse, roadways, and stormwater management facilities. The site is located on the south side of C.R. 235 at the C.R. 235A intersection in Alachua, Alachua County, Florida (Figure 1).

Mr. Ryan Thompson with CHW Professional Consultants, Inc. (CHW) provided information about the project and site plans illustrating the locations of the proposed improvements. The project will consist of roadways, stormwater management facilities, and a clubhouse. We anticipate the clubhouse will be either concrete masonry unit or wood frame construction. Structural loads have not been provided but are expected to be on the order of 1 to 2 kips per foot for load bearing walls, and less than 50 kips for columns. The finished floor of the structure is anticipated to be constructed near the existing site grades.

Four stormwater management facilities are proposed that range in size from about 2.7 to 8.6 acres. Approximately 12,000 feet of roadways are proposed.

A recent aerial photograph of the site was obtained and reviewed. The preliminary site plan and aerial photograph were used in preparation of this exploration and report.

1.3 Purpose

The purpose of this geotechnical exploration was to determine the general subsurface conditions, evaluate these conditions with respect to the proposed construction, and prepare geotechnical parameters and recommendations to assist with clubhouse foundation, stormwater management, and pavement designs.

2.0 FIELD AND LABORATORY TESTS

2.1 General Description

The procedures used for field sampling and testing are in general accordance with industry standards of care and established geotechnical engineering practices for this geographic region. This exploration consisted of performing two (2) Standard Penetration Test (SPT) borings to a depth of 20 feet below land surface (bls) within the proposed clubhouse, two (2) auger borings to a depth of 10 feet bls within the proposed clubhouse, twenty-three (23) auger borings to a depth of 5 feet bls along the roadway alignments, twenty-four (24) auger borings to a depth of 15 feet within the proposed stormwater management facilities, and six (6) auger borings to a depth of 30 feet bls within the proposed stormwater management facilities.

The soil borings were performed at the approximate locations as shown on Figure 2. The borings were located at the site using the provided site plan, Global Positioning System (GPS) coordinates, and obvious site features as reference. The boring locations should be considered approximate. The soil borings were performed from August 23 to August 26, 2021.

2.2 Auger Borings

The auger borings were performed in accordance with ASTM D1452. The borings were performed with flight auger equipment that was rotated into the ground in a manner that reduces soil disturbance. After penetrating to the required depth, the auger was retracted, and the soils collected on the auger flights were field classified and placed in sealed containers. Representative samples of each stratum were retained from the auger boring. Results from the auger borings are provided in Section 5.1.

2.3 Standard Penetration Test Borings

The soil borings were performed with a drill rig employing flight auger drilling techniques and Standard Penetration Testing (SPT) in accordance with ASTM D1586. The SPTs were performed continuously to 10 feet and at 5-foot intervals thereafter. Soil samples were obtained at the depths where the SPTs were performed. The soil samples were classified in the field, placed in sealed containers, and returned to our laboratory for further evaluation.

After drilling to the sampling depth, the standard two-inch O.D. split-barrel sampler was seated by driving it 6 inches into the undisturbed soil. The sampler was then driven an additional 12 inches by blows of a 140-pound hammer falling 30 inches. The number of blows required to produce the next 12 inches of penetration were recorded as the penetration resistance (N-value). These values and the complete SPT boring logs are provided in Section 5.2.

Upon completion of the sampling, the boreholes were abandoned in accordance with Water Management District guidelines.

2.4 Soil Laboratory Tests

The soil samples recovered from the soil borings were returned to our laboratory and examined to confirm the field descriptions. Representative samples were then selected for laboratory testing. The laboratory tests consisted of twenty (20) percent soil fines passing the No. 200 sieve determinations, twenty (20) natural moisture content determinations, two (2) Atterberg Limits tests, twelve (12) constant head hydraulic conductivity tests, and three (3) Limerock Bearing Ratio (LBR). These tests were performed in order to aid in classifying the soils and to further evaluate their engineering properties. The laboratory tests are provided in Section 5.3.

3.0 FINDINGS

3.1 Surface Conditions

Ms. Cassandra R. Lindeman, E.I. with GSE initially visited the site on July 22, 2021, to observe the site conditions. Ms. Lindeman returned to the site on August 13, 2021, with Mr. Jason Kite with Jason Kite, LLC to clear lanes through the trees in the southwest corner of the site to allow the drilling equipment access to the boring locations. Representatives from GSE returned to the site on August 16, 2021, to collect soil samples for permeability testing.

The majority of the site is currently an existing crop field. The southwestern corner of the site contains planted pines, trees, and heavy brush. The entire site is outlined by trees. The site is bordered by CR 235 running southwest to northeast and by NW 110th Avenue on the south side.

The topography at the site is gently sloping. Regional topography can also be characterized as gently to moderately sloping. The Alachua County Growth Management website indicates the ground surface elevations at the site are near 86 to 102 feet.

The Alachua County Soil Survey maps a closed depression on the southern portion of the site.

3.2 Subsurface Conditions

The locations of the auger and SPT borings are provided on Figure 2. Complete logs for the borings are provided in Sections 5.1 and 5.2. Descriptions for the soils encountered are accompanied by the Unified Soil Classification System symbol (SM, SP-SM, etc.) and are based on visual examination of the recovered soil samples and the laboratory tests performed. Stratification boundaries between the soil types should be considered approximate, as the actual transition between soil types may be gradual.

The auger and SPT borings generally encountered relatively consistent soil conditions across the site.

The auger borings located in the areas of the proposed roadways typically encountered poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC) to the explored depth of 5 feet bls. Boring R-16 encountered very clayey sand (SC/CL) at 3 feet bls to the explored depth of 5 feet bls. Borings R-17, R-20, and R-23 encountered clayey sand (SC) at depths of 2, 2.5, and 4 feet bls, respectively, to the explored depth of 5 feet bls.

The auger borings located within the proposed stormwater management facilities initially encountered poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC). The sandy soils were generally underlain by clayey and very clayey sands (SC, SC/CL) with some interbedded layers of clay-rich soils consisting of sandy clay, clay with sand, and clay (CL/CH) to the explored depths of 15 and 30 feet bls. Borings P-8, P-24, and P-28 encountered limestone at 28 and 28.5 feet bls to the explored depth of 30 feet bls.

The auger and SPT borings located within the area of the proposed clubhouse encountered similar conditions to the rest of the site. Boring A-1 encountered sand with silt (SP-SM) to the explored depth of 10 feet bls. Boring A-2 encountered 2 feet of sand with silt (SP-SM) underlain by very clayey sand (SC/CL) to the explored depth of 10 feet bls. Boring B-1 initially penetrated 7 feet of sand with silt (SP-SM) underlain by 1.5 feet of very clayey sand (SC/CL), 5 feet of poorly graded sand (SP), and 6.5 feet of clayey and very clayey sands (SC, SC/CL) to the explored depth of 20 feet bls. Boring B-2 initially penetrated 7 feet of sand with silt (SP-SM) and poorly graded sand (SP) underlain by 6.5 feet of clayey sand (SC) and 6.5 feet of sand with clay (SP-SC) to the explored depth of 20 feet bls.

The sandy soils consisting of poorly graded sand (SP), sand with silt (SP-SM), and sand with clay (SP-SC) are generally in a very loose to medium dense condition with N-values ranging from 2 to 26 blows per foot. The clayey and very clayey sands (SC, SC/CL) encountered are generally in a loose to medium dense condition with N-values ranging from 5 to 21 blows per foot.

The groundwater table was not encountered in the auger and SPT borings at the time of our investigation.

3.3 Review of Published Data

The majority of the site is mapped as five soil series by the Soil Conservation Service (SCS) Soil Survey for Alachua County[1]. The following soil descriptions are from the Soil Survey.

Arredondo fine sand, 0 to 5 percent slopes – This nearly level to gently sloping, well-drained soil is in both small and large areas of uplands. Slopes are smooth to convex. The areas are irregular in shape and range from about 10 to 160 acres in size.

Typically, the surface layer is dark grayish brown fine sand about 8 inches thick. The subsurface layer is fine sand to a depth of 49 inches. The upper 23 inches is yellowish brown, and the lower 18 inches is brownish yellow. The subsoil extends to a depth of 86 inches or more. The upper 5 inches is yellowish brown loamy sand; the next 10 inches is yellowish brown sandy clay loam, and the lower 22 inches is dark yellowish brown sandy clay and sandy clay loam.

Included with this soil in mapping are small depressional areas of soils that have a very dark gray or black surface layer 8 to 24 inches thick. This layer overlies gray sandy material. These areas are shown by wet spot symbols. Also included are small areas of Fort Meade, Gainesville, Kendrick, and Millhopper soils. A few areas of this soil include Arredondo soils that have 5 to 8 percent slopes. Some areas of this soil in the western part of the county have small spots of strongly acid to medium acid soil material 40 to 70 inches deep to calcareous limestone. Limestone boulders, fragments of limestone, and sinkholes are in some areas of this soil, mainly in the limestone plain sections of the western part of the county. Most of these boulders are siliceous. The sinkholes and the boulders are shown by appropriate map symbols. Total included areas are about 15 percent.

In this Arredondo soil, the available water capacity is low in the sandy surface and subsurface layers and low to medium in the loamy subsoil. Permeability is rapid in the surface and subsurface layers and moderately slow to moderate in the loamy subsoil. Natural fertility is low in the sandy surface and subsurface layers and medium in the finer textured subsoil. Organic matter content is low. The water table in this soil is at a depth of more than 72 inches. Surface runoff is slow.

[1] Soil Survey of Alachua County, Florida. Soil Conservation Service, U.S. Department of Agriculture.

Millhopper sand, 0 to 5 percent soils – This nearly level to gently sloping, moderately well drained soil is in small and large irregularly shaped areas on uplands and on slightly rolling knolls in the broad flatwoods. Slopes are mostly nearly smooth or convex. The areas are variable in size. They range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 9 inches thick. The subsurface layer is sand or fine sand about 49 inches thick. The upper 17 inches is yellowish brown, the next 22 inches is light yellowish brown, and the lower 10 inches is very pale brown. The subsoil extends to a depth of 89 inches. The upper 6 inches is yellowish brown loamy sand that has grayish and brownish mottles; the next 22 inches is light gray, mottled sandy clay loam; and the lower 3 inches is light gray, mottled sandy loam.

Included with this soil in mapping are small areas of Arredondo, Bonneau, Fort Meade, Gainesville, Kanapaha, Lochloosa, and Sparr soils. Siliceous limestone boulders and small sinks are within some delineations. Small areas of Millhopper soils that have 5 to 8 percent slopes are also included. About 25 acres mapped as this Millhopper soil along the Santa Fe River is occasionally flooded. Total included areas are about 20 percent or less.

This Millhopper soil has a water table that is at a depth of 40 to 60 inches for 1 to 4 months and at a depth of 60 to 72 inches for 2 to 4 months during most years. The available water capacity is low in the surface and subsurface layers and is low to medium in the subsoil. Permeability is rapid in the surface and subsurface layers, moderately rapid in the upper 6 inches of the subsoil, and slow to moderately slow below this depth. Natural fertility is low. Organic matter content is low to moderately low.

Gainesville sand, 0 to 5 percent slopes – This nearly level to gently sloping, well-drained soil has sandy texture to a depth of 80 inches or more. It is in both small and large, irregularly shaped areas on the gently rolling uplands. Most areas range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 7 inches thick. The underlying layer extends to a depth of 82 inches or more. The upper 22 inches is yellowish brown sand, and the lower 53 inches is strong brown loamy sand.

Included with this soil in mapping are small areas of Arredondo, Fort Meade, Kendrick, and Lake soils. A few small areas of Gainesville soils that have 5 to 8 percent slopes are included. Total included areas are less than 15 percent.

In this Gainesville soil, the available water capacity is low, and the permeability is rapid. Organic matter content ranges from low to moderately low, and natural fertility is low. Surface runoff is slow. The water table is more than 72 inches below the surface.

Arredondo fine sand, 5 to 8 percent slopes – This is near level to sloping, well-drained soil forms in thick beds of sandy and loamy marine materials. These soils are in broad rolling areas of the upland. Slopes range from 0 to 8 percent. The water table is more than 72 inches below the surface. These soils are loamy siliceous, hyperthermic Grossarenic Paleudults.

Arredondo soils are geographically associated with Apopka, Bonneau, Candler, Fort Meade, Gainesville, Jonesville, Kanapaha, Kendrick, Lake Millhopper, and Norfolk soils. Apopka soils have less than 5 percent silt and clay in the A2 horizon, and many of the sand grains are uncoated. Bonneau soils are moderately well drained and have an A horizon 20 to 40 inches thick. Candler soils are sandy to a depth of 80 inches or more and have less than 5 percent silt and clay in their 10- to 40-inch control section.

Fort Meade and Gainesville soils are sandy to a depth of more than 80 inches. They have 10 to 15 percent silt and clay in their 10- to 40-inch control section. Fort Meade soils also have a thick, dark colored A1 horizon. Jonesville soils have underlying limestone at a depth of less than 60 inches. Lake soils are sandy to 80 inches or more. Kanapaha soils are poorly drained, and Millhopper soils are moderately well drained. Norfolk soils have an A horizon less than 20 inches thick.

Lochloosa fine sand, 5 to 8 percent slopes – This is near level to sloping, somewhat poorly drained soil that forms in thick beds of loamy marine deposits. These soils are in broad areas of the gently rolling uplands and in slightly convex areas of the flatwoods. Slopes range from 0 to 8 percent. The water table is about 30 to 40 inches below the surface for about 1 to 4 months during most years. It rises to 15 to 30 inches for about 1 to 4 weeks during most years. During most of the remained of the year it is at a depth of more than 40 inches. These soils are loamy, siliceous, hyperthermic Aquic Arenic Paleudults.

Lochloosa soils are geographically associated with Blichton, Bivans, Boardman, Bonneau, Kanapaha, Kendrick, Micanopy, Millhopper, Sparr, and Wacahoota soils. Blichton, Bivans, Boardman, Kanapaha, and Wacahoota soils are all poorly drained. Blichton soils are more than 5 percent plinthite. In addition, the Bivans soils have a clayey Btg horizon within 20 inches of the surface and contain more than 5 percent nodules and fragments of limestone. Kanapaha soils have an A horizon 40 to 80 inches thick. Wacahoota soils are more than 5 percent nodules and fragments of limestone. Kendrick soils are well drained. Micanopy soils have a clayey Bt horizon within 20 inches of the surface. Millhopper soils are moderately well drained and have an A horizon 40 to 80 inches thick. Sparr soils have a sandy A horizon 40 to 80 inches thick.

3.4 Laboratory Soil Analysis

Selected soil samples recovered from the soil borings were analyzed for the percent soil fines passing the No. 200 sieve, natural moisture content, Atterberg Limits, hydraulic conductivity, and Limerock Bearing Ratio (LBR) tests. Samples selected for laboratory testing were collected at depths ranging from 0.5 to 10 feet bls. These tests were performed to confirm visual soil classification and evaluate their engineering properties. The complete laboratory report is provided in Section 5.3.

The laboratory tests indicate the tested soils consist of poorly graded sand (SP), sand with silt (SP-SM), clayey sand (SC), and very clayey sand (SC/CL). The tested poorly graded sand (SP) contains approximately 3.5 to 4.9 percent soil fines passing the No. 200 sieve with natural moisture contents of about 5.2 to 5.3 percent. The tested sand with silt (SP-SM) contains approximately 5 to 9.5 percent soil fines passing the No. 200 sieve with natural moisture contents of about 5.8 to 8.3 percent. The tested clayey sand (SC) contains approximately 12 to 29 percent soil fines passing the No. 200 sieve with natural moisture contents of about 11 to 18 percent. The tested very clayey sand (SC/CL) contains approximately 30 to 46 percent soil fines passing the No. 200 sieve with natural moisture contents of about 18 to 24 percent.

Atterberg Limits tests indicate the tested very clayey sands (SC/CL) have Liquid Limit (LL) values of 27 and 45, Plastic Limit (PL) values of 16 and 19, and Plasticity Index (PI) values of 11 and 26. These values correspond to a material with low potential (LL < 50 and PI < 25) for expansive behavior[2].

The constant head hydraulic conductivity test results indicate the near-surface poorly graded sand (SP) has a hydraulic conductivity value of 12 feet per day. The tested sand with silt (SP-SM) has hydraulic conductivity values of 4.7 to 22 feet per day.

[2] U.S. Department of the Army USA, 1983, Foundations in Expansive Soils, TM 5-818-7, p. 4-1.

The tested clayey sands (SC) have hydraulic conductivity values of 0.6 to 11 feet per day. The tested very clayey sand (SC/CL) has a hydraulic conductivity value of 1.7 feet per day.

The Modified Proctor maximum dry density tests indicate the near surface grab samples have maximum dry densities ranging from 113.3 to 116.8 pounds per cubic foot and optimum moisture contents of 8.5 to 10.8 percent. The LBR tests indicate the soils have LBR values ranging from 34 to 67.

4.0 EVALUATION AND RECOMMENDATIONS

4.1 General

The following recommendations are made based upon our understanding of the proposed construction, a review of the attached soil borings and laboratory test data, and experience with similar projects and subsurface conditions. If plans or the location of proposed construction changes from those discussed previously, GSE requests the opportunity to review and possibly amend our recommendations with respect to those changes.

The final design of a foundation system is dependent upon adequate integration of geotechnical and structural engineering considerations. Consequently, GSE must review the final foundation design in order to evaluate the effectiveness and applicability of our initial analyses, and to determine if additional recommendations may be warranted. Without such a review, the recommendations presented herein could be misinterpreted or misapplied resulting in potentially unacceptable performance of the foundation system.

The performance of site improvements may be sensitive to their post-construction relationship to site groundwater levels, seepage zones, or soil/rock characteristics exposed at final site grades. GSE recommends that use of boring information for final design of all site improvements be predicated on proper horizontal and vertical control of borings.

In this section of the report, we present our geotechnical parameters and recommendations to assist with building foundation, stormwater management, and pavement designs as well as our general site preparation guidelines.

4.2 Groundwater

The groundwater table was not encountered in the borings at the time of our exploration. The lack of apparent groundwater table in the borings suggest the site is perforated; however, you should expect water to perch on top of the very clayey sands and clays after periods of heavy and seasonal rainfall. Estimates for the temporarily perched groundwater tables are shown on the individual boring logs.

4.3 Building Foundations

The borings located within the proposed building footprint generally encountered poorly graded sand and sand with silt underlain by interbedded layers of clayey and very clayey sand and sandy clay to the explored depths of 10 and 20 feet bls.

Based upon the soil conditions encountered and our limited understanding of the structural loads and site grading, we recommend the building be supported by conventional, shallow strip and/or spread foundations. We recommend the shallow foundations be designed for a maximum allowable gross bearing pressure of 2,000 psf. The gross bearing pressure is defined as the soil contact pressure that can be imposed from the maximum structural loads, weight of the concrete foundations, and weight of the soil above the foundations. The foundations should be designed based upon the maximum load that could be imposed by all loading conditions.

The foundations should be embedded a minimum of 18 inches below the lowest adjacent grade. Interior foundations or thickened sections should be embedded a minimum of 12 inches. The foundations should have minimum widths of 18 inches for strip footings, and 24 inches for columns, even though the maximum soil bearing pressure may not be fully developed.

Due to the mostly sandy nature of the majority of the near-surface soils, we expect settlement to be mostly elastic in nature. The majority of the settlement will occur on application of the loads, during and immediately following construction. Using the recommended maximum bearing pressure, the assumed maximum structural loads, and the field and laboratory test data which we have correlated into the strength and compressibility characteristics of the subsurface soils, we estimate the total settlements of the structure to be 1 inch or less, with approximately half of it occurring upon load application (during construction).

Differential settlement results from differences in applied bearing pressures and the variations in the compressibility characteristics of the subsurface soils. For the building pad prepared as recommended, we anticipate differential settlement of less than 1/2 inch.

Post-construction settlement of the structures will be influenced by several interrelated factors, such as (1) subsurface stratification and strength/compressibility characteristics of the bearing soils; (2) footing size, bearing level, applied loads, and resulting bearing pressures beneath the foundation; (3) site preparation and earthwork construction techniques used by the contractor, and (4) external factors, including but not limited to vibration from off-site sources and groundwater fluctuations beyond those normally anticipated for the naturally-occurring site and soil conditions which are present.

Our settlement estimates for the structure are based upon our limited understanding of the structural loads and site grading and the use of successful adherence to the site preparation recommendations presented later in this report. Any deviation from our project understanding and/or our site preparation recommendations could result in an increase in the estimated post-construction settlement of the structure.

4.4 Flexible Pavement

Overall soil conditions encountered by our borings at this site are suitable for supporting conventional limerock base and asphalt wearing surface pavements. We have not been provided the anticipated traffic loading conditions; therefore, the following pavement component recommendations should be used only as guidelines. The below recommendations are intended to be minimums. Increasing base course and asphalt thicknesses would increase the design life of the pavement.

We recommend a minimum separation of 24 inches be present between the bottom of the base course and the top of the clay-rich soils containing greater than about 25 percent soil fines. Review of the boring logs suggests this separation will likely be present along the majority of the alignment. Boring R-20 did encounter very clayey sand (SC/CL) at a depth of 2.5 feet bls and clay-rich soils approached within 24 inches of grade at boring location R-17. Clay-rich soils were encountered at borings R-16, R-20, and R-23 at depths of 3 feet bls, 2.5 feet bls, and 4 feet bls, respectively. A roadway grading plan is not available at this time. The presence of shallow clay-rich soils is expected to be sporadic and not easily predicted without a grading plan.

In areas where the minimum 24-inch separation is not able to be achieved through grading design, we recommend these soils be undercut. The undercut should extend a minimum of 24 inches beneath the bottom of the base course. The undercut should extend laterally until the clay-rich soils are no longer encountered and free-draining sandy soils have been penetrated. The undercut should be backfilled with either on-site or imported sandy free-draining soils containing less than 10 percent soil fines. The backfill should be placed in maximum 24-inch loose lifts that are compacted to a minimum 95 percent of the Modified Proctor maximum dry density (ASTM D1557). Underdrains should be considered where clay-rich soils are undercut.

4.4.1 Stabilized Subgrade

The stabilized subgrade should have a minimum Limerock Bearing Ratio (LBR) of 40, with a minimum thickness of 12 inches. The stabilized subgrade can be imported material or a mixture of imported and on-site material. If a mix is proposed, a mix design should be performed to determine the optimum mix proportions. The stabilized subgrade should be compacted to a minimum of 98 percent of the Modified Proctor maximum dry density (ASTM D1557) for soils with less than 15 percent fines content. Soils with 15 percent or greater fines content should be compacted to 100 percent of the Standard Proctor maximum dry density (ASTM D698).

4.4.2 Base Course

The base course should consist of crushed limerock having a LBR of at least 100. Limerock should be obtained from a FDOT approved source and should meet FDOT gradation requirements. The base course thickness should be a minimum of 6 inches in automobile parking areas and 8 inches in driveways. The base course should be compacted to at least 98 percent of the Modified Proctor maximum dry density (ASTM D1557).

The constructability of differing base course thicknesses may be difficult and having a uniform 8-inch-thick base course may be more practical.

4.4.3 Wearing Surface

The asphalt-wearing surface should consist of an FDOT Type SP Hot Mix Asphalt mixture. For automobile parking areas, the thickness should be a minimum of 1.5 inches. For driveway areas, the thickness should be a minimum of 2 inches. The asphalt-wearing surface should consist of an SP-12.5 mix. The asphalt should be compacted to at least 95 percent of the mix design density.

The constructability of differing asphalt thicknesses may be difficult and having a uniform 2-inch-thick asphalt wearing surface may be more practical.

4.5 Site Preparation

The soils at this site should be suitable for supporting the proposed construction using normal, good practice site preparation procedures. The following recommendations are our general guidelines for site preparation.

4.5.1 Stripping

Strip the construction limits and 10 feet beyond the perimeter of all grass, roots, topsoil, and other deleterious materials. You should expect to strip to depths of 12 or more inches. Deeper stripping will likely be necessary due to major root systems present at the site.

4.5.2 Dewatering

Temporary dewatering is not expected to be necessary for this project. However, if needed, we anticipate dewatering can be accomplished with sumps placed near the construction area, or with underdrains connected to a vacuum pump.

In any case, the site should always be graded to promote runoff and limit the amount of ponding. Localized ponding of stormwater is expected without proper grading during construction and could render previously acceptable surfaces unacceptable.

4.5.3 Proof-Rolling

Proof-roll the subgrade with heavy rubber-tired equipment, such as a loaded front-end loader or dump truck, to identify any loose or soft zones not found by the soil borings. The proof-rolling should be monitored by a geotechnical engineer or qualified technician. Undercut or otherwise treat these zones as recommended by the geotechnical engineer in this report.

4.5.4 Proof Compaction

Compact the subgrade to a density of at least 95 percent of the Modified Proctor maximum dry density (ASTM D1557). The specified compaction should be obtained to a depth of 1 foot below the foundation bottoms and the existing grade prior to placing fill. Vibratory roller equipment should not be used within approximately 100 feet of existing structures. Lighter "walk-behind" compaction equipment may be used to achieve the degree of compaction.

Should clayey sand be encountered at the bearing surface, this material should be probed and visually confirmed to be unyielding in the upper 12 inches in lieu of density testing. If the foundation excavations penetrate the clayey sand, the excavation should be performed in a manner that reduces soil disturbance. Clayey sand soils (with fines content in excess of 15 percent) that are removed and replaced or appreciably disturbed need to be re-compacted to 98 percent of the Standard Proctor maximum dry density (ASTM D698).

4.5.5 Fill Placement

Imported fill placed to raise the site grades should consist of clean sand having less than 10 percent passing the No. 200 sieve. On-site soils meeting the requirements of Section 4.9 may also be used as structural fill. The fill should be placed in maximum 12-inch loose lifts that are compacted to at least 95 percent of the Modified Proctor maximum dry density (ASTM D1557). If lighter "walk-behind" compaction equipment is used, this may require lifts of 4 inches or less to achieve the required degree of compaction.

4.6 Quality Control and Construction Materials Testing

It should be noted that the geotechnical engineering design does not end with the advertisement of the construction documents. As the geotechnical engineer of record, GSE is the most qualified to perform the construction materials testing that will be required for this project. The benefits of having the geotechnical engineer of record also perform the construction materials testing are numerous. If GSE continues to be involved with the project through construction, we will be able to constantly re-evaluate and possibly alter our geotechnical recommendations in a timely and cost-effective manner once final design and construction techniques are developed. This often results in cost savings for the project.

We recommend performing compaction testing beneath the concrete floor slab and the building foundations. We recommend one test be performed every 50 linear feet of continuous footing and every other column footing, per foot depth of fill or native material. We recommend a compaction test be performed for each 2,500 square feet of floor area or 10,000 square feet of pavement area per foot of fill or native material, or a minimum of three tests each, whichever is greater. Test all footing excavations to a depth of 12 inches at the frequencies stated above.

4.7 Stormwater Management

The soil conditions at the stormwater management facility are relatively consistent; initially penetrating poorly graded sand and sand with silt underlain by clayey to very clayey sand with interbedded layers of sandy clay, clay with sand, and clay. Limestone was encountered in borings P-8, P-24, and P-28 at depths of 28 and 28.5 feet bls.

The water table was not encountered in the auger borings at the time of our exploration. We anticipate the seasonal high groundwater table to be temporarily perched on the very clayey sands and sandy clays.

The laboratory permeability tests indicate the tested layers of poorly graded sand, sand with silt, clayey sand, and very clayey sand have hydraulic conductivity values of 0.6 to 22 feet per day. The underlying very clayey sand, sandy clay, clay with sand, and clay are expected to be confining soils.

Based upon our findings and test results, our recommended soil parameters for the stormwater management design in the explored areas are presented below. The recommended parameters consider the results of the permeability tests, wash 200 determinations, and our experience with these types of soils. The parameters below do not consider a factor of safety.

Proposed Stormwater Management Facility (P-22 to P-29)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 2.5 feet per day.
3. Horizontal hydraulic conductivity equal to 4 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-18 to P-21)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 8 feet per day.
3. Horizontal hydraulic conductivity equal to 12 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

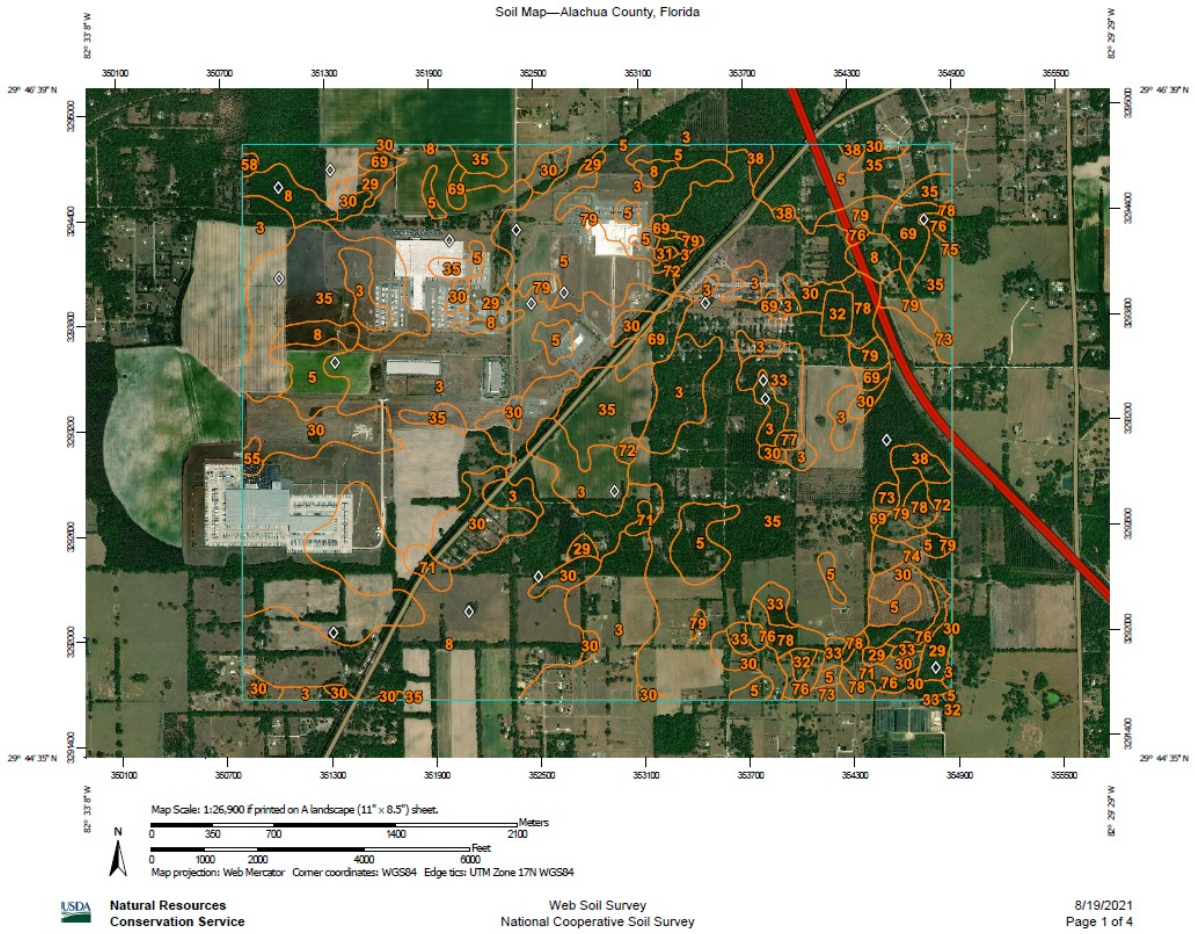
Proposed Stormwater Management Facility (P-12, P-13, A-2, B-2)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 3.5 feet per day.
3. Horizontal hydraulic conductivity equal to 5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-14, P-15)

1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 5 feet per day.
3. Horizontal hydraulic conductivity equal to 7.5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

Proposed Stormwater Management Facility (P-1 to P-11)



1. Base elevation of effective or mobilized aquifer (average depth of confining layer) equal to greater than 30 feet bls.
2. Unsaturated vertical infiltration rate of 3.5 feet per day.
3. Horizontal hydraulic conductivity equal to 5 feet per day.
4. Specific yield (fillable porosity) of 20 percent.
5. Average seasonal high groundwater table depth equal to 35 feet NGVD (potentiometric surface).

In areas where clay-rich soils are present at the basin bottom, we recommend these soils be undercut a minimum of 2 feet and backfilled with the on-site sands and sands with silt (SP, SP-SM) having a maximum of 12 percent soil fines passing the No. 200 sieve. The intent of this undercutting and replacement is to provide a more uniform sand "blanket" at the basin bottom that allows the migration of water to the deeper deposits of sand. This sand blanket will also reduce the potential for clay-fines leaching out of the soils when water is present in the basin that can result in a thin layer of confining type material on the basin bottom that can reduce the effectiveness of the basin.

4.8 Karst Area Evaluation Summary

A site visit and driving tour of the immediate area surrounding the site (approximately 200-foot radius) was performed in order to confirm the absence or presence of visible potential depressional sinkhole features. In addition, readily available published information related to known and documented sinkhole features in the immediate area of the site was reviewed.

Depressional features were observed on the site. In addition, the soil survey indicates the presence of a sinkhole at the southern portion of the site. Multiple sinkholes are indicated with a diamond within a 2-mile radius of the site (See Graphic Below). In addition to the identified sinkhole, multiple closed depressions are present on the site and in the immediate vicinity. Closed depressions are not necessarily an indicator of sinkholes and could represent other landforms. However, there were no compelling indications of sinkhole activity within the depths explored by the borings.

Graphic obtained from the www.websoilsurvey.com

The FDEP Map Direct Gateway[3] website was utilized to determine if there were nearby subsidence incident reports near the subject site. One incident was noted ½ mile south of the CR 241 overpass on I-75. However, GSE knows of multiple subsidence incidents north of the site at commercial developments along CR 235A.

Historical USGS topographic maps dated 2021, 2012, 1981, 1962, and 1954 were reviewed as part of this assessment. The historical use of the site and the findings in the topographic maps indicate that the ground surface elevations at the site have remained fairly consistent at about 90 to 100 feet NGVD. The topographic maps did not encounter compelling changes in the site elevation that would warrant concern.

The karst area survey performed is considered adequate and in sufficient detail to define the hydrologic and geologic conditions at the site. One karst feature was identified on the subject site. The feature is considered a relic sinkhole and does not appear to be active.

This site is located within a highly karstic area which is prone to erosion and fissures in the limestone formations. Site development commonly changes the risk for sinkhole development in highly karstic geology. The construction of impervious surfaces (buildings and pavement) decreases sinkhole risk, as stormwater that infiltrates and erodes subsurface materials is removed.

[3] *Map Direct Gateway*. Florida Department of Environmental Protection, https://ca.dep.state.fl.us/mapdirect/

Stormwater basins commonly have an increased risk for sinkhole development, due to the concentration of stormwater in these areas. The karst geologic conditions encountered at this site are typical for this area of Alachua County, and it is our opinion the risk for sinkhole development at this site is no greater or lower than what is expected for this immediate area.

Site development should be performed in a manner that reduces the potential for sinkhole activity affecting structures. All roof runoffs should be discharged into impervious surfaces or directly into the stormwater management infiltration beneath the perimeter of the structure. The stormwater management basin should be located well away from structures because the basin will have the highest risk for sinkhole development. We wish to point out that these measures will not eliminate the risk for sinkhole activity at the site.

4.9 Fill Suitability

The soils encountered at this site within the explored depths range from sands (SP) to clays (CL/CH). A discussion of the suitability for reuse as structural fill for each soil classification according to the Unified Soil Classification System (USCS) designation is provided below.

SP, SP/SM – Sands (SP) and sand with silt (SP/SM) have less than 5 percent and 12 percent soil fines passing the No. 200 sieve, respectively, and are typically well draining soils that are suitable for reuse as structural fill. The sands with silt may require moisture conditioning (drying) to make the material more workable. These soils will require stockpiling and drying before they are reused if they are excavated from below the water table.

SM – Silty sands (SM) can have between 12 percent and 50 percent soil fines passing the No. 200 sieve. Silty sands are typically non-plastic or have low plasticity and can be reused as structural fill with precautions. Silty sands can be moisture sensitive and difficult to work and compact and can rut if the moisture content is near or above the optimum moisture content. We recommend these soils be moisture conditioned (dried) so that the moisture content during use is at or below the optimum moisture content. Aerating and exposure to the sun is typically the most effective methods of drying these soils. It may not be practical to reuse these materials during the wet season, as frequent rain showers may not allow these soils to dry to a workable moisture content. Suitable silty sands are limited to soil having less than 30 percent soil fines passing the No. 200 sieve. Silty sands with more than 30 percent soil fines are especially moisture sensitive and are not recommended for reuse as structural fill. These soils will behave more as sandy silt, and for this reason, very silty sands having more than 30 percent soil fines passing the No. 200 sieve have been assigned a dual classification of SM/ML. Silty sand soils that are excavated from below the water table are not recommended for reuse as structural fill due to the amount of time that will be required to dry these soils to a workable condition.

SC – Clayey sand (SC) soils can have between 12 percent and 50 percent soil fines passing the No. 200 sieve. Clayey sands can have a high range of plasticity, varying from a PI of 7 or greater and plotting above the A-line to highly plastic. Friable clayey sands are typically suitable for use as structural fill with precautions. Clayey sands will be moisture sensitive and difficult to work and compact and can rut during placement if the moisture content is near or above the natural moisture content. We recommend these soils be moisture conditioned (dried) so that the moisture content during use is at or below the optimum moisture content. Aerating and exposure to the sun is typically the most effective methods of drying these soils. It may not be practical to reuse these materials during the wet season, as frequent rain showers may not allow these soils to dry to a workable moisture content. Suitable clayey sands are limited to soil having less than 30 percent soil fines passing the No. 200 sieve. Clayey sands with more than 30 percent soil fines passing the No. 200 sieve are especially moisture sensitive and are typically highly plastic and are not recommended for reuse as structural fill.

These soils will behave more as sandy clay, and for this reason, very clayey sands having more than 30 percent soil fines passing the No. 200 sieve have been assigned a dual classification of SC/CH or SC/CL. Clayey sand soils that are excavated from below the water table are not recommended for reuse as structural fill due to the amount of time that will be required to dry these soils to a workable condition.

ML, MH, CL, CH – Silts and clays are not suitable materials for reuse as structural fill.

When using on-site soils as fill materials, we recommend the silty and clayey sand soils (SM, SC) be used in the lower depths of the fill. Sand and sand with silt (SP, SP-SM) should be used in the upper portions of the fill. We recommend a minimum of 2 feet of sand (SP, SP-SM) cover the silty and clayey sand fill materials to reduce the potential for soggy surface conditions due to the low permeability characteristics of the silty and clayey sand materials.

4.10 Surface Water Control and Landscaping

Roof gutters should be considered to divert runoff away from the building. The gutter downspouts should discharge a minimum of 10 feet from the structure to reduce the amount of water collecting around the foundations. Where possible, the gutter downspouts should discharge directly into the storm sewer system or onto the asphalt paved areas in order to reduce the amount of water collecting around the foundations. Grading of the site should be such that water is diverted away from the building on all sides to reduce the potential for erosion and water infiltration along the foundation.

With respect to landscaping, it is recommended that any trees and large "tree-like" shrubbery with potential for developing large root systems be planted a minimum distance of half their mature height, and preferably their expected final height, away from the structure. The purpose of this is to reduce the potential for foundation or slab movements from the growth of root systems as the landscaping matures. Consideration should also be given to using landscaping that has a low water demand, so that excessive irrigation is not conducted around the structures.

If excavations for underground utilities encounter the clay-rich soils, the excavations should be made such that they do not trap water (i.e., "swimming pool" or "bowl" effect). Sloping the excavations, installing underdrains, or extending the excavation to a more pervious area can achieve this. Allowing surface water to become trapped within utility trenches or other excavations (including footings) serves as a potential water source for the clay, which can result in shrink swell of these soils. Furthermore, during construction, surface water within the building areas must be controlled such that the water does not become trapped and represent a source of water for the underlying clay-rich soils. Mismanagement of the surface water during construction within the building footprint could result in subsequent post-construction slab movement.

The above recommendations are intended to maintain relatively consistent moisture contents within the clay-rich expansive soils encountered by the borings. The importance of proper surface water control and landscaping placement cannot be overemphasized in accomplishing this objective.

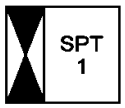
5.4 Key to Soil Classification

KEY TO SOIL CLASSIFICATION CHART

Criteria for Assigning Group Symbols and Group Names Using Laboratory Tests				SYMBOLS		GROUP NAME
				GRAPHIC	LETTER	
COARSE-GRAINED SOILS	Gravels	Clean Gravels	$Cu \geq 4$ and $1 \leq Cc \leq 3$		GW	Well graded GRAVEL
More than 50% retained on No. 200 sieve	More than 50% of coarse fraction retained on No. 4 sieve	Less than 5% fines	$Cu < 4$ and/or $1 > Cc > 3$		GP	Poorly graded GRAVEL
		Gravels with fines	Fines classify as ML or MH		GM	Silty GRAVEL
		More than 12% fines	Fines classify as CL or CH		GC	Clayey GRAVEL
	Sands	Clean Sands	$Cu \geq 6$ and $1 \leq Cc \leq 3$		SW	Well graded SAND
	50% or more of coarse fraction passes No. 4 sieve	Less than 5% fines	$Cu < 6$ and/or $1 > Cc > 3$		SP	Poorly graded SAND
		Sand with fines	Fines classify as ML or MH		SP-SM	SAND with silt
		5% ≤ fines < 12%	Fines classify as CL or CH		SP-SC	SAND with clay
		Sand with fines	Fines classify as ML or MH		SM	Silty SAND
		12% ≤ fines < 30%	Fines classify as CL or CH		SC	Clayey SAND
		Sand with fines	Fines classify as ML or MH		SM	Very silty SAND
		30% fines or more	Fines classify as CL or CH		SC	Very clayey SAND
FINE-GRAINED SOILS	Clays	inorganic	50% ≤ fines < 70%		CL/CH	Sandy CLAY
50% or more passes the No. 200 sieve			70% ≤ fines < 85%		CL/CH	CLAY with sand
			fines ≥ 85%		CL/CH	CLAY
	Silts and Clays	inorganic	PI > 7 and plots on/above "A" line		CL	Lean CLAY
	Liquid Limit less than 50		PI < 4 or plots below "A" line		ML	SILT
		organic	Liquid Limit - oven dried / Liquid Limit - not dried < 0.75		OL	Organic clay / Organic silt
	Silts and Clays	inorganic	PI plots on or above "A" line		CH	Fat CLAY
	Liquid Limit 50 or more		PI plots below "A" line		MH	Elastic SILT
		organic	Liquid Limit - oven dried / Liquid Limit - not dried < 0.75		OH	Organic clay / Organic silt
HIGHLY ORGANIC SOILS	Primarily organic matter, dark in color, and organic odor				PT	PEAT



CORRELATION OF PENETRATION RESISTANCE WITH RELATIVE DENSITY AND CONSISTENCY

	No. OF BLOWS, N	RELATIVE DENSITY
	0 - 4	Very Loose
	5 - 10	Loose
SANDS:	11 - 30	Medium dense
	31 - 50	Dense
	OVER 50	Very Dense

	No. OF BLOWS, N	CONSISTENCY
	0 - 2	Very Soft
SILTS	3 - 4	Soft
&	5 - 8	Firm
CLAYS:	9 - 15	Stiff
	16 - 30	Very Stiff
	31 - 50	Hard
	OVER 50	Very Hard

	No. OF BLOWS, N	RELATIVE DENSITY
	0 - 8	Very Soft
	9 - 18	Soft
LIMESTONE:	19 - 32	Moderately Hard
	33 - 50	Hard
	OVER 50	Very Hard

SAMPLE GRAPHIC TYPE LEGEND

Location of SPT Sample

Location of Auger Sample

PARTICLE SIZE IDENTIFICATION

BOULDERS:		Greater than 300 mm
COBBLES:		75 mm to 300 mm
GRAVEL:	Coarse -	19.0 mm to 75 mm
	Fine -	4.75 mm to 19.0 mm
SANDS:	Coarse -	2.00 mm to 4.75 mm
	Medium -	0.425 mm to 2.00 mm
	Fine -	0.075 mm to 0.425 mm
SILTS & CLAYS:		Less than 0.075 mm

LABORATORY TEST LEGEND

LL	=	Liquid Limit, %
PL	=	Plastic Limit, %
PI	=	Plasticity Index, %
% PASS - 200	=	Percent Passing the No. 200 Sieve
MC	=	Moisture Content, %
ORG	=	Organic Content, %
k_h	=	Horizontal Hydraulic Conductivity, ft/day

6.0 LIMITATIONS

6.1 Warranty

This report has been prepared for our client for his exclusive use, in accordance with generally accepted soil and foundation engineering practices and makes no other warranty either expressed or implied as to the professional advice provided in the report.

6.2 Auger and SPT Borings

The determination of soil type and conditions was performed from the ground surface to the maximum depth of the borings, only. Any changes in subsurface conditions that occur between or below the borings would not have been detected or reflected in this report.

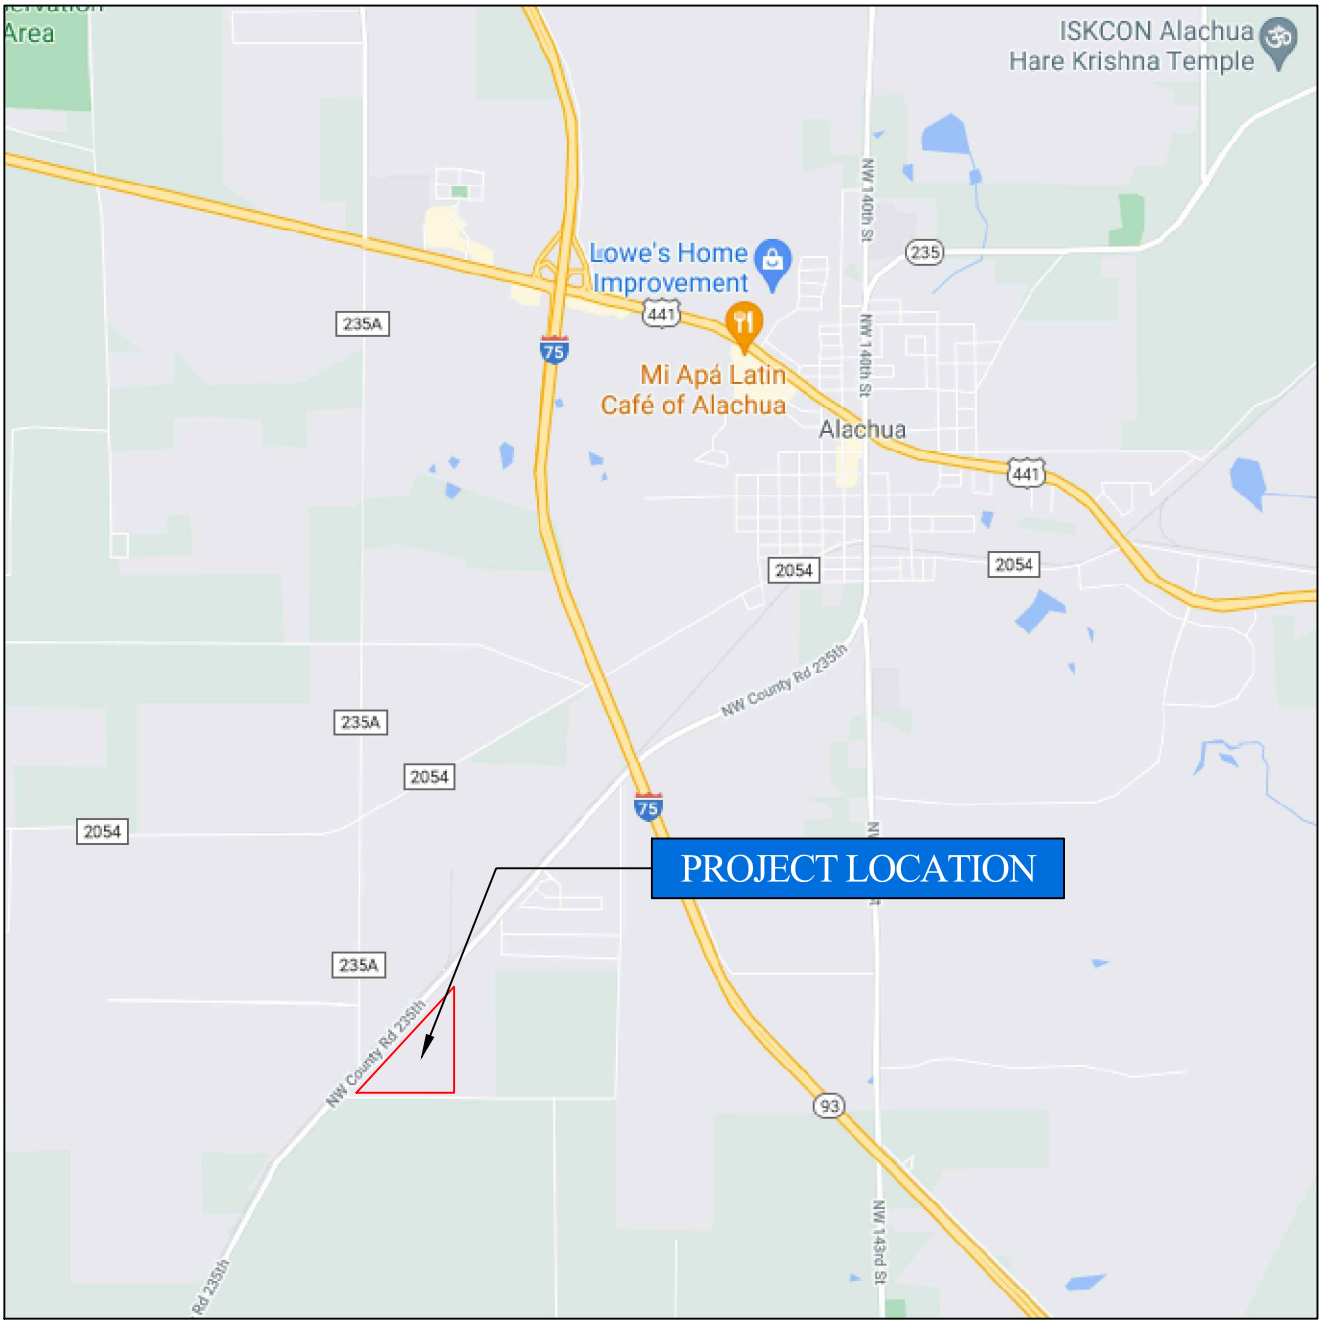
Soil classifications that were made in the field are based upon identifiable textural changes, color changes, changes in composition or changes in resistance to penetration in the intervals from which the samples were collected. Abrupt changes in soil type, as reflected in boring logs and/or cross sections may not actually occur, but instead, be transitional.

Depth to the water table is based upon observations made during the performance of the auger and SPT borings. This depth is an estimate and does not reflect the annual variations that would be expected in this area due to fluctuations in rainfall and rates of evapotranspiration.

6.3 Site Figures

The measurements used for the preparation of the figures in this report were made using the provided site plan and by estimating distances from existing structures and site features. Figures in this report were not prepared by a licensed land surveyor and should not be interpreted as such.

6.4 Unanticipated Soil Conditions



The analysis and recommendations submitted in this report are based upon the data obtained from soil borings performed at the locations indicated on Figure 2. This report does not reflect any variations that may occur between these borings.

The nature and extent of variations between borings may not become known until excavation begins. If variations appear, we may have to re-evaluate our recommendations after performing on-site observations and noting the characteristics of any variations.

6.5 Misinterpretation of Soil Engineering Report

GSE Engineering & Consulting, Inc. is responsible for the conclusions and opinions contained within this report based upon the data relating only to the specific project and location discussed herein. If others make the conclusions or recommendations based upon the data presented, those conclusions or recommendations are not the responsibility of GSE.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED made the ___ day of November, 1997, by International Business Machines Corporation, a New York corporation, hereinafter called the Grantor, to Waco, Inc., qualified to do business in Florida as Waco of Alabama, Inc., an Alabama corporation, having an address at 569 S. Edgewood Avenue, Jacksonville, FL 32205, hereinafter called the Grantee:

(Wherever used herein, the terms "Grantor" and "Grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

WITNESSETH: That the Grantor, for and in consideration of the sum of $10.00 and other good and valuable consideration, receipt and sufficiency whereof are hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the Grantee, all those certain parcels of land situated in Alachua County, Florida, and more particularly described in **Exhibit A** attached hereto and made a part hereof.

TOGETHER with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

SUBJECT TO:

1. Taxes for the year 1998 and subsequent years not yet due and payable.

2. Easements, restrictions, reservations, limitations and conditions of record, if any, provided this shall not operate to reimpose same.

3. All applicable zoning ordinances, other land use laws and regulations, and all applicable regulations and restrictions imposed by governmental authorities.

TO HAVE AND TO HOLD, the same in fee simple forever.

AND the Grantor hereby covenants with the Grantee that the Grantor is lawfully seized of said land in fee simple; that the Grantor has good right and lawful authority to sell and convey said land, and hereby warrants the title to said land and will defend the same against the lawful claims of all persons claiming by, through or under the said Grantor and none other.

IN WITNESS WHEREOF, the said Grantor has hereunto set its hand and seal the day and year first above written.

Signed, sealed and delivered
in our presence:

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 1 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 1, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 1 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $169,223, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements ($1,692,237.44) set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$183,637.07, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth ($1,836,370.73) in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer or successor shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $80,214.30 ($66,845.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $6,684.53 ($66,845.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

DESCRIPTION

A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA. BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHWEST CORNER OF AFORESAID SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 492.93 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT-OF-WAY); THENCE NORTH 41°36'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 908.43 FEET; THENCE SOUTH 48°23'09" EAST, DEPARTING SAID SOUTHERLY RIGHT OF WAY, A DISTANCE OF 50.00 FEET; THENCE NORTH 41°36'51" EAST, A DISTANCE OF 99.06 FEET; THENCE NORTH 48°% 09" WEST, A DISTANCE OF 99.06 FEET TO THE AFOREMENTIONED SOUTHERLY RIGHT OF WAY OF COUNTY ROAD NO. 235; THENCE NORTH 41°36'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 879.87 FEET; THENCE DEPARTING SAID SOUTHERLY RIGHT OF WAY LINE, THE FOLLOWING ELEVEN (11) COURSES: (1) SOUTH 48°19'09" EAST, A DISTANCE OF 285.89 FEET; (2) SOUTH 41°36'51" WEST, A DISTANCE OF 169.39 FEET; (3) SOUTH 18°32'09" EAST, A DISTANCE OF 278.66 FEET; (4) SOUTH 41°36'51" WEST, A DISTANCE OF 519.24 FEET; (5) NORTH 48°23'09" WEST, A DISTANCE OF 374.69 FEET; (6) SOUTH 41°36'51" WEST, A DISTANCE OF 118.16 FEET; (7) SOUTH 48°19'09" EAST, A DISTANCE OF 112.89 FEET; (8) SOUTH 41°36'51" WEST, A DISTANCE OF 139.00 FEET; (9) SOUTH 48°23'09" EAST, A DISTANCE OF 210.71 FEET; (10) SOUTH 41°36'51" WEST, A DISTANCE OF 280.47 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE NORTHEAST HAVING A RADIUS OF 175.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 61°07'21" EAST, 76.09 FEET; (11) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 56°27'45", AN ARC LENGTH OF 29.06 FEET TO THE END OF SAID CURVE; (11) THENCE DEPARTING SAID CURVE, SOUTH 26°39'04" WEST, A DISTANCE OF 133.18 FEET TO THE SOUTH LINE OF AFOREMENTIONED SECTION 28; THENCE SOUTH 89°20'56" WEST, ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 1003.72 FEET TO THE POINT OF BEGINNING.

PARCEL OF LAND CONTAINING 21.29 ACRES MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), WHICH HOLDS A BEARING OF SOUTH 89°20'56" WEST FOR THE SOUTH LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88), BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBERED D178, WITH A PUBLISHED ELEVATION OF 180.53 FEET (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1: 5,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   FRONT = 15'
   REAR = 5'
   SIDE = 5'
   20 FEET ALONG GARAGES = 15'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL No. 12001C 0179 D, COMMUNITY PANEL NO. "120688 0179 D" EFFECTIVE DATE JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORMWATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNER'S ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNER'S ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 2.E.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS, AS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (9) FLORIDA STATUTES.
8. ALL LINES ARE NON-RADIAL UNLESS NOTED OTHERWISE.
9. THIS SURVEY IS A TOTAL OF TWENTY SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS ONE (1) THROUGH FORTY-TWO (42).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 1

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 1 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 32 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 8,000 gallons per day (32 lots x 250 gallons per day) of wastewater capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 8,800 gallons per day (32 lots x 275 gallons per day) of water capacity for the 32 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 152 Average Annual Daily Trips ("AADT") and 16 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 305 Average Annual Daily Trips ("AADT") and 33 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .42 acres (2.6 persons per household x 32 units x 5 acres per 1,000 persons) of recreation capacity for the 32 units proposed in Fletceher Trace Phase 1 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 60.74 tons per year (0.73 tons per capita per year x 2.6 persons per household x 32 units) of solid waste capacity for the 32 units proposed in Fletcher Trace Phase 1 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 32 units proposed in Fletcher Trace Phase 1.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 2 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 2, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 2 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $59,965.35, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$599,653.52] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$16,258.29, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$162,582.89] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $60,778.99 ($50,649.16 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $5,064.92 ($50,649.16 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 2

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 2 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 42 residential lots (14 detached and 28 attached);

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 10,500 gallons per day (42 lots x 250 gallons per day) of wastewater capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 11,550 gallons per day (42 lots x 275 gallons per day) of water capacity for the 42 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 200 Average Annual Daily Trips ("AADT") and 21 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 400 Average Annual Daily Trips ("AADT") and 43 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .55 acres (2.6 persons per household x 42 units x 5 acres per 1,000 persons) of recreation capacity for the 42 units proposed in Fletceher Trace Phase 2 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 79.72 tons per year (0.73 tons per capita per year x 2.6 persons per household x 42 units) of solid waste capacity for the 42 units proposed in Fletcher Trace Phase 2 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 2 (two) student stations in the Alachua SCSA for high schools, for the 42 units proposed in Fletcher Trace Phase 2.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 3 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 3, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 3 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $113,784.92, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$1,137,849.21] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$47,436.64, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$474,366.38] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $90,945.90 ($75,788.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $7,578.83 ($75,788.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

SHEET ONE OF TWO

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2440, PAGE 1824, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 89°34'19" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 491.10 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°48'51" EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2352.87 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE NORTH 41°48'51" EAST, A DISTANCE OF 1870.34 FEET TO THE WEST LINE OF THE NORTHWEST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 297.37 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 89°34'19" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 2637.73 FEET; THENCE, DEPARTING SAID WEST LINE THE FOLLOWING NINE (9) COURSES; (1) SOUTH 84°21'49" WEST, A DISTANCE OF 68.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST; HAVING A RADIUS OF 180.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°16'21" WEST 189.84 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 64°17'39", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°02'46" WEST, A DISTANCE OF 190.87 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST; HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 41°59'13" EAST 35.74 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 99°09'09", AN ARC LENGTH OF 34.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°34'11" EAST, A DISTANCE OF 46.95 FEET; (6) SOUTH 41°48'49" WEST, A DISTANCE OF 420.48 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST; HAVING A RADIUS OF 208.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°36'39" WEST 109.63 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°34'54", AN ARC LENGTH OF 189.84 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°06'51" WEST A DISTANCE OF 511.86 FEET; (9) NORTH 48°53'09" WEST, A DISTANCE OF 296.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.58 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 89°34'19" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER D578, WITH A PUBLISHED ELEVATION OF 156.40' (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1' IN 10,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   - FRONT = 15'
   - REAR = 5'
   - SIDE = 5'
   - STREET FACING GARAGE = 15'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X" AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 548, COMMUNITY PANEL NO. "120060 0120 D", EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNERS ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 3.8.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (9) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 3

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 3 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 37 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 9,250 gallons per day (37 lots x 250 gallons per day) of wastewater capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 10,175 gallons per day (37 lots x 275 gallons per day) of water capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 176 Average Annual Daily Trips ("AADT") and 19 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 352 Average Annual Daily Trips ("AADT") and 38 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .48acres (2.6 persons per household x 37 units x 5 acres per 1,000 persons) of recreation capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 70.23 tons per year (0.73 tons per capita per year x 2.6 persons per household x 37 units) of solid waste capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 37 units proposed in Fletcher Trace Phase 3.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

1. EXECUTIVE SUMMARY

CHW Professional Consultants, Inc. (CHW) has prepared the following Traffic Impact Analysis (TIA) for a development proposed on the south side of CR 235, just east of CR 235A, in the City of Alachua, Florida. The development is commonly referred to as Fletcher Trace. The concept plan for the proposed development is provided in **Appendix A**.

The purpose of this study is to identify the transportation impacts of the proposed project on the transportation network and if deficiencies are identified to recommend mitigation strategies to address the deficiencies. This TIA is required by Alachua County, and the City of Alachua. The study is being prepared for Fletcher Family Companies and is in conformance with the methodology letter submitted on May 26, 2022, see **Appendix B**.

The following developments are being proposed at this site, with an anticipated 2029 build-out:

- 344 Dwelling Units – Single-Family Detached Housing
- 128 Dwelling Units – Multifamily Housing (Low-Rise)

The following site access type and locations are being proposed:

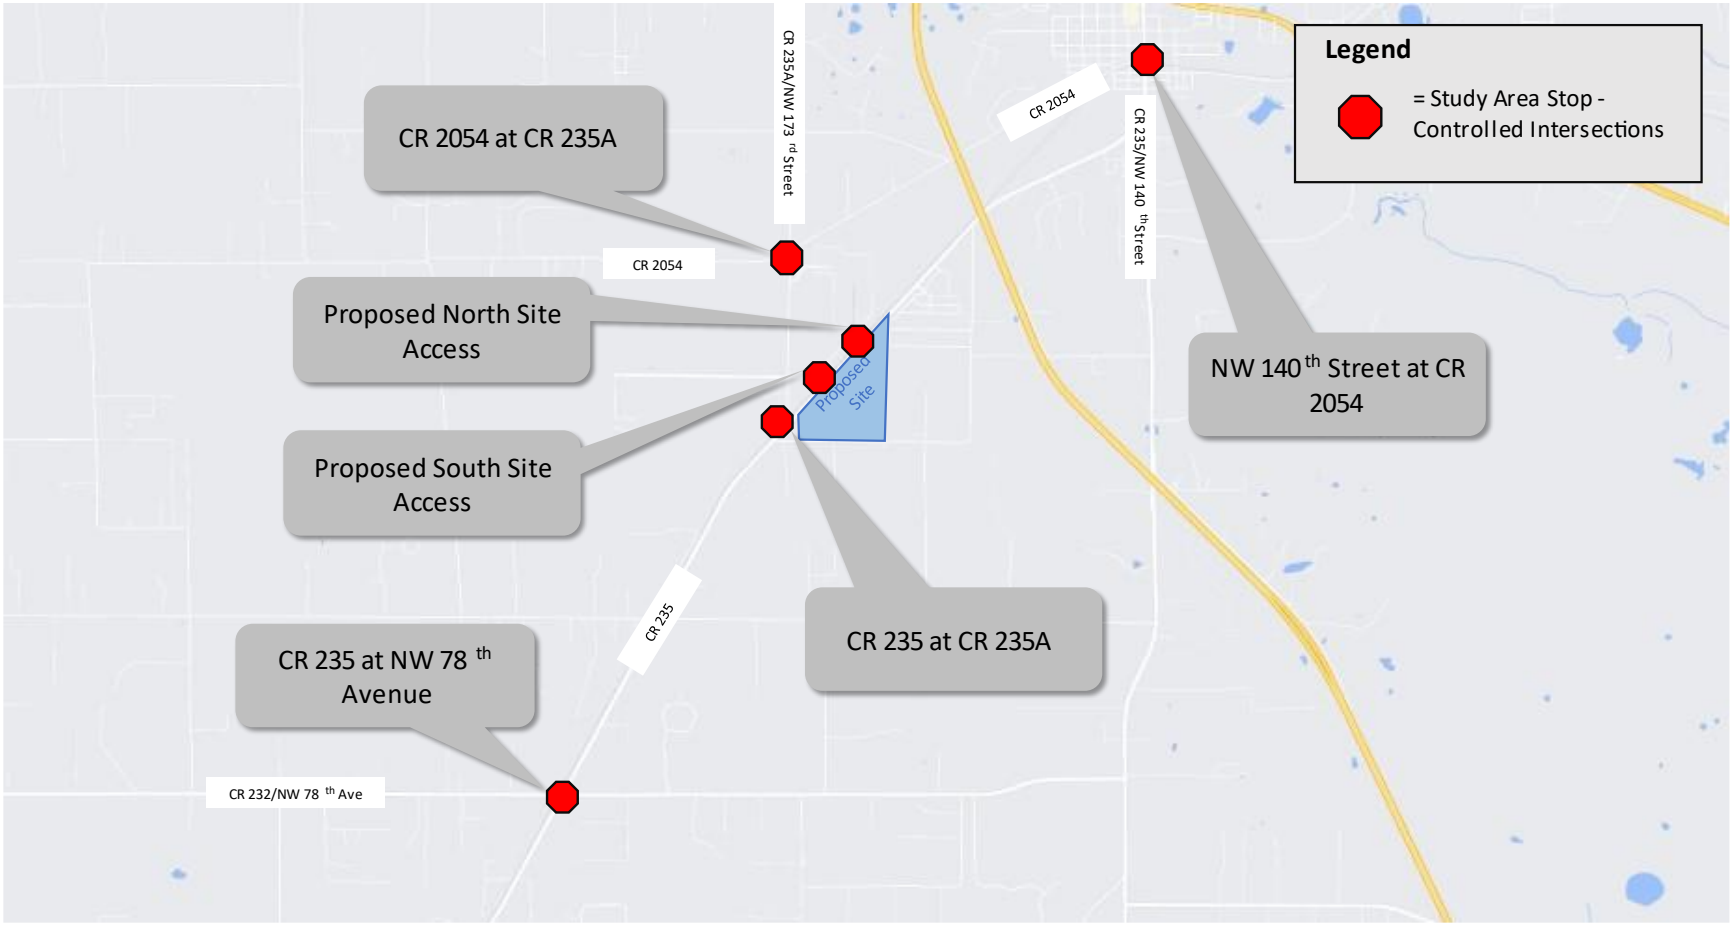
- Full access at the CR 235/Proposed North Site Access intersection; and
- Full access at the CR 235/ Proposed South Site Access intersection;

2. STUDY INTERSECTIONS AND SEGMENTS

2.1. Study Intersections

CHW, in coordination with Alachua County, and the City of Alachua and identified the following intersections to be significantly impacted by the proposed development. The study area intersections are provided in **Figure 1**.

- NW 140th Street (CR 235)/CR 2054 (Peggy Road) intersection;
- CR 235A (NW 173rd Street)/CR 2054 (Peggy Road) intersection;
- CR 235/Proposed North Site Access intersection;
- CR 235/ Proposed South Site Access intersection;
- CR 235/CR 235A (NW 173rd Street) intersection; and
- CR 235/NW 78th Avenue (CR 232) intersection.



2.2. Study Roadway Segments

CR 235 and CR 235A are 2-lane collector roads adjacent to the project that were evaluated as part of this study. If the anticipated project trip exceed 5% of the maximum service volume (MSV), the roadway was further analyzed to determine whether the build-out condition exceeds the MSV. As demonstrated in **Table 1** CR 235 from NW 143rd Place to South City limit, exceeds 5% of the maximum service volume, so an this roadway segment is studied in Section 6.3.

Table 1: Study Roadway Segments Determination

ROAD NAME	FROM	TO	Comp. Plan MSV[1]	Net New Total Daily Project Trips[2]	Trip Dist %[3]	Net New Total Project Trips	% (Net New Total Projec Trips/MSV)	Include in Study Area (> 5%) - Y/N
CR 235	NW 143RD PLACE	SOUTH CITY LIMIT	15,120		67%	2,707	17.90%	Y
CR 235A	US 441	CR 235	15,120	4,040	9%	364	2.41%	N

Figure 1 | Study Intersections

3. TRIP GENERATION

The Institute of Transportation Engineer's (ITE) Trip Generation Manual, 11th Edition was used to develop the trip generation for the site. The trip generation is provided in **Table 2**.

Table 2 | Fletcher Trace Trip Generation

Fletcher Trace Trip Generation									
Land Use	**ITE LU Code**	**Variable DU**	**Daily**	**AM Peak**			**PM Peak**		
				Total	**In**	**Out**	**Total**	**In**	**Out**
Phase 1									
Single-Family Detached Housing	210	344	3,144	229	60	169	317	200	117
Multifamily Housing (Low-Rise)	220	128	896	63	15	48	76	48	28
Total			*4,040*	*292*	*75*	*217*	*393*	*248*	*145*

4. DATA COLLECTION

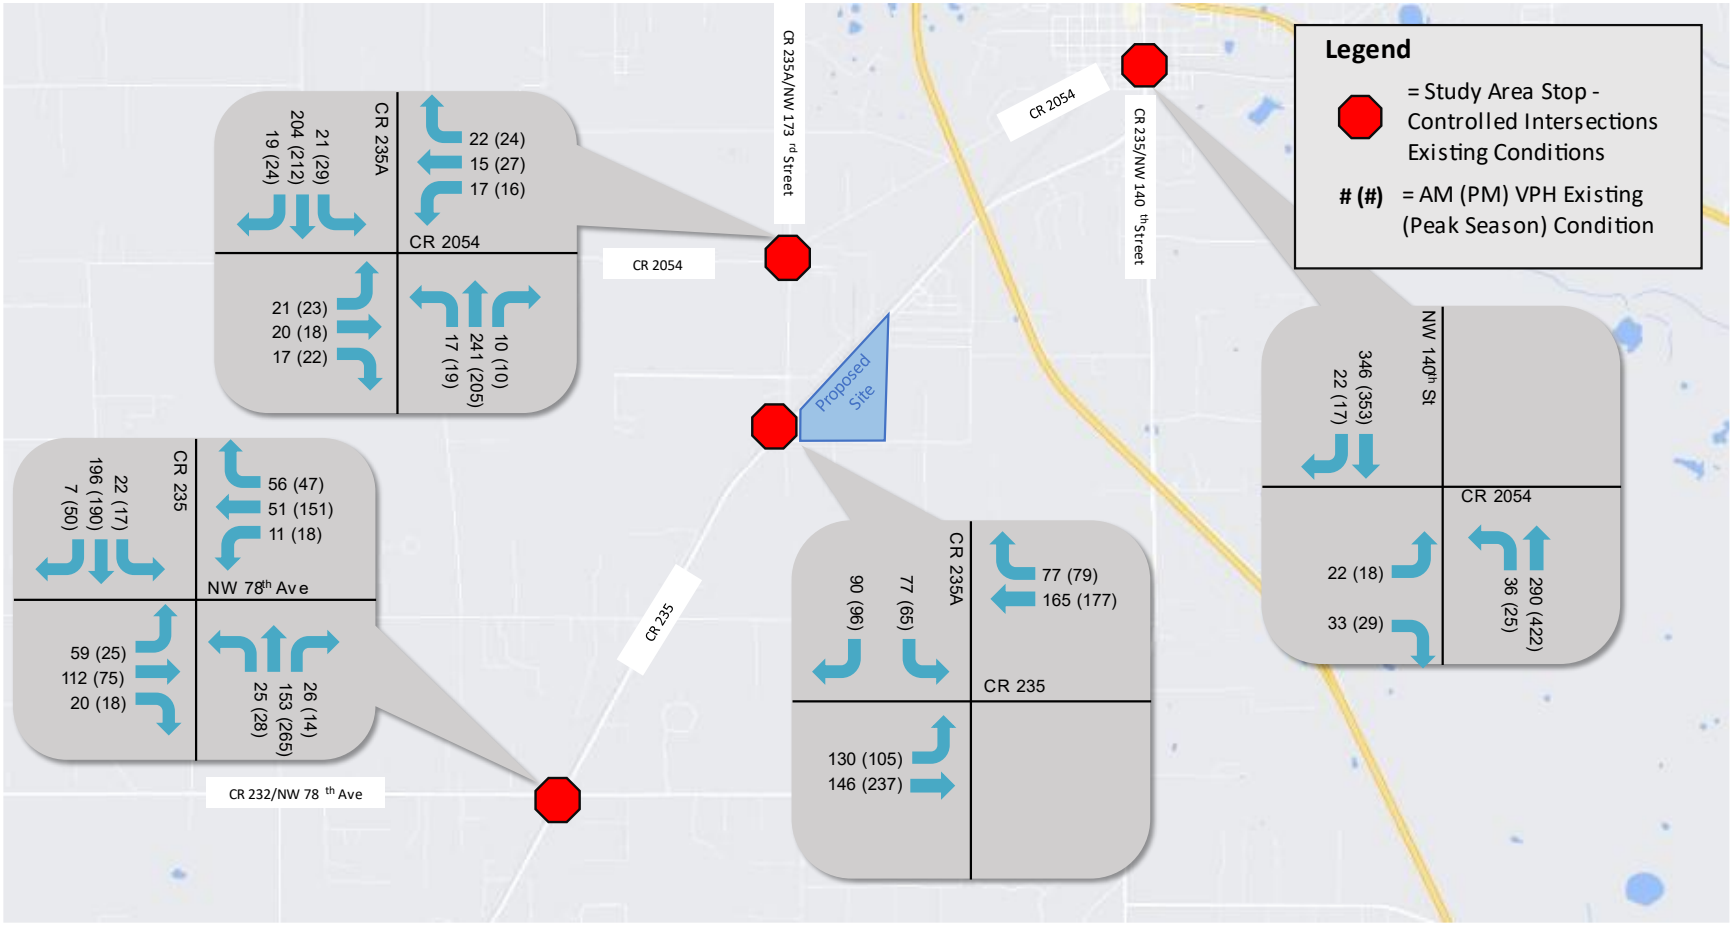
Turning movement counts were collected during the AM and PM peak hours on April 19th, 2022, for the following intersections: NW 140th Street/CR 2054 intersection, CR 235A /CR 2054 intersection, CR 235/CR 235A intersection and CR 235 at CR 232/NW 78th Avenue. The raw count data is provided in **Appendix C**.

The count data was adjusted based on the seasonal adjustment factor. **Figure 2** provides the existing (peak season) turning movements at the study intersections.

Reserved trips provided by the City of Alachua were included to the background volumes where applicable, as provided in **Appendix D**.

The project has an anticipated full build-out in 2029. Growth rates were determined based on historical ADT where available to derive the 2029 background volumes. A minimum of 1.0% yearly growth rate was used for roadways with historical growth rates less than 1.0% and 2.0% for roadways with no historical growth rates. **Appendix E** provides the data used to determine the peak season and background traffic volumes. **Appendix F** provides the peak season and background turning movements at all study intersections in tabular form. **Figure 3** illustrates the background conditions for 2029 at all study intersections.

Figure 2 | Existing (Peak Season) Turning Movements



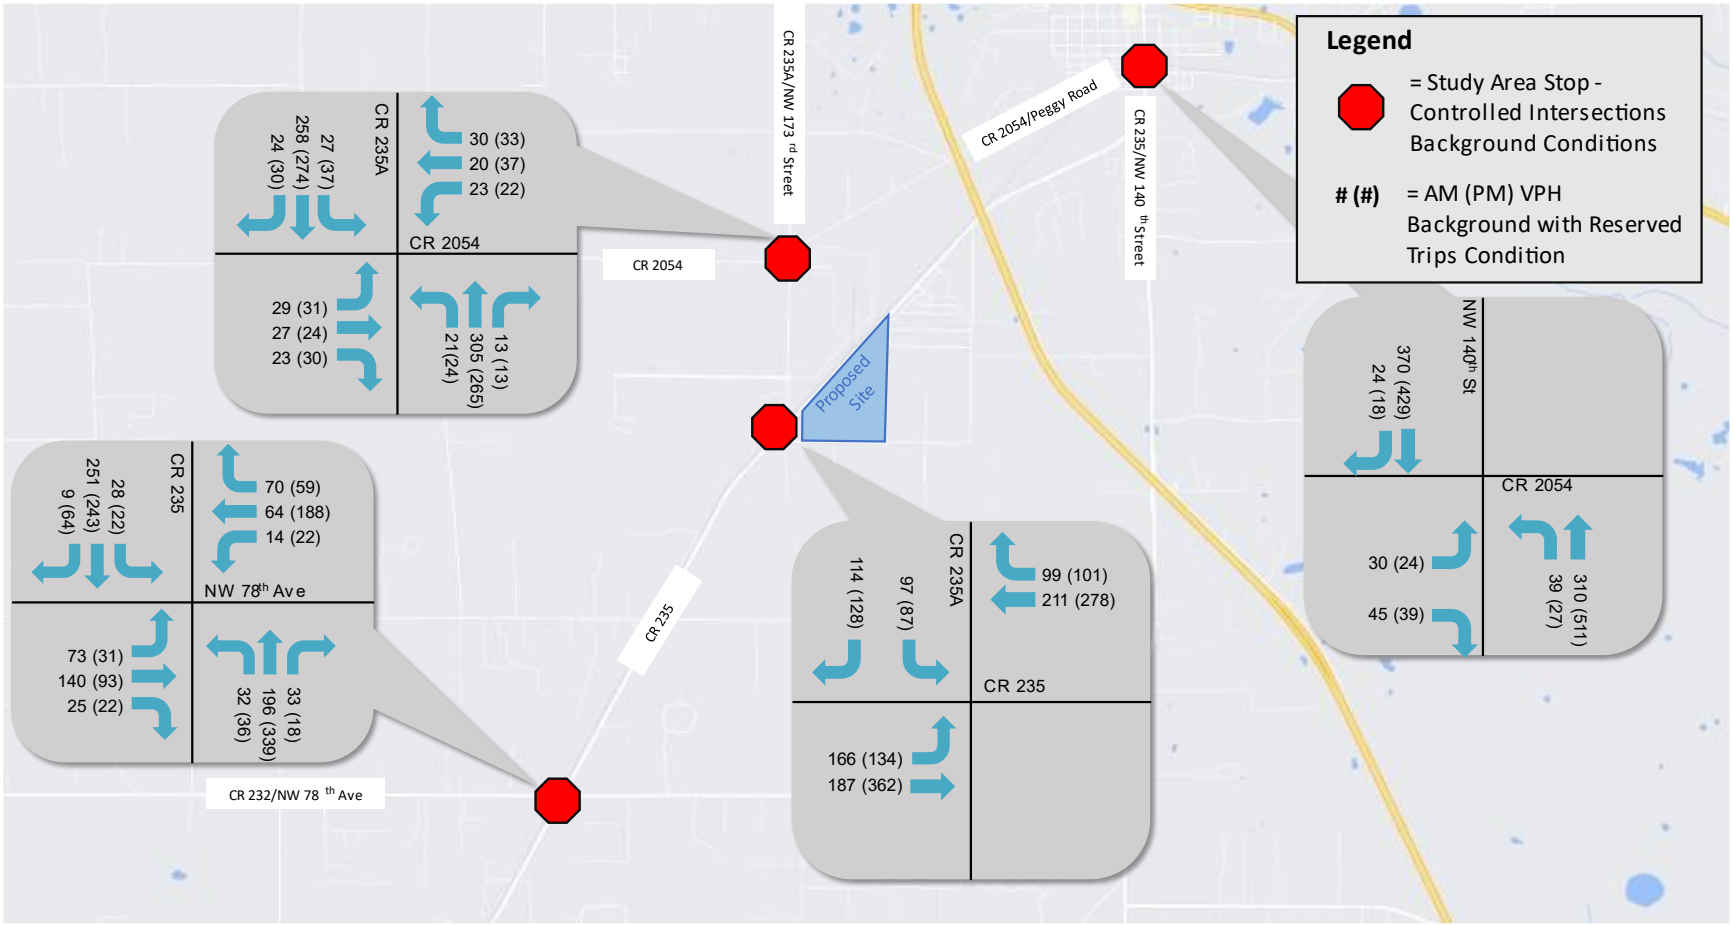


Figure 3 | Background Turning Movements

5. TRIP DISTRIBUTION

The project trip distribution for the Fletcher Trace build-out is expected to mimic the existing patterns of the Savannah Station Phase 1 project trips. A turning movement count was performed during the PM peak two hours of 4:00 to 6:00 PM at the intersection of CR 235 at NW 123rd Avenue, as provided in **Appendix G.** Based on the turning movement counts from Savannah Station Phase 1 the following project trip distribution that was utilized for this study:

- To/from north = 67%
- To/from south = 33%

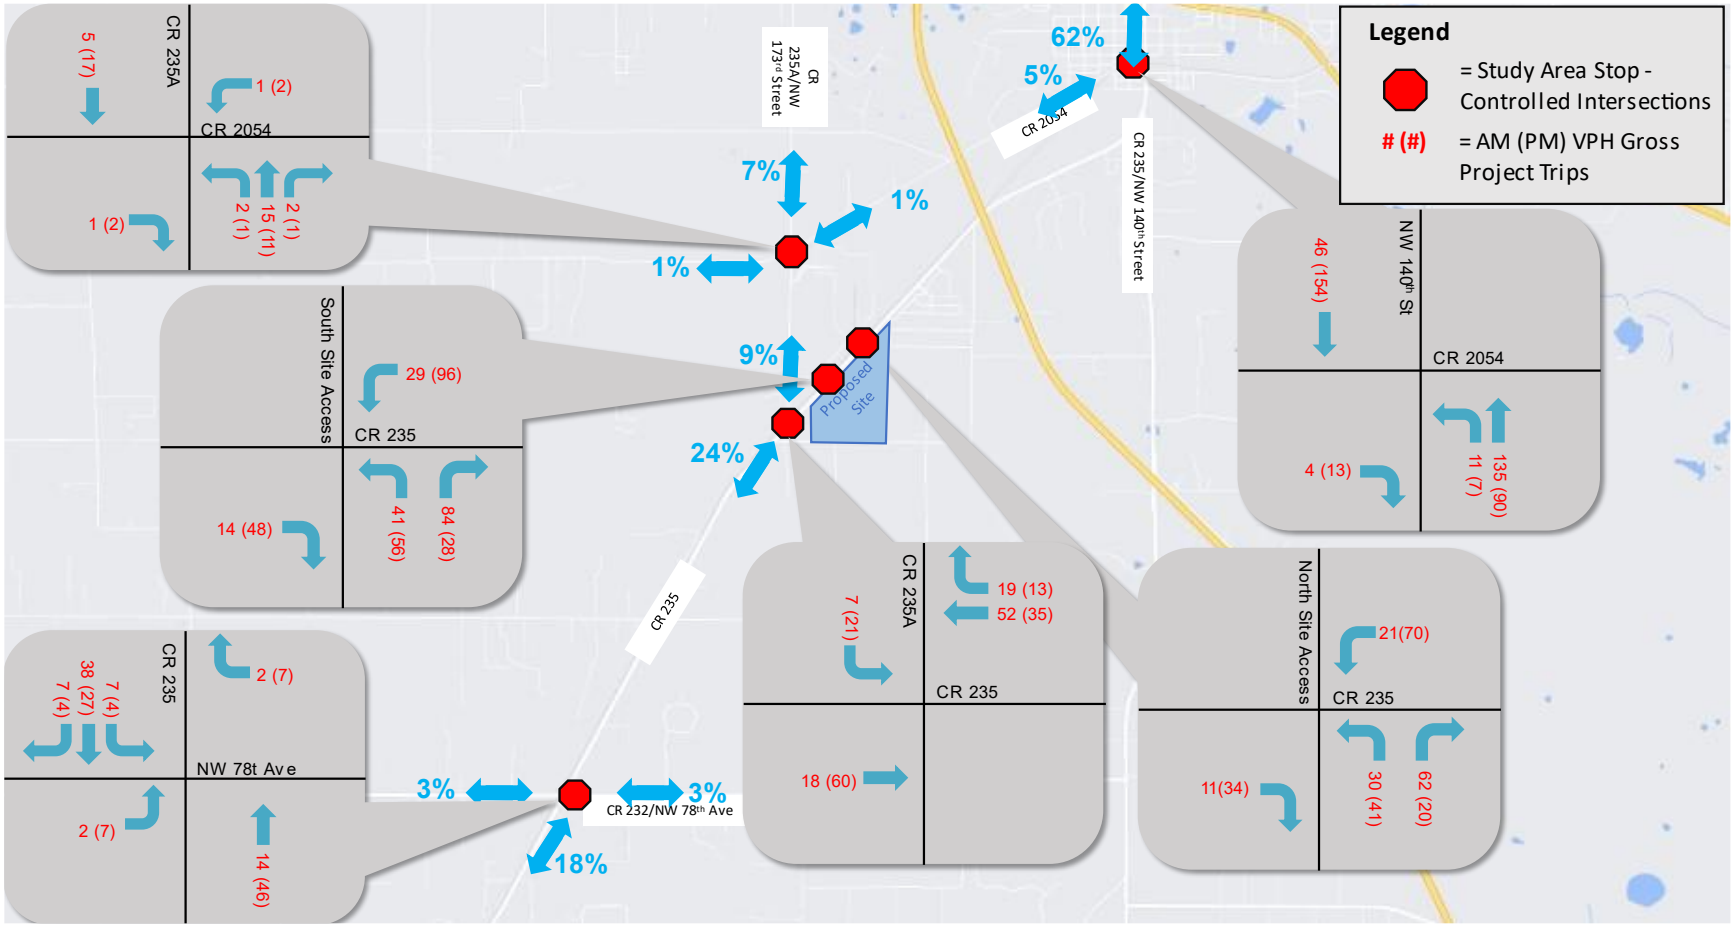
The trip distribution at all other study area intersections was be based on the turning movement count data from the intersections. For example, at the intersection of CR 235 at CR 235A the project trips will either be to/from the north on CR 235A or to/from the west on CR 235. The trip distribution to/from the north was be calculated as follows, based on the total AM and PM count volumes, as provided in **Appendix G**:

(SBL + WBR) / (EBT + WBT + SBL + WBR)

The project trip distribution at the project's connections on CR 235 are based on the layout of the project site, as shown in **Appendix G**. Approximately 50% of the multi-family housing project trips are expected to use the CR 235/Proposed North site access connection and the remaining multi-family housing trips will use the CR 235/Proposed South site access connection. Approximately 40% of the single-family detached housing will use the CR 235/Proposed North site access connection and the remaining 60% will use the CR 235/Proposed South site access connection.

The project trips are shown in **Figure 4** and the combined background with reserved trips and project trips form the build-out condition illustrated in **Figure 5.**

Figure 4 | Project Trip Turning Movements



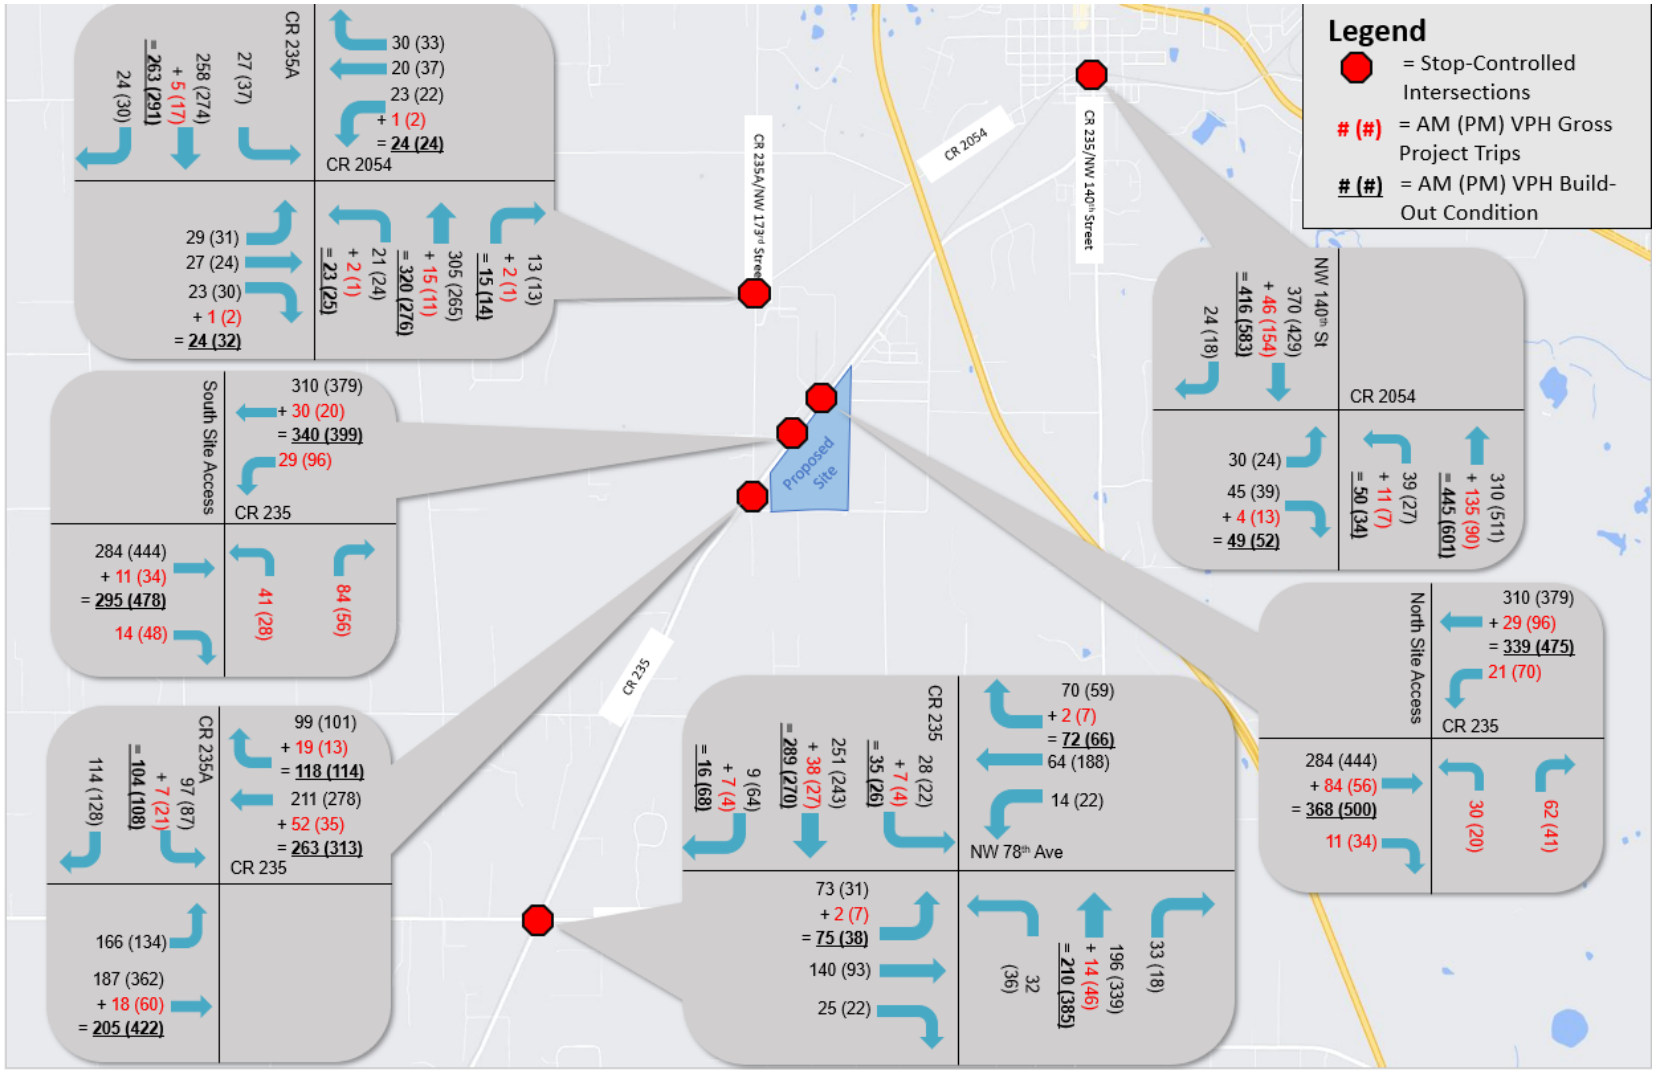


Figure 5 | Build-out Turning Movements

6. ANALYSIS

The analysis is divided into three parts: 1) analysis of intersections within the study area, 2) turn lane warrant analysis, and 3) roadway segment analysis.

6.1. Intersection Analysis

The analysis of the intersection within the study area covered three scenarios, as follows:

- Existing (Peak Season) Conditions;
- Background Conditions ; and
- Build-out Conditions.

All study intersections were analyzed during the AM and PM peak hours. The objectives of the analysis were to identify level of service or operational deficiencies and if necessary, model potential improvement to mitigate deficiencies. Resulting indicators for intersection operational performance include level of service (LOS), delay, volume to capacity (v/c) ratio, and the 95th percentile queue length.

For this analysis Highway Capacity Software 7 (HCS 7) was used to analyze stop sign controlled intersections.

The operational performance of the intersections is provided in **Table 3** and **Table 4**. The HCS reports are provided in **Appendix H**. Intersection deficiencies are highlighted in **Table 3** and **Table 4**. Deficiencies are v/c less than 1.0, 95th percentile queue lengths exceeding storage lengths, and LOS of F for the main street through movements and intersection totals.

Section 6.3 will demonstrate the left-turn lanes are recommended on CR 235 at the site access intersections. Additionally, a right-turn lane is recommended on CR 235 at the south site access and a right-turn taper is recommended at the north site access. These turn-lane improvements are included in the intersection analysis.

Yellow highlight = deficiency occurring without project traffic

Red highlight = deficiency occurs due to added project trips

*NR = Not Reported

As indicated in **Tables 3** and **Table 4** the following deficiency occurs with the addition of project trips.

The westbound movement at the intersection of CR 235 at NW 78th Avenue has volume exceeding capacity during the PM build-out. The volume of project trips forecasted to make a westbound right turn is low at only 7 vehicles per hour. During the PM background scenario, the westbound movement operates with a v/c near capacity at .98. Therefore, the background volumes and not the project trips are what cause the operational issues at this intersection. No improvements are recommended at this intersection.

6.2. Turn Lane Warrant Analysis

The Alachua County Land Development Code requires deceleration (right-turn) tapers for Class III and IV connections to a two-lane collector or arterial roadway with a design speed of 50 MPH or greater. A right turn lane is required if warranted. This site proposes a Class III connection onto CR 235 which has a design speed of 60 MPH, assuming a design speed 5 MPH over the posted speed of 55 MPH.

A right-turn lane warrant analysis, based on the guidelines of the "FDOT Access Management Guidebook", was used to determine whether a right-turn lane is warranted. The thresholds for warranting a right-turn lane range from 35 - 55 right-turns per hour, per the "FDOT Access Management Guidebook". As illustrated in build-out **Figure 4**, the maximum number of right turning vehicles at the CR 235/Proposed North Site Access intersection is 34 during the PM peak hour and at the CR 235/Proposed South Site Access intersection is 48 during the PM peak hour. Therefore, a northbound right-turn lane at the CR 235/Proposed North Site Access intersection is not warranted and not recommended to support this project however a northbound right turn taper is recommended based on the Alachua County Land Development Code requirements. A northbound right-turn lane at the CR 235/Proposed South Site Access intersection is warranted and recommended to support this project. The results are provided in **Appendix J**.

The Alachua County Unified Land Development Code requires a left-turn lane for developments with 50 or more total peak hour trips connecting to a collector or arterial road. As illustrated in build-out **Figure 4**, the maximum number of left turning vehicles at the CR 235/Proposed North Site Access intersection is 70 during the PM peak hour and at the CR 235/Proposed South Site Access intersection is 96 during the PM peak hour. Therefore, left-turn lanes are recommended at both the CR 235/Proposed North Site

Access intersection and CR 235/Proposed South Site Access intersection based on the Alachua County Land Development Code Requirements.

6.3. Roadway Segment Analysis

The study roadway segments for the future roadway segment conditions analysis were determined where the net new traffic from the proposed project is at least 5% of the maximum service volume (MSV) as provided in **Table 1**.

The future roadway segment conditions analysis was completed for roadway segments within the study area. Historic growth rates were applied to the 2022 AADT. Build-out project trips were added to the background trips and applied to each roadway segment. **Table 5** shows that none of the roadway segments in the study area had build-out volumes that exceeded the daily service volume. Therefore, no roadway segment improvements are recommended.

Table 5 | Future Conditions (2029) Roadway Segment LOS Analysis

ROAD NAME	FROM	TO	Comp. Plan MSV[1]	ADOPTED LOS STANDARD	Ex. Trips - 2022 AADT[1]	Back-ground Trips - 2029 AADT[2]	Reserved Trips-AADT[3]	Net New Total Project Trips	Build-out	Exceeds MSV/ Daily Service Volume - Y/N
CR 235	NW 143RD PLACE	SOUTH CITY LIMIT	15,120	D	6,180	7,815	1,018	2,707	11,540	N

(1) Taken from 2022 City of Alachua Annual Concurrency Status Report
(2) Calculated using Historical Growth Rate
(3) Reserved trips provided by the City of Alachua

7. CONCLUSIONS AND RECOMMENDATIONS

The following transportation improvements are recommended to support the project traffic at this site:

- Install a westbound left-turn lane on CR 235 at the south site access.
- Install a westbound left-turn lane on CR 235 at the north site access.
- Install a full-length eastbound right-turn lane on CR 235 at the south site access.
- Install an eastbound right-turn taper on CR 235 at the north site access.

Re: Fletcher Trace, City of Alachua, FL

Dear Thomas and Justin,

CHW is preparing a Traffic Impact Analysis (TIA) Methodology for the proposed Fletcher Trace development consisting of a single-family detached housing and multifamily housing (low-rise) located northeast of the intersection of CR 235 and NW 173rd Street in the City of Alachua, Florida. The project proposes a two access points from CR 235 to the project site, as illustrated in the concept plan provided in **Attachment A**.

Please review the methodology and either provide comment for the purposes of modification/ clarification or provide acceptance.

Study Area

The study area will consist of the following intersections:

- CR 235/NW 140th Street at CR 2054;
- CR 235A and CR 2054;
- CR 235 at Proposed North Site Access;
- CR 235 at Proposed South Site Access;
- CR 235 and CR 235A/NW 173rd Street; and
- CR 235 at CR 232/NW 78th Avenue.

Land Use and Trip Generation

The trip generation for the site will be based on the Institute of Transportation Engineer's (ITE) Trip Generation Manual, 11th Edition. The estimated trip generation is provided below. The TIA will estimate the trip generation based on the number of dwelling units.

Fletcher Trace Trip Generation									
Land Use	ITE LU Code	Variable DU	Daily	AM Peak			PM Peak		
				Total	In	Out	Total	In	Out
Single-Family Detached Housing	210	344	3,144	229	60	169	317	200	117
Multifamily Housing (Low-Rise)	220	128	896	63	15	48	76	48	28
Total			*4,040*	*292*	*75*	*217*	*393*	*248*	*145*

Data Collection

Turning movement counts during the AM and PM peak two hours, during a single day, will be utilized for analysis. Counts will be collected on a Tuesday, Wednesday, or Thursday. The counts will include pedestrians, bicycles, and trucks, in addition to passenger vehicles.

Turning movement counts will be performed at the following intersection:

- CR 235/NW 140th Street at CR 2054;
- CR 235A and CR 2054;
- CR 235 and CR 235A/NW 173rd Street; and
- CR 235 at CR 232/NW 78th Avenue.

The count data will be adjusted based on the seasonal adjustment factor and by the growth rate to forecast the estimated background traffic of the project build-out year 2029. The growth rate will be determined based on historical ADT where available.

Trip Distribution

The project trip distribution for the Fletcher Trace build-out is expected to mimic the existing patterns of the Savannah Station Phase 1 project trips. A turning movement count was performed during the PM peak two hours of 4:00 to 6:00 PM at the intersection of CR 235 at NW 123rd Avenue, as provided in **Attachment B**. Based on the turning movement count the Savannah Station Phase 1 project trip distribution that will be utilized for the Fletcher Trace TIS is provided below:

- To/from north = 67%
- To/from south = 33%

The trip distribution at all other study area intersections will be based on the turning movement count data from the intersections. For example, at the intersection of CR 235 at CR 235A the project trips will either be to/from the north on CR 235A or to/from the west on CR 235. The trip distribution to/from the north will be calculated as follows, based on the total AM and PM count volumes:

(SBL + WBR) / (EBT + WBT + SBL + WBR)

Analysis

The intersection analysis will be performed at the intersections provided in the study area during the AM and PM peak hours, under the following scenarios:

- Existing (peak season) conditions
- Background conditions
- Build-out conditions
- Build-out with improvements, if applicable

The intersection operation analysis will review the delay, LOS, V/C, and 95th percentile queue length of each intersection movement as well as the intersection as a whole. The non-signalized intersections will be analyzed using HCS 7. The reports will be provided in the appendices.

Left and right turn lane warrant analyses will be performed at the site access intersections. If turn lanes are warranted the turn lane lengths will be calculated.

A roadway segment level of service analysis will be provided for CR 235 and CR 235A in accordance with City of Alachua requirements.

Any needed roadway modifications based on this analysis will be identified and modeled to demonstrate that the improvement mitigates the deficiency.

Report

A draft report, including, as a minimum, the following will be submitted for review and comment.

- Study Area Map
- Existing Conditions
- Trip Generation
- Data Collection
- Trip Distribution
- Analysis
  - AM and PM Intersection LOS, Delay, V/C and 95th Percentile Queue Length Analysis
  - Left and Right Turn Lane Warrants
  - Roadway Segment Analysis
- Conclusion and Recommendations
- Appendices with Supporting Documentation

Following any revisions, based upon staff comments, we will prepare a final signed and sealed report.

Please provide acceptance if you concur with this methodology.

Thank you for your review and consideration.

Sincerely,
CHW

Brian Snyder, P.E.
Project Manager

** Formula: Comp Plan MSV - (Existing Traffic + Reserved Trips from Development Orders with Concurrency Reservation.)
^ County Facility AADT counts provided by Alachua County Public Works, April 2022.
^^ AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.

Appendix I
Turn Lane Warrant Analysis

When Not to Consider Exclusive Right-Turn Lanes

- Dense or built-out corridors with limited space
- Right-turn lane that would negatively impact pedestrians or bicyclists
- Vehicular movements from driveways or median openings that cross the right-turn lane resulting in multiple threat crashes
- Context classifications C2T, C4, C5, or C6

When Exclusive Right-Turn Lanes are Beneficial

There are instances when adding an exclusive right-turn lane for unsignalized driveways are beneficial to traffic operations and safety. ***Table 27*** provides some guidance for this situation based on the speed limit of the roadway and how many right turns occur per hour. Locations where the Auto and Truck Modal Emphasis is "High" may be appropriate for consideration of Exclusive Right Turn Lanes.

Table 27 – Recommended Guidelines for Exclusive Right-Turn Lanes to Unsignalized Driveway[10]

Roadway Posted Speed Limit	Number of Right Turns Per Hour
45 mph or less	80 – 125[1]
Over 45 mph	35 – 55[2]
Note: A posted speed limit of 45 mph may be used with these thresholds if the operating speeds are known to be over 45 mph during the time of peak right turn demand.	
Note on traffic projections: Projecting turning volumes is, at best, a knowledgeable estimate. Keep this in mind especially if the projections of right turns are close to meeting the guidelines. In that case, consider requiring the turn lane.	
[1] The lower threshold of 80 right-turn vehicles per hour would be most used for higher volume (greater than 600 vehicles per hour, per lane in one direction on the major roadway) or two-lane roads where lateral movement is restricted. The 125 right-turn vehicles per hour upper threshold would be most appropriate on lower volume roadways, multilane highways, or driveways with a large entry radius (50 feet or greater).	
[2] The lower threshold of 35 right-turn vehicles per hour would be most appropriately used on higher volume two-lane roadways where lateral movement is restricted. The 55 right-turn vehicles per hour upper threshold would be most appropriate on lower volume roadways, multilane highways, or driveways with large entry radius (50 feet or greater).	

Source: NCHRP Report 420 (Impacts of Access Management Techniques)

CR 235/North Site Access
EBR
AM(PM)
11(34)

CR 235/South Site Access
EBR
AM(PM)
14(48)

These recommendations are primarily based on the research done in NCHRP Report 420, Impacts of Access Management Techniques, Chapter 4 – Unsignalized Access Spacing (Technique 1B), and Use of Speed Differential as a Measure to Evaluate the Need for Right-Turn Deceleration Lane at Unsignalized Intersections.

In the *NCHRP Report 420*, the observed high-speed roads, 30 to 40 right-turn vehicles per hour caused evasive maneuvers on 5 - 10 percent of the following through vehicles. For lower speed roadways, 80 to 110 right-turn vehicles caused 15 - 20 percent of the following through vehicles to make evasive maneuvers. The choice of acceptable percentages of through vehicles impacted is a decision based on reasonable expectations of the different roadways.

In this study, by modeling speed differentials, a better understanding of the impacts of through volume and driveway radius was discovered.

[10] May not be appropriate for signalized locations where signal phasing plays an important role in determining the need for right turn lanes.

REQUEST FOR PROPOSALS FIRE STATION HVAC REPLACEMENT

The City of High Springs seeks Request for Proposals from State of Florida licensed and insured HVAC contractors for the replacement of one existing HVAC split system, associated ductwork, and controls to improve building humidity control and ventilation, including incidental electrical power, roofing, and general trades scopes of work, as shown on the attached Construction Documents dated 12/03/2024. Contractors with experience working in critical facilities such as Fire/EMS stations, police stations, emergency operations centers, and/or hospitals are preferred.

To be considered, the Firm or Individual must submit an original and three (3) copies of the RFP in a sealed envelope or package, clearly marked with the Firm's or individual's name and address, and the words "RFP No. (2025-01) Fire Station HVAC Replacement".

RFP's will be received by hand delivery, overnight mail, or mail to:

City of High Springs
Attention: City Clerk's Office
23718 W US HWY 27
High Springs, FL32643

Qualification packet must be submitted to the Office of the City Clerk by 4:00 pm, on February 18, 2025.

LATE SUBMITTALS RECEIVED AFTER THE AFOREMENTIONED DEADLINE DATE, EITHER BY MAIL OR OTHERWISE, WILL NOT BE CONSIDERED AND WILL BE RETURNED UNOPENED. THE TIME OF RECEIPT WILL BE DETERMINED BY THE TIME RECEIVED IN THE CITY OF HIGH SPRINGS CITY HALL—CITY CLERK'S OFFICE. IT IS THE SOLE RESPONSIBILITY OF THE FIRM OR INDIVIDUAL FOR ASSURING THAT THE RFP IS RECEIVED BY THE DESIGNATED DATE. NO FAXED, ELECTRONIC, OR ORAL RFP WILL BE ACCEPTED.

THE CITY RESERVES THE RIGHT TO ACCEPT OR REJECT ANY/OR ALL SUBMISSIONS, TO ACCEPT ALL OR ANY PART OF THE SUBMISSION, TO WAIVE IRREGULARITIES AND TECHNICALITIES, AND TO REQUEST RESUBMISSION, IF IT IS DEEMED IN THE BEST INTEREST OF THE CITY.

RFP SCHEDULE

The City's schedule (timetable) for this Solicitation is as follows:

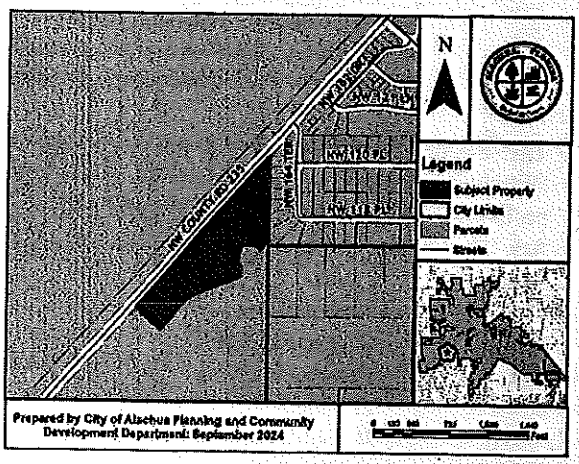
Advertising.....(January 30, 2025)

Deadline for Questions.....(February 10, 2025)

Proposal Due Date.....(February 18, 2025)

City Commission Meeting.....(February 27, 2025)

ACCEPTANCE AND REJECTIONS



The City reserves the right to reject any or all submissions with or without cause; to waive any or all irregularities with regard to the specification and to select the Respondent offering the greatest benefit to the City. Questions, clarification, or further information regarding the RFP may be obtained at the City Clerk's Office. The City reserves the right to delay or modify the above dates and timeline as needed.

City of ALACHUA

NOTICE OF PUBLIC HEARING BEFORE THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on February 10, 2025 at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following: A request by Aaron Hickman, PSM, of CHW, LLC applicant and agent, for Waco Properties, Inc., property owner, for consideration of the Final Plat for Fletcher Trace Phase 3. The final plat proposes to subdivide a ±17.66-acre subject property into a total of 37 lots with associated common areas and road right-of-way. The subject property is located east of CR 235, and west of Pilot Forest subdivision, Tax Parcel Number 03980-002-001; Future Land Use Map (FLUM) Designation: Moderate Density Residential; Zoning: Planned Development – Residential (PD-R).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

AFFIDAVIT FOR POSTED LAND USE SIGN

I ANN MULLINS, POSTED THE LAND USE
(Name)
SIGN ON 1/27/25 FOR THE Fletcher Trace Phase 3
(Date) (State type of action and project name)
LAND USE ACTION.

AS PER ARTICLE 2.2.9 D OF THE LAND DEVELOPMENT REGULATIONS.

THIS WILL BE INCLUDED IN THE STAFF REPORT.

_____
(Signature)

Three(3)
(Number of signs)

SUBDIVIDERS AGREEMENT

THIS SUBDIVIDERS AGREEMENT for Fletcher Trace Phase 3 (the "Agreement") is made by and between Fletcher Development, LLC a Florida limited liability company, whose principal address is 4510 NW 6th Place, 3rd Floor, Gainesville, FL 32607 (the "Developer") and the City of Alachua, a Florida municipal corporation (the "City"), whose principal address is 15100 NW 142 Terrace, Alachua, FL 32615, as of the date signed by the last party below (the "Effective Date").

R E C I T A L S

WHEREAS, the Developer is developing a residential subdivision in the City known as Fletcher Trace Phase 3, including certain Improvements as described in Paragraph 3 below (the "Project"), located on the real property legally described in attached Exhibit "A" (the "Property") and further described in the Final Plat for Fletcher Trace Phase 3 (the "Final Plat"), a copy of which is attached hereto as Exhibit "B" and incorporated herein by this reference; and

WHEREAS, the Developer wishes to enter into a Subdividers Agreement with City as part of the City's site-specific regulations for applications for development orders for the subdivision of land as further set forth and required in Section 2.4.10(G)(6) of the City's Land Development Regulations (the "LDRs"); and

WHEREAS, the Developer acknowledges that this Agreement is a valid exercise of the City's police powers and it is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, et. seq., Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.021, Fla. Stat.; and

WHEREAS, the Developer acknowledges that this Agreement is governed by the City's LDRs and, as such, the Developer must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding or in any way arising out of this Agreement; and

WHEREAS, the Developer acknowledges that this Agreement is a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer shall not have and waives any claim for monetary damages against the City in the event of any dispute regarding or in any way arising out of this Agreement.

NOW THEREFORE, in consideration of the foregoing recitals, the Developer and City (who may hereinafter be referred to collectively as the "parties" or individually as a "party") hereby covenant, stipulate and agree as follows:

1. **Recitals:** The above information and recitals are true and correct and are incorporated as material terms of this Agreement by reference.

2. **Certificate of Concurrency Compliance:** The City agrees to reserve public facilities for the Project as set forth in the Certificate of Concurrency Compliance attached hereto as Exhibit "C" and incorporated herein by reference.

3. **Construction:** The Developer shall construct, at Developer's sole expense, the improvements (the "Improvements") described in the Construction Plans prepared by the Project's Engineer of Record (the "Plans"), which were filed with the City by the Developer and have been reviewed and approved by the City in accordance with Section 2.4.10(G)(4) of the LDRs. The Improvements shall be constructed in accordance with the Plans and the requirements for Major Subdivisions as set forth in the City's LDRs. The Improvements consist of:

a. Certain "Private Improvements," which shall not be conveyed to the City and shall remain under private ownership and control. The Private Improvements are described in the Plans and the Final Plat. Developer agrees to proceed with the construction of the Private Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

b. Certain "Public Improvements," which upon completion shall be offered for dedication and acceptance by the City as provided in Section 14 hereof. The Public Improvements are described in the Final Plat. Developer agrees to proceed with the construction of the Public Improvements in a diligent manner to be fully and finally completed, as evidenced by the City's issuance of a Certification of Completion, on or before April 13, 2026.

c. The Improvements do not include those sidewalks depicted on the Construction Plans which abut or are immediately adjacent to a residential lot depicted on the Plat (hereinafter referred to as "House Sidewalk" or "House Sidewalks"). Such House Sidewalks shall be subject to the specific provisions governing construction, completion, conveyance (if applicable), and construction/maintenance guarantees described in this Agreement.

d. Some of the Improvements may be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) after recording of the Final Plat. Specifically, the following Improvements, hereinafter referred to as the "Post Final Plat Improvements," may be completed after recording of the Final Plat: 6" limerock base, curb and gutter, 1.5" type SP9.5 asphaltic concrete, public and common area sidewalks, and street lighting, as depicted on the approved Construction Plans. Those Post Final Plat Improvements that will be offered for dedication and acceptance by the City following completion shall hereinafter be referred to as the "Post Final Plat Public Improvements," and those Post Final Plat Improvements that shall remain under private ownership and control following completion shall hereinafter be referred to as the "Post Final Plat Private Improvements."

All of the Improvements, with the exception of the Post Final Plat Improvements, shall be constructed and completed (as evidenced by the City's issuance of a Certification of Completion) prior to recording of the Final Plat.

4. **Drainage:** Drainage facilities for the Property shall be maintained in accordance with the approved Plans for the Project at the sole expense of the Developer.

5. **Fire Flow:** The Developer specifically acknowledges and agrees that future development and buildings constructed within the Project shall comply with the fire flow standards as set forth in the Florida Fire Prevention Code (the "FFPC"), which is adopted as part of the Florida Building Code (the "FBC"), as amended and effective at the time of such future development. It is the Developer's sole responsibility to comply with these fire flow standards. Nothing in this Agreement, including, but not limited to, the Plans and or the Certificate of Concurrency Compliance for the Project, attached hereto as Exhibit "C" in any way impacts or waives the requirement for future development and buildings within the Project from complying with the FFPC and FBC, as amended and effective at the time of such future development.

6. **Conveyance:** The Developer shall convey all of the required Public Improvements to the City. However, the parties acknowledge and agree that the Public Improvements shall not be accepted by the City, nor shall the City have any maintenance responsibility for same, unless and until: (1) the Public Improvements have been completed (as evidenced by the issuance of a Certification of Completion), (2) the Warranty Period (as hereinafter defined) has concluded and the Public Improvements have passed all inspections and the Public Services Director has made the determinations required pursuant to Section 14 hereof, and (3) the City Commission of the City of Alachua (the "City Commission") officially accepts the Public Improvements. Acceptance of public House Sidewalks shall be as set forth in Paragraph 16 below.

7. **Compliance:** The Developer warrants that it will construct all of the Improvements in accordance with the approved Plans and the Final Plat for the Project, the LDRs, and all applicable regulations, ordinances, laws, rules and the terms of this Agreement.

8. **Recording of Final Plat:**

The Final Plat for the Project shall be recorded by the Developer in the Public Records of Alachua County, Florida, within 545 days of its approval by the City Commission, provided the requirements of this Paragraph have been satisfied. The Final Plat shall not be released by the City for recording nor recorded until all of the Improvements, with the exception of the Post Final Plat Improvements, are fully and finally completed, as evidenced by the City's issuance of a Certification of Completion for same. Failure to record the Final Plat within 545 days of its approval by the City Commission shall render the Final Plat null, void, and of no further force and effect. Provided, upon Developer's application to the City and showing of good cause, the City Commission may, in its sole discretion, provide for an extension of not more than an additional 365 days. The Developer shall provide the City with a certified copy of the recorded Final Plat within one (1) business day of the recording of the Final Plat. The City shall record this Agreement within five (5) business days of the Effective Date. The Developer shall pay all costs associated with the recording of this Agreement.

9. **Surety Devices for Public Improvements:**

In order to comply with Sections 2.4.10(G)(5)-(8), 7.4.1, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Public Improvements as follows:

a. Public Improvements Maintenance Guarantee. Upon the City's completion of inspection but prior to issuing a Certificate of Completion for the Public Improvements, Developer shall provide the City with a "Public Improvements Maintenance Guarantee" in a form approved by the City in the amount of $113,784.92, which represents 10% of the Engineer's Certification of Construction Costs for Public Improvements [$1,137,849.21] set forth in Exhibit "D", which Public Improvements Maintenance Guarantee shall be in full force effect until Developer obtains a passing inspection for such Public Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Public Improvements Maintenance Guarantee upon the City Commission's acceptance of the Public Improvements, consistent with Section 2.4.10(G)(8)(b) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Public Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Public Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for such Post Final Plat Public Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Public Improvements. The City shall release and return the Post Final Plat Public Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Public Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Public Improvements.

10. **Surety Devices for Private Improvements:** In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, and 7.8.1 of the LDRs, the Developer warrants and agrees to provide the City with surety instruments for all Private Improvements as follows:

a. Private Improvements Maintenance Guarantee. Upon the City's completion of inspections but prior to issuing a Certificate of Completion for the Private Improvements, Developer shall provide the City with a Private Improvements Maintenance Guarantee in a form approved by the City in the amount of

$47,436.64, which represents 10% of the Engineer's Certification of Construction Costs for Private Improvements set forth [$474,366.38] in Exhibit "E", which Private Improvements Maintenance Guarantee shall be in full force and effect until Developer obtains a passing inspection for such Private Improvements following expiration of the Warranty Period (as hereinafter defined) pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement. The City shall release and return the Private Improvements Maintenance Guarantee upon the Developer having obtained a passing inspection for such Private Improvements following expiration of the Warranty Period, pursuant to Section 2.4.10(G)(7)-(8) of the LDRs and Section 14 of this Agreement, less any applicable reductions or drawdowns.

b. Post Final Plat Private Improvements Performance Guarantee. Prior to release and recordation of the Final Plat, Developer shall provide the City with a Cash Deposit, Lender Guarantee, Irrevocable Letter of Credit, Performance Bond, or other acceptable security (the "Post Final Plat Private Improvements Surety Instrument") in a form approved by the City in the amount of 120% of the Engineer's Certification of Construction Costs for any Post Final Plat Private Improvements that have not yet been completed, to guarantee the satisfactory construction of all such Post Final Plat Private Improvements. The City shall release and return the Post Final Plat Private Improvements Surety Instrument, less any applicable reductions or drawdowns, upon: (1) A Private Improvements Maintenance Guarantee consistent with the requirements of Section 9.a. being filed with the City for such Post Final Plat Improvements, and (2) the City's issuance of a Certification of Completion for the Post Final Plat Private Improvements.

c. The surety for all Improvements (public and private) may be consolidated in the same surety instrument.

11. **Inspections:** Upon the City's approval of the Plans and Final Plat, the Developer may commence construction of the Improvements. During the construction period, the Project's Engineer of Record, or Professional Engineer with a Professional Engineering Services Agreement with the City of Alachua shall perform Construction and Engineering Inspection Services (the "CEI Services") and shall prepare and provide to the City inspection reports at the following benchmarks:

a. Inspection of Underground Stormwater System: at beginning of process; during 2 pipe laying activities; during 3 random backfilling operations; and inspection of the completed system by visual and TV camera.
b. Inspections of sewer system: at the beginning of work; during 3 random manhole placements; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system with TV camera.
c. Inspection of water system: at the beginning of work; during all taps or city connections; 3 random pipe placements; 3 backfilling operations; and inspection of the completed system including disinfection and pressure testing.

d. Inspection of the electrical conduit: at the beginning of work; during all city connections; 3 random pipe placements, 3 backfilling operations; and inspection of completed system.
e. Inspection of Stormwater Management basin: at the rough grade stage, outfall placement; final grassing and inspection of completed system.
f. Inspection of pavement: at sub grade of all roads for line and grade and yielding; lime rock base for placement and finish; asphalt inspections at the beginning of operations; at least 3 random quality control checks during placement, asphalt inspection; and inspection of completed pavement. If necessary, a thin asphalt coat shall be added to any areas of the streets in order to provide a smooth graded finish, in particular, around curbs.

The Project's Engineer of Record or the Professional Engineer performing CEI Services shall submit the inspection reports to the City. The inspection reports shall show any discrepancies and shall note the correction of each discrepancy in a subsequent report. The Developer shall provide each inspection report to the City's Public Services Department with a copy to the City's Department of Planning and Community Development within three (3) business days of each inspection. The City may, in its sole discretion, demand in writing the immediate correction of any discrepancies contained on any of the inspection reports within a reasonable period set forth in the written demand. If the correction is not completed in the timeframe in the demand, the City is authorized to make a demand on the Improvements Surety Instrument for the amount needed in order to correct the discrepancy.

Upon completion of the Improvements, the Developer shall have the Project's Engineer of Record, or the Professional Engineer performing the CEI Services, conduct a final inspection and compile a final punch list. Upon the Project's Engineer of Record or the Professional Engineer performing the CEI Services providing a final report to the Developer and the City indicating that all of the deficiencies noted in any inspection report and on the final punch list have been completed and the Improvements are in working order and in accordance with the Plans and LDRs, the LDR Administrator or designee shall thereafter perform a final inspection and provide Developer with a list specifying all defects, deficiencies, and necessary repairs within 60 days of receipt of the final report. Upon completion of any and all repairs and a certification by the Project's Engineer of Record or the Professional Engineer performing the CEI Services that the Improvements have been completed in accordance with the requirements of this Agreement, the Plans, and the LDRs, the City shall issue a Certification of Completion and the Project's Engineer of Record or the Professional Engineer performing the CEI Services shall submit a certified cost of construction for the completed Improvements.

12. **No Transfer of Title Prior to Recording of Final Plat; Completion of Improvements Required Prior to Final Inspection:**

a. No transfer of title or sale of any lots for the Property that is subject to the Final Plat shall occur until the Final Plat has been recorded in accordance with this Agreement.

b. In the event the Developer conveys any interest, legal or equitable, to any portion of the Property, notice is hereby given that the City shall not conduct a final inspection on

any dwelling, nor issue any certificate of occupancy, nor will the City provide permanent City utility services until the Improvements required in this Agreement have been fully and finally completed in accordance with this Agreement. Developer acknowledges and agrees that there is no reasonable business backed expectation that any purchasers of lots or dwellings will be able to occupy or inhabit dwellings in the Project until full and final completion of the Improvements.

13. **Warranty Period:** In accordance with Sections 6.10.4 and 7.8.1 of the LDRs, the Developer warrants all Improvements for a period of one-year from the City's issuance of a Certification of Completion for such Improvements (the "Warranty Period"). Should the City, in the City's sole discretion, determine repairs are needed to the Improvements during the Warranty Period, the City shall provide notice to the Developer and the repairs shall be made within thirty (30) days of such written notice. In the event the Project's Engineer of Record certifies that a requested repair will take more than thirty days to complete, the repair shall be completed in the amount of time determined by the City's Public Services Director, in their sole discretion. The Developer shall be responsible for making all repairs to Improvements, at Developer's sole expense, so long as notice is sent to the Developer within the Warranty Period. The Warranty Period shall be automatically extended until the completion of all requested repairs. Failure of the Developer to complete the repairs within thirty days from the notice (or such time as the Public Services Director may authorize) shall constitute a breach of this Agreement.

14. **Inspections Following Warranty Period; Responsibility for Maintenance:** After the Warranty Period, the Developer shall submit a final certification prepared by the Developer's Engineer of Record that all of the Improvements have been completed and constructed in accordance with the Plans and applicable regulations and are functional and in good working order. The City shall not be bound to accept the Public Improvements for public maintenance or operation until the Public Services Director has determined that the Public Improvements were constructed in accordance with the LDRs, the City of Alachua Requirements for Design and Construction, applicable Florida Department of Transportation standards, and all other applicable laws, rules, and regulations and the City Commission has accepted the Public Improvements. Within 60 days of the Public Services Director's approval, the City Commission shall formally accept maintenance of the Public Improvements. The maintenance of all Private Improvements shall be the sole responsibility of the Developer and its successors, which shall include any homeowner's or property owner's association whose purpose includes the maintenance of such improvements.

15. **Maintenance of Landscape Improvements within City Rights of Way:** The Developer agrees to construct, install and maintain all landscape improvements located within the right-of-way as shown in the approved Plans for the Project at its sole cost and expense. Should the developer or successor fail to install or maintain the landscape improvements in accordance with the approved Plans, the City may provide written notice to the Developer or its successor, specifying the nature of the deficiency. Within 30 days following receipt of such notice, the Developer or successor shall cause the appropriate repairs or cure to be effected. In the event damage or failure to maintain results in a situation where public safety is at risk, the City may, in its sole discretion, effect repairs to the Improvements without the need of prior notice to the Developer or its successor. The City will promptly bill the Developer, its successors or assigns.

If the bill is not paid within 30 days, it shall be a default hereunder and the City shall have the right, but not the obligation, to make a claim under the maintenance bond or other remedies at law.

16. **Construction, Installation, and Surety Devices for House Sidewalks:** The Construction, completion deadlines, and surety devices for House Sidewalks shall be as follows:

a. Construction Deadline: The Developer shall complete the construction and installation of the House Sidewalks in accordance with the Plans. The construction of all of the House Sidewalks shall be completed on or before April 13, 2028. If Developer has not completed all of the House Sidewalks by April 13, 2028, the City shall have the right, but not the obligation, to make a demand on the House Sidewalks Common Law Performance Bond described within Paragraph 16.b. below, for completing as many of the remaining sidewalks as possible with funds derived from such House Sidewalk Common Law Performance Bond. The City shall not, however, have any obligation to expend any money other than the proceeds from the House Sidewalk Common Law Performance Bond to construct sidewalks in the Project.

b. Surety Devices: In order to comply with Sections 2.4.10(G)(5)-(8), 6.10, 7.4.1, and 7.8.1 of the LDRs, the Developer or successor shall provide the City with a House Sidewalks Common Law Performance Bond, in a form acceptable to the City, as the surety instrument to guarantee the satisfactory completion of the House Sidewalks as required in this Agreement. The amount of the House Sidewalk Common Law Performance Bond shall be $90,945.90 ($75,788.25 x 120% of the certified estimated cost of completion in attached Exhibit "F"). Upon the satisfactory completion and inspection of the House Sidewalks, but not the acceptance, the Developer or successor shall provide the City with a House Sidewalk Common Law Maintenance Bond in the amount of $7,578.83 ($75,788.25 x 10%) for the one-year maintenance period. The City will then release and return the House Sidewalk Common Law Performance Bond.

c. Final Approval and Acceptance: Within one (1) year of the completion of all of the House Sidewalks, the City's Public Services Department will do a final inspection and notify the Developer or successor in writing of any deficiencies, in the City's sole discretion. The Developer or successor shall have thirty (30) days to cure any such deficiencies. If the Developer or successor does not cure these deficiencies within thirty (30) days, the City shall be authorized to have the work done and make a demand on the House Sidewalks Common Law Maintenance Bond to pay for the remedial work. Once all deficiencies are remedied to the satisfaction of the City, the House Sidewalks shall be submitted to the City Commission for acceptance. After the City Commission's acceptance of the House Sidewalks, the House Sidewalks Common Law Maintenance Bond will be released and returned to the Developer or successor, less any applicable reductions or drawdowns.

d. The Developer shall have complete and exclusive liability for all claims and shall indemnify the City for all claims, including but not limited to claims for bodily injury and damages, in any way related to or arising out of the construction, completion or non-completion of the House Sidewalks undertaken by the Developer until the City Commission has officially accepted the House Sidewalks.

17. **Non-Interest-Bearing Account:** All cash deposits made by Developer to the City under this Agreement shall be separately segregated on the books of the City and deposited into a non-interest-bearing bank account.

18. **No Inordinate Burden on Land:** The Developer acknowledges and agrees that the requirements under this Agreement in no way inordinately burdens any existing use of the Property or vested right to specific use of the Property described in Exhibit "A" and set forth in the Final Plat for the Project, attached hereto as Exhibit "B".

19. **Withholding Permits:** The City may, in its sole discretion, withhold any and all inspections, permits, and/or certificates for the Project if such action is deemed necessary by the City to secure the Developer's compliance with the terms of this Agreement.

20. **Compliance with Other Laws:** Nothing contained in this Agreement shall relieve the Developer or its successor or assigns from obtaining any local, regional, state or federal permits or complying with any ordinances, laws, rules, or regulations applicable to the development of the Project.

21. **Police Powers:** In the event the Developer, the Developer's agents, contractor, subcontractors, or anyone else acting on behalf of the Developer or the Developer's contractor or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person working on the job or to any member of the general public, the City, in its sole discretion through its City Manager or designee, has the right to exercise its police powers and to stop work on the Project until appropriate corrective measures are taken, without limiting any other remedies available to the City.

22. **Indemnity:** The Developer shall indemnify and hold harmless the City of Alachua, its officers, agents, employees, attorneys, or anyone's action directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in performance of work, down-time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, Developer's agent, contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer or its agent, contractors, or subcontractors may be liable or responsible. The Developer further agrees that the Developer shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this Agreement, or from responsibility under this indemnification clause by employment of independent contractors or subcontractors or other entities. The Developer shall remain liable to the City notwithstanding any attempt by the Developer to pass any responsibility set forth herein to its contract, subcontractors, or other agent or employee.

23. **Payments:** Any payments due from the Developer to the City shall be made either by bank check or cashier's check payable to the City of Alachua, Florida, and provided to the City at the address provided in the Paragraph pertaining to Notices below.

24. **Agreement Runs with Land:** This Agreement shall be recorded in the Public Records of Alachua County, Florida and shall run with the Property.

25. **Default by Developer:** Should Developer fail to complete the Improvements within the timeframes provided in Paragraph 8, the City shall not release the Final Plat for recording and may also pursue any other remedies allowed by law or equity. The City's rights to declare a default are cumulative and the City's failure to declare a default at any time shall not waive its right to declare a future default.

Should Developer fail to complete the House Sidewalks within the timeframes provided in Paragraph 16, the City shall be entitled to make immediate demand on any surety or guarantee provided by Developer hereunder, and also be entitled to any other remedies allowed by law or equity.

26. **Notices:** Except as otherwise provided in this Agreement, any notice, request, or approval, from either party to the other party must be in writing and sent by certified mail, return receipt requested, or by personal delivery. Such notice will be deemed to have been received when either deposited in the United States Postal Service mailbox or personally delivered with a signed proof of delivery. For purposes of notice, the parties and their respective representatives and addresses are:

City:	City of Alachua **Attn: City Manager / LDR Administrator**
Via Hand Delivery:	15100 NW 142nd Terrace Alachua, FL 32615
Via U.S. Mail:	Post Office Box 9 Alachua, FL 32616
Developer:	Fletcher Development, LLC
Via Hand Delivery:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
Via U.S. Mail:	4510 NW 6th Place 3rd Floor Gainesville, FL 3260
With copy to:	[Address]

27. **Binding Effect:** The City and Developer each bind the other and their respective successors and assigns to all of the terms, conditions, covenants and provisions of this Agreement.

28. **Severability:** If any provision of this Agreement is declared void by a court of law, all other provisions will remain in full force and effect.

29. **Not Assignable without Approval:** This Agreement shall not be assignable by the Developer without the written approval of the City Commission.

30. **Enforcement:** The failure of either City or Developer to exercise any right under this Agreement shall not waive such right in the event of any future default or non-compliance with this Agreement.

31. **Jurisdiction and Venue:** This Agreement is governed in accordance with the laws of the State of Florida. Venue for any action regarding this Agreement shall be in the Circuit Court in Alachua County, Florida.

32. **Amendment:** This Agreement may only be amended by mutual written agreement by the City and the Developer with prior approval of the City Commission.

33. **Legal Advice:** The Developer and the City have each had the advice of their respective attorneys before entering into this Agreement, including all exhibits hereto.

34. **Joint Preparation:** This Agreement has been drafted with participation of the City and the Developer and shall not be construed against either the City or Developer on account of draftsmanship.

35. **Captions and Headings:** Paragraph headings are for convenience only and shall not be used to construe or interpret this Agreement.

36. **Time of Essence:** Time is of the essence in complying with each and every term and condition of this Agreement.

37. **Entire Agreement:** This Agreement constitutes the entire agreement of the City and the Developer and supersedes all prior written or oral agreements, understanding or representations.

38. **Exclusive Remedy:** In the event of any question or dispute arising out of or related to this Agreement, the sole and exclusive remedy of the Developer against the City, after Developer exhausts all administrative remedies in the City's LDRs, shall be an action for declaratory judgment. Developer specifically waives all other remedies it may have against the City. In no event shall Developer have a cause of action for monetary damages against the City for anything in any way related to or arising out of this Agreement.

39. **Sovereign Immunity:** The City does not waive its sovereign immunity in entering into this Agreement. Nothing herein, expressed or implied, waives or should be construed to be a waiver or an attempt to waive the sovereign immunity of the City under the Florida Constitution and the laws of the State of Florida.

40. **No Future Representations:** The City's approval of this Subdividers Agreement does not in any way imply, represent, require or guarantee that the City will approve the application for any other phase of the development of the Project.

IN WITNESS WHEREOF, City and Developer have hereunto set their hands and seals the day and year last written below.

LEGAL DESCRIPTION

21-0297

CHW
Professional Consultants

DATE: DECEMBER 28, 2023
PROJECT NAME: FLETCHER TRACE
PROJECT NO: 21-0297
DESCRIPTION FOR: PHASE 3

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2140, PAGE 1834, OF THE PUBLIC RECORDS OF ALACHUA COUNTY FLORIDA, SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, OF SAID ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST; THENCE NORTH 0°04'14" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 403.02 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°06'51" EAST, ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2192.97 FEET TO THE **POINT OF BEGINNING**; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE, NORTH 41°06'51" EAST, A DISTANCE OF 1878.44 FEET TO THE WEST LINE OF THE NORTHEAST QUARTER (NE 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 827.97 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 00°14'12" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTER QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 282.21 FEET; THENCE, DEPARTING SAID WEST LINE, THE FOLLOWING NINE (9) COURSES; (1) SOUTH 64°41'49" WEST, A DISTANCE OF 69.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 185.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°50'21" WEST, 169.54 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 54°32'38", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°03'45" WEST, A DISTANCE OF 160.87 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST, HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°14'11" EAST, 35.36 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 90°00'00", AN ARC LENGTH OF 39.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 85.00 FEET; (6) SOUTH 89°45'49" WEST, A DISTANCE OF 420.66 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST, HAVING A RADIUS OF 235.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 65°26'20" WEST, 193.60 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 48°38'58", AN

ARC LENGTH OF 199.54 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°06'51" WEST, A DISTANCE OF 311.05 FEET; (9) NORTH 48°53'09" WEST, A DISTANCE OF 295.00 FEET TO THE **POINT OF BEGINNING**.

SAID TRACT CONTAINING 17.66 ACRES OF LAND, MORE OR LESS.

DESCRIPTION

A TRACT OF LAND BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 2440, PAGE 1824, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA SITUATED IN THE WEST HALF (W 1/2) OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, THENCE NORTH 89°34'16" WEST, ALONG THE WEST LINE OF SAID SECTION 28, A DISTANCE OF 491.10 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE NORTH 41°46'51" EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 2352.87 FEET TO THE POINT OF BEGINNING; THENCE, CONTINUE ALONG SAID RIGHT OF WAY LINE NORTH 41°46'51" EAST, A DISTANCE OF 1870.34 FEET TO THE WEST LINE OF THE NORTHWEST QUARTER (NW 1/4) OF AFOREMENTIONED SECTION 28; THENCE SOUTH 01°14'54" WEST, ALONG SAID WEST LINE, A DISTANCE OF 297.37 FEET TO THE NORTHWEST CORNER OF THE SOUTHEAST QUARTER (SE 1/4) OF SAID SECTION 28; THENCE SOUTH 89°34'16" EAST, ALONG THE WEST LINE OF SAID SOUTHEASTERLY QUARTER (SE 1/4) OF SECTION 28, A DISTANCE OF 2637.73 FEET; THENCE, DEPARTING SAID WEST LINE THE FOLLOWING NINE (9) COURSES; (1) SOUTH 84°21'49" WEST, A DISTANCE OF 68.19 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHWEST; HAVING A RADIUS OF 180.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 48°16'21" WEST 189.84 FEET; (2) THENCE RUN NORTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 64°17'39", AN ARC LENGTH OF 176.11 FEET TO THE END OF SAID CURVE; (3) SOUTH 16°02'46" WEST, A DISTANCE OF 190.87 FEET TO THE BEGINNING OF A CURVE, CONCAVE TO THE SOUTHWEST; HAVING A RADIUS OF 25.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 41°59'13" EAST 35.74 FEET; (4) THENCE RUN SOUTHEASTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 99°09'09", AN ARC LENGTH OF 34.27 FEET TO THE END OF SAID CURVE; (5) SOUTH 00°14'11" EAST, A DISTANCE OF 46.95 FEET; (6) SOUTH 41°46'49" WEST, A DISTANCE OF 420.48 FEET TO THE BEGINNING OF A CURVE CONCAVE TO THE SOUTHEAST; HAVING A RADIUS OF 208.00 FEET AND BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 63°36'29" WEST 189.83 FEET; (7) THENCE RUN SOUTHWESTERLY ALONG THE ARC OF SAID CURVE, THROUGH A CENTRAL ANGLE OF 68°36'56", AN ARC LENGTH OF 199.94 FEET TO THE END OF SAID CURVE; (8) SOUTH 41°56'51" WEST, A DISTANCE OF 511.86 FEET; (9) NORTH 48°03'09" WEST, A DISTANCE OF 296.00 FEET TO THE POINT OF BEGINNING.

SAID TRACT CONTAINING 17.58 ACRES OF LAND, MORE OR LESS.

SURVEYOR'S NOTES

1. BEARINGS AND COORDINATES SHOWN HEREON ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, NORTH AMERICAN DATUM OF 1983 (NAD 1983), YIELDING A BEARING OF N 89°34'16" W FOR THE WEST LINE OF SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FL.
2. VERTICAL DATUM SHOWN HEREON IS DERIVED FROM THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88). BENCHMARK USED WAS A NATIONAL GEODETIC SURVEY BENCHMARK NUMBER DS78, WITH A PUBLISHED ELEVATION OF 156.40' (NAVD 88).
3. THE ERROR OF CLOSURE FOR THE BOUNDARY OF THIS PLAT DOES NOT EXCEED 1' IN 10,000'.
4. BUILDING SETBACKS (UNLESS SHOWN OTHERWISE)
   - FRONT = 15'
   - REAR = 5'
   - SIDE = 5'
   - STREET FACING GARAGE = 18'
5. THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 120 OF 540, COMMUNITY PANEL NO. 12001C0120 D, EFFECTIVE DATE: JUNE 16, 2006.
6. THE COMMON AREAS, OPEN SPACE, AND STORM WATER MANAGEMENT AREAS SHOWN HEREON, WILL BE CONVEYED TO THE OWNERS ASSOCIATION AND ARE IDENTIFIED FOR MAINTENANCE IN THE HOMEOWNERS ASSOCIATION DOCUMENTS. THE OWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR MAINTENANCE OF TREES PLANTED IN RIGHTS-OF-WAY AND COMMON AREAS IN CONFORMANCE WITH SUBDIVIDERS AGREEMENT AND SECTION 3.8.1. OF THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS.
7. LOT CORNERS AND PERMANENT CONTROL POINTS SHALL BE SET PER 177.091 (9) AND (9) FLORIDA STATUTES.
8. THIS SURVEY IS A TOTAL OF TWO (2) SHEETS. EACH SHEET IS INCOMPLETE WITHOUT THE OTHERS. SEE SHEET ONE (1) FOR OVERALL PLAT BOUNDARY. SEE SHEET (2) FOR DETAIL INFORMATION FOR LOTS SEVENTY FIVE (75) THRU ONE HUNDRED & ELEVEN (111).

CERTIFICATE OF CONCURRENCY COMPLIANCE FOR FLETCHER TRACE PHASE 3

This Certificate of Concurrency Compliance ("Certificate") is hereby issued to Fletcher Development, LLC, a Florida Limited Liability Company authorized to transact business in the State of Florida and ("Developer/Owner") by City of Alachua, Florida ("City") this 14th day of October, 2024.

RECITALS

WHEREAS, the Developer/Owner is developing a residential subdivision in the CITY known as Fletcher Trace Phase 3 (the "Project"), legally described in attached Exhibit '1'.

WHEREAS, the Developer/Owner has secured a Subdivider Regulatory Agreement for the Project from the City for the Project (herein "Subdivider Agreement") as part of the City's site specific requirements for applications for Development permits for the subdivision as further set forth in Section 2.4.10(G)(4) of the City's Land Development Regulations (the "LDRs");

WHEREAS, the LDRs provide in Article 2, Section 2.4.14 for the issuance of a Certificate of Concurrency Compliance by the City as to provide a mechanism for reviewing applications for development approval to ensure that no development order is issued unless there is adequate public facility capacity for roads, sanitary sewer, solid waste, stormwater management, potable water, recreation, or public school facilities. This review is part of a regulatory program of the City to ensure that the adopted level of service standard for each public facility is available to serve development concurrent with the impacts of development;

WHEREAS, Section 2.4.14, requires that a project have one or more of the following land development permits in order to be eligible for issuance of a Certificate of Concurrency Compliance;

WHEREAS, the Project is zoned Planned Development- Residential ("PD-R");

WHEREAS, the Project has an approved preliminary plat approval for a residential subdivision for the Project;

WHEREAS, the Project is now ready to proceed to approval of a Final Plat comprised of 37 residential lots;

WHEREAS, the Developer/Owner intends to immediately initiate construction on the Project;

WHEREAS, the Developer/Owner of the Project agrees to submit payment for sewer connection fees as determined in the City's Capital Facilities charges and as set forth in Section

38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit;

WHEREAS, the Developer/Owner of the Project further agrees to submit payment for water connection fees as determined in the City's Capital Facilities charges and as set forth in Section 38-139 of the City of Alachua Code of Ordinances, as those fees exist prior to the final inspection of each residential unit; and

WHEREAS, the City has determined that adequate water and wastewater capacity exists to the Project;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is a valid exercise of the City's police powers and is authorized by, among other things, Article VIII, Section 2(b) of the Florida Constitution, Section 163.3161, *et. seq.,* Fla. Stat., Section 163.3202, Fla. Stat., and Section 166.201 Fla. Stat.;

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance is governed by the City's LDRs and, as such, the Developer/Owner must utilize the administrative procedures contained in the LDRs in the event there is any dispute regarding this Certificate; and

WHEREAS, the Developer/Owner acknowledges that this Certificate of Concurrency Compliance constitutes a regulatory agreement required as part of the process for the issuance of Development permits for the Project and, as such, Developer/Owner has no claim for monetary damages against the City in the event of any dispute regarding this Certificate, Developer/Owner's sole remedy for any dispute in any way relating to this Certificate is an action for declaratory relief, and nothing in this Certificate expressed or implied waives or should be construed to as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida;

NOW THEREFORE, BASED UPON THE FOREGOING RECITALS, findings of fact and conclusion of law, the City issues this Certificate of Concurrency Compliance subject to the following conditions of issuance:

1. The above recitals are true and correct and are incorporated into this Certificate of Concurrency Compliance by reference.

2. The City will reserve 9,250 gallons per day (37 lots x 250 gallons per day) of wastewater capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

3. The City will reserve 10,175 gallons per day (37 lots x 275 gallons per day) of water capacity for the 37 units proposed in the Project. This capacity reservation is intended solely for residential uses to be constructed within the Project as defined

by applicable development permits including, but not limited to construction plans and Subdivider Agreement, on file with the City.

4. The City will reserve the following trips of traffic capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including construction plans and Subdivider Agreement, on file with the City: 176 Average Annual Daily Trips ("AADT") and 19 Peak Hour Trips along CR235 A (from US 441 to CR 235)(Segment 17); 352 Average Annual Daily Trips ("AADT") and 38 Peak Hour Trips along CR235 (from NW 143rd Place to SCL)(Segment 11).

5. The City will reserve .48acres (2.6 persons per household x 37 units x 5 acres per 1,000 persons) of recreation capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits, including but not limited to the construction plans and Subdivider Agreement, on file with the City.

6. The City will reserve 70.23 tons per year (0.73 tons per capita per year x 2.6 persons per household x 37 units) of solid waste capacity for the 37 units proposed in Fletcher Trace Phase 3 as defined by applicable development permits on file, including but not limited to, construction plans and subdividers agreement, on file with the City.

7. The City will reserve 4 (four) student stations in the Alachua School Concurrency Service Area (ACSA) for elementary schools, 2 (two) student stations in the Alachua SCSA for middle schools, and 3 (three) student stations in the Alachua SCSA for high schools, for the 37 units proposed in Fletcher Trace Phase 3.

8. This Certificate of Concurrency Compliance shall remain in effect for a period of one (1) year from the date of the approval of the Subdivider Agreement between the parties hereto.

9. It is the intent of the City and Developer/Owner that this Certificate of Concurrency Compliance be incorporated into and considered a part of the Subdivider Agreement executed by the Developer/Owner and City for the Project dated the 14th day of October, 2024. Failure to comply with the term of that Subdivider Agreement shall result in the termination of the reservations in this Certificate.

10. This Certificate of Concurrency Compliance shall not be construed to be an absolute guarantee for the reservations should events occur which are outside the control of the City.

THIS CERTIFICATE OF CONCURRENCY COMPLIANCE IS ISSUED this 14th day of October, 2024, and is subject to the terms and findings as stated herein.

The Engineer's probable estimate of cost provided in this document is specifically intended to represent a rough order of magnitude, including all component information for line items aspects of the work, estimated quantities, and applied unit rates. The Engineer's probable estimate of cost is not intended for publication for the use of bidders whatsoever, unless represented as an FDOT Pay Item table on the plans for projects administered accordance with FDOT Standards. For bidding scenarios, the prospective bidders should be advised that they are solely responsible for: identifying and including relevant project scope, calculation of quantities/durations for takeoffs, and determining the appropriate competitive market cost for the work. Additionally, CHW has no control over the cost of labor, materials, equipment, market conditions, or the Contractor's method of determining prices. Therefore, our statements of probable cost provided herein are made on the basis of best judgment as professional consultants familiar with the construction industry. CHW, nor its subconsultants, can offer guarantee that proposals, bids, or construction costs will not vary from our statements of probable cost.

RESOLUTION 25-03

A RESOLUTION OF THE CITY OF ALACHUA, FLORIDA; AUTHORIZING THE USE OF GENERAL FUND - SPECIAL EXPENSE CONTINGENCY IN THE AMOUNT OF $159,981; TRANSFERRING $159,981 TO THE SOLID WASTE DISPOSAL BUDGET; PROVIDING AN EFFECTIVE DATE.

WHEREAS, the Mayor of the City of Alachua declared a local state of emergency to mitigate the threat of Hurricane Helene effective as of September 24, 2024; and,

WHEREAS, on September 26, 2024 the City of Alachua felt the effects of Hurricane Helene; and,

WHEREAS, the City of Alachua invoked use of its Disaster Response and Debris Management Plan with Waste Pro of Florida, Inc. to dispose of Hurricane Helene storm debris; and,

WHEREAS, current expenses to dispose of Hurricane Helene storm debris in Fiscal Year 2024-2025 amount to $159,981.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY OF ALACHUA COMMISSION:

1. The Finance and Administrative Services Director is directed to transfer one hundred fifty-nine thousand nine hundred and eighty-one dollars ($159,981) from the General Fund – Special Expense Contingency budget to the Solid Waste Disposal budget as reflected in the budget amendment attached hereto as Exhibit A.

2. That this resolution shall take effect immediately upon its adoption.

DULY ADOPTED in regular session, this 10th day of February, 2025.

ALACHUA COUNTY SHERIFF AND CITY OF ALACHUA COMBINED OPERATIONAL ASSISTANCE AND VOLUNTARY COOPERATION

MUTUAL AID AGREEMENT

THIS AGREEMENT, by and between CHAD D. SCOTT, Sheriff of Alachua County, hereinafter referred to as "Sheriff," and the **CITY OF ALACHUA** Police Department, hereinafter referred to as "APD,"

W I T N E S S E T H:

WHEREAS, the subscribed law enforcement agencies are so located in relation to each other that it is to the advantage of each to receive and extend mutual aid in the form of law enforcement services and resources to adequately respond to intensive situations including but not limited to emergencies as defined under section 252.34, F.S. as well as continuing, multi-jurisdictional law enforcement problems, so as to protect the public peace and safety, and preserve the lives and property of the people; and

WHEREAS, the Sheriff and Alachua have the authority under section 23.1225, F.S. et seq., the Florida Mutual Aid Act, to enter into a combined mutual aid agreement for law enforcement service which:

(1) Permits voluntary cooperation and assistance of a routine law enforcement nature across jurisdictional lines, and;

(2) Provides for rendering of assistance in a law enforcement emergency as defined in section 252.34, F.S.,

NOW, THEREFORE, the parties agree as follows:

SECTION I: PROVISIONS FOR VOLUNTARY COOPERATION

Each of the aforesaid law enforcement agencies hereby approve and enter into this Agreement whereby each of the agencies may request and render law enforcement assistance to the other in dealing with any violation of Florida Statutes to include, but not limited to, investigating homicides, sex

offenses, robberies, assaults, burglaries, disturbances, arson, motor vehicle thefts, other criminal or suspected criminal activity, and backup services during patrol activities.

SECTION II: PROVISIONS FOR OPERATIONAL ASSISTANCE

Each of the aforesaid law enforcement agencies hereby approve and enter into this Agreement whereby each of the agencies may request and render law enforcement assistance to the other to include, but not necessarily limited to, dealing with civil disturbances, large protest demonstrations, aircraft disasters, fires, natural or manmade disasters, sporting events, concerts, parades, escapes from detention facilities, incidents requiring utilization of specialized units, and other major law enforcement problems and emergencies as defined in s. 252.34, F.A.

SECTION III: PROCEDURE FOR REQUESTING ASSISTANCE

3.1 In the event that the Sheriff is in need of APD's assistance within any area of Alachua County, an authorized representative of the Sheriff shall notify the APD's designee. The APD's authorized agency representative shall evaluate the situation and the APD's available resources, consult with his/her supervisors if necessary, and will respond/render assistance in a manner he/she deems appropriate. The Sheriff or his designee may determine who is authorized to lend assistance, for how long such assistance is authorized and for what purpose such authority is granted. This authority may be granted either verbally or in writing as the particular situation dictates.

3.2 In the event that APD is in need of the Sheriff's assistance within APD's territorial jurisdiction, an authorized representative of the APD shall notify the Sheriff or his designee. The Sheriff or authorized agency representative shall evaluate the situation and the agency's available resources, consult with his/her supervisor if necessary and will respond/render assistance in a manner he/she deems appropriate.

3.3 Should a sworn APD officer be in the unincorporated area of Alachua County for matters of a routine nature, such as traveling through the jurisdiction on routine business, attending a meeting, or transporting a prisoner, and a violation of Florida Statutes occurs in the presence of said officer, representing his/her respective agency, he/she shall be empowered to render enforcement assistance and act in accordance with law. Should enforcement action be taken, said officer shall immediately notify

the Sheriff or his designee and upon the latter's arrival, turn the situation over to the Sheriff's representative and offer any assistance requested, including but not limited to a follow-up written report documenting the event and the actions taken. This provision so prescribed in this paragraph is not intended to grant general authority to conduct investigations, serve warrants and/or subpoenas, but is intended to address critical, life-threatening or public safety situations, prevent bodily injury to citizens, or secure apprehension of criminals whom the law enforcement officer may encounter.

3.4 In the event that it is necessary for APD to take any planned law enforcement related action within the unincorporated areas of Alachua County, an authorized representative of APD shall notify the Sheriff or his designee prior to taking such action. The Sheriff or his authorized representative shall evaluate the situation and ACSO's available resources, consult with his/her supervisors if necessary and will respond/render assistance in a manner he/she deems appropriate. No APD officer shall be empowered under this paragraph to operate in the unincorporated areas of Alachua County without prior request and approval of the Sheriff or his designee as heretofore provided. The Sheriff's decision in these matters shall be final.

SECTION IV: COMMAND AND SUPERVISORY RESPONSIBILITY

4.1 The personnel and equipment that are assigned by the assisting agency head shall be under the immediate command of a supervising officer designated by the assisting agency head. Such supervising officer shall be under the direct supervision and command of the agency head or his/her designee of the department requesting assistance.

4.2 Supervising officers rendering assistance pursuant to 3.4 shall be under the command of the Sheriff or his designee.

4.3 Whenever a deputy sheriff or APD police officer is rendering assistance pursuant to this Agreement, the deputy sheriff or APD police officer shall abide by and be subject to the rules and regulations, personnel policies, general orders and standard operating procedures of his/her own employing agency. If any such rule, regulation, personnel policy, general order or standard operating procedure is contradicted, contravened or otherwise in conflict with a direct order of a supervising deputy sheriff/officer of the requesting agency, then such rule, regulation, personnel policy, general order or standard operating procedure shall control and shall supersede the direct order.

SECTION V: LIABILITY

Each party engaging in any mutual cooperation and assistance, pursuant to this agreement, agrees with respect to any suit or claim for damages resulting from any and all acts, omissions, or conduct of such party's own employees occurring while engaging in rendering aid pursuant to this agreement to assume full responsibility for same, subject to provisions of section 768.28, F.S., where applicable, and provided such party shall have control of the defense of any suit or claim to which said assumption or responsibility applies.

SECTION VI: POWERS, PRIVILEGES, IMMUNITIES AND COSTS

6.1. APD officers, when actually engaging in mutual cooperation and assistance outside of their normal jurisdictional limits but inside this state, under the terms of this agreement, shall, pursuant to the provisions of section 23.127(1), F.S. have the same powers, duties, rights, privileges and immunities as if the employee was performing duties inside the City of Alachua. Any APD officer acting within the unincorporated areas of Alachua County, without the request or approval of the Sheriff or his designee, shall not be covered by this Agreement.

6.2. Each party agrees to furnish necessary equipment, resources and facilities and to render services to the other party to the agreement; provided however, that no party shall be required to deplete unreasonably its own equipment, resources, facilities, and services in furnishing mutual aid.

6.3. The agency that furnishes equipment pursuant to this part must bear the cost of loss or damage to that equipment and must pay any expense incurred in the operation and maintenance of that equipment.

6.4. The agency furnishing aid pursuant to this section shall compensate its appointees/employees during the time such aid is rendered and shall defray the actual travel and maintenance expenses of its employees while they are rendering such aid, including any amounts paid or due for compensation due to personal injury or death while such employees are engaged in rendering such aid.

6.5. The privileges and immunities from liability, exemption from laws, ordinances and rules, and all pension, insurance, relief, disability, workers' compensation, salary, death and other benefits that apply to the activity of any employee of an agency when performing the employee's duties within the

territorial limits of the employee's agency apply to the employee to the same degree, manner, and extent while engaged in the performance of the employee's duties extraterritorially under the provisions of this mutual aid agreement. The provisions of this section shall apply with equal effect to paid, volunteer, and reserve employees.

6.6. Nothing herein shall prevent the requesting agency from requesting supplemental appropriations from the governing authority having budgeting jurisdiction to reimburse the assisting agency for any actual costs or expenses incurred by the assisting agency performing hereunder.

SECTION VII: INSURANCE

Each party shall carry liability insurance in an amount which is at least adequate to cover the risk to which that party may be exposed. Should the insurance coverage, however provided, of any party be canceled or undergo material change, that party shall notify the other party of such change within ten (10) days of receipt of notice or actual knowledge of such change.

SECTION VIII: SHERIFF, DESIGNEE OR AUTHORIZED AGENCY REPRESENTATIVE

7.1. The Sheriff and his designee or authorized agency representative as pertains to this Agreement shall be the following persons:

i. Sheriff
ii. Undersheriff
iii. Major
iv. Captain
v. Shift or Watch Commander

7.2. The APD's designee or authorized agency representative as it pertains to this Agreement shall be the following persons:

i. Chief
ii. Deputy Chief
iii. Lieutenant
iv. Sergeant

SECTION IX: EFFECTIVE DATE

This Agreement shall take effect upon approval and execution by the hereinafter named officials. This Agreement shall continue in full force and effect through January 11, 2029, unless terminated prior thereto by any or both parties hereto.

SECTION X: CANCELLATION

Any party may withdraw from participation in this agreement upon delivery or written notice to the other party.

WHEREFORE, the parties hereto cause these presents to be signed by their duly authorized officers as of the date first above written.

MEETING DATE: February 10, 2025

SUBJECT: Mutual Aid Agreement for Voluntary Cooperation for Traffic Control between the Alachua County Sheriff and the City of Alachua.

PREPARED BY: Jesse Sandusky

RECOMMENDED ACTION:

Authorize the Mayor, Chief of Police and City Attorney to execute the Mutual Aid Agreement for Traffic Control with the Alachua County Sheriff's Office.

Summary

General Counsel for the Alachua County Sheriff's Office submitted the proposed Voluntary Cooperation Mutual Aid Agreement for Traffic Control between the Alachua County Sheriff and the City of Alachua for consideration. The term for this proposed agreement will extend through and including January 11, 2029, and provides for Alachua Police Department officers to enforce Florida traffic laws and conduct crash investigations on specified roadways located outside the City's corporate boundaries, but still within Alachua County.

ALACHUA COUNTY SHERIFF AND CITY OF ALACHUA VOLUNTARY COOPERATION MUTUAL AID AGREEMENT FOR TRAFFIC CONTROL

THIS AGREEMENT, by and between CHAD D. SCOTT, Sheriff of Alachua County, Florida, hereinafter referred to as "Sheriff," and the **CITY OF ALACHUA** by and for its Police Department, hereinafter referred to as "APD," is entered into this _____ day of _____, 2025.

WITNESSETH:

WHEREAS, the City of Alachua has a number of boundaries that intersect various major roadways which lie within the County; and

WHEREAS, there are continuing traffic problems on said roadways; and

WHEREAS, APD personnel have no authority outside the boundaries of the City of Alachua; and

WHEREAS, the Sheriff and the APD agree that a cooperative effort between the two agencies will be mutually advantageous and will allow for a smoother flow of traffic on these roadways;

NOW, THEREFORE, the Sheriff and the APD agree as follows:

1. Should an APD sworn law enforcement officer be outside the boundaries of the City of Alachua, but still within Alachua County for matters of a routine nature, such as traveling through the jurisdiction on routine business, attending a meeting, going to or from work, or responding to a call, said officer shall have authority to enforce the traffic laws of this state and conduct crash investigations on the following roadways:

US 441	**FROM NW 188th ST to 8910 NW 13 ST**	**4 LANE HIGHWAY**
CR 235A	**FROM US 441 TO SR 93 NORTH**	**2 LANE ROADWAY**
CR 235A	**FROM US 441 TO CR 235 SOUTH**	**2 LANE ROADWAY**
CR 241	**FROM INTERSECTION OF CR 235/241 SOUTH TO MILLHOPPER ROAD**	**2 LANE ROADWAY**
CR 235	**FROM US 441 NORTH TO NW 121 TER**	**2 LANE ROADWAY**

CR 241	**FROM INTERSECTION OF CR 235/241 NORTH TO NW 199 AVE**	**2 LANE ROADWAY**
CR 25A	**FROM US 441 TO CR 237 ENTERING FROM N.B. OR S.B.**	**2 LANE ROADWAY**

2. APD personnel performing traffic enforcement and crash investigations shall be under the immediate command of a supervising officer with the City of Alachua. Should enforcement action be taken pursuant to this Agreement, said officer shall notify the Sheriff. In the event a deputy responds, the investigation will be turned over to the Sheriff. The APD officer will complete a report indicating his/her involvement and will ensure a copy of the report is sent to the Sheriff.

3. The Sheriff and the APD agree to furnish personnel, equipment and other resources to each other in furtherance of performing the functions heretofore stated, provided, however, that no party shall be required to deplete unreasonably its own personnel, equipment or other resources in furnishing such mutual aid.

4. Whenever the aforementioned APD personnel are rendering aid outside the boundaries of the City of Alachua, but still within Alachua County, and pursuant to this agreement, such personnel shall have the same powers, duties, rights, privileges, and immunities as if they were performing their duties within the jurisdiction of their employing agency.

5. The agency which furnishes any equipment pursuant to this agreement shall bear all loss or damage such equipment may sustain and shall pay any expense incurred in the operation and maintenance thereof. Furthermore, the agency furnishing aid pursuant to this agreement shall retain full responsibility for the compensation of its personnel during the time of rendering such aid, including but not limited to salary, retirement, insurance and any amounts paid or due for compensation of its personnel during the time of rendering such aid, including but not limited to salary, retirement, insurance and any amounts paid or due for compensation due to personal injury or death while such personnel are engaged in rendering such aid. The agency furnishing aid pursuant to this agreement shall also provide law enforcement liability insurance with adequate coverage being applicable whenever and wherever its personnel are rendering aid.

6. Nothing in this Voluntary Cooperation Agreement shall be construed so as to require any individual or entity acting or failing to act pursuant to this agreement to perform or not perform any act or thing which would be in contravention of any requirement or provision of any applicable rule, regulation, ordinance, statute or law.

7. This agreement is not intended to provide any extension of authority to any member of the City of Alachua Police Department not assigned to the traffic control detail.

8. This agreement shall be in effect from the date above first written through and including January 11, 2029, unless sooner terminated. This agreement may be renewed or extended by written agreement only.

9. Either party to this agreement may withdraw from this agreement by giving written notice thereof to the other party. Upon receipt of such notice, this agreement shall be terminated.

WHEREFORE, the parties hereto cause these presents to be signed by their duly authorized officers as of the date first above written.
