(PROPERTY OWNER) FOR THE HIGHLAND HILLS MAJOR SUBDIVISION PRELIMINARY PLAT WHICH PROPOSES THE SUBDIVISION OF LAND INTO 38 SINGLE-FAMILY DETACHED LOTS WITH ASSOCIATED COMMON AREAS AND RIGHTS-OF-WAY ON A ± 8.36-ACRE SUBJECT PROPERTY GENERALLY LOCATED SOUTH OF US HIGHWAY 441, BETWEEN INTERSTATE 75 AND NORTHWEST 147TH DRIVE, ALONG NORTHWEST 151ST BOULEVARD (TAX PARCELS: 03869-007-000, 03869-009-000 (PORTION THEREOF), AND 03869-010-000). FUTURE LAND USE: MEDIUM DENSITY RESIDENTIAL; ZONING: RESIDENTIAL MULTIPLE FAMILY – 8 (RMF-8) (QUASI-JUDICIAL HEARING).

Clay Sweger, Land Planner — EDA Consultants, 3/10/26, Report for Applicant, Submitted.
Carson Crockett, Principal Planner, 03/10/26, Staff Report, Filed.

Citizen Comment:
Soorya Lindberg
Brian Bisher

Member Judd based that, based upon the competent, substantial evidence, the presentation before this Board, and Staff's recommendation, this Board finds the application for the Highland Hills Major Subdivision Preliminary Plat submitted by eda consultants, inc., on behalf of 10.47 L.L.C. to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and transmit such findings to the City Commission with a recommendation to approve subject to the six conditions in Exhibit "A" and located on page 18 of the March 10, 2026, staff report; seconded by Member Johns.

Motion passed by 5-0 roll call vote.

D) PTAL25-0002 | ADU TEXT AMENDMENT TO THE LAND DEVELOPMENT REGULATIONS - A REQUEST BY CALEB SAPP (APPLICANT AND AGENT) ON BEHALF OF TERRY HOWARD FOR A PRIVATELY INITIATED TEXT AMENDMENT TO THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS, AMENDING SECTION 4.4.4(A) REGARDING STANDARDS AND REQUIREMENTS FOR ACCESSORY DWELLING UNITS (ADUS) (LEGISLATIVE HEARING).

Carson Crockett, Principal Planner, 03/10/26, Staff Report, Filed.

Member Judd move that, based upon the competent substantial evidence, the presentation before this Board, and Staff's recommendation, this Board finds the proposed text amendment to Section 4.4.4(A) of the City of Alachua Land Development Regulations to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and transmit such finding to the City Commission with a recommendation to approve; seconded by Vice Chair William Menadier.

Motion passed by 5-0 roll call vote.

E) PTAL26-0001 | CERTIFIED RECOVERY RESIDENCE TEXT AMENDMENT TO THE LAND DEVELOPMENT REGULATIONS - A REQUEST BY THE CITY OF ALACHUA PLANNING & COMMUNITY DEVELOPMENT DEPARTMENT FOR A STAFF-INITIATED TEXT AMENDMENT TO THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS, AMENDING ARTICLE 2 AND ARTICLE 10 RELATING TO THE ESTABLISHMENT OF A PROCESS TO RECEIVE A REASONABLE ACCOMMODATION FOR CERTIFIED RECOVERY RESIDENCES AS REQUIRED BY FLORIDA STATUTE 397.487 (LEGISLATIVE HEARING).

Carson Crockett, Principal Planner, 03/10/26, Staff Report, Filed.

Member Johns moved that, based upon the competent substantial evidence, the presentation before this Board, and Staff's recommendation, this Board finds the proposed text amendment to Article 2 and Article 10 of the City of Alachua Land

Development Regulations to be consistent with the City of Alachua Comprehensive Plan and transmit such finding to the City Commission with a recommendation to approve and the recommendation to include the re-created Section 2.4.25 in Table 2.1.1 of the Land Development Regulations; seconded by Vice Chair Menadier.

Motion passed by 5-0 roll call vote.

F) ADMIN | PRESENTATION OF PROPOSED EVALUATION & APPRAISAL REPORT (EAR) PUBLIC PARTICIPATION PROCESS

Carson Crockett, Principal Planner, 03/10/26, Staff Report, Filed.

Vice Chair Menadier moved that this Board, sitting as the Local Planning Agency, approve the proposed Evaluation & Appraisal Report (EAR) public participation process as presented by the Planning & Community Development Department; seconded by Member Johns.

Motion passed unanimous consent.

III. BOARD COMMENTS/DISCUSSION

IV. CITIZENS COMMENTS

ADJOURN

Member Johns moved to adjourn; seconded by Member Highlander.

City of Alachua
Planning & Community Development Department
Staff Report

Planning & Zoning Board Hearing Date: April 21, 2026
Quasi-Judicial Hearing **Application #: PCA26-0001**

SUBJECT:	A request for consideration of a certificate of appropriateness for the addition of a car port to a property in the City of Alachua Downtown Historic District
APPLICANT/AGENT:	Sheila Spence
PROPERTY OWNER:	John and Sheila Spence
LOCATION:	14722 Northwest 140th Street
PARCEL ID NUMBER:	03663-001-001
FLUM DESIGNATION:	Central Business District
ZONING:	Commercial – Central Business District (CBD)
OVERLAY:	City of Alachua Downtown Historic District
ACREAGE:	± 0.13
PROJECT PLANNER:	Parker A.H. Stevens
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board approve the certificate of appropriateness for Sheila Spence.
RECOMMENDED MOTION:	*I move that, based upon the competent substantial evidence presented at this hearing, the presentation before this Board, and Staff's recommendations, this Board find the application for Sheila Spence to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and approve the certificate of appropriateness application.*

SUMMARY

This application is a request by Sheila Spence, resident and applicant, for consideration of a certificate of appropriateness proposing the additional of a car port to a commercial structure in the City of Alachua Downtown Historic District.

The ± 0.12-Acre subject property is located at 14722 Main Street (Tax Parcel 03663-001-001).

The applicant has submitted pictures of the existing structure and the proposed additional structure to demonstrate that the proposed addition is consistent with the character of adjacent properties. Figure 1 shows the intended design of the additional structure. All pictures and architectural details are available for review in the application materials.

Figure 1. Structure Design Overview

EXISTING USES

The subject property has one structure, the structure to which the additional will serve. The land use of the property is generally office; however, the structure appears more residential in nature. Figure 2 depicts the current condition of the structure.

Figure 2. Current Condition

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 1. Figure 3 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Offices	Central Business District	Central Business District (CBD)
South	Multi-Family Residential	Central Business District	Central Business District (CBD)
East	Church	Medium Density Residential	Residential, Single Family (RSF-3)
West	Single Family Residential	Central Business District	Central Business District (CBD)

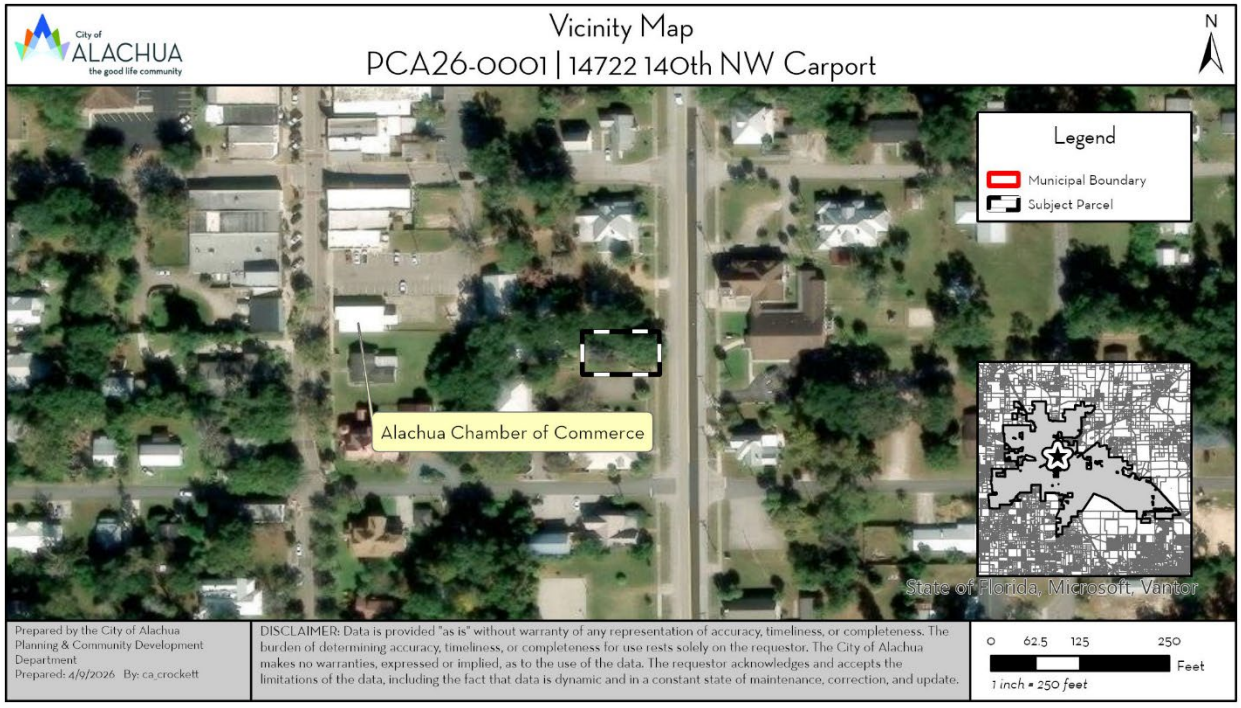

Figure 3. Vicinity Map

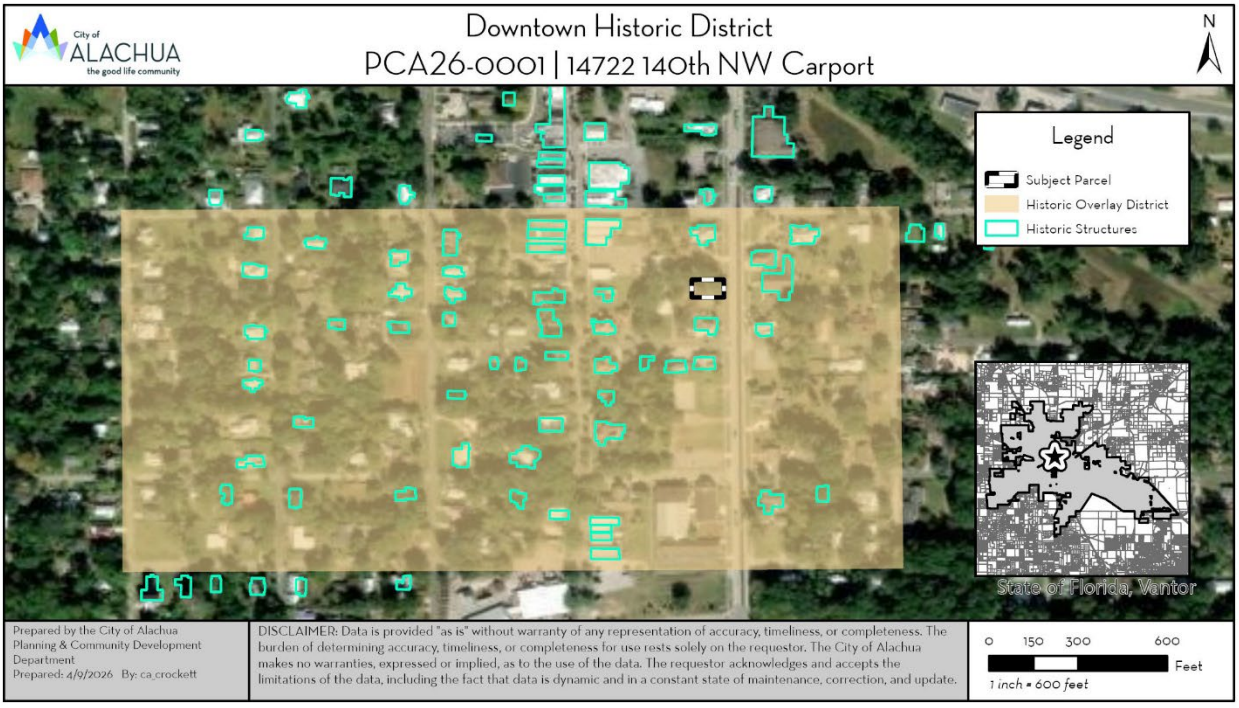
HISTORIC OVERLAY DISTRICT



Section 3.7.2(A) of the City's Land Development Regulations (LDRs) establishes the standards for the Historic Overlay District (including the City of Alachua Downtown Historic District). The general purposes of the Historic Overlay District are to:

1. Protect the beauty of the City and improve the quality of its environment through identification, recognition, conservation, maintenance and enhancement of its historic and architectural resources;
2. Protect against designated land and buildings or structures having historic and architectural significance from the intrusion of development that fails to protect such significance;
3. Stabilize and improve property values in such districts, strengthening the local economy;
4. Foster civic pride; and,
5. Encourage redevelopment of the City's downtown.

Section 3.7.2(A)(2)(a) of the LDRs establishes the City of Alachua Downtown Historic District, which includes all lots within an area bounded by NW 145th Avenue, NW 145th Terrace, NW 148th Place, and NW 138th Terrace. The area of the district, the subject property, and contributing historic structures are shown in Figure 5.

Figure 4. City of Alachua Downtown Historic District and Location of Subject Property

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Historic, Cultural and Archeological Preservation*

The City shall encourage the preservation of historic, cultural, and archeological resources through the use of preservation districts, land acquisition, and partnerships with local, state and federal protection agencies.

Objective 3.1: *Historic Preservation Districts*

The City shall encourage property owners to maintain and improve buildings, grounds, streetscape and vistas and encourage settlement and revitalization of established neighborhoods.

Policy 3.5.a: The City shall ensure that future development within a historic district is sensitive to the historic character of the historic district.

Policy 3.9.a: An historic preservation overlay zoning classification shall be used to protect significant historic resources.

Policy 3.10.a: The City shall establish and maintain Certificate of Appropriateness procedures for reviewing exterior changes to historic buildings, structures and sites in historic districts.

Evaluation & Findings: The applicant has submitted materials to support that the proposed exterior alterations to the structure are consistent with and sensitive to the historic character of the historic district.

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Certificate of Appropriateness Standards

Section 2.4.6(F) of the City's Land Development Regulations (LDRs) establishes the standards with which all certificate of appropriateness applications must be found compliant. The application has been reviewed for compliance with the standards of Section 2.4.6(F). An evaluation of the findings of the applicant's compliance with the standards of Section 2.4.6(F). is provided below.

(F) ***Certificate of appropriateness standards***. The following standards shall be applied in determining whether to approve, approve with conditions, or deny a certificate of appropriateness:

(1) ***Affect exterior appearance***. Whether the proposed action will affect the exterior appearance of a building or structure and if such action will be visible from a street, or if such action will affect the appearance of any interior portion of a building or structure listed on the National Register of Historic Places or a building or structure listed as a contributing building to the City of Alachua Downtown Historic District.

Evaluation & Findings: The proposed addition of a car port is to the structure located at 14722 NW 140th Street, which is not a contributing building nor a listed structure. This structure will be visible from the street, but will not affect the appearance of any interior portion of a building or structure listed on the National Register of Historic Places or building or structure listed as a contributing building to the City of Alachua Downtown Historic District.

(2) ***Affect consistency with historical, architectural or other relevant qualities***. Whether any such affect is consistent with the historical, architectural, or other qualities which the Historic Overlay District seeks to protect and preserve.

Evaluation & Findings: The proposed addition to the structure will preserve the architectural characteristics of the district. The design of the car port is complementary in nature to the existing structure, and will keep with the architectural qualities of the historic district.

(3) ***Negative of positive impact on neighboring properties of historical significance***. Whether the proposed action will have a negative or positive impact on neighboring properties that have historic significance.

Evaluation & Findings: There are four contributing properties located proximate to the subject property as shown in Table 2. The applicant has provided photographs of the proximate structures to demonstrate the compatibility of the proposed exterior alterations with the surrounding historic district and contributing structures. The proposed exterior alterations will not negatively impact the neighboring properties that have historic significance.

Table x. Proximate Contributing Structures

Address	Site Name	Year Built	Architectural Style
14804 NW 140th Street	Pearson-Braswell House	c. 1900	Queen Anne
14702 NW 140th Street	Hinkelman House	c. 1929	Frame Vernacular
14805 NW 140th Street	First Methodist Church	c. 1912	Neo-Gothic & Romanesque
14707 NW 140th Street	Bell-Rist House	c. 1900	Queen Anne

(4) *Effect of denial*. Whether the denial of a certificate of appropriateness would deprive the owner of reasonable beneficial use of their property.

Evaluation & Findings: The proposed addition provides a practical, functional improvement without altering the structure's historic character. Denial would limit the property's reasonable and beneficial use.

(5) *Demolition*. In cases where a certificate of appropriateness is proposed for demolition of all or a portion of a historic property, the applicant shall demonstrate:

(a) That no other feasible alternative can be found;

(b) The extent to which the property may not be beneficially used without approval of the demolition;

(c) The ability to obtain a reasonable return from the existing structures; and

(d) Whether or not the building, structure, or property contributes to a Historic Overlay District, or no longer has historical significance.

Evaluation & Findings: No demolition is proposed: therefore, this standard is not applicable.

RE: Notice of Hearing to be Scheduled for 14722 NW 140th Street Certificate of Appropriateness Application

Dear Andrew Kaplan,

On February 5, 2026, the City of Alachua received your certificate of appropriateness application for an additional structure to 14722 NW 140th Street submitted on behalf of Sheila Spence. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been scheduled for the **April 21, 2026,** Planning & Zoning Board meeting.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6123 or at pa_stevens@cityofalachua.org.

Sincerely,

Parker Stevens

CERTIFICATE OF APPROPRIATENESS APPLICATION REPORT

Date: February 5, 2026

Applicant Name: Sheila Spence

Property Owners: John and Sheila Spence

Property Address: 14722 Northwest 140th Street, Alachua, Florida 32615

Mailing Address: 14704 Northwest 41st Avenue, Newberry, Florida 32669

Phone Number: (352) 339-0142

Submitted to:

City of Alachua

Planning and Community Development Department

P.O. Box 9

Alachua, FL 32616

Phone: (386) 418-6121

Project Description

The proposed project consists of adding a simple, open-sided carport to an existing structure located within the City of Alachua's Historic Business District. The project aims to provide covered parking for one vehicle while preserving the property's historic character and the surrounding area.

1. Effect on Exterior Appearance

The proposed carport is a single-structure addition designed to complement the existing building. Materials, scale, and colors will match or harmonize with the current structure, ensuring minimal visual impact. No interior portions of the building are affected.

2. Consistency with Historic and Architectural Qualities

The carport is designed to align with the historical and architectural character of the Historic Business District. Its simple form and compatible materials help preserve the qualities protected by the designation ordinance.

3. Impact on Neighboring Historic Properties

The proposed addition is low-profile and visually compatible with surrounding historic properties. It is expected to have a neutral to positive impact and will not detract from neighboring historically significant lands.

4. Effect of Denial on Reasonable Use

Denial of the Certificate of Appropriateness would limit the property's reasonable and beneficial use. The carport provides a practical, functional improvement without altering the structure's historic character.

5. Demolition

This application does not propose the demolition of any structure or portion of a historic property. All existing structures will remain intact.

6. Proof of Ownership

Proof of ownership is included in the application package.

7. Proof of Payment of Taxes

Proof of payment of all applicable property taxes is included in the application package.

8. Fee

The applicants acknowledge that the required application fee will be paid in full in accordance with the City of Alachua's fee schedule. A $100.00 check for the Certificate of Appropriateness (minor review) is included with this application.

Certification and Acknowledgment

We certify and acknowledge that:

1. We will comply with the current Florida Building Code and obtain all required permits. A certificate of occupancy is not applicable for this carport.
2. We will comply with the requirements of the Alachua County Fire Marshal.
3. We will obtain a local business tax receipt, if required.
4. We will meet all parking standards and any use-specific standards for the zoning district.
5. Falsifying information on this application may result in revocation of the Certificate of Appropriateness.

Respectfully submitted,

Sheila Spence

- ☐ New Construction
- ☑ Alteration of Exterior Features
- ☐ Removal
- ☑ Addition

B. APPLICANT

1. Applicant's Status ☑ Owner (title holder) ☐ Agent
2. Name of Applicant(s) or Contact Person(s): Sheila Spence Title: owner
   Company (if applicable): _____
   Physical address: 14722 NW 140 STREET, Alachua, FL 32615
   Mailing Address: 14704 NW 41 AVE, Newberry FL 32669
   City: _____ State: _____ ZIP: _____
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): Sheila Spence and John Spence
   Mailing Address: 14704 NW 41 AVE, Newberry, FL 32669
   City: _____ State: _____ ZIP: _____
   Telephone: 352-339-0142 FAX: _____ e-mail: Sheila@JohnSpence.com

C. PROPERTY AFFECTED

1. Address of Subject Property: 14722 NW 140 STREET, Alachua, FL 32615
2. Parcel ID Number(s): 03663-001-001
3. Existing Use of Property: Office space for owner
4. Future Land Use Map Designation: _____
5. Zoning Designation: Office 1 story (p1700)
6. Acreage: 0.120 5227.2 sq ft
7. Number of Existing Structures on the Property: one

D. ATTACHMENTS

1. A detailed drawing which identifies the dimensions of the property, location of existing building(s) and those proposed (if applicable), distances of buildings from property lines, building setback lines (dimensioned), and names of adjacent streets. A current survey or site plan may be submitted to meet this requirement, if all requested information is provided.
2. Set of plans and specifications for the project. All drawings must be clear, concise, and drawn to scale. Plans must include and dimension all exterior elevations and provide a dimensioned floor plan illustrating all rooms within any proposed addition (if applicable).
3. Photographs of existing building(s) (all facades or elevations of building(s) and adjacent buildings). Photographs must clearly illustrate the appearance and conditions of existing building(s) affected by the project, close-up pictures of any specific elements under consideration by the project (for

example, windows or doors if proposed to be removed and/or replaced), as well as photographs depicting such elements and their relation with neighboring buildings.

4. If demolition is proposed, a report from a registered structural engineer stating the condition of the structure.

5. The applicant must provide a report which addresses the following:

(1) *Affect Exterior Appearance*

Whether the proposed action will affect the exterior appearance of the subject land or structure or the appearance of any interior portion specifically identified in any relevant designation ordinance.

(2) *Affect Consistent with Historical, Architectural, or Other Relevant Qualities*

Whether any such affect is consistent with the historical, architectural, or other qualities which the relevant designation ordinance seeks to protect and enforce.

(3) *Negative or Positive Impact on Neighboring Lands of Historical Significance*

Whether the proposed action will have a negative or positive impact on neighboring lands that have historic significance.

(4) *Effect of Denial*

Whether the denial of a Certificate of Appropriateness would deprive the owner of reasonable beneficial use of their land.

(5) *Demolition*

In cases where a Certificate of Appropriateness is proposed for demolition of all or a portion of a Historic Property, the applicant shall demonstrate:

(a) That no other feasible alternative can be found;

(b) The extent to which the land may not be beneficially used without approval of the demolition;

(c) The ability to obtain a reasonable return from the existing structure(s); and

(d) Whether or not the building, structure, or land contributes to a Historic Overlay (HO) District, or no longer has historical significance.

6. Proof of ownership.

7. Proof of payment of taxes.

8. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All attachments are required for a complete application. **A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.**

I/We certify and acknowledge that:

1. I /We must comply with the current Florida Building Code through the Building Department and obtain any necessary permits prior to receiving a final certificate of occupancy.
2. I/We must comply with the requirements of the Alachua County Fire Marshall.
3. I /We must obtain a Local Business Tax Receipt.
4. I/We must meet parking standards and any use specific standards for the zoning district
5. Falsifying information on this application may result in the Certificate of Appropriateness being revoked.

Warranty Deed

This Warranty Deed made this 20th day of July, 2010 between ANTONIO DIFRANCO whose post office address is 13716 N.W. 106th Avenue, Alachua, FL 32615, grantor, and SPENCE INVESTMENT HOLDINGS, LLC, a Florida limited liability company whose post office address is 4110-D N.W. 37th Place, Gainesville, FL 32606, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in Alachua County, Florida to-wit:

Parcel 3
A portion of Lot 4, Block 6, of the OLMSTEAD SURVEY, as per plat thereof recorded in Plat Book "C", Page 79-B of the Public Records of Alachua County, Florida, being more particularly described as follows:

Commence at a set nail and cap 'PLS 4789' at the Southeast corner of said Lot 4, Block 6 of the OLMSTEAD SURVEY and run thence North 00° 01' 07" West, along the West right of way line of NW 140th Street (80 foot right of way), 139.88 feet to a set 1/2" rebar and cap 'PLS 4789' and the point of beginning, thence North 89° 53' 59" West, 93.73 feet to a set 1/2" rebar and cap 'PLS 4789', thence North 00° 01' 07" West, 59.67 feet to a set 1/2" rebar and cap 'PLS 4789' on the North line of said Lot 4, Block 6; thence North 89° 53' 50" East, along said North line of Lot 4, Block 6, 93.73 feet to a found 3/4" pipe on the West right of way line of NW 140th Street (80 foot right of way); thence South 00° 01' 07" East, along said West right of way line, 60.00 feet to the point of beginning.

Parcel Identification Number: 03663-001-001

Subject to easements and restrictions of record.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

The land described herein is not the homestead of the grantor, and neither the grantor nor the grantors spouse, nor anyone for whose support the grantor is responsible, resides on or adjacent to said land.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to December 31, 2009.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

South 00° 01' 07" East, along said West right of way line, 60.00 feet to the point of beginning.

Parcel Identification Number: 03663-001-001

Subject to easements and restrictions of record.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

The land described herein is not the homestead of the grantor, and neither the grantor nor the grantors spouse, nor anyone for whose support the grantor is responsible, resides on or adjacent to said land.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2009.**

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning and Zoning Board of the City of Alachua will hold a public hearing on April 21, 2026, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following:

Application #: PCA26-0001 | Certificate of Appropriateness

A request by Sheila Spence (Applicant and Property Owner) for the approval of a certificate of appropriateness for the addition of a car port to a property in the City of Alachua Downtown Historic District. Subject property is located at 14722 NW 140th Street; Tax Parcel: 03663-001-001; FLU: Central Business District; Zoning: Central Business District (CBD); Overlay: City of Alachua Downtown Historic District.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. one week prior to the date of hearing. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 101 at least 48 hours prior to the public hearing.

Board Agenda Item

MEETING DATE: April 21, 2026

SUBJECT: PSP25-0014 | San Felasco Tech City Fire Station Site Plan - A request by NV5, Inc. (Applicant/Agent) on behalf of The Laser Investment Group, LLC (Property Owner) for a site plan proposing the construction of a ± 11,300 square foot fire station with associated site improvements on a ± 1.03-acre subject property generally located on NW 86th Drive, north of US Highway 441 and south of NW 87th Court (Tax Parcel 05844-004-004). FLU: Corporate Park; Zoning: Corporate Park (CP) (Quasi-Judicial Hearing).

PREPARED BY: Carson Crockett

RECOMMENDED ACTION:

Staff recommends that the Planning & Zoning Board approve the site plan for The Laser Investment Group, LLC, subject to the seven conditions provided in Exhibit "A" and located on page 21 of the April 21, 2026, Staff Report to the Planning & Zoning Board.

Recommended Motion: *I moved that, based upon the competent substantial evidence presented at this hearing, the presentation before this Board, and Staff's recommendation, this Board finds the application for The Laser Investment Group, LLC, to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and approves the site plan, subject to the seven conditions provided in Exhibit "A" and located on page 21 of the April 21, 2026, Staff Report to the Planning & Zoning Board.*

Summary

This application is a request by NV5, Inc. (Applicant/Agent) on behalf of The Laser Investment Group, LLC (Property Owner) for a site plan proposing the construction of a ± 11,300 square foot fire station with associated site improvements. The ± 1.03-acre subject property is generally located on NW 86th Drive, north of US Highway 441 and south of NW 87th Court (Tax Parcel 05844-004-004).

The site plan proposes one restricted egress off of NW 86th Drive and the main ingress and egress off of a private driveway that connects to NW 86th Drive. Stormwater is proposed to be conveyed to an existing master stormwater management facility with a valid environmental resource permit from the Suwannee River Water Management District (ERP-001-232301-6).

Planning & Zoning Board Hearing Date: April 21, 2026
Quasi-Judicial Hearing **Application #: PSP25-0014**

SUBJECT:	A request for a site plan proposing the construction of a ± 11,300 square foot fire station with associated site improvements.
APPLICANT/AGENT:	NV5, Inc.
PROPERTY OWNER:	The Laser Investment Group, LLC
LOCATION:	Generally located on NW 86th Drive, north of US Highway 441 and south of NW 87th Court.
PARCEL ID NUMBER:	05844-004-004
FLUM DESIGNATION:	Corporate Park
ZONING:	Corporate Park (CP)
OVERLAY:	N/A
ACREAGE:	± 1.03-acres
PROJECT PLANNER:	Carson J. Crockett, AICP
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board approve the site plan for The Laser Investment Group, LLC, subject to the seven conditions provided in Exhibit "A" and located on page 21 of the April 21, 2026, Staff Report to the Planning & Zoning Board.
RECOMMENDED MOTION:	*I moved that, based upon the competent substantial evidence presented at this hearing, the presentation before this Board, and Staff's recommendation, this Board finds the application for The Laser Investment Group, LLC, to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and approves the site plan, subject to the seven conditions provided in Exhibit "A" and located on page 21 of the April 21, 2026, Staff Report to the Planning & Zoning Board.*

SUMMARY

This application is a request by NV5, Inc. (Applicant/Agent) on behalf of The Laser Investment Group, LLC (Property Owner) for a site plan proposing the construction of a ± 11,300 square foot fire station with associated site improvements. The ± 1.03-acre subject property is generally located on NW 86th Drive, north of US Highway 441 and south of NW 87th Court (Tax Parcel 05844-004-004).

The site plan proposes one restricted egress off of NW 86th Drive and the main ingress and egress off of a private driveway that connects to NW 86th Drive. Stormwater is proposed to be conveyed to an existing master stormwater management facility with a valid environmental resource permit from the Suwannee River Water Management District (ERP-001-232301-6).

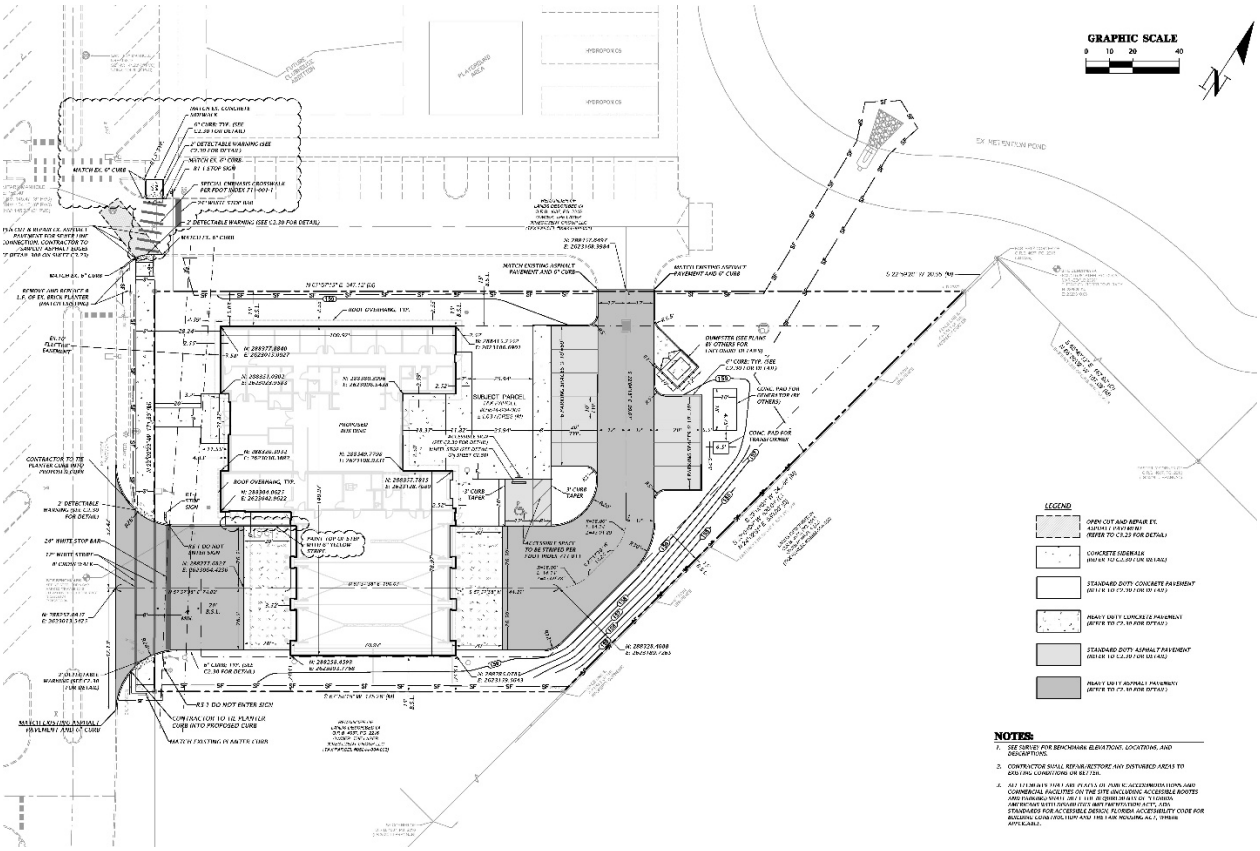

Figure 1. Proposed Site Plan

EXISTING USES

The subject property is undeveloped and is principally comprised of cleared lands.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 1. Figure 2 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Vacant	Corporate Park	Corporate Park (CP)
South	Cemetery	Corporate Park	Corporate Park (CP)
East	Vacant Industrial	Industrial	Industrial General (IG)
West	Commercial Recreation, Indoor	Corporate Park	Corporate Park (CP)

Figure 2. Vicinity Map

NEIGHBORHOOD MEETING

The purpose of a neighborhood meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. Neighborhood meetings are required for site plan applications.

A neighborhood meeting was held on December 8, 2025, at 11801 Research Drive (NV5, inc. Offices). As required by Section 2.2.4 of the City's Land Development Regulations, all property owners within 400 feet of the subject property were notified and notice of the meeting was published in a newspaper of general circulation. The applicant was available to answer questions. Materials submitted by the applicant indicate that the meeting was attended by one member of the public and no questions or concerns were raised. A neighborhood meeting summary submitted by the Applicant is included in the application materials.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Future Land Use Map 2035*

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Objective 1.4: *Corporate Park*

The City shall establish Corporate Park as a mixed-use land use category. This land use category shall provide a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. The Corporate Park category is intended to:

1. Provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology, with provisions for a variety of residential uses; and,
2. Provide a variety of employment opportunities to the citizens of Alachua and the North Central Florida Region.

Evaluation & Findings: The proposed fire and EMS use of the subject property will serve the Corporate Park land use category, including the existing and future residential and non-residential uses, and serve the surrounding region. The location of the fire station in the Corporate Park land use will also provide for additional employment opportunities.

Policy 1.4.b Development within the Corporate Park land use category should be designed in a campus-like or "corporate park" setting with generous, linked open space to maximize value and to promote visual quality and compatibility with the surrounding area. Pedestrian-friendly features, such as buildings placed near the street, sidewalks, and trails leading to nearby uses, such as retail and housing, is encouraged.

Evaluation & Findings: The proposed site plan orients the structure to immediately face NW 86th Drive, with all parking located in the rear of the subject property. Additionally, sidewalk connections are proposed to incorporate the site into the entirety of the Corporate Park land use. The architectural plans of the proposed fire and EMS use have been reviewed and demonstrate a cohesive visual quality with the surrounding area.

Policy 1.4.c: Non-residential Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio (F.A.R.) for parcels 5 acres or greater, 0.75 F.A.R. for parcels less than 5 acres but greater than 1 acre, and 1.0 F.A.R. for parcels 1 acre or less.

Evaluation & Findings: The proposed fire and EMS use will be housed in a ± 11,300 square foot structure on a ± 1.03-acre subject property. This results in an FAR of approximately 0.25, which is well under the maximum of 0.75 FAR allowed for parcels less than 5 acres but greater than 1 acre.

Policy 1.4.f: The City shall develop performance standards for uses in the Corporate Park land use category in order to address the following:

1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;

Evaluation & Findings: The site plan proposes one restricted egress off of NW 86th Drive and the main ingress and egress off of a private driveway that connects to NW 86th Drive. Pedestrian access is provided for on-site and connects to the surrounding sidewalk system along NW 8th Drive and the Corporate Park land use category as a whole.

2. Buffering from adjacent existing/potential uses and use of landscaping to create an integrated design;

Evaluation & Findings: Landscape buffers have been provided for consistent with Section 6.2, Tree protection and landscaping standards, of the City's Land Development Regulations.

3. Open space provisions and balance of proportion between gross floor area and site size;

Evaluation & Findings: Open space has been provided for consistent with Section 6.7, Open space standards, of the City's Land Development Regulations. The site plan proposed a structure with an FAR of approximately 0.25 and proposes a total functional open space of 40.3% of the subject property.

4. Adequacy of pervious surface area in terms of drainage requirements;

Evaluation & Findings: Stormwater is proposed to be conveyed to an existing master stormwater management facility with a valid environmental resource permit from the Suwannee River Water Management District (ERP-001-232301-6).

5. Placement of signage;

Evaluation & Findings: Signage is not proposed as part of the site plan application and will be applied for as a separate building permit. Signage will be reviewed for consistency with Section 6.5,

6. Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;

Evaluation & Findings: Site lighting has been provided for consistent with Section 6.4, Exterior lighting standards, of the City's Land Development Regulations.

7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout and drive aisles, and points of conflict;

Evaluation & Findings: The site layout, including parking and on-site circulation patterns, is consistent with Section 6.1, Off-street parking and loading standards, of the City's Land Development Regulations.

8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;

Evaluation & Findings: Landscaping has been provided for consistent with Section 6.2, Tree protection and landscaping standards, of the City's Land Development Regulations.

9. Unique site features and resources which may constrain site development, such as soils, existing vegetation and historic significance;

Evaluation & Findings: No environmental features, existing vegetation, or historic structures exist on the site; therefore, there are no concerns related to unique site features.

10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design;

Evaluation & Findings: There are no performance based zoning requirements that apply to the subject property; therefore, this policy is not applicable.

11. Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less; and,

Evaluation & Findings: The proposed fire and EMS use will be housed in a ± 11,300 square foot structure on a ± 1.03-acre subject property. This results in an FAR of approximately 0.25, which is well under the maximum of 0.75 FAR allowed for parcels less than 5 acres but greater than 1 acre.

12. Complementary residential uses.

Evaluation & Findings: No residential uses are proposed as part of this application; however, nearby residential uses are incorporated into the overall Corporate Park land use.

Objective 5.1: *Natural Features*

The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: *Topography*: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: *Soils*: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: *Flood prone areas*: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: *Wetlands*: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: *Habitat*: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: An environmental conditions analysis was conducted, with the findings included in this report. Based on the best available data, there are no significant environmental resources that would limit or impact development.

Objective 5.2: *Availability of facilities and services*

The City shall utilize a concurrency management system to ensure that the adopted levels of service standards are maintained.

Evaluation & Findings: A public facilities impact analysis was conducted, with the findings included in this report. No adverse impacts to the level of service of any facility monitored for concurrency are anticipated as part of the application.

Objective 9.1: *Connections to Water and Wastewater Systems*

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

Evaluation & Findings: The subject property is within the City's Community Wastewater Service Area and Community Potable Water Service Area. The proposed site plan will connect to City facilities at time of development as required.

Transportation Element

Objective 1.1: *Level of Service*

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation & Findings: A public facilities impact analysis was conducted, with the findings included in this report. No adverse impacts to the level of service of any facility monitored for concurrency are anticipated as part of the application.

Policy 1.4.d: The City shall require pedestrian paths within subdivisions and within new developments to be connected to paths outside the development.

Evaluation & Findings: Pedestrian access is provided for on-site and connects to the surrounding sidewalk system along NW 8th Drive and the Corporate Park land use category as a whole.

Community Facilities Element

Policy 1.1.d: The City hereby establishes the following level of service standards for sanitary sewer facilities:

a) *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection (FDEP).

b) *Quantity*: System-wide wastewater collection and treatment will be sufficient to provide a minimum of 250 gallons per day per equivalent residential unit (ERU) on an average annual basis. Plant expansion shall be planned in accordance with Rule 62-600.405, Florida Administrative Code, or subsequent provision..

c) *System capacity*: If the existing demand and reserved capacity of the committed use of the City's wastewater facility reaches 85% of the permitted capacity design, no further development orders for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: A public facilities impact analysis was conducted, with the findings included in this report. No adverse impacts to the level of service of any facility monitored for concurrency are anticipated as part of the application.

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which shall include all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity water main exists within 100 feet of the property line of any lot with a residential land use category or an existing single family residence and wastewater service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. Gravity wastewater main exists with 500 feet of the property line of any proposed residential subdivision consisting of 5 units or less and the gravity wastewater system is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation & Findings: The subject property is within the City's Community Wastewater Service Area and Community Potable Water Service Area. The proposed site plan will connect to City facilities at time of development as required.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities for residential uses:

Facility Type	Level of Service Standard
Solid Waste Landfill	0.73 tons per capita per year

Evaluation & Findings: A public facilities impact analysis was conducted, with the findings included in this report. No adverse impacts to the level of service of any facility monitored for concurrency are anticipated as part of the application.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within 100 feet of any lot within a residential land use category or an existing single family residence water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. A water main exists within 500 feet of any proposed residential subdivision consisting of 5 units or less and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation & Findings: The subject property is within the City's Community Wastewater Service Area and Community Potable Water Service Area. The proposed site plan will connect to City facilities at time of development as required.

Policy 4.1.c: The City establishes the following level of service standards for potable water:

1. *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection.
2. *Quantity*: System-wide potable water distribution and treatment will be sufficient to provide a minimum of 275 gallons per day per equivalent residential unit (ERU) on an average annual basis.

3. *Capacity*: Plant expansion shall be planned in accordance with Florida Administrative Code. Additionally, if the existing demand and reserved capacity of the City's potable water facility reaches 85% of the permitted design capacity, no further development orders or permits for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: A public facilities impact analysis was conducted, with the findings included in this report. No adverse impacts to the level of service of any facility monitored for concurrency are anticipated as part of the application.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Evaluation & Findings: Although Figure 3 shows potential wetlands on the subject property, field visits confirmed that there are no delineated wetlands on the subject property. Should wetlands be discovered during development of the site, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation & Findings: The subject property is not located within or adjacent to a strategic ecosystem; therefore, the development is not anticipated to impact any strategic ecosystem(s) identified within the ecological inventory report.

Regulated Plant & Animal Species

The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region.

Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation & Findings: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. Some areas of the subject property have been identified as priority three as part of the FNAI; however, the limitations of the FNAI result in non-contiguous portions of the subject property being identified. Should a regulated plant or animal species be discovered during development, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Soil Survey

The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff.) There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have a lower infiltration rate and therefore a higher runoff potential.

There are two soil types found within the subject property, shown in Table 2.

Table 2. Soil Types

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Millhopper Sand; 0 - 5% Slopes	A	Moderately Well Drained	Slight	Slight	87.28%
Fort Meade Fine Sand; 0 – 5% Slopes	A	Well Drained	Slight	Slight	12.72%

Evaluation & Findings: The two soils present on the subject property are well-drained and are conducive to the type of development proposed. As such, there are no concerns related to the soils on the subject property.

Flood Potential

Panel 12001C0143E of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated November 2, 2018, indicates that the development area is in Flood Zone X (areas determined to be outside of the 500-year floodplain).

Evaluation & Findings: The subject property is located in Flood Zone X. As such, there are no concerns related to flood potential on the subject property.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.

Evaluation & Findings: The subject property is not located in an area of high aquifer recharge potential and no sinkholes are known to exist on the subject property. As such, there are no concerns related to karst-sensitive features on the subject property.

Wellfield Protection Zones

Policy 7.2.1 of the Future Land Use Element of the City's Comprehensive Plan establishes a 500-foot radius area around each city-owned potable water well.

Evaluation & Findings: The subject property is not located within a wellfield protection zone. As such, there are no concerns related to wellfield protection on the subject property.

Historic Structures/Markers and Historic Features

The State of Florida and the Alachua County Historic Resources Inventory identify historic structures in addition to the City's Historic Overlay District, as established by Section 3.7 of the City's Land Development Regulations.

Evaluation & Findings: The subject property is not located in the City's Historic Overlay District and no structures identified as historic by the State of Florida or the Alachua County Historic Resources Inventory exist on the subject property. As such, there are no concerns related to historic structures or features on the subject property.

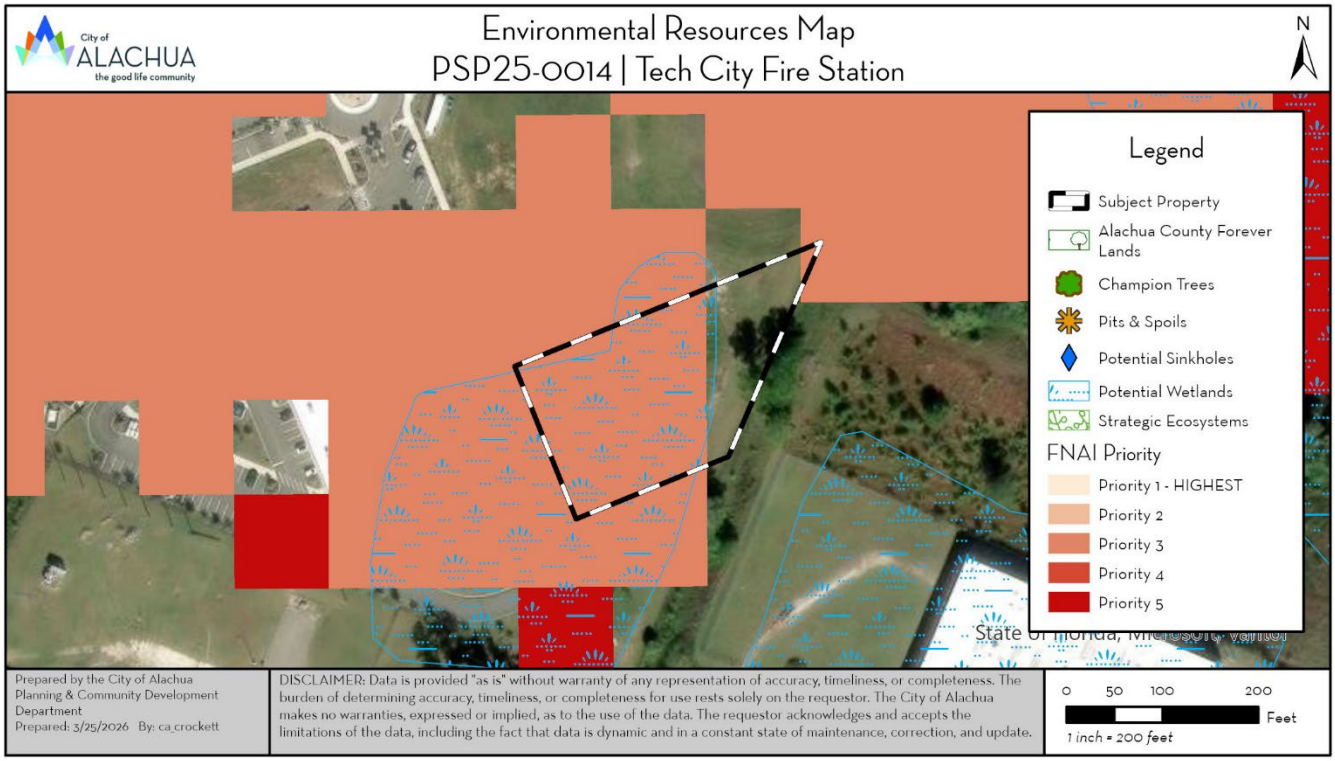

Figure 3. Environmental Resources Map

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Site Plan Standards

Section 2.4.9(E)(1) of the City's Land Development Regulations (LDRs) establishes the standards with which all site plans must be found compliant. The application has been reviewed for compliance with the standards of Section 2.4.9(E)(1). An evaluation of the findings of the applicant's compliance with the standards of Section 2.4.9(E)(1) is provided below.

(1) *Minor site plan and site plan standards*. A minor site plan or site plan shall be approved only upon a finding the applicant demonstrates all of the following standards are met:

(a) *Consistency with the Comprehensive Plan*. The development and uses proposed by the minor site plan or site plan comply with the goals, objectives and policies of the Comprehensive Plan.

Evaluation & Findings: An analysis of the application's consistency with the Comprehensive Plan has been provided in this report. Staff has found the application to be consistent with the Comprehensive Plan.

(b) *Use allowed in zone district*. The use is allowed in the zone district in accordance with Article 4, Use Regulations.

Evaluation & Findings: The subject property is zoned Corporate Park (CP), which permits the fire and EMS use type.

(c) *Zone district use specific standards*. The development and uses proposed by the minor site plan or site plan comply with Section 4.3, Use specific standards.

Evaluation & Findings: Section 4.3.2(G) of the City's LDRs establishes use specific standards for all use types in the public safety use category. The application has been reviewed for, and been found to comply with, the standards of Section 4.3.2(G).

(d) *Development and design standards*. The development proposed by the minor site plan or site plan and its general layout and design comply with all applicable standards in Article 6, Development Standards.

Evaluation & Findings: The application has been reviewed for, and been found to comply with, all applicable and relevant provisions of Article 6, Development Standards, including but not limited to Section 6.1, Off-street parking and loading standards, Section 6.2, Tree protection and landscaping standards, Section 6.3, Fencing standards, Section 6.4, Exterior lighting standards, Section 6.7, Open space standards, and Section 6.9, Environmental protection standards.

(e) ***Subdivision standards***. In cases where a subdivision has been approved or is pending, the development proposed by the minor site plan or site plan and its general layout and design comply with all applicable standards in Article 7, Subdivision Standards.

Evaluation & Findings: No subdivision of land is proposed as part of the application; therefore, compliance with this standard is not applicable.

(f) ***Complies with all other relevant City laws, ordinances, regulations, requirements, and State and Federal laws and regulations***. The proposed development and use complies with all other relevant City laws, ordinances, regulations, requirements, and with all State and Federal laws and regulations.

Evaluation & Findings: The application has been reviewed for, and been found to comply with, all other relevant City ordinances and regulations.

PUBLIC FACILITIES IMPACT ANALYSIS

Section 2.4.14 of the City's Land Development Regulations (LDRs) establishes the standards for a Certificate of Concurrency Compliance which applies to all development orders unless exempted by Section 2.4.14(C). The application has been reviewed for impacts to roads, sanitary sewer, solid waste, stormwater management, potable water, and recreation facilities to ensure the application's potential impacts do not negatively impact the level of service (LOS) for those public facilities.

Traffic Impact

The following impacts are expected on the roadway segments identified in Table 3.

Table 3-1. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2]	Segment Description	Lanes	Functional Classification	Area Type	LOS
4	US 441: from CR 25A East Intersection to SR 235	4/D	Principle Arterial	Urban Trans	D

1 City of Alachua Comprehensive Plan, Transportation Element.
2 For developments generating less than 1,000 trips, affected roadway segments are identified as all those wholly or partially located within 1/2 mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater [Section 2.4.14(H)(2)(a)of the LDRs].

Table 3-2. Projected Impact on Affected Comprehensive Plan Roadway Segment

Traffic System Category	Segment 4 US 441	
	AADT	Peak Hour
Maximum Service Volume[1]	45,700	4,110
Existing Traffic[2]	19,600	1,747
Reserved Trips[3]	1,612	169
Available Capacity[3]	24,488	2,194
Increase/Decrease in Trips Generated by Development[4]	53	5
Residual Capacity	24,435	2,189
Residual Percentage of Permitted Design Capacity Utilized	46.53%	46.74%

1 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
2 Florida Department of Transportation. (2026). *2025 Count Data.* Accessed via Florida Traffic Online April 2026.
3 Source: City of Alachua April 13, 2026, Development Monitoring Report.
4 Trip Generation Formula: ITE Trip Generation 12th edition; Trip Distribution: Segment 4 – 100%.

Evaluation & Findings: The anticipated impacts generated by the development will not adversely impact the level of service of the roadway segments identified above. The impacts that will be generated by the development are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Potable Water Impacts

Table 4. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity[1]	3,000,000
Less Actual Potable Water Flows[1]	1,447,333
Reserved Capacity[2]	350,100
Available Capacity	1,202,567
Increase/Decrease in Potable Water Demand from Application[3]	1,695
Residual Capacity	1,200,872
Residual Percentage of Permitted Design Capacity Utilized	59.97%

1 City of Alachua Public Services Department, April 2026
2 City of Alachua April 13, 2026, Development Monitoring Report
3 Formula: Per 62-6.008 FAC (11,300 sq. ft. / 100) * 15 gpd.

Evaluation & Findings: The anticipated impacts generated by the development will not adversely impact the level of service of the City's potable water facilities. The impacts that will be generated by the development are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Sanitary Sewer Impacts

Table 5. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Permitted Capacity[1]	1,500,000
Less Actual Treatment Plant Flows[1]	756,000
Reserved Capacity[2]	325,846
Available Capacity	418,154
Increase/Decrease in Sanitary Sewer Demand from Application[3]	1,695
Residual Capacity	416,459
Residual Percentage of Permitted Design Capacity Utilized	72.24%

1 City of Alachua Public Services Department, April 2026
2 City of Alachua April 13, 2026, Development Monitoring Report
3 Formula: Per 62-6.008 FAC (11,300 sq. ft. / 100) * 15 gpd.

Evaluation & Findings: The anticipated impacts generated by the development will not adversely impact the level of service of the City's sanitary sewer facilities. The impacts that will be generated by the development are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Solid Waste Impacts

Table 6. Solid Waste Impacts

System Category	Pounds Per Day	Tons Per Year
Existing Demand[1]	45,412.00	8,287.69
Reserved Capacity[2]	43,496.82	7,938.17
Increase/Decrease in Demand Generated by Application[3]	24.74	4.50
New River Solid Waste Facility Anticipated Capacity[4]	30+ Years	

1 Bureau of Economic & Business Research, University of Florida, Estimates of Population by County and City in Florida (2025); Policy 2.1.a, Community Facilities Element. Formula: 11,353 Persons x 0.73 tons per year.
2 City of Alachua April 13, 2026, Development Monitoring Report
3 Formula: Scincero and Sincero; Enviornmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996. (((12 lbs / 1,000 sq. ft. / day * 11,300 sq. ft.) * 365) / 2,000).
4 New River Solid Waste Association, April 2026

Evaluation & Findings: The anticipated impacts generated by the development will not adversely impact the level of service of the City's solid waste facilities. The impacts that will be generated by the development are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Recreation Facilities

The proposed development is a nonresidential development; therefore, there are no impacts to recreation facilities. The development will have no impact to the Level of Service (LOS) of recreation facilities.

Public School Facilities

The proposed development is a nonresidential development; therefore, there are no impacts to public school facilities. The development will have no impact to the Level of Service (LOS) of public school facilities.

Stormwater Management Facilities

The proposed site plan application will convey stormwater to an off-site stormwater management facility originally permitted as a master environmental resource permit (ERP-001-232301-6). No City maintained facilities are to be impacted by the site plan. The proposed site plan application is not anticipated to impact the level of service of stormwater management facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

TO
PSP25-0014
SAN FELASCO TECH CITY FIRE STATION SITE PLAN
STAFF REPORT

CONDITIONS

1. The Applicant acknowledges and agrees that if any gopher tortoises or gopher tortoise burrows are discovered on site, it shall provide a 100% gopher tortoise survey for the subject property, which shall include a list of all local, state, and federal permits required for relocation of any gopher tortoises on site. Surveys shall be valid for a period of 3 years from original date of survey. This condition shall be the obligation of any subsequent party with interest in the property subject to this Development Order.
2. The Applicant acknowledges and agrees that if any killdeer or killdeer nests are discovered on site, it shall provide a 100% killdeer survey for the subject property. Surveys shall be valid for a period of 3 years from original date of survey. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
3. The Applicant acknowledges and agrees it shall utilize the standard measures for protection for the Eastern Indigo Snake as outlined in the latest snake protection/education plan developed by the U.S. Fish and Wildlife Service. This condition shall be the obligation of any subsequent party with interest in the property subject to this Development Order.
4. The Applicant acknowledges and agrees that all public access and utility easements shall be prepared in coordination with the City's Compliance & Risk Management Department and shall receive approval of the City's Compliance & Risk Management Director prior to being recorded in the Public Records of Alachua County and prior to the issuance of a building permit for any building activity associated with this Development Order. The Applicant shall incur all costs associated with preparing and recording easements. This condition shall be the obligation of any subsequent party with interest in the property subject to this Development Order.
5. The Applicant acknowledges and agrees to ensure sufficient fire flow, compliant with any regulations from the Authority Having Jurisdiction (AHJ), prior to the issuance of a building permit. The Applicant shall be responsible for any cost associated with the provision of adequate fire flow. This condition shall be the obligation of any subsequent party with interest in the property subject to this Development Order.
6. The Applicant acknowledges and agrees that it shall obtain all other applicable local, state, and federal permits before the commencement of site plan work. This condition shall be the obligation of any subsequent party with interest in the property subject to this Development Order.

7. The Applicant acknowledges and agrees that Conditions 1 – 6 as stated above do not inordinately burden the land and shall be binding upon the property owner, including any subsequent property owners, successors, or assigns, and that the site plan shall comply with Conditions 1 – 7 as stated herein.

RE: Notice of Hearing to be Scheduled for the Tech City Fire Station Site Plan Application

Dear Randy Olney,

On March 18, 2026, the City of Alachua received your revised site plan application for the San Felasco Tech City Fire Station project submitted on behalf of The Laser Investment Group, LLC. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been scheduled for the **April 21, 2026,** Planning & Zoning Board meeting.

You must provide two *double sided, three-hole punched, color sets* of each **complete** application package, seven full size sets of site plans, and a digital copy of all materials in PDF format on a CD or by emailing a Cloud/FTP link to download the materials to planning@cityofalachua.org *no later than 10 business days prior to the Planning & Zoning Board meeting at which your application is scheduled to be heard*; therefore, the above referenced materials must be submitted to the City no later than ***Monday, April 6, 2026***. Materials may be submitted earlier than this date.

Additionally, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing; therefore, posted notice signs must be placed on the property no later than ***Monday, April 6, 2026***. These signs will be ready for pickup after 12:00 PM on Thursday, April 2, 2026. You will be notified again when the signs are available.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

Sincerely,

Carson J. Crockett, AICP
Principal Planner

RE: **San Felasco Tech City Fire Station Site Plan**

Public Services has reviewed the subject project (March 2026 Submittal Documents) and offer the following comments. Review was specific to the Public Services Utilities.

NO.	COMMENTS
1	**Comment on Feb 2026 Submittal** **Sheet C0.0** Under General Notes, note 5, replace City of Alachua with appropriate electricity service provider. Please **Revise and Resubmit** this sheet. **The revised sheet may be submitted directly to Public Services via email, as a PDF attachment.** **Comment on March 2026 Submittal** **Sheet C0.0** **Approved**
2	**Comment on Jan 2026 Submittal** **Sheet C0.0**

NO.	COMMENTS
	Replace the title "Construction Plans" with "Site Plans". Please **Revise and Resubmit** this sheet **Comment on Feb 2026 Submittal** **Sheet C0.0** **Approved**
3	**Comment on Jan 2026 Submittal** **Fire Flow** The fire flow results the City received show sufficient calculations, but not sufficient flow for the real-world fire test. In addition, the City's Water Hydraulics Model also shows insufficient flow. Therefore, it is the responsibility of the owner-contractor to ensure steps are taken to supply sufficient fire flow. Please **Revise and Resubmit** this sheet **Comment on Feb 2026 Submittal** **Fire Flow** Applicant has stated they are aware of the insufficient fire flow, and will ensure compliance with any regulations from the Authority Having Jurisdiction (AHJ) before the building is approved. **Conditional Approval** **Planning will include this requirement as a necessary condition for the approval of the building permit.** **Comment on March 2026 Submittal** **Fire Flow** To repeat the above, applicant has stated they are aware of the insufficient fire flow available at the proposed site, and will ensure compliance with any regulations from the Authority Having Jurisdiction (AHJ) before the building is approved. **Conditional Approval** Planning will include this requirement as a necessary condition for the approval of the building permit.

NO.	COMMENTS
4.	**Comment on Jan 2026 Submittal** **Sheet C3.10** All utilities shown within the property are private, and all water lines used are already being metered. Therefore, please remove all PUEs shown, and clarify that the utilities offsite are provided and maintained by the City, while all utilities within the property line are to be maintained by the owner-contractor. Please **Revise and Resubmit** this sheet. **Comment on Feb 2026 Submittal** **Sheet C3.10** Replace the added note to sheet C3.10 with the following: "All onsite utilities are private, and shall be privately maintained. The transitions from the City of Alachua's maintenance responsibility to the private entities' maintenance responsibility are shown as 'COA End of Maintenance' call-outs. Such call-outs can be found on previous San Felasco Tech City Plan Sets." Also, at the 1" private water meter, remove "(END OF COA MAINTENANCE)". Please **Revise and Resubmit** this sheet. **The revised sheet may be submitted directly to Public Services via email, as a PDF attachment.** **Comment on March 2026 Submittal** **Sheet C3.10** **Approved**
5.	**Comment on Jan 2026 Submittal** **Sheet C3.10** Call out the water meter on site for this property as a "PRIVATE WATER METER". Please **Revise and Resubmit** this sheet. **Comment on Feb 2026 Submittal** **Sheet C3.10** **Approved**

NO.	COMMENTS
6.	**Comment on Jan 2026 Submittal** **General Comment** The City of Alachua takes no objections to using City details, as long as it is clear we won't be maintaining private infrastructure. Please **Revise and Resubmit** this sheet. **Comment on Feb 2026 Submittal** **General Comment** **Approved**

Please advise if you have any questions or require additional information.

Application #: PSP25-0014

RE: Project Assistance Team (PAT) Comments for Tech City Fire Station Site Plan

Dear Randy Olney,

On February 5, 2026, the Planning & Community Development Department received your revised site plan application for the Tech City Fire Station project, which proposes the construction of a ± 11,300 square foot fire station with associated site improvements on a ± 1.03-acre subject property (tax parcel 05855-004-004).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting may be scheduled to review these comments by request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 18, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026 Planning & Zoning Board (PZB) Meeting**.

Address the following insufficiencies:

Remaining Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

4. Article 6 – Development Standards

f. Section 6.8 – Design standards for business uses

ii. Per site plan application section D.1.cc, architectural plans shall include calculation of glazing, façade massing, and materials utilized. Provide required calculations.

Response: Please refer to Sheet A-201, Exterior Elevations. The required calculations for glazing, façade massing, and material usage are provided. Note that glazing on the North elevation is limited to 15% due to the interior function as bunk/sleeping quarters. Also note that the South elevation consists of the Apparatus Bay, where glazing is not permitted due to operational visibility restrictions.

Remaining Deficiency: As a street facing façade, the north elevation is required to have 20% glazing per Section 6.8.2(A)(2)(a)(i)a. Only 15% is provided. Staff notes the floorplan limitation and refers to the applicant to Section 6.8.2(A)(2)(a)(iv), which permits the use of spandrel class when an architectural floorplan demonstrates that windows cannot be provided due to a limitation presented by the interior layout or functional purpose of such interior space. Provide spandrel glass for the remaining required glazing.

iii. The north façade faces a street and is therefore subject to the façade massing standards. Provide required façade offsets or alternatives as set forth in Section 6.8.2(b).

Response: Please refer to sheets A-201 and A-202, Exterior Elevations. The north façade has been revised to include offset alternatives per Section 6.8.2(b). Façade color and material changes following the same dimensional standards as the offset requirements have been incorporated into the design.

Remaining Deficiency: Section 6.8.2(A)(2)(b)(i) requires each offset have a minimum width of ten feet. The alternative chosen to be provided is required by Section 6.8.2(A)(2)(b)(ii)a. to follow the same dimensional standards as the offset requirement. The offset alternatives provided are only 4'-8" in width. Revise to provide offset alternatives at least ten feet in width.

iv. Per Section 6.8.2(B), when a sidewalk system exists within a right-of-way which is contiguous to the development, a minimum of one pedestrian connection to the sidewalk system shall be provided. Provide required connection to sidewalk on NW 86th Drive. Extend sidewalk to the southern property line, including crosswalk across driveway.

Response: The sidewalk has been shifted to the right of way and a connection to the sidewalk on NW 86th Drive has been provided. Please refer to Sheet C1.10.

Remaining Deficiency: Provide crosswalk and curb cut to connect to the sidewalk to the north.

5. **Outside Review**
   a. Review and address comments from outside reviewer dated 02/15/2026 (attached).
   b. Review and address comments from City of Alachua Public Services dated 02/17/2026 (attached).

Pursuant to Resolution 24-05, application fees include two (2) PAT reviews, and the reviews associated with each resubmittal to confirm that comments were addressed. **Please note, if an additional PAT review is required, a surcharge of 25% of the site plan application fee will be assessed for the additional PAT review** (site plan application fee - $2,700; 25% surcharge - $675;). You will be notified if an additional PAT review is required, and the surcharge must be paid prior to any further review of the application.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

Sincerely,

Carson J. Crockett, AICP
Principal Planner

RE: Tech City Fire Station

Dear Mr. Crockett,

As you requested, we have reviewed the submitted Site Plan Application and other materials provided to us for the above referenced project. The applicant has addressed our previous comments, and we find this project approvable from a technical perspective. We have one minor comment listed below:

C2.10 – Detailed Grading and Drainage Plan

1. It appears that the landing outside of the door on the south side of the building near the driveway has a slope of approximately 4.80%. Please review the grading of this sidewalk. No resubmittal required.

Sincerely,

Timothy J. Boehlein, PE
Project Manager, JBPro

RE: **San Felasco Tech City Fire Station Site Plan**

Public Services has reviewed the subject project (February 2026 Submittal Documents) and offer the following comments. Review was specific to the Public Services Utilities.

NO.	COMMENTS
1	**Comment on Feb 2026 Submittal** **Sheet C0.0** Under General Notes, note 5, replace City of Alachua with appropriate electricity service provider. Please **Revise and Resubmit** this sheet. **The revised sheet may be submitted directly to Public Services via email, as a PDF attachment.**
2	**Comment on Jan 2026 Submittal** **Sheet C0.0** Replace the title "Construction Plans" with "Site Plans". Please **Revise and Resubmit** this sheet

NO.	COMMENTS
	Comment on Feb 2026 Submittal **Sheet C0.0** **Approved**
3	**Comment on Jan 2026 Submittal** **Fire Flow** The fire flow results the City received show sufficient calculations, but not sufficient flow for the real-world fire test. In addition, the City's Water Hydraulics Model also shows insufficient flow. Therefore, it is the responsibility of the owner-contractor to ensure steps are taken to supply sufficient fire flow. Please **Revise and Resubmit** this sheet **Comment on Feb 2026 Submittal** **Fire Flow** Applicant has stated they are aware of the insufficient fire flow, and will ensure compliance with any regulations from the Authority Having Jurisdiction (AHJ) before the building is approved. **Conditional Approval** **Planning will include this requirement as a necessary condition for the approval of the building permit.**
4.	**Comment on Jan 2026 Submittal** **Sheet C3.10** All utilities shown within the property are private, and all water lines used are already being metered. Therefore, please remove all PUEs shown, and clarify that the utilities offsite are provided and maintained by the City, while all utilities within the property line are to be maintained by the owner-contractor. Please **Revise and Resubmit** this sheet. **Comment on Feb 2026 Submittal** **Sheet C3.10** Replace the added note to sheet C3.10 with the following:

NO.	COMMENTS
	"All onsite utilities are private, and shall be privately maintained. The transitions from the City of Alachua's maintenance responsibility to the private entities' maintenance responsibility are shown as 'COA End of Maintenance' call-outs. Such call-outs can be found on previous San Felasco Tech City Plan Sets." Also, at the 1" private water meter, remove "(END OF COA MAINTENANCE)". Please **Revise and Resubmit** this sheet. **The revised sheet may be submitted directly to Public Services via email, as a PDF attachment.**
5.	**Comment on Jan 2026 Submittal** **Sheet C3.10** Call out the water meter on site for this property as a "PRIVATE WATER METER". Please **Revise and Resubmit** this sheet. **Comment on Feb 2026 Submittal** **Sheet C3.10** **Approved**
6.	**Comment on Jan 2026 Submittal** **General Comment** The City of Alachua takes no objections to using City details, as long as it is clear we won't be maintaining private infrastructure. Please **Revise and Resubmit** this sheet. **Comment on Feb 2026 Submittal** **General Comment** **Approved**

Please advise if you have any questions or require additional information.

RE: Project Assistance Team (PAT) Comments for Tech City Fire Station Site Plan

Dear Randy Olney,

On January 5, 2026, the Planning & Community Development Department received your revised site plan application for the Tech City Fire Station project, which proposes the construction of a ± 11,300 square foot fire station with associated site improvements on a ± 1.03-acre subject property (tax parcel 05855-004-004).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting is scheduled for **10:30 AM, Tuesday, January 27, 2026,** to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, February 4, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **March 2026 Planning & Zoning Board (PZB) Meeting.**

Address the following insufficiencies:

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Concurrency Impact Analysis**
   a. Provide rate and formula for trip generation. The Tomoka Hills Fire Station project, of a similar size, did generate daily trips. Staff understands a new ITE Edition has been released since the previous application process occurred. Please confirm.
2. **Article 4 – Use Regulations**
   a. Provide detail, in color, on proposed solar canopies to ensure compliance with Section 4.4.4(K).
3. **Article 5 – Dimensional Standards**
   a. Provide measurement of roof overhang that projects into the required yard (north). Per Table 5.2-1, hoods, canopies, roof overhangs, and/or marquees shall not project over three feet into a required yard, and shall come no closer than one foot to the lot line.
4. **Article 6 – Development Standards**
   a. Section 6.1 – Off-street parking and loading
      i. Required ADA space is shown in the right-of-way and is not provided off-street. Per Section 6.1.4(A)(1), all required off-street parking facilities shall be located on the same lot or parcel of land they are intended to serve.
      ii. Provide width of ADA space on sheet C1.10. Dimensions must comply with Section 6.1.9(A).
   b. Section 6.2 – Tree protection and landscaping standards
      i. Per Section 6.2.2(D)(1)(b), required site understory trees must be distributed 50% in front of the structure and 25% on each side. Eight total are required, resulting in four understory trees required in front of the structure. Staff noted only three. Relocate one understory tree to the west side (primary side) of the site.
      ii. Provide dumpster enclosure detail in accordance with Section 6.2.3(B).
      iii. Per Section 6.2.2(D)(7), a preliminary irrigation plan shall be submitted at time of site plan with the required notes. Note final irrigation plans are permitted through Alachua County. Irrigation must be sufficient for establishment of plants in the respective water use zone. Provide preliminary irrigation plan.
   c. Section 6.3 – Fencing standards
      i. Confirm no fencing is proposed as part of this site plan. If fencing is proposed, provide a fencing plan in accordance with Section 6.3.
   d. Section 6.4 – Exterior lighting standards
      i. Per Section 6.4.4(C), maximum initial horizontal illumination shall not exceed ten footcandles at building entries and five footcandles in parking lots in the business districts. Staff notes one instance on sheet AP-100 in the rear parking lot that exceeds five footcandles. Revise.

e. Section 6.5 – Signage
    i. The applicant is put on notice that a site plan does not permit signage and that all signage must be permitted through a separate sign permit. Remove signage from architectural sheets.
f. Section 6.8 – Design standards for business uses
    i. Sheets A-101 and A-201 were not submitted electronically. Ensure these sheets are submitted electronically with future submittals.
    ii. Per site plan application section D.1.cc, architectural plans shall include calculation of glazing, façade massing, and materials utilized. Provide required calculations.
    iii. The north façade faces a street and is therefore subject to the façade massing standards. Provide required façade offsets or alternatives as set forth in Section 6.8.2(b).
    iv. Per Section 6.8.2(B), when a sidewalk system exists within a right-of-way which is contiguous to the development, a minimum of one pedestrian connection to the sidewalk system shall be provided. Provide required connection to sidewalk on NW 86th Drive. Extend sidewalk to the southern property line, including crosswalk across driveway.

5. **Outside Review**
    a. Review and address comments from outside reviewer dated 01/18/2026 (attached).
    b. Review and address comments from City of Alachua Public Services dated 01/20/2026 (attached).

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

Sincerely,

Carson J. Crockett, AICP
Principal Planner

RE: Tech City Fire Station

Dear Mr. Crockett,

As you requested, we have reviewed the submitted Site Plan Application and other materials provided to us for the above referenced project. Our review generated the following comments and recommendations that are outlined below.

General Application Comments

1. Please provide final SRWMD minor modification permit once received.
2. The available fire flow is noted to be below the required amount. The fire flow report states that the fire protection system may need booster pumps to achieve the required minimum. Please provide additional information or confirmation from the Fire Marshall on the proposed solution.
3. Please show proposed lights on the landscape plan to demonstrate there will be no conflicts with proposed plantings.

C0.21 -Stormwater Pollution Prevention Plan

1. The detail for Outfall Protection on Sheet C0.22 does not match up with what is shown with the silt fence on Sheet C0.21. Recommend updating the silt fence shown on Sheet C0.21 to match what is shown in the detail to avoid confusion and ensure no washout is caused in the existing retention pond.

C1.10 – Detailed Horizontal Control Plan

1. Please clarify if there are existing crosswalks or locations where the site sidewalks will tie into the master pedestrian circulation for the project area.
2. Recommend providing detectable warnings at the proposed curb ramps.
3. A curb ramp is provided leading to the main driveway on the west side of the project; however, no crosswalk striping or continuation of pedestrian network is shown. Future extension of this pedestrian network would likely conflict with

proposed backflow preventor and hydrant. Please clarify if sidewalk will continue to south in future.
4. Per FDOT index 711-001, ADA marking on an angled parking space shall be rotated to be aligned with pavement markings. Please revise for clarity.
5. Please show vehicle tracking exhibit demonstrating that a dump truck can access the proposed location of the dumpster and exit the site.

C2.10 – Detailed Grading and Drainage Plan

1. Provide additional grading information on the curb ramp leading to the driveway on the southwest portion of the site.
2. Provide additional spot elevations at the driveways leading to the building as well as on the proposed sidewalks.
3. Confirm that 12” area drain that is detailed on Sheet C2.30 has the ability to accept (2) 15” pipes and (1) 8” pipe.
4. The plan shows heavy duty concrete and sidewalk. The details on Sheet C2.30 show heavy duty concrete, standard concrete pavement, and sidewalk. All of which have different thicknesses. Please clarify where standard vs. sidewalk concrete shall be used.
5. Please clarify where Wheel Stops (detailed on Sheet 2.30) will be used.

C3.10 – Detailed Utility Plan

1. The provided meter sizing calculations show a 1” meter, however the plans show a 2” meter. Please clarify the discrepancy.

Sincerely,

Timothy J. Boehlein, PE

RE: Completeness Review for Tech City Fire Station Site Plan Application

Dear Randy Olney,

On January 5, 2026, the Planning & Community Development Department received your revised site plan application for the Tech City Fire Station project, which proposes the construction of a ± 11,300 square foot fire station with associated site improvements on a ± 1.03-acre subject property (tax parcel 05855-004-004).

According to Section 2.2.6 of the City's Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned application for completeness and finds that **the application is now complete.**

A full review of the application will now be undertaken by the City, with the findings transmitted to you and a Project Assistance Team (PAT) meeting scheduled under separate cover. If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

RE: Completeness Review for Tech City Fire Station Site Plan Application

Dear Randy Olney,

On December 22, 2025, the Planning & Community Development Department received your site plan application for the Tech City Fire Station project, which proposes the construction of a ± 11,300 square foot fire station with associated site improvements on a ± 1.03-acre subject property (tax parcel 05855-004-004).

According to Section 2.6.6 of the City's Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned application for completeness and finds that **the application is incomplete** and that the following deficiencies must be addressed to begin the review of the application. The following deficiencies must be addressed no later than **5:00 PM on Tuesday, January 6, 2026**, to remain on the March Planning & Zoning Board review schedule.

In accordance with Section 2.2.6(B) of the LDRs, the applicant must correct the deficiencies and resubmit the application for completeness determination. *Plans and application materials may be made available for return in order to revise and resubmit as needed.*

The time frame and cycle for review shall be based upon the date the application is determined to be complete. If the applicant fails to respond to the identified deficiencies within 45 calendar days, the application shall be considered withdrawn.

Please note that if an additional completeness review is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the application.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the content of the application will be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be scheduled after the application is determined to be complete.

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Site Plan Attachment #7, Neighborhood Meeting Materials**
   a. Provided mailed notice list for the neighborhood meeting did not include the required list of registered persons. Mailed notice must include this list of registered persons. Submit documentation demonstrating these individuals were mailed notice or hold an additional neighborhood meeting to remedy.
2. **Site Plan Attachment #10, Proof of Payment of Taxes**
   a. A 2024 tax bill was provided. Provide proof of payment of 2025 tax bill.

Note for future applications: The authorized agent affidavit was submitted on an outdated form. The City will accept it for the purposes of this application; however, please ensure submittals are made using the most up to date forms available on the City's website.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

GENERAL NOTES

1. THE TOPOGRAPHIC AND EXISTING INFORMATION SHOWN HEREON WERE TAKEN FROM A BOUNDARY AND TOPOGRAPHIC SURVEY PREPARED BY NV5, AND DATED SEPTEMBER 18, 2025 AND REVISED OCTOBER 16, 2025.

2. THE LOCATION OF ALL EXISTING UTILITIES SHOWN ON THE PLANS HAS BEEN DETERMINED FROM THE BEST INFORMATION AVAILABLE. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR ACCURACY. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO NOTIFY THE VARIOUS UTILITIES AND TO MAKE NECESSARY ARRANGEMENTS FOR ANY RELOCATION OF THESE UTILITIES WITH THE OWNER OF THE UTILITY. THE CONTRACTOR SHALL EXERCISE CAUTION WHEN CROSSING ANY UNDERGROUND UTILITY, WHETHER SHOWN ON THE PLANS OR LOCATED BY THE UTILITY COMPANY. THE RESPECTIVE UTILITY COMPANIES SHALL RELOCATE ALL UTILITIES THAT INTERFERE WITH THE PROPOSED CONSTRUCTION. THE CONTRACTOR SHALL COOPERATE WITH THE UTILITY COMPANIES DURING THE RELOCATION OPERATIONS. ANY DELAY OR INCONVENIENCE CAUSED TO THE CONTRACTOR BY THE VARIOUS UTILITIES SHALL BE INCIDENTAL TO THE CONTRACT AND NO EXTRA COMPENSATION WILL BE ALLOWED.

3. THE CONTRACTOR SHALL EXERCISE EXTREME CAUTION IN AREAS OF BURIED UTILITIES AND SHALL PROVIDE AT LEAST 48 HOURS NOTICE TO THE APPROPRIATE UTILITY COMPANIES IN ORDER TO ALLOW MARKING OF THE LOCATIONS OF EXISTING UNDERGROUND FACILITIES IN ADVANCE OF CONSTRUCTION BY CALLING THE FLORIDA SUNSHINE STATE ONE-CALL CENTER, INC. AT 1-800-432-4770 OR 811. IT IS THE CONTRACTOR'S RESPONSIBILITY TO NOTIFY "SUNSHINE" 48 HOURS PRIOR TO ANY CLEARING OF CONSTRUCTION TO IDENTIFY ALL UTILITY LOCATIONS. NO CONSTRUCTION ACTIVITY MAY OCCUR UNTIL THE UTILITIES HAVE BEEN PROPERLY MARKED.

4. THE CONTRACTOR SHALL FIELD VERIFY THE HORIZONTAL LOCATION AND VERTICAL LOCATION OF ALL EXISTING UTILITIES WITHIN THE LIMITS OF THE PROJECT ENVELOPE SHOWN PRIOR TO COMMENCING WORK. THE CONTRACTOR SHALL CALL ALL UTILITY COMPANIES TO HAVE THE LOCATIONS OF ALL UTILITIES FIELD MARKED PRIOR TO COMMENCEMENT OF CONSTRUCTION. ANY DISCREPANCIES SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER PRIOR TO CONTINUING CONSTRUCTION.

5. THE CONTRACTOR IS RESPONSIBLE FOR REPAIRING ANY DAMAGE TO EXISTING FACILITIES, ABOVE OR BELOW GROUND THAT MAY OCCUR AS A RESULT OF THE WORK PERFORMED BY THE CONTRACTOR.

6. ALL PRIVATE AND PUBLIC PROPERTY AFFECTED BY THIS WORK SHALL BE RESTORED TO A CONDITION EQUAL TO OR BETTER THAN EXISTING CONDITIONS BEFORE COMMENCING CONSTRUCTION WORK, UNLESS SPECIFICALLY EXEMPTED BY THE PLANS. ADDITIONAL COSTS ARE INCIDENTAL TO OTHER CONSTRUCTION AND NO EXTRA COMPENSATION WILL BE ALLOWED.

7. ALL WORK PERFORMED SHALL COMPLY WITH THE REGULATIONS AND ORDINANCES OF THE VARIOUS GOVERNMENTAL AGENCIES HAVING JURISDICTION OVER THE WORK INCLUDING LANDSCAPING.

8. IT IS THE CONTRACTOR'S RESPONSIBILITY TO BECOME FAMILIAR WITH THE PERMIT AND INSPECTION REQUIREMENTS OF THE VARIOUS GOVERNMENTAL AGENCIES. THE CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS PRIOR TO CONSTRUCTION AND SCHEDULE INSPECTIONS ACCORDING TO AGENCY AND/OR MUNICIPALITY INSTRUCTIONS.

9. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO COMPLY WITH AND ENFORCE ALL APPLICABLE SAFETY REGULATIONS.

10. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING EXCAVATIONS AGAINST COLLAPSE AND SHALL PROVIDE BRACING, SHEETING OR SHORING AS NECESSARY. TRENCHES SHALL BE KEPT DRY WHILE PIPES ARE BEING PLACED. DEWATERING SHALL BE USED AS REQUIRED, AND PERMITTED THROUGH LOCAL GOVERNMENTAL AGENCIES AND WATER MANAGEMENT DISTRICT PER CURRENT REGULATIONS AT THE SOLE COST OF THE CONTRACTOR.

11. CONTRACTOR TO REVIEW GEOTECHNICAL REPORT AND BORINGS PRIOR TO BIDDING THE PROJECT AND FOLLOW OUTLINED CONSTRUCTION TECHNIQUES.

12. THE CONTRACTOR IS RESPONSIBLE FOR COORDINATING APPLICABLE TESTING WITH THE SERVICES OF AN APPROVED TESTING LABORATORY AND/OR SOILS ENGINEER, APPLICABLE REGULATORY AGENCIES, AND AS MAY BE FOUND IN THE ENGINEERING CONSTRUCTION DRAWINGS OR SPECIFICATIONS. CONTRACTOR TO VERIFY ALL TESTING WITH THE OWNER PRIOR TO COMMENCING CONSTRUCTION. UPON COMPLETION OF THE WORK, THE TESTING LABORATORY AND/OR SOILS ENGINEER MUST SUBMIT TO THE OWNER'S ENGINEER CERTIFICATIONS STATING THAT ALL REQUIREMENTS HAVE BEEN MET.

13. INSTALL SILT FENCE PRIOR TO SITE DEMOLITION OR NEW SITE CONSTRUCTION. INSTALL SILT FENCE PER FLORIDA STORMWATER EROSION AND SEDIMENTATION CONTROL INSPECTOR'S MANUAL AND PROVIDE TOE-IN. THE CONTRACTOR SHALL MAINTAIN THE SILT FENCE IN WORKING ORDER THROUGHOUT THE CONSTRUCTION PHASE. THE PROJECT SILT FENCE SHALL BE INSPECTED DAILY AND ANY CORRECTIVE MEASURES SHALL BE COMPLETED WITHIN 24 HOURS.

14. ALL TREE BARRICADES AND SILT FENCING SHALL BE INSTALLED AND INSPECTED BY CITY OF ALACHUA OR NV5 INSPECTOR PRIOR TO COMMENCEMENT OF ANY DEMOLITION OR CONSTRUCTION ACTIVITIES.

15. THE CONTRACTOR IS TO PREPARE THE SITE PRIOR TO BEGINNING ACTUAL CONSTRUCTION IN ACCORDANCE WITH THE GEOTECHNICAL REPORT.

16. ALL DELETERIOUS MATERIAL (I.E. MUCK, PEAT, BURIED DEBRIS) IS TO BE EXCAVATED IN ACCORDANCE WITH THESE PLANS OR AS DIRECTED BY THE OWNER'S ENGINEER OR OWNER'S SOIL TESTING COMPANY. DELETERIOUS MATERIAL IS TO BE STOCKPILED AND REMOVED FROM THE SITE. EXCAVATED AREAS ARE TO BE BACKFILLED WITH APPROVED MATERIALS AND COMPACTED AS SHOWN ON THESE AREAS.

17. CONTRACTOR SHALL CLEAR AND GRUB ONLY THOSE PORTIONS OF THE SITE NECESSARY FOR CONSTRUCTION. DISTURBED AREAS SHALL BE SODDED, SEEDED, MULCHED, OR PLANTED WITH OTHER APPROVED LANDSCAPE MATERIAL, AS DIRECTED BY THESE PLANS, IMMEDIATELY FOLLOWING CONSTRUCTION PER LOCAL INSPECTOR.

18. WORK BEING PERFORMED UNDER THIS CONTRACT SHALL INTERFACE SMOOTHLY WITH OTHER WORK BEING PERFORMED ON THE SITE BY OTHER CONTRACTORS AND/OR UTILITY COMPANIES. IT WILL BE NECESSARY FOR THE CONTRACTOR TO COORDINATE AND SCHEDULE HIS ACTIVITIES, WHERE NECESSARY, WITH OTHER CONTRACTORS AND UTILITY COMPANIES.

19. ALL PAVEMENT DIMENSIONS SHOWN ARE TO EDGE OF PAVEMENT UNLESS OTHERWISE NOTED.

20. THE GOVERNING STANDARDS AND SPECIFICATIONS, UNLESS STATED OTHERWISE SHALL BE PER FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD PLANS (FY 2026-27 ROAD CONSTRUCTION) AND STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION DATED FY 2026-27, AS AMENDED BY CONTRACT DOCUMENTS. ALL MATERIALS AND METHODS SHALL MEET FDOT SPECIFICATIONS AND SHALL BE PRODUCED OR OBTAINED FROM AN FDOT APPROVED SOURCE.

21. ALL NEW TRAFFIC CONTROL DEVICES (SIGNS AND PAVEMENT MARKINGS) SHALL CONFORM TO THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD) AND FDOT STANDARDS.

22. ALL STRIPING WITHIN THE RIGHT OF WAY SHALL BE PLACED FIRST AS TEMPORARY STRIPING FOLLOWED BY APPLICATION OF THERMOPLASTIC STRIPING 30 DAYS LATER.

23. CONTRACTOR IS RESPONSIBLE FOR MAINTAINING PROPER BENCHMARKS ON-SITE. EXISTING BENCH MARKS SCHEDULED FOR REMOVAL SHALL BE RELOCATED AT CONTRACTORS EXPENSE AND RE-ESTABLISHED BY A LICENSED SURVEYOR.

24. ALL HANDICAP RAMPS SHALL COMPLY WITH THE FLORIDA ACCESSIBILITY CODE AND AMERICANS WITH DISABILITIES ACT.

25. A PRE-CONSTRUCTION CONFERENCE SHALL BE REQUIRED. THE CONTRACTOR, ENGINEER OF RECORD, AND THE OWNER SHALL MEET WITH THE CITY OF ALACHUA PRIOR TO INITIATION OF SITE CONSTRUCTION.

26. ANY CHANGE ORDER REQUESTS, SITE REVISIONS, AND PAY REQUESTS MUST BE SUBMITTED TO AND APPROVED BY THE ENGINEER OF RECORD.

27. CONTRACTOR IS RESPONSIBLE FOR ALL DEWATERING AS NEEDED THROUGHOUT ALL CONSTRUCTION ACTIVITIES COVERED BY THESE PLANS. DEWATERING SHALL BE DONE IN ACCORDANCE WITH FDOT STANDARD SPECIFICATIONS, 2018 EDITION, SECTION 120.

28. THE CONTRACTOR IS RESPONSIBLE FOR THE PERFORMANCE AND COST OF ALL CLEARING AND GRUBBING AND ALL WORK OF REMOVAL, DISPOSAL, AND REPAIR OR REPLACEMENT OF EXISTING IMPROVEMENTS WHERE SHOWN IN THE PLANS, OR ORDERED BY THE ENGINEER TO BE REMOVED, OR WHERE REQUIRED BECAUSE OF THE CONSTRUCTION OPERATIONS, IN ORDER TO CONSTRUCT THE PROPOSED IMPROVEMENTS (THIS INCLUDES BUT IS NOT LIMITED TO PROPOSED PIPING, STRUCTURES, UTILITIES, PAVING, CURBING, ETC.).

29. AN AS-BUILT SURVEY MAY BE REQUIRED BY REGULATORY AGENCIES. CONTRACTOR TO COORDINATE WITH PROJECT OWNER FOR COMPLETION OF AS-BUILT SURVEYS PRIOR TO PROJECT / PERMIT CLOSE-OUT.

MAINTENANCE OF TRAFFIC (MOT) NOTES

1. THE CONTRACTOR IS RESPONSIBLE FOR CREATING A MAINTENANCE OF TRAFFIC (MOT) PLAN FOR CONSTRUCTION ACTIVITY THAT OCCURS WITHIN THE PUBLIC RIGHT-OF-WAY, INCLUDING BUT NOT LIMITED TO SIDEWALK WORK AND ACTIVITIES THAT REQUIRE A LANE (OR ROAD) CLOSURE, SUCH AS CONNECTION TO SEWER MANHOLES AND WATER MAINS. THE MOT PLAN MUST BE CREATED BY A REGISTERED PROFESSIONAL ENGINEER WHO IS CERTIFIED TO DO SO BY THE FDOT MOT CERTIFICATION TRAINING. THE MOT PLAN MUST ALSO BE IN ACCORDANCE WITH FDOT STANDARD PLANS AND FDOT STANDARD SPECIFICATIONS REQUIREMENTS AND MUST BE REVIEWED AND APPROVED BY THE OWNER OR THEIR DESIGNEE.

2. THE CONTRACTOR SHALL SUBMIT THE MOT TO THE APPROPRIATE REGULATORY AUTHORITY PRIOR TO WORK REQUIRING THE MOT FOR APPROVAL. NO WORK IN THE ROW SHALL OCCUR UNTIL THE MOT IS APPROVED.

DEMOLITION GENERAL NOTES

1. THE CONTRACTOR SHALL BE RESPONSIBLE TO DISPOSE OF ALL DEMOLITION MATERIALS IN A SAFE AND LAWFUL MANNER. THE CONTRACTOR SHALL SALVAGE TO THE OWNER ANY ITEM AS DETERMINED BY THE OWNER. ONCE DEMOLISHED, MATERIAL SHALL BE DISPOSED OF PROPERLY AND IMMEDIATELY.

2. REMOVE ALL IMPROVEMENTS DEFINED ON THE DEMOLITION PLAN. SALVAGE ITEMS TO OWNER AS DEFINED BY THE OWNER'S REPRESENTATIVE AND CONSTRUCTION DOCUMENT SPECIFICATIONS.

3. EXISTING PAVEMENT AND SIDEWALK EDGES THAT BORDER NEW CONSTRUCTION OR DEMOLITION ARE TO BE SAW-CUT TO PROVIDE A SMOOTH TRANSITION.

4. ALL EXISTING TREES ARE TO REMAIN UNLESS OTHERWISE NOTED.

5. ROOTS LARGER THAN 1 INCH IN DIAMETER ON TREES TO BE PRESERVED THAT ARE ENCOUNTERED DURING CONSTRUCTION MUST BE CUT CLEANLY AND COVERED OVER WITH SOIL BY THE END OF THE WORKING DAY.

6. ALL ASPHALT AND LIMEROCK WILL BE COMPLETELY REMOVED FROM AREAS THAT WILL BE LANDSCAPED. IN PARTICULAR, AREAS WHERE ASPHALT WILL BE REMOVED MUST HAVE THE TOP HARD SURFACE, LIMEROCK, AND COMPACTED SOIL REMOVED. REPLACEMENT SOIL SHALL BE CLEAN DEEP FILL OF PH 5.5 - 6.5. THE DEPTH OF UNCOMPACTED SOIL PRIOR TO PLANTING MUST BE AT LEAST 3 FEET TO ACCOMMODATE FUTURE TREE ROOT GROWTH. NO LIMEROCK, LARGE STONES, OR OTHER CONSTRUCTION DEBRIS CAN REMAIN IN AREAS TO BE LANDSCAPED.

PAVING, GRADING, AND DRAINAGE GENERAL NOTES

1. THE CONTRACTOR IS RESPONSIBLE FOR EROSION/SEDIMENTATION CONTROL PRACTICES DURING CONSTRUCTION TO MINIMIZE ON-SITE EROSION/SEDIMENTATION AND TO PROTECT AGAINST DAMAGE TO OFF SITE PROPERTY. THE FOLLOWING PRACTICES SHALL BE EMPLOYED:

   A. EROSION AND SEDIMENTATION CONTROL SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. AREAS OF OFF-SITE DISCHARGE DURING CONSTRUCTION SHALL BE PROTECTED WITH A SEDIMENT BARRIER PER FLORIDA STORMWATER EROSION AND SEDIMENTATION CONTROL INSPECTOR'S MANUAL TO PREVENT OFF-SITE DISCHARGE OF SEDIMENTS. A SILT BARRIER SHALL SPECIFICALLY BE REQUIRED, CONSTRUCTED, AND MAINTAINED AS INDICATED ON THIS SHEET. TEMPORARY SEED AND MULCH SHOULD BE USED TO CONTROL ON-SITE EROSION WHEN IT IS NOT PRACTICAL TO ESTABLISH PERMANENT VEGETATION. SOD SHALL BE PLACED AS EARLY AS POSSIBLE ON ALL SLOPES STEEPER THAN 5 (FT) HORIZONTAL TO 1 (FT) VERTICAL. SOD SHALL BE PINNED AS REQUIRED. ALL EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE MAINTAINED IN WORKING ORDER THROUGHOUT THE CONSTRUCTION PHASE. THE CONTRACTOR SHALL INSPECT AND REPAIR AS NECESSARY THE EROSION/SEDIMENTATION PROTECTION AT THE END OF EACH WORKING DAY.

   NOTE: EROSION/SEDIMENTATION CONTROL SHALL BE PLACED PRIOR TO SITE EXCAVATION AND SHALL REMAIN IN PLACE UNTIL SITE VEGETATION AND LANDSCAPING IS COMPLETE.

   B. ALL INLET STRUCTURES AND PIPE SHALL BE PROTECTED FROM SILTATION BY CONSTRUCTING INLET PROTECTION AS DEFINED BY THESE PLANS OR IN THE FDOT STANDARDS. IF SILTATION OCCURS, THE CONTRACTOR IS RESPONSIBLE TO REMOVE SILTATION AS PART OF THE BASE CONTRACT AT NO ADDITIONAL COST TO THE OWNER.

   C. PERMANENT VEGETATIVE STABILIZATION SHALL BE APPLIED ON FINE GRADED SITES AS SOON AS PRACTICAL. TEMPORARY SEEDING SHOULD BE EMPLOYED TO PREVENT EXPOSURE OF BARREN SOILS UNTIL PERMANENT VEGETATION CAN BE APPLIED.

   D. ALL SLOPES 1:3 OR STEEPER REQUIRE LAPPED OR PEGGED SOD.

   E. EROSION, SEDIMENT AND TURBIDITY CONTROL ARE THE RESPONSIBILITY OF THE CONTRACTOR. THESE DELINEATED MEASURES ARE THE MINIMUM REQUIRED, WITH ADDITIONAL CONTROLS TO BE UTILIZED AS NEEDED, DEPENDENT UPON ACTUAL SITE CONDITIONS AND CONSTRUCTION OPERATION.

   F. ALL SYNTHETIC BALES, SILT FENCE, AND OTHER EROSION CONTROL MEASURES SHALL BE REMOVED AT THE COMPLETION OF THE PROJECT.

2. THE CONTRACTOR SHALL MAINTAIN IN HIS POSSESSION A COPY OF THE WATER MANAGEMENT DISTRICT CONSTRUCTION PERMIT. HE SHALL BE RESPONSIBLE FOR ADHERENCE TO ALL CONDITIONS CONTAINED IN THE PERMIT.

3. PROPOSED SPOT ELEVATIONS REPRESENT FINISHED PAVEMENT OR GROUND SURFACE GRADE UNLESS OTHERWISE NOTED ON DRAWINGS.

4. CONTRACTOR SHALL SUBMIT FOR REVIEW TO THE OWNER AND OWNER'S ENGINEER SHOP DRAWINGS ON ALL PRECAST AND MANUFACTURED ITEMS TO BE USED ON THIS SITE. FAILURE TO OBTAIN APPROVAL BEFORE INSTALLATION MAY RESULT IN REMOVAL AND REPLACEMENT AT CONTRACTOR'S EXPENSE. ENGINEER'S APPROVAL OF A SHOP DRAWING DOES NOT RELIEVE THE CONTRACTOR'S RESPONSIBILITY FOR THE PERFORMANCE OF THE ITEM.

5. THE COST OF ALL TESTING OF COMPACTION AND OTHER REQUIRED TESTS SHALL BE PAID BY THE CONTRACTOR AND MADE AVAILABLE TO THE ENGINEER OF RECORD DURING SITE INSPECTIONS.

6. GENERAL CONTRACTOR TO CONTACT ENGINEER OF RECORD AND THE OWNER REPRESENTATIVE 48 HOURS IN ADVANCE PRIOR TO BACKFILLING TRENCHES FOR FIELD INSPECTION AND PRIOR TO LAYING ASPHALT FOR FIELD INSPECTION.

7. CONTRACTOR IS TO SUBMIT FDOT APPROVED ASPHALT DESIGN MIXES TO THE OWNER'S REPRESENTATIVE AND ENGINEER OF RECORD BEFORE ANY WORK IS TO COMMENCE ON PROJECT. THE MIXTURE AT THE PLANT OR ON THE ROAD SHALL NOT EXCEED 335 DEGREES. THE CONTRACTOR SHALL NOTIFY THE OWNER'S REPRESENTATIVE AND PROVIDE TEMPERATURE READINGS PRIOR TO LAYING ASPHALT.

8. AS DETERMINED NECESSARY AND DIRECTED BY CITY OF ALACHUA , OWNER, OR ENGINEER OF RECORD, THE CONTRACTOR SHALL UNDERCUT ALL UNSUITABLE MATERIAL 24 INCHES BELOW THE BOTTOM OF ANY PROPOSED LIMEROCK BASE, AND SHALL BACKFILL WITH FILL MATERIAL MEETING FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION. SEE FDOT INDEX 120-001 AND 120-002.

9. PROVIDE LEVEL PLATFORM IN FRONT OF ALL EGRESS DOORS. THE FLOOR SURFACE ON BOTH SIDES OF A DOOR SHALL BE AT THE SAME ELEVATION. THE FLOOR SURFACE OR LANDING ON EACH SIDE OF THE DOOR SHALL EXTEND FROM THE DOOR IN THE CLOSED POSITION A DISTANCE EQUAL TO THE DOOR WIDTH AND SHALL COMPLY WITH SECTION 4.13.6 MANEUVERING CLEARANCES AT DOORS OF THE FLORIDA ACCESSIBILITY CODE FOR BUILDING CONSTRUCTION.

10. RAMPS SHALL HAVE LEVEL LANDINGS AT THE BOTTOM AND TOP OF EACH RAMP RUN. CURB RAMPS ARE NOT REQUIRED TO HAVE LANDINGS. LANDINGS SHALL HAVE THE FOLLOWING FEATURES:

    A. THE LANDING SHALL BE AT LEAST AS WIDE AS THE RAMP RUN LEADING TO IT.

    B. ALL LANDINGS ON RAMPS SHALL BE NOT LESS THAN 60" CLEAR, AND THE BOTTOM OF EACH RAMP SHALL HAVE NOT LESS THAN 72" OF STRAIGHT AND LEVEL CLEARANCE.

    C. IF RAMPS CHANGE DIRECTION AT LANDINGS, THE MINIMUM LANDING SIZE SHALL BE 60"X60". IF A RAMP RUN HAS A RISE GREATER THAN 6" OR A HORIZONTAL PROJECTION GREATER THAN 72" THEN IT SHALL HAVE HANDRAILS ON BOTH SIDES. HANDRAILS ARE NOT REQUIRED ON CURB RAMPS. HANDRAILS SHALL BE SHOWN ON THE SITE PLAN.

11. THE CONTRACTOR SHALL STOCKPILE TOPSOIL AND CONSTRUCTION MATERIALS IN AREAS DESIGNATED BY THE OWNER.

12. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING RECORD DRAWINGS OR AS-BUILT SURVEY AS NOTED IN NOTE #29 UNDER SITE GENERAL NOTES.

13. ALL CONCRETE USED SHALL BE 2,500 PSI MINIMUM.

14. ALL WELLS, CLEANOUTS, MANHOLE TOPS, PULL BOX COVERS AND OTHER UTILITY APPURTENANCES IN THE AREA OF REDEVELOPMENT SHALL BE PROTECTED AND TOPS ADJUSTED TO MATCH PROPOSED GRADES.

15. CONTRACTOR SHALL SAW CUT, TACK, AND MATCH EXISTING PAVEMENT AT LOCATIONS WHERE NEW PAVEMENT MEETS ANY EXISTING PAVEMENT.

16. SOD SHALL BE PLACED AROUND ALL STRUCTURES AS DIRECTED BY FDOT INDEX 524-001 AND FDOT INDEX 425- AND 430- SERIES AS APPROPRIATE. ALL OTHER DISTURBED AREAS SHALL BE SEEDED AND MULCHED.

17. ALL STORM SEWER CURB AND DITCH BOTTOM INLETS SHALL CONFORM TO THE APPLICABLE FDOT STANDARD PLANS ALL DRAINAGE STRUCTURES WITH GRATES THAT ARE LOCATED IN GRASSED AREAS SHALL HAVE THE GRATE CHAINED TO THE STRUCTURE USING AN EYE BOLT AND CHAIN.

18. ALL CONCRETE STRUCTURES SHALL HAVE ALL EXPOSED EDGES CHAMFERED 3/4" AND CLASS I SURFACE FINISH.

19. ALL HDPE FITTINGS AND CONNECTORS SHALL BE WATER TIGHT. SEE SPECIFICATIONS FOR MORE INFORMATION.

20. COMPACTION OF ALL MATERIALS SHALL BE LIMITED TO STATIC MODE ONLY, UNLESS DIRECTED OTHERWISE BY THE ENGINEER OF RECORD.

21. ALL RCP PIPE JOINTS SHALL BE WRAPPED WITH FILTER FABRIC IN ACCORDANCE WITH FDOT STANDARD SPECIFICATION SECTION 430.

WATER AND WASTEWATER NOTES

1. MATERIALS AND CONSTRUCTION METHODS FOR WATER AND WASTEWATER SYSTEMS SHALL BE IN ACCORDANCE WITH THE LOCAL REGULATORY AGENCY CODES, PLANS, AND SPECIFICATIONS FOR CONSTRUCTION, LATEST REVISION THEREOF AND SUPPLEMENTAL SPECIFICATIONS THERETO. APPROVAL AND CONSTRUCTION OF ALL UTILITY EXTENSIONS AND CONNECTIONS MUST BE COORDINATED THROUGH THE REGULATORY AGENCY DEPARTMENT FOR PUBLIC UTILITIES. MATERIALS AND CONSTRUCTION METHODS SHALL COMPLY WITH THE CITY OF ALACHUA DEPARTMENT OF PUBLIC SERVICE DESIGN AND CONSTRUCTION MANUAL, LATEST EDITION.

2. IT IS THE CONTRACTOR'S RESPONSIBILITY TO NOTIFY ALL UTILITY COMPANIES TO DISCONNECT OR REMOVE THEIR FACILITIES PRIOR TO REMOVING OR DEMOLISHING ANY EXISTING STRUCTURES FROM THE SITE.

3. THE CONTRACTOR IS RESPONSIBLE FOR ANY NECESSARY UTILITY FIELD LOCATION AND RELOCATION AS REQUIRED.

4. THE COST OF ALL TESTING OF COMPACTION AND OTHER REQUIRED TESTS SHALL BE PAID BY THE CONTRACTOR AND MADE AVAILABLE TO THE ENGINEER OF RECORD DURING SITE INSPECTIONS.

5. THE CONTRACTOR SHALL PERFORM AN INFILTRATION/EXFILTRATION TEST ON GRAVITY SEWERS IN ACCORDANCE WITH THE REGULATORY JURISDICTION. SAID TESTS ARE TO BE CERTIFIED BY THE ENGINEER AND SUBMITTED TO THE REGULATORY AGENCY FOR APPROVAL. COORDINATION AND NOTIFICATION OF PARTIES US THE CONTRACTOR'S RESPONSIBILITY.

6. ALL FORCE MAINS SHALL BE SUBJECT TO A HYDROSTATIC PRESSURE TEST IN ACCORDANCE WITH THE REGULATORY AGENCY HAVING JURISDICTION. SAID TESTS ARE TO BE CERTIFIED BY THE ENGINEER AND SUBMITTED TO THE REGULATORY AGENCY FOR APPROVAL. COORDINATION AND NOTIFICATION OF PARTIES IS THE CONTRACTOR'S RESPONSIBILITY.

7. CONTRACTOR SHALL SUBMIT FOR REVIEW TO THE OWNER AND OWNER'S ENGINEER SHOP DRAWINGS ON ALL PRECAST AND MANUFACTURED ITEMS TO BE USED ON THIS SITE. FAILURE TO OBTAIN APPROVAL BEFORE INSTALLATION MAY RESULT IN REMOVAL AND REPLACEMENT AT CONTRACTOR'S EXPENSE. ENGINEER'S APPROVAL OF A SHOP DRAWING DOES NOT RELIEVE THE CONTRACTOR'S RESPONSIBILITY FOR THE PERFORMANCE OF THE ITEM.

8. A HORIZONTAL SEPARATION OF TEN FEET PREFERRED, BUT NO LESS THAN SIX FEET, SHALL BE MAINTAINED BETWEEN POTABLE WATER MAINS AND GRAVITY OR PRESSURE WASTEWATER MAINS, WASTEWATER FORCE MAINS, AND RECLAIMED WATER MAINS NOT REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C. A HORIZONTAL SEPARATION OF TEN FEET PREFERRED, BUT NO LESS THAN THREE FEET, SHALL BE MAINTAINED BETWEEN POTABLE WATER MAINS AND VACUUM WASTEWATER MAINS. A HORIZONTAL SEPARATION OF THREE FEET SHALL BE MAINTAINED BETWEEN POTABLE WATER MAINS AND STORM SEWERS, STORMWATER FORCE MAINS, AND RECLAIMED WATER MAINS REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C.

9. WHEN POTABLE WATER MAINS CROSS OTHER PIPES, THE TWO PIPES SHALL HAVE JOINTS A MINIMUM OF SIX FEET FROM THE CROSSING. WHEN POTABLE WATER MAINS CROSS UNDERNEATH OTHER PIPES, THE MINIMUM VERTICAL SEPARATION IS TWELVE INCHES. WHEN POTABLE WATER MAINS CROSS ABOVE PRESSURE WASTEWATER MAINS, WASTEWATER FORCE MAINS, AND RECLAIMED WATER MAINS, THE MINIMUM VERTICAL SEPARATION IS TWELVE INCHES. WHEN POTABLE WATER MAINS CROSS ABOVE GRAVITY AND VACUUM WASTEWATER MAINS, STORM SEWERS, AND STORMWATER FORCE MAINS, THE PREFERRED VERTICAL SEPARATION IS TWELVE INCHES AND THE THE MINIMUM VERTICAL SEPARATION IS SIX INCHES.

10. ALL WATER MAINS SHALL HAVE A MINIMUM OF 36 INCHES OF COVER.

11. RESTRAINED JOINTS SHALL BE PROVIDED AT ALL FITTINGS AND HYDRANTS IN ACCORDANCE WITH AWWA STANDARDS.

12. ALL PVC SERVICE LINES SHALL BE SUITABLE FOR POTABLE WATER SERVICE AND RATED NSF 61.

13. THE SITE WORK CONTRACTOR SHALL ENGAGE THE SERVICES OF A LICENSED UNDERGROUND UTILITY AND EXCAVATION CONSTRACTOR TO INSTALL THE NEW WATER SERVICE LINE.

14. ALL SANITARY SEWER SERVICE LATERALS SHALL BE 4" PVC SDR 35 OR 6" PVC SDR 35 WITH A CLEAN-OUT LOCATED PER THE PLANS. MINIMUM SLOPE FOR 4" LATERALS SHALL BE 1.0% AND A MINIMUM CLEANOUT SPACING OF 75 FEET ON-CENTER AND MINIMUM SLOPE FOR 6" LATERALS SHALL BE 0.6% AND A MINIMUM CLEANOUT SPACING OF 100 FEET ON-CENTER.

15. PUBLIC UTILITY EASEMENTS WILL BE PROVIDED AS REQUIRED FOR ALL UTILITIES SHOWN HEREON BY METES AND BOUND DESCRIPTION AND IN ACCORDANCE WITH THE REGULATORY AGENCY DEPARTMENT FOR PUBLIC UTILITIES.

16. ALL UNDERGROUND FIRE LINE PIPING SHALL BE PVC (C900), AND ALL ABOVE GRADE FIRE LINE PIPING SHALL BE DIP.

17. AS A MINIMUM, PROVIDE TRACER WIRE FROM THE WET TAP TO THE PADS FOR THE FIRE LINE AND POTABLE WATER METER.

18. WATER METER APPURTENANCES SHALL BE FURNISHED AND INSTALLED BY THE CONTRACTOR. THE WATER METER ITSSELF WILL BE FURNISHED AND INSTALLED BY THE CITY.

19. DURING CONSTRUCTION, FOR THE WATER METER, PROVIDE A TEMPORARY BARRIER TO PROTECT AGAINST DAMAGE. BARRIER SHALL EITHER CONFORM TO COA DETAIL 324 OR COA APPROVED EQUAL.

20. WET TAPS TO BE DONE BY A SUB-CONTRACTOR PRE-APPROVED BY THE CITY OF ALACHUA.

21. PROVIDE TRACER WIRE SYSTEM ALONG THE ENTIRE LENGTH OF THE FORCE MAIN STARTING AT THE PRIVATE LIFT STATION AND ENDING AT THE DISCHARGE MANHOLE.

ELECTRIC SERVICE GENERAL NOTES

1. ALL ELECTRICAL UTILITIES AND INFORMATION SHOWN ON THE CIVIL PLANS ARE FOR LOCATION AND COORDINATION PURPOSES ONLY. REFER TO ELECTRICAL PLANS BY OTHERS FOR THE ELECTRICAL DESIGN AND DETAILS.

BOUNDARY & TOPOGRAPHIC SURVEY

SITUATED IN THE SOUTHWEST QUARTER (SW 1/4) OF FRACTIONAL SECTION 20, TOWNSHIP 8 SOUTH, RANGE 19 EAST, CITY OF ALACHUA, ALACHUA COUNTY, FLORIDA

LEGAL DESCRIPTION: (BY THIS SURVEYOR)

A PARCEL OF LAND SITUATED IN FRACTIONAL SECTION 20, TOWNSHIP 8 SOUTH, RANGE 19 EAST, ALACHUA COUNTY, FLORIDA, BEING A PORTION OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4637, PAGE 2216, AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE NORTHEAST CORNER OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4637, PAGE 2216, BEING A 5/8" REBAR AND CAP (LS 3524) LYING ON THE SOUTH RIGHT OF WAY LINE OF SEABOARD COAST LINE RAILROAD (200 FOOT RIGHT OF WAY WIDTH) AND RUN SOUTH 23°08'06" WEST, ALONG THE EASTERLY LINE OF SAID LANDS, A DISTANCE OF 870.57 FEET TO A 5/8" REBAR AND CAP (LS 3524); THENCE NORTH 66°50'02" WEST, ALONG THE EASTERLY LINE OF SAID LANDS, A DISTANCE OF 167.69 FEET A 5/8" REBAR AND CAP (LB 2389); THENCE SOUTH 22°59'28" WEST, ALONG THE EASTERLY LINE OF SAID LANDS, A DISTANCE OF 20.05 FEET TO A 5/8" REBAR AND CAP (LB 2389) MARKING THE POINT OF BEGINNING; THENCE CONTINUE SOUTH 23°00'09" WEST, ALONG SAID EASTERLY LINE, A DISTANCE OF 242.86 FEET TO A 5/8" REBAR AND CAP (LB 2389); THENCE LEAVING SAID EASTERLY LINE, SOUTH 67°58'15" WEST, A DISTANCE OF 175.26 FEET TO A 5/8" REBAR AND CAP (LB 8246); THENCE NORTH 22°02'22" WEST, A DISTANCE OF 171.53 FEET TO A 5/8" REBAR AND CAP (LB 8246); THENCE NORTH 67°57'13" EAST, A DISTANCE OF 347.12 FEET TO THE POINT OF BEGINNING.

SAID LANDS CONTAINING 1.03 ACRES, MORE OR LESS.

FLOOD ZONE:

THIS PROPERTY IS LOCATED IN FEDERAL FLOOD ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN, AS INTERPOLATED FROM FEMA F.I.R.M. PANEL NO. 140 OF 640, COMMUNITY PANEL NO. "120664 0140 D, EFFECTIVE DATE: JUNE 16, 2006.

SURVEYORS NOTES:

1. HORIZONTAL DATUM SHOWN HEREON ARE ARE BASED ON STATE PLANE COORDINATES, FLORIDA NORTH ZONE; NORTH AMERICAN DATUM 1983 2011 ADJUSTMENT (NAD 83 (2011)); SAID COORDINATES WERE DERIVED FROM EDA'S CIVIL ENGINEERING PLAN-SET UNDER PROJECT NO. 2025-0048.S05, DATED 06-12-2025.
2. VERTICAL DATUM SHOWN HEREON IS SHOWN IN NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88) AND WAS DERIVED FROM BENCHMARKS PUBLISHED ON SAID EDA'S CIVIL ENGINEERING PLAN-SET UNDER PROJECT NO. 2025-0048.S05, DATED 06-12-2025.
3. UNDERGROUND UTILITIES SHOWN HEREON HAVE BEEN LOCATED BY THIS SURVEYOR TO "QUALITY LEVEL B" STANDARDS PER ACSE 38-02. WHILE EVERY EFFORT HAS BEEN MADE TO LOCATE ALL UTILITIES AS ACCURATELY AS POSSIBLE OTHER UTILITIES MAY EXIST IN THE PROJECT AREA IN USE OR ABANDONED.
4. THE SURVEYOR HAS NO KNOWLEDGE OF UNDERGROUND FOUNDATIONS WHICH MAY ENCROACH.
5. FENCING, SYMBOLS AND MONUMENTATION SHOWN HEREON MAY BE EXAGGERATED FOR PICTORIAL PURPOSES ONLY AND MAY NOT BE SHOWN TO SCALE.
6. THIS SURVEY WAS PRODUCED WITHOUT THE BENEFITS OF FURNISHED TITLE WORK. NO INSTRUMENTS OF RECORD REFLECTING EASEMENTS, RIGHTS-OF-WAY, AND OR OWNERSHIP WERE FURNISHED TO THE SURVEYOR EXCEPT AS SHOWN, AND NO SEARCH OF THE PUBLIC RECORDS HAS BEEN DONE BY THE SURVEYOR.
7. INFORMATION FROM FEDERAL EMERGENCY MANAGEMENT AGENCY, (F.E.M.A.) FLOOD INSURANCE RATE MAP(S), SHOWN ON THIS MAP WAS CURRENT AS OF THE REFERENCED DATE. MAP REVISIONS AND AMENDMENTS ARE PERIODICALLY MADE BY LETTER AND MAY NOT BE REFLECTED ON THE MOST CURRENT MAP.
8. SANITARY SEWER INFORMATION SHOWN HEREON IS BASED ON A PREVIOUS SURVEY CONDUCTED BY EDA CONSULTANTS, INC., PROJECT NUMBER: 2025-0048.S05, DATED: 06-12-2025.
9. ADDITIONAL POINTS MAY BE FOUND BY TURNING ON THE SV-NODE* LAYERS IN THE SUPPLIED DIGITAL FILE.
10. TOPOGRAPHIC INFORMATION SHOWN HEREON BASED ON GROUND SURVEY. CONTOURS SHOWN HEREON REFLECT 1-FOOT INTERVALS.
11. PROJECT LIMITS ARE PER CLIENT SPECIFICATIONS.

I. INTRODUCTION

THIS DOCUMENT WAS PREPARED IN ORDER TO ILLUSTRATE COMPLIANCE WITH CHAPTER 62-621.300 (4) OF THE FLORIDA ADMINISTRATIVE CODE, WHICH PERTAINS TO THE GENERIC PERMIT FOR STORMWATER DISCHARGE FROM LARGE AND SMALL CONSTRUCTION ACTIVITIES. THE ADMINISTRATIVE CODE GRANTS THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION (FDEP) THE AUTHORITY TO REGULATE POINT SOURCE DISCHARGE OF STORMWATER FROM CONSTRUCTION SITES. THIS DOCUMENT ESTABLISHES A STORMWATER POLLUTION PREVENTION PLAN FOR THE SITE USING STANDARD PRACTICE AND BEST MANAGEMENT PRACTICES (BMPs) AND IS ORGANIZED TO CORRESPOND TO 62-621.300(4)(a) GENERIC PERMIT FOR STORMWATER DISCHARGE FROM LARGE AND SMALL CONSTRUCTION ACTIVITIES FDEP FORM 62-621.300(4)(b) IS TO BE SUBMITTED IN CONJUNCTION WITH THIS DOCUMENT. CONTRACTOR(S) MUST FILL IN THE ACTIVITIES SEQUENCE (SECTION ii. B. BELOW) AND SIGN THIS SHEET (REFER TO SIGNATURE TABLE THIS SHEET) AND RETAIN THIS SHEET AND ALL FOLLOWING SWPPP SHEETS ON SITE. ALTERNATIVELY, CONTRACTOR(S) MAY PREPARE AND SIGN THEIR OWN SWPP PLAN MEETING THE REQUIREMENTS. IF THE SITE OR CONTRACTOR ACTIVITIES REQUIRE ANY BMPs THAT ARE NOT DESCRIBED ON THIS SHEET, THE CONTRACTOR MUST PREPARE AN ALTERNATIVE OR ADDITIONAL SWPPP DOCUMENT CONTAINING THE NECESSARY BMPs.

II. SITE DESCRIPTION

COUNTY:	ALACHUA COUNTY, FLORIDA
SECTION, TOWNSHIP, RANGE:	SECTION 20, TOWNSHIP 8 SOUTH, RANGE 19 EAST
COUNTY PARCEL NO.:	05844-004-004
STREET ADDRESS:	LOCATED ALONG THE EAST SIDE OF NW 86TH DRIVE IN TECH CITY
PROJECT AREA:	1.03 ACRES
SITE LOCATION MAP:	SEE COVER SHEET OF CONSTRUCTION DRAWINGS

A. NATURE OF CONSTRUCTION ACTIVITY

THE PROPOSED DEVELOPMENT INCLUDES THE CONSTRUCTION OF AN ±11,300 SF FIRE STATION, ASSOCIATED PARKING AREA AND DRIVEWAYS, STORMWATER CONVEYANCE SYSTEM, AND ASSOCIATED UTILITY INFRASTRUCTURE. THE PROJECT SITE IS LOCATED ALONG THE EAST SIDE OF NW 86TH DRIVE IN TECH CITY.

B. SEQUENCE OF MAJOR SOIL DISTURBING ACTIVITIES - CONTRACTOR MUST FILL IN DAYS

DAYS	
FROM_____TO_____	PRIOR TO CONSTRUCTION, SILT FENCING AND TREE PROTECTION FENCING SHALL BE INSTALLED AND ALL EXISTING STORM DRAINAGE SWALE AND INLETS SHALL BE PROTECTED IN ACCORDANCE WITH THE STATE OF FLORIDA EROSION AND SEDIMENT CONTROL DESIGNER AND REVIEWER MANUAL, DATED JULY 2013, AND THESE PLANS.
FROM_____TO_____	THE CONSTRUCTION SERVICE ENTRANCE SHALL BE STABILIZED TO MINIMIZE THE CREATION OF DUST AND OFF-SITE TRACKING OF SEDIMENTS.
FROM_____TO_____	THE SITE THAT IS TREATED BY THE CONSTRUCTED STORMWATER MANAGEMENT FACILITY(S) SHALL BE CLEARED AND GRUBBED.
FROM_____TO_____	THE PERMANENT ROADWAYS/DRIVEWAYS SHALL BE ROUGHLY GRADED.
FROM_____TO_____	THE UNDERGROUND UTILITIES INFRASTRUCTURE AND STORMWATER PIPING SYSTEM SHALL BE INSTALLED. ANY DE-WATERING (PUMPED) SHALL BE DIVERTED TO THE ASSOCIATED STORMWATER MANAGEMENT FACILITY(S).
FROM_____TO_____	THE PERMANENT ROADWAY/DRIVEWAY SUBGRADE SHALL BE COMPACTED, A LIMEROCK BASE SHALL BE ESTABLISHED, AND THEN FOLLOWED BY AN OVERLAY OF ASPHALT.
FROM_____TO_____	UPON SIGNIFICANT COMPLETION OF CONSTRUCTION, THE STORMWATER PIPING SYSTEM SHALL BE FLUSHED OUT TO REMOVE ACCUMULATED DEBRIS AND SEDIMENT.
FROM_____TO_____	ALL REMAINING DISTURBED AREAS WITHIN THE CONSTRUCTION AREA SHALL BE COMPLETELY GRASSED AND/OR LANDSCAPED ACCORDING TO THESE PLANS. TURF ESTABLISHMENT SHALL BE PER FDOT STANDARD SPECIFICATIONS SECTION 570. EVIDENCE OF GROWTH MUST BE PRESENT PRIOR TO REMOVAL OF SILT FENCING AND OTHER EROSION CONTROL APPLICATIONS.

C. SITE DEVELOPMENT DATA:

TOTAL PROJECT SITE AREA:	1.03 ACRES
TOTAL SITE AREA TO BE DISTURBED:	1.03 ACRES
TOTAL IMPERVIOUS AREA (AS SHOWN IN CONSTRUCTION DRAWINGS):	0.65 ACRES
TOTAL DETENTION VOLUME:	0.00 ACRE-FEET
TOTAL ONSITE OPEN AREA:	0.42 ACRES

D. SOIL CONDITIONS AND STORMWATER QUALITY

THE NRCS DATA FOR THE SITE REVEALS THAT THE SITE SOILS ARE COMPRISED OF FORT MEAD FINE SAND AND MILLHOPER SAND. NV5 CONDUCTED A GEOTECHNICAL EXPLORATION IN SEPTEMBER OF 2025.

THE PROJECT SITE WILL ROUTE STORMWATER RUNOFF VIA A STORMWATER PIPE CONVEYANCE SYSTEM AND INTO THE EXISTING MASTER STORMWATER MANAGEMENT FACILITY.

THE MASTER STORMWATER MANAGEMENT FACILITY WAS DESIGNED TO PROVIDE RATE AND VOLUME CONTROL AND WATER QUALITY TREATMENT OF THE STORMWATER RUNOFF RESULTING FROM THE POST-DEVELOPMENT SITE UNDER 100-YEAR CRITICAL STORM EVENT RAINFALL CONDITIONS.

E. SITE MAP

PLEASE SEE THE STORMWATER POLLUTION PREVENTION PLAN (C0.21) FOR DETAILS.

F. STORMWATER OUTFALL LOCATION AND RECEIVING WATER BODY

THE STORMWATER MANAGEMENT FACILITY #3 OUTFALL STRUCTURE IS LOCATED AT THE NORTHERN CENTRAL PORTION OF THE PROJECT (29°46'36.54" N, 82°26'11.36" W) AND THE ASSOCIATED RECEIVING WATER BODY IS AN EXISTING MASTER STORMWATER MANAGEMENT FACILITY THAT ULTIMATELY LEADS INTO CELLON CREEK.

III. CONTROLS TO REDUCE POLLUTION

AS OUTLINED IN THE SUWANNEE RIVER WATER MANAGEMENT DISTRICT (SRWMD) PERMIT, ALL CONSTRUCTION ACTIVITIES SHALL BE CONDUCTED IN A MANNER AS TO NOT VIOLATE STATE WATER QUALITY STANDARDS. PRIOR TO CONSTRUCTION, THE CONTRACTOR SHALL IMPLEMENT AND MAINTAIN ALL EROSION AND SEDIMENT CONTROL MEASURES REQUIRED TO RETAIN SEDIMENT ON-SITE. IF SITE CONDITIONS ARE SUCH THAT ADDITIONAL CONTROL MEASURES ARE REQUIRED OTHER THAN WHAT IS SPECIFIED IN THE EROSION AND SEDIMENTATION CONTROL PLAN, THEN THE CONTRACTOR SHALL IMPLEMENT ADDITIONAL BEST MANAGEMENT PRACTICES. THESE MEASURES MUST BE INSPECTED AND MAINTAINED THROUGHOUT THE CONSTRUCTION PHASE AND UNTIL AS DIRECTED BY THESE PLANS. THE STORMWATER POLLUTION PREVENTION PLAN (C0.21) AND SECTION IV BELOW PROVIDE DETAILS ON THE SPECIFIC CONTROL MEASURES TO REDUCE STORMWATER POLLUTION.

IV. EROSION AND SEDIMENT CONTROLS

A. STABILIZATION PRACTICES

EXISTING TREES AND NATURAL VEGETATION TO REMAIN ON-SITE SHALL BE PROTECTED BY TREE BARRICADE FENCING AS DEPICTED ON THE STORMWATER POLLUTION PREVENTION PLAN (C0.21). TYPE III SILT FENCING SHALL PROTECT ALL DRAINAGE STRUCTURES AND SHALL BUFFER AREAS WITH POTENTIAL TO CONTRIBUTE OFF-SITE RUNOFF AND AS SPECIFICALLY DEPICTED ON THE STORMWATER POLLUTION PREVENTION PLAN (C0.21). STABILIZATION MEASURES SHALL BE INITIATED FOR EROSION AND SEDIMENT CONTROL ON DISTURBED AREAS AS SOON AS PRACTICAL, BUT IN NO CASE MORE THAN 7 DAYS, IN PORTIONS OF THE SITE WHERE CONSTRUCTION HAS TEMPORARILY OR PERMANENTLY CEASED. AS SPECIFIED IN SECTION II.B. ABOVE, UPON COMPLETION OF CONSTRUCTION, ALL STORMWATER MANAGEMENT FACILITIES SHALL BE SCRAPED CLEAN OF ACCUMULATED SEDIMENT AFTER THE COMPLETION OF CONSTRUCTION. ALL TURF ESTABLISHMENT SHALL BE PERFORMED MEETING THE REQUIREMENTS OF SECTION 570 OF THE STANDARD SPECIFICATIONS. EVIDENCE OF GROWTH MUST BE PRESENT PRIOR TO FINAL RELEASE.

B. STRUCTURE PRACTICES

AS DEPICTED IN THE STORMWATER POLLUTION PREVENTION PLAN (C0.21). THE STORMWATER MANAGEMENT SYSTEM IS AN EXISTING DRY RETENTION FACILITY AND PROPOSED STORM PIPE CONVEYANCE SYSTEM. TO PREVENT EROSION DURING CONSTRUCTION, TYPE III SILT FENCING WILL BE INSTALLED IN THE LOCATIONS SHOWN ON THE PLANS. ALL EXISTING AND PROPOSED STORM DRAINS AND DRAINAGE SWALES SHALL BE PROTECTED ACCORDING TO THE STATE OF FLORIDA EROSION AND SEDIMENT CONTROL DESIGNER AND REVIEWER MANUAL, DATED JULY 2013 OR PER DETAILS PROVIDED ON SHEET C0.21 UNTIL CONSTRUCTION IS COMPLETE. THE STORM PIPE CONVEYANCE SYSTEM SHALL BE FLUSHED OUT TO REMOVE ALL ACCUMULATED DEBRIS AND SEDIMENT UPON COMPLETION OF CONSTRUCTION.

C. DRAINAGE LOCATIONS THAT SERVE AREAS WITH LESS THAN 10 DISTURBED ACRES

AS SPECIFIED IN THE "SEQUENCE OF MAJOR SOIL DISTURBING ACTIVITIES," THE SMF IS EXISTING AND SILT FENCE WILL BE PLACED AROUND THE SITE PRIOR TO CLEARING AND GRUBBING OUTSIDE OF THE SMF(S) AREAS AND CONSTRUCTION OF THE PERMANENT PAVED AREAS. THE TOTAL CONTRIBUTING DRAINAGE AREA FROM THE PROJECT SITE TO THE EXISTING SMF IS APPROXIMATELY 1.03 ACRES AND WILL CONSIST OF APPROXIMATELY 1.03 ACRES OF DISTURBED CONSTRUCTION AREA. THEREFORE, NO ADDITIONAL SEDIMENT TRAP BASINS ARE NECESSARY TO PROVIDE SEDIMENT STORAGE ON-SITE DURING CONSTRUCTION. AS SHOWN ON THE STORMWATER POLLUTION PREVENTION PLAN (C0.21), THE EXISTING STORMWATER MANAGEMENT SYSTEM WILL PREVENT OFF-SITE EROSION DURING CONSTRUCTION. SILT FENCES OR EQUIVALENT SEDIMENT CONTROLS SHALL BE INSTALLED AT SIDE SLOPE AND DOWN SLOPE BOUNDARIES, INLET LOCATION, OUTLET LOCATIONS, AND OTHER LOCATIONS AS SHOWN ON THE STORMWATER POLLUTION PREVENTION PLAN, AS REQUIRED. BY COMPLETION OF CONSTRUCTION, THE SIDE SLOPES, SWALES, AND ALL DISTURBED AREAS SHALL BE STABILIZED WITH GRASS AND LANDSCAPING AS SPECIFIED ON THE CONSTRUCTION DRAWINGS.

D. DRAINAGE LOCATIONS THAT SERVE AREAS WITH MORE THAN 10 DISTURBED ACRES

NOT APPLICABLE, SEE SECTION C, ABOVE.

V. STORMWATER MANAGEMENT

A. BEST MANAGEMENT PRACTICES

AFTER CONSTRUCTION, THE STORMWATER CONVEYANCE SYSTEM SHALL BE MAINTAINED IN ACCORDANCE WITH THE SPECIFIED STORMWATER MAINTENANCE NOTES IN THE INCLUDED CONSTRUCTION DRAWINGS AND/OR RESPECTIVE MAINTENANCE REPORTS. SPECIFICALLY, STORM PIPES AND STRUCTURES WILL BE INSPECTED SEMI-ANNUALLY AND CLEANED ANNUALLY, AND LANDSCAPING AND GRASS THAT PREVENTS EROSION SHALL BE MAINTAINED.

B. VEGETATED SWALES

WHEN VEGETATED SWALES ARE UTILIZED, SILT FENCING OR EQUIVALENT SEDIMENT CONTROLS SHALL BE INSTALLED AT ADEQUATE INTERVALS TO COLLECT SEDIMENT ALONG THE SWALE. THE SEDIMENT SHALL BE REMOVED WHEN SEDIMENT REACHES ONE-THIRD OF THE HEIGHT OF THE SILT FENCING. SEE THE STORMWATER POLLUTION PREVENTION PLAN (C0.21) FOR DETAILS AND LOCATIONS, AS REQUIRED.

C. VELOCITY DISSIPATION DEVICES AT DISCHARGE POINTS

WHEN DISCHARGE POINTS ARE NOT LOCATED UNDER WATER, RIP RAP PADS HAVE BEEN PROVIDED AT LOCATIONS WHERE NECESSARY DUE TO ANTICIPATED DISCHARGE VELOCITIES. PLEASE SEE THE CONSTRUCTION PLANS FOR DETAILS AND LOCATIONS, AS NEEDED.

VI. CONTROLS FOR OTHER POTENTIAL POLLUTANTS

A. WASTE DISPOSAL

THE CONTRACTOR SHALL PROVIDE LITTER COLLECTION CONTAINERS WITHIN THE PROJECT BOUNDARIES DURING CONSTRUCTION. CONTRACTOR SHALL DISPOSE OF ALL UNSUITABLE MATERIALS AND CONSTRUCTION DEBRIS IN ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE, AND FEDERAL REQUIREMENTS.

B. DUST CONTROL

TO PREVENT OFF-SITE VEHICULAR TRACKING OF SEDIMENTS AND DUST GENERATION, A STABILIZED CONSTRUCTION ENTRANCE SHALL BE ESTABLISHED BY THE SITE CONTRACTOR. PLEASE SEE THE STORMWATER POLLUTION PREVENTION PLAN (C0.21) FOR DETAILS AND LOCATION(S).

C. EXISTING VERSUS PROPOSED POTABLE AND SANITARY SEWER SYSTEMS

THERE ARE EXISTING SANITARY SEWER AND POTABLE WATER SYSTEMS LOCATED ON THE PROJECT SITE. EXTENSION AND UPGRADES ARE PROPOSED. IF TEMPORARY SANITARY SYSTEMS ARE UTILIZED DURING CONSTRUCTION, THE CONTRACTOR SHALL PROPERLY CONTROL AND DISCHARGE ANY SANITARY WASTE IN ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE, AND FEDERAL REGULATIONS.

D. FERTILIZER & PESTICIDES

THE USE OF FERTILIZERS, HERBICIDES, AND PESTICIDES ON THE PROJECT SITE, WILL BE DIRECTED BY THE LANDSCAPE PLAN AND THE FDOT STANDARD SPECIFICATIONS SECTION 570, TO SUPPORT THE GROWTH OF THE PROPOSED VEGETATION. ESTABLISHING THIS VEGETATION WILL AID IN THE STABILIZATION OF THE PROJECT SITE AND REDUCE EROSION. APPLICATION RATES FOR THE FERTILIZERS, HERBICIDES, AND PESTICIDES SHALL BE IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS TO GUARD AGAINST OVER-USE, WHICH CAN LEAD TO VIOLATIONS OF STATE WATER QUALITY STANDARDS.

E. TOXIC MATERIAL

THE CONSTRUCTION SITE WILL BE IN FULL COMPLIANCE WITH STATE AND FEDERAL REQUIREMENTS. A PLASTIC MAT, TAR PAPER, OR OTHER IMPERVIOUS MATERIAL SHALL BE PLACED UNDER AREAS WHERE TOXIC LIQUIDS ARE TO BE OPENED AND STORED.

F. HAZARDOUS MATERIALS

ALL HAZARDOUS MATERIALS SHALL BE STORED IN A SECURE LOCATION, UNDER COVER, AND IN APPROPRIATE TIGHTLY, SEALED CONTAINERS WHEN NOT IN USE. ALL PRODUCTS SHALL BE STORED IN AND USED FROM THE ORIGINAL CONTAINER WITH THE ORIGINAL PRODUCT LABEL. CONTAINERS MUST BE STORED IN A MANNER TO PROTECT THEM FROM THE ELEMENTS AND INCIDENTAL DAMAGE. THE MINIMUM PRACTICAL QUANTITY OF ALL SUCH MATERIALS SHALL BE KEPT ON THE JOB SITE AND SCHEDULED FOR DELIVERY AS CLOSE TO TIME OF USE AS PRACTICAL.

ALL PRODUCTS SHALL BE USED IN STRICT COMPLIANCE WITH THE INSTRUCTIONS ON THE PRODUCT LABEL.

SUFFICIENT EQUIPMENT AND/OR MATERIALS SHALL BE KEPT ONSITE TO CONTAIN AND CLEAN UP SPILLS OF HAZARDOUS MATERIALS IN THE AREAS WHERE THESE MATERIALS ARE STORED OR USED. SPILL CONTROL AND CONTAINMENT KIT SUPPLIES SHALL BE OF SUFFICIENT QUANTITIES AND APPROPRIATE CONTENT TO CONTAIN A SPILL FROM THE LARGEST ANTICIPATED PIECE OF EQUIPMENT AND FROM THE LARGEST ANTICIPATED QUANTITIES OF PRODUCTS STORED ON THE SITE AT ANY GIVEN TIME.

CONTRACTOR TO CONTAIN AND CLEAN UP ANY SPILLS IMMEDIATELY AFTER THEY OCCUR. ANY SPILLS OF PETROLEUM PRODUCTS OR HAZARDOUS MATERIALS IN EXCESS OF REPORTABLE QUANTITIES AS DEFINED BY EPA, STATE, OR LOCAL AGENCY REGULATIONS SHALL BE REPORTED TO THE APPROPRIATE AGENCIES IN THE REQUIRED TIME FRAMES. THE CONTRACTOR SHALL PROVIDE A WRITTEN NOTICE TO THE OWNER IMMEDIATELY UPON IDENTIFICATION OF ANY SPILL.

ALL EXCESS, USED, OR SPILLED PRODUCTS, INCLUDING CONTAMINATED SOIL, SHALL BE DISPOSED OF BY THE CONTRACTOR IN STRICT COMPLIANCE WITH INSTRUCTIONS ON THE PRODUCT LABEL AND ALL APPLICABLE REGULATIONS.

VII. APPROVED STATE AND LOCAL PLANS

THE CONSTRUCTION DRAWINGS FOR THE PROJECT WERE APPROVED AND PERMITTED BY THE FOLLOWING AGENCIES:

* CITY OF ALACHUA
* FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION
* SUWANNEE RIVER WATER MANAGEMENT DISTRICT

VIII. CONSTRUCTION ACTIVITY DISCHARGES

IN ACCORDANCE WITH THIS PLAN, THERE ARE NO ANTICIPATED DISCHARGES OF STORMWATER ASSOCIATED WITH CONSTRUCTION ACTIVITIES.

IX. CHANGES TO THE POLLUTION PREVENTION PLAN

THIS STORMWATER POLLUTION PREVENTION PLAN SHALL BE AMENDED TO REFLECT ANY APPLICABLE CHANGE IN A STATE, REGIONAL, OR LOCAL PERMIT FOR WHICH THE PERMITTEE RECEIVES WRITTEN NOTICE. WHEN WRITTEN NOTICE IS RECEIVED, THE PERMITTEE SHALL PROVIDE A RE-CERTIFICATION OF THIS POLLUTION PREVENTION PLAN, WHICH HAS BEEN REVISED TO ADDRESS SUCH CHANGES. AMENDMENTS TO THE PLAN SHALL BE PREPARED, SIGNED, DATE, AND KEPT AS ATTACHMENTS TO THE ORIGINAL PLAN.

X. ALTERNATIVE PERMIT REQUIREMENTS

NO ALTERNATIVE PERMIT REQUIREMENTS ARE REQUESTED.

XI. MAINTENANCE

THE CONTRACTOR IS RESPONSIBLE FOR THE MAINTENANCE, INSPECTION SCHEDULE, AND REPAIRS OUTLINED IN THIS PLAN. MAINTENANCE SHALL CONTINUE THROUGHOUT THE PROJECT UNTIL WORK IS COMPLETE. THE CONTRACTOR IS RESPONSIBLE FOR REMOVING ALL TEMPORARY EROSION AND SEDIMENT CONTROL DEVICES AFTER CONSTRUCTION IS COMPLETE. IN ADDITION TO THE TIMES MENTIONED IN THE PREVIOUS SECTIONS, THE CONTRACTOR SHALL INITIATE ANY REPAIRS WITHIN 24 HOURS OF BEING REPORTED. IN THE EVENT THAT THE SMF(S) DO NOT PERFORM PROPERLY OR IF A SINKHOLE DEVELOPS, THE PROJECT ENGINEER SHALL BE NOTIFIED TO ASSIST IN COORDINATING REMEDIAL ACTION. ACCUMULATED SEDIMENT SHALL BE REMOVED FROM SILT FENCING WHEN IT HAS REACHED ONE-THIRD THE HEIGHT OF THE SILT FENCE. UPON FINAL COMPLETION OF CONSTRUCTION AND ACCEPTANCE BY BOTH THE CITY AND OWNER, THE OPERATION AND MAINTENANCE ENTITY WILL BE ALACHUA COUNTY.

XII. INSPECTIONS

THE CONTRACTOR SHALL INSPECT ALL POINTS OF POTENTIAL DISCHARGE FROM THE PROJECT SITE FOR ALL DISTURBED AREAS ON THE CONSTRUCTION SITE AT LEAST ONCE EVERY SEVEN CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A STORM THAT IS 0.50 INCHES OR GREATER. FOR POINTS OF DISCHARGE INTO SURFACE WATERS OF THE STATE OR AN MS4, A QUALIFIED INSPECTOR (PROVIDED BY THE OPERATOR) SHALL PERFORM THE REQUIRED INSPECTIONS. THE CONTRACTOR SHALL INSTALL A RAIN GAUGE AT THE SITE TO MONITOR AND DOCUMENT RAINFALL EVENTS 0.50 INCHES OR GREATER. LOCATIONS WHERE THE SITE IS COMPLETELY CONSTRUCTED AND STABILIZED, SUCH INSPECTIONS SHALL BE CONDUCTED AT LEAST ONCE A MONTH. ALL INSPECTIONS SHALL BE RECORDED ON THE CONSTRUCTION INSPECTION FORM. THE CONTRACTOR MAY USE THEIR OWN FORM (MEETING FDEP SWPPP REQUIREMENTS) OR A SAMPLE FORM FROM FDEP. A SAMPLE CONSTRUCTION FORM IS AVAILABLE AT: "HTTPS://FLORIDADEP.GOV/WATER/STORMWATER/DOCUMENTS/CONSTRUCTION-SWPPP". MORE SPECIFICALLY, THE INSPECTION SHALL ENSURE THE FOLLOWING CATEGORIES.

A. DISTURBED AREAS

ALL DISTURBED AREAS AND AREAS USED FOR MATERIAL STORAGE SHALL BE INSPECTED FOR POLLUTANTS ENTERING THE STORMWATER SYSTEM. THE STORMWATER MANAGEMENT SYSTEM AND EROSION AND SEDIMENT CONTROL MEASURES IDENTIFIED IN THE PLAN SHALL BE INSPECTED TO ENSURE THEY ARE OPERATING CORRECTLY. LOCATIONS WHERE VEHICLES ENTER AND EXIT THE SITE SHALL BE INSPECTED FOR EVIDENCE OF OFF-SITE SEDIMENT TRACKING.

B. MAINTENANCE PERFORMANCE

BASED ON THE RESULTS OF THE INSPECTION, ALL MAINTENANCE OPERATIONS NEEDED TO ASSURE PROPER COMPLIANCE WITH THIS PLAN SHALL BE DONE IN A TIMELY MANNER, BUT IN NO CASE LATER THAN 7 DAYS FOLLOWING THE INSPECTION.

C. REPORTING REQUIREMENTS

ALL INSPECTIONS SHALL BE RECORDED ON THE CONSTRUCTION INSPECTION FORM. THIS FORM IS CREATED TO SUMMARIZE THE SCOPE OF THE INSPECTION, THE NAME(S) AND QUALIFICATION OF THE INSPECTOR(S), THE DATE OF INSPECTION, RAINFALL DATA, OBSERVATIONS, THE ACTIONS TAKEN TO CORRECT INCIDENTS OF NON-COMPLIANCE WITH THE PROVISIONS OF THIS PLAN. IF NO INCIDENTS OF NON-COMPLIANTS ARE OBSERVED, THE REPORT SHALL CONTAIN A CERTIFICATION THAT THE FACILITY IS IN COMPLIANCE WITH THE STORMWATER POLLUTION PREVENTION PLAN AND THE ASSOCIATED PERMIT.

XIII. NON-STORMWATER DISCHARGES

IN ADDITION TO STORMWATER RUNOFF, THIS PLAN APPLIES TO RUNOFF FROM IRRIGATION OPERATIONS AND CONSTRUCTION PRACTICES. THIS PLAN DOES NOT PERTAIN TO DISCHARGES FROM FIRE FIGHTING ACTIVITIES.

XIV. CONTRACTORS CERTIFICATION

THE CONTRACTORS OR SUB-CONTRACTORS SHALL PHOTOCOPY AND COMPLETE THE FORM ON THIS PAGE. IT SHALL BE PROVIDED TO THE OWNER AND KEPT ON FILE PURSUANT TO SECTION XV REGARDING PROJECT RECORDS.

XV. RETENTION OF RECORDS

THE PERMITTEE SHALL RETAIN COPIES OF STORMWATER POLLUTION PREVENTION PLANS AND ALL REPORTS REQUIRED BY THIS PERMIT, AND RECORDS OF ALL DATA USED TO COMPLETE THE NOTICE OF INTENT TO BE COVERED BY THIS PERMIT, FOR A PERIOD OF AT LEAST THREE YEARS FROM THE DATE THAT THE SITE IS FINALLY STABILIZED.

THE PERMITTEE SHALL RETAIN A COPY OF THE STORMWATER POLLUTION PREVENTION PLAN AND ALL REPORTS, RECORDS, AND DOCUMENTATION REQUIRED BY THIS PERMIT AT THE CONSTRUCTION SITE, OR AN APPROPRIATE ALTERNATIVE LOCATION AS SPECIFIED IN THE NOTICE OF INTENT, FROM THE DATE OF PROJECT INITIATION TO THE DATE OF FINAL STABILIZATION.

XVI. NOTICE OF TERMINATION

NOTICE OF TERMINATION:

1. WHERE A SITE HAS BEEN FINALLY STABILIZED AND ALL STORMWATER DISCHARGES AUTHORIZED BY THIS PERMIT ARE ELIMINATED, THE PERMITTEE SHALL SUBMIT A NOTICE OF TERMINATION (DEP FORM 62-621.300(6)), SIGNED IN ACCORDANCE WITH PART VII.C OF DEP DOCUMENT NO. 62-621.300(4)(a), WITHIN 14 DAYS OF FINAL STABILIZATION OF THE SITE TO TERMINATE COVERAGE UNDER THIS PERMIT.
2. ELIMINATION OF STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITY MEANS THAT ALL DISTURBED SOILS AT THE SITE HAVE BEEN FINALLY STABILIZED AND TEMPORARY EROSION AND SEDIMENT CONTROL MEASURES HAVE BEEN REMOVED OR WILL BE REMOVED AT AN APPROPRIATE TIME, OR THAT ALL STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITY FROM THE SITE THAT ARE AUTHORIZED BY THIS GENERIC PERMIT HAVE OTHERWISE BEEN ELIMINATED.
3. FOR CONSTRUCTION ACTIVITIES WHERE THE OPERATOR CHANGES, THE EXISTING OPERATOR SHALL FILE AN N.O.T. IN ACCORDANCE WITH THIS PART WITHIN 14 DAYS OF RELINQUISHING CONTROL OF THE PROJECT TO A NEW OPERATOR.

THE PERMITTEE SHALL SUBMIT A NOTICE OF TERMINATION TO THE FOLLOWING ADDRESS:

NPDES STORMWATER NOTICES CENTER, MS# 2510
FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION
2600 BLAIR STONE ROAD
TALLAHASSEE, FLORIDA 32399-2400

PROJECTS THAT DISCHARGED STORMWATER ASSOCIATED WITH CONSTRUCTION ACTIVITY TO A MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) SHALL SUBMIT A COPY OF THE N.O.T. TO THE OPERATOR OF THE MS4.

Contractor/Subcontractor Certification Statement
Stormwater Pollution Prevention Plan

Site Name: TECH CITY FIRE STATION
Site Location: 05844-004-004
Alachua County, Florida

THE CONTRACTOR(S) OR SUB-CONTRACTOR(S) RESPONSIBLE FOR COMPLYING WITH THIS STORMWATER POLLUTION PREVENTION PLAN SHALL SIGN THE CERTIFICATION STATEMENT BELOW. MULTIPLE COPIES OF THIS CERTIFICATION STATEMENT MAY BE NECESSARY DEPENDING ON THE NUMBER OF SUB-CONTRACTORS ASSOCIATED WITH THE PROJECT

I CERTIFY UNDER PENALTY OF LAW THAT I UNDERSTAND, AND SHALL COMPLY WITH, THE TERMS AND CONDITIONS OF THE STATE OF FLORIDA GENERIC PERMIT FOR STORMWATER DISCHARGE FROM LARGE AND SMALL CONSTRUCTION ACTIVITIES AND THIS STORMWATER POLLUTION PREVENTION PLAN PREPARED THEREUNDER.

EROSION & SEDIMENTATION CONTROL

1. SILT FENCING AND/OR STAKED HAYBALES SHALL BE CONSTRUCTED WHERE SHOWN ON THE DRAWINGS PRIOR TO STARTING CONSTRUCTION.

2 ALL STORMDRAIN INLETS SHALL BE PROTECTED DURING CONSTRUCTION IN ACCORDANCE WITH FDOT STATE OF FLORIDA EROSION AND SEDIMENT CONTROL DESIGNER AND REVIEWER MANUAL.

3. THE STORMDRAIN SYSTEM SHALL BE FLUSHED OUT TO REMOVE ALL ACCUMULATED DEBRIS AND SEDIMENT UPON COMPLETION OF CONSTRUCTION.

4. ALL DISTURBED AREAS IN THE CONSTRUCTION AREA SHALL BE COMPLETELY STABILIZED BY COMPLETION OF CONSTRUCTION. GRASS SEEDING RATES AND MIXTURES SHALL BE PER SECTION 570 OF THE STANDARD SPECIFICATIONS. EVIDENCE OF GROWTH MUST BE PRESENT PRIOR TO FINAL RELEASE.

5. REFER TO THE SWPPP PLAN FOR COMPLETE EROSION CONTROL MEASURES.

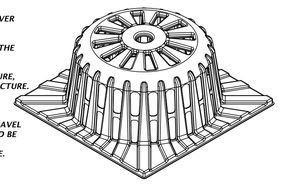
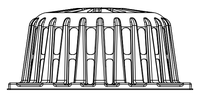
TYPICAL INSTALLATION SEQUENCE FOR SILT-SAVER FRAME AND FILTER

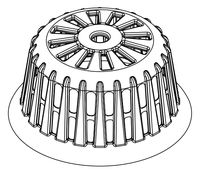


1. EXCAVATE APPROXIMATELY 4" TO 6" BELOW THE TOP OF THE INLET STRUCTURE.

2. PLACE THE FRAME ONTO THE INLET STRUCTURE, ENSURING PROPER SEATING OF FRAME TO STRUCTURE.

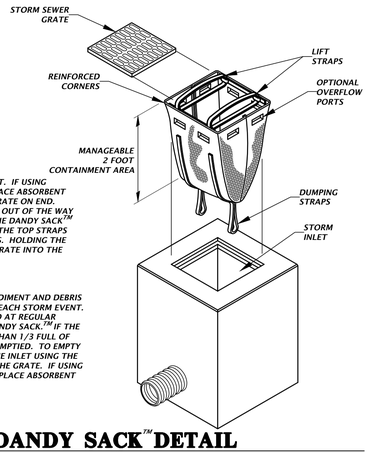


3. SLIDE THE FILTER OVER THE FRAME.



4. FILL THE FILTER POCKETS WITH SOIL, #57 GRAVEL OR EQUIVALENT. THE FILTER POCKETS SHOULD BE COMPLETELY FILLED TO ENSURE A GOOD SEAL BETWEEN THE GROUND AND INLET STRUCTURE.

5. BACK FILL AROUND THE FRAME AND FILTER ASSEMBLY IS NOT REQUIRED TO COMPLETE INSTALLATION; HOWEVER, BACK FILLING MAY BE NECESSARY TO COMPLETE EXCAVATION REQUIREMENTS FOR THE SITE.



BASE OF FRAME SHAPED & SIZED TO FIT INLET TOP

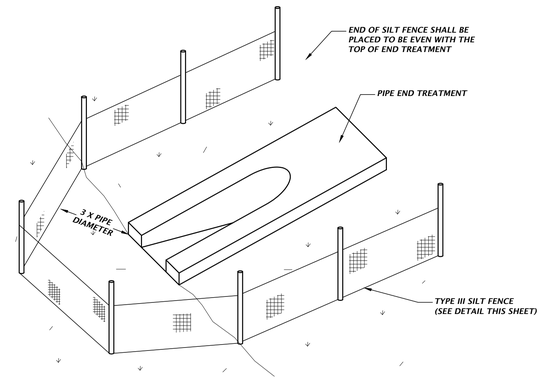
SILT-SAVER® DETAIL

NTS

INSTALLATION:

REMOVE THE GRATE FROM INLET. IF USING OPTIONAL OIL ABSORBENTS; PLACE ABSORBENT PILLOW IN UNIT. STAND THE GRATE ON END. MOVE THE TOP LIFTING STRAPS OUT OF THE WAY AND PLACE THE GRATE INTO THE DANDY SACK™ SO THAT THE GRATE IS BELOW THE TOP STRAPS AND ABOVE THE LOWER STRAPS. HOLDING THE LIFTING DEVICES, INSERT THE GRATE INTO THE INLET.

MAINTENANCE:



REMOVE ALL ACCUMULATED SEDIMENT AND DEBRIS FROM VICINITY OF UNIT AFTER EACH STORM EVENT. AFTER EACH STORM EVENT AND AT REGULAR INTERVALS, LOOK INTO THE DANDY SACK.™ IF THE CONTAINMENT AREA IS MORE THAN 1/3 FULL OF SEDIMENT, THE UNIT MUST BE EMPTIED. TO EMPTY UNIT, LIFT THE UNIT OUT OF THE INLET USING THE LIFTING STRAPS AND REMOVE THE GRATE. IF USING OPTIONAL OIL ABSORBENTS; REPLACE ABSORBENT WHEN NEAR SATURATION.

NOTES:

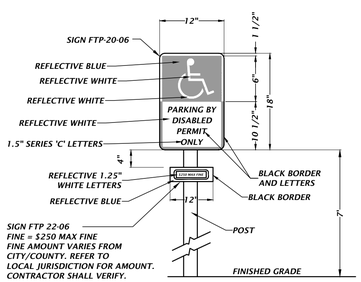
1. IN STAGE #1, PLACE MATERIAL IN HORIZONTAL LAYERS NOT TO EXCEED 6 INCHES FOR A-1 OR A-2-4 OR LAYERS NOT TO EXCEED 12 INCHES FOR A-3 (ARCHER SAND ONLY) PER FDOT SPECIFICATION 125-8.3.2.2; NO OTHER SOIL CLASSIFICATIONS WILL BE PERMITTED. COMPACT BACKFILL MATERIAL TO MEET THE REQUIREMENTS OF FDOT SPECIFICATION 125-9.2.1 AND PERFORM TESTING TO MEET THE REQUIREMENTS FDOT SPECIFICATION 125-9.3.1. THE CONTRACTOR MAY ELECT TO PLACE EXCAVATABLE FLOWABLE FILL IF THE UTILITY IS PROPERLY ANCHORED AND APPROVED BY GRU.
2. IN STAGE #2, PLACE FLOWABLE FILL TO THE BOTTOM OF THE EXISTING BASE COURSE.
3. NEW 8" LIMEROCK BASE SHALL BE COMPACTED TO NOT LESS THAN 98% OF MAX DENSITY AS SPECIFIED BY THE FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATION 200-7.2. THE WIDTH OF THE LIMEROCK BASE SHALL BE THE WIDTH OF THE PIPE TRENCH PLUS 18" ON BOTH SIDES SEE DETAIL.
4. UNLESS OTHERWISE SPECIFIED, MATERIALS AND METHODS OF OPERATION REQUIRED TO INSTALL NEW AND REPLACEMENT PAVEMENT SHALL BE IN ACCORDANCE WITH THE LATEST APPLICABLE REQUIREMENTS OF THE FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION.
5. PAVEMENT SHALL BE REMOVED TO NEATLY SAWED STRAIGHT EDGES.
6. THE TYPE AND THICKNESS OF THE NEW SURFACE MATERIAL SHALL BE CONSISTENT WITH THAT OF THE EXISTING SURFACE, BUT IN ALL CASES SHALL MEET THE MINIMUM STANDARDS ESTABLISHED BY THE PLANS AND SPECIFICATIONS.
7. THE BACKFILLING AND PAVEMENT REPLACEMENT MUST BE DONE IN ACCORDANCE WITH FDOT INDEX 425-080.
8. PAVEMENT CUTS SHALL HAVE THE ASPHALT SURFACE REPLACED WITHIN 24 HOURS, WITH OPEN CUT RESTORATION PERFORMED IN ACCORDANCE WITH MOST CURRENT EDITION OF FDOT INDEX 425-080 USING THE FLOWABLE FILL OPTION.



OPEN CUT AND REPAIR PAVEMENT DETAILS

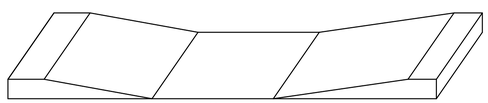
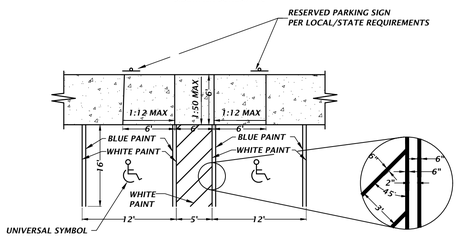
SIGN NOTES:

1. SIGN CONSTRUCTION, DESIGN AND PLACEMENT SHALL COMPLY WITH STATE AND LOCAL STATUTES.

ACCESSIBLE PARKING SIGN DETAIL



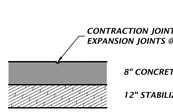
NTS



DETECTABLE WARNING DETAIL

NTS

1. PROVIDE DETECTABLE WARNINGS IN ACCORDANCE WITH THE AMERICANS WITH DISABILITIES ACT ACCESSIBILITY GUIDELINES (ADAAG) SECTION 705-DETECTABLE WARNINGS ON WALKING SURFACES AND THE 2014 FLORIDA BUILDING CODE, ACCESSIBILITY, CHAPTER 7, SECTION 705.
2. RAISED TRUNCATED DOMES SHALL HAVE A BASE DIAMETER FROM 0.9" MIN TO 1.4" MAX, A TOP DIAMETER FROM 50% TO 65% OF BASE DIAMETER, A HEIGHT OF 0.2 INCH (5 mm) NOMINAL, CENTER-TO-CENTER SPACING FROM 1.6" MIN TO 2.4" MAX, AND BASE-TO-BASE SPACING OF 0.65% MINIMUM, MEASURED BETWEEN THE MOST ADJACENT DOMES ON A SQUARE GRID.
3. SURFACES SHALL CONTRAST VISUALLY WITH ADJACENT WALKING SURFACES EITHER LIGHT-ON-DARK, OR DARK-ON-LIGHT.
4. ALL SIDEWALK CURB RAMPS SHALL HAVE DETECTABLE WARNING SURFACES THAT EXTEND THE FULL WIDTH OF THE RAMP AND IN THE DIRECTION OF TRAVEL 24 INCHES.
5. IF MATS ARE TO BE UTILIZED:
   - A - DETECTABLE WARNING SURFACE SHALL CONSIST OF 3-FT WIDE, SURFACE APPLIED, POLYURETHANE MAT WITH IN-LINE TRUNCATED DOME PATTERN.
   - B - DETECTABLE WARNING SURFACE SHALL BE SECURED BY ADHESIVE AND STAINLESS STEEL ANCHORS.
   - C - ACCEPTABLE PRODUCTS ARE THE SURFACE APPLIED REDIMAT MANUFACTURED BY DETECTABLE WARNING SYSTEMS, INC. OR EQUAL LISTED ON THE FDOT QUALIFIED PRODUCTS LIST IN ACCORDANCE WITH SECTION 527-2.4 OF THE FDOT STANDARD SPECIFICATIONS.
   - D - PRIOR TO INSTALLING DETECTABLE WARNING MAT, SCRUB THE SURFACE WITH A WIRE BRISTLE BRUSH. THE EXISTING CONCRETE SURFACE SHALL BE CLEANED OF ANY LOOSE MATERIAL, DUST, OILS, GREASE, AND SEALERS.
   - E - ALL INSTALLATIONS SHALL BE MADE IN ACCORDANCE WITH THE DETECTABLE WARNING MAT MANUFACTURER'S SPECIFICATIONS.
6. IF INTERLOCKING PAVERS ARE TO BE UTILIZED:
   - A - DETECTABLE WARNING SURFACE FOR THE RAMPS SHALL CONSIST OF INTERLOCKING 4" X 8" ADA DETECTABLE WARNING SURFACE PAVERS HAVING A MINIMUM DEPTH OF 2". CONCRETE PAVERS ARE TO MEET ASTM C902 CLASS SX TYPE 1; AND BRICK PAVERS ARE TO MEET ASTM C55, GRADE N, SOLID BRICK COLOR TO MEET ADA CONTRAST REQUIREMENTS.
   - B - ALL UNITS SHALL BE SOUND AND FREE OF DEFECTS THAT WOULD INTERFERE WITH THE APPEARANCE OF PROPER PLACEMENT OF THE UNIT OR IMPAIR THE STRENGTH OR LONGEVITY OF THE FINAL STRUCTURE. ANY UNITS THAT ARE STRUCTURALLY DAMAGED DURING THE WORK SHALL BE IMMEDIATELY REMOVED AND REPLACED. THE PAVERS ARE TO BE LAID IN A TWO BY TWO BASKETWEAVE PATTERN, FLUSH WITH THE FINISH GRADE OF THE RAMP SURFACE, AND HAVE GAPS BETWEEN 1/16 AND 1/8 INCH. CUT PAVERS (MASONRY SAW ONLY) SHALL BE NO SMALLER THAN ONE-THIRD OF A WHOLE PAVER.
   - C - MODIFY FORMWORK OR PROVIDE FORMED GROUT INFILL BEHIND CURVED DROP CURB SECTIONS TO ENSURE STRAIGHT EDGE RESTRAINT FOR PAVERS.
   - D - CONCRETE EDGE RESTRAINT FOR WARNING AREA. MAXIMUM GAP OF 1/8" BETWEEN PAVERS AND EDGE. USE¼" RADIUS ALONG CONCRETE EDGES.
   - E - WHEN PAVERS ABUT EITHER EARTH/DIRT OR PAVEMENT, A SIX INCH CONCRETE BAND SHALL BE INSTALLED. BAND SHALL BE WITHIN LIMITS OF THE WIDTH OF PROPOSED CONCRETE AND NOT EXTENDED AN ADDITIONAL SIX INCHES..
7. OTHER METHODS/MATERIALS MAY BE USED FOR THE DETECTABLE WARNING STRIP, BUT THEY MUST MEET THE ABOVE CRITERIA.
8. ALL MATERIALS/METHODS TO BE UTILIZED SHALL BE SUBMITTED FOR APPROVAL TO THE ENGINEER PRIOR TO ORDERING THE MATERIALS/METHODS. FAILURE TO OBTAIN APPROVAL BEFORE ORDERING OR INSTALLATION MAY RESULT IN REMOVAL AND REPLACEMENT AT CONTRACTOR'S EXPENSE. ENGINEER'S APPROVAL DOES NOT RELIEVE THE CONTRACTOR'S RESPONSIBILITY FOR THE PERFORMANCE OF THE ITEM,
9. IF FDOT CURB RAMPS ARE SPECIFIED, REFER TO THE FDOT INDEX 522-002 FOR SPECIFICATIONS CONCERNING THE APPLICABLE DETECTABLE WARNING STRIP TO BE USED WITH FDOT SPECIFIED RAMPS.



NOTE:
CURB RAMP SLOPE SHALL NOT EXCEED 1:12

PAVEMENT MARKING FOR PARKING

(See Note 5)

UNIVERSAL SYMBOL OF ACCESSIBILITY

NOTES:

1. Dimensions are to the centerline of markings.
2. An Access Aisle is required for each accessible space when angle parking is used.
3. Criteria for pavement markings only, not public sidewalk curb ramp locations. For ramp locations refer to plans.
4. Mount FTP-22-06 sign below the FTP-21-06 sign.
5. Use of the pavement symbol in accessible parking spaces is optional. When pavement symbol is used, the symbol is either 3'-0" or 5'-0" high and white in color.

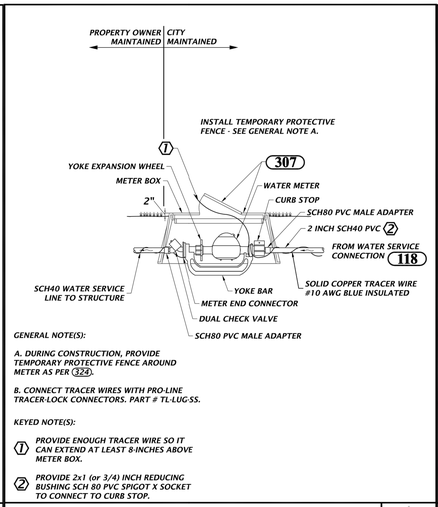
KEYED NOTE(S):

1. PROVIDE TIE RODS FOR DUAL RESTRAINT AND AS PER 306.
2. CONNECT TRACER WIRES FROM MAIN TO SERVICE WITH PRO-LINE TRACER-LOCK CONNECTORS. PART # TL-LUG-SS.
3. EXTEND TRACER WIRE AT LEAST 8-INCHES ABOVE GRADE.



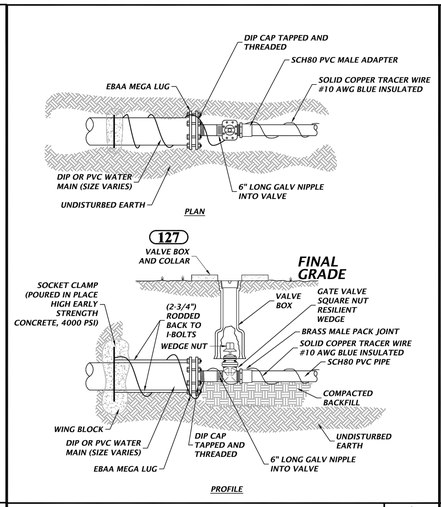
103 FIRE HYDRANT (PERPENDICULAR/ PARALLEL TO MAIN)
NTS

KEYED NOTE(S):

1. PROVIDE BACKFLOW PREVENTION ASSEMBLY ENCLOSURE. COORDINATE WITH VENDOR TO SELECT ENCLOSURE SIZE SUITABLE FOR INSTALLED BACKFLOW PREVENTER ASSEMBLY.
2. ENCLOSURE VENDOR AND FEATURES:
   - MARINE GRADE ALUMINUM
   - 1.5 INCH INSULATION, 9.0 R VALUE
   - MEANS TO ACCESS ASSEMBLY
   - LOCKABLE
   - MOUNTING HARDWARE
   - COLOR: TAN, UNLESS OTHERWISE NOTED.
   - VENDORS: SAFE T COVER, NASHVILLE, TN; OR EQUAL
3. POUR CONCRETE PAD WITH DIMENSIONS AS PER VENDOR'S RECOMMENDATIONS. MINIMUM THICKNESS OF 4 INCHES.
   - PROVIDE SLEEVES AROUND PIPING
4. BACKFLOW PREVENTER FURNISHED, INSTALLED AND MAINTAINED BY PROPERTY OWNER, NOT COA.

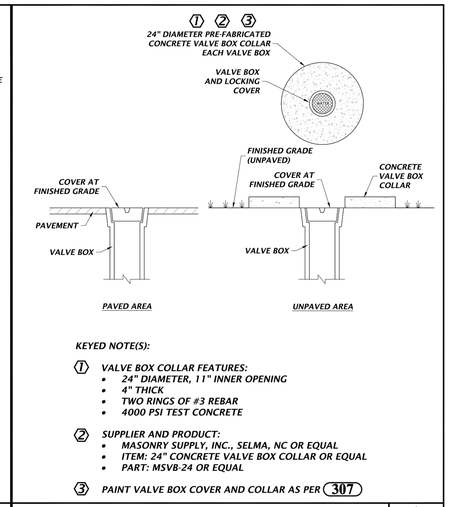
121 3/4" TO 2" BACKFLOW PREVENTER AND ENCLOSURE
NTS

GENERAL NOTE(S):



A. DURING CONSTRUCTION, PROVIDE TEMPORARY PROTECTIVE FENCE AROUND METER AS PER 324.

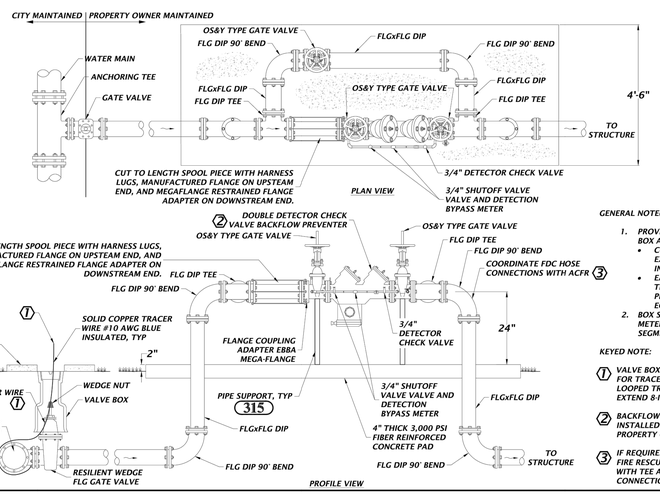
B. CONNECT TRACER WIRES WITH PRO-LINE TRACER-LOCK CONNECTORS. PART # TL-LUG-SS.



KEYED NOTE(S):

1. PROVIDE ENOUGH TRACER WIRE SO IT CAN EXTEND AT LEAST 8-INCHES ABOVE METER BOX.
2. PROVIDE 2x1 (or 3/4) INCH REDUCING BUSHING SCH 80 PVC SPIGOT X SOCKET TO CONNECT TO CURB STOP.

115 3/4" AND 1" WATER METER ASSEMBLY
NTS

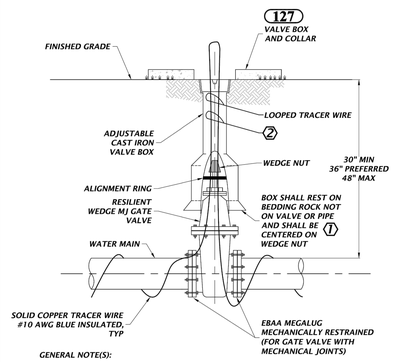


124 WATER MAIN REDUCTION OF LINE SIZE
NTS

KEYED NOTE(S):

1. VALVE BOX COLLAR FEATURES:
   - 24" DIAMETER, 11" INNER OPENING
   - 4" THICK
   - TWO RINGS OF #3 REBAR
   - 4000 PSI TEST CONCRETE
2. SUPPLIER AND PRODUCT:
   - MASONRY SUPPLY, INC., SELMA, NC OR EQUAL
   - ITEM: 24" CONCRETE VALVE BOX COLLAR OR EQUAL
   - PART: MSVB-24 OR EQUAL
3. PAINT VALVE BOX COVER AND COLLAR AS PER 307

127 VALVE BOX COVER
NTS



GENERAL NOTE(S):

1. PROVIDE FREEZE PROTECTION BOX AS FOLLOWS:
   - CORRUGATED ALUMINUM EXTERIOR WITH INTERIOR INSULATION
   - EASY INTERNAL ACCESS FOR TESTING AND MAINTENANCE. PROVIDE CLASPS OR EQUIVALENT.
2. BOX SHALL COVER BOTH WATER METER AND BYPASS LINE SEGMENTS.

KEYED NOTE:

1. VALVE BOX SERVES AS ACCESS POINT FOR TRACER WIRES. PROVIDE ENOUGH LOOPED TRACER WIRE SO IT CAN EXTEND 8-INCHES ABOVE VALVE BOX.
2. BACKFLOW PREVENTER FURNISHED, INSTALLED AND MAINTAINED BY PROPERTY OWNER, NOT COA.
3. IF REQUIRED BY ALACHUA COUNTY FIRE RESCUE (ACFR), REPLACE ELBOW WITH TEE AND FDC HOSE CONNECTIONS.

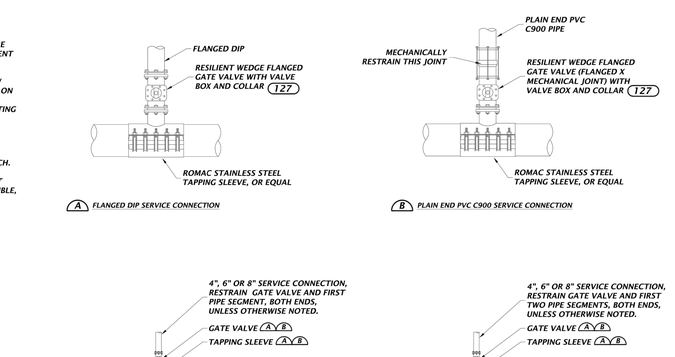
139 FIRE LINE 4" AND LARGER DOUBLE DETECTOR CHECK VALVE BACKFLOW PREVENTER (NO DOWNSTREAM DIESEL FIRE PUMP)
NTS

GENERAL NOTE(S):

1. PVC EXTENSIONS SHALL NOT BE USED ON VALVE BOX INSTALLATION.
2. VALVE BOX LID TO BE LETTERED WITH THE WORD "WATER" OR "RECLAIMED".

KEYED NOTE(S):

1. WHEN VALVE BOX IS TO BE INSTALLED IN ROADWAY OR OTHER TRAFFIC AREAS SET VALVE BOX ON FIVE (5) SOLID COMMON BRICKS.
2. VALVE BOX MAY SERVE AS ACCESS POINT FOR TRACER WIRES. PROVIDE ENOUGH LOOPED TRACER WIRE SO IT CAN EXTEND 8-INCHES ABOVE GRADE.



145 GATE VALVE FOR WATER AND RECLAIMED WATER MAINS 4" OR LARGER
NTS

GENERAL NOTE(S)

1. MINIMUM RESTRAINED LENGTHS ARE BASED ON 309 AND ARE SUFFICIENT FOR BOTH DIP AND PVC PIPE.
2. THIS DETAIL APPLIES TO BOTH NEW SERVICE CONNECTIONS INSTALLED ON NEW PIPE AND NEW SERVICE CONNECTIONS INSTALLED ON EXISTING PIPE.

KEYED NOTE(S):

1. PREFERRED LOCATION TO REDUCE THRUST FORCES IN THE PIPE BRANCH.
2. IF 5' MIN DISTANCE BETWEEN JOINT AND TAPPING SLEEVE IS NOT POSSIBLE, CONTACT COA. THRUST FORCE ANALYSIS REQUIRED.

149 WATER SERVICE CONNECTION FOR NEW AND EXISTING MAINS - 4", 6" AND 8"

GENERAL NOTE(S):

1. *WATER SHALL NOT BE PERMITTED IN THE TRENCH DURING CONSTRUCTION.*
2. *ALL PIPE TO BE INSTALLED WITH BELL FACING UPSTREAM TO THE DIRECTION OF THE FLOW.*
3. *DEPTH FOR REMOVAL OF UNSUITABLE MATERIAL SHALL GOVERN DEPTH OF BEDDING ROCK BELOW THE PIPE. FIELD DETERMINE REQUIRED REMOVAL OF UNSUITABLE MATERIAL TO REACH SUITABLE FOUNDATION. THE BOTTOM OF THE TRENCH SHALL NOT BE EXCAVATED BELOW THE SPECIFIED GRADE. IF UNDERCUTTING OCCURS, THE BOTTOM OF THE TRENCH SHALL BE BROUGHT UP TO THE ORIGINAL GRADE WITH APPROVED MATERIAL AND THOROUGHLY COMPACTED TO A MINIMUM OF 95% MODIFIED PROCTOR.*
4. *FINAL RESTORATION IN IMPROVED AREAS SHALL BE IN COMPLIANCE WITH ALL APPLICABLE REGULATIONS OF GOVERNING AGENCIES.*

KEYED NOTE(S):

1. *TRENCH STABILIZATION SHALL BE PROVIDED TO A DEPTH OF 12-INCHES. THE MATERIAL SHALL BE NO. 57 STONE.*
2. *BEDDING SHALL BE A MINIMUM OF 6-INCHES AND COMPOSED OF IMPORTED GRANULAR FILL. COMPACT TO 95% STANDARD PROCTOR, AASHTO T-99.*
3. *HAUNCHING PORTION OF THE PIPE ZONE SHALL BE PLACED TO THE SPRINGLINE OF THE PIPE AND COMPOSED OF IMPORTED GRANULAR FILL. COMPACT TO 95% STANDARD PROCTOR ASSHTO T-99.*
4. *INITIAL BACKFILL: COMMON FILL COMPACTED TO 95% (98% UNDER PAVEMENT) OF THE MAXIMUM DENSITY AS PER AASHTO T-180, FROM THE SPRINGLINE OF THE PIPE TO TWO (2) FEET ABOVE THE PIPE, THE SOIL SHALL BE CAREFULLY BACKFILLED IN 6-INCH LIFTS AND THE SOIL CONSOLIDATED WITH THE HAND OPERATED TAMPING MACHINE (OR AS REQUIRED BY CITY, COUNTY, OR STATE INSPECTORS).*
5. *FINAL BACKFILL: COMMON FILL COMPACTED TO 95% (98% UNDER PAVEMENT) OF THE MAXIMUM DENSITY AS PER AASHTO T-180. AFTER PLACEMENT AND COMPACTION OF THE INITIAL BACKFILL, THE BALANCE OF THE BACKFILL MATERIAL MAY BE MACHINE PLACED OR AS REQUIRED BY THE INSPECTOR AND SHALL NOT CONTAIN ANY ROCKS OR DEBRIS.*
6. *12" MINIMUM*

GENERAL NOTE(S):

1. *ALL BEARING SURFACES TO BE CARRIED TO UNDISTURBED SOIL.*
2. *THESE TABLES SHOW MINIMUM SIZES FOR THRUST BLOCKS IN GOOD SOIL (A-1 THRU A-3, CLEAN SANDS AND GRAVELS) WITH MINIMUM BEARING CAPACITY OF 2000 psi.*
3. *POOR SOILS A-4 THRU A-8, SILTY SOILS, CLAYS, MUCK AND PEAT WILL REQUIRE LARGER THRUST BLOCKING.*
4. *BOTH CONCRETE THRUST BLOCKS AND TIE RODS MUST BE USED WHEN, IN THE JUDGEMENT OF THE ENGINEER, THE NATURE AND CRITICALITY OF AN INSTALLATION IS SUCH AS TO REQUIRE POSITIVE ASSURANCE OF STABILITY.*
5. *THE USE OF THRUST BLOCKS SHALL BE LIMITED TO SITUATIONS SUCH AS POINT REPAIR WHERE EXPOSING SEVERAL JOINTS OF PIPE IS NOT FEASIBLE DUE TO EXISTING GROUND CONDITIONS.*
6. *CONCRETE COLLARS WITH TIE RODS MAY BE USED ON DEAD END LINES AT THE CONTRACTOR'S DISCRETION. NUMBER OF TIE RODS REQUIRED IS AS FOLLOWS:*

3" - 8"	*DIAMETER MAIN - 2 TIE RODS REQUIRED PER JOINT (5/8" ROD)*
10" - 12"	*DIAMETER MAIN - 4 TIE RODS REQUIRED PER JOINT (5/8" ROD)*
14" - 16"	*DIAMETER MAIN - 6 TIE RODS REQUIRED PER JOINT (5/8" ROD)*

7. *TIE RODS AND NUTS SHALL CONFORM TO AWWA/ANSI CIII/A21.11*
8. *TIE RODS AND NUTS SHALL PROVIDE MIN YIELD AND TENSILE STRENGTH OF 45,000 PSI AND 60,000 PSI, RESPECTIVELY.*
9. *MAXIMUM TEST PRESSURE TO BE 150 PSI.*
10. *SAFETY FACTOR = 1.5*

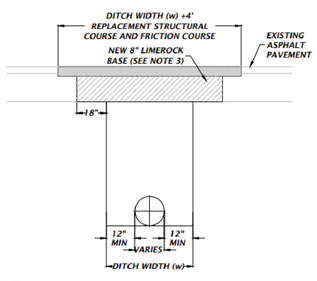
TABLE - MANHOLE LININGS AND COVERS			
APPLICATION TYPE	HYDROGEN SULFIDE GAS CONCENTRATION	MANHOLE LINING REQUIRED	MANHOLE COVER AND FLUME
TYPE 1: WASTEWATER DISCHARGE FROM RESIDENTIAL HOMES, EITHER DIRECTLY OR INDIRECTLY	LOW	YES (3)	CAST IRON (212)
TYPE 2: OFF-ROAD OR CITY ROAD, RECEIVES FORCE MAIN DISCHARGE, EITHER DIRECTLY OR INDIRECTLY	HIGH	YES (1)	COMPOSITE (213)
TYPE 3: COUNTY OR STATE ROAD, RECEIVES FORCE MAIN DISCHARGE, EITHER DIRECTLY OR INDIRECTLY	HIGH	YES (1)	CAST IRON WITH COATING (214)

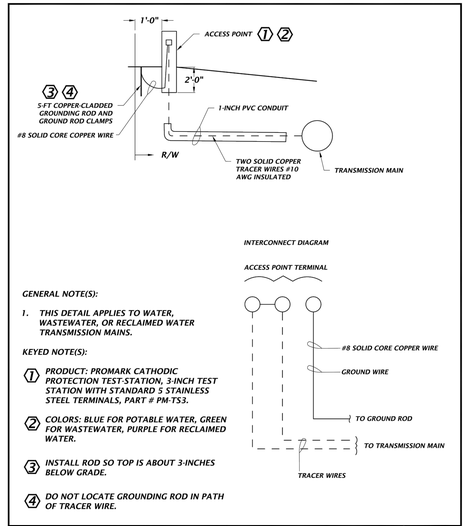
GENERAL NOTE(S):



1. MODIFY DETAIL AS NECESSARY IF DROP NOT REQUIRED.
2. PRECAST MANHOLE SECTIONS TO BE MANUFACTURED IN ACCORDANCE WITH THE LATEST EDITIONS OF A.S.T.M. C-478-73 WITH 4000 LB. CONC., TYPE II CEMENT. ALL LIFTING HOLES AND OUTSIDE INSERTS SHALL BE FILLED WITH NON-SHRINK GROUT AND SEALED WITH "RAMNEK" SEALER.
3. THE INTERIOR AND EXTERIOR OF MANHOLE AND THE INTERIOR OF THE ADJUSTMENT RINGS SHALL BE JOINED AND SEALED WITH "RAMNEK" SEALER.
4. MANHOLE AND DROP ASSEMBLY SHALL BE REQUIRED FOR 4" OR LARGER INFLUENT PIPES WITH 2 FOOT OR GREATER INFLUENT DROP.
5. ALL M/H JOINTS BELOW THE TOP CONE SECTION SHALL INCLUDE A 6" WIDE (MIN) EXTERIOR JOINT TAPE (W/PRIMER). TAPE ON THE CONE SECTION IS OPTIONAL.
6. PRECAST BASE SECTIONS WITH A BOTTOM SHALL BE INSTALLED ON UNDISTURBED EARTH. BEDDING IS REQUIRED WHEN THE SOIL CONDITIONS ARE WET OR WHEN THE SOIL IS UNSUITABLE, FIELD DETERMINE REQUIRED REMOVAL OF UNSUITABLE MATERIAL TO REACH SUITABLE FOUNDATION. IF UNDERCUTTING OCCURS, THE BOTTOM OF THE TRENCH SHALL BE BROUGHT UP TO THE ORIGINAL GRADE WITH APPROVED MATERIAL AND THOROUGHLY COMPACTED TO A MINIMUM OF 95% MODIFIED PROCTOR.

KEYED NOTE(S):

1. UNLESS OTHERWISE NOTED OR SHOWN, FOR NEW MANHOLES, PROVIDE AGRU SURE-GRIP YELLOW 3.0 MM THICK LINER. FOR EACH EXISTING MANHOLE THAT CONNECTS TO NEW FORCE MAIN, PROVIDE RAVEN 405 EPOXY COATING. FURNISH AND INSTALL THESE PRODUCTS AS PER LATEST VERSION OF CITY OF ALACHUA, PUBLIC SERVICES, REQUIREMENTS FOR DESIGN AND CONSTRUCTION.
2. THIS CONCRETE BOX INCLUDES PIPING INTEGRALLY CAST AT THE FACTORY.
3. INTERIOR: TWO COATS WATER BASED EPOXY COATING. RED INITIAL COAT FOLLOWED BY GRAY FINAL COAT.
4. GRAVITY PIPE WITH TOP HALF REMOVED PASSES THROUGH MANHOLE AS PER (216)
5. FROM MANHOLE VENDOR. TYPICAL SIZES ARE 2'x2'x2' AND 2'x2'x1'.
6. FOR EXISTING MANHOLE, PROVIDE FLOWABLE FILL AROUND JOINT BEND INSTEAD OF PRECAST DROP BOX
7. FOR ALL MANHOLES, PROVIDE EXTERIOR COAT AS FOLLOWS: TWO COATS WATER BASED EPOXY COATING. RED INITIAL COAT FOLLOWED BY GRAY FINAL COAT.
8. MANHOLE (MH) HEIGHT = RIM ELEVATION MINUS FLOOR ELEVATION. WHEN MANHOLE HEIGHT LESS THAN 20 FEET, PROVIDE 48" DIAMETER. WHEN MANHOLE HEIGHT 20 FEET OR MORE, PROVIDE 72" DIAMETER WITH COVER SIZE AS PER DETAILS (212) (213) (214)



215 **STANDARD MANHOLE AND DROP, AS REQUIRED**
NTS

GENERAL NOTE(S):

1. SEE BEDDING AND TRENCHING DETAIL (302) FOR SPECIFICATIONS ON BACKFILL OVER A PIPE.
2. NEW 8" LIMEROCK BASE SHALL BE COMPACTED TO NOT LESS THAN 98% OF MAX DENSITY AS SPECIFIED BY THE FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATION 200-7.2. THE WIDTH OF THE LIMEROCK BASE SHALL BE THE WIDTH OF THE PIPE TRENCH PLUS 18" ON BOTH SIDES SEE DETAIL.
3. UNLESS OTHERWISE SPECIFIED, MATERIALS AND METHODS OF OPERATION REQUIRED TO INSTALL NEW AND REPLACEMENT PAVEMENT SHALL BE IN ACCORDANCE WITH THE LATEST APPLICABLE REQUIREMENTS OF THE FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION.
4. PAVEMENT SHALL BE REMOVED TO NEATLY SAWED STRAIGHT EDGES.
5. THE TYPE AND THICKNESS OF NEW SURFACE MATERIAL SHALL BE CONSISTENT WITH THAT OF THE EXISTING SURFACE, BUT IN ALL CASES SHALL MEET THE MINIMUM STANDARDS ESTABLISHED BY THE PLANS AND SPECIFICATIONS.
6. THE BACKFILLING AND PAVEMENT REPLACEMENT MUST BE DONE IN ACCORDANCE WITH FDOT INDEX.

300 **BACKFILL OVER PIPE/PAVEMENT REPAIR DETAIL**
NTS

GENERAL NOTE(S):

1. THIS DETAIL APPLIES TO WATER, WASTEWATER, OR RECLAIMED WATER TRANSMISSION MAINS.

KEYED NOTE(S):

1. PRODUCT: PROMARK CATHODIC PROTECTION TEST STATION, 3-INCH TEST STATION WITH STANDARD 5 STAINLESS STEEL TERMINALS, PART # PM-TS3.
2. COLORS: BLUE FOR POTABLE WATER, GREEN FOR WASTEWATER, PURPLE FOR RECLAIMED WATER.
3. INSTALL ROD SO TOP IS ABOUT 3-INCHES BELOW GRADE.
4. DO NOT LOCATE GROUNDING ROD IN PATH OF TRACER WIRE.

318 **ACCESS POINT FOR TRANSMISSION MAIN**
NTS

2 OVERALL DIMENSION FLOOR PLAN

1/8" = 1'-0"

GENERAL NOTES

1. DIMENSIONS ON CMU WALLS ARE MADE FROM THE EXTERIOR FACE OF THE BLOCK. OTHER FINISHES LIKE STUCCO OR VENEER ARE NOT USED AS DIMENSIONED REFERENCES UNLESS OTHERWISE NOTED.
2. DIMENSIONS ON INTERIOR WALLS ARE TAKEN FROM GWB FACE UNLESS OTHERWISE NOTED.
3. REFER TO FLOOR PLAN TAGS AND WALL TYPES FOR MORE INFORMATION. ANY UNTAGGED PARTITION TO BE TYPE 1.
4. PROVIDE ABUSE RESISTANT GWB ON ALL COMMON AREAS, INCLUDING HALLWAYS.
5. USE MOISTURE-RESISTANT GWB ON ALL WET LOCATIONS.
6. PROVIDE CORNER GUARDS AT HIGH TRAFFIC AREAS. REFER TO FINISH PLAN FOR LOCATIONS.
7. ALL DOORS INSTALLED OVER CMU WALLS TO BE PAINTED HOLLOW METAL WITH SOLID GROUNTED PAINTED METAL FRAME, AND ALL DOORS TO BE INSTALLED IN METAL STUD WALLS TO BE STAINED SOLID CORE WOOD WITH PAINTED HOLLOW METAL FRAME.
8. PROVIDE DOOR SEALS, SWEEPS, CLOSERS, ETC TO ENSURE A WATER TIGHT CONDITION AT ALL EXTERIOR DOORS.
9. ALL EXPOSED CMU ON INTERIOR SPACES TO HAVE CONCAVE TOOLED MORTAR JOINS AND EPOXY PAINT.
10. PROVIDE ROLLER WINDOW SHADES AT EVERY WINDOW. COORDINATE SELECTION AND COLOR WITH ARCHITECT AND OWNER.

It's fast, it's free, it's the law.
Call 811 two business days before digging

LEGEND

NEW TREES TO BE ADDED

GENERAL NOTES
ALL ASPHALT, LIMEROCK, AND CONSTRUCTION DEBRIS SHALL BE REMOVED FROM PLANTING BEDS AND SOD AREAS PRIOR TO LANDSCAPE INSTALLATION. IF ENCOUNTERED DURING CONSTRUCTION OR INSTALLATION, THESE SHALL BE EXCAVATED AND REMOVED FROM THE SITE. PLANTING DEPTH OF SOIL IN SUCH AREAS SHOULD BE AT LEAST 3'. IF FILL MUST BE ADDED, IT MUST BE FLORIDA CLEAN DEEP FILL (FREE OF WEED SEEDS) WITH pH 6.0 – 7.5.

ALL LANDSCAPED AREAS SHALL BE MULCHED WITH 3" THICKNESS OF MULCH. PINE BARK MULCH SHALL BE USED IN ALL AREAS.

NEW TREES OUTSIDE OF MULCHED LANDSCAPED BEDS WILL BE PROTECTED FROM MOWER AND STRING TRIMMER DAMAGE WITH 10" OF PLASTIC DRAIN TUBING.

LEADER SHOOTS AND MAIN STRUCTURAL LIMBS OF TREES SHALL NOT BE TOPPED OR PRUNED. TREES WILL BE STAKED AS NEEDED. GUYLINES WILL BE OF NON-SYNTHETIC BIODEGRADABLE MATERIAL.

REFER TO CIVIL PLANS FOR TREE BARRICADE DETAILS AND INFORMATION.

ALL VEGETATIVE MATERIALS IDENTIFIED IN THE FLORIDA EXOTIC PEST PLAN COUNCIL'S LIST OF INVASIVE PLANT SPECIES, AS AMENDED, SHALL BE REMOVED AT THE TIME OF DEVELOPMENT

PLANT SELECTION FOR THIS PROJECT HAS BEEN DESIGNED TO UTILIZE FLORIDA FRIENDLY PLANT MATERIALS, AS OUTLINED BY THE UNIVERSITY OF FLORIDA IFAS EXTENSION.

GRASSING
ALL DISTURBED AND UNPAVED AREAS TO BE GRASSED WITH SOD THAT IS FREE OF NOXIOUS WEEDS INCLUDING TROPICAL SODA APPLE OR SHALL BE SEEDED AND MULCHED. SEE CIVIL SITE PLANS FOR ADDITIONAL RELATED INFORMATION.

PLANT MATERIAL
ALL PLANT MATERIAL TO BE FLORIDA NO.1 OR BETTER, GRADED IN ACCORDANCE WITH THE STATE OF FLORIDA DEPARTMENT OF AGRICULTURE, DIVISION OF PLANT INDUSTRY'S 'GRADES AND STANDARDS FOR NURSERY PLANTS', CURRENT EDITION AT THE TIME PLANS ARE ISSUED. CALL THE LANDSCAPE ARCHITECT PRIOR TO PURCHASING ANY PLANT MATERIAL FOR AN ON SITE INSPECTION AND REVIEW OF LANDSCAPE PLAN.

PLANT QUANTITIES SHOWN ARE FOR PERMITTING PURPOSES ONLY. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO CONFIRM ALL QUANTITIES SHOWN ON THE PLAN.

10% OPEN SPACE REQUIREMENT
AS PER CITY OF ALACHUA LDR SECTION 6.7.3 (A), THE MINIMUM OPEN SPACE SET ASIDE SHALL BE 10% OF THE DEVELOPMENT SITE. REFER TO CIVIL PLANS FOR OPEN SPACE CALCULATIONS.

IRRIGATION
ALL PROPOSED PLANT MATERIAL HAS BEEN SELECTED TO ENSURE MINIMAL WATERING REQUIREMENTS UPON ESTABLISHMENT, AND IS CONSIDERED TO BE OF LOW TO MODERATE WATER USE AS DEFINED IN SECTION 6.2.2(7)(b)(i)b IN THE CITY OF ALACHUA CODE OF ORDINANCES. ALL PLANT MATERIAL TO BE HAND WATERED UNTIL ESTABLISHMENT PER SECTION 6.2.2(7)(b)(vi)b). WATER SOURCE TO BE FROM HOSE BIB LOCATED ON THE BUILDING WALL AND A WATER TRUCK WHERE DISTANCE BETWEEN HOSE BIBB AND PLANT MATERIAL IS GREATER THAN 100'. REFER TO ARCHITECT'S PLANS FOR HOSE BIBB LOCATIONS

A. PROJECT

1. Project Name: Tech City Fire Station
2. Pre-Application Conference Date: October 30, 2025
3. Neighborhood Meeting Date: December 8, 2025
4. Address of Subject Property: Unassigned; Off of NW 86th Drive in Tech City
5. Parcel ID Number(s): 05844-004-004
6. Existing Use of Property: Vacant
7. Future Land Use Map Designation: Corporate Park District (CP)
8. Zoning Designation: Corporate Park District (CP)
9. Acreage: ±1.03 ac.
10. Total Existing Building Square Footage, if applicable: N/A
11. Total Existing Impervious Area (not including existing building area), if applicable: ±1,108 sf
12. Total Building Square Footage Proposed: ±11,300 sf
13. Total New Impervious Area Proposed (not including building area): ±17,025 sf

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ■ Agent
2. Name of Applicant(s) or Contact Person(s): Randall Olney, P.E. Title: Senior Director of Technical Operations
   Company (if applicable): NV5 Inc.
   Mailing address: 11801 Research Drive
   City: Alachua State: FL ZIP: 32615
   Telephone: (352) 331 - 1976 FAX: _____ e-mail: Randy.Olney@nv5.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): The Laser Investment Group, LLC
   Mailing Address: 13900 Tech City Circle, Suite 100
   City: Alachua State: FL ZIP: 32615

   ** Must provide an executed Authorized Agent Affidavit or other acceptable documentation (as deemed acceptable by the City in its sole discretion) authorizing the agent to act on behalf of the property owner.*

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ■ Yes ☐ No
   If yes, list names of all parties involved: Alachua County
2. Has the applicant discussed possible utility/infrastructure fees with the Public Services Department?

If no, contact the Public Services Department at 386-418-6140. ■ Yes ☐ No

D. ATTACHMENTS

1. Site Plan. Sheet size shall be 24" X 36" with a 3" left margin and ½" top, bottom, and right margin.

   Site Plan shall include:
   a. Name and location of project.
   b. Name and contact information (address, telephone, and email address) of property owner, developer (if applicable), and all professional consultants (i.e., landscape architect, photometric, electrical engineer, architect, etc.) for the project.
   c. Zoning of the subject property.
   d. Vicinity map - indicating general location of the site and major adjacent streets and all adjacent properties.
   e. Boundary and topographic survey. Survey shall be signed and sealed by the surveyor, and shall be no older than two (2) years.
   f. Complete legal description of the subject property.
   g. Statement of proposed uses.
   h. Location of the subject property in relation to adjacent properties.
   i. Date, north arrow, and graphic scale (not to exceed one (1) inch equal to 50 feet.)
   j. Area and dimensions of the subject property.
   k. Structures and major features – fully dimensioned – including setbacks from property lines and right-of-ways, distances between structures (if structures are within 25 feet of one another), floor area of each building, floor area ratio, and property lines.
   l. Location of all property lines, existing and proposed adjacent right-of-ways, sidewalks, curbs, and gutters.
   m. Distance between ingress and egress connections for the project and the ingress / egress connections for all contiguous properties and for properties on the opposite side of the road, measured from the interior radius of all ingress/egress connections.
   n. Location of all existing and proposed utilities (electric, potable water, sanitary sewer, gas, etc.) on the subject property, and on adjacent properties if located within 50 feet of the subject property, and within adjacent rights-of-way.
   o. Location of all existing and proposed fire hydrants.
   p. Location of all existing easements on the property and on adjacent properties if located within 50 feet of the subject property, and recording information for such easements.
   q. Location of all proposed easements (legal descriptions and sketches of all proposed easements shall be provided by the applicant following a review of proposed utility locations by Public Services).
   r. Location and dimensions of all existing and proposed vehicular parking spaces, dimensions of all drive aisles, and the angle of parking spaces.
   s. Location of all bicycle parking areas and specifications of bicycle racks.
   t. Location, dimensions, and vertical clearance of all off-street loading spaces, if required by Section 6.1 of the LDRs.
   u. Location and dimensions of all vehicle stacking spaces, if required by Section 6.1 of the LDRs.
   v. Vehicular parking calculations, indicating the minimum and maximum number of required spaces and the number of parking spaces provided (regular and accessible spaces) in accordance with Section 6.1 of the LDRs.
   w. Bicycle parking calculations, if required by Section 6.1 of the LDRs.
   x. Striping and signage for all traffic control devices.
   y. Landscape Plan, indicating the location, size, and design of required and proposed landscaped areas. Landscape Plans shall identify the following with sufficient detail and calculations to demonstrate compliance with Section 6.2.2 of the LDRs:
      i. Location, identification of the species, and size of all existing trees.
      ii. Required perimeter buffer areas.
      iii. Parking lot perimeter landscaping.
      iv. Parking lot interior landscaping.
      v. Building façade landscaping.
      vi. Calculation of landscaped areas (see Policy 2.4.a of the Comprehensive Plan Future Land Use Element).
      vii. Calculation of open space provided (see Section 6.7 of the LDRs).
      viii. Calculation of tree credits, if applicable. Calculations shall be as set forth in Sections 6.2.1(D)(4) and 6.2.2(D)(6) of the LDRs and shall be shown on the plan in tabular format (if tree credits are utilized, the Landscape Plan must identify in the landscape calculations where credit is applied).
      ix. Tree protection detail in accordance with Section 6.2.1(D)(2) of the LDRs.
      x. If tree removal is proposed, a tree survey, showing:
         (a) Each tree proposed for removal;
         (b) Each tree proposed for retention;
         (c) The size and species (both common and scientific names) of all trees proposed for removal/retention;

(d) Location, size, and species of all new trees proposed to meet mitigation requirements. Mitigation trees must be shown on the plans and a list of all mitigation trees and calculation of required mitigation must be provided on the plan in tabular format.

z. Location of waste receptacles and detail of waste receptacle screening, demonstrating compliance with Section 6.2.3(B) and, if within the Gateway Overlay District, with Section 3.7.2(C)(5)(c)(ii).

aa. Photometric Plan, demonstrating compliance with the applicable provisions of Section 6.4 of the LDRs.

bb. Location and size of any lakes, ponds, canals, or other waters and waterways, and required setbacks dimensioned on the plans from such waterways.

cc. For development consisting of a nonresidential use, except for single tenant retail sales and services uses greater than or equal to 20,000 square feet in area and except for use types within the industrial services, manufacturing and production, warehouse freight and movement, waste-related services, and wholesale sales use categories ***not*** located within 500 feet of the right-of-way of US Highway 441: Architectural plans demonstrating compliance with the design standards for business uses as provided in Section 6.8.2 of the LDRs. Architectural plans shall include:

i. Calculation of glazing of:
   (a) the front façade;
   (b) any facade facing a street;
   (c) any façade facing a publicly-accessible parking area which is a part of the development and consisting of 15 percent or more of the minimum off-street parking required by Section 6.1.4(B) of the LDRs; and,
   (d) any façade facing vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.

ii. Calculation of the area of all façades subject to glazing.

iii. Detail on the architectural plans depicting façade massing or a massing alternative as defined in Section 6.8.2(A)(2)(b).

iv. Identification of each material utilized in each façade and the percentage of the total area of the façade for each material used.

dd. For development consisting of a nonresidential use where a single retail services tenant is greater than or equal to 20,000 square feet in area: Architectural plans demonstrating compliance with the design standards for single tenant retail sales and service uses greater than or equal to 20,000 square feet in area as provided in Section 6.8.3 of the LDRs. Architectural plans shall include:

i. Color plans depicting the color of all materials used in the façade.

ii. Identification of each material utilized in each façade and the percentage of the total area of the façade for each material used.

iii. Calculation of glazing of:
   (a) the front façade;
   (b) any facade facing a street;
   (c) any façade facing a publicly-accessible parking area which is a part of the development and consisting of 15 percent or more of the minimum off-street parking required by Section 6.1.4(B) of the LDRs; and,
   (d) any façade facing vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.

iv. Calculation of the area of all façades subject to glazing.

v. If a glazing alternative as defined in Section 6.8.3(A)(2)(a)(iv) is used, calculation of area of alternative materials used or identification of other architectural features meeting the requirements of Section 6.8.3 of the LDRs.

vi. Detail on the architectural plans depicting façade massing or a massing alternative as defined in Section 6.8.2(A)(2)(b) of the LDRs.

ee. For development consisting multi-family residential uses and/or a mobile home park:

i. Gross acreage.

ii. Number of dwelling units proposed.

iii. Density.

iv. Location and percentage of total open space and recreation areas.

v. Floor area of each dwelling unit.

vi. Number of proposed parking spaces.

vii. Street layout, if applicable.

viii. Layout of mobile home stands (for mobile home parks only).

ix. City of Alachua Public School Student Generation Form.

2. Stormwater management plan - including the following:
   a. Plans showing existing contours at one (1) foot intervals based on U.S. Coastal and Geodetic Datum.
   b. Proposed finished floor elevation of all buildings.
   c. Existing and proposed stormwater management facilities with size and grades.
   d. Proposed orderly disposal of surface water runoff.
   e. Drainage calculations.

3. Fire Department Access and Water Supply Plan. All fire protection plans are subject to review and approval by the Alachua County Fire Marshal and City of Alachua Public Services Department. Fire Department Access and Water Supply Plan shall include:
   a. Plans prepared by a professional engineer licensed in the State of Florida.
   b. Fire flow calculations for each newly constructed building. Calculations shall be performed in accordance with Chapter 18, Section 18.4 of the Florida Fire Prevention Code.
   c. Documentation from the water purveyor stating the available flow to the subject property.

4. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools (if applicable) in accordance with Section 2.4.14 of the LDRs.

5. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy).

   For commercial/corporate park/industrial projects: In addition to submitting specific written information regarding the development's compliance with the relevant Goals, Objectives, and Policies of the City of Alachua Comprehensive Plan, a response to the design and performance standards as provided in Policy 1.3.d (for commercial projects), Policy 1.4.f (for corporate park projects), or Policy 1.5.d (for industrial projects) of the Future Land Use Element:

   The following criteria shall apply when evaluating commercial/corporate park/industrial development proposals:

   1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
   2. Buffering from adjacent existing/potential uses;
   3. Open space provisions and balance of proportion between gross floor area and site size;
   4. Adequacy of pervious surface area in terms of drainage requirements;
   5. Placement of signage;
   6. Adequacy of site lighting and intrusiveness of lighting upon the surrounding area;
   7. Safety of on-site circulation patterns (patron, employee and delivery vehicles), including parking layout and drive aisles, and points of conflict;
   8. Landscaping, as it relates to the requirements of the Comprehensive Plan and Land Development Regulations;
   9. Unique features and resources which may constrain site development, such as soils, existing vegetation and historic significance; and
   10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design.
   11. Commercial/Corporate Park/Industrial uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 10 acres or greater, 0.50 floor area ratio for parcels less than 10 acres but 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio to parcels 1 acre or less.
   12. Complementary residential uses (corporate park only).

6. *For Site Plans for Buildings Less than 80,000 Square Feet in Area:* One (1) set of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).
   For Site Plans for Buildings Greater than or Equal to 80,000 Square Feet in Area: Two (2) sets of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).

7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's LDRs;
   ii. Copy of written notice (letter) sent to all property owners within 400 feet and to all persons/organizations registered with the City to receive notice, and a copy of the mailing labels or a list of those who received written notice; and,
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

8. Legal description: (1) on 8.5" x 11" paper; and (2) electronic file in Word format.

9. Proof of ownership (i.e., copy of deed.)

10. Proof of payment of taxes.

11. Traffic Impact Analysis or Statement, as deemed applicable to the project by the City of Alachua in its sole discretion.

12. Environmental Assessment or Study, as deemed applicable to the project by the City of Alachua in its sole discretion.

13. Environmental Resource Permit (or Letter of Exemption) from the Suwannee River Water Management District (SRWMD) or Self-Certification for a Stormwater Management System in Uplands Serving Less than 10 Acres of Total Project Area and Less than 2 Acres of Impervious Surfaces from the Florida Department of Environmental Protection (FDEP) pursuant to Section 403.814(12), Florida Statutes (or documentation which shows a permit application/exemption/self-certification has been submitted to SRWMD or FDEP).

14. If access is from a County Road, access management permit from Alachua County Public Works (or documentation which shows a permit application has been submitted).

15. If access is from a State Road, access management permit from Florida Department of Transportation (or documentation which shows a permit application has been submitted).

16. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any costs associated with outside professional consulting services deemed necessary by the City in its sole discretion will be billed to the applicant at the rate of the consultant. The invoice for such services shall be paid in full prior to any public hearing(s) on the application.

All applicable attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

Under penalty of perjury, I/we certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

Warranty Deed

This Warranty Deed made this 17th day of **October, 2018** between **Phoenix Commercial Park, LLLP, a Florida limited liability limited partnership** whose post office address is **PO Box 1000, Alachua, FL 32616**, grantor, and **The Laser Investment Group, LLC, a Florida limited liability company** whose post office address is **3201 SW 42 Street, Suite 2, Gainesville, FL 32608**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Alachua County, Florida** to-wit:

A portion of Parcel A as recorded in Official Records Book 3527, Page 1217 of the Public Records of Alachua County, Florida being more particularly described as follows:

Commence at the Southeast corner of Section 20, Township 8 South, Range 19 East, Alachua County, Florida; thence West a distance of 1313.40 feet; thence North a distance of 218.99 feet to a point on the North right-of-way line of U.S. Highway No. 441 (200 foot right-of-way); thence North 72° 51' 47" West on said North right-of-way line a distance of 171.11 feet to the point of curvature of a curve concave to the Northeast having a delta of 06° 52' 05", a radius of 11424.66 feet and a chord bearing and distance of North 69° 24' 13" West, 1368.62 feet; thence Northwesterly on the arc of said curve a distance of 1369.44 feet; thence North 66° 00' 17" West, a distance of 58.98 feet to the Southeast corner of said Parcel A; thence on the boundary of said Parcel A the following seven (7) courses and distances:
1) leaving said North right-of-way line, North 23° 59' 25" East, a distance of 664.68 feet;
2) thence North 66° 04' 35" West, a distance of 265.85 feet;
3) thence North 24° 28' 46" East, a distance of 680.88 feet;
4) thence North 65° 49' 12" West, a distance of 500.01 feet to the POINT OF BEGINNING of the following described parcel of land;
5) thence North 24°11' 00" East, a distance of 870.43 feet to a point on the South right-of-way line of the Seaboard Coast Line Railroad (200' right-of-way);
6) thence North 58° 45' 42" West, on said South right-of-way line, a distance of 881.26 feet;
7) thence South 23° 50' 23" West, a distance of 1504.88 feet; thence leaving said boundary South 65° 30' 13" East, a distance of 699.02 feet; thence North 24° 02' 31" East, a distance of 530.00 feet to a point on the Northwesterly projection of the boundary of said Parcel A; thence South 65° 49' 12" East on said Northwesterly projection, a distance of 167.86 feet to the POINT OF BEGINNING.

Parcel Identification Number: 05855-004-000 and 05855-005-000

A Legal Description Sketch prepared by EDA Engineers-Surveyors-Planners, Inc. is attached as Exhibit A and incorporated by reference.

DoubleTime®

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2017**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Live Oak, FL 32060

Subject: Tech City Fire Station
Letter of Modification to Permit No. 232301-4

Dear Staff:

Please accept this letter of modification for the above-mentioned project.

The Tech City Fire Station is located within a ±1.03 ac. parcel off of NW 86th Dr. in Alachua, FL. The project site is located within the Tech City master development, previously permitted and last modified with SRWMD under ERP #232301-4. The drainage calculations associated with the ERP #232301-3 permit from 2019 allocate 590,736 sf of impervious area within the Post Drainage Area-3A basin and 84,416 sf of impervious area in Post Drainage Area-3B.

Phase 5 of the Tech City development is currently under review with the water management district and proposes a total of 411,152 sf of impervious area in Drainage Area 3. Drainage Area 3 is the combination of Post Drainage Areas 3A and 3B from the ERP #232301-3 with a combined total of 675,152 sf of allowed impervious area. Should Phase 5 be approved, 411,152 sf of impervious area would be proposed and 264,000 sf of impervious area would be the remaining allowed impervious area.

This project proposes the construction of a fire station. The project proposes ±1,108 sq. ft. of impervious area to be demolished. In the post-development condition, the project areas will contain ±28,325 sq. ft. of proposed impervious area, resulting in a net addition of ±27,217 sq. ft. of impervious area.

The construction of the fire station will bring Drainage Area 3 new impervious total to ±438,369 sq. ft. at the completion of this project. Therefore, since the net proposed impervious area is less than the permitted 675,152 sq. ft. of impervious area, the project is compliant with the previous permit.

	Impervious Area (sf)				
Drainage Area	Phase 5 (under SRWMD review) Proposed Total	Project Proposed	Total Proposed	Allowed	Remaining
3	411,152	27,217	438,369	675,152	236,783

Please refer to the attached exhibits for further details. We trust that you will find this application complete and sufficient for review and approval of a permit modification of the latest sequence. Should you have any questions, please feel free to contact me at (352) 331-1976 or via email at Gabriela.Ledford@nv5.com.

9.1.6.7 FHWA Inlet and Access Hole Energy Loss

Other FHWA research has produced other approaches for estimating inlet and access hole energy losses to improve on the Approximate Method (Chang and Kilgore 1989, Chang et al. 1994, Kilgore 2006, Kerenyi et al. 2006). These also have limitations, some shared with the Approximate Method, including:

Table 7-5. Head Loss Coefficients.

MEMORANDUM

To:	Utility Review	**Date:**	December 9, 2025
From:	Gabriela Ledford, P.E.	**Project:**	Tech City Fire Station
CC:	Randall Olney, P.E.		
Subject:	Meter Sizing Calculations		

The following is a calculation for meter sizing for the proposed project based on the AWWA M22 Manual.

Building data is based on the information available from the project architect at the time of this memo. Any changes to the building data will void the provided meter sizing calculation and requires a revised analysis to verify calculations are compliant with AWWA criteria.

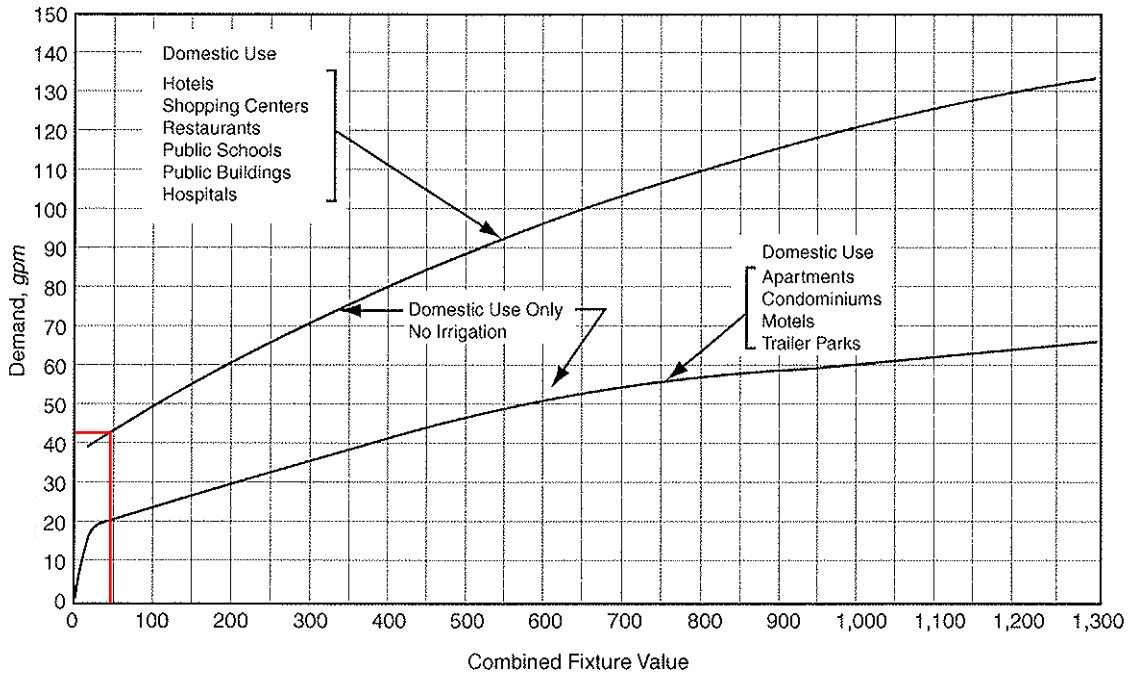

Figure 4-2 Water-flow demand per fixture value—enlarged scale from Figure 4-1

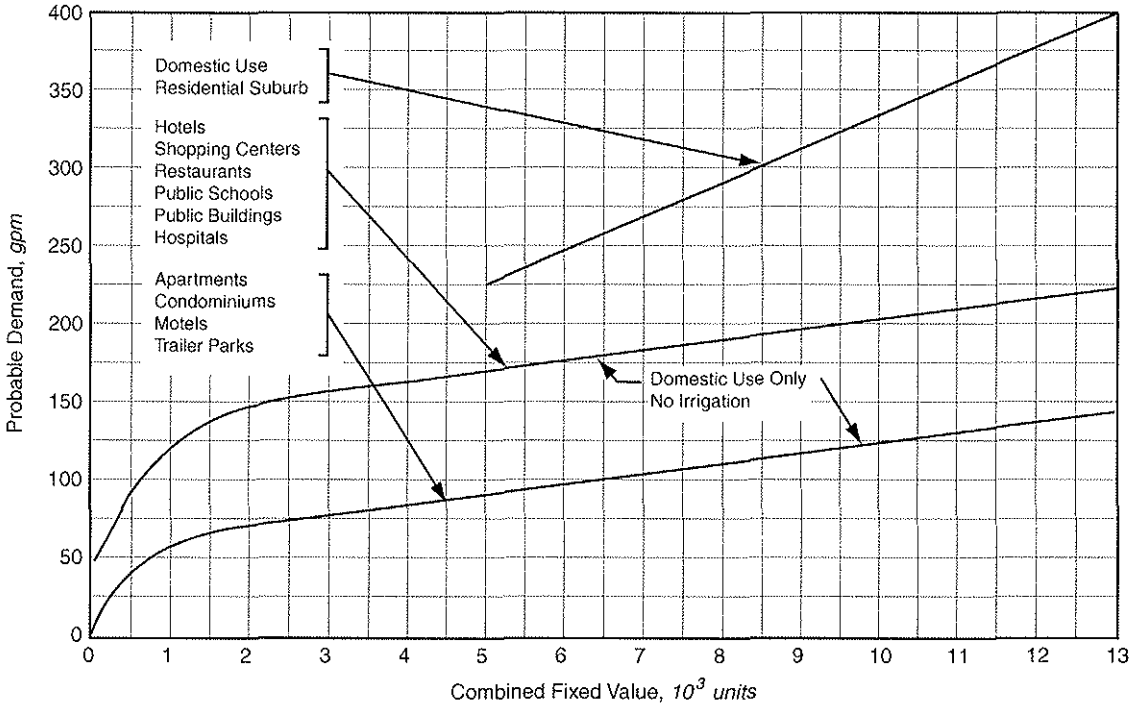

Figure 4-3 Water flow demand per fixture value—high range

applied to a graph that compensates for a reduced average fixture demand as the number of fixtures increases. This general procedure is followed in this chapter, with the exception of the means of establishing the values.

Pressure adjustment. Because the pressure that is available at the fixture influences flows in fixtures that do not have a pressure-reducing valve, it is necessary to establish a base pressure for estimating fixture flows. The increase in flow through plastic garden hoses caused by pressure changes is readily seen in Figure 4-6. Utilities generally design from a minimum pressure at the outlet of the meter; therefore, this location was selected. All calculations in the current version are made on the base pressure of 60 psi at the meter outlet, and pressure adjustment factors are included in Table 4-1 to assist the estimator in adjusting data from the graphs to the standard minimum delivery pressure of the estimator's utility.

Fixture values. As defined in the 1975 M22, a fixture value (as opposed to a fixture "unit" used by Hunter) is simply the best estimate of the peak instantaneous demand of a given fixture or appliance, depending on circumstances and based on the actual conditions at its point of use. This parameter was arbitrarily chosen to serve as a simple variable against which measured peak demands could be plotted in order to develop demand probability curves. Some suggested fixture values are provided in Table 4-2. Fixture values represent the peak flow in gallons per minute of each fixture or appliance when it is operated without the interference of other fixtures at 60 psi (414 kPa). The user is reminded that these are only suggested values for domestic-type uses with 1/2-in. (13 mm) connections, and that actual demands for the fixtures and appliances being used in the proposed building should take preference. For example, the suggested shower value is 2.5 gpm (0.57 m^3/hr) and the bathtub flow rate is 8 gpm (1.8 m^3/hr). If the actual showers and baths being used have flow rates greater or less than these rates, then the actual values, not the values from Table 4-2, should be used. It is especially important to consider actual values in commercial, industrial, or institutional buildings and in cases where connections larger than 1/2-in. (13 mm) are used. Values for fixtures or appliances not listed in Table 4-2 should be obtained from the manufacturer.

Table 4-1 Pressure adjustment factors*

Working Pressure at Meter Discharge (*psi*)	Average Flow from 50 ft of 5/8-in. Hose and Sprinkler (*gpm*)	Pressure Adjustment Factor
35	6.7	0.74
40	7.2	0.80
50	8.1	0.90
60	9.0	1.00
70	9.8	1.09
80	10.5	1.17
90	11.2	1.25
100	12.1	1.34

*derived from Table 4-1 and 4-2 of Manual M22 (1975).

NOTE: To convert psi to kPa: psi × 6.89476; to convert gpm to m^3/hr: gpm × 0.227.

MEMORANDUM

To:	City of Alachua Utility Review	**Date:**	12/18/25
From:	Gabriela Ledford, P.E.	**Project:**	Tech City Fire Station
CC:	Randall Olney, P.E.		
Subject:	Required Fire Flow		

Comments:

The following is a calculation for required fire flow for the proposed project based on the most recent edition of NFPA 1: Fire Code.

Building data is based on the information available from the project architect at the time of this memo. Any changes to the building data will void the provided fire flow calculation and requires a revised analysis to verify the building complies with the applicable fire protection criteria.

NFPA Calculations:

Building: **Business, Storage, Residential**
Construction Type: II-B (000)
Max. Fire Flow Area: ±11,299 SF

Required Fire Flow for Florida Fire Prevention Code Table 18.4.5.1.2: 2,250 gpm

Per NFPA 1, 18.4.5.2.1, a reduction in required fire flow of 75% shall be permitted when the building is protected throughout by an approved automatic sprinkler system. The resulting fire flow shall not be less than 1,000 gpm.

Required Fire Flow with automatic sprinkler system reduction: 2,250 gpm – 75% = 562.5 gpm

Conclusions

Minimum Required Fire Flow to be provided: **1,000 gpm**

Available Fire Flow per Fire Hydrant Flow Test: **984.7 gpm @ 20 psi**

The available fire flow is below the required minimum fire flow. Therefore, the building's fire protection system may need booster pumps to compensate for the flows below the required minimum.

Gabriela Raquel Ledford
State of Florida, Professional Engineer, License No. 102134

This item has been digitally signed and sealed by Gabriela Raquel Ledford, PE on the date indicated here.

Flow Graph

Created with the free hydrant flow test program from www.igneusinc.com

18.4.5.2.1

Fire flow and flow duration for dwellings having a fire flow area in excess of 5000 ft^2 (464.5 m^2) shall not be less than that specified in Table 18.4.5.2.1.

Table 18.4.5.2.1 Minimum Required Fire Flow and Flow Duration for Buildings

Fire Flow Area ft^2 (× 0.0929 for m^2)					Fire Flow gpm† (× 3.785 for L/min)	Flow Duration (hours)

SUWANNEE RIVER
WATER MANAGEMENT DISTRICT

Minor Modification

PERMITTEE:
Mitch Glaeser
The Laser Investment Group, LLC
13900 Tech City Cir
Ste 100
Alachua, FL 32615

PERMIT NUMBER: ERP-001-232301-6
DATE ISSUED: January 29, 2026
DATE EXPIRES: January 29, 2031
COUNTY: Alachua
TRS: S20 T8S R19E

PROJECT: San Felasco Tech City Fire Station

Upon completion, the approved entity to which operation and maintenance may be transferred pursuant to rule 62-330.310 and 62-330.340 or 40B-4.1130, Florida Administrative Code (F.A.C) shall be:

Mitch Glaeser
The Laser Investment Group, LLC
13900 Tech City Cir
Ste 100
Alachua, FL 32615

Based on the information provided to the Suwannee River Water Management District (District), the subject proposed project has met the conditions of issuance as found in subsection 62-330.301, subsections 62-330.407 through 62-330.635, or subsection 40B-4.3030, F.A.C. The permit is hereby in effect for the activity description below:

The previous master permit (ERP-001-232301-3) authorized construction, operation, and maintenance of a stormwater management system serving a total of 41.45 acres of impervious surfaces on a total project area of 78.73 acres. This minor modification is for the construction of 0.62 acres of impervious area on a total project area of 1.03 acres previously authorized under ERP-001-232301-3. The design engineer has certified the proposed conditions do not exceed the allowable conditions of the master system. The project shall be constructed in accordance with the plans certified by Randall Scott Olney, P.E., of NV5, and calculations certified by Gabriela Ledford, P.E., NV5 on or before January 29, 2026.

The permittee shall adhere to all permit conditions and/or requirements as well as perform any required reporting, monitoring, or inspections in accordance with the original permit.

This authorization does not exempt you from obtaining permits from any other regulatory agency. Any modifications to the authorized plans shall require reconsideration by the District prior to commencement of construction.

Approved By: Zach Sullivan, P.E.

NEIGHBORHOOD MEETING PUBLIC NOTICE

Tech City Fire Station

24-0272

To:	Neighbors of NW 86th Drive, Alachua, Florida
From:	Gabriela Ledford, PE
Date:	Tuesday, November 18, 2025
RE:	Tech City Fire Station – Neighborhood Meeting Public Notice

A Neighborhood Meeting will be held to discuss a Site Plan application for an ±11,500-square-foot fire station on ±1.03-acres of Alachua County Tax Parcel #05844-004-004. The Site Plan application will include associated bays, utility, and stormwater connections.

The property is located in the City of Alachua. The Future Land Use (FLU) classification is Corporate Park and the property's zoning district is Corporate Park (CP).

The property is located within the San Felasco Tech City mixed use community, east of NW 86th Drive.

Date:	Monday, December 8, 2025
Time:	6:00 PM
Location:	NV5 Office, 11801 Research Drive, Alachua, FL, 32615

Contact:
Gabriela Ledford, PE
(352)-331-1976
11801 Research Drive,
Alachua, FL 32615
Gabriela.Ledford@NV5.com

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposal and seek their comments.

If you are unable to attend the meeting, please contact NV5 using the information above and we will provide materials after the meeting is held. Comments may also be submitted in writing to the address or email above or by phone at the phone number above.

PUBLIC NOTICE

A Neighborhood Meeting will be held to discuss a Site Plan application for an ±11,500-square-foot fire station on ±1.03-acres of Alachua County Tax Parcel #05844-004-004. The Site Plan application will include associated bays, utility, and stormwater connections.

The property is located in the City of Alachua. The Future Land Use (FLU) classification is Corporate Park and the property's zoning district is Corporate Park (CP).

The property is located within the San Felasco Tech City mixed use community, east of NW 86th Drive.

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposals and seek their comments.

Infinity Con celebrates all things pop culture

Elliot Tritto

PHOTOS BY ALAN YOUNGBLOOD/GAINESVILLE SUN

Gainesville residents in the fall flock to familiar events like The Fest, Tom Petty Weekend, the Downtown Festival & Art Show, and Gator football games. But another new tradition is carving out its own space for fans of comics, gaming and pop culture: Infinity Con.

Held Nov. 15–16 at the Alachua County Sports and Events Center, the convention offered guests a chance to browse vendor booths, join or watch costume contests, play video and board games, and much more.

David Heringer, owner and director of immersive events for Infinity Con, said this year's event marks the convention's first "real" year in Gainesville after hurricane-related setbacks last year. Founded in Lake City in 2014, Infinity Con later expanded to Tallahassee in 2019 before finding a home in Gainesville.

"So, I was glad to be able to get back in here and really get it set up and bring more of the event that I really wanted to do for Gainesville," Heringer said.

Infinity Con attendees encountered numerous characters roaming the main floor, including Batman, manga and anime character Chainsaw Man, and several heroes and villains from "Star Wars."

Dressed as rebel alliance X-Wing pilot Wedge Antilles, David Sollberger said he is a part of the Rebel Legion, one of several different "Star Wars" costuming organizations who joined "forces" to bring several volunteers and props to Infinity Con.

Sollberger, who was attending his first Infinity Con, said he joined Rebel Legion in 2019 and has been a fan of "Star Wars" since first seeing the original film in theaters in 1977.

"Most of the time, I do children's hospitals, autistic events, non-profit things, cancer research funding events. That's really what we do is do charity work to raise money or awareness," Sollberger said.

Another highlight was The Fallout Xperience, an attraction inspired by the popular video game series. Guests toured a post-apocalyptic vault filled with props like Nuka-Cola bottles, a Mr. Handy robot, and a 3D-printed Deathclaw or "genetically engineered reptilian creature."

Infinity Con also featured artist Christopher Burdett, known for his work on "Buffy the Vampire Slayer," "Angel," and "Firefly." Burdett now creates monsters for tabletop games like Dungeons & Dragons and Magic: The Gathering.

Chainsaw Man was popular during Infinity Con at the Alachua County Sports and Events Center in Gainesville.

Autumn gives a tour of the Fallout Xperience during Infinity Con at the Alachua County Sports and Events Center.

A giant 3-D printed monster awaits visitors in the Fallout Experience during Infinity Con at the Alachua County Sports and Event Center on Nov. 15. The two-day event featured fantasy characters, displays, gaming, recreations of characters from anime and video games.

Rev. Jesse Jackson in stable condition

Remains hospitalized for observation

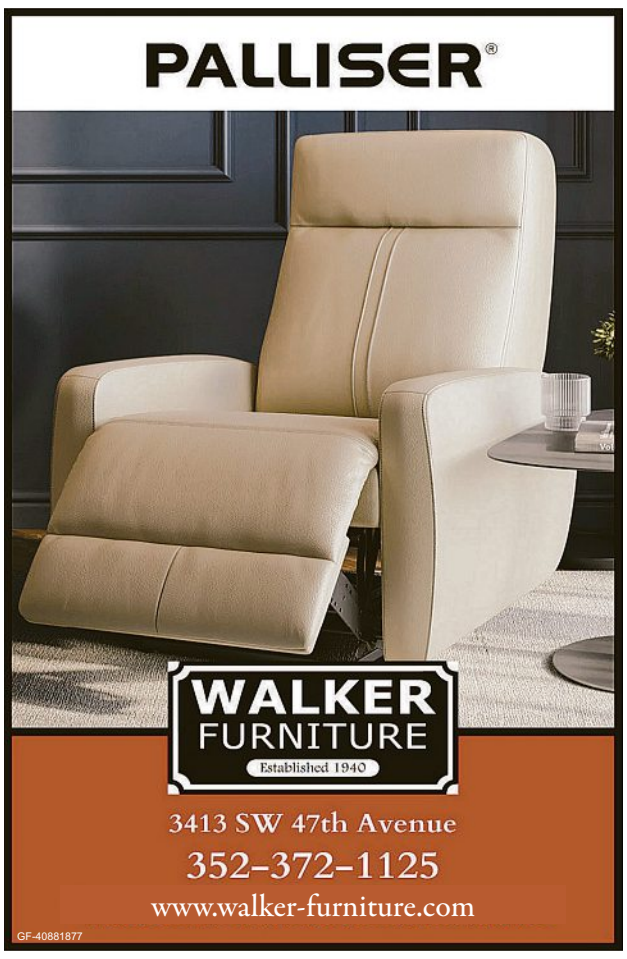
Melina Khan
USA TODAY

The Rev. Jesse Jackson Sr. is in stable condition despite remaining hospitalized, his family said in a statement on Nov. 16.

Jackson, 84, was admitted to a hospital on Nov. 12 under observation for progressive supranuclear palsy, the Rainbow PUSH Coalition, his civil rights organization, said in a statement.

In the Nov. 16 statement, Jackson's family dispelled reports that the civil rights leader is on life support and confirmed that he is breathing without the assistance of machines at Northwestern Memorial Hospital in Chicago.

"In fact, today he called for 2,000 churches to prepare 2,000 baskets of food to prevent malnutrition during the holiday season," said his son, Yusef Jackson.



Jesse Jackson, an ordained Baptist minister, was a prominent voice in the 1960s civil rights movement and former protégé of the Rev. Dr. Martin Luther King Jr. He had two unsuccessful bids for the Democratic presidential nomination, in 1984 and 1988, and formed the civil rights organizations Operation PUSH and the Rainbow Coalition, which later merged.

In 2017, Jackson announced that he had been diagnosed with Parkinson's disease two years earlier. But his diagnosis was confirmed to be progressive supranuclear palsy last April, the Rainbow PUSH Coalition said.

Progressive supranuclear palsy, or PSP, is a rare neurological disorder that affects body movements, walking and balance, and eye movements, according to the National Institute of Neurological Disorders and Stroke.

While different from Parkinson's disease, some of their symptoms are similar. PSP typically begins later than when Parkinson's disease symptoms develop.

PSP usually worsens rapidly and can lead to serious complications such as pneumonia, choking or head injuries from falls, according to NINDS.

Tech City Fire Station

Site Plan Application

City of Alachua
Neighborhood Meeting
December 8th, 2025

NV5

PN: 24-0272

TYPE OF APPLICATIONS:

- **Site Plan**

APPLICATION INTENT:

- **To support the community by proposing a ±11,300-square-foot fire station with stormwater infrastructure, parking, and associated utility infrastructure.**

The purpose of a Neighborhood Meeting:

The City of Alachua requires Site Plan applicants to host a neighborhood meeting prior to application submittal.

The purpose is **to inform neighbors** of the proposed action's nature.

This meeting provides an opportunity to **ask questions and learn information** regarding the application purpose.

PUBLIC NOTIFICATION

- Notification letters were sent out to property owners and current residents within a 400-foot radius of the subject property. Additionally, letters were sent out to the addresses on the Public Notification Lists for Neighborhood Meetings.

NV5 (Agent) Attendees: Gabriela Ledford, PE; Randy Olney, PE, MBA; Romy Garraud
Public Attendees: 1

NV5, on behalf The Lunz Group, hosted the required Neighborhood Meeting and presented the following: the meeting's purpose; the application's request and intent; maps illustrating the site's regulatory and physical characteristics; and site plan. One (1) member of the public, Jeff Taylor, MBA, EFO (Deputy Chief, Alachua County Fire Rescue), attended the meeting. Deputy Chief Taylor did not express any questions or concerns regarding the project. He engaged in a brief, conversational discussion with NV5 representatives, but no issues were raised.

The meeting was adjourned at approximately 6:30 PM.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

Tech City Fire Station

(24-0272)

To:	Bryan Thomas, AICP, CPM, City of Alachua Planning & Community Dev. Director
From:	Gabriela Ledford, P.E.
Date:	December 18, 2025
RE:	Tech City Fire Station – Comprehensive Plan Consistency Analysis

This Comprehensive Plan Consistency Analysis is submitted for Tech City Fire Station Site Plan Application. The proposed use is a ±11,300-square-foot fire station with stormwater infrastructure, parking, and associated utility infrastructure. The project area includes ±1.03-acres of Alachua County Tax Parcel 05844-004-004. The development area is located within the San Felasco Tech City mixed use community. The site has a Corporate Park Future Land Use (FLU) classification and a Corporate Park (CP) Zoning designation.

The following identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this application is consistent with each. Comprehensive Plan text is provided in normal font, while consistency statements are provided in **bold**.

Future Land Use Element

Objective 1.4: Corporate Park

The City shall establish Corporate Park as a mixed-use land use category. This land use category shall provide a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. The Corporate Park category is intended to:

1. Provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology, with provisions for a variety of residential uses; and,
2. Provide a variety of employment opportunities to the citizens of Alachua and the North Central Florida Region.

This application proposes the development of a fire station within the San Felasco Tech City mixed use community. This fire station will act as a replacement to Alachua County Fire Rescue Station 25, which is currently located near the project site, along US Highway 441. San Felasco Tech City is designed as a live, work, play community that integrates office spaces, commercial areas, restaurants, a weekly farmers market, residential units, and supporting amenities. The proposed fire station will serve the residents and businesses in Tech City and the surrounding Alachua community, ensuring safety and emergency response capabilities. Additionally, the fire station will gradually provide employment opportunities for residents of Alachua and North Central Florida as positions become available. This facility will provide essential community services while supporting the Corporate Park FLU.

Policy 1.4.a: The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential, live-work units, building industry uses, and accessory storage facilities (including outdoor storage yards) either as allowed uses or

with a special exception permit. Such uses shall be developed in a manner compatible with surrounding land uses, and to minimize potential nuisances or damage to the environment.

The proposed fire station is consistent with the Corporate Park FLU as it will support the safety of the surrounding office and business park, that is Tech City.

Policy 1.4.c: Non-residential Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio (F.A.R.) for parcels 5 acres or greater, 0.75 F.A.R. for parcels less than 5 acres but greater than 1 acre, and 1.0 F.A.R. for parcels 1 acre or less.

The proposed fire station will be ±11,300-square-feet on a tax parcel that is ±1.03-acres. Therefore, the F.A.R. of the site will be 0.25, which is less than the maximum permitted for a parcel that is less than 5 acres but greater than 1 acre.

Policy 1.4.f: The City shall develop performance standards for uses in the Corporate Park land use category in order to address the following:

1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;

Vehicular and pedestrian site access, including cross access, will be integrated into the site plan design.

2. Buffering from adjacent existing/potential uses and use of landscaping to create an integrated design;

Landscaping will be used to create an adequate buffer from adjacent uses for an integrated design. Specifically, perimeter buffer landscaping will be incorporated into the site design, along the northern, southern, and eastern perimeter. Detailed landscaping plans will be submitted with the site plans.

3. Open space provisions and balance of proportion between gross floor area and site size;

10% of the gross site area will be dedicated to open space.

4. Adequacy of pervious surface area in terms of drainage requirements;

The site will connect to existing stormwater management facilities, ensuring adequate pervious surface areas that meet the drainage requirements.

5. Placement of signage;

Signage, if proposed, will be addressed as an independent permit with the City of Alachua.

6. Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;

Site lighting will abide by the standards set in Section 6.4. of the Land Development Regulations.

7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout and drive aisles, and points of conflict;

On-site circulation patterns, including parking layout, drive aisles, and points of conflict, will meet safety requirements.

8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;

Landscaping on site will abide by the goals of the Comprehensive Plan and requirements of the Land Development Regulations.

9. Unique site features and resources which may constrain site development, such as soils, existing vegetation and historic significance;

There are no unique site features such as existing vegetation or elements of historic significance and onsite soils are suitable for development.

10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design;

Not applicable.

11. Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less; and,

The proposed fire station will be ±11,300-square-feet on a tax parcel that is ±1.03-acres. Therefore, the F.A.R. of the site will be 0.25, which is less than the maximum permitted for a parcel that is less than 5 acres but greater than 1 acre.

12. Complementary residential uses

The fire station will serve the surrounding residential homes in Tech City, as well as residential homes in the City of Alachua.

Objective 2.4: Landscaping and Tree Protection Standards

The City shall adopt landscaping and tree protection standards in order to achieve the aesthetic design values of the community and preserve tree canopies, as well as to protect exceptional specimens and champion trees.

Development on the site will comply with the landscaping standards in the Comprehensive Plan. The tree protection standards are not applicable, as there are currently no trees on the site.

Policy 2.4.a: Landscaping: General – The City shall require landscaping plans to be submitted with each nonresidential and multiple family residential site plan. The minimum landscaped area shall be 10% of the development site, not inclusive of any designated open space areas. Landscaping designs shall incorporate principles of xeriscaping, where feasible. The City shall develop a list of preferred planting materials to assist in the landscape design. Landscape plans shall include perimeter and internal site landscaping.

The Site Plan will include landscaping plans that show 10% of the site as dedicated to landscaping.

Policy 2.4.b: Landscaping: Buffering – A buffer consists of horizontal space (land) and vertical elements (plants, berms, fences, walls) that physically separate and visually screen adjacent land uses. The City shall establish buffer yard requirements that are based on the compatibility of the adjacent uses and the desired result of the buffer.

Landscape buffering will be incorporated into the site design. Detailed landscape plans illustrating where landscape buffers will be placed are included in this application submittal.

Policy 2.4.c: Tree Protection: Heritage Trees and Champion Trees – The City shall require the preservation of heritage trees and champion trees when possible. Standards shall be set for determining the health and safety risks associated with heritage and champion trees both on individual residential lots, and existing and proposed developments.

There are currently no trees on the site, meaning there will be no impact to Heritage or Champion Trees.

Policy 2.4.d: Tree Protection: Regulated Trees – The City shall establish standards for the preservation of regulated trees. Particular attention shall be given to preserving specimen and preferred species of regulated trees, where feasible.

The proposed development will ensure the protection of any regulated trees. Currently, there are no trees on the site.

Policy 2.4.e: Tree Protection: Removal and Mitigation – Along with establishing standards for tree removal and mitigation, the City shall establish a tree banking program to provide flexibility for re-planting trees through the mitigation process. Funds within the tree bank may be utilized to plant landscaping on city-owned properties, in public parks, and in road rights of way, where appropriate.

The proposed development will adhere to the City's removal and mitigation standards. Currently, there are no trees on the site.

Objective 2.5: Open Space Standards

The City shall utilize open space requirements to preserve the rural character of Alachua, protect natural resources, and provide spaces for people to recreate and gather.

Development on the site will adhere to the City's open space requirements.

Policy 2.5.a: There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.

The site will contain a minimum of 10% open space.

Policy 2.5.b: Open space shall not be limited to unusable portions of project sites. A portion of open space shall be usable and functional.

Open space on the project site will be usable and functional.

Goal 5: Development Standards

The City shall include provisions through its Comprehensive Plan amendment process, development review process and in its Land Development Regulations for development standards that address natural features and availability of facilities and services. These development standards will strive to protect natural resources and public facility resources while allowing for innovative and flexible development patterns.

The fire station will serve as a vital community service, supporting the residents and businesses of Tech City. Development will be carried out in a manner that safeguards natural resources and public facilities.

Objective 5.1: Natural Features

The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process

The site's natural topography and soils will be conducive to the development. There are no wetlands or FEMA floodplains on-site.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

The fire station design minimizes impacts to the site's natural topography. Development techniques will be used to minimize these impacts, and a retention pond exists near the site to collect any excess water from the site.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently 2 types of soil located on the site:

- **Fort Meade fine sand, 0-5% slopes (Hydro Group: A)**
- **Millhopper sand, 0-5% slopes (Hydro Group: A)**

Both of the soil types mentioned above are conducive to development.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

There are no FEMA flood prone areas on the site.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

There are no wetlands located on-site. Please see the Boundary and Topographic Survey for verification.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

The site is considered an infill development and is located within an area that does not contain a known habitat for listed species. Based on a review of available data and site conditions, no listed species are present on the property. However, this site is part of the Tech City Master Plan, and when the Master Plan was undergoing regulatory review a listed species list may have been conducted.

Goal 9: Water and Wastewater Service

The City will ensure that new development and redevelopment within the corporate limits shall connect to the City's potable water and wastewater systems, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the Comprehensive Plan.

A Concurrency Analysis Impact report, included in this submittal, will include the projected potable water impact, project sanitary sewer impact, and projected solid waste impact. The fire station will connect to the City's potable water and wastewater systems.

Objective 9.1: Connections to Water and Wastewater Systems

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

The fire station will connect to the City's potable water and wastewater utilities. Projected impacts of potable water, sanitary sewer, and solid waste are included in the Concurrency Impact Analysis report.

<u>Transportation Element</u>

Objective 1.1: Level of Service

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems

Policy 1.1a: The City shall establish and maintain the Level of Service Standards, as noted below, at the PM peak hour for the following roadway segments within the City.

Segment Number	Segment Description	Lanes	Functional Classification	Area Type	Adopted LOS Standard
4	US 441 (From CR 25A East Intersection to SR 235)	4/D	Principle Arterial	Urban Trans	D

The Concurrency Analysis Impact report includes the projected trip generation and projected impacts on the road segment affected by this development (CR 25A East Intersection to SR 235).
The proposed development supports safe, convenient, and efficient level of service standards for motorized and non-motorized transportation systems across the project site and surrounding area. Future use of the site for a fire station (Institute of Transportation Engineers (ITE) Land Use Code 575) will not result in a degradation of the City's transportation Level of Service (LOS) standards, as demonstrated in the trip generation map, located in the Concurrency Impact Analysis Report submitted with this application.

Objective 1.3: Parking

> The City shall require innovative parking lot design for multiple-family and nonresidential developments, including the provision of bicycle parking, pedestrian friendly design, and landscaping.

The development of the site will include landscaping and incorporate a pedestrian friendly design.

Policy 1.3.d: The City shall require landscaping within parking areas, with an emphasis on canopy trees. The City shall consider establishing incentives for landscaping in excess of minimum standards.

The fire station parking area will contain perimeter and interior landscaping, containing canopy and understory trees, as well as shrubs. For more information regarding the type of landscaping that will be provided please view the Landscape Details and Specifications sheet that is part of this submittal package.

Policy 1.3.e: The City shall establish standards for parking facility design that adequately separates pedestrians from vehicular traffic and delineates pedestrian crossing zones.

Pedestrians and traffic are adequately separated, and pedestrian crossing zones are delineated.

Policy 1.3.f: The City shall establish bicycle parking facility standards based on type of use within developments.

According to the City of Alachua's Land Development Code (Sec. 6.1.4 (D)), bicycle parking is required for a development with 50 or more parking spaces. The proposed fire station will have 10 parking spaces and one (1) ADA compliant parking space.

Policy 1.3.g: The City shall require spaces to accommodate persons with physical disabilities as required by the Americans with Disabilities Act.

The parking area will be ADA compliant. There will be one (1) ADA parking space on the site.

Objective 1.4: Bicycle and Pedestrian Standards

The City shall work to develop a network of bicycle, pedestrian, and other multimodal (non-vehicular) facilities which connect all areas of the City.

A sidewalk and road will connect the development and the rest of Tech City, allowing pedestrians, bicyclists, and other non-vehicular users to reach the proposed fire station.

Policy 1.4.a: The City shall require any development which must obtain site plan or subdivision approval to provide additional right-of-way width for bicycle and pedestrian ways along all proposed collector and arterial streets.

No new roads will be proposed.

Policy 1.4.d: The City shall require pedestrian paths within subdivisions and within new developments to be connected to paths outside the development.

There will be a sidewalk from the proposed fire station that connects to paths outside of the development. A sidewalk will be constructed from the proposed fire station to establish a direct connection with pedestrian pathways beyond the development.

Policy 1.5.c: The City shall require new development and redevelopment which is compatible with an adjacent existing development(s) to interconnect with existing development(s) through one or more of the following methods:

1. Through the extension of a public or private street from the new development to the adjacent existing development or adjacent lands; and/or,
2. Through joint use of driveways and cross access agreements among adjoining properties to allow circulation between sites. Cross access between new development and existing development shall be configured to provide safe and convenient interconnectivity between the new development and all other existing development located along the cross access corridor.

The fire station will connect to the adjacent development via NW 86th Drive and provide cross-access to the adjacent parcel.

Policy 1.5.d The City shall require new developments which are compatible with adjacent existing development to interconnect with adjacent lands through one or more of the following methods:

1. Through the extension of a sidewalk from the new development to the adjacent existing development or adjacent lands; and/or,
2. Through the extension of a multi-purpose trail from the new development to the adjacent existing development or adjacent lands.

A sidewalk will connect the proposed fire station to the adjacent existing development.

Community Facilities Element

Objective 4.1: Water System Level of Service Standards

Achieve and maintain acceptable levels of service for potable water quantity and quality.

Acceptable levels of service for water on site will be achieved and maintained. The site is projected to utilize 1,695 gallons of potable water a day, leaving the City with a residual capacity of 394,306 gallons of potable water per day.

Policy 4.1.c: The City establishes the following level of service standards for potable water:

2. Quantity: System-wide potable water distribution and treatment will be sufficient to provide a minimum of 275 gallons per day per equivalent residential unit (ERU) on an average annual basis.

Per the current City of Alachua Development Monitoring Report, there is residual capacity for existing Potable Water facilities. The accompanying Concurrency Impact Analysis demonstrates facility demands resulting from the proposed nonresidential use will not exceed this residual capacity.

Objective 5.1: Protection of High Aquifer Recharge Areas and Water Bodies

The City recognizes the importance of the protection of high aquifer recharge areas, wellfield protection areas, lakes, streams, drainage basins, wetlands and stream-to-sink features as vital to the protection of groundwater resources. The City shall, through partnerships and using the best available data, provide protection for groundwater resources.

There are no wetlands located on-site. Please see the Boundary and Topographic Survey for verification.

Policy 5.1.a: The City shall consider the best available hydrogeological information (e.g, Suwannee River Water Management District high aquifer recharge potential maps or site-specific data), and may require the collection of site-specific hydrogeological data, such as soil borings or electric resistivity tests, when assessing the impacts of proposed land use changes and developments in areas of high aquifer recharge potential. This information should be used in the determination of land use decisions on a case-by-case basis.

Certified geotechnical engineers performed soil borings, observed water table elevations in the soil borings, and estimated the seasonal high water table.

<u>Conservation and Open Space Element</u>

Objective 1.5: Soils

The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

Adherence to proper design criteria ensures soil resources are protected on the project site and adjacent lands. The site is primarily composed of Millhopper sand, with 0 to 5 percent Slopes (Hydro Group: A) and partially composed of Fort Meade fine sand with 0 to 5 percent slopes (Hydro Group: A). According to the NRCS soil database, these soil types are conducive to the proposed development, which is also demonstrated on surrounding sites with similar uses and soil types.

Policy 1.5.a: The City shall ensure soil protection and intervention measures are included in the development review process.

Coordination with the City throughout the development review process ensures soil protection and intervention measures are utilized to manage on-site and surrounding conditions. Temporary seed and mulch will be utilized to control on-site erosion, and sediment barriers will be employed to prevent off-site discharge of sediments. Sediment and erosion controls will be placed prior to site excavation and will remain in place until site vegetation is established and landscaping is complete. More information regarding soil protection and intervention is included in the construction plans.

Date:	~~December 18, 2025~~ RESUBMITTED February 4, 2026
RE:	Tech City Fire Station – Concurrency Impact Analysis

This Concurrency Analysis is submitted for Tech City Fire Station Site Plan Application. The proposed use is an ±11,300-square-foot fire station with stormwater management facilities, parking, and associated infrastructure.

The following analysis estimates potential impacts on City of Alachua public facilities that may result from the proposed development. Please note, building square footage, rather than building footprint area, is used for all calculations. The project area includes ±1.03-acres of Alachua County Tax Parcel 05844-004-004. The development area is located within the San Felasco Tech City mixed use community. The site has a Corporate Park Future Land Use (FLU) classification and a Corporate Park (CP) Zoning designation.

Roadways / Transportation

Table 1: Projected Trip Generation

Land Use	ITE LU	Variable KSF	Daily[1]	AM Peak			PM Peak		
			Total	Total	In	Out	Total	In	Out
Fire and Rescue Station	575	11.3	53	5	3	2	5	2	3
Gross Trips			53	5	3	2	5	2	3

Source: ITE Trip Generation 12th Edition

1. *Daily trips were estimated using the assumption that 9.5% of daily trips occur during the PM Peak hour. This percentage is based on the Florida Department of Transportation's Recommended Standard K Factors.*

Conclusion: Approval of this application may generate a net increase of **53 daily vehicle trips**. The proposed development *will not* negatively impact the adopted LOS for adjacent and nearby roadways, as demonstrated in Tables 1-5 of this report.

Per City LDR §2.4.14(H)(2), affected roadways for developments generating *less* than 1,000 external average daily trips (ADT) are those within one-half mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater. Table 2 calculates projected impacts on City of Alachua roadways.

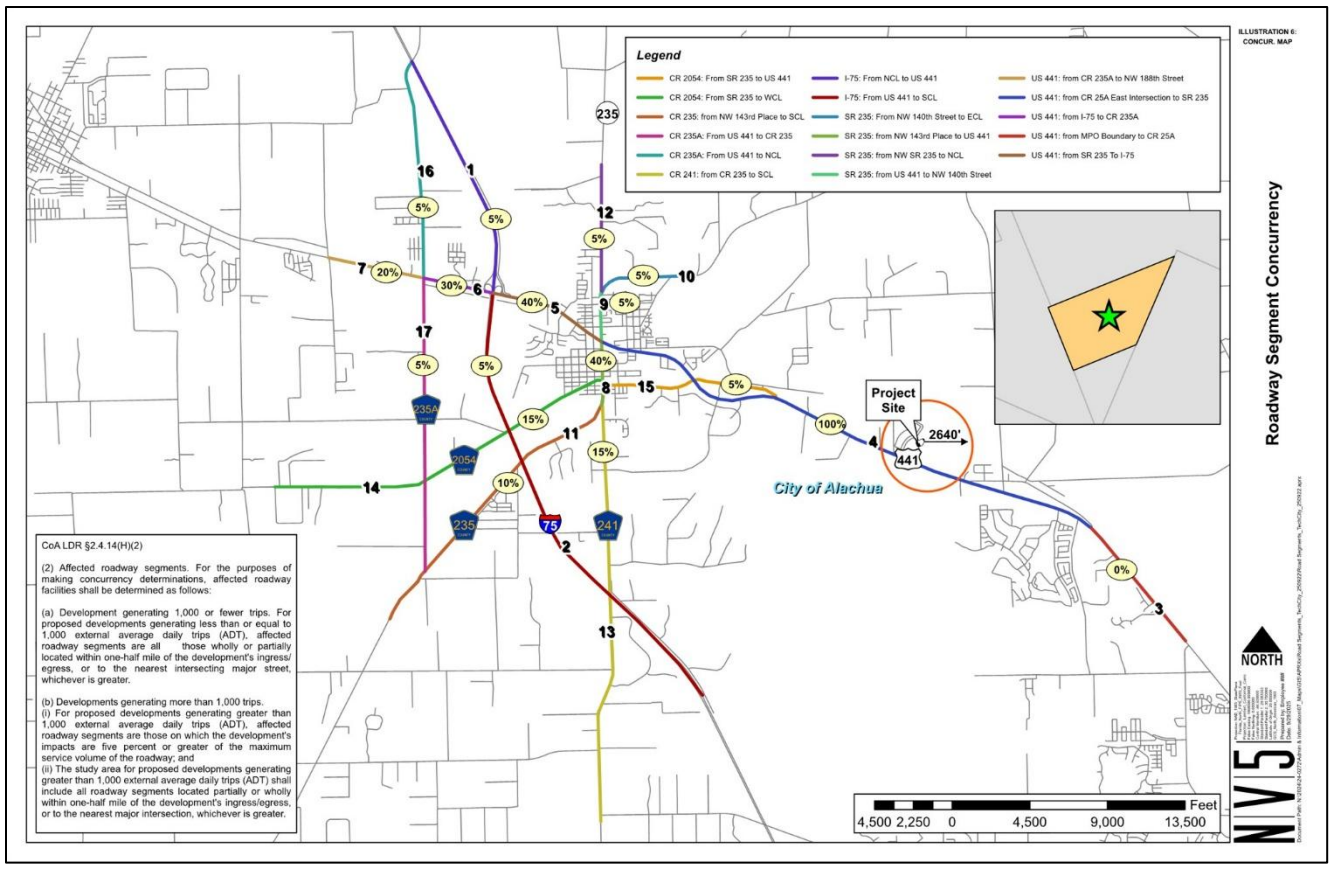

Figure 1: Traffic Segment Map

Table 2: Projected Impacts on Roadway Segments

	AADT	PM
Traffic System Category	**Segment 4**	
	From CR 25A East Intersection to SR 235	
Maximum Service Volume[1]	45,700	4,110
Existing Demand	17,700	1,559
Reserved Capacity	2,483	327
Available Capacity	25,517	2,224
Projected Trip Generation[2]	53	5
Available Capacity w/ Application approval	**25,464**	**2,219**

1. *Source: City of Alachua October 2025 Development Monitoring Report*
2. *NOTE: Projected trip distribution percentage is as follows:*
    a. *Segment 4: 100%*

Conclusion: Affected roadway segments include US Hwy 441 (From CR 25A East Intersection to SR 235). There is available capacity with this application's approval. Therefore, this development *will not* cause the roadway segments to fall below the LOS standards.

Potable Water/Sanitary Sewer

Table 3: Projected Potable Water Impact

System Category	Gallons Per Day (GPD)
Current Permitted Capacity[1]	2,300,000
Less actual Potable Water Flows[1]	1,565,500
Reserved Capacity[1]	338,499
Available Capacity[1]	396,001
Percentage of Permitted Design Capacity Utilized[1]	82.78%
Projected Potable Water Demand from Proposed Project[2]	1,695
Residual Capacity after Proposed Project	**394,306**

1. *Source: City of Alachua October 2025 Development Monitoring Report*
2. *Formulas used: (11,300 sq. ft. / 100)* 15 gpd*
    a. *Source: 62-6.008 Florida Administrative Code (FAC)*

Conclusion: There is residual capacity with this application's approval. Therefore, the proposed development *will not* cause the City's potable water facilities to fall below LOS standards.

Table 4: Projected Sanitary Sewer Impact

System Category	Gallons Per Day (GPD)
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less actual Treatment Plant Flows[1]	813,000
Reserved Capacity[1]	314,385
Residual Capacity[1]	372,615
Percentage of Permitted Design Capacity Utilized[1]	75.16%
Projected Potable Water Demand from Proposed Project[2]	1,695
Residual Capacity after Proposed Project	**370,920**

1. *Source: City of Alachua October 2025 Development Monitoring Report*
2. *Formulas used: (11,300 sq. ft. / 100)* 15 gpd*
    a. *Source: 62-6.008 Florida Administrative Code (FAC)*

Conclusion: There is residual capacity with this application's approval. Therefore, the proposed development *will not* cause sanitary sewer facilities to fall below LOS standards.

Solid Waste

Table 5: Projected Solid Waste Impact

System Category	LBs Per Day	Tons Per Year
Existing Demand[1]	45,184.00	8,246.08
Reserved Capacity[1]	26,736.11	4,879.34
New River Solid Waste Facility Capacity[1]	30+ years	
Solid Waste Generated by Proposed Project[2]	24.74	**4.5**

Alachua, Florida 32615

EXECUTIVE SUMMARY

A Geotechnical exploration was performed for the project site in the City of Alachua, Alachua County, Florida.

The subsurface conditions at the site were explored with a total of four (4) Standard Penetration Test (SPT) borings to a depth of 20 feet below land surface (bls) within the proposed building area, and three (3) auger borings to a depth of 5 feet bls within the proposed pavement area.

Based on the field explorations, the site plan provided, and our experience with general subsoil conditions for similar developments, the following summarizes our main geotechnical recommendations:

- The subsoil conditions across the site are relatively consistent. The borings initially encountered very loose to loose poorly graded sand, and sand with silt to depths of 5 to 13.5 feet. This was underlain by loose to medium dense silty clayey sand, clayey to very clayey sand, and stiff clay-rich soil to a maximum termination depth of 20 feet.
- Borings were observed during drilling for the presence and level of groundwater. The groundwater table was encountered at depths of 8.8 to 9.3 feet. We estimate that during the rainy season, the seasonal high groundwater table will be approximately 3.5 feet below the existing surface.
- The subsoil conditions described above are considered suitable to adequately support the building on typical shallow foundations in the form of spread/continuous footings or monolithic slab supported on site soil or structural fill. Bearing pressures on the order of 2,000 psf are recommended with minimum embedment depth of 1.5 feet assuming the 12 inches below the foundation level are compacted to 95% of Modified Proctor maximum dry density. Foundation design and construction recommendations are presented later in the report.

This report should be read in its entirety so that the recommendations presented herein are fully understood and properly implemented in the project geotechnical design.

Attachment No. 3 Important Information About This Geotechnical Report

1.0 PROJECT INFORMATION

The proposed project site is a vacant, cleared lot within the San Felasco Tech City master development, located in the City of Alachua, Alachua County, Florida. The site encompasses approximately 1.01 acres and has Parcel ID No. 05844-004-004.

Structural loads have not been provided at the time of this proposal. We have assumed maximum column loads of less than 80 kips and maximum wall loads on the order of 1 to 2 kips per foot. We anticipate the building will be constructed at or near the existing site grades.

2.0 PURPOSE

The purpose of our services on this project is to explore the shallow subsurface in order to provide geotechnical engineering recommendations for:

- Subsurface soil conditions
- Groundwater conditions
- Earthwork and excavation
- Foundation design and construction
- Floor slab design and construction
- Pavement design and construction

3.0 FIELD EXPLORATION

The subsurface conditions at the site were explored with a total of four (4) Standard Penetration Test (SPT) borings to a depth of 20 feet bls within the proposed building area, and three (3) auger borings to a depth of 5 feet bls within the proposed pavement area. Borings were performed at the approximate locations shown on **Drawing No. 3**. Boring locations were marked and identified in the field using a GPS unit.

The SPT borings were drilled with a truck-mounted drill rig utilizing the mud rotary method. Samples of the subsurface materials were recovered at two-foot intervals within the upper 10 feet of the boring and at roughly five-foot intervals thereafter using a Standard Penetration Test split-spoon sampler (SPT) in substantial accordance with ASTM D-1586, "Standard Test Method for Standard Penetration Test and Split-Barrel Sampling of Soils." This test procedure drives a 1.4-inch I.D. split-tube sampler into the subsurface profile using a 140-pound hammer falling 30 inches. The number of blows required to drive the sampler the second and third six-inch increments is the SPT N-value, in blows per foot, and is an indication of material strength. Upon completion of the borings, the boreholes were backfilled to the ground surface with soil cuttings.

The auger borings were performed in accordance with ASTM D1452. The borings were performed with flight auger equipment that was rotated into the ground in a manner that reduces soil disturbance. After penetrating to the required depth, the auger was retracted, and the soil collected on the auger flights were field classified and placed in sealed containers. Representative samples of each stratum were retained from the auger borings.

The soil samples recovered from the borings were classified by a geotechnical engineer. The collected samples were later re-examined to confirm field classifications. Visual soil classifications were made in accordance with ASTM D2487 and ASTM D2488. Conditions encountered at each boring location are indicated on the individual boring logs shown in **Attachment No. 1**. Strata contacts shown on these boring logs are approximate. The boring data reflects conditions at the specific test location only, and at the time the borings were drilled.

4.0 GENERAL POTENTIAL FOR SINKHOLE DEVELOPMENT

Sinkhole development occurs in Florida and varies geographically from areas with almost no potential or a very low potential to areas with a high potential where sinkholes occur frequently. The subject property is approximately in Area III on the United States Geological Survey map entitled "Sinkhole Type, Development, and Distribution in Florida".

Area III typically has soil cover between 30 and 200 feet thick that consists of mainly cohesive clayey sediments of low permeability. Sinkholes are most numerous, of varying size, and develop abruptly. Cover-collapse sinkholes dominate in Area III.

During our limited shallow explorations, we did not encounter traditional signs associated with potential sinkhole development including abnormal downward pore water pressure gradients, obvious raveled zones, surface depressions, etc. However, this evaluation was not planned to specifically address sinkhole potential.

If the sinkhole potential of the site is to be evaluated, additional site-specific data must be obtained. This might include using geophysical methods such as Electrical Resistivity tests and additional geotechnical tests such as Cone Penetrometer Test (CPT) soundings, and/or more/deeper Standard Penetration Test borings. Interpretation of the test data should be done by a professional geologist/engineer familiar with the use of these tests under local conditions. However, it should be noted that even if indicators of sinkhole activity are found, it is impossible to predict if, when or precisely where a sinkhole may occur. If requested, NV5 can assist in assessing the sinkhole potential of the location of the proposed construction.

5.0 SOIL AND GROUNDWATER CONDITONS

5.1 SOIL SURVEY

The USDA Soil Survey of Alachua County, Florida, as shown on **Drawing No. 2**, was reviewed for a general description of the near-surface soil types that may be anticipated at the site. It should be noted that the Soil Survey is not intended as a substitute for site-specific geotechnical exploration; rather it is a useful tool in planning a project scope in that it provides information on soil types likely to be encountered. The major shallow subsurface profile at the project site is represented in the following:

> *5 – Fort Meade fine sand, 0 to 5 percent slopes* – This nearly level to gently sloping, well-drained soil is in both small and large areas on the gently rolling uplands. The areas are mostly irregular in shape and range from about 10 to 400 acres.

Typically, the surface layer is fine sand about 14 inches thick. The upper 10 inches is very dark brown, and the lower 4 inches is very dark grayish brown. The underlying layer is fine sand to a depth of 80 inches or more. In sequence from the top, the upper 20 inches is dark brown; the next 9 inches is dark yellowish brown; the next 28 inches is yellowish brown; and the lower 14 inches is dark brown.

Included with this soil in mapping are small areas of Arredondo, Gainesville, Kendrick, and Millhopper soils. Also included are small areas of soils which are similar to the Fort Meade soil but which have only 6 to 10 inches of a very dark gray or very dark grayish brown surface layer over a fine sand or loamy sand underlying layer. Total included areas are less than 15 percent.

In this Fort Meade soil, the available water capacity is low to medium. The permeability is rapid. The natural fertility is low. Organic matter content of the surface layer is moderately low to high. Surface runoff is slow. The water table is more than 72 inches below the surface.

8 – Millhopper sand, 0 to 5 percent slopes – This nearly level to gently sloping, moderately well drained soil is in small and large irregularly shaped areas on uplands and on slightly rolling knolls in the broad flatwoods. Slopes are mostly nearly smooth or convex. The areas are variable in size. They range from about 10 to 250 acres.

Typically, the surface layer is dark grayish brown sand about 9 inches thick. The subsurface layer is sand or fine sand about 49 inches thick. The upper 17 inches is yellowish brown, the next 22 inches is light yellowish brown, and the lower 10 inches is very pale brown. The subsoil extends to a depth of 89 inches. The upper 6 inches is yellowish brown loamy sand that has grayish and brownish mottles; the next 22 inches is light gray, mottled sandy clay loam; and the lower 3 inches is light gray, mottled sandy loam.

Included with this soil in mapping are small areas of Arredondo, Bonneau, Fort Meade, Gainesville, Kanapaha, Lochloosa, and Sparr soils. Siliceous limestone boulders and small sinks are within some delineations. Small areas of Millhopper soils that have 5 to 8 percent slopes are also included. About 25 acres mapped as this Millhopper soil along the Santa Fe River is occasionally flooded. Total included areas are about 20 percent or less.

This Millhopper soil has a water table that is at a depth of 40 to 60 inches for 1 to 4 months and at a depth of 60 to 72 inches for 2 to 4 months during most years. The available water capacity is low in the surface and subsurface layers and is low to medium in the subsoil. Permeability is rapid in the surface and subsurface layers, moderately rapid in the upper 6 inches of the subsoil, and slow to moderately slow below this depth. Natural fertility is low. Organic matter content is low to moderately low.

The borings generally encountered soils consistent with the soil survey.

5.2 SUBSURFACE CONDITIONS

The subsoil conditions across the site are relatively consistent. The borings initially encountered very loose to loose poorly graded sand, and sand with silt to depths of 5 to 13.5 feet. This was underlain by loose to medium dense silty clayey sand, clayey to very clayey sand, and stiff clay-rich soil to a maximum termination depth of 20 feet.

Very loose to loose surficial soils were encountered throughout the site. These isolated conditions are consistent with native, very loose near-surface sand deposits commonly found in this area of Alachua County.

Conditions encountered at each boring location are indicated on the individual boring logs shown in **Attachment No. 1**. Stratification boundaries on the boring logs represent the approximate location of changes in native soil types; in situ, the transition between materials may be gradual.

5.3 GROUNDWATER

Borings were observed during drilling for the presence and level of groundwater. The groundwater table was encountered at depths of 8.8 to 9.3 feet after the drilling. We estimate that during the rainy season, the seasonal high groundwater table will be approximately 3.5 feet below the existing surface.

It should be recognized that fluctuations of the groundwater table will occur due to seasonal variations in the amount of rainfall, runoff and other factors not evident at the time the boring was performed. Therefore, groundwater levels during construction or at other times in the future may be higher or lower than the levels indicated on the boring logs.

Our estimates of the seasonal groundwater conditions are based on the USDA Soil Survey, the encountered soil types and groundwater and do not represent the temporary rise in water table that occurs immediately following a storm events.

6.0 CONCLUSIONS AND RECOMMENDATIONS

The following conclusions and recommendations are based on the project characteristics previously described, the data obtained from our field explorations, and our experience with similar subsurface conditions and construction types. If subsurface conditions different from those disclosed by the borings are encountered during construction, we should be notified immediately so that we might review the following recommendations considering such changes.

The final design of a foundation system is dependent upon adequate integration of geotechnical and structural engineering considerations. Consequently, NV5 must review the final foundation design to evaluate the effectiveness and applicability of our initial analyses, and to determine if additional recommendations may be warranted. Without such a review, the recommendations presented herein could be misinterpreted or misapplied resulting in potentially unacceptable performance of the foundation system.

6.1 FOUNDATIONS

Assuming the site is prepared as recommended in Earthwork section of this report, in our opinion, the proposed building may be supported by shallow foundation system in the form of spread/strip footings and/or thickened edge monolithic slab foundations, bearing on native soil or newly placed fill extending to native soil. Design recommendations for shallow foundations for the proposed building are presented below:

- We recommend using a gross allowable bearing pressure of 2,000 psf to size the foundations. The gross bearing pressure is defined as the soil contact pressure that can be imposed from the maximum structural loads, weight of the concrete foundations, and weight of the soil above the foundations. Exterior foundations should be embedded to a minimum of 18 inches below lowest adjacent grades. Interior foundations should be embedded a minimum of 12 inches.
- Total settlement of recommended shallow foundations is expected to be less than 1 inch. Differential settlement is expected to be less than ½ inch between column footings, less than ½ inch over 40 feet for strip footings, and less than ½ inch over 40 feet for monolithic slab foundations.
- Footing subgrade soils should be approved by the Geotechnical Engineer or their representative prior to the placement of concrete and reinforcing steel. NV5 recommends that the very loose to loose soil conditions encountered in the building borings be compacted to at least 95% of the Modified Proctor maximum dry density to a depth of 1 foot below the foundation bearing levels.
- A minimum of one field density to a minimum depth of 1 foot below the footing subgrade per column footing and per 50 linear feet for strip foundations should be performed.
- The base of all foundation excavations should be free of water and loose soil prior to placing concrete. Concrete should be placed soon after excavating to reduce bearing soil disturbance. Should the soils at bearing level become excessively dry, disturbed or saturated, the affected soil should be moisture conditioned and re-compacted or removed prior to placing concrete. It is recommended that the geotechnical engineer be retained to observe and test the soil foundation bearing materials.
- NV5 anticipates hand-operated compaction equipment will be utilized, as necessary, in footing cuts, following any mass grading. If unsuitable bearing soils are encountered in footing excavations, the excavation should be extended deeper to suitable soils and the footing could bear directly on these soils at the lower level or on suitable backfill placed in the excavations. Over-excavation for compacted backfill placement below footings should extend laterally beyond all edges of the footings. The over-excavation should then be backfilled up to the footing base elevation per the preceding general earthwork specifications, using hand operated compaction equipment in footing cuts.

6.2 GROUND FLOOR SLABS

Ground floor slabs may be supported on grade or engineered fill. Slab subgrades should be properly prepared as recommended above under Site Preparation and Grading and Drainage. Slabs on grade may be designed using a modulus of subgrade reaction of 150 pounds per cubic inch (pci). Slabs

should be reinforced for the loads that they will sustain, and construction joints should be provided at frequent intervals. NV5 recommends you consider a thicker concrete slab that is reinforced with steel.

Slabs in contact with soil are subject to movement of moisture from the soil upward through the slab. To prevent such moisture vapor transmission, a moisture barrier should be placed on the slab subgrade and should be protected from damage during construction. Construction joints should be provided with water stops in any permanently submerged areas.

6.3 EARTHWORK

6.3.1 Site Preparation

Prior to placing any fill, and existing asphalt, limerock, organics/muck, topsoil and any otherwise unsuitable material should be removed from the construction area.

Geotechnical site preparation for construction should consist of removal of all existing infrastructure, underground utilities, landscape, and other deleterious materials within proposed building and pavement footprints. Any voids created by the removal of these deleterious materials should be properly backfilled as described in the paragraphs below.

After preparation as described above, areas for structures that will have slabs on grade should be proof rolled with a heavy roller (with vibrator turned off) or loaded truck prior to placing fill. The proof rolling should be observed by the geotechnical engineer to identify and mitigate any weak subgrade conditions evidenced by yielding or rutting at the wheels of the roller or truck.

The site preparation recommended above should include the planned structure and pavement footprints plus a five-foot perimeter, if available.

6.3.2 Fill Material and Compaction Requirements

In general, fill soils should consist of either inorganic, non-plastic sand having less than 12% material passing the No. 200 sieve. Based on our boring data some of the near-surface sand may satisfy the fill criteria but might require localized sorting and moisture-conditioning prior to re-use. In any event, representative samples of the fill soils should be collected for classification and compaction testing. The maximum dry density, optimum moisture content, gradation, and plasticity should be determined. These tests are needed for quality control of the compacted fill.

Fill soils should be placed with loose lift thicknesses of not more than 12 inches, moisture-conditioned to within two (2) percent of the optimum moisture content based on ASTM D-1557 and compacted to a minimum of 95 percent Modified Proctor maximum dry density. One test should be performed for each 2,500 square feet of fill area per lift of fill soil. If during the compaction process fill shows evidence of yielding under the weight of the roller, it should be scarified and re-compacted, or removed and replaced with fill described above. The vibrations produced by the operation of the compactor should be monitored for potential adverse effects on adjacent existing structures, pavements, and utilities. If nearby structures may be affected by the vibration of the compactor, the compaction procedure may require modification as approved by the geotechnical engineer.

6.3.3 Grading and Drainage

Final surrounding grades should be sloped away from the structure on all sides to prevent ponding of water. Roof drainage should discharge to the stormwater system or a minimum of 10 feet beyond the footprint of the proposed structures where there are pervious surfaces. Site grades should be set considering the estimated seasonal high groundwater.

6.3.4 Earthwork Construction Consideration

Construction traffic over the completed subgrade should be avoided to the extent practical. The site should also be graded to prevent ponding of surface water on the prepared subgrades or in excavations. If the subgrade should become desiccated, saturated, or disturbed, the affected material should be removed or these materials should be scarified, moisture conditioned, and re-compacted prior to floor slab and pavement construction.

Installation of landscape drains should be considered around the back sides of curbs to collect and control landscape irrigation and other water entering through landscaping from entering the sides of the pavement sections, reducing the potential for water-related damage. Landscape drains should be routed to the stormwater collection or other positive outfall, away from the pavement.

The geotechnical engineer should be retained during the construction phase of the project to observe earthwork and to perform necessary tests and observations during subgrade preparation; proof-rolling; placement and compaction of controlled compacted fills; backfilling of excavations into the completed subgrade, and just prior to construction of building floor slabs.

6.4 EXCAVATION AND DEWATERING

Groundwater levels were encountered in the drilled boreholes at depths of approximately 8.8 to 9.3 feet below the existing ground will 3.5 feet below the existing surface during the rainy season. Localized dewatering should not be required; however, if required, may be achieved with pumps and sumps. Dewatering for deeper excavations including installation of utility systems and appurtenances for storm drains and sewer lines might require well points around those excavations. All dewatering and subsequent effluent discharge should meet the requirements of the local jurisdictional agencies. During dewatering the adjacent properties must be monitored for adverse im-pacts from dewatering drawdown. The dewatering subcontractor should submit a proposed design for dewatering operations to the owner for review and approval prior to commencing work.

Shallow excavations into the near-surface materials will likely stand vertical for short periods of time only. The excavation sides will unravel over time as they are exposed to weather and construction traffic. Deeper excavations, especially those that extend below the groundwater table, as well as excavations that will remain open for longer periods of time will require support in the form of temporary shoring or sliding trench boxes to prevent instability of excavation walls and to protect workers from injury. All excavations should comply with Occupational Safety and Health Administration (OSHA) design and safety requirements. Shoring designs should be signed and sealed by a Florida-licensed professional engineer, and should be provided for the Owner's review.

If excavations encroach on a 1 horizontal to 1 vertical projection from the bottom of any existing foundation, the existing building should be shored by the Contractor to prevent any unnecessary movement, as needed.

6.5 FLEXIBLE PAVEMENT

Overall soil conditions encountered by our borings at this site are suitable for supporting conventional limerock base and asphalt wearing surface pavements. We have not been provided the anticipated traffic loading conditions; therefore, the following pavement component recommendations should be used only as guidelines.

The seasonal high groundwater table is estimated to be 3.5 feet beneath existing grade at the site. We recommend a minimum of either 12 to 24 inches of separation (depending upon the pavement section design) be present between the bottom of the base course and the estimated seasonal high groundwater table. If this separation cannot be achieved by site grading, NV5 recommends underdrains be used beneath the base course.

6.5.1 Stabilized Subgrade

If a crushed limerock or recycled concrete base is used, we recommend a stabilized subgrade be located beneath the base. The stabilized subgrade should have a minimum Limerock Bearing Ratio (LBR) of 40, with minimum thicknesses of 6 inches for automobile parking areas and 12 inches for driveways.

The stabilized subgrade can be imported material or a mixture of imported and on-site material. If a mix is proposed, a mix design should be performed to determine the optimum mix proportions. The stabilized subgrade should be compacted to a minimum of 98 percent of the Modified Proctor maximum dry density (ASTM D1557) for soils with less than 15 percent fines content. Soils with 15 percent or greater fines content should be compacted to 100 percent of the Standard Proctor maximum dry density (ASTM D698).

6.5.2 Base Course

The base course can consist of either crushed limerock, soil cement, or recycled concrete. If you should use a soil cement base course, a stabilized subgrade is not required.

Limerock should have a LBR of at least 100, be obtained from a FDOT approved source and meet FDOT gradation requirements. The base course thickness should be a minimum of 6 inches in automobile parking areas, and 8 inches in driveway areas. The base course should be compacted to at least 98 percent of the Modified Proctor maximum dry density (ASTM D1557). We recommend a minimum 24 inches separation between the bottom of the limerock base course and the estimated seasonal high water table. If site grading does not allow for this separation we recommend underdrains be considered.

Soil cement can consist of an imported material or a blend of the on-site soils and cement. A mix design should be performed to determine the optimum cement content. We recommend the soil cement have a minimum 28-day compressive strength of 500 psi. Soil cement can be blended off-site (in a pug mill) or on site. Soil cement pills should be cast from each day's production to verify the recommended compressive strength has been achieved at 28 days. We recommend the soil cement base course be a minimum of 8 inches thick throughout the project. We recommend a minimum 18 inches separation between the bottom of the soil cement base course and the estimated seasonal high-water table. If site grading does not allow for this separation we recommend underdrains be considered.

Recycled concrete should have a LBR of at least 150, be obtained from an FDOT approved source and meet FDOT gradation requirements. The base course thickness should be a minimum of 8 inches. The base course should be compacted to at least 98 percent of the Modified Proctor maximum dry density (ASTM D1557). We recommend a minimum 12 inches separation between the bottom of the recycled concrete base course and the estimated seasonal high-water table. If site grading does not allow for this separation we recommend underdrains be considered.

6.5.3 Wearing Surface

The asphalt-wearing surface should consist of an FDOT Type SP Hot Mix Asphalt mixture. For automobile parking areas, the thickness should be a minimum of 1.5 inches. For driveway areas, the thickness should be a minimum of 2 inches. The asphalt-wearing surface should consist of an SP-12.5 mix. The asphalt should be compacted to at least 95 percent of the mix design density.

The constructability of differing asphalt thicknesses may be difficult, and having a uniform 2-inch thick asphalt wearing surface may be more practical.

6.6 RIGID PAVEMENT

Concrete pavement is a rigid pavement that results in smaller load transfers to the subgrade soils than flexible pavement. For concrete pavement subgrade, we recommend using the existing surficial sands or recommended clean sand (SP) fill, compacted to at least 98 percent of the Modified Proctor maximum dry density without additional stabilization with the following stipulations:

- Subgrade soils must be compacted to at least 98 percent of Modified Proctor maximum dry density to a depth of at least 2 feet prior to placement of concrete.
- The surface of the subgrade soils must be smooth and any disturbances or wheel rutting corrected prior to placement of the concrete.
- The subgrade soils must be moistened prior to placement of concrete.
- Concrete pavement thickness should be uniform throughout, with the exception of thickened edges (curb or footing).
- The bottom of the pavement should be separated from the estimated seasonal high groundwater level by at least 18 inches.
- Limerock or any other impermeable base is not suitable unless it meets the minimum recommended permeability of 10 feet/day.
- The upper 12 inches of subgrade underlying the base course must also be “free-draining” and water that enters the base and subgrade must be allowed to seep out by gravity or if this is not possible, underdrains must be incorporated into the subgrade. A “bathtub” condition within the base/subgrade must be avoided.

Our recommendations for slab thickness for both light-duty and heavy-duty concrete pavements are based on a.) subgrade soils are compacted to 98 percent of the Modified Proctor maximum dry density, b.) modulus of subgrade reaction (k) of 150 pounds per cubic inch, c.) a 20-year design life, and d.) previously stated design parameters. For an anticipated light-duty traffic group, a minimum pavement thickness of 5.5 inches is recommended, using Table 2.4 from the ACI 330 Guide for Design and Construction of Concrete Parking Lots, ACI 330R-01. For an anticipated heavy-duty traffic group, a minimum pavement thickness of 8 inches is recommended, using Table 3.4 from the FDOT Rigid Pavement Design Manual, January 2019.

We recommend using concrete with a minimum 28-day compressive strength of 4,000 pounds per square inch and a minimum 28-day flexural strength (modulus of rupture) of at least 600 pounds per square inch based on the third point loading of concrete beam test samples. Minimum control joint spacing of 15 by 15 feet is suggested. Lay-out of sawcut control joints should form square panels, and the depth of sawcut joint should be at least 1/4 of the concrete slab thickness (a minimum 2-inch sawcut control joint depth for the recommended 8-inch slab thickness). The joints should be sawed within six hours of concrete placement or as soon as the concrete has developed sufficient strength to support workers and equipment.

For further details on concrete pavement construction, refer to "Guide to Jointing Non-reinforced Concrete Pavements" published by the Florida Concrete and Products As-sociates, Inc. and "Building Quality Concrete Parking Areas", published by the Portland Cement Association.

7.0 LIMITATIONS

This report has been prepared for the exclusive use of the Owner and other members of the design/construction team for the specific projects discussed in this report. This report has been prepared in accordance with generally accepted local geotechnical engineering practices; no other warranty is expressed or implied.

During the design development phase of the project, it is recommended that NV5 be retained to provide consultation to the ownership and design team, to review final foundation specification and review foundation design drawings, and to ensure that its recommendations have been correctly interpreted and implemented. Furthermore, NV5 should be retained to provide inspections during geotechnical construction. If the client does not provide NV5 with the opportunity to participate in the installation of the foundation, as is recommended in this report, then the client acknowledges and agrees that NV5 has no responsibility for the interpretation of the recommendations made in this report or for the performance of the foundation.

The evaluation and recommendations submitted in this report are based in part upon the data collected from the field exploration. The nature or extent of variations throughout the subsurface profile may not become evident until the time of construction. If variations then appear evident, it may be necessary to evaluate our recommendations as provided in this report. In the event changes are made in the nature, design or locations of the proposed project construction, the conclusions and recommendations contained in this report shall not be considered valid unless the changes are reviewed, and conclusions modified or verified in writing by NV5.

8.0 CLOSURE

We appreciate the opportunity to provide geotechnical engineering services on this project. In the event that you have any questions concerning the contents of this report, or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

This item has been digitally signed and sealed by

on the date adjacent to the seal. Printed copies of this document are not considered signed and sealed and the signature must be verified on any electronic copies.

BOULDERS:		Greater than 300 mm
COBBLES:		75 mm to 300 mm
GRAVEL:	Coarse -	19.0 mm to 75 mm
	Fine -	4.75 mm to 19.0 mm
SANDS:	Coarse -	2.00 mm to 4.75 mm
	Medium -	0.425 mm to 2.00 mm
	Fine -	0.075 mm to 0.425 mm
SILTS & CLAYS:		Less than 0.075 mm

Attachment No. 3

Important Information About This Geotechnical Report

Important Information about This

Geotechnical-Engineering Report

Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.

While you cannot eliminate all such risks, you can manage them. The following information is provided to help.

The Geoprofessional Business Association (GBA) has prepared this advisory to help you – assumedly a client representative – interpret and apply this geotechnical-engineering report as effectively as possible. In that way, you can benefit from a lowered exposure to problems associated with subsurface conditions at project sites and development of them that, for decades, have been a principal cause of construction delays, cost overruns, claims, and disputes. If you have questions or want more information about any of the issues discussed herein, contact your GBA-member geotechnical engineer. Active engagement in GBA exposes geotechnical engineers to a wide array of risk-confrontation techniques that can be of genuine benefit for everyone involved with a construction project.

Understand the Geotechnical-Engineering Services Provided for this Report

Geotechnical-engineering services typically include the planning, collection, interpretation, and analysis of exploratory data from widely spaced borings and/or test pits. Field data are combined with results from laboratory tests of soil and rock samples obtained from field exploration (if applicable), observations made during site reconnaissance, and historical information to form one or more models of the expected subsurface conditions beneath the site. Local geology and alterations of the site surface and subsurface by previous and proposed construction are also important considerations. Geotechnical engineers apply their engineering training, experience, and judgment to adapt the requirements of the prospective project to the subsurface model(s). Estimates are made of the subsurface conditions that will likely be exposed during construction as well as the expected performance of foundations and other structures being planned and/or affected by construction activities.

The culmination of these geotechnical-engineering services is typically a geotechnical-engineering report providing the data obtained, a discussion of the subsurface model(s), the engineering and geologic engineering assessments and analyses made, and the recommendations developed to satisfy the given requirements of the project. These reports may be titled investigations, explorations, studies, assessments, or evaluations. Regardless of the title used, the geotechnical-engineering report is an engineering interpretation of the subsurface conditions within the context of the project and does not represent a close examination, systematic inquiry, or thorough investigation of all site and subsurface conditions.

Geotechnical-Engineering Services are Performed for Specific Purposes, Persons, and Projects, and At Specific Times

Geotechnical engineers structure their services to meet the specific needs, goals, and risk management preferences of their clients. A geotechnical-engineering study conducted for a given civil engineer will not likely meet the needs of a civil-works constructor or even a different civil engineer. Because each geotechnical-engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client.

Likewise, geotechnical-engineering services are performed for a specific project and purpose. For example, it is unlikely that a geotechnical-engineering study for a refrigerated warehouse will be the same as one prepared for a parking garage; and a few borings drilled during a preliminary study to evaluate site feasibility will not be adequate to develop geotechnical design recommendations for the project.

Do not rely on this report if your geotechnical engineer prepared it:

- for a different client;
- for a different project or purpose;
- for a different site (that may or may not include all or a portion of the original site); or
- before important events occurred at the site or adjacent to it; e.g., man-made events like construction or environmental remediation, or natural events like floods, droughts, earthquakes, or groundwater fluctuations.

Note, too, the reliability of a geotechnical-engineering report can be affected by the passage of time, because of factors like changed subsurface conditions; new or modified codes, standards, or regulations; or new techniques or tools. *If you are the least bit uncertain* about the continued reliability of this report, contact your geotechnical engineer before applying the recommendations in it. A minor amount of additional testing or analysis after the passage of time – if any is required at all – could prevent major problems.

Read this Report in Full

Costly problems have occurred because those relying on a geotechnical-engineering report did not read the report in its entirety. Do not rely on an executive summary. Do not read selective elements only. *Read and refer to the report in full.*

You Need to Inform Your Geotechnical Engineer About Change

Your geotechnical engineer considered unique, project-specific factors when developing the scope of study behind this report and developing the confirmation-dependent recommendations the report conveys. Typical changes that could erode the reliability of this report include those that affect:

- the site's size or shape;
- the elevation, configuration, location, orientation, function or weight of the proposed structure and the desired performance criteria;
- the composition of the design team; or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project or site changes – even minor ones – and request an assessment of their impact. *The geotechnical engineer who prepared this report cannot accept*

responsibility or liability for problems that arise because the geotechnical engineer was not informed about developments the engineer otherwise would have considered.

Most of the "Findings" Related in This Report Are Professional Opinions

Before construction begins, geotechnical engineers explore a site's subsurface using various sampling and testing procedures. *Geotechnical engineers can observe actual subsurface conditions only at those specific locations where sampling and testing is performed.* The data derived from that sampling and testing were reviewed by your geotechnical engineer, who then applied professional judgement to form opinions about subsurface conditions throughout the site. Actual sitewide-subsurface conditions may differ – maybe significantly – from those indicated in this report. Confront that risk by retaining your geotechnical engineer to serve on the design team through project completion to obtain informed guidance quickly, whenever needed.

This Report's Recommendations Are Confirmation-Dependent

The recommendations included in this report – including any options or alternatives – are confirmation-dependent. In other words, they are not final, because the geotechnical engineer who developed them relied heavily on judgement and opinion to do so. Your geotechnical engineer can finalize the recommendations *only after observing actual subsurface conditions* exposed during construction. If through observation your geotechnical engineer confirms that the conditions assumed to exist actually do exist, the recommendations can be relied upon, assuming no other changes have occurred. *The geotechnical engineer who prepared this report cannot assume responsibility or liability for confirmation-dependent recommendations if you fail to retain that engineer to perform construction observation.*

This Report Could Be Misinterpreted

Other design professionals' misinterpretation of geotechnical-engineering reports has resulted in costly problems. Confront that risk by having your geotechnical engineer serve as a continuing member of the design team, to:

- confer with other design-team members;
- help develop specifications;
- review pertinent elements of other design professionals' plans and specifications; and
- be available whenever geotechnical-engineering guidance is needed.

You should also confront the risk of constructors misinterpreting this report. Do so by retaining your geotechnical engineer to participate in prebid and preconstruction conferences and to perform construction-phase observations.

Give Constructors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can shift unanticipated-subsurface-conditions liability to constructors by limiting the information they provide for bid preparation. To help prevent the costly, contentious problems this practice has caused, include the complete geotechnical-engineering report, along with any attachments or appendices, with your contract documents, *but be certain to note conspicuously that you've included the material for information purposes only.* To avoid misunderstanding, you may also want to note that "informational purposes" means constructors have no right to rely on the interpretations, opinions, conclusions, or recommendations in the report. Be certain that constructors know they may learn about specific project requirements, including options selected from the report, *only* from the design drawings and specifications. Remind constructors that they may perform their own studies if they want to, and *be sure to allow enough time* to permit them to do so. Only then might you be in a position to give constructors the information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions. Conducting prebid and preconstruction conferences can also be valuable in this respect.

Read Responsibility Provisions Closely

Some client representatives, design professionals, and constructors do not realize that geotechnical engineering is far less exact than other engineering disciplines. This happens in part because soil and rock on project sites are typically heterogeneous and not manufactured materials with well-defined engineering properties like steel and concrete. That lack of understanding has nurtured unrealistic expectations that have resulted in disappointments, delays, cost overruns, claims, and disputes. To confront that risk, geotechnical engineers commonly include explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

Geoenvironmental Concerns Are Not Covered

The personnel, equipment, and techniques used to perform an environmental study – e.g., a "phase-one" or "phase-two" environmental site assessment – differ significantly from those used to perform a geotechnical-engineering study. For that reason, a geotechnical-engineering report does not usually provide environmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated subsurface environmental problems have led to project failures.* If you have not obtained your own environmental information about the project site, ask your geotechnical consultant for a recommendation on how to find environmental risk-management guidance.

Obtain Professional Assistance to Deal with Moisture Infiltration and Mold

While your geotechnical engineer may have addressed groundwater, water infiltration, or similar issues in this report, the engineer's services were not designed, conducted, or intended to prevent migration of moisture – including water vapor – from the soil through building slabs and walls and into the building interior, where it can cause mold growth and material-performance deficiencies. Accordingly, ***proper implementation of the geotechnical engineer's recommendations will not of itself be sufficient to prevent moisture infiltration. Confront the risk of moisture infiltration*** by including building-envelope or mold specialists on the design team. ***Geotechnical engineers are not building-envelope or mold specialists.***

City of ALACHUA

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning and Zoning Board of the City of Alachua will hold a public hearing on April 21, 2026, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located 15100 NW 142nd Terrace, Alachua, Florida, to consider the following:

Application #: PSP25-0014 | San Felasco Tech City Fire Station Site Plan

A request by NV5, Inc. (Applicant/Agent) on behalf of The Laser Investment Group, LLC (Property Owner) for a site plan proposing the construction of a ± 11,300 square foot fire station with associated site improvements on a ± 1.03-acre subject property generally located on NW 86th Drive, north of US Highway 441 and south of NW 87th Court (Tax Parcel 05844-004-004). FLU: Corporate Park; Zoning: Corporate Park (CP).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application, staff report, and any related materials are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. one week prior to the date of hearing. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL, 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

AFFIDAVIT FOR POSTED LAND USE SIGN

I, Courtney O'Connor, POSTED THE LAND USE SIGN(S)
(Print Name)

ON 4/3/26 FOR THE San Felasco Tech City Fire Station Site Plan
(Date) (Project name & type of action)

LAND USE ACTION AS PER ARTICLE 2.2.9(D) OF THE LAND DEVELOPMENT

REGULATIONS. THIS WILL BE INCLUDED IN THE STAFF REPORT.

(Signature)

Two
(Number of signs)

Posted Notice Location Map
PSP25-0014 | Tech City Fire Station

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at regular intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

SIGNS MUST BE REMOVED BY THE APPLICANT WITHIN TEN DAYS AFTER THE FINAL DECISION ON THE APPLICATION

Staff Report

Planning & Zoning Board Hearing Date: April 21, 2026
Quasi-Judicial Hearing **Application #: PSP25-0011**

SUBJECT:	A request for a site plan proposing the construction of a ± 3,600 square foot carwash building with drive-through service and associated site improvements.
APPLICANT/AGENT:	Josh Russell, P.M., Paulson Mitchell Wise.
PROPERTY OWNER:	Alachua 441/235, LLC
LOCATION:	Generally located at the southeast corner of NW US 441 and NW 173rd Street (CR 235a)
PARCEL ID NUMBER:	03044-003-000, 03042-050-008
FLUM DESIGNATION:	Commercial
ZONING:	Commercial Intensive (CI)
OVERLAY:	N/A
ACREAGE:	± 1.25
PROJECT PLANNER:	Parker A.H. Stevens
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board find the site plan application for Alachua 441/235, LLC, to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and approve the site plan, subject to the three conditions found in exhibit "A" on page 25 of the April 21, 2026, staff report.
RECOMMENDED MOTION:	*I move that, based upon the competent substantial evidence, the presentation before this Board, and Staff's recommendation, this Board find the site plan application for Alachua 441/235, LLC, to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and approve the site plan, subject to the three conditions found in exhibit "A" and located on page 25 of the April 21, 2026, staff report.*

SUMMARY

This application is a request by Paulson Mitchell Wise (applicant/agent), on behalf of Alachua 441/235, LLC (property owner), for a site plan which proposes the construction of a ± 3,600 square foot carwash with drive-through service with associated site improvements on a ± 1.25-acre property.

The subject property is generally located at the southeast corner of US Highway 441 and NW 173rd Street (CR 235a). The site plan proposes two ingress / egress points to NW 173rd Street. Stormwater is proposed to be directed to an off-site facility that is part of the Santa Fe Crossing Infrastructure Plan approved on May 22, 2023.

EXISTING USES

The subject property is undeveloped and was cleared and graded as part of the Santa Fe Crossings Infrastructure Plan approved on May 22, 2023.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 1. Figure 1 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Office	Commercial	Community Intensive (CI)
South	Vacant Commercial	Commercial	Commercial Intensive (CI)
East	Auto Repair & Servicing	Commercial	Commercial Intensive (CI)
West	Restaurant with drive-through service	Commercial	Commercial Intensive (CI)

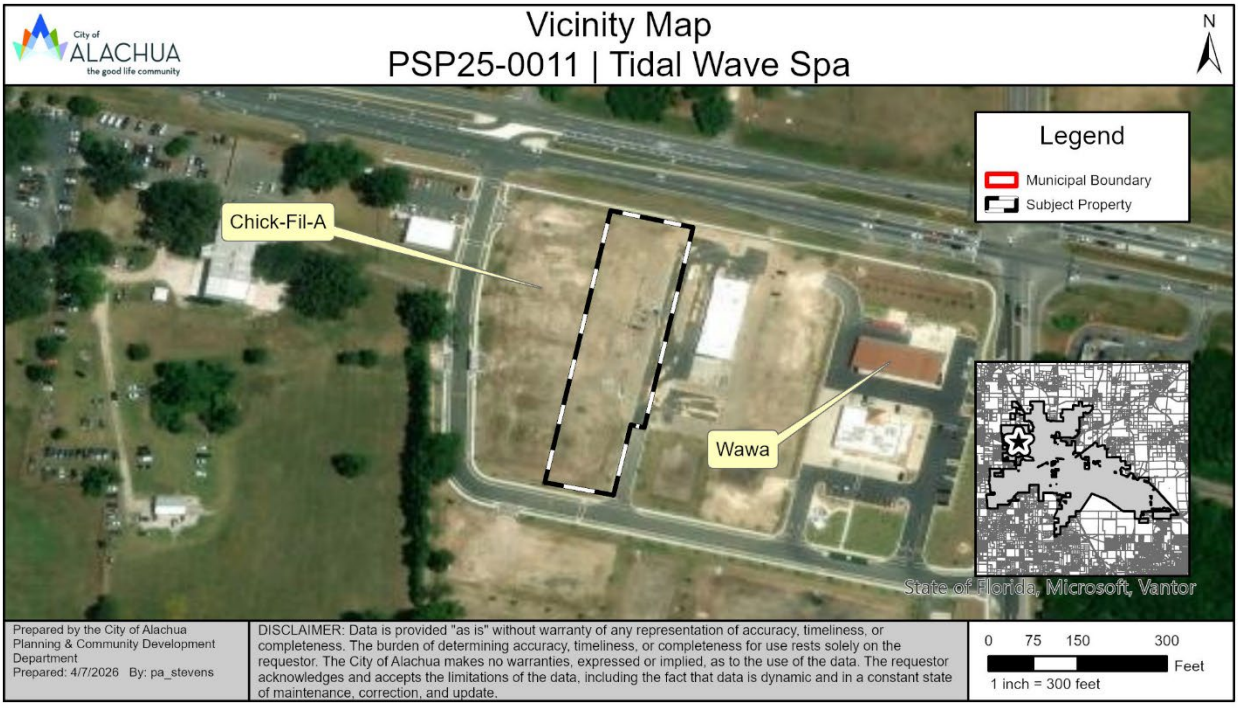

Figure 1. Vicinity Map

NEIGHBORHOOD MEETING

The purpose of a neighborhood meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. Neighborhood meetings are required for site plan applications.

A neighborhood meeting was held on July 31, 2025 at 16367 NW 167th Boulevard (Holiday Inn Express & Suites). As required by Section 2.2.4 of the City's Land Development Regulations, all property owners within 400 feet of the subject property were notified and notice of the meeting was published in a newspaper of general circulation. The applicant was available to answer questions. Materials submitted by the applicant indicate that the meeting was attended by 1 member of the public. A neighborhood meeting summary, submitted by the applicant, is available in the application materials.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Future Land Use Map 2035*

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Objective 1.3: *Commercial & Mixed-Use*

The City shall establish three commercial and mixed-use land use categories: Community Commercial, Commercial, and Central Business District. These land use categories shall provide a broad range of commercial uses, including retail sales and services, personal services, offices, and tourist-oriented uses, and the potential for mixed-use developments in order to provide for the availability of goods and services, both to the citizens and visitors of Alachua and to the citizens of the North Central Florida region while diversifying the housing stock.

Policy 1.3.b: *Commercial*: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
1. Personal services;
2. Financial institutions;
3. Recreation and entertainment;
4. Tourist-related uses;
5. Visitor accommodations;
6. Commercial shopping centers;
7. Auto-oriented uses;
8. Traditional Neighborhood Planned Developments;
9. Employment Center Planned Developments;
10. Commercial recreation centers;
11. Office/business parks;
12. Limited industrial services;
13. Eating establishments;
14. Single family attached units;
15. Apartments and townhomes;
16. Duplexes and quadplexes;

17. Single-family and multi-family residential above first floor commercial uses;
18. Convention centers; and,
19. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Evaluation & Findings: The subject property's future land use category is Commercial. The proposed use of a car wash with drive-through service falls under carwash or auto detailing, which is an allowed use in the Commercial future land use category. The use supports the objective of the commercial and mixed-use future land use categories by providing services to citizens and visitors of the Alachua and North Central Florida region.

Policy 1.3.d: *Design and performance standards*: The following criteria shall apply when evaluating commercial development proposals in the commercial & mixed-use future land use categories:

1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage and/or shared access;

Evaluation & Findings: The proposed site plan includes two vehicular ingress/egress point from NW 161st Place and cross access connected to the east and west to provide for safe and efficient vehicular movements. One pedestrian connection to the sidewalk adjacent to US Highway 441 is proposed to provide for safe pedestrian access.

2. Buffering from adjacent existing/potential uses;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the required buffer standards as established in Section 6.2.2 and Section 6.2.3 of the City's Land Development Regulations.

3. Open space provisions and balance of proportion between gross floor area and site size;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the minimum required open space standards as established in Section 6.7 of the City's Land Development Regulations.

4. Adequacy of pervious surface are in terms of drainage requirements;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the maximum allowable impervious area standard as established in Table 5.1-3. Of the City's Land Development Regulations. Additionally, all stormwater will be conveyed to an offsite stormwater management facility that is part of the Santa Fe Crossings Infrastructure Plan approved on May 22, 2023.

5. Placement of signage;

Evaluation & Findings: Commercial signage is to be permitted separately from the proposed site plan and the applicant has been notified of such requirement under Section 2.4.11. All incidental signage and signage required for traffic control has been reviewed and the site plan demonstrates that the placement of signage will not interfere with visibility, landscaping, utilities, or site circulation.

6. Adequacy of site lighting and potential impacts of lighting upon surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution in adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;

Evaluation & Findings: The proposed site plan included a photometric plan and has demonstrated compliance with the outdoor lighting standards as established in Section 6.4 of the City's Land Development Regulations.

7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout, drive aisles, and points of conflict;

Evaluation & Findings: 5 parking spaces are proposed for the development, including 2 handicap parking spaces. One turn-around space is provided at the mid-section of the drive-through lanes. A loading space is not required for the proposed site plan by Section 6.1 of the City's Land Development Regulations.

8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the tree protection and landscaping standards as established in Section 6.2 of the City's Land Development Regulations.

9. Unique features and resources which may constrain site development such as soils, existing vegetation and historic significance; and,

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. The soils present are well drained soils in hydrologic group A, with only slight limitations for development. There is no existing vegetation on the site other than grass/sod cover as it was cleared as part of the Santa Fe Crossings Infrastructure Plan approved on May 22, 2023. No historically significant structures are present on the site.

10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design.

Evaluation & Findings: No performance-based zoning requirements are being applied to the development.

Policy 1.3.e: *Density and intensity standards*.

1. *Non-mixed-uses*. The following density and intensity standards shall apply to non-mixed-use development proposals in the commercial & mixed-use future land use categories:
    a. *Density*. Residential uses are limited to a density of 10 dwelling units per acre in the Community Commercial land use category and 15 dwelling units per acre in the Commercial and Central Business District land use categories.
    b. *Intensity*. Non-residential uses are limited to an intensity of less than or equal to 0.5 floor area ratio for parcels 5 acres or greater, 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less.

Evaluation & Findings: The proposed site plan is a non-residential development consisting of ± 3,600 square feet of floor area on a ± 1.25-acre subject property. As such the permitted floor area ratio is 0.75 and the floor area ratio of the proposed site plan is ± 0.06 and is therefore acceptable.

Objective 5.1: *Natural Features*

The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: *Topography*: The City shall protect the natural topography of the City. Including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: *Soils*: The City shall ensure soil protection and intervention measures are included in the development process.

Policy 5.1.c: *Flood prone areas*: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permits when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: *Wetlands*: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and Suwannee River Water Management District.

Policy 5.1.e: *Habitat*: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as

known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. There are no concerns related to environmental features, topography, soils, flood prone areas, wetlands, or habitat on the subject property.

Objective 9.1: *Connections to Water and Wastewater Systems*

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

Policy 9.1.a: Any new development or redevelopment within a Commercial or Industrial land use category within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the City's Comprehensive Plan, shall connect to the City's potable water and wastewater system.

Evaluation & Findings: The proposed site plan is located with the City's potable water and wastewater service areas and will connect to these City services as required.

Transportation Element

Objective 1.1: *Level of Service*

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of any affected roadway segment.

Policy 1.4.d: The City shall require pedestrian paths within subdivision and within new developments to be connected to paths outside the development.

Evaluation & Findings: The proposed site plan shows a sidewalk connection from the internal pedestrian network to the sidewalk running along to NW US Highway 441, adjacent to the proposed development.

Policy 1.5.c: The City shall require new development and redevelopment which is compatible with an adjacent existing development(s) to interconnect with existing development (s) through one or more of the following methods:

1. Through the extension of a public or private street from the new development to the adjacent existing development or adjacent lands; and/or,
2. Through joint use of driveways and cross access agreements among adjoining properties to allow circulation between sites. Cross access between new development and existing development shall be configured to provide safe and convenient interconnectivity between the new development and all other existing development located along the cross access corridor.

Evaluation & Findings: The proposed site plan shows cross access to be connected to development to the east and west to provide for safe and efficient vehicular movements.

Community Facilities Element

Policy 1.1.d: The City hereby establishes the following level of service standards for sanitary sewer facilities:

a) *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection (FDEP).

b) *Quantity*: System-wide wastewater collection and treatment will be sufficient to provide a minimum of 250 gallons per day per equivalent residential unit (ERU) on an average annual basis. Plant expansion shall be planned in accordance with Rule 62-600.405, Florida Administrative Code, or subsequent provision.

c) *System capacity*: If the existing demand and reserved capacity of the committed use of the City's wastewater facility reaches 85% of the permitted capacity design, no further development orders for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of the City's wastewater facilities.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities for residential uses:

Facility Type	Level of Service Standard
Solid Waste Landfill	0.73 tons per capita per year

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of the City's solid waste facilities.

Policy 4.1.c: The City establishes the following level of service standards for potable water:

1. *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection.
2. *Quantity*: System-wide potable water distribution and treatment will be sufficient to provide a minimum 275 gallons per day per equivalent residential unit (ERU) on an average annual basis.

3. *Capacity*: Plant expansion shall be planned in accordance with Florida Administrative Code. Additionally, if the existing demand and reserved capacity f the City's potable water facility reaches 85% of the permitted design capacity, no further development orders or permits for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of the City's potable water facilities.

Conservation and Open Space Element

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. There are no concerns related to listed species or their habitat on the subject property. As such. A listed species inventory is not required prior to development approval.

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrological disturbances.

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. There are no concerns related to wetlands on the subject property.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Evaluation & Findings: There are no delineated wetlands on the subject property. Should wetlands be discovered, the development will be required to conform with the applicable policies and regulations established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation & Findings: The subject property is not located within or adjacent to a strategic ecosystem; therefore, the development will have no impact upon any strategic ecosystems identified within the ecological inventory report.

Regulated Plant & Animal Species

The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region.

Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation & Findings: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. No areas of the subject property have been prioritized as part of the Florida Natural Areas Inventory. If a regulated plant or animal species is discovered, the development will be required to conform with the applicable policies and regulations established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Soil Survey

The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff.) There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have a lower infiltration rate and therefore a higher runoff potential.

There are two soil types found within the subject property, shown in Table 2.

Table 2. Soil Types

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Fort Meade Fine Sand; 0 – 5% Slopes	A	Well Drained	Slight	Slight	41.5%
Arredondo Fine Sand; 0 – 5% Slopes	A	Well Drained	Slight	Slight	58.5%

Evaluation & Findings: The soil types present on the subject property do not pose any significant limitations for development.

Flood Potential

Panel 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the development area is in Flood Zone X (areas determined to be outside of the 500-year floodplain).

Evaluation & Findings: Since the subject property is located in Flood Zone X, there are no issues related to flood potential.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.

Evaluation & Findings: The subject property is located within a Karst sensitive area. No potential sink holes are known to exist on the site. Stormwater is being conveyed to an offsite

management facility approved as part of the Santa Fe Hills Infrastructure Plan and no new stormwater management facilities are proposed.

Wellfield Protection Zones

Policy 7.2.1 of the Future Land Use Element of the City's Comprehensive Plan establishes a 500-foot radius area around each city-owned potable water well.

Evaluation & Findings: The subject property is not located within a City of Alachua wellfield protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the City's Comprehensive Plan; therefore, there are no issues related to wellfield protection.

Historic Structures/Markers and Historic Features

The State of Florida and the Alachua County Historic Resources Inventory identify historic structures in addition to the City's Historic Overlay District, as established by Section 3.7 of the City's Land Development Regulations.

Evaluation & Findings: The subject property is not within the City's Historic Overlay District and the State of Florida and Alachua County Historic Resources Inventory note no historic structures or markers on the subject property.

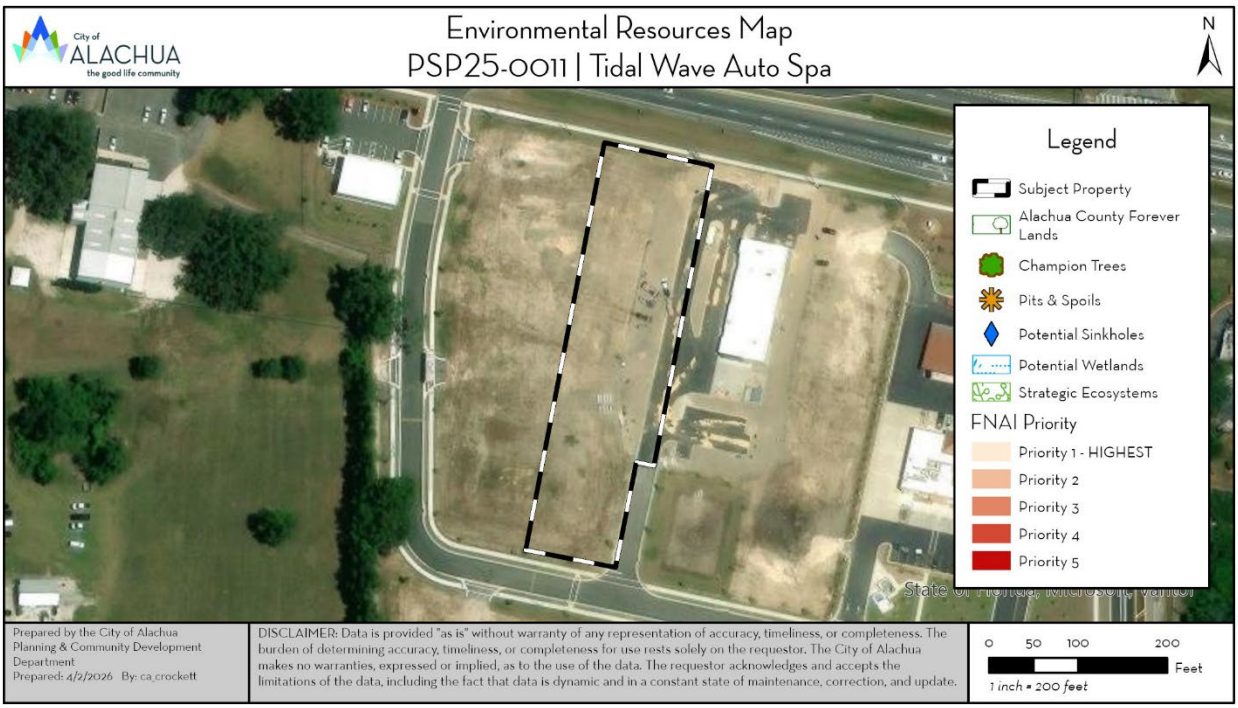

Figure 2. Environmental Resources Map

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Site Plan Standards

Section 2.4.9(E)(1) of the City's Land Development Regulations (LDRs) establishes the standards with which all site plans must be found compliant. The application has been reviewed for compliance with the standards of Section 2.4.9(E)(1). An evaluation of the findings of the applicant's compliance with the standards of Section 2.4.9(E)(1) is provided below.

(1) **Minor site plans and site plan standards.** A minor site plan or site plan shall be approved only upon finding the applicant demonstrates all the following requirements are met:

(a) ***Consistency with the Comprehensive Plan***. The development and uses proposed by the minor site plan or site plan comply with the goals, objectives and policies of the Comprehensive Plan.

Evaluation & Findings: An evaluation of the application's consistency with the Comprehensive Plan has been included within this report. Staff has found the application to be consistent with the City of Alachua Comprehensive Plan.

(b) ***Use allowed in zone district***. The use is allowed in the zone district in accordance with Article 4, Use Regulations.

Evaluation & Findings: The use type of carwash is a permitted use in the Commercial Intensive (CI) zone district.

(c) ***Zone district use specific standards.*** The development and uses proposed by the minor site plan or site plan comply with Section 4.3, Use specific standards.

Evaluation & Findings: Use specific standards for carwash are established in Section 4.3.4(J)(5) of the City's Land Development Regulations. The application has been reviewed against, and found to comply with, the use specific standards.

(d) ***Development and design standards***. The development proposed by the minor site plan or site plan and its general layout and design comply with all applicable standards in Article 6, Development Standards.

Evaluation & Findings: The application has been reviewed for compliance with all relevant standards of Article 6, including Section 6.1, *Off-street parking and loading standards,* Section 6.2, *Tree protection and landscaping standards,* Section 6.3, *Fencing standards,* Standard 6.4, *Exterior lighting standards,* Section 6.6, *Infill standards,* Section 6.7, *Open space standards,* Section 6.8, *Design standards for business uses,* and Section 6.9, *Environmental protection standards.* The applicant submitted a request for, and was granted, an alternative landscape plan as set forth in Section 6.2.2(D)(9). The alternative landscaping is noted on Sheet L-1.1 in the submitted material

(e) ***Subdivision standards.*** In cases where a subdivision has been approved or is pending, the development proposed by the minor site plan or site plan and its general layout and design comply with all applicable standards in Article 7, Subdivision Standards.

Evaluation & Findings: No subdivision of land is proposed as part of this application; therefore, this standard is not applicable.

(f) **Complies with all other relevant City laws, ordinances, regulations, requirements, and State and Federal laws and regulations**. The proposed development and use complies with all other relevant City laws, ordinances, regulations, requirements, and with all State and Federal laws and regulations.

Evaluation & Findings: The application complies with all other relevant City laws, ordinances, regulations, requirements, and State and Federal laws and regulations.

Design Standards for Business Uses

Section 6.8.2 of the City's Land Development Regulations (LDRs) establishes the standards with which all business uses, unless exempted by Section 6.8.1, must be found compliant. The application has been reviewed for compliance with the standards of Section 6.8.2. An evaluation of the findings of the applicant's compliance with the standards of Section 6.8.2 is provided below.

(A) *Façade and material design*.

(1) *Generally*. All façades facing a street, lands containing existing residential uses, or vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8, or RMF-15, shall be subject to the standards set forth in Subsection 6.8.2(A)(2).

(2) *Standards*.

(a) *Glazing*.

(i) Glazing of the front facade in the following amounts:

a. Twenty percent of the ground floor façade area when it faces a street or a publicly-accessible parking area which is a part of the development and consists of 15 percent or more of the development's minimum off-street parking requirement pursuant to Section 6.1.4(B);

b. Fifteen percent of the ground floor façade area when it faces any vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.

(ii) For the purposes of this section, the ground floor façade area of single-story buildings shall be calculated by measuring the applicable building wall between the finished grade and the underside of the roof of the facade. When a building wall includes a parapet, the ground floor façade area shall be calculated by measuring to the top of the parapet. For buildings with more than one story, the ground floor façade area shall be calculated by measuring the applicable building wall between the finished grade and the underside of the floor above the ground level floor.

(iii) Windows shall not use reflective or heavily tinted glass that obstructs views into the building.

(iv) Spandrel glass may be used only when an architectural floorplan demonstrates that windows cannot be provided due to a limitation presented by the interior layout or functional purpose of such interior space.

Evaluation & Findings: Three of the four façade faces substantially face a street, publicly accessible parking area which consists of 15 percent or more of the development's minimum off-street parking requirement, and/or vacant lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8, or RMF-15 or lands containing existing residential uses. The north, east, and south elevations each meet the "minimum 20%" glazing requirement.

(b) *Façade massing*.

(i) *Offset required*. Front facades and street-facing facades shall incorporate wall offsets of at least two feet in depth (projections or recesses) a minimum of every 30 feet. Each required offset shall have a minimum width of ten feet.

(ii) *Offset alternatives*. The following alternatives can be used in place of the required front façade offsets:

a. Façade color changes following the same dimensional standards as the offset requirements;

b. Pilasters having a minimum depth of one foot, a minimum width of one foot, and a minimum height of 80 percent of the façade's height; and/or

c. Roofline changes when coupled with correspondingly aligned façade material changes.

Evaluation & Findings: Three of the four façade faces substantially face a street. The east façade is approximately 133 feet in width and includes offsets. The north façade is approximately 41 feet in width, with a break at approximately 19 feet. The south façade is approximately 41 feet in length, with a break at approximately 19 feet.

(c) *Material design*.

(i) A minimum of 25 percent of the materials utilized for each side facade and the rear façade shall be the same as the materials utilized for the front or street-facing façade(s).

Evaluation & Findings: All four façade faces use an approximately similar ratio of the same four materials and glazing.

(d) *Prohibited materials*. The following materials shall be prohibited:

(i) Metal siding in more than 50 percent of any façade when visible from a street, lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses;

(ii) Exposed smooth finished concrete block when visible from a street, lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses; and,

(iii) Exposed split face concrete block in more than 60 percent of any façade.

Evaluation & Findings: The façade is comprised of two veneer materials of different colors and materials for accents on each façade face and the parapet wall, comprising under 60% of the building materials.

(3) *Screening of mechanical equipment*. Mechanical equipment shall be fully concealed from visibility from a street, lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.

Evaluation & Findings: The applicant has submitted an exhibit demonstrating that all mechanical equipment will be screened from view with landscaping and canopy.

(B) *Connections to sidewalk system*.

(1) When a sidewalk system exists within a right-of-way which is contiguous to the development, a minimum of one pedestrian connection to the sidewalk system shall be provided. On-site pedestrian circulation patterns shall be configured to provide safe and convenient access from the off-site sidewalk system to the main entrance(s) of the building(s). Sidewalks shall be constructed in accordance with Subsection 7.3.2(B), Configuration.

Evaluation & Findings: A sidewalk system is present along U.S. Highway 441, NW 174th Drive, and NW 161st Place. The applicant has provided a connection from the employee office space to the sidewalk on 441 NW US Highway.

(C) *Interconnectivity with adjacent business uses*.

(1) All uses subject to this section shall provide interconnection with adjacent existing compatible developments through one or more of the following methods:

(a) Through extension of a public or private street from the new development to the adjacent existing development or adjacent lands; and/or

(b) Through joint use of driveways and cross access agreements among adjoining properties to allow circulation between sites. Cross access between new development and existing development shall be configured to provide safe and convenient interconnectivity between the new development and all other existing development located along the cross-access corridor.

Evaluation & Findings: The proposed site plan shows one cross access corridor which connects existing developments to the east and west and provides safe and efficient vehicular movements. A site plan is a final development order, and if approved, concurrency will be reserved.

PUBLIC FACILITIES IMPACT ANALYSIS

Section 2.4.14 of the City's Land Development Regulations (LDRs) establishes the standards for a Certificate of Concurrency Compliance which applies to all development orders unless exempted by Section 2.4.14(C). The application has been reviewed for impacts to roads, sanitary sewer, solid waste, stormwater management, potable water, and recreation facilities to ensure the application's potential impacts do not negatively impact the level of service (LOS) for those public facilities.

Traffic Impact

The following impacts are expected on the roadway segments identified in Table 3.

Table 3-1. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2]	Segment Description	Lanes	Functional Classification	Area Type	LOS
6	U.S. Hwy 441 From I-75 to CR 235A	4/D	Principle Arterial	Urban	D
7	U.S. Hwy 441 From CR235A to NW 188th Street	4/D	Principle Arterial	Urban	D
16	CR235A From U.S. Hwy 441 to North City Limit	2/U	Major Collector	Comm	D
17	CR 235A From U.S. Hwy 441 to CR 235	2/U	Major Collector	Comm	D

1 City of Alachua Comprehensive Plan, Transportation Element.
2 For developments generating less than 1,000 trips, affected roadway segments are identified as all those wholly or partially located within 1/2 mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater [Section 2.4.14(H)(2)(a)of the LDRs].

Table 3-2. Projected Impact on Affected Comprehensive Plan Roadway Segment

Traffic System Category	Segment 6 US 441		Segment 7 US 441		Segment 16 CR235 A		Segment 17 CR235A	
	AADT	Peak Hour	AADT	Peak Hour	AADT	Peak Hour	AADT	Peak Hour
Maximum Service Volume[1]	39,000	3,510	43,000	3,870	15,120	1,359	15,120	1,359
Existing Traffic[2,3]	32,500	2,782	24,000	2,093	2,524	227	7,200	647
Reserved Trips[4]	2,138	207	1,658	150	1,174	117	4,772	448
Available Capacity[4]	4,362	521	17,342	1,627	11,422	1,015	3,148	264
Increase/Decrease in Trips Generated by Development[5,6]	349	47	271	20	78	4	78	8
Residual Capacity	4,013	474	17,071	1,607	11,344	1,011	3,070	256
Residual Percentage of Permitted Design Capacity Utilized	89.71%	86.50%	60.30%	58.48%	24.97%	25.61%	79.70%	81.16%

1 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT/Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
2 Florida Department of Transportation. (2026). *2025 Count Data*. Accessed via Florida Traffic Online April 2026.
3 County Facility AADT counts provided by Alachua County Public Works, April 2026. County facilities only counted for AADT. PM Peak counts are represented as a ratio of the MSV.
4 Source: City of Alachua April 13, 2026, Development Monitoring Report.
5 Trip Generation Formula: ITE Trip Generation 11th edition; Trip Distribution AADT: Segment 6 – 45%, Segment 7 – 35%, Segment 16 – 10%, Segment 17 – 10%
6 Trip Generation Formula: ITE Trip Generation 11th edition; Trip Distribution Peak Hour: Segment 6 – 60%, Segment 7 – 25%, Segment 16 – 5%, Segment 17 – 10%

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of the affected roadway segments; therefore, the impacts are acceptable. Note that impacts of the proposed site plan may negatively impact the capacity of roadway segment 6 for average annual daily trips (AADT); however, level of service standards are maintained and monitored for PM peak hour trips per Policy 1.1.a of the Transportation Element of the City of Alachua Comprehensive Plan. A site plan is a final development order, and if approved, concurrency will be reserved.

Potable Water Impacts

Table 4. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity[1]	3,000,000
Less Actual Potable Water Flows[1]	1,565,500
Reserved Capacity[2]	440,296
Available Capacity	994,204
Increase/Decrease in Potable Water Demand from Application[3]	33,600
Residual Capacity	960,604
Residual Percentage of Permitted Design Capacity Utilized	67.97%

1 City of Alachua Public Services Department, April 2025
2 City of Alachua April 2026 Development Monitoring Report
3 Formula: Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 4.1.c(2): 70 GPM * 8 operating hours

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of the City's potable water facilities; therefore, the impacts are acceptable.

Sanitary Sewer Impacts

Table 5. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Permitted Capacity[1]	1,500,000
Less Actual Treatment Plant Flows[1]	813,000
Reserved Capacity[2]	409,317
Available Capacity	277,683
Increase/Decrease in Sanitary Sewer Demand from Application[3]	22,730
Residual Capacity	254,953
Residual Percentage of Permitted Design Capacity Utilized	83.00%

1 City of Alachua Public Services Department, April 2025
2 City of Alachua April 2026 Development Monitoring Report
3 Formula: Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 1.1.d(b): 33,600 GPD * 67.65%

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of the City's wastewater facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Solid Waste Impacts

Table 6. Solid Waste Impacts

System Category	Pounds Per Day	Tons Per Year
Existing Demand[1]	45,184.00	8,246.08
Reserved Capacity[2]	61,034.53	11,138.80
Increase/Decrease in Demand Generated by Application[3]	43.2	7.88
New River Solid Waste Facility Anticipated Capacity[4]	30+ Years	

1 Bureau of Economic & Business Research, University of Florida, Estimates of Population by County and City in Florida (2023); Policy 2.1.a, Community Facilities Element. Formula: 11,015 Persons x 0.73 tons per year.
2 City of Alachua April 2026 Development Monitoring Report
3 Formula: Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996. Formula used: (12 lbs. / 1,000 sq. ft./day) * 3,600 sq. ft.
4 New River Solid Waste Association, April 2024

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of solid waste facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Recreation Facilities

The proposed development is a nonresidential development; therefore, there are no impacts to recreation facilities. The development will have no impact to the Level of Service (LOS) of recreation facilities.

Public School Facilities

The proposed development is a nonresidential development; therefore, there are no impacts to public school facilities. The development will have no impact to the Level of Service (LOS) of public school facilities.

Stormwater Management Facilities

The proposed site plan application is part of the Santa Fe Crossings Infrastructure Plan approved on May 22, 2023, and will convey stormwater to off-site stormwater management facilities as part of the Santa Fe Crossings Infrastructure Plan. A stormwater management report was submitted by the applicant as part of the application materials and demonstrates compliance with the level of service standard for stormwater management facilities. No City maintained facilities are to be impacted by the site plan. The proposed site plan application is not anticipated to impact the level of service of stormwater management facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

CONDITIONS

1. The applicant acknowledges and agrees that it shall address all comments provided by Claudia S. Vega, P.E., Director of Engineering of eda consultants, inc. in a letter dated April 1, 2026, and Tom Ridgik, P.E., Engineering Supervisor, in a letter dated March 4, 2026 and located in exhibit "B" of the April 21st, 2026, Staff Report. The applicant further agrees that a verification by City Staff in the Planning & Community Development Department that all comments have been sufficiently addressed shall be required prior to the issuance of a building permit for any building activity associated with this Development Order. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
2. The applicant acknowledges and agrees that it shall obtain all other applicable local, state, and federal permits before the commencement of site plan work. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
3. The applicant acknowledges and agrees that Conditions 1 - 2 as stated above do not inordinately burden the land and shall be binding upon the property owner, including any subsequent property owners, successors, or assigns, and that the site plan shall comply with Conditions 1 – 3 as stated herein.

RE: Notice of Hearing to be Scheduled for PSP25-0011 Tidal Wave Spa

Dear Josh Russell,

On March 18, 2026, the City of Alachua received your revised site plan for PSP25-0011 Tidal Wave Spa submitted on behalf of Alachua 441/235, LLC. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been scheduled for the **April 21, 2026** Planning & Zoning Board meeting.

You must provide two *double sided, three-hole punched, color sets* of each **complete** application package, seven full size sets of site plans, and a digital copy of all materials in PDF format on a CD or by emailing a Cloud/FTP link to download the materials to planning@cityofalachua.org *no later than 10 business days prior to the Planning & Zoning Board meeting at which your application is scheduled to be heard*; therefore, the above referenced materials must be submitted to the City no later than ***Monday, April 6, 2026***. Materials may be submitted earlier than this date.

Additionally, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing; therefore, posted notice signs must be placed on the property no later than ***Monday, April 6, 2026***. These signs will be ready for pickup after 12:00 PM on Thursday, April 2, 2026. You will be notified again when the signs are available.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6123 or at pa_stevens@cityofalachua.org.

Sincerely,

Parker A.H. Stevens
Planner

Ref: Site development plans for Tidal Wave Auto Spa

Dear Carson Crockett:

The following are our comments for the site plans for Tidal Wave Auto Spa.

1. **Sheet C-200**
    a. Please show the extent of the asphalt that will need to be demolished and rebuilt in order to install AC-1 CI.
    b. SWCB-L EX-1's label indicates that it only has a 15" outflow pipe, which is troubling due to the proposed pipe to SWCB-L EX-1 being 18". The plans label an existing 18" HDPE connected to the structure, which is inconsistent with the structure label and would not require an upsizing of the existing pipes. Please confirm the sizes of the SWCB-L EX-1 outflow pipe. If the downstream pipes are truly 15" they will need to be upgraded.

2. **Sheet C-520**
    a. Cars might still utilize the business during heavy rainfall, this spread should be addressed according to general engineering practices, as the revised 15.46 ft and 10.38 ft of gutter spread over AA-1 and AA-3 respectively still exceed normal widths.

Please do not hesitate to contact me if you have any questions/comments.

Sincerely,

Claudia S. Vega, P.E.

RE: Project Assistance Team (PAT) Comments for Tidal Wave Auto Spa-Alachua Site Plan Application

Dear Josh Russell,

On February 12, 2026, the City of Alachua received your updated site plan for the Tidal Wave Auto Spa-Alachua Site project, which proposes the construction of a ± 3,600 square foot building with associated site improvements on a ± 1.25-acre subject property (tax parcel 03044-003-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting may be scheduled to discuss these comments upon request of the applicant.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Thursday, April 2, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April 2026 Planning & Zoning Board (PZB) Meeting**.

Address the following insufficiencies:

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Comprehensive Plan Consistency Analysis**
   a. The Comprehensive Plan Consistency Analysis must be provided in a way that directly calls out specific goals, policies and objectives that are being addressed. This is typically represented as:
      i. *Policy #:*
      ii. **Evaluation:**
2. **Article 6 – Development Standards**
   a. Section 6.2 – Tree protection and landscaping standards
      i. Staff notes that 6 Red Maples are provided on the site plan, and 5 are listed on the legend. Additionally, 8 Glory Maples are provided on the site plan, and 9 are listed on the legend. Revise the landscaping plan.
      ii. The understory trees on the north buffer are approved, however, the trees must be evenly spaced across the buffer. Revise and resubmit.
      iii. Per Section 6.2.1(G)(1)(c), a note shall be included that all vegetative materials identified in the Florida Exotic Pest Plant Council's List of Invasive Plant Species, as amended, shall be removed at time of development. Provide required note on Sheet L-1.1 to comply with this code section.
      iv. Per Section 6.2.2(C)(8), a narrative explaining how Florida Friendly Landscaping Practices have been incorporated into the landscape plan. Provide a note on Sheet L-1.1 to comply with this section.
      v. Section 6.2.2(D)(9)(B)(i) of the LDRs states that Landscape plantings shall comply with the following standards: ""Florida #1" grade quality standard or better as defined and specified within the latest edition of the "Florida Grades and Standards for Nursery Plants" as published by the Florida Department of Agriculture and Consumer Services, Division of Plant Industries. Provide healthy, vigorous stock grown in a recognized nursery in accordance with good horticultural practices and free of disease, pests, and defects." Provide a note on Sheet L-1.1 confirming compliance with this code section.
   b. Section 6.4 – Exterior lighting standards
      i. Per Section 6.4.4(C)(2), Maximum initial horizontal illumination shall not exceed in business districts, ten footcandles at building entries and five footcandles in parking lots. Staff notes multiple locations where the maximum footcandles are exceeded. Revise and resubmit.
      ii. Per Section 6.4.4(F)(1), light fixtures in excess of 60 watts or 100 lumens shall use full cut-off lenses or hoods to prevent glare and spillover from the site onto adjacent lands and roads. The wall mounted lights labeled LC2 exceed the wattage noted in the section. Provide details for the light fixtures demonstrating compliance with this code section.
   c. Section 6.5 – Signage

i. Remove note: Pylon Sign (# 17) on the Legend for Sheet C-100.

3. **Outside Review**
   a. Comments from outside reviewer will be delivered as soon as they are provided to the City to be reviewed and addressed
   b. Review and address comments from City of Alachua Public Services dated 3/4/2026 (attached).

If you have any questions regarding the information above, please contact me at (386) 418-6123 or at pa_stevens@cityofalachua.org. We look forward to receiving your revised application.

Sincerely,

Parker A.H. Stevens
Planner

RE: **Tidal Wave Auto Spa Site Plan**

Public Services has reviewed the subject project (Feb 2026 Submittal Documents) and offer the following comments. Review was specific to the Public Services Utilities.

NO.	COMMENTS
1	**Comment on Dec Submittal** **Tract 4 Extension of Water Main Loop** Is the Design Engineer aware of extending the water main loop to Tract 4? Has the Design Engineer been in contact with the Infrastructure Site Developer? Will any of this water main extension be installed within Tract 4? Is so, construction coordination shall be required. As per Sheet C6.00 of the Santa Fe Crossings Infrastructure Plan, text reads: 'AS A CONDITION OF SITE DEVELOPMENT, DEVELOPER SHALL BE RESPONSIBLE FOR THE EXTENSION OF THE WATER MAIN LOOP TO TRACT 4 TO COMPLETE THE 8-INCH LOOP". Please **submit** response and other applicable information.

NO.	COMMENTS
	Comment on Feb Submittal **Tract 4 Extension of Water Main Loop** The following comment is repeated from above. As per Sheet C6.00 of the Santa Fe Crossings Infrastructure Plan, text reads: 'AS A CONDITION OF SITE DEVELOPMENT, DEVELOPER SHALL BE RESPONSIBLE FOR THE EXTENSION OF THE WATER MAIN LOOP TO TRACT 4 TO COMPLETE THE 8-INCH LOOP". Approval of the Tidal Wave Site Plans is contingent upon the water main loop being installed and completed. The City suggests that the Santa Fe Crossing Infrastructure developer be contacted to resolve this issue. Please **submit** response. **Revise and Resubmit** applicable sheets.
2	**Comment on Dec Submittal** **Needed and Available Fire Flow Calculations (NFF & AFF)** This reviewer was unable to locate the Needed Fire Flow (NFF) calculations as well as the Available Fire Flow supporting documentation. Please **submit** requested information. **Comment on Feb Submittal** The Needed Fire Flow (NFF) of 1500 gpm is now shown on Sheet C-300. Please **submit** the supporting calculations. Please **submit** the Available Fire Flow (AFF) supporting documentation, including the Field Fire Flow Test Report.
3.	**Comment on Dec Submittal** **Sheet C-010 Demolition Plan** Please confirm design intent is to remove existing water valves and existing hand hole (probably a clean-out). Once confirmed, City will discuss internally with its water distribution staff to determine if additional action is required.

NO.	COMMENTS
	Please submit response. **Comment on Feb Submittal** **Sheet C-010 Demolition Plan** **Approved**
4.	**Comment on Dec Submittal** **Sheet C-300 Utility Plan** **Utility Plan Notes** Please add the following: " 19. WATER AND WASTEWATER SYSTEMS TO BE OWNED AND OPERATED BY CITY OF ALACHUA SHALL BE CONSTRUCTED IN ACCORDANCE WITH "CITY OF ALACHUA, PUBLIC SERVICES, DESIGN AND CONSTRUCTION MANUAL, LATEST EDITION". 20. PROVIDE TRACER WIRE SYSTEM FOR WATER PIPING AS SHOWN ON THE DETAILS AND AS PER THE COA DCM. 21. TRACER WIRE SYSTEM SHALL COMMENCE AT THE TIE-IN(S) AT EXISTING WATER MAIN(S) AND TERMINATE AT EACH COA END OF MAINTENANCE POINT. 22. WATER METER APPURTENANCES SHALL BE FURNISHED AND INSTALLED BY THE CONTRACTOR. THE WATER METER ITSELF WILL BE FURNISHED AND INSTALLED BY THE CITY. 23. WET TAP(S) TO PRESSURIZED WATER MAINS SHALL BE DONE BY A SUB-CONTRACTOR PRE-APPROVED BY THE CITY OF ALACHUA. 24. SERVICE WATER PIPING UPSTREAM THE WATER METER SHALL BE PVC, TYPE AND SIZE AS SHOWN ON THE DETAILS. 25. PIPING BETWEEN EACH METER AND EACH BFP SHALL BE GALVANIZED STEEL. 26. INSTALL EACH WATER METER SO ITS EDGE IS TWO FEET FROM EDGE OF SIDEWALK. DONOT INSTALL WATER METERS IN SIDEWALKS. 27. FOR EACH COA END OF MAINTENANCE CLEANOUT, PROVIDE A BURIED ELECTRONIC MARKER AS PER COA STANDARD DETAILS. 28. PROVIDE ENCLOSURES FOR BFP ASSEMBLIES AS SHOWN ON THE DETAILS. **Special Notes**

NO.	COMMENTS
	At the end of Special Notes 9 and 11, please add: " , WHICH IS THE CITY END OF MAINTENANCE" **Existing Cleanout, or New** Please clarify. Will this cleanout remain existing or will it be replaced? C-010 Demolition Plan suggests it will be replaced with a new one. If new, please call out cleanout size, rim and floor elevations as well as connecting pipe inverts. Also, call out that this cleanout is "CITY END OF MAINTENANCE". Please **Revise & Resubmit** this sheet. **Comment on Feb Submittal** **Sheet C-300 Utility Plan** **Approved**
5	**Comment on Dec Submittal** **Sheet C-300 Utility Plan** **Water Insert** This inset shows two taps off the existing 12-inch water main. Is that your design intent? For this application, there is often only 1 tap. Also see notes 25 & 26. Please modify as required. The Engineer has decided not to use the existing water meter assemblies as per the Santa Fe Crossing design documents. Instead the existing 12-main is being tapped and water meters/BFPS installed in a different location. Please note that the water meters and tapped connection may require a PUE. This is because the road and its "ROW" is private. Please show this PUE. Meanwhile, this issue will be discussed with various City staff to determine is a PUE is indeed required. Please **Revise & Resubmit** this sheet. **Comment on Feb Submittal** **Sheet C-300 Utility Plan** Roads are private for which there is no public ROW. The City is evaluating whether there is a blanket PUE in effect for this private road. If such a blanket PUE exists, there is no need for an additional PUE. But if there is no such blanket PUE, a PUE may be required for

NO.	COMMENTS
	these meters. No action required by Design Engineer now, until City completes its evaluation. **FYI**
6.	**Comment on Dec Submittal** **Sheet C-300** **Domestic Water Meter Sizing Calculations** Please **submit** a letter that includes the following: Official letterhead of the Engineer of Record, or equivalent credentialed professional Addressee: Tom Ridgik, Public Services Engineering Supervisor, City of Alachua Signed and sealed by Engineer of Record, or equivalent credentialed professional Building Design Flow (gpm) Proposed Water Meter Size (size using building design flow with meter flow ranges identified in City Ordinances) PDF version of the letter is acceptable; letter can be forwarded by email Also, on either the cover sheet or the utility plan, call-out the: Building Design Flow Water Meter Size **Submit** the supporting calculations The meter sizing method used must be acceptable to COA. Although the City may consider other methods, the City will accept the Florida plumbing code method that calculates facility water supply design flow together with flow meter ranges as set forth by City ordinances. **Resubmit** affected sheets **Comment on Feb Submittal** **Sheet C-300 Utility Plan** **Domestic Water Meter Sizing Calculations** **Approved**

RE: Project Assistance Team (PAT) Comments for Tidal Wave Auto Spa-Alachua Site Plan Application

Dear Josh Russell,

On December 22, 2025, the Planning & Community Development Department received your revised site plan application for the Tidal Wave Auto Spa-Alachua project, which proposes the construction of a ± 3,600 square foot building with associated site improvements on a ± 1.25-acre subject property (tax parcel 03044-003-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting to review these comments may be scheduled by request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Thursday, February 12, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April 21, 2026, Planning & Zoning Board (PZB) Meeting.**

Please address the following insufficiencies:

Deficiencies to be Addressed

***Unless otherwise noted, references to the code sections are to the City of Alachua Land Development Regulations. ***

1. Article 2, Administration

   Section 6.1, Off-Street Parking and Loading Standards

   a. According to Section 2.4.9(E)(1)(a) of the Land Development Regulations (LDRs), a justification must be provided to demonstrate how the proposed drive-thru, self-service carwash is consistent with the adopted policies, goals, and objectives of the Comprehensive Plan. This justification must extend beyond general statements of alignment and specifically detail how the proposal aligns with particular goals, objectives, and policies. This requirement was noted as comment #6 in the Letter of Comments dated December 04, 2025. However, the resubmittal received on December 22, 2025, includes a Comprehensive Plan Consistency Analysis that offers only a summary. It lacks the specific goals, objectives, and policies necessary to demonstrate that the proposal aligns with the Comprehensive Plan. Please address.

   b. Please confirm if there will be an office building on the site. Additionally, provide the number of employees that will be at the site to ensure there are adequate parking stalls for both employees and clients to reduce potential parking shortages.

2. Article 5, Density, Intensity, and Dimensional Standards

   Section 5.1-3, Table of Dimensional Standards in the Business Zoning Districts

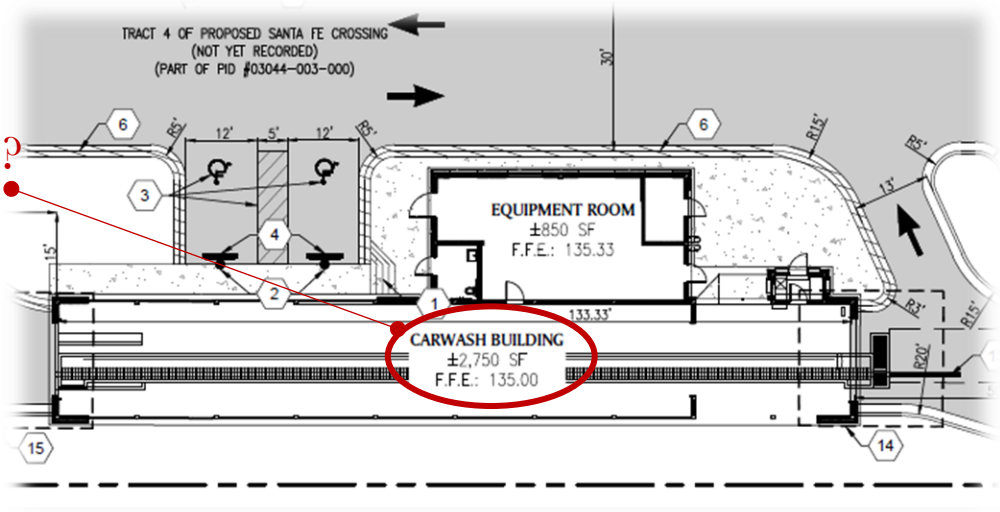
   a. The Site Plan provided includes a Site Date Table on the initial sheet. This table outlines the required and proposed measurements; however, these measurements are not shown on the site plan, Sheet C-100. Please include clear measurements to confirm that the proposed layout meets the minimum setback requirements.

3. Article 6, Development Standards

   Section 6.1, Off-Street Parking and Loading Standards

   a. Section 6.1.4, Table 6.1-1, Minimum Off-Street Parking Standards, requires a total of 1 standard parking stall for each employee. According to Sheet C-100 of the Site Plan set, 3 spaces are being provided. Additionally, Section 6.1.7 of the LDRs, states that standard parking stalls must measure at least 9' x 18'. However, in the referenced sheet, all standard parking stalls measure 9' x 19'. Please confirm.

b. Per Section 6.1.8(A), Table 6.1-4, Carwash vehicle stall, automatic shall have a minimum of six (6) stacking stalls, which shall be measured from the entrance. Please demonstrate there is adequate stacking. The stacking stall shall measure at a minimum of 9' x 20' in size; please clearly depict this measurement in accordance with LDRs, Section 6.1.8(B)(1)(a).



c. Section 6.1.8(B)(1)(c)(ii) of the LDRs, requires sidewalks to be separate from stacking areas by walls or landscaping with berms. Sheet C-100 appears to depict internal sidewalks, but it's not clear. Please label the area as a sidewalk and provide the width measurement.

d. In an earlier comment, there is a request for confirmation regarding an office space. This request is based on the figures shown on Sheet C-100, which may indicate the presence of a doorway. This question is particularly relevant because the accessible spaces are located near what is currently labeled as an Equipment Room. Please refer to the depiction below from the referenced sheet for clarification. Please confirm.

. Sheet C-100, Site Plan, depicts an area labeled as Carwash Building. Is this the tunnel through which vehicles pass for carwash services? The Site Analysis shown on the stated sheet refers to the 2,750 SF as a carwash tunnel. Please keep the referencing consistent throughout the entire plan and related documents.

Drive-Thru Tunnel?
Please confirm. If confirmed, update label.

f. Sheet C-100, Site Plan, does not show pedestrian crosswalks, which shall be at minimum 10-feet in width, either raised above the adjacent pavement or otherwise designed with sustainable alternative materials to provide access to primary building entrances and parking areas.

Section 6.2, Tree Protection and Landscaping Standards

Section 6.2.2 Landscaping Standards

a. Per Section 6.2.2(B)(8), it applies when there are eight (8) or more parking stalls. There are a total of 29 parking spaces depicted, of which 3 are for employee parking (per Sheet C-100, Site Plan), 2 are for accessible parking (per Sheet C-100), and the remaining 24 are stalls for each parking bay area.

b. Section 6.2.2(C) requires the submittal of a landscape plan, which was included in the site plan set. However, the referenced section also requires a narrative explaining how Florida Friendly Landscaping practices have been incorporated into the landscape plan. Sheet L1.1, Landscape Plan, was not provided. Include with the updated submittal.

c. LDRs, Section 6.2.2(D)(3)(e), requires a perimeter buffer along the outer edge of the parcel that must extend to the property boundary line or right-of-way line. The landscape buffer located to the south of the subject property is set back and does not reach the required property boundary line. If there are safety, health, or welfare reasons for this setback, a justification must be provided and noted on the plan. If no justification is provided for consideration, the requirements remain applicable.

d. The application includes a memorandum dated July 30, 2025, regarding a request for alternative landscaping options. While alternatives may be considered, strong justification is required for any requests that could lead to unreasonable or impractical situations; otherwise, the established standards will prevail. If there are existing natural features or other unique circumstances, and a valid justification is provided, the request will be reviewed by the Land Development for consideration.

e. Sheet L1.1, the Landscape Plan included in the site plan set, contains the alternative landscape request. If the request is approved, the reference plan sheet shall include only a note specifying what was approved and the approval date. Please submit a corrective request.

f. The note on Sheet C-100, Site Plan, indicates that the architectural plans contain details about the waste receptacles. However, these referenced plans were not included in the plan set received as of December 22, 2025. This situation is concerning, as it relates to Section 6.2.3, Screening Standards in the LDRs, which requires a solid fence measuring at least 6-feet in height. This fence must be constructed of materials such as wood, masonry, stone, finished (non-reflective) metal, or other similar materials. Alternatively, landscaping using evergreen materials capable of providing screening must reach a minimum height of 6-feet within three years from the date of planting.

g. The note on Sheet C-100, Site Plan, indicates that the architectural plans for screening the vacuum are part of the plan set; however, the proposed plan is absent.

Section 6.4, Exterior Lighting Standards

Section 6.4.5 Height Standards

a. Section 6.4.5(A)(1) specifies that a lighting fixture shall not exceed a height of 15-feet, whether mounted on poles or walls. However, Sheet E1.2 of the Site Photometric Plan indicates a lighting pole with a total height of 25-feet, of which 6-feet is embedded in the ground. Based on these measurements, the proposed lighting exceeds the allowable height. Correct.

Section 6.5.4, Permanent Signs

Section 6.5.4(C) In Business Districts

a. Freestanding signs for multi-tenant developments are permitted, with the adherence of the adopted standards that apply in Section 6.5.4. The plans submitted do not include a sign plan. If there is interest in having a freestanding

sign, its location shall be indicated on the site plan to ensure setbacks and other related requirements are met. A detailed sign plan is only required at the Construction Plan level of review.

Section 6.7, Open Space Standards

Section 6.7.3(A) General Standards

a. There is a minimum requirement of 10% of the gross site area to be designated as open space. This information must be clearly indicated on both the Site Plan (C-100) and the Landscaping Plan (L1.1) to ensure compliance.

4. Miscellaneous

a. The Sheet List Table indicates a Sheet numbered C-000, titled Cover Sheet, but there is no corresponding page that provides this information.
b. The plan set includes additional pages that are not listed in the Sheet List Table, which are numbered and titled as follows:
    1. 1 G0.1, Cover Sheet, Sheet Index, Legend
    2. 1 G1.1, Specifications
    3. 1 G.1.2, Specifications
    4. 1 LS.1, Life Safety
    5. A1.1, First Floor Plan
    6. A2.1, Exterior Elevation
    7. A3.0, Door & Window Schedule/Details
    8. A5.1, Building Section
    9. A5.2, Building Section
    10. A6.1, Sections/Details
    11. A6.2, Sections/Details
    12. A7.1, Trench Details
    13. A8.1, Roof Plan
    14. AB.1, Auxiliary Buildings
    15. AB.2, Auxiliary Buildings
    16. AB.3, Canopies
    17. S0.1, General Notes
    18. S0.2, Structural Special Inspections
    19. S1.1, Foundation Plan
    20. S2.1, Roof Framing Plan
    21. S3.1, Foundation Sections & Details
    22. S3.2, Foundation Sections & Details
    23. S4.1, Framing Sections & Details
    24. S5.1, Framing Sections & Details
    25. S6.1, Auxiliary Buildings

26. E0.1, Electrical Notes
27. E1.1, Site Power Plan
28. E1.2, Site Photometric Plan
29. E2.1, Electric Plan
30. E5.1, Electrical Riser Diagram and Panel Schedules
31. M2.1, Mechanical Plan
32. P0.1, Plumbing Notes
33. P0.2, Plumbing Notes
34. Drawing No. 1 of 2, Alta/NSPS Land Title Survey
35. Drawing No. 2 of 2, Alta/NSPS Land Title Survey

c. The response to comments received on December 22, 2025, is mistakenly addressed to Spartanburg County, instead of the of Alachua. Please correct this error.

d. Comment No. 3, cited on December 04, 2025, addressed the requirement for a current, signed, and sealed boundary survey prepared by a Florida licensed land surveyor. The response to the comments letter indicates, "See attached survey." All related to the review of the proposed carwash must be bound, listed on the sheet index, titled, and numbered according to the information outlined in the sheet index. While a Land Title Survey is included, it is not referenced in the sheet index, nor is it titled or numbered to match a corresponding sheet. Please make the necessary corrections.

e. The Land Title Survey, Drawing No. 2 of 2, needs to be updated to reflect the correct information. The information being referenced is that the lot to the east is Chick-Fil-A, and the lot to the west is Firestone. However, Drawing No. 2 of 2 is conflicting because it suggests the lot to the east is "Vacant Land," when it's not.

f. The Land Title Survey, Drawing No. 1 of 2 and 2 of 2, lacks a drawing date, which is necessary according to Site Plan Application, D.1.e. Please revise the referenced sheets to include this required information.

g. Adherence to Site Plan Checklist, the submitted plans do not fully comply with the Site Plan application checklist. The plan set must be organized and include items outlined in the submission requirements. The current package includes construction level details not required at the preliminary stage of a Major Site Plan review. Please remove the following sheets from the plan set such as 1 LS.1, Life Safety, A3.0, Door & Window Schedule/Details. This is to name a few of sheet that must be removed.

h. Comment No. 7, cited on December 04, 2025, to submit pre-addressed mailing labels for all real property within a 400-ft radius of the subject property. The labels were not including, though the response suggested differently. This is necessary for the time of being scheduled for the Planning & Zoning Board hearing. Otherwise this may cause a delay.

i. Upon receipt and review of the updated major site plan, please be advised that additional review comments may be prompted if there are noticeable changes, modifications, or inconsistencies introduced relative to the original submittal, or if the changes impact previously reviewed setbacks, site layout, or other data. The Planning & Community Development Department has the right to re-evaluate all aspects of the project should the scope of development alter.

j. When submitting revised plan sets, they shall be accompanied by written response addressing all comments.

If you have any questions regarding the information above, please contact me at (386) 418-6126 or via email at Be_Fisher@CityofAlachua.org.

Sincerely,

Bernadette Fisher

Ref: Site development plans for Tidal Wave Auto Spa

Dear Bernadette Fisher:

The following are our comments for the site plans for Gatorland Kubota Sales & Services.

1. **All sheets**
    a. The existing asphalt hatch mentioned on sheet C-100's legend is not showing up on any of the sheets.

2. **Sheet C-100**
    a. Please provide dimensions for the concrete sidewalks.
    b. Please provide Northings and Eastings on the site to locate the different improvements, including but not limited to property corners, intersections between drive aisles, intersections between drive aisles and property lines and at the locations of inlets and manholes.
    c. Please provide the bearing & distances and curve data for the drive aisles centerlines.
    d. Please provide dimensions for the car wash building and equipment room.
    e. Please label the depth of the H/C parking spots.
    f. Please provide Northings and Eastings on the site to locate the different elements.

3. **Sheet C-200**
    a. The Northeastern most spot elevation reads "???".
    b. The carwash building is 4 inches lower than the equipment room despite being connected via a door. Please verify that this is okay.
    c. The structure chart does not include AA-4 and AA-5's PI callout. It is unclear what kind of structures these are.
    d. Please move the viewport or SWCB-L EX-1's label showing the existing inverts.

4. **Sheet C-300**
    a. The special notes are missing item #5. In the plans, item #5 seems to be pointing at nothing just above the water reclaim system.
    b. Is A-1 CO supposed to be removed?

5. **Sheet C-520**
    a. 16.20 ft and 11.13 ft of gutter spread over AA-1 and AA-2 respectively is a lot. Suggest upsizing the downstream pipes to reduce the impact of the standing water.

6. **Stormwater management study**
    a. Appendix B title has a typo.

Please do not hesitate to contact me if you have any questions/comments.

Sincerely,

Claudia S. Vega, P.E.

UTILITY PLAN NOTES

1. EXISTING UTILITIES ARE INDICATED ON THE DRAWINGS AT APPROXIMATE LOCATIONS AND REFLECT GENERAL OBSERVATION FROM GROUND SURFACE. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL UTILITY COMPANIES ON THE PROJECT IN ORDER TO VERIFY THE EXACT LOCATION AND DEPTHS OF EXISTING UTILITIES PRIOR TO START OF WORK.
2. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR ALL COST ASSOCIATED WITH RELOCATING, CAPPING, AND/OR REMOVING EXISTING UTILITIES AS SHOWN ON THE CONSTRUCTION DOCUMENTS.
3. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR COORDINATION WITH UTILITY OWNERS AND THEIR PROPOSED ROUTINGS TO SERVE BUILDINGS.
4. FOR A LIST OF UTILITY OWNERS THAT HAVE FACILITIES IN THE VICINITY OF THIS PROJECT SEE SHEET C-000 COVER SHEET. THIS IS NOT AN EXHAUSTIVE LIST AND IS MEANT FOR GENERAL INFORMATION AND COORDINATION.
5. PROTECT EXISTING POWER LINES, WATER MAINS, GAS LINES, TELEPHONE LINES, FIBER OPTIC LINES, CABLE LINES, AND OTHER UTILITIES. IF DAMAGE OCCURS CONTACT UTILITY IMMEDIATELY. IF A GAS LINE HAS BEEN DAMAGED, IMMEDIATELY CALL 1-800-GAS-LINE.
6. PROPOSED WATER METERS SHALL BE INSTALLED FLUSH WITH "AS-BUILT" FINISHED GRADES.
7. UNDERGROUND UTILITY LINES SHALL BE INSTALLED, TESTED AND APPROVED BEFORE BACKFILLING.
8. THE GENERAL CONTRACTOR SHALL COORDINATE THE INSTALLATION AND LOCATION OF UTILITIES ENTERING THE BUILDING WITH THE ARCHITECTURAL PLANS.
9. BEFORE STARTING ANY EXCAVATION LOOK FOR VISUAL SIGNS OF GAS LINES IN THE AREA SUCH AS METER SETS ON THE SIDES OF HOUSES OR BUILDINGS, YELLOW PAINT, FLAGS OR MARKERS WHICH WOULD INDICATE GAS.
10. USE EXTREME CAUTION WHEN DIGGING AROUND GAS FACILITIES.
11. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR POTHOLING TO VERIFY UTILITY LOCATION MARKINGS.
12. PRIOR TO THE INSTALLATION OF SANITARY SEWER PIPE, THE GENERAL CONTRACTOR SHALL VERIFY THE INVERTS OF EXISTING STRUCTURES AND INFORM THE ENGINEER OF ANY CONFLICTS PRIOR TO CONSTRUCTION.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING A MARKED-UP SET OF DESIGN DRAWINGS SHOWING ALL "AS-BUILT" CONDITIONS. THESE "RECORD DRAWINGS" SHALL BE MADE AVAILABLE TO THE DESIGNER AND/OR THE CITY OF ALACHUA INSPECTOR UPON REQUEST. THESE "RECORD DRAWINGS" SHALL BE AT THE SITE AT ALL TIMES AND SHALL BE MADE AVAILABLE TO THE ENGINEER TO PREPARE FINAL DRAWINGS.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING APPROPRIATE SLEEVES (I.E., IRRIGATION, POWER, ETC.) UNDER PAVED AREAS AS NEEDED TO ROUTE THESE SERVICES TO LANDSCAPE AREAS, SITE LIGHTING FIXTURES, SIGNS, ETC. OR COORDINATE WITH SUB-CONTRACTORS TO LAY LINES BEFORE PAVING CONSTRUCTION.
15. ALL WATER LINES 6" AND GREATER REQUIRE THRUST RESTRAINTS AT BENDS, TEES, FIRE HYDRANTS, DEAD ENDS, ETC. PROVIDE THRUST RESTRAINTS PER LOCAL JURISDICTION SPECIFICATIONS.
16. ALL SANITARY SEWER CONSTRUCTION TO CONFORM TO APPLICABLE CITY OF ALACHUA SPECIFICATIONS AND ORDINANCES.
17. ALL WATER CONSTRUCTION TO CONFORM TO APPLICABLE CITY OF ALACHUA SPECIFICATIONS AND ORDINANCES.
18. SLOPES AND DISTANCES ARE TO CENTERLINE OF STRUCTURES.

ADD NOTES AS PER SUBMITTAL COMMENTS.

UTILITY MATERIAL NOTES:

1. SANITARY SEWER PIPE SHALL BE AS FOLLOWS UNLESS OTHERWISE SPECIFIED: PVC; SDR-26 PER ASTM D3034.
2. SANITARY SEWER INVERT AT BUILDING SHOULD BE 6' BELOW FINISHED FLOOR ELEVATION.
3. WATER PIPE SHALL BE AS FOLLOWS: 2" HDPE CTS FOR PRIVATE WATER LINES. CLASS 52 DUCTILE IRON PIPE FOR PUBLIC LINES GREATER THAN 2", AND TYPE K COPPER LINES FOR FOR 2" OR LESS.
4. STEEL CASING FOR JACK AND BORE SHALL HAVE A MINIMUM YIELD STRENGTH OF 35,000 PSI AND SHALL CONFORM TO ASTM A139.

SPECIAL NOTES:

1. PVC ELECTRICAL CONDUIT, COORDINATE WITH MEP FOR EXACT LOCATION AND SIZE
2. 4" PVC & 2" ELECTRICAL CONDUIT TO SERVE PREP CANOPY (CONDUIT ENDING ON THE PASSENGER SIDE OF DRIVE)
3. 3" ELECTRICAL CONDUIT FROM AIR COMPRESSOR
4. WATER RECLAIM SYSTEM
6. SANITARY SEWER MATERIAL SHALL BE 6 INCH PVC, 1% MINIMUM SLOPE
7. WATER LINE MATERIAL SHALL BE 2 INCH HDPE CTS
8. WATER LINES SHALL MAINTAIN 4 FOOT OF COVER MINIMUM
9. CONTRACTOR TO PAY FOR AND INSTALL 1.5 INCH DOMESTIC WATER METER
10. CONTRACTOR TO PAY FOR AND INSTALL A 1.5 INCH DOMESTIC BACKFLOW PREVENTER (RPZ TYPE) IN HOTBOX
11. CONTRACTOR TO PAY FOR AND INSTALL 3/4 INCH IRRIGATION WATER METER
12. CONTRACTOR TO PAY FOR AND INSTALL A 3/4 INCH IRRIGATION BACKFLOW PREVENTER (RPZ TYPE) IN HOTBOX
13. 3- 6" PVC VACUUM LINES (PRESSURE TESTED PER VAC PRODUCER)
14. 2"x12" TAPPING SLEEVE & VALVE

WHICH IS CITY END OF MAINTENANCE

CONFIRM WATER METER SIZES. SEE SUBMITTAL COMMENTS.

RE: 2nd Completeness Review: Tidal Wave Auto Spa-Alachua Site Plan Application

Dear Josh Russell,

On December 22, 2025, the Planning & Community Development Department received your revised site plan application for the Tidal Wave Auto Spa-Alachua project. This project the construction of a ± 3,600 square foot building along with associated site improvements on a ± 1.25-acre subject property (tax parcel 03044-003-002).

Pursuant to Section 2.6.6 of the City's Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned application for completeness and find that **the application is complete**.

A full review of the application will now be undertaken by the City, with the findings transmitted to you and a Project Assistance Team (PAT) meeting scheduled under separate cover.

If you have any questions regarding the information above, please contact me at (386) 418-6126 or via email at Be_Fisher@CityofAlachua.org.

Sincerely,

Bernadette Fisher

RE: 1st Completeness Review: Tidal Wave Auto Spa-Alachua Site Plan Application

Dear Josh Russell,

On October 29, 2025, the Planning & Community Development Department received your revised site plan application for the Tidal Wave Auto Spa-Alachua project, which proposes the construction of a ± 3,600 square foot building with associated site improvements on a ± 1.25-acre subject property (tax parcel 03044-003-002).

According to Section 2.6.6 of the City's Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned application for completeness and finds that the application is incomplete and that the following deficiencies must be addressed to begin the review of the application. Please address the following deficiencies no later than **5:00 PM on February 10, 2026.**

In accordance with Section 2.2.6(B) of the LDRs, the applicant must correct the deficiencies and resubmit the application for completeness determination. Plans and application materials may be made available for return in order to revise and resubmit as needed.

The time frame and cycle of review shall be based upon the date the application is determined to be complete. If the applicant fails to respond to the identified deficiencies within 45 calendar days, the application shall be considered withdrawn.

Please note that if additional completeness is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the application.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the application's content will be performed, and the findings will be discussed at a Project Assistance Team (PAT) meeting, which will be scheduled after the application is determined to be complete.

Deficiencies to be Addressed

Unless otherwise noted, references to the code sections are to the City of Alachua Land Development Regulations. *

1. Site Plan Application, Attachment #1.b, Name and Contact Information
   a. The site plan lacks the required name, phone number, and email address for all licensed professionals involved (e.g., engineer, architect, surveyor). Please revise to include this information as per City submittal guidelines.

2. Site Plan Application, Attachment, #1.c, Zoning of the Subject Property
   a. The site plan does not identify the property's zoning classification. A zoning data table or note indicating the current zoning is required. See sample below.

3. SITE DATA TABLE:		
SITE ADDRESS (or PARCEL NO.):		
SITE SIZE:		
FUTURE LAND USE:		
ZONING:		
EXISTING USE:		
PROPOSED USE:		
SETBACKS:	REQUIRED:	PROPOSED:
Front:	25'	35'
Side:	10'	15'
Rear:	15'	20'
BUILDING HEIGHT:	60'	60'
LOT COVERAGE:	50%	32%
*Per Ordinance No. O-03-09, Turkey Creek Planned Unit Development, Exhibit A		

SAMPLE

Please review Article 5 of the LDRs to ensure all details are provided at the time of resubmittal.

3. Site Plan Application, Attachment #1.e, Property Boundary and Topographic Survey
   a. Property Boundary Survey

      A current, sealed boundary survey by a licensed land surveyor is required to confirm legal property lines, easements, other applicable information, ensuring the development remains entirely within the subject property's boundaries and does not encroach onto adjacent properties or public rights-of-way.

   b. Topographic Survey

      A current, sealed topographic survey illustrating existing land elevations, contours, structures, utilities, and other features is required for proper grading, drainage, and infrastructure design.

Please resubmit with the complete survey information.

4. **Site Plan Application, Attachment #1.f, Legal Description of the Subject Property**
   a. Provide an accurate, written legal description of the property on 8.5"x11" paper and an electronic Word file to precisely define property boundaries.

5. **Site Plan Application, Attachment #3, Fire Department Access and Water Supply Plan**
   a. Corrections are needed due to missing information on fire department access and water supply, as required by the Florida Fire Prevention Code and the city code.

6. **Site Plan Application, Attachment #5, Comprehensive Plan Consistency Analysis**
   a. Provide a statement or report demonstrating how the proposed development aligns with the City's comprehensive plan goals, policies, objectives, and future land use designation. Identify relevant plan sections (e.g., Future Land Use, Transportation) and explain compliance. Include a statement showing alignment with design and performance standards in Policy 1.3.d of the Comprehensive Plan.

7. **Site Plan Application, Attachment #6, Mailing Labels for Properties within 400-foot Radius**
   a. Submit pre-addressed mailing labels for all real property within a 400-foot radius of the subject property. The labels were not included.

8. **Site Plan Application, Attachment #9, Proof of Ownership**
   a. Provide acceptable documentation verifying the property owner's legal interest in the subject property.

9. **Site Plan Application, Attachment #10, Proof of Payment of Taxes**
   a. Provide an official tax receipt from the Alachua County Tax Collector confirming all current real property taxes and assessments.

If you have any questions regarding the information above, please contact me at (386) 418-6126 or via email at Be_Fisher@CityofAlachua.org.

Sincerely,

Bernadette Fisher

I. Executive Summary

The project consists of the construction of an automated tunnel carwash, associated parking, and required utilities. The property owner and developer will request an ERP (Environmetal Resource Permit) Modification from the SRWMD. This parcel is part of the overall ERP Application ID 001-243718-1 originally issued on 12/16/2022 last modified under ERP Application ID 001-243718-7 issued 05/07/2025. The proposed site improvements have been accounted for in the previously designed, permitted and constructed master stormwater management system. The constructed master stormwater management system consists of multiple ponds for both attenuation and water quality. The system has adequate capacity and does not require any modifications to account for the Tidal Wave Auto Spa improvements. Below is an outline of the current SRWMD permits and Modifications:

1. Santa Fe Crossings Stormwater Management Report (Standard General ERP)
    a. ERP 001-243718-1 (issued 12/16/2022)
    b. Project Name – Sante Fe Crossings
    c. This permit allowed for the construction of a stormwater management system serving the overall development. The project is located off US Hwy 441, City of Alachua, Florida.

2. Permit Modification 2
    a. ERP 001-243718-8 (Submitted 09/09/2025)
    b. Project Name – Tidal Wave Auto Spa
    c. Permit allowed for the modification

II. PROPOSED CONSTRUCTION

The project consists of the construction of an automated tunnel carwash, associated parking, and required utilities. These improvements will occur on Tract 4. As part of the overall developer's improvements, the pond has accounted for the subject site for attenuation. As part of the overall develop's improvements, the pond has accounted for the subject site to have a maximum impervious coverage of 85% and a maximum curve number of 89. The proposed Tidal Wave Auto Spa will consist of 72.8% of impervious coverage (0.91 acres).

The development of the Tidal Wave Auto Spa will be in compliance with the master development's stormwater calculations.

1.0 INTRODUCTION

The applicant is requesting a Minor Modification to the existing Environmental Resource Permit (ERP) 243718-6, which authorizes future commercial development within Lot #5 with an impervious area of with an allowable imperviousness coverage of 85% per previously permitted and approved in the existing master ERP.

The subject property is ± 1.37-acre undeveloped land that is currently being cleared and rough graded per master developer, with Parcel ID: 03044-003-000 & 03042-050-008 located at 16314 US Highway 441, Alachua, FL 32615. The project scope includes a new construction of +/- 5,413 SF fast food restaurant with drive-thru, associated parking, utilities and drainage infrastructure. The Site is under the jurisdiction of the City of Alachua, Alachua County, the Suwannee River Water Management District (SRWMD), and the Florida Department of Transportation (FDOT). See map aerial below (**Figure 1**) for additional details.

Figure 1: Aerial Map

The master development was previously permitted under SRWMD (Suwannee River Water Management District) ERP No. 001-243718-1 for the construction of 1.28 acres of impervious surfaces on a total project area of 11.58 acres, and since has been modified by ERP No. 001-243718-6.

The Master development permits have been approved to construct the necessary utility & development infrastructure to support several future commercial lots, which includes three new dry stormwater basins (Basin 1, 2 and 3). Basin 1 will serve tracts 2,4,5,6,7 and a portion of the right-of-way. Basin 2 will only serve tract 4, and Basin 3 will only serve tract 1 and the remaining right-of-way.

2.0 EXISTING CONDITIONS AND BACKGROUND

The site is situated within Flood Zone X, an area of minimal flood hazard, and does not have an associated Base Flood Elevation (BFE). (flood panel #12001C0120D effective 8/12/2024). See **Appendix A** for additional maps and figures.

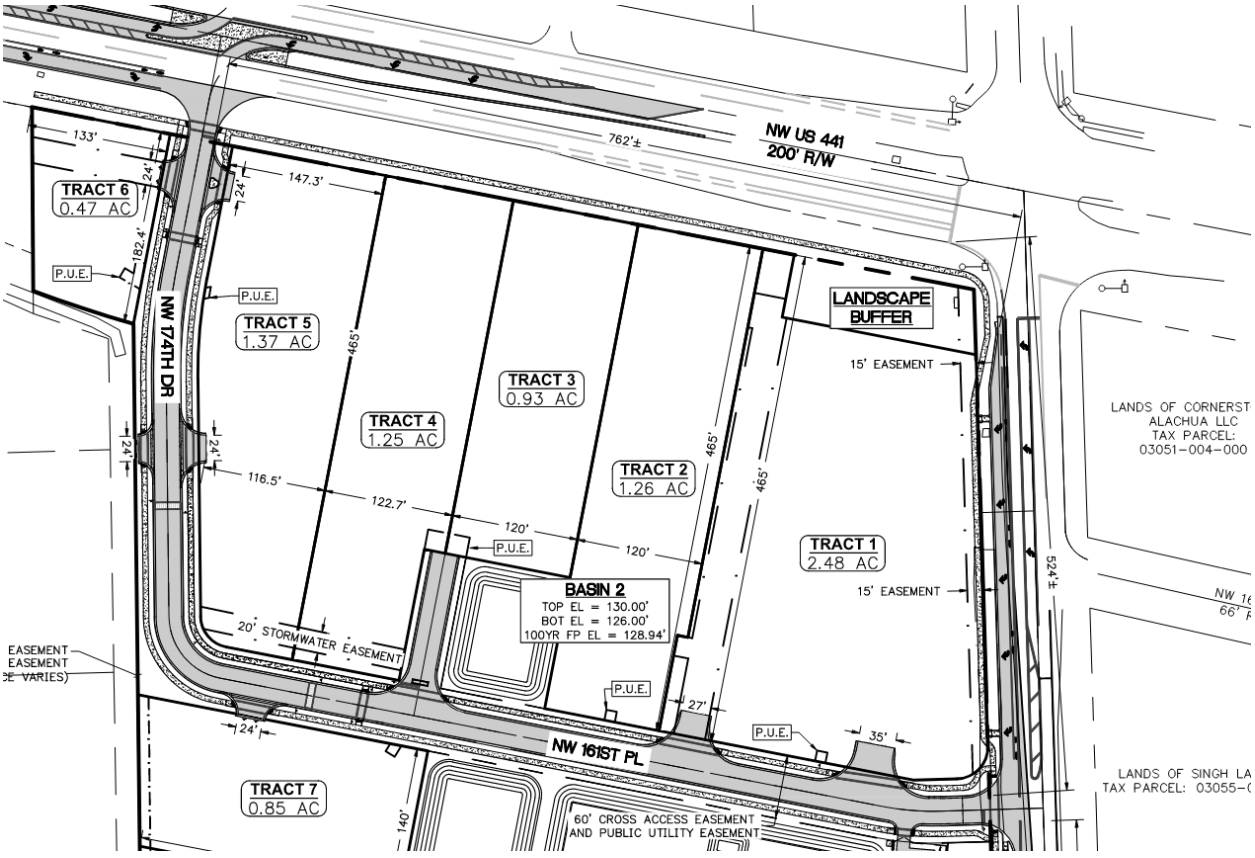
The site-specific geotechnical report was executed by Whitestone that explored subsurface conditions of the soil and physical properties. Static groundwater was not encountered during the site investigation to a maximum explored depth of 16.5 feet below ground surface (BGS). Refer to **Appendix C Supporting Documents**.

Previously a Geotechnical report was executed by ECS for the construction of the master development Santa Fe Crossings Water Utility Infrastructure permitted on (ERP-001-243717-6). ECS Florida did not encounter groundwater during the site investigation but estimated seasonal high groundwater based on their interpretation of the site conditions boring logs and soil survey information to range in depth from 6 to 30 feet BGS.

Table 1: Soil Parameters

Basin Name	Vertical Infiltration Rate (ft/day)	Horizontal Infiltration Rate (ft/day)	Elevation of Effective Aquifer (ft)	Avg. Seasonal High Water Elevation (ft bls)	Porosity (%)
Basin 1	6.00	6.00	10.50	10.50	25
Basin 2	3.50	3.50	14.50	14.50	25
Basin 3	4.50	4.50	9.00	9.00	25

2.1 PERMITTED DRIANAGE DESIGN (ERP-001-243718-6)



The Applicant proposes to develop in Tract 5 (also referred to as Lot 5) which has been designated to discharge into Basin 1. The Master Development has been designed to support future commercial lots development. See below excerpt for the permitted breakdown of impervious area per lot:

Bowman

Table 5: Allowable Impervious Area

Lot #	Total Area (AC)	Allowable Impervious Area (AC)
1	2.48	2.11
2	1.26	1.07
3	0.93	0.79
4	1.35	1.15
5	1.27	1.08
6	0.47	0.40
7	0.85	0.72

According to the permitted conditions Lot 5 was designed to have an allowable impervious area is 1.08 acres or 85% of the total area (out of 1.27 acre lot). A mistake or revision may have occurred during permitting, according to the infrastructure plans provided, Lot 4 total area is 1.25 acres and Lot 5 total area is 1.37, with these changes made the allowable impervious area for Lot 5 should be equal to 1.165 acres.

The calculations for the proposed stormwater storage for Basin 1 were designed to incorporate 12" of freeboard within the Basin per SRWMD requirements. See below summary of the Permitted stage storage calculations for Basin 1:

Table 6: Basin Stage Storage Calculations

Basin 1:

Stage	Surface Area (SF)	Surface Area (AC)	Volume (CF)
125.00	24,451	0.56	0
126.00	28,287	0.65	26,369
127.00	32,223	0.74	56,624
128.00	36,261	0.83	90,866
129.00	40,399	0.93	129,196
129.50	42,505	0.98	149,922

All 3 new stormwater basins were analyzed to establish the max stages for each storm event as the 100-year critical floodplain elevations. A minimum of 12" of freeboard was provided in each basin in accordance with SRWMD requirements. See below table for Permitted Critical Storm Events Max Stages:

Table 8: Critical Storm Events

Drainage Area	100-YR Critical Storm Event	Top of Bank Elevation (FT)	Basin Max Stage (FT)
BASIN 1	100YR – 240HR	130.50	128.49
BASIN 2	100YR – 008HR	130.00	128.94
BASIN 3	100YR – 240HR	127.00	126.00

The Suwannee River Water Management District criteria governs the water quality treatment volume recovery requirements. The criteria requires the WQTV to be runoff from the first 2.0" of rainfall over each drainage area. The SRWMD requires that he required WGTV be recovered within 72 hours following the design storm event. See below table for the Permitted WQTV calculations and recovery time:

Table 7: Water Quality Treatment Volume Storage & Recovery Time

Basin Name	Volume Provided (CF)	Basin Stage (FT)	Recovery Time (Hrs)
BASIN 1	53,186	126.75	20.93
BASIN 2	18,233	128.66	35.93
BASIN 3	27,688	123.49	5.09

3.0 PROPOSED CONDITIONS

The Applicant is proposing to construct a +/- 5,413 SF Chick-Fil-A Restaurant building with drive-thru within Lot #5 with an approximate area of 1.37 acres, with total imperviousness of 1.09 acres (79.56%). Please refer to table 1 for the land use breakdown of the proposed site.

Table 1. Proposed Land Use Breakdown

Area Description	Proposed		
	Square Feet	Acreage	%
Building	5,413	0.12	9.1
Sidewalk / Paving	42,006	0.97	70.4
Grass / Open Area	12,257	0.28	20.5
Total Area	**59,676**	**1.37**	**100**

The proposed development drainage improvements will use a series of interconnected pipes with catch basins, manholes and curb inlets that will connect to the existing drainage system via existing Curb Inlet (EX-1), subsequently a proposed 18" ERCP pipes and catch basins within (20 feet stormwater Easement) to connect to another Existing Curb inlet (EX-2). The existing EX-2 curb inlet is connected to the existing drainage system which directs storm runoff to Basin 1. Basin 1 is interconnected with Basin 2 and Basin 3. Basin 3 is the only basin with an outfall that discharges off-site via type C Inlet Control Structure with a Rim elevation equal to 126' and a 15" Polypropylene Pipe which connects to a type C structure located East off-site the property.

All 3 Basins were previously permitted in ERP-001-243718-6 meeting all the requirements of SRWMD, FDOT, Alachua County, the City of Alachua, and NPDES. Each basin is designed to provide a 12" of freeboard, the ability to recover from each storm event within the required times and the required water quality volume. Refer to **Appendix B ERP Stormwater Report** for additional information.

Minimum finished floor elevations were evaluated based on the maximum stage of the 100-year critical floodplain elevation and the required 12" freeboard. Basin 1 established a 130.50 feet Top of Bank; minimum Finish Floor Elevation for Lot #5 is 136.00 feet.

4.0 CONCLUSION

The applicant is requesting a Minor Modification to the existing Environmental Resource permit ERP-001-243718-6. The proposed on-site improvements for the development area are within Lot #5 with an approximately 1.37 acres. According to the approved ERP permit the allowable Impervious Area is 85% of the total lot area equal to 1.16 acres, based on the proposed land use breakdown the proposed impervious area is 79.5% equal to 1.09 acres, providing 20.5% Pervious area. Therefore, proposed conditions are within the allowable permitted conditions.

I. Introduction

Santa Fe Crossings is a proposed development located on US-441 in the City of Alachua at Tax Parcel 03044-003-000 & 03042-050-008 as indicated in **Attachment A: Project Location Map**. This development proposes to construct the necessary utility and stormwater infrastructure improvements in order to support several future commercial lots. This report will address the proposed stormwater management systems associated with the proposed improvements. The development will construct Three (3) new dry stormwater basins. The stormwater management system will discharge to the CR-235A right of way in the southwest corner of the site in a manner similar to pre-development conditions. The property is within an area of minimal flood hazard as shown by the FEMA national flood hazard layer FilRMette provided in **Attachment B.**

II. Drainage Design Criteria

A. City of Alachua

Stormwater Quantity: All developments shall be constructed and maintained so that post-development runoff rates and pollutant loads do no exceed pre-development conditions. While development activity is underway and after it is completed, the characteristics of stormwater runoff shall approximate the rate, volume, quality, and timing of stormwater runoff that occurred under the site's natural unimproved or existing state, except that the first one-half inch of stormwater runoff shall be treated in an off-line retention system or according to other best management practices as described in the water management district's Surface Water Management Permitting Manual, as amended.

Stormwater Quality: Facilities which directly discharge into an Outstanding Florida Water shall include an additional level of treatment equal to the runoff of the first 1.5 inches of rainfall from the design storm consistent with F.A.C. 62-25.025(9), in effect upon adoption of the Comprehensive Plan, in order to meet the receiving water quality standards of F.A.C. Chapter 62-302, in effect upon adoption of the Comprehensive Plan. Stormwater discharge facilities shall be designed so as not to lower the receiving water quality below the minimum conditions necessary to assure the suitability of water for the designated use of its classification as established in F.A.C. Chapter 62-302, in effect upon adoption of the Comprehensive Plan.

B. Alachua County

Stormwater management facilities must be designed in accordance with the following from Article 9 of the Unified Land Development Code:

Stormwater Treatment Performance Standards: Per Alachua County Stormwater Treatment Code Section 77.27, the Alachua County Stormwater Treatment Standard is based on minimum levels of stormwater treatment and BMP design criteria that are presumed to achieve the

desired level of pollutant load reduction. Projects using retention BMPs within the Karst Sensitive Areas must meet (a), (b), or (c) below, and treat the first inch of runoff from the project area with one or more LID techniques separate from the dry retention basin.

Discharging directly or indirectly to surface waters – Reduce annual average total nitrogen and phosphorus load by 70% and 80%, respectively.

Discharging directly to an Outstanding Florida Waterbody – Reduce both annual average total nitrogen and phosphorus load by 95%.

Discharging within watersheds of Verified Impaired Water Bodies or Water Bodies within Adopted Nutrient Total Maximum Daily Loads (TMDLs) – Choose the greater nutrient reduction option of the following: meet requirements of (a), (b) or reduce the nitrogen and phosphorus loadings of predevelopment by 10%.

C. Suwannee River Water Management District (SRWMD)

Stormwater management facilities must be designed in accordance with the Suwannee River Water Management District Applicant's Handbook Volume II as follows:

Stormwater Quantity: Dry retention, online stormwater ponds must be designed such that the storm events are attenuated with post-development peak discharge rates not exceeding the pre-development peak discharge rates for the 100-yr 1-hr, 2-hr, 4-hr, 8-hr, 24-hr, 72-hr, 168-hr & 240-hr storm events, while providing 1 ft of freeboard. In addition, half of the entire stored volume must be recovered within 7 days following the end of the critical storm event, and the entire stored volume must be recovered within 30 days following the end of the critical storm event.

Stormwater Quality: Dry retention, online stormwater ponds must be designed such that the treatment volume shall be the runoff from the first 2.0" of rainfall following a critical duration storm event. Additionally, that volume of runoff must be treated within 72 hours following the end of the critical storm event.

D. National Pollutant Discharge Elimination System (NPDES)

Chapter 62-621.300(4) FAC requires that a Stormwater Pollution Prevention Plan (SWPPP) must be developed for issuance of a Generic Permit for Stormwater Discharge from Large and Small Construction Activities in order to be in conformance with the Florida Department of Environmental Protection (FDEP) regulation of point source discharges of stormwater from construction sites, as defined by the NPDES.

As outlined under the above mentioned rule, FDEP requires construction Activities spanning one (1) acre or more to comply with the regulations that limit point source discharge of stormwater runoff from the construction site. A Notice of Intent (NOI) must be submitted to FDEP prior to construction. The SWPPP must be included within the plan set to demonstrate the means by which the guidelines of the NPDES will be met. The project drawing set includes an SWPPP for the project, and the contractor will file for the NOI prior to beginning construction activities.

III. Design Methodology

Determination of the stormwater runoff conditions for both pre and post-development conditions utilizes the NRCS curve number method. This method calculates runoff curve numbers based on the soil characteristics and the land use cover conditions for the contributing drainage area. Rainfall hydrographs are generated based on accepted rainfall volumes for the local area, rainfall volume over time, and storm event distributions accepted by the local regulatory agencies.

JBPro utilizes the stormwater modeling program ICPR (version 3) to perform the stormwater basin flood routings. The program uses the runoff conditions and the basin design parameters to route the required storm events. The program is used to determine the peak flood stages and compare pre- and post-development conditions to determine the critical storm event. The critical storm event is the controlling storm event which dictates the final basin design. In addition, the PercPak feature of ICPR is used to analyze groundwater mounding and soil infiltration effects for each of the design storms in order to determine the drawdown times for both water quantity and quality calculations. ICPR is an accepted analysis program by the regulatory agencies having jurisdiction.
Nutrient removal efficiencies were estimated using BMP Trains V8.7, which is a downloadable software model based off the Best Management Practice (BMP) studies conducted in recent years within the state of Florida. First, the desired removal efficiency is specified for both Nitrogen and Phosphorus comparing pre and post development conditions. Next, details of the provided design are input into the model spreadsheet. These details vary from project to project but can include items such as LID treatment volume, retention treatment volume, LID and retention watershed characteristics, predevelopment site characteristics, and the configuration of each watershed's BMP. Once all the necessary information is entered into BMPTRAINS a performance summary can be viewed to see if treatment goals are obtained.

IV. Geotechnical Investigation

ECS Florida, LLC. conducted a geotechnical engineering investigation for the proposed stormwater management system on 03/20/2022. A copy of this report is provided in **Attachment C**. Soil borings were taken in each stormwater basin. A summary of these soil parameters is shown in Table 1 below. In order to provide a factor of safety for the designed stormwater management systems, the vertical and horizontal infiltration rates were divided by 2 in the stormwater model.

Table 1: Soil Parameters

Basin Name	Vertical Infiltration Rate (ft/day)	Horizontal Infiltration Rate (ft/day)	Elevation of Effective Aquifer (ft)	Avg. Seasonal High Water Elevation (ft bls)	Porosity (%)
Basin 1	6.00	6.00	10.50	10.50	25
Basin 2	3.50	3.50	14.50	14.50	25
Basin 3	4.50	4.50	9.00	9.00	25

V. Pre-Development Drainage Design

A. Stormwater Management Design

As indicated in **Attachment D: Pre-Development Drainage Map,** the existing site consists of one drainage area. The entirety of the site drains to the SE corner of the site, where it then discharges to the County Road 235A right of way. An NRCS curve number analysis was done on the pre-development conditions, and the curve number was determined to be **49.5.** This calculation is shown in **Attachment E: Drainage Design Calculations.**

B. Flood Routing

The system was analyzed under pre-development conditions using the stormwater modeling program ICPR 3.2 to perform the stormwater flood routings to establish the pre-development flood stages. Total flow and max flow rate were also calculated to establish the max discharge values for use in the post-development condition. The program uses the runoff conditions and the basin design parameters to route the required design storm events. In addition, PercPak within ICPR utilizes the existing geotechnical parameters for the stormwater analysis as part of the mounding modeling analysis to analyze recovery of the system. ICPR with PercPak is an accepted analysis program by the regulatory agencies having jurisdiction. ICPR input data and modeling results are provided in the output reports included in **Attachment G: ICPR Inputs and Results**.

VI. Post-Development Drainage Design

A. Stormwater Management Design

The post-development stormwater system is shown in **Attachment D: Post Development Drainage Map.** The system was designed in a manner to mimic pre-development drainage conditions as closely as possible. The basins will be connected, and only Basin 3 will discharge off of the site. Basin 1 will serve tracts 2, 4, 5, 6, 7 and a portion of the right of way. Basin 2 will only serve tract 4. Basin 3 will only serve tract 1, and the remaining right of way.

B. Drainage Area Curve Numbers

Table 4 provides the Post-Development Drainage Area Curve Numbers for each drainage area. Full calculations for each of the curve numbers below can be seen in **Attachment E: Drainage Design Calculations.** The drainage areas were broken down into several categories, including Right-of-Way, Lot Area, Open Space, and Retention Areas. Curve numbers were assigned to each category based on the data presented in TR-55. A right-of-way curve numbers was established to be 78 as calculated with the proposed typical sections. A lot curve number was established to be 89 based on the total allowable impervious area for future developers on each lot. A breakdown of impervious area per lot is provided in Table 5 below.

Table 4: Post-Development Design Data

Drainage Area	Total Drainage Area (Acres)	Weighted Curve Number (CN)
DA-1	7.53	87.25
DA-2	1.22	89.25
DA-3	4.89	88.50

Table 5: Allowable Impervious Area

Lot #	Total Area (AC)	Allowable Impervious Area (AC)
1	2.48	2.11
2	1.26	1.07
3	0.93	0.79
4	1.35	1.15
5	1.27	1.08
6	0.47	0.40
7	0.85	0.72

C. Basin Stage – Storage Relationship

The calculations for the proposed stormwater storage basins are provided in **Attachment E: Drainage Design Calculations.** The onsite basins were designed to incorporate 12" of freeboard within the basin per SRWMD requirements. A summary of the stage storage calculations for each basin is provided in Table 6 below.

Table 6: Basin Stage Storage Calculations

Basin 1:

Stage	Surface Area (SF)	Surface Area (AC)	Volume (CF)
125.00	24,451	0.56	0
126.00	28,287	0.65	26,369
127.00	32,223	0.74	56,624
128.00	36,261	0.83	90,866
129.00	40,399	0.93	129,196
129.50	42,505	0.98	149,922

Basin 2:

Stage	Surface Area (SF)	Surface Area (AC)	Volume (CF)
126.00	4,811	0.11	0
127.00	5,983	0.14	5,397
128.00	7,255	0.17	12,016
129.00	8,627	0.20	19,957
130.00	10,485	0.24	29,513

Basin 3:

Stage	Surface Area (SF)	Surface Area (AC)	Volume (CF)
122.75	34,374	0.79	0
123.00	35,352	0.81	8,716
124.00	39,328	0.90	46,056
125.00	43,405	1.00	87,422
126.00	47,582	1.09	132,916
127.00	51,860	1.19	182,637

D. Water Quality Treatment Volume

The Suwannee River Water Management District criteria governs the water quality treatment volume recovery requirements. This criteria requires the WQTV to be the runoff from the first 2.0" of rainfall over each drainage area. The site has a total drainage area of 502.491 SF, which corresponds to a required 83,749 CF of water quality volume required. The SRWMD requires that the required Water Quality Treatment Volume (WQTV) be recovered within 72 hours following the design storm event. In accordance with SRWMD recommendations, the water quality treatment volume was routed using ICPR as a slug load to determine the WQTV recovery time. Table 7 shows the routing recovery time after the slug load was applied. The full calculations for WQTV recovery are provided in **Attachment E: Drainage Design Calculations** and the ICPR input data and modeling results are provided in the output reports included in **Attachment G: ICPR Inputs and Results**.

Table 7: Water Quality Treatment Volume Storage & Recovery Time

Basin Name	Volume Provided (CF)	Basin Stage (FT)	Recovery Time (Hrs)
BASIN 1	53,186	126.75	20.93
BASIN 2	18,233	128.66	35.93
BASIN 3	27,688	123.49	5.09

E. Flood Routing – Max Stage

The system was analyzed using the stormwater modeling program ICPR 3.2 to perform the stormwater basin flood routings to assure the retention basins are sized correctly to handle the stormwater discharge from all of the design storm events. The program uses the runoff

conditions and the basin design parameters to route the required design storm events. The program is used to determine the peak flood stages to determine the critical storm event, which is the controlling storm event that dictates the final basin design. In addition, PercPak within ICPR utilizes the existing geotechnical parameters for the stormwater basins as part of the mounding modeling analysis to analyze recovery of the system. ICPR with PercPak is an accepted analysis program by the regulatory agencies having jurisdiction. ICPR input data and modeling results are provided in the output reports included in **Attachment G: ICPR Inputs and Results**.

Each of the (3) stormwater basins were analyzed to establish the max stages for each storm event as well as the 100-year critical floodplain elevations. A minimum of 12" of freeboard was provided in each basin in accordance with SRWMD requirements. A full summary of the max stage for each basin under all the required storm events can be seen in **Attachment E: Drainage Design Calculations**. A summary of the 100-year critical floodplain elevations can be seen in Table 8 below.

Table 8: Critical Storm Events

Drainage Area	100-YR Critical Storm Event	Top of Bank Elevation (FT)	Basin Max Stage (FT)
BASIN 1	100YR – 240HR	130.50	128.49
BASIN 2	100YR – 008HR	130.00	128.94
BASIN 3	100YR – 240HR	127.00	126.00

F. Flood Routing – Volume Discharge

The discharge from Basin 3 to the CR235A Right of way was analyzed to ensure the discharge volumes and rates do not exceed Pre-Development conditions. A summary of the total discharge volumes and max discharge rates from ICPR can be seen in **Attachment G: ICPR Inputs and Results** and are summarized in Table 9 below.

Table 9: Pre / Post Volume/Rate Discharge Comparison

Storm	100YR-001HR	100YR-002HR	100YR-004HR	100YR-008HR	100YR-024HR	100YR-072HR	100YR-168HR	100YR-240HR
Pre-Development Discharge Volume (CF)	0.48	0.94	1.69	2.51	4.80	7.17	9.18	11.08
Post-Development Discharge Volume (CF)	0.06	0.37	1.07	1.98	4.39	6.51	7.81	9.48
Decrease in Total Discharge Volume (CF)	0.42	0.57	0.61	0.53	0.41	0.66	1.37	1.60
Pre-Development Discharge Rate (CFS)	14.09	12.48	14.52	17.92	6.99	6.82	5.24	6.79
Post-Development Discharge Rate (CFS)	0.47	1.36	2.39	3.05	3.78	4.75	4.45	5.77
Decrease in Total Discharge Rate (CFS)	13.62	11.13	12.13	14.88	3.22	2.07	0.78	1.02

G. Flood Routing – Volume Recovery

As required by SRWMD, 7-Day and 30-Day Recovery Results for each storm event can be seen in **Attachment E**. All (3) basins recover half of the maximum stored volume within 7 days and fully recover all of the stored volume within 30 days following each storm event. A summary of the recoveries is provided in Tables 10 and 11 below.

Table 10: Full Volume Recovery Time

Storm/Basin	Basin 1	Basin 2	Basin 3
100YR-001HR	22.26	30.26	14.51
100YR-002HR	38.26	42.26	64.26
100YR-004HR	62.26	54.26	192.26
100YR-008HR	94.26	66.26	290.26
100YR-024HR	206.26	114.26	398.26
100YR-072HR	344.26	274.26	532.26
100YR-168HR	542.27	444.27	758.27
100YR-240HR	662.26	562.26	888.26

Table 11: Percentage of Volume Recovered at 7 Days

Storm/Basin	Basin 1	Basin 2	Basin 3
100YR-001HR	100.00%	100.00%	100.00%
100YR-002HR	100.00%	100.00%	100.00%
100YR-004HR	100.00%	100.00%	97.73%
100YR-008HR	100.00%	100.00%	90.40%
100YR-024HR	97.63%	100.00%	86.04%
100YR-072HR	86.66%	91.35%	84.25%
100YR-168HR	77.13%	75.63%	80.25%
100YR-240HR	78.14%	68.67%	82.08%

VII. Conclusions

The Santa Fe Crossings stormwater system conforms to all of the requirements of SRWMD, FDOT, Alachua County, the City of Alachua, and NPDES. As shown within this report, each basin is designed to provide the minimum 12” of freeboard. Additionally, each basin demonstrates the ability to recover from each storm event within the required times. Based on the data provided in this report, this project complies with the required stormwater management design and permitting requirements for all applicable agencies.

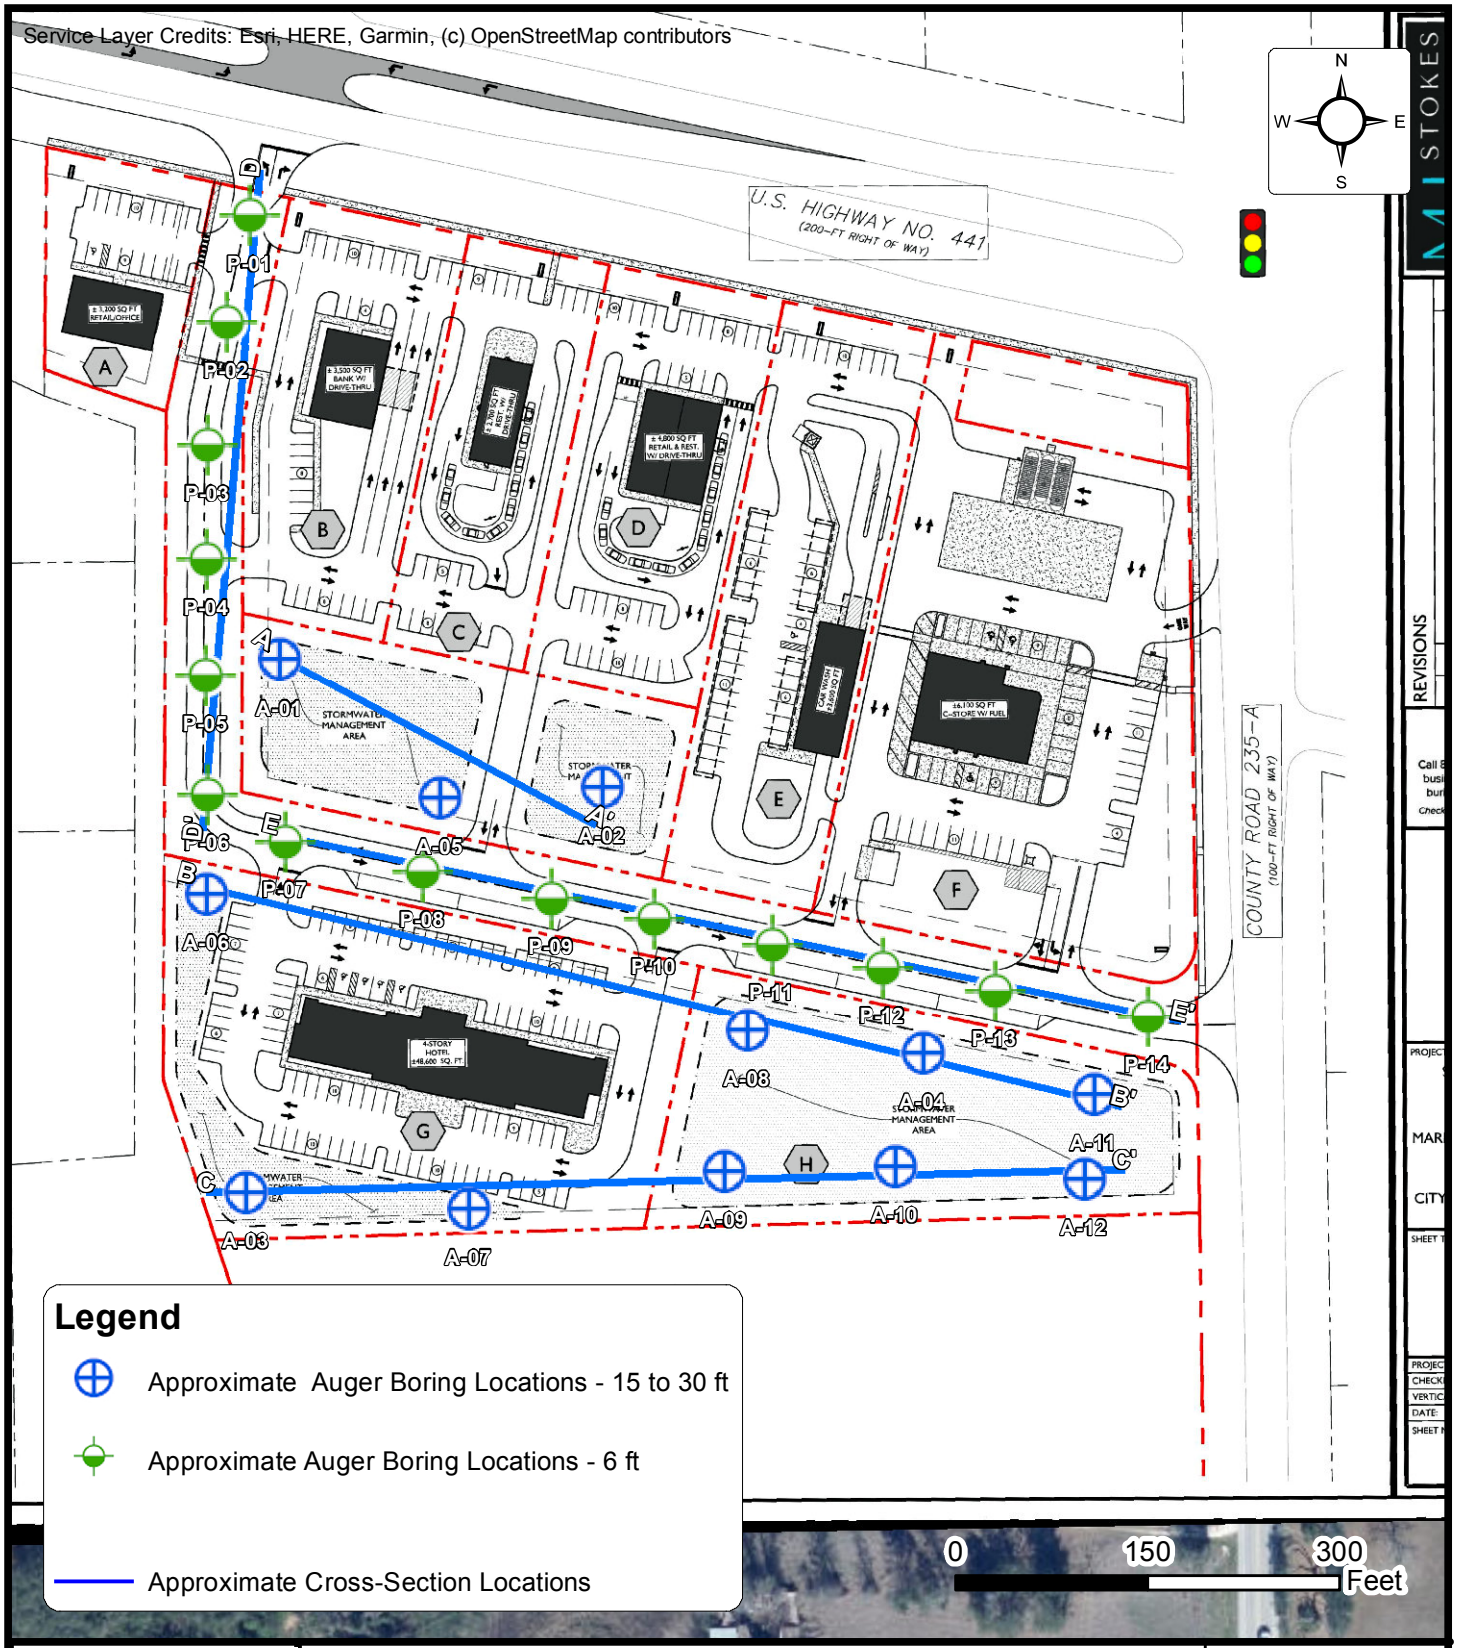
Alachua, Alachua County, Florida

ECS Project Number 35:32630

March 20, 2022

EXECUTIVE SUMMARY

The following summarizes the main findings of the exploration, particularly those that may have a cost impact on the planned development. Information gleaned from the executive summary should not be utilized in lieu of reading the entire geotechnical report.



The geotechnical exploration performed for the planned stormwater management basins and main roadway included four (4) soil test borings drilled to depths of thirty (30) feet, eight (8) soil test borings drilled to the depths of fifteen (15) feet, and fourteen (14) soil test borings drilled to the depths of six (6) feet. Bulk samples for laboratory permeability and Limerock Bearing Ratio (LBR) testing were obtained.

The soil borings performed in the proposed stormwater management basins encountered variable surface conditions. Generally, the subsurface profile initially consists of sandy materials followed by intrabedded strata of clayey soils.

The soils borings performed in the proposed main roadway area encountered sandy soil from near ground surface to the explored depths of six (6) feet.

In general, soils appear satisfactory for stormwater management and pavement support. Our recommended soil paramateres for stormwater management and pavement designs are included within the body of this report. Depending on the final basin geometry design and pavement grading, some undercutting and replacement of clayey sands could be required.

During construction, ECS should be retained by the contractor to visually inspect the basin bottoms after excavations to assist where (if anywhere) undercutting is required and perform material testing for the proposed pavement.

Whitestone Project No.: GF2422245.000
September 4, 2024

SECTION 1.0
Summary of Findings and Recommendations

Whitestone has conducted an exploration and evaluation of the subsurface conditions at the site of the proposed Chick-fil-A restaurant to be located at 16314 U.S. Highway 441 in Alachua, Alachua County, Florida. Based on the December 13, 2023 *Conceptual Site Plan* prepared by Bowman Consulting Group, Ltd. (Bowman), the proposed development includes construction of an approximately 4,987-square feet single-story Chick-fil-A restaurant with drive-thru services, outdoor patio area, trash enclosure, and associated pavements, utilities, and landscaping. Whitestone anticipates the Chick-fil-A building will be constructed at or near the existing site grades. No stormwater management (SWM) areas and/or retaining walls are planned as part of the Chick-fil-A development area.

The geotechnical investigation included conducting a reconnaissance of the project site, advancing eight borings and five test pits, and collecting soil samples for laboratory testing and physical characterization. Site subsurface conditions consisted of surficial topsoil, underlain by natural coastal plain deposited sandy soils underlain by deeper fat clay and elastic silt soils generally encountered at the shallowest depth of six feet below the existing ground surface. The encountered subsurface conditions are not indicative of karst formations to the depth of boring and test pit termination depths. However, karst conditions originate in the underlying limestone, which is deeper than the boring and test pit terminations. Static groundwater was not encountered during the site investigation to a maximum explored depth of 16.5 feet below ground surface (fbgs).

The results of the investigation indicate that the proposed structures may be supported by conventional ground supported shallow foundations and floor slabs following in-place compaction improvement and approval of the upper natural loose sands encountered within the proposed building and canopy footprints. Areas of overexcavation and replacement/recompaction of the upper sandy soils should be anticipated throughout the site due to the very loose to loose upper zones of natural sandy soils encountered. Although not anticipated based on the results of Whitestone's subsurface investigations, the fat clays and elastic silts require overexcavation and replacement with granular soils if encountered within 18 inches of foundation and floor slab subgrade bearing elevations. Monitoring and testing should be conducted to verify that the ground improvement within the building pad and canopy areas recommended herein is conducted and suitable materials used for controlled fill/backfill are properly placed and compacted over suitable subgrade soils. Whitestone recommends that the suitability of the bearing soils along the footing bottoms be verified by a geotechnical engineer prior to placing concrete for the footings. Although not anticipated based on the results of Whitestone's subsurface investigations, the fat clays and elastic silts will also require overexcavation and replacement with granular soils if encountered within 12 inches of pavement subgrade elevations. Additionally, the site conditions support the use of typical pavement sections using standard Florida Department of Transportation (FDOT) specified materials.

The above summary is intended to provide an overview of the geotechnical findings and recommendations and is not fully developed. Greater detail is presented in the following sections. The entire report must be read for a comprehensive understanding of the information contained herein.

SECTION 2.0
Introduction

2.1 AUTHORIZATION

Mr. Chad Brubaker, Vice President - Development of Alachua CFA LLC c/o Lisciotti Development, issued authorization to Whitestone to conduct a geotechnical investigation on this site relevant to the construction of a proposed Chick-fil-A restaurant at 16314 U.S. Highway 441 in Alachua, Alachua County, Florida. The geotechnical investigation was conducted in general accordance with Whitestone's February 15, 2023 proposal to Alachua CFA LLC c/o Lisciotti Development.

2.2 PURPOSE

The purpose of this subsurface exploration and analysis was to:

- ascertain the various soil profile components at test locations;
- estimate the engineering characteristics of the proposed foundation, floor slab, and pavement bearing and subgrade materials;
- provide geotechnical criteria for use by the design engineers in preparing the foundation, floor slab, and pavement design;
- provide recommendations for required earthwork and subgrade preparation;
- record groundwater and bedrock levels (where encountered) at the time of the investigation and discuss the potential impact on the proposed construction; and
- recommend additional investigation and/or analysis (if warranted).

2.3 SCOPE

The scope of the exploration and analysis included the subsurface exploration, field testing and sampling, laboratory testing, and a geotechnical engineering analysis and evaluation of the subsurface materials. This *Report of Geotechnical Investigation* is limited to addressing the site conditions related to the physical support of the proposed construction. Whitestone also completed a *Phase I Environmental Site Assessment* for this site, which was reported under separate cover.

2.3.1 Field Exploration

Field exploration of the project site was conducted by means of eight borings, identified as B-1 through B-8, advanced with a custom track-mounted drill rig. The borings were advanced to termination depths that ranged from 10 fbgs to 16.5 fbgs. Field exploration also consisted of excavating five test pits, identified as TP-1 through TP-5, with a mini track-mounted excavator to the depth of eight fbgs. The borings and test pits subsequently were backfilled to the surface with excavated soils from the investigation. Test locations are shown on the *Test Location Plan* included as Figure 1.

Test locations were based on project information provided to Whitestone at the time of the investigation, including the *Conceptual Site Plan* prepared by Bowman. The subsurface tests were conducted in the presence of a Whitestone representative, who conducted field tests, recorded visual classifications, and collected samples of the various strata encountered. Test locations were established in the field using normal taping procedures and estimated right angles. These locations are presumed to be approximate.

Borings and Standard Penetration Tests (SPTs) were conducted in general accordance with ASTM International (ASTM) designation D 1586. The SPT resistance value (N) can be used as an indicator of the consistency of fine-grained soils and the relative density of coarse-grained soils. The N-value for various soil types can be correlated with the engineering behavior of earthworks and foundations. The split spoon sampling was conducted using an automatic hammer.

Groundwater level observations, although not encountered, were recorded during the field drilling operations and prior to backfilling the bore holes. Groundwater elevations derived from sources other than seasonally observed groundwater monitor wells may not be representative of true groundwater levels.

2.3.2 Laboratory Program

In addition to the field investigation, laboratory testing was conducted to determine additional, pertinent engineering characteristics of representative samples of on-site soils. The laboratory testing was conducted in general accordance with applicable ASTM standard test methods and included physical testing of the natural soil stratum.

Physical/Textural Analyses: Representative samples of selected strata encountered were subjected to a laboratory program that included Atterberg Limits determinations (ASTM D-4318), moisture content determinations (ASTM D-2216), and particle size analysis through the No. 200 sieve (ASTM D-1140) in order to conduct supplementary engineering soil classifications in general accordance with ASTM D-2487. The soil strata tested were classified by the Unified Soil Classification System (USCS) and results of the laboratory testing are summarized in the following table. Quantitative test results are provided in Appendix B.

PHYSICAL/TEXTURAL ANALYSES SUMMARY							
Boring No.	**Sample**	**Depth (fbgs)**	**% Passing No. 200 Sieve**	**Moisture Content (%)**	**Liquid Limit**	**Plastic Index**	**USCS Classification**
B-2	S-2	2.0 to 4.0	40.2	25.6	47	24	SC
B-3	S-4	6.0 to 8.0	54.7	27.2	59	33	CH
B-4	S-4	6.0 to 8.0	11.5	13.7	Non-Plastic		SP-SM
B-5	S-4	6.0 to 8.0	90.3	66.8	111	31	MH

The engineering classifications are useful when considered in conjunction with the additional site data to estimate properties of the soil types encountered and to predict the soil's behavior under construction and service loads.

SECTION 3.0
Site Description

3.1 LOCATION AND DESCRIPTION

The subject site is located at 16314 U.S. Highway 441 in Alachua, Alachua County, Florida. At the time of Whitestone's investigation, the site consisted of a vacant, grass and soil covered parcel. The site is bound to the north by U.S Highway 441 followed by residential dwellings, to the east by a construction site for new adjacent proposed retail development, to the south by vacant grass and brush covered land, and to the west by a car dealership. The location of the site is shown on the *Test Location Plan* included as Figure 1.

3.2 EXISTING CONDITIONS

Surface Cover/Development: At the time of the investigation, the subject site consisted of a vacant, grass and soil covered parcel. The site formerly consisted of a wooded area. Based on available historical aerials, the site consisted of vacant land from at least 1955 to the year 2005. In 2005, the site appears to be a parking lot. The site appears to be vacant form 2007 to 2017 when the trees become apparent.

Topography: Topographic information was not available at the time of this report. Based on visual observations during the site investigation, the site appears to be flatlying with an estimated maximum grade change of approximately one foot.

Utilities: At the time of Whitestone's subsurface field investigation, below ground and above ground electrical lines, communication, water, and sewer lines were observed along the right-of-way of U.S. Highway 441 and along the recently constructed entrance roadway that borders the western and southern portions of the site. Other utilities were not observed at the subject site by Whitestone but may be present. The utility information contained in this report is presented for general discussion only and is not intended for construction purposes.

Site Drainage: Surface run-off generally follows existing topography draining vertically through the existing exposed grass and soil surface throughout the site.

3.3 SITE GEOLOGY

The site is located within the Florida Coastal Plain Physiographic Province of the United States and the Alachua Karst Hills Geomorphology Province of Florida. According to the Florida Geological Survey Geologic Map of the State of Florida 1:100,000 Scale, the immediate underlying geologic formation is

mapped as the Hawthorn Group, Undifferentiated. The undifferentiated Hawthorn Group sediments are generally light olive gray and blue gray in unweathered sections to reddish brown in deeply weathered sections, poorly to moderately consolidated, clayey sands to silty clays and relatively pure clays. The underlying bedrock also consists of the Eocene-age Ocala Limestone Formation, underlain by the Avon Park Formation. The Ocala Limestone and Avon Park Formations generally consist of cream to light-brown to tan and white to orangish gray, sandy, variably fossiliferous limestone occasionally interbedded with fossiliferous dolostone. The overburden materials at the site include beach and near shore deposits of sand, silt, and smectitic-clay decomposition residuum.

The site is mapped by United States Geological Survey as being within a humid climate karst area. Karst conditions, including solution cavities, are known to exist in areas where carbonate limestone bedrock is present. The limestone bedrock, which is water soluble and susceptible to solution cavities and void formation, can result in surficial depressions or sinkholes. The site is located within the Ocala Karst District in which the Ocala Limestone exhibits extensive karstification. These karst features often have tens of feet of relief, dramatically influencing the topography of the Ocala Karst District. Based on a review of the Florida Department of Environmental Protection (FDEP) *Subsidence and Swallet Incident Reports*, the closest reported subsidence or swallet incident is approximately 1.25 miles from the subject site. There are an additional 15 previous subsidence and swallet incidents reported within an approximate five-mile radius of the site. The site is mapped within Florida Sinkhole Area Type III, that consists mainly of cohesive clayey sediments of low permeability. Sinkholes are most numerous, of varying size, and develop abruptly. Cover collapse sinkholes dominate. Cover generally ranges from 30 feet to 200 feet above carbonate rock.

3.4 PROPOSED CONSTRUCTION

Based on the above referenced *Conceptual Site Plan* prepared by Bowman, the proposed site development includes construction of an approximately 4,987-square feet single-story Chick-fil-A restaurant with drive-thru services, outdoor patio area, trash enclosure, and associated pavements, utilities, and landscaping. No SWM areas and/or earth retaining walls areas are planned as part of the Chick-fil-A development area. Whitestone assumes the subject site will be redeveloped at or near existing grades with maximum cuts/fills on the order of approximately one foot to two feet.

Detailed structural loading has not yet been developed. Based on past experience with similar facilities, Whitestone expects that the proposed structure will consist of a combination of masonry and metal framing with ground-supported concrete foundations and floor slab. The maximum design loads are less expected to be than the following:

- interior column loads - 60.0 kips;
- load bearing walls - 2.0 kips per linear foot;
- floor slab loads - 125 pounds per square foot; and
- pavement load - 25,000 (18) kip equivalent single axel loads.

The scope of Whitestone's investigation and the professional advice contained in this report were generated based on the project details and loading noted herein. Any revisions or additions to the design details enumerated in this report should be brought to the attention of Whitestone for additional evaluation as warranted.

SECTION 4.0
Subsurface Conditions

Details of the subsurface materials encountered are presented on the *Records of Subsurface Exploration* presented in Appendix A of this report. The subsurface soil conditions encountered in the borings and test pits conducted consisted of the following generalized strata in order of increasing depth.

4.1 SUBSURFACE SOIL CONDITIONS (WHITESTONE)

Surface Cover: The subsurface tests were conducted within grass-covered and/or exposed soil surface covered areas. Borings conducted within grass covered areas encountered approximately one inch of sandy topsoil at the surface consisting of poorly graded sand with silt and a trace amount of roots.

Coastal Plain Deposits: Underlying surface cover, the subsurface tests encountered natural coastal plain deposits that primarily consisted of poorly graded sand (USCS: SP, SP-SM) with variable amounts of silt and gravel, clayey sand (USCS: SC), sandy fat clay (USCS: CH), and/or elastic silt (USCS: MH). The fat clay and elastic silt soils were encountered at the shallowest depth of six fbgs. The subsurface tests were terminated in this stratum at depths that ranged from approximately eight fbgs to 16.5 fbgs. SPT N-values recorded within coarse grained portions of this stratum ranged from two blows per foot (bpf) to 21 bpf, indicating very loose to medium dense relative densities and averaging approximately seven bpf. SPT N-values recorded within fine grained portions of this stratum ranged from 10 bpf to 22 bpf and averaged approximately 14 bpf.

4.2 GROUNDWATER

Static groundwater was not encountered within the subsurface tests conducted with the maximum explored depth of approximately 16.5 fbgs. However, perched/trapped water conditions may be present following periods of precipitation, particularly above finer-grained soils. In the fine-grained site soils at the site, groundwater levels may not stabilize in the bore holes and test pits for several days and actual groundwater levels could vary from those encountered during this investigation. Groundwater levels are expected to fluctuate seasonally and following periods of precipitation.

SECTION 5.0
Conclusions and Recommendations

5.1 GENERAL

The results of the subsurface investigation and analysis indicate that the proposed structures may be supported by conventional ground supported shallow foundations and floor slabs following in-place compaction improvement and approval of the very loose to loose upper natural sandy soils encountered within the proposed building footprint and canopy foundation areas, as recommended herein. The existing sandy soils are anticipated to be suitable for supporting pavements contingent upon compaction improvement and construction phase evaluation. Areas of overexcavation and replacement/recompaction of upper very loose to loose site soils should be anticipated within the proposed building pad, canopy foundations, and pavement areas prior to structural support. Although not anticipated based on the results of Whitestone's subsurface investigations, the fat clays and elastic silts will require complete overexcavation and replacement with granular soils if encountered within 18 inches of final foundation and floor slab subgrade elevations, and 12 inches of the pavement subgrade elevations due to their expansion potential. The fat clay and elastic silt soils will not be suitable for reuse as structural backfill materials due to their high moisture sensitivity and expansion potential. A majority of the remaining site soils, including the poorly graded sand and clayey sand natural soils, are anticipated to be suitable for reuse as structural backfill materials following stringent moisture control and segregation of any organics, if encountered.

The site is underlain by carbonate bedrock including limestone. Karst conditions including solution cavities are known to exist where carbonate bedrock is present. However, the results of Whitestone's subsurface investigation did not identify conditions typically indicative of an elevated global risk for sinkhole development, e.g., subsurface voids, and/or solution channels.

5.2 SITE PREPARATION AND EARTHWORK

Surface Cover Stripping: Prior to stripping operations, all utilities should be identified and secured. Surficial vegetation and topsoil should be stripped at least five feet beyond the limits of the proposed construction areas. Although not anticipated, any remnant structures encountered during site grading or excavations including foundation walls, footings, slabs, and utilities, should be removed entirely from below proposed foundations and slabs including their zones of influence (as determined by the owners Geotechnical Engineer) and excavated to at least two feet below proposed construction subgrade levels elsewhere. The earthwork contractor should be required to conduct earthwork in accordance with the recommendations in this report, including backfilling any excavation, etc. with structural fill. Any fill or backfill placed within the proposed development areas during stripping operations should be placed as structural fill in accordance with Section 5.2 and 5.3 of this report.

Surface Preparation/Proofrolling: Prior to placing any fill, backfill or subbase materials to raise or restore grades to the proposed building and/or pavement subgrade elevations, the exposed soils should be compacted to a firm and unyielding surface with a minimum of four passes in two perpendicular directions of a minimum 20-ton, vibratory smooth drum roller. The surface should be proofrolled with a loaded tandem axle truck in the presence of the geotechnical engineer to help identify soft or loose pockets that may require removal and replacement or further investigation. Any fill or backfill should be placed and compacted in accordance with Section 5.3.

Weather Performance Criteria: The site soils may soften when exposed to water; every effort must be made to maintain drainage of surface water runoff away from construction areas by grading and limiting the exposure of excavations and prepared subgrades to rainfall. Accordingly, excavation and fill placement procedures should be conducted during favorable weather conditions. Overexcavation of saturated soils and replacement with controlled structural fill per Section 5.3 of this report may be required prior to resuming work on disturbed subgrade soils.

On-Site Soil Protection and Maintenance: The site soils will degrade when exposed to inclement weather or repeated construction traffic. However, if properly protected and maintained as recommended herein, the site soils will provide adequate support for the proposed construction. The site contractors should employ appropriate means and methods to protect the subgrade including, but not limited to the following:

- sealing exposed subgrade soils on a daily basis with a vibratory smooth drum roller;
- regrading the site as needed to maintain positive drainage away from open earthwork construction areas and to prevent standing water;
- removing wet surficial soils and ruts immediately; and
- limiting exposure to construction traffic and precipitation especially following inclement weather.

Pavement Subgrade Stabilization and Inspection: Pavement subgrade soils which are exposed to inclement weather and heavy construction traffic will degrade and require either extensive drying time or overexcavation and replacement in order to provide a suitable subgrade for pavements. Overexcavation of unstable soils within pavement areas typically should be limited to approximately 1.5 feet below planned subgrade unless directed otherwise by the owner's geotechnical engineer, provided that a reinforcing geogrid approved by the owner's geotechnical engineer is used. Alternatively, unstable materials may be completely overexcavated and either aerated and recompacted or replaced with imported structural fill per Section 5.3. However, this option is likely least economical.

Geogrids typically are economical when proposed undercut depths exceed approximately 18 inches. The geogrid (Tensar TriAx TX130S, or similar) should be placed directly on the exposed subgrade and backfill should consist of a well-graded gravel and sand blend. The services of the geotechnical engineer should be

retained to inspect soil conditions during construction and to provide specific recommendations for stabilizing subgrades. Additionally, a geotechnical engineer should be retained to verify the suitability of prepared pavement subgrades for support of design loads.

Carbonic Rock Area Considerations: Carbonate rock formations are soluble in mildly acidic water and characteristically contain subsurface voids and solution cavities of varying sizes. Sinkholes occur when soil overlying the void washes into underlying voids in sufficient quantities to cause a surficial collapse. Naturally formed sinkholes typically require thousands to tens of thousands of years to form, however, sinkhole development can be greatly accelerated by acts of man. For this reason, care should be exercised when constructing structures within a sinkhole prone area. Many triggering mechanisms have their origin in rapidly fluctuating, or artificially fluctuating groundwater levels. These conditions may be caused by situations beyond the owner's control, including saturating rains, droughts, drawdown from neighborhood wells, or changes to drainage patterns. Sinkholes can form undetected, even if prudent design and construction practices are implemented.

Site Planning Considerations: At a minimum, the recommended measures to reduce sinkhole occurrence include relatively minor site planning considerations and construction measures to minimize risks inherent to the region. Such measures should include proper grading to avoid concentrations of surface runoff. Additionally, excavations for footing and utilities should not be exposed to rain and surface runoff due to potential increased risk of sinkhole formation and degradation of subgrade materials. Any excavation that must remain open for more than one day is recommended to be sealed at the base with a lean concrete mud mat.

Regional development also should be monitored during the life of the facility to identify conditions that might affect groundwater levels or drainage patterns. If prudent design measures and construction phase considerations are properly implemented, the long-term risk of potential sinkhole activity may be reduced. Sinkholes can form undetected even if prudent design and construction practices are implemented.

Sinkhole Remediation: Although no open sinkholes or surface depressions were identified during the investigation, sinkholes can develop during relatively short time periods and risk of sinkhole occurrence generally increases during construction because of exposed soil conditions and temporary drainage issues. Early formation of sinkholes often can be detected by depressions at the ground surface or within excavations. If suspicious depression areas develop during construction, the locations should be probed or excavated in the presence of the geotechnical engineer to determine if additional investigation is required. In the event that new sinkholes occur during construction, Whitestone preliminarily recommends excavating the sinkhole to expose the throat (cavity) and backfilling the area with grout or lean concrete. If a depression is observed during construction, Whitestone should be notified immediately for remediation recommendations.

5.3 STRUCTURAL FILL AND BACKFILL

Imported Fill Material: Any imported material placed as structural fill or backfill to raise elevations or restore design grades should consist of clean, relatively well-graded sand or gravel with a maximum particle size of two inches and five percent to 15 percent of material finer than a #200 sieve. Silts, clays, and silty or clayey sands and gravels with higher percentage of fines and with a liquid limit less than 40 and a plasticity index less than 20 may be considered subject to the owner's approval, provided that the required moisture content and compaction controls are met during favorable weather conditions. The material should be free of clay lumps, organics, and deleterious material. Imported structural fill material should be approved by a qualified geotechnical engineer prior to delivery to the site.

On-Site Materials: Whitestone anticipates that a majority of the upper natural sandy soils will be structurally suitable for selective reuse as fill/backfill material, provided that soil moisture contents are controlled within two percent of optimum moisture level, any particles larger than three inches in diameter are removed, and objectionable portions, such as any organics or debris, if encountered, are segregated. Although not anticipated within proposed construction excavation depths, if encountered, the underlying fat clay and elastic silt natural soils (USCS: CH and MH) are not suitable for reuse as structural backfill materials due to their plasticity/elasticity and expansion potential. Reuse of the site soils will be contingent on careful review in the field by visual observation by the owner's geotechnical engineer during construction as recommended herein. Immediate reuse of the site clayey sand soils (USCS: SC) should not be anticipated due to the moisture sensitivity. The surficial topsoil encountered at the site is not suitable for reuse as structural backfill and should be placed in landscaped areas, where possible.

Compaction and Placement Requirements: On-site soils used as fill or backfill should be placed in maximum nine-inch loose lifts and compacted using a 20-ton smooth drum vibratory drum roller during mass grading activities or a small walk-behind roller or hand-held vibratory compactor within excavations. All structural fill and backfill, including 10 feet outside exterior building walls, should be compacted to at least 95 percent of the maximum dry density within two percent of the optimum moisture content as determined by ASTM D 1557 (Modified Proctor).

Structural Fill Testing: A sample of the imported fill material or any on-site material proposed for reuse as structural fill or backfill should be submitted to the geotechnical engineer for analysis and approval at least one week prior to its use. The placement of all fill and backfill should be monitored by a qualified engineering technician to ensure that the specified material and lift thicknesses are properly installed. A sufficient number of in-place density tests should be conducted to ensure that the specified compaction is achieved throughout the height of the fill or backfill.

5.4 GROUNDWATER CONTROL

Static groundwater was not enconstructicountered during this investigation with the maximum depth explored of approximately 16.5 fbgs. However, perched/trapped water may be encountered above finer-grained site soils. As such, construction phase dewatering may consist of removing surface water runoff, infiltrating water, or trapped water at this site. Whitestone anticipates that construction phase dewatering, if required, would include installing temporary sump pits and filtered pumps within trenches and excavations. Brief ponding of stormwater may occur across the site after heavy rains.

Proper grading and drainage should be incorporated into the site design and construction phase grading to discourage ponding of surface runoff. Every effort should be made to maintain drainage of surface run-off away from construction areas by grading. The contractor should limit exposure of excavations and prepare subgrades to rainfall. Overexcavation of wet soils and replacement with controlled structural fill per Section 5.3 of this report may be required prior to resuming work on disturbed subgrade soils.

5.5 FOUNDATIONS

Shallow Foundation Design Criteria: Following in-place compaction improvement and approval of the upper very loose to loose natural sandy soils encountered within the building footprint and canopy foundation areas, Whitestone recommends supporting the proposed structures on conventional shallow spread and continuous footings designed to bear within the improved and approved natural soils and/or structural fill/backfill materials, provided these materials are properly evaluated, placed and compacted in accordance with Sections 5.2, 5.3, and 5.11 of this report. Areas of overexcavation and replacement/recompaction of the upper very loose to loose natural sandy soils may be required throughout the building footprint and canopy foundation areas due to the upper very loose to loose upper zones encountered. Although not anticipated within 18 inches of final foundation bearing subgrade elevations based on the results of Whitestone's subsurface investigations, the fat clays and elastic silts will require complete overexcavation and replacement with granular soils if encountered within 18 inches of final foundation subgrade elevations due to their expansion potential. Provided the footing subgrades are also thoroughly surface compacted with a vibratory drum roller or heavy plate compactor, foundations bearing within these materials may be designed to impart a maximum net allowable bearing pressure of 2,000 pounds per square foot.

Foundation subgrades in soil should be compacted in the presence of the geotechnical engineer to densify any disturbed soils. Regardless of loading conditions, new foundations should be sized no less than minimum dimensions of 18 inches for continuous wall footings and 24 inches for isolated column footings.

Footings should be designed such that the maximum toe pressure due to the combined effect of vertical loads (including soil weight) and overturning moment does not exceed the recommended maximum allowable bearing pressure. In addition, positive contact pressure should be maintained throughout the base of the footings such that no uplift or tension exists between the base of the footings and the supporting soil. Uplift loads should be resisted by the weight of the concrete footing. Side friction should be neglected when proportioning the footings, and lateral resistance should be provided by friction resistance at the base of the footings. A coefficient of friction (ultimate) against sliding of 0.4 is recommended for use in the design of the foundations bearing within the site soils or imported structural fill.

Foundation Inspection: Whitestone recommends that the suitability of the bearing soils along the footing bottoms be verified by a geotechnical engineer prior to placing concrete for the footings. Special attention should be given to areas underlain by very loose and loose sandy soils which are anticipated throughout the proposed building footprint and canopy foundation areas. In the event that isolated areas of unsuitable materials are encountered in footing excavations, overexcavation and replacement of the materials or deeper foundation embedment may be necessary to provide a suitable footing subgrade. Any overexcavation to be restored with structural fill will need to extend at least one foot laterally beyond footing edges for each vertical foot of overexcavation. Lateral overexcavation may be eliminated if grade is restored with lean concrete. The bottom of overexcavated foundation trench areas should be compacted with vibratory smooth drum rollers, walk-behind compactors, vibrating plates or plate tampers ("jumping jacks") to compact locally disturbed materials and densify any underlying loose zones. Any standing water within the footing excavation should be removed with a mechanical pump prior to concrete placement.

Settlement: Whitestone estimates post construction settlements of new foundations will be on the order of less than one inch if the recommendations outlined in this report are properly implemented. Differential settlement between individual footings should be less than one-half inch.

Foundation Embedment: Exterior turndown footings should be placed at least 18 inches below adjacent exterior grades, or the minimum depth required by local building codes, to maintain adequate confinement and provide undermining protection from potential future adjacent excavations and/or erosion.

5.6 FLOOR SLAB

Following in-place ground improvement via compaction of the upper very loose to loose natural sandy soils encountered within the building footprint, proofroll inspections and approval, Whitestone anticipates that the improved and approved site natural sandy soils will provide suitable support for the floor slab, contingent upon construction phase evaluation and ground improvement efforts. Areas of overexcavation and replacement/recompaction may be required throughout the building footprint due to the very loose to loose upper zones of natural sandy soils encountered. Although not anticipated within 18 inches of the final

floor slab subgrade elevation based on the results of Whitestone's subsurface investigations, the fat clays and elastic silts will require complete overexcavation and replacement with granular soils if encountered within 18 inches of the final floor slab subgrade elevation due to their expansion potential. The exposed subgrade should be compacted and inspected via proofrolling in accordance with Sections 5.2, 5.3 and 5.11 of this report. Any areas that become softened or disturbed as a result of wetting and/or repeated exposure to construction traffic should be removed and replaced with compacted structural fill. The properly improved and prepared site soils and structural fill/backfill materials are expected to yield a minimum subgrade modulus (k) of 150 psi/in.

A minimum four inch layer of three-quarter inch maximum size FDOT Crushed Limerock or similar sized site soils with less than five percent passing the number 200 sieve and a minimum LBR of 40 (if encountered) should be installed below the floor slab to provide a uniform subgrade and capillary break. A moisture vapor barrier should be placed beneath the floor slab in accordance with local building code requirements and/or where recommended by the flooring manufacturer.

5.7 PAVEMENT DESIGN CRITERIA

General: The majority of the improved and approved site natural sandy soils and/or compacted structural fill/backfill placed to raise or restore design elevations are anticipated to be suitable for support of the proposed pavements provided these materials are properly evaluated, compacted, and proofrolled in accordance with Sections 5.2, 5.3, and 5.11 of this report during favorable weather conditions. Areas of overexcavation and replacement/recompaction should be anticipated due to the upper very loose to loose zones encountered throughout the site. Subgrade stabilization with a triaxial geogrid, approved by the owner's geotechnical engineer, may be used to minimize depths of overexcavation (if necessary) as discussed further in Section 5.2. Although not anticipated at or within 12 inches of final pavement subgrade elevations based on the results of Whitestone's subsurface investigations, the fat clays and elastic silts will require complete overexcavation and replacement with granular soils if encountered within 12 inches of final pavement subgrade elevations due to their expansion potential and poor drainage characteristics.

Design Criteria: A preliminary LBR value of 40 has been assigned to the properly prepared subgrade soils for pavement design purposes. This value was correlated with pertinent soil support values and assumed traffic loads to prepare flexible and rigid pavement designs per the AASHTO *Guide for the Design of Pavement Structures*.

Design traffic loads were assumed based on typical volumes for similar facilities and correlated with 18-kip equivalent single axle loads (ESAL) for a 20-year life. An estimated maximum pavement load of 25,000 ESALs was used for the pavement design. This value assumes the pavement primarily will accommodate both automobile and limited heavier truck traffic. Actual loading experienced is anticipated to be less than this value.

Pavement Sections: Pavement components should meet material specifications from FDOT *Standard Specifications* specified below. The recommended flexible pavement section is tabulated below:

FLEXIBLE PAVEMENT SECTION		
Layer	**Material**	**Thickness (inches)**
Asphalt Top Course	FDOT Section 334 Type SP-12.5 (Superpave Asphalt Concrete); PG 67-22	1.5
Asphalt Binder Course	FDOT Section 334 Type SP-19.0 (Superpave Asphalt Concrete); PG 67-22	2.5
Base Course	Crushed Limerock with minimum LBR of 100, compacted to 98% modified Proctor maximum dry density	6.0
Stabilized Subgrade	Subgrade with minimum LBR of 40 compacted to 98% modified Proctor maximum dry density	12.0

A rigid concrete pavement should be used to provide suitable support at areas of high traffic or severe turns, such as at the drive-thru, trash enclosure, and ingress/egress locations. The recommended rigid pavement section is tabulated below:

RIGID PAVEMENT SECTION		
Layer	**Material**	**Thickness (inches)**
Surface	4,000 psi air-entrained concrete	6.0 [1]
Base Course	Crushed Limerock with minimum LBR of 100, compacted to 98% modified Proctor maximum dry density	6.0
Stabilized Subgrade	Subgrade with minimum LBR of 40 compacted to 98% modified Proctor maximum dry density	12.0

Note [1]: The outer edges of concrete pavements are susceptible to damage as trucks move from rigid pavement to adjacent flexible pavement. Therefore, the thickness at the outer two feet of the rigid concrete pavement should be 12 inches. The concrete should be reinforced with at least one layer of six-inch by six-inch W5.4/W5.4 welded wire fabric (ASTM A185).

Additional Design Considerations: The pavement section thickness designs presented in this report are based on the design parameters detailed herein and are contingent on proper construction, inspection, and maintenance. Additional pavement thickness may be required by local code. The designs are contingent on achieving the minimum soil support value in the field. To accomplish this requirement, all subgrade soil and supporting fill or backfill must be properly evaluated, placed, and prepared as detailed in Sections 5.2, 5.3, and 5.11 of this report. Proper drainage must be provided for the pavement structure including appropriate grading and surface water control, as well as measures to drain water from the subgrade.

The performance of the pavement also will depend on the quality of materials and workmanship. Whitestone recommends that FDOT standards for materials, workmanship, and maintenance be applied to this site. Project specifications should include verifying that the installed asphaltic concrete material

composition is within tolerance for the specified materials and that the percentage of air voids of the installed pavement is within specified ranges for the respective materials. Rigid concrete pavements should be suitably air-entrained, jointed, and reinforced in general accordance with ACI 330R-08 *Guide for the Design and Construction of Concrete Parking Lots*.

5.8 RETAINING WALL/LATERIAL EARTH PRESSURES

Proposed site retaining walls were not indicated at this time. Whitestone should be notified if retaining walls or structures resisting lateral earth pressures are planned. The following recommendations are provided for preliminary planning.

Lateral Earth Pressures: Retaining/below-grade walls should be capable of withstanding active and at-rest earth pressures. Backfill soils adjacent to these structures should consist of freely draining granular fill composed primarily of coarse to fine sand. Silty soils should not be used as retaining wall backfill. With an active earth pressure coefficient (K_a) of 0.33, level backfill, and an assumed maximum backfill soil unit weight of 130 pounds per cubic foot (pcf), an equivalent fluid pressure of 43 psf per foot of wall height should be used in design of retaining/below-grade walls which are free to rotate.

Retaining/below-grade walls and wall corners typically are restrained from lateral movement and should be designed using at-rest earth pressures. A coefficient of at-rest earth pressure (K_o) of 0.5, for a level backfill, is recommended for retaining/below-grade walls designed to resist at-rest earth pressures, which assume no lateral movement. With an assumed maximum total unit weight of backfill of approximately 130 pcf, an equivalent fluid pressure of 65 pounds per square foot per foot of wall height should be used in design of restrained retaining/below-grade wall and wall corners. A coefficient of friction of 0.4 against sliding can be used for concrete on the existing site soils. Additional lateral earth pressures from a sloped backfill or any temporary or long-term surcharge loads also should be included in the design. Retaining wall design should include a global stability analysis.

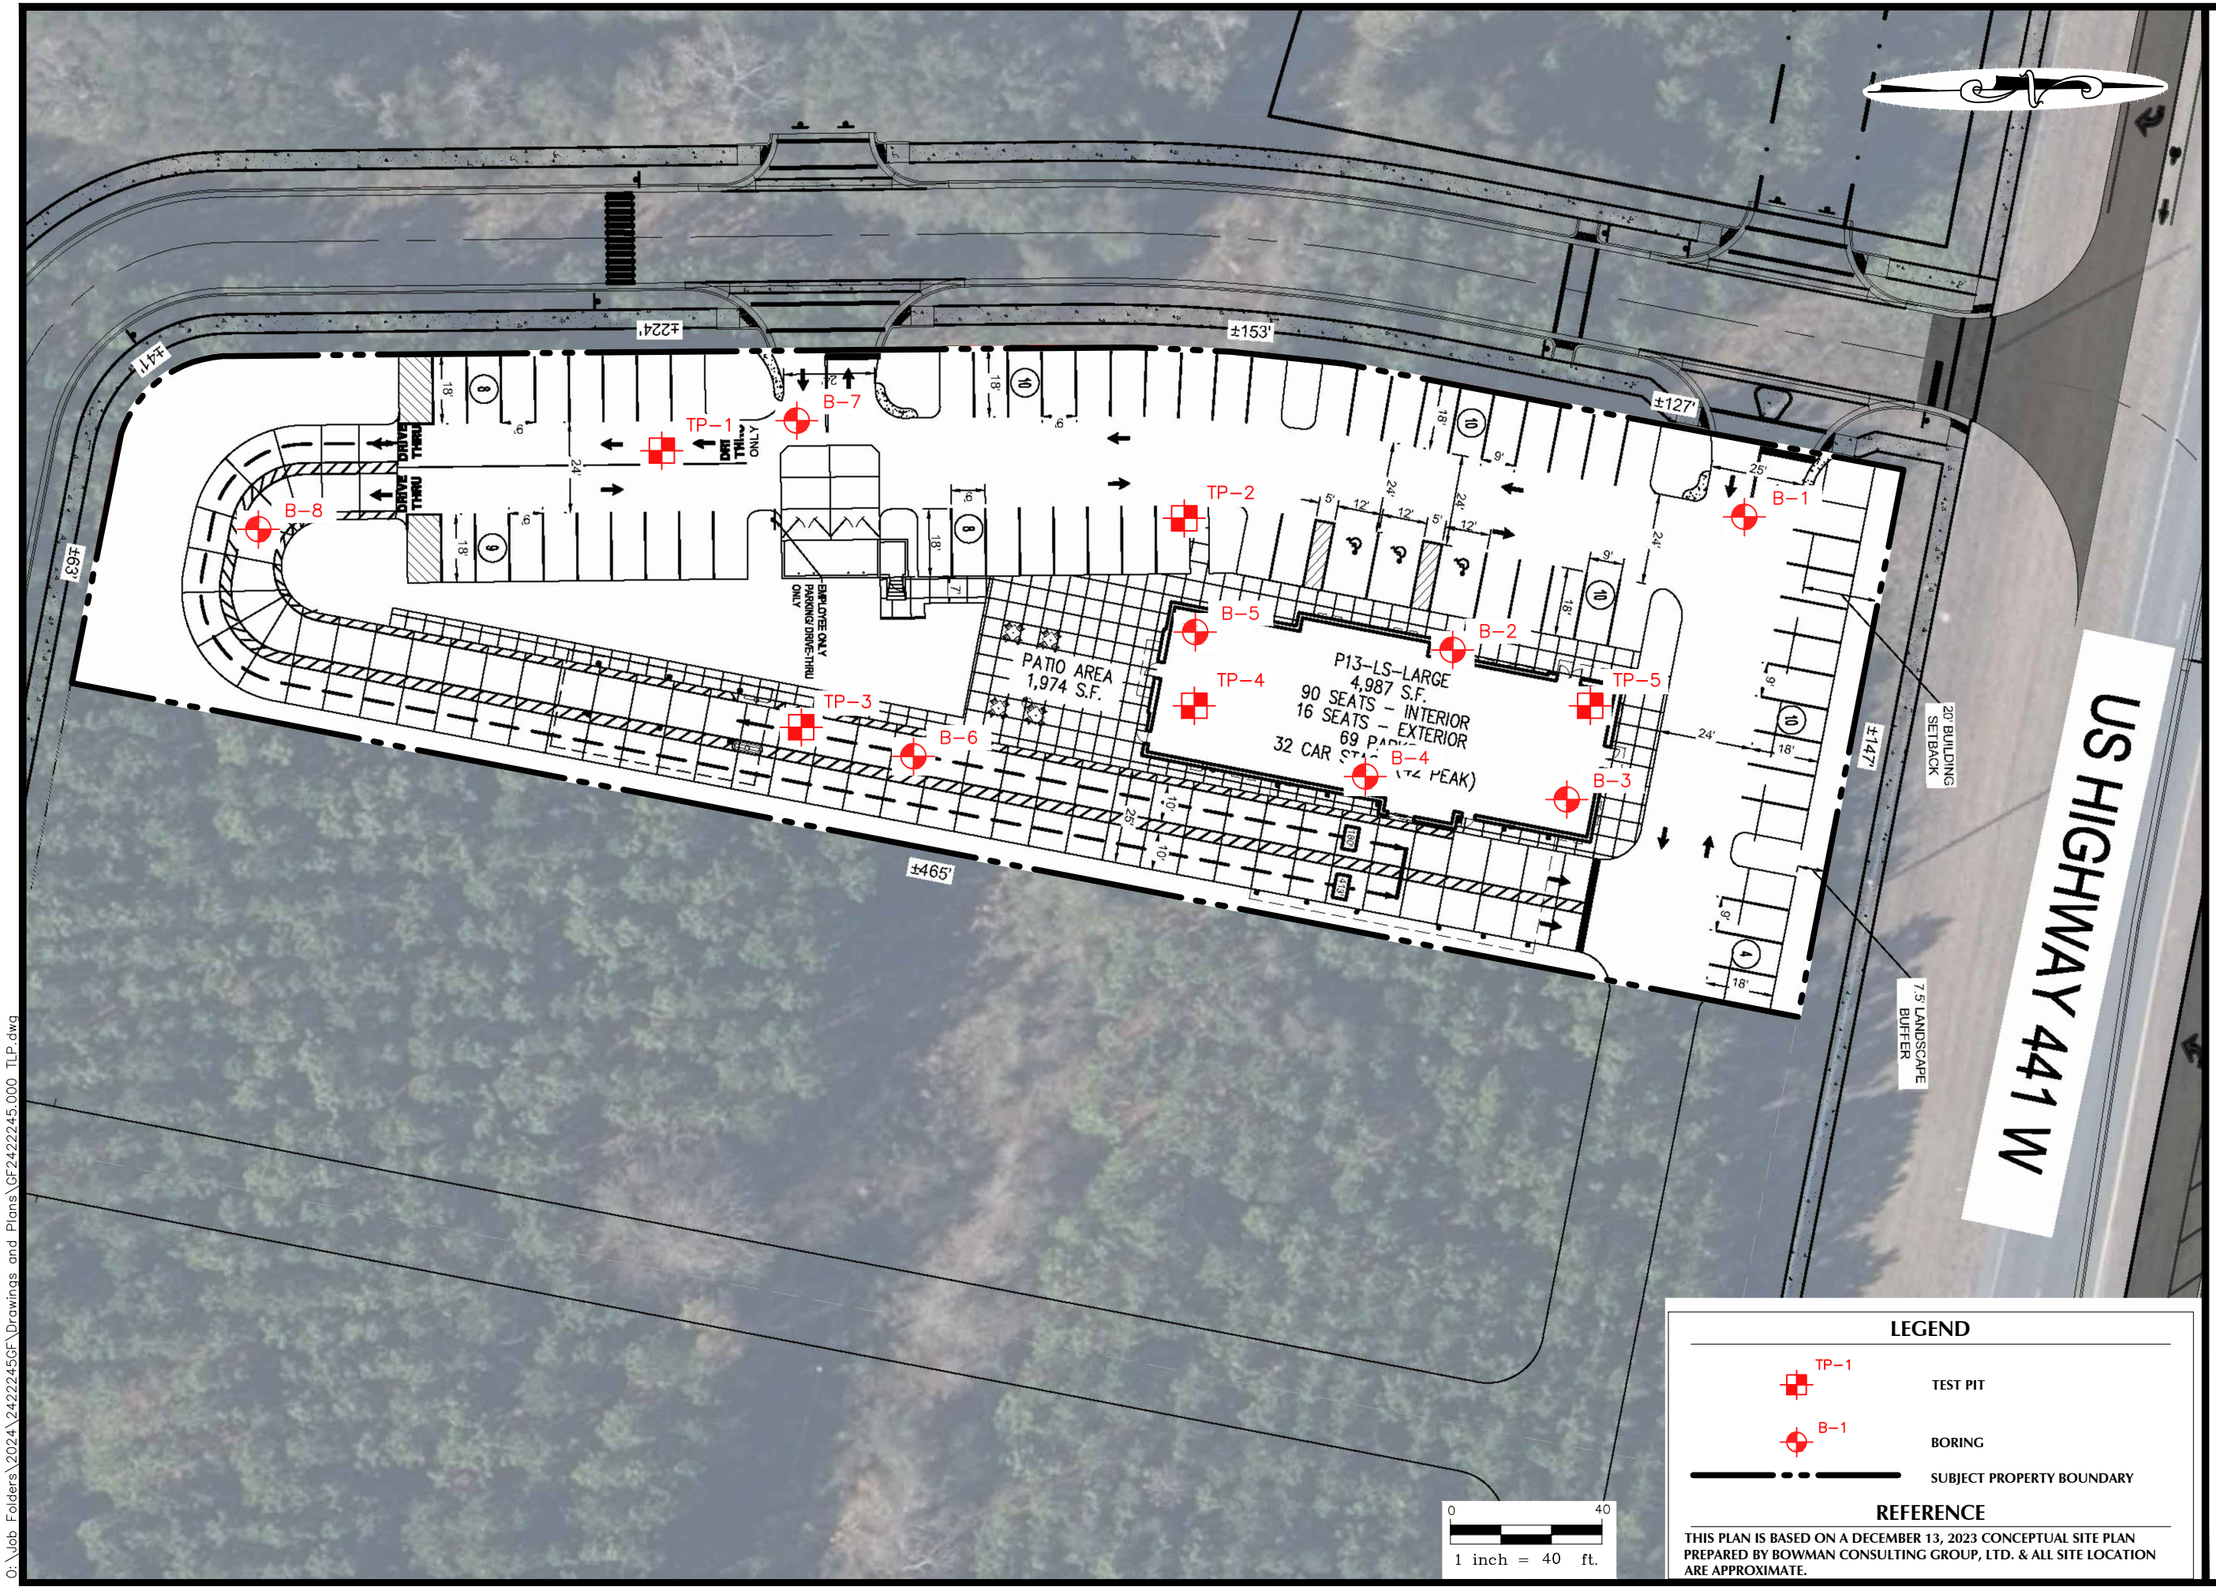
Backfill Criteria: Whitestone recommends that granular soils be used to backfill behind retaining walls. The granular backfill materials should consist of clean, relatively well-graded sand or gravel with a maximum particle size of three inches and up to 12 percent of material finer than a #200 U.S. Standard sieve. A majority of the upper site soils (USCS: SP-SM) are anticipated to be suitable for retaining wall backfill, if required.

Whitestone recommends that backfill directly behind any walls be compacted with light, hand-held compactors. Heavy compactors and grading equipment should not be allowed to operate within a zone of influence measured at a 45-degree angle from the base of the walls during backfilling to avoid developing excessive temporary or long-term lateral soil pressures.

Wall Drainage: Positive drainage should be provided at the base of the retaining/below-grade walls. Where wall drainage is not provided, the wall should be designed to withstand full hydrostatic pressure.

Whitestone should be notified if any other retaining structures or design considerations requiring lateral earth pressure estimations are proposed. Specific recommendations for temporary retaining structures are beyond Whitestone's scope of work.

5.9 SEISMIC AND LIQUEFACTION CONSIDERATIONS



The subsurface conditions are most consistent with a Site Class D as defined by the *2023 Florida Building Code*. Based on the seismic zone and soil profile, liquefaction considerations are not expected to have a substantial impact on design.

5.10 EXCAVATIONS

The natural soils encountered during this investigation are consistent with, at least, Type C Soil Conditions as defined by 29 CFR Part 1926 (OSHA) which require a maximum unbraced excavation angle of 1.5:1 (horizontal:vertical). Actual conditions encountered during construction should be evaluated by a competent person (as defined by OSHA) to ensure that safe excavation methods and/or shoring and bracing requirements are implemented.

5.11 SUPPLEMENTAL POST INVESTIGATION SERVICES

Construction Inspection and Monitoring: The owner's geotechnical engineer should conduct inspection, testing, and consultation during construction as described in previous sections of this report. Monitoring and testing should also be conducted to verify that the ground improvement within the building pad, canopy foundation and pavement areas recommended herein is conducted and approved, and suitable materials used for controlled fill/backfill are properly placed and compacted over suitable subgrade soils. The overexcavation and replacement/recompaction of any very loose upper natural sandy soils encountered within the proposed building footprint, canopy foundation, and pavement areas that are unsuitable for structural design support in their current condition should be witnessed and documented by the owner's geotechnical engineer. The overexcavation of unsuitable fine-grained soils with expansion potential and proper placement of structural fill/backfill within the building pad, canopy, and pavement areas should also be documented by the owner's geotechnical engineer.

A. PROJECT

1. Project Name: Tidal Wave Auto Spa - Alachua
2. Pre-Application Conference Date: 04/01/2025
3. Neighborhood Meeting Date: 07/31/2025
4. Address of Subject Property: NW US 441 & NW 173rd Street
5. Parcel ID Number(s): 03044-003-000 & 03042-050-008
6. Existing Use of Property: Vacant
7. Future Land Use Map Designation: Commercial
8. Zoning Designation: CI
9. Acreage: 1.25
10. Total Existing Building Square Footage, if applicable: N/A
11. Total Existing Impervious Area (not including existing building area), if applicable: N/A
12. Total Building Square Footage Proposed: +/-3,600
13. Total New Impervious Area Proposed (not including building area): 36,040

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☒ Agent
2. Name of Applicant(s) or Contact Person(s): Josh Russell Title: Project Manager
   Company (if applicable): Paulson Mitchell Wise
   Mailing address: 85A Mill Street, Suite 200
   City: Roswell State: GA ZIP: 30075
   Telephone: 251-623-2218 FAX: e-mail: jrussell@civilPMW.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): Alachua 441/235 LLC (John C Vick III)
   Mailing Address: 496 S Hunt Club Blvd
   City: Apopka State: FL ZIP: 32703

   ** Must provide an executed Authorized Agent Affidavit or other acceptable documentation (as deemed acceptable by the City in its sole discretion) authorizing the agent to act on behalf of the property owner.*

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☐ Yes ☒ No
   If yes, list names of all parties involved:
2. Has the applicant discussed possible utility/infrastructure fees with the Public Services Department?

If no, contact the Public Services Department at 386-418-6140. ☒ Yes ☐ No

D. ATTACHMENTS

X 1. Site Plan. Sheet size shall be 24" X 36" with a 3" left margin and ½" top, bottom, and right margin.

Site Plan shall include:

a. Name and location of project.
b. Name and contact information (address, telephone, and email address) of property owner, developer (if applicable), and all professional consultants (i.e., landscape architect, photometric, electrical engineer, architect, etc.) for the project.
c. Zoning of the subject property.
d. Vicinity map - indicating general location of the site and major adjacent streets and all adjacent properties.
e. Boundary and topographic survey. Survey shall be signed and sealed by the surveyor, and shall be no older than two (2) years.
f. Complete legal description of the subject property.
g. Statement of proposed uses.
h. Location of the subject property in relation to adjacent properties.
i. Date, north arrow, and graphic scale (not to exceed one (1) inch equal to 50 feet.)
j. Area and dimensions of the subject property.
k. Structures and major features – fully dimensioned – including setbacks from property lines and right-of-ways, distances between structures (if structures are within 25 feet of one another), floor area of each building, floor area ratio, and property lines.
l. Location of all property lines, existing and proposed adjacent right-of-ways, sidewalks, curbs, and gutters.
m. Distance between ingress and egress connections for the project and the ingress / egress connections for all contiguous properties and for properties on the opposite side of the road, measured from the interior radius of all ingress/egress connections.
n. Location of all existing and proposed utilities (electric, potable water, sanitary sewer, gas, etc.) on the subject property, and on adjacent properties if located within 50 feet of the subject property, and within adjacent rights-of-way.
o. Location of all existing and proposed fire hydrants.
p. Location of all existing easements on the property and on adjacent properties if located within 50 feet of the subject property, and recording information for such easements.
q. Location of all proposed easements (legal descriptions and sketches of all proposed easements shall be provided by the applicant following a review of proposed utility locations by Public Services).
r. Location and dimensions of all existing and proposed vehicular parking spaces, dimensions of all drive aisles, and the angle of parking spaces.
s. Location of all bicycle parking areas and specifications of bicycle racks.
t. Location, dimensions, and vertical clearance of all off-street loading spaces, if required by Section 6.1 of the LDRs.
u. Location and dimensions of all vehicle stacking spaces, if required by Section 6.1 of the LDRs.
v. Vehicular parking calculations, indicating the minimum and maximum number of required spaces and the number of parking spaces provided (regular and accessible spaces) in accordance with Section 6.1 of the LDRs.
w. Bicycle parking calculations, if required by Section 6.1 of the LDRs.
x. Striping and signage for all traffic control devices.
y. Landscape Plan, indicating the location, size, and design of required and proposed landscaped areas. Landscape Plans shall identify the following with sufficient detail and calculations to demonstrate compliance with Section 6.2.2 of the LDRs:
    i. Location, identification of the species, and size of all existing trees.
    ii. Required perimeter buffer areas.
    iii. Parking lot perimeter landscaping.
    iv. Parking lot interior landscaping.
    v. Building façade landscaping.
    vi. Calculation of landscaped areas (see Policy 2.4.a of the Comprehensive Plan Future Land Use Element).
    vii. Calculation of open space provided (see Section 6.7 of the LDRs).
    viii. Calculation of tree credits, if applicable. Calculations shall be as set forth in Sections 6.2.1(D)(4) and 6.2.2(D)(6) of the LDRs and shall be shown on the plan in tabular format (if tree credits are utilized, the Landscape Plan must identify in the landscape calculations where credit is applied).
    ix. Tree protection detail in accordance with Section 6.2.1(D)(2) of the LDRs.
    x. If tree removal is proposed, a tree survey, showing:
        (a) Each tree proposed for removal;
        (b) Each tree proposed for retention;
        (c) The size and species (both common and scientific names) of all trees proposed for removal/retention;

(d) Location, size, and species of all new trees proposed to meet mitigation requirements. Mitigation trees must be shown on the plans and a list of all mitigation trees and calculation of required mitigation must be provided on the plan in tabular format.

z. Location of waste receptacles and detail of waste receptacle screening, demonstrating compliance with Section 6.2.3(B) and, if within the Gateway Overlay District, with Section 3.7.2(C)(5)(c)(ii).

aa. Photometric Plan, demonstrating compliance with the applicable provisions of Section 6.4 of the LDRs.

bb. Location and size of any lakes, ponds, canals, or other waters and waterways, and required setbacks dimensioned on the plans from such waterways.

cc. For development consisting of a nonresidential use, except for single tenant retail sales and services uses greater than or equal to 20,000 square feet in area and except for use types within the industrial services, manufacturing and production, warehouse freight and movement, waste-related services, and wholesale sales use categories ***not*** located within 500 feet of the right-of-way of US Highway 441: Architectural plans demonstrating compliance with the design standards for business uses as provided in Section 6.8.2 of the LDRs. Architectural plans shall include:
   i. Calculation of glazing of:
      (a) the front façade;
      (b) any facade facing a street;
      (c) any façade facing a publicly-accessible parking area which is a part of the development and consisting of 15 percent or more of the minimum off-street parking required by Section 6.1.4(B) of the LDRs; and,
      (d) any façade facing vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.
   ii. Calculation of the area of all façades subject to glazing.
   iii. Detail on the architectural plans depicting façade massing or a massing alternative as defined in Section 6.8.2(A)(2)(b).
   iv. Identification of each material utilized in each façade and the percentage of the total area of the façade for each material used.

dd. For development consisting of a nonresidential use where a single retail services tenant is greater than or equal to 20,000 square feet in area: Architectural plans demonstrating compliance with the design standards for single tenant retail sales and service uses greater than or equal to 20,000 square feet in area as provided in Section 6.8.3 of the LDRs. Architectural plans shall include:
   i. Color plans depicting the color of all materials used in the façade.
   ii. Identification of each material utilized in each façade and the percentage of the total area of the façade for each material used.
   iii. Calculation of glazing of:
      (a) the front façade;
      (b) any facade facing a street;
      (c) any façade facing a publicly-accessible parking area which is a part of the development and consisting of 15 percent or more of the minimum off-street parking required by Section 6.1.4(B) of the LDRs; and,
      (d) any façade facing vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.
   iv. Calculation of the area of all façades subject to glazing.
   v. If a glazing alternative as defined in Section 6.8.3(A)(2)(a)(iv) is used, calculation of area of alternative materials used or identification of other architectural features meeting the requirements of Section 6.8.3 of the LDRs.
   vi. Detail on the architectural plans depicting façade massing or a massing alternative as defined in Section 6.8.2(A)(2)(b) of the LDRs.

ee. For development consisting multi-family residential uses and/or a mobile home park:
   i. Gross acreage.
   ii. Number of dwelling units proposed.
   iii. Density.
   iv. Location and percentage of total open space and recreation areas.
   v. Floor area of each dwelling unit.
   vi. Number of proposed parking spaces.
   vii. Street layout, if applicable.
   viii. Layout of mobile home stands (for mobile home parks only).
   ix. City of Alachua Public School Student Generation Form.

X 2. Stormwater management plan - including the following:
   a. Plans showing existing contours at one (1) foot intervals based on U.S. Coastal and Geodetic Datum.
   b. Proposed finished floor elevation of all buildings.
   c. Existing and proposed stormwater management facilities with size and grades.
   d. Proposed orderly disposal of surface water runoff.
   e. Drainage calculations.

X 3. Fire Department Access and Water Supply Plan. All fire protection plans are subject to review and approval by the Alachua County Fire Marshal and City of Alachua Public Services Department. Fire Department Access and Water Supply Plan shall include:
   a. Plans prepared by a professional engineer licensed in the State of Florida.
   b. Fire flow calculations for each newly constructed building. Calculations shall be performed in accordance with Chapter 18, Section 18.4 of the Florida Fire Prevention Code.
   c. Documentation from the water purveyor stating the available flow to the subject property.

X 4. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools (if applicable) in accordance with Section 2.4.14 of the LDRs.

X 5. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy).

X **For commercial/corporate park/industrial projects:** In addition to submitting specific written information regarding the development's compliance with the relevant Goals, Objectives, and Policies of the City of Alachua Comprehensive Plan, a response to the design and performance standards as provided in Policy 1.3.d (for commercial projects), Policy 1.4.f (for corporate park projects), or Policy 1.5.d (for industrial projects) of the Future Land Use Element:

The following criteria shall apply when evaluating commercial/corporate park/industrial development proposals:

1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
2. Buffering from adjacent existing/potential uses;
3. Open space provisions and balance of proportion between gross floor area and site size;
4. Adequacy of pervious surface area in terms of drainage requirements;
5. Placement of signage;
6. Adequacy of site lighting and intrusiveness of lighting upon the surrounding area;
7. Safety of on-site circulation patterns (patron, employee and delivery vehicles), including parking layout and drive aisles, and points of conflict;
8. Landscaping, as it relates to the requirements of the Comprehensive Plan and Land Development Regulations;
9. Unique features and resources which may constrain site development, such as soils, existing vegetation and historic significance; and
10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design.
11. Commercial/Corporate Park/Industrial uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 10 acres or greater, 0.50 floor area ratio for parcels less than 10 acres but 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio to parcels 1 acre or less.
12. Complementary residential uses (corporate park only).

X 6. *For Site Plans for Buildings Less than 80,000 Square Feet in Area:* One (1) set of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).
For Site Plans for Buildings Greater than or Equal to 80,000 Square Feet in Area: Two (2) sets of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).

X 7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's LDRs;
   ii. Copy of written notice (letter) sent to all property owners within 400 feet and to all persons/organizations registered with the City to receive notice, and a copy of the mailing labels or a list of those who received written notice; and,
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

X 8. Legal description: (1) on 8.5" x 11" paper; and (2) electronic file in Word format.

X 9. Proof of ownership (i.e., copy of deed.)

X 10. Proof of payment of taxes.

X 11. Traffic Impact Analysis or Statement, as deemed applicable to the project by the City of Alachua in its sole discretion.

X 12. Environmental Assessment or Study, as deemed applicable to the project by the City of Alachua in its sole discretion.

X 13. Environmental Resource Permit (or Letter of Exemption) from the Suwannee River Water Management District (SRWMD) or Self-Certification for a Stormwater Management System in Uplands Serving Less than 10 Acres of Total Project Area and Less than 2 Acres of Impervious Surfaces from the Florida Department of Environmental Protection (FDEP) pursuant to Section 403.814(12), Florida Statutes (or documentation which shows a permit application/exemption/self-certification has been submitted to SRWMD or FDEP).

X 14. If access is from a County Road, access management permit from Alachua County Public Works (or documentation which shows a permit application has been submitted).

X 15. If access is from a State Road, access management permit from Florida Department of Transportation (or documentation which shows a permit application has been submitted).

X 16. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any costs associated with outside professional consulting services deemed necessary by the City in its sole discretion will be billed to the applicant at the rate of the consultant. The invoice for such services shall be paid in full prior to any public hearing(s) on the application.

All applicable attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

Under penalty of perjury, I/we certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

WATER USAGE

PAULSON · MITCHELL · WISE

CIVIL ENGINEERS & PLANNERS

Tom Ridgik

Public Services Engineering Supervisor

City of Alachua

Tom,

The attached Estimated Water Usage Analysis provides data from over 300 Tidal Wave Auto Spa carwashes. As shown in this document, the Fresh water used per vehicle is 23.33 gallons with an application period of 20 seconds. This interpolates to a maximum continuous flow rate of 70 Gallons Per Minute therefore a 2" domestic water meter will be used based on the City of Alachua Water meter sizing criteria.

The attached irrigation plan indicates that a minimum 10 gallons per minute is required therefore a ¾" irrigation water meter will be used based on the City of Alachua Water meter sizing criteria.

Water Meter			
Size (inches)	Type	Maximum Continuous Flow Rate (gpm)	Equivalent Residential Connection (ERC)
⅝ × ¾	Positive Displacement	10	1.0
1	Positive Displacement	25	2.5
1 ½	Positive Displacement	50	5.0
2	Positive Displacement	80	8.0

Thanks,

Michael Letson, PE

Project Manager

CONCURRENCY IMPACT ANALYSIS

Concurrency Impact Analysis

To: Carson J Crockett, Principal Planner, City of Alachua

From: Tia Lubbers, PE; Kimley-Horn and Associates

Date: September 3, 2025

RE: ***Alachua Tidal Wave Auto Spa***
Kimley-Horn Project Number 242449000

This Concurrency Analysis is submitted for Alachua Tidal Wave Auto Spa. The proposed use is a 1 lane, ±3,600-square-foot automated carwash. The project is part of the overall Santa Fe Crossing Development. The project area includes parts of Alachua County Tax Parcel(s) 03044-003-000 and 03042-050-008. The development area is located in the southwest quadrant of the intersection of US-441 and County Road 235A. The Zoning District classification is Commercial Intensive (CI). The site's Future Land Use (FLU) category is Commercial. A conceptual site plan is provided as an **Attachment.**

The following analysis estimates potential impacts on City of Alachua transportation facilities that may result from the proposed development.

Trip Generation

Table 1 summarizes the trip generation potential of the proposed development based on the Institute of Transportation Engineer's (ITE) land use code (LUC) 948 (Carwash). It should be noted that the ITE *Trip Generation Manual*, 11th Edition only provides a trip generation rate for the PM peak hour of adjacent street trips for LUC 948. Therefore, it was assumed that the trips generated during the PM peak hour consisted of 10% of the daily number of trips generated by the site. It was also assumed the number of trips generated during the AM peak hour was equivalent to the number of trips generated during the PM peak hour. The site is currently vacant. The proposed carwash was evaluated at buildout with 1 car wash tunnel. Buildout is anticipated to generate a net increase of approximately 775 daily trips, 78 AM peak hour trips (39 in, 39 out), and 78 PM peak hour trips (39 in, 39 out).

Table 1: Trip Generation Summary

ITE Code[1]	Land Use	Intensity	Daily Trips[2]	AM Peak Hour of Adjacent Street[3]			PM Peak Hour of Adjacent Street		
				Total	In	Out	Total	In	Out
Proposed Development									
948	Carwash	1.0 tunnel(s)	775	78	39	39	78	39	39

1. Trip Generation was calculated using the data from ITE's Trip Generation Manual, 11th Edition.

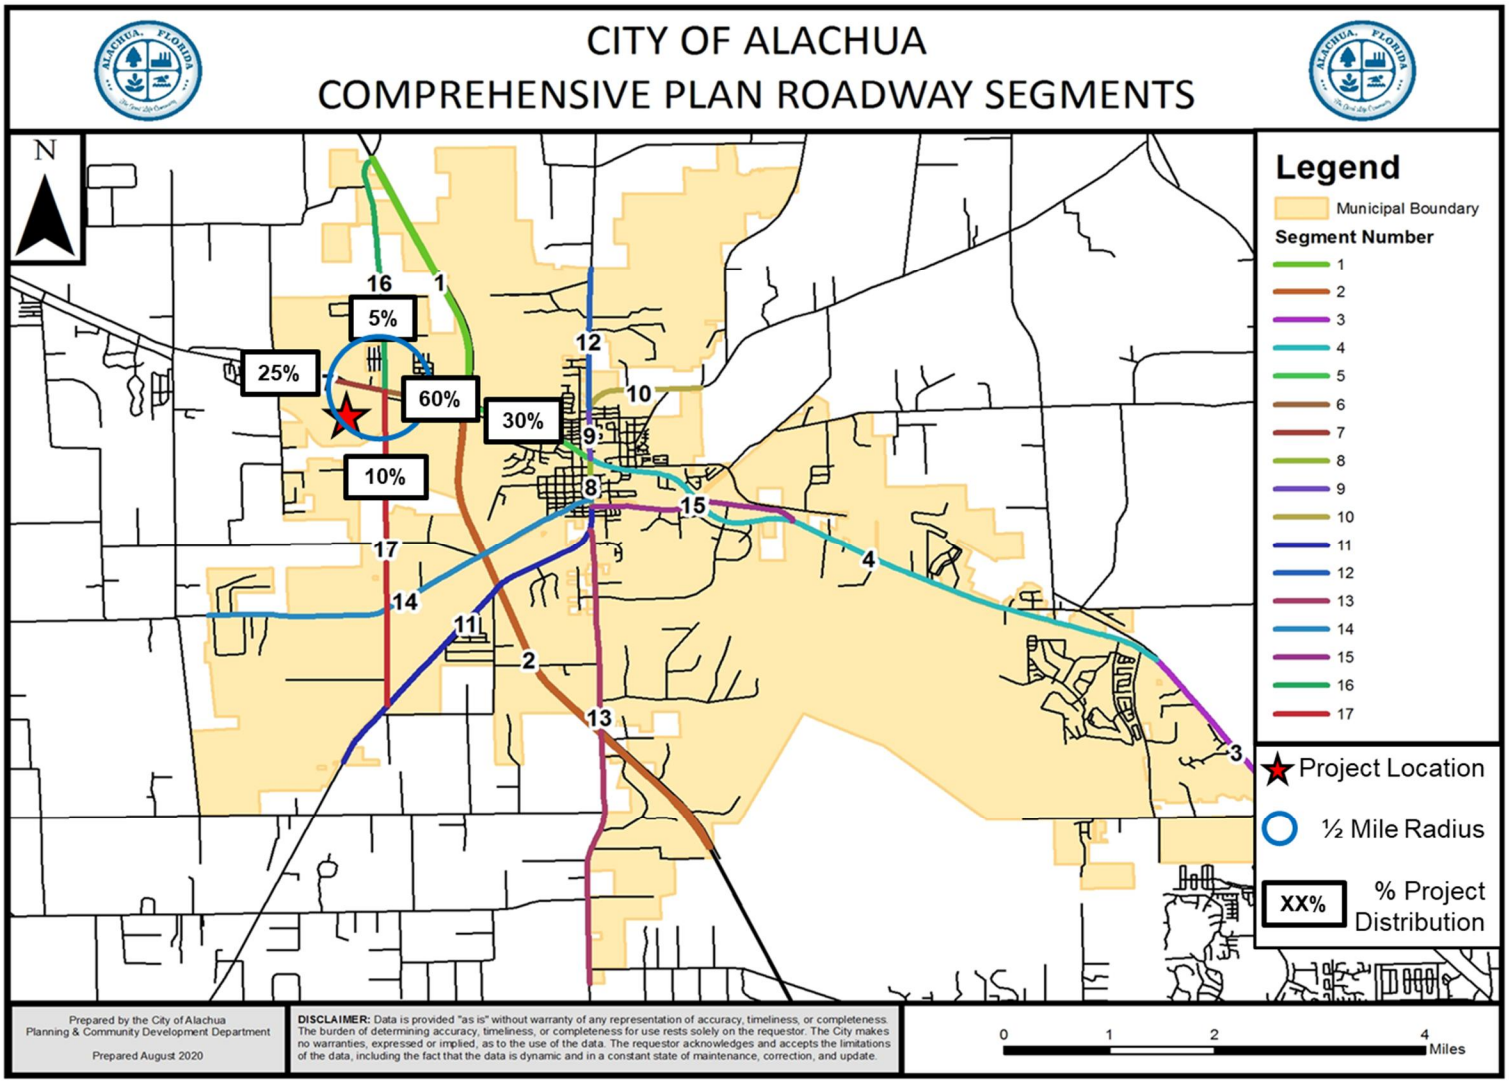
2. Trip Generation for PM Peak Hour of Adjacent Street was assumed to be 10% of daily trip generation.

3. Trip generation for AM Peak Hour of Adjacent Street was assumed to be the same as PM Peak Hour of Adjacent Street.

Automated Car Wash [ITE 948]

Daily	T = 775.00 (X); (X is number of tunnels)
AM Peak Hour of Adjacent Street	T = 77.50 (X); (X is number of tunnels); (50% in / 50% out)
PM Peak Hour of Adjacent Street	T = 77.50 (X); (X is number of tunnels); (50% in / 50% out)

Distribution



The distribution of project trips was consistent with the distribution utilized for the overall Santa Fe Crossing development. Excerpts from the previously prepared Santa Fe Crossing traffic impact study are provided as an **Attachment. Figure 1** illustrates the project trip distribution.

Determining the affected roadway segments was based on the City of Alachua Land Development Regulations Section 2.4.14(H)(2)(a):

> *(i) For proposed developments generating less than or equal to 1,000 external average daily trips (ADT), affected roadway segments are all those wholly or partially located within one-half mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater.*

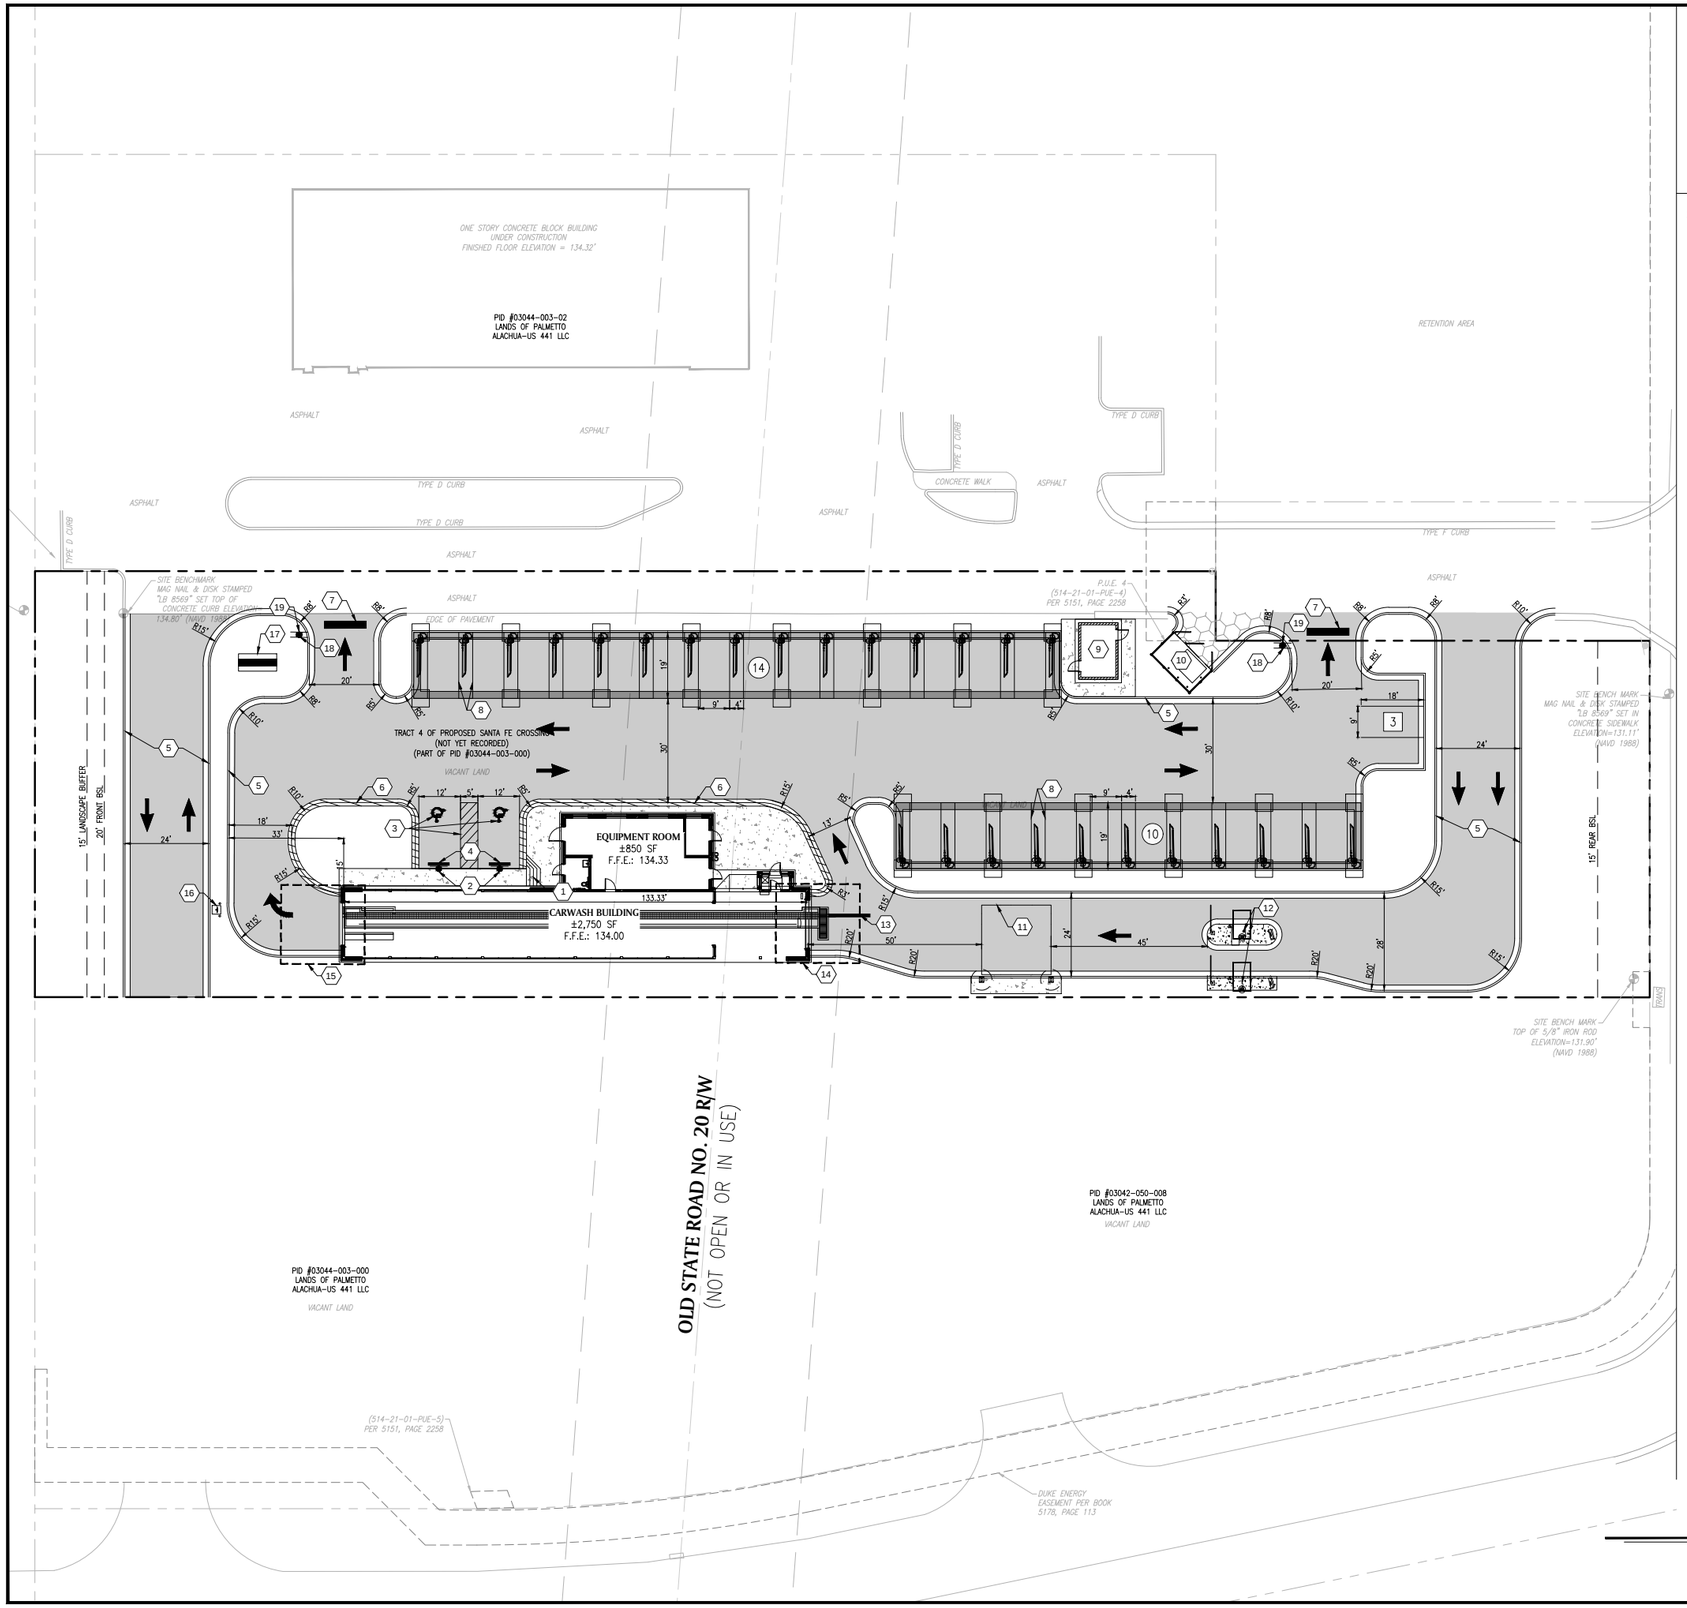
Segment 6 (US 441, from I-75 to CR 235A), Segment 7 (US 441, from CR 235A to NW 188th St), Segment 16 (CR 235A, from US 441 to North City Limit), and Segment 17 (CR 235A, from CR 235 to US 441) are all within one-half mile of the development's access connection and considered to be affected segments. **Figure 1** illustrates the affected segments.

Figure 1: Traffic Segment Map

Transportation Concurrency Analysis

Table 2 summarizes the concurrency capacity evaluation on affected segments.

Table 2: Concurrency Capacity Evaluation



Roadway Segment (#)	From	To	Daily/Peak Hour	MSV	Existing Traffic	Reserved Trips	Available Capacity	% Assign	Project Traffic	Available Capacity after Project Traffic
US 441 (6)	I-75	CR 235A	Daily	39,000	34,000	5,513	(513)	45%	349	(862)
			Peak Hour	3,510	2,819	508	183	60%	47	136
US 441 (7)	CR 235A	NW 188th St	Daily	43,000	25,000	4,548	13,452	35%	271	13,181
			Peak hour	3,870	2,241	441	1,188	25%	20	1,168
CR 235A (16)	US 441	North City Limit	Daily	15,120	2,080	2,840	10,200	10%	78	10,122
			Peak Hour	1,359	185	288	886	5%	4	882
CR 235A (17)	CR 235	US 441	Daily	15,120	6,048	4,373	4,699	10%	78	4,621
			Peak hour	1,359	536	447	376	10%	8	368

Notes:
1. Obtained from Table 2a of the City of Alachua Development Monitoring Report.
2. Project Traffic assignment is the maximum across the segment.
3. Per the City of Alachua LDR Section 2.4.14(H)(2)(a) roadway segments are considered affected if they are within one-half mile radius of the development's ingress/egress or to the nearest major intersection.

As shown in the table above, all segments are anticipated to have remaining capacity with the addition of reserved and project trips with the exception of Segment 6 which is anticipated to exceed its daily capacity with the addition of reserved trips. However, Segment 6 is anticipated to have remaining capacity with the addition of reserved trips and anticipated project traffic during the peak hour. Therefore, the proposed development is not anticipated to cause any new deficiencies on the affected roadway segments.

5.0 BUILDOUT CONDITIONS ANALYSIS – YEAR 2023

5.1 BUILDOUT TRAFFIC

Buildout (2023) AM peak hour and PM peak hour traffic volumes were developed by summing background (2023) traffic and anticipated project trips. Intersection turning movement volume development worksheets for all intersections are provided in **Appendix E**.

5.2 BUILDOUT ROADWAY ANALYSIS

Roadway segment analyses were performed for buildout (2023) daily and PM peak hour conditions. Roadway segment attributes, existing segment volumes, reserved trips, and project trip distributions were assumed consistent with the MPH Study (March 2022).

As summarized in **Table 4,** all roadway segments are anticipated to operate within their maximum service volumes (MSV) under buildout (2023) daily and PM peak hour conditions.

[*THIS SPACE INTENTIONALLY LEFT BLANK*]

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

PAULSON · MITCHELL · WISE
CIVIL ENGINEERS & PLANNERS

April 1, 2026

RE: Tidal Wave Auto Spa – City of Alachua

Comprehensive Plan Consistency Analysis

PMI Project #: 2025144

The project located near the intersection of US HWY 441 and County Road 235A for a Tidal Wave Auto Spa has been designed to align with the City's comprehensive plan goals, policies, objectives, and future land use designation.

The following design aspects align with the City's comprehensive plan:

Policy 1.3.b – Commercial

Evaluation:
The subject property is designated Commercial, which is intended to accommodate a range of commercial activities, including auto-oriented uses. The proposed Tidal Wave Auto Spa car wash is consistent with this designation as an auto-oriented use.

Specifically, the project aligns with Item 8 – Auto-oriented uses, as it is designed to serve motorists through a drive-through format that provides convenient and efficient vehicle cleaning services. The site layout, including dedicated access points, internal circulation, and stacking lanes, is oriented toward vehicular use and supports safe and efficient operation.

The proposed use is compatible with the intent of the Commercial land use category, as it serves the needs of the traveling public and is appropriately located within an area designated for vehicle-oriented commercial development.

Policy 1.3.d – Design and Performance Standards

Evaluation:
The proposed development has been designed to meet the applicable design and performance standards and ensure compatibility with surrounding uses.

1. Interparcel Access: The site includes a shared access drive with Tract 3 and a cross-access drive connecting Tracts 5 and 3. This design promotes connectivity, enhances traffic flow, and provides multiple access routes for both this site and adjacent parcels, helping reduce congestion.

2. Buffering: The site will be buffered to the north by the shared access drive and to the south with landscaped areas, providing separation from adjacent parcels and improving visual and operational compatibility.
3. Open Space: Approximately 12.8% of the site will be maintained as open space, providing additional separation from adjacent roads and internal access drives while enhancing landscaping and overall site aesthetics.
4. Pervious Surface / Stormwater: Proposed pervious coverage is approximately 27.2%, exceeding the minimum 15% required by the overall development plan. This enhances open space and landscaping while supporting effective stormwater management.
5. Signage: Signage will complement the architectural aesthetic of the wash building and will be strategically located to avoid obstructing visibility for adjacent businesses.
6. Lighting: Site lighting will provide sufficient illumination for the car wash and vacuum areas while minimizing off-site light pollution through carefully directed fixtures.
7. Safe On-Site Circulation: Oversized access drives and parking stalls allow patrons to safely vacuum vehicles without impeding traffic flow, ensuring safe circulation for customers, employees, and delivery vehicles.
8. Landscaping: Landscaping throughout the site—including parking lot planting, perimeter buffers, and canopy trees—will comply with Land Development Regulations. Native species will enhance aesthetics and integrate with the surrounding environment.
9. The site has been evaluated for any natural or historic constraints, and development will avoid or mitigate impacts as required.
10. The project is designed to meet all applicable performance-based zoning requirements, including those related to lighting, drainage, and operational characteristics.

Policy 1.3.e – Density and Intensity Standards

Evaluation:
The proposed project is a non-mixed-use commercial development.

a. Density: The project does not include residential uses; therefore, density standards are not applicable.

b. Intensity: The proposed development complies with applicable floor area ratio (FAR) limitations. The subject parcel is approximately 1.25 acres (54,450 square feet), with a proposed building area of 3,376 square feet, resulting in a FAR of approximately 0.06. This is well below the maximum allowable FAR of 0.75 for parcels less than 5 acres. The project represents a low-intensity commercial use, with the majority of the site devoted to vehicle circulation, stacking, and landscaping.

Tidal Wave Auto Spa Neighborhood Meeting Summary

Meeting started at 5:00 pm on July 31st 2025; the scope of the project was discussed along with the neighboring development. Tidal wave representative had regional map to show and discuss where the proposed development was going related to attendees' property and current construction projects. Questions were answered about the Tidal Wave brand, business model, hours of operation, type of employment offered, water and sewer usage, existing traffic studies, and how tidal wave is involved in the community and fundraising opportunities and charity programs that they provide. Also discussed unrelated developments in the area that are in the planning phase. Explained the layout of the development and the components of the site plan to include the access and shaded vacuum parking stalls. Attendees left around 5:45 pm and meeting was adjourned at 6:00 pm.

COUNTY: Alachua
TRS: T8S, R18E, S8

PROJECT: Santa Fe Crossings

Upon completion, the approved entity to which operation and maintenance may be transferredpursuant to rule 62-330.310 and 62.330.340 or 40B-4.1130, Florida Administrative Code (F.A.C.) shall be:

John Wells
SHJ Development, LLC
124 East Thompson Street
Thomaston, GA 30286

Based on the information provided to the Suwannee River Water Management District (District),the subject proposed project has met the qualifications found in subsection 62-330.315, F.A.C., and qualifies for a minor modification of the existing permit. This minor modification is hereby in effect for the activity description below:

The pervious master permit was for the construction and operation of stormwater management system serving 7.56 acres of impervious surface on a total project area of 11.58 acres. This minor modification is for the construction of .91 acres of impervious surfaces on a total project area of 1.24 acres that was previously authorized under the permit ERP-001-243718-6. The design engineer has certified that the proposed conditions do not exceed the allowable conditions of the master system. The project shall be constructed in accordance with the application package, calculations, and plans submitted and certified by Michael Letson, P.E., with Paulson Mitchell Incorporated, on or before October 13, 2025.

The permittee shall adhere to all permit conditions and/or requirements as well as perform any required reporting, monitoring, or inspections in accordance with the original permit.

This authorization does not exempt you from obtaining permits from any other regulatory agency. Any modifications to the authorized plans shall require reconsideration by the District prior to commencement of construction.

Approved By: Jordan Gregg

COMMENT RESPONSE LETTER

PAULSON · MITCHELL · WISE
CIVIL ENGINEERS & PLANNERS

April 8, 2026

RE: Tidal Wave Auto Spa – City of Alachua
Response to City of Alachua comments dated: April 1, 2026
PMI Project #: 2025144

To whom it may concern,

We recently received City of Alachua comments dated: 04/01/26, we offer the following responses:

1. Per Section 6.4.4(C)(2), "Maximum initial horizontal illumination shall not exceed: *Business districts*. Ten footcandles at building entries and five footcandles in parking lots in the business districts." The definition of parking lot in the City of Alachua code is "the portion of a site or development dedicated to vehicular ingress and egress, off-street parking, parking aisles, internal travel ways, fire lanes and other areas dedicated to vehicular use, but not necessarily including vehicular storage areas." Multiple sections of the plan still exceed the maximum footcandles allowed within our code. Revise and resubmit.
Response: Photometric plan updated accordingly.

2. Per Section 6.8.2 (A)(2)(a)(i)a. of the Land Development Regulations, "twenty percent of the ground floor façade area when it faces a street or a publicly-accessible parking area which is a part of the development and consists of 15 percent or more of the development's minimum off-street parking requirement pursuant to Section 6.1.4(B)." The north and south entrance and exit will require, at minimum, twenty percent glazing. Per our conversation, the actual entrances will not be included as part of the total ground floor facade area, and per section 6.8.2.(A)(2)(a)(iv), Spandrel glass may be used "when an architectural floorplan demonstrates that windows cannot be provided due to a limitation presented by the interior layout or functional purpose of such interior space." Revise and resubmit.
Response: Architectural plans updated accordingly.

3. Per Section 6.8.2 (A)(2)(b)(i) & (ii), "Front facades and street-facing facades shall incorporate wall offsets of at least two feet in depth (projections or recesses) a minimum of every 30 feet. Each required offset shall have a minimum width of ten feet." The east wall will need include wall offsets. Per our discussion, "pilasters with a minimum depth of one foot, a minimum width of on foot, and a minimum height of 80 percent of the facade's height" are permitted as an offset alternative. Revise and resubmit.
Response: Architectural plans updated accordingly.

4. Per Section 7.3.2(C), "all multiple-family and nonresidential development shall provide at least one improved pedestrian connection between the on-site pedestrian circulation system and the adjacent

public sidewalk or greenway network, with an additional connection required for each additional five acres of development area." A sidewalk connection will be required from the main building either the sidewalk on NW 441 US Highway or the sidewalk on NW 161st Place. Revise and resubmit.

Response: A connection to the public sidewalk has been provided. Please see sheet C-100.

SHEET C-001

EXISTING CONDITIONS NOTES:

1. BOUNDARY INFORMATION TAKEN FROM SURVEY BY GSA, INC., DATED 05.05.25 ENTITLED ALTA/NSPS LAND SURVEY FOR SHJ DEVELOPMENT LLC. ADDITIONAL ITEMS TAKEN FROM ADJACENT ASBUILT FILES.
2. AN ASBESTOS SURVEY & MANAGEMENT (ACM) WAS NOT PERFORMED.
3. A PHASE I ENVIRONMENTAL SITE ASSESSMENT WAS PERFORMED BY BL COMPANIES , DATED 03/25/2025.
4. NO JURISDICTIONAL WATERS DETERMINATION WAS PERFORMED.
5. PROPERTY IS LOCATED AT TBD US HWY 441 & CR 235A, CITY OF ALACHUA, FLORIDA 32615.
6. NO PORTION OF THIS TRACT OF LAND LIES WITHIN THE 100-YEAR INTERMEDIATE REGIONAL FLOOD ZONE AS PER THE FEDERAL EMERGENCY MANAGEMENT AGENCY AS SHOWN ON COMMUNITY PANEL NUMBER 12001C0120D, DATED JUNE 16, 2006.
7. OWNER: SHJ DEVELOPMENT, LLC.
   124 EAST THOMPSON STREET
   THOMASTON, GA 30286
8. PROPERTY IS ZONED CI (COMMERCIAL INTENSIVE). PROPERTY USE IS COMMERCIAL CARWASH.
9. BUILDING SETBACK RESTRICTIONS: FRONT: 20'; REAR: 15'.
10. GENERAL CONTRACTOR SHALL VERIFY EXISTING GRADES AND INVERTS PRIOR TO BEGINNING CONSTRUCTION, IF EXISTING GRADES OR INVERTS ARE AT VARIANCE WITH DRAWINGS, NOTIFY ENGINEER AND RECEIVE INSTRUCTION PRIOR TO PROCEEDING.
11. EXISTING UTILITIES ARE INDICATED ON THE DRAWINGS AT APPROXIMATE LOCATIONS AND REFLECT GENERAL OBSERVATION FROM GROUND SURFACE. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL UTILITY COMPANIES ON THE PROJECT IN ORDER TO VERIFY THE EXACT LOCATION AND DEPTHS OF EXISTING UTILITIES PRIOR TO START OF WORK.

SHOP DRAWING REQUIREMENTS:

1. IF PROVIDED, CIVIL RELATED SHOP DRAWINGS SHOULD BE LIMITED TO THOSE ITEMS THAT REQUIRE COORDINATION WITH THE CONTRACT DOCUMENTS THAT INCLUDE, BUT ARE NOT LIMITED TO, THE FOLLOWING:
   - 1.1. STORM SEWER STRUCTURE CUT SHEETS TO CONFIRM INVERTS, PIPE ANGLES, PIPE SIZES, AND STRUCTURE DEPTHS;
   - 1.2. STORM SEWER GRATE INFORMATION FOR EACH STRUCTURE TO INCLUDE NUMBER OF GRATES AND OPEN AREA OF EACH GRATE;
   - 1.3. SANITARY SEWER STRUCTURE CUT SHEETS TO CONFIRM INVERTS, PIPE ANGLES, PIPE SIZES, AND STRUCTURE DEPTHS;
   - 1.4. PIPE MATERIAL FOR THE WATER MAIN;
   - 1.5. PIPE MATERIAL FOR THE SEWER MAIN;
   - 1.6. PIPE MATERIAL FOR THE STORM SEWER;
   - 1.7. OUTLET CONTROL STRUCTURE;
2. MISCELLANEOUS ITEMS RELATED TO GASKETS, FITTINGS, ETC. THAT ARE REFERENCED BY JURISDICTIONAL SPECIFICATIONS AND MEET INDUSTRY STANDARD SPECIFICATIONS DO NOT NEED TO BE SUBMITTED FOR REVIEW.
3. CONTRACTOR SHALL VERIFY THAT ALL FIRE HYDRANT ASSEMBLIES, VALVES, METERS, BACKFLOW PREVENTORS, ETC. MEET THE REQUIREMENTS OF THE PERMITTING JURISDICTION FOR ALLOWABLE MANUFACTURERS.
4. RETAINING WALL SHOP DRAWING REVIEW WILL BE LIMITED TO WALL HEIGHT AND LENGTH ONLY. ALL OTHER ITEMS TO BE REVIEWED BY RETAINING WALL DESIGNER.
5. MISCELLANEOUS ITEMS RELATED TO FENCING, STRIPING, AND SIGNAGE DO NOT NEED TO BE REVIEWED.

AS-BUILT REQUIREMENTS:

1. IT IS THE CONTRACTOR'S RESPONSIBILITY TO COORDINATE WITH THE AUTHORITY HAVING JURISDICTION TO DETERMINE THE REQUIREMENTS FOR AS-BUILT DRAWINGS AND TO OBTAIN ALL APPLICABLE JURISDICTIONAL REQUIREMENTS AND CHECK LISTS PRIOR TO CONSTRUCTION.
2. AS-BUILTS SHALL BE PERFORMED AT THE APPROPRIATE STAGE OF CONSTRUCTION TO PROVIDE THE REQUIRED INFORMATION. SOME JURISDICTIONS REQUIRE ALL WATER LINE BENDS AND FITTINGS TO BE LOCATED PRIOR TO BACKFILLING THE UTILITY. IT IS THE CONTRACTORS RESPONSIBILITY TO CONFIRM THESE REQUIREMENTS AND PROVIDE THE NECESSARY INFORMATION.
3. AS-BUILTS MUST BE PROVIDED BY A SURVEYOR. ENGINEER WILL NOT ACCEPT REDLINE MARK-UPS TO PRODUCE AS-BUILT DOCUMENTS.
4. AT A MINIMUM, THE CONTRACTOR SHALL PROVIDE THE FOLLOWING AS-BUILTS, EVEN IF THE AUTHORITY HAVING JURISDICTION DOES NOT REQUIRE AS-BUILTS:
   - 4.1. SANITARY SEWER TO INCLUDE TOP ELEVATION, INVERT ELEVATION(S), PIPE MATERIAL, PIPE LENGTH, PIPE SLOPE, AND PIPE SIZE;
   - 4.2. STORM SEWER TO INCLUDE TOP ELEVATION, INVERT ELEVATION(S), PIPE MATERIAL, PIPE LENGTH, PIPE SLOPE, AND PIPE SIZE;
   - 4.3. WATER LINE TO INCLUDE PIPE MATERIAL, PIPE SIZE, LOCATION OF ALL VISIBLE APPURTENANCES SUCH AS VALVES, FIRE HYDRANTS, ETC. AND THE APPROXIMATE LOCATION OF THE WATER LINE;
   - 4.4. DETENTION POND TO INCLUDE POND CONTOURS, SPOT ELEVATIONS ALONG DAM, AND OUTLET CONTROL STRUCTURE AS-BUILT. ALL UNDERGROUND DETENTION PONDS MUST BE SURVEYED PRIOR TO BACKFILLING TO CONFIRM PIPE LENGTHS, LOCATION, AND SIZE.
5. AS-BUILTS SHALL BE PROVIDED TO THE AUTHORITY HAVING JURISDICTION AS SOON AS PRACTICAL TO ALLOW FOR ADEQUATE TIME TO REVIEW PRIOR TO PROJECT CLOSE OUT.
6. DETENTION POND AS-BUILT SHALL BE PROVIDED TO THE ENGINEER AS SOON AS THE DETENTION POND IS COMPLETED AND STABILIZED SO DETENTION POND VOLUMES CAN BE CONFIRMED. AT A MINIMUM, CONTRACTOR SHALL PROVIDE DETENTION POND AS-BUILT AT LEAST TWO WEEKS PRIOR TO ANTICIPATED PROJECT CLOSE OUT. SOME JURISDICTIONS MAY TAKE LONGER FOR THEIR INTERNAL REVIEW.

DEMOLITION PLAN

0 10 20 40 80

SCALE: 1 = 20

DEMOLITION NOTES:

1. ALL NECESSARY PERMITS FOR DEMOLITION SHALL BE PAID FOR AND OBTAINED BY THE CONTRACTOR PRIOR TO BEGINNING WORK.
2. CONTRACTOR IS RESPONSIBLE FOR ALL COSTS INCURRED FOR THE REMOVAL AND DISPOSAL OF ALL MATERIAL AND DEBRIS. ANY DISCREPANCIES IN THE DEMOLITION PLAN SHALL BE REPORTED TO THE ENGINEER IMMEDIATELY.
3. CONTRACTOR SHALL PROTECT ALL ADJACENT LANDS FROM DAMAGE DURING DEMOLITION WORK. ANY OFF-SITE AREAS DISTURBED SHALL BE RETURNED TO A CONDITION EQUAL TO OR BETTER THAN THE EXISTING CONDITION.
4. NO DEMOLITION MATERIALS SHALL BE DISPOSED OF ON-SITE. ALL DEBRIS SHALL BE HAULED OFF-SITE TO A DISPOSAL AREA APPROVED BY THE STATE OF FLORIDA FOR THE HANDLING OF DEMOLITION DEBRIS AT CONTRACTORS EXPENSE.
5. ALL MATERIAL EXCEPT THAT BELONGING TO A PUBLIC OR PRIVATE UTILITY COMPANY SHALL BECOME THE PROPERTY OF THE CONTRACTOR. THE CONTRACTOR SHALL NOTIFY RESPECTIVE UTILITY COMPANIES AND/OR AUTHORITIES WHEN WATER, GAS, AND ELECTRIC METERS ARE READY FOR REMOVAL AND SHALL COORDINATE THE DISCONNECTION OF ALL SUCH UTILITIES IN COMPLIANCE WITH THE UTILITY COMPANIES AND/OR AUTHORITIES. ALL COORDINATION AND COST INCURRED SHALL BE AT CONTRACTORS EXPENSE.
6. ALL STRUCTURES NOT LABELED FOR DEMOLITION SHALL BE PROTECTED FROM DAMAGE DURING ALL PHASES OF CONSTRUCTION. ANY STRUCTURES THAT ARE TO REMAIN THAT ARE DAMAGED SHALL BE REPAIRED BY THE CONTRACTOR TO A CONDITION EQUAL TO OR BETTER THAN THE EXISTING CONDITION AT NO ADDITIONAL COST.
7. CONSTRUCTION ENTRANCE, TREE PROTECTION FENCE, AND SILT FENCE SHALL BE IN PLACE PRIOR TO DEMOLITION OPERATIONS.
8. NECESSARY BARRICADES, SUFFICIENT LIGHTS, SIGNS, AND OTHER TRAFFIC CONTROL METHODS THAT MAY BE NECESSARY FOR THE PROTECTION AND SAFETY OF THE PUBLIC SHALL BE PROVIDED AND MAINTAINED THROUGHOUT THE LIFE OF THE PROJECT. ANY COST INCURRED OF ANY AND ALL TRAFFIC CONTROL MEASURES NECESSARY SHALL BE PART OF THE CONTRACT.
9. LOCATION OF EXISTING UTILITIES ARE APPROXIMATE. CONTRACTOR SHALL FIELD VERIFY ALL UTILITIES PRIOR TO ANY DEMOLITION. ANY DAMAGE TO SUCH UTILITIES SHALL BE REPAIRED AT CONTRACTORS EXPENSE. CONTRACTOR SHALL CALL 811, 72 HOURS PRIOR TO CONSTRUCTION TO HAVE UTILITIES LOCATED. CONTRACTOR SHALL NOTIFY ENGINEER OF ANY DISCREPANCIES IMMEDIATELY.
10. CONTRACTOR SHALL NOTIFY ENGINEER OF DISCREPANCIES BETWEEN THESE PLANS AND FIELD CONDITIONS.
11. FOUNDATIONS, FLOORS, FLOOR SLABS, AND BASEMENTS SHALL BE REMOVED ENTIRELY UNLESS OTHERWISE NOTED. ALL DEMOLITION OF FOUNDATIONS, FLOORS, FLOOR SLABS, BUILDINGS, AND APPURTENANCES SHALL BE AT CONTRACTORS EXPENSE.
12. ANY POWER LINES THAT EXTEND TO OR FROM ADJACENT PROPERTIES SHALL NOT BE REMOVED WITHOUT COORDINATION WITH THE POWER COMPANY (TO ENSURE CONTINUOUS POWER, SHOULD THE LINE SERVE THE ADJACENT PROPERTY).
13. CONTRACTOR SHALL COORDINATE RELOCATION AND/OR REMOVAL, AT CONTRACTORS EXPENSE, OF ALL BURIED AND/OR OVERHEAD POWER LINES AND POLES, TELEPHONE LINES, FIBER OPTIC LINES, GAS LINES, WATER LINES, FORCE MAINS, AND REUSE LINES AS SHOWN WITH UTILITY COMPANY HAVING JURISDICTION. ALL COSTS OF RELOCATION AND REMOVAL SHALL BE PART OF THE CONTRACT.
14. CONTRACTOR TO COORDINATE WITH GAS COMPANY FOR RELOCATION OF EXISTING GAS LINE IF REQUIRED. DEMOLITION AND RELOCATION OF THE GAS LINE, IF REQUIRED, SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR AND PART OF THE CONTRACT.
15. ALL EXISTING UTILITIES TO BE DEMOLISHED SHALL BE REMOVED ENTIRELY, NOT ABANDONED IN PLACE, UNLESS OTHERWISE NOTED.
16. CONTRACTORS SHALL REMOVE ALL TREES, SHRUBS, AND BUSHES WITHIN THE LIMITS OF CONSTRUCTION UNLESS OTHERWISE SHOWN ON SHEET LA-100/TS-100.

1. EXISTING AND PROPOSED CONTOURS ARE SHOWN AT ONE FOOT INTERVALS.
2. ALL SPOT ELEVATIONS ARE TOP OF PAVEMENT UNLESS OTHERWISE NOTED.
3. TOP ELEVATIONS ARE TO TOP OF GRATE FOR DROP INLETS, TO TOP OF RIM FOR MANHOLES, CATCH BASINS, AND YARD INLETS, AND TO GROUND ELEVATION FOR PEDESTAL INLETS.
4. SLOPES AND DISTANCES ARE TO CENTERLINE OF STRUCTURES.
5. PROPOSED SPOT ELEVATIONS ARE AT FINISHED GRADE ELEVATIONS, UNLESS OTHERWISE NOTED. SPOT ELEVATIONS SHALL TAKE PRECEDENCE OVER CONTOURS AND SLOPES SHOWN. THE GENERAL CONTRACTOR SHALL NOTIFY THE ENGINEER OF SPOT ELEVATIONS WHICH DO NOT APPEAR TO BE CONSISTENT WITH THE CONTOURS AND SLOPES. SPOT ELEVATIONS SHALL BE USED FOR SETTING ELEVATIONS OF CURB AND GUTTER, PAVING, AND UTILITIES.
6. GENERAL CONTRACTOR SHALL VERIFY EXISTING GRADES PRIOR TO BEGINNING CONSTRUCTION, IF EXISTING GRADES ARE AT VARIANCE WITH DRAWINGS, NOTIFY ENGINEER AND RECEIVE INSTRUCTION PRIOR TO PROCEEDING.
7. THE GEOTECHNICAL ENGINEER OR HIS REPRESENTATIVE SHALL BE ONSITE DURING GRADING ACTIVITIES TO OBSERVE SOIL CONDITIONS AND PERFORM THE REQUIRED TESTING AS OUTLINED IN THE GEOTECHNICAL REPORT.
8. DISTURBED AREAS WITH SLOPES STEEPER THAN 3:1 LEFT IDLE FOR SEVEN (7) DAYS, AND NOT TO FINAL GRADE, WILL BE ESTABLISHED TO TEMPORARY VEGETATION. DISTURBED AREAS WITH SLOPES FLATTER THAN 3:1 LEFT IDLE FOR FOURTEEN (14) DAYS, AND NOT TO FINAL GRADE, WILL BE ESTABLISHED TO TEMPORARY VEGETATION. DISTURBED AREAS LEFT IDLE FOR 90 DAYS AFTER THE LAST LAND DISTURBING ACTIVITY WILL BE ESTABLISHED TO PERMANENT VEGETATION. ALL AREAS TO FINAL GRADE WILL BE ESTABLISHED TO PERMANENT VEGETATION UPON COMPLETION.
9. ALL EROSION CONTROL STRUCTURES AND/OR APPURTENANCES AS SHOWN ON THE APPROVED PLANS SHALL BE IN PLACE, OPERATIONAL, AND INSPECTED, PRIOR TO THE BEGINNING OF CONSTRUCTION, AND SHALL BE MAINTAINED IN OPERATIONAL CONDITION UNTIL THE PHASE OR PROJECT HAS BEEN COMPLETED.
10. EROSION AND SEDIMENT CONTROL DEVICES WERE INSTALLED AND INSPECTED PRIOR TO ANY GRADING ON SITE. DURING THE CLEARING AND MASS GRADING OPERATIONS, THE CONTRACTOR SHALL CONTACT THE ENGINEER TO INSPECT THE MODIFICATIONS REQUIRED TO THE PHASE I EROSION CONTROL ONCE INSTALLATION HAS BEEN COMPLETED. THE ENGINEER SHALL INSPECT THE EROSION CONTROL INSTALLATION WITHIN SEVEN DAYS OF INSTALLATION COMPLETION.
11. SEDIMENT/EROSION CONTROL DEVICES MUST BE CHECKED AFTER EACH STORM EVENT. EACH DEVICE IS TO BE MAINTAINED OR REPLACED IF SEDIMENT ACCUMULATION HAS REACHED ONE HALF THE CAPACITY OF THE DEVICE. ADDITIONAL DEVICES MAY BE NECESSARY AS THE PROJECT PROGRESSES.
12. THE CONTRACTOR HAS THE COMPLETE RESPONSIBILITY FOR THE HANDLING OF ALL SURPLUS EXCAVATED MATERIALS INCLUDING THE REMOVAL OF ANY EXCESS MATERIALS FROM THE PROJECT SITE. THE CONTRACTOR SPECIFICALLY UNDERSTANDS AND AGREES THAT DUE TO THE SEQUENCE OF THE WORK, IT MAY BE NECESSARY TO RETAIN SELECT EXCAVATED MATERIALS ON SITE TO MEET LATER NEEDS OF THE PROJECT. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO HAUL OFF EXCESS MATERIAL OR TO RETAIN MATERIAL ON SITE FOR LATER USE. THE CONTRACTOR SHALL HAVE THE SOLE RESPONSIBILITY FOR HAVING ADEQUATE, SUITABLE MATERIAL ON-SITE TO REPLACE UNSUITABLE MATERIAL OR TO OTHERWISE CONFORM TO THE REQUIREMENTS OF THE CONTRACT DOCUMENTS.
13. CONTRACTOR TO CLEAN OUT ACCUMULATED SILT IN THE STORM DRAINAGE SYSTEM, TO INCLUDE PIPES, STRUCTURES, WATER QUALITY DEVICES, AND PONDS AT THE END OF CONSTRUCTION WHEN DISTURBED AREAS HAVE BEEN STABILIZED.
14. IF DURING THE GRADING PROCESS CONDITIONS ARE ENCOUNTERED INDICATING AN UNIDENTIFIED CONDITION, THE ENGINEER SHALL BE CONTACTED FOR RECOMMENDATIONS.
15. THE CONTRACTOR SHALL ADJUST ALL MANHOLE COVERS, FIRE HYDRANTS, VALVE COVERS, CLEAN OUTS, VAULTS, BOXES, AND GRATES, EXISTING AND PROPOSED, TO "AS-CONSTRUCTED" FINISHED GRADE.
16. ALL EXISTING TREE, DEBRIS, STRUCTURES, ASPHALT, CONCRETE, AND ALL DELETERIOUS MATERIAL, INCLUDING BUT NOT LIMITED TO CONCRETE FOOTINGS, BASEMENTS, SEPTIC TANKS, AND UNDERGROUND UTILITIES TO BE REMOVED SHALL BE DISPOSED OF OFF-SITE AT THE CONTRACTOR'S EXPENSE.
17. BEFORE ANY GRADING IS DONE, THE SURFACE OF THE SITE SHALL BE STRIPPED OF TOPSOIL AS DEFINED BY THE SOILS REPORT. STRIPPED MATERIAL THAT IS SUITABLE FOR LANDSCAPING SHALL BE STOCKPILED FOR LATER USE AS DIRECTED BY THE GEOTECHNICAL ENGINEER.
18. IF GRADE ADJUSTMENTS ARE REQUIRED, THE CONTRACTOR SHALL NOTIFY THE ENGINEER TO INVESTIGATE SUCH ADJUSTMENTS.
19. IF A CONFLICT EXISTS BETWEEN THE PLANS, SPECIFICATIONS, OR SOILS REPORT, THE CONTRACTOR SHALL CONTACT THE ENGINEER FOR CLARIFICATION.
20. MAXIMUM CUT AND FILL SLOPES TO BE 3:1.
21. ALL ROADWAYS, PUBLIC OR PRIVATE, MUST HAVE THE COUNTY INSPECTOR/GEOTECHNICAL ENGINEER OBSERVE AND APPROVE THE PROOF ROLLING OF ROAD AND DRIVE AREAS BEFORE AGGREGATE BASE COURSE IS APPLIED AND ALSO BEFORE THE ASPHALT OR CONCRETE IS APPLIED. IF APPROVED BY THE COUNTY ENGINEER/GEOTECHNICAL ENGINEER, CONTRACTOR MAY HAVE A GEOTECHNICAL/SOILS ENGINEER EVALUATE THE EXPOSED SUBGRADE AND GAB PRIOR TO INSTALLATION OF BASE COURSE AND ASPHALT OR CONCRETE.
22. EXISTING DRAINAGE STRUCTURES TO BE INSPECTED AND REPAIRED AS NEEDED AND EXISTING PIPES TO BE CLEANED OUT TO REMOVE ALL SILT AND DEBRIS.
23. PRIOR TO THE INSTALLATION OF STORM DRAIN PIPE, THE GENERAL CONTRACTOR SHALL VERIFY THE INVERTS OF EXISTING STRUCTURES AND INFORM THE ENGINEER OF ANY CONFLICTS PRIOR TO CONSTRUCTION.
24. CONTRACTOR RESPONSIBLE FOR CHECKING AND MAINTAINING EROSION CONTROL DEVISES AFTER STORM EVENTS DURING CONSTRUCTION.

MATERIAL NOTES:

1. ALL OF THE MATERIALS, METHODS OF CONSTRUCTION, AND WORKMANSHIP FOR THE WORK COVERED IN REFERENCE TO STORMWATER CONVEYANCE CONSTRUCTION SHALL CONFORM TO THE MOST RECENT STANDARD SPECIFICATIONS OF THE FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT).
2. THE STORMWATER PIPE WAS DESIGNED ON THE 25-YEAR STORM EVENT USING THE RATIONAL METHOD.
3. ALL STORMWATER PIPES SHALL BE SMOOTH LINED CORRUGATED POLYETHYLENE PIPE (HDPE) OR REINFORCED CONCRETE PIPE (RCP) UNLESS OTHERWISE SHOWN ON PLANS.
   - 3.1. HDPE: THIS SPECIFICATION APPLIES TO HIGH DENSITY POLYETHYLENE CORRUGATED PIPE WITH AN INTEGRALLY FORMED SMOOTH INTERIOR (HDPE). THIS PIPE SHALL CONFORM TO AASHTO M252, TYPE S FOR PIPE SIZES 4"-10" AND AASHTO M294, TYPE S FOR PIPE SIZES 12"-60". JOINTS SHALL BE AS RECOMMENDED BY THE MANUFACTURER. CONNECTIONS SHALL CREATE A WATER TIGHT JOINT AT A MINIMUM. INSTALLATION SHALL BE IN ACCORDANCE WITH ASTM RECOMMENDED PRACTICE D2321 OR AS SPECIFIED BY THE CITY/COUNTY. PIPE SHALL BE ADS N-12 WT OR APPROVED EQUAL.
   - 3.2. RCP: REINFORCED CONCRETE PIPE TO BE IN ACCORDANCE WITH ASTM C76. JOINTS SHALL BE MADE BY USE OF A CONTINUOUS RUBBER GASKET CONFORMING TO REQUIREMENTS OF ASTM C443 (TYPE II OR III) OR PREFORMED FLEXIBLE BITUMINOUS JOINTS CONFORMING TO THE REQUIREMENTS OF ASTM C990. THE ANNULAR SPACE SHALL BE FILLED WITH JOINT MATERIAL AND THE INSIDE OF EACH JOINT WIPED SMOOTH. RUBBER-TYPE, O-RING, AND PRE-FORMED PLASTIC GASKET JOINTS SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.

   REINFORCED CONCRETE PIPE CLASS CHART:

CLASS	FILL OVER TOP OF PIPE
III	1 – 15 FT
IV	15 – 20 FT
V	20 – 80 FT

4. PIPE INSTALLATION: SMOOTH INTERIOR POLYETHYLENE PIPE (HDPE) AND REINFORCED CONCRETE PIPE (RCP) SHALL BE INSTALLED IN ACCORDANCE WITH THE FLORIDA DOT STANDARD SPECIFICATIONS. ALL PIPE STRUCTURES ARE TO BE PLACED ON STABLE EARTH OR FINE GRANULAR FOUNDATION, THE CHARACTERISTICS OF WHICH WOULD BE EXPECTED TO PROVIDE LONG-TERM STABILITY. IN ALL LIVE STREAM PIPE INSTALLATIONS, IN AREAS OF LOW BEARING SOIL OR NON-UNIFORM FOUNDATIONS, IN AREA WHERE ROCK IS ENCOUNTERED AT THE FOUNDATION LEVEL, OR IN OTHER LOCATIONS WHERE CONDITIONS WARRANT, A MINIMUM OF SIX (6) INCHES OF CRUSHED STONE BEDDING IS REQUIRED. (MAXIMUM SIZE OF STONE SHALL BE THREE-FOURTHS-INCH). BACKFILL FOR SMOOTH INTERIOR POLYETHYLENE PIPE (HDPE) PIPE INSTALLATIONS SHALL BE CONSTRUCTED USING AGGREGATE BASE OR CRUSHER RUN SIX (6) INCHES BELOW THE BOTTOM OF THE PIPE TO TWELVE (12) INCHES ABOVE THE PIPE CROWN. THESE MATERIALS SHALL BE PLACED IN LAYERS OF NOT MORE THAN SIX (6) INCHES LOOSE. COMPACTION OF THESE MATERIALS SHALL BE ACCOMPLISHED BY HAND TAMPING OR MACHINE TAMPING.
5. IF DRAINAGE PIPE IS TO BE INSTALLED PRIOR TO THE COMPLETION OF GRADING, A MINIMUM OF FOUR (4) FEET OF FILL SHOULD BE PROVIDED WHERE NEEDED TO ADEQUATELY PROTECT THE DRAINAGE STRUCTURE DURING THE LAND DEVELOPMENT PHASE, UNLESS THE STRUCTURE ITSELF IS DESIGNED TO WITHSTAND THE ANTICIPATED LIVE LOAD DURING CONSTRUCTION.
6. THE CONTRACTOR MAY USE PRECAST CONCRETE STRUCTURES AT ITS DISCRETION. PRECAST STRUCTURES SHALL CONFORM TO THE REQUIREMENTS OF ASTM C478. JOINTS SHALL BE MADE BY USE OF A CONTINUOUS RUBBER GASKET CONFORMING TO REQUIREMENTS OF ASTM C443 (TYPE II OR III) OR PREFORMED FLEXIBLE BITUMINOUS JOINTS CONFORMING TO THE REQUIREMENTS OF ASTM C990. JOINTS SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.

SCALE: 1 = 20

UTILITY PLAN NOTES:

1. EXISTING UTILITIES ARE INDICATED ON THE DRAWINGS AT APPROXIMATE LOCATIONS AND REFLECT GENERAL OBSERVATION FROM GROUND SURFACE. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR CONTACTING ALL UTILITY COMPANIES ON THE PROJECT IN ORDER TO VERIFY THE EXACT LOCATION AND DEPTHS OF EXISTING UTILITIES PRIOR TO START OF WORK.
2. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR ALL COST ASSOCIATED WITH RELOCATING; CAPPING; AND/OR REMOVING EXISTING UTILITIES AS SHOWN ON THE CONSTRUCTION DOCUMENTS.
3. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR COORDINATION WITH UTILITY OWNERS AND THEIR PROPOSED ROUTINGS TO SERVE BUILDINGS.
4. FOR A LIST OF UTILITY OWNERS THAT HAVE FACILITIES IN THE VICINITY OF THIS PROJECT SEE SHEET C-000 COVER SHEET. THIS IS NOT AN EXHAUSTIVE LIST AND IS MEANT FOR GENERAL INFORMATION AND COORDINATION.
5. PROTECT EXISTING POWER LINES, WATER MAINS, GAS LINES, TELEPHONE LINES, FIBER OPTIC LINES, CABLE LINES, AND OTHER UTILITIES. IF DAMAGE OCCURS CONTACT UTILITY IMMEDIATELY. IF A GAS LINE HAS BEEN DAMAGED, IMMEDIATELY CALL 1-800-GAS-LINE.
6. PROPOSED WATER METERS SHALL BE INSTALLED FLUSH WITH "AS-BUILT" FINISHED GRADES.
7. UNDERGROUND UTILITY LINES SHALL BE INSTALLED, TESTED AND APPROVED BEFORE BACKFILLING.
8. THE GENERAL CONTRACTOR SHALL COORDINATE THE INSTALLATION AND LOCATION OF UTILITIES ENTERING THE BUILDING WITH THE ARCHITECTURAL PLANS.
9. BEFORE STARTING ANY EXCAVATION LOOK FOR VISUAL SIGNS OF GAS LINES IN THE AREA SUCH AS METER SETS ON THE SIDES OF HOUSES OR BUILDINGS, YELLOW PAINT, FLAGS OR MARKERS WHICH WOULD INDICATE GAS.
10. USE EXTREME CAUTION WHEN DIGGING AROUND GAS FACILITIES.
11. THE GENERAL CONTRACTOR IS RESPONSIBLE FOR POTHOLING TO VERIFY UTILITY LOCATION MARKINGS.
12. PRIOR TO THE INSTALLATION OF SANITARY SEWER PIPE, THE GENERAL CONTRACTOR SHALL VERIFY THE INVERTS OF EXISTING STRUCTURES AND INFORM THE ENGINEER OF ANY CONFLICTS PRIOR TO CONSTRUCTION.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING A MARKED-UP SET OF DESIGN DRAWINGS SHOWING ALL "AS-BUILT" CONDITIONS. THESE "RECORD DRAWINGS" SHALL BE MADE AVAILABLE TO THE DESIGNER AND/OR THE CITY OF ALACHUA INSPECTOR UPON REQUEST. THESE "RECORD DRAWINGS" SHALL BE AT THE SITE AT ALL TIMES AND SHALL BE MADE AVAILABLE TO THE ENGINEER TO PREPARE FINAL DRAWINGS.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING APPROPRIATE SLEEVES (I.E., IRRIGATION, POWER, ETC.) UNDER PAVED AREAS AS NTTED TO ROUTE THESE SERVICES TO LANDSCAPE AREAS, SITE LIGHTING FIXTURES, SIGNS, ETC. OR COORDINATE WITH SUB-CONTRACTORS TO LAY LINES BEFORE PAVING CONSTRUCTION.
15. ALL WATER LINES 6" AND GREATER REQUIRE THRUST RESTRAINTS AT BENDS, TEES, FIRE HYDRANTS, DEAD ENDS, ETC. PROVIDE THRUST RESTRAINTS PER LOCAL JURISDICTION SPECIFICATIONS.
16. ALL SANITARY SEWER CONSTRUCTION TO CONFORM TO APPLICABLE CITY OF ALACHUA SPECIFICATIONS AND ORDINANCES.
17. ALL WATER CONSTRUCTION TO CONFORM TO APPLICABLE CITY OF ALACHUA SPECIFICATIONS AND ORDINANCES.
18. SLOPES AND DISTANCES ARE TO CENTERLINE OF STRUCTURES.
19. WATER AND WASTEWATER SYSTEMS TO BE OWNED AND OPERATED BY CITY OF ALACHUA SHALL BE CONSTRUCTED IN ACCORDANCE WITH "CITY OF ALACHUA, PUBLIC SERVICES, DESIGN AND CONSTRUCTION MANUAL, LATEST EDITION".
20. PROVIDE TRACER WIRE SYSTEM FOR WATER PIPING AS SHOWN ON THE DETAILS AND AS PER THE COA DCM.
21. TRACER WIRE SYSTEM SHALL COMMENCE AT THE TIE-IN(S) AT EXISTING WATER MAIN(S) AND TERMINATE AT EACH COA END OF MAINTENANCE POINT.
22. WATER METER APPURTENANCES SHALL BE FURNISHED AND INSTALLED BY THE CONTRACTOR. THE WATER METER ITSELF WILL BE FURNISHED AND INSTALLED BY THE CITY.
23. WET TAP(S) TO PRESSURIZED WATER MAINS SHALL BE DONE BY A SUB-CONTRACTOR PRE-APPROVED BY THE CITY OF ALACHUA.
24. SERVICE WATER PIPING UPSTREAM THE WATER METER SHALL BE PVC, TYPE AND SIZE AS SHOWN ON THE DETAILS.
25. PIPING BETWEEN EACH METER AND EACH BFP SHALL BE GALVANIZED STEEL.
26. INSTALL EACH WATER METER SO ITS EDGE IS TWO FEET FROM EDGE OF SIDEWALK. DONOT INSTALL WATER METERS IN SIDEWALKS.
27. FOR EACH COA END OF MAINTENANCE CLEANOUT, PROVIDE A BURIED ELECTRONIC MARKER AS PER COA STANDARD DETAILS.
28. PROVIDE ENCLOSURES FOR BFP ASSEMBLIES AS SHOWN ON THE DETAILS.

UTILITY MATERIAL NOTES:

1. SANITARY SEWER PIPE SHALL BE AS FOLLOWS UNLESS OTHERWISE SPECIFIED: PVC; SDR-26 PER ASTM D3034.
2. SANITARY SEWER INVERT AT BUILDING SHOULD BE 6' BELOW FINISHED FLOOR ELEVATION.
3. WATER PIPE SHALL BE AS FOLLOWS: 2" HDPE CTS FOR PRIVATE WATER LINES. CLASS 52 DUCTILE IRON PIPE FOR PUBLIC LINES GREATER THAN 2", AND TYPE K COPPER LINES FOR FOR 2" OR LESS.
4. STEEL CASING FOR JACK AND BORE SHALL HAVE A MINIMUM YIELD STRENGTH OF 35,000 PSI AND SHALL CONFORM TO ASTM A139.

SPECIAL NOTES:

1. PVC ELECTRICAL CONDUIT, COORDINATE WITH MEP FOR EXACT LOCATION AND SIZE
2. 4" PVC & 2" ELECTRICAL CONDUIT TO SERVE PREP CANOPY (CONDUIT ENDING ON THE PASSENGER SIDE OF DRIVE)
3. 3" ELECTRICAL CONDUIT FROM AIR COMPRESSOR
4. WATER RECLAIM SYSTEM
5. SANITARY SEWER MATERIAL SHALL BE 6 INCH PVC, 1% MINIMUM SLOPE
6. WATER LINE MATERIAL SHALL BE 2 INCH HDPE CTS
7. WATER LINES SHALL MAINTAIN 4 FOOT OF COVER MINIMUM
8. CONTRACTOR TO PAY FOR AND INSTALL 2 INCH DOMESTIC WATER METER, WHICH IS THE CITY END OF MAINTENANCE
9. CONTRACTOR TO PAY FOR AND INSTALL A 2 INCH DOMESTIC BACKFLOW PREVENTER (RPZ TYPE) IN HOTBOX
10. CONTRACTOR TO PAY FOR AND INSTALL 3/4 INCH IRRIGATION WATER METER, WHICH IS THE CITY END OF MAINTENANCE
11. CONTRACTOR TO PAY FOR AND INSTALL A 3/4 INCH IRRIGATION BACKFLOW PREVENTER (RPZ TYPE) IN HOTBOX
12. 3- 6" PVC VACUUM LINES (PRESSURE TESTED PER VAC PRODUCER)
13. 2"x12" TAPPING SLEEVE & VALVE
14. 2"x3/4" PVC TEE
15. 3/4" 90° BEND

REQUIRED FIRE FLOW	1,500 GPM
REQUIRED DOMESTIC FLOW	70 GPM*
REQUIRED IRRIGATION FLOW	10 GPM**

*2" METER SUPPORTS 80 GPM
**3/4" METER SUPPORTS 10 GPM

I:\2025\2025144\5 CIV\2025125.25 - Prior to Grading Changes\2025144.dwg, ARCH FULL BLEED D (24.00 X 36.00 INCHES), BONGUE PALETTE, DWG TO PDF.PC3, JAMES ALBERTSON, April 6, 2026 8:47:08 AM

I CERTIFY UNDER PENALTY OF LAW THAT THIS DOCUMENT AND ALL ATTACHMENTS WERE PREPARED UNDER MY DIRECTION OR SUPERVISION IN ACCORDANCE WITH A SYSTEM DESIGNED TO ASSURE THAT QUALIFIED PERSONNEL PROPERLY GATHERED AND EVALUATED THE INFORMATION SUBMITTED. BASED ON MY INQUIRY OF THE PERSON OR PERSONS WHO MANAGE THE SYSTEM, OR THOSE PERSONS DIRECTLY RESPONSIBLE FOR GATHERING THE INFORMATION, THE INFORMATION SUBMITTED IS, TO THE BEST OF MY KNOWLEDGE AND BELIEF, TRUE, ACCURATE, AND COMPLETE. I AM AWARE THAT THERE ARE SIGNIFICANT PENALTIES FOR SUBMITTING FALSE INFORMATION, INCLUDING THE POSSIBILITY OF FINE AND IMPRISONMENT FOR KNOWING VIOLATIONS.

NAME (OPERATOR AND/OR RESPONSIBLE AUTHORITY) 04/08/2026 DATE

I CERTIFY UNDER PENALTY OF LAW THAT I UNDERSTAND, AND SHALL COMPLY WITH, THE TERMS AND CONDITIONS OF THE STATE OF FLORIDA GENERIC PERMIT FOR STORMWATER DISCHARGE FROM LARGE AND SMALL CONSTRUCTION ACTIVITIES AND THIS STORMWATER POLLUTION PREVENTION PLAN PREPARED THEREUNDER.

NAME	TITTLE	COMPANY NAME ADDRESS PHONE NUMBER
NAME:_____ SIGNATURE:_____ DATE:_____		
NAME:_____ SIGNATURE:_____ DATE:_____		
NAME:_____ SIGNATURE:_____ DATE:_____		

SITE DESCRIPTION:

THE PROJECT SITE IS LOCATED AT TBD US HWY 441 & CR 235A, CITY OF ALACHUA, FLORIDA 32615

THE TOTAL SITE AREA IS 1.25, AND HAS A DISTURBED AREA FOR CONSTRUCTION OF 1.26

THE SITE IS CURRENTLY A GRADED PAD WITH STORMWATER STRUCTURES LOCATED WITHIN AN EXISTING DEVELOPMENT. AT COMPLETION, THE SITE WILL CONTAIN A NEW AUTOMATED EXPRESS TUNNEL CAR WASH WITH ASSOCIATED PARKING, AS WELL AS THE INSTALLATION REQUIRED UTILITIES AND STORMWATER DRAINAGE SYSTEM.

EXISTING SOIL TYPE IS 29 – MYAKKA FINE SAND WITH 0 TO 2 PERCENT SLOPES. THE WATER TABLE WAS NOT ENCOUNTERED 10 FT BELOW THE EXISTING SURFACE.

LATITUDE AND LONGITUDE: 29°48'15.37"N –82°31'40.44"W

CONTROLS:

1. BEST MANAGEMENT PRACTICES (BMPs)
   - FDOT TYPE IV SILT FENCE SHALL BE INSTALLED AROUND THE PERIMETER OF THE SITE AND SERVE AS SEDIMENT STORAGE. (PRIOR TO SITE CLEARING)
   - CONSTRUCTION EXITS SHALL BE INSTALLED AT LOCATION SPECIFIED ON PLANS. (PRIOR TO SITE CLEARING)
   - ALL INSTALLATION OF BMP'S SHALL ADHERE TO THE EROSION CONTROL PLAN AND WILL ONLY BE ALLOWED TO DEVIATE WITH ENGINEER'S APPROVAL
2. STORMWATER CONTROL
3. STORMWATER MANAGEMENT TO BE HANDLED THROUGH AN EXISTING OFFSITE FACILITY.
4. WASTE DISPOSAL
   - ALL WASTE MATERIAL WILL BE COLLECTED AND STORED IN A SECURELY LIDDED METAL DUMPSTER AND MEET ALL LOCAL AND STATE SOLID WASTE MANAGEMENT REGULATIONS. THE DUMPSTER SHALL BE EMPTIED A MINIMUM OF TWICE PER WEEK OR MORE OFTEN IF NECESSARY, AND BE HAULED TO AN APPROVED SOLID WASTE LANDFILL. NO CONSTRUCTION WASTE MATERIALS SHALL BE BURIED ONSITE.
4. CONSTRUCTION ENTRANCES/EXITS
   - STABILIZED CONSTRUCTION EXITS SHALL BE PROVIDED AS WELL AS A DAILY STREET SWEEP AND USE OF WATER FOR DUST CONTROL.

MAINTENANCE:

- SILT FENCE SHALL BE INSPECTED WEEKLY OR WITHIN 24 HOURS OF A STORM EVENT THAT IS 0.5 INCHES OR GREATER. SEDIMENT DEPOSITS SHALL BE REMOVED ONCE IT HAS ACCUMULATED TO ONE-HALF THE ORIGINAL HEIGHT OF THE BARRIER. FILTER FABRIC SHALL BE REPLACED WHENEVER IT HAS DETERIORATED TO SUCH AN EXTENT THAT THE EFFECTIVNESS OF THE FABRIC IS REDUCED.
- CONSTRUCTION EXITS SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OF FLOW OF MUD ONTO PUBLIC RIGHT-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING WITH 1.5–3.5 INCH STONE, AS CONDITIONS DEMAND, AND REPAIR AND/OR CLEANOUT OF ANY STRUCTURES TO TRAP SEDIMENT.
- MULCH AND SOD THAT HAS BEEN WASHED OUT SHALL BE REPLACED IMMEDIATELY.
- MAINTAIN ALL OTHER AREAS OF THE SITE WITH PROPER CONTROLS AS NECESSARY.

INSPECTIONS:

INSPECTIONS MUST OCCUR AT LEAST ONCE A WEEK AND WITHIN 24 HOURS OF THE END OF A STORM EVENT THAT IS 0.50 INCHES OR GREATER.

QUALIFIED INSPECTOR MUST INSPECT ALL SITE BMP'S IDENTIFIED TO ENSURE THEY ARE INSTALLED, MAINTAINED, AND OPERATING CORRECTLY AND EFFECTIVELY IN ALL AREAS THAT HAVE NOT BEEN STABILIZED. INSPECTIONS MAY BE REDUCED TO ONCE PER MONTH ONCE THE SITE HAS ACHIEVED FINAL STABILIZATION UNTIL THE NOTICE OF TERMINATION IS FILED.

SESC NOTES:

1. MAINTAIN A COPY OF THE STORMWATER POLLUTION PREVENTION PLAN (SWPP) ON THE SITE FOR THE DURATION OF CONSTRUCTION, IF REQUIRED. ADHERE TO THE SWPP DURING CONSTRUCTION OPERATIONS..
2. MAINTAIN AND REPAIR ALL SESC BEST MANAGEMENT PRACTICES BMPS DURING CONSTRUCTION UNTIL ALL VEGETATION IS ESTABLISHED, (ALL DISTURBED SOIL SURFACES AREA UNIFORMLY COVERED IN PERMANENT VEGETATION WITH A DENSITY OF 70 OR GREATER, OR AS DEFINED BY PERMIT.).
3. PERFORM ALL EARTH-DISTURBING CONSTRUCTION ACTIVITIES WITHIN THE LIMITS OF DISTURBANCE AS INDICATED ON THE DRAWINGS.
4. REVIEW THE LIMITS OF DISTURBANCE SHOWN ON THE DRAWINGS AND FIELD-STAKING THE LIMIT OF DISTURBANCE PRIOR TO THE START OF CONSTRUCTION AND/OR CONTRACTORS OPERATIONS AT NO ADDITIONAL COST TO THE OWNER.
5. INSTALL PERIMETER EROSION AND SEDIMENT CONTROL MEASURES PRIOR TO THE START OF ANY LAND CLEARING OR GRADING ACTIVITIES.
6. APPLY TEMPORARY EROSION AND SEDIMENTATION CONTROL MEASURES AS SHOWN ON THE DRAWINGS AND/OR AS REQUIRED BY SESC PERMIT AND IMPLEMENT ADDITIONAL MEASURES AS DICTATED BY THE SITE CONDITIONS.
7. ENSURE THAT ANY SEDIMENTATION RESULTING FROM WORK ON THE SITE IS CONTAINED ON THE SITE AND NOT ALLOWED TO COLLECT ON ANY OFF-SITE AREAS OR IN WATERWAYS.
8. LEAVE SLOPES IN A ROUGHENED CONDITION DURING THE GRADING PHASE TO REDUCE RUNOFF VELOCITIES AND EROSION.
9. LOCATE LAY DOWN, STAGING AND STOCKPILE AREAS WITHIN THE PERMITTED LIMITS OF DISTURBANCE.
10. INSTALL SILT FENCE AROUND THE PERIMETER OF ON-SITE SOIL STOCKPILE AREAS IF RUNOFF CAN IMPACT A STABILIZED PART OF THE SITE, OR LEAVE THE SITE. ADDITIONALLY, INACTIVE PORTIONS OF THE STOCKPILE AREAS ARE TO BE STABILIZED AS REQUIRED BY PERMIT.
11. IMPLEMENT TEMPORARY STABILIZATION MEASURES ON ANY DISTURBED AREAS WHERE CONSTRUCTION ACTIVITIES WILL NOT RESUME FOR 14 DAYS OR MORE. IMPLEMENTATION OF TEMPORARY STABILIZATION MEASURES MUST BE INITIATED IMMEDIATELY AND COMPLETED WITHIN SEVEN (7) DAYS FROM WHEN CONSTRUCTION ACTIVITIES TEMPORARILY CEASED ON ANY PORTION OF THE SITE. APPLY 3-5 LBS/1000 SFT. TEMPORARY SEED AND STRAW MULCH OVER DISTURBED AREA.
12. TOPSOIL AND SEED ALL EXPOSED ARES WITHIN SEVEN (7) CALENDAR DAYS FOLLOWING THE CONCLUSION OF FINAL GRADING IN THAT AREA.
13. REGULARLY CHECK SEEDED AREAS TO SEE THAT A GOOD STAND OF THE VEGETATION IS "ESTABLISHED". VEGETATION WILL NOT BE CONSIDERED "ESTABLISHED UNTIL 100% OF THE SOIL SURFACE IS UNIFORMLY COVERED WITH PERMANENT VEGETATION WITH A DENSITY OF 70% OR GREATER. FERTILIZE, WATER, RESEED AND MUCH AS NEEDED.
14. MINIMIZE TRACKING OF SOIL AND SEDIMENT ONTO OFF-SITE ROADWAYS THROUGH THE USE OF APPROPRIATE MEASURES. IMMEDIATELY REMOVE ANY SOIL OR SEDIMENT TRACKED ONTO THE ROADWAYS.
15. NO VEHICLES AND EQUIPMENT CLEARING IS ALLOWED AT LOCATIONS WHERE RUNOFF COULD FLOW DIRECTLY INTO A WATER COURSE OR DOWNSTREAM STORM SEWER.
16. MAINTAIN DUST CONTROL DURING CONSTRUCTION. WATER TANK TRUCKS SHALL BE USED ON ON-SITE DISTURBED AREAS AND OTHER PLACES WHERE DUST BECOMES A PROBLEM.
17. ALL STOCKPILES ARE TO BE PROTECTED AGAINST DUST AND EROSION.
18. AT ALL TIMES DURING AND AFTER DEVELOPMENT, CLEARED AREAS SHALL BE STABILIZED. FINAL STABILIZATION METHODS SHALL BE IN PLACE WITHIN FOURTEEN DAYS OF FINAL GRADING.
19. ALL CONTROL MEASURES SHALL COMPLY WITH THE MANAGEMENT PRACTICES CONTAINED IN THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION'S "EROSION & SEDIMENT CONTROL DESIGNER AND REVIEWERS MANUAL" LATEST EDITION.
20. IT IS THE CONTRACTOR'S RESPONSIBILITY TO MANAGE ALL SEDIMENT AND EROSION CONTROL MEASURES AS REQUIRED BY REGULATORY AGENCIES.
21. NO CLEARING, GRADING, EXCAVATING, FILLING, OR OTHER DISTURBANCE OF THE NATURAL TERRAIN SHALL OCCUR UNTIL EROSION AND SEDIMENTATION CONTROL MEASURES HAVE BEEN INSTALLED, EXCEPT THOSE OPERATIONS NEEDED TO IMPLEMENT THESE MEASURES.
22. THE CONTRACTOR SHALL PROVIDE THE COUNTY ENGINEER A COPY OF THE NPDES PERMIT PRIOR TO COMMENCING CONSTRUCTION ACTIVITIES AS REQUIRED BY FDEP'S NPDES PROGRAM.

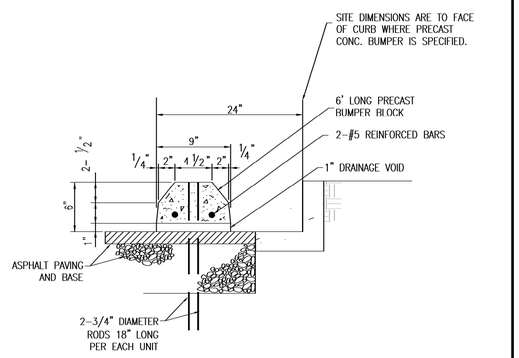
ON SITE ADA RAMP DETAILS
NOT TO SCALE



C-610 / 9

NOTES:
1. EXPANSION JOINTS REQUIRED AT ALL STRUCTURES AND CURB RETURNS.
2. EXPANSION JOINT: PLACE AT ENDS OF ALL RADII, 5'–0" ON EACH SIDE OF DRAINAGE STRUCTURE, AND AT 90'–0" MAXIMUM, INTERVALS IN STRAIGHT CURB AND GUTTER. PROVIDE #6 x 18" LONG SMOOTH STEEL DOWEL BARS WITH 1" DIA. GREASE CAP THROUGH EXPANSION JOINTS, (3/4" THICK BITUMINOUS FILLER MATERIAL).
3. CONTRACTION JOINT: PROVIDE 2" DEEP x 1/8" WIDE CONTRACTION JOINT AT 15'–0" INTERVALS.
4. SLOPE ON GUTTER SHOULD BE A MINIMUM OF 0.6%. SLOPE SHALL PROMOTE POSITIVE DRAINAGE TO DRAINAGE STRUCTURES. SLOPE TOWARDS OR AWAY FROM CURB AS REQUIRED.
5. 2'–6" LONG TIE BAR ON 2'–6" CENTERS SHALL BE PROVIDED WHEN CURB IS ADJACENT TO P.C.C. PAVEMENT.
6. PROVIDE (2) #6 x 2'–6" LONG TIE BARS TO CONNECT EXISTING AND NEW CURB AND GUTTER.
7. REMOVE FORMS AS EARLY AS POSSIBLE. BRUSH TOP AND FACE OF CURBS TO REMOVE ALL IMPERFECTIONS. TYPICAL OF ALL FORM WORK.
8. ALL RADII SHALL BE TRUE ARCS.
9. MEDIUM TO LIGHT BROOM FINISH ON ALL EXTERIOR CONCRETE.
10. CONCRETE SHALL BE MINIMUM 3,000 PSI AT 28 DAYS

SITE DETAILS

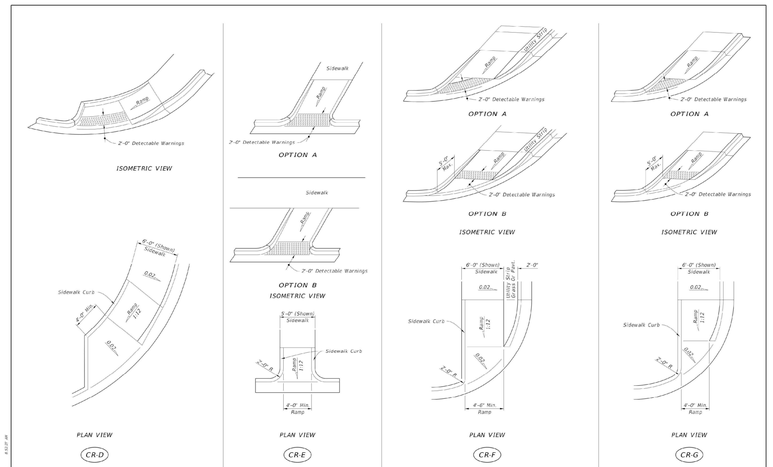
SHEET C-611

I:\2025\2025144\D Civil\2025122.25 - Prior to Grading Changes\2025144d.dwg, ePDF FULL BLEED D (24.00 X 36.00 INCHES), BONGUE PALETTE, DWG TO PDF.PC3, JAMES HAMPTON, April 8, 2026 8:53:27 AM



GENERAL NOTES:

1. Cross Slopes and Grades:
   - A. Sidewalk, ramp, and landing slopes (i.e. 0.02, 0.05, and 1:12) shown in this Index are maximums. With approval of the Engineer, provide the minimum feasible slope where the requirements cannot be met.
   - B. Landings must have cross-slopes less than or equal to 0.02 in any direction.
   - C. Maintain a single longitudinal slope along each side of the curb ramp. Ramp slopes are not required to exceed 15 feet in length.
   - D. Joints permitted at the location of Slope Breaks. Otherwise locate joints in accordance with Index 522-001. No joints are permitted within the ramp portion of the Curb Ramp.
2. Curb, Curb and Gutter and/or Sidewalk:
   - A. Refer to Index 522-001 for concrete thickness and sidewalk details.
   - B. Remove any existing curb, curb and gutter, or sidewalk to the nearest joint beyond the curb transition or to the extent that no remaining section is less than 5 feet long.
   - C. Width of Curb Ramp is 4'-0" minimum. Match sidewalk or Shared Use Path width as shown in the Plans.
3. Curb Ramp Alpha-Identification:
   - A. Sidewalk curb ramp alpha-identifications (e.g. CR-A) are provided for reference purposes in the Plans.
   - B. Alpha-identifications CR-I and CR-J are intentionally omitted.
4. Detectable Warnings:
   - A. Install detectable warnings in accordance with Specification 527.
   - B. Place detectable warnings across the full width of the ramp or landing, to a minimum depth of 2 feet measured perpendicular to the curb line and no greater than 5 feet from the back of the curb or edge of pavement.
   - C. If detectable warnings are shown in the Plans on slopes greater than 5%, align the truncated domes with the centerline of the ramp; otherwise, the truncated domes are not required to be aligned.

GENERAL NOTES:

1. Work this Index with Index 425-001 and Index 425-010.
2. Orient grate with vanes directed toward predominant flow.
3. Provide 1½" minimum cover for steel in slab tops unless otherwise shown. Tops may be either cast-in-place or precast concrete.
4. Place top slab openings such that 2 edges of inlet frame will be located directly above bottom wall or riser wall for Alternate B applications..
5. When used on a structure with dimensions larger than those detailed on Sheet 3 and risers are not applied, construct the top slab using Index 425-010 with the slab opening adjusted to 24"x36". The "Special Top Slab" on Index 425-010 is not permitted.
6. Frame may be adjusted with one to six courses of brick.
7. Vaned grates with approximately equal openings that satisfy AASHTO HL-93 loading are permitted. Provide reversible (right or left) grates.

GENERAL NOTES:

1. Use a 1-piece cover, unless the 2-piece cover is called for in the Plans, except at inlets and manholes with sump bottoms. Use the 2-piece cover when the sump depth exceeds 2', unless otherwise noted.
2. Include "Adjustable" on the cover for Type 1 manhole adjustable frames.
3. For square or rectangular precast drainage structures, use either deformed or smooth WWR meeting the requirements of Option 1 or 2 in the Wall Reinforcing Splice Details, except that welded wire reinforcement shall not be used in structures exceed 10-ft-tall and lapped in accordance with Option 1 or 3 as shown in the Wall Reinforcing Splice Details.
4. Lap splice horizontal steel in the walls of rectangular structures in accordance with Option 1, 2 or 3 as shown in the Wall Reinforcing Splice Details.
5. Welding of splices and laps is permitted. Use AASHTO M259 requirements and restrictions on welds.
6. Rebar straight end embedment of peripheral reinforcement may be used in lieu of ACI standard hooks for top and bottom slabs, except when hooks are specifically called for in the Plans.
7. Precast opening for pipe must be the pipe OD plus 6" (± 2" tolerance); Use mortar to seal the pipe into the opening of such a mix that shrinkage will not cause leakage into or out of the structure. Dry-pack mortar may be used to seal openings less than 2½" wide.

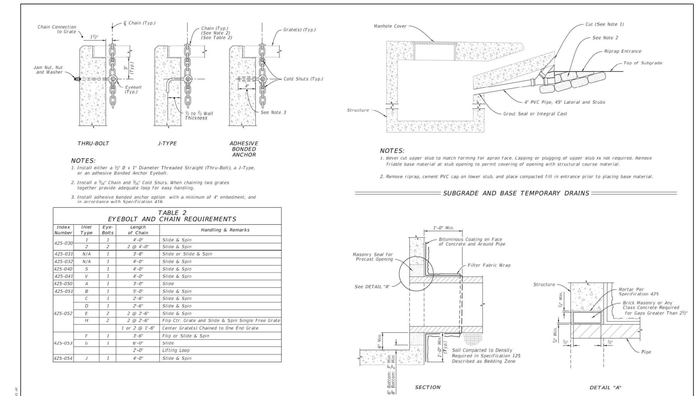
II	165	190	255 / 190	445
III	90	190	180 / 190	370

NOTE: Frame Type I in Table 1, Includes Adjustable frames.



MANHOLE FRAMES

NOTES:

1. Use Class II concrete for Manhole top Type 7 slabs.
2. Manhole top Type 7 slabs may be of cast-in-place or precast construction. The optional key is for precast tops and in lieu of dowels. Omit frame and slab openings when top is used over a junction box.
3. Manhole top Type 8 may be of cast-in-place, precast concrete construction, or brick construction. For concrete construction, use the same concrete and steel reinforcement as the supporting wall unit. An eccentric cone may be used.
4. Use construction joint options, as shown on Sheet 6 to secure manhole tops to structures.
5. Frames may be adjusted to a maximum 12" height with brick or precast ASTM C478 grade rings.
6. Manhole top Type 8 may be substituted for a Type 7, if the minimum dimensions are not reduced.
7. Manhole top Type 7 may be substituted for Type 8, if the minimum thickness (h) above pipe opening cannot be maintained with Type 8.

LAST REVISION 11/01/20	DESCRIPTION:	FDOT FY 2023-24 STANDARD PLANS	SUPPLEMENTARY DETAILS FOR DRAINAGE STRUCTURES	INDEX 425-001	SHEET 2 of 8

NOTES:

1. Install either a ½" Ø x 1" Diameter Threaded Straight (Thru-Bolt), a J-Type, or an adhesive Bonded Anchor Eyebolt.
2. Install a ¾" Chain and ¾" Cold Shuts. When chaining two grates together provide adequate load for easy handling.
3. Install adhesive bonded anchor option with a minimum of 4" embedment, and in accordance with Specification 416.

TABLE 2
EYEBOLT AND CHAIN REQUIREMENTS

Index Number	Inlet Type	Eye-Bolts	Length of Chain	Handling & Remarks
425-030	1	1	4'-0"	Slide & Spin

LOCKING GRATES TO INLETS

NOTES:

1. Bevel cut upper stub to match forming for apron face. Capping or plugging of upper stub is not required. Remove friable base material at stub opening to permit covering of opening with structural course material.
2. Remove riprap, cement PVC cap on lower stub, and place compacted fill in entrance prior to placing base material.

SUBGRADE AND BASE TEMPORARY DRAINS

PIPE TO STRUCTURE FILTER FABRIC WRAP

NOTES:

1. See inlet indexes for optional precast inlet construction details up to depths of 15'.
2. Interior dimensions of an Alt. "B" Bottom may be adjusted to reflect these inlet interior dimensions when precast units are used in conjunction with Alt. "B" Structure Bottoms, Index 425-030.
3. Use concrete meeting the requirements of ASTM C478 or Class IV for precast structures with 6" wall or slab thickness.
4. Reinforcement may be deformed bar reinforcement or welded wire reinforcement. Bar reinforcement other than #3 bar may be used, however only two grades are recognized: Grade 40 and Grade 60. Smooth welded wire reinforcement will be recognized as having a design strength of 70 ksi. Deformed welded wire reinforcement will be recognized as having a design strength of 70 ksi. The area of reinforcement required may be adjusted in accordance with the Equivalent Steel Area Table provided. Use the following equations to determine the steel area and spacing for bars not otherwise specified:

   Grade 40 Steel Area = As40= 60/40 x As60

   Smooth Welded Wire Reinforcement: Steel Area = As65= 60/65 x As60

   Deformed Welded Wire Reinforcement Steel Area = As70= 60/70 x As60

   When a reduced area of reinforcement is provided, any maximum bar spacing shown must also be reduced as determined by the following equations, unless otherwise shown:

   Max. Grade 40 Bar Spacing = Grade 60 Bar Spacing

   Max. Smooth Welded Wire Spacing = Grade 60 Bar Spacing x 0.86

   Max. Deformed Welded Wire Spacing = Grade 60 Bar Spacing x 0.74

   When an increased area of reinforcing is provided, the maximum bar spacing may be increased by the squared ration of increased steel area, but not to exceed 12":

   Max. Bar Spacing Provided w=Max. Bar Spacing Required x $\left(\frac{\text{Steel Area Provided}}{\text{Min. Steel Area Required}}\right)^2$

   Use wire no smaller than W3.1 or D4.0, or larger and with spacing 8" or less. Use bar reinforcement displaying the minimum yield designation grade mark, or either the number 60 or one (1) grade mark line to be acceptable at the higher value. Use minimum bar spacing no greater than 12" for bars in the walls of precast structures with walls 8" or less in thickness, with a maximum spacing of 18" for vertical bars and 12" for horizontal bars. Wires smaller than W3.1 or D4.0 may be used in the walls of ASTM C 478 round structure bottoms and round risers.
5. Fiber-reinforced concrete may be substituted for conventional steel reinforcement in accordance with the Structures Design Guidelines. Submit shop drawings corresponding to an approved fiber-reinforced concrete mix design for approval to the State Drainage Office.

PRECAST OPTION AND EQUIVALENT REINFORCEMENT SUBSTITUTION

LAST REVISION 11/01/20	DESCRIPTION:	FDOT FY 2023-24 STANDARD PLANS	SUPPLEMENTARY DETAILS FOR DRAINAGE STRUCTURES	INDEX 425-001	SHEET 5 of 8

NOTES:

1. Segments may be inverted. Opening for pipe is the pipe OD plus Ø (± 2" tolerance).
2. If h can not be attained, then a top or bottom slab must be attached to the segment as shown below.

TABLE 3
Minimum Value for H

H (min.)	Box or Riser Diameter
1'-0"	3'-0" & 4'-0"
1'-6"	5'-0" & 6'-0"
2'-0"	>6'-0"

NOTES:

1. h may be less than 6" when approved by the Engineer, but not for inlet segments at finish grade elevation.
2. Dowel construction joint or monolithic cast only.

CONSTRUCTION JOINT OPTIONS AND MINIMUM BOX AND RISER SEGMENT DIMENSIONS

LAST REVISION 11/01/20	DESCRIPTION:	FDOT FY 2023-24 STANDARD PLANS	SUPPLEMENTARY DETAILS FOR DRAINAGE STRUCTURES	INDEX 425-001	SHEET 6 of 8

NOTES:

1. Submit Shop Drawings of corner openings for approval by the Engineer.
2. h_1 may be less than 1'-6" when a minimum 1'-0" deep segment, 8" slab or curb inlet is provided above the corner opening.
3. For inlet segments at finish grade elevation, substitute a #6 Bar for the top corner bar when $1'-6" \le h_1 < 2'-0"$.
4. Install bars continuously around corner and evenly spaced. Tie additional reinforcement to the outside of vertical wall reinforcement.
5. Dowel construction joint or monolithically cast wall and slabs.

SKEWED PIPE IN RECTANGULAR STRUCTURES

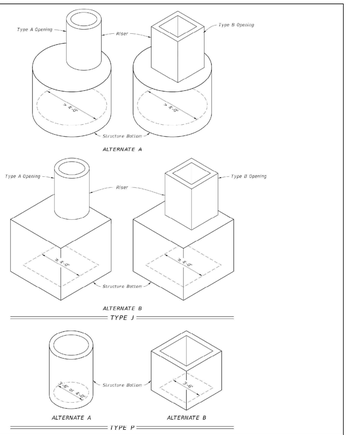
GRADING DETAILS

SHEET C-621

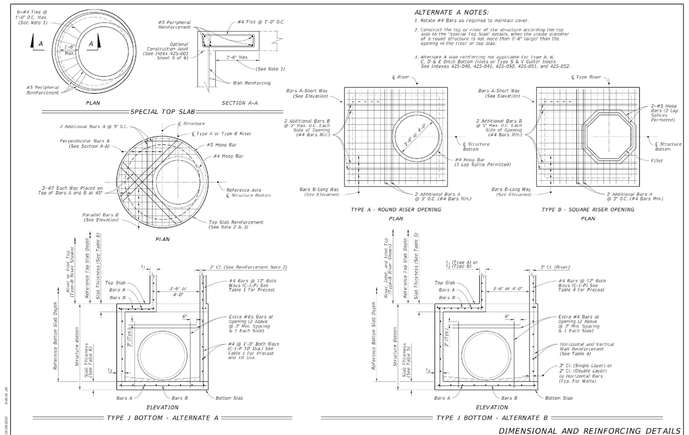
L:\2025\2025144\D CIV\2026.02.25 - Prior to Grading Change\2025144d.dwg, ePDH FILL BLEED 3 (24.00 X 36.00 INCHES), SCHQUE PALETA, DWG TO PDF.PC3, JAMES ALBERTSON, April 8, 2026 8:54:49 AM

GENERAL NOTES:



1. Work this Index with Specification 425 and Index 425-001.
2. Type P standard structure bottoms are 4'-0"diameter and smaller (All, A) and 5'-6" square (All, B). Larger standard structure bottoms are designated Type J. Risers are permitted for all structures.
3. Walls of circular structures (All, A) constructed in place may be of brick or reinforced concrete. Construct precast and rectangular structures (All, B) with reinforced concrete only.
4. Wall thickness and reinforcement are for either reinforced cast-in-place or precast concrete units except that precast circular units may be furnished with walls in accordance with ASTM C478 (See Table 1).
5. Top and bottom slab thickness and reinforcement are for precast and cast-in-place construction. Use Class III concrete, except when Class IV concrete is shown in the Plans.
6. All, A or All, B structure bottoms may be used in conjunction with curb inlet tops Types 1, 2, 3, 4, 5, 6, 9, and 10, and any manhole or junction box. All, B structure bottoms may be used in conjunction with curb inlet Types 7 & 8, or any slotted bottom inlet.
7. Rectangular structures may be rotated as directed by the Engineer in order to facilitate connections between the structure walls and pipes.
8. Use straight embedment reinforcement in lap and bottom slabs except when ACI hooks are specifically required.
9. Construct corner fillets as shown for rectangular structures used with circular risers and inlet throats, and when used on skew with rectangular risers, inlets, and inlet throats. Construct fillets in the top slab of the All, A structure bottoms when used with the Type B risers. Reinforce each fillet with two #3 bars.
10. Units larger than specified standards may be substituted at the contractor's option when these units will fit the pipe and will not interfere with runs of utility conduits. Furnish such larger units at no additional cost to the Department. Larger All, A units cannot replace All, B units without approval of the Engineer. This Note applies to this Index only.

REINFORCEMENT NOTES:



1. Locate wall reinforcement in rectangular structures as shown in the WALL REINFORCEMENT SPLICE DETAILS in Index 425-001.
2. Provide a minimum 2"clear cover for all reinforcement unless otherwise noted and except for 78"diameter ASTM C478 units.
3. Additional bars used to reinforce lade fenders for precast structures with grouted pipe connections may be left flush with the hole surface.
4. Cut or bend reinforcement as pipe openings to maintain cover.
5. Remove exposed ends of reinforcing at precast pipe openings and grouted joints to 1" below the concrete surface and seal with a Type F Epoxy meeting the requirements of Specification 926.
6. Lapwelment area smooth or deformed welded wire reinforcement may be substituted in accordance with Index 425-001.

$t_1$and t_2= Wall Thickness.
A_s= Vertical and horizontal areas of reinforcement.
##Provide 0.20 sq. in./ft. at each face, 12" max. bar spacing.
***Maximal maximum wall thickness.
****As, total circumferential reinforcement for continuous steel hoops:
A_s = 0.40 sq. in. for riser section height equal to or less than 7'-0" (2 hoop min.)
A_s = 0.60 sq. in. for riser section height more than 2'-0" up to 4'-0" (3 hoop min.)
Areas of reinforcing for precast items are based on Grade 60 reinforcing.
No reduction in the area of reinforcement is allowed for welded wire fabric in Table 1.
Area of vertical reinforcing may be reduced in accordance with ASTM C478.

TABLE 4 NOTES:

1. Wall depth is measured to the top of the bottom slab for doors and to the top of the intermediate slab for risers.
2. Wall height is the distance between top of lower slab to bottom of upper slab. Use Table 5 for wall heights exceeding 12'.
3. Wall lengths exceeding 9'-0" require two layers of reinforcing (See Table 4) with 2" Cl. cover from the horizontal bars to the inside and outside faces for each layer.
4. Wall thickness and reinforcing for intermediate depths shown in Table 4, at 12'-0" Diameter (opposite a special design).
5. Wall thickness and reinforcing for rectangular structures is based on the longer wall length.

TABLES 1, 2, 3, AND 4

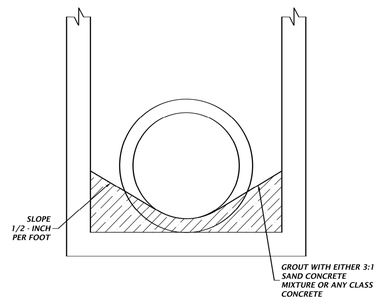
SLAB AND WALL DESIGN TABLE NOTES



1. Size is the inside dimensions of a structure.
2. Slab reinforcement is appropriate for top, intermediate, and bottom slabs.
3. Bottom Slabs for precast 3'-6" x 3'-6" rectangular structures at 12' depth or less, may be 8" thick.
4. Slab depth is measured from finished grade to top of slab.
5. Reinforcing schedules with larger areas of steel may be substituted for schedules with smaller areas of steel at same spacing, except that Schedule B10 may not be substituted for Schedule A6. See Index 425-001 for allowable bar spacing adjustments when larger areas of reinforcing are substituted.

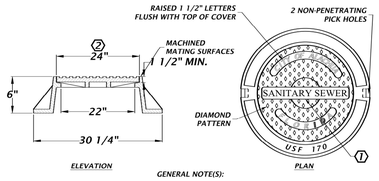
GENERAL NOTE:



RUBBER BOOT, DOUBLE BANDED, 316 S/S CLAMPS, MEETING THE ASTM C923 STANDARD. Kor-N-Seal® I EX SERIES CONNECTOR WITH DOUBLE STAINLESS STEEL BANDS OR EQUAL

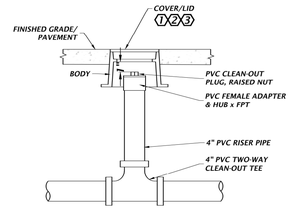
KEYED NOTE(S):

1. ESPECIALLY FOR RETRO FIT WORK, INSTALLING A GRAVITY SEWER PIPE UP TO 2 FEET ABOVE INVERT IS PERMISSIBLE.

209 MANHOLE PIPE CONNECTION
NTS

C-630 9

GENERAL NOTE(S):



1. USF 170 RING AND CE COVER
2. LOAD CLASSIFICATION: HEAVY DUTY
3. MATERIAL: GRAY CAST IRON, ASTM A48 CLASS 35B
4. PAINT TOP AS PER 307

KEYED NOTE(S):

1. INSCRIBING "SANITARY SEWER" ON TWO LINES IS ACCEPTABLE.
2. FOR A 72-INCH DIAMETER MANHOLE IN A TYPE 1 APPLICATION, PROVIDE A 30-INCH MANHOLE COVER.

212 CAST IRON SANITARY SEWER MANHOLE FRAME AND COVER
NTS

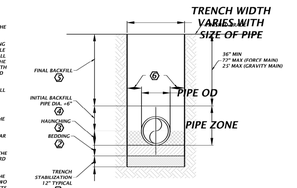
C-630 6

KEYED NOTES:

1. HEAVY DUTY LOAD RATING MODEL: SIGMA CORPORATION CO-2610S
2. COVER/LID CAN ALSO ACCOMMODATE 6" CLEAN-OUT
3. PAINT COVER/LID AS PER 307

GENERAL NOTES:
A. REFER TO 200

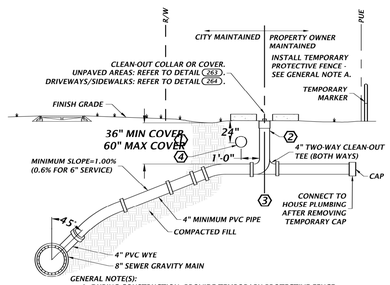
264 CLEAN-OUT COVER FOR DRIVEWAYS/SIDEWALKS
NTS



C-630 3

GENERAL NOTE(S):

1. WATER SHALL NOT BE PERMITTED IN THE TRENCH DURING CONSTRUCTION.
2. ALL PIPE TO BE INSTALLED WITH BELL FACING UPSTREAM TO THE DIRECTION OF THE FLOW.
3. DEPTH FOR REMOVAL OF UNSUITABLE MATERIAL SHALL GOVERN DEPTH OF BEDDING ROCK BELOW THE PIPE. FIELD DETERMINE REQUIRED REMOVAL OF UNSUITABLE MATERIAL TO REACH SUITABLE FOUNDATION. THE BOTTOM OF THE TRENCH SHALL BE SHAPED TO FIT THE LOWER PORTION OF THE PIPE FOR UNIFORM BEARING. THE BOTTOM OF THE TRENCH SHALL BE BROUGHT UP TO THE ORIGINAL GRADE WITH APPROVED MATERIAL AND THOROUGHLY COMPACTED TO A MINIMUM OF 95% MODIFIED PROCTOR.
4. FINAL RESTORATION IN IMPROVED AREAS SHALL BE IN COMPLIANCE WITH ALL APPLICABLE REGULATIONS OF GOVERNING AGENCIES.



KEYED NOTE(S):

1. TRENCH STABILIZATION SHALL BE PROVIDED TO A DEPTH OF 12-INCHES. THE MATERIAL SHALL BE NO. 57 STONE.
2. BEDDING SHALL BE A MINIMUM OF 6-INCHES AND COMPOSED OF IMPORTED GRANULAR FILL. COMPACT TO 95% STANDARD PROCTOR, AASHTO T-99.
3. HAUNCHING PORTION OF THE PIPE ZONE SHALL BE PLACED TO THE SPRINGLINE OF THE PIPE AND COMPOSED OF IMPORTED GRANULAR FILL. COMPACT TO 95% STANDARD PROCTOR ASSHTO T-99.
4. INITIAL BACKFILL: COMMON FILL COMPACTED TO 95% (98% UNDER PAVEMENT) OF THE MAXIMUM DENSITY AS PER AASHTO T-180, FROM THE SPRINGLINE OF THE PIPE TO TWO (2) FEET ABOVE THE PIPE AND SHALL BE CAREFULLY BACKFILLED IN 6-INCH LIFTS AND THE SOIL CONSOLIDATED WITH THE HAND OPERATED TAMPING MACHINE (OR AS REQUIRED BY CITY, COUNTY, OR STATE INSPECTOR).
5. FINAL BACKFILL: COMMON FILL COMPACTED TO 95% (98% UNDER PAVEMENT) OF THE MAXIMUM DENSITY AS PER AASHTO T-180. AFTER PLACEMENT AND COMPACTION OF THE INITIAL BACKFILL, THE BALANCE OF THE BACKFILL MATERIAL MAY BE MACHINE PLACED OR AS REQUIRED BY THE INSPECTOR AND SHALL NOT CONTAIN ANY ROCKS OR DEBRIS.
6. 12" MINIMUM

REMOVAL OF TEMPORARY CONCRETE WASHOUT FACILITIES

1. WHEN TEMPORARY CONCRETE WASHOUT FACILITIES ARE NO LONGER REQUIRED FOR THE WORK, THE HARDENED CONCRETE SHOULD BE REMOVED AND DISPOSED OF. MATERIALS USED TO CONSTRUCT TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD BE REMOVED FROM THE SITE OF THE WORK AND DISPOSED OF.

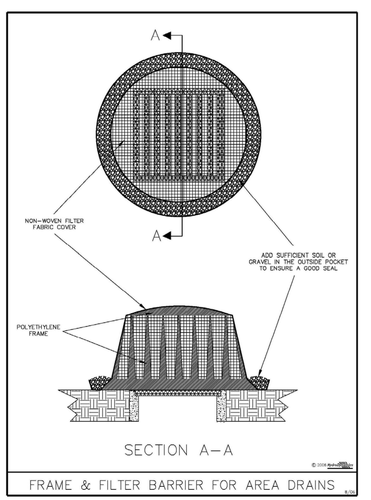
2. HOLES, DEPRESSIONS OR OTHER GROUND DISTURBANCE CAUSED BY THE REMOVAL OF THE TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD BE BACKFILLED AND REPAIRED.

INSPECTION AND MAINTENANCE

1. INSPECT AND VERIFY THAT ACTIVITY-BASED BMPS ARE IN PLACE PRIOR TO THE COMMENCEMENT OF ASSOCIATED ACTIVITIES. WHEN ACTIVITIES ASSOCIATED WITH THE BMP ARE UNDER WAY, INSPECT WEEKLY DURING THE RAINY SEASON AND AT TWO WEEK INTERVALS IN THE NON-RAINY SEASON TO VERIFY CONTINUED BMP IMPLEMENTATION.

2. TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD BE MAINTAINED TO PROVIDE ADEQUATE HOLDING CAPACITY WITH A MINIMUM FREEBOARD OF 4 IN. FOR ABOVE GRADE FACILITIES AND 12 IN. FOR BELOW GRADE FACILITIES. MAINTAINING TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD INCLUDE REMOVING AND DISPOSING OF HARDENED CONCRETE AND RETURNING THE FACILITIES TO A FUNCTIONAL CONDITION. HARDENED CONCRETE MATERIALS SHOULD BE REMOVED AND DISPOSED OF.

3. WASHOUT FACILITIES MUST BE CLEANED, OR NEW FACILITIES MUST BE CONSTRUCTED AND READY FOR USE ONCE THE WASHOUT IS 75% FULL.



ONSITE TEMPORARY CONCRETE WASHOUT FACILITY, TRANSIT TRUCK WASHOUT PROCEDURES

1. TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD BE LOCATED A MINIMUM OF 50 FT. FROM STORM DRAIN INLETS, OPEN DRAINAGE FACILITIES, AND WATERCOURSES. EACH FACILITY SHOULD BE LOCATED AWAY FROM CONSTRUCTION TRAFFIC OR ACCESS AREAS TO PREVENT DISTURBANCE OR TRACKING.
2. A SIGN SHOULD BE INSTALLED ADJACENT TO EACH WASHOUT FACILITY TO INFORM CONCRETE EQUIPMENT OPERATORS TO UTILIZE THE PROPER FACILITIES.
3. TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD BE CONSTRUCTED ABOVE GRADE OR BELOW GRADE AT THE OPTION OF THE CONTRACTOR. TEMPORARY CONCRETE WASHOUT FACILITIES SHOULD BE CONSTRUCTED AND MAINTAINED IN SUFFICIENT QUANTITY AND SIZE TO CONTAIN ALL LIQUID AND CONCRETE WASTE GENERATED BY WASHOUT FACILITIES.
4. TEMPORARY WASHOUT FACILITIES SHOULD HAVE A TEMPORARY PIT OR BERMED AREAS OF SUFFICIENT VOLUME TO COMPLETELY CONTAIN ALL LIQUID AND WASTE CONCRETE MATERIALS GENERATED DURING WASHOUT PROCEDURES.
5. WASHOUT OF CONCRETE TRUCKS SHOULD BE PERFORMED IN DESIGNATED AREAS ONLY.
6. ONLY CONCRETE FROM MIXER TRUCK CHUTES SHOULD BE WASHED INTO CONCRETE WASH OUT.
7. CONCRETE WASHOUT FROM CONCRETE PUMPER BINS CAN BE WASHED INTO CONCRETE PUMPER TRUCKS AND DISCHARGED INTO DESIGNATED WASHOUT AREA OR PROPERLY DISPOSED OF OFFSITE.
8. ONCE CONCRETE WASTES ARE WASHED INTO THE DESIGNATED AREA AND ALLOWED TO HARDEN, THE CONCRETE SHOULD BE BROKEN UP, REMOVED AND DISPOSED OF OFFSITE IN A LEGAL MANNER, DISPOSE OF HARDENED CONCRETE WASTE ON A REGULAR BASES.
9. TEMPORARY CONCRETE WASHOUT FACILITY (TYPE ABOVE GRADE)
   a. TEMPORARY WASHOUT FACILITY (TYPE ABOVE GRADE) SHOULD BE CONSTRUCTED AS SHOWN IN THE DETAILS ON THIS SHEET WITH A RECOMMENDED MINIMUM LENGTH AND MINIMUM WIDTH OF 10 FT., BUT WITH SUFFICIENT QUANTITY AND VOLUME TO CONTAIN ALL LIQUID AND CONCRETE WASTE GENERATED BY WASHOUT OPERATIONS.
   b. STRAW BALES, WOOD STAKES, AND SANDBAG MATERIALS SHOULD CONFORM TO THE PROVISION IN THE EROSION AND SEDIMENT CONTROL PLAN.
   c. PLASTIC LINING MATERIAL SHOULD BE A MINIMUM OF 10 MIL POLYETHYLENE SHEETING AND SHOULD BE FREE OF HOLES, TEARS, OR OTHER DEFECTS THAT COMPROMISE THE IMPERMEABILITY OF THE MATERIAL.
10. TEMPORARY CONCRETE WASHOUT FACILITY (TYPE BELOW GRADE)
   a. TEMPORARY WASHOUT FACILITY (TYPE BELOW GRADE) SHOULD BE CONSTRUCTED AS SHOWN IN THE DETAILS ON THIS SHEET, WITH A RECOMMENDED MINIMUM LENGTH AND WIDTH OF 10 FT., BUT WITH SUFFICIENT QUANTITY AND VOLUME TO CONTAIN ALL LIQUID AND CONCRETE WASTE GENERATED BY WASHOUT OPERATIONS.
   b. LATH AND FLAGGING SHOULD BE COMMERCIAL TYPE.
   c. PLASTIC LINING MATERIAL SHOULD BE A MINIMUM OF 10 MIL POLYETHYLENE SHEETING AND SHOULD BE FREE OF HOLES, TEARS, OR OTHER DEFECTS THAT COMPROMISE THE IMPERMEABILITY OF THE MATERIAL.

SWPPP DETAILS

SHEET **C-640**

LANDSCAPE CALCULATIONS

TOTAL SITE AREA = 1.25 Acres
- 3 Canopy Trees / Acre = 3.75 trees (4) on front facade
- 2 Canopy Trees / Acre = 2.5 trees (3) on other 3 facades

- Additional 4 Canopy trees / 100' of building facade
  43' front & back facade (86') and 136' side facades (272') = 358'
  = 3.58 x 4 = 14 Additional Canopy facade trees
- 6 Understory Trees /Acres = 7.5 trees (8)
  50% (4) planted in front of the structure & 25% (4) planted each side

TOTAL TREES = 14 Canopy Trees & 8 Understory Trees - REQUIREMENT NOT SATISFIED
Request Exemption for Business Type & Utilities

PARKING LOT LANDSCAPING: 1 Canopy Trees / 1800sf of parking Lot Area
- 2 ADA Spaces (563.3sf) & 3 Employee Spaces (478.5sf) = 1041.8 sf = 1 tree required
- 24 Vacuum Vehicular Use Areas - Canopied (2411.9sf + 3348.0sf) = 5760sf
  = 3 trees - Request Exemption with use of Shade Canopies

SITE PERIMETER LANDSCAPE BUFFERS:

NORTH BUFFER - ARTERIAL FRONTAGE: 122.67' linear feet
- Minimum of 4 Canopy Trees & 3 Understory Trees / 100' with
  a continuous opaque screen of shrubs for the entire length
  1.2 x 4 =4.9 (5) Canopy Trees and 1.2 x 3 = 3.6 (4) Understory Trees
  Note: Overhead Powerlines: Understory/Ornamental Trees requested for Canopy Trees

EAST BUFFER - TYPE 'A': 465.00' linear feet
-Option 2: 1 Canopy Tree / 60' and 1 Hedge
  465' / 60' = 7.75 (8) Canopy Trees
  Note: 4 Canopy Trees provided - Request exception with use of Shade Canopy

WEST BUFFER - TYPE 'C': 465.00' linear feet
-Option 2: 1 Canopy Tree / 30' plus 1 Evergreen Hedge
  465' / 30' = 15.5 (16) Canopy Trees and 1 Hedge

SOUTH BUFFER - TYPE 'A': 102.67' linear feet
-Option 2: 1 Canopy Tree / 60' plus 1 Hedge
  102.7' / 60' = 1.7 (2) Canopy Tree and 1 Hedge

ALTERNATIVE LANDSCAPE REQUEST

Per section 6.2.2 (D)(1)(b)(i) & (ii) relief from the number of trees needed to meet the following requirements is requested. Based on the type of business and it's facade, the associated utilities and tree densities of the adjoining business' it would be in keeping with good landscape planning practice to reduce the amount of trees required for this site.

Requirement of: Additional Trees per 100' of Building Facade:
- The facade and associated utilities associated with this type of business limits the amount of space for the required number of trees. The adjoining sites combined with this site create an appropriate combination of trees and aesthetic in keeping with the intent of the code.

Requirement of: Parking Lot Trees at 1 per 1800 sf of Parking Area:
- The majority of parking for this business is vacuum stations that are covered with a shade canopy.
- 84.7% of the parking area is covered with the shade canopy.
- Calculations for the 2 uncovered parking areas have been provided with the required number of trees provided per the requirement calculations.

The majority of spaces are shaded with a canopy, which meets the intent of the code. Relief from the number of trees needed to meet this requirement would be in keeping with good landscape planning practice.

Requirement of: Canopy Trees to be used for Arterial Frontage (North Buffer):
- Overhead Powerlines are in the area. The substitution of understory trees is requested.

Requirement of: East Buffer 'Type A' 1 Canopy Tree / 60' Linear Feet plus one hedge:
- 265' linear feet (57%) of the 465' total linear footage is drive aisles (4) and shade canopy making over half of the area unavailable for tree planting.
- A continuous evergreen hedge has been provided along the shade canopy meeting the requirement.

Relief to 50% of the number of trees (from 8 to 4) to meet this requirement would be in keeping with good landscape planning practice.

FLORIDA EXOTIC PLANT PEST PLANT NOTE:
All vegetative materials identified in the Florida Exotic Pest Plant Council's List of Invasive Plant Species as amended , shall be removed at the time of development

FLORIDA-FRIENDLY LANDSCAPING NOTE: Florida-Friendly Landscaping is a set of nine guiding principles designed to protect Florida's natural resources while creating beautiful, low-maintenance landscapes. These principles include right plant, right place; water efficiently; fertilize appropriately; mulch; attract wildlife; manage yard pests responsibly; recycle yard waste; reduce stormwater runoff; and protect the waterfront. By following these guidelines, you can save water, reduce pollution, and support local wildlife.
This project has used the principles of the right plant in the right place, using the City of Alachua's approved plant list in combination with a water effecient irrigation system and mulching to reduce evapotranspiration & runoff.

FLORIDA #1" GRADE QUALITY STANDARDS NOTE: All landscape plantings shall comply with the following standards: "Florida #1" grade quality standard or better as defined and specified within the latest edition of the "Florida Grades and Standards for Nursery Plants" as published by the Florida Department of Agriculture and Consumer Services, Division of Plant Industries. Provide healthy, vigorous stock grown in a recognized nursery in accordance with good horticultural practices and free of disease, pests, and defects."

Count	Common Name	Botanical Name	Size	Species %	Tree Type	Use	Native

TIDAL WAVE LANDSCAPE NOTES

ALL DISTURBED AREAS NOT COVERED BY STRUCTURES, PAVING OR LANDSCAPING SHALL BE SODDED. NO SEEDING SHALL BE USED.

ALL PLANT BEDS SHALL BE UNDERLAIN WITH LANDSCAPING FABRIC AND HAVE 3" OF DYED BROWN OR BLACK WOOD MULCH WITH EDGING AS REQUIRED. NO PINE STRAW MULCH WILL BE ALLOWED.

AN UNDERGROUND IRRIGATION SYSTEM, SHALL BE INSTALLED AND SHALL COMPLY WITH ALL LOCAL MUNICIPAL CODES AND REGULATIONS AND ALSO COMPLY WITH THE LATEST NATIONAL ELECTRIC CODE RULES FOR ALL ELECTRIC WORKS AND MATERIALS.

IF THERE IS NO PLANT BED AGAINST THE CAR WASH TUNNEL, VAC HOUSE(S), OR DUMPSTER ENCLOSURE, THEN THERE SHALL BE A 18 INCH MINIMUM STRIP OF RIVER ROCK INSTALLED.

ALL RIVER ROCK SHALL BE 4"-6" MINIMUM IN DIAMETER AND SHALL BE UNDERLAIN WITH LANDSCAPING FABRIC.

GENERAL LANDSCAPE NOTES

1. LANDSCAPE WORK SHALL INCLUDE BUT IS NOT LIMITED TO THE SUPPLYING OF ALL PLANT MATERIALS SPECIFIED, THE FURNISHING OF ALL LABOR, EQUIPMENT, WATER, ELECTRICITY, EQUIPMENT AND ALL MATERIALS CALLED, INCLUDING ALL RELATED PREPARATION WORK REGARDING SITE INCONSISTENCIES AND SOIL ISSUES.
2. CONTRACTOR WILL MAINTAIN ALL PLANTS AND PLANTED AREAS UNTIL FINAL ACCEPTANCE BY THE OWNER. THE CONTRACTOR WILL ASSIGN A QUALIFIED PROJECT MANAGER AND FIELD SUPERVISOR TO WORK DIRECTLY WITH THE LA OR OWNER AND SUPERVISE THE WORK AT ALL TIMES THROUGH FINAL OWNER ACCEPTANCE.
3. ALL LANDSCAPE WORK SHALL COMPLY WITH ALL APPLICABLE CODES AND ORDINANCES. PERMITTING IS THE RESPONSIBILITY OF THE CONTRACTOR.
4. VERIFICATION OF EXISTING CONDITIONS IS THE RESPONSIBILITY OF THE CONTRACTOR. THIS INCLUDE BUT IS NOT LIMITED TO: SOIL CONDITIONS, UTILITIES (UNDERGROUND & ABOVE GROUND), EXISTING STRUCTURES, ETC. PRIOR TO CONSTRUCTION, THE CONTRACTOR IS RESPONSIBLE FOR LOCATING ALL UNDERGROUND UTILITIES AND SHALL AVOID DAMAGE TO ALL UTILITIES DURING THE COURSE OF WORK. THE CONTRACTOR IS RESPONSIBLE FOR REPAIRING ANY & ALL DAMAGE TO UTILITIES, STRUCTURE, SITE APPURTENANCES, ETC. WHICH OCCURS AS THE RESULT OF THE CONSTRUCTION, AT NO ADDITIONAL COST TO THE OWNER.
5. THE CONTRACTOR SHOULD BE COMPLETELY FAMILIAR WITH THE CONSTRUCTION DOCUMENTS PRIOR TO COMMENCEMENT OF WORK. ANY DISCREPANCIES, POTENTIAL PROBLEMS, ETC. SHOULD BE MADE KNOWN TO THE LA OR OWNER PRIOR TO THE COMMENCEMENT OF WORK.
6. ALL REASONABLE SAFEGUARDS ARE TO BE TAKEN IN ORDER TO PROTECT EXISTING STRUCTURES, PAVEMENT, FURNISHINGS, LAWN AND LANDSCAPING. THE CONTRACTOR IS RESPONSIBLE FOR DAMAGE THAT OCCURS AS A RESULT OF CONTRACTOR NEGLIGENCE.
7. EXISTING OR PROPOSED DRAINAGE PATTERNS ARE NOT TO BE ALTERED BY THE CONTRACTOR IN A WAY THAT IS INCONSISTENT WITH THE LANDSCAPE PLANS.
8. THE CONTRACTOR IS RESPONSIBLE FOR ALL WORK AND COORDINATION OF WORK, INCLUDING WORK TO BE PERFORMED BY SUBCONTRACTORS.
9. THE CONTRACTOR MUST CONFIRM THE AVAILABILITY OF ALL SPECIFIED PLANT MATERIAL PRIOR TO THE COMMENCEMENT OF WORK. THE CONTRACTOR WILL ARRANGE FOR APPROVAL FOR PLANT MATERIALS BY THE LA VIA FIELD VISITS/ TAGGING AND OR SUBMISSION OF PLANT SAMPLES AT THE DISCRETION OF THE LA OR OWNER.
10. ALL PLANT MATERIAL MUST MEET OR EXCEED THE LATEST EDITION OF AMERICAN STANDARDS FOR NURSERY STOCK. ALL PLANT MATERIAL SIZES SPECIFIED ARE MINIMUM SIZES. ALL CONTAINER AND TREE CALIPER SIZES ARE MINIMUM, CONTAINER OF CALIPER SIZE MAY BE INCREASED IF NECESSARY TO PROVIDE OVERALL PLANT SIZE SPECIFIED.
11. ALL PLANT MATERIAL WILL BE SUBJECT TO APPROVAL AT THE JOB SITE BY THE LA OR OWNER PRIOR TO INSTALLATION. WHEN DELIVERED PLANT MATERIAL DOES NOT COMPLY WITH THE REQUIREMENTS, THE LA RESERVES THE RIGHT TO REJECT SUCH PLANTS AND REQUIRE THE CONTRACTOR TO REPLACE REJECTED WORK AND CONTINUE SPECIFIED MAINTENANCE UNTIL RE-INSPECTED AND FOUND TO BE ACCEPTABLE. THE CONTRACTOR WILL REMOVE REJECTED PLANTS & MATERIALS FROM THE PLANTING SITE WITHIN 72 HOURS AND REPLACE WITH ACCEPTABLE MATERIAL AT THE COST OF THE CONTRACTOR.
12. NO PLANT SUBSTITUTIONS WILL BE PERMITTED WITHOUT PRIOR WRITTEN APPROVAL FROM THE LA OR OWNER. ANY SUBSTITUTIONS MUST BE SUBMITTED IN WRITING ACCOMPANIED BY PHOTOS OR SAMPLES FOR THE APPROVAL BY THE LA OR OWNER PRIOR TO INSTALLATION.
13. ALL SHRUB BEDS WILL BE TILLED TO MINIMUM DEPTH OF 4-6 INCHES OR AS SPECIFIED IN THE CONSTRUCTION DOCUMENT DETAILS. PLANTING BEDS TO BE SEPARATED FROM LAWN AREAS WITH A 4 INCHES DEEP EXCAVATED TRENCH. THE TRENCH WILL HAVE A VERTICAL FACE AGAINST THE LAWN AREA AND A GENTLY TAPERED EDGE LEADING INTO THE SHRUB BED.
14. THE CONTRACTOR WILL BE RESPONSIBLE FOR REMOVING EXISTING VEGETATION AS REQUIRED AND PREPARING PLANTING AREAS PRIOR TO INSTALLATION OF PLANT MATERIALS.
15. THE CONTRACTOR IS RESPONSIBLE FOR ENSURING THAT THE SOIL IN ALL PLANTED AREAS IS OF AN APPROPRIATE TYPE AND CONSISTENCY FOR PLANTING AND AT THE CORRECT PH. THE CONTRACTOR IS RESPONSIBLE FOR FIELD VERIFYING SOIL AND SUITABILITY AND ANY NECESSARY AMENDMENTS SHOULD BE IMMEDIATELY BROUGHT TO THE ATTENTION OF THE LA OR OWNER.
16. THE CONTRACTOR WILL TEST PROJECT SOILS TO VERIFY THAT THE SOILS ON-SITE ARE ACCEPTABLE FOR PROPER GROWTH OF PLANT MATERIALS AND ADEQUATE DRAINAGE IN PLANT BEDS AND PLANTERS. THE CONTRACTOR WILL COORDINATE THE LOCATION AND PROCUREMENT OF EXISTING ON-SITE SOIL SAMPLES WITH THE LANDSCAPE ARCHITECT. REPRESENTATIVE SAMPLES WILL BE SUBMITTED TO A CERTIFIED TESTING LABORATORY FOR ANALYSIS. THE FINDINGS TOGETHER WITH THE RECOMMENDATIONS FOR AMENDING THE SOILS SHALL BE REVIEWED AND APPROVED BY THE OWNER AND LANDSCAPE ARCHITECT PRIOR TO DELIVERY AND INSTALLATION OF PLANT MATERIALS AT THE JOB.
17. ALL PLANTING BEDS WILL BE STAKED AND OR PAINTED BY THE CONTRACTOR FOR APPROVAL BY THE LA, OWNER OR OWNERS REPRESENTATIVE, PRIOR TO PLANT INSTALLATION. TREES WILL BE LOCATED WITH STAKES OR FLAGS FOR APPROVAL BY THE LA OR OWNER PRIOR TO INSTALLATION.
18. ALL PROPOSED TREES WILL BE INSTALLED EITHER ENTIRELY IN OR OUT OF PLANTING BEDS.
19. TREES SHALL BE INSTALLED ACCORDING TO BEST MANAGEMENT PRACTICES AND ANSI A300 TRANSPLANTING STANDARD.
20. THE CONTRACTOR IS RESPONSIBLE FOR DETERMINING THE AMOUNT OF SOD OR SEED REQUIRED TO INSTALL LAWN AREAS ACCORDING TO THE LANDSCAPE PLANS. PRIOR TO THE AWARDED CONTRACT THE CONTRACTOR SHALL PROVIDE A UNIT COST FOR ANY ADDITIONAL SOD OR SEEDED AREAS ADDED NOT INCLUDED IN THE BID DOCUMENTS.
21. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE STABILITY AND PLUMB CONDITION OF ALL INSTALLED PLANT MATERIALS AND REPLACING ANY DAMAGED PLANT MATERIAL WITH PLANTS OF EQUAL KIND, SIZE AND CONDITION AT NO ADDITIONAL COST TO THE OWNER. NO CHAINS OR CABLES ATTACHED TO THE TRUNK WILL BE USED WHEN INSTALLING PLANT MATERIALS. IT SHALL BE THE CONTRACTORS RESPONSIBILITY TO PREVENT PLANTS AND TREES FROM FALLING OR BEING BLOWN OVER AND TO REPLACE ALL PLANTS WHICH ARE DAMAGED DUE TO INADEQUATE GUYING OR STAKING, AT NO ADDITIONAL COST TO THE OWNER. THE CONTRACTOR WILL REMOVE ALL STAKING MATERIALS AT THE END OF THE WARRANTY PERIOD AND DISPOSE OFFSITE.
22. ALL INSTALLED PLANTS AND PLANT BEDS WILL BE MULCHED AS SPECIFIED IN THE DETAILS.
23. ALL PLANT MATERIALS WILL RECEIVE ADEQUATE WATERING BY THE CONTRACTOR AS REQUIRED UNTIL FINAL ACCEPTANCE BY OWNER. IF AN IRRIGATION SYSTEM IS PRESENT OR PROPOSED, THE CONTRACTOR WILL COORDINATE SUPPLEMENTAL WATERING OF NEWLY PLANTED MATERIAL UNTIL IRRIGATION SYSTEM IS FULLY OPERATIONAL.
24. ALL EXISTING TREES TO REMAIN AS NOTED ON THE DRAWINGS WILL BE PROTECTED BY FENCING SPECIFIED IN THE DRAWING DETAILS. VEHICLE TRAFFIC, PARKING OR MATERIALS STORAGE IS PROHIBITED WITHIN THE DRIPLINE OF ANY TREE OR WITHIN ANY TREE PROTECTION FENCE. ANY EXISTING PLANT MATERIAL OR TREES DAMAGED BY CONSTRUCTION ACTIVITY WILL BE REPLACED BY THE CONTRACTOR AT THEIR EXPENSE.
25. NO TREES WILL BE PLANTED WITHIN DESIGNATED UTILITY CORRIDORS, PUBLIC RIGHT OF WAY (WITHOUT RIGHT OF WAY UTILIZATION PERMIT) NOR ANY PLANTS LOCATED WITHIN FOUR FEET (4) OF ANY SWALE CENTERLINE IDENTIFIED ON THE DRAWINGS. ANY FIELD ADJUSTMENTS WILL NEED APPROVAL BY THE LA OR OWNER PRIOR TO INSTALLATION.
26. THE CONTRACTOR WILL BE RESPONSIBLE FOR PROVIDING EFFECTIVE TRAFFIC CONTROL AND REMOVAL OF ALL DEBRIS OFF-SITE ON A DAILY BASIS.
27. THE CONTRACTOR WILL IMMEDIATELY REPORT ANY CONTRACT DOCUMENT DISCREPANCIES OR CONFLICTS TO THE LA OR OWNER, INCLUDING BUT NOT LIMITED TO MATERIAL QUANTITIES AND LOCATIONS PRIOR TO CONTRACT AWARD AND COMMENCEMENT OF WORK. QUANTITY ESTIMATES HAVE BEEN MADE CAREFULLY BUT THE LANDSCAPE ARCHITECT ASSUMES NO LIABILITY FOR OMISSIONS OR ERRORS. HIS ESTIMATES ARE ONLY AN AID FOR CLARIFICATION OF UNITS. THE CONTRACTOR MUST COMPARE WITH HIS OWN ESTIMATES. NO EXTRA COMPENSATION WILL BE ALLOWED FOR EXTRA QUANTITIES NECESSARY TO COMPLETE THE WORK AFTER EXECUTION OF THE CONTRACT DOCUMENTS. CONTRACTOR WILL BE RESPONSIBLE FOR INSTALLATION OF PLANT MATERIAL ACCORDING TO DRAWINGS.
28. WARRANTY: ALL PLANTS WILL HAVE A REPLACEMENT WARRANTY TO REMAIN ALIVE AND HEALTHY AND IN THRIVING CONDITION FOR ONE YEAR FROM THE DATE OF ACCEPTANCE. PLANTS SHALL BE SPECIMEN QUALITY. PLANTS WILL BE HEALTHY AND VIGOROUS, WELL BRANCHED AND DENSELY FOLIATED WHEN IN LEAF AND MEET ALL MINIMUM STANDARDS OF THE LATEST EDITION OF AMERICAN STANDARD FOR NURSERY STOCK (ANSI Z60.1).
29. ALL B&B TREES WILL BE MOVED WITH STRAPPING CONNECTED TO WIRE BASKET ONLY, NEVER ATTACHED DIRECTLY TO TREE TRUNK. CONTAINER PLANTS WILL BE MOVED IN A WAY THAT IS COMPLETELY SUPPORTED BY THE CONTAINER, NOT THE TREE TRUNK. ANY DAMAGED PLANTS WILL NOT BE ACCEPTED BY LA OR OWNER AND MUST BE REPLACED.
30. WIRE BASKETS, STRAPPING AND WRAP (BURLAP) WILL BE REMOVED DURING INSTALLATION PROCESS AND DISCARDED OF PROPERLY. NO DEBRIS OF ANY KIND SHALL BE LEFT IN PLANTING PITS,
31. CONTRACTOR WILL INSPECT ALL DELIVERED PLANT MATERIAL TO ENSURE ALL MATERIAL MEETS ALL MINIMUM STANDARDS OF THE LATEST EDITION OF AMERICAN STANDARD FOR NURSERY STOCK (ANSI Z60.1), INCLUDING SHIPPING STANDARDS.
32. TREES SPECIFIED TO HAVE CLEAR TRUNK HEIGHT SHALL BE NURSERY GROWN WITH CLEAR TRUNK SPECIFIED.
33. CONTRACTOR WILL BACK-FILL ALL PLANTINGS WITH 2/3 SCREENED & CULTIVATED EXISTING SOILS AND 1/3 LOCAL NURSERY GRADE LANDSCAPE MIX. CONTRACTOR SHALL SUBMIT ALL SOIL PRODUCTS TO LA OR OWNER FOR REVIEW AND APPROVAL PRIOR TO ORDERING.
34. GRASS ALL DISTURBED AREAS (INCLUDING RIGHT-OF-WAY) UNLESS OTHERWISE INDICATED. ALL GRASSED AREAS SHALL BE CLEANED OF ALL STONES & DEBRIS, RAKED SMOOTH AND CONFORM TO PROPOSED GRADES. CONTRACTOR WILL COORDINATE GRASSING SCHEDULE & MATERIALS WITH CIVIL ENGINEER SOIL STABILIZATION SCHEDULE AND MATERIALS.
    A. SOD: AREAS TO BE SOD SHALL BE ROLLED TO PROVIDE A CONSISTENTLY EVEN SURFACE. REFER TO SODDING DETAIL FOR INSTALLATION INSTRUCTIONS.
    B. SEED: REFER TO AND COORDINATE WITH PLANT SCHEDULE (LIST) AND CIVIL ENG. SOIL STABILIZATION VEGETATION SCHEDULE (LIST) FOR SEED TYPE AND TIME FOR INSTALLATION. CONTRACTOR WILL GUARANTEE A FULL/THICK STAND OF ESTABLISHED GRASS AND WILL PROVIDE IRRIGATION TO SEEDED LAWN AREAS UNTIL ACCEPTANCE OF LAWN. THINLY ESTABLISHED AREAS SHALL BE RE-SEEDED AND IRRIGATED AS NECESSARY BY CONTRACTOR UNTIL ACCEPTED BY THE LA OR OWNER.
35. CONTRACTOR WILL INSTALL ALL WARRANTY MATERIAL PER ORIGINAL LANDSCAPE NOTES & DETAILS IN PLANS.
36. IRRIGATION SYSTEM, IF REQUIRED, IS TO BE DESIGNED BY OTHERS. CONTRACTOR TO INSTALL AUTOMATIC IRRIGATION SYSTEM TO PROVIDE 100% COVERAGE IN ACCORDANCE WITH SPRINKLER HEAD MANUFACTURER'S SPECIFICATIONS.
37. CONTRACTOR / LANDSCAPE CONTRACTOR PLEASE NOTE:
LANDSCAPE CONTRACTOR WILL PROVIDE PHOTOGRAPHS OF ALL TREES, SHRUBS & GROUNDCOVER MATERIAL WITH HEIGHT POLE FOR TREES & YARDSTICK FOR FOR SHRUBS, TO LANDSCAPE ARCHITECT FOR APPROVAL PRIOR TO DELIVERY TO JOB SITE.

LANDSCAPE DETAILS & NOTES

SHEET L2.1

INSTALLATION GENERAL NOTES

1. THE SYSTEM DESIGN ASSUMES A MINIMUM DYNAMIC PRESSURE FOR THE IRRIGATION SYSTEM OF 65 PSI, AT A DESIGN FLOW OF 10 GPM AT THE 3/4-INCH IRRIGATION POINT-OF-CONNECTION (POC). TAP, METER, BACKFLOW PREVENTER, MASTER VALVE AND FLOW METER SHALL BE SIZED AS INDICATED IN THE DRAWING LEGEND. VERIFY PRESSURE AND FLOW ON SITE PRIOR TO CONSTRUCTION.
2. READ THOROUGHLY AND BECOME FAMILIAR WITH THE SPECIFICATIONS AND INSTALLATION DETAILS FOR THIS AND RELATED WORK PRIOR TO CONSTRUCTION.
3. COORDINATE UTILITY LOCATES ("CALL BEFORE YOU DIG") OF UNDERGROUND UTILITIES PRIOR TO CONSTRUCTION.
4. DO NOT PROCEED WITH THE INSTALLATION OF THE IRRIGATION SYSTEM WHEN IT IS OBVIOUS IN THE FIELD THAT OBSTRUCTIONS OR GRADE DIFFERENCES EXIST THAT MIGHT NOT HAVE BEEN CONSIDERED IN THE ENGINEERING. IF DISCREPANCIES IN CONSTRUCTION DETAILS, LEGEND, NOTES, OR SPECIFICATIONS ARE DISCOVERED, BRING ALL SUCH OBSTRUCTIONS OR DISCREPANCIES TO THE ATTENTION OF THE OWNER'S REPRESENTATIVE.
5. THE DRAWINGS ARE DIAGRAMMATIC. THEREFORE, THE FOLLOWING SHOULD BE NOTED:
   A. ALTHOUGH IRRIGATION COMPONENTS MAY BE SHOWN OUTSIDE PLANTING AREAS FOR CLARITY, INSTALL IRRIGATION PIPE AND WIRING IN LANDSCAPED AREAS WHENEVER POSSIBLE.
   B. TREE AND SHRUB LOCATIONS AS SHOWN ON LANDSCAPE PLANS TAKE PRECEDENCE OVER IRRIGATION EQUIPMENT LOCATIONS. AVOID CONFLICTS BETWEEN THE IRRIGATION SYSTEM, PLANTING MATERIALS, AND ARCHITECTURAL FEATURES.
   C. COORDINATE THE LOCATION OF IRRIGATION EQUIPMENT WITH ALL OTHER SITE UTILITIES, BOTH EXISTING AND NEW TO BE INSTALLED AS PART OF THIS PROJECT.
   D. USE ONLY STANDARD TEES AND ELBOW FITTINGS. USE OF TEES IN THE BULLNOSE CONFIGURATION, OR USE OF CROSS TYPE FITTINGS IS NOT ALLOWED.
6. PROVIDE THE FOLLOWING COMPONENTS TO THE OWNER PRIOR TO THE COMPLETION OF THE PROJECT:
   A. TWO (2) OPERATING KEYS FOR EACH TYPE OF MANUALLY OPERATED VALVES.
   B. TWO (2) OF EACH SERVICING WRENCH OR TOOL NEEDED FOR COMPLETE ACCESS, ADJUSTMENT, AND REPAIR OF ALL ROTARY SPRINKLERS.
7. SELECT NOZZLES FOR SPRAY AND ROTARY SPRINKLERS WITH ARCS WHICH PROVIDE COMPLETE AND ADEQUATE COVERAGE WITH MINIMUM OVERSPRAY FOR THE SITE CONDITIONS. CAREFULLY ADJUST THE RADIUS OF THROW AND ARC OF COVERAGE OF EACH ROTARY SPRINKLER TO PROVIDE THE BEST PERFORMANCE.
8. THE IRRIGATION CONTRACTOR IS RESPONSIBLE FOR THE INSTALLATION OF IRRIGATION SLEEVING. SLEEVES ARE REQUIRED FOR BOTH PIPING AND ELECTRICAL WIRING AT EACH HARDSCAPE CROSSING. COORDINATE INSTALLATION OF SLEEVING WITH OTHER TRADES. ANY PIPE OR WIRE WHICH PASSES BENEATH EXISTING HARDSCAPE WHERE SLEEVING WAS NOT INSTALLED WILL REQUIRE HORIZONTAL BORING BY THE IRRIGATION CONTRACTOR. PIPE SLEEVES SHALL BE SIZED TWICE THE NOMINAL SIZE OF THE PIPE PASSING THROUGH.
9. INSTALL ALL ELECTRICAL POWER TO THE IRRIGATION CONTROL SYSTEM IN ACCORDANCE WITH THE NATIONAL ELECTRIC CODE AND ALL APPLICABLE LOCAL ELECTRIC UTILITY CODES.
10. THE FOLLOWING SHOULD BE NOTED REGARDING PIPE SIZING: IF A SECTION OF UNSIZED PIPE IS LOCATED BETWEEN TWO IDENTICALLY SIZED SECTIONS, THE UNSIZED PIPE IS THE SAME NOMINAL SIZE AS THE TWO SIZED SECTIONS. THE UNSIZED PIPE SHOULD NOT BE CONFUSED WITH THE DEFAULT PIPE SIZE NOTED IN THE LEGEND.
11. VALVE CONTROL WIRE TO BE #14AWG SINGLE STRAND DIRECT BURIAL WIRE. PROVIDE AN INDIVIDUAL CONTROL WIRE FROM CONTROLLER TO EACH VALVE AND A COMMON WIRE TO ALL VALVES. INSTALL TWO (2) #14 AWG CONTROL WIRES ON STANDARD WIRE SYSTEMS, FOR USE AS SPARES. INSTALL SPARE WIRES FROM CONTROLLER LOCATION TO EACH DEAD-END OF MAINLINE. COIL 3 FEET OF WIRE IN VALVE BOX.

IRRIGATION SLEEVE LEGEND

* ALL SLEEVES SHALL BE CLASS 200 PVC AND SIZED TWICE THE NOMINAL SIZE OF THE PIPE PASSING THROUGH, ALL CONTROL WIRE SLEEVES SHALL BE 2-INCH

MAINLINE: 2.5-INCH SLEEVE
LATERAL LINE: 2-INCH SLEEVE
WIRE SLEEVE: 2-INCH SLEEVE

CONSTRUCTION NOTES

1. THE IRRIGATION SYSTEM POINT-OF-CONNECTION (POC) SHALL BE DOWNSTREAM OF THE IRRIGATION WATER TAP AND METER INSTALLED BY OTHERS AT THE APPROXIMATE LOCATION SHOWN. INSTALL BACKFLOW PREVENTION UNIT AND MASTER VALVE ASSEMBLY AS INDICATED. VERIFY EXACT LOCATION OF POC WITH OWNER'S REPRESENTATIVE.
2. WALL MOUNT THE IRRIGATION CONTROLLER AT THE APPROXIMATE LOCATION SHOWN. COORDINATE ELECTRICAL POWER TO THE CONTROLLER WITH THE OWNER'S REPRESENTATIVE. CARE SHOULD BE TAKEN TO INSTALL THE IRRIGATION CONTROLLER IN A LOCATION THAT IS ACCESSIBLE FOR MAINTENANCE, AND SCREENED FROM VIEW EITHER BEHIND ENTRY WALLS, NEXT TO BUILDINGS, OR BEHIND PLANT MATERIAL. FINAL LOCATION TO BE APPROVED BY OWNER'S REPRESENTATIVE.
3. IRRIGATION SHOWN OUT OF LANDSCAPED AREA FOR CLARITY ONLY. INSTALL IRRIGATION COMPONENTS WITHIN LANDSCAPED AREA.
4. MAINLINE AND LATERAL LINES ARE SHOWN IN SAME SLEEVE FOR CLARITY ONLY. MAINLINE, CONTROL WIRES, AND LATERAL PIPE SHALL BE INSTALLED IN SEPARATE SLEEVES.

ESTIMATED ANNUAL WATER USE

THE IRRIGATION SYSTEM AS SHOWN ON THIS PLAN HAS AN ESTIMATED ANNUAL WATER USE OF 191,198 GALLONS. TO VERIFY EFFICIENT IRRIGATION SYSTEM OPERATION, THE OWNER SHALL COMPARE THIS ESTIMATED IRRIGATION WATER USE WITH ACTUAL WATER USE, AS RECORDED ON SITE, AFTER ALL PLANT MATERIAL HAS BEEN ESTABLISHED.

THE ESTIMATED ANNUAL IRRIGATION WATER USE OF THIS SYSTEM IS BASED ON 30-YEARS AVERAGE EVAPOTRANSPIRATION RATES (ET) FOR THE LOCAL AREA AND TYPICAL NEW IRRIGATION SYSTEM EQUIPMENT EFFICIENCIES. MAJOR DEVIATIONS FROM THIS ESTIMATE USE SHOULD BE BROUGHT TO THE ATTENTION OF THE OWNER AND CURRENT IRRIGATION MAINTENANCE COMPANY AT THE TIME OF THE DEVIATION.

TO VERIFY EFFICIENT IRRIGATION SYSTEM OPERATION AND WATER USE, AN IRRIGATION SYSTEM EVALUATION AND AUDIT SHOULD BE PERFORMED.

IRRIGATION SYSTEM DESIGN PARAMETERS

THE FACTORS IN THE TABLE BELOW WERE UTILIZED IN THE IRRIGATION SYSTEM DESIGN TO DETERMINE TAP CAPACITY REQUIREMENTS AND MAINLINE SIZE AND ARE MADE AVAILABLE TO GUIDE DECISIONS ON THE SYSTEM OPERATION BY THE CONTRACTOR. MULTIPLE ZONES WILL BE REQUIRED TO OPERATE AT THE SAME TIME UP TO A COMBINED TOTAL EQUAL TO THE MINIMUM FLOW REQUIRED AT THE POC WHEN ZONE SIZES ARE LOWER THAN THE MINIMUM FLOW REQUIRED AT THE POC.

MINIMUM PRESSURE REQUIREMENT AT POC	65 PSI
MINIMUM FLOW REQUIRED AT POC	10 GPM
MAXIMUM FLOW AT FURTHEST POINTS OF THE SYSTEM	10 GPM
TOTAL IRRIGATION DAYS PER WEEK	2 DAYS
WATER WINDOW PER DAY	14 HRS

IRRIGATION LEGEND

- SLEEVES: **CLASS 200 PVC**
- POINT-OF-CONNECTION ASSEMBLY
- MAINLINE PIPE: **CLASS 200 PVC 1 1/4-INCH SIZE UNLESS OTHERWISE INDICATED**
- LATERAL PIPE TO SPRINKLERS: **CLASS 200 PVC 1-INCH SIZE UNLESS OTHERWISE INDICATED**

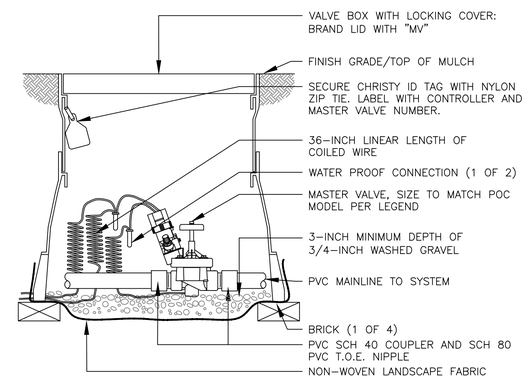
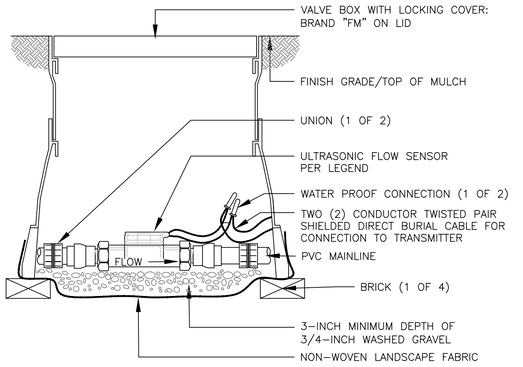
IRRIGATION PLAN & NOTES

SHEET IR1.1



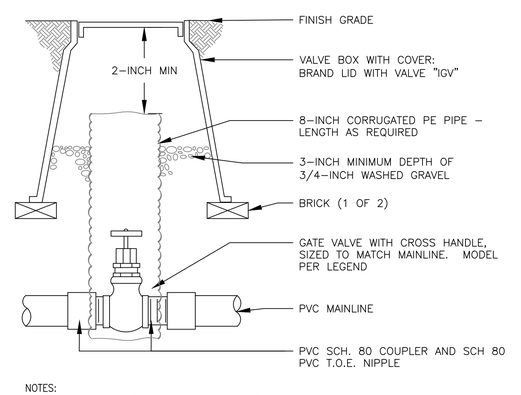
NOTES:
1. INSTALL ALL WIRING PER LOCAL ELECTRICAL CODES.
2. INSTALL GROUND ROD WITHIN IRRIGATED TURF AREA. IF IRRIGATED TURF AREA IS NOT IN CLOSE PROXIMITY TO CONTROLLER, INSTALL ONE (1) DRIP EMITTER FROM NEAREST DRIP VALVE IN VALVE BOX HOUSING GROUNDING ROD.

1 WALL MOUNT CONTROLLER ASSEMBLY

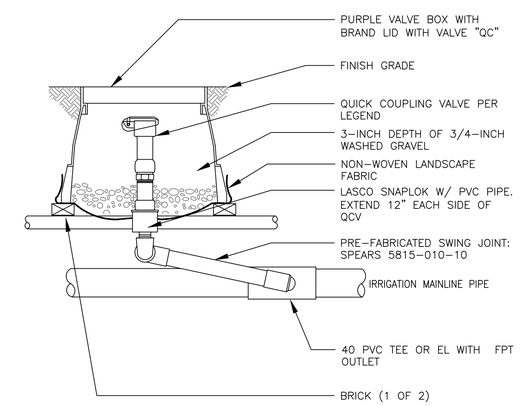


NOTES:
1. INSTALL GROUNDING ROD OR PLATE BASED ON SITE CONDITIONS, DO NOT INSTALL BOTH.
2. DO NOT INSTALL ANY OTHER WIRE OR CABLES INSIDE THE SPHERE OF INFLUENCE.
3. INSTALL GROUNDING PLATE AT A MINIMUM OF 30-INCHES BELOW GRADE OR BELOW FROST-LINE, WHICHEVER IS DEEPER.
4. TYPICAL INSTALLATION SHOWN FOR AN IRRIGATION CONTROLLER CAPACITY OF 64 STATIONS OR LESS, INSTALL AN ADDITIONAL GROUNDING ROD/PLATE PER 64 STATIONS.

2 TYPICAL IRRIGATION CONTROLLER GROUNDING ROD OR PLATE INSTALLATION

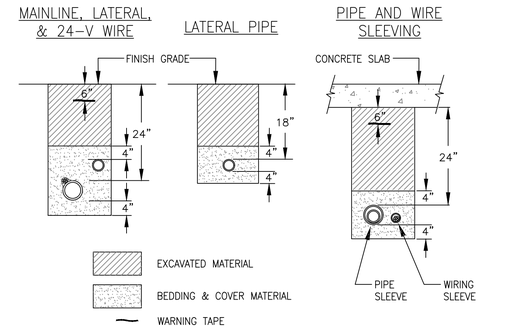


3 MASTER VALVE ASSEMBLY



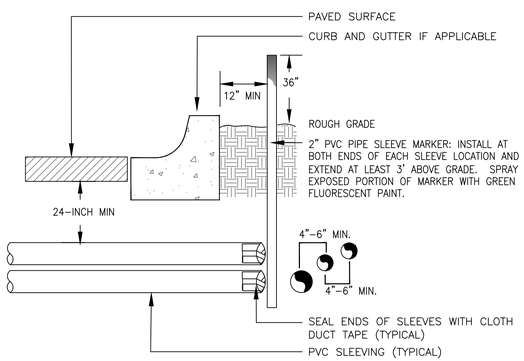
NOTES:
1. TYPICAL ULTRASONIC FLOW SENSORS DO NOT REQUIRE THE DISTANCES (5X AFTER / 10X BEFORE) OF TYPICAL FLOW SENSORS. VERIFY SPECIFIED FLOW SENSOR DISTANCE REQUIREMENTS, PRIOR TO INSTALLATION.

4 ULTRASONIC FLOW SENSOR ASSEMBLY

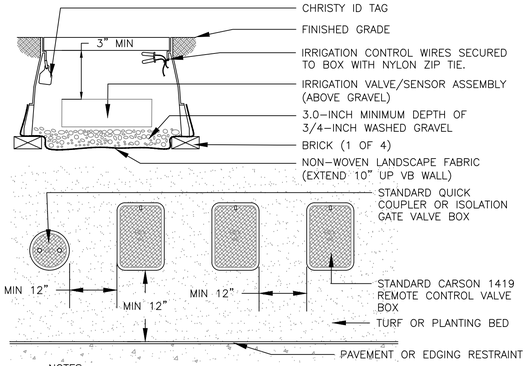


NOTES:
1. NOMINAL SIZE OF GATE VALVE TO MATCH NOMINAL MAINLINE SIZE.

5 ISOLATION GATE VALVE ASSEMBLY 1.5-INCH MAINLINE AND SMALLER

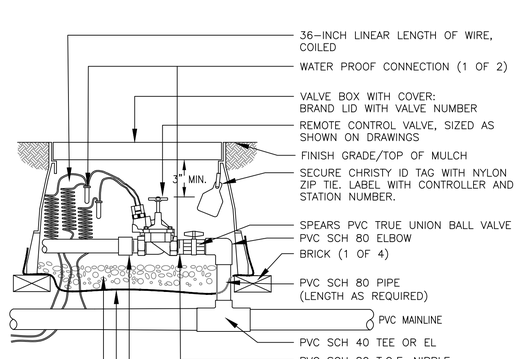


6 QUICK COUPLING VALVE ASSEMBLY



NOTES:
1. SLEEVE ALL PIPE AND WIRE SEPARATELY.
2. ALL PIPE TO BE INSTALLED PER MANUFACTURER'S SPECIFICATIONS."SNAKE" UNSLEEVED PLASTIC PIPE IN TRENCH. PROVIDE A MINIMUM OF 2" CLEARANCE TO SIDE OF TRENCH AND BETWEEN PIPES.
3. ALL 120-V WIRING SHALL BE INSTALLED IN ACCORDANCE WITH LOCAL CODE REQUIREMENTS. TAPE AND BUNDLE 24-V WIRE EVERY 10' AND PROVIDE LOOSE 20" LOOP AT ALL CHANGES OF DIRECTION OVER 30 DEGREES.

7 TYPICAL TRENCHING DETAIL



NOTE:
1) ALL SLEEVING TO BE CLASS 200 BE PVC, SIZED AS NOTED.
2) INSTALL SLEEVES IN SIDE-BY-SIDE CONFIGURATION WHERE MULTIPLE SLEEVES ARE TO BE INSTALLED. SPACE SLEEVES 4" TO 6" APART. DO NOT STACK SLEEVES VERTICALLY.

8 TYPICAL SLEEVING DETAIL

NOTES:
1. INSTALL ONLY ONE RCV TO VALVE BOX. LOCATE AT LEAST 12-INCHES FROM AND ALIGN WITH NEARBY WALLS OR EDGES OF PAVED AREAS. GROUP RCV ASSEMBLIES TOGETHER WHERE PRACTICAL.
4. GROUP RCV ASSEMBLIES TOGETHER WHERE PRACTICAL, BUT AVOID GROUPING MORE THAN THREE (3) STANDARD VALVE BOXES TOGETHER IN A SERIES.
5. ARRANGE GROUPED VALVE BOXES IN RECTANGULAR PATTERNS.

9 TYPICAL VALVE BOX INSTALLATION

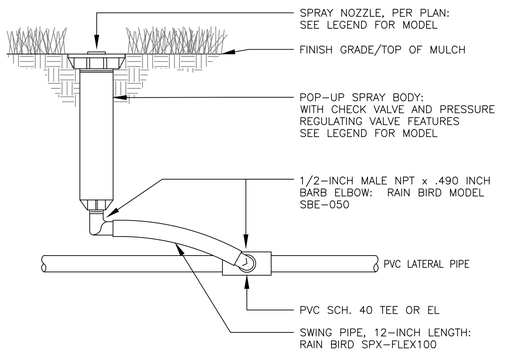
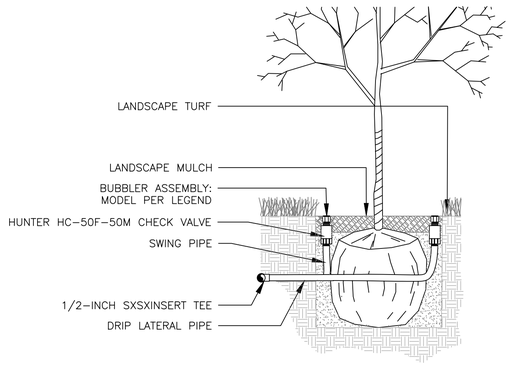
FORT COLLINS, COLORADO 80524
Telephone: 970.282.1800
Web: www.hinesinc.com



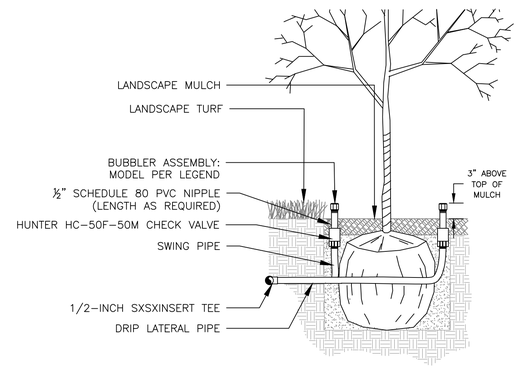
NOTE:
1. USE BARBED INSERT FITTINGS ON DRIP LATERAL PIPE WITH STAINLESS STEEL HOSE CLAMPS. PLACE CLAMPS ON DRIP TUBING DIRECTLY OVER BARBED AREA OF FITTING. PINCH CLAMPS ARE NOT ACCEPTABLE.

11 REMOTE CONTROL DRIP VALVE ASSEMBLY

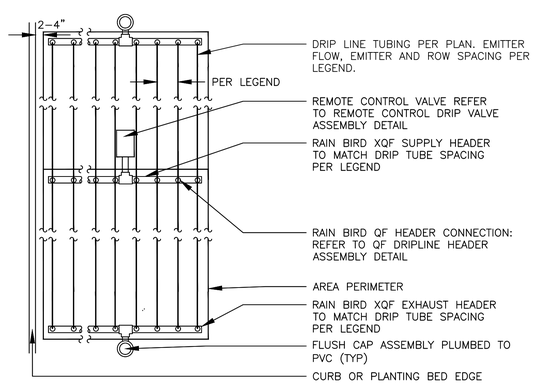


NOTES:
1. INSTALL PLASTIC RISERS FOR ROTORS IN NATIVE AREAS.

12 6-INCH GEAR DRIVEN ROTOR ASSEMBLY W/SWING JOINT

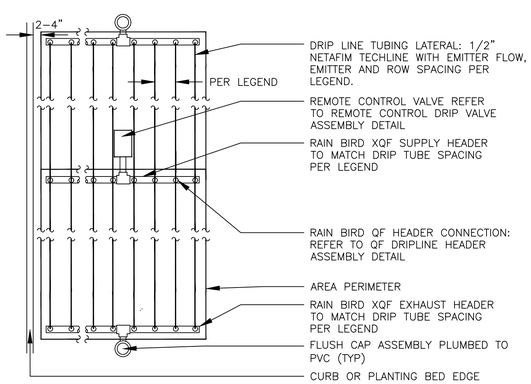


13 6-INCH POP UP SPRAY SPRINKLER ASSEMBLY



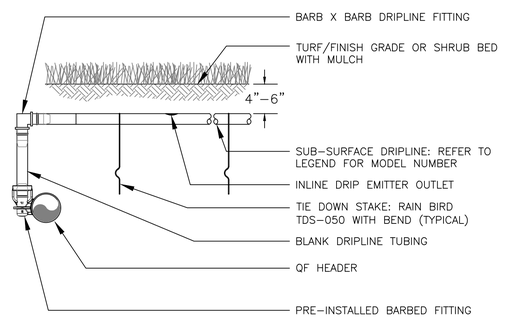
NOTES:
1. REFER TO LANDSCAPE PLANS FOR TREE GRATE INSTALLATION AND DETAILS.

14 BUBBLER ASSEMBLY FOR TREES TURF



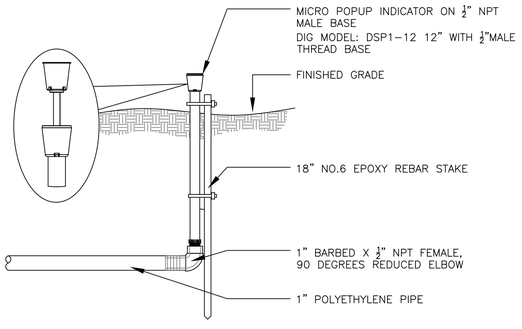
NOTES:
1. REFER TO LANDSCAPE PLANS FOR TREE GRATE INSTALLATION AND DETAILS.

15 BUBBLER ASSEMBLY FOR TREES IN SHRUB BEDS



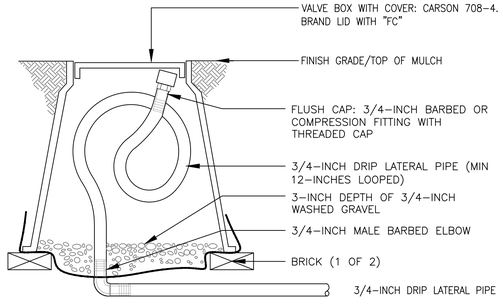
NOTES:
1. INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS AND RECOMMENDATIONS FOR EQUIPMENT APPLICATION AND INSTALLATION.
2. MAXIMUM FLOW FOR 1-INCH REMOTE CONTROL VALVE ASSEMBLY IS 20 GPM.
3. INSTALL AT A DEPTH OF 4"-6" IN UNIFORM SOIL.

16 SUBSURFACE DRIP ASSEMBLY IN SHRUB BEDS



NOTES:
1. INSTALL SYSTEM PER MANUFACTURER'S INSTRUCTIONS AND RECOMMENDATIONS FOR EQUIPMENT APPLICATION AND INSTALLATION.
2. MAXIMUM FLOW FOR 1-INCH REMOTE CONTROL VALVE ASSEMBLY IS 20 GPM.
3. INSTALL AT A DEPTH OF 4"-6" IN UNIFORM SOIL.

17 SUBSURFACE DRIP ASSEMBLY IN TURF AREAS



NOTES:
1. PLACE TIE-DOWN STAKES EVERY THREE FEED IN SAND, FOUR FEET IN LOAM, AND FIVE FEET IN CLAY.
2. AT FITTINGS WHERE THERE IS A CHANGE OF DIRECTION SUCH AS TEES OR ELBOWS, USE TIE-DOWN STAKES ON EACH LEG OF THE CHANGE OF DIRECTION.
3. INSERTION PLOW AND TRENCHED INSTALLATIONS DO NOT REQUIRE TIE-DOWN STAKES.

18 QF DRIPLINE HEADER ASSEMBLY

19 DRIP SYSTEM OPERATION INDICATOR

NOTE:
1. LOOP IRRIGATION DRIP TUBING INSIDE VALVE BOX FOR EXTENSION OUTSIDE OF BOX DURING BLOWOUT.

20 DRIP FLUSH CAP ASSEMBLY

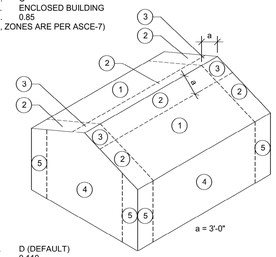
AB.3

DESIGN CRITERIA:

BUILDING CODE - 8TH EDITION FLORIDA BUILDING CODE 2023

1. RISK CATEGORY & IMPORTANCE FACTORS:
   - A. RISK CATEGORY..... II
   - B. WIND FACTOR..... 1.0
   - C. SNOW FACTOR..... 1.0
   - D. SEISMIC FACTOR..... 1.0

2. DESIGN DEAD LOADS:
   - A. ROOF..... 20 PSF



3. DESIGN LIVE LOADS*:
   - A. FLOOR: GRATING (VEHICULAR)..... 250 PSF
   - B. ROOF..... 20 PSF

   * LIVE LOADS ARE REDUCIBLE IN ACCORDANCE WITH THE BUILDING CODE.

4. WIND LOADS:
   - A. ULTIMATE WIND SPEED..... 123 MPH
   - B. DIRECTIONALITY FACTOR (Kd)..... 0.85
   - C. EXPOSURE CATEGORY..... C
   - D. ENCLOSURE CLASSIFICATION..... ENCLOSED BUILDING
   - E. GUST EFFECT FACTOR (G)..... 0.85
   - F. COMPONENT AND CLADDING LOADS (100 SQ. FT., ZONES ARE PER ASCE-7)

ROOFS	10 FT²	100 FT²
NEGATIVE ZONE 1	-56.4 PSF	-27.9 PSF
NEGATIVE ZONE 2	-62.1 PSF	-40.2 PSF
NEGATIVE ZONE 3	-76.4 PSF	-43.5 PSF
POSITIVE ALL ZONES	30.8 PSF	22.0 PSF
OVERHANG ZONE 1	-82.6 PSF	-49.1 PSF
OVERHANG ZONE 2	-88.3 PSF	-61.4 PSF
OVERHANG ZONE 3	-111.1 PSF	-68.2 PSF
WALLS		
NEGATIVE ZONE 4	-36.5 PSF	-31.4 PSF
NEGATIVE ZONE 5	-45.0 PSF	-35.0 PSF
POSITIVE ZONES 4 & 5	33.6 PSF	28.6 PSF

REFERENCE ASCE 7 FOR EFFECTIVE WIND AREAS NOT LISTED. OTHERWISE, USE THE SMALLEST APPLICABLE AREA.

5. EARTHQUAKE LOADS:
   - A. SITE CLASS..... D (DEFAULT)
   - B. Ss =..... 0.110
   - C. S1 =..... 0.055
   - D. SDS =..... 0.117
   - E. SD1 =..... 0.088
   - F. SEISMIC DESIGN CATEGORY..... B
   - G. BASIC SEISMIC FORCE RESISTING SYSTEM =..... STEEL ORDINARY MOMENT FRAMES
   - H. RESPONSE MODIFICATION COEFFICIENT, R =..... 3.5
   - I. OVER-STRENGTH FACTOR (Oo)..... 3.0
   - J. DEFLECTION AMPLIFICATION FACTOR (Cd)..... 3.0
   - K. SEISMIC RESPONSE COEFFICIENT (Cs) =..... 0.034
   - L. LONG PERIOD TRANSITION PERIOD (TL)..... 8
   - M. ANALYSIS PROCEDURE..... EQUIVALENT LATERAL FORCE
   - N. DESIGN BASE SHEAR =..... 9K

6. SNOW LOADS:
   - A. GROUND SNOW LOAD..... 4.0 PSF
   - B. UNIFORM ROOF SNOW LOAD (Ps)..... 3.4 PSF
   - C. THERMAL FACTOR (Ct)..... 1.2
   - D. SNOW EXPOSURE FACTOR (Ce)..... 1.0
   - E. RAIN ON SNOW SURCHARGE..... 0 PSF
   - F. LEEWARD SNOW LOAD (UNBALANCED)..... 6.9 PSF

SPECIAL INSPECTIONS:

1. SPECIAL INSPECTION AND A FINAL REPORT IN ACCORDANCE WITH IBC SECTION 1704.2.4 SHALL BE SUBMITTED TO THE BUILDING OFFICIAL PRIOR TO THE TIME THAT PHASE OF THE WORK IS APPROVED FOR OCCUPANCY.
2. THE OWNER WILL EMPLOY THE SERVICES OF ONE OR MORE SPECIAL INSPECTORS TO PROVIDE SPECIAL INSPECTIONS DURING CONSTRUCTION ACCORDING TO THE SCHEDULE OF SPECIAL INSPECTIONS.
3. THE SPECIAL INSPECTOR SHALL BE A QUALIFIED PERSON WHO SHALL DEMONSTRATE COMPETENCE, TO THE SATISFACTION OF THE BUILDING OFFICIAL, FOR INSPECTION OF THE PARTICULAR TYPE OF CONSTRUCTION OR OPERATION REQUIRING SPECIAL INSPECTION.
4. DUTIES AND RESPONSIBILITIES OF THE SPECIAL INSPECTOR:
   - A. THE SPECIAL INSPECTOR SHALL OBSERVE THE WORK ASSIGNED FOR CONFORMANCE WITH THE APPROVED DESIGN DRAWINGS AND SPECIFICATIONS. THE INSPECTOR MAY NOT ALTER, MODIFY, ENLARGE, OR WAIVE ANY OF THE REQUIREMENTS OF THE DOCUMENTS.
   - B. THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL, THE PROFESSIONAL OF RECORD, AND THE CONTRACTOR. ALL DISCREPANCIES SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE CONTRACTOR FOR CORRECTION, THEN, IF UNCORRECTED, SUBMIT A COMPLETE LIST OF ALL OUTSTANDING DISCREPANCIES ON A WEEKLY BASIS TO THE OWNER, THE BUILDING OFFICIAL, AND THE PROFESSIONAL OF RECORD UNTIL ALL CORRECTIONS HAVE BEEN COMPLETED.
   - C. THE SPECIAL INSPECTOR SHALL SUBMIT A FINAL SIGNED REPORT STATING THE WORK REQUIRING SPECIAL INSPECTION WAS, TO THE BEST OF THE INSPECTOR'S KNOWLEDGE, IN CONFORMANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THE CODE.
5. DUTIES AND RESPONSIBILITIES OF THE CONTRACTOR:
   - A. NOTIFY THE SPECIAL INSPECTOR THAT SPECIAL INSPECTIONS ARE NEEDED.
   - B. COORDINATE THE SCHEDULING AND TIMELY NOTIFICATION OF THE SPECIFIC INDIVIDUALS NEEDED FOR THE SPECIAL INSPECTION.
   - C. PROVIDE DIRECT ACCESS TO THE APPROVED PLANS AND SPECIFICATIONS FOR THE PROJECT
   - D. SUBMIT FABRICATORS CERTIFICATES OF COMPLIANCE, WELDER'S CERTIFICATES, AND OTHER REQUIRED DOCUMENTATION FOR REVIEW BY THE SPECIAL INSPECTOR.
   - E. PROVIDE SAFE ACCESS TO THE WORK TO BE INSPECTED AND DELIVER SAMPLES FOR TESTING WHEN NEEDED.
6. WHERE SPECIAL INSPECTION REQUIREMENTS DUPLICATE THE REQUIREMENTS OF SPECIFIED QUALITY ASSURANCE TESTING, DUPLICATE INSPECTIONS SHALL NOT BE REQUIRED.

QUALITY ASSURANCE:

1. THE CONTRACTOR/OWNER SHALL EMPLOY AND PAY FOR THE SERVICES OF AN INDEPENDENT TESTING AGENCY ACCEPTABLE TO THE OWNER TO PROVIDE QUALITY ASSURANCE TESTING AND INSPECTIONS. THE TESTING AGENCY SHALL BE LICENSED BY THE PROJECT STATE AND ALL TESTING AND INSPECTIONS SHALL BE PERFORMED UNDER THE SUPERVISION OF AN ENGINEER REGISTERED IN THE PROJECT STATE.
2. FAILURE OF QUALITY ASSURANCE TESTING AND INSPECTIONS TO DETECT ANY DEFECTIVE WORK OR MATERIAL SHALL NOT IN ANY WAY PREVENT LATER REJECTION WHEN SUCH DEFECT IS NOTED, NOR SHALL IT OBLIGATE THE OWNER'S REPRESENTATIVE FOR FINAL ACCEPTANCE.
3. THE TESTING AGENCY AND ITS REPRESENTATIVE ARE NOT AUTHORIZED TO REVOKE, ALTER, RELAX, ENLARGE, OR RELEASE ANY PORTION OF THE WORK, PERFORM ANY DUTIES OF THE CONTRACTOR OR BE A PARTY TO SCHEDULING OF WORK.
4. RECORDS OF INSPECTIONS SHALL BE KEPT AVAILABLE TO THE BUILDING OFFICIAL DURING PROGRESS OF THE WORK AND FOR TWO YEARS AFTER COMPLETION OF THE PROJECT. RECORDS SHALL BE PRESERVED BY THE INDEPENDENT TESTING AGENCY.
5. A MINIMUM OF TWENTY-FIVE PERCENT OF ALL SHOP AND FIELD COMPLETE JOINT PENETRATION GROOVE WELDS SHALL BE INSPECTED AT RANDOM. ALL FIELD COMPLETE OR PARTIAL PENETRATION GROOVE WELDS ALONG THE COLUMN BASE PLATES SHALL BE TESTED IN COMPLIANCE WITH THE GOVERNING CITY, MUNICIPAL, OR FEDERAL BODY, IF THE TESTING REQUIREMENT, BOTH IN TERMS OF QUALITY AND QUANTITY, IS DIFFERENT THAN STATED ABOVE THE MORE STRINGENT OF THE TWO REQUIREMENTS SHALL BE FOLLOWED. ANY DEVIATION FROM THIS GUIDELINE IS SUBJECT TO THE ENGINEER OF RECORD'S APPROVAL.

SUBMITTALS:

1. CONTRACTOR SHALL SUBMIT A SCHEDULE OF SHOP DRAWING SUBMITTAL DATES AT LEAST 30 DAYS PRIOR TO FIRST SUBMITTAL. FAILURE TO SUBMIT DRAWINGS ON DESIGNATED DATES MAY IMPACT REVIEW SCHEDULE.
2. ANY MATERIALS OR PRODUCTS SUBMITTED FOR APPROVAL THAT ARE DIFFERENT FROM THE MATERIAL OR PRODUCTS SPECIFIED IN THE STRUCTURAL CONTRACT DOCUMENTS WILL BE CONSIDERED ONLY IF THE FOLLOWING CRITERIA ARE SATISFIED.
   - A. A COST SAVINGS TO THE OWNER IS DOCUMENTED AND SUBMITTED WITH THE REQUEST.
   - B. THE MATERIAL OR PRODUCT HAS BEEN APPROVED BY THE ICC-ES, AND THE ICC-ES REPORT IS SUBMITTED WITH THE REQUEST. SUBMITTALS NOT SATISFYING THE ABOVE CRITERIA WILL NOT BE CONSIDERED.
3. REVIEW OF SUBMITTALS AND/OR SHOP DRAWINGS BY THE STRUCTURAL ENGINEER OF RECORD DOES NOT RELIEVE THE CONTRACTOR OF THE SOLE RESPONSIBILITY TO REVIEW AND CHECK SHOP DRAWINGS BEFORE SUBMITTAL TO THE STRUCTURAL ENGINEER OF RECORD. THE CONTRACTOR REMAINS SOLELY RESPONSIBLE FOR ERRORS AND OMISSIONS ASSOCIATED WITH THE PREPARATION OF SHOP DRAWINGS AS THEY PERTAIN TO MEMBER SIZES, DETAILS, AND DIMENSIONS SPECIFIED IN METHODS, TECHNIQUES, SEQUENCES, AND PROCEDURES OF CONSTRUCTION. SEE SPECIFIC PROVISIONS IN THE CONTRACT DOCUMENT DEALING WITH THE APPROPRIATE DESIGN RESPONSIBILITIES OF CONTRACTORS, SUBCONTRACTORS, AND CONTRACT SUPPLIERS.
4. THE USE OF REPRODUCTIONS OF THESE CONTRACT DOCUMENTS BY ANY CONTRACTOR, SUBCONTRACTOR, ERECTOR, FABRICATOR, OR MATERIAL SUPPLIER IN LIEU OF PREPARATION OF SHOP DRAWINGS SIGNIFIES HIS ACCEPTANCE OF ALL INFORMATION SHOWN HEREIN AS CORRECT AND OBLIGATES HIM TO ANY JOB EXPENSE, REAL OR IMPLIED, ARISING FROM ANY ERRORS THAT MAY OCCUR HEREIN.

DEFERRED SUBMITTALS:

1. DEFERRED SUBMITTALS ARE DEFINED AS THE FOLLOWING PORTIONS OF THE DESIGN THAT ARE NOT SUBMITTED AT THE TIME OF APPLICATION AND THAT ARE TO BE SUBMITTED TO THE BUILDING OFFICIAL WITHIN A SPECIFIED PERIOD:
   - A. PRE-MANUFACTURED WOOD TRUSSES
2. THE DEFERRED SUBMITTALS SHALL BE APPROVED BY THE PROJECT ARCHITECT AND/OR ENGINEER OF RECORD. THE DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE DESIGN AND SUBMITTAL DOCUMENTS HAVE BEEN AUTHORIZED BY THE BUILDING OFFICIAL.

MISCELLANEOUS:

1. STRUCTURAL DRAWINGS SHALL BE COORDINATED WITH ARCHITECTURAL, EQUIPMENT, AND MECHANICAL DRAWINGS. CONTRACTOR IS RESPONSIBLE FOR COORDINATING PERTINENT ASPECTS OF ALL DISCIPLINES INTO THEIR SHOP DRAWINGS AND WORK, AND SHALL NOTIFY THE ARCHITECT OF ANY DISCREPANCIES OR OMISSIONS.
2. NO OPENINGS OR MODIFICATIONS SHALL BE MADE IN OR TO ANY STRUCTURAL MEMBER WITHOUT THE WRITTEN APPROVAL OF THE ARCHITECT.
3. NO CHANGE IN SIZE OR DIMENSION OF STRUCTURAL MEMBERS SHALL BE MADE WITHOUT THE WRITTEN APPROVAL OF THE ARCHITECT.
4. OPENINGS 1'-4" OR LESS ON A SIDE ARE GENERALLY NOT SHOWN ON THE STRUCTURAL DRAWINGS. REFER TO ARCHITECTURAL AND MECHANICAL DRAWINGS FOR SUCH OPENINGS.
5. THE CONTRACTOR IS RESPONSIBLE FOR LIMITING THE AMOUNT OF CONSTRUCTION LOAD IMPOSED UPON STRUCTURAL FRAMING. CONSTRUCTION LOADS SHALL NOT EXCEED THE DESIGN CAPACITY OF THE FRAMING AT THE TIME THE LOADS ARE IMPOSED.
6. THE STRUCTURE IS DESIGNED TO FUNCTION AS A UNIT UPON COMPLETION. THE CONTRACTOR IS RESPONSIBLE FOR FURNISHING ALL THE TEMPORARY BRACING AND/OR SUPPORT THAT MAY BE REQUIRED AS THE RESULT OF THE CONTRACTOR'S CONSTRUCTION METHODS AND/OR SEQUENCES.
7. DO NOT SCALE THESE DRAWINGS: USE DIMENSIONS. FOR DIMENSIONS NOT SHOWN ON THE STRUCTURAL CONTRACT DOCUMENTS, SEE ARCHITECTURAL DRAWINGS.
8. CONTRACTOR'S CONSTRUCTION AND/OR ERECTION SEQUENCES SHALL RECOGNIZE AND CONSIDER THE EFFECTS OF THERMAL MOVEMENTS OF STRUCTURAL ELEMENTS DURING THE CONSTRUCTION PERIOD.
9. THE CONTRACTOR SHALL INFORM THE PROFESSIONAL OF RECORD, IN WRITING, OF ANY DEVIATION FROM THE CONTRACT DOCUMENTS. THE CONTRACTOR SHALL NOT BE RELIEVED OF THE RESPONSIBILITY OF SUCH DEVIATION BY THE PROFESSIONAL OF RECORD, REVIEW OF SHOP DRAWINGS, PRODUCT DATA, ETC. UNLESS THE CONTRACTOR HAS SPECIFICALLY INFORMED THE PROFESSIONAL OF RECORD OF SUCH DEVIATION AT THE TIME OF SUBMISSION AND THE ARCHITECT HAS GIVEN THE WRITTEN APPROVAL TO THE SPECIFIC DEVIATION.
10. WHERE A SECTION/DETAIL IS CUT ON THE PLAN, IT IS ASSUMED/UNDERSTOOD TO BE REPRESENTATIVE OF ALL LIKE OR SIMILAR CONDITIONS. THE CONTRACTOR IS RESPONSIBLE FOR COORDINATING SUCH REQUIREMENTS INTO THEIR SHOP DRAWINGS AND WORK.
11. AT ALL TIMES THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR THE CONDITIONS OF THE JOB SITE, INCLUDING SAFETY OF PERSONS AND PROPERTY. THE ARCHITECT'S OR ENGINEER'S PRESENCE AT THE JOB SITE OR REVIEW OF WORK DOES NOT IMPLY CONFIRMATION OF THE ADEQUACY OF THE CONTRACTOR'S MEANS OR METHODS OF CONSTRUCTION. THE CONTRACTOR IS RESPONSIBLE FOR COMPLIANCE WITH OSHA REGULATIONS.
12. CONSULT ARCHITECTURAL, MECHANICAL, AND ELECTRICAL DRAWINGS FOR LOCATION, SIZE AND EXTENT OF CHASES, INSERTS, RECESSES, RIDGES, FINISHES, DEPRESSIONS, ETC., NOT SHOWN ON THE STRUCTURAL DRAWINGS.
13. THE GENERAL CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND SITE CONDITIONS BEFORE STARTING WORK. THE ARCHITECT SHALL BE NOTIFIED OF ANY DISCREPANCIES.
14. THE CONTRACTOR SHALL VERIFY ALL FLOOR AND ROOF MOUNTED MECHANICAL EQUIPMENT WEIGHTS AS WELL AS FLOOR AND/OR ROOF OPENING SIZES AND LOCATIONS WITH ARCHITECTURAL AND MECHANICAL DRAWINGS.
15. THE CONTRACTOR SHALL NOTIFY, IN WRITING, THE STRUCTURAL ENGINEER OF RECORD OF CONDITIONS ENCOUNTERED IN THE FIELD WHICH ARE CONTRADICTORY TO THOSE SHOWN ON THE STRUCTURAL CONTRACT DOCUMENTS.
16. STRUCTURAL CONTRACT DOCUMENTS SHALL NOT INCLUDE SHOP DRAWINGS, VENDOR DRAWINGS, OR ANY MATERIAL PREPARED AND SUBMITTED BY THE CONTRACTOR OR SUBCONTRACTOR.
17. REFERENCE TO STANDARD SPECIFICATIONS OR ANY TECHNICAL SOCIETY, ORGANIZATION OR ASSOCIATION OR TO CODES OF LOCAL OR STATE AUTHORITIES SHALL MEAN THE LATEST STANDARD, CODE SPECIFICATION OR TENTATIVE SPECIFICATION ADOPTED AND PUBLISHED AT THE DATE OF TAKING BIDS, UNLESS SPECIFICALLY STATED OTHERWISE.
18. SEE ARCHITECTURAL DRAWINGS FOR FLOOR ELEVATIONS, SLOPE, AND LOCATION OF DEPRESSED FLOOR AREAS. THE CONTRACTOR SHALL COMPARE STRUCTURAL SECTIONS WITH THE ARCHITECTURAL SECTIONS AND REPORT ANY DISCREPANCY TO THE ARCHITECT PRIOR TO FABRICATING OR INSTALLING STRUCTURAL MEMBERS.

FOUNDATIONS:

1. SPREAD FOOTINGS SHALL BEAR ON SOIL CAPABLE OF SUSTAINING A NET ALLOWABLE BEARING PRESSURE OF 2.5 KSF FOR INDIVIDUAL SPREAD COLUMN FOOTINGS AND 2.5 KSF FOR CONTINUOUS WALL FOOTINGS ON AN AGGREGATE MAT MEETING THE GEOTECHNICAL FILL REQUIREMENTS UNDER FULL SERVICE LIVE AND DEAD LOAD.
2. THE FOOTINGS HAVE BEEN POSITIONED AT THE ESTIMATED ELEVATION WHICH WILL PROVIDE SUITABLE BEARING. HOWEVER, IF ADEQUATE BEARING CAPACITY IS NON-EXISTENT AT THESE ESTIMATED ELEVATIONS, THE FOOTING SHALL BE LOWERED TO AN ELEVATION WHERE THE PRESCRIBED SAFE BEARING CAPACITY EXISTS.
3. FOOTINGS MAY BE CAST INTO AN EARTH-FORMED TRENCH IF SOIL CONDITIONS PERMIT.
4. EXCAVATION FOR FOOTINGS SHALL BE CUT TO ACCURATE SIZES AND DIMENSIONS, AS SHOWN ON PLANS. ALL SOIL BELOW SLABS AND FOOTINGS SHALL BE PROPERLY COMPACTED AND SUBGRADE BROUGHT TO A REASONABLE TRUE AND LEVEL PLANE BEFORE PLACING CONCRETE.
5. IN THE AREA OF THE BUILDING, EXISTING ORGANIC MATERIAL, UNSUITABLE SOIL, ABANDONED FOOTINGS, AND ANY OTHER EXISTING UNSUITABLE MATERIALS AS IDENTIFIED BY THE GEOTECHNICAL INVESTIGATION REPORT SHALL BE REMOVED. ANY FILL MATERIAL REQUIRED AT THE SITE SHALL CONFORM TO THE REQUIREMENTS SET FORTH IN THE GEOTECHNICAL INVESTIGATION REPORT AND APPROVED BY A SOILS ENGINEER. ROCKS OF A DIAMETER GREATER THAN THAT SPECIFIED SHALL BE EXCLUDED FROM STRUCTURAL FILL LIFTS. FILL MATERIAL SHALL BE PLACED IN LOOSE LIFTS ACCORDING TO THE GEOTECHNICAL ENGINEER'S RECOMMENDATIONS AND COMPACTED TO A SPECIFIED MAXIMUM DRY DENSITY AS DETERMINED BY THE MODIFIED COMPACTION TEST (ASTM D1557). ADEQUATE FIELD DENSITY AND MOISTURE CONTENT TESTS SHALL BE PERFORMED TO ENSURE COMPLIANCE.
6. FOOTING CONCRETE SHALL BE CAST ON THE SAME DAY THE EXCAVATION IS APPROVED. IF THE BEARING SURFACE IS ALLOWED TO BECOME DISTURBED IN ANY WAY, IT SHALL BE REWORKED TO THE SATISFACTION OF THE TESTING ENGINEER PRIOR TO CASTING THE CONCRETE.
7. ALL BEARING MATERIAL SHALL BE INSPECTED BY THE INDEPENDENT TESTING AGENCY PRIOR TO CONCRETE PLACEMENT. THE INDEPENDENT TESTING AGENCY SHALL BE THE SOLE JUDGE AS TO THE SUITABILITY OF THE BEARING MATERIAL. FOOTING ELEVATIONS SHALL BE ADJUSTED AS REQUIRED.
8. WHEN UNSATISFACTORY OR UNCONTROLLED FILL IS ENCOUNTERED, REMOVAL, AND REPLACEMENT WILL BE PAID ON THE BASIS OF UNIT PRICES SET FORTH IN THE CONTRACT.
9. DRAINAGE FILL SHALL BE AN EVENLY GRADED MIXTURE OF NATURAL OR CRUSHED STONE, CONFORMING TO THE REQUIREMENTS OF ASTM STANDARD C33, AND HAVING A GRADATION AS FOLLOWS:

   100 % PASSING.....A 3/4" SIEVE
   10-30 % PASSING..... A 1/2" SIEVE
   0-10 % PASSING..... A 3/8" SIEVE
   0-5 % PASSING..... A #4 SIEVE
10. ANY FILL WITHIN 10'-0" OF THE BUILDING LIMIT SHALL CONFORM TO THE RECOMMENDATIONS OF THE GEOTECHNICAL ENGINEER FOR PREPARATION.
11. BACKFILL AROUND AND OVER FOUNDATION ELEMENTS SHALL BE OF SUITABLE MATERIAL, INSPECTED AND PRE-APPROVED BY THE TESTING ENGINEER.
12. BACKFILL AGAINST WALLS SHALL BE PLACED IN 8 INCH LIFTS AND SHALL BE DEPOSITED EVENLY AGAINST EACH SIDE OF THE WALL UNTIL THE LOWER FINAL GRADE IS REACHED. BACKFILL SHALL NOT BE PLACED AGAINST WALLS DEPENDENT UPON TOP AND BOTTOM SLABS/FOUNDATION FOR SUPPORT UNTIL SUCH SLABS HAVE ATTAINED MINIMUM DESIGN COMPRESSIVE STRENGTH. WALLS WITH SLAB-ON-GROUND AT THE TOP OF THE WALL SHALL BE SAFELY SHORED AND BRACED DURING BACKFILLING.
13. MAXIMUM SLOPE OF EXCAVATIONS SHALL BE IDENTIFIED IN THE GEOTECHNICAL INVESTIGATION REPORT AND ADHERED TO. PROVIDE SHORING AND PROTECTION FOR EXCAVATION BANKS AS NECESSARY TO PRESERVE SAFETY AND PREVENT CAVING.
14. ALL BEARING STRATA SHALL BE ADEQUATELY DRAINED BEFORE FOUNDATION CONCRETE IS PLACED.
15. COLUMN FOOTINGS AND WALL FOOTINGS SHALL BE POURED MONOLITHIC WITH TOPS OF ADJACENT FOOTINGS AT THE SAME ELEVATION.
16. THERE SHALL BE NO HORIZONTAL OR VERTICAL CONSTRUCTION JOINTS IN ANY FOOTING WITHOUT PRIOR WRITTEN APPROVAL FROM THE ENGINEER.
17. CONCRETE CAST ON SLOPING SURFACES SHALL BEGIN AT THE LOWEST ELEVATION AND CONTINUE MONOLITHICALLY TOWARD THE HIGHER ELEVATION UNTIL THE INTENDED POUR IS COMPLETED.
18. FOUNDATION DESIGN IS BASED ON THE SUBSURFACE EXPLORATION AND GEOTECHNICAL ENGINEERING EVALUATION "DATED MAY 6, 2025 AS PREPARED BY S&ME, INC. PROJECT NO 25350231".

CONCRETE:

1. CODE: AMERICAN CONCRETE INSTITUTE (ACI) 318 (LATEST ADDITION)
2. CONCRETE SHALL HAVE A 28-DAY COMPRESSIVE STRENGTH IN ACCORDANCE WITH THE FOLLOWING:

   TUNNEL SLAB & TRENCH..... 5000 PSI
   OTHER SLABS ON GRADE..... 3000 PSI
   FOOTINGS..... 3000 PSI
3. ALL CONCRETE SHALL HAVE A DENSITY OF 145 PCF UNLESS NOTED OTHERWISE.
4. CONTRACTOR SHALL SUBMIT CONCRETE MIX DESIGNS FOR ALL UNIQUE CONCRETE APPLICATIONS FOR REVIEW WELL IN ADVANCE OF CONCRETE PLACEMENT. CONCRETE MIX DESIGN SHALL BE CERTIFIED BY AN ENGINEER REGISTERED IN THE PROJECT STATE. MIX DESIGN TEST DATA SHALL COMPLY WITH ACI 318 AND SHALL INCLUDE (AT A MINIMUM) AVERAGE 28 DAY STRENGTH, NUMBER OF SAMPLES, AND STANDARD DEVIATION (IF APPLICABLE). TEST RESULTS SHALL NOT BE MORE THAN 24 MONTHS OLD AT TIME OF SUBMITTAL.
5. REINFORCING SHALL CONFORM TO ASTM A615, GR60, UNLESS NOTED OTHERWISE.
6. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A185, GRADE 60.
7. WELDED WIRE FABRIC SHALL BE PLACED 1" BELOW T/SLAB, UNLESS NOTED OTHERWISE. LAP FABRIC 6" ON SIDES AND ENDS.
8. ALL REINFORCING SHALL BE DETAILED, FABRICATED AND PLACED IN ACCORDANCE WITH THE LATEST ADDITION OF THE ACI DETAILING MANUAL.
9. ALL MIXING, TRANSPORTING, PLACING AND CURING OF CONCRETE SHALL BE DONE IN ACCORDANCE WITH THE RECOMMENDATIONS OF THE AMERICAN CONCRETE INSTITUTE.
10. ALL "CONTINUOUS" REINFORCEMENT SHALL HAVE A MINIMUM LAP OF "B" TYPE (ACI 318) AT SPLICES, UNLESS NOTED OTHERWISE.
11. SUBMIT REINFORCING PLACEMENT AND DETAIL (SHOP) DRAWINGS FOR REVIEW. NO REINFORCING BARS SHALL BE INSTALLED UNTIL THE SHOP DRAWINGS HAVE BEEN REVIEWED AND RETURNED.
12. PRODUCTS AND MATERIALS:
   - A. TYPE I/II PORTLAND CEMENT SHALL CONFORM TO ASTM C-150.
   - B. AGGREGATES SHALL CONFORM TO ASTM C-33.
   - C. REINFORCING BARS SHALL CONFORM TO ASTM A-615 (GRADE 60).
   - D. FORMING SHALL BE OF WOOD, STEEL, OR FIBERGLASS OF SATISFACTORY QUALITY AND CONDITION.
   - E. NO ADMIXTURES SHALL BE ADDED TO THE CONCRETE UNLESS APPROVED BY THE ENGINEER.
   - F. NON-SHRINK GROUT SHALL BE READY TO USE NON-METALLIC AGGREGATE AND DEVELOP A 28-DAY COMPRESSIVE STRENGTH OF 6000 PSI.
13. ALL REINFORCING SHALL BE SUPPORTED IN FORMS SPACED WITH NECESSARY ACCESSORIES AND SHALL BE SECURELY WIRED TOGETHER IN ACCORDANCE WITH LATEST ADDITION OF THE CRSI "MANUAL OF STANDARD PRACTICE".
14. MINIMUM CONCRETE COVER (UNLESS NOTED OTHERWISE) SHALL BE:

   UNFORMED SURFACE IN CONTACT WITH THE GROUND.....3 INCHES
   FORMED SURFACES EXPOSED TO EARTH OR WEATHER
   #6 BARS AND LARGER.....2 INCHES
   #5 BARS AND SMALLER.....1 1/2 INCHES
   FORMED SURFACES NOT EXPOSED TO EARTH OR WEATHER
   SLABS, WALLS, AND JOISTS.....3/4 INCHES
15. SCHEDULED OR DETAILED REINFORCING STEEL SHALL NOT BE TACK WELDED FOR ANY REASON. WELDED REINFORCING STEEL SPLICES ARE NOT PERMITTED WITHOUT ENGINEER'S APPROVAL. WHERE WELDING IS APPROVED IT SHALL CONFORM TO AWS D1.4 STRUCTURAL WELDING CODE - REINFORCING STEEL.
16. SLAB-ON-GRADE SHALL BE SAW CUT IMMEDIATELY AFTER CONCRETE HARDENS. THE CONTRACTOR SHALL SUBMIT LAYOUT AND CONSTRUCTION SCHEDULE ("SOFT CUT" ® INTERNATIONAL OR SIM.)
17. CONTROL JOINTS IN SLABS ON GROUND SHALL BE LOCATED AT 15'-0" MAXIMUM SPACING AND SHALL CREATE SECTIONS OF SLAB WITH A MAXIMUM ASPECT RATIO OF 1.5:1. CONTROL JOINTS SHALL BE SAWN AND SHALL BE A MINIMUM OF 1/4 OF THE SLAB THICKNESS DEEP IF CUT WITH A CONVENTIONAL SAW, OR 1" DEEP IF CUT WITH AN EARLY-ENTRY DRY-CUT SAW. THE CONTROL JOINTS SHALL BE SAWN AS SOON AS THE SAW BLADE CAN CUT THE CONCRETE WITHOUT DISPLACING THE AGGREGATE. CUT EVERY OTHER MESH WIRE AT THE CONTROL JOINT LOCATION PRIOR TO PLACING CONCRETE.
18. SAWN CONTROL JOINTS SHALL BE PLACED AS SOON AS CONCRETE IS ABLE TO BE SAWN WITHOUT PULLING AGGREGATE FROM FLOOR. SLABS SHALL NOT BE LEFT OVERNIGHT, OR ANY REASONABLE AMOUNT OF TIME, WITHOUT SAWING JOINTS. WEATHER IS CRITICAL TO THE SCHEDULE OF SAWN JOINTS. IF LARGE AREAS OF SLAB ARE POURED AT ONE TIME, SEVERAL SAWS MAY BE REQUIRED SO THAT JOINTS ARE PLACED IN TIME TO PREVENT SHRINKAGE CRACKING. PROPER JOINTING OF THE SLAB IS CRITICAL. REFER TO THE ACI MANUAL OF CONCRETE PRACTICE FOR PROPER JOINTING TECHNIQUES.
19. BASE PLATES, ANCHOR BOLTS, SUPPORT ANGLES, ETC. BELOW GRADE SHALL BE COVERED WITH A MINIMUM OF 4" OF CONCRETE.
20. THE FLATNESS AND LEVELNESS OF THE SLAB-ON-GRADE SHALL BE DETERMINED ACCORDING TO ASTM E-1155 OR ACI 117, SLAB CLASS 5 (ACI 302) STANDARD TEST METHOD USING F NUMBERS. THE SPECIFIC FLATNESS AND LEVELNESS SHALL BE F/F-35 AND F/L-20.
21. WHERE FOOTINGS, WALLS, OR OTHER STRUCTURAL ELEMENTS INTERSECT, CORNER OR TEE, PROVIDE CORNER BARS WITH REQUIRED LAP LENGTHS TO PROVIDE CONTINUITY OF HORIZONTAL STEEL REINFORCING, UNLESS NOTED OTHERWISE.
22. PROVIDE A MINIMUM OF 3" COVER FOR ANCHOR BOLTS AND LOCATE HORIZONTAL REINFORCEMENT TO THE OUTSIDE FOR ANCHOR BOLT CONTAINMENT, UNLESS NOTED OTHERWISE.
23. WHERE DOWELS, BOLTS OR INSERTS ARE CALLED OUT TO BE ANCHORED TO CAST IN PLACE OR PRECAST CONCRETE ELEMENTS USING ADHESIVE ANCHORS, USE AN ANCHORAGE SYSTEM EQUAL TO "HILTI" HIT HY-200. FOLLOW ALL MANUFACTURER'S RECOMMENDATIONS. ALTERNATE ANCHORAGE SYSTEMS MAY BE USED WITH ENGINEER'S PRIOR APPROVAL.
24. PROVIDE TEMPORARY SHORING AND BRACING OF ALL STRUCTURAL AND MISCELLANEOUS ELEMENTS UNTIL CONCRETE HAS OBTAINED 80% OF DESIGN STRENGTH AND ALL PERMANENT BRACING ELEMENTS ARE INSTALLED.
25. PLACEMENT OF CONCRETE, COLD WEATHER AND HOT WEATHER PRECAUTIONS, MATERIAL AND PROPORTIONING REQUIREMENTS, REBAR COVER AND DETAILING SHALL CONFORM TO THE REQUIREMENTS OF THE ACI 318.

CONCRETE REINFORCEMENT LAP LENGTH SCHEDULE

BAR SIZE	f'c = 3,000 PSI		f'c = 4,000 PSI		f'c = 4,500 PSI	
	TOP BARS	OTHER	TOP BARS	OTHER	TOP BARS	OTHER
#3	28"	22"	25"	19"	23"	18"
#4	38"	29"	33"	25"	31"	24"
#5	47"	36"	41"	31"	38"	30"
#6	56"	43"	49"	37"	46"	35"
#7	81"	63"	71"	54"	67"	51"
#8	93"	72"	81"	62"	76"	59"

NOTES:
1. WHERE THE CLEAR SPACING BETWEEN BARS BEING SPLICED IS LESS THAN (2) BAR DIAMETERS, INCREASE THE LAP LENGTH BY 50%.
2. WHERE THE BAR COVER IS LESS THAN OR EQUAL TO THE BAR DIAMETER, INCREASE THE LAP LENGTH BY 50%.
3. TOP BARS ARE HORIZONTAL BARS WITH MORE THAN 12" OF CONCRETE CAST BELOW THE BARS.
4. LAP SPLICE LENGTHS ARE PROVIDED FOR NORMAL WEIGHT CONCRETE. WHERE LIGHTWEIGHT CONCRETE IS USED, INCREASE LAP SPLICE LENGTHS BY 30%.
5. SPLICES OF HORIZONTAL REINFORCEMENT IN WALLS SHALL BE STAGGERED.
6. SPLICES OF HORIZONTAL REINFORCEMENT IN WALLS CONTAINED TWO MATTS OF REINFORCEMENT SHALL NOT OCCUR IN THE SAME LOCATION.

STRUCTURAL STEEL:

1. CODE: LATEST EDITION OF THE AMERICAN INSTITUTE OF STEEL CONSTRUCTION "SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS, ANSI/AISC 360. STEEL SHALL CONFORM TO THE FOLLOWING GRADES:

   WIDE FLANGE SHAPES..... ASTM A992 (Fy=50ksi)
   ALL CHANNELS, ANGLES, PLATES, ETC. (UNO)..... A36 (Fy=36ksi)
   STRUCTURAL TUBES..... A500, GRADE B (Fy=46ksi)
   ANCHOR BOLTS..... F1554, GRADE 36

POST-INSTALLED ANCHORS:

1. POST-INSTALLED ANCHORS SHALL ONLY BE INSTALLED WHERE SPECIFIED ON THE CONTRACT DRAWINGS. POST-INSTALLED ANCHORS SHALL NOT BE USED FOR MISSING OR MIS-PLACED CAST-IN-PLACE ANCHORS WITHOUT PERMISSION FROM THE ENGINEER OF RECORD.
2. TESTING, SCANNING, AND LOCATING OF EXISTING REINFORCEMENT IS REQUIRED PRIOR TO INSTALLATION OF POST-INSTALLED ANCHORS TO AVOID INTERFERENCE AND/OR DAMAGE TO IN-PLACE REINFORCEMENT.
3. SUBSTITITION REQUESTS FOR SPECIFIED POST-INSTALLED ANCHORS SHALL BE ACCOMPANIED BY ADEQUATE CALCULATIONS BY A ENGINEER LICENSED IN THE PROJECT STATE THAT THE REQUESTED ANCHOR MEETS OR EXCEEDS THAT OF WHAT IS SPECIFIED.
4. MECHANICAL ANCHORS SHALL BE TESTED AND ASSESSED IN ACCORDANCE WITH THE MOST RECENT EDITION OF ACI 355.2 QUALIFICATION OF POST INSTALLED MECHANICAL ANCHORS IN CONCRETE AND COMMENTARY.
5. ADHESIVE ANCHOR SYSTEMS SHALL BE TESTED AND ASSESSED IN ACCORDANCE WITH THE MOST RECENT EDITION OF ACI 355.4 QUALIFICATION OF POST-INSTALLED ADHESIVE ANCHORS IN CONCRETE (355.4) AND COMMENTARY. BULKMIXED (E.G., BUCKET-MIXED) ADHESIVES ARE NOT PERMITTED.
6. CONCRETE SHALL HAVE A MINIMUM COMPRESSIVE STRENGTH (f'c) OF 2,500 PSI AT THE TIME OF ADHESIVE ANCHOR INSTALLATION.
7. CONCRETE AT TIME OF ADHESIVE ANCHOR INSTALLATION SHALL HAVE A MINIMUM AGE OF 21 DAYS. FOR INSTALLATION OF ADHESIVE ANCHORS IN CONCRETE HAVING AN AGE LESS THAN 21 DAYS, TESTS SHALL BE CONDUCTED TO VERIFY THE PERFORMANCE OF THE PRODUCT IN ACCORDANCE WITH ACI 355.4.
8. THE CONCRETE TEMPERATURE AT THE TIME OF ADHESIVE ANCHOR INSTALLATION SHALL BE AT LEAST 50°F UNLESS TESTING HAS BEEN CONDUCTED IN ACCORDANCE WITH RECOGNIZED CRITERIA TO VERIFY PERFORMANCE IN CONCRETE AT LOWER TEMPERATURES.
9. ADHESIVE ANCHORS SHALL BE SUPPLIED AS AN ENTIRE SYSTEM. THE SYSTEM SHALL INCLUDE, BUT IS NOT LIMITED TO, MANUFACTURERS PRINTED INSTALLATION INSTRUCTIONS (MPII) AS SUPPLIED WITH THE ADHESIVE, ADHESIVE CARTRIDGE, MIXING NOZZLE, EXTENSION TUBE, DISPENSER, AND ALL REQUIRED EQUIPMENT FOR PROPERLY CLEANING THE DRILLED HOLE.
10. ALL-THREADED ROD (EYEBOLTS, THREADED STUDS, INTERNAL THREADED PARTS) TO BE USED IN ADHESIVE ANCHOR ASSEMBLIES SHALL CONFORM TO ASTM A36, F1554 OR OTHER APPROVED ANCHOR ASSEMBLY TYPES. (STAINLESS STEEL ANCHOR RODS SHALL BE AISI TYPE 304 OR TYPE 316.) THREADS SHALL BE UNC COARSE THREADS, UNLESS NOTED OTHERWISE. COMPATIBLE NUTS AND WASHERS SHALL BE FURNISHED WITH THE ALL-THREAD ROD AND CONSIDERED PART OF THE ASSEMBLY. WITH HOT-DIPPED GALVANIZED RODS, USE OVERSIZED TAPPED, HOT-DIPPED GALVANIZED NUTS.
11. NUTS, WASHERS, AND OTHER HARDWARE USED WITH AN ALL-THREADED BAR ADHESIVE ANCHOR SYSTEM OR WITH A MECHANICAL EXPANSION ANCHOR SHALL HAVE A MATERIAL OR AN ALLOY DESIGNATION THAT IS COMPATIBLE WITH THE ANCHOR ROD/ALLOY. GALVANIZED ASSEMBLIES SHALL BE HOT-DIP GALVANIZED IN ACCORDANCE WITH ASTM A153 CLASS C. ELECTROPLATE GALVANIZING IS NOT ACCEPTABLE. DISSIMILAR METAL ASSEMBLIES SHALL BE SEPARATED BY NYLON, EPDM, OR OTHER APPROVED NON-METALLIC WASHERS.
12. REINFORCING BARS TO BE USED IN ADHESIVE ANCHOR ASSEMBLIES OR AS POST-INSTALLED REINFORCING SHALL CONFORM TO ASTM A615, A706, A995, OR A1035.
13. THE EMBEDMENT DEPTH SPECIFIED SHALL BE DEFINED AS THE DEPTH FROM THE BASE MATERIAL TO THE DEEPEST PART OF THE ANCHOR AFTER THE ANCHOR HAS BEEN FULLY INSTALLED.
14. ADHESIVE CARTRIDGES SHALL BE STORED UNDER CONDITIONS IN COMPLIANCE WITH MANUFACTURER RECOMMENDATIONS REGARDING TEMPERATURE, EXPOSURE TO SUNLIGHT, ETC. AND EVIDENCE OF COMPLIANCE SHALL BE MADE AVAILABLE UPON REQUEST. THE USE OF EXPIRED ADHESIVE, AS INDICATED BY THE EXPIRATION DATE ON THE CARTRIDGE, IS PROHIBITED.
15. ADHESIVE ANCHORS SHALL BE INSTALLED BY QUALIFIED PERSONNEL TRAINED TO INSTALL ADHESIVE ANCHORS IN ACCORDANCE WITH THE SPECIFICATIONS (ALT: CONTRACT DOCUMENTS). BOTH POST-INSTALLED EXPANSION AND ADHESIVE ANCHORS SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S PRINTED INSTALLATION INSTRUCTIONS (MPII).
16. ADHESIVE ANCHORS WITH DIAMETER GREATER THAN 3/8- INCH INSTALLED IN ORIENTATIONS FROM HORIZONTAL TO VERTICAL SHALL EMPLOY A PISTON PLUG FOR THE ADHESIVE INJECTION.
17. INSTALLATION OF ADHESIVE ANCHORS IN ORIENTATIONS FROM HORIZONTAL TO VERTICAL TO SUPPORT SUSTAINED TENSION LOADS SHALL BE PERFORMED BY PERSONNEL CERTIFIED BY THE ACI ADHESIVE ANCHOR INSTALLER CERTIFICATION PROGRAM OR EQUIVALENT.
18. THE CONTRACTOR SHALL PROVIDE ALL EQUIPMENT REQUIRED TO INSTALL THE EXPANSION AND/OR ADHESIVE ANCHOR INCLUDING, BUT NOT LIMITED TO, DRILLS, SETTING TOOLS, CLEAN-OUT BRUSHES, BLOWOUT BULBS, OIL-FREE COMPRESSED AIR, VACUUMS, WRENCHES, ETC.
19. UNLESS OTHERWISE SPECIFIED, ANCHORS SHALL BE INSTALLED IN HOLES DRILLED WITH A ROTARY IMPACT HAMMER DRILL OR, WHERE NOT OTHERWISE PRESCRIBED, A ROCK DRILL. WHERE SPECIFIED AND WHERE PERMITTED BY THE MPII, HOLES MAY BE DRILLED WITH A DIAMOND CORE DRILL. IN ALL CASES, THE BIT DIAMETER SHALL BE IN ACCORDANCE WITH THE MPII.
20. ANCHOR HOLES SHALL BE THOROUGHLY CLEANED IN ACCORDANCE WITH THE PROCEDURES SPECIFIED IN THE MPII PRIOR TO ADHESIVE INJECTION.
21. DRILLED AND CLEANED ANCHOR HOLES SHALL BE PROTECTED FROM CONTAMINATION AND WATER (E.G. RAIN) UNTIL THE ADHESIVE IS INSTALLED.
22. A DRILLED ANCHOR HOLE SHALL BE RE-CLEANED JUST PRIOR TO ADHESIVE INJECTION IF, IN THE OPINION OF THE ENGINEER, INSPECTOR, OR OWNER'S REPRESENTATIVE, THE HOLE HAS BECOME CONTAMINATED AFTER INITIAL CLEANING.
23. ADHESIVE SHALL BE INJECTED IN ACCORDANCE WITH THE MPII USING EQUIPMENT AND PROCEDURES AS SPECIFIED THEREIN FOR THE SPECIFIC CONDITIONS ASSOCIATED WITH THE INJECTION. THIS SHOULD BE CLEARLY SPECIFIED IN THE MPII, IF NOT, ANOTHER PRODUCT SHOULD BE SPECIFIED.
24. ANCHOR ELEMENTS TO BE INSTALLED IN THE ADHESIVE SHALL BE CLEAN, OIL-FREE, AND FREE OF LOOSE RUST, PAINT, OR OTHER COATINGS. THREADS ON THE PROJECTING PORTION OF THE ANCHOR ELEMENT SHALL BE PROTECTED FROM ADHESIVE CONTAMINATION.
25. INSTALLED ADHESIVE ANCHORS SHALL BE SECURELY FIXED IN-PLACE TO PREVENT DISPLACEMENT WHILE THE ADHESIVE CURES. UNLESS SHOWN OTHERWISE ON THE DRAWINGS, ANCHORS SHALL BE INSTALLED PERPENDICULAR TO THE CONCRETE SURFACE. ANCHORS DISPLACED BEFORE FULL ADHESIVE CURE SHALL BE CONSIDERED DAMAGED AND REPLACED AT THE CONTRACTOR'S EXPENSE.
26. POST-INSTALLED REINFORCING BARS OR ALL-THREADED BARS SHALL NOT BE BENT AFTER BEING INSTALLED.

FBC 110.3 REQUIRED INSPECTIONS

MATERIAL / ACTIVITY	SERVICE	Y/N	AGENT	DATE COMPLETED
1. Foundation Inspection: After trenches are excavated and forms erected				
Stem-Wall	Field inspection	N		
Monolithic Slab on Grade	Field inspection	Y		
Piling/Pile Caps	Field inspection	N		
Footers/Grade Beams	Field inspection	Y		
2. Framing Inspection: After the roof, framing, fireblocking, and bracing is in place. All concealing wiring, all pipes, chimneys, ducts and vents are completed.				
Window/Door Framing	Field inspection	Y		
Vertical Cells/Columns	Field inspection	Y		
Lintel/Tie Beams	Field inspection	Y		
Framing/Trusses/Bracing/Connectors	Field inspection	Y		
Draft Stopping/Fire Blocking	Field inspection	Y		
Curtain Wall Framing	Field inspection	N		
Energy Insulation	Field inspection	Y		
Accessibility	Field inspection	Y		
Verify Rough Opening Dimensions Are Within Tolerances	Field inspection	Y		
3. Sheathing Inspections: As part of the dry-in inspection or after all roof and wall sheathing and fasteners are complete.				
Roof Sheathing	Field inspection	Y		
Wall Sheathing	Field inspection	Y		
Sheathing Fasteners	Field inspection	Y		
Roof/Wall Dry-in	Field inspection	Y		
4. Exterior Wall Coverings				
Roof Sheathing	Field inspection	Y		
Wall Sheathing	Field inspection	Y		
5. Roof Inspection				
Dry-In	Field inspection	Y		
Insulation	Field inspection	Y		
Roof Coverings	Field inspection	Y		
Flashing	Field inspection	Y		
6. Final Inspections : After the building is complete and ready for occupancy				
Final Inspection	Field inspection	Y		

STUDS, JOISTS, HEADERS, ETC.

NAILING SCHEDULE

SHEET NO:

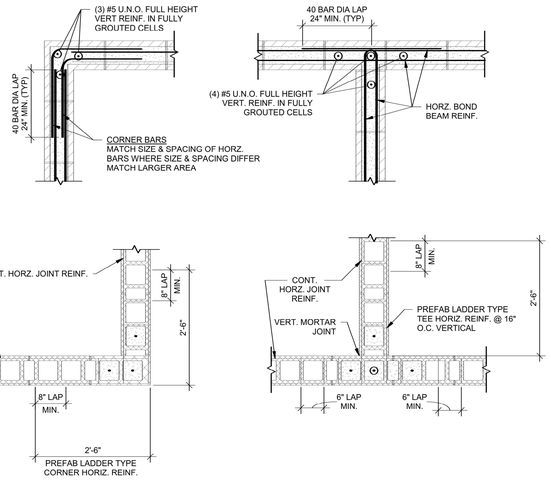
S4.1

MINIMUM REINFORCING LAP LENGTH SCHEDULE (SD)



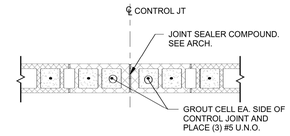
BAR TYPE	BAR SIZE AND LAP LENGTH			
	#3	#4	#5	#6
FILLED 8" CMU CELLS (SINGLE BAR)	16"	21"	32"	54"
FILLED 12" CMU CELLS (SINGLE BAR)	16"	21"	26"	40"
FILLED 12" CMU CELLS (DOUBLE BARS)	19"	34"	45"	54"

NOTES:
1. THESE VALUES ARE ADEQUATE FOR REGULAR WEIGHT CONCRETE THEY MAY BE MULTIPLIED BY 1.3 IF LIGHT WEIGHT CONCRETE IS USED.
2. THESE VALUES ARE ADEQUATE FOR BARS WITHOUT EPOXY COATING.
3. THESE VALUES APPLY TO MASONRY W/ f'm = 1,500 PSI.
4. SBC CODE SECTION 2108.9.2.11 ANS SECTION 12.14.3 ALLOW OPTIONAL REINFORCING SPLICES AS FOLLOWS:
   - A WELDED SPLICE WHEREBY BARS ARE BUTTED AND WELDED TO DEVELOP IN TENSION 125 PERCENT OF THE YIELD STRENGTH OF THE BAR
   - MECHANICAL CONNECTIONS THAT ARE CAPABLE OF DEVELOPING 125 PERCENT OF THE YIELD STRENGTH OF THE BAR.

LOW LIFT GROUTING PROCEDURE:
A. CONSTRUCT WALL TO HEIGHT OF 5'-0". ALLOW MORTAR TO SET SUFFICIENTLY TO WITHSTAND GROUT PRESSURE.
B. INSPECT UNITS FOR ALIGNMENT. CLEAN OUT CELLS TO BE FILLED.
C. FILL CELLS TO 1½" BELOW TOP COURSE.
D. DELAY 3 TO 5 MINUTES PRIOR TO CONSOLIDATING TO ALLOW WATER TO BE ABSORBED BY MASONRY.
E. VERTICAL REINFORCING PRE-MANUFACTURED REBAR POSITIONER SHALL BE LOCATED AT THE TOP OF THE FIRST COURSE AT THE COURSE BELOW THE TOP OF THE WALL AND 4'-0" O.C. (MAX.)

TYPICAL DETAIL OF LOW-LIFT REINFORCED MASONRY CONSTRUCTION

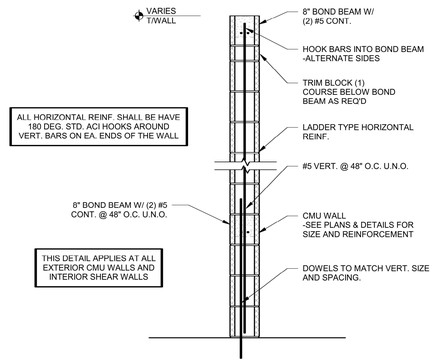
1 S5.1 — SCALE: 3/4" = 1'-0"



@ CORNER **@ TEE INTERSECTION**

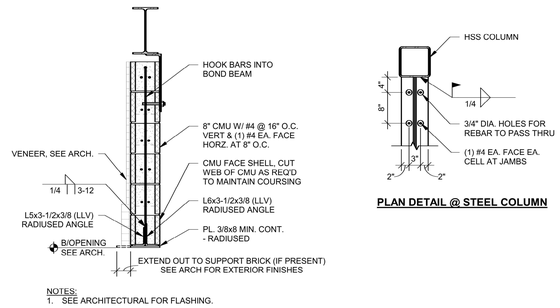
NOTE:
1. CORNER/TEE INTERSECTION REINF. SHALL BE LAPPED WITH THE TYPICAL LADDER TYPE HORIZ. REINF. AND EXTEND A MINIMUM OF 30" IN EACH DIRECTION AT THE INTERSECTION.

TYPICAL CMU WALL CORNERS AND INTERSECTIONS



2 S5.1 — SCALE: 3/4" = 1'-0"

NOTES:
1. SPACING OF CONTROL JOINTS IN INTERIOR/EXTERIOR CMU WALL SHALL NOT EXCEED 18'-0".
2. SEE ARCH FOR EXACT LOCATIONS OF CONTROL JOINTS.
3. CONTINUE HORZ. JOINT REINF. THRU CONTROL JOINTS.
4. WHERE CMU WALLS INTERSECT CONTROL JOINTS IN THE SLAB ON GRADE, ALIGN CMU CONTROL JOINTS WITH THOSE IN THE SLAB ON GRADE.

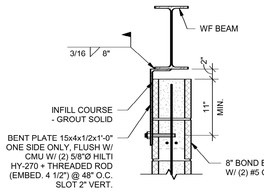


TYPICAL CMU CONTROL JOINTS

3 S5.1 — SCALE: 3/4" = 1'-0"

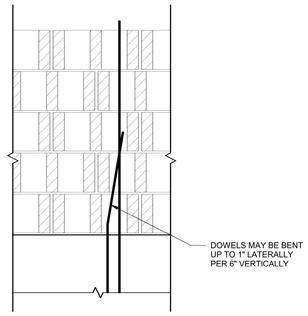
TYP. CMU STRUCTURAL WALLS

4 S5.1 — SCALE: 3/4" = 1'-0"



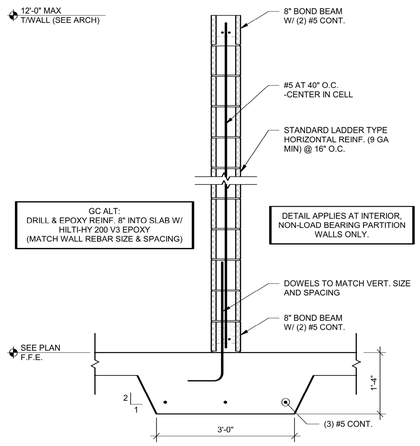
NOTES:
1. SEE ARCHITECTURAL FOR FLASHING.

PLAN DETAIL @ STEEL COLUMN



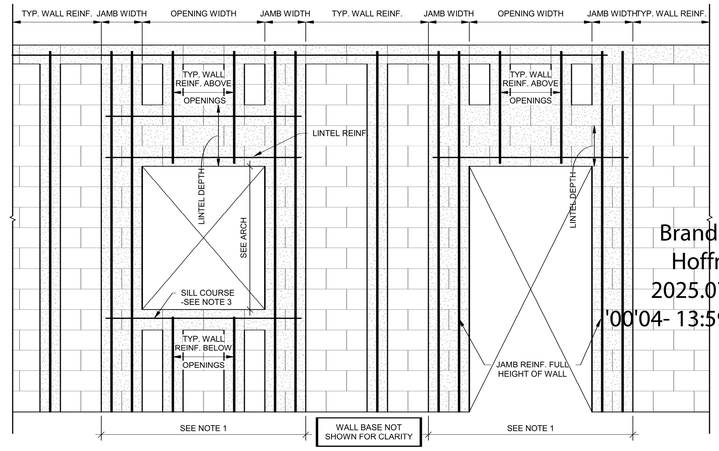
LINTEL FOR ARCHED OPENING

5 S5.1 — SCALE: 3/4" = 1'-0"



CMU WALL BRACING TO WF BEAM

6 S5.1 — SCALE: 1" = 1'-0"

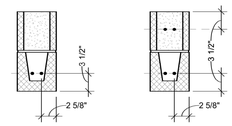


PERMISSIBLE BENDING OF FOUNDATION DOWELS

7 S5.1 — SCALE: 1" = 1'-0"

TYP. CMU PARTITION WALLS

8 S5.1 — SCALE: 3/4" = 1'-0"



NOTES:
1. DO NOT PLACE CONTROL JOINTS WITHIN OPENING OR JAMB REGIONS.
2. GROUT SOLID ALL CELLS CONTAINING REINFORCEMENT.
3. SILL COURSE AS REQ'D:
   A. 8" CMU = (2) #5 CONT. (8'-0" MAX)
   B. 6" CMU = (1) #5 CONT. (6'-0" MAX)
4. NOTIFY STRUCTURAL ENGINEER OF RECORD IF OPENING WIDTHS EXCEED THOSE SCHEDULED.

SCHEDULE FOR CMU LINTELS IN 8" NON-LOAD BEARING MASONRY WALLS

OPENING WIDTH	LINTEL DEPTH	REINFORCING	END BEARING REQ'D	JAMB REINF. REQ'D
UP TO 4'-0"	8"	(2) #5 CONT. BOTT.	8"	(2) #5
4'-0" TO 8'-0"	16"	(4) #5 CONT.	8"	(2) #6
OVER 8'-0"	SEE PLAN	SEE PLAN	SEE PLAN	SEE PLAN

NOTES:
1. MIN. END BEARING REQ'D ALSO IS MINIMUM JAMB WIDTH. IF THERE IS NOT ADEQUATE JAMB WIDTH, USE STEEL LINTEL FOR APPROPRIATE SPAN AND NOTIFY THE STRUCTURAL ENGINEER.
2. HOOK BARS 8" INTO FILLED JAMBS.
3. LINTELS SHALL BE CONSTRUCTED WITH U-BLOCKS AT THE BOTTOM AND DEPRESSED WEB BLOCKS ABOVE AND SHALL BE FULLY GROUTED.

LINTEL WITH (2) BARS **LINTEL WITH (4) BARS**

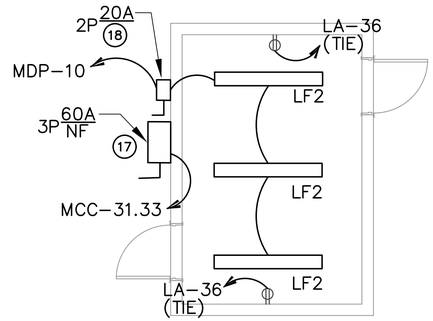
1 SITE POWER PLAN
SCALE: 1" = 25'-0"

KEY NOTES



1. PROPOSED LOCATION OF PAD MOUNTED UTILITY TRANSFORMER. COORDINATE EXACT LOCATION WITH UTILITY PRIOR TO ROUGH IN.
2. PROPOSED LOCATION OF BUILDING METER / SHUNT TRIP BUTTON, REFER TO ELECTRICAL RISER DIAGRAM ON SHEET E5.1 FOR REQUIREMENTS.
3. PROPOSED ROUTING OF UNDERGROUND SERVICE LATERAL, COORDINATE EXACT ROUTING AS REQUIRED, REFER TO ELECTRICAL RISER DIAGRAM ON SHEET E5.1 FOR REQUIREMENTS.
4. PROPOSED ROUTING OF UNDERGROUND UTILITY PRIMARY. CONTRACTOR TO COORDINATE EXACT LOCATION AND REQUIREMENTS WITH UTILITY PRIOR TO STARTING ANY WORK.
5. LOCATION OF COMMUNICATION OUTLET IN OPERATOR'S STATION, REFER TO TELEPHONE DETAIL ON SHEET E5.1 FOR REQUIREMENTS.
6. PROPOSED ROUTING OF COMMUNICATION CONDUITS, COORDINATE EXACT ROUTING AS REQUIRED. REFER TO TELEPHONE DETAIL ON SHEET E5.1 FOR REQUIREMENTS.
7. PROVIDE ELECTRICAL AND DATA CONNECTION FOR PAY STATION KIOSKS. COORDINATE EXACT LOCATION AND REQUIREMENTS WITH SYSTEM INSTALLER AND CONNECT FOR OPERATION.
8. JUNCTION BOX FOR PAY STATION / PREP CANOPY LIGHTING.
9. WIRE CIRCUIT THRU TIME CLOCK AND LIGHTING CONTACTOR. REFER TO ELECTRICAL RISER DIAGRAM ON SHEET E5.1 FOR REQUIREMENTS.
10. JUNCTION BOX FOR VACUUM ENCLOSURE LIGHTING. PROVIDE MANUAL SWITCH(ES) AT ENCLOSURE ENTRANCE FOR LIGHTING CONTROL.
11. JUNCTION BOX FOR VACUUM ENCLOSURE VENDING RECEPTACLE.
12. PROVIDE 60 AMP, NEMA 3R ELECTRICAL DISCONNECT FOR VACUUM MOTOR. COORDINATE EXACT LOCATION AND REQUIREMENTS WITH SYSTEM INSTALLER AND CONNECT FOR OPERATION.
13. JUNCTION BOX FOR ELECTRICAL CONNECTION TO WAIT & GO LIGHT (30-C). COORDINATE EXACT LOCATION AND REQUIREMENTS WITH CAR WASH VENDOR DRAWINGS AND CIVIL DRAWINGS PRIOR TO ROUGH IN AND CONNECT FOR OPERATION. 2
14. (2) 3/4" CONDUITS UNDER SLAB FOR WAIT & GO CAMERA AND WAIT & GO LIGHT 120V RELAY. COORDINATE EXACT LOCATION AND REQUIREMENTS WITH CAR WASH VENDOR DRAWINGS PRIOR TO ROUGH IN AND CONNECT FOR OPERATION.
15. 3" CONDUITS FOR COMPRESSOR.
16. (1) 4" PVC AND (1) 2" CONDUIT FROM ELECTRICAL ROOM TO PREP CANOPY COLUMN.
17. (1) 1" CONDUIT TO MCC (BRANCH CIRCUIT & CONNECTION BY EQUIPMENT VENDOR).
18. PROVIDE FUSES ACCORDING TO MANUFACTURER'S RECOMMENDATION.

GENERAL NOTES

- REFER TO SITE LIGHTING FIXTURE SCHEDULE ON SHEET E1.2 FOR REQUIREMENTS OF FIXTURES.
- REFER TO LIGHTING PLAN ON SHEET E2.1 FOR WALL PACK ELECTRICAL REQUIREMENTS.

GENERAL MECHANICAL POWER NOTE

REFER TO SHEET E5.1, MECHANICAL EQUIPMENT-ELECTRICAL SCHEDULE, FOR POWER REQUIREMENTS TO ALL MECHANICAL EQUIPMENT INDICATED ON THIS SHEET.

ALTA/NSPS LAND TITLE SURVEY

IN SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA

© COPYRIGHT 2025 LJA ENGINEERING, INC.

TITLE LEGAL DESCRIPTION

PARCEL 1:

A TRACT OF LAND SITUATED IN GOVERNMENT LOT FOUR (4), SECTION EIGHT (8), TOWNSHIP EIGHT (8) SOUTH, RANGE EIGHTEEN (18) EAST, ALACHUA COUNTY, FLORIDA, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHEAST CORNER OF GOVERNMENT LOT 4, SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, AND RUN NORTH 01 DEG. 48 MIN, 14 SEC, WEST, ALONG THE EAST LINE OF SAID GOVERNMENT LOT 4 AND THE CENTERLINE OF STATE ROAD NO. S-235A, 1297.87 FEET; THENCE RUN SOUTH 88 DEG. 11 MIN, 46 SEC, WEST 50.00 FEET TO THE INTERSECTION OF THE WEST RIGHT OF WAY LINE OF SAID STATE ROAD NO. S-235A AND THE NORTHERLY RIGHT OF WAY LINE OF OLD STATE ROAD NO. 20, SAID INTERSECTION BEING THE POINT OF BEGINNING; THENCE RUN NORTHWESTERLY ALONG THE NORTHERLY RIGHT OF WAY LINE OF SAID OLD STATE ROAD NO. 20 WITH A CURVE CONCAVE NORTHEASTERLY, SAID CURVE HAVING A CENTRAL ANGLE OF 01 DEG, 34 MIN, 56 SEC., A RADIUS OF 13, 163,97 FEET, A LENGTH OF 363,52 FEET, AND A CHORD OF NORTH 75 DEG, 39 MIN, 20 SEC, WEST, 363,5 1 FEET; THENCE RUN NORTH 74 DEG, 51 MIN, 52 SEC, WEST, ALONG THE NORTHERLY RIGHT OF WAY LINE OF SAID OLD STATE ROAD NO. 20, 439.23 FEET; THENCE RUN NORTHWESTERLY ALONG THE NORTHERLY RIGHT OF WAY LINE OF SAID OLD STATE ROAD NO. 20, WITH A CURVE CONCAVE NORTHEASTERLY, SAID CURVE HAVING A CENTRAL ANGLE OF 15 DEG, 01 MIN, 16 SEC, A RADIUS OF 1238,90 FEET, A LENGTH OF 324,80 FEET, AND A CHORD OF NORTH 67 DEG, 21 MIN, 14 SEC, WEST, 323,87 FEET; THENCE RUN NORTH 59 DEG, 50 MIN, 36 SEC, WEST, ALONG THE NORTHERLY RIGHT OF WAY LINE OF SAID OLD STATE ROAD NO, 20, 257,85 FEET TO THE SOUTHERLY RIGHT OF WAY LINE OF U.S. HIGHWAY NO, 441; THENCE SOUTH 79 DEG, 06 MIN, 00 SEC, EAST, ALONG THE SOUTHERLY RIGHT OF WAY LINE OF SAID U.S. HIGHWAY NO. 441, 1315,12 FEET TO THE WESTERLY RIGHT OF WAY LINE OF SAID STATE ROAD NO. S-235A; THENCE RUN SOUTH 01 DEG. 48 MIN. 14 SEC. EAST, ALONG THE WESTERLY RIGHT OF WAY LINE OF SAID STATE ROAD NO. S-235A, 210,39 FEET TO THE POINT OF BEGINNING;

LESS AND EXCEPT:

THAT PROPERTY PREVIOUSLY SOLD TO AMERICAN TELEPHONE AND TELEGRAPH COMPANY AS DESCRIBED IN DEED RECORDED IN OFFICIAL RECORDS BOOK 415, PAGE 137, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA

AND:

COMMENCE AT THE SOUTHEAST CORNER OF GOVERNMENT LOT 4 OF SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST (ALSO BEING ON THE CENTERLINE OF COUNTY ROAD 235-A); THENCE RUN NORTH 01 DEG. 48 MIN, 14 SEC, WEST, A DISTANCE OF 1297.87 FEET; THENCE RUN SOUTH 88 DEG. 11 MIN, 46 SEC, WEST, A DISTANCE OF 50 FEET TO A POINT ON THE WEST RIGHT OF WAY LINE OF COUNTY ROAD S- 235A, SAID POINT BEING THE POINT OF BEGINNING; THENCE FROM SAID POINT OF BEGINNING ALONG A CHORD BEARING OF NORTH 75 DEG, 50 MIN, 25 SEC, WEST A RADIUS OF 13,163,97 FEET; THENCE RUN NORTHWESTERLY ALONG SAID CURVE AN ARC DISTANCE OF 363,64 FEET; THENCE RUN NORTH 74 DEG, 53 MIN, 16 SEC, WEST A DISTANCE OF 440,59 FEET TO A POINT OF CURVE ON A CURVE; SAID CURVE CONCAVE NORTHEASTERLY WITH A CHORD BEARING OF NORTH 71 DEG, 57 MIN, 49 SEC, WEST AND A RADIUS OF 1,238.90 FEET; THENCE RUN SOUTHEASTERLY ALONG SAID CURVE AN ARC DISTANCE OF 126,42 FEET; THENCE RUN SOUTH 00 DEG, 31 MIN, 04 SEC, WEST A DISTANCE OF 33 FEET MORE OR LESS TO A POINT OF CURVE ON A CURVE ON THE CENTERLINE OF COUNTY ROAD NW 18-A (ALSO KNOWN AS OLD STATE ROAD NO, 20); SAID POINT OF CURVE ON A CURVE CONCAVE NORTHEASTERLY WITH A CHORD BEARING OF SOUTH 71 DEG, 57 MIN, 49 SEC, EAST AND A RADIUS OF 1,238.90 FEET; THENCE RUN SOUTHEASTERLY ALONG SAID CURVE A DISTANCE OF 126,42 FEET MORE OR LESS; THENCE RUN SOUTH 74 DEG, 53 MIN, 1 6 SEC, EAST A DISTANCE OF 441 FEET MORE OR LESS TO A POINT OF CURVE; SAID CURVE CONCAVE NORTHEASTERLY WITH A CHORD BEARING OF SOUTH 75 DEG, 50 MIN. 25 SEC. EAST AND A RADIUS OF 13,163.97 FEET; THENCE RUN SOUTHEASTERLY ALONG SAID CURVE AN ARC DISTANCE OF 364 FEET MORE OR LESS TO THE WEST RIGHT OF WAY LINE OF COUNTY ROAD S-235A; THENCE RUN NORTH 01 DEG. 48 MIN. 14 SEC. WEST A DISTANCE OF 34,35 FEET MORE OR LESS TO THE POINT OF BEGINNING. LYING AND BEING IN SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA.

SAID PARCEL 1 BEING MORE PARTICULARLY DESCRIBED BY SURVEY AS FOLLOWS:

A PARCEL OF LAND SITUATE, LYING AND BEING LOCATED IN GOVERNMENT LOT 4, SECTION 8, TOWNSHIP-8-SOUTH, RANGE- 18-EAST, ALACHUA COUNTY, FLORIDA, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS: COMMENCE AT THE SOUTHEAST CORNER OF GOVERNMENT LOT 4, SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, AND RUN NORTH 01 DEGREES 48 MINUTES 14 SECONDS WEST, ALONG THE EAST LINE OF SAID GOVERNMENT LOT 4 AND THE CENTERLINE OF STATE ROAD NO. S-235A, A DISTANCE OF 1263,48 FEET; THENCE LEAVE SAID LINE AND RUN SOUTH 88 DEGREES 11 MINUTES 46 SECONDS WEST A DISTANCE OF 49,95 FEET TO A 5/8 INCH IRON ROD MARKING THE INTERSECTION OF THE WEST RIGHT-OF-WAY BOUNDARY OF NORTHWEST COUNTY ROAD S-235A AND THE SOUTH RIGHT-OF-WAY BOUNDARY OF OLD STATE ROAD NUMBER 20 FOR THE POINT OF BEGINNING, SAID POINT LYING ON A NON-TANGENT CURVE CONCAVE NORTHEASTERLY; FROM SAID POINT OF BEGINNING AND LEAVING SAID WEST RIGHT-OF-WAY BOUNDARY AND RUN ALONG SAID SOUTH RIGHT-OF-WAY OF OLD STATE ROAD NUMBER 20 AND SAID CURVE WITH A RADIUS OF 13 196,97 FEET, THROUGH A CENTRAL ANGLE OF 01 DEGREES 37 MINUTES 13 SECONDS, FOR AN ARC DISTANCE OF 373,20 FEET (THE CHORD OF SAID ARC BEING NORTH 75 DEGREES 33 MINUTES 53 SECONDS WEST 373,19 FEET); THENCE CONTINUE ALONG SAID RIGHT-OF-WAY NORTH 74 DEGREES 44 MINUTES 51 SECONDS WEST A DISTANCE OF 439,91 FEET TO A POINT MARKING A CURVE TO THE RIGHT; THENCE CONTINUE ALONG SAID RIGHT-OF-WAY CURVE WITH A RADIUS OF 1271,90 FEET, THROUGH A CENTRAL ANGLE OF 00 DEGREES 42 MINUTES 1 1 SECONDS, FOR AN ARC DISTANCE OF 15,61 FEET (THE CHORD OF SAID ARC BEING NORTH 76 DEGREES 28 MINUTES 59 SECONDS WEST 15,61 FEET) TO A NAIL WITH DISK STAMPED LB2947 MARKING A POINT OF NON-TANGENT COMPOUND CURVE TO THE RIGHT; THENCE CONTINUE ALONG SAID RIGHT-OF-WAY CURVE WITH A RADIUS OF 1271,90 FEET, THROUGH A CENTRAL ANGLE OF 04 DEGREES 29 MINUTES 30 SECONDS, FOR AN ARC DISTANCE OF 99,71 FEET (THE CHORD OF SAID ARC BEING NORTH 71 DEGREES 50 MINUTES 34 SECONDS WEST 99,69 FEET) TO A NAIL WITH DISK STAMPED LB2947; THENCE LEAVE SAID RIGHT-OF-WAY AND RUN NORTH 00 DEGREES 23 MINUTES 33 SECONDS WEST A DISTANCE OF 1 73,27 FEET TO A 5/8 INCH IRON ROD LYING ON THE SOUTH RIGHT-OF-WAY BOUNDARY OF NORTHWEST U.S. 441; THENCE ALONG SAID RIGHT-OF- WAY RUN SOUTH 79 DEGREES 03 MINUTES 00 SECONDS EAST A DISTANCE OF 905.82 FEET TO A 1-INCH IRON PIPE MARKING THE INTERSECTION OF SAID RIGHT-OF-WAY WITH THE AFORESAID WEST RIGHT-OF-WAY BOUNDARY OF NORTHWEST COUNTY ROAD S-235A; THENCE LEAVE SAID SOUTH RIGHT-OF-WAY AND RUN ALONG SAID WEST RIGHT-OF-WAY SOUTH 01 DEGREES 46 MINUTES 25 SECONDS EAST A DISTANCE OF 244.79 FEET TO THE POINT OF BEGINNING.

PARCEL 2:

COMMENCE AT THE SOUTHEAST CORNER OF SECTION 8, TOWNSHIP 8 SOUTH, RANGE 1 8 EAST, ALACHUA COUNTY, FLORIDA, FOR A POINT OF REFERENCE, THENCE RUN ALONG THE SOUTH LINE OF SAID SECTION 8, S 87 DEGREES 26'54" W, 50.01 FEET TO THE WESTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. S-235 A; THENCE RUN ALONG SAID RIGHT OF WAY LINE, N 01 DEGREES 47 '55" W, 861,24 FEET TO AND FOR THE POINT OF BEGINNING. THENCE DEPARTING FROM SAID RIGHT OF WAY LINE, RUN S 87 DEGREES 27,06" W, 764,76 FEET; THENCE RUN N 19 DEGREES 05 '30" W, 131,62 FEET; THENCE RUN N 00 DEGREES 43'17"" W, 523,49 FEET (SAID POINT BEING ON A CURVE); THENCE RUN ON A CURVE, BEING CONCAVE NORTHEASTERLY, (HAVING A CENTRAL ANGLE OF 00 DEGREES 42'11", A RADIUS OF 1271,90 FEET, A CHORD BEARING AND DISTANCE OF S 74 DEGREES 21'50" E, 15,61 FEET) AN ARC DISTANCE OF 15,61 FEET TO A POINT OF TANGENCY; THENCE RUN S 74 DEGREES 4751' E, 439,91 FEET TO A POINT OF CURVATURE; THENCE RUN ON A CURVE, BEING CONCAVE NORTHEASTERLY, (HAVING A CENTRAL ANGLE OF 01 DEGREES 37'13", A RADIUS OF 13,196,97 FEET, A CHORD BEARING AND DISTANCE OF S 75 DEGREES 36'53" E, 373,19 FEET) AN ARC DISTANCE OF 373.20 FEET TO THE AFORESAID WESTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. S-235 A; THENCE RUN ALONG SAID RIGHT OF WAY LINE, S 01 DEGREES 47'55" E, 401.75 FEET TO THE POINT OF BEGINNING.

PARCEL 3:

COMMENCE AT THE SOUTHEAST CORNER OF SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, FOR A POINT OF REFERENCE, THENCE RUN ALONG THE SOUTH LINE OF SAID SECTION 8, S 87 DEGREES 26'54" W, 50.01 FEET TO THE WESTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. S-235 A; THENCE RUN ALONG SAID RIGHT OF WAY LINE, N 01 DEGREES 47'55" W, 611,24 FEET TO AND FOR THE POINT OF BEGINNING, THENCE DEPARTING FROM SAID RIGHT OF WAY LINE, RUN S 87 DEGREES 27'06" W, 687,23 FEET; THENCE RUN N 19 DEGREES 05'30" W, 260,78 FEET; THENCE RUN N 87 DEGREES 27'06 " E, 764,76 FEET TO THE AFORESAID RIGHT OF WAY LINE OF COUNTY ROAD NO. S-235 A; THENCE RUN ALONG SAID RIGHT OF WAY LINE, S 01 DEGREES 47 '55" E, 250,00 FEET TO THE POINT OF BEGINNING.

LESS AND EXCEPT THOSE LANDS AS DESCRIBED IN SPECIAL WARRANTY DEED RECORDED JUNE 26, 2023, IN OFFICIAL RECORDS BOOK 5101, PAGE 702; WARRANTY DEED RECORDED JULY 2, 2024, IN OFFICIAL RECORDS BOOK 5167, PAGE 1332; AND SPECIAL WARRANTY DEED RECORDED AUGUST 12, 2024, IN OFFICIAL RECORDS BOOK 5173, PAGE 2776.

NOTES CORRESPONDING TO SCHEDULE B-II EXCEPTIONS

(SURVEYORS COMMENTS IN ALL CAPS & PARENTHESES)

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met. (NOT A SURVEY MATTER)

2. Taxes and assessments for the year 2025 and subsequent years, which are not yet due and payable. (NOT A SURVEY MATTER)

3. Standard Exceptions:

   a. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

   b. Rights or claims of parties in possession not shown by the public records.

SUBJECT TO EASEMENTS, RESTRICTIONS AND/OR RIGHTS OF WAY OF RECORD, IF ANY.

SURVEYOR'S REPORT (LAST DAY OF FIELD SURVEY: 05/05/2025) (FIELD BOOK 203/1-7) (ADDED CHIC FILLET BUILDING AND OFFSITE SPOT ELEVATIONS 2-9-2026)

I HEREBY CERTIFY THAT:

I AM A PROFESSIONAL SURVEYOR AND MAPPER REGISTERED IN THE STATE OF FLORIDA, HOLDING CERTIFICATE NO. 4521, AND THAT I AM ACTING ON BEHALF OF LJA ENGINEERING, INC., A CORPORATION AUTHORIZED TO OFFER SERVICES OF REGISTERED LAND SURVEYORS AND MAPPERS IN THE STATE OF FLORIDA, HOLDING L.B. NO. 8569;

THIS ALTA/NSPS LAND TITLE SURVEY REPRESENTS A FIELD SURVEY PERFORMED UNDER MY SUPERVISION OF THE LAND SHOWN AND DESCRIBED HEREON;

THIS SURVEY WAS PREPARED WITH THE BENEFIT OF A TITLE COMMITMENT NO. (NACS250184) BY (FIDELITY NATIONAL TITLE INSURANCE COMPANY) (OFFICE FILE #(NAC250184) WITH AN EFFECTIVE DATE OF (MARCH 14, 2025) AT (8:00) (AM). (SEE SCHEDULE B SECTION II EXCEPTIONS IN NOTES CORESPONDING TO SCHECHULE B-II HEREON:

THE LOCATION OF UNDERGROUND UTILITIES WERE MARKED IN THE FIELD BY "THE UNDERGROUND DETECTIVE"(UGDET.COM). NO OTHER ATTEMPT TO LOCATE ANY OTHER UNDERGROUND UTILITIES OR PERTINENT ATTRIBUTES AFFECTING SUBJECT PROPERTY NOT ABSTRACTED NOR SURVEYED AS PART OF THE SCOPE OF THIS SURVEY EXCEPT AS SHOWN;

WETLAND OR JURISDICTIONAL AREAS (IF ANY) WERE NOT DETERMINED NOR LOCATED AS A PART OF THE SCOPE OF SURVEY;

PROPERTY SITUCATED IN FLOOD ZONE "X" PER FEMA FLOOD INSURANCE RATE MAP 12001C0120D WITH AN EFFECTIVE DATE OF 06/16/2006;

BEARINGS SHOWN HEREON ARE BASED ON GRID NORTH OF THE FLORIDA STATE PLANE COORDINATE SYSTEM, WEST ZONE (0902), NORTH AMERICAN DATUM OF 1983 (2011 ADJUSTMENT). A BEARING OF N.77°49'56"W. FOR THE NORTH LINE OF THE SUBJECT PROPERTY, AS SHOWN HEREON, WAS USED;

COORDINATES FOR THIS SURVEY ARE BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, WEST ZONE (0902), NAD1983 (2011 ADJUSTMENT) USING GEOID18 (NAVD1988), AND WERE ESTABLISHED USING RTK GPS BASE STATION AND ROVER, WITH THE BASE STATION OCCUPYING F.D.O.T. CONTROL MONUMENT 2626010GPS4, HAVING A PUBLISHED NORTHING OF 297,599.110, EASTING OF 2,595871.390, AND AN ELEVATION 99.94' (NAVD 1988);

ELEVATIONS SHOWN ON THIS SURVEY ARE BASED ON NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 1988). BENCHMARK'S USED WERE F.D.O.T. CONTROL MONUMENT 2626010GPS4 HAVING A PUBLISHED ELEVATION OF 99.94' (NAVD 1988);

OTHER INFORMATION USED IN THE PREPARTION OF THIS SURVEY:

1. PREVIOUS SURVEY OF THE OVERALL PROPOSED SUBDIVISION OF SANTA FE CROSSINGS (NOT YET RECORDED) PREPARED BY JB PRO, CERTIFICATE OF AUTHORIZATION LB8031, PROJECT NUMBER 514-21-01, SIGNED BY RICHARD L. WHITE, LS4816 DATED 12/02/2022;
2. BASE CAD FILE OF SANTA FE CROSSINGS ENTITILED "xbase-SFC.dwg FURNISHED BY CLIENT;
3. PDF FILE ENTITLED "Santa Fe Crossings - S&D Package.pdf" CONSISTING OF 11 PAGES, EACH WITH DESCRIPTION & SKETCHES OF THE EASEMENTS (NOT YET RECORDED) AS SHOWN HEREON;
4. F.D.O.T. RIGHT OF WAY MAPS FOR US HIGHWAY #441 (F.D.O.T. SECTION 2602-206/207)

UNLESS OTHERWISE NOTED, ALL BEARINGS AND DISTANCES SHOWN ON THIS SURVEY WERE FIELD MEASURED OR CALCULATED FROM OBSERVATIONS ELECTRONICALLY COLLECTED DURING THE FIELD SURVEY. DATA CONTAINED WITHIN PARENTHESIS (IF ANY) REPRESENTS THE RECORD DEED OR PLAT INFORMATION AND IS SHOWN FOR COMPARISON BETWEEN THE TWO;

THIS SURVEY IS NOT INTENDED TO DELINEATE THE REGULAR JURISDICTION OF ANY FEDERAL, STATE, REGIONAL OR LOCAL AGENCY, BOARD OR COMMISSION OR OTHER ENTITY;

THIS SURVEY MEETS THE STANDARDS OF PRACTICE (FORMERLY KNOWN AS THE MINIMUM TECHNICAL STANDARDS) FOR SURVEYING IN THE STATE OF FLORIDA, AS SET FORTH BY THE FLORIDA BOARD OF LAND SURVEYORS, RULE NO. 5J-17, FLORIDA ADMINISTRATIVE CODE, PURSUANT TO SECTION 472.027 OF THE FLORIDA STATUTES.

TO SHJ DEVELOPMENT, LLC, A DELAWARE LIMITED LIABILITY COMPANY; FIDELITY NATIONAL TITLE INSURANCE COMPANY:
THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 1, 2, 3, 4, 5, 7A, 8, 11B, 14, 16, 17, AND 18, OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON 04/16/2025. DATE OF PLAT OR MAP: (SEE PLOT STAMP IN MARGIN HEREON)

lasted about two minutes, investigators said.

By the time the complaint was filed in April 2024, Webb had moved to New Smyrna Beach. She was arrested in St. Johns County about a week later and released on bail.

In March 2026, prosecutors formally charged Webb with burglary of an unoccupied structure while wearing a mask. A theft charge was not pursued.

A jury found Webb guilty April 1, 2026. Judge Robert Groeb sentenced her the same day to 10 years in state prison. Webb has filed an appeal.

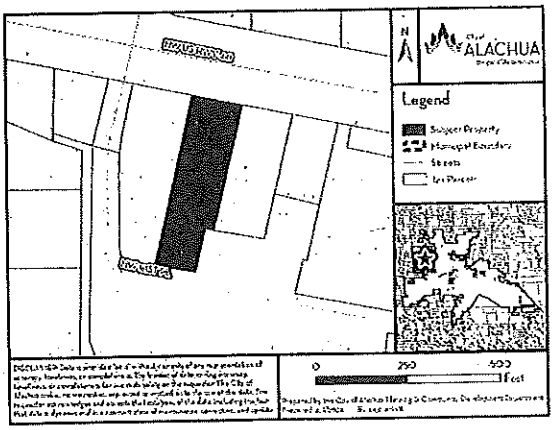
ADVERTISE IN ALACHUA COUNTY TODAY

A search of the vehicle yielded about 30 grams of marijuana in a bag in the back seat and a Glock 26

felony, possession of more than 20 grams of marijuana and resisting an officer without violence.



City of ALACHUA

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning and Zoning Board of the City of Alachua will hold a public hearing on April 21, 2026, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located 15100 NW 142nd Terrace, Alachua, Florida, to consider the following:

Application #: PSP25-0011 | Tidal Wave Auto Spa Site Plan

A request by Paulson Mitchell Wise, Inc. (Applicant/Agent) on behalf of Alachua 441/235 LLC (Property Owner) for a site plan proposing the construction of a ± 3,600 square foot carwash with associated site improvements on a ± 1.25-acre subject property, generally located on the southside of US Highway 441, between NW 173rd Street (CR 235A) and NW 174th Drive (Tax parcel 03044-003-000 (portion thereof); 03044-050-008 (portion thereof)). FLU: Commercial; Zoning: CI.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application, staff report, and any related materials are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. one week prior to the date of hearing. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL, 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

Four
(Number of signs)

Posted Notice Location Map
PSP25-0011 | Tidal Wave Auto Spa

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at regular intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

SIGNS MUST BE REMOVED BY THE APPLICANT WITHIN TEN DAYS AFTER THE FINAL DECISION ON THE APPLICATION

Board Agenda
Item

MEETING DATE: April 21, 2026

SUBJECT: PSP25-0012 | Westside Commons/Heartland Dental Site Plan Permit — A request by Alakai Acquisitions, LLC (Applicant/Agent) on behalf of Alachua Outparcel LLC and Santa Fe Hills Church of Christ, Inc. (Property Owners) for a site plan proposing the construction of a ± 4,200 square foot dental clinic with associated site improvements on a 0.69-acre subject property generally located along the north side of US Highway 441, just west of the intersection of US Highway 441 and NW 173rd Street (CR 235A) (Tax parcel 03044-001-002 (portion thereof); 03044-002-000 (portion thereof). FLU: Commercial, Zoning: Community Commercial (CC). (Quasi-judicial hearing)

PREPARED BY: Bryan Thomas

RECOMMENDED ACTION:

Staff recommends that the Planning & Zoning Board find the site plan application for Alachua Outparcel, LLC, to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and approve the site plan subject to the five conditions found in exhibit "A" and located on page 25 of the April 21, 2026, staff report.

Recommended Motion: *I move that, based upon the competent substantial evidence, the presentation before this Board, and Staff's recommendation, this Board finds the site plan application for Alachua Outparcel, LLC to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and approves the site plan, subject to the five conditions found in exhibit "A" and located on page 25 of the April 21, 2026, staff report.*

Summary

This application is a request by Alakai Acquisitions (applicant/agent), on behalf of Alachua Outparcel LLC (property owner), for a site plan which proposes the construction of a ± 4,200 square foot medical office with associated site improvements on a ± 1.28-acre subject property.

The ± 1.28-acre subject property (parts of Tax Parcels 03044-001-002 and 03044-002-000) is generally located at the northwest corner of US Highway 441 and NW 173rd Street. The site plan proposes to provide two points of ingress/egress via shared driveways, with the southern driveway accessing US Highway 441 and the northern driveway accessing NW 173rd Street. Stormwater is proposed to be directed to an off-site facility that is part of the Westside

Commons Infrastructure Plan approved on December 8, 2025.

FINANCIAL IMPACT

None.

Staff Report

Planning & Zoning Board Hearing Date: April 21, 2026
Quasi-Judicial Hearing **Application #: PSP25-0012**

SUBJECT:	A request for a site plan proposing the construction of a ± 4,200 square foot medical office with drive-through service and associated site improvements.
APPLICANT/AGENT:	Alakai Acquisitions
PROPERTY OWNER:	Alachua Outparcel, LLC
LOCATION:	Generally located on the northeast intersection of US Highway 441 and NW 173rd Street
PARCEL ID NUMBER:	03044-001-002 and 03044-002-000 (parts of)
FLUM DESIGNATION:	Commercial
ZONING:	Community Commercial
OVERLAY:	N/A
ACREAGE:	± 1.28
PROJECT PLANNER:	Bryan S. Thomas, AICP
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board find the site plan application for Alachua Outparcel, LLC, to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and approve the site plan subject to the five conditions found in exhibit "A" and located on page 25 of the April 21, 2026, staff report.
RECOMMENDED MOTION:	*I move that, based upon the competent substantial evidence, the presentation before this Board, and Staff's recommendation, this Board finds the site plan application for Alachua Outparcel, LLC to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and approves the site plan, subject to the five conditions found in exhibit "A" and located on page 25 of the April 21, 2026, staff report.*

SUMMARY

This application is a request by Alakai Acquisitions (applicant/agent), on behalf of Alachua Outparcel LLC (property owner), for a site plan which proposes the construction of a ± 4,200 square foot medical office with associated site improvements on a ± 1.28-acre subject property.

The ± 1.28-acre subject property (parts of Tax Parcels 03044-001-002 and 03044-002-000) is generally located at the northwest corner of US Highway 441 and NW 173rd Street. The site plan proposes to provide two points of ingress/egress via shared driveways, with the southern driveway accessing US Highway 441 and the northern driveway accessing NW 173rd Street. Stormwater is proposed to be directed to an off-site facility that is part of the Westside Commons Infrastructure Plan approved on December 8, 2025.

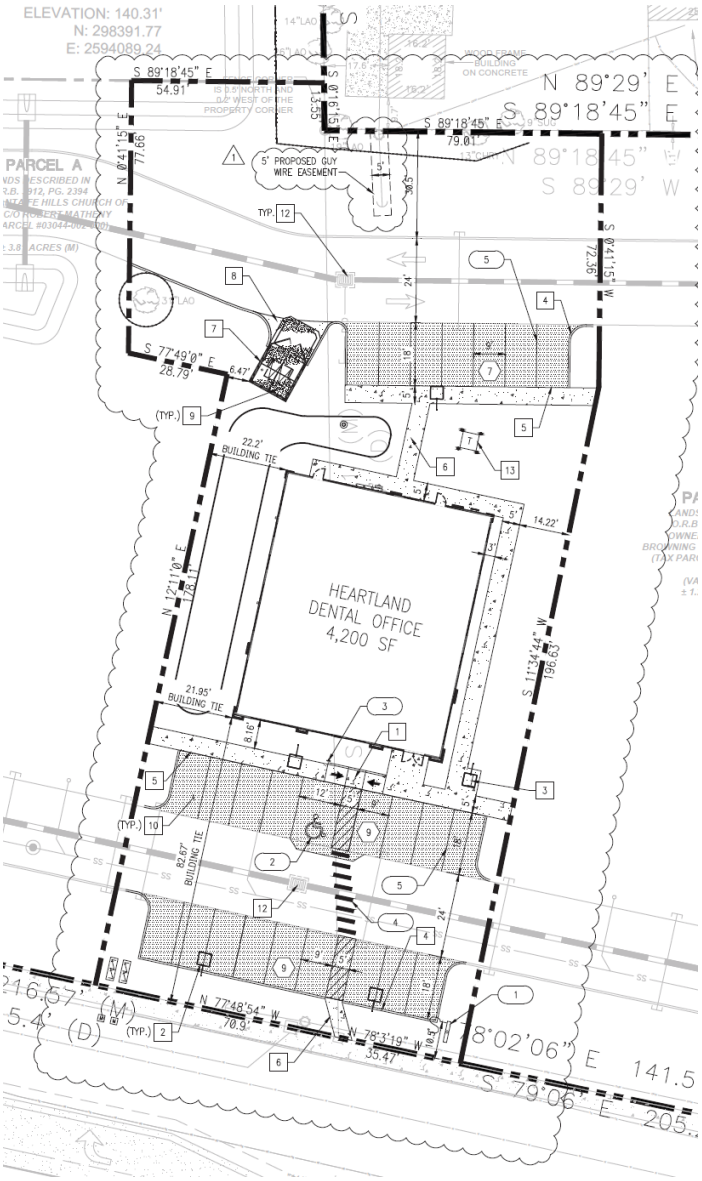

Figure 1. Proposed Site Plan Overview

EXISTING USES

The subject property is currently undeveloped and mostly cleared.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 1. Figure 2. provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Residential	Agriculture	Agricultural
South	Gas Station	Commercial	Commercial Intensive
East	Vacant	Commercial	Community Commercial
West	Church	Commercial	Community Commercial

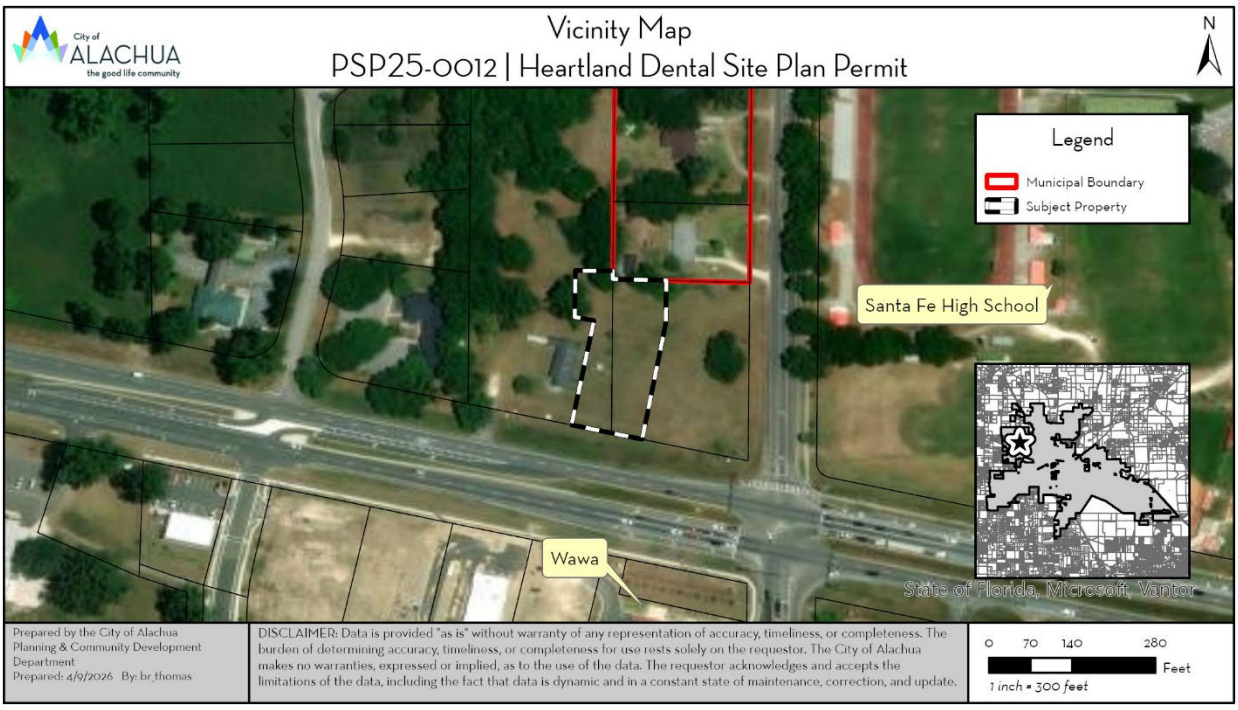

Figure 2. Vicinity Map

NEIGHBORHOOD MEETING

The purpose of a neighborhood meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. Neighborhood meetings are required for site plan applications.

A neighborhood meeting was held on October 21, 2025 at the Legacy Park Multipurpose Center, Meeting Room #2. As required by Section 2.2.4 of the City's Land Development Regulations, all property owners within 400 feet of the subject property were notified and notice of the meeting was published in a newspaper of general circulation. The applicant was available to answer questions. Materials submitted by the applicant indicate that the meeting was attended by one member of the public.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Future Land Use Map 2035*

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Objective 1.3: *Commercial & Mixed-Use*

The City shall establish three commercial and mixed-use land use categories: Community Commercial, Commercial, and Central Business District. These land use categories shall provide a broad range of commercial uses, including retail sales and services, personal services, offices, and tourist-oriented uses, and the potential for mixed-use developments in order to provide for the availability of goods and services, both to the citizens and visitors of Alachua and to the citizens of the North Central Florida region while diversifying the housing stock.

Policy 1.3.b: *Commercial*: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Recreation and entertainment;

5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Evaluation & Findings: The subject property's future land use category is Commercial. The proposed use of a medical office falls under eating establishments, which is an allowed use in the Commercial future land use category. The use supports the objective of the commercial and mixed-use future land use categories by providing goods to citizens and visitors of the Alachua and North Central Florida region.

Policy 1.3.d: *Design and performance standards*: The following criteria shall apply when evaluating commercial development proposals in the commercial & mixed-use future land use categories:

21. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage and/or shared access;

Evaluation & Findings: The proposed site plan includes an interior shared driveway with two vehicular ingress/egress points from NW 173rd Street and US Highway 441 to provide for safe and efficient vehicular movements. One pedestrian connection to the sidewalk adjacent to US Highway 441 is proposed to provide for safe pedestrian access.

22. Buffering from adjacent existing/potential uses;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the required buffer standards as established in Section 6.2.2 and Section 6.2.3 of the City's Land Development Regulations.

23. Open space provisions and balance of proportion between gross floor area and site size;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the minimum required open space standards as established in Section 6.7 of the City's Land Development Regulations.

24. Adequacy of pervious surface are in terms of drainage requirements;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the maximum allowable impervious area standard as established in Table 5.1-3. Of the City's Land Development Regulations. Additionally, all stormwater will be conveyed to an off-site stormwater management facility that is part of the Westside Commons Infrastructure Plan approved on December 8, 2025.

25. Placement of signage;

Evaluation & Findings: Commercial signage is to be permitted separately from the proposed site plan and the applicant has been notified of such requirement under Section 2.4.11. All incidental signage and signage required for traffic control has been reviewed and the site plan demonstrates that the placement of signage will not interfere with visibility, landscaping, utilities, or site circulation.

26. Adequacy of site lighting and potential impacts of lighting upon surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution in adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;

Evaluation & Findings: The proposed site plan included a photometric plan and has demonstrated compliance with the outdoor lighting standards as established in Section 6.4 of the City's Land Development Regulations.

27. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout, drive aisles, and points of conflict;

Evaluation & Findings: The proposed site plan has demonstrated a safe on-site circulation pattern, including an exhibit demonstrating access and maneuverability of a typical Alachua County Fire Rescue vehicle (40 feet in length, 8.17 feet in width). A loading space is not required for the proposed site plan by Section 6.1 of the City's Land Development Regulations; however, the applicant has stated that deliveries are to occur during non-peak or non-business hours only.

28. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;

Evaluation & Findings: The proposed site plan has demonstrated compliance with the tree protection and landscaping standards as established in Section 6.2 of the City's Land Development Regulations.

29. Unique features and resources which may constrain site development such as soils, existing vegetation and historic significance; and,

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. The soils present are well drained soils in hydrologic group A, with only slight limitations for development. There is no existing vegetation on the site other than grass/sod cover as it was cleared as part of the Westside Commons Infrastructure Plan approved on December 8, 2025. No historically significant structures are present on the site.

30. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design.

Evaluation & Findings: No performance based zoning requirements are being applied to the development.

Policy 1.3.e: *Density and intensity standards*.

1. *Non-mixed-uses*. The following density and intensity standards shall apply to non-mixed-use development proposals in the commercial & mixed-use future land use categories:
    a. *Density*. Residential uses are limited to a density of 10 dwelling units per acre in the Community Commercial land use category and 15 dwelling units per acre in the Commercial and Central Business District land use categories.
    b. *Intensity*. Non-residential uses are limited to an intensity of less than or equal to 0.5 floor area ratio for parcels 5 acres or greater, 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less.

Evaluation & Findings: The proposed site plan is a non-residential development consisting of ± 4,200 square feet of floor area on a ± 1.28-acre subject property. As such the permitted floor area ratio is 0.75 and the floor area ratio of the proposed site plan is ± 0.08 and is therefore acceptable.

Objective 5.1: *Natural Features*

The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: *Topography*: The City shall protect the natural topography of the City. Including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: *Soils*: The City shall ensure soil protection and intervention measures are included in the development process.

Policy 5.1.c: *Flood prone areas*: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permits when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: *Wetlands*: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and Suwannee River Water Management District.

Policy 5.1.e: *Habitat*: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. There are no concerns related to environmental features, topography, soils, flood prone areas, wetlands, or habitat on the subject property.

Objective 9.1: *Connections to Water and Wastewater Systems*

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

Policy 9.1.a: Any new development or redevelopment within a Commercial or Industrial land use category within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the City's Comprehensive Plan, shall connect to the City's potable water and wastewater system.

Evaluation & Findings: The proposed site plan is located with the City's potable water and wastewater service areas and will connect to these City services as required.

Transportation Element

Objective 1.1: *Level of Service*

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of any affected roadway segment.

Policy 1.4.d: The City shall require pedestrian paths within subdivision and within new developments to be connected to paths outside the development.

Evaluation & Findings: The proposed site plan shows a sidewalk connection from the internal pedestrian network to the sidewalk running along to NW US Highway 441, adjacent to the proposed development.

Policy 1.5.c: The City shall require new development and redevelopment which is compatible with an adjacent existing development(s) to interconnect with existing development (s) through one or more of the following methods:

1. Through the extension of a public or private street from the new development to the adjacent existing development or adjacent lands; and/or,
2. Through joint use of driveways and cross access agreements among adjoining properties to allow circulation between sites. Cross access between new development and existing development shall be configured to provide safe and convenient interconnectivity between the new development and all other existing development located along the cross access corridor.

Evaluation & Findings: The proposed site plan shows access to shared use driveways to the north and south, with connections to US Highway 441 and NW 173rd Street to provide for safe and efficient vehicular movements.

Community Facilities Element

Policy 1.1.d: The City hereby establishes the following level of service standards for sanitary sewer facilities:

a) *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection (FDEP).

b) *Quantity*: System-wide wastewater collection and treatment will be sufficient to provide a minimum of 250 gallons per day per equivalent residential unit (ERU) on an average annual basis. Plant expansion shall be planned in accordance with Rule 62-600.405, Florida Administrative Code, or subsequent provision.

c) *System capacity*: If the existing demand and reserved capacity of the committed use of the City's wastewater facility reaches 85% of the permitted capacity design, no further development orders for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of the City's wastewater facilities.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities for residential uses:

Facility Type	Level of Service Standard
Solid Waste Landfill	0.73 tons per capita per year

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of the City's solid waste facilities.

Policy 4.1.c: The City establishes the following level of service standards for potable water:

3. *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection.

4. *Quantity*: System-wide potable water distribution and treatment will be sufficient to provide a minimum 275 gallons per day per equivalent residential unit (ERU) on an average annual basis.

5. *Capacity*: Plant expansion shall be planned in accordance with Florida Administrative Code. Additionally, if the existing demand and reserved capacity f the City's potable water facility reaches 85% of the permitted design capacity, no further development orders or permits for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: Staff has prepared, and included within this report, a public facilities impact analysis. The proposed site plan is not anticipated to degrade the level of service of the City's potable water facilities.

Conservation and Open Space Element

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. There are no concerns related to listed species or their habitat on the subject property. As such. A listed species inventory is not required prior to development approval.

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrological disturbances.

Evaluation & Findings: Staff has prepared, and included within this report, an environmental conditions analysis. There are no concerns related to wetlands on the subject property.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Evaluation & Findings: There are no delineated wetlands on the subject property. Should wetlands be discovered, the development will be required to conform with the applicable policies and regulations established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation & Findings: The subject property is not located within or adjacent to a strategic ecosystem; therefore, the development will have no impact upon any strategic ecosystems identified within the ecological inventory report.

Regulated Plant & Animal Species

The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region.

Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation & Findings: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. No areas of the subject property have been prioritized as part of the Florida Natural Areas Inventory. If a regulated plant or animal species is discovered, the development will be required to conform with the applicable policies and regulations established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Soil Survey

The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff.) There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have a lower infiltration rate and therefore a higher runoff potential.

There is one soil type found within the subject property, shown in Table 2.

Table 2. Soil Types

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Arredondo-Urban Land Complex; 0-5% Slopes	A	Well Drained	Slight	Slight	100%

Evaluation & Findings: The soil types present on the subject property do not pose any significant limitations for development.

Flood Potential

Panel 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the development area is in Flood Zone X (areas determined to be outside of the 500-year floodplain).

Evaluation & Findings: Since the subject property is located in Flood Zone X, there are no issues related to flood potential.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.

Evaluation & Findings: The subject property is located within a Karst sensitive area. No potential sink holes are known to exist on the site. Stormwater is being conveyed to an off-site management facility approved as part of the Westside Commons Infrastructure Plan and no new stormwater management facilities are proposed.

Wellfield Protection Zones

Policy 7.2.1 of the Future Land Use Element of the City's Comprehensive Plan establishes a 500-foot radius area around each city-owned potable water well.

Evaluation & Findings: The subject property is not located within a City of Alachua wellfield protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the City's Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures/Markers and Historic Features

The State of Florida and the Alachua County Historic Resources Inventory identify historic structures in addition to the City's Historic Overlay District, as established by Section 3.7 of the City's Land Development Regulations.

Evaluation & Findings: The subject property is not within the City's Historic Overlay District and the State of Florida and Alachua County Historic Resources Inventory note no historic structures or markers on the subject property.

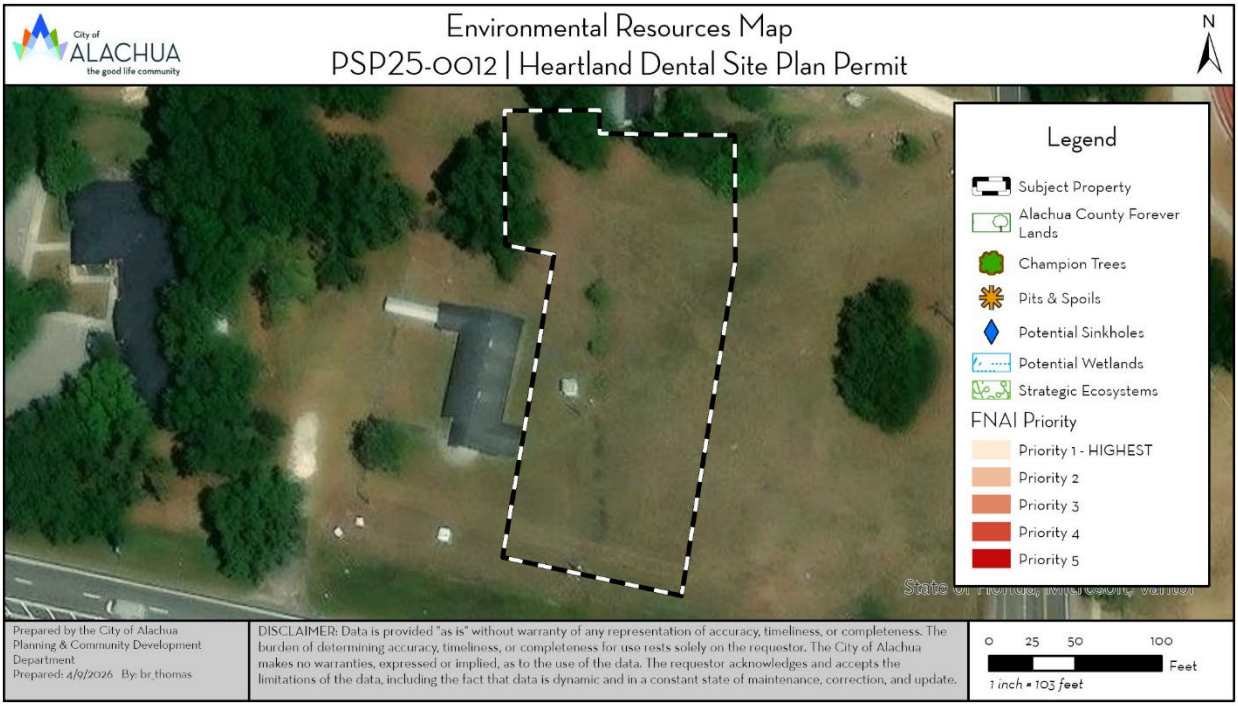

Figure 3. Environmental Resources Map

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Site Plan Standards

Section 2.4.9(E)(1) of the City's Land Development Regulations (LDRs) establishes the standards with which all site plans must be found compliant. The application has been reviewed for compliance with the standards of Section 2.4.9(E)(1). An evaluation of the findings of the applicant's compliance with the standards of Section 2.4.9(E)(1) is provided below.

(1) ***Minor site plan and site plan standards***. A minor site plan or site plan shall be approved only upon a finding the applicant demonstrates all the following requirements are met:

(a) ***Consistency with the Comprehensive Plan***. The development and uses proposed by the minor site plan or site plan comply with the goals, objectives and policies of the Comprehensive Plan.

Evaluation & Findings: An evaluation of the application's consistency with the Comprehensive Plan has been included within this report. Staff has found the application to be consistent with the City of Alachua Comprehensive Plan.

(b) ***Use allowed in zone district***. The use is allowed in the zone district in accordance with Article 4, Use Regulations.

Evaluation & Findings: The use type of medical office is a permitted use in the Community Commercial (CC) zone district.

(c) ***Zone district use specific standards***. The development and uses proposed by the minor site plan or site plan comply with Section 4.3, Use specific standards.

Evaluation & Findings: Use specific standards for medical offices are established in Section 4.3.2(E)(2) of the City's Land Development Regulations. The application has been reviewed against, and found to comply with, the use specific standards.

(d) ***Development and design standards***. The development proposed by the minor site plan or site plan and its general layout and design comply with all applicable standards in Article 6, Development Standards.

Evaluation & Findings: The application has been reviewed for compliance with all relevant standards of Article 6, including Section 6.1, *Off-street parking and loading standards*, Section 6.2, *Tree protection and landscaping standards*, Section 6.3, *Fencing standards*, Section 6.4, *Exterior lighting standards*, Section 6..6, *Infill standards*, Section 6.7, *Open space standards*, Section 6.8, *Design standards for business uses*, and Section 6.9, *Environmental protection standards*.

(e) *Subdivision standards*. In cases where a subdivision has been approved or is pending, the development proposed by the minor site plan or site plan and its general layout and design comply with all applicable standards in Article 7, Subdivision Standards.

Evaluation & Findings: No subdivision of land is proposed as part of this application; therefore, this standard is not applicable.

(f) *Complies with all other relevant City laws, ordinances, regulations, requirements, and State and Federal laws and regulations*. The proposed development and use complies with all other relevant City laws, ordinances, regulations, requirements, and with all State and Federal laws and regulations.

Evaluation & Findings: The application complies with all other relevant City laws, ordinances, regulations, requirements, and State and Federal laws and regulations.

Design Standards for Business Uses

Section 6.8.2 of the City's Land Development Regulations (LDRs) establishes the standards with which all business uses, unless exempted by Section 6.8.1, must be found compliant. The application has been reviewed for compliance with the standards of Section 6.8.2. An evaluation of the findings of the applicant's compliance with the standards of Section 6.8.2 is provided below.

(A) *Façade and material design*.

(1) *Generally*. All façades facing a street, lands containing existing residential uses, or vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8, or RMF-15, shall be subject to the standards set forth in Subsection 6.8.2(A)(2).

(2) *Standards*.

(a) *Glazing*.

(i) Glazing of the front facade in the following amounts:

a. Twenty percent of the ground floor façade area when it faces a street or a publicly-accessible parking area which is a part of the development and consists of 15 percent or more of the development's minimum off-street parking requirement pursuant to Section 6.1.4(B);

b. Fifteen percent of the ground floor façade area when it faces any vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.

(ii) For the purposes of this section, the ground floor façade area of single-story buildings shall be calculated by measuring the applicable building wall between the finished grade and the underside of the roof of the facade. When a building wall includes a parapet, the ground floor façade area shall be calculated by measuring to the top of the parapet. For buildings with more than one story, the ground floor façade area shall be calculated by measuring the applicable building wall between the finished grade and the underside of the floor above the ground level floor.

(iii) Windows shall not use reflective or heavily tinted glass that obstructs views into the building.

(iv) Spandrel glass may be used only when an architectural floorplan demonstrates that windows cannot be provided due to a limitation presented by the interior layout or functional purpose of such interior space.

Evaluation & Findings: Two of the four façade faces substantially face a street, publicly accessible parking area which consists of 15 percent or more of the development's minimum off-street parking requirement, and/or vacant lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8, or RMF-15 or lands containing existing residential uses. The north and south elevations all consist of a minimum 20% glazing.

(b) *Façade massing*.

(i) *Offset required*. Front facades and street-facing facades shall incorporate wall offsets of at least two feet in depth (projections or recesses) a minimum of every 30 feet. Each required offset shall have a minimum width of ten feet.

(ii) *Offset alternatives*. The following alternatives can be used in place of the required front façade offsets:

a. Façade color changes following the same dimensional standards as the offset requirements;

b. Pilasters having a minimum depth of one foot, a minimum width of one foot, and a minimum height of 80 percent of the façade's height; and/or

c. Roofline changes when coupled with correspondingly aligned façade material changes.

Evaluation & Findings: Two of the four façade faces substantially face a street. The north façade is approximately 60 feet in width and incorporates one wall offset at least two feet in depth to ensure no expanse exceeds 30 feet. The south façade is approximately 60 feet in width and incorporates two wall offsets at least two feet in depth to ensure no expanse exceeds 30 feet.

(c) *Material design*.

(i) A minimum of 25 percent of the materials utilized for each side facade and the rear façade shall be the same as the materials utilized for the front or street-facing façade(s).

Evaluation & Findings: All four façade faces use an approximately similar ratio of the same three materials and glazing.

(d) *Prohibited materials*. The following materials shall be prohibited:

(i) Metal siding in more than 50 percent of any façade when visible from a street, lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses;

(ii) Exposed smooth finished concrete block when visible from a street, lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses; and,

(iii) Exposed split face concrete block in more than 60 percent of any façade.

Evaluation & Findings: The façade is comprised of one brick accent material, stucco/plaster sections comprised of different colors, and metal soffits, trim coping and downspouts in black.

(3) *Screening of mechanical equipment*. Mechanical equipment shall be fully concealed from visibility from a street, lands classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.

Evaluation & Findings: The applicant has submitted an exhibit demonstrating that all rooftop mechanical equipment will be screened from view of the adjacent streets by use of parapet wall and other mechanical equipment will be screened from view with landscaping.

(B) *Connections to sidewalk system*.

(1) When a sidewalk system exists within a right-of-way which is contiguous to the development, a minimum of one pedestrian connection to the sidewalk system shall be provided. On-site pedestrian circulation patterns shall be configured to provide safe and convenient access from the off-site sidewalk system to the main entrance(s) of the building(s). Sidewalks shall be constructed in accordance with Subsection 7.3.2(B), Configuration.

Evaluation & Findings: A sidewalk system is present along U.S. Highway 441 and NW 173rd Street. One sidewalk connection is proposed from the south side of the proposed building to the sidewalk running along US Highway 441.

(C) *Interconnectivity with adjacent business uses*.

(1) All uses subject to this section shall provide interconnection with adjacent existing compatible developments through one or more of the following methods:

(a) Through extension of a public or private street from the new development to the adjacent existing development or adjacent lands; and/or

(b) Through joint use of driveways and cross access agreements among adjoining properties to allow circulation between sites. Cross access between new development and existing development shall be configured to provide safe and convenient interconnectivity between the new development and all other existing development located along the cross-access corridor.

Evaluation & Findings: The proposed site plan shows connection to the internal driveway system on both the north and south sides of the development to provide for safe and efficient vehicular movements.

PUBLIC FACILITIES IMPACT ANALYSIS

Section 2.4.14 of the City's Land Development Regulations (LDRs) establishes the standards for a Certificate of Concurrency Compliance which applies to all development orders unless exempted by Section 2.4.14(C). The application has been reviewed for impacts to roads, sanitary sewer, solid waste, stormwater management, potable water, and recreation facilities to ensure the application's potential impacts do not negatively impact the level of service (LOS) for those public facilities.

Traffic Impact

The following impacts are expected on the roadway segments identified in Table 3-1.

Table 3-1. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2]	Segment Description	Lanes	Functional Classification	Area Type	LOS
6	U.S. Hwy 441 From I-75 to CR 235A	4/D	Principle Arterial	Urban	D
7	U.S. Hwy 441 From CR235A to NW 188th Street	4/D	Principal Arterial	Urban	D
16	CR 235A From U.S. Hwy 441 to North City Limit	2/U	Major Collector	Comm	D
17	CR 235A From U.S. Hwy 441 to CR 235	2/U	Major Collector	Comm	D

1 City of Alachua Comprehensive Plan, Transportation Element.
2 For developments generating less than 1,000 trips, affected roadway segments are identified as all those wholly or partially located within 1/2 mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater [Section 2.4.14(H)(2)(a)of the LDRs].

Table 3-2. Projected Impact on Affected Comprehensive Plan Roadway Segment

Traffic System Category	Segment 6 US 441		Segment 7 US 441		Segment 16 CR 235A		Segment 17 CR235A	
	AADT	Peak Hour	AADT	Peak Hour	AADT	Peak Hour	AADT	Peak Hour
Maximum Service Volume[1]	39,000	3,510	43,000	3,870	15,120	1,359	15,120	1,359
Existing Traffic[2]	32,500	2,782	24,000	2,093	2,524	227	7,200	647
Reserved Trips[3]	2,138	207	1,658	150	1,174	117	4,772	448
Available Capacity[3]	4,362	521	17,342	1,627	11,422	1,015	3,148	264
Increase/Decrease in Trips Generated by Development[4]	79	9	44	5	9	1	15	2
Residual Capacity	4,283	512	17,298	1,622	11,413	1,014	3,133	262
Residual Percentage of Permitted Design Capacity Utilized	89.02%	85.41%	59.77%	58.09%	24.52%	25.39%	79.28%	80.72%

1 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
2 Florida Department of Transportation. (2025). *2024 Count Data*. Accessed via Florida Traffic Online April 2025.
3 Source: City of Alachua April 2026 Development Monitoring Report.
4 Trip Generation Formula: ITE Trip Generation 11th edition, ITE Code 934; Trip Distribution: Segment 6 – 54%; Segment 7 – 30%; Segment 16 – 6%; Segment 17 – 10%.

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of the affected roadway segments; therefore, the impacts are acceptable. Note that impacts of the proposed site plan may negatively impact the capacity of roadway segment 6 for average annual daily trips (AADT); however, level of service standards are maintained and monitored for PM peak hour trips per Policy 1.1.a of the Transportation Element of the City of Alachua Comprehensive Plan. A site plan is a final development order, and if approved, concurrency will be reserved.

Potable Water Impacts

Table 4. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity[1]	3,000,000
Less Actual Potable Water Flows[1]	1,447,333
Reserved Capacity[2]	350,100
Available Capacity	1,202,567
Increase/Decrease in Potable Water Demand from Application[3]	400
Residual Capacity	1,202,167
Residual Percentage of Permitted Design Capacity Utilized	59.93%

1 City of Alachua Public Services Department, April 2026
2 City of Alachua April 2026 Development Monitoring Report
3 Formula: Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 4.1.c(2): 275 GPD / Unit

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of the City's potable water facilities; therefore, the impacts are acceptable. Note that Policy 4.1.c(3) of the Community Facilities Element of the City of Alachua Comprehensive Plan states if the existing demand and reserved capacity of the City's potable water facility reaches 85% of the permitted design capacity, no further development orders or permits for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement. Funds have been allocated in the Fiscal Year 2025 – 2029 Capital Improvements Program to address capacity of potable water facilities; therefore, there are no issues related to exceeding the 85% design capacity. A site plan is a final development order, and if approved, concurrency will be reserved.

Sanitary Sewer Impacts

Table 5. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Permitted Capacity[1]	1,500,000
Less Actual Treatment Plant Flows[1]	756,000
Reserved Capacity[2]	325,846
Available Capacity	418,154
Increase/Decrease in Sanitary Sewer Demand from Application[3]	400
Residual Capacity	417,754
Residual Percentage of Permitted Design Capacity Utilized	72.15%

1 City of Alachua Public Services Department, April 2026
2 City of Alachua April 2026 Development Monitoring Report
3 Formula: Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 1.1.d(b): 250 GPD / Unit

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of the City's wastewater facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Solid Waste Impacts

Table 6. Solid Waste Impacts

System Category	Pounds Per Day	Tons Per Year
Existing Demand[1]	45,412.00	8,287.69
Reserved Capacity[2]	43,496.82	7,938.17
Increase/Decrease in Demand Generated by Application[3]	115	21
New River Solid Waste Facility Anticipated Capacity[4]	30+ Years	

1 Bureau of Economic & Business Research, University of Florida, Estimates of Population by County and City in Florida (2025); Policy 2.1.a, Community Facilities Element. Formula: 11,015 Persons x 0.73 tons per year.
2 City of Alachua April 2026 Development Monitoring Report
3 Formula: Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 2.1.a: 0.73 tons / year per capita
4 New River Solid Waste Association, April 2026

Evaluation & Findings: The proposed site plan application is not anticipated to adversely impact the level of service of solid waste facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

Recreation Facilities

The proposed development is a nonresidential development; therefore, there are no impacts to recreation facilities. The development will have no impact to the Level of Service (LOS) of recreation facilities.

Public School Facilities

The proposed development is a nonresidential development; therefore, there are no impacts to public school facilities. The development will have no impact to the Level of Service (LOS) of public school facilities.

Stormwater Management Facilities

The proposed site plan application is part of the Westside Commons Infrastructure Plan approved on December 8, 2025, and will convey stormwater to off-site stormwater management facilities as part of the Westside Commons Infrastructure Plan. A stormwater management report was submitted by the applicant as part of the application materials and demonstrates compliance with the level of service standard for stormwater management facilities. No City maintained facilities are to be impacted by the site plan. The proposed site plan application is not anticipated to impact the level of service of stormwater management facilities; therefore, the impacts are acceptable. A site plan is a final development order, and if approved, concurrency will be reserved.

CHIPOTLE SITE PLAN
STAFF REPORT

CONDITIONS

1. The applicant acknowledges and agrees that deliveries of supplies and materials to the site made by any vehicle with more than two axels must occur during non-business hours or during non-peak hours whenever practicable to ensure a safe and efficient vehicular and pedestrian circulation pattern. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
2. The applicant acknowledges and agrees that any proposed tree planting (canopy and understory) shown on the landscape plans that is located within 5' of a public utility line will be relocated to be a minimum distance of 5', and a preferred distance of 10', from a public utility line and a revised landscape plan sheet will be submitted demonstrating compliance with this condition. The applicant further agrees that administrative approval of the revision must be obtained prior to the issuance of a building permit for any building activity associated with this development order. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
3. The applicant acknowledges and agrees that it shall obtain all other applicable local, state, and federal permits before the commencement of site plan work. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
4. The applicant acknowledges and agrees that to ensure the continued compliance with the City of Alachua Comprehensive Plan and Land Development Regulations, the development order authorizing this site plan shall be recorded in the public records of Alachua County, Florida, and shall run with the land. The applicant shall be responsible for all costs associated with recording the development order in the public records of Alachua County, Florida. This condition shall be the obligation of any subsequent party with interest in the property subject to this development order.
5. The applicant acknowledges and agrees that Conditions 1 – 4 as stated above do not inordinately burden the land and shall be binding upon the property owner, including any subsequent property owners, successors, or assigns, and that the site plan shall comply with Conditions 1 -5 as stated herein.

RE: Notice of Hearing to be Scheduled for Westside Commons-Heartland Dental Site Plan Application

Dear Zach Pinel,

On February 12, 2026, the City of Alachua received your revised site plan application for the Westside Commons-Heartland Dental project submitted on behalf of Alachua Outparcel LLC. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been tentatively scheduled for the April 21, 2026 Planning & Zoning Board meeting, pending resubmittal of final landscaping plans that meet City of Alachua landscaping requirements as set forth in Sec. 6.2. of the City's Land Development Regulations.

You must provide two *double sided, three-hole punched, color sets* of each **complete** application package, seven full size sets of site plans, and a digital copy of all materials in PDF format on a CD or by emailing a Cloud/FTP link to download the materials to planning@cityofalachua.org *no later than 10 business days prior to the Planning & Zoning Board meeting at which your application is scheduled to be heard*; therefore, the above referenced materials must be submitted to the City no later than ***Thursday, April 9, 2026***. Materials may be submitted earlier than this date.

Additionally, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing; therefore, posted notice signs must be placed on the property no later than ***Tuesday, April 7, 2026***. These signs will be ready for pickup after 12:00 PM on Thursday, April 2, 2026. You will be notified again when the signs are available.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6122 or at br_thomas@cityofalachua.com.

Sincerely,

Bryan S. Thomas
Director of Planning & Community Development

RE: Project Assistance Team (PAT) Comments for Westside Commons~Heartland Dental Site Plan Application

Dear Zach Pinel,

On October 27, 2025, the Planning & Community Development Department received your site plan for the Westside Commons~Heartland Dental project, which proposes the construction of a ± 4,200 square foot building with associated site improvements on a ± 0.69-acre subject property (tax parcel 03044-001-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). The City's Planning Assistance Team (PAT) has reviewed the application materials and determined the following insufficiencies require attention. You can request a meeting to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Thursday, February 12, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies, which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April 21, 2026, Planning & Zoning Board (PZB) Meeting.**

Please address the following insufficiencies:

Deficiencies to be Addressed

***Unless otherwise noted, references to the code sections are to the City of Alachua Land Development Regulations. ***

1. Article 2, Administration

   Section 2.4.9, Minor Site Plans, Site Plans, and Infrastructure Plans

   a. According to Section 2.4.9(E)(1)(a) of the Land Development Regulations (LDRs), a justification must be provided to demonstrate how the proposed dental office is consistent with the adopted policies, goals, and objectives of the Comprehensive Plan. This justification must extend beyond general statements of alignment and specifically detail how the proposal aligns with particular goals, objectives, and policies.

   b. The response to Policy 1.3.d. regarding Design and Performance Standards lacks specificity. It states, "The site plans for the subject property conform to the above requirements. The proposed density is well below the maximum allowable." However, this response does not adequately fulfill the necessary requirements. Each standard shall be addressed individually and in detail concerning the subject property. Furthermore, the reference to density is incorrect; density pertains to residential properties, not commercial ones. The appropriate measurement for commercial properties is intensity. A correction is needed.

2. Article 6, Development Standards

   Sec. 6.1, Off-Street Parking Standards

   Section 6.1.4(B), Table 6.1-1, outlines the minimum required parking for the proposed dental office. The Site Data Table indicates that 21 parking stalls are provided. However, there is also reference to "27 spaces." Please clarify the significance of this additional total, as it affects the requirement for accessible parking stalls, necessitating 2 instead of 1.

3. Site Dimension Plan
   a. Upon reviewing Sheet C1.0, Site Dimension Plan, it appears that the number of parking spaces listed in the Site Data Table does not match the actual count. Instead of the 21 spaces indicated, there are a total of 25. Please correct the number of parking stalls to align with the figure shown in the referenced table.

b. Sheet L1, Landscape Plan, has details on the top of the page that are covered, so this sheet will need corrections to confirm compliance.

4. Miscellaneous

a. Upon receipt and review of the updated major site plan, please be advised that additional review comments may be prompted if there are noticeable changes, modifications, or inconsistencies introduced relative to the original submittal, or if the changes impact previously reviewed setbacks, site layout, or other data. Should the scope of development alter, the Planning & Community Development Department reserves the right to re-evaluate all aspects of the project.

b. When submitting revised plan sets, they shall be accompanied by a written response addressing all comments.

If you have any questions regarding the information above, please contact me at (386) 418-6126 or via email at Be_Fisher@CityofAlachua.org.

Sincerely,

Bernadette Fisher

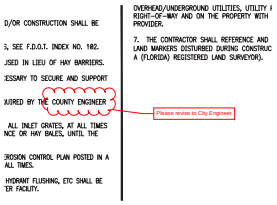
MEMORANDUM

To:	Bernadette Fischer	**Date:**	January 19, 2026
From:	Randall S. Olney, PE	**Project:**	Heartland Dental – Westside Commons
CC:	NV5 File		
Subject:	1st Engineering Review		

This memo is for the first review of the Heartland Dental – Westside Commons Site Plan Application to the City of Alachua. Please note the comments below are provided as the engineering review for the City of Alachua only. Plan resubmittals with responses to comments and plan revisions are subject to additional comments.

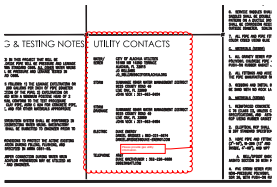
Please find the engineering review comments that relate to specific plan sheets attached.

Heartland Dental - Westside Commons - 1st Review



C0.0 - COVERSHEET (1)

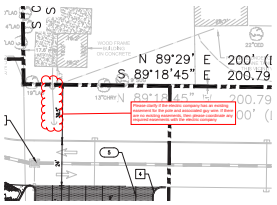
Page Label: C0.0 - COVERSHEET
Color:



Please note that FAC 61G15-23.004 was updated on 4/21/2025 slightly revising the note required when digitally signing and sealing engineering documents. Please ensure any digitally signed and sealed documents that are resubmit meet current FAC requirement.

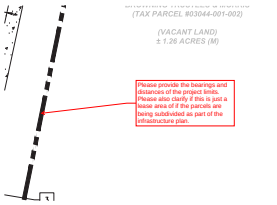
C0.1 - GENERAL NOTES (2)

Page Label: C0.1 - GENERAL NOTES
Color:



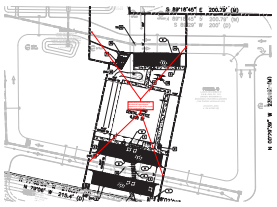
Please revise to City Engineer

Page Label: C0.1 - GENERAL NOTES
Color:



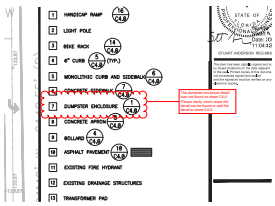
Please provide gas utility information.

C1.0 - SITE DIMENSION PLAN (4)



Page Label: C1.0 - SITE DIMENSION PLAN
Color:

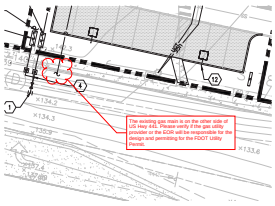
Please clarify if the electric company has an existing easement for the pole and associated guy wire. If there are no existing easements, then please coordinate any required easements with the electric company



Page Label: C1.0 - SITE DIMENSION PLAN
Color:

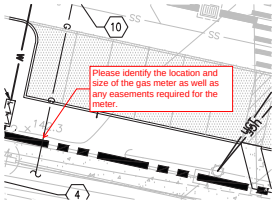
Please provide the bearings and distances of the project limits. Please also clarify if this is just a lease area of if the parcels are being subdivided as part of the infrastructure plan.

Page Label: C1.0 - SITE DIMENSION PLAN
Color:



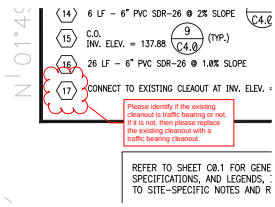
Please clarify if the drive aisles are within an ingress/egress easement or a right of way as part of the infrastructure plan

Page Label: C1.0 - SITE DIMENSION PLAN
Color:



The dumpster enclosure detail was not found on sheet C4.0. Please clarify which sheet the detail can be found or add the detail to sheet C4.0.

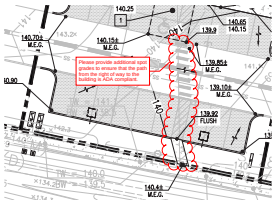
C2.0 - SITE UTILITY PLAN (3)



Page Label: C2.0 - SITE UTILITY PLAN
Color:

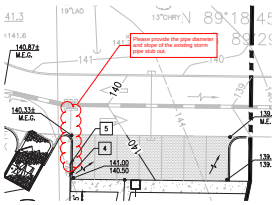
The existing gas main is on the other side of US Hwy 441. Please verify if the gas utility provider or the EOR will be responsible for the design and permitting for the FDOT Utility Permit.

Page Label: C2.0 - SITE UTILITY PLAN
Color:



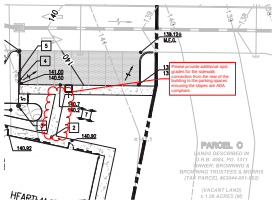
Please identify the location and size of the gas meter as well as any easements required for the meter.

Page Label: C2.0 - SITE UTILITY PLAN
Color:



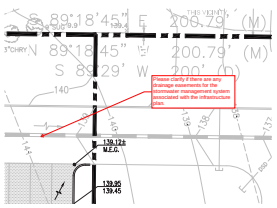
Please identify if the existing cleanout is traffic bearing or not. If it is not, then please replace the existing cleanout with a traffic bearing cleanout.

C3.0 - SITE GRADING & DRAINAGE PLAN (4)



Page Label: C3.0 - SITE GRADING & DRAINAGE PLAN
Color:

Please provide additional spot grades to ensure that the path from the right of way to the building is ADA compliant.



Page Label: C3.0 - SITE GRADING & DRAINAGE PLAN
Color:

Please provide the pipe diameter and slope of the existing storm pipe stub out.

Page Label: C3.0 - SITE GRADING & DRAINAGE PLAN

RE: **Heartland Dental Site Plan**

Public Services has reviewed the subject project (Oct 2025 Submittal Documents) and offer the following comments. Review was specific to the Public Services Utilities.

NO.	COMMENTS
1	**Comment on Oct Submittal** **Fire Flow** As per submitted documents, needed fire flow is 1750 gpm, with an available fire flow of 1800 gpm. The Engineer thus concludes that available fire flow is sufficient. The City does not necessarily share this conclusion for the following reasons: (1) The test and residual fire hydrants have not been physically identified. Please **submit** a sketch calling out these fire hydrants, preferable the piping as well. Using a GIS map as the base sheet is suggested. Upon request, the City can provide this base map. (2) The fire flow test was conducted at the SE corner of intersection at 441 & 173rd St, yet the Heartland Dental site is located at the NW corner. This adds uncertainty to the fire flow tests. Due to the fact that NW corner is higher than the SE corner, as well as piping configuration, the fire flow available at the NW corner may be less

NO.	COMMENTS
	than at the SE corner. (3) While the hydrant sketch is being resubmitted, the City will model the available fire flow at the NW site. This issue is unresolved.
2	**Comment on Oct Submittal** **Sheet C0.0** After "HEARTLAND DENTAL", add "SITE PLANS" to be consistent with COA practices. Please **Revise & Resubmit** this sheet.
3.	**Comment on Oct Submittal** **Sheet C0.1** **Utility Notes A. General** Note 3: Keep existing text, but add the following: " WATER AND WASTEWATER SYSTEMS SHALL BE CONSTRUCTED IN ACCORDANCE WITH "CITY OF ALACHUA, PUBLIC SERVICES, DESIGN AND CONSTRUCTION MANUAL, LATEST EDITION". **Utility Notes B. Materials (Water)** Modify Note 1 as follows: "1. SERVICE PIPE **DOWNSTREAM EACH BACKFLOW PREVENTER** SHALL BE POLYETHYLENE (PE), DR9". Add the following notes: "8. SERVICE WATER PIPING UPSTREAM THE WATER METER SHALL BE PVC, TYPE AS SHOWN ON THE DETAILS. 9. SERVICE WATER PIPING BETWEEN THE WATER AND THE BACKFLOW PREVENTER SHALL BE OF THE SIZE AND TYPE AS SHOWN ON THE DETAILS 10. WATER PIPING BETWEEN WATER METER AND BFP SHALL BE GALVANIZED STEEL 11. WATER METER APPURTENANCES SHALL BE FURNISHED AND INSTALLED BY THE CONTRACTOR. THE WATER METER ITSELF WILL BE

NO.	COMMENTS
	FURNISHED AND INSTALLED BY THE CITY. 12. FOR EACH BACKFLOW PREVENTER, PROVIDE AN ENCLOSURE AS PER THE DETAILS. 13. WET TAP(S) TO PRESSURIZED WATER MAINS SHALL BE DONE BY A SUB-CONTRACTOR PRE-APPROVED BY THE CITY OF ALACHUA. 14. PROVIDE TRACER WIRE SYSTEM FOR WATER PIPING AS SHOWN ON THE DETAILS AND AS PER THE COA DCM. 15. TRACER WIRE SYSTEM SHALL COMMENCE AT THE TIE-IN(S) AT EXISTING WATER MAIN(S) AND TERMINATE AT EACH COA END OF MAINTENANCE POINT." **Utility Notes D. Materials (Storm)** **Add the following note:** "5. "UNLESS AN ALTERNATE IS APPROVED BY COA, GROUT BOTTOM OF ALL STORMWATER DRAINAGE STRUCTURE INVERTS AS PER FDOT INDEX 425-001 AND AS PER COA STANDARD DETAIL 210." Please **Revise & Resubmit** this sheet.
4.	**Comment on Oct Submittal** **Sheet C2.0** Call-out the pipe downstream the gate valve (Site Utility Note 1) as "2-INCH SCH 40 PVC – NSF 61" Site Utility Note 17: Add the following: "CITY OF ALACHUA END OF MAINTENANCE" Site Utility Note 2: Add text "(1) INSTALL METER SO ITS EDGE IS TWO FEET FROM EDGE OF SIDEWALK (2) CITY OF ALACHUA END OF MAINTENANCE". Site Utility Note 4: Change tee size to 2 X 2 X 2 Site Utility Note 5: Add text "(1) INSTALL METER SO ITS EDGE IS TWO FEET

NO.	COMMENTS
	FROM EDGE OF SIDEWALK (2) CITY OF ALACHUA END OF MAINTENANCE" Site Utility Note 10: Add text "AT CITY WATER MAIN INTERSECTION, ROUTE GAS PIPE UNDER WATER MAIN WITH 1-FOOT VERTICAL CLEARANCE" Please **Revise & Resubmit** this sheet.
5.	**Comment on Oct Submittal** **Sheet C2.0** **Domestic Water Meter Sizing Calculations** Please **submit** a letter that includes the following: Official letterhead of the Engineer of Record, or equivalent credentialed professional Addressee: Tom Ridgik, Public Services Engineering Supervisor, City of Alachua Signed and sealed by Engineer of Record, or equivalent credentialed professional Building Design Flow (gpm) Proposed Water Meter Size (size using building design flow with meter flow ranges identified in City Ordinances) PDF version of the letter is acceptable; letter can be forwarded by email Also, on either the cover sheet or the utility plan, call-out the: Building Design Flow Water Meter Size **Submit** the supporting calculations The meter sizing method used must be acceptable to COA. Although the City may consider other methods, the City will accept the Florida plumbing code method that calculates facility water supply design flow coupled with flow meter ranges as set forth by City ordinances. **Resubmit** affected sheets
6.	**Comment on Oct Submittal** **Sheet C2.0**

NO.	COMMENTS
	Irrigation Water Meter Sizing Calculations Please **submit** a letter that includes the following: Official letterhead of the Engineer of Record, or equivalent credentialed professional Addressee: Tom Ridgik, Public Services Engineering Supervisor, City of Alachua Signed and sealed by Engineer of Record, or equivalent credentialed professional Irrigation System Design Flow (gpm): A method acceptable to the City is to call the design flow of each zone, and identify the maximum flow. Proposed Water Meter Size (size using irrigation system design flow with meter flow ranges identified in City Ordinances) PDF version of the letter is acceptable; letter can be forwarded by email Also, on either the cover sheet, the utility plan or the landscaping plan, call-out the: Irrigation System Design Flow Water Meter Size **Resubmit** affected sheets
7	**Comment on Oct Submittal** **Sheet C4.1** Replace Detail 115 Add the following details: 112 127 130 210 307 318 321A 321B

NO.	COMMENTS
	COA will forward these details. If not forwarded, please contact COA. Please **resubmit** applicable sheets.

RE: Completeness Review: Westside Commons~Heartland Dental Site Plan Application

Dear Zach Pinel,

On October 27, 2025, the Planning & Community Development Department received your revised site plan application for the Westside Commons-Heartland Dental project, which proposes the construction of a ± 4,200 square foot building with associated site improvements on a ± 1.28-acre subject property (tax parcel 03044-001-002).

Pursuant to Section 2.6.6 of the City's Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned application for completeness and finds that **the application is complete**.

A full review of the application will now be undertaken by the City, with the findings transmitted to you and a Project Assistance Team (PAT) meeting scheduled under separate cover.

If you have any questions regarding the information above, please contact me at (386) 418-6125 or via email at Be_Fisher@CityofAlachua.org.

Sincerely,

Bernadette Fisher

A. PROJECT

1. Project Name: Heartland Dental
2. Pre-Application Conference Date: April 29, 2025
3. Neighborhood Meeting Date: October 21, 2025
4. Address of Subject Property: NWC of US Highway 441 and NW 173RD Street
5. Parcel ID Number(s): 03044-001-002
6. Existing Use of Property: Vacant (00000)
7. Future Land Use Map Designation: Commercial
8. Zoning Designation: Community Commercial
9. Acreage: 1.28
10. Total Existing Building Square Footage, if applicable: 0sf
11. Total Existing Impervious Area (not including existing building area), if applicable: 5,955sf
12. Total Building Square Footage Proposed: 4,200sf
13. Total New Impervious Area Proposed (not including building area): 12,728sf

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☑ Agent
2. Name of Applicant(s) or Contact Person(s): Zach Pinel Title: Buyer Representative
   Company (if applicable): Alakai Acquisitions
   Mailing address: 33 East Robinson, Suite 210
   City: Orlando State: FL ZIP: 32801
   Telephone: 407.575.5935 FAX: None e-mail: zpinel@alakai-capital.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): Santa Fe Hills Church of Christ / Browning and Browning Trustees & Morris
   Mailing Address: 1026 NW 125th Drive / 627 SW 83rd Terrace
   City: Newberry / Gainesville State: FL / FL ZIP: 32669 / 32607

   ** Must provide an executed Authorized Agent Affidavit or other acceptable documentation (as deemed acceptable by the City in its sole discretion) authorizing the agent to act on behalf of the property owner.*

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☑ Yes ☐ No
   If yes, list names of all parties involved: Robert Matheny / Jeannette L. Browning, D. Holton Browning, Janice L. Morris
2. Has the applicant discussed possible utility/infrastructure fees with the Public Services Department?

If no, contact the Public Services Department at 386-418-6140. ☑ Yes ☐ No

D. ATTACHMENTS

1. Site Plan. Sheet size shall be 24" X 36" with a 3" left margin and ½" top, bottom, and right margin.

   Site Plan shall include:
   a. Name and location of project.
   b. Name and contact information (address, telephone, and email address) of property owner, developer (if applicable), and all professional consultants (i.e., landscape architect, photometric, electrical engineer, architect, etc.) for the project.
   c. Zoning of the subject property.
   d. Vicinity map - indicating general location of the site and major adjacent streets and all adjacent properties.
   e. Boundary and topographic survey. Survey shall be signed and sealed by the surveyor, and shall be no older than two (2) years.
   f. Complete legal description of the subject property.
   g. Statement of proposed uses.
   h. Location of the subject property in relation to adjacent properties.
   i. Date, north arrow, and graphic scale (not to exceed one (1) inch equal to 50 feet.)
   j. Area and dimensions of the subject property.
   k. Structures and major features – fully dimensioned – including setbacks from property lines and right-of-ways, distances between structures (if structures are within 25 feet of one another), floor area of each building, floor area ratio, and property lines.
   l. Location of all property lines, existing and proposed adjacent right-of-ways, sidewalks, curbs, and gutters.
   m. Distance between ingress and egress connections for the project and the ingress / egress connections for all contiguous properties and for properties on the opposite side of the road, measured from the interior radius of all ingress/egress connections.
   n. Location of all existing and proposed utilities (electric, potable water, sanitary sewer, gas, etc.) on the subject property, and on adjacent properties if located within 50 feet of the subject property, and within adjacent rights-of-way.
   o. Location of all existing and proposed fire hydrants.
   p. Location of all existing easements on the property and on adjacent properties if located within 50 feet of the subject property, and recording information for such easements.
   q. Location of all proposed easements (legal descriptions and sketches of all proposed easements shall be provided by the applicant following a review of proposed utility locations by Public Services).
   r. Location and dimensions of all existing and proposed vehicular parking spaces, dimensions of all drive aisles, and the angle of parking spaces.
   s. Location of all bicycle parking areas and specifications of bicycle racks.
   t. Location, dimensions, and vertical clearance of all off-street loading spaces, if required by Section 6.1 of the LDRs.
   u. Location and dimensions of all vehicle stacking spaces, if required by Section 6.1 of the LDRs.
   v. Vehicular parking calculations, indicating the minimum and maximum number of required spaces and the number of parking spaces provided (regular and accessible spaces) in accordance with Section 6.1 of the LDRs.
   w. Bicycle parking calculations, if required by Section 6.1 of the LDRs.
   x. Striping and signage for all traffic control devices.
   y. Landscape Plan, indicating the location, size, and design of required and proposed landscaped areas. Landscape Plans shall identify the following with sufficient detail and calculations to demonstrate compliance with Section 6.2.2 of the LDRs:
      i. Location, identification of the species, and size of all existing trees.
      ii. Required perimeter buffer areas.
      iii. Parking lot perimeter landscaping.
      iv. Parking lot interior landscaping.
      v. Building façade landscaping.
      vi. Calculation of landscaped areas (see Policy 2.4.a of the Comprehensive Plan Future Land Use Element).
      vii. Calculation of open space provided (see Section 6.7 of the LDRs).
      viii. Calculation of tree credits, if applicable. Calculations shall be as set forth in Sections 6.2.1(D)(4) and 6.2.2(D)(6) of the LDRs and shall be shown on the plan in tabular format (if tree credits are utilized, the Landscape Plan must identify in the landscape calculations where credit is applied).
      ix. Tree protection detail in accordance with Section 6.2.1(D)(2) of the LDRs.
      x. If tree removal is proposed, a tree survey, showing:
         (a) Each tree proposed for removal;
         (b) Each tree proposed for retention;
         (c) The size and species (both common and scientific names) of all trees proposed for removal/retention;

(d) Location, size, and species of all new trees proposed to meet mitigation requirements. Mitigation trees must be shown on the plans and a list of all mitigation trees and calculation of required mitigation must be provided on the plan in tabular format.

z. Location of waste receptacles and detail of waste receptacle screening, demonstrating compliance with Section 6.2.3(B) and, if within the Gateway Overlay District, with Section 3.7.2(C)(5)(c)(ii).

aa. Photometric Plan, demonstrating compliance with the applicable provisions of Section 6.4 of the LDRs.

bb. Location and size of any lakes, ponds, canals, or other waters and waterways, and required setbacks dimensioned on the plans from such waterways.

cc. For development consisting of a nonresidential use, except for single tenant retail sales and services uses greater than or equal to 20,000 square feet in area and except for use types within the industrial services, manufacturing and production, warehouse freight and movement, waste-related services, and wholesale sales use categories ***not*** located within 500 feet of the right-of-way of US Highway 441: Architectural plans demonstrating compliance with the design standards for business uses as provided in Section 6.8.2 of the LDRs. Architectural plans shall include:
   i. Calculation of glazing of:
      (a) the front façade;
      (b) any facade facing a street;
      (c) any façade facing a publicly-accessible parking area which is a part of the development and consisting of 15 percent or more of the minimum off-street parking required by Section 6.1.4(B) of the LDRs; and,
      (d) any façade facing vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.
   ii. Calculation of the area of all façades subject to glazing.
   iii. Detail on the architectural plans depicting façade massing or a massing alternative as defined in Section 6.8.2(A)(2)(b).
   iv. Identification of each material utilized in each façade and the percentage of the total area of the façade for each material used.

dd. For development consisting of a nonresidential use where a single retail services tenant is greater than or equal to 20,000 square feet in area: Architectural plans demonstrating compliance with the design standards for single tenant retail sales and service uses greater than or equal to 20,000 square feet in area as provided in Section 6.8.3 of the LDRs. Architectural plans shall include:
   i. Color plans depicting the color of all materials used in the façade.
   ii. Identification of each material utilized in each façade and the percentage of the total area of the façade for each material used.
   iii. Calculation of glazing of:
      (a) the front façade;
      (b) any facade facing a street;
      (c) any façade facing a publicly-accessible parking area which is a part of the development and consisting of 15 percent or more of the minimum off-street parking required by Section 6.1.4(B) of the LDRs; and,
      (d) any façade facing vacant land classified as CSV, A, RSF-1, RSF-3, RSF-4, RSF-6, RMH-5, RMH-P, RMF-8 or RMF-15, or lands containing existing residential uses.
   iv. Calculation of the area of all façades subject to glazing.
   v. If a glazing alternative as defined in Section 6.8.3(A)(2)(a)(iv) is used, calculation of area of alternative materials used or identification of other architectural features meeting the requirements of Section 6.8.3 of the LDRs.
   vi. Detail on the architectural plans depicting façade massing or a massing alternative as defined in Section 6.8.2(A)(2)(b) of the LDRs.

ee. For development consisting multi-family residential uses and/or a mobile home park:
   i. Gross acreage.
   ii. Number of dwelling units proposed.
   iii. Density.
   iv. Location and percentage of total open space and recreation areas.
   v. Floor area of each dwelling unit.
   vi. Number of proposed parking spaces.
   vii. Street layout, if applicable.
   viii. Layout of mobile home stands (for mobile home parks only).
   ix. City of Alachua Public School Student Generation Form.

2. Stormwater management plan - including the following:
   a. Plans showing existing contours at one (1) foot intervals based on U.S. Coastal and Geodetic Datum.
   b. Proposed finished floor elevation of all buildings.
   c. Existing and proposed stormwater management facilities with size and grades.
   d. Proposed orderly disposal of surface water runoff.
   e. Drainage calculations.

3. Fire Department Access and Water Supply Plan. All fire protection plans are subject to review and approval by the Alachua County Fire Marshal and City of Alachua Public Services Department. Fire Department Access and Water Supply Plan shall include:
   a. Plans prepared by a professional engineer licensed in the State of Florida.
   b. Fire flow calculations for each newly constructed building. Calculations shall be performed in accordance with Chapter 18, Section 18.4 of the Florida Fire Prevention Code.
   c. Documentation from the water purveyor stating the available flow to the subject property.

4. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools (if applicable) in accordance with Section 2.4.14 of the LDRs.

5. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy).

   For commercial/corporate park/industrial projects: In addition to submitting specific written information regarding the development's compliance with the relevant Goals, Objectives, and Policies of the City of Alachua Comprehensive Plan, a response to the design and performance standards as provided in Policy 1.3.d (for commercial projects), Policy 1.4.f (for corporate park projects), or Policy 1.5.d (for industrial projects) of the Future Land Use Element:

   The following criteria shall apply when evaluating commercial/corporate park/industrial development proposals:

   1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
   2. Buffering from adjacent existing/potential uses;
   3. Open space provisions and balance of proportion between gross floor area and site size;
   4. Adequacy of pervious surface area in terms of drainage requirements;
   5. Placement of signage;
   6. Adequacy of site lighting and intrusiveness of lighting upon the surrounding area;
   7. Safety of on-site circulation patterns (patron, employee and delivery vehicles), including parking layout and drive aisles, and points of conflict;
   8. Landscaping, as it relates to the requirements of the Comprehensive Plan and Land Development Regulations;
   9. Unique features and resources which may constrain site development, such as soils, existing vegetation and historic significance; and
   10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design.
   11. Commercial/Corporate Park/Industrial uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 10 acres or greater, 0.50 floor area ratio for parcels less than 10 acres but 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio to parcels 1 acre or less.
   12. Complementary residential uses (corporate park only).

6. *For Site Plans for Buildings Less than 80,000 Square Feet in Area:* One (1) set of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).
   For Site Plans for Buildings Greater than or Equal to 80,000 Square Feet in Area: Two (2) sets of mailing labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits (obtain from the Alachua County Property Appraiser's web site) – and all persons/organizations registered to receive notice of development applications (current list may be obtained from the Planning & Community Development Department).

7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's LDRs;
   ii. Copy of written notice (letter) sent to all property owners within 400 feet and to all persons/organizations registered with the City to receive notice, and a copy of the mailing labels or a list of those who received written notice; and,
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

8. Legal description: (1) on 8.5" x 11" paper; and (2) electronic file in Word format.

9. Proof of ownership (i.e., copy of deed.)

10. Proof of payment of taxes.

11. Traffic Impact Analysis or Statement, as deemed applicable to the project by the City of Alachua in its sole discretion.

12. Environmental Assessment or Study, as deemed applicable to the project by the City of Alachua in its sole discretion.

13. Environmental Resource Permit (or Letter of Exemption) from the Suwannee River Water Management District (SRWMD) or Self-Certification for a Stormwater Management System in Uplands Serving Less than 10 Acres of Total Project Area and Less than 2 Acres of Impervious Surfaces from the Florida Department of Environmental Protection (FDEP) pursuant to Section 403.814(12), Florida Statutes (or documentation which shows a permit application/exemption/self-certification has been submitted to SRWMD or FDEP).

14. If access is from a County Road, access management permit from Alachua County Public Works (or documentation which shows a permit application has been submitted).

15. If access is from a State Road, access management permit from Florida Department of Transportation (or documentation which shows a permit application has been submitted).

16. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any costs associated with outside professional consulting services deemed necessary by the City in its sole discretion will be billed to the applicant at the rate of the consultant. The invoice for such services shall be paid in full prior to any public hearing(s) on the application.

All applicable attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

Under penalty of perjury, I/we certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

WARRANTY DEED

THIS WARRANTY DEED, executed this 8th day of March, 2022, by JEANNETTE L. BROWNING, Grantor, to D. HOLTON BROWNING and JEANNETTE L. BROWNING, as Trustees of the BROWNING FAMILY REVOCABLE TRUST under Agreement dated January 19, 2022, with full power and authority to protect, conserve and to sell, or to lease or to encumber, or otherwise to manage and dispose of the real property described herein, and whose post office address is 627 SW 83rd Terrace, Gainesville, FL 32607, Grantee,

WITNESSETH, That the Grantor for and in consideration of the sum of TEN AND NO/100 ($10.00) DOLLARS and other valuable consideration, receipt whereof is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the Grantee, all that certain land situate, lying and being in the **County of Alachua, State of Florida**, to-wit:

Jeannette L. Browning's Interest in:

A tract of land located in the Southeast ¼ of Section 8, Township 8 South, Range 18 East, Alachua County, Florida, being more particularly described as follows:

For a point of reference commence at the Southeast corner of said Section 8: thence run North 01 deg. 49 min. West, along the East line of said Section 8 a distance of 2010.55 feet; thence run South 89 deg. 29 min. West, 50 feet to the Westerly right-of-way of State Road S-235A being the point of beginning; thence from said point of beginning continue South 89 deg. 29 min. West, a distance of 200 feet; thence run South 01 deg. 49 min. East, a distance of 257.75 feet to the Northerly right-of-way line a distance of 205.2 feet to the said Westerly right-of-way line of State Road No. S235A; thence run North 01 deg. 49 min. West, along said Westerly right-of-way line, a distance of 298.4 feet to close on said point of beginning.

NOTE TO PROPERTY APPRAISER:
The land described herein is not the homestead of the Grantor, and neither the Grantor nor the Grantor's spouse, nor anyone for whose support the Grantor is responsible, resides on or adjacent to said land.

SUBJECT TO: Taxes and assessments for the current year and all subsequent years.
SUBJECT TO: Conditions, restrictions, limitations, easements and utility agreements of record, if any.
TOGETHER with all tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.
TO HAVE AND TO HOLD the same in fee simple forever.

TITLE TO THE LANDS DESCRIBED HEREIN HAS NOT BEEN EXAMINED BY A. SCOTT TONEY, P.A. AND NO WARRANTY OR OTHER REPRESENTATION IS MADE

AS TO THE MARKETABILITY OR CONDITION OF THE TITLE. THIS INSTRUMENT WAS PREPARED AND BASED SOLELY UPON INFORMATION PROVIDED BY GRANTOR.

AND, the Grantor(s) hereby covenant with said Grantee(s) that the Grantor(s) are lawfully seized of said land in fee simple; that the Grantor(s) have good right and lawful authority to sell and convey said land, and hereby warrant the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to the current year.

IN WITNESS WHEREOF, the said Grantor(s) have signed and sealed these presents the day and year first above written.

Signed, Sealed and Delivered in the presence of:

PH 407.645.5008 I FX 407.629.9124

TABLE OF CONTENTS

1. Project Narrative and Concurrency Analysis
2. Consistency with City of Alachua Comprehensive Plan Analysis
3. Needed Fire Flow Analysis

1. Concurrency Analysis

This site plan application requests to construct a new 4,200 square foot Heartland Dental Office on an approximately 0.69 acre parcel located at the Westside Crossing commercial development. Infrastructure such as driveways and stormwater treatment is proposed to be constructed under a previously submitted master infrastructure plan. Shown below is an analysis of the proposed development's concurrency demands and the existing infrastructure available to serve the project.

Roadways/Transportation

Projected Trip Generation:

Land Use	ITE LU Code	Variable Type	Variable Quantity	Trip Rate	Daily	AM Peak	PM Peak
Proposed							
Medical-Dental Office Building	720	Per 1,000 SF	4.2	Daily = 34.80 AM Peak = 3.53 PM Peak = 4.10	146 Trips	15 Trips	17 Trips

Conclusion: Approval of this application results in an additional 146 daily, 15 AM peak hour, and 17 PM peak hour trips on the public road network. This does not include the effect of pass-by trips which the traffic study estimates to be approximately 162 trips.

Per the traffic study conducted by Traffic Planning and Design, Inc., the comprehensive plan roadway segment analysis showed that all of the segments currently operate at acceptable levels of service. At project build out, all of the roadway segments will continue to operate within their capacity similar to existing conditions.

Additionally, the intersection analysis conducted by TPD indicated that the intersection currently operates at an acceptable Level of Service, and will continue to operate at an acceptable LOS after project build-out.

Potable Water / Sanitary Sewer / Solid Waste

	Demand	Max Total Demand	Current Potable Water Residual Capacity	Residual Capacity After Proposed Project
Potable Water	(250 GPD per practitioner + 15 GPD per employee)	400 GPD (1 practitioner) (10 employees)	138,980 GPD	138,580 GPD

Conclusion: The project site will be served by the City of Alachua potable water infrastructure. The maximum possible allowable impacts from approval of this application will not exceed capacity of the City's adopted LOS for potable water.

	Demand	Max Total Demand	Current Potable Water Residual Capacity	Residual Capacity After Proposed Project
Sanitary Sewer	(250 GPS per Practitioner + 15 GPD per employee)	400 GPD (1 practitioner) (10 employees)	168,166 GPD	167,766 GPD

Conclusion: The project site will be served by the City of Alachua wastewater infrastructure. The maximum possible allowable impacts from approval of this application will not exceed capacity of the City's adopted LOS for sanitary sewer.

	Max Total Demand	Existing Demand	Demand After Proposed Project
Solid Waste	Total Waste Per Year: 21 Tons per year or 115 lbs. per day	10,184 Tons per year	10,205 Tons per year

Conclusion: Solid waste facility capacity exists to adequately serve development of the proposed project. The New River Solid Waste Facility is anticipated to be able to have enough capacity for the next 50+ years. The maximum potential impact from approval of this application will not negatively or exceed the City's adopted LOS for the solid waste facility system.

The total estimated impact on public facilities for both proposed and existing development is as follows:
Water – 400 GPD

Sewer – 400 GPD
Solid Waste – 21 Tons per year or 137 lbs. per day
Transportation – 146 Max Daily Trips

Based on the fact that the utilities involved have sufficient capacity to serve the proposed development and the adjacent streets have sufficient capacity, it appears that sufficient capacity exists for all public facilities.

4. CONSISTENCY WITH CITY OF ALACHUA COMPREHENSIVE PLAN

This section identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this application is consistent with each.

Policy 1.3.b: Commercial: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Recreation and entertainment;
5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-orientated uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/businesses parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

The proposed Heartland Dental office development is allowed in the property's current land use and zoning classification. This project is proposed to provide dental services to the adjacent residential development and school.

Policy 1.3.d: Design and performance standards: The following criteria shall apply

when evaluating commercial development proposals:
1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
2. Buffering from adjacent existing/potential uses;
3. Open space provisions and balance of proportion between gross floor area and site size;
4. Adequacy of pervious surface area in terms of drainage requirements;
5. Placement of signage;
6. Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;
7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout, drive aisles, and points of conflict;
8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;
9. Unique features and resources which may constrain site development such as soils, existing vegetation and historic significance;
10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design; and,
11. Commercial uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 5 acres or greater, 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less.

The site plans for the subject property conform to the above requirements. The proposed density is well below the maximum allowable.

Policy 1.3.e**:** The creation/promotion of strip pattern commercial development shall be discouraged. Infill within established commercial areas is preferred over extension of a strip commercial pattern. Extension of a commercial land use designation may be considered in circumstances where the extension is compatible with the existing land uses surrounding the land or the land use categories of surrounding lands. Extensions of a commercial land use category shall not encroach into a residential area. The following criteria shall be applied to limit the impacts of commercial development upon surrounding areas:

1. Impacts upon traffic circulation should be anticipated and mitigated through the reservation of right-of-way for road widening and marginal access streets when appropriate.
2. Access points for commercial development shall minimize points of conflict by utilizing frontage roads, providing cross access between parcels, or installing shared use ingress and egress access driveways connections to roadways.
3. Setbacks and landscaped or other appropriate buffers shall be established to mitigate the visual impacts of commercial development upon surrounding land uses.
4. A sidewalk or bicycle path shall be required where appropriate, to provide convenient access to the development from surrounding areas and to reduce traffic volumes on the roadways.

The subject property is located on a busy intersection on a state highway, is part of the City's Corporate Corridor Activity Center and is surrounded by other commercially zoned property along US 441. Access points are limited to 1 each per public road, with appropriate signage and traffic channelizing to limit traffic movements. The proposed Heartland Dental office is compatible with adjacent properties along US 441 and large landscaped buffers are provided from adjacent agriculturally zoned property (currently used as single family residential). Public sidewalks, including a wider mixed-use path along NW 173rd, are proposed.
No additional right of way for public roads is required.

Policy 1.3.f: The City shall pursue the establishment of activity centers and similar criteria to guide the placement and design of commercial and business areas.
1. The City shall establish and maintain a Gateway Activity Center at the interchange of US 441 and Interstate 75. The boundaries of the Gateway Activity Center shall be based on the Generalized US 441/I-75 Activity Center Map provided in the Future Land Use Map Series. The intent of this activity center is to welcome existing and future residents and visitors to the City, and to promote Alachua as an attractive, vibrant, and economically prosperous community.
2. The City shall establish and maintain the US 441 corridor as a Corporate Corridor Activity Center. The intent of establishing this activity center is to implement economic development objectives and to promote a coordinated development plan to maximize existing and future land use patterns and preserve the function of the US 441 corridor.

The subject property is located in the US 441 Corporate Corridor Activity Center. The proposed site plan is being designed as part of a coordinated development plan and contributes to the goal of providing well-being to nearby resident by providing medical services and additional economic development opportunities through the creation of new jobs.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications foran amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.317(6)(a)9.a. and b., Florida Statutes, respectively.

This project will not promote the use of land far from existing urban areas for low density, single use developments, nor will they create a need for the costly extension of services. All public roads and utilities are available adjacent to or close to the development, and the property is surrounded by existing development on all sides.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Changes to the existing topography will be limited, and there are no know seepage slopes on site. Existing vegetation, including several large trees, will be preserved where possible.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently three (3) types of soils located onsite:

- **Arredondo Fine Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Arredondo-Urban Land Complex, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Fort Meade Fine Sand, 0 to 5 Percent Slopes (Hydro. Group A)**

Appropriate development techniques and design considerations have been applied to the various soil types on this site. All soils are well drained and non-hydric

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established.
The City shall also require finished floor elevations on subdivision plats, site

plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

The subject property is not within any documented FEMA Flood Zone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

There are no documented wetlands on the project site. All soils are well drained and non-hydric.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

There are no documented listed wildlife or plant species or their habitat onsite. As the proposed Heartland Dental office is proposed on an existing developed lot that is regularly mowed, there appears to be no need to investigate further as the area does not appear to be inviting to listed species.

Objective 5.2: Availability of facilities and services: The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

Section 2 of this report demonstrates the impacts that the proposed development will have on public facilities and services. Sufficient capacity appears to exist for this development.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools, and improved recreation in accordance with LOS standards adopted in the elements addressing these facilities.

Section 2 demonstrates how the proposed plan for the project site will impact City of Alachua facilities and adopted level of service. It is not anticipated that the

proposed plan for the project site will exceed the adopted LOS standards.

Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Ch. 163, Florida Statutes, development agreement has commenced.

Acknowledged.

CONSERVATION AND OPEN SPACE ELEMENT

Objective 1.5: Soils. The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

None of the onsite soils are particularly susceptible to erosion issues. Standard erosion control measures are specified to be installed and used during construction and until final stabilization.

Objective 1.10: Wetlands. The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

The National Wetlands Inventory database does not indicate any wetlands or hydric soils onsite. If any wetlands are found onsite, they will be adequately protected in development of the project site.

Needed Fire Flow Analysis

Per NFPA for a 4,200 SF building with type of construction V-B, the required fire flow is 1,750 GPM for 2 hours. Per the fire flow test done on-site the hydrant is capable of flowing 1807.02 gpm at 20 psi.

INTRODUCTION

This traffic analysis was performed to assess the impact of a proposed Westside Commons development, located in the northwest quadrant of the intersection of US 441 and NW 173rd Street, in the City of Alachua, Florida. The proposed development will consist of a Coffee Shop with drive through window and no indoor seating and two, 2,500 square foot fast food restaurants with drive through windows. The site is accessed via two driveways, a right in / right out driveway on US 441, and a full access driveway on NW 173rd Street. The project is anticipated to be built by the end of 2026. **Figure 1** depicts the location of the project site, and the surrounding roadway network. **Figure 2** provides the preliminary site plan which shows the access connections.

Methodology

This analysis was conducted in accordance with the traffic study methodology submitted to and approved by the City of Alachua and meets their Guidelines. The methodology coordination and correspondence are provided in **Appendix A.** Data utilized in the analysis consisted of a preliminary site plan provided by Project Engineers, traffic volume data and Level of Service standards obtained from the City of Alachua and intersection turning movement counts obtained by TPD Inc.

Study Area

The guidelines require that all 17 roadway segments contained in the Comprehensive Plan be evaluated along with the intersections within one-quarter mile (1/4). The roadway segments are shown in **Figure 3**. The following intersections were included in the analysis:

*(FDOT Road Segment #, COA Comprehensive Plan #).	

EXISTING CONDITIONS ANALYSIS

An existing conditions analysis was conducted for the Comprehensive Plan roadway segments and study intersection utilizing existing traffic volumes and roadway geometry to establish their current operating conditions.

Roadway Segment Analysis

The existing Comprehensive Plan roadway segments are summarized in **Table 1**. As shown, the existing peak hour conditions analysis reveals that the roadway segments currently operate within their adopted Maximum Service Volumes (MSV). Relevant information from the City of Alachua February 2025 Development Monitoring Report is included in **Appendix B.**

Intersection Analysis

The study intersection was analyzed in accordance with the procedures of the *Highway Capacity Manual (HCM)* using the latest version of the *Highway Capacity Software (HCS)*. The capacity analysis at the intersections was performed using the existing intersection geometry and traffic volumes during the A.M. and P.M. peak hours. **Figure 3** depicts the existing A.M. and P.M. peak hour traffic volumes. The traffic counts were taken on March 25, 2025, when FDOT's seasonal factor was 0.98 and therefore were not adjusted. The intersection counts are included in **Appendix C** along with the FDOT's seasonal factor report. The intersection capacity analysis results are summarized in **Table 2,** which shows that the study intersection operates within the adopted Levels of Service standard during A.M. and P.M. peak hours. Detailed capacity analysis *w*orksheets are included in **Appendix D**.

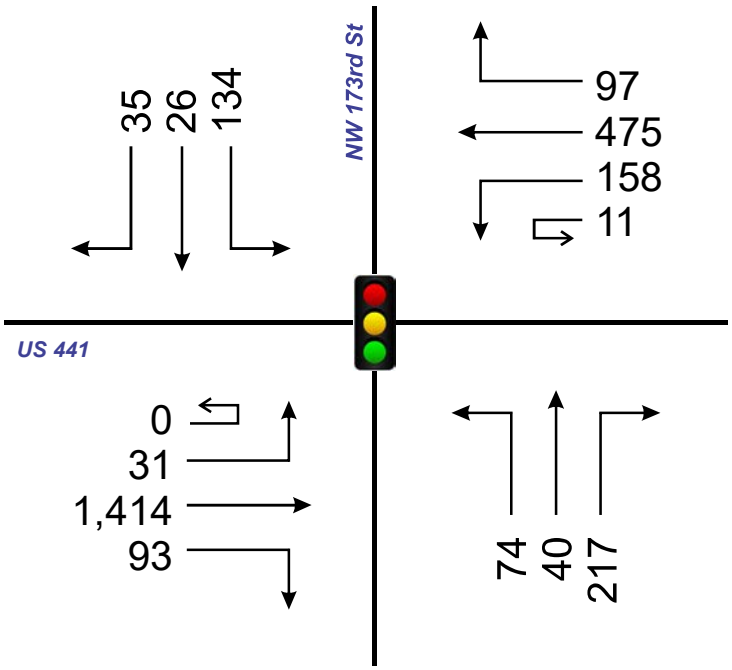

Table 2
Existing P.M. Intersection Capacity Analysis

Intersection	Control	Time Period	EB		WB		NB		SB		Overall

A.M. Peak Hour

P.M. Peak Hour

PROPOSED DEVELOPMENT AND TRIP GENERATION

The proposed development consists of a Coffee Shop with a drive-through window and no indoor seating and two, 2,500 square foot fast food restaurants with drive through windows. To determine the impact of this development, an analysis of its trip generation characteristics was conducted. This included the determination of the trips to be generated as well as their distribution and assignment to the area roadways.

Trip Generation

Trip generation data was obtained from the 11th Edition of the Institute of Transportation Engineers (ITE) *Trip Generation Manual*. **Table 3** provides a summary of the trip generation for the proposed development. As indicated, the proposed development is projected to generate 1,127 net new daily trips, of which 116 and 70 will occur in the A.M. and P.M. peak hours, respectively. Copies of the ITE trip generation sheets are included in the study methodology in Appendix A.

Table 3
Trip Generation Summary

ITE Code	Land Use	Variable[1]	Daily Trips		A.M. Peak Hour Generation				P.M. Peak Hour Generation			
			Rate	Trips	Rate	Enter	Exit	Total	Rate	Enter	Exit	Total

[1] KSF = 1,000 Square Feet, DTL = Drive Thru Lane [2]From ITE 11th Edition Pass-by Appendix

The Guidelines state that pass-by traffic shall not exceed 10% of the adjacent street traffic. **Table 4** presents an analysis of the pass-by trip reduction from US 441 and if it will exceed 10% of the respective A.M. and P.M. peak volumes, per the values from FDOT on-line count database. As can be seen, the background volumes on US 441 are greater than the pass-by trips generated by the development during the A.M. and P.M. peak hours, so no adjustments were made.

Table 4
Peak Hour Pass-By Traffic Consumption Verification – US 441

P.M.	WB	1,140	114	56	51	Yes

[1]From FDOT on-line County Station 260245, 2023 count.

Trip Distribution/Trip Assignment

A trip distribution pattern was estimated using the currently adopted Gainesville MPO Model. A Select Zone Analysis (SZA) was conducted by modifying the network to include a Traffic Analysis Zone (TAZ) representing the proposed project and the model's socio-economic data updated to reflect the proposed project buildout. The distribution pattern is illustrated in **Figure 5** and the model plot outputs are provided in Appendix A. Utilizing this distribution, the development project trips were assigned to the area roadways.

Westside Commons
Project № 6064
Figure 5
Page 10

Project Trip Distribution

N
NTS

PROJECTED TRAFFIC CONDITIONS

Projected traffic conditions were assessed in order to evaluate the impact of the proposed development within its area of influence. The projected conditions were estimated by combining the P.M. peak hour project trips with background traffic volumes.

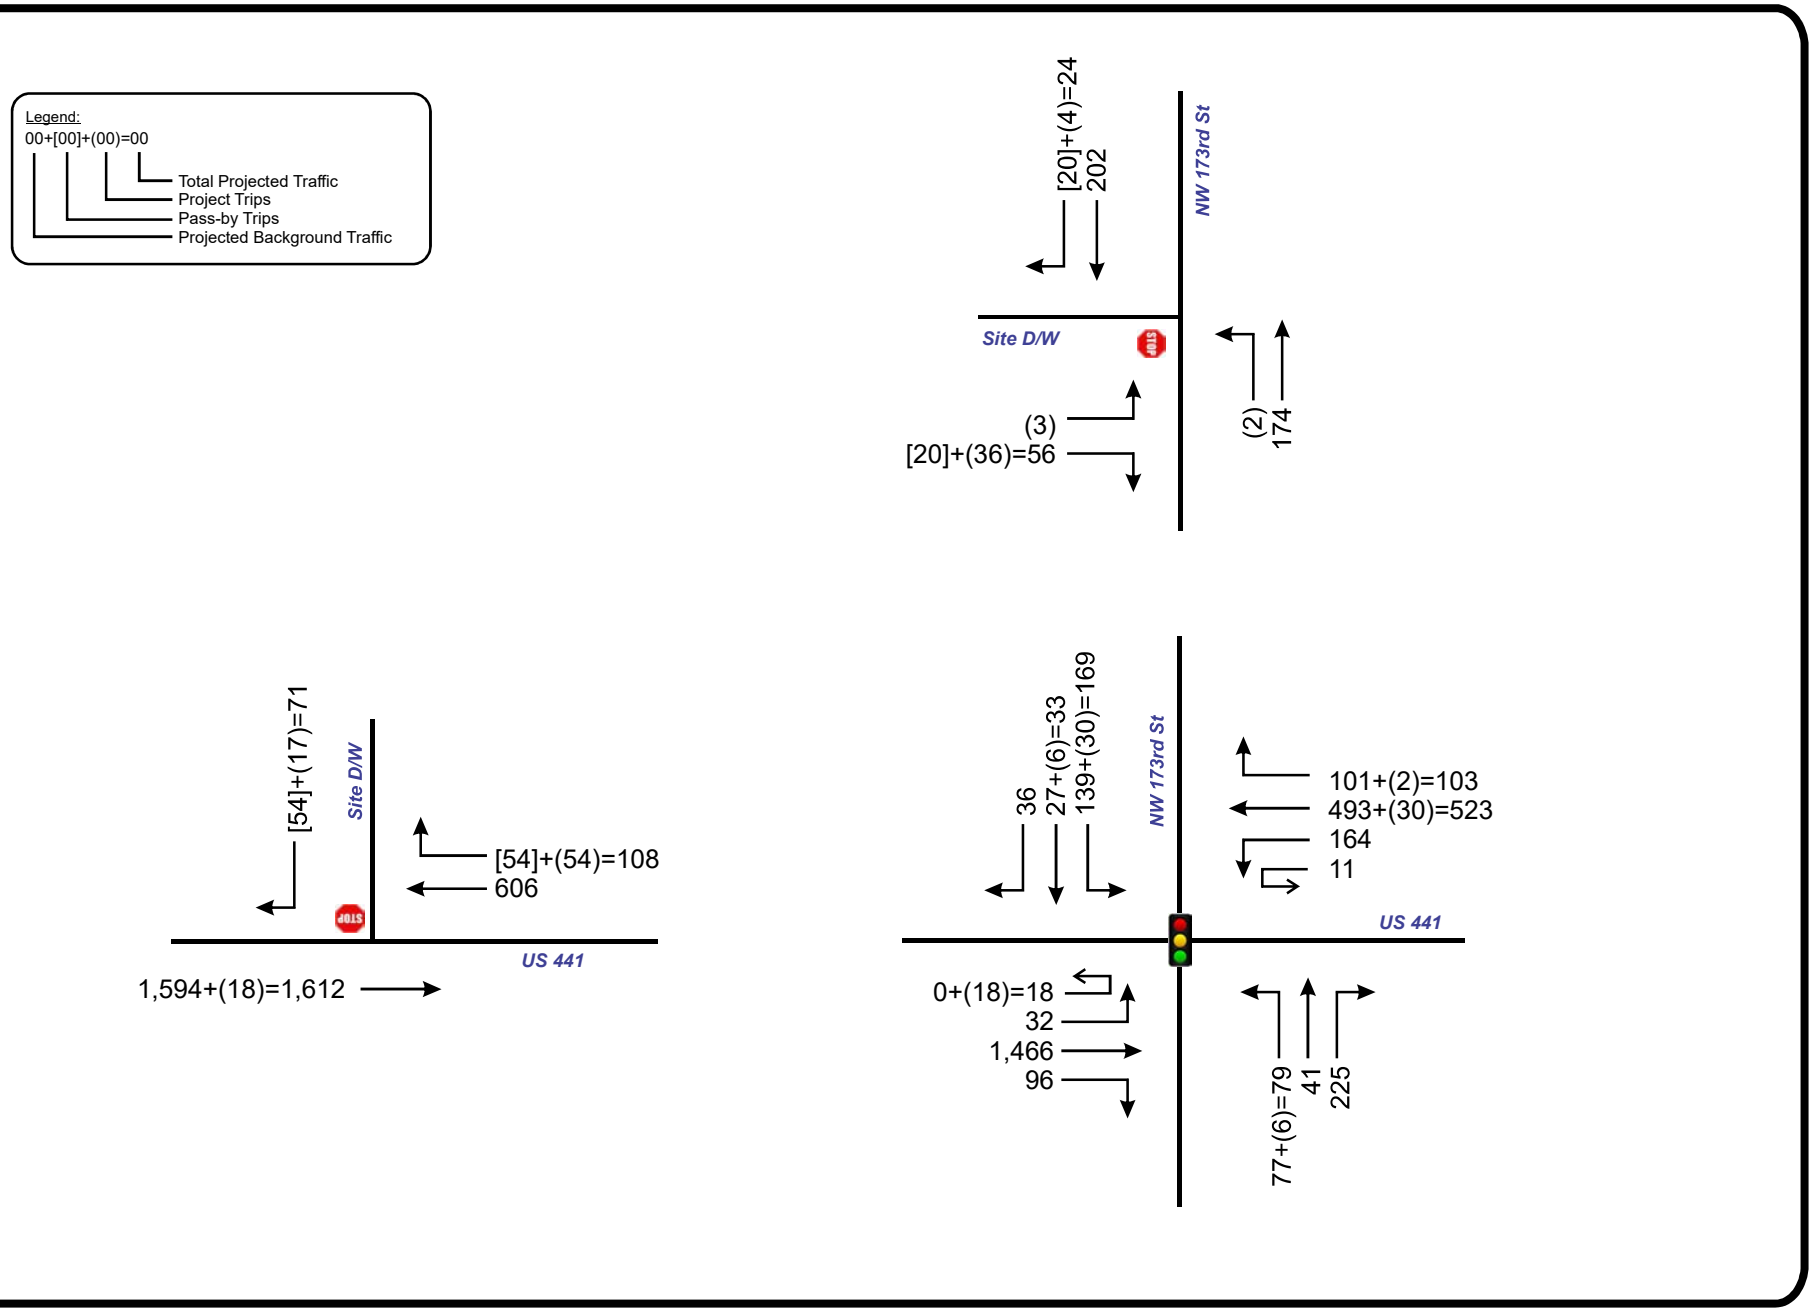
Background Traffic Projections

Background traffic volumes are determined by expanding existing peak hour traffic volumes to the buildout year using an annual growth rate. A historical trend analysis was conducted using the Annual Average Daily Traffic (AADT) data obtained from FDOT on-line Traffic database for the area roadways. As provided in the Study Methodology in Appendix A, the historical trend analysis for US 441 averaged 3.70% per year. This growth rate was applied to the existing traffic volumes as appropriate in order to determine the projected background volumes in the project buildout year of 2026.

Roadway Segment Analysis

The projected Comprehensive Plan roadway segment analysis was performed by comparing the total projected peak hour traffic volume of each segment with the respective capacity. The peak hour analysis, as summarized in **Table 5,** revealed that all the study roadway segments will operate within the adopted LOS standards similar to existing conditions upon buildout of the development.

Intersection Analysis



To assess the projected operating conditions at the study intersections, intersection capacity analyses were conducted using the *Highway Capacity Software (HCS)*. Total A.M. and P.M. peak hour traffic volumes were determined by combining background traffic and project trips. **Figures 6 and 7** show the projected A.M. and P.M. peak hour intersection turning movements, respectively, for the study intersections and site access driveways. The projected Levels of Service are summarized in **Table 6.** Detailed HCS analysis worksheets are included in **Appendix E**. The analysis indicates that the study intersections and site access driveway will operate at overall satisfactory Levels of Service, similar to existing conditions upon build out of the development.

Table 5
Projected Comprehensive Plan Roadway Segment Capacity Analysis

Roadway	Segment	Com Plan MSV	Existing Pk Hr Demand	Reserved Capacity	Trip Dist	Project Demand	Available Capacity	Percentage of Permitted Design Capacity Utilized
I-75	From North City Limit to US 441	8,250	4,450	20	0%	0	3,780	54.18%

		P.M.	9.3	A	--	--	7.7	A	--	--	--	--

Turn Warrant Analysis

Access to the site is proposed via two driveways, a right in / right out driveway on US 441 and a full access driveway NW 173rd Street. To determine the need for separate left or right turn lanes, a turn lane analysis was conducted at the proposed site access driveways using the guidelines of *NCHRP Report 457 – Evaluating Intersection Improvements: An Engineering Study Guide*. Based upon these guidelines, a separate westbound right turn lane is warranted for the US 441 driveway connection. The NW 173rd driveway connection does not warrant a separate left or right turn lane. The turn lane warrant charts are included in **Appendix F.**

To determine the length of the westbound right turn lane at the site driveway and US 441, the intersection analysis was utilized as follows:

Right turn lane length (TL) = Deceleration Distance (DD) + Queue Length (QL)

DD = 185 feet for posted speed of 45 mph (As per FDOT FDM 212)

QL = 0.7 * 25.0 = 17.5 feet (Use 25 feet for 1 vehicle, from HCS P.M. Analysis)

TL = 185 + 25 = 210 feet

The westbound right turn lane length should be a minimum of 210 feet in order to serve the site upon completion.

STUDY CONCLUSIONS

This traffic analysis was performed to assess the impact of the proposed Westside Commons development, located in the northwest quadrant of the intersection of US 441 and NW 173rd Street, in the City of Alachua, Florida. The proposed development will consist of a Coffee Shop with drive through window and no indoor seating and two, 2,500 square foot fast food restaurants with drive through windows. The site is accessed via two driveways, a right in / right out driveway on US 441, and a full access driveway on NW 173rd Street. The project is anticipated to be built by the end of 2026. The results of the study as documented herein are summarized below:

- The proposed development is projected to generate 1,127 net new daily trips, of which 116 and 70 trips will occur in the A.M. and P.M. peak hours, respectively.

- The Comprehensive Plan roadway segment analysis indicated that all of the segments currently operate at acceptable Levels of Service. At project build out, all of the roadway segments will continue to operate within their capacity similar to existing conditions.

- The intersection analysis indicated that the study intersection currently operates at acceptable Levels of Service. The study intersection and project driveways will continue to operate satisfactorily upon the addition of background and project trips.

- Access to the site will be provided via two driveways, a right in / right out driveway on US 441 and a full access driveway on NW 173rd Street. The site access driveways are projected to operate satisfactorily at project buildout. Based upon NCHRP 457, a westbound right turn lane is warranted for the US 441 driveway. The length should be a minimum of 210 feet, which includes a 50-foot taper. The NW 173rd Street driveway does not warrant a separate left or right turn lane.

Good morning,

Thanks for taking my call this morning and clarifying that the study methodology is approved.

We will schedule data collection and move forward with the analysis.

Thanks again and have a great day.

Subject: Alachua Retail Center Traffic Impact Analysis Methodology, City of Alachua TPD # 6064

Good morning Carson,

Thanks for speaking with me last week concerning the City of Alachua Traffic Impact Analysis (TIA) study requirements.

Please find attached the Alachua Retail Center TIA Methodology. The site is located in the northwest quadrant of the intersection of US 441 and NW 173rd Street.

Please review and let me know if you have any questions.
Also, please send me your latest version of the City of Alachua Concurreny Database and segment map.

Thanks,

RE: Traffic Impact Analysis Methodology
City of Alachua, City of Alachua
TPD No. 6064

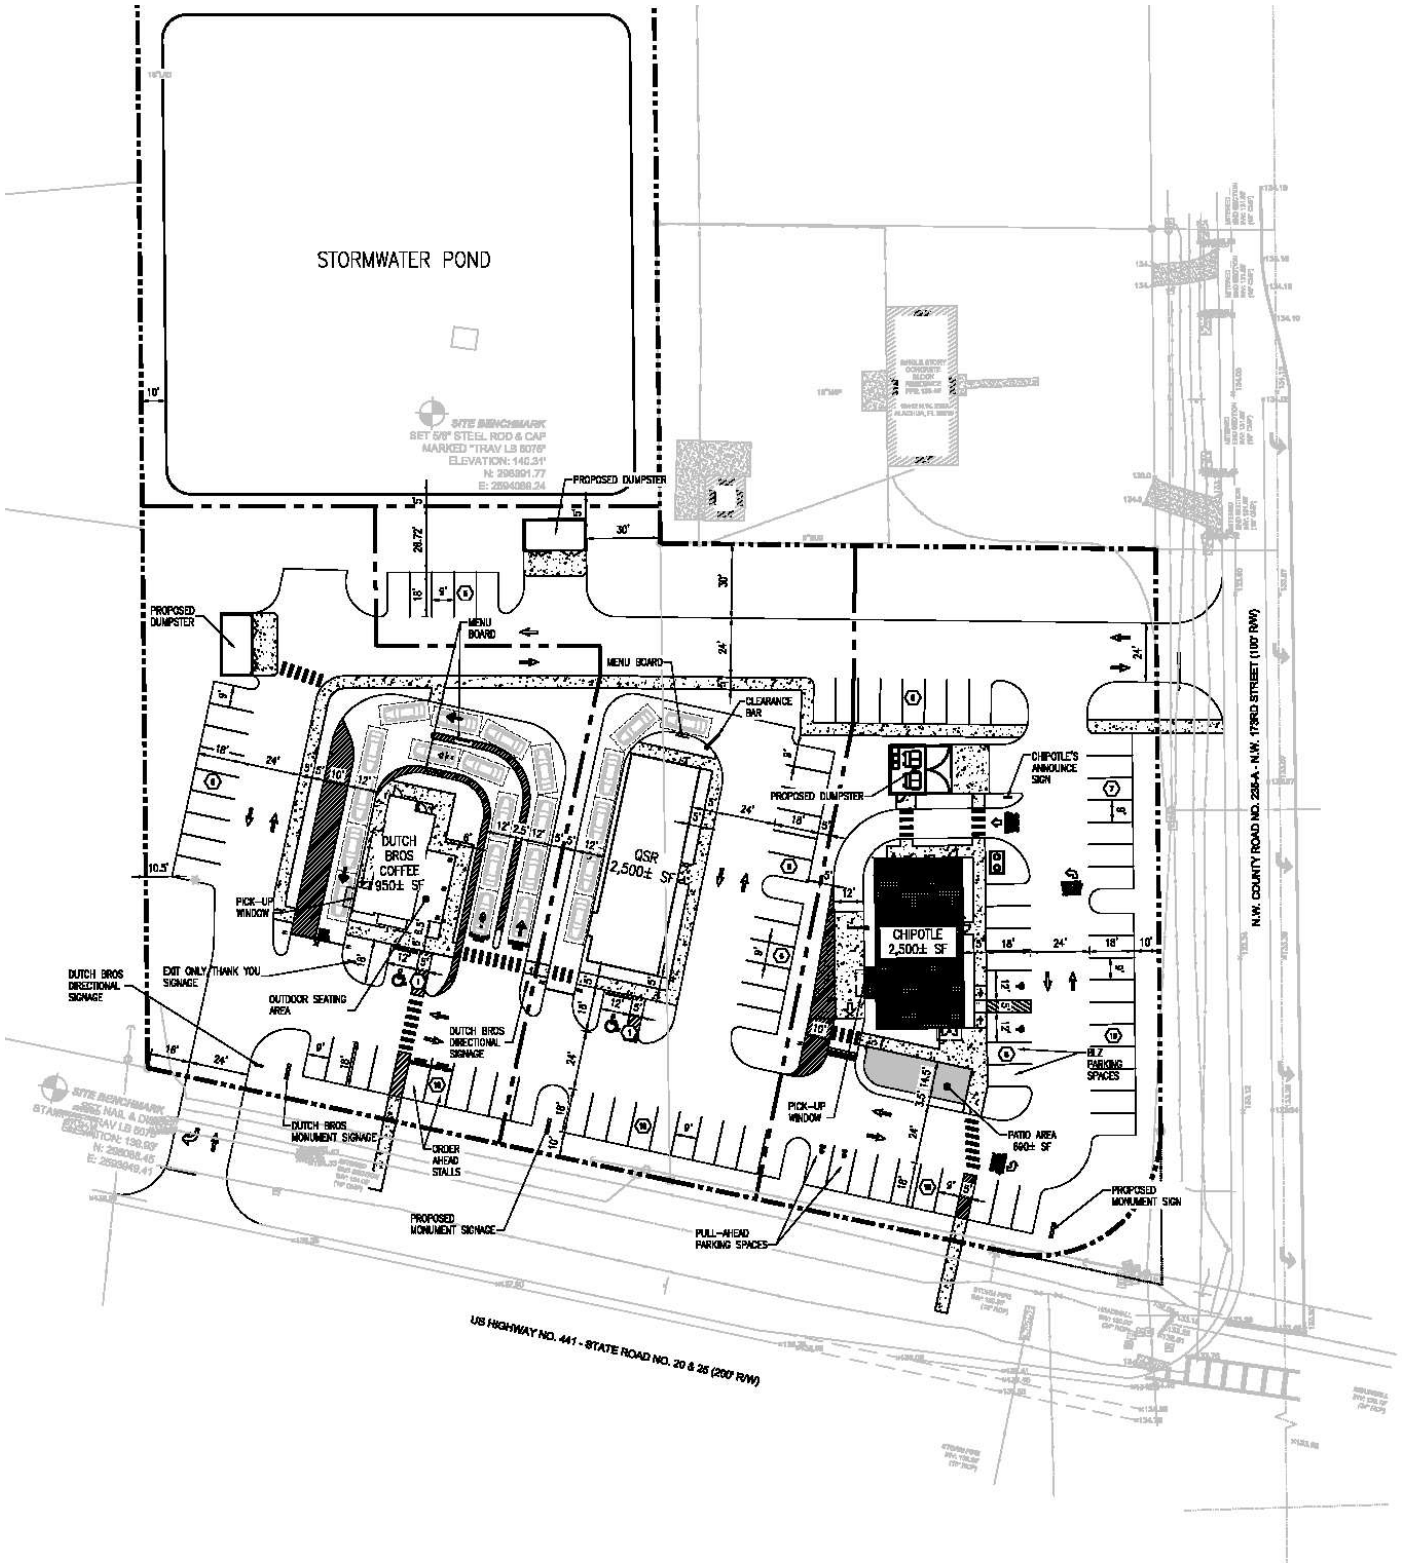
The following is an outline of the proposed methodology for the Traffic Impact Study for the Alachua Retail Center in the City of Alachua, Florida. The project site is located in the northwest quadrant of the intersection of US 441 and NW 173rd Street. **Figure 1** depicts the site location and the area roadways.

1. Proposed Development

The proposed development is for a Coffee Shop with drive through window and no indoor seating and two (2) fast-food restaurants with drive through windows. Access to the site is proposed via two driveways, a right in / right out access on US 441 and a full access driveway on NW 173rd Street. **Figure 2** depicts the conceptual site plan and its access configuration.

2. Trip Generation

Trip generation data from the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition* will be used for the trip generation estimation of the development. **Table 1** provides a summary of the trip generation for the proposed development calculated with the ITE data.



The project is expected to generate a total of 1,127 net new daily trips, of which 116 will occur during the A.M. peak hour and 70 will occur during P.M. peak hour. The ITE trip generation worksheets are included in **Attachment A**.

Trip Generation Calculation Summary

ITE Code	Land Use	Variable	Daily Trips		A.M. Peak Hour Generation				P.M. Peak Hour Generation			
			Rate	Trips	Rate	Enter	Exit	Total	Rate	Enter	Exit	Total
938	Coffee Shop w/Drive Through & No indoor seating	1 DTL	179.00	179	39.31	20	20	40	15.08	8	7	15
934	Fast-Food Restaurant w/Drive Through	2.5 KSF	467.48	1,169	44.61	57	55	112	33.03	43	40	83
934	Fast-Food Restaurant w/Drive Through	2.5 KSF	467.48	1,169	44.61	57	55	112	33.03	43	40	83
Sub-Total			**--**	**2,517**	**--**	**134**	**130**	**264**	**--**	**94**	**87**	**181**
ITE 938 Pass-by Trips (AM=90%, Midday=84%,PM= 98% Daily=90.67%)			--	162	---	18	18	36	---	8	7	15
ITE 934 Pass-by Trips (AM=50%, PM =55%, Daily=52.5%)			--	614	--	28	28	56	--	24	22	46
ITE 934 Pass-by Trips (AM=50%, PM =55%, Daily=52.5%)			--	614	--	28	28	56	--	24	22	46
Pass-by Sub-Total			--	1,390	--	74	74	148	--	56	55	111
Net New Trips			**---**	**1,127**	**---**	**60**	**56**	**116**	**---**	**38**	**32**	**70**

[1] KSF = 1,000 Square Feet [2] VFP = Vehicle Fueling Position

The pass-by trips were evaluated to verify that they do not exceed 10% of the adjacent street traffic. The traffic count volume was obtained from FDOT on-line AADT Traffic Report, excerpts provided in **Attachment B**. **Table 2** presents an analysis of the pass-by trip reduction from US 441 if it exceeds 10% of the respective A.M. and P.M. peak volumes. The project pass-by trips on US 441 utilized the existing count distribution. As can be seen, 10% of the background volume on US 441 is greater than the pass-by trips generated by the development during the A.M. and P.M. peak hours, so no adjustments were made.

Table 2
P.M. Peak Hour Pass-By Traffic Consumption Verification

Background Trips[1]				Pass-By Trips		
Time Period	Direction	US 441	10% of US 441	US 441 Enter	US 441 Exit	Equal to or less than 10% Requirement
A.M.	EB	1,187	118	0	0	Yes
A.M.	WB	1,140	114	74	74	Yes
P.M.	EB	1,187	118	0	0	Yes
P.M.	WB	1,140	114	56	55	Yes

[1]From FDOT on-line County Station 260245, 2023 count.

3. Trip Distribution

The trip distribution pattern for the proposed project was estimated utilizing the currently adopted Gainesville MPO Model. A Select Zone Analysis (SZA) was conducted by modifying the model network to include a Traffic Analysis Zone (TAZ) representing the proposed project and the model's socio-economic data updated to reflect the proposed project buildout. The trip distribution is shown in **Figure 3.** The model distribution plot is included in **Attachment C**.

4. Impact Area

As per City of Alachua Guidelines, the study area includes all the concurrency roadway segments within ½ mile (0.50) and any roadway that the project exceeds 5% of its level of service capacity along with the significant intersections within one-quarter (0.25) mile of the development. The following roadway segments and intersections are proposed to be included in the analysis:

The roadway segments will be included in the analysis:

- US 441, East of NW 173rd Street
- US 441, West of NW 173rd Street
- NW 173rd Street, North of US 441
- NW 173rd Street, South of US 441

The intersections to be included in the area analysis are:

- US 441 & NW 173rd Street
- Project Site Driveways

Note: Additional roadway segments and intersections will be added depending upon a significant analysis of the City of Alachua Concurrency Database.

Alachua Retail Center
Project № 6064
Figure 3
Page 6

Project Trip Distribution

N
NTS

5. Traffic Impact Assessment

a) Roadway

- Obtain existing traffic volumes for the study roadway segment from the turning movement counts at the study intersections for use in the traffic analysis.
- Background traffic will be determined with the use of an annual growth rate obtained from historical AADT in the vicinity of the project. From FDOT on-line, US 441 and NW 173rd Street have an average growth rate of 3.70% per year, which will be applied. Trend analysis worksheets are provided in **Attachment D**.
- Combine project traffic with background traffic to obtain total traffic volumes.
- Perform P.M. peak hour/peak direction roadway analyses utilizing Alachua County LOS standards.

b) Intersections

- Conduct intersection counts during the A.M. and P.M. peak period at the study intersections.
- Determine background traffic with the use of an annual growth rate. As developed for the roadway segment analysis, 3.70 % per year will be utilized.
- Turn lane analysis, access analysis and multi-modal assessment will be evaluated.
- Combine project traffic with background traffic to obtain total traffic.
- Perform intersection capacity analysis utilizing the HCM/HCS operational analysis procedures for the A.M. and P.M. peak hour.

6. Traffic Report

Prepare traffic report summarizing study procedures, analyses and recommendations.
If you have any questions or concerns, please contact us at (407) 628-9955.

APPENDIX B

City of Alachua February 2025 Monitoring Report

City of Alachua

MIKE DAROZA
CITY MANAGER

PLANNING & COMMUNITY DEVELOPMENT
DIRECTOR KATHY WINBURN

Date: February 26, 2025

To: Development Monitoring Report Recipients

From: Carson J. Crockett, AICP Candidate
Planner

RE: City of Alachua February 2025 Development Monitoring Report

Section 2.4.14(M)(1) of the City's Land Development Regulations requires monthly permit activity and available public infrastructure capacity needed to support development to be monitored in a development monitoring report to be published at least quarterly. This report assesses the impacts of development on the City's adopted level of service standards, including development that has been issued a certificate of level of service standard (preliminary development order) or a certificate of concurrency compliance (final development order).

The February 2025 Development Monitoring Report contains the following information:

- Table 1. Certificates of Level of Service Standard (Preliminary Development Orders) and Certificates of Concurrency Compliance (Final Development Orders
- Table 2. Traffic Impacts
- Table 3. Potable Water Impacts
- Table 4. Sanitary Sewer Impacts
- Table 5. Solid Waste Impacts
- Table 6. Recreation Impacts
- Table 7. Projects with Valid Public School Capacity Reservations
- Table 8. Traffic Impacts by Segment

While no deficiencies presently exist, the impacts of new developments upon public facilities will continue to be closely monitored to ensure that imminent deficiencies are identified and appropriately addressed. Note that level of service is monitored for certificates of concurrency compliance only and that certificates of level of service standard are monitored for informational purposes only.

Sincerely,

Carson J. Crockett, AICP Candidate
Planner

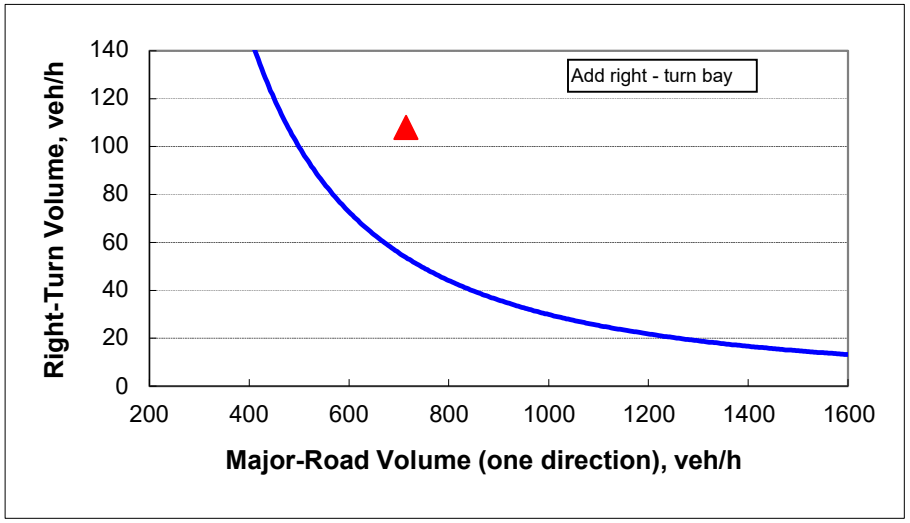
APPENDIX F

NCHRP Report 457 Turn Lane Analysis Worksheets

Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.



INPUT

Roadway geometry:	4-lane roadw ay

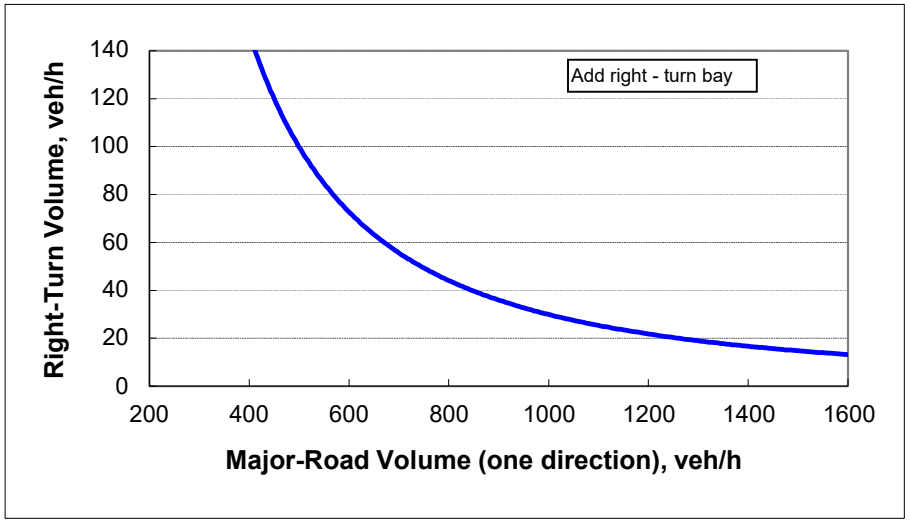
Variable	Value
Major-road speed, mph:	45
Major-road volume (one direction), veh/h:	714
Right-turn volume, veh/h:	108

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	54
Guidance for determining the need for a major-road right-turn bay for a 4-lane roadway:	
Add right-turn bay.	

Source: National Cooperative Highway Research Program (NCHRP) Report 457- Evaluating Intersection Improvements: An Engineering Study Guide

Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.



INPUT

Roadway geometry:	4-lane roadw ay

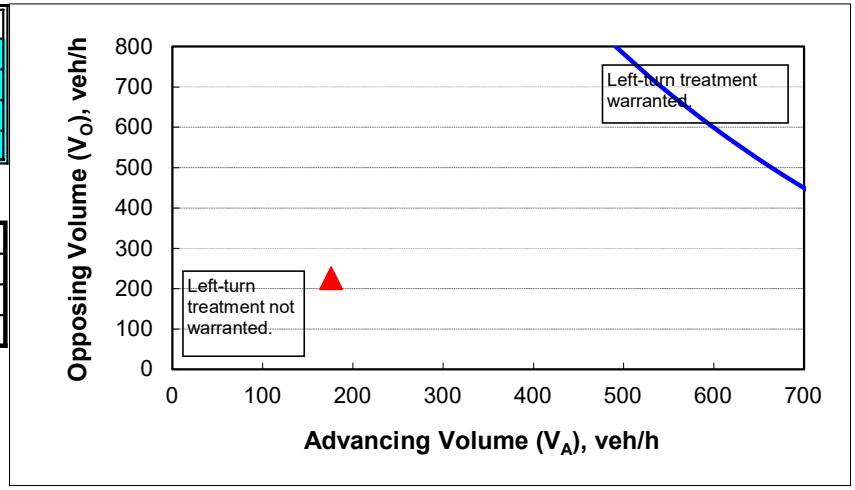
Variable	Value
Major-road speed, mph:	45
Major-road volume (one direction), veh/h:	1747
Right-turn volume, veh/h:	75

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	11
Guidance for determining the need for a major-road right-turn bay for a 4-lane roadway:	
Add right-turn bay.	

Source: National Cooperative Highway Research Program (NCHRP) Report 457- Evaluating Intersection Improvements: An Engineering Study Guide

Figure 2 - 5. Guideline for determining the need for a major-road left-turn bay at a two-way stop-controlled intersection.



2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	45
Percent of left-turns in advancing volume (V_A), %:	2%
Advancing volume (V_A), veh/h:	176
Opposing volume (V_O), veh/h:	226

OUTPUT

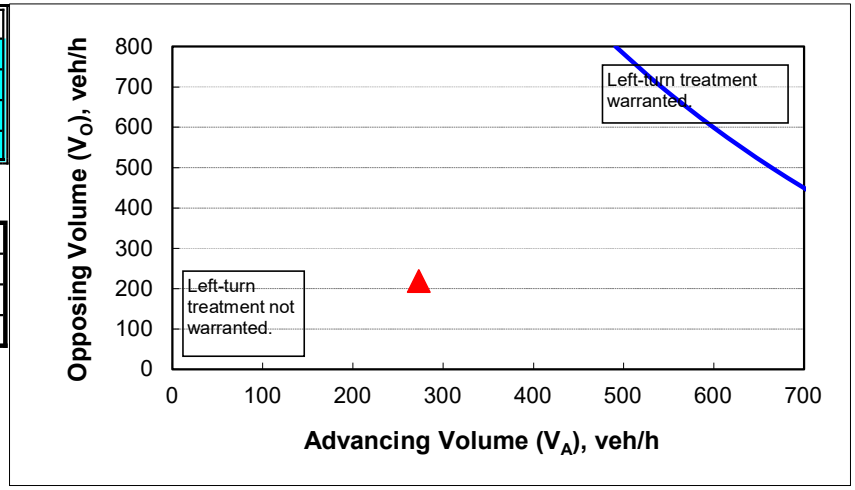
Variable	Value
Limiting advancing volume (V_A), veh/h:	891
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	

CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Source: National Cooperative Highway Research Program (NCHRP) Report 457- Evaluating Intersection Improvements: An Engineering Study Guide

Figure 2 - 5. Guideline for determining the need for a major-road left-turn bay at a two-way stop-controlled intersection.



2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	45
Percent of left-turns in advancing volume (V_A), %:	2%
Advancing volume (V_A), veh/h:	273
Opposing volume (V_O), veh/h:	219

OUTPUT

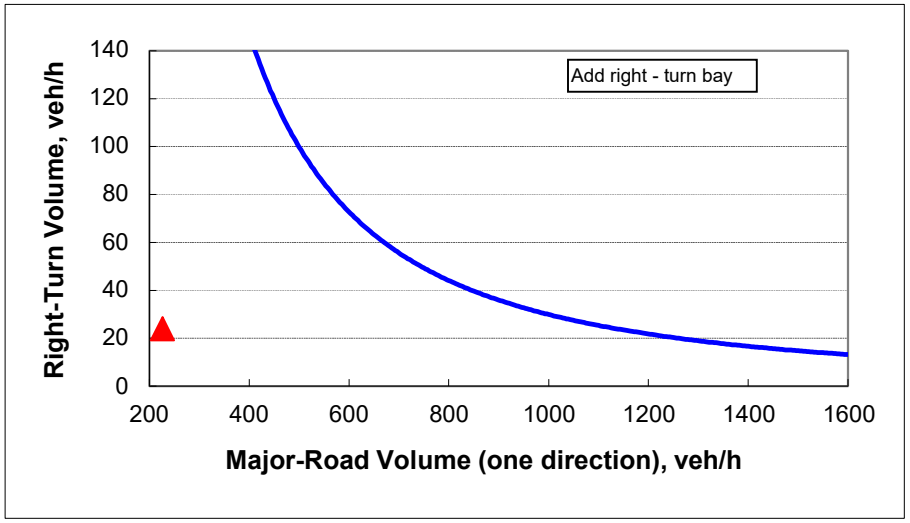
Variable	Value
Limiting advancing volume (V_A), veh/h:	898
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	

CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Source: National Cooperative Highway Research Program (NCHRP) Report 457- Evaluating Intersection Improvements: An Engineering Study Guide

Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.



INPUT

Roadway geometry:	4-lane roadw ay

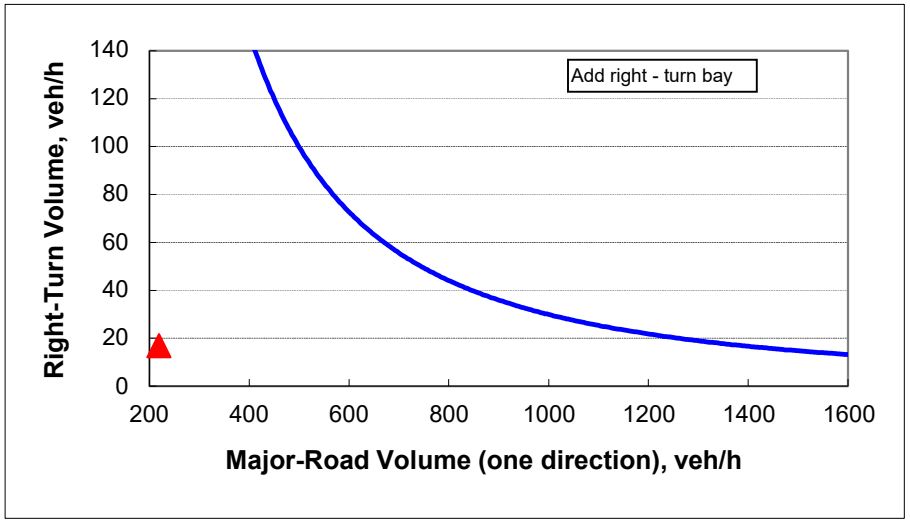
Variable	Value
Major-road speed, mph:	45
Major-road volume (one direction), veh/h:	226
Right-turn volume, veh/h:	24

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	397
Guidance for determining the need for a major-road right-turn bay for a 4-lane roadway:	
Do NOT add right-turn bay.	

Source: National Cooperative Highway Research Program (NCHRP) Report 457- Evaluating Intersection Improvements: An Engineering Study Guide

Figure 2 - 6. Guideline for determining the need for a major-road right-turn bay at a two-way stop-controlled intersection.



INPUT

Roadway geometry:	4-lane roadw ay

Variable	Value
Major-road speed, mph:	45
Major-road volume (one direction), veh/h:	219
Right-turn volume, veh/h:	17

OUTPUT

Variable	Value
Limiting right-turn volume, veh/h:	420
Guidance for determining the need for a major-road right-turn bay for a 4-lane roadway:	
Do NOT add right-turn bay.

1.0 EXECUTIVE SUMMARY

The subject property comprises two legal parcels generally located on the in the northwest corner of the intersection of Matin Luther King Boulevard (NW US Highway 441) and NW 173rd Street in Alachua, Florida. One parcel is addressed at 16313 NW US Highway 441 while the other is not addressed, and the parcels are identified by the Alachua County Property Appraiser as Parcel Identification Nos. 03044-002-000 and 03044-001-002, respectively. Property ownership of the first parcel was identified as Browning & Browning Trustees & Morris, while the second parcel is owned by Santa Fe Hils Church of Christ.

The property appears to have been developed with a church sometime between 1961 and 1964, which was observed on the day of the site reconnaissance. No other uses were documented.

On the day of the site visit, the western parcel of the property was developed with Santa Fe Hills Church of Christ and the eastern parcel was undeveloped.

The interior of the church structure on the property was not able to be accessed on the day of the site reconnaissance, which was considered a limiting condition. Based on the observed use of the onsite structure, documented resources, and interviews with the property owner and church members, this limiting condition was not considered to affect the ability of the environmental professional to assess the property for environmental concerns.

Adjoining properties have been developed with single-family residences, a high school, retail and office uses, and (recently) a gas station.

On the day of the site visit, the east adjoining properties were three single-family residences (16412, 16508, and 16520 NW County Road 235A) and (east of NW County Road 235A) Santa Fe High School (16213 NW US Highway 441); the north adjoining properties were two single-family residences (16618 NW 173rd Terrace and 16607 NW 174th Terrace); the west adjoining properties were four vacant commercial parcels (not addressed) and Horizon Realty/Alachua Title Services (16407 NW 174th Drive); the southeast adjoining property (across the intersection of NW US Highway 441 and NW County road 235A) was Elliano's Coffee (16286 NW US Highway 441); and the south adjoining properties (south of NW US Highway 441) are commercial under construction (16308 NW US Highway 441) and Wawa Gas Station (16304 NW US Highway 441).

A current U.S. Geologic Service (USGS) 7.5-minute series topographic quadrangle map (*High Springs, Florida*) was reviewed to determine the physical setting of the property. The property is situated approximately 139 feet above mean sea level. Based on surface topography as depicted on the USGS map, groundwater flow direction is estimated to be generally to the west-northwest. A copy of the USGS topographic quadrangle map is provided as Figure 1,

Appendix A.

A standard environmental records search of available federal and state (and tribal) environmental record databases was obtained from Environmental Data Resources, Inc. (EDR).

No federal environmental records of concern were reported within the ASTM – E 1527-21 minimum search distances. Please refer to the EDR search report in Appendix C for federal environmental record sources reviewed.

The following state and/or tribal environmental records of concern were located (but not reported in the EDR radius report) within the ASTM – E 1527-21 minimum search distances:

- **Wawa #5438** (Facility ID 9819988), located at 16304 NW US Highway 441, a south adjoining property, was identified as a registered Underground Storage Tank (UST) facility.

  This facility registered two (2) 22,000-gallon USTs and two (2) 20,000-gallon USTs in May 2024. No violations or discharges have been documented for this facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

Based on the lack of violations or releases documented at the property, this facility does not represent a Recognized Environmental Condition to the subject property.

- **Alachua County School Board – Santa Fe High** (Facility ID 8518896), located at 16805 NW County Road 235A, a portion of an east adjoining property across NW County Road 235A, was identified as a registered Underground Storage Tank (UST) facility.

  The school facility had a 3,000 diesel UST installed in 1985 to service its bus fleet. In December 2009, a Dispenser and Piping Closure Report prepared by Stillwater Technologies, Inc. documented the replacement of a dispenser and product piping, and analytical sampling documented no contamination was present. A December 15, 2009, letter from Alachua County Environmental Protection Department accepted the results of the Closure Report. The most recent Storage Tank Facility Routine Compliance Site Inspection Report, conducted in January 2024, documented that the facility was “In Compliance”. No discharges or violations have been documented at the facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

Based on the lack of violations or releases documented at the property, the distance of the facility from the subject property, and the regulatory compliance, this facility does not represent a Recognized Environmental Condition to the subject property.

No other state and/or tribal environmental records were determined to represent an

environmental concern to the subject property, based on their distance, regulatory compliance status, and/or location cross- or down-gradient with respect to groundwater flow direction. Please refer to the EDR search report in Appendix C for state/tribal environmental record sources reviewed.

No additional environmental records of concern were reported for the property. Please refer to the EDR search report in Appendix C for additional environmental record sources reviewed.

Utilizing the default Area of Concern (AOC), as defined by the approximate minimum search distances defined in ASTM E2600-22, Section 8.1.3, it has been determined (through the course of the Phase I ESA) that no known or suspected contaminated properties with Chemicals of Concern (COC) exist.

Based on the application of Tier 1 of the VES, it is concluded that a Vapor Encroachment Condition (VEC) does not exist.

Except for any limitations and exceptions discussed in Section 2.4, this Phase I ESA complies with ASTM – E 1527-21.

Thomson Environmental Consulting, LLC, has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM – E 1527-21 of the property identified as the Alachua Property. Any exceptions to, or deletions from, this practice are described in Section 11 of this report.

The results of this assessment have revealed **no** recognized environmental conditions (RECs) associated with the property.

The results of this assessment have revealed **no** controlled recognized environmental conditions (RECs) associated with the property.

The results of this assessment have revealed **no** significant data gaps associated with the property:

No additional assessment is recommended as a result of this assessment.

2.0 INTRODUCTION

Alachua Outparcel, LLC engaged Thomson Environmental Consulting, LLC (THOMSON) to conduct a Phase I Environmental Site Assessment (ESA) of the property identified as the Alachua Property in Alachua, Florida, subsequently referred to in this report as "the subject property". The subject property comprises two legal parcels generally located on the in the northwest corner of the intersection of Matin Luther King Boulevard (NW US Highway 441) and NW 173rd Street in Alachua, Florida.

This assessment was prepared using the standard of care articulated in the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM – E 1527-21) and the U.S. Environmental Protection Agency's (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) contained in Protection of the Environment, Title 40, Chapter 1, Part 312, Congressional Federal Record (40 CFR Part 312).

2.1 Purpose

The purpose of the Phase I ESA is to identify, to the extent feasible pursuant to the standard of care articulated in ASTM – E 1527-21, *recognized environmental conditions* (RECs) in connection with the property. A REC is defined as:

> The presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ASTM – E 1527-21 constitutes AAI for the purpose of Landowner Liability Protection (LLP), under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This report was prepared to qualify the User for a LLP to CERCLA liability.

2.2 Scope of Services

The scope of work for this assessment utilizes the standard of care articulated in ASTM – E 1527-21 and the USEPA's Standards and Practices for AAI contained in 40 CFR Part 312. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying RECs.

The scope of ASTM – E 1527-21 is not intended to provide a universal analysis of potential environmental risks and hazards. This assessment included no analysis of non-standard scope environmental risks and hazards unless otherwise listed above and/or detailed in Section 12.0. Analysis of other non-standard scope issues by THOMSON would require additional contractual arrangements.

2.3 Significant Assumptions

THOMSON has made certain assumptions in preparing the scope of this Phase I ESA:

- Data gathered from public information sources (e.g., libraries or public regulatory agencies) are accurate and reliable.
- Site operations reflect site conditions relative to potential releases and no intentional concealment of environmental conditions or releases has occurred.
- Interview information is directly reported as gathered by the assessor and is limited by the accuracy of the interviewee's recollection and experience.
- Published geologic information and site observations made by the environmental professional are used to estimate likely contaminant migration pathways in the subsurface. These estimates by the environmental professional are limited in accuracy and are generally cross-referenced with existing information about similar sites and environmental releases in the area.
- Regulatory information is often limited to sites identified after the late-1980s because reliable records were not kept by regulatory agencies prior to that time frame.

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all [potential] contaminants or all conditions above and below ground.

2.4 Limitations and Exceptions

The report has been prepared utilizing the standard of care articulated in ASTM – E 1527-21 and the USEPA's Standards and Practices for AAI contained in 40 CFR Part 312 and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report.

The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. Should such an event occur, Thomson Environmental Consulting, LLC, must be notified in order that we may determine if modifications to our conclusions are necessary (within 180 days of report production).

The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. The interior of the church structure on the property was not able to be accessed on the day of the site reconnaissance, which was considered a limiting condition.

The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past owners with applicable local, state, and federal government laws and regulations was not included in our contract for services.

Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

2.5 Special Terms and Conditions

There were no special terms or contractual conditions for this assessment.

2.6 User Reliance

This report may be distributed and relied upon by Alachua Outparcel, LLC, or successors and assigns of the aforementioned. THOMSON is not responsible for the conclusions, opinions, or recommendations of others. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the express written consent of Thomson Environmental Consulting, LLC. Use and reliance of this report more than 180 days after the production date (as detailed in ASTM – E 1527-21, Sections 4.6 and 4.8) would require certain items to be updated to be considered valid. This ESA is not a statement of suitability of the property for any specific use or purpose.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The subject property comprises two legal parcels generally located on the in the northwest corner of the intersection of Matin Luther King Boulevard (NW US Highway 441) and NW 173rd Street in Alachua, Florida. One parcel is addressed at 16313 NW US Highway 441 while the other is not addressed, and the parcels are identified by the Alachua County Property Appraiser as Parcel Identification Nos. 03044-002-000 and 03044-001-002, respectively. Property ownership of the first parcel was identified as Browning & Browning Trustees & Morris, while the second parcel is owned by Santa Fe Hils Church of Christ.

Property record cards (obtained electronically from the Alachua County Property Appraiser's website) including full legal descriptions of the subject property parcels are provided in Appendix D.

3.2 Site and Vicinity General Characteristics

The property is in a moderately developed area of commercial and institutional development just west of the I-75 corridor.

3.3 Current Use of the Property

On the day of the site visit, the western parcel of the property was developed with Santa Fe Hills Church of Christ and the eastern parcel was undeveloped.

3.4 Structures, Roads, Other Improvements on the Property

On the day of the site visit, the western parcel of the property was developed with a single-story church that according to property appraiser records was originally constructed circa 1978 (but was visible on the property in aerials prior to that time). The structure measured 2,511 square feet and was constructed of concrete block. A 98 square foot canopy was attached to the main structure that was constructed circa 1995. The church was serviced by a potable water well (contained within a small wellhouse) and septic tank.

3.5 Current Uses of Adjoining Properties

On the day of the site visit, the east adjoining properties were three single-family residences (16412, 16508, and 16520 NW County Road 235A) and (east of NW County Road 235A) Santa Fe High School (16213 NW US Highway 441); the north adjoining properties were two single-family residences (16618 NW 173rd Terrace and 16607 NW 174th Terrace); the west adjoining properties were four vacant commercial parcels (not addressed) and Horizon Realty/Alachua Title Services (16407 NW 174th Drive); the southeast adjoining property (across the

intersection of NW US Highway 441 and NW County road 235A) was Elliano's Coffee (16286 NW US Highway 441); and the south adjoining properties (south of NW US Highway 441) are commercial under construction (16308 NW US Highway 441) and Wawa Gas Station (16304 NW US Highway 441).

4.0 USER PROVIDED INFORMATION

A "User" is defined by ASTM – E 1527-21 as the party seeking to use the results of a Phase I ESA and may include a potential purchaser of land in the project area, a potential tenant of the project area, an owner of land in the project area, a lender, or a project area manager. A User Questionnaire was completed by Mr. Zach Pinel of Alachua Outparcel, LLC and returned to Thomson dated March 4, 2025.

4.1 Title Records and Environmental Liens or Activity and Use Limitations

Reasonably ascertainable recorded land title records and lien records that are filed under federal, tribal, state, or local law were to be reviewed by the User to identify Environmental Liens or Activity and Use Limitations (AULs), if any, that are currently recorded against the property. Environmental Liens and AULs that are imposed by judicial authorities may be recorded or filed in judicial records, and, where applicable, such records should be reviewed. Any Environmental Liens or AULs so identified were to be reported to the Environmental Professional (EP). Unless added by a change in the scope of work, this practice does not impose on the EP the responsibility to undertake a review of recorded land title records and judicial records for Environmental Liens or AULs. The user was to either (1) engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for Environmental Liens or AULs currently recorded against or relating to the property, or (2) negotiate such an engagement of a title company or title professional as an addition to the scope of work to be performed by the EP.

The User responded that they had obtained a title search, but did not provide THOMSON with the results.

4.2 Specialized User Knowledge

If the User was aware of any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property, it is the User's responsibility to communicate any information based on such specialized knowledge or experience to the EP.

The User indicated he had no specialized knowledge or experience related to the property or nearby properties.

4.3 Commonly Known or Reasonably Ascertainable Information

If the User was aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property, it is the User's responsibility to communicate such information to the EP.

The User indicated that the past uses of the property included one vacant parcel and one occupied by a church.

4.4 Valuation Reduction for Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the User was to consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User was to try to identify an explanation for a lower price which does not reasonably reflect fair market value if the property were not contaminated and make a written record of such explanation. This does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property.

The User indicated that the purchase price being paid for this property reasonably reflects the fair market value of the property or whether they are aware of any reduction in value that has occurred for potential environmental reasons.

4.5 Owner, Property Manager and Occupant Information

The User did not indicate the current owner, property manager, or occupant information.

4.6 Reason for Performing Phase I ESA

ASTM – E 1527-21 states that the User shall make known to the EP the reason why the User is requesting the Phase I ESA. If the User does not identify the purpose of the Phase I ESA, the EP is to assume the purpose is to qualify for a Landowner Liability Protection (LLP) to CERCLA liability and state this in the report (see Section 2.1).

By not indicating another reason, it is assumed that the Phase 1 ESA was requested to qualify for a LLP to CERCLA liability and to satisfy the conditions of the lending institution.

4.7 Other

The User did not provide any other information that was utilized during the course of this assessment.

5.0 RECORDS REVIEW

The purpose of the records review was to obtain and review records that will help identify recognized environmental concerns in connection with the property.

Some records reviewed pertain not only to the property, but also to properties within an additional approximate minimum search distance in order to help assess the potential of environmental conditions resulting from migrating hazardous substances or petroleum products. Unless stated otherwise the approximate minimum search distances used below were as specified in the ASTM – E 1527-21.

5.1 Standard Environmental Records

A standard environmental record (SER) search of available federal and state environmental record databases was obtained from Environmental Data Resources, Inc. (EDR). A copy of this search is provided as Appendix C.

ASTM – E 1527-21 defines the approximate minimum search distances from the property to a facility located in a standard environmental record source (i.e. database) as follows:

Standard Environmental Record Sources	Approximate Minimum Search Distance (miles)
Federal	
NPL Site List	1.0
Delisted NPL Site List	0.5
CERCLIS List	0.5
CERCLIS NFRAP List	0.5
RCRA CORRACTS List	1.0
RCRA non-CORRACTS TSD List	0.5
RCRA Generators List	*Property* and *Adjoining Properties*
Institutional Control / Engineering Controls Registries	*Property* only
ERNS List	*Property* only
State (and Tribal)	
NPL (equivalent)	1.0
CERCLIS (equivalent)	0.5
Landfill and/or Solid Waste Disposal Site List	0.5
Leaking Storage Tank List	0.5
Registered Storage Tank List	*Property* and *Adjoining Properties*
Institutional Control / Engineering Controls Registries	*Property* only
Voluntary Cleanup Sites	0.5
Brownfield Sites	0.5

Due to discrepancies in the location of some facilities in the databases arising from incorrect or incomplete addresses, it is possible that some facilities may be listed as “orphan sites”, which are unmapped. No unmapped facilities were observed to be within the ASTM – E 1527-21 minimum search distance of the property.

A review of the regulatory information from this database search for possible recognized environmental conditions (RECs) within the ASTM – E 1527-21 approximate minimum search distance is provided in the Federal and State sections below. Note that the review of the regulatory records contained in the standard environmental records search takes into account the following factors:

- Not all facilities reported within the relevant EDR minimum search radii fall within the relevant ASTM – E 1527-21 minimum search distances.
- Facilities are evaluated for their potential impact on the property, and therefore documented soil and groundwater contamination at facilities that are down-gradient of the property (with respect to groundwater flow) are usually not considered RECs. Only if a contaminated facility is near the property or there is indeterminate local groundwater flow direction would a facility require more detailed inspection.
- With regard to off-site, documented contaminated facilities, the following criteria are primary considerations in determining the potential for impact to the property: facility status (active vs. closed); the identification of a Responsible Party (RP); inclusion of the facility in a government-funded cleanup program; results of onsite analytical sampling, and/or completion of remedial activities and/or monitoring sufficient to receive a No Further Action (NFA) or Site Rehabilitation Completion Order (SRCO), or equivalent, from the regulating agency.
- While the distance of a contaminated facility from the property is a consideration in evaluating its potential for being a REC, distance alone is not sufficient to determine whether or not it constitutes a REC.

5.1.1 Federal Environmental Records

No federal environmental records of concern were reported within the ASTM – E 1527-21 minimum search distances. Please refer to the EDR search report in Appendix C for federal environmental record sources reviewed.

5.1.2 State (and Tribal) Environmental Records

The following state and/or tribal environmental records of concern were located (but not reported in the EDR radius report) within the ASTM – E 1527-21 minimum search distances:

- **Wawa #5438** (Facility ID 9819988), located at 16304 NW US Highway 441, a south adjoining property, was identified as a registered Underground Storage Tank (UST) facility.

  This facility registered two (2) 22,000-gallon USTs and two (2) 20,000-gallon USTs in May 2024. No violations or discharges have been documented for this facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

- **Alachua County School Board – Santa Fe High** (Facility ID 8518896), located at 16805 NW County Road 235A, a portion of an east adjoining property across NW County Road 235A, was identified as a registered Underground Storage Tank (UST) facility.

  The school facility had a 3,000 diesel UST installed in 1985 to service its bus fleet. In December 2009, a Dispenser and Piping Closure Report prepared by Stillwater Technologies, Inc. documented the replacement of a dispenser and product piping, and analytical sampling documented no contamination was present. A December 15, 2009, letter from Alachua County Environmental Protection Department accepted the results of the Closure Report. The most recent Storage Tank Facility Routine Compliance Site Inspection Report, conducted in January 2024, documented that the facility was "In Compliance". No discharges or violations have been documented at the facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

No other state and/or tribal environmental records were determined to represent an environmental concern to the subject property, based on their distance, regulatory compliance status, and/or location cross- or down-gradient with respect to groundwater flow direction. Please refer to the EDR search report in Appendix C for state/tribal environmental record sources reviewed.

5.2 Additional Environmental Records

Additional Environmental Records included those records that are proprietary to EDR. These included Historical Auto Stations and Cleaners. These records are based on the names of the business at specific addresses and are not based on the known presence or documented discharge of any specific constituent. These records are used by THOMSON as indicators to cross-reference actual regulatory database records during the assessment.

No additional environmental records of concern were reported for the property. Please refer to the EDR search report in Appendix C for additional environmental record sources reviewed.

5.3 Physical Setting Source(s)

A current U.S. Geologic Service (USGS) 7.5-minute series topographic quadrangle map (*High Springs, Florida*) was reviewed to determine the physical setting of the property. The property is situated approximately 139 feet above mean sea level. Based on surface topography as depicted on the USGS map, groundwater flow direction is estimated to be generally to the west-northwest. A copy of the USGS topographic quadrangle map is provided as Figure 1, Appendix A.

5.4 Historical Use Information on the Property

The objective of consulting historical sources is to develop a history of the previous uses of the

property in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property.

5.4.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were prepared historically for many urban areas in the past and detail locations of potential environmental concerns, particularly as they related to potential fire-fighting concerns (such as fuel storage tanks). Sanborn Fire Insurance Maps were typically not produced for locations outside of urban areas.

A Certified Sanborn Map Report was obtained from Environmental Data Resources dated March 4, 2025. The report documented that there were no available Sanborn Map Reports for the area of the property.

A copy of the "Unmapped Property" Certified Sanborn Map Report is included in Appendix D.

5.4.2 Aerial Photography

Aerial photography is used to roughly determine the presence or absence of structures and discernible uses of the property over time. Aerial photographs from the following years were obtained from various sources and reviewed for this assessment: 1937, 1961, 1964, 1971, 1982, 1994, 2004, 2008, 2014, and 2023.

In the 1937 aerial photograph, the subject property is visible as undeveloped with no structures or discernible visible use.

In the 1961 aerial photograph, no significant changes are visible to the subject property, though perimeter vegetation growth may indicate perimeter fencelines.

In the 1964 aerial photograph, the western parcel of the property is visible with a structure on the southern portion of the property. The eastern parcel has no significant changes are visible.

In the 1971 through 1994 aerial photographs, no significant changes are visible to the subject property.

In the 2004 aerial photograph, a small canopy is visible added on to the northwest corner of the structure.

In the 2008 and 2014 aerial photographs, no significant changes are visible to the subject property.

In the 2023 aerial photograph, there is a small structure (shed) visible in the central portion of the western parcel.

Copies of the historical aerials reviewed for this assessment are included in Appendix D.

5.4.3 Other Historical Sources

City Directories contain the names of the occupants of properties, by address, over the years. A search of City Directories (The EDR-City Directory Abstract) was obtained from Environmental Data Resources dated March 4, 2025. City Directories were searched from 1992 through 2020.

The abstract identified the following listings for the subject property parcel addressed at 16313 NW US Highway 441:

2017 – Church of Christ Santa Fe Hills
2014 – Church of Christ Santa Fe Hills
2010 – Church of Christ Santa Fe Hills

No listings at the property address indicated the potential for an environmental concern (e.g., gas stations, automotive repair shops).

Historical topographic maps were reviewed on the internet at NETRonline's website (www.historicaerials.com) for the following years: 1963, 1976, 1991, 1993, 2012, 2015, 2018, and 2021.

In the 1963 topographic map, the subject property is not depicted with any structures.

In the 1976 and 1991 topographic maps, no significant changes are depicted to the subject property.

In the 1993 topographic map, the subject property is visible with a structure.

In the 2012 topographic map, the property is depicted in an area where individual building footprints are not depicted.

In the 2015 through 2021 topographic maps, no significant changes are depicted to the subject property.

The Alachua County Property Appraiser's website was used to obtain the property record cards. Property record cards (obtained electronically from the Alachua County Property Appraiser's website) including full legal descriptions of the subject property parcels are provided in Appendix D.

No other historical sources were utilized in determining historical use information on the subject property and were not deemed necessary to evaluate the impact of uses with regard to recognized environmental conditions for the property.

5.5 Historical Use Information on Adjoining Properties

The objective of consulting historical sources is to develop a history of the previous uses of the surrounding properties in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property.

5.5.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were prepared historically for many urban areas in the past and detail locations of potential environmental concerns, particularly as they related to potential fire-fighting concerns (such as fuel storage tanks). Sanborn Fire Insurance Maps were typically not produced for locations outside of urban areas.

A Certified Sanborn Map Report was obtained from Environmental Data Resources dated March 4, 2025. The report documented that there were no available Sanborn Map Reports for the adjoining properties.

A copy of the "Unmapped Property" Certified Sanborn Map Report is included in Appendix D.

5.5.2 Aerial Photography

Aerial photography is used to roughly determine the presence or absence of structures and discernible uses of the adjoining properties over time. Aerial photographs from the following years were obtained from various sources and reviewed for this assessment: 1937, 1961, 1964, 1971, 1982, 1994, 2004, 2008, 2014, and 2023.

In the 1937 aerial photograph, all adjoining properties are visible as undeveloped. County Road 235A is visible to the east.

In the 1961 aerial photograph, an east adjoining property is visible as developed with a residential structure, and the west adjoining property is visible as cleared for potential agriculture or grazing land. No significant changes are visible to the remaining adjoining properties.

In the 1964 aerial photograph, no significant changes are visible to the adjoining properties.

In the 1971 aerial photograph, the north adjoining properties are visible as developed with single-family residences. No significant changes are visible to the remaining adjoining properties.

In the 1982 aerial photograph, two additional single-family residences are visible on east adjoining properties, and the high school athletic field is visible on the other east adjoining property. The west adjoining property appears prepped for row crops. NW US Highway 441 is visible as improved.

In the 1994 aerial photograph, no significant changes are visible to the adjoining properties.

In the 2004 aerial photograph, a west adjoining property is visible as developed with a commercial structure. No significant changes are visible to the remaining adjoining properties.

In the 2008 through 2023 aerial photographs, no significant changes are visible to the adjoining properties.

Copies of the historical aerials reviewed for this assessment are included in Appendix D.

5.5.3 Other Historical Sources

City Directories contain the names of the occupants of properties, by address, over the years. A search of City Directories (The EDR-City Directory Abstract) was obtained from Environmental Data Resources dated March 4, 2025. City Directories were searched from 1992 through 2020.

The abstract identified the following listings for adjoining properties:

West Adjoining Property (16407 NW 174th Drive)
2020 – Alachua Title Service, Flowers Surveying-Mapping, Haskins Demolition LLC, Horizon Realty Intl Inc., Horizon Realty of Alachua Inc., Suwannee River Area Health Ed, Tanner Construction Group
2017 – Alachua Title Services, FL Citrus Business & Industries Fund, Horizon Realty of Alachua Inc., Quality Vision International, Surveying & Mapping Inc Flowers
2014 – Alachua Title Services, FL Citrus Business & Industries Fund, Horizon Realty of Alachua Inc., Sol Valley Farms
2010 – Alachua Title Svc, Hallmark Mortgage Svc, Horizon Realty, Suwannee River Area Health Ed
2005 – Alachua Title Services, Horizon Realty of Alachua Inc., Turner Stockton, Stockton T. Wolfe

East Adjoining Property (16213 NW US Highway 441)
2010 – Santa Fe High School
2005 – School Board Alachua County FL
2000 – Alachua County of Schools Public, Santa Fe High School

No listings at the adjoining property addresses indicated the potential for environmental concern (e.g., gas stations, automotive repair shops, dry cleaners).

Historical topographic maps were reviewed on the internet at NETRonline's website (www.historicaerials.com) for the following years: 1963, 1976, 1991, 1993, 2012, 2015, 2018,

and 2021.

In the 1963 topographic map, a south adjoining property is depicted with a structure. No other adjoining properties are depicted as developed with structures.

In the 1976 and 1991 topographic maps, no significant changes are depicted to the adjoining properties.

In the 1993 topographic map, the east adjoining properties and north adjoining properties are visible as developed with structures.

In the 2012 topographic map, the adjoining properties are depicted in an area where individual building footprints are not depicted.

In the 2015 through 2021 topographic maps, no significant changes are depicted to the adjoining properties.

No other historical sources were utilized in determining historical use information on adjoining properties and were not deemed necessary to evaluate the impact of adjoining uses with regard to recognized environmental conditions for the property.

6.0 SITE RECONNAISSANCE

The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property.

6.1 Methodology and Limiting Conditions

The site reconnaissance was performed by Joel Thomson of Thomson Environmental Consulting, LLC, on March 11, 2025. The weather during the site visits was clear to partly cloudy and approximately 75 degrees Fahrenheit.

During the site reconnaissance, pedestrian transects through the accessible portions of the entire exterior of the site were performed. The interior of the church structure on the property was not able to be accessed on the day of the site reconnaissance, which was considered a limiting condition. The entire property, as well as adjoining properties, was visually evaluated for any recognized environmental conditions (RECs).

6.2 General Site Setting

6.2.1 Current Use of the Property

On the day of the site visit, the western parcel of the property was developed with Santa Fe Hills Church of Christ and the eastern parcel was undeveloped.

6.2.2 Past Use(s) of the Property

The property appears to have been developed with a church sometime between 1961 and 1964, which was observed on the day of the site reconnaissance. No other uses were documented.

6.2.3 Current Use(s) of Adjoining Properties

On the day of the site visit, the east adjoining properties were three single-family residences (16412, 16508, and 16520 NW County Road 235A) and (east of NW County Road 235A) Santa Fe High School (16213 NW US Highway 441); the north adjoining properties were two single-family residences (16618 NW 173rd Terrace and 16607 NW 174th Terrace); the west adjoining properties were four vacant commercial parcels (not addressed) and Horizon Realty/Alachua Title Services (16407 NW 174th Drive); the southeast adjoining property (across the intersection of NW US Highway 441 and NW County road 235A) was Elliano's Coffee (16286 NW US Highway 441); and the south adjoining properties (south of NW US Highway 441) are commercial under construction (16308 NW US Highway 441) and Wawa Gas Station (16304 NW US Highway 441).

6.2.4 Past Use(s) of Adjoining Properties

Adjoining properties have been developed with single-family residences, a high school, retail and office uses, and (recently) a gas station.

6.2.5 Current or Past Uses in the Surrounding Area

The surrounding area has been developed with primarily residential and institutional uses since before the 1980s, with retail and commercial uses since the 2000s.

6.2.6 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

The regional geology of northeast Florida includes units of Eocene age and younger limestone and dolomite. These units are, in ascending order: the Oldsmar Limestone; the Lake City Limestone; the Avon Park Limestone; and the Ocala Group. The Ocala Group is comprised of the Inglis, Williston, and Crystal River Formations. Collectively, the Oldsmar, Lake City, and Avon Park Limestones with the Ocala Group comprise the geology of the Floridian Aquifer.

A current U.S. Geologic Service (USGS) 7.5-minute series topographic quadrangle map (*High Springs, Florida*) was reviewed to determine the physical setting of the property. The property is situated approximately 139 feet above mean sea level. Based on surface topography as depicted on the USGS map, groundwater flow direction is estimated to be generally to the west-northwest. A copy of the USGS topographic quadrangle map is provided as Figure 1, Appendix A.

6.2.7 General Description of Structures

On the day of the site visit, the western parcel of the property was developed with a single-story church that according to property appraiser records was originally constructed circa 1978 (but was visible on the property in aerials prior to that time). The structure measured 2,511 square feet and was constructed of concrete block. A 98 square foot canopy was attached to the main structure that was constructed circa 1995. The church was serviced by a potable water well (contained within a small wellhouse) and septic tank.

6.2.8 Roads

No named roads were located on the property.

6.2.9 Potable Water Supply

Potable water was supplied to the property by an onsite groundwater well.

6.2.10 Sewage Disposal System

The property was serviced by an onsite sewage treatment and disposal system (OSTDS)

consisting of a septic tank and associated drainfield.

6.3 Interior and Exterior Observations

6.3.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

No hazardous substances or petroleum products in connection with identified uses were observed or documented on the property.

6.3.2 Storage Tanks

Determining the presence of Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs) is considered essential in assessing potential contamination sources. Visual inspection and the review of tank registration records are used to determine the possible existence of past and present storage tanks in the area of the property. It must be noted, however, that the absence of certain site conditions or lack of records may restrict or prevent the determination of the number and contents of storage tanks on the property.

No aboveground or underground storage tanks were documented, indicated, or observed on the property.

6.3.3 Odors

No strong, pungent, or noxious odors were observed.

6.3.4 Pools of Liquid

No standing pools of liquid were observed on the property.

6.3.5 Drums

No drums of materials were observed.

6.3.6 Hazardous Substances and Petroleum Products Containers

No hazardous substances or petroleum products containers were observed.

6.3.7 Unidentified Substance Containers

No open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were observed on the property.

6.3.8 PCBs

The past use of PCBs in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors was common. PCBs in electrical equipment are controlled by United States EPA

regulation 40 CFR, Part 761. According to this regulation there are three categories for classifying electrical equipment; less than 50 ppm of PCBs is considered “Non-PCB”; between 50 and 500 ppm is considered “PCB-Contaminated”; and greater than 500 ppm is considered “PCB”.

A pole-mounted electrical transformer was observed on the southeast property corner, in the right-of-way of the adjoining roadway corridors. It appeared to be in good working condition with no visible signs of leaking or staining.

No other suspect-containing PCB equipment, such as hydraulic lifts, were observed.

6.4 Interior Observations

6.4.1 Heating/Cooling

As observed from the exterior of the structure, heating/cooling was provided by a split-system, with interior air handler and exterior condensing unit, powered by electricity, as well as a window-mounted air conditioning unit powered by electricity.

6.4.2 Stains or Corrosion

The interior of the structure was not visibly observed during the site reconnaissance.

6.4.3 Drains and Sumps

The interior of the structure was not visibly observed during the site reconnaissance.

6.5 Exterior Observations

6.5.1 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed on the property.

6.5.2 Stained Soil or Pavement

No stained soil or pavement was observed on the property.

6.5.3 Stressed Vegetation

No stressed vegetation was observed on the property.

6.5.4 Solid Waste

Solid waste was not currently generated at the property or observed on the day of the site reconnaissance.

6.5.5 Waste Water

There was no waste water or other liquids generated or being discharged into a drain, ditch, underground injection system, or stream on or adjacent to the property.

6.5.6 Wells

A groundwater wells for potable water was observed on the property.

6.5.7 Septic Systems

The property was serviced by an onsite sewage treatment and disposal system (OSTDS) consisting of a septic tank and associated drainfield.

7.0 INTERVIEWS

7.1 Interviews with Past and Present Owners, Occupants, and/or Key Site Manager

An interview questionnaire was completed by the current property owner of the western parcel, Mr. Robert M. Matheny, President of Santa Fe Hills Church of Christ, was completed and returned to Thomson dated March 20, 2025.

Mr. Matheny noted that the onsite business was a "Church Building" and that the past uses were known and were "Always used as a place of worship". He did not know of any specific chemicals that are present or once were present at the property. He did not know of any spills or other chemical releases that have taken place at the property. He did not know of any environmental cleanups that have taken place at the property. He did not have any other knowledge or experience with the property that may be pertinent to the environmental professional.

Additionally, Ms. Gia Arvin of Matchmaker Realty responded by email on March 23, 2025, that a "church contact" noted that there has never been an onsite heating oil tank, and that there has never been a buried propane tank. She noted that there is a septic tank.

The interview questionnaire and email correspondence are included in Appendix D.

7.2 Interviews with State and/or Local Government Officials

THOMSON interviewed administration at the Florida Department of Environmental Protection's (FDEP) Central District. Thomson was directed to the FDEP's online document system (OCULUS) for information on the subject property and documented facilities in the relevant vicinity.

THOMSON requested information from Alachua Fire and Rescue regarding potential responses to the property (or immediate vicinity) related to hazardous substances or petroleum products. As of the date of publication, no response had been received from the Alachua Fire Rescue. If a response is received at a later date that has a material effect on the conclusions of this report, an addendum will be issued.

THOMSON searched the City of Alachua's permitting website (https://www6.citizenserve.com/Portal/PortalController) for existing permits for the property. There were four entries for both parcels, generally related to roofing, and none of the permits documented by the City of Alachua were indicative of a potential environmental concern.

A permit summary as obtained from the City of Alachua's permitting website is contained in Appendix D.

8.0 VAPOR ENCROACHMENT SCREENING

A Vapor Encroachment Screening (VES) was performed for the property in general accordance with ASTM E2600-22.

Utilizing the default Area of Concern (AOC), as defined by the approximate minimum search distances defined in ASTM E2600-22, Section 8.1.3, it has been determined (through the course of the Phase I ESA) that no known or suspected contaminated properties with Chemicals of Concern (COC) exist.

9.0 FINDINGS

The subject property comprises two legal parcels generally located on the in the northwest corner of the intersection of Matin Luther King Boulevard (NW US Highway 441) and NW 173rd Street in Alachua, Florida. One parcel is addressed at 16313 NW US Highway 441 while the other is not addressed, and the parcels are identified by the Alachua County Property Appraiser as Parcel Identification Nos. 03044-002-000 and 03044-001-002, respectively. Property ownership of the first parcel was identified as Browning & Browning Trustees & Morris, while the second parcel is owned by Santa Fe Hils Church of Christ.

The property appears to have been developed with a church sometime between 1961 and 1964, which was observed on the day of the site reconnaissance. No other uses were documented.

On the day of the site visit, the western parcel of the property was developed with Santa Fe Hills Church of Christ and the eastern parcel was undeveloped.
The interior of the church structure on the property was not able to be accessed on the day of the site reconnaissance, which was considered a limiting condition.

Adjoining properties have been developed with single-family residences, a high school, retail and office uses, and (recently) a gas station.

On the day of the site visit, the east adjoining properties were three single-family residences (16412, 16508, and 16520 NW County Road 235A) and (east of NW County Road 235A) Santa Fe High School (16213 NW US Highway 441); the north adjoining properties were two single-family residences (16618 NW 173rd Terrace and 16607 NW 174th Terrace); the west adjoining properties were four vacant commercial parcels (not addressed) and Horizon Realty/Alachua Title Services (16407 NW 174th Drive); the southeast adjoining property (across the intersection of NW US Highway 441 and NW County road 235A) was Elliano's Coffee (16286 NW US Highway 441); and the south adjoining properties (south of NW US Highway 441) are commercial under construction (16308 NW US Highway 441) and Wawa Gas Station (16304 NW US Highway 441).

A current U.S. Geologic Service (USGS) 7.5-minute series topographic quadrangle map (*High Springs, Florida*) was reviewed to determine the physical setting of the property. The property is situated approximately 139 feet above mean sea level. Based on surface topography as depicted on the USGS map, groundwater flow direction is estimated to be generally to the west-northwest. A copy of the USGS topographic quadrangle map is provided as Figure 1, Appendix A.

A standard environmental records search of available federal and state (and tribal) environmental record databases was obtained from Environmental Data Resources, Inc. (EDR).

No federal environmental records of concern were reported within the ASTM – E 1527-21 minimum search distances. Please refer to the EDR search report in Appendix C for federal environmental record sources reviewed.

The following state and/or tribal environmental records of concern were located (but not reported in the EDR radius report) within the ASTM – E 1527-21 minimum search distances:

- **Wawa #5438** (Facility ID 9819988), located at 16304 NW US Highway 441, a south adjoining property, was identified as a registered Underground Storage Tank (UST) facility.

  This facility registered two (2) 22,000-gallon USTs and two (2) 20,000-gallon USTs in May 2024. No violations or discharges have been documented for this facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

- **Alachua County School Board – Santa Fe High** (Facility ID 8518896), located at 16805 NW County Road 235A, a portion of an east adjoining property across NW County Road 235A, was identified as a registered Underground Storage Tank (UST) facility.

  The school facility had a 3,000 diesel UST installed in 1985 to service its bus fleet. In December 2009, a Dispenser and Piping Closure Report prepared by Stillwater Technologies, Inc. documented the replacement of a dispenser and product piping, and analytical sampling documented no contamination was present. A December 15, 2009, letter from Alachua County Environmental Protection Department accepted the results of the Closure Report. The most recent Storage Tank Facility Routine Compliance Site Inspection Report, conducted in January 2024, documented that the facility was “In Compliance”. No discharges or violations have been documented at the facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

No other state and/or tribal environmental records were determined to represent an environmental concern to the subject property, based on their distance, regulatory compliance status, and/or location cross- or down-gradient with respect to groundwater flow direction. Please refer to the EDR search report in Appendix C for state/tribal environmental record sources reviewed.

No additional environmental records of concern were reported for the property. Please refer to the EDR search report in Appendix C for additional environmental record sources reviewed.

Utilizing the default Area of Concern (AOC), as defined by the approximate minimum search distances defined in ASTM E2600-22, Section 8.1.3, it has been determined (through the course of the Phase I ESA) that no known or suspected contaminated properties with Chemicals of Concern (COC) exist.

Except for any limitations and exceptions discussed in Section 2.4, this Phase I ESA complies with ASTM – E 1527-21.

10.0 OPINION

The following state and/or tribal environmental records of concern were located (but not reported in the EDR radius report) within the ASTM – E 1527-21 minimum search distances:

- **Wawa #5438** (Facility ID 9819988), located at 16304 NW US Highway 441, a south adjoining property, was identified as a registered Underground Storage Tank (UST) facility.

  This facility registered two (2) 22,000-gallon USTs and two (2) 20,000-gallon USTs in May 2024. No violations or discharges have been documented for this facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

OPINION – Based on the lack of violations or releases documented at the property, this facility does not represent a Recognized Environmental Condition to the subject property.

- **Alachua County School Board – Santa Fe High** (Facility ID 8518896), located at 16805 NW County Road 235A, a portion of an east adjoining property across NW County Road 235A, was identified as a registered Underground Storage Tank (UST) facility.

  The school facility had a 3,000 diesel UST installed in 1985 to service its bus fleet. In December 2009, a Dispenser and Piping Closure Report prepared by Stillwater Technologies, Inc. documented the replacement of a dispenser and product piping, and analytical sampling documented no contamination was present. A December 15, 2009, letter from Alachua County Environmental Protection Department accepted the results of the Closure Report. The most recent Storage Tank Facility Routine Compliance Site Inspection Report, conducted in January 2024, documented that the facility was “In Compliance”. No discharges or violations have been documented at the facility.

  Copies and/or excerpts of relevant documents are included in Appendix D.

OPINION – Based on the lack of violations or releases documented at the property, the distance of the facility from the subject property, and the regulatory compliance, this facility does not represent a Recognized Environmental Condition to the subject property.

Utilizing the default Area of Concern (AOC), as defined by the approximate minimum search distances defined in ASTM E2600-22, Section 8.1.3, it has been determined (through the course of the Phase I ESA) that no known or suspected contaminated properties with Chemicals of Concern (COC) exist.

OPINION – Based on the application of Tier 1 of the VES, it is concluded that a Vapor Encroachment Condition (VEC) does not exist.

The interior of the church structure on the property was not able to be accessed on the day of the site reconnaissance, which was considered a limiting condition.

OPINION – Based on the observed use of the onsite structure, documented resources, and interviews with the property owner and church members, this limiting condition was not considered to affect the ability of the environmental professional to assess the property for environmental concerns.

11.0 CONCLUSION

Thomson Environmental Consulting, LLC, has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM – E 1527-21 of the property identified as the Alachua Property. Any exceptions to, or deletions from, this practice are described in Section 11 of this report.

The results of this assessment have revealed **no** recognized environmental conditions (RECs) associated with the property.

The results of this assessment have revealed **no** controlled recognized environmental conditions (RECs) associated with the property.

The results of this assessment have revealed **no** significant data gaps associated with the property:

No additional assessment is recommended as a result of this assessment.

12.0 DEVIATIONS

Except for any limitations and exceptions discussed in Section 2.4, this Phase I ESA complies with ASTM – E 1527-21 and the EPA's Standards and Practices for All Appropriate Inquiries (AAI) contained in 40 CFR Part 312.

14.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Joel A. Thomson
Environmental Professional / President of Thomson Environmental Consulting, LLC

15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

The qualifications of the Environmental Professional conducting this assessment are provided in Appendix F.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ALACHUA COUNTY NW	15404 CR 235A	S 1/4 - 1/2 (0.451 mi.)	10	25
Database: SWF/LF, Date of Government Version: 10/04/2024				
Facility-Site Id: 29653				
Class Status: CLOSED, IN LTC, WITH GW MONITORING (Y)				
Class Status: PRE-AUTHORIZED (B)				

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALACHUA CNTY SCHOOL	***16805 NW CR 235-A***	***NNE 0 - 1/8 (0.117 mi.)***	***A2***	***8***
Database: UST, Date of Government Version: 11/11/2024				
Tank Status: A-Closed In Place				
Tank Status: B-Removed from Site				
Tank Status: U-In Service				
Facility-Site Id: 8518896				
Facility Status: OPEN				

AST: Shortly after the Sept 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the AST list, as provided by EDR, has revealed that there is 1 AST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALACHUA CNTY SCHOOL	***16805 NW CR 235-A***	***NNE 0 - 1/8 (0.117 mi.)***	***A2***	***8***

Database: AST, Date of Government Version: 11/11/2024
Facility-Site Id: 8518896
Facility Status: OPEN
Facility Status: OPEN

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ALACHUA CNTY SCHOOL	16805 NW CR 235-A	NNE 0 - 1/8 (0.117 mi.)	A3	19

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
RACETRAC #413	***16300 MARTIN LUTHER***	***ESE 1/4 - 1/2 (0.333 mi.)***	***9***	***22***

DWM CONTAM: A listing of active or known sites. The listing includes sites that need cleanup but are not actively being working on because the agency currently does not have funding (primarily petroleum and drycleaning).

A review of the DWM CONTAM list, as provided by EDR, and dated 07/14/2023 has revealed that there is

EXECUTIVE SUMMARY

1 DWM CONTAM site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ALACHUA COUNTY NORTH	***ALACHUA COUNTY BCC***	***SSE 1/4 - 1/2 (0.484 mi.)***	***11***	***26***

Close Date: 06/01/2008				
ACEPD Number: 3443				

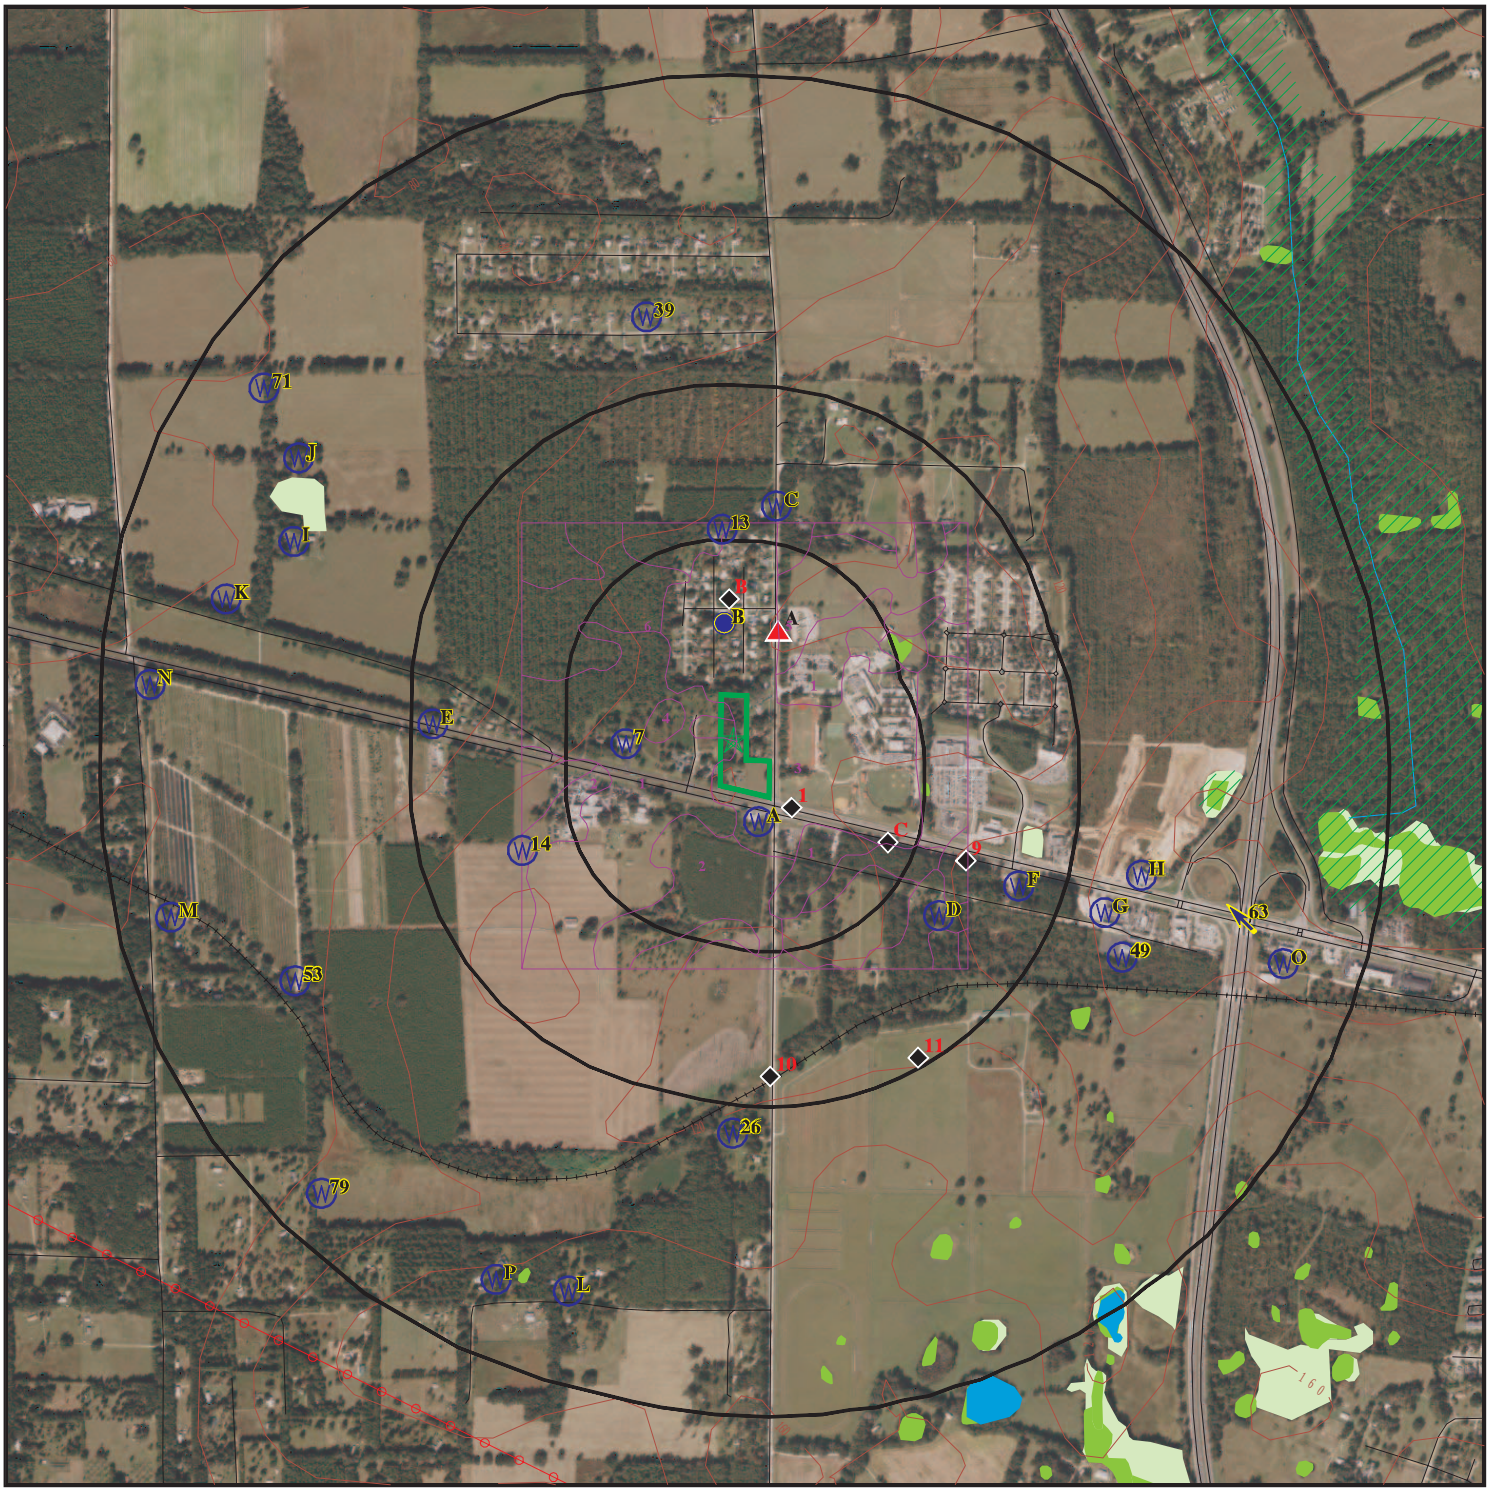
HAZ WASTE: The records in this data set are generated by county SQG Assessment, Notification and Verification Programs on-site surveys (see 403.7225 FS). The waste records are wastes observed during county inspections. Even though this state program targets SQGs and VSQGs for outreach, some counties choose to additionally look at their LQGs.

A review of the HAZ WASTE list, as provided by EDR, and dated 11/11/2024 has revealed that there is 1 HAZ WASTE site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
JACK'S SMALL ENGINE	16530 US HWY 441 N	ESE 1/8 - 1/4 (0.205 mi.)	C7	21

RESP PARTY: Open, inactive and closed responsible party sites

A review of the RESP PARTY list, as provided by EDR, and dated 11/01/2024 has revealed that there is 1 RESP PARTY site within approximately 0.5 miles of the target property.



Lower Elevation	Address	Direction / Distance	Map ID	Page
ALACHUA COUNTY NORTH	***ALACHUA COUNTY BCC***	***SSE 1/4 - 1/2 (0.484 mi.)***	***11***	***26***

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/19/2024
Date Data Arrived at EDR: 01/02/2025
Date Made Active in Reports: 01/21/2025
Number of Days to Update: 19

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024
Date Data Arrived at EDR: 01/02/2025
Date Made Active in Reports: 01/21/2025

Next Scheduled EDR Contact: 04/07/2025
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/19/2024
Date Data Arrived at EDR: 01/02/2025

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024
Date Data Arrived at EDR: 12/18/2024
Date Made Active in Reports: 12/20/2024
Number of Days to Update: 2

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

Lists of state and tribal brownfield sites

BSRA: Brownfield Site Rehabilitation Agreements Listing
The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans.
It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

BROWNFIELDS AREAS: Brownfields Areas Database
A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Next Scheduled EDR Contact: 03/17/2025
Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/04/2024
Date Data Arrived at EDR: 11/05/2024

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

ALACHUA PROPERTY
16313 NW US HIGHWAY 441
ALACHUA, FL 32615

TARGET PROPERTY COORDINATES

Latitude (North):	29.805876 - 29° 48' 21.15''
Longitude (West):	82.527667 - 82° 31' 39.60''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	352362.2
UTM Y (Meters):	3298074.5
Elevation:	139 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	17090184 HIGH SPRINGS, FL
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

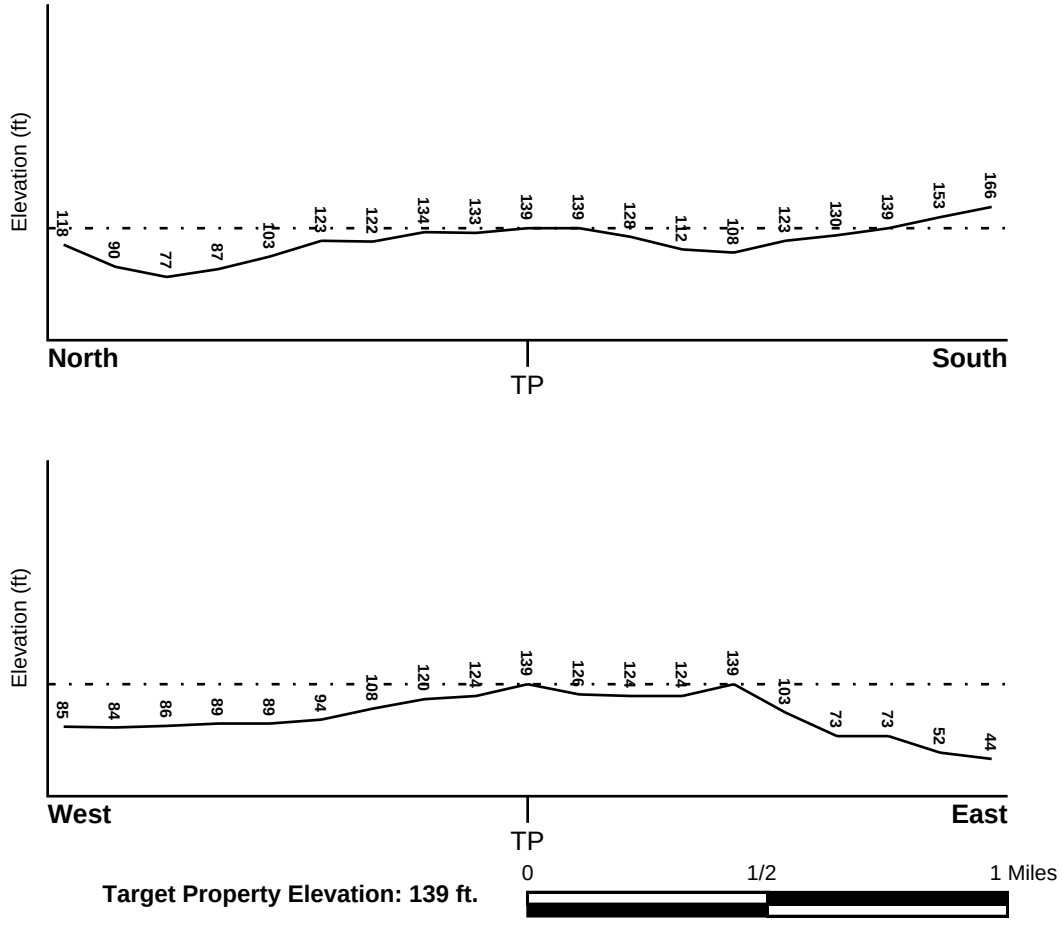
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
12001C0120D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
12001C0110D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HIGH SPRINGS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
63	1/2 - 1 Mile ESE	NW
1G	1/2 - 1 Mile ESE	NW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Fort Meade

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 42.34	Max: 6 Min: 4.5
2	14 inches	85 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141.14 Min: 42.34	Max: 6 Min: 4.5

Soil Map ID: 2

Soil Component Name: Arredondo

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Division of Waste Management - Storage Tank Facility Registration Form
Registration Instructions and Codes List

Storage tank registration is available online through the DEP Business Portal in lieu of the paper form:

- *DEP Business Portal can be found:* Online Services Business Portal (ESSA)
- *Instructions on how to navigate the DEP Business Portal can be found on the DEP Registration web page:* Storage Tank Facility Registration

Storage Tank Facility Registration Form

In the first outlined section block, identify the types of information being submitted on the registration form.
[Forms 62-761.900(2) for Underground Storage Tanks (USTs), and 62-762.901(2) for Aboveground Storage Tanks (ASTs). For facilities with both types of tanks, one form may be used].
Check **New Registration** when the **location** is being registered for the first time and no Facility Identification number exists. If submitting a revised Registration form, check all other boxes that apply to designate the type(s) of revisions being submitted.

A. Facility Information

County List the county where the storage tank facility is located.

Facility ID Include the DEP Facility Identification number whenever possible. Write in "Pending" when submitting a new registration for the first time. Remember: the Facility ID number identifies the location, and it does not change even when a facility is transferred to a new owner upon sale of the facility.

Facility Name Provide the current name of the business establishment operating at the facility location. When registering an abandoned facility, where tanks exist but there is no operational business, identify the location with the property owner's name, as in "Smith Property", if no other facility name is being used.

Facility Address Include the street number and name. In a rural area with no street number associated with it, provide the parcel ID number along with directions (e.g., 'x' miles N of intersection...). Provide the name and telephone number of a contact person or manager *on location,* where possible.

Facility Type This information is an explanation or term that most closely describes the operational use of the facility. Select the code(s) that provides the best or most appropriate description of the facility.

1. If the facility is owned by a government entity, select the appropriate type from the following:
   F. Federal Government **H.** Local or City Government **N.** Native Tribal Lands
   G. State Government **I.** County Government

2. If the facility meets the definition of "bulk product facility" - a waterfront location with at least one aboveground tank with a capacity greater than 30,000 gallons which is used for the storage of pollutants ("Pollutants" includes oil of any kind and in any form, gasoline, pesticides, ammonia, chlorine, and derivatives thereof, excluding liquefied petroleum gas"); select the type from:
   T. Coastal bulk product facility - facility, as defined above and located on the Florida coast, may have storage tank systems that store hazardous substances in addition to pollutants. ("Coastline means the line of mean low water along the portion of the coast that is in direct contact with the open sea and the line marking the seaward limit of inland waters, as determined under the Convention on Territorial Seas and the Contiguous Zone, 15 U.S.T. (Pt. 2) 1606.").
   S. Inland waterfront bulk product facility – a facility, as defined above and located on "inland waterways" (lakes, rivers), may have storage tank systems that store hazardous substances in addition to pollutants.

3. When the facility is a "waterfront location", but not a *bulk product facility* as defined above, select the most appropriate type from:
   V. Marine fueling facility - a commercial, recreational, or retail coastal facility that provides fuel to vessels and may store other pollutants and/or hazardous substances on site.

Facility Type continued

W. Waterfront fueling facility - a commercial, recreational, or retail facility located on a non-coastal waterway that provides fuel to vessels and may store other pollutants and/or hazardous substances on site.

4. When the facility is not described as previously stated, select the most appropriate type from:

A. Retail Station - primarily supplies vehicular fuel to automotive customers; may store other regulated substances.

C. Fuel User, Non-retail - primarily stores motor fuel and/or other pollutants or hazardous substances for consumption by facility/owner/operator.

D. Inland Bulk Petroleum Storage - inland facility with no waterfront access, that has multiple active UST and/or AST storage systems used primarily for storage of pollutants intended for distribution. May also store hazardous substances on-site for facility consumption and/or distribution purposes.

E. Industrial Plant - inland facility with no waterfront access; may include power plants and facilities designed for manufacturing and/or chemical processing; may have multiple active UST and/or AST storage systems used for storage of pollutants and/or hazardous substances intended for facility consumption.

J. Collection Station - maintenance or other related facility that acquires and temporarily stores used and/or waste oil prior to recycling and/or disposal.

K. Inland Bulk Chemical Storage - inland facility with no waterfront access, that has multiple active UST and/or AST storage systems and/or compression vessels used for storage of hazardous substances intended for distribution. May also store pollutants on site for facility consumption and/or distribution purposes.

L. Chemical User - facility primarily uses regulated hazardous substance tanks on site; may also store pollutants.

M. Agricultural - facility actively used in production of crops, plants, or livestock.

P. UST Residential (>1100 gallons) - residence with USTs regulated by Federal Environmental Protection Agency.

Z. Other - Identify the type of establishment that you are registering.

Financial Responsibility – The demonstration of financial responsibility shall be made by the owner or operator in accordance with 40 CFR 280, Subpart H. Check box for Insurance or Other (includes all other financial responsibility methods).

24 Hour Emergency Contact - Provide the name and telephone number of the Emergency Contact for this facility.

B. Account Owner Information

1. Provide the name, address, contact name, telephone number, and email address of the individual(s) and/or business(es) that are responsible for the operation of the storage tanks and for the payment of DEP annual Storage Tank Registration fees. The Account Owner is responsible for payment of the annual storage tank registration fees and will receive the annual storage tank registration placard(s) upon payment. Please provide your account owner's (STCM) email address for your Accounts Payable (AP) or the contact to whom all invoices are to be emailed.

2. When submitting revisions to owner’s contact name or address information, please include their STCM Account Number.

3. When ownership changes, submit a registration form complete with the effective date of ownership and new account owner's signature.

C. Real Property Owner Information

1. Provide the legal entity name, address, contact name, telephone number, and email address of the individual(s) and/or business(es) that are vested with ownership, dominion or legal or rightful title to the real property.

2. Submit a registration form when the property ownership changes, complete with the date.

D. Tank/Compression Vessel Information - Complete one row in Section D for each storage tank and/or compression vessel system located at the facility. Use the following system description codes where appropriate.

1. **Tank ID** – number the systems sequentially, or provide a unique ID number; do not use symbols (#, %, -, etc.).
2. **Tank or Vessel Indicator** – choose T or V to describe the system type.
3. **Tank Placement** – choose A or U to designate aboveground or underground placement of the system.
4. **Tank Capacity** – enter the storage tank capacity in gallons.
5. **Installation Date** – record the date of installation in 'MM/YY' format; provide a best estimate if unknown.
6. **Tank Content** – record the current content (or last content, if system is closed or out-of-service) from the list below:

A	**Leaded Gasoline**	**M**	**Fuel Oil: On-site Heating Only; USTs or ASTs < 30K gals^**	**W**	**Petroleum-based Additive Product**
B	**Unleaded Gasoline (No Ethanol)**	**N**	**Fuel Oil: Distribution; or On-site Heating - ASTs > 30K gals¥**	**X**	**Miscellaneous Petroleum-based Product**
D	**Diesel Fuel**	**O**	**New and Lube Oil**	**Y**	**Unknown Substance**
E	**Aviation Gasoline**	**Q**	**Pesticide**	**Z**	**Other Substance (please identify)**
F	**Jet Fuel**	**R**	**Ammonia Compound**	**7**	**Biodiesel (B20)**
G	**Diesel Fuel-Emergency Generator**	**S**	**Chlorine Compound**	**8**	**E10 – Blend of 10% Ethanol/90% Gasoline**
J	**Used Oil**	**T**	**Hazardous Substance (CERCLA)**	**9**	**E85 – Blend of 85% Ethanol/15% Gasoline**
K	**Kerosene**	**U**	**Mineral Acid***		
L	**Waste Oil**	**V**	**Grades 5 & 6 Bunker "C" Residual Oils**		

* Mineral Acid = Hydrobromic acid, Hydrochloric acid, Hydrofluoric acid, Phosphoric acid and Sulfuric acid.
^ M = fuel is used solely to heat the facility premises and must be stored in a tank with capacity < 30,000 gallons; exempt from regulation.
¥ N = fuel is distributed as heating fuel, or fuel is used solely to heat the facility premises, but the storage tank capacity exceeds 30,000 gallons.

** Compartmented tanks – register as a single tank; itemize the size and contents of each compartment. See construction miscellaneous attributes.
** Manifold tanks – register as individual storage tanks; with individual size and content – even though they are "connected".

7. **Status** – record the current status of the system, and the status effective date (or best estimate) in 'MM/YY' format. Update the tank status timely, as necessary for tanks moving between "in service" and "out-of-service" status.

   A. Properly closed in-place UST filled with sand, concrete or other inert material; AST rendered unusable.

   B. Removed from the site.

   D. Deleted – Data Error – Added to STCM in error; may be a duplicate tank (and/or facility), or tank was registered prior to installation and decided not to have tank installed.

   E. Construction modified – AST constructed as a "mobile tank" or enclosed in a building; no longer retains a "regulated" status.

   M. Moved to New Site – Designation that identifies a tank as removed from a particular facility and reinstalled at a second facility.

   T. Out-of-service tank – Tank system that is designated as out-of-service by the owner or operator.

   U. In-service – Tank system that is NOT designated as out-of-service by the owner or operator.

   V. Temporary out-of-service – Field erected storage tank system that is designated as temporary out-of-service by the owner or operator.

   X. Non-regulated use/process – Exempt from regulation due to how the tank or substance is used; i.e., tank stores diesel used in FLOWTHROUGH process.

   Z. Non-regulated product – Stored in tank; provide status effective date when status relates to a 'change in product' from a regulated substance to a non-regulated substance for a particular storage tank.

8. **Construction, Piping, and Monitoring Attributes** – Select from the lists on the following page the codes that best describe the attributes of each storage tank system.

CONSTRUCTION

Primary Construction:	**C** Steel	**X** Concrete
	D Unknown	**Y** Polyethylene
	E Fiberglass	**Z** Other DEP approved protection method
	F Fiberglass-clad steel	
Overfill/Spill:	**A** Ball check valve	**O** Tight fill
	M Spill containment bucket	**P** Level gauges, high-level alarms
	N Flow shut-off	**Q** Other DEP approved protection method
Corrosion Protection	**G** Cathodic protection – sacrificial anode	**H** Cathodic protection – impressed current
Secondary Containment	**I** Double-walled construction: single material (outer tank material same as inner tank material)	
	R Double-walled construction: dual material (outer tank – concrete, approved synthetic material, or tank "jacket")	
	J Synthetic liner in tank excavation	
	K Concrete, synthetic material, and/or off-site clays beneath AST and in containment area	
	S Other DEP approved/registered containment system	
Construction:	**B** Internal Lining	**U** Field Erected
Miscellaneous Attributes	**L** Compartmented	**W** Built on supports

PIPING

Primary Construction	**B** Steel or Galvanized Metal	**X** No piping associated with tank
	C Fiberglass	**Y** Unknown
	N Approved Synthetic Material	**Z** Other DEP approved piping material
Corrosion Protection	**D** External Protective Coating	
	E Cathodically Protected with Sacrificial Anode or Impressed Current	
Secondary Containment	**F** Double-walled construction: single material (outer pipe material same as inner pipe material)	
	M Double-walled construction: dual material (outer pipe approved synthetic material or pipe "jacket")	
	G Synthetic liner or box/trench liner in piping excavation or pipe containment area	
	P Internal Piping: contained within an internal sump riser directly connected to tank and located beneath dispenser	
Piping:	**A** Aboveground – no contact with soil	**K** Dispenser Sumps
Miscellaneous Attributes	**I** Suction Piping System	**L** Bulk Product System
	J Pressurized Piping System	**H** Airport/Seaport Hydrant System
	W Piping over water	

MONITORING

External	**E** Monitoring of UST synthetic liner	**W** Fiber-optics Technologies
	Q Visual Inspection of AST Systems	**Z** Other DEP approved monitoring methods
	8 Manually Sampled Wells	
Internal	**F** Interstitial Space – Double-walled Tank	
	R Interstitial Monitoring of AST Tank Bottom	
Piping Monitoring	**G** Electronic Line Leak Detector with Flow Shutoff	**K** Interstitial Monitoring – Double-walled Piping
	H Mechanical Line Leak Detector	**U** Bulk Product Piping Pressure Test
	J Monitoring of Piping Liner	**6** External Monitoring
Miscellaneous	**I** Not Required – See Rule for Exemptions	**3** Electronic Monitoring of Piping Sumps
	Y Unknown	**4** Visual Inspections of Dispenser Sumps
	1 Continuous Electronic Sensing Equipment	**5** Electronic Monitoring of Dispenser Sumps
	2 Visual Inspections of Piping Sumps	

E. Certified Contractor and Certification

Record the name and the ***Department of Business and Professional Regulation License Number*** for the ***Certified Contractor*** whenever an underground storage tank has been installed or removed. Do not rely on the contractor to file this form. Storage Tank Registration Forms are required to be submitted by the storage tank system owner.

Please Remember - The Registration Form cannot be processed without the name and signature of the storage tank system owner and the date of the form submittal. Please print the name legibly in case a representative of the storage tank program should need to contact you.

Submit form to tankregistration@floridadep.gov

If you have questions, please call a storage tank registration representative at (850) 245-8839 or email tankregistration@floridadep.gov for assistance. Thank you for your cooperation.

Storage Tank Registration Electronic Submission

Storage Tank Registration Accepted

03/07/2024

Account Owner Information

STCM Account Number:	68130
Account Owner Name:	WAWA FLORIDA LLC
Account Owner Address:	7022 TPC DR #200 Orlando, FL 32822-
Account Owner Phone:	(610) 361-3839
Account Owner E-mail:	JOSHUA.M.WORTH@WAWA.COM

Facility Information

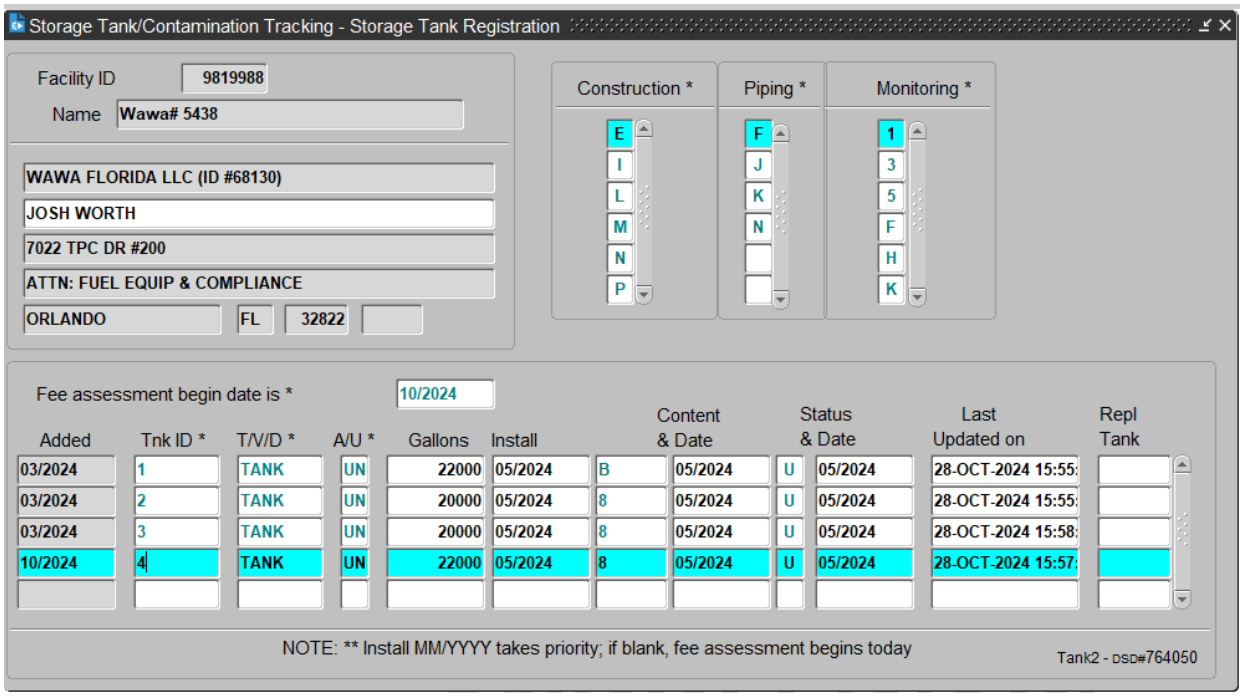
Facility ID:	9819988
Facility Name:	Wawa# 5438
Facility Address:	16314 NW US HIGHWAY 441 ALACHUA, FL 32615-5266

Thank you for submitting your Petroleum Storage Tank Registration. Your Storage Tank Registration has been accepted.

If you wish to review your current Invoice for all of your properly registered Storage Tank Facility (ies), please select the following link: FDEP Petroleum Storage Tank Invoice Review.

Your Petroleum Storage Tank Registration form is attached to this e-mail. You may either pay your invoice by returning to the online Storage Tank registration or by sending a check to:

DEP - Storage Tank Registration - PO Box 3070 - Tallahassee, FL 32315-3070



If you have questions regarding your Storage Tank Registration, you may contact the Storage Tank registration staff at (850) 245-8839 or by e-mail at TankRegistration@dep.state.fl.us.

Date: Monday, October 28, 2024 4:04:56 PM
Attachments: Wawa# 5438 Tank Registration Amendment for change in tank configuration signed.pdf
image002.png

Joshua,

Per your request to update tank information and add new tank please note the changes has been updated. Also, listed below steps to pay for new tank added and obtain copy of the Placard.

Thank you

- http://www.fldepportal.com

- Click on "Pay"
- Click on "Registration"
- Click on "Storage Tank Registration"
- Enter: e-mail address and password for the e-mail you want your placard sent to. (You need to have already registered this e-mail account with DEP).
- If you have not already registered, please click on Register to proceed.
- Click Yes for Do you have STCM#?
- Enter STCM # 68130
- You can click on Pay online to pay invoice and the placard will be emailed.
- or
- Request Placard (if you simply need to print your placard).
- Enter the STCM#
- Click: Search and Continue
- Select: Placard(s) you want printed and placard(s) will be emailed.

Cynthia,

As per our conversation, attached is the amended STRF with the effective date changed to 5/23/24. Thank you for all your help and I apologize for the confusion.

Thanks,

Josh

Josh,

Please verify only adding new tank #4 at this time, because you listed different Install dates and Content Codes in Section D of the form not on file for the other tanks already setup.

Florida DEP Tank Registration Unit,

Attached is the STRF Amendment for a change in the tank configuration at Facility ID# 9819988 (Wawa# 5438 in Alachua). There will be 4 tanks, but I registered 3. I apologize about my mistake.

Thanks,

Josh Worth

Subject: Change of Address

Ms. McGill:

The Alachua County Public Schools has a fuel site at one of our high schools in Alachua, Florida and the address has been changed. I just called FDEP and I was informed to email you with the correct address and when our 2007-2008 placard are mailed to us it will have the correct address on it. Here is the following information: Facility ID: 8518896, Placard No: 250287. The new address is: Alachua County School Board - Santa Fe High, 16805 NW County Road 235-A, Alachua, FL 32615, Alachua County.

A confirming PO has been sent to our finance department for our 2007-2008 storage tank registation.

Thank you for your help.

Sincerely,

Paula Davis

STORAGE TANK REGISTRATION

This placard certifies that the owner & facility named has complied with the registration requirements for petroleum &/or hazardous substance storage tanks regulated by the FL Department of Environmental Protection. The placard must be placed out of the weather and in plain view of storage tank compliance inspectors entering the facility.

SECONDARY CONTAINMENT INSTALLATION DEADLINES
12-31-2004: UST small diameter piping over surface water & UST remote fill pipes must have secondary containment.
01-01-2005: Dike-field areas of large ASTs must meet new standards.& AST small diameter piping over surface water must have secondary containment.
12-31-2009: Single-wall USTs & UST small diameter piping in contact with the soil must have secondary containment.
01-01-2010: Single-wall field erected ASTs & AST single-wall bulk product piping in contact with the soil must have secondary containment unless deferred by an API 570 Integrity Assessment.

The Department has never issued an extension to an upgrade deadline since the storage tank rules were adopted in 1984. If you have questions about these or other deadlines – or need general technical assistance – consult Rule 62-761, F.A.C., or contact a storage tank inspector from the DEP district office, or from the local storage tank program office for your county.

DEPARTMENT OF ENVIRONMENTAL PROTECTION IS ON THE INTERNET
The Web address for DEP is http:\\www.dep.state.fl.us.
You can access the site for Storage Tank Regulation directly by using: http:\\www.dep.state.fl.us/waste/categories/tanks.
Look under the HIGHLIGHTS section to find links to storage tank rules, forms, database reports and other program information.

EMAIL registration-related questions and comments to: TankRegistration@dep.state.fl.us – or telephone (850) 245-8839.
Registration staff members will assist you with your questions and will respond to you by phone or reply to your email address.

The Storage Tank Registration placard below must be posted at the facility.
It must be placed out of the weather and in plain view of inspectors entering the facility.

Storage Tank Regulation Program
P.O. Box 3070
Tallahassee, Florida 32315

Dear Ms. KcKinnie:

I am writing in regard to an email I sent you last week. As I have not had any response from it, I am not sure that you ever received it.

The School Board of Alachua County Transportation Department recently registered our storage tanks #STCH-392 for 2004-2005 fiscal year. When we received the Storage Tank Registration Placards for all of our sites the addresses were all incorrect. All site addresses have changed. I am enclosing copies of the 2004-2005 placards with corrected addresses

Would you please print new placards with the corrected addresses and mail to the following address: School Board of Alachua County Transportation Department, 1800 SE Hawthorne Road, Gainesville, Florida 32641, ATTN: Paula Davis.

Thank you for your help in this matter.

Sincerely,

Paula J. Davis

Q. is surrounded by earth dike
R. rests on an impervious base
S. rests on an earth/gravel base
T. has interior lined bottom
U. is cathodically protected
V. is built of/coated with corrosion resistant material
W. is supported above the soil

List (15)

Integral piping system has:
A. no parts in contact with the soil
Parts contacting the soil which are:
B. galvanized or unprotected metal
C. built of corrosion resistant metal
D. corrosion resistant coated
E. cathodically protected
F. double-walled
G. within a secondary containment
H. interior lined

List (16)

Monitoring system is:
A. automatically sampled well(s)
B. manually sampled well(s)
C. groundwater monitoring plan
D. SPCC plan
E. well/detector in secondary containment
F. in-ground detector
G. within walls of double-wall tank
H. continuous in piping
I. not required

List (17)

Tank disposal method
A. abandoned in place, filled w/sand or concrete
B. removed from site
C. retrofitted
F. abandoned in place, but not filled w/sand or concrete

List (18) Gallons Left

STORAGE TANK REGISTRATION CODES LIST

(#2) FACILITY TYPE CODES

A. Retail/fuel seller
B. Residence
C. Non-retail/fuel user not seller
D. Inland bulk petroleum storage
E. Industrial plant
F. Federal government
G. State government
H. Local, city government
I. County government
J. Collection station
K. Bulk chemical storage
L. Chemical user facility
M. Agricultural facility
N. Indian land
T. Bulk product facility
V. Marine fueling facility
Z. Other: _____

(4) County code
(5) Facility information

(#6) FINANCIAL RESPONSIBILITY CODES

A. State Program - Third Party Liability/State contractor (FPLIPA/AIG)
B. State Program - Third Party Liability/Self insurance with other carrier; other federal financial responsibility mechanism.
C. Other coverage meeting federal financial responsibility requirements.
D. None

(7) Owner information
(8) Tank site information
(9) Tank number
(10) Tank size

(#11) CONTENT CODES

A. Leaded gasoline
B. Unleaded gasoline
C. Gasohol
D. Vehicular diesel
E. Aviation gasoline
F. Jet Fuel
G. Diesel; emergency generator
H. Diesel; generator or pump
K. Kerosene
L. Waste oil
M. Fuel oil; on site heating
N. Fuel oil; distribution
O. New/lube oil
Q. Pesticide
R. Ammonia compound
S. Chlorine compound
T. Hazardous substance
U. Mineral acid
V. Bunker 'C' residual oil
W. Petroleum additive (pollutant)
Y. Unknown
Z. Other: _____

(12) Tank installation date
(13) Tank placement (U or A)

(#14) TANK CONSTRUCTION CODES

A. Overfill protection - ball check valve
B. Interior lined or lined bottom steel
C. Bare, painted, or asphalted steel
D. Unknown
E. Fiberglass
F. Fiberglass-clad steel, composite
G. Cathodically protected & coated steel, sacrificial anode
H. Cathodically protected & coated steel, impressed current
I. Double-walled
J. Secondary containment, synthetic liner
K. Secondary containment, concrete
L. Compartmented
M. Spill containment
N. Overfill protection - flow shut off
O. Overfill protection - tight fill
P. Impervious berm
Q. Earth berm
R. Impervious base
S. Earth base
T. Small use tank
U. Field erected tank
W. Tank built on supports
X. Concrete
Y. Other: _____
Z. Department approved alternate

(#15) PIPING CONSTRUCTION CODES

A. Aboveground, not in contact with soil
B. Galvanized or unprotected metal
C. Fiberglass
E. Cathodically protected steel
F. Double-walled
G. Secondary containment
H. Airport hydrant piping
I. Suction piping system
J. Pressurized piping system
K. Dispenser liners
L. Bulk product transfer lines
Y. Unknown
Z. Department approved alternate

(#16) LEAK DETECTION METHODS

A. Vapor monitoring
B. Groundwater monitoring
E. Interstitial monitoring, tank liners
F. Interstitial monitoring, double-walled tank
G. Piping/in-line leak detectors with automatic shut-off
H. Piping/in-line flow restrictors
I. Not required, see rule for exemptions
J. Interstitial monitoring, piping liners
K. Interstitial monitoring, double-walled piping
L. Automatic tank gauging system
M. Manual tank gauging system
Y. Unknown
Z. Department approved alternate

(#17) TANK STATUS/DISPOSAL CODES

*A. Properly closed in place: underground tank filled with sand or concrete; aboveground tank properly closed
*B. Removed from the site . . *A or B: Closure Assessment required
F. Unmaintained storage tank - tank not in use and not properly disposed; or tank discovered abandoned
T. Temporary out-of-service
U. In-service

Stationary Tank Registration/Notification Form

BY BB

Form 17-1.218(2)

NAME:
MAIL ADDRESS: SCHOOL BOARD OF ALACHUA COUNTY
CITY/STATE: 620 E. UNIVERSITY AVE.
GAINESVILLE, FLA. 32601

FACILITY LOCATION
ADDRESS: SANTA FE HIGH SCHOOL
CITY/STATE: ALACHUA, FLA. 32615

(Make corrections to name and addresses here)

1. Facility/Addressee name: _____

Facility address _____

Mailing address _____

Use this form to comply with the following requirements of the Stationary Tank Rule Chapter 17-61, Florida Administrative Code.

1. Each owner or operator shall register the following with the department.
   a. All existing facilities by December 31, 1984. (Questions 1-19)
   b. All new storage systems or facilities at least 10 days prior to the start of installation of tanks except in the cases of emergency replacement. (Questions 1-19)
   c. A non pollutant containing installation which is to be converted to a facility, at least 10 days prior to the placement of pollutants in such a facility. (Questions 1-19)
2. Each owner or operator shall notify the department of the following.
   a. All storage systems within 10 days of abandonment. (Questions 1-12, 16, 20)
   b. Facility sale within 10 days of sale. Notice shall be made by the seller. (Answer questions 1-7, and 11. Question 7 about the new owner.)
   c. Retrofitting within 10 days of completion. (Questions 1-19)
3. You may notify the department of a change of operator. (Questions 1-6)

List 18

Integral Piping System has:

A. no parts in contact with the soil.

Parts contacting the soil which are:

B. unprotected metal.
C. built of corrosion resistant materials.
D. corroson resistant coated.
E. cathodically protected.
F. double-walled.
G. within a secondary containment.
H. interior lined.
M. none of the above.

List 19

Monitoring system is:

A. automatically sampled well(s).
B. manually sampled well(s).
C. groundwater monitoring plan.
D. SPCC plan.
E. well/detector in secondary containment.
F. in-ground detector.
G. within walls of double-walled tank.
H. continuous in piping.
I. not required.
N. none of the above.

List 20

Tank disposal method.

A. Filling.
B. Removal.
C. Retrofitting.
F. Other.

MOTOR FUEL TANK REGISTRATION

The 1986 Legislature imposed a $50 initial registration fee plus an annual $25 renewal fee on all motor fuel tanks over 550 gallons in size. Funds received will be used primarily to clean up contamination caused by leaking tanks and spills. The registration fee shown on the face of this form is based on the number of motor fuel storage tanks previously registered at this location. RETURN THIS CARD with a check for the amount indicated in the supplied return envelope to the Department of Environmental Regulation within 30 days of receipt of this notice. This will ensure accurate credit and prevent assessment of late fee charges of $20.00 per tank. After receipt of payment, and upon completion of processing, a certificate of registration will be issued to each facility. If several facilities are owned by one individual or one company, mail each registration separately. If there are any questions concerning this registration, call the Department of Environmental Regulation, Storage Tank Section at (904) 488-0300.

Make checks payable to: Department of Environmental Regulation.

C ANALYTICAL DATA REPORT

Section 1.0
Introduction

This report presents the results of a diesel dispenser and associated product piping closure assessment performed by Stillwater Technologies, Inc. (Stillwater) at the Santa Fe High School in Alachua County, Florida (Site). A Site Location Map is provided in **Figure 1**. The closure assessment was conducted for the closure of one diesel dispenser and approximately 50 feet of product piping. The Florida Department of Environmental Protection (FDEP) Facility ID number for the site is 8518896.

Section 2.0
Dispenser and Piping Closure

The closure activities were conducted in conjunction with the upgrade to the Site's existing diesel underground storage tank (UST) system. The upgrade included installing a new dispenser, new double-wall product piping, new tank STP sump, vent line, fill riser, and annular space riser. The petroleum system work was conducted by KC Petroleum (KC) between the dates of November 16 –December 4, 2009. Prior to Stillwater conducting site screening activities, KC excavated to the tank top and uncovered the product piping. KC's Pollutant Storage System Contractors License Number is PCC1256881.

Section 3.0
Soil Assessment

Stillwater conducted soil screening activities at the Site on November 17, 2009. Soil samples were screened from beneath the dispenser, from below the product piping run, and from several side wall points in the excavation. Photographs of the excavation are included in **Appendix A**. Samples were collected at depths of 1 foot below the dispenser, from depths of 1 foot below the product piping, and from a depth of approximately 1 foot into the side wall of the excavation. All sample locations are illustrated on **Figure 2**. The samples were placed into 16-ounce mason jars, half filled, and covered with aluminum foil. The samples were then allowed to temperature equilibrate for approximately five minutes. The headspace of each sample was then analyzed using an Organic Vapor Analyzer (OVA) equipped with a photoionization detector (PID). The OVA model used was a Mini RAE 2000 PID. A calibration certificate for the OVA is included in **Appendix B.**

The OVA screening only had one detection of 13.5 parts per million in soil sample SS-2, which was from the excavation sidewall. A summary of the OVA soil sample readings is included in **Table 1**. For OVA substantiation and release confirmation two soil samples (including SS-2) were also collected and analyzed by Flowers Chemical Laboratories, Inc. for petroleum constituents included in the Kerosene Analytical Group. No analyzed compounds were detected above the specified detection limits. A copy of the analytical data report is included in **Appendix C.**

Section 4.0
Conclusions and Recommendations

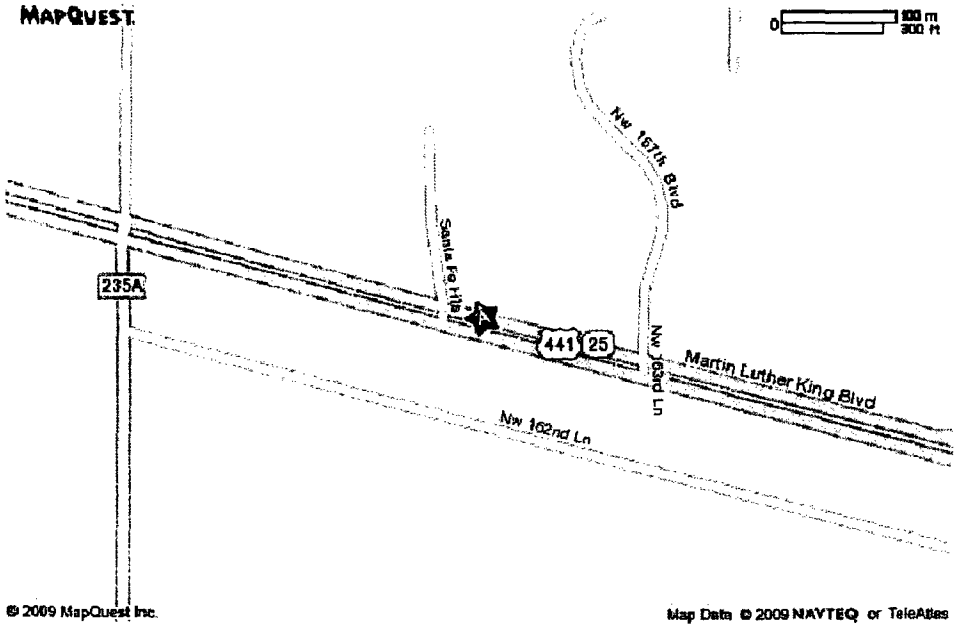
Having completed the dispenser and piping closure Stillwater concludes the following:

- One dispenser and approximately 50 feet of product piping were properly removed;
- OVA screening of soils detected only one low level reading (13.5 ppm); and
- Soil laboratory analytical data did not detect any constituents above their detection limits.

Based on the evidence collected during this closure, Stillwater does not recommend any additional assessment activities.

TABLE 1: SOIL SCREENING SUMMARY

Facility Name: Alachua County - Santa Fe High School



Facility ID# 8518896

BORING NO.	DATE COLLECTED	SAMPLE INTERVAL	OVA READING (ppm)
SS-1	11/17/09	sidewall	0
SS-2*	11/17/09	sidewall	13.5

Report Summary

Date Received: Nov 17, 2009

FCL Project Manager: June S. Flowers

Laboratory #	Sample Description	Analysis	Chemist	Location	SampleMatrix
110475SO1	SS-2	EPA8021	CTH	Main Lab	Soil
		EPA8270	CLS	Main Lab	
		FL-PRO	CTH	Main Lab	
		SM2540 B	CLL	Main Lab	
		X8270	ACS	Main Lab	
		XPRO	ACS	Main Lab	
110475SO2	SS-6	EPA8021	CTH	Main Lab	Soil
		EPA8270	CLS	Main Lab	
		FL-PRO	CTH	Main Lab	
		SM2540 B	CLL	Main Lab	
		X8270	ACS	Main Lab	
		XPRO	ACS	Main Lab	

Certificate of Results

Sample integrity was certified prior to analysis. Test results meet all requirements of the NELAC Standards except as noted in the Quality Control Report. Uncertainties for these data are available on request. This report may not be reproduced in part; results relate only to items tested.

ACCREDITED IN ACCORDANCE WITH nelac

Jefferson S. Flowers, Ph.D.
President/Technical Director

Narrative Report

Sample Handling
Sample handling and holding time criteria were met for all samples. Samples collected by submitter. No unusual events occurred during analysis. Results are reported on a wet weight basis for aqueous matrices and on a dry weight basis for sludge and soil matrices unless otherwise noted. Sample results reported as dissolved were field filtered.

Quality Control
Enclosed analyses met method or FCL criteria, unless otherwise denoted on the sample results. Applied data qualifiers are defined below.

Attachments
Chain of Custody

Qualifier	Meaning
U	Compound was analyzed for but not detected.
J	One or more QC samples associated with this data value exceeded QC limits.
J1	Surrogate recovery limits have been exceeded.
J2	No known quality control criteria exist for the component.
J3	Reported value failed to meet established quality control criteria for either precision or accuracy.
J4	Sample matrix interfered with the ability to make an accurate determination on the spiked sample.
Q	Sample held beyond the accepted holding time.
L	Off-scale high; reported concentration exceeds the highest standard.
V	Analyte was detected in both the sample and the associated method blank.
ZTNTC	Too numerous to count. Numeric value represents filtration volume.
A	Absent
P	Present
T	Value reported is less than the statistical method detection limit. Reported for informational purposes only.
M	Value reported is greater than the statistical method detection limit, but less than the reported MDL.
G	The greatest of the dilutions performed did not yield sufficient oxygen depletion for valid data.
S	The least of the dilutions performed did not yield sufficient oxygen residual for valid data.
O	Result is greater than (over) the specified value.
I	Reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
B	Results based upon colony plate count outside ideal range.
Y	The laboratory analysis was from an improperly preserved sample. The data may not be accurate.

DEP Facility # 018518896
Chapter 62-761/762, FAC, Closure Assessment Report – Review

Dear Mr. Atwater:

The Alachua County Environmental Protection Department (ACEPD) is contracted with the Florida Department of Environmental Protection (Department) to conduct the Storage Tank System Compliance Verification Program for facilities located in Alachua County. ACEPD has reviewed the December 7, 2009 Dispenser and Piping Closure Report that was submitted by Stillwater Technologies, Inc. and received on December 14, 2009 for the above referenced facility. The Dispenser and Piping Closure Report appears to comply with the Department's April 1998 "Storage Tank Closure Assessment Requirements".

The results as provided in the Dispenser and Piping Closure Report do not indicate the presence of petroleum contamination in the area addressed in excess of Department Cleanup Target Levels. Please note that this letter does not certify that this site is not contaminated, and the Department reserves the right to require appropriate actions for this site in accordance with Chapter 62-770, Florida Administrative Code (FAC), if any contamination is discovered in the future in excess of Department Cleanup Target Levels.

If you have any questions please contact Tim Ramsey at (352) 264-6843 or email at thr@alachuacounty.us.

Sincerely,

Timothy H. Ramsey
Petroleum Contracts Supervisor

Three Years	Certificate of Financial Responsiblity	01/20/2022	01/18/2024	Insurance documents complete
Three Years	Monthly Maint. Visual Examinations and Results	01/20/2022	01/18/2024	Records complete

Inspection Comments

01/18/2024
Routine Compliance Inspection.

> Aaron Hardin assisted with the inspection.
> Inspection of 1 Double Wall underground Diesel fuel tank for Bus fleet
> Release detection methods for the facility's UST systems are: electronic monitoring for the interstice of the double-wall USTs and STP sumps, and visual inspections of the new double-wall spill bucket and dispenser sump.
> Current tank registration placard was reviewed.
> Financial responsibility records are complete.
> Monthly electronic and visual release detection records are complete.
> Test records indicate annual operability tests for the Veeder-Root system, line leak detector, ball valve were performed in December 2022 and are now due. Testing has been scheduled.
> Double wall spill bucket has been hydro tested.
> STP piping sump was hydro tested and all passed.
> Spill bucket and dispenser sump were dry.

> A copy of the inspection report and In Compliance Letter were emailed to Aaron Hardin (hardinam@gm.sbac.edu)

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Thomson Environmental Consulting, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Owner or Site Manager Interview

Interview Date:	March 20, 2025
Name:	Robert M. Matheny
Title:	President
Company/Organization:	Santa Fe Hills Church of Christ

Status:

- ☐ Client/Owner
- ☐ Site Manager
- ☐ Occupant
- ☐ Government Official
- ☑ Other

President of Santa Fe Hills Church of Christ

During what time period were you the site manager of the property?

What was type of business did you have at the property?

Church Building

Do you know the past uses of the property?

- ☑ Yes
- ☐ No

If yes describe:

Always used as a place to worship

Do you know of specific chemicals that are present or once were present at the property?

- ☐ Yes
- ☑ No

If yes describe:

Do you know of spills or other chemical releases that have taken place at the property?

☐Yes
☑No

If yes describe:

_____

_____

_____

Do you know of any environmental cleanups that have taken place at the property?

☐Yes
☑No

If yes describe:

_____

_____

_____

Do you have any other knowledge or experience with the property that may be pertinent to the environmental professional?

☐Yes
☑No

If yes describe:

_____

_____

_____

_____

From: Gia & Scott arvin <askthearvins@yahoo.com>
Sent: Sunday, March 23, 2025 3:40 PM
To: Joel Thomson
Cc: Orlando Jaffee Cabot
Subject: Re: Church Property - Alachua

From the church contact:

Spoke to a member that has been there off and on since the beginning. She said as far as knows they never had fuel oil heat, only gas, and never buried a propane tank. There is a septic tank. I was quite sure there wasn't any sewer charge that was paid. She is also going to confirm those answers with her brother, Paul, who has always been a member there. If he has any different answers I will let you know ASAP.

Gia Arvin
Matchmaker Realty

gia@giaandscott.com

On Mar 20, 2025, at 12:34 PM, Joel Thomson <joel@thomsonenv.com> wrote:

Thanks Cabot. A couple of additional questions below...

Gia, to your knowledge did the church facility ever have a heating oil tank for the onsite furnace?

I believe it was connected to natural gas on the day of my field visit. Is that correct? Or is there a buried propane tank?

Does the church operate on a septic tank and field? Or is it hooked up to municipal sanitary sewer?

Thanks!

Subject: Church Property - Alachua

Hey Gia,

Can you or the owners please fill out the questionnaire attached? This is for the phase 1. I will also get an updated estimate for closing on the property. I am also copying Joel Thomson to this email as he had some questions regarding the Church Property.

Talk to you soon.

Thanks,

Cabot

APPENDIX E

User Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT
ASTM STANDARD E1527-21 USER QUESTIONNAIRE
Alachua Property, Alachua County, Florida

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must provide the following information (if available) to the Environmental Professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(Please provide answers in the space provided after each question. Additional space is provided on the last page if required.)

Property Name and Address: West Side Commons

16313 NW US HWY 441; Unassigned. Parcel ID Numbers: 03044-002-000; 03044-001-002

Name of User: Alachua Outparcel Relationship to Property: Purchaser

Signature of User: Zachary Pinel Date: 3/4/2025

(1) Have you engaged a title company or title professional to undertake a review of reasonably ascertainable recorded land title records (often referred to as a chain of title)? ✓ YES ___ NO

(2) Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal , tribal, state or local law? ___ YES ✓ NO

(3) Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? ___ YES ✓ NO

(4) As the User of this Environmental Site Assessment (ESA) do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? ___ YES ✓ NO

(5) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you responded "No", have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? ✓ YES ___ NO

(6) Are you aware of any commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? ✓YES ___NO

_____

For example, as User,

(a) Do you know the past uses of the property? ✓YES ___NO
1 parcel vacant, the other was a church

(b) Do you know of specific chemicals that are present or once were present at the property? ___YES ✓NO _____

(c) Do you know of spills or other chemical releases that have taken place at the property? ___YES ✓NO _____

(d) Do you know of any environmental cleanups that have taken place at the property? ___YES ✓NO _____

(7) As the User of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? ___YES ✓NO _____

_____

(8) In accordance with Section 6.7 of ASTM Standard E1527-21, unless stated otherwise the reason for the User requesting this ESA shall be assumed to be "to qualify for a Landowner Liability Protection (LLP) to CERCLA liability". (State Reason if Different) _____

(9) Do you know whether any of the following documents exist and, if so, whether copies can and will be provided to the Environmental Professional within reasonable time and cost constraints?

a. Environment site assessment reports (___YES ✓NO)
b. Environment compliance audit reports (___YES ✓NO)
c. Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits) (___YES ✓NO)
d. Registrations for underground and above-ground storage tanks (___YES ✓NO)
e. Registrations for underground injection systems (___YES ✓NO)
f. Material safety data sheets (___YES ✓NO)
g. Community right-to-know plan (___YES ✓NO)
h. Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans, etc. (___YES ✓NO)
i. Reports regarding hydrogeologic conditions on the property or surrounding area (___YES ✓NO)
j. Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property (___YES ✓NO)
k. Hazardous waste generator notices or reports (___YES ✓NO)

l. Geotechnical studies (___YES ✓NO)
m. Risk assessments (___YES ✓NO)
n. Recorded Activity and Use Limitations (AULs) (___YES ✓NO)

COPIES OF THE FOLLOWING WILL BE PROVIDED (Example: a, e, and k): _____
_____

(10) Are you aware of:

a. Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? ___YES ✓NO
_____

b. Any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? ___YES ✓NO
_____

c. Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? ___YES ✓NO
_____

ENVIRONMENTAL CONSULTING

JOEL A. THOMSON
PRESIDENT

Mr. Thomson serves as President of Thomson Environmental Consulting, LLC. He combines an interdisciplinary background with extensive knowledge gained through applied fieldwork and exposure to a wide variety of consulting scenarios. He has provided both public and private clients with environmental consulting services for over 14 years.

Mr. Thomson meets the requirements of an Environmental Professional (EP) as defined in 40 CFR §312.10 by holding a baccalaureate degree in science and having more than five (5) years of full-time relevant experience (as defined by §312.1(c)).

Since prior to 2005, Mr. Thomson has performed numerous environmental site assessments and investigations of surface and subsurface conditions and has used professional judgment to develop opinions regarding conditions indicative of releases or threatened releases on the following types of properties, among others:

- Raw land
- Agricultural land
- Single-family homes
- Multi-family residences
- Commercial real estate parcels (undeveloped)
- Office buildings
- Shopping malls
- Ski resorts and snow-making operations
- Airport hangars

Mr. Thomson has provided Phase I Environmental Site Assessments (ESAs) to clients in the following states:

- Florida
- New Hampshire
- Vermont
- California
- Nevada
- Arizona

Summary of Neighborhood Meeting for Proposed Site Plan
IP # 2025.0802
Westside Commons – Heartland Dental Office– Alachua, FL

A neighborhood meeting was held by Interplan LLC at 6:00 PM on Tuesday, October 21, 2025 at the Legacy Park Multipurpose Center, Meeting Room #2. Notices advertising the meeting were sent to property owners within 400 feet (list attached) of the Subject Parcels and an advertisement was posted in the Gainesville Sun 10 business days prior to the meeting as required by the City of Alachua.

The meeting itself was held from 6:00 pm until 6:30 PM at the Legacy Park Multipurpose Center, and Gilberto Corral w/Interplan LLC attended on behalf of the applicant to discuss the site plans with any interested parties. A few copies of 11x17 size plans, and elevations of the building for the proposed Heartland Dental office were provided for review. A total of one person attended the meeting, and her name is provided on the attached sign in sheet. I provided her with a copy of the site plan, explained the proposed development, and answered her questions.

The attendee had no objections to a dental office being built on the subject parcel, and had a few other general questions such as, size of the building and who the tenant would be. I answered her questions, we discussed the site plan and the City of Alachua's infrastructure for a few more minutes, and at approximately 6:30 PM there were no further questions or comments so the meeting was adjourned.

A copy of the newspaper advertisement, mailed notice, list of recipients and sign in sheet is attached.

SELF-CERTIFICATION FOR A STORMWATER MANAGEMENT SYSTEM IN UPLANDS SERVING LESS THAN 10 ACRES OF TOTAL PROJECT AREA AND LESS THAN 2 ACRES OF IMPERVIOUS SURFACES

Owner(s)/Permittee(s):	Ashley Rosado, Nicholas Jones
File No:	0463846001EG
File Name:	WESTSIDE COMMONS - ALACHUA, FL
Site Address:	16313 NW US Highway 441 Alachua FL - 32615 8670
County:	Alachua
Latitude:	29° 48' 17.986"
Longitude:	-82° 31' 37.1064"
Total Project Area:	5.05
Total Impervious Surface Area:	.09
Approximate Date of Commencement of Construction:	
Registered Florida Professional:	STUART ANDERSON
License No.:	60848
Company:	

Date: August 19, 2025

Ashley Rosado certified through the Department's Enterprise Self-Service Application portal that the project described above was designed by the above-named Florida registered professional to meet the following requirements:

(a)The total project area involves less than 10 acres and less than 2 acres of impervious surface;
(b)Activities will not impact wetlands or other surface waters;
(c)Activities are not conducted in, on, or over wetlands or other surface waters;
(d)Drainage facilities will not include pipes having diameters greater than 24 inches, or the hydraulic equivalent, and will not use pumps in any manner;
(e)The project is not part of a larger common plan, development, or sale; and
(f)The project does not:

1.Cause adverse water quantity or flooding impacts to receiving water and adjacent lands;
2.Cause adverse impacts to existing surface water storage and conveyance capabilities;
3.Cause a violation of state water quality standards; or
4.Cause an adverse impact to the maintenance of surface or ground water levels or surface water flows established pursuant to s. 373.042 or a work of the district established pursuant to s. 373.086, F.S.

This certification was submitted before initiation of construction of the above project. The system is designed, and will be operated and maintained in accordance with applicable rules adopted pursuant to part IV of chapter 373, F.S. There is a rebuttable presumption that the discharge from such system will comply with state water quality standards.Therefore, construction, alteration, and maintenance of the stormwater management system serving this project is authorized in accordance with s.403.814(12), F.S.

In accordance with s. 373.416(2), F.S., if ownership of the property or the stormwater management system is sold or transferred to another party, continued operation of the system is authorized only if notice is provided to the Department within 30 days of the sale or transfer.This notice can be submitted to:

FDEP Northeast District
8800 Baymeadows Way West
Jacksonville, FL32256

This certification was submitted along with the following electronic documents:

File Description
Civil Plans
LOA
Stormwater Report
Survey

If you have submitted this certification as a Florida Registered Professional, you may wish to sign and seal this certification, and return a copy to the Department, in accordance with your professional practice act requirements under Florida Statutes.

I, STUART ANDERSON, License No. 60848, do hereby certify that the above information is true and accurate, based upon my knowledge, information and belief. In the space below, affix signature, date, seal, company name, address and certificate of authorization (if applicable).

This sealed certification may be submitted to the Department, either electronically (as an attachment in Adobe PDF or other secure, digital format) at DEP_NED@FloridaDEP.gov, or as a hardcopy, at the postal address below:

FDEP Northeast District
8800 Baymeadows Way West
Jacksonville, FL32256

PART 3: PERMIT APPROVAL

The above application has been reviewed and is hereby approved subject to all Provisions as attached.

Permit Number: 2025-A-291-00030
Department of Transportation

Signature: Randall Woodard Title: PERMITS COORDINATOR II

Department Representative's Printed Name Randall Woodard

Temporary Permit ☐ YES ☑ NO (If temporary, this permit is only valid for 6 months)

Special provisions attached ☐ YES ☑ NO

Date of Issuance: 8/28/2025

If this is a normal (non-temporary) permit it authorizes construction for one year from the date of issuance. This can only be extended by the Department as specified in 14-96.007(6).

Approved
2025-A-291-00030
Randall Woodard
8/28/2025

See following pages for General and Special Provisions

PART 4: GENERAL PROVISIONS

1. Notify the Department of Transportation Maintenance Office at least 48 hours in advance of starting proposed work.
   Phone: 3523814342 , Attention: Randall Woodard
2. A copy of the approved permit must be displayed in a prominent location in the immediate vicinity of the connection construction.
3. Comply with Rule 14-96.008(1), F.A.C., Disruption of Traffic.
4. Comply with Rule 14-96.008(7), F.A.C., on Utility Notification Requirements.
5. All work performed in the Department's right of way shall be done in accordance with the most current Department standards, specifications and the permit provisions.
6. The permittee shall not commence use of the connection prior to a final inspection and acceptance by the Department.
7. Comply with Rule 14-96.003(3)(a), F.A.C., Cost of Construction.
8. If a Significant Change of the permittee's land use, as defined in Section 335.182, Florida Statutes, occurs, the Permittee must contact the Department.
9. Medians may be added and median openings may be changed by the Department as part of a Construction Project or Safety Project. The provision for a median might change the operation of the connection to be for right turns only.
10. All conditions in NOTICE OF INTENT WILL APPLY unless specifically changed by the Department.
11. All approved connection(s) and turning movements are subject to the Department's continuing authority to modify such connection(s) or turning movements in order to protect safety and traffic operations on the state highway or State Highway System.
12. **Transportation Control Features and Devices in the State Right of Way.** Transportation control features and devices in the Department's right of way, including, but not limited to, traffic signals, medians, median openings, or any other transportation control features or devices in the state right of way, are operational and safety characteristics of the State Highway and are not means of access. The Department may install, remove or modify any present or future transportation control feature or device in the state right of way to make changes to promote safety in the right of way or efficient traffic operations on the highway.
13. The Permittee for him/herself, his/her heirs, his/her assigns and successors in interest, binds and is bound and obligated to save and hold the State of Florida, and the Department, its agents and employees harmless from any and all damages, claims, expense, or injuries arising out of any act, neglect, or omission by the applicant, his/her heirs, assigns and successors in interest that may occur by reason of this facility design, construction, maintenance, or continuing existence of the connection facility,except that the applicant shall not be liable under this provision for damages arising from the sole negligence of the Department.
14. The Permittee shall be responsible for determining and notify all other users of the right of way.
15. Starting work on the State Right of Way means that I am accepting all conditions on the Permit.

Approved
2025-A-291-00030
Randall Woodard
8/28/2025

PART 5: SPECIAL PROVISIONS

NON-CONFORMING CONNECTIONS: ☐ YES ☐ NO

If this is a non-conforming connection permit, as defined in Rule Chapters 14-96 and 14-97, then the following shall be a part of this permit.

1. The non-conforming connection(s) described in this permit is (are) not permitted for traffic volumes exceeding the Permit Category on page 1 of this permit, or as specified in "Other Special Provisions" below.

2. All non-conforming connections will be subject to closure or relocation when reasonable access becomes available in the future.

OTHER SPECIAL PROVISIONS:

1.This permit only applies to work being done within FDOT right of way. 2. Contact FDOT Inspector Dale Hunter 48 hours in advance 352-575-3713 for a preconstruction meeting and before any work is performed within FDOT right of way. 3 Have all utilities located before the preconstruction meeting. 9.The Contractor must have a copy of the approved FDOT Permit on site during construction.

PART 6: APPEAL PROCEDURES

You may petition for an administrative hearing pursuant to sections 120.569 and 120.57, Florida Statutes. If you dispute the facts stated in the foregoing Notice of Intended Department Action (hereinafter Notice), you may petition for a formal administrative hearing pursuant to section 120.57 (1), Florida Statutes. If you agree with the facts stated in the Notice, you may petition for an informal administrative hearing pursuant to section 120.57(2), Florida Statutes. You must file the petition with:

Clerk of Agency Proceedings
Department of Transportation
Haydon Burns Building
605 Suwannee Street, M.S. 58
Tallahassee, Florida 32399-0458

The petition for an administrative hearing must conform to the requirements of Rule 28-106.201(2) or Rule 28-106.301(2), Florida Administrative Code, and be filed with the Clerk of Agency Proceedings by 5:00 p.m. no later than 21 days after you received the Notice. The petition must include a copy of the Notice, be legible, on 8 1/2 by 11 inch white paper, and contain:

1. Your name, address, telephone number, any Department of Transportation identifying number on the Notice, if known, the name and identification number of each agency affected, if known, and the name, address, and telephone number of your representative, if any, which shall be the address for service purposes during the course of the proceeding.
2. An explanation of how your substantial interests will be affected by the action described in the Notice;
3. A statement of when and how you received the Notice;
4. A statement of all disputed issues of material fact. If there are none, you must so indicate;
5. A concise statement of the ultimate facts alleged, including the specific facts you contend warrant reversal or modification of the agency's proposed action, as well as an explanation of how the alleged facts relate to the specific rules and statutes you contend require reversal or modification of the agency's proposed action;
6. A statement of the relief sought, stating precisely the desired action you wish the agency to take in respect to the agency's proposed action.

If there are disputed issues of material fact a formal hearing will be held, where you may present evidence and argument on all issues involved and conduct cross-examination. If there are no disputed issues of material fact an informal hearing will be held, where you may present evidence or a written statement for consideration by the Department.

Mediation, pursuant to section 120.573, Florida Statutes, may be available if agreed to by all parties, and on such terms as may be agreed upon by all parties. The right to an adminstrative hearing is not affected when mediation does not result in a settlement.

Your petition for an administrative hearing shall be dismissed if it is not in substantial compliance with the above requirements of Rule 28-106.201(2) or Rule 28-106.301(2), Florida Administrative Code. If you fail to timely file your petition in accordance with the above requirements, you will have waived your right to have the intended action reviewed pursuant to chapter 120, Florida Statutes, and the action set forth in the Notice shall be conclusive and final.

EROSION CONTROL NOTES

ALL EROSION CONTROL MEASURES SHALL REMAIN IN PLACE UNTIL COMPLETION OF CONSTRUCTION.

1. ALL EROSION AND SEDIMENT CONTROL WORK SHALL CONFORM WITH LOCAL CITY/COUNTY AND WATER MANAGEMENT DISTRICT SPECIFICATIONS, SUBJECT TO AUTHORIZED AND APPROVED VARIANCES, WAIVERS AND/OR CONDITIONAL CHANGES.

2. EROSION AND SEDIMENT CONTROL MEASURES SHALL BE PLACED PRIOR TO OR AS THE FIRST STEP IN, CONSTRUCTION. SEDIMENT CONTROL PRACTICES WILL BE APPLIED AS A PERIMETER DEFENSE AGAINST ANY TRANSPORTATION OF SILT OFF THE SITE.

3. ALL AREAS AFFECTED BY THIS WORK SHALL BE RESTORED TO A CONDITION EQUAL TO OR BETTER THAN EXISTING CONDITION, UNLESS SPECIFICALLY EXEMPTED BY THE PLANS. THE COST FOR SUCH RESTORATION SHALL BE INCIDENTAL TO OTHER CONSTRUCTION AND NO ADDITIONAL COMPENSATION SHALL BE ALLOWED.

4. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER OF ANY DISCREPANCIES BETWEEN THESE PLANS AND FIELD CONDITIONS PRIOR TO CONSTRUCTION.

5. PRIOR TO CONSTRUCTION THE CONTRACTOR SHALL PROVIDE TREE PROTECTION BARRIERS TO MEET THE REQUIREMENTS OF LOCAL SPECIFICATIONS.

6. THE CONTRACTOR SHALL SELECTIVELY CLEAR ONLY THE AREAS REQUIRED FOR CONSTRUCTION AND STABILIZE ANY POTENTIAL EROSION AREAS IMMEDIATELY FOLLOWING COMPLETION OF CONSTRUCTION.

7. CONTRACTOR SHALL KEEP ANY AND ALL SAND, SILT OR OTHER DEBRIS FROM MOVING OFF-SITE. USE AND MAINTAIN SILT FENCE JUST INSIDE OF PROPERTY LINE.

8. CONTRACTOR SHALL BLOCK INTRUSION OF SAND, SILT OR OTHER DEBRIS INTO ANY DRAINAGE OR SANITARY SEWER STRUCTURE OR PIPING ON OR ADJACENT TO SITE.

9. ALL CLEARED AREAS FOR IMPROVEMENT AND/OR CONSTRUCTION SHALL BE WATERED TO PREVENT WIND EROSION.

10. FOR ADDITIONAL INFORMATION AND DETAILS, **SEE F.D.O.T. INDEX NO. 102**.

11. UNLESS SPECIFIED, SILT FENCES MAY BE USED IN LIEU OF HAY BARRIERS.

12. ADDITIONAL POSTS AND RAILS MAY BE NECESSARY TO SECURE AND SUPPORT BARRIERS.

13. ADDITIONAL BARRIER LENGTHS MAY BE REQUIRED BY THE COUNTY ENGINEER OR BY REGULATORY AGENCIES.

14. FILTER FABRIC MUST BE INSTALLED UNDER ALL INLET GRATES, AT ALL TIMES WHEN INLETS ARE NOT PROTECTED BY SILT FENCE OR HAY BALES, UNTIL THE LIMEROCK BASE IS FINISHED AND PRIMED.

15. THE CONTRACTOR IS REQUIRED TO HAVE THE EROSION CONTROL PLAN POSTED IN A VISIBLE LOCATION ON THE CONSTRUCTION SITE AT ALL TIMES.

16. NON STORMWATER DISCHARGES SUCH AS FIRE HYDRANT FLUSHING, ETC SHALL BE DISCHARGED TO EXISTING UNDERGROUND STORMWATER FACILITY.

17. ANY POTENTIALLY HAZARDOUS CHEMICALS BROUGHT ONTO THE JOB SITE WILL BE LIMITED AND KEPT IN ORIGINAL CONTAINER WITH MSDS LABEL.

18. NO SILT SHALL BE TRACKED ONTO PUBLIC ROADWAYS. ANY SILT DEPOSITED ON PUBLIC ROADWAYS SHALL BE REMOVED BY THE END OF THE WORK DAY.

DEMOLITION NOTES

1. PRIOR TO COMMENCEMENT OF DEMOLITION THE CONTRACTOR WILL COORDINATE HIS ACTIVITIES WITH ALL THE UTILITY COMPANIES SERVING THIS AREA. CONTRACTOR IS TO COORDINATE FULLY WITH UTILITY COMPANIES ON EXACT LOCATION OF UNDERGROUND UTILITIES PRIOR TO EXCAVATION.

2. THE CONTRACTOR IS TO COMPLETELY REMOVE AND DISPOSE OF ALL STRUCTURES AND BUILDINGS THAT IS SO INDICATED INCLUDING FOUNDATIONS, TIMBER AND BRUSH, EXCEPT AS OTHERWISE INDICATED; STUMPS AND ROOTS; EXISTING PAVEMENT; OTHER STRUCTURES AS SHOWN OR REASONABLY IMPLIED IN THE DRAWINGS.

3. EXCEPT IN AREAS WHERE EXISTING TREES SHALL BE PRESERVED, A MINIMUM DEPTH OF REMOVAL SHALL BE (2) FOOT BELOW SUBGRADE IN ROADWAY AREAS AND TO ORIGINAL SOILS ELSEWHERE. WHERE EXISTING BUILDINGS ARE TO BE DEMOLISHED, ALL TRACES OF FOUNDATIONS AND UNDERGROUND UTILITIES ARE TO BE REMOVED (UNLESS OTHERWISE NOTED ON PLANS). THE CONTRACTOR IS RESPONSIBLE FOR PROPER DISPOSAL OF ALL WASTE MATERIAL.

4. WHERE PAVING OR STRUCTURES ARE TO BE REMOVED WHICH ABUT OR ARE A PART OF CONNECTED FACILITIES (THAT ARE OFF-SITE), RESTORATION OF ANY DAMAGE THAT MIGHT RESULT FROM DEMOLITION IS TO BE RESTORED TO A CONDITION EQUAL TO OR BETTER THAN EXISTING UNLESS SPECIFICALLY EXEMPTED BY THE PLANS. THE COST FOR SUCH RESTORATION SHALL BE INCIDENTAL TO OTHER CONSTRUCTION AND NO EXTRA COMPENSATION WILL BE ALLOWED.

5. THE LOCATION OF ALL EXISTING UTILITIES, STORM DRAINAGE AND TREES SHOWN ON THE PLANS HAVE BEEN DETERMINED FROM AVAILABLE INFORMATION AND IS GIVEN FOR THE CONVENIENCE OF THE CONTRACTOR. THE OWNER OR ENGINEER ASSUMES NO RESPONSIBILITY FOR ACCURACY. PRIOR TO THE START OF DEMOLITION THE CONTRACTOR SHALL VISIT THE SITE AND DETERMINE THE EXISTANCE & LOCATION OF ALL STRUCTURES, UTILITIES & TREES SHOWN OR NOT ON THE PLANS, WHICH WOULD NEED TO BE REMOVED OR PRESERVED.

6. THE CONTRACTOR IS TO COORDINATE THE RELOCATION OR REMOVAL OF ALL OVERHEAD/UNDERGROUND UTILITIES, UTILITY POLES, LIGHTS AND LINES IN THE RIGHT-OF-WAY AND ON THE PROPERTY WITH THE APPROPRIATE SERVICE PROVIDER.

7. THE CONTRACTOR SHALL REFERENCE AND RESTORE PROPERTY CORNERS AND LAND MARKERS DISTURBED DURING CONSTRUCTION. (UNDER THE DIRECTION OF A FLORIDA REGISTERED LAND SURVEYOR).

UTILITY SEPARATION NOTES

(1) HORIZONTAL SEPARATION BETWEEN UNDERGROUND WATER MAINS AND SANITARY OR STORM SEWERS, WASTEWATER OR STORM WATER FORCE MAINS, RECLAIMED WATER PIPELINES, AND ON-SITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS.

(A) NEW OR RELOCATED, UNDERGROUND WATER MAINS SHALL BE LAID TO PROVIDE A HORIZONTAL DISTANCE OF AT LEAST THREE FEET BETWEEN THE OUTSIDE OF THE WATER MAIN AND THE OUTSIDE OF ANY EXISTING OR PROPOSED STORM SEWER, STORM WATER FORCE MAIN, OR PIPELINE CONVEYING RECLAIMED WATER REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C.

(B) NEW OR RELOCATED, UNDERGROUND WATER MAINS SHALL BE LAID TO PROVIDE A HORIZONTAL DISTANCE OF AT LEAST THREE FEET, AND PREFERABLY TEN FEET, BETWEEN THE OUTSIDE OF THE WATER MAIN AND THE OUTSIDE OF ANY EXISTING OR PROPOSED VACUUM-TYPE SANITARY SEWER.

(C) NEW OR RELOCATED, UNDERGROUND WATER MAINS SHALL BE LAID TO PROVIDE A HORIZONTAL DISTANCE OF AT LEAST SIX FEET, AND PREFERABLY TEN FEET, BETWEEN THE OUTSIDE OF THE WATER MAIN AND THE OUTSIDE OF ANY EXISTING OR PROPOSED GRAVITY- OR PRESSURE-TYPE SANITARY SEWER, WASTEWATER FORCE MAIN, OR PIPELINE CONVEYING RECLAIMED WATER NOT REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C. THE MINIMUM HORIZONTAL SEPARATION DISTANCE BETWEEN WATER MAINS AND GRAVITY-TYPE SANITARY SEWERS SHALL BE REDUCED TO THREE FEET WHERE THE BOTTOM OF THE WATER MAIN IS LAID AT LEAST SIX INCHES ABOVE THE TOP OF THE SEWER.

(D) NEW OR RELOCATED, UNDERGROUND WATER MAINS SHALL BE LAID TO PROVIDE A HORIZONTAL DISTANCE OF AT LEAST TEN FEET BETWEEN THE OUTSIDE OF THE WATER MAIN AND ALL PARTS OF ANY EXISTING OR PROPOSED "ON-SITE SEWAGE TREATMENT AND DISPOSAL SYSTEM" AS DEFINED IN SECTION 381.0065(2), F.S., AND RULE 64E-6.002, F.A.C.

(2) VERTICAL SEPARATION BETWEEN UNDERGROUND WATER MAINS AND SANITARY OR STORM SEWERS, WASTEWATER OR STORM WATER FORCE MAINS, AND RECLAIMED WATER PIPELINES:

(A) NEW OR RELOCATED, UNDERGROUND WATER MAINS CROSSING ANY EXISTING OR PROPOSED GRAVITY- OR VACUUM-TYPE SANITARY SEWER OR STORM SEWER SHALL BE LAID SO THE OUTSIDE OF THE WATER MAIN IS AT LEAST SIX INCHES, AND PREFERABLY 12 INCHES, ABOVE OR AT LEAST 12 INCHES BELOW THE OUTSIDE OF THE OTHER PIPELINE. HOWEVER, IT IS PREFERABLE TO LAY THE WATER MAIN ABOVE THE OTHER PIPELINE.

(B) NEW OR RELOCATED, UNDERGROUND WATER MAINS CROSSING ANY EXISTING OR PROPOSED PRESSURE-TYPE SANITARY SEWER, WASTEWATER OR STORM WATER FORCE MAIN, OR PIPELINE CONVEYING RECLAIMED WATER SHALL BE LAID SO THE OUTSIDE OF THE WATER MAIN IS AT LEAST 12 INCHES ABOVE OR BELOW THE OUTSIDE OF THE OTHER PIPELINE. HOWEVER, IT IS PREFERABLE TO LAY THE WATER MAIN ABOVE THE OTHER PIPELINE.

(C) AT THE UTILITY CROSSINGS DESCRIBED IN PARAGRAPHS (A) AND (B) ABOVE, ONE FULL LENGTH OF WATER MAIN PIPE SHALL BE CENTERED ABOVE OR BELOW THE OTHER PIPELINE SO THE WATER MAIN JOINTS WILL BE AS FAR AS POSSIBLE FROM THE OTHER PIPELINE. ALTERNATIVELY, AT SUCH CROSSINGS, THE PIPES SHALL BE ARRANGED SO THAT ALL WATER MAIN JOINTS ARE AT LEAST THREE FEET FROM ALL JOINTS IN VACUUM-TYPE SANITARY SEWERS, STORM SEWERS, STORM WATER FORCE MAINS, OR PIPELINES CONVEYING RECLAIMED WATER REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C., AND AT LEAST SIX FEET FROM ALL JOINTS IN GRAVITY- OR PRESSURE-TYPE SANITARY SEWERS, WASTEWATER FORCE MAINS, OR PIPELINES CONVEYING RECLAIMED WATER NOT REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C.

(3) SEPARATION BETWEEN WATER MAINS AND SANITARY OR STORM SEWER MANHOLES.

(A) NO WATER MAIN SHALL PASS THROUGH, OR COME INTO CONTACT WITH, ANY PART OF A SANITARY SEWER MANHOLE.

(B) EFFECTIVE AUGUST 28, 2003, WATER MAINS SHALL NOT BE CONSTRUCTED OR ALTERED TO PASS THROUGH, OR COME INTO CONTACT WITH, ANY PART OF A STORM SEWER MANHOLE OR INLET STRUCTURE.

(4) SEPARATION BETWEEN FIRE HYDRANT DRAINS AND SANITARY OR STORM SEWERS, WASTEWATER OR STORM WATER FORCE MAINS, RECLAIMED WATER PIPELINES, AND ON-SITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS.
NEW OR RELOCATED FIRE HYDRANTS WITH UNDERGROUND DRAINS SHALL BE LOCATED SO THAT THE DRAINS ARE AT LEAST THREE FEET FROM ANY EXISTING OR PROPOSED STORM SEWER, STORM WATER FORCE MAIN, OR PIPELINE CONVEYING RECLAIMED WATER REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C.; AT LEAST THREE FEET, AND PREFERABLY TEN FEET, FROM ANY EXISTING OR PROPOSED VACUUM-TYPE SANITARY SEWER; AT LEAST SIX FEET, AND PREFERABLY TEN FEET, FROM ANY EXISTING OR PROPOSED GRAVITY- OR PRESSURE-TYPE SANITARY SEWER, WASTEWATER FORCE MAIN, OR PIPELINE CONVEYING RECLAIMED WATER NOT REGULATED UNDER PART III OF CHAPTER 62-610, F.A.C.; AND AT LEAST TEN FEET FROM ANY EXISTING OR PROPOSED "ON-SITE SEWAGE TREATMENT AND DISPOSAL SYSTEM" AS DEFINED IN SECTION 381.0065(2), F.S., AND RULE 64E-6.002, F.A.C.

UTILITY NOTES

PRIOR TO COMMENCING ANY CONSTRUCTION, THE CONTRACTOR SHALL FIELD VERIFY ALL EXISTING UTILITIES, INCLUDING WITHOUT LIMITATION POTABLE WATER, RECLAIMED WATER, SANITARY SEWER, AND ALL SERVICE UTILITIES, AT POINTS OF CONNECTION, POINTS OF CROSSING, AND/OR POTENTIAL CONFLICT. NOTIFY ENGINEER OF ANY DISCREPANCIES BETWEEN THE PLANS AND FIELD CONDITIONS.

A. GENERAL

1. THE LOCATIONS OF EXISTING UTILITIES, SUCH AS WATER MAINS, SEWERS, GAS LINES, ETC., SHOWN ON THE PLANS ARE BASED ON THE BEST AVAILABLE INFORMATION AND ARE SHOWN FOR THE CONVENIENCE OF THE CONTRACTOR. THE ENGINEER AND OWNER ASSUME NO LIABILITY FOR ACCURACY AND COMPLETENESS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL UTILITY COMPANIES 48 HOURS PRIOR TO COMMENCEMENT OF CONSTRUCTION AND TO HAVE THEIR FACILITIES LOCATED IN THE FIELD PRIOR TO ANY WORK.

2. DUE TO GRAPHIC LIMITATIONS OF THE DRAWING SCALE, ALL STORM SEWER, DRAINAGE, WATER AND SANITARY SEWER MAINS, SERVICES, LATERALS, CONNECTIONS, AND APPURTENANCES DEPICTED HEREIN – UNLESS OTHERWISE LOCATED BY DIMENSIONS – REFLECT SCHEMATIC LOCATIONS ONLY. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE FINAL LOCATIONS IN ACTUAL CONSTRUCTION AND INSTALLATION OF THE PROPOSED IMPROVEMENTS, INCLUDING ANY REQUISITE COORDINATION WITH THE RESPECTIVE GOVERNING AGENCY/UTILITY PROVIDER.

3. ALL WATER AND SEWER CONSTRUCTION SHALL CONFORM TO THE STANDARDS AND SPECIFICATIONS OF THE **CITY OF ALACHUA**, AND WILL BE SUBJECT TO THEIR INSPECTION AND ACCEPTANCE.

4. CONTRACTOR SHALL INSPECT PIPING AND MATERIALS BEFORE INSTALLATION TO DETECT APPARENT DEFECTS. MARK DEFECTIVE MATERIALS WITH WHITE PAINT AND PROMPTLY REMOVE FROM SITE.

5. LAY SEWER PIPING BEGINNING AT LOW POINT OF SYSTEM (CONNECTION TO OFF SITE SYSTEM OR PUMP STATION), TRUE TO GRADES AND ALIGNMENT INDICATED WITH UNBROKEN CONTINUITY OF INVERTS. PLACE BELL ENDS OR GROOVE ENDS OF PIPING FACING UPSTREAM.

6. CLEAR INTERIOR OF PIPE OF DIRT AND OTHER SUPERFLUOUS MATERIAL AS WORK PROGRESSES. MAINTAIN SWAB OR DRAG IN LINE AND PULL PAST EACH JOINT AS IT IS COMPLETED. PLACE PLUGS IN ENDS OF UNCOMPLETED CONDUIT WHENEVER WORK STOPS.

7. MAINTAIN **36"** COVER OVER MAINS, AND **30"** OVER SERVICES/LATERALS.

8. WHEN PROPOSED CONSTRUCTION OCCURS AT EXISTING MANHOLES, INLETS, VAULTS, AND OTHER STRUCTURES, THE CONTRACTOR SHALL MODIFY THE STRUCTURES, FRAMES, AND GRATES TO MEET THE PROPOSED GRADES UNLESS OTHERWISE DIRECTED.

9. INSTALL CONTINUOUS LOCATOR TAPE/WIRE, LOCATED DIRECTLY OVER POTABLE WATER MAINS AND SANITARY SEWER MAINS AT 6" TO 8" ABOVE PIPE.

10. WHERE APPLICABLE, UTILITY TRENCHES CROSSING PAVEMENT AREAS SHALL BE BACK FILLED WITH COMPACTED GRANULAR MATERIAL IN ACCORDANCE WITH A.A.S.H.T.O.-T-99.

11. CONTRACTOR SHALL PROVIDE SLEEVES FOR IRRIGATION LINES UNDER PAVEMENT. COORDINATE WITH GENERAL CONTRACTOR.

12. ALL TRENCHES EXCAVATED FOR THE PURPOSES OF UTILITY/STORM INSTALLATION SHALL BE KEPT DRY FOR THE DURATION OF UTILITY/STORM CONSTRUCTION. DEWATERING OF UTILITY/STORM TRENCHES MAY BE REQUIRED TO PREVENT FLOTATION OF UTILITY/STORM PIPES DURING INSTALLATION.

13. THE CONTRACTOR SHALL NOTIFY THE ENGINEER WHEN CONSTRUCTION IS COMPLETE FOR WATER, WASTEWATER AND STORMWATER SYSTEMS SO TIMELY CERTIFICATIONS MAY BE INITIATED. SATISFACTORY BACTERIOLOGICAL TEST RESULTS, PRESSURE TEST RESULTS, AND AN AS BUILT SURVEY SHALL BE SUBMITTED TO ENGINEER PRIOR TO FINAL CERTIFICATION.

14. SUITABLE COUPLINGS COMPLYING WITH ASTM SPECIFICATIONS ARE REQUIRED FOR JOINING DISSIMILAR MATERIALS.

15. DEFLECTION TESTS ARE REQUIRED FOR ALL FLEXIBLE PIPE. TESTING REQUIREMENTS: 1) NO PIPE SHALL EXCEED A DEFLECTION OF 5%; 2) USING A RIGID BALL OR MANDREL FOR THE DEFLECTION TEST WITH A DIAMETER NOT LESS THEN 95% OF THE BASE INSIDE DIAMETER OR AVERAGE INSIDE DIAMETER OF THE PIPE; 3) PERFORMING THE TEST WITHOUT MECHANICAL PULLING DEVICES.

B. MATERIALS (WATER)

1. SERVICE PIPE SHALL BE POLYETHYLENE (PE), DR9.

2. WATER MAINS SHALL BE PVC ASTM C900, DR 18 WITH INTEGRAL BELLS AND ELASTOMERIC JOINTS PER ASTM C3139 AND GASKETS PER ASTM F477.

3. DUCTILE IRON PIPE (D.I.P.), IF REQUIRED, SHALL CONFORM TO ANSI/AWWA A21.51/C151, CLASS 50 (MIN.) PIPE FOR ALL SIZES.

4. CORPORATION STOPS SHALL BE 1 1/2" BRASS, EQUIPPED WITH CONNECTIONS COMPATIBLE WITH SERVICE PIPE AND THREADED IN ACCORDANCE WITH SPECIFICATIONS IN AWWA C800. CURB STOPS SHALL BE SIZED TO MATCH THE METER SIZE AND CONFORM WITH AWWA C800 AND AWWA C901.

5. FITTINGS SHALL BE BRASS, CAST AND MACHINED IN ACCORDANCE WITH AWWA C800 AND AWWA C901, WITH COMPATIBLE PIPE CONNECTIONS.

6. SERVICE SADDLES SHALL BE USED FOR ALL SERVICE LINE TAPS. SERVICE SADDLES SHALL BE DOUBLE STRAP, ANCHORED BY A MINIMUM FOUR (4) BOLT PATTERN ON A DUCTILE IRON SADDLE BODY. FOR PVC PIPE, DOUBLE STRAPS SHALL BE CORROSION RESISTANT ALLOY STEEL, SIZED EXACTLY TO THE PIPE OUTSIDE DIAMETER. SEALING GASKETS SHALL BE BUNA-N RUBBER.

7. ALL PIPE AND PIPE FITTINGS INSTALLED UNDER THIS PROJECT WILL BE COLOR CODED USING BLUE AS A PREDOMINANT COLOR.

C. MATERIALS (SEWER)

1. ALL GRAVITY SEWER PIPE AND FITTINGS SHALL BE NON-PRESSURE POLYVINYL CHLORIDE PIPE (PVC) CONFORMING TO ASTM D 3034, SDR 26, WITH PUSH-ON RUBBER GASKET JOINTS.

2. ALL FITTINGS AND ACCESSORIES SHALL BE MANUFACTURED OR SUPPLIED BY THE PIPE MANUFACTURER OR PRIOR-APPROVED EQUAL.

3. BEDDING AND INITIAL BACK FILL OVER SEWER MAINS AND SERVICES SHALL BE SAND WITH NO ROCK LARGER THAN 1" IN DIAMETER.

D. MATERIALS (STORM)

1. REINFORCED CONCRETE PIPE (RCP): O-RING PIPE SHALL CONFORM TO ASTM C 76 (CLASS III, UNLESS OTHERWISE SPECIFIED) AND AASHTO M 170 STANDARD SPECIFICATIONS, AND ASTM C 443 STANDARD SPECIFICATION FOR JOINTS FOR RCP USING RUBBER GASKETS.

2. ELLIPTICAL RCP SHALL CONFORM TO ASTM C 507 (CLASS III) AND AASHTO M 207 STANDARD SPECIFICATIONS.

3. HDPE PIPE AND FITTINGS SHALL MEET THE REQUIREMENTS OF AASHTO M-25 (3"-10"), M-294 (12" AND LARGER), TYPE S (CORRUGATED OUTSIDE – SMOOTH INSIDE, 4"-60"), AND MP7 (60" TYPE S).

A. BELL/SPIGOT GASKET FOR HDPE PIPE SHALL BE SOIL/SILT TIGHT PER AASHTO SECTION 26 WITH RUBBER GASKET MEETING ASTM F-477.

4. PVC STORM SEWER PIPE (12" OR LESS) AND FITTINGS SHALL BE NON-PRESSURE POLYVINYL CHLORIDE PIPE (PVC) CONFORMING TO ASTM D 3034, SDR 26, WITH PUSH-ON RUBBER GASKET JOINTS.

GENERAL NOTES

A. GENERAL

1. ALL INFRASTRUCTURE AND IMPROVEMENTS SHALL CONFORM TO THE STANDARDS AND SPECIFICATIONS OF THE LOCAL JURISDICTION AND WILL BE SUBJECT TO THEIR INSPECTION AND ACCEPTANCE.

2. SITE LOCATION: **NW 173RD STREET & US HIGHWAY 441, ALACHUA, FL 32615**

3. THIS SITE LIES IN FLOOD ZONE **X**, F.I.R.M. PANEL **12001C0120D**, DATED **JUNE 16, 2006**.

4. BOUNDARY, TOPOGRAPHIC, AND TREE SURVEY BY **ACCURIGHT SURVEYS OF ORLANDO INC., 2012 EAST ROBINSON, ORLANDO, FLORIDA 32803**.

5. BENCHMARK – REFER TO TOPOGRAPHIC SURVEY BY **ACCURIGHT SURVEYS OF ORLANDO INC.**

6. LEGAL DESCRIPTION SHOWN HEREIN IS FURNISHED BY SURVEYOR, AND IS INCLUDED FOR PERMITTING AND APPROVAL PURPOSES, AND AS A COURTESY FOR THE CONTRACTOR. INTERPLAN LLC. ASSUMES NO LIABILITY FOR ITS ACCURACY OR COMPLETENESS.

7. SITE GEOTECHNICAL INVESTIGATION PERFORMED BY **UES** ENGINEERING. INTERPLAN LLC. ASSUMES NO RESPONSIBILITY FOR THE CORRECTNESS, ACCURACY AND COMPLETENESS OF THEIR WORK. **THE CONTRACTOR SHALL OBTAIN A COPY OF THE GEOTECHNICAL ENGINEER'S REPORT FOR THIS SITE AND COMPLY WITH RECOMMENDATIONS CONTAINED THEREIN.** IF ADDITIONAL SERVICES ARE REQUIRED, THE CONTRACTOR SHALL MAKE A REQUEST TO THE OWNER.

8. CONTRACTOR SHALL PROVIDE AND INSTALL EROSION CONTROL DEVICES (SILT FENCE OR OTHER METHODS) AT LIMITS OF CONSTRUCTION AND AROUND EACH STORM INLET PRIOR TO CONSTRUCTION, AND SHALL MAINTAIN SAID EROSION CONTROL DEVICES DURING CONSTRUCTION, ALL IN CONFORMANCE WITH CURRENT LOCAL, COUNTY AND STATE CRITERIA.

9. THE SITE SHALL BE CLEARED AS MAY BE NOTED ON THE PLANS, OF ALL OBSTRUCTIONS AND DELETERIOUS MATERIAL SUCH AS FENCES, WALLS, FOUNDATIONS, LOGS, SHRUBS, BRUSH, WEEDS, OTHER VEGETATION, AND ACCUMULATION OF RUBBISH OF WHATEVER NATURE. OFF-SITE DISPOSAL, INCLUDING ANY HAZARDOUS MATERIAL ENCOUNTERED, SHALL BE IN ACCORDANCE WITH APPLICABLE LOCAL, STATE, AND FEDERAL RULES AND REGULATIONS.

10. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY INTERPLAN LLC. OF ANY DISCREPANCIES BETWEEN THE PLANS AND FIELD CONDITIONS PRIOR TO START OF CONSTRUCTION.

11. THE CONTRACTOR SHALL REMAIN SOLELY RESPONSIBLE FOR ANY DESIGN CHANGES WHICH HE MAY INCORPORATE INTO THE PLANS WITHOUT PRIOR WRITTEN CONSENT AND/OR APPROVAL FROM THE OWNER AND THE ENGINEER. 2

12. THE CONTRACTOR SHALL COORDINATE ALL WORK WITHIN EACH EXISTING RIGHT OF WAY WITH THE CITY OF **ALACHUA, ALACHUA COUNTY,** AND THE FLORIDA DEPARTMENT OF TRANSPORTATION.

13. SCS SOILS: **-ARREDONDO FINE SAND, 0 TO 5 PERCENT SLOPES**
-ARREDONDO-URBAN LAND COMPLEX, 0 TO 5 PERCENT SLOPES
-FORT MEADE FINE SAND, 0 TO 5 PERCENT SLOPES

14. STORMWATER MANAGEMENT IS PROVIDED BY A **STORMWATER RETENTION POND**.

15. THE CONTRACTOR SHALL RESTORE OFF-SITE AREAS TO A CONDITION EQUAL TO OR BETTER THAN THE CONDITION EXISTING PRIOR TO COMMENCEMENT OF CONSTRUCTION.

16. ALL DISTURBED AREAS SHALL BE SODDED.

17. AT LEAST 30 DAYS PRIOR TO ANTICIPATED COMPLETION OF SITE CONSTRUCTION, THE FINAL CERTIFICATION PROCESS WILL BEGIN. THE CONTRACTOR SHALL PROVIDE DOCUMENTS AND INFORMATION, IN A TIMELY MANNER, TO ENGINEER, INCLUDING, WITHOUT LIMITATION:
a. SURVEYED "AS-BUILTS" PER AS-BUILT SURVEY SCOPE IN SPEC MANUAL.
b. COMPACTION AND DENSITY TEST REPORTS, AND
c. PRESSURE TESTING AND BACTERIOLOGICAL TESTING RESULTS, AS **REQUIRED, FOR WATER DISTRIBUTION AND/OR WASTEWATER COLLECTION/TRANSMISSION SYSTEMS.**

THE CONTRACTOR SHALL HAVE TWO (2) SETS OF AS-BUILT PLANS, SIGNED AND SEALED BY SURVEYOR OF RECORD, ON SITE THE DAY OF THE CIVIL ENGINEERING FINAL PUNCH LIST INSPECTION. THE GENERAL CONTRACTOR IS TO GIVE THE TWO AS-BUILT PLANS TO THE REPRESENTATIVE FROM INTERPLAN COMPLETING THE INSPECTION. IF ANY DEFICIENCIES ARE NOTED, ONE SET OF RED-LINED AS-BUILT PLANS WILL BE GIVEN TO THE GC FOR REVISIONS TO BE MADE. REVISED AS-BUILTS WILL NEED TO BE FORWARDED TO INTERPLAN BEFORE ANY CERTIFICATIONS CAN BE INITIATED.

18. ALL TRAFFIC CONTROL DEVICES, EQUIPMENT AND INSTALLATION SHALL MEET THE REQUIREMENTS OF THE LOCAL JURISDICTION AND/OR FLORIDA DEPARTMENT OF TRANSPORTATION.

19. PARKING STALLS SHALL CONFORM WITH LOCAL CODE. ACCESSIBLE PARKING SPACES AND ACCESS ROUTES SHALL FURTHER CONFORM WITH CURRENT ADA REQUIREMENTS.

20. HANDICAP PAVEMENT MARKINGS AND SIGNAGE SHALL CONFORM WITH CURRENT ADA REQUIREMENTS AND LOCAL ORDINANCE.

21. LANDSCAPE SHALL BE TRIMMED TO ENSURE SIGHT VISIBILITY OF TRAFFIC CONTROL DEVICES.

22. ALL PAVEMENT IS DIMENSIONED TO FACE OF CURB.

23. ALL BUILDING DIMENSIONS AND TIES ARE TO OUTSIDE FACE. SEE ARCHITECTURAL PLANS.

24. ALL CURB RETURN RADII ARE 5' UNLESS NOTED.

25. BUILDING AND SITE IMPROVEMENTS ARE PARALLEL AND PERPENDICULAR TO **NORTH, SOUTH, EAST, AND WEST** PROPERTY LINE.

GC NOTE:

A COPY OF THIS SHEET C0.1 SHALL BE PROVIDED TO ALL BIDDERS AND SUB-CONTRACTORS.

DISINFECTING & TESTING NOTES

WATER MAINS THAT ARE INCLUDED IN THIS PROJECT THAT WILL BE CONSTRUCTED OF POLYVINYL CHLORIDE PIPE WILL BE PRESSURE AND LEAKAGE TESTED IN ACCORDANCE WITH AWWA STANDARD C605. ALL OTHER WATER MAINS INCLUDED IN THIS PROJECT WILL BE PRESSURE AND LEAKAGE TESTED IN ACCORDANCE WITH AWWA STANDARD C600.

LEAKAGE TESTS ARE REQUIRED AS FOLLOWS: 1) THE LEAKAGE EXFILTRATION OR INFILTRATION DOES NOT EXCEED 200 GALLONS PER INCH OF PIPE DIAMETER PER MILE PER DAY FOR ANY SECTION OF THE PIPE; 2) EXFILTRATION OR INFILTRATION TESTS BE PERFORMED WITH A MINIMUM POSITIVE HEAD OF 2 FEET; 3) AIR TESTS, AS A MINIMUM, CONFORM TO THE TEST PROCEDURE DESCRIBED IN ASTM C 828 FOR CLAY PIPE, ASTM C 924 FOR CONCRETE PIPE, ASTM F-1417 FOR PLASTIC PIPE, AND FOR OTHER MATERIALS APPROPRIATE TEST PROCEDURES.

DISINFECTION OF THE WATER DISTRIBUTION SYSTEM SHALL BE PERFORMED IN ACCORDANCE WITH AWWA C651 DISINFECTING WATER MAINS. **SATISFACTORY BACTERIOLOGICAL TEST RESULTS SHALL BE SUBMITTED TO ENGINEER PRIOR TO FINAL CERTIFICATION.**

THE CONTRACTOR SHALL MAKE PROVISIONS TO PROTECT THE ACTIVE EXISTING MAIN FROM BACKFLOW CONTAMINATION DURING FILLING, FLUSHING, AND TESTING OF THE NEW MAIN, AS SPECIFIED IN AWWA C651-92.

CONTRACTOR SHALL UTILIZE A JUMPER CONNECTION DURING WATER MAIN TESTING. ALTERNATE TYPES OF BACKFLOW PREVENTION MAY BE UTILIZED AS APPROVED BY INSPECTION STAFF AND ENGINEER.

DEMOLITION NOTES

1. PRIOR TO COMMENCEMENT OF DEMOLITION THE CONTRACTOR WILL COORDINATE HIS ACTIVITIES WITH ALL THE UTILITY COMPANIES SERVING THIS AREA. CONTRACTOR IS TO COORDINATE FULLY WITH UTILITY COMPANIES ON EXACT LOCATION OF UNDERGROUND UTILITIES PRIOR TO EXCAVATION.

2. THE CONTRACTOR IS TO COMPLETELY REMOVE AND DISPOSE OF ALL STRUCTURES AND BUILDINGS THAT IS SO INDICATED INCLUDING FOUNDATIONS, TIMBER AND BRUSH, EXCEPT AS OTHERWISE INDICATED; STUMPS AND ROOTS; EXISTING PAVEMENT; OTHER STRUCTURES AS SHOWN OR REASONABLY IMPLIED IN THE DRAWINGS.

3. EXCEPT IN AREAS WHERE EXISTING TREES SHALL BE PRESERVED, A MINIMUM DEPTH OF REMOVAL SHALL BE (2) FOOT BELOW SUBGRADE IN ROADWAY AREAS AND TO ORIGINAL SOILS ELSEWHERE. WHERE EXISTING BUILDINGS ARE TO BE DEMOLISHED, ALL TRACES OF FOUNDATIONS AND UNDERGROUND UTILITIES ARE TO BE REMOVED (UNLESS OTHERWISE NOTED ON PLANS). THE CONTRACTOR IS RESPONSIBLE FOR PROPER DISPOSAL OF ALL WASTE MATERIAL.

4. WHERE PAVING OR STRUCTURES ARE TO BE REMOVED WHICH ABUT OR ARE A PART OF CONNECTED FACILITIES (THAT ARE OFF–SITE), RESTORATION OF ANY DAMAGE THAT MIGHT RESULT FROM DEMOLITION IS TO BE RESTORED TO A CONDITION EQUAL TO OR BETTER THAN EXISTING UNLESS SPECIFICALLY EXEMPTED BY THE PLANS. THE COST FOR SUCH RESTORATION SHALL BE INCIDENTAL TO OTHER CONSTRUCTION AND NO EXTRA COMPENSATION WILL BE ALLOWED.

5. THE LOCATION OF ALL EXISTING UTILITIES, STORM DRAINAGE AND TREES SHOWN ON THE PLANS HAVE BEEN DETERMINED FROM AVAILABLE INFORMATION AND IS GIVEN FOR THE CONVENIENCE OF THE CONTRACTOR. THE OWNER OR ENGINEER ASSUMES NO RESPONSIBILITY FOR ACCURACY. PRIOR TO THE START OF DEMOLITION THE CONTRACTOR SHALL VISIT THE SITE AND DETERMINE THE EXISTANCE & LOCATION OF ALL STRUCTURES, UTILITIES & TREES SHOWN OR NOT ON THE PLANS, WHICH WOULD NEED TO BE REMOVED OR PRESERVED.

6. THE CONTRACTOR IS TO COORDINATE THE RELOCATION OR REMOVAL OF ALL OVERHEAD/UNDERGROUND UTILITIES, UTILITY POLES, LIGHTS AND LINES IN THE RIGHT–OF–WAY AND ON THE PROPERTY WITH THE APPROPRIATE SERVICE PROVIDER.

7. THE CONTRACTOR SHALL REFERENCE AND RESTORE PROPERTY CORNERS AND LAND MARKERS DISTURBED DURING CONSTRUCTION. (UNDER THE DIRECTION OF A FLORIDA REGISTERED LAND SURVEYOR).

DEMOLITION NOTES

1. PRIOR TO COMMENCEMENT OF DEMOLITION THE CONTRACTOR WILL COORDINATE HIS ACTIVITIES WITH ALL THE UTILITY COMPANIES SERVING THIS AREA. CONTRACTOR IS TO COORDINATE FULLY WITH UTILITY COMPANIES ON EXACT LOCATION OF UNDERGROUND UTILITIES PRIOR TO EXCAVATION.

2. THE CONTRACTOR IS TO COMPLETELY REMOVE AND DISPOSE OF ALL STRUCTURES AND BUILDINGS THAT IS SO INDICATED INCLUDING FOUNDATIONS, TIMBER AND BRUSH, EXCEPT AS OTHERWISE INDICATED; STUMPS AND ROOTS; EXISTING PAVEMENT; OTHER STRUCTURES AS SHOWN OR REASONABLY IMPLIED IN THE DRAWINGS.

3. EXCEPT IN AREAS WHERE EXISTING TREES SHALL BE PRESERVED, A MINIMUM DEPTH OF REMOVAL SHALL BE (2) FOOT BELOW SUBGRADE IN ROADWAY AREAS AND TO ORIGINAL SOILS ELSEWHERE. WHERE EXISTING BUILDINGS ARE TO BE DEMOLISHED, ALL TRACES OF FOUNDATIONS AND UNDERGROUND UTILITIES ARE TO BE REMOVED (UNLESS OTHERWISE NOTED ON PLANS). THE CONTRACTOR IS RESPONSIBLE FOR PROPER DISPOSAL OF ALL WASTE MATERIAL.

4. WHERE PAVING OR STRUCTURES ARE TO BE REMOVED WHICH ABUT OR ARE A PART OF CONNECTED FACILITIES (THAT ARE OFF-SITE), RESTORATION OF ANY DAMAGE THAT MIGHT RESULT FROM DEMOLITION IS TO BE RESTORED TO A CONDITION EQUAL TO OR BETTER THAN EXISTING UNLESS SPECIFICALLY EXEMPTED BY THE PLANS. THE COST FOR SUCH RESTORATION SHALL BE INCIDENTAL TO OTHER CONSTRUCTION AND NO EXTRA COMPENSATION WILL BE ALLOWED.

5. THE LOCATION OF ALL EXISTING UTILITIES, STORM DRAINAGE AND TREES SHOWN ON THE PLANS HAVE BEEN DETERMINED FROM AVAILABLE INFORMATION AND IS GIVEN FOR THE CONVENIENCE OF THE CONTRACTOR. THE OWNER OR ENGINEER ASSUMES NO RESPONSIBILITY FOR ACCURACY. PRIOR TO THE START OF DEMOLITION THE CONTRACTOR SHALL VISIT THE SITE AND DETERMINE THE EXISTANCE & LOCATION OF ALL STRUCTURES, UTILITIES & TREES SHOWN OR NOT ON THE PLANS, WHICH WOULD NEED TO BE REMOVED OR PRESERVED.

6. THE CONTRACTOR IS TO COORDINATE THE RELOCATION OR REMOVAL OF ALL OVERHEAD/UNDERGROUND UTILITIES, UTILITY POLES, LIGHTS AND LINES IN THE RIGHT-OF-WAY AND ON THE PROPERTY WITH THE APPROPRIATE SERVICE PROVIDER.

7. THE CONTRACTOR SHALL REFERENCE AND RESTORE PROPERTY CORNERS AND LAND MARKERS DISTURBED DURING CONSTRUCTION. (UNDER THE DIRECTION OF A FLORIDA REGISTERED LAND SURVEYOR).

POLLUTION CONTROL NOTES

ALL EROSION CONTROL MEASURES SHALL REMAIN IN PLACE UNTIL COMPLETION OF CONSTRUCTION.

1. ALL EROSION AND SEDIMENT CONTROL WORK SHALL CONFORM WITH LOCAL CITY/COUNTY AND WATER MANAGEMENT DISTRICT SPECIFICATIONS, SUBJECT TO AUTHORIZED AND APPROVED VARIANCES, WAIVERS AND/OR CONDITIONS OF SITE PERMITS.

2. EROSION AND SEDIMENT CONTROL MEASURES SHALL BE PLACED PRIOR TO OR AS THE FIRST STEP IN, CONSTRUCTION. SEDIMENT CONTROL PRACTICES WILL BE APPLIED AS A PERIMETER DEFENSE AGAINST ANY TRANSPORTATION OF SILT OFF THE SITE.

3. ALL AREAS AFFECTED BY THIS WORK SHALL BE RESTORED TO A CONDITION EQUAL TO OR BETTER THAN EXISTING CONDITION, UNLESS SPECIFICALLY EXEMPTED BY THE PLANS. THE COST FOR SUCH RESTORATION SHALL BE INCIDENTAL TO OTHER CONSTRUCTION AND NO ADDITIONAL COMPENSATION SHALL BE ALLOWED.

4. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER OF ANY DISCREPANCIES BETWEEN THESE PLANS AND FIELD CONDITIONS PRIOR TO CONSTRUCTION.

5. PRIOR TO CONSTRUCTION THE CONTRACTOR SHALL PROVIDE TREE PROTECTION BARRIERS TO MEET THE REQUIREMENTS OF LOCAL SPECIFICATIONS.

6. THE CONTRACTOR SHALL SELECTIVELY CLEAR ONLY THE AREAS REQUIRED FOR CONSTRUCTION AND STABILIZE ANY POTENTIAL EROSION AREAS IMMEDIATELY FOLLOWING COMPLETION OF CONSTRUCTION.

7. CONTRACTOR SHALL KEEP ANY AND ALL SAND, SILT OR OTHER DEBRIS FROM MOVING OFF-SITE. USE AND MAINTAIN SILT FENCE JUST INSIDE OF PROPERTY LINE.

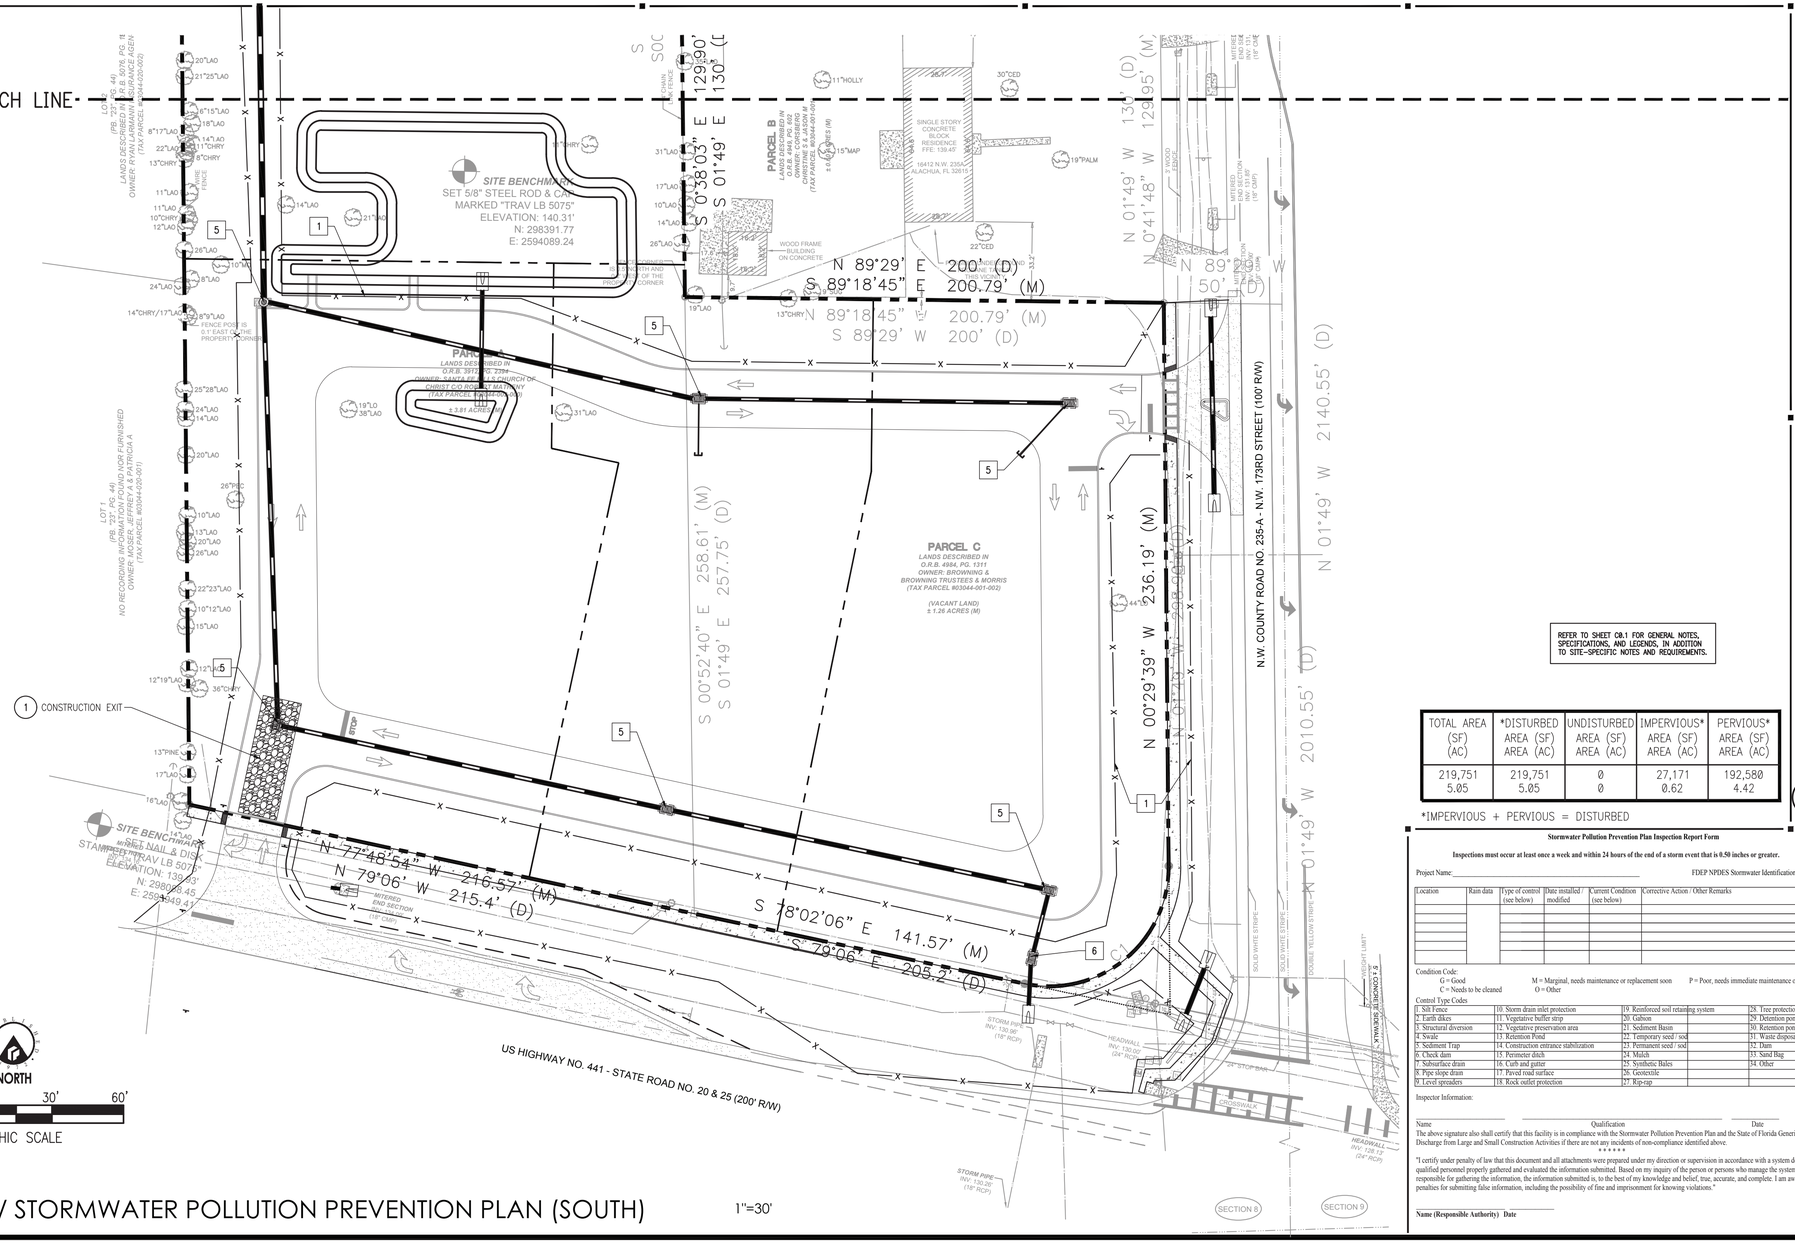
8. CONTRACTOR SHALL BLOCK INTRUSION OF SAND, SILT OR OTHER DEBRIS INTO ANY DRAINAGE OR SANITARY SEWER STRUCTURE OR PIPING ON OR ADJACENT TO SITE.

9. ALL CLEARED AREAS FOR IMPROVEMENT AND/OR CONSTRUCTION SHALL BE WATERED TO PREVENT WIND EROSION.

10. FOR ADDITIONAL INFORMATION AND DETAILS, SEE F.D.O.T. INDEX NO. 102.

11. UNLESS SPECIFIED, SILT FENCES MAY BE USED IN LIEU OF SYNTHETIC BARRIERS.

12. ADDITIONAL POSTS AND RAILS MAY BE NECESSARY TO SECURE AND SUPPORT BARRIERS.



13. ADDITIONAL BARRIER LENGTHS MAY BE REQUIRED BY THE COUNTY ENGINEER OR BY REGULATORY AGENCIES.

14. FILTER FABRIC MUST BE INSTALLED UNDER ALL INLET GRATES, AT ALL TIMES WHEN INLETS ARE NOT PROTECTED BY SILT FENCE OR SYNTHETIC BALES, UNTIL THE LIMEROCK BASE IS FINISHED AND PRIMED.

15. THE CONTRACTOR IS REQUIRED TO HAVE THIS PLAN ALONG WITH A COPY OF THE NPDES NOTICE OF INTENT POSTED IN A VISIBLE LOCATION ON THE CONSTRUCTION SITE AT ALL TIMES.

16. "CONTRACTOR IS REQUIRED BY NPDES TO KEEP A LOG ON SITE FOR THE SOIL EROSION AND SEDIMENT CONTROL MEASURES INDICATED ON THE PLAN. THE LOG SHALL CONTAIN DATES FOR: INSTALLATION OF CONTROL MEASURES, MAJOR SITE CONSTRUCTION ACTIVITIES, INSPECTION ON AT LEAST A WEEKLY BASIS AND INSPECTION AFTER ANY RAINFALL EVENT THAT IS 1/2" OR GREATER".

17. THE CONTRACTOR IS REQUIRED TO SUBMIT A COPY OF THIS LOG ALONG WITH A NOTICE OF TERMINATION TO THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION UPON THE COMPLETION OF CONSTRUCTION.

GENERAL NOTE(S):

1. WATER SHALL NOT BE PERMITTED IN THE TRENCH DURING CONSTRUCTION.
2. ALL PIPE TO BE INSTALLED WITH BELL FACING UPSTREAM TO THE DIRECTION OF THE FLOW.
3. DEPTH FOR REMOVAL OF UNSUITABLE MATERIAL SHALL GOVERN DEPTH OF BEDDING ROCK BELOW THE PIPE. FIELD DETERMINE REQUIRED REMOVAL OF UNSUITABLE MATERIAL TO REACH SUITABLE FOUNDATION. THE BOTTOM OF THE TRENCH SHALL NOT BE EXCAVATED BELOW THE SPECIFIED GRADE. IF UNDERCUTTING OCCURS, THE BOTTOM OF THE TRENCH SHALL BE BROUGHT UP TO THE ORIGINAL GRADE WITH APPROVED MATERIAL AND THOROUGHLY COMPACTED TO A MINIMUM OF 95% MODIFIED PROCTOR.
4. FINAL RESTORATION IN IMPROVED AREAS SHALL BE IN COMPLIANCE WITH ALL APPLICABLE REGULATIONS OF GOVERNING AGENCIES.

KEYED NOTE(S):

1. TRENCH STABILIZATION SHALL BE PROVIDED TO A DEPTH OF 12-INCHES. THE MATERIAL SHALL BE NO. 57 STONE.
2. BEDDING SHALL BE A MINIMUM OF 6-INCHES AND COMPOSED OF IMPORTED GRANULAR FILL. COMPACT TO 95% STANDARD PROCTOR, AASHTO T-99.
3. HAUNCHING PORTION OF THE PIPE ZONE SHALL BE PLACED TO THE SPRINGLINE OF THE PIPE AND COMPOSED OF IMPORTED GRANULAR FILL. COMPACT TO 95% STANDARD PROCTOR ASSHTO T-99.
4. INITIAL BACKFILL: COMMON FILL COMPACTED TO 95% (98% UNDER PAVEMENT) OF THE MAXIMUM DENSITY AS PER AASHTO T-180. FROM THE SPRINGLINE OF THE PIPE TO TWO (2) FEET ABOVE THE PIPE, THE SOIL SHALL BE CAREFULLY BACKFILLED IN 6-INCH LIFTS AND THE SOIL CONSOLIDATED WITH THE HAND OPERATED TAMPING MACHINE (OR AS REQUIRED BY CITY, COUNTY, OR STATE INSPECTORS).
5. FINAL BACKFILL: COMMON FILL COMPACTED TO 95% (98% UNDER PAVEMENT) OF THE MAXIMUM DENSITY AS PER AASHTO T-180. AFTER PLACEMENT AND COMPACTION OF THE INITIAL BACKFILL, THE BALANCE OF THE BACKFILL MATERIAL MAY BE MACHINE PLACED OR AS REQUIRED BY THE INSPECTOR AND SHALL NOT CONTAIN ANY ROCKS OR DEBRIS.
6. 12" MINIMUM

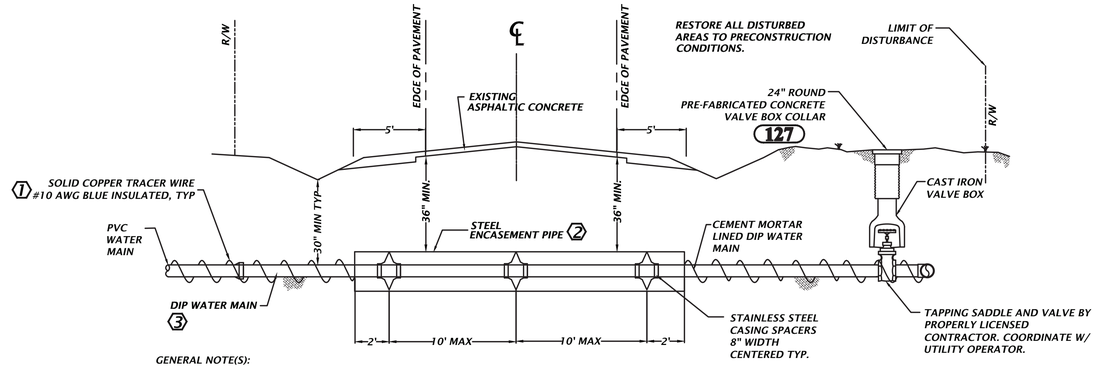
GENERAL NOTE(S)



A. SUITABLE FOR 4" - 16" PIPE SIZES.
B. REMOVE DEFECTIVE PIPE SEGMENT. REPLACE WITH NEW PIPE SEGMENT WITH MINIMUM LENGTH OF 3' 0".
C. RESTRAIN ALL JOINTS, UNLESS OTHERWISE SHOWN.
D. INSTALL MJ FITTINGS AS PER AWWA C600, WHICH INCLUDES:
   - CLEANING SOCKET AND PLAIN END.
   - LUBRICATING GASKET AND PLAIN END.
   - FURNISHING AND INSTALLING USING T-BOLT AND NUT FASTENERS.
   - FOR PIPE SIZES 4" - 16", BOLT SIZE SHALL BE ¾-INCH.
   - TIGHTENING TO SPECIFIED TORQUE RANGE.
E. DEPENDING ON PIPE MATERIALS AND WHETHER PIPE IS NEW OR EXISTING, ACCEPTABLE MJ RESTRAINT PRODUCTS INCLUDE:
   - EBAA MEGALUG SERIES 1100.
   - EBAA MEGALUG SERIES 1100SD.
   - EBAA MEGALUG SERIES 2000PV.
   - EBAA MEGALUG SERIES 2000SVD.
F. ACCEPTABLE ALTERNATIVE TO MJ RESTRAINT IS TIE-ROD RESTRAINT. SEE DETAILS 266E AND 266F.
G. FOR MJ RESTRAINT AND MJ GLANDS (NON-RESTRAINED), PROVIDE GASKET.
H. FIELD INSPECT FOR PRESENCE OF TRACER WIRE. IF PRESENT, MAINTAIN TRACER WIRE CONTINUITY. PROVIDE NEW TRACER WIRE AS REQUIRED. CONNECT TRACER WIRE USING PRO-LINE TRACER-LOCK CONNECTORS, PART # TL-LUG-SS.
I. ABBREVIATIONS:
   - MJ = MECHANICAL JOINT
   - DI = DUCTILE IRON
   - PVC = POLYVINYL CHLORIDE

266H **WATER/WASTEWATER PIPE REPAIR GENERAL NOTES**
NTS

1. PROVIDE DETECTABLE WARNINGS IN ACCORDANCE WITH THE AMERICANS WITH DISABILITIES ACT ACCESSIBILITY GUIDELINES (ADAAG) SECTION 705-DETECTABLE WARNINGS ON WALKING SURFACES AND THE 2020 FLORIDA BUILDING CODE, ACCESSIBILITY, CHAPTER 7, SECTION 705.
2. RAISED TRUNCATED DOMES SHALL HAVE A BASE DIAMETER FROM 0.9" MIN TO 1.4" MAX, A TOP DIAMETER FROM 50% TO 65% OF BASE DIAMETER, A HEIGHT OF 0.2 INCH (5 mm) NOMINAL, CENTER-TO-CENTER SPACING FROM 1.6" MIN TO 2.4" MAX, AND BASE-TO-BASE SPACING OF 0.65% MINIMUM, MEASURED BETWEEN THE MOST ADJACENT DOMES ON A SQUARE GRID.
3. SURFACES SHALL CONTRAST VISUALLY WITH ADJACENT WALKING SURFACES EITHER LIGHT-ON-DARK, OR DARK-ON-LIGHT.
4. ALL SIDEWALK CURB RAMPS SHALL HAVE DETECTABLE WARNING SURFACES THAT EXTEND THE FULL WIDTH OF THE RAMP AND IN THE DIRECTION OF TRAVEL 24 INCHES.
5. MATS ARE NOT ACCEPTABLE.
6. PROVIDE INTERLOCKING PAVERS AS FOLLOWS:
   A - DETECTABLE WARNING SURFACE FOR THE RAMPS SHALL CONSIST OF INTERLOCKING 4" X 8" ADA DETECTABLE WARNING SURFACE PAVERS HAVING A MINIMUM DEPTH OF 2". CONCRETE PAVERS ARE TO MEET ASTM C902 CLASS SX TYPE 1; AND BRICK PAVERS ARE TO MEET ASTM C55, GRADE N, SOLID BRICK COLOR TO MEET ADA CONTRAST REQUIREMENTS.
   B - ALL UNITS SHALL BE SOUND AND FREE OF DEFECTS THAT WOULD INTERFERE WITH THE APPEARANCE OF PROPER PLACEMENT OF THE UNIT OR IMPAIR THE STRENGTH OR LONGEVITY OF THE FINAL STRUCTURE. ANY UNITS THAT ARE STRUCTURALLY DAMAGED DURING THE WORK SHALL BE IMMEDIATELY REMOVED AND REPLACED. THE PAVERS ARE TO BE LAID IN A TWO BY TWO BASKETWEAVE PATTERN, FLUSH WITH THE FINISH GRADE OF THE RAMP SURFACE, AND HAVE GAPS BETWEEN 1/16 AND 1/8 INCH. CUT PAVERS (MASONRY SAW ONLY) SHALL BE NO SMALLER THAN ONE-THIRD OF A WHOLE PAVER.
   C - MODIFY FORMWORK OR PROVIDE FORMED GROUT INFILL BEHIND CURVED DROP CURB SECTIONS TO ENSURE STRAIGHT EDGE RESTRAINT FOR PAVERS.
   D - CONCRETE EDGE RESTRAINT FOR WARNING AREA. MAXIMUM GAP OF 1/8" BETWEEN PAVERS AND EDGE. USE¼" RADIUS ALONG CONCRETE EDGES.
   E - WHEN PAVERS ABUT EITHER EARTH/DIRT OR PAVEMENT, A SIX INCH CONCRETE BAND SHALL BE INSTALLED. BAND SHALL BE WITHIN LIMITS OF THE WIDTH OF PROPOSED CONCRETE AND NOT EXTENDED AN ADDITIONAL SIX INCHES..
7. ALL MATERIALS/METHODS TO BE UTILIZED SHALL BE SUBMITTED FOR APPROVAL TO THE ENGINEER AND CITY OF ALACHUA PRIOR TO ORDERING THE MATERIALS/METHODS. FAILURE TO OBTAIN APPROVAL BEFORE ORDERING OR INSTALLATION MAY RESULT IN REMOVAL AND REPLACEMENT AT CONTRACTOR'S EXPENSE. ENGINEER'S APPROVAL DOES NOT RELIEVE THE CONTRACTOR'S RESPONSIBILITY FOR THE PERFORMANCE OF THE ITEM.

403 **ADA DETECTABLE WARNING**
NTS

GENERAL NOTE(S):

1. ALL WORK IN HIGHWAY RIGHT-OF-WAY SHALL BE CONDUCTED IN STRICT ACCORDANCE WITH ANY PERMITS ISSUED FOR AND AUTHORIZING THE WORK.
2. CONTRACTOR SHALL MAINTAIN SAFETY AND TRAFFIC TROUGH THE WORK ZONE AT ALL TIMES IN ACCORDANCE WITH FDOT STANDARD INDEX NO. S600, 601, 602, 603, AND 604 AS REQUIRED FOR THE PREVAILING WORK CONDITION.
3. ALL AREAS DISTURBED DURING CONSTRUCTION SHALL BE RESTORED TO PRECONSTRUCTION CONDITIONS.
4. CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING AND PROTECTING EXISTING UTILITIES.
5. ALL TRENCH EXCAVATIONS WHICH EXCEED 5 FEET IN DEPTH OR GREATER SHALL BE DONE IN ACCORDANCE WITH OSHA STANDARD 29CFR, SECTION 1926.650 SUBPART P. CONTRACTOR SHALL ALSO BE RESPONSIBLE FOR DESIGNING A TRENCH SAFETY SYSTEM. CONTRACTOR SHALL PROVIDE WRITTEN DOCUMENTATION OF COMPLIANCE TO THE ARCHITECT AND ENGINEER AND SHALL PROVIDE A SEPARATE COST ITEM WITHIN HIS SCHEDULE OF VALUES INDICATING COST OF COMPLIANCE.

KEYED NOTE(S):

1 CONNECT TRACER WIRES WITH PRO-LINE TRACER-LOCK CONNECTIONS, PART # TL-LUG-SS.
2 SIZE ENCASEMENT PIPE AS PER DESIGN MANUAL.
3 PVC900 WATER MAIN CAN BE USED IF APPROVED BY FDOT.

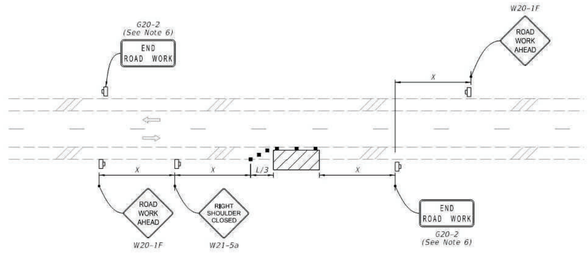
Not for construction

NOTE:



1. This Index applies to Two-Lane, Two-Way and Multilane Roadways, including Medians of divided roadways, with work on the shoulder.
2. L = Taper Length
   X = Work Zone Sign Spacing
   B = Buffer Length
   See Index 102-600 for "L", "X", "B", and channelizing device spacing values.
3. Where work activities are between 2' and 15' from the edge of traveled way, the Engineer may omit signs and channelizing devices for work operations 60 minutes or less.
4. When four or more work vehicles enter the through traffic lanes in a one hour period (excluding establishing and terminating the work area), use a flagger or lane closure to accommodate work vehicle ingress and egress.
5. For work less than 2' from the traveled way and work zone speed is greater than 45 MPH, use a lane closure.
6. The "Speeding Fines Doubled When Workers Present" signs (MOT-13-06) and "End Road Work" Signs (G20-2) along with the associated work zone sign spacing distances may be omitted when the work operation is in place for 24 hours or less.
7. Temporary pavement markings may be omitted when the work operation is in place for 3 days or less.
8. Omit "Shoulder Closed" signs (W21-5a) along with associated work zone sign spacing distances for work on the median.
9. When there is no paved shoulder, the "Worker" sign (W21-1) may be used instead of the "Shoulder Closed" sign (W21-5a).
