PREPARED BY: Carson Crockett

RECOMMENDED ACTION:

Staff recommends that the City Commission find the small-scale Comprehensive Plan amendment for JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and pass and adopt Ordinance 26-09 upon second and final reading.

Recommended Motion: *I move that, based upon the presentation before this Commission and Staff's recommendation, this Commission finds the application for a small-scale Comprehensive Plan amendment for JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and pass and adopt Ordinance 29-09 upon second and final reading.*

Summary

This application is a request by eda consultants, inc. (Agent) and NV5, Inc. (Agent), together as the Applicant on behalf of JTFA LLC (Property Owner) for consideration of an amendment to the City of Alachua Future Land Use Map (FLUM). The proposed amendment would change the future land use designation from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential, Community Commercial, and Commercial on a ± 46.70-acre subject property.

The subject property is generally located at 16650 NW US Highway 441 (tax parcels 03042-050-004; 03042-050-005 (portion thereof); 03046-003-000 (portion thereof)).

The Applicant has submitted a companion application for a site-specific amendment to the

Official Zoning Atlas (rezoning), which proposes to amend the zoning of the subject property from Planned Development – Residential (PD-R) and Community Commercial (CC) to PD-R and Planned Development – Commercial (PD-COMM).

Existing Future Land Use Map Designations

Policy 1.2.a of the City of Alachua Comprehensive Plan, Future Land Use Element establishes the Low Density Residential land use category which acts as "a transition between rural residential/agricultural areas and the urban areas within the City." Development is limited to one dwelling unit per acre and is typically comprised of single-family detached dwelling units.

The Moderate Density Residential land use category is established by Policy 1.2.b of the City of Alachua Comprehensive Plan, Future Land Use Element. Development is limited to four dwelling units per acre and is primarily comprised of single-family detached dwelling units; however, townhomes and duplexes are also permitted uses.

Policy 1.3.a of the City of Alachua Comprehensive Plan, Future Land Use Element establishes the Community Commercial land use category, which is established to "provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock." Typical uses are primarily commercial in nature; however, limited residential uses are permitted. Development is limited to a floor area ratio of 0.6 for parcels 5-acres or greater in size and 15 dwelling units per acre.

Proposed Future Land Use Map Designations

The proposed amendment would retain some Moderate Density Residential and Community Commercial land use categories on the subject property. The remaining portion would be amended to the Commercial land use category, which is established by Policy 1.3.b of the City of Alachua Comprehensive Plan, Future Land Use Element.

The Commercial land use category provides "for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate." Typical uses are primarily commercial in nature, including regional commercial uses and auto-oriented uses; however, limited residential uses are permitted. Development is limited to a floor area ratio of 0.6 for parcels 5-acres or greater in size and 15 dwelling units per acre.

On April 21, 2026, the Planning & Zoning Board, sitting as the Local Planning Agency, voted to transmit the application to the City Commission with a recommendation to approve.

On May 4, 2026, the City Commission deferred the hearing of Ordinance 26-09 to a date certain of June 8, 2026.

On June 8, 2026, the City Commission voted to continue the hearing to a date certain of June

22, 2026.

On June 22, 2026, the City Commission voted to pass Ordinance 26-09 upon first reading.

ORDINANCE 26-09

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO HE SMALL SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION OF A ± 46.68-ACRE SUBJECT PROPERTY FROM LOW DENSITY RESIDENTIAL, MODERATE DENSITY RESIDENTIAL, AND COMMUNITY COMMERCIAL TO MODERATE DENSITY RESIDENTIAL, COMMUNITY COMMERCIAL, AND COMMERCIAL; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441 (TAX PARCEL 03042-050-004; 03042-050-005 (PORTION THEREOF); 03046-003-000 (PORTION THEREOF)); REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, an application for a small-scale Comprehensive Plan amendment to the City of Alachua Comprehensive Plan Future Land Use Map as further described herein has been filed with the City (the "Amendment") by eda consultants, inc. ("Agent") and NV5, Inc. ("Agent") (together as the "Applicant") on behalf of JTFA LLC (the "Property Owner"); and,

WHEREAS, a duly advertised public hearing was conducted on the proposed Amendment on April 21, 2026, by the Planning and Zoning Board, sitting as the Local Planning Agency ("LPA"), and the LPA reviewed and considered all comments received during the public hearing concerning the application and made its recommendation to the City Commission; and,

WHEREAS, the City Commission held duly advertised public hearings on June 8, 2026 (which was continued to a date certain of June 22, 2026), and August 24, 2026, on the proposed Amendment and provided for and received public participation; and,

WHEREAS, the City Commission has determined and found said application for the Amendment to be consistent with the City of Alachua Comprehensive Plan; and,

WHEREAS, for reasons set forth in this ordinance that is hereby adopted and incorporated as findings of fact, that the City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare;

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA.

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and are incorporated herein by reference.
2. The Amendment is consistent with the City of Alachua Comprehensive Plan.
3. The Amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

Section 2. Comprehensive Plan Future Land Use Map Amended

The City of Alachua Comprehensive Plan Future Land Use Map is hereby amended from Low Density Residential (± 20.32-acres), Moderate Density Residential (± 19.36-acres), and Community Commercial (± 7.00-acres) to Moderate Density Residential (± 6.37-acres), Community Commercial (± 10.20-acres), and Commercial (± 30.11-acres) on a ± 46.68-acre subject property, consisting of Tax Parcel Numbers 03042-050-004; 03042-050-005 (portion thereof), and 03045-003-000 (portion thereof), in accordance with the legal descriptions found in Exhibit "A" and map found in Exhibit "B" attached hereto.

Section 3. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of the City of Alachua, Florida.

Section 4. Repealing Clause

All ordinances or parts of ordinances in conflict with this ordinance are, to the extent they conflict with this ordinance, repealed.

Section 5. Providing for Severability

It is the declared intent of the Alachua City Commission that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by a court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance and the remainder of this ordinance, after the exclusion of such part or parts, shall be deemed to be valid.

Section 6. Effective Date

This Ordinance shall be effective upon its passage and adoption on the second and final reading. The effective date of this Amendment, unless timely challenged, shall be 31 days after adoption in accordance with Chapter 163.3187, Florida Statutes. If timely challenged, this Amendment shall become effective on the date the state land planning agency or Administrative Commission enters a final order determining this adopted Amendment to be in compliance with Chapter 163.3187, Florida Statutes. No development orders, development permit, or land uses dependent on this Amendment may be issued or commenced before this Amendment has become effective.

PASSED on first reading on the 22nd day of June, 2026.

PASSED and **DULY ADOPTED**, in regular session, with a quorum present and voting, by the City Commission, upon second reading this 24th day of August, 2026.

SUMMARY

This application is a request by eda consultants, inc. (Agent) and NV5, Inc. (Agent), together as the Applicant on behalf of JTFA LLC (Property Owner) for consideration of an amendment to the City of Alachua Future Land Use Map (FLUM). The proposed amendment would change the future land use designation from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential, Community Commercial, and Commercial on a ± 46.70-acre subject property.

The subject property is generally located at 16650 NW US Highway 441 (tax parcels 03042-050-004; 03042-050-005 (portion thereof); 03046-003-000 (portion thereof)).

The Applicant has submitted a companion application for a site-specific amendment to the Official Zoning Atlas (rezoning), which proposes to amend the zoning of the subject property from Planned Development – Residential (PD-R) and Community Commercial (CC) to PD-R and Planned Development – Commercial (PD-COMM).

Existing Future Land Use Map Designations

Policy 1.2.a of the City of Alachua Comprehensive Plan, Future Land Use Element establishes the Low Density Residential land use category which acts as "a transition between rural residential/agricultural areas and the urban areas within the City." Development is limited to one dwelling unit per acre and is typically comprised of single-family detached dwelling units.

The Moderate Density Residential land use category is established by Policy 1.2.b of the City of Alachua Comprehensive Plan, Future Land Use Element. Development is limited to four dwelling units per acre and is primarily comprised of single-family detached dwelling units; however, townhomes and duplexes are also permitted uses.

Policy 1.3.a of the City of Alachua Comprehensive Plan, Future Land Use Element establishes the Community Commercial land use category, which is established to "provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock." Typical uses are primarily commercial in nature; however, limited residential uses are permitted. Development is limited to a floor area ratio of 0.6 for parcels 5-acres or greater in size and 15 dwelling units per acre.

Table 1. Summary of Existing FLUM Designations

Summary of Existing FLUM Designations	
FLUM Designation:	Low Density Residential; Moderate Density Residential; Community Commercial

Table 1. Summary of Existing FLUM Designations (Continued)

Max Gross Density:	Low Density Residential	20 dwelling units (1 DUA)
	Moderate Density Residential	77 dwelling units (4 DUA)
	Community Commercial	105 dwelling units (15 DUA*)
	TOTAL	202 dwelling units (± 4.33 DUA)
Max Floor Area:	Low Density Residential	N/A
	Moderate Density Residential	N/A
	Community Commercial	± 182,952 square feet (0.60 FAR*)
	TOTAL	± 182,952 square feet (0.09 FAR)
Typical Uses: (For a full and comprehensive list, refer to the City of Alachua Comprehensive Plan, Future Land Use Element)	Low Density Residential	▪ Single family detached dwelling units; ▪ Accessory dwelling units; ▪ Manufactured or modular homes meeting certain design criteria; ▪ Residential Planned Developments; and, ▪ Supporting community services.
	Moderate Density Residential	▪ Single family detached dwelling units; ▪ Accessory dwelling units; ▪ Manufactured or modular homes meeting certain design criteria; ▪ Mobile homes only within mobile home parks; ▪ Duplexes and quadplexes; ▪ Townhomes; ▪ Residential Planned Developments; and, ▪ Supporting community services.
	Community Commercial	▪ Neighborhood commercial establishments; ▪ Residential/offices and live-work units; ▪ Personal services; ▪ Financial institutions; ▪ Retail sales and services that serve the community; ▪ Eating establishments; ▪ Indoor recreation/entertainment; ▪ Single-family and multi-family above first floor commercial uses; ▪ Visitor accommodations; ▪ Supporting community services; ▪ Traditional Neighborhood Planned Developments; ▪ Single family attached units; ▪ Apartments and townhomes; and, ▪ Duplexes and quadplexes.
*Density and intensity calculations were completed using the highest densities and intensities permitted in the Commercial land use category; however, the highest densities and intensities are associated with mixed-use development. Non-mixed-use development would have a lower theoretical development potential.		

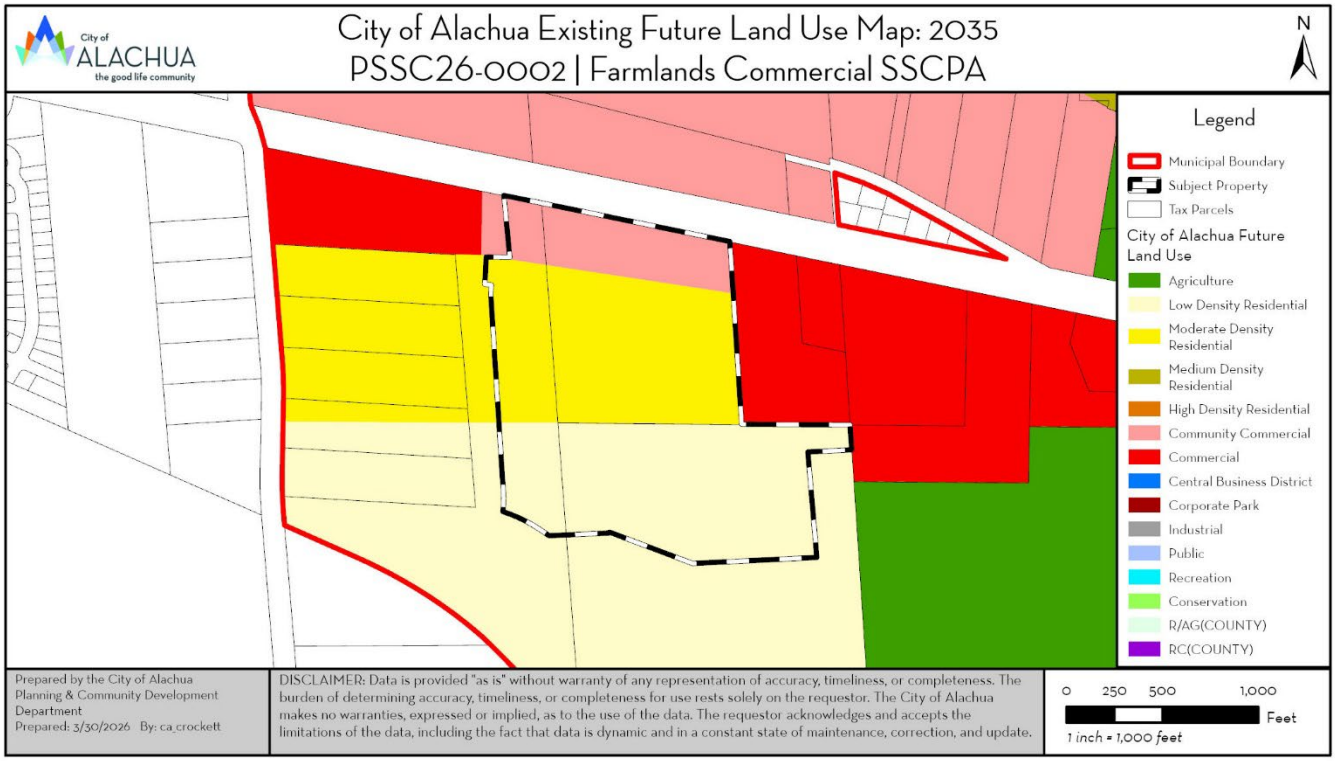

Figure 1. Existing Future Land Use Map with Subject Property

Proposed Future Land Use Map Designations

The proposed amendment would retain some Moderate Density Residential and Community Commercial land use categories on the subject property. The remaining portion would be amended to the Commercial land use category, which is established by Policy 1.3.b of the City of Alachua Comprehensive Plan, Future Land Use Element.

The Commercial land use category provides "for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate." Typical uses are primarily commercial in nature, including regional commercial uses and auto-oriented uses; however, limited residential uses are permitted. Development is limited to a floor area ratio of 0.6 for parcels 5-acres or greater in size and 15 dwelling units per acre.

Table 2. Summary of Proposed FLUM Designations

Summary of Proposed FLUM Designations	
FLUM Designation:	Moderate Density Residential; Community Commercial; Commercial

Table 2. Summary of Proposed FLUM Designations (Continued)

Max Gross Density:	Moderate Density Residential	25 dwelling units (4 DUA)
	Community Commercial	153 dwelling units (15 DUA*)
	Commercial	451 dwelling units (15 DUA)
	TOTAL	629 dwelling units (± 13.47 DUA)
Max Floor Area:	Moderate Density Residential	N/A
	Community Commercial	± 266,587 square feet (0.60 FAR*)
	Commercial	± 786,955 square feet (0.60 FAR*)
	TOTAL	± 1,053,542 square feet (0.52 FAR)
Typical Uses: (For a full and comprehensive list, refer to the City of Alachua Comprehensive Plan, Future Land Use Element)	Moderate Density Residential	▪ Single family detached dwelling units; ▪ Accessory dwelling units; ▪ Manufactured or modular homes meeting certain design criteria; ▪ Mobile homes only within mobile home parks; ▪ Duplexes and quadplexes; ▪ Townhomes; ▪ Residential Planned Developments; and, ▪ Supporting community services.
	Community Commercial	▪ Neighborhood commercial establishments; ▪ Residential/offices and live-work units; ▪ Personal services; ▪ Financial institutions; ▪ Retail sales and services that serve the community; ▪ Eating establishments; ▪ Indoor recreation/entertainment; ▪ Single-family and multi-family above first floor commercial uses; ▪ Visitor accommodations; ▪ Supporting community services; ▪ Traditional Neighborhood Planned Developments; ▪ Single family attached units; ▪ Apartments and townhomes; and, ▪ Duplexes and quadplexes.
	Commercial	▪ Retail sales and services; ▪ Personal services; ▪ Financial institutions; ▪ Recreation and entertainment; ▪ Tourist-related uses; ▪ Visitor accommodations; ▪ Commercial shopping centers; ▪ Auto-oriented uses; ▪ Traditional Neighborhood Planned Developments; ▪ Employment Center Planned Developments; ▪ Commercial recreation centers; ▪ Office/business parks; ▪ Limited industrial services;

Table 2. Summary of Proposed FLUM Designations (Continued)

		▪ Eating establishments; ▪ Single family attached units; ▪ Apartments and townhomes; ▪ Duplexes and quadplexes; ▪ Single-family and multi-family residential above first floor commercial uses; ▪ Convention centers; and, ▪ Supporting community services.
Net Increase/ Decrease	*+ 427 dwelling units* *+ 870,590 square feet non-residential floor area*	
*Density and intensity calculations were completed using the highest densities and intensities permitted in the Commercial land use category; however, the highest densities and intensities are associated with mixed-use development. Non-mixed-use development would have a lower theoretical development potential.		

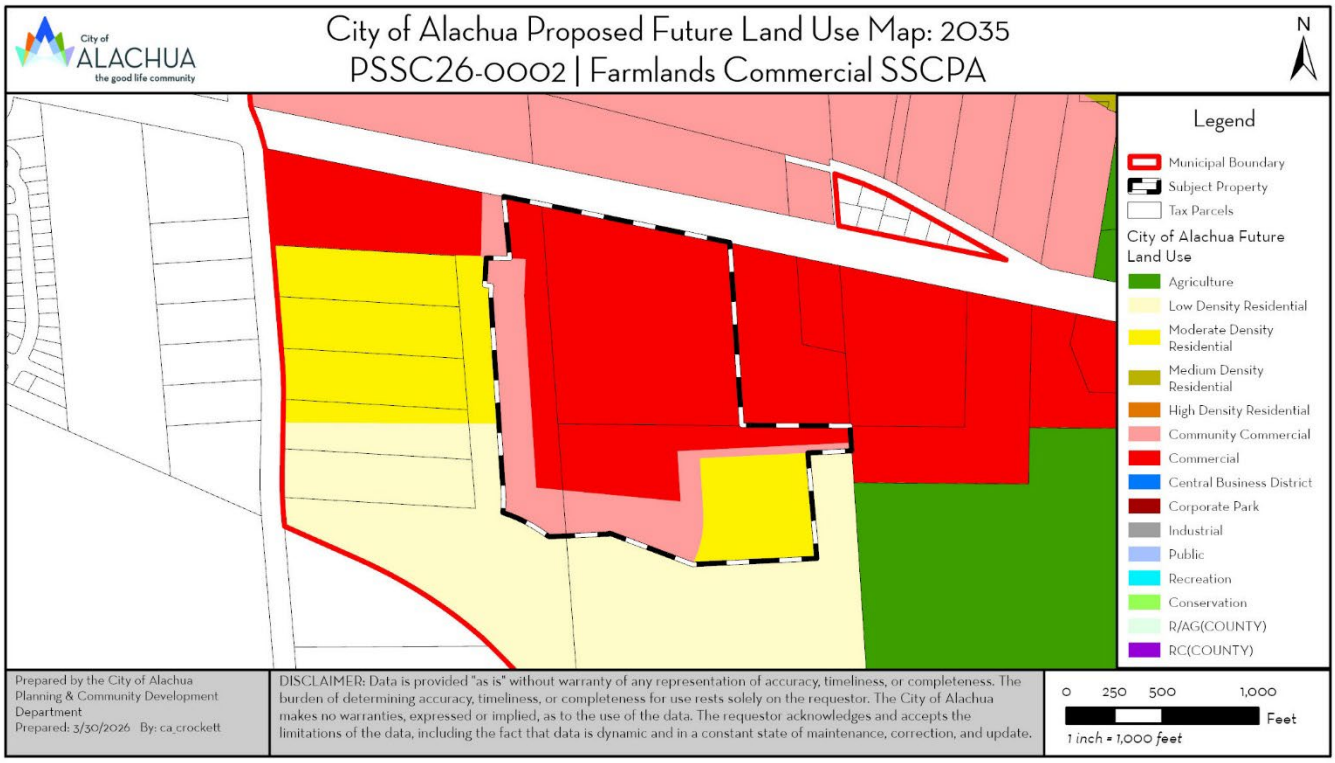

Figure 2. Proposed Future Land Use Map with Subject Property

EXISTING USES

The subject property is undeveloped and has been historically used for silviculture; however, the subject property is part of a previously approved PD-R.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 3. Figure 3 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 3. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Agriculture, Vacant Commercial	Community Commercial	Planned Development – Commercial (PD-COMM)
South	Silviculture, Vacant Residential	Low Density Residential	Planned Development – Residential (PD-R)
East	Agriculture, Repair and Servicing	Agriculture, Commercial	Agricultural (A); Commercial Intensive (CI)
West	Silviculture, Vacant Residential, Vacant Commercial	Low Density Residential, Moderate Density Residential, Commercial	Planned Development – Residential (PD-R); Commercial Intensive (CI)

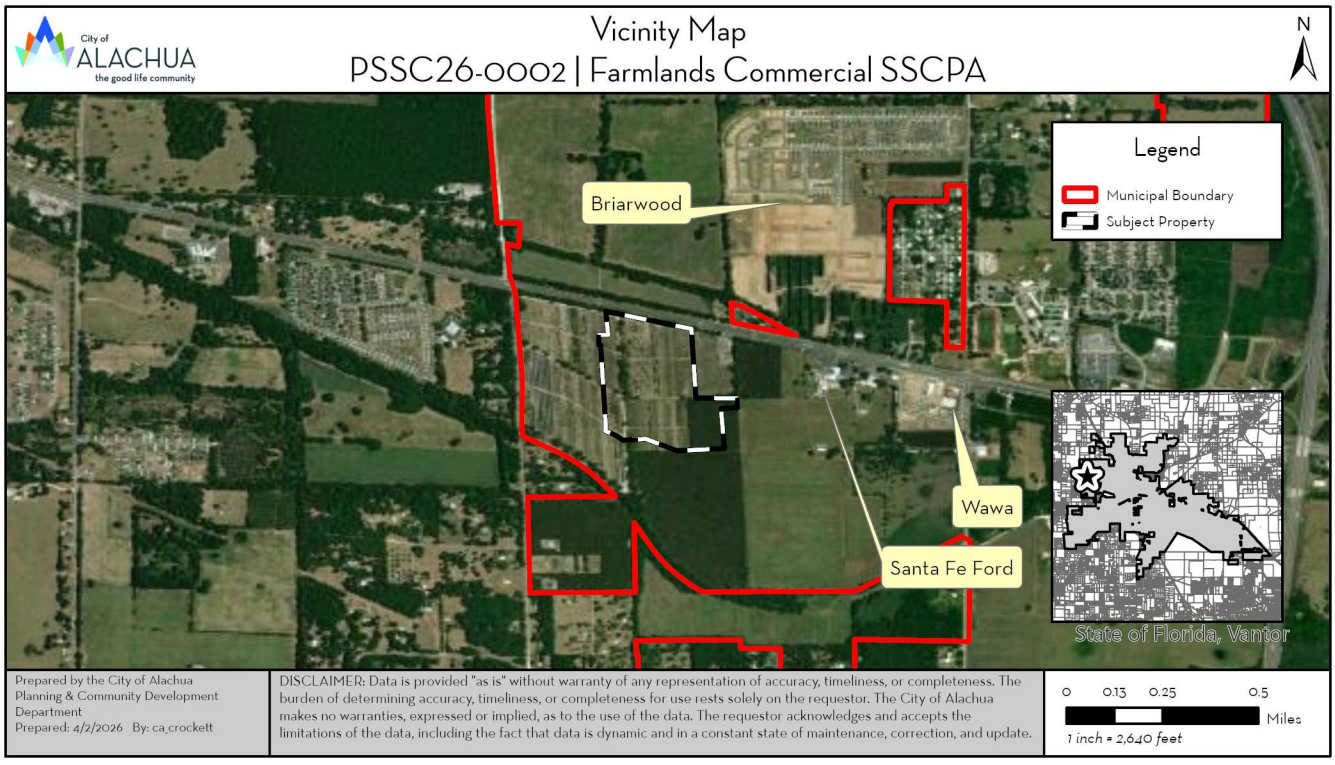

Figure 3. Vicinity Map

NEIGHBORHOOD MEETING

The purpose of a neighborhood meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. Neighborhood meetings are not required for small-scale Comprehensive Plan amendment applications; however, two neighborhood meetings were held regarding the companion site-specific amendment to the Official Zoning Atlas.

A neighborhood meeting was held on September 24, 2025, and October 22, 2025, at Legacy Park. As required by Section 2.2.4 of the City's Land Development Regulations, all property owners within 400 feet of the subject property were notified and notice of the meeting was published in a newspaper of general circulation. The applicant was available to answer questions. Materials submitted by the applicant indicate that the meetings were attended by 16 members of the public in total.

Neighborhood meeting summaries submitted by the Applicant are available in the application materials.

NEEDS ANALYSIS

Chapter 163.3177(6)(a)4., Florida Statues, requires the future land use element of a comprehensive plan to provide a balance of uses that foster vibrant, viable communities and economic development opportunities and address outdated development patterns, such as antiquated subdivisions. The amount of land designated for future land uses should allow the operation of real estate markets to provide adequate choices for permanent and seasonal residents and business and may not be limited solely by the projected population. The element shall accommodate at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year planning period unless otherwise limited under s. 380.05, including related rules of the Administration Commission.

The population of the City of Alachua is currently an estimated 11,296 persons, according to the University of Florida Bureau of Economic and Business Research. The City's Comprehensive Plan has established a population projection of 17,464 persons by the year 2035. The Applicant did provide an analysis demonstrating that the proposed amendment would not adversely impact the amount of land needed for a minimum 10-year planning period.

The Applicant submitted a needs analysis, which is included in the application materials. The Applicant contends the "developed nature and urban character of the US 441 corridor within the City of Alachua indicates this area is continuing its urbanizing form and there is a need for additional commercial and residential options in the City and for residents in the context area and proximate cities of High Springs and Newberry."

URBAN SPRAWL ANALYSIS

Section 163.3177, Florida Statutes, requires any amendment to the Future Land Use Element to discourage the proliferation of urban sprawl. Section 163.3177(6)(a)9.a., Florida Statutes, identifies 13 primary urban sprawl indicators and states that, "[t]he evaluation of the presence of these indicators shall consist of an analysis of the plan or plan amendment within the context of features and characteristics unique to each locality..."

An evaluation of each primary indicator is provided below.

(I) Promotes, allows, or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.

Evaluation & Findings: The proposed amendment includes multiple future land use categories that range in density and intensity and range in allowable uses, providing for a mix of allowable uses on the subject property.

(II) Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.

Evaluation & Findings: The subject property is already designated with urban and urban-transitional future land use categories and is adjacent to other urban land use categories.

(III) Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

Evaluation & Findings: The proposed amendment is consistent with surrounding future land use categories, ensuring isolated and radial development patterns do not occur. The proposed Commercial land use area reduces the existing potential of strip or ribbon patterns by better incorporating the area into the adjacent Moderate Density Residential and Low Density Residential land use areas with a transitionary Community Commercial land use area.

(IV) Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

Evaluation & Findings: No environmentally sensitive features are known to exist on the subject property. The subject property is located in an identified area of high aquifer recharge potential. The Applicant has provided a preliminary geotechnical evaluation to demonstrate the general suitability of the site for the proposed land use categories. Further, detailed evaluation will be required as part of the review of any final development order. This will allow the detailed evaluation to be tailored to the specific type of development in question at time of review.

(V) Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The subject property is adjacent to active silviculture activities; however, both the subject property and adjacent property are already designated with urban and urban-transitional future land use categories. The Applicant contends that the silviculture activities will be relocated by the property owner to another property in the general region.

(VI) Fails to maximize use of existing public facilities and services.

Evaluation & Findings: The subject property exists within the City of Alachua's Community Potable Water Service Area and Community Wastewater Service Area and any development will be required to connect to the respective public facilities as required by the Comprehensive Plan. Connections to public facilities will be the responsibility of the developer of the subject property at time of development.

(VII) Fails to maximize use of future public facilities and services.

Evaluation & Findings: The subject property exists within the City of Alachua's Community Potable Water Service Area and Community Wastewater Service Area and any development will be required to connect to the respective public facilities as required by the Comprehensive Plan. Connections to public facilities will be the responsibility of the developer of the subject property at time of development. Additionally, the subject property exists within the Alachua West Water Distribution Infrastructure Improvement Area.

(VIII) Allows for land use patterns or timing which disproportionately increase the cost in time, money, and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

Evaluation & Findings: The subject property already has urban future land use categories on the site, which are of lower density and intensity. The proposed amendment, increasing density and intensity, would actually be anticipated to decrease the cost in time, money, and energy of public facility and service provision and maintenance as more users in a concentrated area means less cost to furnish facilities and services per user.

(IX) Fails to provide a clear separation between rural and urban uses.

Evaluation & Findings: The proposed amendment maintains a transition of the most intense land use category of Commercial along US Highway 441, stepping down in intensity to Community Commercial and Moderate Density Residential on the subject property. The proposed Moderate Density Residential category also abuts Low Density Residential on the property adjacent to the south. Policy 1.2.a of the Comprehensive Plan, Future Land Use Element describes Low Density Residential as "a transition between rural residential / agricultural areas and the urban areas within the City." As such, the proposed amendment establishes a logical development pattern and maintains a clear separation between rural and urban uses.

(X) Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

Evaluation & Findings: Typical developments in the Commercial land use category would not be development well-suited for infill development as larger scale, regionally facing, and highway-oriented uses are permitted in the Commercial land use category. As such, the proposed amendment including a Commercial land use area would not discourage or inhibit infill development elsewhere in existing neighborhoods and communities where larger scale, regionally facing, and highway-oriented uses are not appropriate.

(XI) Fails to encourage a functional mix of uses.

Evaluation & Findings: The Commercial and Community Commercial land use categories are mixed-use land use categories and permit for a wide array of regionally and locally facing non-residential uses with a limited amount of residential uses. The Moderate Density Residential portion augments the limited amount of residential uses permitted in the Commercial and Community Commercial land use areas, resulting in a functional mix of permitted uses across the subject property.

(XII) Results in poor accessibility among linked or related land uses.

Evaluation & Findings: The proposed amendment is generally linked with related land uses. The Commercial land use category is located along US Highway 441 and connects two existing Commercial land use areas. The Community Commercial land use category is located as a transitionary category as established by Policy 1.3.a of the Comprehensive Plan, Future Land Use Element. "The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories." The Moderate Density Residential land use category is located adjacent to existing residential land use areas. Ultimately, the proposed amendment results in a logical development pattern that will encourage accessibility between the related land uses, including a functional mix of residential and non-residential uses.

(XIII) Results in the loss of significant amounts of functional open space.

Evaluation & Findings: The subject property is in private ownership, is not open to the public, and does not serve as functional open space.

Urban Form Criteria

In addition to the preceding urban sprawl indicators, Chapter 163.3177 also establishes eight "Urban Form" criteria. An amendment to the Future Land Use Map is presumed to not be considered urban sprawl if it meets four of the eight urban form criteria. These urban form criteria, and an evaluation of each as each may relate to this application, are provided below.

The applicant has also provided an analysis of the application's consistency with Chapter 163.3177 within the application materials.

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

Evaluation & Findings: No environmentally sensitive features are known to exist on the subject property. The subject property is located in an identified area of high aquifer recharge potential. The Applicant has provided a preliminary geotechnical evaluation to demonstrate the general suitability of the site for the proposed land use categories. Further, detailed evaluation will be required as part of the review of any final development order. This will allow the detailed evaluation to be tailored to the specific type of development in question at time of review.

(II) Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

Evaluation & Findings: The subject property already has urban future land use categories on the site, which are of lower density and intensity. The proposed amendment, increasing density and intensity, would actually be anticipated to decrease the cost in time, money, and energy of public facility and service provision and maintenance as more users in a concentrated area means less cost to furnish facilities and services per user.

(III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

Evaluation & Findings: The Commercial and Community Commercial land use categories are mixed-use land use categories and permit for a wide array of regionally and locally facing non-residential uses with a limited amount of residential uses. The Moderate Density Residential portion augments the limited amount of residential uses permitted in the Commercial and Community Commercial land use areas, permitting a wide range of housing types.

The City recognizes that mixed-use development reduces transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling. Ultimately, the proposed amendment results in a logical development pattern that will encourage accessibility between the related land uses, including a functional mix of residential and non-residential uses.

(IV) Promotes conservation of water and energy.

Evaluation & Findings: The City recognizes that mixed-use development reduces transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling. The Applicant further contends that a decrease in vehicle miles travelled (VMT) promotes energy conservation of both fossil fuels and electric power.

(V) Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The Applicant contends that the silviculture activities conducted on site will be relocated by the property owner to another property in the general region. Staff notes that the Applicant's contention likely does not meet the burden of preserving agricultural areas and activities.

(VI) Preserves open space and natural lands and provides for public open space and recreation needs.

Evaluation & Findings: The subject property is in private ownership, is not open to the public, and does not serve as functional open space. Additionally, the subject property is not comprised of natural lands and is primarily comprised of silviculture operations. The proposed future land use categories all require open space as part of future development.

(VII) Creates a balance of land uses based upon the demand of the residential population for the nonresidential needs of an area.

Evaluation & Findings: The Commercial and Community Commercial land use categories permit a wide array of non-residential land uses, including regionally facing and more locally facing uses, to meet the need of the residential population of the City of Alachua and context area.

(VIII) Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. 163.3164.

Evaluation & Findings: The Applicant contends that the proposed amendment will discourage urban sprawl; however, the existing future land use categories were found not to constitute urban sprawl when adopted by Ordinance 22-06. Additionally, the proposed amendment does not provide for an innovative development pattern. As such, Staff notes this criterion is likely not met.

Staff notes six of the eight urban form criteria are met, and as such, the proposed amendment does not constitute urban sprawl as established by Florida Statute 163.3177(6)(a)9.b.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Future Land Use Map 2035*

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Evaluation & Findings: The proposed land use categories would maintain a balance between residential and non-residential uses in the City and maintain a minimum number of lands for a 10-year planning period.

Policy 1.2b: *Moderate Density Residential* (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments; and,
8. Supporting community services such as schools, houses of worship, parks, and community centers.

Evaluation & Findings: The proposed Moderate Density Residential land use category abuts a Community Commercial land use category and Low Density Residential land use category, acting as a step down in density and intensity between the non-residential and residential areas and maintaining an orderly and compatible pattern of development.

Policy 1.3.a: Community Commercial: The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:

1. Neighborhood commercial establishments;
2. Residential/offices and live-work units;
3. Business and professional offices;
4. Personal services;
5. Financial institutions;
6. Retail sales and services that serve the community;
7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;
11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;
13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use

Evaluation & Findings: The proposed Community Commercial land use category would act as a transition from the Commercial land use area to the residential land use areas, which is consistent with the purposes of the Community Commercial land use category and would maintain an orderly and compatible pattern of development.

Policy 1.3.b: *Commercial*: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Recreation and entertainment;
5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Evaluation & Findings: The proposed Commercial land use category would be located along US Highway 441, where more intense and highway-oriented commercial uses are appropriate. The proposed Commercial land use category would abut an existing Commercial land use category to the east, and be abutted by Community Commercial as a transition to the west and south, maintaining and orderly and compatible pattern of development.

Policy 1.3.f: The creation/promotion of strip pattern commercial development shall be discouraged. Infill within established commercial areas is preferred over extension of a strip commercial pattern. Extension of a commercial land use designation may be considered in circumstances where the extension is compatible with the existing land uses surrounding the land or the land use categories of surrounding lands. Extensions of a commercial land use category shall not encroach into a residential area. The following criteria shall be applied to limit the impacts of commercial development upon surrounding areas:

1. Impacts upon traffic circulation should be anticipated and mitigated through the reservation of right-of-way for road widening and marginal access streets when appropriate.
2. Access points for commercial development shall minimize points of conflict by utilizing frontage roads, providing cross access between parcels, or installing shared use ingress and egress access driveways connections to roadways.
3. Setbacks and landscaped or other appropriate buffers shall be established to mitigate the visual impacts of commercial development upon surrounding land uses.
4. A sidewalk or bicycle path shall be required where appropriate, to provide convenient access to the development from surrounding areas and to reduce traffic volumes on the roadways.

Evaluation & Findings: The proposed Commercial land use category would abut an existing Commercial land use category to the east, and be abutted by Community Commercial as a transition to the west and south, maintaining an orderly and compatible pattern of development. Although the Commercial and Community Commercial land use categories are proposed to extend into an existing residential future land use category, the property is undeveloped and not an existing residential neighborhood. As such, concerns with residential compatibility are minimal as (1) residential compatibility can be addressed at time of development review, ensuring proper landscaping and buffering, (2) the proposed commercial land use categories will not interfere with an existing residential area, and (3) the proposed Commercial land use category will be surrounded by a transitionary Community Commercial land use category.

A phase 1 traffic impact analysis has been submitted as part of this application and has demonstrated that proper consolidation of access points and right-of-way design will be taken into account at time of final design. A more detailed traffic analysis will be required as part of any development application. Pedestrian and bicycle facilities will be required to connect to adjacent properties at time of final design. Setbacks and buffers between residential and non-residential use areas will be required at time of final design.

Policy 1.3.g: The City shall pursue the establishment of activity centers and similar criteria to guide the placement and design of commercial and business areas.

1. The City shall establish and maintain a Gateway Activity Center at the interchange of US 441 and Interstate 75. The boundaries of the Gateway Activity Center shall be based on the Generalized US 441/I-75 Activity Center Map provided in the Future Land Use Map Series. The intent of this activity center is to welcome existing and future residents and visitors to the City, and to promote Alachua as an attractive, vibrant, and economically prosperous community.
2. The City shall establish and maintain the US 441 corridor as a Corporate Corridor Activity Center. The intent of establishing this activity center is to implement economic development objectives and to promote a coordinated development plan to maximize existing and future land use patterns and preserve the function of the US 441 corridor.

Evaluation & Findings: The subject property is within the City's Corporate Corridor Activity Center. Highway-oriented and more intense commercial development is consistent with the objectives of economic development and is consistent with the surrounding development pattern, ensuring a coordinated future land use pattern.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications for an amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.3177(6)(a)9.a. and b., Florida Statutes, respectively.

Evaluation & Findings: An urban sprawl analysis conducted by staff has been included in this report. Staff has found the proposed amendment to not constitute urban sprawl as defined in Chapter 163.317(6)(a)9., Florida Statutes.

Policy 5.1.a: *Topography*: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to topography of the existing site. Only moderate limitations related to topography exist for commercial development in a limited portion of the site. No seepage slopes or potential sinkholes are known to exist on the subject property. All policies and regulations regarding the protection of natural topography will be enforced at time of development review. At this stage, the proposed land use categories are generally suitable for the subject property in relation to topography, karst-sensitive, and other geologic features. Any development application for the subject property will require additional geotechnical screening and evaluation.

Policy 5.1.b: *Soils*: The City shall ensure soil protection and intervention measures are included in the development review process.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to the six soil types present on the subject property, which are all well or moderately well drained soils. As such, the proposed land use categories are generally suitable for the subject property in relation to soils.

Policy 5.1.c: *Flood prone areas*: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. The subject property is within Flood Zone X; and as such, staff noted no concerns related to flood potential.

Policy 5.1.d: *Wetlands*: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to wetlands on the subject property. No delineated or potential wetlands are known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to wetlands.

Policy 5.1.e: *Habitat*: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to potential habitat for listed species. The subject property is not identified by the Florida Natural Areas Inventory (FNAI) and not located near an Alachua County Strategic Ecosystem. As such, the proposed land use categories are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of development review.

Objective 9.1: *Connections to Water and Wastewater Systems*

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

Evaluation & Findings: The subject property is located within the City's Community Potable Water Service Area and Community Wastewater Service Area. As such, any development of the subject property will be required to connect to City facilities at time of development.

Transportation Element

Objective 1.1: *Level of Service*

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation & Findings: A phase 1 traffic impact analysis has been submitted as part of this application. Multiple improvements are recommended, and will be assessed in more detail at time of final design. The Applicant contends that while the maximum build-out scenario of the proposed future land use categories would result in an increase to trip generation, the companion rezoning application limits the maximum build-out scenario and would actually result in a net reduction in potential trip generation. Concurrency will be reevaluated at time of application for a final development order, at which time the Applicant must demonstrate that the level of service will not be exceeded, or potential fees or improvements will be required in accordance with Chapter 18 of the City's Code of Ordinances. An amendment to the Future Land Use Map inherently does not impact the level of service standard.

Objective 1.2: *Access Management*

The City shall establish access management standards and coordinate with Alachua County and the Florida Department of Transportation to maintain access management standards which promote safe and efficient travel.

Evaluation & Findings: A phase 1 traffic impact analysis has been submitted as part of this application and has demonstrated that proper consolidation of access points and right-of-way design will be taken into account at time of final design. Access to US Highway 441 will be required to be in a consolidated manner that promotes safe and efficient travel at time of final design.

Policy 1.4.b The City shall require any commercial, industrial, or residential development which must obtain site plan or subdivision approval to provide a sidewalk along the frontage of any collector street or arterial street when a sidewalk is not present along the frontage of the street. A sidewalk shall not be required if a sidewalk does not exist within 2,640 feet of the property on the same side of the collector or arterial street.

Evaluation & Findings: The subject property is within 2,640 feet of a sidewalk on the same side of an arterial street, and as such, will be required to provide a sidewalk at time of development.

Policy 1.5.e Where feasible, the City will encourage strategies to facilitate development patterns that support multi-modal solutions, including urban design and appropriate land use mixes, including intensity and density.

Evaluation & Findings: The proposed land use categories include a mix of residential and commercial uses in an arrangement that will promote walking and cycling between the uses in close proximity. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes, and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Evaluation & Findings: The proposed land use categories allow for a variety of housing types in a range of densities. The commercial land use categories also allow for housing stock in close proximity to commercial development in a mixed-use manner.

Policy 1.1.i: The City shall establish land use designations and zoning districts that accommodate mixed-use development consisting of residential with commercial and/or retail.

Evaluation & Findings: The proposed Commercial and Community Commercial land use categories are mixed-use land use categories that accommodate mixed-use development with residential, commercial, and retail in close proximity to each other. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling.

Community Facilities Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which shall include all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity water main exists within 100 feet of the property line of any lot with a residential land use category or an existing single family residence and wastewater service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. Gravity wastewater main exists with 500 feet of the property line of any proposed residential subdivision consisting of 5 units or less and the gravity wastewater system is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation & Findings: The subject property is located within the Community Wastewater Service Area and any future development on the subject property will be required to connect.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within 100 feet of any lot within a residential land use category or an existing single family residence water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. A water main exists within 500 feet of any proposed residential subdivision consisting of 5 units or less and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation & Findings: The subject property is located within the Community Potable Water Service Area and any future development on the subject property will be required to connect.

Policy 5.1.a: The City shall consider the best available hydrogeological information (e.g, Suwannee River Water Management District high aquifer recharge potential maps or site-specific data), and may require the collection of site-specific hydrogeological data, such as soil borings or electric resistivity tests, when assessing the impacts of proposed land use changes and developments in areas of high aquifer recharge potential. This information should be used in the determination of land use decisions on a case-by-case basis.

Evaluation & Findings: The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map.

The Applicant submitted preliminary geotechnical analysis conducted by UES Professional Solutions, which was then reviewed by Kenneth Hill, P.E. of GSE Engineering & Consulting, Inc. on behalf of the City of Alachua. In reviewing the preliminary geotechnical analysis, Hill states that, "generally soil conditions are suitable for the development of commercial and residential projects." Hill does indicate that it is "prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design." As such, any development application for the subject property will require additional geotechnical screening and evaluation as recommended by Hill in their review of the preliminary geotechnical analysis.

At this stage, the proposed land use categories are generally suitable for the subject property in relation to karst-sensitive and other geologic features.

Conservation and Open Space Element

Objective 1.3: *Listed Species*

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to potential habitat for listed species. The subject property is not identified by the Florida Natural Areas Inventory (FNAI) and not located near an Alachua County Strategic Ecosystem. As such, the proposed land use categories are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of development review.

Policy 1.4.f: The City shall promote mixed use and compact development to promote pedestrian, golf cart and bicycle traffic and reduce automobile dependency.

Evaluation & Findings: The proposed Commercial and Community Commercial land use categories are mixed-use land use categories that accommodate mixed-use development with residential, commercial, and retail in close proximity to each other. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling.

Objective 1.7: *Geological Resources*

The City shall identify, protect and conserve significant geological resources and their natural functions.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. There are no potential sinkholes or other geologic features known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to geologic features.

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to wetlands on the subject property. No delineated or potential wetlands are known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to wetlands.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Evaluation & Findings: No potential or delineated wetlands are known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to wetlands. Should wetlands be discovered on the site, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation & Findings: The subject property is not located within or adjacent to a strategic ecosystem; therefore, no impacts are anticipated to any strategic ecosystem(s) identified within the ecological inventory report. As such, the proposed land use categories are generally suitable for the subject property in relation to strategic ecosystems.

Regulated Plant & Animal Species

The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region.

Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation & Findings: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. No parts of the subject property are identified as a priority area by the FNAI. As such, the proposed land use categories are generally suitable for the subject property in relation to regulated plant and animal species and habitat.

A listed species inventory will be required at time of development plan application to ensure final design is appropriate. Should a regulated plant or animal species be discovered, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Soil Survey

The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff.) There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have a lower infiltration rate and therefore a higher runoff potential.

There are six soil types found within the subject property, shown in Table 4.

Table 4. Soil Types

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Arredondo Fine Sand; 0-5% Slope	A	Well Drained	Slight	Slight	45.01%
Fort Meade Fine Sand; 0-5% Slope	A	Well Drained	Slight	Slight	43.35%
Kendrick Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	7.12%
Arredondo Fine Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	4.27%
Gainesville Loamy Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	0.21%
Millhopper Sand; 0-5% Slope	A	Moderately-Well Drained	Slight	Slight	0.02%

Evaluation & Findings: The six soils present on the subject property are well or moderately well-draining and are generally conducive to residential and commercial development. Only moderate limitations for commercial development exist, and those limitations are due to slope, not drainage. As such, the proposed land use categories are generally suitable for the subject property in relation to soils.

Flood Potential

Panel 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the development area is in Flood Zone X (areas determined to be outside of the 500-year floodplain).

Evaluation & Findings: The subject property is located in Flood Zone X. As such, there are no concerns related to flood potential on the subject property.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.

Evaluation & Findings: There are no potential sinkholes or other geologic features known to exist on the subject property. The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map.

The Applicant submitted preliminary geotechnical analysis conducted by UES Professional Solutions, which was then reviewed by Kenneth Hill, P.E. of GSE Engineering & Consulting, Inc. on behalf of the City of Alachua. In reviewing the preliminary geotechnical analysis, Hill states that, "generally soil conditions are suitable for the development of commercial and residential projects." The full letter is available for review in Exhibit "B" of this report. Hill does indicate that it is "prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design." As such, any development application for the subject property will require additional geotechnical screening and evaluation as recommended by Hill in their review of the preliminary geotechnical analysis.

At this stage, the proposed land use categories are generally suitable for the subject property in relation to karst-sensitive and other geologic features.

Wellfield Protection Zones

Policy 7.2.1 of the Future Land Use Element of the City's Comprehensive Plan establishes a 500-foot radius area around each city-owned potable water well.

Evaluation & Findings: The subject property is not located within a wellfield protection zone. As such, the proposed land use categories are generally suitable for the subject property in relation to wellfield protection.

Historic Structures/Markers and Historic Features

The State of Florida and the Alachua County Historic Resources Inventory identify historic structures in addition to the City's Historic Overlay District, as established by Section 3.7 of the City's Land Development Regulations.

Evaluation & Findings: The subject property is not located in the City's Historic Overlay District and no structures identified as historic by the State of Florida or the Alachua County Historic Resources Inventory exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to historic structures or features.

SMALL-SCALE COMPREHENSIVE PLAN AMENDMENT
STAFF REPORT

DRAFT ORDINANCE 26-XX

ORDINANCE 26-XX

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO HE SMALL SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION OF A ± 46.68-ACRE SUBJECT PROPERTY FROM LOW DENSITY RESIDENTIAL, MODERATE DENSITY RESIDENTIAL, AND COMMUNITY COMMERCIAL TO MODERATE DENSITY RESIDENTIAL, COMMUNITY COMMERCIAL, AND COMMERCIAL; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441 (TAX PARCEL 03042-050-004; 03042-050-005 (PORTION THEREOF); 03046-003-000 (PORTION THEREOF)); REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, an application for a small scale Comprehensive Plan amendment to the City of Alachua Comprehensive Plan Future Land Use Map as further described herein has been filed with the City (the "Amendment") by eda consultants, inc. ("Agent") and NV5, Inc. ("Agent") (together as the "Applicant") on behalf of JTFA LLC (the "Property Owner"); and,

WHEREAS, a duly advertised public hearing was conducted on the proposed Amendment on _____, 2026, by the Planning and Zoning Board, sitting as the Local Planning Agency ("LPA"), and the LPA reviewed and considered all comments received during the public hearing concerning the application and made its recommendation to the City Commission; and,

WHEREAS, the City Commission held duly advertised public hearings on _____, 2026, and _____, 2026, on the proposed Amendment and provided for and received public participation; and,

WHEREAS, the City Commission has determined and found said application for the Amendment to be consistent with the City of Alachua Comprehensive Plan; and,

WHEREAS, for reasons set forth in this ordinance that is hereby adopted and incorporated as findings of fact, that the City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare;

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA.

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and are incorporated herein by reference.
2. The Amendment is consistent with the City of Alachua Comprehensive Plan.
3. The Amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

DRAFT

Section 2. Comprehensive Plan Future Land Use Map Amended

The City of Alachua Comprehensive Plan Future Land Use Map is hereby amended from Low Density Residential (± 20.32-acres), Moderate Density Residential (± 19.36-acres), and Community Commercial (± 7.00-acres) to Moderate Density Residential (± 6.37-acres), Community Commercial (± 10.20-acres), and Commercial (± 30.11-acres) on a ± 46.68-acre subject property, consisting of Tax Parcel Numbers 03042-050-004; 03042-050-005 (portion thereof), and 03045-003-000 (portion thereof), in accordance with the legal descriptions found in Exhibit "A" and map found in Exhibit "B" attached hereto.

Section 3. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of the City of Alachua, Florida.

Section 4. Repealing Clause

All ordinances or parts of ordinances in conflict with this ordinance are, to the extent they conflict with this ordinance, repealed.

Section 5. Providing for Severability

It is the declared intent of the Alachua City Commission that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by a court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance and the remainder of this ordinance, after the exclusion of such part or parts, shall be deemed to be valid.

Section 6. Effective Date

This Ordinance shall be effective upon its passage and adoption on the second and final reading. The effective date of this Amendment, unless timely challenged, shall be 31 days after adoption in accordance with Chapter 163.3187, Florida Statutes. If timely challenged, this Amendment shall become effective on the date the state land planning agency or Administrative Commission enters a final order determining this adopted Amendment to be in compliance with Chapter 163.3187, Florida Statutes. No development orders, development permit, or land uses dependent on this Amendment may be issued or commenced before this Amendment has become effective.

DRAFT

PASSED on first reading on the _____ of _____, 2026.

PASSED and **DULY ADOPTED**, in regular session, with a quorum present and voting, by the City Commission, upon second reading this _____, day of _____ , 2026.

Review of Geotechnical Information
Farmlands Commercial PD Rezoning
Alachua, Alachua County, Florida
GSE Project No. 17335

GSE Engineering & Consulting, Inc. (GSE) has performed a review of geotechnical information/reports that was submitted as part of the rezoning application for the Farmlands Commercial PD located in Alachua, Florida. The remainder of this report summarizes our review.

Background Information

The site is located on the south side of U.S. Highway 441 approximately 0.5 miles west of the NW CR 235A intersection in Alachua, Florida. The site includes portions or all of Tax Parcels 03046-003-002, 03042-050-004, 03042-050-005, 03042-050-003, 03042-050-010 and 03042-051-001.

The site is proposed for commercial and residential development. You provided two geotechnical site exploration reports prepared by UES Professional Solutions (UES) that were included as part of the project application. You requested we review the reports to determine if the evaluations demonstrate the sites are suitable for single-story commercial buildings and single-family residential development, or if additional evaluation is appropriate/necessary.

Data Review

We were provided the following geotechnical engineering reports prepared by UES:

1. Preliminary Geotechnical Exploration Services, Proposed Alachua Commercial Center, US Hwy 441, Alachua, Alachua County, Florida. UES Project No. A25140.00683.005, Report No. 2160889 dated December 18, 2025 (Report 1).
2. Preliminary Geotechnical Exploration Services, Tax Parcels 03042-005/003 – US 441, Alachua, Alachua County, Florida. UES Project No. A25140.00683.005, Report No. 2162758 dated March 6, 2026 (Report 2).

GSE Engineering & Consulting, Inc.
5590 SW 64th Street, Suite B
Gainesville, Florida 32608
352-377-3233 Phone ◆ 352-377-0335 Fax
www.gseengineering.com

The reports included soil borings and laboratory testing of soil samples considering typical commercial development. Report 1 included twenty-nine (29) Standard Penetration Test (SPT) soil borings advanced to depths ranging from 10 to 40 feet below existing land surface (bls) and accompanying laboratory testing that included sieve analysis, wash 200 tests, Atterberg Limits tests, hydraulic conductivity (permeability) tests, and Limerock Bearing Ratio tests. Report 2 included twenty-five (25) SPT borings advanced to depths of 20 to 25 feet bls along with accompanying laboratory testing that included sieve analysis, wash 200 tests, Atterberg Limits tests, organic content tests, hydraulic conductivity (permeability) tests, corrosion series tests, and Limerock Bearing Ratio tests. Test were also performed on topsoil type materials to evaluate their suitability for reuse and determine fertilizer recommendations.

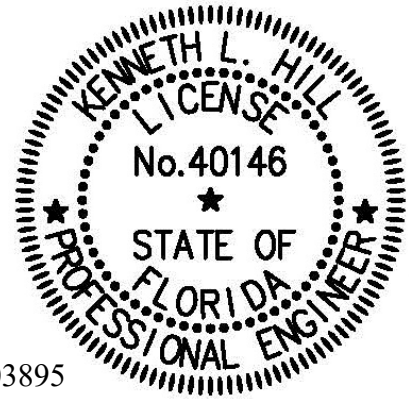
Both geotechnical explorations encountered sandy soil overlying clayey sand, sandy clay, and clay to the explored depths. Laboratory testing on representative soils indicates that some of the clays have a high risk for expansive characteristics. Limestone was encountered in one soil boring at a depth of 39.5 feet bls. Groundwater was generally not encountered within the depths explored or not determined due to the mud rotary method of advancing the boreholes.

Technical Analysis

The geotechnical explorations performed for this project indicate that generally soil conditions are suitable for the development of commercial and residential projects. The soil borings encountered expansive clays in some areas, but this is common in this area of Alachua County and the geotechnical engineer discusses methods for considering and mitigating the effects of the expansive soils on development and building elements.

The geotechnical engineer qualifies both reports as "*preliminary*" and states "***Due to the preliminary design stage of this project, building locations, structural loads, and grading information were unavailable. Therefore, it may be necessary to perform additional geotechnical services including additional test borings once the structure locations, stormwater management system, proposed grades, and structural loadings are available"***. Preliminary geotechnical explorations are generally intended to screen the site for suitability of the proposed development. Preliminary geotechnical explorations are not intended to be used for final design. The number of soil borings performed for the projects are not adequate for final design and additional soil borings should be performed.

The preliminary explorations did not include geophysical screening of the site for karst geological conditions. Sinkhole risk in Alachua County is mostly related to site elevation. Lower elevation sites in the Gulf Coastal Lowlands and Cody Scarp geological regions have a higher risk for sinkhole development than high elevation sites in the Northern Highlands geological region, and this is due to the separation between land surface and the limestone formation. Sinkholes most commonly develop in stormwater management facilities due to stormwater infiltration eroding soil into fractures and cavities in the limestone formation. Sinkhole risk is reduced in impervious areas, due to the absence of stormwater infiltration.



The site is located near the transition of the Cody Scarp to the Gulf Coastal Lowlands geology. The surface of the limestone formation in this area of Alachua is typically on the order of elevation 60 feet. The ground surface at the location of the stormwater management basin for these projects varies from about elevations 90 to 100 feet. If the basin is excavated 10 feet deep, the separation between the bottom of the basin and the limestone formation is expected to be on the order of 20 feet. We have observed multiple sinkholes develop in stormwater management facilities where the separation between the basin bottom and the limestone formation is on the order of 20 feet.

The City of Alachua has policies that allow for the requirement of geophysical screening in its sole discretion and has required this screening on some projects. GSE considers it prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design. The intent is to evaluate, determine, and consider the actual sinkhole potential risk in these areas. This information would then be considered and incorporated into the final design.

Closure

GSE appreciates this opportunity to provide these engineering services to you on this important matter. If you have any questions, or if we can provide any additional information, please contact us.

Sincerely,
GSE Engineering & Consulting, Inc.

RE: Notice of Hearing to be Scheduled for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On April 1, 2026, the City of Alachua received your revised small-scale Comprehensive Plan amendment and site-specific amendment to the Official Zoning Atlas applications for the Farmlands Commercial project. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been scheduled for the **April 21, 2026,** Planning & Zoning Board meeting.

You must provide two *double sided, three-hole punched, color sets* of **each complete** application package, seven full size sets of PD plans, and a digital copy of all materials in PDF format on a CD or by emailing a Cloud/FTP link to download the materials to planning@cityofalachua.org *no later than 10 business days prior to the Planning & Zoning Board meeting at which your application is scheduled to be heard*; therefore, the above referenced materials must be submitted to the City no later than ***Monday, April 6, 2026***. Materials may be submitted earlier than this date.

Additionally, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing; therefore, posted notice signs must be placed on the property no later than ***Monday, April 6, 2026***. These signs will be ready for pickup after 12:00 PM on Thursday, April 2, 2026. You will be notified again when the signs are available.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

Sincerely,

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On March 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting may be scheduled to review these comments by request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 24, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Pursuant to Resolution 24-05, application fees include two (2) PAT reviews, and the reviews associated with each resubmittal to confirm that comments were addressed. **Please note, if an additional PAT review is required, a surcharge of 25% of the site plan application fee will be assessed for the additional PAT review (original application fee - $12,500; 25% surcharge - $3,125).** You will be notified if an additional PAT review is required, and the surcharge must be paid prior to any further review of the application.

Address the following insufficiencies:

PSSC26-0002 - Farmlands Rezoning
Staff has no additional comments at this time, but reserves the right to provide additional comments at a later date.

PR26-0002 - Farmlands Rezoning

Remaining Deficiencies to be Addressed
** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

4. **Compliance with Land Development Regulations**
   a. Per Table 3.6-3, development standards shall only be modified in ways that are consistent with the general intent and purpose of the PD-COMM district. Every proposed modification must be justified in this light. No justification is provided.
      i. Generally, a modification should only be considered if the proposed modification is unachievable via existing administrative remedies.

      Response: In collaboration with City staff and mindful of staff recommendations, limited modifications have been presented on supplements development and design sheets. The site-specific development and design sheets retain consistency with the City of Alachua's Comprehensive Plan and overall vision, while permitting modest modifications to existing zoning performance standards to achieve a unique and cohesive mixed-use project design.

      Remaining Deficiency: Provide justification.

   c. Per Table 3.6-3, a master parking plan must be provided to modify any parking standards. Provide master parking plan as an additional sheet to the PD Master Plan.

      Response: A Master Parking and Circulation Plan has been provided as a supplement to the application materials. In collaboration with staff, the applicant has creatively and thoughtfully proposed a standard that is mindful of pedestrian-scale needs and places safety at the forefront of design.

      Remaining Deficiency: See Additional Deficiency comments related to Parking Master Plan.

   e. Section 6.4.4(A) already does not apply to architectural lighting. Architectural lighting is governed by Section 6.4.4(B)(4). Remove unnecessary modification.

      Response: None provided.

      Remaining Deficiency: Respond.

g. Section 6.8 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.

Response: Proposed modifications have been removed and a development and design plan sheet has been included in the resubmittal, which outlines achievable performance standards that are consistent with the City's Comprehensive Plan and overall community vision for vibrant walkable non-residential areas in proximity to a variety of housing options. These elements also are designed in a manner that promotes non-motorized access for all citizens.

Remaining Deficiency: See Additional Deficiency comments related to Master Architectural Building Plan.

5. **PD Master Plan**

d. Provide development standards, including minimum setbacks, maximum height, etc., for the PD-COMM area.

Response: The development and design plan sheet contains the requested standards. A note (#16) has been added to the PD Master Plan to indicated that development standards for the PD-COMM area will be found on the separate Parking & Circulation Master Plan sheet.

Remaining Deficiency: Development Standards for the PD-COMM should be included on the PD Master Plan, not on the Parking Master Plan. Provide.

Note 16 references three Parking Master Plan sheets, of which there are only two. Revise.

f. Note 4 refers to a typical roadway section that has not been provided. Provide for review or remove note.

Response: Note #4 is proposed to remain and the requested cross sections can be found; 1) PD-R cross sections on Sheet P200, and 2) PD-COMM cross sections on the separate Parking & Circulation Master Plan sheet.

Remaining Deficiency: See Additional Deficiency comments related to Parking Master Plan.

7. **Miscellaneous**

a. In furtherance of Objective 1.4, Conservation & Open Space Element, among others, and the City's Strategic Plan, Staff proposes a multi-use trail dedication that aligns with the former seaboard airline right-of-way.

Response: The applicant has received Preliminary Plat and Construction Plan approval for the portion of the project referenced above. A trail dedication would be a design conflict with the previous and existing City approvals.

Remaining Deficiency: Staff notes that he Preliminary Plat will need amended to reflect all amendments to the PD; therefore, the Applicant's response regarding previous approval without a trail is moot. Further, the trail could be located within the 20' southern landscape buffer, not affecting lot lines and not resulting in any reduction in lots. Staff will work with the Applicant to ensure that this inclusion does not impede the construction of phase 1 as otherwise previously approved, understanding that grading may need slightly adjusted to account for an 8-foot-wide trail.

Additional Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Parking Master Plan**
   a. Sheet 1 of 2 does not depict the approximate location of the emergency access drive to the residential site on NW 188th Street. Revise.
   b. Sheet 1 of 2. Revise to show development areas as shown on the PD Master Plan (A, B, and C).
   c. Note 1. Revise "Landscape islands are required every 8th single row with a 5' sidewalk" to state "Landscape islands/spines are required every 4th single row with a 5' sidewalk."
      i. Staff is amenable to the following alternative language, provided that increased width and landscape areas are provided. "At a minimum, 12' wide landscape islands/spines are required with a 6' sidewalk such that in no case will a pedestrian be required to cross more than one drive aisle to access a landscape island/spine with a 6' sidewalk."
   d. Note 1. Revise "All parking will be impervious to "Required off-street parking spaces must, at a minimum, be surfaced with structurally adequate asphaltic concrete or concrete surface course. Any off-street parking spaces provided in excess of the minimum requirement may be of an alternative surface material in accordance with Section 6.1.3(E) of the LDRs.
   e. Note 2. The current bicycle parking requirement (assuming a full build-out scenario) would be approximately 148 spaces. A rate of 1 bicycle space per 10,000 square feet would yield a requirement of approximately 45 spaces (less than one-third of the current requirement). A rate of 1 bicycle space per 5,000 square feet may be more appropriate, with a minimum provision for structures under 10,000 square feet, if proper justification can be provided. Revise and provided justification.
   f. Note 4. Does not exist. Renumber notes accordingly
   g. Notes 5-7 do not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
   h. The Development Standards Table does not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
      i. Further, the development areas should be consistent with those shown on the PD Master Plan (A, B, and C).
      ii. Maximum Lot Coverage does not refer to FAR, but rather, impervious surface area. Revise to reflect this standard accordingly.
   i. Driveway Cross Sections. Staff notes 14' and 15' wearing surfaces (per lane) are excessive and can contribute to irresponsible driver behavior. The City only requires 12' wearing surfaces per lane. Additionally, unnecessary lane width will further restrict planting of required landscape materials. Revise, reducing the land width on all driveway cross sections to 12' wearing surfaces.
   j. Sheet 2 of 2. The location of bicycle parking is governed by general note 2 on sheet 1. Remove bicycle parking locations from sheet 2 to reduce possible confusion.
   k. Sheet 2 of 2. Extend the eastern future access stub to the property line.
   l. Sheet 2 of 2. Include the approximate location of the multi-modal connection to the PD-R.

2. **Master Architectural Building Plan**
   a. As previously commented and discussed, only additional requirements to those in Section 6.8 are permitted to be included as part of the PD Master Plan. No deviation of a requirement in Section 6.8 that reduces such requirement is permitted. Staff noted the Master Architectural Building Plan currently does not comply with Section 6.8. Revise or remove from PD Master Plan.
3. **Miscellaneous**
   a. Some future land use maps appear to be older versions of the companion application. Check all future land use maps to ensure they are up to date.
   b. Remove all code alterations at the end of the justification report. If the deviation is not allowed by Table 3.6-3 and not noted on the PD Master Plan, it will not be incorporated into the PD. Justification as to the deviations can still be included in this report.
   c. The applicant is put on notice that, for consistency with Policy 5.1.a of the Community Facilities Element, further geologic testing will be required to be conducted, with the results submitted at time of final PD plan application.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

Sincerely,

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On February 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting is scheduled for **1:30 PM on February 17, 2026** to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 18, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Address the following insufficiencies:

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

PSSC26-0002 – Farmlands SSCPA

1. Needs Analysis
   a. While a needs analysis cannot rely solely on population projections, population projections should still be a factor as Florida Statute still requires a minimum amount of lands for a 10 year planning period be provided in the City. Population projections are available in the City's comp plan. Provide such analysis.
   b. Tables use "UPA" for unit per acre. Please use industry acronym "DUA" for dwelling units per acre. This is also how the City's Comprehensive Plan and Land Development Regulations refer to the standard.
   c. The submitted needs analysis does not consider the highest and best use of the property, which includes residential development as part of a mixed-use development. The development scenario for public facilities impact need not posit residential in the commercial land use, but the needs analysis should.
2. Urban Sprawl Analysis
   a. Staff noted only the 13 primary indicators of urban sprawl were evaluated in full. All eight urban form criteria must be analyzed. Revise analysis and include the eight urban form criteria.
   b. This application does not meet the definition of Infill Development established in the City's Comprehensive Plan, and as such, justification stating it is infill development is not proper justification. Revise response to primary indicator ten.
3. Comprehensive Plan Consistency Analysis
   a. Address Policy 1.3.f of the Future Land Use Element, specifically as it relates to the extension of commercial into residential areas.
   b. Objective 5.1 of the Future Land Use Element states that the City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during the review of proposed amendments to the Future Land Use Map. The response provided states this analysis will occur at a later date. Revise response. The proper analysis must occur at time of Future Land Use Map amendment.
   c. In response to Policy 5.2.a, Future Land Use Element, the Applicant states the land use change will not impact the level of service. In response to Objective 1.1, Transportation Element, the Applicant states the land use will impact the level of service. Ensure all responses are consistent. Revise.
   d. In response to Objective 1.8, Conservation & Open Space Element, the Applicant notes that the "mixed-use development is proposed with residential and commercial uses in nature." Staff is unclear on what this analysis means. Revise and clarify.
   e. The Applicant's response to Objective 1.9, Conservation & Open Space Element, is not relevant to this application. Revise or remove.
   f. The proposed amendment includes residential lands. As such, provide an analysis of the Housing Element, and if relevant, the Recreation Element and Public Schools Element.

4. Concurrency Impact Analysis
    a. The Applicant is put on notice that, consistent with the submitted TIA recommendations, a more detailed analysis will be required to address potential impacts of specific development proposals at time of development of the site. These must include ways to address the level of service of segment 6.
5. Outside Review
    a. Comments from City of Alachua Public Services will be provided at a later date and forwarded as soon as received by the Planning & Community Development Department.
6. Miscellaneous
    a. Staff notes that a Commercial land use category abutting the Low Density Residential land use category is not a logical development pattern and does not provide a transition of the higher intensity use area of up to 0.6 FAR and 15 DUA to the lower intensity use area of just one DUA. Staff recommends either a Community Commercial land use category or a Moderate Density Residential land use category be used as a transitionary land use category between the two use areas. This would also be more similar to the established development pattern of the US 441 Corporate Corridor Activity Center.

PR26-0002 - Farmlands Rezoning

1. Statement of Proposed Change/Existing vs. Proposed Zoning
    a. The summary of change in development potential should consider both FAR and DUA for the business zone districts as the CC and CI districts are mixed-use districts.
    b. Tables use "UPA" for unit per acre. Please use industry acronym "DUA" for dwelling units per acre. This is also how the City's Comprehensive Plan and Land Development Regulations refer to the standard.
2. Comprehensive Plan Consistency Analysis
    a. In response to Policy 5.1.b, Future Land Use Element, the Applicant notes five soil types and six soil types are present on site. Revise to be consistent.
    b. In response to Policy 5.2.a, Future Land Use Element, and Objective 1.1, Transportation Element, the Applicant states the land use will not impact the level of service. The associated TIA suggests a negative impact is possible. Revise and clarify.
    c. In response to Objective 1.8, Conservation & Open Space Element, the Applicant notes that the "mixed-use development is proposed with residential and commercial uses in nature." Staff is unclear on what this analysis means. Revise and clarify.
    d. The Applicant's response to Objective 1.9, Conservation & Open Space Element, is not relevant to this application. Revise or remove.
    e. The proposed amendment includes residential lands. As such, provide an analysis of the Housing Element, and if relevant, the Recreation Element and Public Schools Element.
3. Concurrency Impact Analysis
    a. The Applicant is put on notice that, consistent with the submitted TIA recommendations, a more detailed analysis will be required to address potential impacts of specific development proposals at time of development of the site. These must include ways to address the level of service of segment 6.

4. **Compliance with Land Development Regulations**
   a. Per Table 3.6-3, development standards shall only be modified in ways that are consistent with the general intent and purpose of the PD-COMM district. Every proposed modification must be justified in this light. No justification is provided.
      i. Generally, a modification should only be considered if the proposed modification is unachievable via existing administrative remedies.
   b. Article 4 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.
   c. Per Table 3.6-3, a master parking plan must be provided to modify any parking standards. Provide master parking plan as an additional sheet to the PD Master Plan.
      i. Modifying the standard from one bicycle space per ten off-street parking spaces to one per 40 off-street parking spaces is a four-fold reduction. One per 80 off-street parking spaces is an even greater reduction. The PD-COMM shows pedestrian and bicycle connections to the residential area, and per conversations with FDOT, a multi-use trail will be required along US 441. There is no clear justification as to why a reduction of this degree, with a maximum of only ten bicycle spaces site wide, would be necessary. Staff does not support the modification as proposed.
      ii. No clear justification has been provided to modify Section 6.1.8(B)(3). Staff does not support such change as proposed.
      iii. The purpose of Section 6.1.10 is to ensure that a pedestrian has to cross no more than one drive aisle before reaching a dedicated pedestrian facility. Modifying the standard as proposed would result in pedestrians having to cross two drive aisles and potentially have the pedestrian forgo walking on the pedestrian facility altogether. No clear justification has been provided to modify Section 6.1.10. Staff does not support the change as proposed.
   d. Per Table 3.6-3, an alternative landscape plan must be provided to modify any landscape standards. Provide an alternative landscape plan as an additional sheet to the PD Master Plan.
      i. No clear justification has been provided to modify Section 6.2.2(D)(2)(b) or Section 6.2.2(D)(3). Staff does not support the modification as proposed.
   e. Section 6.4.4(A) already does not apply to architectural lighting. Architectural lighting is governed by Section 6.4.4(B)(4). Remove unnecessary modification.
   f. Per Table 3.6-3, a master sign plan must be provided to modify any signage standards. Provide a master sign plan as an additional sheet to the PD Master Plan.
      i. Staff notes that any change to a sign standard must have a compelling justification in conformance with both the PD-COMM district and the general purposes of Section 6.5. No clear justification has been provided. Staff does not support the proposed modification as proposed.
   g. Section 6.8 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.

5. **PD Master Plan**
   a. Show at least one designated bicycle and pedestrian facility from the eastern most portion of Area B to Area A. Exact location is not necessary, only that there will be a connection.
   b. Provide DUA figures in the Land Use Data Table.
   c. The Land Use Data Table note states "land use areas are approximate and may be adjusted." Revise to note that they cannot be adjusted limitlessly.
   d. Provide development standards, including minimum setbacks, maximum height, etc., for the PD-COMM area.
   e. Note three only references PD-R. Revise to include PD-COMM.
   f. Note 4 refers to a typical roadway section that has not been provided. Provide for review or remove note.
   g. Note 13 should require a 20' easement with a 10' sidewalk. Revise.
   h. The City will not permit any private signage in a public-right-of-way. Remove or revise Note 16.
6. **Outside Review**
   a. Comments from City of Alachua Public Services will be provided at a later date and forwarded as soon as received by the Planning & Community Development Department.
7. **Miscellaneous**
   a. In furtherance of Objective 1.4, Conservation & Open Space Element, among others, and the City's Strategic Plan, Staff proposes a multi-use trail dedication that aligns with the former seaboard airline right-of-way.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

RE: Completeness Review for Farmlands Commercial Small-Scale Comprehensive Plan Amendment (SSCPA) and Amendment to the Official Zoning Atlas (Rezoning)

Dear Clay Sweger & Gerry Dedenbach,

On February 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that **the applications are now complete**.

An in-depth review of the content of the applications will now be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be sent under separate cover.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

Sincerely,

RE: Completeness Review for Farmlands Commercial Small-Scale Comprehensive Plan Amendment (SSCPA) and Amendment to the Official Zoning Atlas (Rezoning)

Dear Clay Sweger & Gerry Dedenbach,

On January 26, 2026, the City of Alachua received your applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

According to Section 2.2.6 of the City's Land Development Regulations, a completeness review shall be conducted upon receipt of the applications to determine that the applications contain all the necessary information and materials, are in proper form and of sufficient detail, and are accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned applications for completeness and finds that **the applications are incomplete**. The following deficiencies must be addressed to begin review of the applications. The deficiencies must be addressed no later than **5:00 PM on Thursday, February 5, 2026** to remain on the April Planning & Zoning Board review schedule.

In accordance with Section 2.2.6(B) of the City's Land Development Regulations, the applicant must correct the deficiencies and resubmit the application for completeness determination. *Plans and application materials may be made available for return in order to revise and resubmit as needed.*

The time frame and cycle for review shall be based upon the date the applications are determined to be complete. If the applicant fails to respond to the identified deficiencies within 45 calendar days, the applications shall be considered withdrawn (*, 2025*).

Please note that if an additional completeness review is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the applications.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the content of the application will be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be scheduled after the application is determined to be complete.

PSSC26-0002 - Farmlands SSCPA

1. **Submission Requirement, Electronic Materials** – Per the City's submission requirements, in addition to three printed copies, all materials must be submitted in digital (PDF) format: on a CD or by emailing a cloud/FTP link. Only some electronic materials were received electronically. Provide all materials electronically.

2. **Application Attachment #11, Proof of Payment of Taxes** – Proof of payment of taxes was submitted up through the year 2024. Provide proof of payment of taxes for 2025.

PR26-0002 - Farmlands Rezoning

1. **Submission Requirement, Electronic Materials** – Per the City's submission requirements, in addition to three printed copies, all materials must be submitted in digital (PDF) format: on a CD or by emailing a cloud/FTP link. Only some electronic materials were received electronically. Provide all materials electronically.

2. **Application Attachment #11, Proof of Payment of Taxes** – Proof of payment of taxes was submitted up through the year 2024. Provide proof of payment of taxes for 2025.

Memorandum

Date: August 19, 2026

To: Patrice Boyes, Esq., Holtzman Vogel

From: M.C. Alfieri, P.G., P.Hg., CGWP

Regarding: Technical Review for August 24, 2026 Land Use Designation Hearing Regarding Alachua Farmlands, Alachua, Alachua County, Florida

Digitally signed by Michael Alfieri
DN: cn=Michael Alfieri ou=Users e=Michael.Alfieri@apexcos.com
Location:
Date: 2026-08-19 11:55-04:00

Executive Summary

Apex Companies, LLC (Apex) was retained by the City of Alachua (City) through Holtzman Vogel Baran Torchinsky & Josefiak PLLC (Client/Holtzman Vogel) to conduct an independent professional geologic review of technical information and Ordinance conditions associated with the proposed Alachua Farmlands Land Use and Zoning Applications. The review focused on the impact of the proposed Alachua Farmlands Land Use and Zoning with the local karst system and whether the available information and Ordinance conditions provide reasonable assurance that karst features will not be adversely affected by the proposed land use designation and re-zoning, while meeting environmental requirements set by the City. Apex reviewed geotechnical investigations, geophysical studies, historical aerial photography, City Staff Reports, landfill monitoring reports, and supporting technical correspondence provided by both the City and the Applicant.

Based on the information reviewed, the site is underlain by karst geology typical of Alachua County; however, the available data do not indicate the presence of active sinkhole activity. Multiple phases of geotechnical drilling, laboratory testing, and geophysical investigations conducted by licensed engineering professionals identified no evidence of contemporaneous raveling, progressive subsurface weakening, or other indicators commonly associated with active sinkhole formation. The depressional feature identified on the property is most consistent with a stable paleo sinkhole, supported by subsurface data and historical aerial photography demonstrating little to no change in the feature since at least 1937. Independent review by GSE Engineering & Consulting similarly concluded that the site appears suitable for the proposed development, while recommending additional site-specific investigations during final design to further evaluate stormwater management areas and potential karst risks.

Apex generally concurs that the investigations completed to date provide reasonable assurance that identified karst features are not currently exhibiting active sinkhole behavior and that the proposed land use designation and zoning do not present evidence that karst features will be adversely affected. Nevertheless, additional geotechnical and karst hydrogeologic evaluations during final development design and permitting may be appropriate and would be consistent with standard engineering practice in karst terrain, as Staff's Condition No. 5.i.ii provides.

Concerning the former Northwest Alachua County Landfill, the County requested a condition to the re-zoning requiring the "*submittal of an appropriate engineering and environmental study demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent landfill or the extent, movement, or management of the existing groundwater contamination plume.*" The Applicant agreed to this request and indicated that the scope and timing of the study

will be coordinated between the Applicant and Alachua County. The scope of the study at the time of development plan review will be important to sort out which property is downgradient of any plume.

Introduction

Apex was retained to provide Professional Geologic review of technical data associated with the land use and zoning applications for Alachua Farmlands. Apex focused on potential impacts to the karst system in compliance with City of Alachua Land Development Codes and relevant provisions of the City of Alachua Comprehensive Plan. Apex was tasked with reviewing relevant geologic data, submitted documents (i.e., staff reports, applications, supporting documentation, record evidence) and preparing a brief technical memorandum summarizing the geologic data, its relevance in respect to karst, and whether in our professional geologic opinion reasonable assurances have been provided to demonstrate karst features will remain unaffected by the proposed land use and zoning. The scope of services provided is based on decades of experience as scientific investigator and published lead and/or co-author to numerous peer-reviewed journal articles and conference proceedings related to karst science.

Data Compilation and Review

Project data has been provided by the City of Alachua and the Applicant as follows:

Rise Partners/NV5 (2026) Historical Aerials (1937-2026).

Summary of Site-Specific Data Review

December 2025 and March 2026 UES Geotechnical Evaluations

Geotechnical investigations completed by UES Professional Solutions, LLC (UES) in December 2025 and March 2026 were overseen by two Florida Licensed Professional Engineers, who specifically practice geotechnical engineering, with reports officially signed and sealed per Florida law. These two reports focused on the suitability of the site for future land use (i.e., commercial/retail development). UES completed a review of readily available geologic and geotechnical data and literature references, completed thirty-five (35) geotechnical borings in 2025 and an additional twenty-five (25) geotechnical borings in 2026. The borings were completed to depths ranging from 10 to 40 feet below land surface in the proposed footprint of buildings, parking lots, and stormwater management areas. The UES reports indicate the geotechnical borings were completed in accordance with ASTM D1586.

UES also collected geologic samples during the geotechnical boring phase of the evaluations and completed the following geotechnical laboratory analyses: (a) forty-three (43) Wash #200 fines content determinations (in accordance with ASTM D1140); (b) six (6) Grain Sieve Analysis tests (in accordance with ASTM D-422); (c) ten (10) Atterberg Limits Tests (in accordance with ASTM D4318-05); (d) forty-nine (49) moisture content tests (in accordance with ASTM D-2216); (e) thirteen (13) Laboratory Permeability Tests (in accordance with ASTM D-2434); (f) three (3) Limerock Bearing Ratio (LBR) tests (in accordance with Florida Department of Transportation FM-515); (g) two (2) organic content tests (in accordance with ASTM D2974); (h) two (2) corrosion series; (i) one (1) topsoil series; and (j) one Modified Proctor Test (in accordance with ASTM D1557). Additionally, UES completed two (2) double ring infiltrometers within the footprint of the proposed stormwater management areas to assess percolation rates for the proposed system.

Apex has reviewed all geological logs and geotechnical laboratory reporting provided in the reports. Our findings are highlighted below:

- The data collected at shallow boring locations were completed to determine geotechnical suitability, while the deep boring locations were completed to evaluate the stratigraphy of the property.
- Evidence of contemporaneous raveling was <u>not</u> identified in the SPT data collected and presented by UES in the December 2025 and March 2026 geotechnical reports.

  - Used in industry practice, Florida Statute 627.706(2)(h) and (i) define the following:
    (h) "Sinkhole" means a landform created by subsidence of soil, sediment, or rock as underlying strata are dissolved by groundwater. A sinkhole forms by collapse into subterranean voids created by dissolution of limestone or dolostone or by subsidence as these strata are dissolved.
    (i) "Sinkhole activity" means settlement or systematic weakening of the earth supporting the covered building only if the settlement or systematic weakening results from contemporaneous movement or raveling of soils, sediments, or rock materials into subterranean voids created by the effect of water on a limestone or similar rock formation.
- Groundwater was encountered in some, but not all, SPT borings completed. In locations where the water table was identified, it appears to be perched on clay-rich sediments, which is common.
  - Soil mottling was used by the geotechnical engineers to determine the seasonal high-water levels at the project site.
- Atterberg Limits testing (ASTM D4318) indicates that the clays are not in a flowable state at the property.
  - Testing completed by UES indicates that expansive clays are not present near surface and within the footprint of the proposed project; however, UES indicates that if during construction expansive clays are identified, geotechnical design modifications to footings will be made accordingly.
  - While clay does not ravel due to the properties of the clay minerals comprising the material, if moisture contents are elevated placing the clay in a flowable state and if void space is available, flowing clays can contribute to the formation of sinkholes.

April 2026 GSE Geotechnical Review of December 2025 and March 2026 UES Geotechnical Evaluations

GSE Engineering & Consulting, Inc. (GSE) was retained by the City of Alachua to review the December 2025 and March 2026 UES Geotechnical Evaluations. This was completed by a Florida Licensed Professional Engineer, who specifically practices geotechnical engineering, with the letter officially signed and sealed per Florida law. GSE concluded that the site appears generally suitable for the proposed commercial and residential development, but the geotechnical investigations completed by UES are only preliminary in nature and are not sufficient for final design. GSE notes a data gap related to karst conditions and sinkhole risk beneath proposed stormwater facilities. GSE recommends additional subsurface characterization and geophysical investigations during the final design phase to better evaluate and mitigate the potential risk.

June 2026 UES Limited Sinkhole Potential Evaluation

A supplemental geotechnical investigation was completed by UES in June 2026 and was overseen by two Florida Licensed Professional Engineers, who specifically practice geotechnical engineering, with reports officially signed and sealed per Florida law. The investigation focused on an observed depressional feature within the project site. While not specifically stating, it is unclear if this work was completed based on the GSE review discussed above, or if this was a proactive decision by the Applicant.

UES completed another literature review, completed a geophysical survey consisting of thirteen (13) ground penetrating radar (GPR) traverses and two (2) electrical resistivity imaging (ERI). Geohazards, a UES Company (Geohazards) was retained by UES to complete this limited sinkhole evaluation. While no anomalies were identified during the GPR traverses, Geohazards did identify two (2) ERI anomalies. Apex has reviewed the ERI data provided within the report and find the modeling results to be acceptable (i.e., Root Mean Square Error

[RMS] under 10 percent). Geohazards recommended geotechnical testing of the observed ERI anomalies for confirmation of the observed features.

UES completed two SPT borings (in accordance with ASTM D1586) to evaluate the geophysical anomalies. Boring B-1 was completed within the heart of the ERI anomalies, while boring B-2 was completed outside of the identified ERI anomalies. The geologic logs do not indicate evidence of contemporaneous raveling. Clay rich sediment overlaying the limestone was not indicated to be in a flowable state and more than likely contributed to the loss of signal with the GPR evaluation. The discrete drop in penetration resistance between sand-rich sediment and underlying clay-rich sediment is also a normal occurrence and does not constitute a progressive weakening of sediments with depth. While not synonymous with a sinkhole or sinkhole activity per the Florida Statutes, the variable depth to the top of limestone appears to indicate a paleo-chimney sinkhole at this location. The loss of drilling fluid at the epikarst, the ancient erosional surface of the limestone, is a common occurrence with mud rotary drilling and, in this case, is not indicative of active sinkhole formation. While paleo sinkholes can reactivate under the right conditions, the June 2026 SPT data indicates that this is not the case.

1937 to 2026 Aerial Photography Provided by NV5

Apex reviewed the aerial photography presented by NV5. The figures provided focused on the depressional feature investigated by UES in June 2026. While the depressional feature is observed in each of the time periods presented, the relative shape and size has not significantly changed since 1937 (approximately 90 years). This provides another line of evidence for the paleo sinkhole and lack of reactivation.

Summary of Off-Site-Specific Data Review

June 2026 Alachua County Northwest Landfill Report by Jones Edmunds

The June 2026 Jones Edmunds & Associates, Inc. (Jones Edmunds) Alachua County Northwest Landfill report was provided was provided by both the City and the Applicant. Our findings are highlighted below:

- The groundwater sampling was completed on January 6, 7, 8, 19, and 20 and February 5, 2026.
    - Monitor well schematics were not identified in the report. It is unclear as to what aquifer is specifically being monitored.
    - Laboratory data indicates pH, TDS, Iron, Manganese, 1,2-Dibromoethene, 1,2-Dichloropropane, Trichloroethene, and Vinyl Chloride concentrations were at or outside Florida Department of Environmental Protection (FDEP) groundwater standards.
- Groundwater elevation data used to prepare the groundwater contour map was on January 6, 2026.
    - As presented, groundwater flow on site is westerly at a gradient of approximately $1x10^{-4}$-feet per foot then doglegs to the north at a gradient of approximately $2x10^{-3}$-feet per foot.
        - This is based on nine (9) monitor wells located on the landfill property boundary and numerous off-site wells and appears to be generated from Surfer (Golden Software version unknown) or another data contouring program and imported into AutoCAD.
        - The dogleg north is attributed to one measurement at the northwestern-most monitor on the landfill property boundary.
        - The groundwater elevation map is drawn with 0.5-foot contour intervals, but there are no notes as to the accuracy of the water level indicator used in the study.

July 2026 Letter from Applicant to Alachua County Regarding Affected Party Status

In correspondence between the City and Alachua County, Alachua County requested a condition to the re-zoning requiring the "*submittal of an appropriate engineering and environmental study demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent landfill or the extent, movement, or management of the existing groundwater contamination plume.*" The Applicant agreed to this request and indicated that the scope and timing of the study will be coordinated between the Applicant and Alachua County. The scope of the study at the time of development plan review will be important to sort out the which property is downgradient of any plume.

Discussion of Ordinances and Proposed Conditions

City of Alachua Zoning Ordinance 26-10

This ordinance, if adopted on Second Reading, would re-zone approximately 182 acres known as the "Farmlands Planned Development" from Community Commercial (CC), Commercial Intensive (CI), and existing Planned Development Residential (PD-R) zoning to a combination of PD-R and Planned Development Commercial (PD-COMM). The ordinance authorizes a mixed-use development consisting of up to 203 single-family residential units and up to 454,000 square feet of commercial development, to be built in as many as five phases over a 10-year period.

Conditions to the Ordinance would establish detailed development standards addressing transportation, utilities, stormwater management, environmental protection, landscaping, open space, pedestrian connectivity, parking, and infrastructure requirements, including extensive geotechnical and karst evaluations, groundwater protection measures, species surveys, and coordination with applicable regulatory agencies. On First Reading, the City Commission found the Application consistent with the City's Comprehensive Plan and Land Development Regulations.

Apex has reviewed the Environmental Conditions to Zoning Ordinance 26-10 and provides the following comments:

- The required geotechnical and karst evaluations in Condition 5.i.ii, as drafted by Staff, are appropriately timed to occur at Final PD Development Plan Review, which is better aligned for later efforts regarding the actual development of the project site, not the land use and re-zoning stage.
- The text added by the Commission at First Reading (to include the "*geologic requirements outlined in the letter sent to Patrice Boyes on December 23, 2025, by Michael Alfieri, P.G., on behalf of Apex Comp*anies") is not appropriate at this juncture. These requirements were developed for a specific project based on those site conditions, available data, and identified geologic concerns at that location. Given the variability of subsurface conditions across different properties, automatically imposing the same geological/geophysical/geotechnical requirements on unrelated properties is not appropriate or technically defensible. Geologic and geotechnical investigation programs should be developed using a site-specific, risk-based approach that reflects the unique characteristics of a proposed project and property.

City of Alachua Land Use Designation Ordinance 26-09

Objective 1.7: Geological Resources The City shall identify, protect and conserve significant geological resources and their natural function.

Policy 1.7.a: The City shall work with the Florida Geological Survey (FGS), Florida Department of Environmental Protection (FDEP), Suwannee River Water Management District, and the Alachua County Environmental Protection Department, to identify and map significant geological resources, including karst features such as sinkholes, caves, and entire stream to sink basins. Significance of a feature should reflect its potential contribution to the area's network of natural resources.

Policy 1.7.b: The City may utilize FGS Florida Aquifer Vulnerability Assessment (FAVA) maps, in conjunction with site-specific data, when available, to determine karst related aquifer contamination potentials. The City may utilize the FAVA map created specifically for Alachua County.

Policy 1.7.c: The City shall prepare an emergency management plan to address the opening of a sinkhole when it poses a threat to public infrastructure, and the public's health, safety or welfare.

Policy 1.7.d: The City shall review the possibility of acquiring and managing, when feasible, unique geological features and their surrounding natural areas. If a subject feature is privately owned, the City shall encourage the owner to create a management plan in cooperation with the appropriate agencies, and investigate the possibility of acquiring and preserving the surrounding property.

Policy 1.7.e: The City shall utilize regulatory and stewardship techniques to ensure that stormwater, wastewater and landscaping practices do not negatively impact the structural integrity, hydrology, biodiversity and other natural functions of significant geologic resources.

Apex generally concurs that the investigations completed to date support the suitability of the property for the proposed land use amendment from a geologic and karst perspective. However, consistent with standard engineering practice in karst terrain, additional site-specific geotechnical and hydrogeologic evaluations should continue during final development design and permitting to support the stormwater management system design, foundation recommendations, and other project-specific engineering considerations. Such evaluations are customary and represent an appropriate progression from preliminary planning to detailed design.

City of Alachua Planning & Community Development Department (April 21, 2026) Staff Report: Quasi-Judicial Hearing Application #: PR26-0001

Apex reviewed the Staff Report, which recommended the approval of Zoning Ordinance 26-10 with Conditions (Application PR26-0002). The proposal would modify the existing zoning framework by retaining a residential component of 203 single-family dwelling units, while creating a new planned commercial development district allowing up to 450,000 square feet of non-residential development. Apex focused specifically on the environmental analysis in the Staff Report for purposes of this Technical Memorandum. Apex concluded that the Staff Report provides the City Commission with a technical basis to consider approval of the re-zoning.

Apex provides the following comments:

- On page 43 of the PDF document indicates working with the Suwannee River Water Management District (SRWMD) and the FDEP criteria for karst stormwater management system design. This should be site specific and focused on the stormwater management system.
- On page 49, there is a common misnomer under "Karst-Sensitive Features". As written, "*karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.*" There are no underground streams, rivers, or oceans. Water can be transported via conduits with the limestone and can capture water from streams

and rivers via swallets/sinkholes (referred to as stream piracy), but these are not "underground streams". Karst features are the result of non-uniform dissolution of carbonates (or similar rock types). For example, the rates of dissolution and weathering are not uniform and can result nonuniform peaks and valleys in the limestone surface and/or variable sized dissolution "holes" (i.e., vugs, conduits, caves) in the rock.

Conclusions

Apex generally concurs that the investigations completed to date support the suitability of the site for the proposed land use and rezoning from a geologic and karst perspective. Nevertheless, additional geotechnical and karst hydrogeologic evaluations during final development design and permitting may be appropriate and would be consistent with standard engineering practice in karst terrain, as Staff's Condition No. 5.i.ii provides. Such evaluations are customary and represent an appropriate progression from preliminary planning to detailed design.

Based on Apex's review of the materials provided, the project site is underlain by karst geology typical of north-central Florida; however, the data reviewed do not indicate the presence of active sinkhole activity on the property. Multiple phases of subsurface exploration, laboratory testing, geophysical surveys, and supplemental sinkhole evaluations completed under the supervision of licensed geotechnical professionals did not identify evidence of contemporaneous raveling, progressive subsurface weakening, or other indicators commonly associated with active sinkhole formation. Furthermore, the depressional feature evaluated by UES appears most consistent with a stable paleo sinkhole, a conclusion supported by geotechnical data, geophysical testing, and historical aerial photography demonstrating little to no change in the feature over approximately 90 years.

Concerning the former Northwest Alachua County Landfill, the County requested a condition to the re-zoning requiring the "*submittal of an appropriate engineering and environmental study demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent landfill or the extent, movement, or management of the existing groundwater contamination plume.*" The Applicant agreed to this request and indicated that the scope and timing of the study will be coordinated between the Applicant and Alachua County. The scope of the study at the time of development plan review will be important to sort out the which property is downgradient of any plume.

City of Alachua
Comprehensive Plan Amendment Application

☐ **Large** Scale Comprehensive Plan Amendment (greater than 10 acres)

☑ **Small** Scale Comprehensive Plan Amendment (10 acres or less)

NOTE: It is the burden of the applicant to be familiar with the requirements of Chapter 163, Florida Statutes, which are related to Comprehensive Plan Amendments. Requirements for Comprehensive Plan Amendments may change with each Legislative Session. Please contact the Planning and Community Development Department if you need assistance with locating this information.

A. PROJECT

1. Project Name: Farmlands
2. Address of Subject Property: 16600 block of US Highway 441
3. Parcel ID Number(s): 03046-003-000 (portion of), 03042-050-004 and 03042-050-005 (portion of)
4. Existing Use of Property: Undeveloped / Tree Farm
5. Existing Future Land Use Map Designation: Community Commercial, Moderate Density Residential and Low Density Residential
6. Proposed Future Land Use Map Designation: Commercial, Community Commercial & Moderate Density Residential
7. Acreage: 46.7 (+/)

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☒ Agent
2. Name of Applicant(s) or Contact Person(s): Clay Sweger, AICP, LEED AP Title: Director of Planning
   Company (if applicable): eda consultants, inc.
   Mailing address: 720 SW 2nd Avenue, Suite 300, South Tower
   City: Gainesville State: FL ZIP: 32601
   Telephone: ( )352-373-3541 FAX: ( ) N/A e-mail: csweger@edafl.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): See attached list of property owners.
   Mailing Address: _____
   City: _____ State: _____ ZIP: _____
   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☒ Yes ☐ No
   If yes, list names of all parties involved: Current property owners & Rise Development
   If yes, is the contract/option contingent or absolute? ☒ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change and maps which illustrate the proposed change.
2. Urban Sprawl Analysis which evaluates as to whether the plan amendment incorporates a development pattern or urban form that achieves four or more of the following eight criteria:

   (I) Directs growth and development to areas of the community in a manner that does not adversely impact natural resources;
   (II) Promotes the efficient and cost effective provision or extension of public infrastructure and services;
   (III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that support a range of housing choices and a multimodal transportation system;
   (IV) Promotes conservation of water and energy;
   (V) Preserves agricultural areas and activities;

(VI) Preserves open space and natural lands and provides for public open space and recreation needs;
(VII) Creates a balance of land uses based on demands of residential population for the nonresidential needs of an area; and,
(VIII) Provides uses, densities and intensities of use and urban form that would remediate an existing or planned sprawl development pattern or provides for an innovative development pattern such as transit oriented development or new towns.

3. Concurrency Impact Analysis which considers the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.

4. Needs Analysis which demonstrates the necessity for the proposed increase in the proposed Future Land Use Map Designation. This analysis may consist, in whole or part, of a market impact study or real estate needs analysis.

5. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

6. A current aerial map of the property (may be obtained from the Alachua County Property Appraiser).

7. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

8. If the application includes any Future Land Use Map Designation which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. **A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.**

PUBLIC SCHOOL STUDENT GENERATION CALCULATION FORM

PROJECT # | **APPLICATION DATE** Oct. 30, 2025

NAME & DESCRIPTION OF PROJECT Farmlands Planned Development - CPA

A proposed land use map change that reduces the maximum permitted density from 275 to 20

PROJECT ADDRESS (Contact 911 Addressing @ 352.338.7361) 16600-18800 block of US Hwy 441

A future land map change that will result in a net reduction of 72 units (from 275 to 203).

Tax Parcel Numbers 03046-003-000 (portion of), 03042-050-004, 03042-050-005 (portion of)

Acreage 46.7 +/-

DEVELOPMENT DATA (check all that apply)

☑ Single Family — Number of Units -72

☐ Multi Family — Number of Units

☐ Exempt (See exemptions on page 2)

Level of Review

☐ Pre-Application Conference ☐ Preliminary ☐ Final ☐ Revised ☐ Staff Administrative Review

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

SCHOOL CONCURRENCY SERVICE AREAS (SCSA)

Elementary Northwest Alachua | **Middle** Mebane | **High** Santa Fe

SINGLE FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY	-72	**units X 0.12 Elementary School Multiplier**	-9	**Student Stations**
MIDDLE	-72	**units X 0.06 Middle School Multiplier**	-5	**Student Stations**
HIGH	-72	**units X 0.09 High School Multiplier**	-7	**Student Stations**

MULTI FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY		**units X 0.06 Elementary School Multiplier**		**Student Stations**
MIDDLE		**units X 0.03 Middle School Multiplier**		**Student Stations**
HIGH		**units X 0.03 High School Multiplier**		**Student Stations**

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

THIS QUIT-CLAIM DEED,
executed this 8th day of June 2022, by

KEVIN L. CARTER and SHIMA CARTER, husband and wife,

whose address is 7853 Gunn Highway, Tampa, FL 33626
Grantor, to

JTFA, LLC, a Florida limited liability company,

whose address is 4881 NW 8th Avenue, Suite 4, Gainesville, FL 32605
Grantee:

WITNESSETH, that the said Grantor, for and in consideration of the sum of Ten and No/100 Dollars ($10.00), in hand paid by the said Grantee, the receipt whereof is hereby acknowledged, does hereby remise, release and quit-claim unto the said Grantee forever, all the right, title, interest, claim and demand which the said Grantor has in and to the following described lot, piece or parcel of land, situate, lying and being in the County of Alachua, State of Florida, to wit:

See Exhibit A attached hereto.

SUBJECT TO easements and restrictions of record, if any;
SUBJECT TO Taxes for 2022 and all subsequent years;
Tax Parcel #s: 03042-050-004, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004 & 03046-003-005

Note to Auditor: Documentary stamp tax paid on 40% of the value of the properties as Grantors own a 60% interest in Grantee.

TO HAVE AND TO HOLD the same together with all and singular the appurtenances thereunto belonging or in anywise appertaining, and all the estate, right, title, interest, lien, equity and claim whatsoever of the said Grantor, either in law or equity, to the only proper use, benefit and behalf of the said Grantee forever.

IN WITNESS WHEREOF, the said Grantor has signed and sealed these presents the day and year first above written.

Signed, sealed and delivered
in our presence as witnesses:

Warranty Deed

This Warranty Deed made this **14th** day of **August, 2019** between **GOLDEN POND FARMS, INC., a Florida corporation** whose post office address is **P.O. Box 357133, Gainesville, FL 32635**, grantor, and **JTFA LLC, a Florida limited liability company** whose post office address is **4881 N.W. 8th Ave., Ste. 4 , Gainesville, FL 32605**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Alachua County**, **Florida** to-wit:

A tract of land lying in Sections 8 and 17, Township 8 South, Range 18 East, Alachua County, Florida, being more particularly described as follows:

Commence at the Southwest corner of said Section 8 and thence run N 87°26'55" E along the South line of said Section 8, a distance of 50.03 feet to the East right-of-way line of NW 188th Street and the POINT OF BEGINNING; thence continuing N 87°26'55" E along said South line, a distance of 1265.99 feet to the West line of the East Half of the Southwest 1/4 of said Section 8; thence run N 05°57'06" W, along said West line, a distance of 1355.00 feet; thence run N 88°18'49" E, a distance of 1323.39 feet; thence run S 05°28'46" E, a distance of 2646.72 feet to the South line of the North Quarter of Section 17, Township 8 South, Range 18 East; thence run S 87°27'46" W, along said South line, a distance of 563.44 feet to the centerline of Old Railroad 200 foot right-of-way, being the point of curvature of a non-tangent curve, concave to the Northeast, having a radius of 1903.25 feet, a central angle of 26°22'58", and a chord distance of 868.66 feet and bearing of N 47°05'05" W; thence run Northwesterly along said curve, an arc distance of 876.38 feet to the Point of Tangency of said curve; thence run N 33°53'26" W, along said centerline, a distance of 387.32 feet to the East line of the Northwest 1/4 of the Northwest 1/4 of said Section 17; thence run S 03°10'53" E, along said East line, a distance of 167.35 feet; thence run S 87°25'30" W, a distance of 1199.80 feet; thence run N 82°03'26" W, a distance of 64.91 feet to the aforesaid East right-of-way line of NW 188th Street; thence run N 03°27'31" W, along said right-of-way line, a distance of 516.55 feet to the Point of Beginning.

Containing 88.98 acres, more or less.

Parcel Identification Number: 03875-001-000, 010-001, 010-002;03042-050-005

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

DoubleTime®

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2018**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

A PARCEL OF LAND LYING IN SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA; THENCE NORTH 05°01'08" WEST, ALONG THE WEST LINE OF SAID SECTION 8, A DISTANCE OF 2816.61 FEET TO THE SOUTHERLY RIGHT-OF-WAY LINE OF US HIGHWAY NO. 441 (STATE ROAD NO. 20 & NO. 25) (200 FOOT WIDE RIGHT-OF-WAY); THENCE SOUTH 77°51'19" EAST, ALONG SAID SOUTHERLY RIGHT-OF-WAY LINE, A DISTANCE OF 2262.99 FEET TO THE NORTHWEST CORNER OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4819, PAGE 1614, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA; THENCE SOUTH 04°15'41" EAST, A DISTANCE OF 944.88 FEET TO THE SOUTHWEST CORNER OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4819, PAGE 1614, SAID CORNER ALSO BEING ON THE NORTH LINE OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, OF SAID PUBLIC RECORDS; THENCE NORTH 89°31'39" EAST, ALONG SAID NORTH LINE OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, A DISTANCE OF 491.11 FEET TO THE SOUTHEAST CORNER OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4819, PAGE 1614, SAID CORNER ALSO BEING THE NORTHEAST CORNER OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727; THENCE SOUTH 04°14'37" EAST, ALONG THE EAST LINE OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, A DISTANCE OF 129.71 FEET; THENCE SOUTH 86°48'45" WEST, A DISTANCE OF 198.97 FEET TO THE POINT OF BEGINNING; THENCE CONTINUE SOUTH 86°48'45" WEST, A DISTANCE OF 488.75 FEET; THENCE SOUTH 03°11'15" EAST, A DISTANCE OF 279.72 TO A POINT OF CURVATURE OF A CURVE CONCAVE TO THE WEST WITH A RADIUS OF 605.00 FEET; THENCE SOUTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 26°32'59", A DISTANCE OF 280.34 FEET TO AN INTERSECTION WITH A NON-TANGENT LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 10°05'15" WEST, 277.84 FEET); THENCE NORTH 86°48'45" EAST, A DISTANCE OF 562.69 FEET; THENCE NORTH 04°14'37" WEST, A DISTANCE OF 550.24 FEET TO THE POINT OF BEGINNING.

CONTAINING 6.37 ACRES, MORE OR LESS.

NOTICE OF NEIGHBORHOOD WORKSHOP

Date: Wednesday, September 24, 2025

Time: 6:00 p.m.

Place: Legacy Park Multipurpose Center - Meeting Room 1
15400 Peggy Road, Alachua, Fl 32615

Contact: eda consultants, inc.
(352) 373-3541
permitting@edafl.com

A neighborhood workshop will be held to discuss proposed future land use map changes for all or a portion of 3 tax parcels (03046-003-000, 03042-050-005, and 03042-050-004) from Community Commercial, Low Density Residential and Moderate Density Residential to Commercial and from Low Density Residential to Moderate Density Residential and a rezoning from Community Commercial (CC) and PD-R to Commercial Intensive (CI). There is also a proposed Planned Development – Residential (PD-R) zoning amendment application on all or portions of 10 tax parcels (03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03042-050-005, 03875-001-001, 03875-010-001 & 03875-010-002). These properties are generally located in the 16600 block of US Highway 441 (south side). This is not a public hearing. The purpose of this meeting is to inform members of the public of the proposal and to seek their comments.

PUBLIC NOTICE

Neighborhood Meeting – Alachua Solar I Project

Alachua Solar I, LLC invites the public to attend a Neighborhood Meeting to discuss the proposed Alachua Solar I project, a planned 7.0 MW DC / 5.0 MW AC ground-mounted solar energy facility to be located on approximately 38 acres located at the City of Alachua Wastewater Treatment Plant property.

The purpose of the Neighborhood Meeting is to provide nearby property owners and interested members of the public an opportunity to:
- Learn more about the proposed solar project;
- Ask questions directly to the project representatives;
- Provide early input and feedback on the development.

Meeting Details:
- Date: Thursday, September 18th, 2025
- Time: 5:00 PM to 7:30 PM
- Location: 13302 Progress Blvd. Alachua, FL 32615 (Project Site)

This meeting is intended to encourage open communication between the project stakeholders, nearby property owners, and the community. The Neighborhood Meeting provides an important opportunity for early public involvement and discussion.

For more information, or if you need special assistance, please contact:
Craig Fisher
Alachua Solar I, LLC
Phone: (305) 773-6993
Email: craig@morenienergy.com

ALACHUA COUNTY TODAY

Published Weekly
Alachua, Alachua County, FLORIDA

STATE OF FLORIDA
COUNTY OF ALACHUA:

Before the undersigned authority personally appeared **Bryan Boukari**, who on oath and in my physical presence says that he is the Manager of *Alachua County Today*, a weekly newspaper published at Alachua in Alachua County, Florida; that the attached copy of advertisement, **eda consultants – Neighborhood Workshop Notice - Farmlands Commerical LUC-ZON**, being a Public Notice in the Matter set forth at the beginning of the attached notice, was published in said newspaper in the issue(s) dated **September 4, 2025**.

Affiant further says that the website or newspaper complies with all legal requirements for publication in chapter 50, Florida Statutes. More specifically, *Alachua County Today* is a newspaper published at Alachua, in said Alachua County, Florida, and that the said newspaper has heretofore been continuously published in said Alachua County, Florida, each week and has been entered as periodicals matter at the post office in Alachua, in said Alachua County, Florida, for a period of one year next preceding the first publication of the attached copy of advertisement; and affiant further says that he (she) has neither paid nor promised any person, firm or corporation any discount, rebate, commission or refund for the purpose of securing this advertisement for publication in the said newspaper.

Sworn to and subscribed before me this **6th day of September 2025** by Bryan Boukari, who is personally known to me.

(Signature of Affiant)

Neighborhood Meeting Minutes

Project: Farmlands Commercial Land Use Change & Rezoning

Meeting Date & Time: September 24, 2025 at 6:00 p.m.

Community Participants: 12 participants in total (2 did not sign in)

Project Representatives: Clay Sweger, AICP, LEED AP – eda
Stephanie Sutton – eda
Ashley Scannella – eda
Sam Berry – Rise
Matt Phillips – Rise
Keith Lerner – Property Owner
Gerry Dedebach – NV5

Meeting Minutes:

The meeting was conducted open-house style. There were project representatives stationed throughout the room, with printed graphics on posters. As community participants arrived, they circulated throughout the room and asked questions about the proposed action. Below is the collected feedback from participants.

Q: What is the acreage of the subject property?
A: As shown on the maps on display, the future land use map change includes a reduction of 7 acres of Community Commercial land, reduction of approx. 20 acres of Moderate Density Residential land and a reduction of approx. 20 acres of Low Density Residential land. The future land use map proposes to add approx. 40 acres of Commercial land and 6 acres of Moderate Density Residential land. The zoning map proposes to reduce approx. 33 acres from PD-R and add 33 acres to Commercial Intensive. The PD-R will be amended in conjunction with these map changes.

Q: There are concerns with existing traffic and speed limits along US 441. What can be done?
A: The project will include a traffic study to be conducted to analyze the existing and proposed traffic conditions and the developer will be responsible for improvements to the roadway related to operational and safety improvements. The developer understands local concerns about traffic safety and the desire to request a reduction in posted speed along this portion of the roadway.

Q: Will there be a stoplight put in? Where?
A: Yes, the plan is to install a new traffic light in front of the commercial area as part of the future commercial development. A traffic study will be provided and coordination and permitting with FDOT.

Q: The posted speed is too high? What can be done?

A: FDOT makes decisions related traffic speeds. We will discuss this issue with FDOT as the traffic study is prepared. The reduced speed may be a recommendation from our traffic study which will be prepared shortly.

Q: What are the minimum lot sizes of the lots in the PD-R area?
A: The smallest lots are 10,000 SF and some are minimum 1/3 acre and ½ acre in size in certain labeled areas. These requirements are not proposed to change from the approved zoning.

Q: How many less lots will there be?
A: The proposal is to reduce the number of lots allowed from 275 to 203 (-72 lots).

Q: Will anything change in the already-approved residential Ph. 1 along the west side?
A: No, the plan is to develop Ph. 1 exactly the same as originally approved.

Q: How far is the commercial zoning area from 188th Street?
A: The commercial zoning area that's proposed is approximately 1,000 feet away from 188th Street.

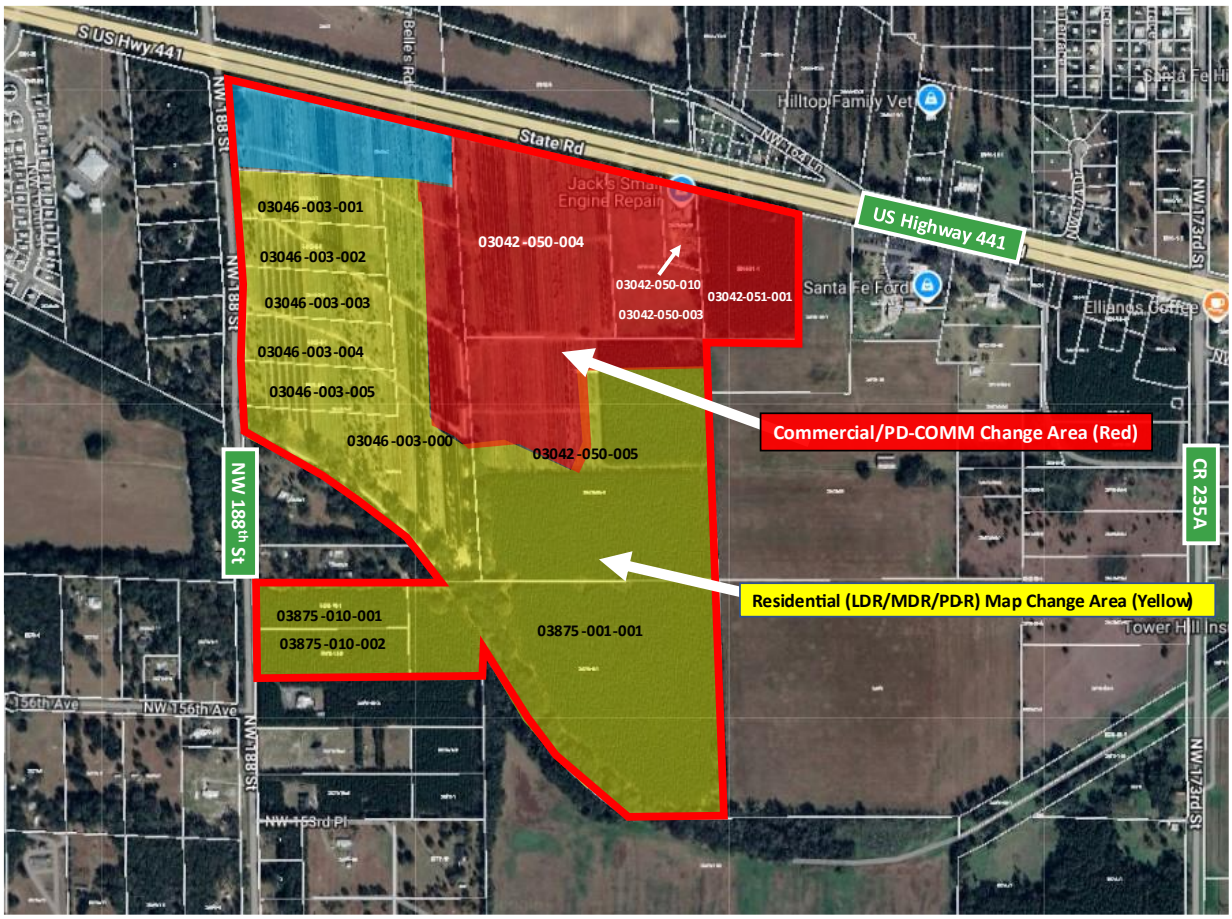
Q: Will the stormwater basin still remain along 188th Street?
A: Yes, the basin will remain, as originally permitted.

Q: The access from the property to 188th Street will remain emergency-only, correct?
A: Yes, the access will be gated for emergency access only.

Q: Who are the commercial users that will be located on-site?
A: The developer is not able to announce the specific tenants at this time, but they are all national retailers and will include a variety of types to serve the public.

Q: What is the schedule of review and approval for this project?
A: We plan to submit the land use and zoning change at the end of this month and anticipate that the review process will take approximately 5 months. After that, a Site Plan for the commercial development would be submitted, which would likely be under review for the remainder of 2026. Construction would commence shortly thereafter.

NOTICE OF NEIGHBORHOOD WORKSHOP



Date: Wednesday, October 22, 2025

Time: 6:00 p.m.

Place: Legacy Park Multipurpose Center - Meeting Room 1
15400 Peggy Road, Alachua, FL 32615

Contact: eda consultants, inc.
(352) 373-3541
permitting@edafl.com

A neighborhood workshop will be held to discuss proposed future land use map changes from Community Commercial, Low Density Residential and Moderate Density Residential to Commercial and from Low Density Residential to Moderate Density Residential and a rezoning from Community Commercial (CC) and Planned Development - Residential (PD-R) to Planned Development - Commercial (PD-COMM) and Planned Development - Residential (PD-R) generally located in the 16400 to 18800 blocks of US Highway 441 (south side) on all or a portion of 14 tax parcels (03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03042-050-003, 03042-050-004, 03042-050-010, 03042-051-001, 03042-050-005, 03875-001-001, 03875-010-001 and 03875-010-002). The overall approximate map modification acreage is 182 (+/-) acres. This is not a public hearing. The purpose of this meeting is to inform members of the public of the proposal and to seek their comments.

FESTIVAL:
Continued from page A1

Festival raises funds, supports local charities

seemed easier." That nostalgic theme carried throughout the free, family-friendly festival, where attendees were encouraged to don vintage attire and join in a lively costume contest.

This year's festival was a collaborative effort between NMSO and Gainesville Street Rods, which helped raise money for charity. Nearly $2,000 was collected to support Homes 4 Heroes, while a clothing drive gathered donations for St. Francis House. Organizers said both causes benefitted significantly from the enthusiastic response of festivalgoers.

Entertainment was central to the event, with music from the 1950s and 1960s filling the streets courtesy of Newberry's Twisted H Productions. A live DJ kept energy high throughout the day, while food trucks and local vendors offered refreshments and merchandise. The highlight for many was the classic car show, billed as "awesome" by organizers, which drew car enthusiasts eager to showcase vintage rides.

While the Fabulous 50's Festival is one of NMSO's smaller events, organizers said they were encouraged by the turnout. An estimated 3,000 visitors attended, enjoying not only the festival itself but also the restaurants and shops in historic downtown Newberry.

Mack said the strong community response reaffirmed the festival's growing role in highlighting downtown as a hub for both residents and visitors. The event not only showcased local businesses but also fostered a sense of pride in Newberry's historic core.

With live music, classic cars, nostalgic costumes and charitable giving, the Fabulous 50's Festival once again blended entertainment with community spirit—leaving organizers optimistic about the festival's future as a fixture on Newberry's event calendar.

STATE OF FLORIDA
COUNTY OF ALACHUA:

Before the undersigned authority personally appeared **Bryan Boukari**, who on oath and in my physical presence says that he is the Manager of *Alachua County Today*, a weekly newspaper published at Alachua in Alachua County, Florida; that the attached copy of advertisement, **eda consultants - 2nd Neighborhood Workshop - Farmlands Commercial LUC-ZO**, being a Public Notice in the Matter set forth at the beginning of the attached notice, was published in said newspaper in the issue(s) dated **October 2, 2025**.

Affiant further says that the website or newspaper complies with all legal requirements for publication in chapter 50, Florida Statutes. More specifically, *Alachua County Today* is a newspaper published at Alachua, in said Alachua County, Florida, and that the said newspaper has heretofore been continuously published in said Alachua County, Florida, each week and has been entered as periodicals matter at the post office in Alachua, in said Alachua County, Florida, for a period of one year next preceding the first publication of the attached copy of advertisement; and affiant further says that he (she) has neither paid nor promised any person, firm or corporation any discount, rebate, commission or refund for the purpose of securing this advertisement for publication in the said newspaper.

Sworn to and subscribed before me this **5th day of October 2025** by Bryan Boukari, who is personally known to me.

(Signature of Affiant)

Neighborhood Meeting Minutes

Project: Farmlands Commercial Land Use Change & Rezoning

Meeting Date & Time: October 22, 2025 at 6:00 p.m.

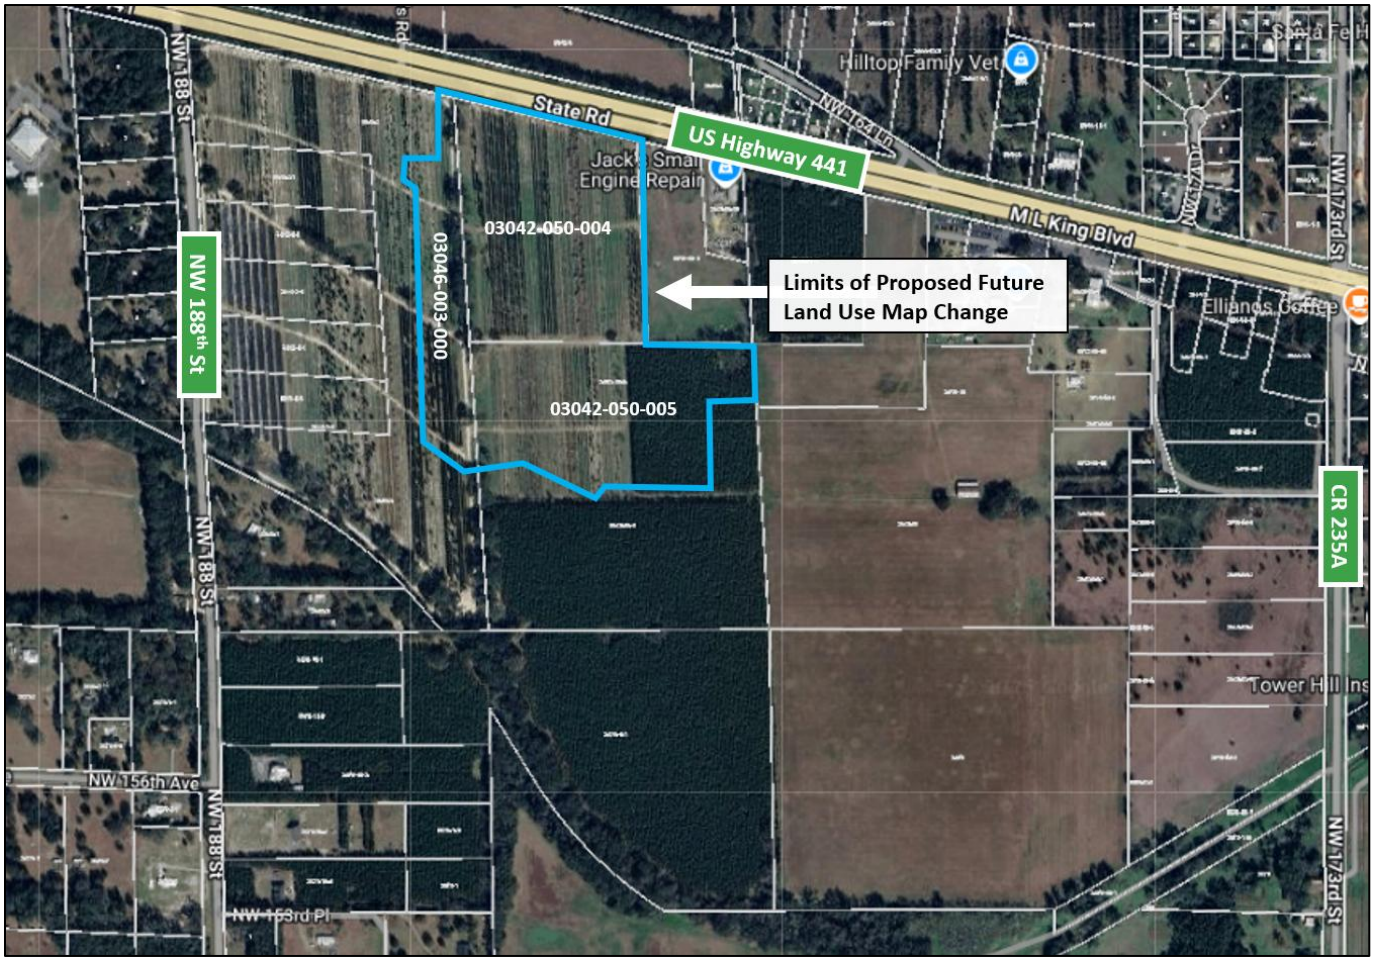
Community Participants: 4 participants in total

Project Representatives: Clay Sweger - eda
Sergio Reyes - eda
Stephanie Sutton - eda
Heather Hartman - eda
Keith Lerner - Property Owner
David Lerner - Property Owner
David Buckle - Foresite Group
Craig Brashier - NV5

Meeting Minutes:
The meeting was conducted open-house style. There were project representatives stationed throughout the room, with printed graphics on posters. As community participants arrived, they circulated throughout the room and asked questions about the proposed action. Below is the collected feedback from participants.

Q: What are the changes between the first workshop and the second?
A: Essentially, the change is the addition of 3 parcels along US 441 into the proposed rezoning area. In addition, the portion of the property proposed for commercial use are now proposed to be zoned 'PD-CCOMM' instead of 'Commercial Intensive.'

Q: There are concerns with existing traffic and speed limits along US 441. What can be done?
A: The project will include a traffic study to be conducted to analyze the existing and proposed traffic conditions and the developer will be responsible for improvements to the roadway related to operational and safety improvements. The developer understands local concerns about traffic safety and the desire to request a reduction in posted speed along this portion of the roadway.



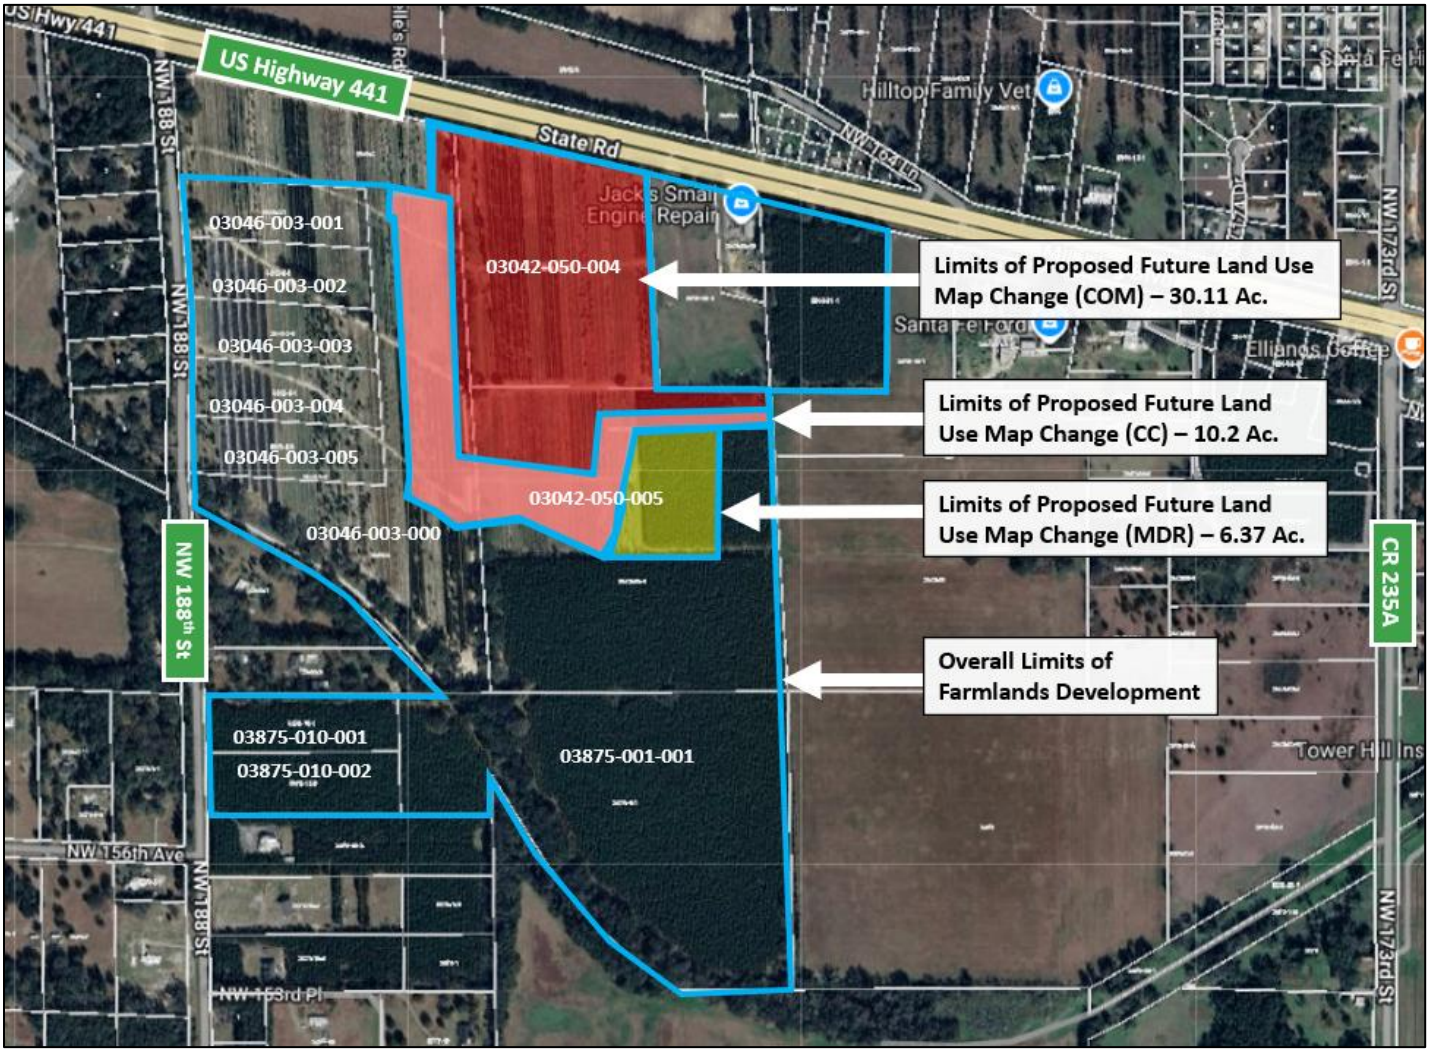
Q: What are the minimum lot sizes of the lots in the PD-R area?
A: The smallest lots are 10,000 SF and some are minimum 1/3 acre and ½ acre in size. These requirements are not proposed to change from the approved zoning.

Q: How many less lots will there be?
A: The proposal is to reduce the number of lots allowed from 275 to 203 (-72 lots).

Q: Are there City utilities that serve the site?
A: Yes, the City serves water and sewer to the site.

Q: What is the schedule of review and approval for this project?
A: We plan to submit the land use and zoning change at the end of this month and anticipate that the review process will take approximately 5 months. After that, a Site Plan for the commercial development would be submitted, which would likely be under review for the remainder of 2026. Construction would commence shortly thereafter.

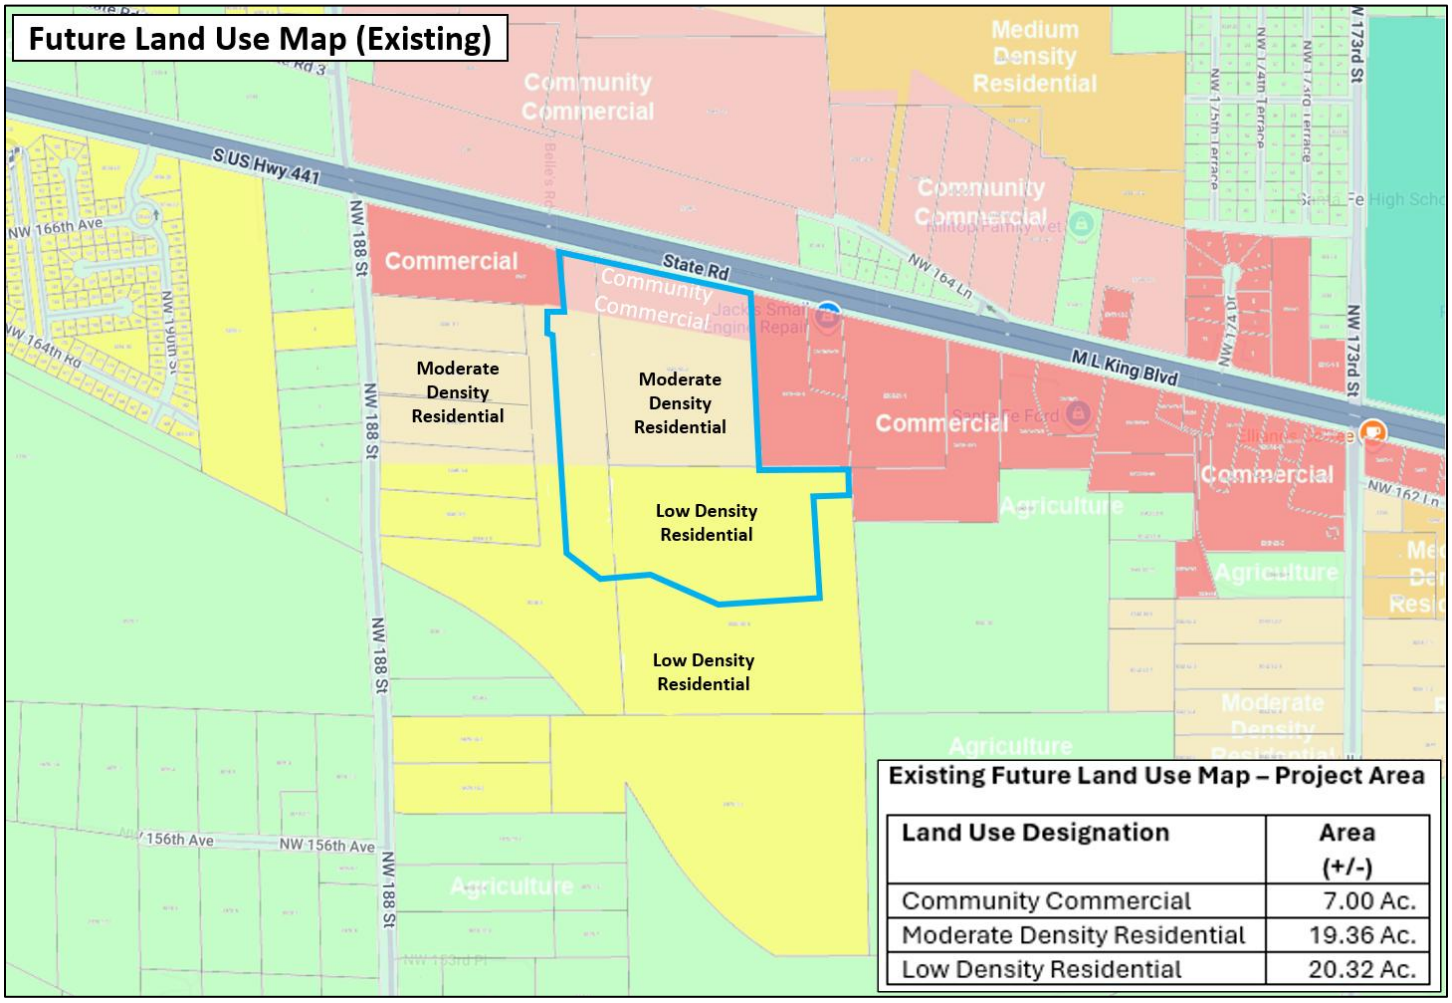
Future Land Use Map Amendment
Justification Report



Request:	Small Scale Future Land Use Map Amendment application from Community Commercial, Moderate Density Residential & Low Density Residential to Commercial and Community Commercial and from Low Density Residential to Moderate Density Residential.
Location:	16600 block of US Highway 441
Parcel Numbers:	03046-003-000 (portion of), 03042-050-004, 03042-050-005 (portion of)
Acreage:	46.7 +/- Acres
Prepared By:	Clay Sweger, AICP, LEED AP (eda consultants, inc.) Gerry Dedenbach, AICP, LEED AP (NV5)
Date:	January 26, 2026, Revised March 3, 2026

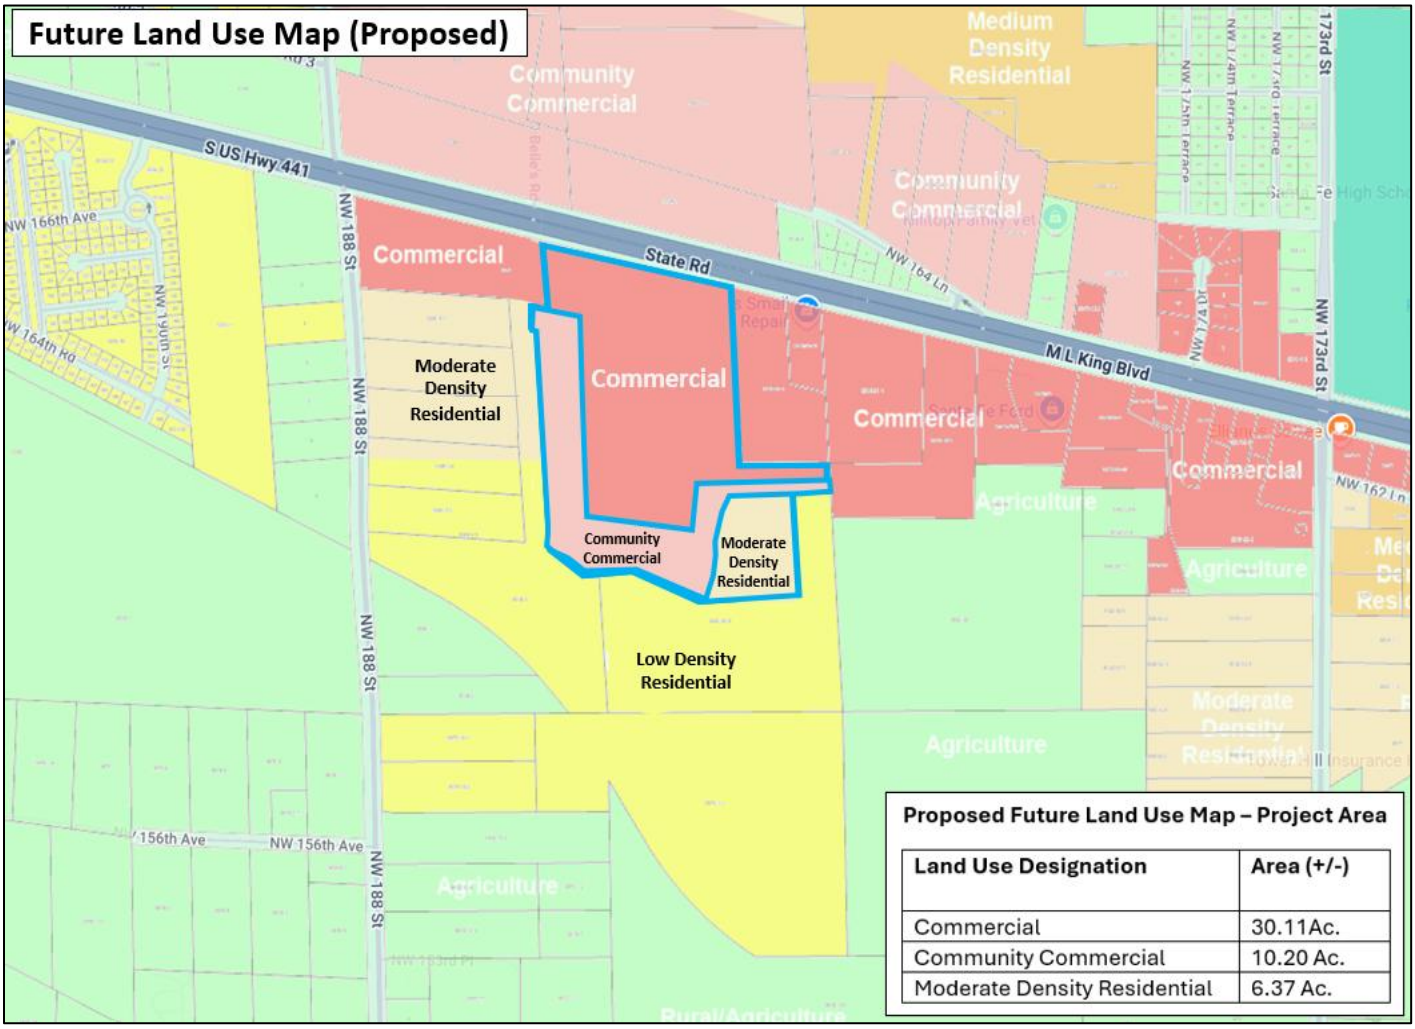
Background

The subject property is located at the 16600 block of US Highway 441 in the City of Alachua. The property is located south of US Highway 441 and a commercial parcel, west of commercial and agricultural land, east of NW 188th Street and north of residential and undeveloped properties. The proposal concerns an approximately 46.68-acre subject property, that currently is utilized as a tree farm and contains timberland. The tax parcel numbers are 03046-003-000 (portion of), 03042-050-004, 03042-050-005 (portion of). The parcels are located within Section 8, Township 8, Range 18.



The subject property is part of a larger mixed use, Planned Development known as 'Farmlands' that consists of approximately 182 +/- acres. The overall boundary of this mixed use future development (with the portion newly proposed for Commercial (COM), Community Commercial (CC) and Moderate Density Residential (MDR) Future Land Use map designation) is identified below:

Statement of Proposed Change



The property owners request a small-scale future land use map amendment to amend the future land use categories from Community Commercial to Commercial (approx. 7 acres), Moderate Density Residential to Commercial & Community Commercial (approx. 12.98 acres), Low Density Residential to Commercial & Community Commercial (approx. 20.33 acres) and Low Density Residential to Moderate Density Residential (approx. 6.37 acres). The related rezoning application is to rezone lands with the underlying Commercial future land use designation to Planned Development – Commercial (PD-COMM) and the Moderate Density Residential land use area to Planned Development – Residential (PD-R) for consistency with these future land use categories.

The existing Future Land Use Map for the project site and surrounding area is shown below:

The subject parcel currently has a mix of commercial and residential future land use designations and is bounded on multiple sides by a similar mix of commercial and residential designations, including to the north and south, and portions of the east & west by land with a commercial future land use designation. Portions of land to the west have a residential future land use designation.

The proposed Future Land Use Map for the project site and surrounding area is shown below:

Proposed Future Land Use Map – Project Area

Land Use Designation	Area (+/-)
Commercial	30.11Ac.
Community Commercial	10.20 Ac.
Moderate Density Residential	6.37 Ac.

As indicated earlier, the proposed future land use map amendment is related to an application for a rezoning that is being submitted simultaneously (please see the Justification Report for the related application that discusses the rezoning). The proposed rezoning would place a Planned Development – Commercial (PD-COMM) zoning on the property with a proposed Commercial and Community Commercial future land use area and Planned Development – Residential (PD-R) zoning on the property that would be consistent with the proposed future land use map designation of Moderate Density Residential on the property.

The Moderate Density Residential future land use designation allows for use types that are compatible with the surrounding development pattern in the vicinity, including single family detached units and single family subdivisions throughout the context area and City as a whole.

The City of Alachua Comprehensive Plan Future Land Use Element describes the Moderate Density Residential future land use category as shown below, with desired uses in bold:

Policy 1.2b: Moderate Density Residential (0 to 4 dwelling units per acre): *The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre.*

The following uses are allowed in the Moderate Density Residential land use category:

1. *Single family detached dwelling units;*
2. *Accessory dwelling units;*
3. *Manufactured or modular homes meeting certain design criteria;*
4. *Mobile homes only within mobile home parks;*
5. *Duplexes and quadplexes;*
6. *Townhomes;*
7. *Residential Planned Developments; and,*
8. *Supporting community services such as schools, houses of worship, parks, and community centers.*

The Commercial and Community Commercial future land use designations are established to provide a wide range of goods and services to local consumers. The City of Alachua Comprehensive Plan Future Land Use Element describes the Commercial and Community Commercial future land use categories as shown below:

Policy 1.3.b: Commercial: *The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:*

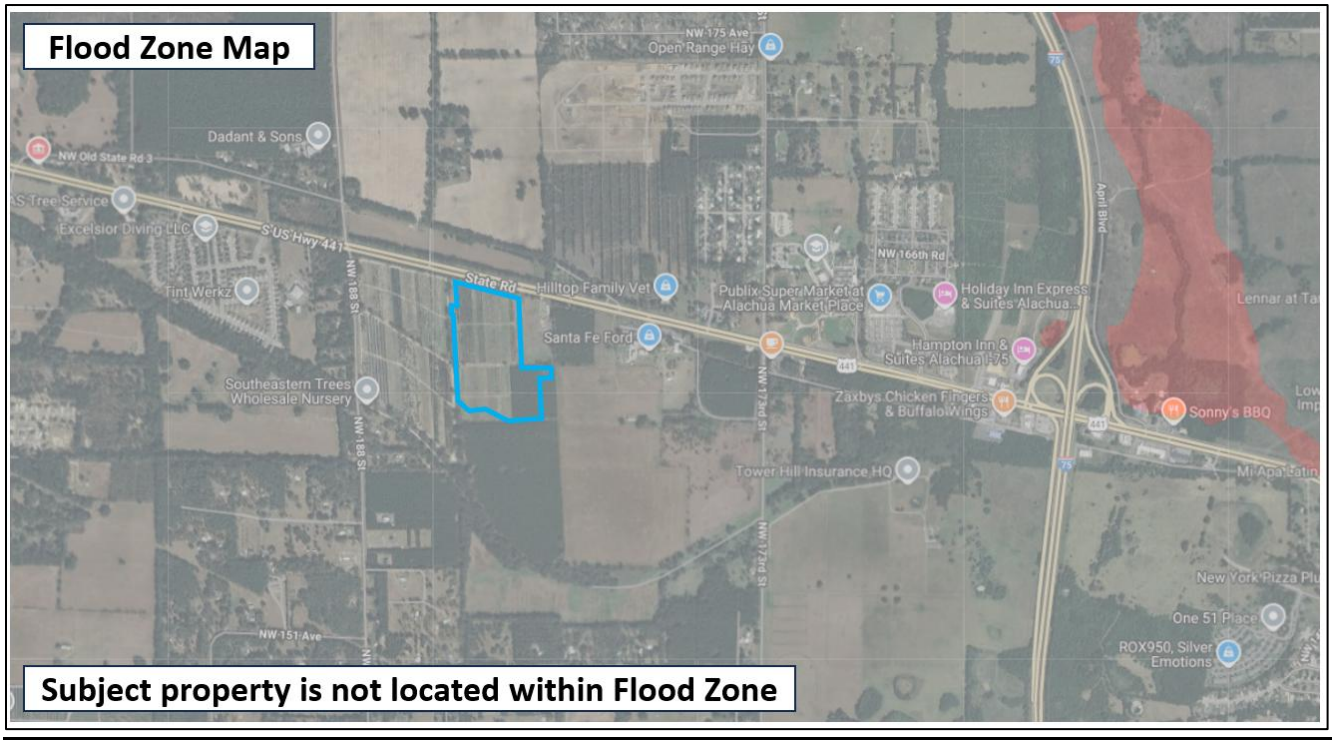
1. *Retail sales and services;*
2. *Personal services;*
3. *Financial institutions;*
4. *Recreation and entertainment;*
5. *Tourist-related uses;*
6. *Visitor accommodations;*
7. *Commercial shopping centers;*
8. *Auto-oriented uses;*
9. *Traditional Neighborhood Planned Developments;*
10. *Employment Center Planned Developments;*
11. *Commercial recreation centers;*
12. *Office/business parks;*
13. *Limited industrial services;*
14. *Eating establishments;*
15. *Single family attached units;*
16. *Apartments and townhomes;*
17. *Duplexes and quadplexes;*

18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers. Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Policy 1.3.a: Community Commercial: *The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:*

1. Neighborhood commercial establishments;
2. Residential/offices and live-work units;
3. Business and professional offices;
4. Personal services;
5. Financial institutions;
6. Retail sales and services that serve the community;
7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;
11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;
13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use.



As described in the policies listed above, the proposed Commercial, Community Commercial and Moderate Density Residential future land use designations are appropriate for the subject property as illustrated in the previous land use map exhibits. The proposed future land use is appropriate due to its location in an area with a mix of commercial and residential development areas well suited to accommodate a mix of development types compatible in nature with the context area and City as a whole. In addition, the property is served by all necessary public facilities to serve future development of the site.

Environmental / Suitability Analysis

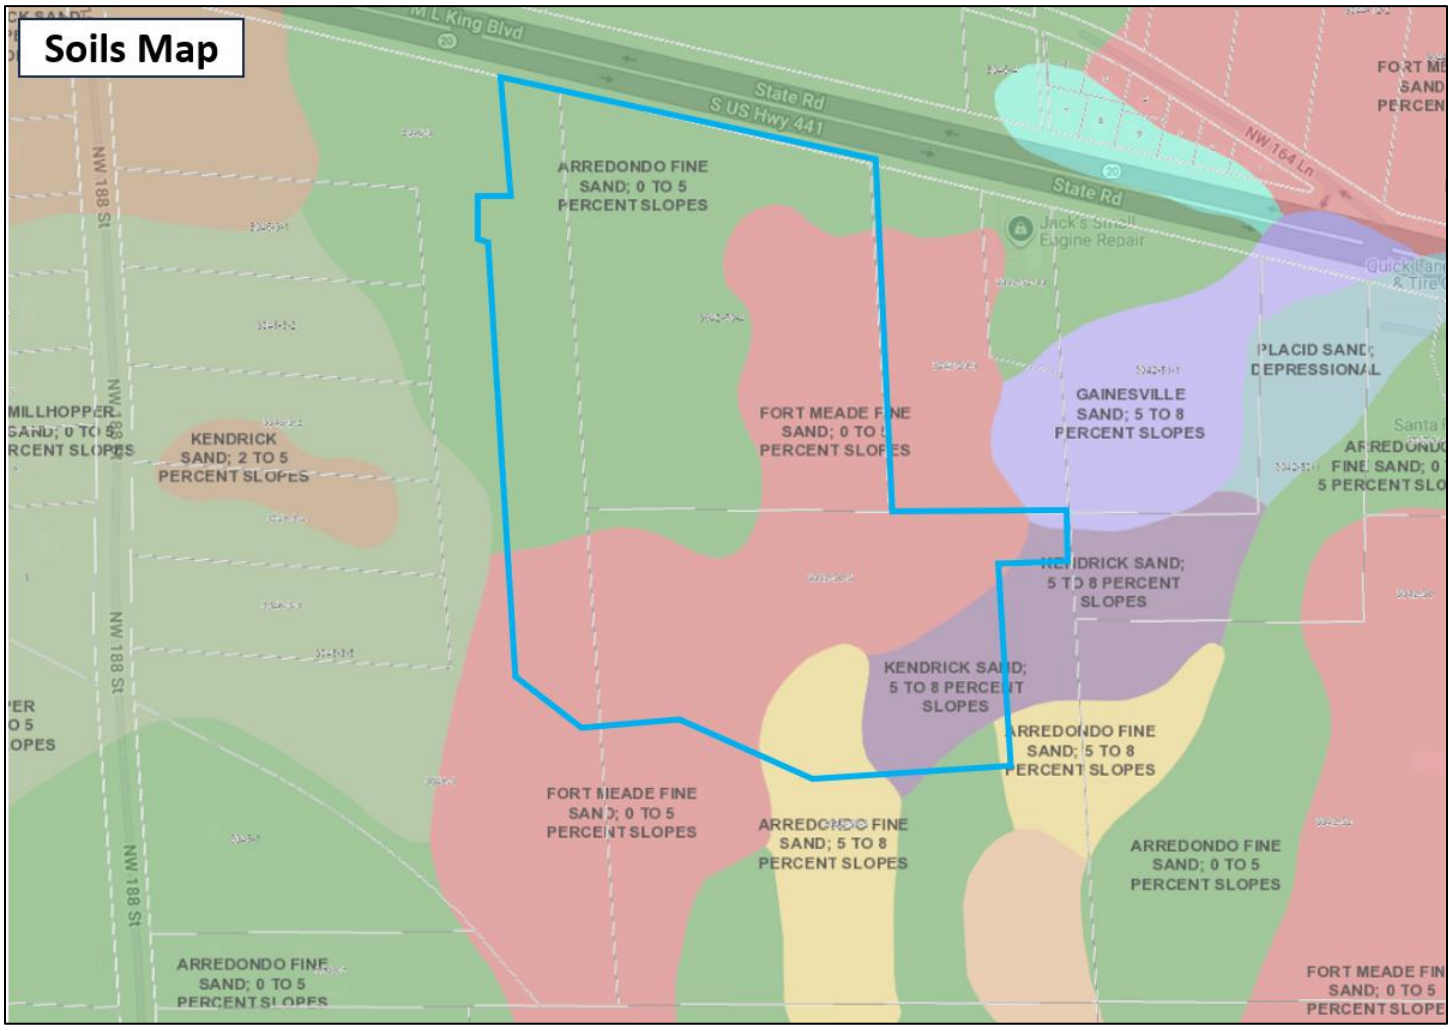
The subject property has no environmental constraints based on an analysis of wetlands, strategic ecosystem, soils, flood zones, topography, and surrounding uses and is suitable for urban development.

100-Year Flood Zone / Flood Potential:

The subject parcel is fully within Flood Zone X (the gray area shading on the map), which is outside the 0.2% annual chance of flood hazard. There are no FEMA flood plain areas on the property and therefore, it is not an issue for future development. The figure below illustrates the flood zones:

Strategic Ecosystems:

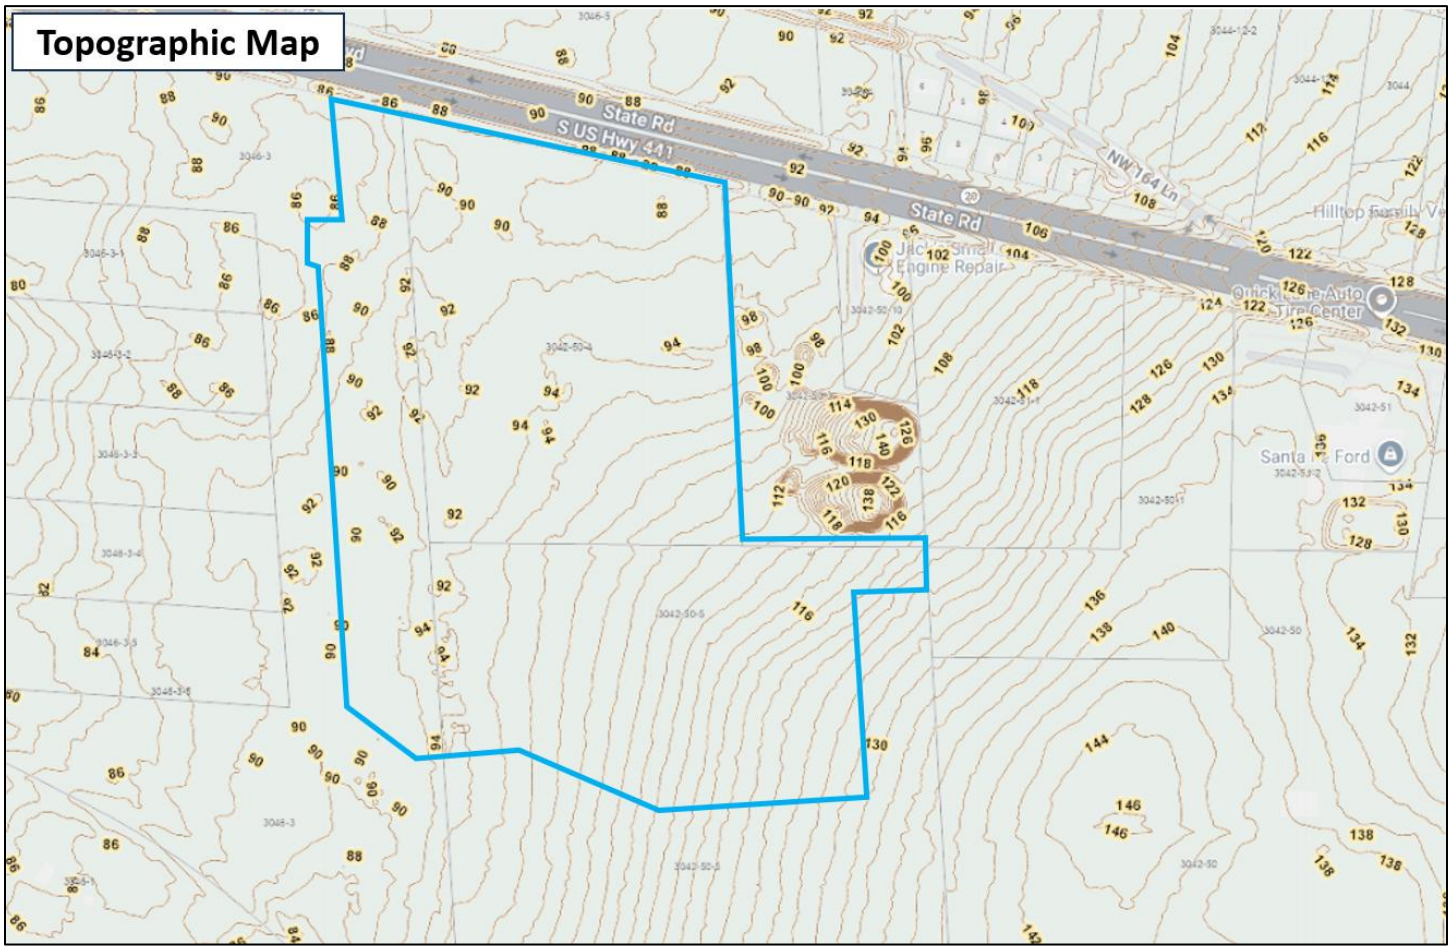
The subject property is not located within a Strategic Ecosystem overlay as indicated in the figure below and therefore, it is not an issue for future development.



Soils:

Soils on the site are indicated in the narrative and exhibit below. Based on the soil information analysis, the proposed land use application is not in conflict with Future Land Use Element Objective 5.1 and its sub-policy concerning soils (Policy 5.1.b.).

According to the *Soil Survey of Alachua County Florida*, Arredondo fine sand, 0 to 5 percent slopes consists of nearly level to gently sloping, fairly well drained soils. A limited area of Arredondo fine sand, 5 to 8 percent slopes exists on the site's south. This soil has only slight limitations as sites for septic tank absorption fields, dwellings, small commercial buildings, trench landfills, and local roads and streets.



Kendrick sand, 5 to 8 percent slopes, is a gently sloping, well-drained soil in both small and large areas on the gently rolling upland. This soil has only slight limitations as sites for septic tank absorption fields, dwellings, small commercial buildings, trench landfills, and local roads and streets.

Fort Meade fine sand, 0 to 5 percent slopes is a nearly level to gently sloping, well-drained soil in both small and large areas on the gently rolling uplands. This soil has slight limitations for use as sites for dwellings, for local roads and streets, and for septic tank absorption fields.

Topography:

The following figure illustrates the site's topography. The site slopes from 126 feet in the eastern portion to approximately 90 feet in the western portion of the property, spanning over a large expanse of land and poses no impediments to the site's proposed urban development program.

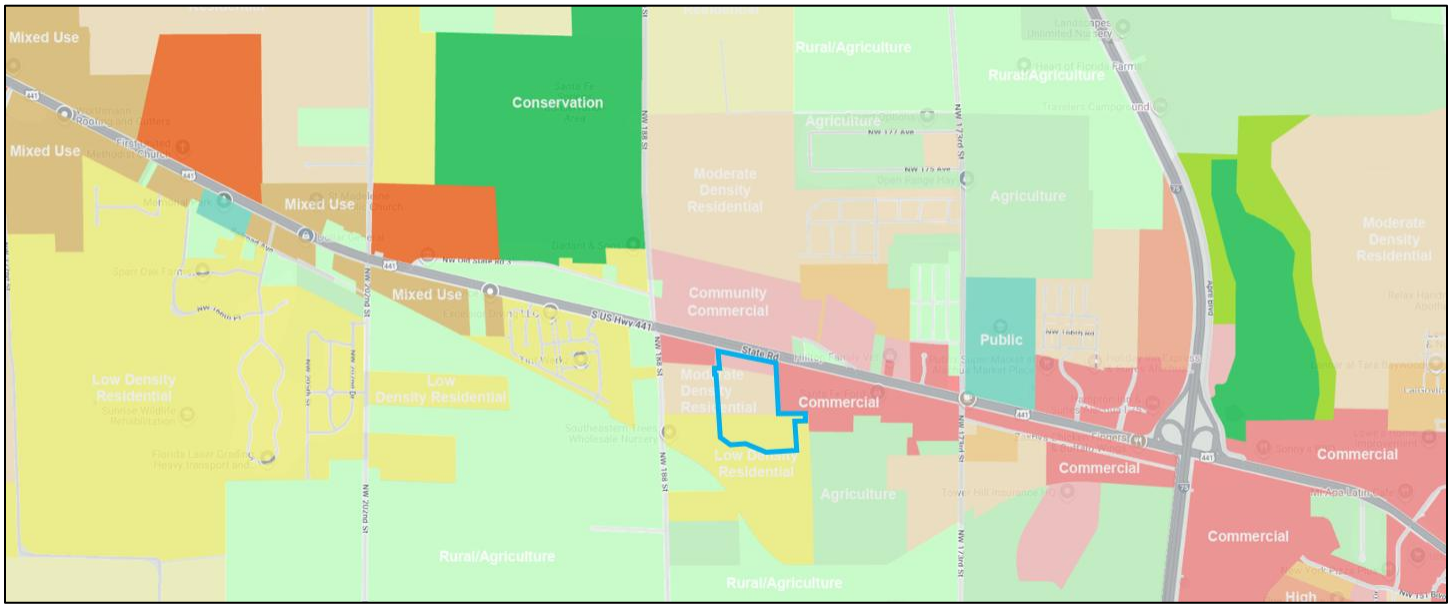
Wellfield Protection Zone:

The subject parcel is not located in a wellfield protection zone. Please see the City of Alachua's Wellfield Protection Zones map dated December 2019 in the Future Land Use Element map series for confirmation the property is not located in the wellfield protection zone.

Wetlands:

The figure below illustrates that there are no wetlands located on the subject property, according to the National Wetlands Inventory (NWI) map below:

Needs Analysis



State Requirements

Recent action by the Florida State legislature (H.B. 7202) modified the requirements for need determinations on comprehensive plan future land use map amendments. The law no longer places a maximum need based strictly on population projections. Rather, it should allow the operation of real estate markets to provide adequate choices for businesses and residents. Therefore, this new policy direction precludes the need to analyze land use changes based on existing and projected populations and directs the focus on preparing lands in urban infill areas for appropriate and compatible development.

This proposed land use change is proposed in an urban area which includes existing nearby urban development in multiple directions with urban utility infrastructure services available. The site is located within the urbanizing portion of the City of Alachua, with access along a major state arterial roadway (US 441) and within close proximity to Interstate 75. Public services (centralized water & sewer utilities,

electric, telecommunications, police/fire protection, etc.) are readily available with adequate capacity to serve the site and fully accommodate on-site urban development. There is also existing residential and commercial development in the immediate vicinity of the parcel.

As indicated on the combined future land use maps for Alachua & High Springs, almost every property abutting US 441 has an urban land use designation.

Existing vs. Proposed Designations

The application proposes to amend the future land use category from Community Commercial to Commercial (approx. 7 acres), Moderate Density Residential to Commercial & Community Commercial (approx. 12.98 acres), Low Density Residential to Commercial & Community Commercial (approx. 20.33 acres) and Low Density Residential to Moderate Density Residential (approx. 6.37 acres). The proposed land use changes result in modest modifications to potential density & intensity for the site based on its existing designations and approved Planned Development Zoning Master Plan. The "Public Facilities Impact Analysis" section will analyze capacity to serve a potential development scenario on the site.

In summary, the tables below outline the net change in land use entitlements that would result in the proposed future land use map change:

Existing FLU Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Community Commercial	7.0	0.5 FAR	152,460 SF
Moderate Density Residential	19.36	4 DUA	77 Units
Low Density Residential	20.32	1 DUA	20 Units
Total	**46.68**		**152,460 SF / 97 Units**

Proposed FLU Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Commercial	30.11	0.17 FAR	222,970 SF
Community Commercial	10.20	0.17 FAR	75,533 SF
Moderate Density Residential	6.37	4 DUA	25 Units
Total	**46.68**		**298,503 SF / 25 Units**

Net Change

Non-Residential	**+146,043 SF**
Residential	**-72 Units**

The site is located within an urbanizing portion of the City of Alachua, abutting US 441 and in proximity to Interstate 75. The existing developed nature and urban character of the US 441 corridor within the City of Alachua indicates this area is continuing its urbanizing form and there is a need for additional commercial and residential use options in the City and for residents in the context area and proximate Cities of High Springs and Newberry.

Public services are readily available to serve the site at adequate capacity to accommodate on-site development. Land with similar commercial and residential designations are located within 1/8 mile of the subject property and developing a mix of uses upon this land will support the concept of urban development and City of Alachua growth strategies.

The City of Alachua Moderate Density Residential future land use designation allows for a variety of residential use types within the City of Alachua. Further, as single family detached development is in high demand, the land use change will help facilitate this development type.

The land use change also provides approximately 40 acres of commercially viable land which according to Policy 1.3.a and 1.3.b of the City of Alachua Comprehensive Plan, is established to provide a wide range of goods and services to local consumers. While the commercial land use does permit multifamily residential development, the existing property value does not support residential development at the permitted density that would be marketable and financially feasible. Based on comparable land values to similar projects in the vicinity, the commercial land use area would need to provide a residential density far in excess of the permitted 15 DUA to match projected values of the commercial land use area. Such a density is not currently marketable in the vicinity.

Minimum Land Use Needs Analysis: The proposed map amendments will not result in a reduction in the minimum amount of lands (land uses) necessary to accommodate the projected population growth for the 10 year planning period, as summarized below:

- Population Projection for 10-year Planning Period (2025)*: +7,100 Persons
- Associated # of Residential Units Needed for +7,100 Population (2.65 / Unit*): 2,679 Units
- Amount of Vacant Land Currently Available in Moderate Density FLU designation*: 1,537 Acres
- Associated # of Units for Vacant Land in Moderate Density FLU designation (4 DUA): 6,148 Units
- Available Capacity to Serve 10-Year Planning Period: 3,469 Units
- Less Reduction Resulting from Proposed Map Amendment -72 Units
- Net Capacity to Serve Residential Demand in 10-Year Planning Period 3,397 Units

**Source: City of Alachua Data & Analysis (2020)*

Summary: Based on population projections and associated information provided in the City's Data & Analysis Report for the planning period (2035) there is more than adequate capacity within the currently adopted Future Land Use Map to accommodate the projected growth within just the Moderate Density Residential land use area. The minimal reduction of residential units proposed will not affect the City's ability to provide adequate land for residential growth. Moreover, the proposed project will provide residential housing within a mixed use development, consistent with the City's vision and goals for creating a resilient community.

Public Facilities Analysis

A future land use map amendment may result in changes in overall impacts on public facilities if the amendment changes the allowable uses or density/intensity for the property. The following tables analyze the change in public facilities impacts based on the associated existing and proposed land use categories, relative to the City's Level of Service (LOS) standards.

In accordance with LDR *Article 2, Section 2.4.14(H)* and *Comprehensive Plan Future Land Use Element Policy 5.2.a*, adequate public facilities are available to serve on-site development scenarios. Specifically, the LDR states that "the necessary public facilities will be deemed available concurrent with the impacts of the proposed development if the sum of proposed development impacts when added to the existing demand and the capacity reservations are less than the maximum service volume on the affected facilities." Based upon realistic maximum development scenarios, any new development allowed in the proposed land use categories will operate within the City's LOS standards outlined in the Comprehensive Plan and LDR's.
Development Scenario Impact: The net difference between the existing and proposed future land use designations is described below:

Existing FLU Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Community Commercial	7.0	0.5 FAR	152,460 SF
Moderate Density Residential	19.36	4 DUA	77 Units
Low Density Residential	20.32	1 DUA	20 Units
Total	**46.68**		**152,460 SF / 97 Units**

Proposed FLU Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Commercial	30.11	0.17 FAR	222,970 SF
Community Commercial	10.20	0.17 FAR	75,533 SF
Moderate Density Residential	6.37	4 DUA	25 Units
Total	**46.68**		**298,503 SF / 25 Units**

Net Change

Non-Residential	**+146,043 SF**
Residential	**-72 Units**

The following public facilities impact information is based on the net changes indicated above.

Traffic:

Please refer to the Roadway Segment and LOS Analysis Report prepared by Optimus Traffic Solutions.

While there are existing segments of US 441 currently functioning either at or slightly over currently adopted Level of Service standards, the proposed project does not overly exacerbate existing conditions and brings forth opportunities to implement both capacity and safety strategies to the US 441 corridor and City as a whole. Items to be considered during the site plan approval process such as, but not limited to, Transportation System Management (TSM), Transportation Demand Management (TDM), Roadway Segment reclassification, Speed limit reductions, and overall re-evaluation of Level of Services / Quality Level of Service standards are all items the City of Alachua could consider moving forward.

Notably, at the two (2) Neighborhood meetings, our public engagement had several participants sharing how historic traffic volumes have increased over the last several decades and their desire for operational and/or safety modifications being greatly appreciated, during the course of site plan approval process. Many local participants stated their turning movements onto US 441 now take longer and they would appreciate operational modifications be considered and approved by the Florida Department of Transportation during the course of site plan review.
In addition, it was noted by many the introduction of service and retail establishments closer to their homes will reduce overall trip lengths, which equates to lower Vehicle Miles Traveled (VMT) in the transportation network. In addition, the introduction of a mixed-use component to the existing approved residential community will create greater opportunities for daily and specific trips being satisfied by non-motorized travel options. These items represent and reinforce many of the City of Alachua's recently adopted Land Development Regulations contained in Section 4.7 and the City's Strategic Goals, Objectives, and Policies contained within the Comprehensive Plan.

Sanitary Sewer:

Goal 1: Wastewater The City shall plan for and provide adequate and economical wastewater service while protecting the environment, especially groundwater resources.

Objective 1.2 Wastewater Service New development may only occur within areas where wastewater service is available or shall be made available as a part of the proposed development. For purposes of this objective, development does not include an addition to an existing development of less than 33% of the existing floor area of the development or an addition of less than 33% of the existing impervious surface area within a five-year period.

The following analysis examines public facilities impacts to City wastewater facilities. For residential uses, the flow rates were calculated using the ratio of 250 GPD / unit (-72 Units x 250 GPD = -18,000 GPD. For the proposed commercial uses, the flow rates were calculated using *64E-6.008, F.A.C. (Shopping Center): (146,043 SF x 0.1 GAL/SF = 14,604 GPD).* Net generation between residential and commercial changes is -3,395 GPD. Adequate capacity is available to support this development and will not negatively impact the City's adopted LOS for this system.

Sanitary Sewer Impacts

System Category	GPD
Treatment Plan Current Permitted Capacity	1,500,000
Less Actual Treatment Plant Flows	813,000
Reserved Capacity	314,385
Site Demand	-3,396
Residual Capacity	**376,011**

1. *Source: City of Alachua Public Services Department, October 2025*
2. *Commercial calculations per 64E-6.008, F.A.C. (Shopping Center): (146,043 SF x 0.1 GAL/SF = 14,604 GPD*
3. *Single Family Calculations: 250 Gal/Unit per day x -72 Units = -18,000 GPD*

Potable Water:

Goal 4: Potable Water The City shall provide an adequate supply of potable water to customers throughout the water service area.

Objective 4.1 Water System Level of Service Standards The City shall achieve and maintain acceptable levels of service for potable water quantity and quality.

The following analysis examines public facilities impacts to City potable water facilities. For residential uses, the flow rates were calculated using the ratio of 275 GPD / unit (-72 Units x 275 GPD = -19,800 GPD). For the proposed commercial uses, the flow rates were calculated using *64E-6.008, F.A.C. (Shopping Center): (146,043 SF x 0.1 GAL/SF = 14,604 GPD.* Net generation between residential and commercial changes is -5,196 GPD. Adequate capacity is available to support this development and will not negatively impact the City's adopted LOS for this system.

Potable Water Impacts

System Category	GPD
Current Permitted Capacity	2,300,000
Less Actual Potable Water Flows	1,565,000
Reserved Capacity[2]	338,499
Site Demand	-5,196
Residual Capacity	**401,697**

1. *Source: City of Alachua Public Services Department, October 2025*
2. *Commercial calculations per 64E-6.008, F.A.C. (Shopping Center): 146,043 x 0.1 GAL/SF = 14,604 GPD*
3. *Single Family Calculations: 275 Gal/Unit per day x -72 Units= -19,800 GPD*

Solid Waste:

Goal 2: Solid Waste The City will provide for solid waste disposal service in a sanitary, economic, and environmentally safe manner.

Maximum Development Scenario Project Impact: Residential uses generate approximately 0.73 tons per year of solid waste per capita per City of Alachua Comprehensive Plan (-72 units x 2.3 residents per unit x 0.73 tons/year per capita = -121 tons). Commercial uses generate approximately 635 tons (based on calculation indicated in Footnote #2 below).

The following table indicates the projected solid waste generation, which will not exceed the City's overall Level of Service standards:

Solid Waste Impact

Solid Waste Impact – Residential Land Uses[1]	-121 Tons
Solid Waste Impact – Commercial Land Uses[2]	320 Tons
Net Increase	199 Tons

1. *Formula: (0.73 tons / year per capita @ 2.3 residents per unit)= -121 Tons/Year*
2. *Formula: ((12 lbs per 1,000 SF/day x 146,043 SF) x 365 days/year) / 2,000 = 320 Tons/Year*

**Source*: *Environmental Engineering: A Design Approach, Cincero and Cincero, 1996*

PUBLIC SCHOOLS

The proposed Future Land Use Map amendment will result in a net reduction of permitted residential density of 72 dwelling units. As such, there will be a reduction of potential student station generation and a reduced impact to public schools. Based on this, the amendment will lessen impacts on the City's public school facilities adopted LOS.

RECREATION

The proposed amendment to the Future Land Use Map will result in a net reduction of permitted residential density of 72 units. As such, there will be a reduction of recreation area demand. Based on this, the amendment will lessen impacts on recreation adopted Level of Service.

Recreation Impact Table

System Category	Acreage
Existing City of Alachua Recreation Acreage	135.48
Acreage Required to Serve Existing Population	56.48
Reserved Capacity	11.64
Site Demand	-0.99
Available Recreation Acreage	**68.35**

1. *Source: City of Alachua Public Services Department, October 2025*

2. *Calculations for Proposed Project: -72 Units x 2.76 persons/household x 5 acres / 1,000 persons = -0.99 acres*

Stormwater:

Goal 3: Stormwater The City shall develop and maintain a stormwater management system that minimizes flooding, protects, preserves and enhances desirable water quality conditions, and, where possible, preserves and utilizes existing natural features.

The minimum LOS standard for development in the City of Alachua requires a floor elevation of one (1) foot above the 100-year/24-hour storm elevation. Any new/future development on the portion of this property proposed for the subject property will be required to meet these standards and the Suwannee River Water Management District (SRWMD) requirements at the time of final development approval.

FIRE / EMS

The proposed development will be served by Fire Station #21 located at 16121 NW 173rd Street.

POLICE

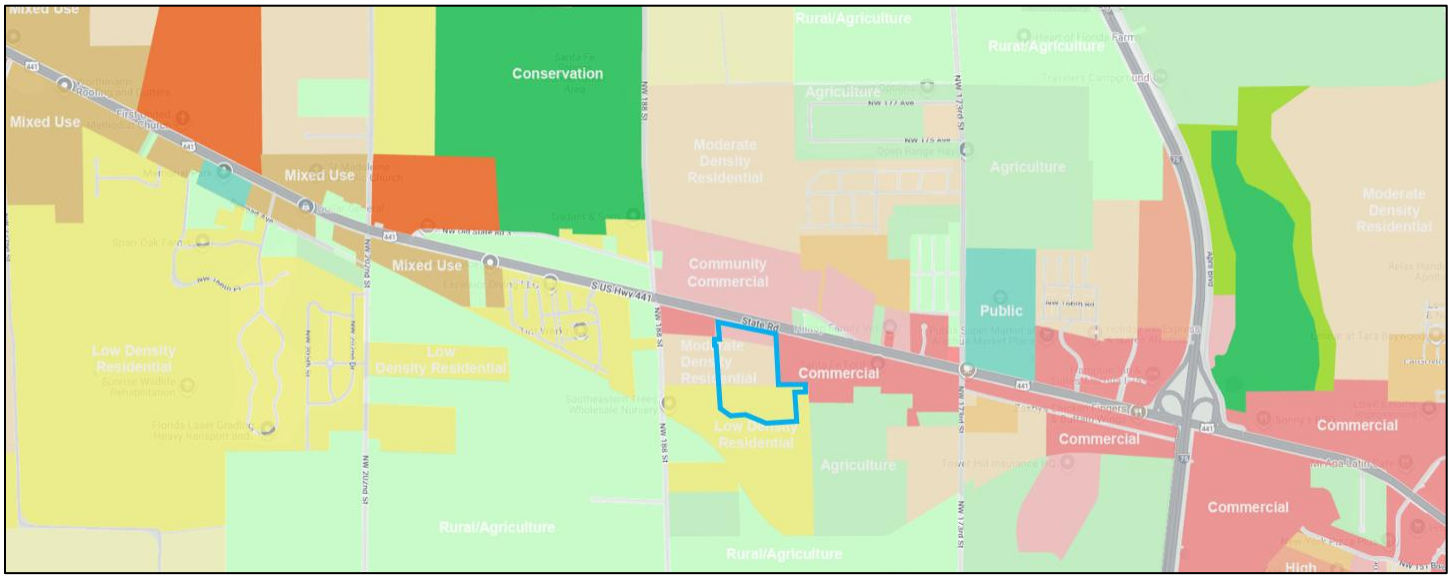
The proposed development will be served by the City of Alachua Police Department located at 15000 NW 142nd Avenue.

Compatibility Analysis

Compatibility with adjacent land uses is a consideration when considering a proposed change in future land use designations. The following list of adjacent uses illustrates the existing land uses for the surrounding properties:

The existing land uses and future land use designations of the adjacent properties are as follows:

North: US Highway 441, Undeveloped Property
Community Commercial future land use designation



East: Undeveloped Properties
Commercial & Agriculture future land use designations

West: NW 188th Street, Residential Properties
Commercial, Residential and Agriculture future land use designations

South: Residential & Undeveloped Property
Agriculture future land use designation

The proposed Commercial, Community Commercial and Moderate Density Residential future land use designations are compatible with the overall surrounding land use designations, zoning districts and the existing development pattern in the area. As previously stated, the site is located within the urbanizing portion of the City of Alachua, with access along a major state arterial roadway (US 441)

and within close proximity to Interstate 75. Public services (centralized water & sewer utilities, electric, telecommunications, police/fire protection, etc.) are readily available to serve the site at adequate capacity to accommodate on-site development. There is also existing residential and commercial development in the immediate vicinity of the parcel. As indicated on the combined future land use maps for Alachua & High Springs, almost all properties abutting US 441 have urban designations.

Urban Sprawl Analysis

Urban Sprawl Indicators

This amendment has been analyzed to determine that the plan amendment incorporates a development pattern or urban form that achieves at least four of the following criteria indicating that it discourages urban sprawl (Ch. 163.3177(6)(a)(9)(b), F.S.).

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

Response: The proposed land use map amendment to the commercial and residential map designations is in a geographic area with all necessary urban services available to serve urban development on the property (centralized water & sewer utilities, electric, telecommunications, police/fire protection, etc.) along a State arterial highway (US 441) and proximity to Interstate 75. In addition, future development shall comply with the applicable regulations regarding protection of natural resources.

(II) Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

Response: The subject property is currently served by a State arterial roadway for full access (US Highway 441). Existing public utilities are also available to serve the site and connections to such utilities will be provided by the developer. According to the City Public Services Department, utilities are available to service future development on the parcel.

(III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

Response: The proposed future land use map amendment will include a mix of residential and non-residential land uses that will provide the appropriate designations to support a proposed companion mixed use Planned Development (PD-R / PD-COMM) zoning, which will include a master plan to interconnect the residential and non-residential uses and will include urban design standards to promote walkability. Sidewalks, trails, and bicycle facilities will encourage non-motorized travel within the mixed-use community. In addition, convenient access will prove a live, work, play environment where individuals will be able to enjoy daily activities, walk to work, and enjoy the site's amenities without the need to drive to multiple other locations.

(IV) Promotes conservation of water and energy.

Response: The proposed future land use map amendment will promote a mix of residential and non-residential uses in an area in which the City has adequate public infrastructure to support growth. Development in urbanized/urbanizing areas with appropriate water and sewer services available help promote overall conservation of water and energy. Creation of the mixed-use community also reduces Vehicle Miles Traveled (VMT) which promotes energy conservation of both fossil fuels and electric power.

(V) Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

Response: Currently, there are agricultural and silviculture operations upon the subject property. However, the property owner plans to preserve (not eliminate) their existing agricultural operation to another property in the region. In addition, many of the nearby lands abutting US Highway 441 are either developed or have significant land use entitlements which indicate that it is not the City's Comprehensive Plan long term vision for agricultural activities to occur in this area.

(VI) Preserves open space and natural lands and provides for public open space and recreation needs.

Response: The proposed map amendment will promote the provision of open space and recreation areas. Currently, the subject property does not include any dedicated public open spaces or recreation areas. The future development of the property with a residential development will be required by City regulations to provide these types of amenities.

(VII) Creates a balance of land uses based upon demands of the residential population for the nonresidential needs of an area.

Response: The proposed land use map amendment for the commercial, community commercial, and residential map designations provides an additional mix of residential non-residential land uses that complement each other along US Highway 441 in an area with centralized services available.

(VIII) Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. 163.3164.

Response: The proposed future land use map amendment will include a mix of residential and non-residential land uses at urban densities and intensities to create a development pattern that will discourage sprawl due to the locational characteristics of the subject property, including adjacency to a state arterial highway, availability of centralized public facilities, etc.

The primary indicators that a plan amendment promotes or does not promote urban sprawl are listed below. Perhaps the most common indicators of urban sprawl include leapfrog development, ribbon or strip development and large expanses of low density, single dimensional development.

Included with each of these listed indicators is a site-specific response that demonstrates the proposed comprehensive plan amendment will not result in urban sprawl:

1. *Promotes, allows or designates significant amounts of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.*

Response: The proposed amendment creates a mix of commercial, community commercial, and residential land use designations in an area of the City of Alachua suited for development due to it geographic location and availability of centralized water & sewer utilities, electric, telecommunications, police/fire protection, etc. Existing public utilities are available to serve the site and connections to such utilities will be provided by the developer. According to the City Public Services Department, utilities are available to service future development on the parcel. This will involve connection to potable water and wastewater lines.

2. *Promotes, allows or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.*

Response: The subject property is located in an urban area along US Highway 441 with significant urban development near the US 441 / I-75 interchange. To the east and west of the subject property (along US Highway 441) are properties with commercial land use & zoning designations. In addition, multiple developed properties with complimentary commercial and residential future land use designations are in the vicinity. Existing, centralized public utilities are available to serve the site and connections to such utilities will be provided by the developer.

According to the City Public Services Department, utilities are available to service future development on the parcel. This will involve connection of centralized water & sewer utilities, electric, telecommunications, etc.

3. Promotes, allows or designates urban development in radial, strip, isolated or ribbon patterns generally emanating from existing urban developments.

Response: No radial, strip, isolated or ribbon patterns will be created by this land use change. The proposed development upon the subject property is mixed-use and internally connected , thus not promoting strip development. This development form promotes consistency with the Comprehensive Plans overall goals for the land use pattern along the US 441 corridor and throughout the City of Alachua.

4. Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

Response: On site environmental resources will be protected during development plan permitting in accordance with the City of Alachua Comprehensive Plan and Land Development Regulations.

5. Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities and dormant, unique and prime farmland and soils.

Response: Currently, there are agricultural or silviculture operations within the subject property. However, the property owner plans to relocate, not eliminate, their existing agricultural operation to another property in the region. In addition, many of the nearby lands abutting US Highway 441 are either developed or have significant land use entitlements which indicate that it is not the City's Comprehensive Plan long term vision for agricultural activities to occur in this area.

6. Fails to maximize use of existing public facilities and services.

Response: Upon approval of the site's land use change and development plan permits, all existing utilities provided by the City of Alachua shall be utilized. A State arterial roadway (US 441) provides full access to the property. Centralized water & sewer utilities, electric, telecommunications are currently available to serve the subject property. Connections to such utilities will be provided by the developer. According to the City Public Services Department, utilities are available to service the parcel's future development.

7. Fails to maximize use of future public facilities and services.

Response: As stated above, future development will be required to maximize the use of future public facilities and services available to serve the site. Connections to such utilities will be

provided by the developer. According to the City Public Services Department, utilities are available to service the parcel's future. This may involve connection to *future public facilities and services*.

8. Allows for land use patterns or timing which disproportionately increase the cost in time, money and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, educational, health care, fire and emergency response, and general government.

Response: The subject property is located in the urban part of the City of Alachua abutting an existing State arterial roadway and a secondary paved road. Potable water and sanitary sewer, law enforcement, educational, health care, fire and emergency response, and general government facilities and services are available within the City of Alachua. According to the City Public Services Department, utilities are available to service the parcel's future development. Adequate vehicular capacity is currently available on the local road network to serve future development on site. Due to the immediate proximity of the site to these public facilities, the development of this site will not result in a disproportionate burden on public facilities and services.

9. Fails to provide a clear separation between rural and urban uses.

Response: The subject property is within the City of Alachua's urbanized area and located directly on US Highway 441, with availability of centralized utilities and consistent with the area's land use pattern. The transitional density gradient created by the requested Future Land Use Map amendment creates a clear separation between rural and urban uses to the south and southwest of the site.

10. Discourages or inhibits infill development or redevelopment of existing neighborhoods and communities.

Response: The proposed amendment does not discourage or inhibit infill development or redevelopment of existing neighborhoods and communities. The site's proposed development as a mix of commercial and residential uses along the US 441 corridor with public services available (water, sewer, police, fire, etc.) in an area that is urbanizing in nature based on the existing local development pattern and urban future land use designations along US 441 adjacent to the subject property.

11. Fails to encourage an attractive and functional mix of uses.

Response: The proposed land use change seeks and attractive and functional mix of uses in the immediate area, which includes commercial and residential uses.

12. Results in poor accessibility among linked and related land uses.

Response: The proposed amendment will not result in poor accessibility among linked and related uses. Future development will provide interconnectivity within the site and to the context area to the extent practicable.

13. Results in loss of significant amounts of functional open space.

Response: The proposed amendment will not result in loss of significant amounts of functional open space. Currently, the property does not provide any functional open space to the area. In addition, the development of the site shall provide at least 10% functional open space as part of any future development, per City of Alachua LDR requirements.

Comprehensive Plan Consistency

This future land use map amendment Justification Report, along with the following summary of the applicable Comprehensive Plan elements, demonstrates that the application is consistent with the City of Alachua Comprehensive Plan. The proposed land use map amendment application is consistent with the Goals, Objectives, and Policies included within the Future Land Use Element, the Transportation Element, Community Facilities Element, Conservation/Open Space Element, Intergovernmental Coordination Element, Economic Element and Capital Improvements Element

Future Land Use Element:

The following Goals, Objectives and Policies are applicable to the proposed land use change application:

Policy 1.2b: Moderate Density Residential (0 to 4 dwelling units per acre): *The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre.*

The following uses are allowed in the Moderate Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments; and,
8. Supporting community services such as schools, houses of worship, parks, and community centers.

The Commercial future land use designation is established to provide a wide range of goods and services to local consumers. The City of Alachua Comprehensive Plan Future Land Use Element describes the Commercial future land use category as shown below:

Policy 1.3.b: Commercial: *The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:*

1. *Retail sales and services;*
2. *Personal services;*
3. *Financial institutions;*
4. *Recreation and entertainment;*
5. *Tourist-related uses;*
6. *Visitor accommodations;*
7. *Commercial shopping centers;*
8. *Auto-oriented uses;*
9. *Traditional Neighborhood Planned Developments;*
10. *Employment Center Planned Developments;*
11. *Commercial recreation centers;*
12. *Office/business parks;*
13. *Limited industrial services;*
14. *Eating establishments;*
15. *Single family attached units;*
16. *Apartments and townhomes;*
17. *Duplexes and quadplexes;*
18. *Single-family and multi-family residential above first floor commercial uses;*
19. *Convention centers; and,*
20. *Supporting community services such as schools, houses of worship, parks, and community centers. Development in the Commercial land use category may occur as mixed-use or non-mixed-use.*

Policy 1.3.a: Community Commercial: *The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:*

1. *Neighborhood commercial establishments;*
2. *Residential/offices and live-work units;*
3. *Business and professional offices;*
4. *Personal services;*
5. *Financial institutions;*
6. *Retail sales and services that serve the community;*

7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;
11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;
13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use.

Consistency: As described in the policies listed above, the proposed Commercial, Community Commercial and Moderate Density Residential future land use designations are appropriate for the subject property as illustrated in the previous land use map exhibits. The proposed future land use map designations are appropriate due to its location in an area with a mix of commercial and residential development areas well suited to accommodate a mix of development types that will be compatible in nature. In addition, the property is served by all necessary public facilities to serve the site's future development.

Policy 1.3.f: *The creation/promotion of strip pattern commercial development shall be discouraged. Infill within established commercial areas is preferred over extension of a strip commercial pattern. Extension of a commercial land use designation may be considered in circumstances where the extension is compatible with the existing land uses surrounding the land or the land use categories of surrounding lands. Extensions of a commercial land use category shall not encroach into a residential area. The following criteria shall be applied to limit the impacts of commercial development upon surrounding areas:*

1. *Impacts upon traffic circulation should be anticipated and mitigated through the reservation of right-of-way for road widening and marginal access streets when appropriate.*

2. *Access points for commercial development shall minimize points of conflict by utilizing frontage roads, providing cross access between parcels, or installing shared use ingress and egress access driveways connections to roadways.*

3. *Setbacks and landscaped or other appropriate buffers shall be established to mitigate the visual impacts of commercial development upon surrounding land uses.*

4. *A sidewalk or bicycle path shall be required where appropriate, to provide convenient access to the development from surrounding areas and to reduce traffic volumes on the roadways.*

Consistency: The proposed land use map amendment is consistent with this Policy. A transitional land use gradient has been introduced between residential areas and the

Commercial land use area. The proposed map change will not create a strip pattern of development as the property is currently abutted by portions of both the east and west sides and will create a concentrated commercial node that does not create a sprawl-like pattern.

The introduction of Community Commercial, as a banded area around the core commercial area provides a de-intensifying area where stormwater management facilities and transitional landscape buffering will occur. The proposed land use map provides compatibility between the proposed Commercial future land use area and the adjacent residential areas by placing a lower intensity Community Commercial land use designation as a step-down development approach.

In addition, the overall property is proposed to be developed under one mixed use master plan, which will provide integrated traffic circulation, appropriate setbacks and buffers to provide further compatibility between uses. The site's master plan also includes extensive pedestrian/bicycle facilities to promote non-motorized means of travel throughout the mixed use community.

Objective 2.5: *Open Space Standards: The City shall utilize open space requirements to preserve the rural character of Alachua, protect natural resources, and provide spaces for people to recreate and gather.*

Policy 2.5.a: *There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.*

Policy 2.5.b: *Open space shall not be limited to unusable portions of project sites. A portion of open space shall be usable and functional.*

Consistency: **Any new development on the site shall adhere to the policies stated above that relate to open space as it relates to requirements in the Land Development Regulations.**

Objective 5.1: *Natural features: The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.*

Consistency: **As stated in the 'Environmental / Suitability Analysis' section of the report, the subject property has no environmental constraints based on an analysis of wetlands, strategic ecosystem, soils, flood zones, topography, and surrounding uses and is suitable for urban development. The proposed future land use categories provide for future use of the land that is consistent and appropriate with the site characteristics identified above.**

Objective 5.2: *Availability of facilities and services The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.*

Policy 5.2.a: *All new development shall meet level of service requirements for roadways, potable water, sanitary sewer, stormwater, solid waste, and public schools in accordance with LOS standards adopted in the elements addressing these facilities.*

Consistency: **As described in the "Public Facilities Analysis" portion of this report, adequate facilities (capacity) are currently available to serve the site and will not negatively affect the City's adopted LOS standards. The subject property abuts a State arterial roadway for full access (US Highway 441). In addition, public utilities are available to serve the site and connections to such utilities will be provided by the developer. According to the City Public Services Department, utilities are available to serve the site's future development.**

New development on the site (when proposed) will be required to meet concurrency standards as stated in the Comprehensive Plan.

GOAL 9: *Water and Wastewater Service: The City will ensure that new development within the corporate limits shall connect to the City's potable water and wastewater systems, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the Comprehensive Plan*

Consistency: **Any new development on this site will be required to connect to public potable water and wastewater facilities as indicated above.**

Objective 1.1: *Level of Service The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.*

Consistency: **An analysis of the proposed land use change impacts is included in this report (see the "Public Facilities Analysis" section of this Justification Report) based on potential land use maximum net development scenarios indicate that the proposed future land use map amendment will not result in an increase in traffic impact that will negatively affect the adopted Level of Service (LOS) standards, consistent with the Transportation Element.**

Community Facilities Element:

Goal 1: *The City shall plan for and provide adequate and economical wastewater service while protecting the environment, especially the groundwater resources.*

Objective 1.2 *New development may only occur within areas where wastewater service is available or shall be made available as a part of the proposed development. For purposes of this objective, development does not include an addition to an existing development of less than 33% of the existing floor area of the development or an addition of less than 33% of the existing impervious surface area within a five-year period.*

Goal 2: *The City will provide for solid waste disposal service in a sanitary, economic, and environmentally safe manner.*

Goal 3: *The City shall develop and maintain a stormwater management system that minimizes flooding and protects, preserves and enhances desirable water quality conditions, and, where possible, preserves and utilizes existing natural features.*

Goal 4: *The City shall provide an adequate supply of potable water to customers throughout the water service area.*

Objective 4.1 *The City shall achieve and maintain acceptable levels of service for potable water quantity and quality.*

Consistency: **Consistency with this element is demonstrated in the "Public Facilities Analysis" and the "Environmental Analysis" sections of the report. Future development on the site will be required to connect with potable water and wastewater facilities consistent with the above Goals and Objectives. Stormwater management facilities for development upon the site will be required consistent with adopted engineering standards.**

Conservation & Open Space Element:

The proposed future land use map amendment is consistent with this element. Specifically, the application is consistent with each of the following objectives listed within the element:

Objective 1.4: Air Quality The City shall institute the following measures to maintain air quality at the levels established in the National Ambient Air Quality "Standards (NAAQX).

Consistency: **There are no specific development proposals associated with this future land use amendment application, therefore there are no air quality assessments. Any future development proposal associated with the site will meet the City's air quality standards.**

Objective 1.5: Soils The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

Consistency: **As described in the Environmental Analysis section of this application, the existing soil types on site have minimal to no limitations for urban development.**

Policy 1.5.c: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Response: The subject property does not contain any known seepage slopes. In addition, the site topography will be taken into consideration with the site's future development and ultimately, the drainage design. In addition, future on-site development will include stormwater management areas complying with all applicable City, County, and water management district standards for water quality and quantity and shall be designed to minimize negative impacts on the natural terrain and topographic pattern.

Objective 1.6: Mineral Resources The City shall ensure that extraction activities do not pose a threat to natural resources, protected habitats and ecosystems, and human health.

Consistency: There are no known mineral resources within the subject property.

Objective 1.7: Geological Resources The City shall identify, protect and conserve significant geological resources and their natural functions.

Consistency: There are no known or identified geological resources on the property.

Objective 1.10: Wetlands The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Consistency: No wetlands are located on the subject property.

Objective 1.11: Open and Green Space The City shall work to preserve native ecosystems and the natural aesthetic beauty and charm of Alachua by ensuring the provision of open spaces and green linkages throughout the City, designed for the enjoyment of the citizenry.

Consistency: The required open and green space requirements shall be met upon subsequent development of the site.

Objective 1.12: Water Resources The City shall protect and conserve the quantity and quality of water resources, not only for the benefit of residents of the City, but for all in North Florida who depend on the Floridian Aquifer for drinking water, and for the benefit of all connected springs, streams, and rivers which may be impacted by the City's land use and development practices.

Consistency: The site's future development will be connected to centralized water and sewer facilities consistent with the requirements in the Community Facilities Element Policies 1.2.a, 4.1.b, and 4.2.a. Connections to utilities will be provided by the developer. According to the City Public Services Department, utilities are available to service future development on the parcel. This will involve connection to potable water and wastewater lines at the developer's expense.

Policy 1.12.d: The City shall require the following buffers for development along surface water bodies…

Response: There are no surface water bodies located on the project site.

Capital Improvements Element:

Objective 1.2: The City shall require that all decisions regarding the issuance of development orders and permits shall be consistent with the development requirements of the Comprehensive Plan, the Land Development Regulations, and that public facilities and services necessary to support such development are available while also maintaining the adopted level of service standards.

Consistency: Any new development of the subject parcel would require an analysis for availability of public facilities consistent with adopted LOS standards. Development on the parcel will be subject to development review and concurrency analysis at the time of development application.

New development or redevelopment at the site will be required to connect to the "public sanitary sewer system if abutting any street or right-of-way in which there is located a public sanitary sewer" (Section 38-137 Code of Ordinances). Policies 1.2.a and 4.1.b in the Community Facilities Element establish the requirements for connection to the public wastewater and potable water systems.

Public facilities currently are operating within the acceptable level of service standards outlined within the Comprehensive Plan (see the "Public Facilities Impact Analysis" section of this report). However, any future development plan applications would be subject to review for required capital improvements.

Public Schools Element

Objective 2.2: Level of Service Standards The City shall ensure, in coordination with the School Board, that the capacity of public schools is sufficient to support new residential subdivisions, plats and/or site plans at the adopted level of service (LOS) standards within the period covered by the five-year schedule of capital improvements.

Consistency: An analysis of the impacts to public schools facilities has been provided within 'Public Facilities Analysis' section of the Report. The proposed Future Land Use Map amendment will result in a net reduction of permitted residential density of 72 dwelling units. As such, there will be a reduction of potential student station generation and a reduced impact to public schools. Based on this, the amendment will lessen impacts on the City's public school facilities adopted LOS.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Consistency: This amendment would support additional housing within the City, thereby furthering Policy 1.1.a. The Moderate Density Residential future land use category allows for a

variety of housing types, including single family detached dwelling units, accessory dwelling units; duplexes and quadplexes and townhomes.

Recreation Element

Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Consistency: An analysis of the impacts to recreation facilities has been provided within 'Public Facilities Analysis' section of the Report. As stated, the proposed future land use map amendment will result in a reduction of recreation area demand. Based on this, the amendment will lessen impacts on recreation adopted Level of Service.

CLAY SWEGER, AICP, LEED AP

Director of Planning

Mr. Sweger is AICP-certified, LEED green building accredited, and holds a FDOT qualification to provide urban planning services. His educational training, professional certifications, and prior experience as a planner for the Alachua County Department of Growth Management give him a broad range of abilities in the field of urban planning. Mr. Sweger manages all planning projects at eda. For our private sector clients he liaises with Planning and Zoning departments across the state to bring our clients projects to fruition in the best interest of these public agencies. On the public sector side, he is the Project Manager for continuing services planning contracts with several municipal clients.

SELECTED PROJECT EXPERIENCE:

◊ **Town of White Springs Comprehensive Plan Update**
Role: Planning Consultant | Client: Town of White Springs, FL | Year: 2026-2026

Provided professional planning services related to the latest update to the Town of White Springs Comprehensive Plan. Services in this scope of work included preparation of a Data and Analysis Report, Water Supply Plan, Comprehensive Plan amendment language for multiple Elements, and an update to the Future Land Use Map.

◊ **City of Waldo Economic Redevelopment Planning Initiatives**
Role: Planning Consultant | Client: City of Waldo, FL | Year: 2026-2026

Provided professional planning services related to recent economic development initiatives for the City, including preparation of an Economic Development Plan, Strategic Implementation Plan, and amendments to the Comprehensive Plan and Land Development Plan related to the initiative.

◊ **Courthouse Complex Planned Development (PD) Zoning Amendment**
Role: Project Manager, Planner | Client: Alachua County | Year: 2023

Managed amendments to the 2001 Planned Development ordinance for the downtown Gainesville courthouse complex, spanning three city blocks. Updated approvals removed outdated conditions, addressed current site conditions, aligned with the City's Land Development Code, and accommodated future County improvements.

◊ **Columbia County Bell Road Corridor Large Scale Comp Plan Amendment**
Role: Planning Consultant | Client: Columbia County, FL | Year: 2023

Prepared planning analysis and a justification report for submittal to the Florida Department of Economic Opportunity supporting expansion of the County's Designated Urban Development Area (DUDA) and Future Land Use Map amendment for approximately 4,000 acres near the I-10/SR 41 interchange. Coordinated with economic development staff to document planned projects, funding, and market support for this strategic industrial growth initiative.

SERGIO REYES, P.E.
President / Principal-in-Charge

Mr. Reyes has been a crucial member of eda's team of engineers for over three decades. He serves as the client liaison for all of eda's public and private sector clients to ensure delivery of sound engineering solutions to their varied project needs, such as design of stormwater systems, roadways, and utility infrastructure. Mr. Reyes serves as the Project Manager for annual contracts with City of Gainesville, Gainesville Regional Utilities, City of Newberry, Alachua County, City of Alachua, and other local government agencies, providing on their behalf civil design services, project management and review of projects submitted by others.

PROJECT EXPERIENCE

◊ **Cuscowilla Fire Station**

Client: Alachua County | Year: 2023

Mr. Reyes served as the project manager for the construction of a new fire station to serve the Town of Micanopy and surrounding areas. Plans were prepared to redevelop the existing mobile home on site into a temporary fire station facility with the required site improvements (access, stormwater, other infrastructure). A later project phase was the construction of a permanent fire station building and additional site improvements required for a full fire station facility (parking, fire systems, access points, etc.) . Mr. Reyes coordinated closely with Alachua County Facilities Management, Alachua County Fire Rescue, and Alachua County Growth Management to obtain county approval and permit the project with FDOT and St. Johns River Water Management District.

◊ **Gainesville Regional Airport Terminal Expansion**

Client: Gainesville-Alachua County Regional Airport Authority | Year: 2020

Mr. Reyes provided utility design in support of a 15,200 SF terminal expansion to the Gainesville Regional Airport. He prepared full utility plans and permitted modifications through Gainesville Regional Utilities in order to improve existing service for the expansion, including design of a water main, lift station, and force main. He also facilitated permitting with the City of Gainesville, Gainesville Regional Utilities (GRU) and St. Johns River Water Management District (SJRWMD) for the overall project.

◊ **San Felasco Tech City**

Client: The Emory Group Companies | Year: Ongoing

Mr. Reyes designed, permitted, and provides ongoing construction administration for this mixed-use development on 82 acres along State Road 441 comprising 270,000 commercial square feet and 252 residential units, built and permitted in 4 phases.

MATHEW B. ROOT

AIA, CRX, MBA, OAA

CEO

PROFESSIONAL BACKGROUND

Mathew first joined the firm in 1998, giving him over thirty years of experience as a Project Manager. He currently serves as the President and CEO for MJM Architects. In this role, he manages and directs the firm's various project teams on the design, production, and construction administration of both national rollout programs and the firm's more unique and specialized projects. He also acts as Architect of Record on multiple projects throughout the United States.

As the principal-in-charge of several project teams, he has built long-term relationships with many nationally recognized market leaders in their industries, who continue to rely on MJM as a partner to their ongoing success.

EDUCATION

Bachelor of Architecture, University of Tennessee
Master of Business Administration, University of Tennessee

CERTIFICATIONS & REGISTRATIONS

Registered and Practicing Architect in Many US States
NCARB Certified
LEED AP
(CRX) Certified Retail Property Executive

PROFESSIONAL AFFILIATIONS

Green Building Certification Institute
International Council of Shopping Centers
American Institute of Architects
Ontario Association of Architects

EXPERIENCE

CANTON TOWN CENTER, CANTON, GA

Role: Principal-in-Charge, Project Lead

Mathew was the principal-in-charge and the project lead for an 840,000-sf multiple-tenant shopping center in Canton, GA. Taking over this project from another firm during the schematic design phase, the project was on an accelerated schedule to complete the design and construction document phases to meet the previously established delivery deadlines for the major retailers in the center. Working within a jurisdiction with design requirements at odds with the tenants' desires, MJM worked closely with the Owner to develop a comprehensive design that was acceptable to all stakeholders and could be delivered on time and within budget. Construction administration services were provided throughout the project's construction phase, and all buildings were delivered to the tenants on time, avoiding delay penalties.

OKATIE CROSSINGS, OKATIE, SC

Role: Principal-in-Charge, Project Lead

Mathew served as the principal-in-charge and the project lead to create a master planning package and basis-of-design pattern book for a proposed 1,000,000 sf multi-tenant mixed-use development in Okatie, SC. MJM provided overall master planning, signage guidelines, and wayfinding and created a pattern book for the Owner that was approved by the jurisdiction to use as a guideline for all future development within the Project.

BEST BUY - VARIOUS LOCATIONS

Role: Principal-in-Charge

Mathew started his career in 1998 at MJM as a Project Manager for one of the firm's new clients, Best Buy. In the 25 years since, he has served as a Project Manager, Senior Project Manager, and Principal-in-Chargefor what remains one of the firm's largest clients. MJM provides design, construction documentation, and construction administration for Best Buy for its stores, distribution centers, call centers (Great Call), and service centers (Geek Squad) across the United States. MJM has provided services for new stores, remodels, and expansions, touching nearly half of Best Buy's stores in the United States, and Prototype design services for the various store formats over the years.

LOWE'S HOME IMPROVEMENT & BLAIN'S FARM & FLEET

Role: Principal-in-Charge

Mathew has provided services as the principal-in-charge for both the Lowe's Home Improvement team and the Blain's Farm and Fleet team through their expansion efforts, having completed more than 50 stores totaling 100,000 of each over the last 20 years.

FED-EX GROUND - VARIOUS LOCATIONS

Role: Principal-in-Charge

Mathew has served as principal-in-charge for several of the firm's Fed-Ex Ground projects. As principal-in-charge, he assists the team in the due diligence process, including code analysis and entitlements, provides quality control, and serves as Architect of Record.

KEITH L BUTTS, PE

352-258-2710
klbpe1@gmail.com

Gainesville, Florida

Professional Summary

A highly experienced Civil Engineer with more than 30 years of expertise spanning multiple disciplines, including geotechnical engineering, construction materials testing and inspections. Adept at managing complex projects, ensuring quality control, and conducting thorough testing to ensure structural integrity. Proven track record of delivering successful projects within scope, time, and budget while adhering to industry standards and safety regulations. Strong analytical snd problem-solving skills, with a deep understanding of soil mechanics, foundation design, and material behavior. Committed to innovative solutions and continuous professional development, with a reputation for fostering collaborative relationships with clients, contractors, and stakeholders.

Experience

Regional Manager, Branch Manager, UES Professional Solutions. Gainesville, FL — 2006-Present

- Responsible for the operation and oversight of multiple offices
- Creates and manages up to $6 million budgets, financial statements, and office accounts receivable and payable.
- Interviews, hires and manages employees, conducts staff reviews, and ensures effective performance management for 50 plus professional, technical and office staff.
- Oversees licensed professionals, performs engineering analysis, prepares reports and conducts quality assurance reviews of engineering reports to ensure they meet company standards and client expectations with a focus on engineering standard of care.
- Mentors young engineers and managers across four offices, providing guidance, support, and professional development to foster leadership skills and technical expertise. Creates a collaborative learning environment, helping emerging leaders navigate complex challenges, and ensuring the growth of high-performing teams. Uses effective mentorship and management strategies to develop future leaders, fostering career progression and success.
- Develops and maintains strong relationships with both public and private sector clients, while also directing and coordinating sales and business development staff to drive growth.
- Project administration and oversight including management of geotechnical explorations, construction materials testing and inspections, and environmental assessments, ensuring all projects are executed efficiently, on time, and within budget.

Regional Manager, Giles Engineering Associates, Inc., Sanford, FL — 2002-2006

- Established and grew Orlando office into a successful, multi-disciplined operation offering geotechnical, environmental, and construction testing services.
- Created and managed office budget
- Oversaw a diverse team of staff professionals, office and field personnel, ensuring efficient project execution and adherence to high-quality standards.
- Provided mentorship and guidance to young engineers, helping them develop leadership skills and advance in management roles across two additional offices.
- Played a pivotal role in fostering a collaborative, growth-focused environment while driving operational excellence and ensuring the successful delivery of services to clients.

District Manager, Branch Manager, Staff Engineer, Professional Service Industries, Inc. (PSI), Tampa, FL and Sarasota, FL — 1994-2002

- Managed Construction Services Department in Tampa
- Oversaw three additional offices providing multiple service lines, ensuring the smooth operation of all departmental functions across locations.
- Managed office and department budgets
- Reviewed and wrote engineering reports across various disciplines, ensuring technical accuracy and adherence to industry standards.
- Provided strong leadership and mentorship to staff professionals, supporting their career development and fostering a culture of excellence.
- Collaborated closely with the business development team to attract new clients, maintain strong relationships with existing clients, and drive business growth.

OPTIMUS TRAFFIC SOLUTIONS, LLC

Brian Snyder, PE

Principal Engineer & Founder – Optimus Traffic Solutions, LLC
1925 SW 49th Place
Gainesville, FL 32608
352-339-2938 / briansnyder@optimustraffic.com

PROFESSIONAL SUMMARY

Professional Engineer with 19 years of experience in traffic operations, traffic signal design, and transportation planning across public and private-sector roles. Former manager of Marion County's award-winning Traffic Management Center and experienced project manager for traffic impact studies, ICE reports, long-range planning, and permitting. Principal Engineer and Founder of Optimus Traffic Solutions, providing traffic engineering throughout Florida.

WORK HISTORY

Principal - Optimus Traffic Solutions, LLC **January 2025 – Current**

- Prepared Traffic Impact Analyses for private development projects, including trip generation, distribution, and operational analysis.
- Managed quality control of city-wide traffic count program.
- Intersection planning along corridor design.

Project Manager – CHW an NV5 Company **October 2016 – December 2024**

- Prepared traffic studies including; traffic impact analyses, speed studies, Intersection Control Evaluations (ICE)
- Designed roadway improvements
- Designed traffic signals
- Prepared Long Range Transportation Plan for local government

Project Manager II – Marion County Office of the County Engineer **April 2007 – October 2016**

- Implemented and managed Marion County's award winning, $1.5M Traffic Management Center, improving corridor coordination and real-time operations
- Coordinated traffic signals along corridors
- Reviewed and approves all developer's Traffic Impact Studies and Site Plans
- Voting member of the Transportation Advisory Committee of the Transportation Planning Organization
- Designed and provides specifications for traffic signals and traffic signal modifications
- Taught Intermediate Level Maintenance of Traffic class for County Employees
- Supervised staff as Interim County Traffic Engineer
- Worked in the Stormwater Division, Asset Management Division, and Engineering Services Division as an Engineer Trainee

EDUCATION

The Walmart Effect

New research suggests that the company makes the communities it operates in poorer —even taking into account its famous low prices.

No corporation looms as large over the American economy as Walmart. It is both the country's biggest private employer, known for low pay, and its biggest retailer, known for low prices. In that sense, its dominance represents the triumph of an idea that has guided much of American policy making over the past half century: that cheap consumer prices are the paramount metric of economic health, more important even than low unemployment and high wages. Indeed, Walmart's many defenders argue that the company is a boon to poor and middle-class families, who save thousands of dollars every year shopping there.

Two new research papers challenge that view. Using creative new methods, they find that the costs Walmart imposes in the form of not only lower earnings but also higher unemployment in the wider community outweigh the savings it provides for shoppers. On net, they conclude, Walmart makes the places it operates in poorer than they would be if it had never shown up at all. Sometimes consumer prices are an incomplete, even misleading, signal of economic well-being.

In the 1990s and early 2000s, before tech giants came to dominate the discourse about corporate power, Walmart was a hot political topic. Documentaries and books proliferated with such titles as *Wal-Mart: The High Cost of Low Price* and *How Walmart Is Destroying America (And the World)*. The publicity got so bad that Walmart created a "war room" in 2005 dedicated to improving its image.

When the cavalry came, it came from the elite economics profession. In 2005, Jason Furman, who would go on to chair Barack Obama's Council of Economic Advisers, published a paper titled "Wal-Mart: A Progressive Success Story." In it, he argued that although Walmart pays its workers relatively low wages, "the magnitude of any potential harm is small in comparison" with how much it saved them at the grocery store. This became the prevailing view among many economists and policy makers over the next two decades.

Fully assessing the impact of an entity as dominant as Walmart, however, is a complicated task. The cost savings for consumers are simple to calculate but don't capture the company's total effect on a community. The arrival of a Walmart ripples

through a local economy, causing consumers to change their shopping habits, workers to switch jobs, competitors to shift their strategies, and suppliers to alter their output.

Annie Lowrey: How the low minimum wage helps big companies

The two new working papers use novel methods to isolate Walmart's economic impact —and what they find does not look like a progressive success story after all. The first, posted in September by the social scientists Lukas Lehner and Zachary Parolin and the economists Clemente Pignatti and Rafael Pintro Schmitt, draws on a uniquely detailed dataset that tracks a wide range of outcomes for more than 18,000 individuals across the U.S. going back to 1968. These rich data allowed Parolin and his co-authors to create the economics equivalent of a clinical trial for medicine: They matched up two demographically comparable groups of individuals within the dataset and observed what happened when one of those groups was exposed to the "treatment" (the opening of the Walmart) and the other was not.

Their conclusion: In the 10 years after a Walmart Supercenter opened in a given community, the average household in that community experienced a 6 percent decline in yearly income—equivalent to about $5,000 a year in 2024 dollars—compared with households that didn't have a Walmart open near them. Low-income, young, and less-educated workers suffered the largest losses.

In theory, however, those people could still be better off if the money that they *saved* by shopping at Walmart was greater than the hit to their incomes. According to a 2005 study commissioned by Walmart itself, for example, the store saves households an average of $3,100 a year in 2024 dollars. Many economists think that estimate is generous (which isn't surprising, given who funded the study), but even if it were accurate, Parolin and his co-authors find that the savings would be dwarfed by the lost income. They calculate that poverty increases by about 8 percent in places where a Walmart opens relative to places without one even when factoring in the most optimistic cost-savings scenarios.

But their analysis has a potential weakness: It can't account for the possibility that Walmarts are not evenly distributed. The company might, for whatever reason, choose communities according to some hard-to-detect set of factors, such as deindustrialization or de-unionization, that predispose those places to growing poverty in the first place. That's where the second working paper, posted last December, comes in. In it, the economist Justin Wiltshire compares the economic trajectory of counties where a Walmart did open with counties where Walmart *tried* to open but failed because of local resistance. In other words, if Walmart is selecting locations based on certain hidden characteristics, these counties all should have them. Still, Wiltshire arrives at similar results: Workers in counties where a Walmart opened experienced a greater decline in earnings than they made up for with cost savings, leaving them worse off overall. Even more interesting, he finds that the losses weren't limited to workers in the retail industry; they affected basically every sector from manufacturing to agriculture.

What's going on here? Why would Walmart have such a broadly negative effect on income and wealth? The theory is complex, and goes like this: When Walmart comes to town, it uses its low prices to undercut competitors and become the dominant player in a given area, forcing local mom-and-pop grocers and regional chains to slash their costs or go out of business altogether. As a result, the local farmers, bakers, and manufacturers that once sold their goods to those now-vanished retailers are gradually replaced by Walmart's array of national and international suppliers. (By some estimates, the company has historically sourced 60 to 80 percent of its goods from China alone.) As a result, Wiltshire finds, five years after Walmart enters a given county, total employment falls by about 3 percent, with most of the decline concentrated in "goods-producing establishments."

From the December 2011 issue: How Walmart is changing China

Once Walmart has become the major employer in town, it ends up with what economists call "monopsony power" over workers. Just as *monopoly* describes a company that can afford to charge exorbitant prices because it lacks any real competition, *monopsony* describes a company that can afford to pay low wages because

workers have so few alternatives. This helps explain why Walmart has consistently paid lower wages than its competitors, such as Target and Costco, as well as regional grocers such as Safeway. "So much about Walmart contradicts the perfectly competitive market model we teach in Econ 101," Wiltshire told me. "It's hard to think of a clearer example of an employer using its power over workers to suppress wages."

Walmart's size also gives it power over the producers who supply it with goods. As Stacy Mitchell, a co–executive director of the Institute for Local Self-Reliance, recently wrote in *The Atlantic*, Walmart is well known for squeezing its suppliers, who have little choice but to comply for fear of losing their largest customer. Selling to Walmart at such low prices can force local suppliers to lay off workers and pay lower wages to those who remain. They also naturally try to make up for the shortfall by charging their other customers higher prices, setting off a vicious cycle that allows Walmart to entrench its dominance even further.

The most direct upshot of the new research is that Walmart isn't the bargain for American communities that it appears to be. (When I reached out to Furman about the new research, he said he wasn't sure what to make of it and suggested I talk with labor economists.) More broadly, the findings call into question the legal and conceptual shift that allowed Walmart and other behemoths to get so huge in the first place. In the late 1970s, antitrust regulators and courts adopted the so-called consumer-welfare standard, which held that the proper benchmark of whether a company had gotten too big or whether a merger would undermine competition was if it would raise consumer prices or reduce sellers' output. In other words, the purpose of competition law was redefined as *the most stuff possible, as cheaply as possible*. But as the new Walmart research suggests, that formula does not always guarantee the maximum welfare for the American consumer.

The outgoing Biden administration, with its focus on reviving antitrust, recognized this. Its most recent enforcement guidelines, for example, direct the government to take into account a merger's effect on workers, not just consumers, and the antitrust agencies have included such claims in multiple lawsuits. The question is whether the

incoming Trump administration, which has sent mixed messages on corporate consolidation, will follow the same path.

Recent history shows the political danger in threatening low consumer prices. The public's reaction to the inflation of the past few years suggests that many Americans would rather be slightly poorer but have price stability than be richer but with more inflation. That will tempt policy makers to prioritize low prices above all else and embrace the companies that offer them. But if Walmart's example reveals anything, it is that, in the long term, low prices can have costs of their own.

Support for these stories was provided in part by the William and Flora Hewlett Foundation. The Atlantic *maintains full editorial control over its content.*

1 Introduction

The Farmlands Mixed Use site is anticipated to include the following land uses under the buildout condition:

- 203 Single Family Detached Homes
- 423,400 SF Shopping Center
  - Main Shopping Center – 345,000 SF
  - Future Retail, Northwest Corner of Site – 78,400 SF
- 3 Sit Down Restaurants +/- 5,500 SF
- 3 Fast-food Restaurants with Drive-through +/- 2,500 SF
- 1 Coffee Shop with Drive-through +/- 2,000 SF
- Gasoline/Service Station with 16 fueling positions
- 1 Auto Service Center +/- 4,000 SF

A preliminary concept plan is provided in **Attachment A**.

Access to the site will be provided via multiple connections along HWY 441 which will be coordinated with FDOT, City of Alachua and adjacent development requirements. The current access plan is provided below, however, it is understood modifications may occur to the access types and locations as coordination efforts continue with FDOT, the City of Alachua and the Briarwood Town Center developer to the north:

- Access A - Directional median opening with left outs prohibited, located approximately 1,100 FT east of NW 188th Street
- Access B - Full median opening site access, located approximately 1,915 FT east of NW 188th Street
- Access C - Right-in/right-out access centered between Access B and Access D
- Access D - Full median opening site access, located approximately 760 FT west of the intersection of NW 164th Lane

1.1 Analysis Timeframe

The site will be built out in phases with the full site buildout anticipated in 2032. **Table 1** provides the estimated buildout schedule of the development.

Table 1 - Buildout Schedule

Figure 2 illustrates the roadway segment capacity utilization under the buildout condition. As shown in **Table 7** and illustrated in **Figure 2**, the addition of the Farmlands Mixed Use project trips, causes the HWY 441 segment (4107, 6) from I-75 to CR 235A to exceed the adopted level-of-service capacity. This is the only segment that exceeds the level-of-service capacity under the buildout condition. The City of Alachua has seen historical traffic volume increases, with only limited segments functioning at, or near, current adopted levels-of-service, as illustrated in **Figure 2**. Strategic Planning and transportation techniques will ensure the City's quality of life elements are maintained as growth occurs throughout north central Florida.

It is important to note that net new project trips are conservatively high. A portion of the project trips from areas to the west such as High Springs, will be trips that are currently traveling past this site to retail and restaurant destinations in the City of Alachua and Gainesville, and will instead travel to this new destination and not travel east of this site. For this reason, the impact of the Farmlands Mixed Use site is not expected to be as significant as illustrated in **Table 7**. It is difficult to forecast the portion of trips that will be removed from the segment (4107, 6), however, this can be determined by collecting counts after a portion of the commercial property is developed. This data collection may be recommended in the follow-up intersection analysis, to assess the actual impacts of the development. Additionally, the majority of the project trips from this development will be to/from the retail and restaurants. Unlike residential land uses that add trips, these land uses essentially absorb instead of create trips in the roadway network and reducing the drive time for the local traveling public.

The maximum service volumes established by the City of Alachua are based on the FDOT Quality/Level of Service Handbook. The latest edition of this handbook states multiple limitations of using Generalized Service Volume Tables (GSVTs) such as the limitation noted below from Section 4.4 of the handbook:

"The GSVTs cannot be relied upon when approaching LOS E and LOS F thresholds, because of operational fluctuations at these thresholds. In these situations, analysts should perform more detailed analysis."

Because the buildout volumes exceed the adopted level-of-service, it is recommended that a more detailed analysis is provided along the HWY 441 roadway segment (4107, 6). Intersection analysis at the signalized intersections along this corridor will provide the level-of-service of the HWY 441 through movements at each intersection which is needed to determine the appropriate modifications to maintain an acceptable level-of-service. It is recommended that this detailed intersection analysis is included in the follow-up Operational Analysis.

Cc: Planning Division
Subject: No to Farmlands: Staff Shared Legislative Decisions Are a Choice

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Sent: Monday, June 8, 2026 1:09 PM
To: Planning Division
Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use

Please preserve our quality of life now and for future generations

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Patti Marcheret

Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use

Here we go again! Think think think then think again. More traffic congestions, wear & tear on all ready horrible roads, more trash. This is a NI BRAINER! No no no. Do not allow this.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Diane Saunders

Subject: 6/8 No to Farmlands: Protect Small Businesses

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Please vote no.

Jessica Sanchez

Subject: From a resident who lives on this street, please don't do this to us!!

My family and I live on our family's land that we have owned for the last 50 years. It is special to us. The stars. The birds, the sounds. Beautiful nature. Fresh well water. Growing our own vegetables and enjoying this beautiful setting. To us and our neighbors, this area is an inviting retreat. We don't want more traffic, noise and light pollution. We have seen a dramatic increase in traffic over the past t years and 441 is often bumper to bumper already from this intersection to the interstate. We worry about the environmental repercussions, pollution to air and ground, the water and sewer impact in a small area. We weren't built for this. Our area isn't meant for this. This isn't our vision. There's already a huge burden on this land with the existing developments and tower hill project, new neighborhoods that seemingly pop up overnight. We can't do this to our beautiful land. We are intentionally developing a food forest to pass on to our children. It is being directly threatened.

Subject: June 8th Vote: Farmlands Ordinances 26-09 and 26-10

Dear Mayor and Alachua City Commissioners,

I support the Farmlands Shopping Center because it will make everyday life more convenient for local families while providing important benefits for our community.

Many residents often have to drive to Gainesville for shopping, groceries, and other errands. Bringing more stores and services to Alachua would save time, reduce travel, and allow residents to spend more of their money locally.

The project would also generate significant new tax revenue for the city. The property currently generates about $15,900 per year in property taxes, but the Farmlands development is projected to generate more than $1.4 million annually. That additional revenue can help support city services, infrastructure, and other community needs without increasing taxes on local residents. I encourage you to vote in favor of the Farmlands Shopping Center.

Chris Beatty

Mayor and Commissioners,

As an Alachua resident, I support the Farmlands Shopping Center because it will bring jobs, new investment, and much-needed shopping and services closer to home.

Many residents currently have to travel to Gainesville for everyday needs. This project would provide more convenient options locally while creating approximately 1,200 permanent jobs, more than 1,290 construction jobs, and over $151 million in private investment.

The development would also generate significant new tax revenue for the city, helping fund local services without increasing taxes on residents.

I encourage you to vote in favor of the Farmlands Shopping Center and support this opportunity for Alachua's future.

Subject: 6/8 No to Farmlands: Protect Small Businesses

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Dear Honorable Mayor and Respected Commissioners,

Regarding the June 8 agenda item known as "Farmlands" and the request for a Future Land Use Map change. I respectfully ask that you "vote NO" on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location will draw regional traffic - well beyond what the surrounding roads are designed to reasonably handle.

This is a legislative decision, which means the Commission is not required to approve.

US 441 already experiences heavy daily congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

More concerning is that large commercial centers could pull activity away from downtown Main Street and affect the local charm that defines our community.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and thoughtful consideration!

Respectfully,

John Havlik

Subject: Support for the Farmlands Shopping Center Project

The Florida State Hispanic Chamber of Commerce has long championed policies and projects that create economic opportunity, strengthen local communities, and support small business growth across Florida. Representing more than 604,000 Hispanic-owned businesses that contribute over $90 billion annually to our state's economy, we understand the importance of responsible development that creates jobs, expands commerce, and improves quality of life.

The proposed Farmlands Shopping Center in Alachua represents exactly the kind of investment that can help communities thrive. The project is expected to create approximately 1,200 permanent jobs and more than 1,290 construction jobs, providing meaningful employment opportunities and generating economic activity that will benefit local families and businesses alike.

Beyond its economic impact, the development will provide residents with greater access to shopping, services, and everyday necessities closer to home. For working families, seniors, and residents who currently travel outside the community for many basic needs, the project offers increased convenience while keeping more consumer spending and business activity within Alachua.

The Farmlands Shopping Center will also deliver significant long-term benefits to the community through increased tax revenue. The project is projected to generate more than $1.4 million annually in property taxes, substantially increasing resources available for local schools, city services, libraries, and other community priorities, all without raising taxes on residents.

Projects like this help create stronger local economies, support entrepreneurs, attract investment, and provide communities with the resources they need to grow and prosper. For these reasons, the Florida State Hispanic Chamber of Commerce respectfully urges you to support the Farmlands Shopping Center.

Best,

Julio Fuentes
President

Subject: Support for The Farmlands Commercial Application

I am writing to express my strong endorsement for The Farmlands commercial application and to respectfully urge a favorable vote. This project presents a well-considered and meticulously planned opportunity to enhance shopping and dining options for residents across the Alachua area. As someone who frequents Alachua for work 5-6 days a week, I have observed the limited shopping and dining establishments available in the area. It is important to note that the proposed development will not detract from the existing downtown businesses. A pertinent example is Gainesville, where despite substantial commercial growth along Archer Road, the downtown area continues to flourish. Furthermore, the Farmlands project is notably less intensive than what the current zoning permits. It is worth highlighting that the entire stretch of 441 in this vicinity is already designated for commercial use, and there are no residential properties adjacent to the Farmlands commercial site or the additional property. In light of these considerations, I firmly believe that this project will bring significant advantages to the community. I would also like to draw attention to the fact that the individuals attending the meetings in person often express opposition to various projects. For instance, they opposed the Publix/Lowes development, yet many of them now patronize these establishments. It is essential to recognize that there are numerous supporters of this project who may not be present at these meetings. Thank you for taking the time to consider my perspective.

Subject: Vote YES on Farmlands

I am writing to express my support for The Farmlands commercial application and to respectfully encourage a YES vote. This project represents a well-planned opportunity to expand shopping and dining options for residents throughout the Alachua area. For someone who works in Alachua 5-6 days per week it really lacks shopping/restaurants.
The proposed development will not diminish the downtown businesses. Gainesville provides a clear comparison: despite significant commercial growth along Archer Road, its downtown continues to thrive. The Farmlands project is also far less intensive than what current zoning would allow.
That entire stretch of 441 in this area is already zoned for commercial use, and no existing residences border the Farmlands commercial property or the additional property.
For these reasons, I believe this project offers meaningful benefits to the community.
The only people that attend the meetings in person come to oppose everything. They opposed the Publix/Lowes yet all shop there now?
Please understand there are more people who wants this project they just don't attend the meetings!
Thank you for your time and consideration.

Sent: Thursday, June 4, 2026 10:41 AM
To: Planning Division
Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use

Stop trying to ruin the reason we live out here. Not to mention the increase in already terrible traffic.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Chris Greene

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

Mainly I'm concerned about the heavy traffic and trucks it will bring to the US highway 235 where there have already been multiple car accidents in front of the school Alachua Learning Center. More cars means more chances of reckless drivers and accidents!

Also, If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? Subject: The Farmlands

City Commissioners,

I respectfully urge you to vote in favor of the Farmland project and support responsible growth in our community. This development will create new jobs, generate additional tax revenue, and strengthen our local economy.

Currently, many residents travel outside the city to shop and spend money elsewhere. By expanding local retail and commercial opportunities, we can keep more of those dollars within our community while providing greater convenience for residents. Supporting projects like Farmland helps ensure continued economic growth and enhances the quality of life for those who live and work here.

Thank you for your consideration, and I encourage you to vote yes on the Farmland project.

Best regards,

Paul Norris

Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use

I live in this area and the light at 441 /235A is already congested and there is not a crosswalk going over 441 so children and sometimes workers try to cross that street which can be dangerous. In addition, there is not enough traffic planning in that area to not cause this to be a heavy traffic area and residence, not being able to leave or returned to their homes.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I have experienced this personally with rush hour backed up to Lowe's from Santa Fe HS headed north and the exact opposite headed south in the mornings. This corridor is a main thoroughfare for several counties in the area and the only alternative to I-75 which has frequent crashes and other longstanding issues.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use

Don't build here!!!

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Subject: 6/8 No to Farmlands: Protect Small Businesses

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

How about water supply and the ability to process waste water. I read that the City is already at the 85% mark and needs help. Why would we want to burden the water process, and even further, in the middle of a draught. There is already enough uncontrolled development in my area. Off of 441 and 156, there is a huge acreage of trees just cut down, and I saw plans for 100 homes to be built. Where are the roads and water coming from? Road 235 already has had many accidents, and crowding with more traffic will not help safety. What about roads? Why is heavy industrial equipment being allowed where there is barely small paved road (156). This area also creates a fire hazard, with huge piles of dead trees all over. This is in addition to fire hazard of another 25 acres near me which was clear cut about 2 years ago, and huge piles of just ready to burn trees and brush still sits there.

I don't see how you can vote for more development when current projects are likely going to damage water supply capacities, overstress roads not meant for heavy traffic, and reduce our quality of life by adding yet more cement in place of trees.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Also, stress of water supply at a time of draught. We are asked to reduce our water use at our homes. Why are we asked to conserve, while huge building projects are going to consume more than thousands of homes.

Thank you for your time and consideration.

Sincerely,

Dhira Crunkilton

Subject: The Farmlands

I am writing to express my strong support for The Farmlands commercial application and to respectfully encourage a **YES vote.** This project represents a thoughtful, well-planned opportunity to expand shopping and dining options for residents throughout the Alachua area.

The proposed development will not diminish the vitality of downtown businesses. The Farmlands project is also far less intensive than what current zoning would allow.

This is a far better solution than multiple separate entrances and unrelated projects along the corridor. The entire stretch of 441 in this area is already zoned for commercial use, and no existing residences border the additional Farmlands commercial property.

For these reasons, I believe this project offers meaningful benefits to the community while aligning with responsible growth and existing land-use plans.

Thank you for your time and consideration.

Subject: Farmlands commercial project

As a restaurant owner in downtown Alachua, I believe more commercial/shopping will benefit everyone. Please vote YES for The Farmlands commercial project. Keep in mind the supporters do not show up only the people who oppose everything in Alachua.

The developer has put together a well-designed plan that will serve the residents very well. The part time and full-time local jobs starting from day one will benefit the local community. The Santa Fe high school students will be able to have jobs while in school.

Instead of having several 441 openings where people turn into the different businesses you can have a more comprehensive plan. It's all zoned commercial on that 441 strip. It will all get developed, will it be with 1 plan or all separately. All done together at the same time is significantly better.

This will greatly help the city when the property taxes go away in the near future!

VOTE YES for this project.

Subject: 6/8 No to Farmlands: Protect Small Businesses

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Sincerely,

Carol White

Cc:	Planning Division
Subject:	June 8th agenda. No to Farmlands: Protect Small Businesses

Dear Mr. Mayor and Commissioners,

I am writing concerning the June 8 agenda item referred to as Farmlands and the requested amendment to the Future Land Use Map. I respectfully urge you to vote against this proposal in its current form.

Should this site ultimately be developed with a major national retailer, such as Walmart, it has the potential to attract traffic from throughout the region. The resulting increase in vehicle volume could place substantial strain on surrounding roadways that are already heavily utilized.

Because this is a legislative matter, the Commission is under no obligation to approve the request.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained that, outside of quasi-judicial proceedings, elected officials retain the discretion to determine whether a proposal is appropriate for the community. As he stated in the meeting recording: "…As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." I respectfully ask that you take my concerns into account when making that decision.

US 441 already experiences significant traffic congestion, and additional regional draw could further impact travel times, roadway safety, and overall quality of life for residents. Development of this magnitude could also alter the small-town atmosphere that many people value and that makes Alachua unique.

Additionally, I am concerned that a large-scale commercial development could divert customers and economic activity away from downtown Main Street and High Springs,

potentially affecting the locally focused character and businesses that contribute to the area's identity.

If the Commission concludes that this proposal is not the right fit for this location, you have the authority to deny the request or encourage the applicant to return with a proposal of a more appropriate scale and intensity.

Key considerations include:

• Traffic – Increased regional traffic on an already busy US 441 corridor

• Scale – A substantial expansion in commercial intensity for the area

• Community Impact – Potential effects on downtown Main Street, High Springs, and the character of the community

Thank you for your time, service, and thoughtful consideration of this matter.

To: Planning Division
Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use

Not needed; enough heavy traffic of US 441

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

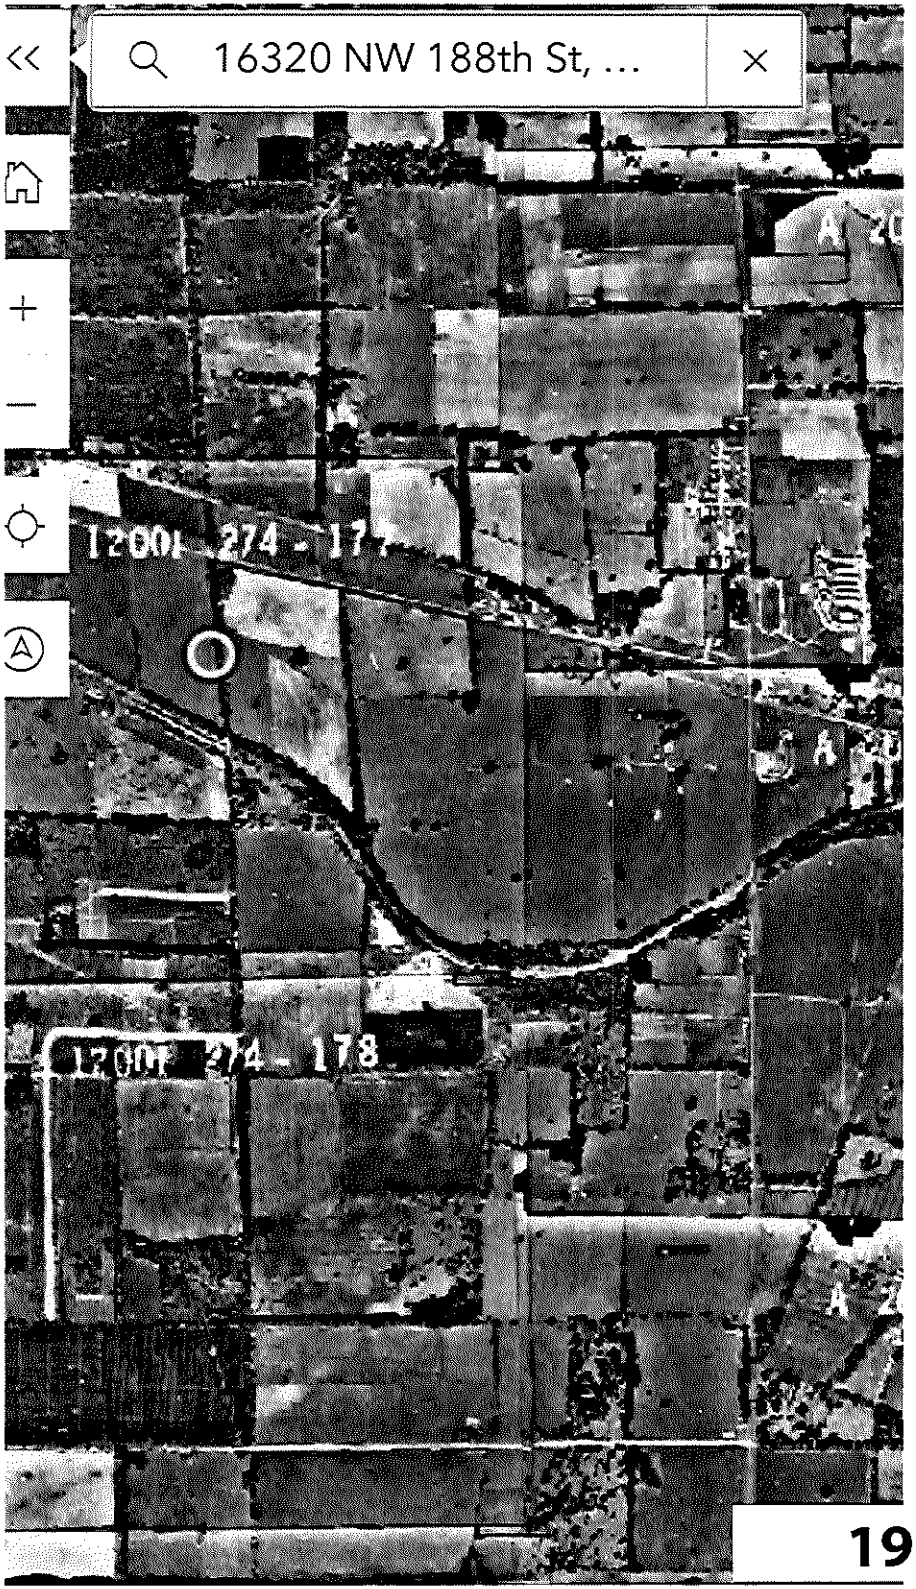
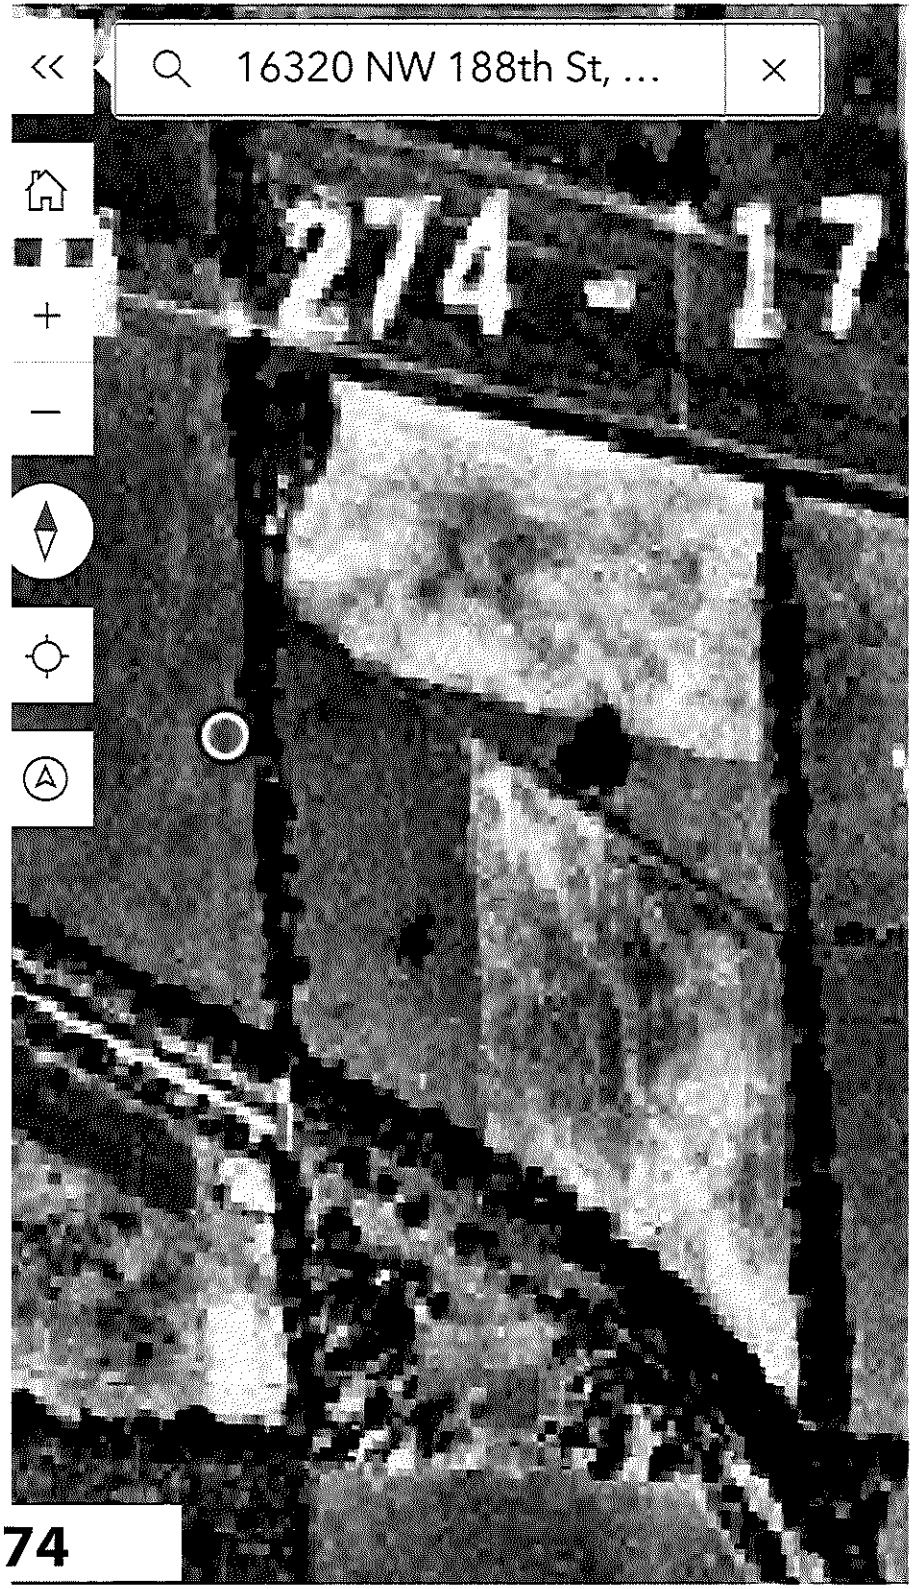
To: Planning Division
Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use



We moved here because it was further away from the Gainesville traffic. Please don't bring it back to turn this area into that.



Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.

PROFESSIONAL QUALIFICATIONS AND EXPERIENCE

GeoSolutions Inc., Gainesville, Florida: President and Principal Hydrogeologist, September 1986 to March 2017

Founded and managed hydrogeologic and engineering consulting firm specializing in environmental consulting, remediation design and implementation, and regulatory reporting and compliance.
Scope of professional work also includes: hydrogeologic investigations; geophysical investigations; aerial photo interpretation; fracture trace analysis; karst groundwater dye trace investigations, spring watershed delineations, groundwater quality assessments; hazardous waste assessments and cleanups; landfill permitting and closure monitoring; expert testimony, sewage treatment plant permitting/geotechnical design; sinkhole investigations; storage tank closure audits; contamination assessments, remedial actions; and real estate transactional audits;

Handex Corporation, Odenton, Maryland: Senior Hydrogeologist, March 1986 to September 1986

Responsibilities involved supervising and coordinating hydrocarbon groundwater contamination assessments and remediation operations.

Groundwater Technology, Inc., A Division of Oil Recovery Systems, Tampa, Florida: Senior Hydrogeologist and Manager, Southeastern Regional Office, Tampa, April 1984 to March 1986

Developed and managed the southeastern regional consulting office for ORS-GT. Hired and supervised a staff of 16. Designed, installed, and monitored product recovery and groundwater quality restoration programs for gasoline spills; directed hazardous waste site investigations, assessments and buried drum removals; and applied geophysical methods for geologic and waste site mapping as well as performed environmental permitting and consent order development for industrial clients.

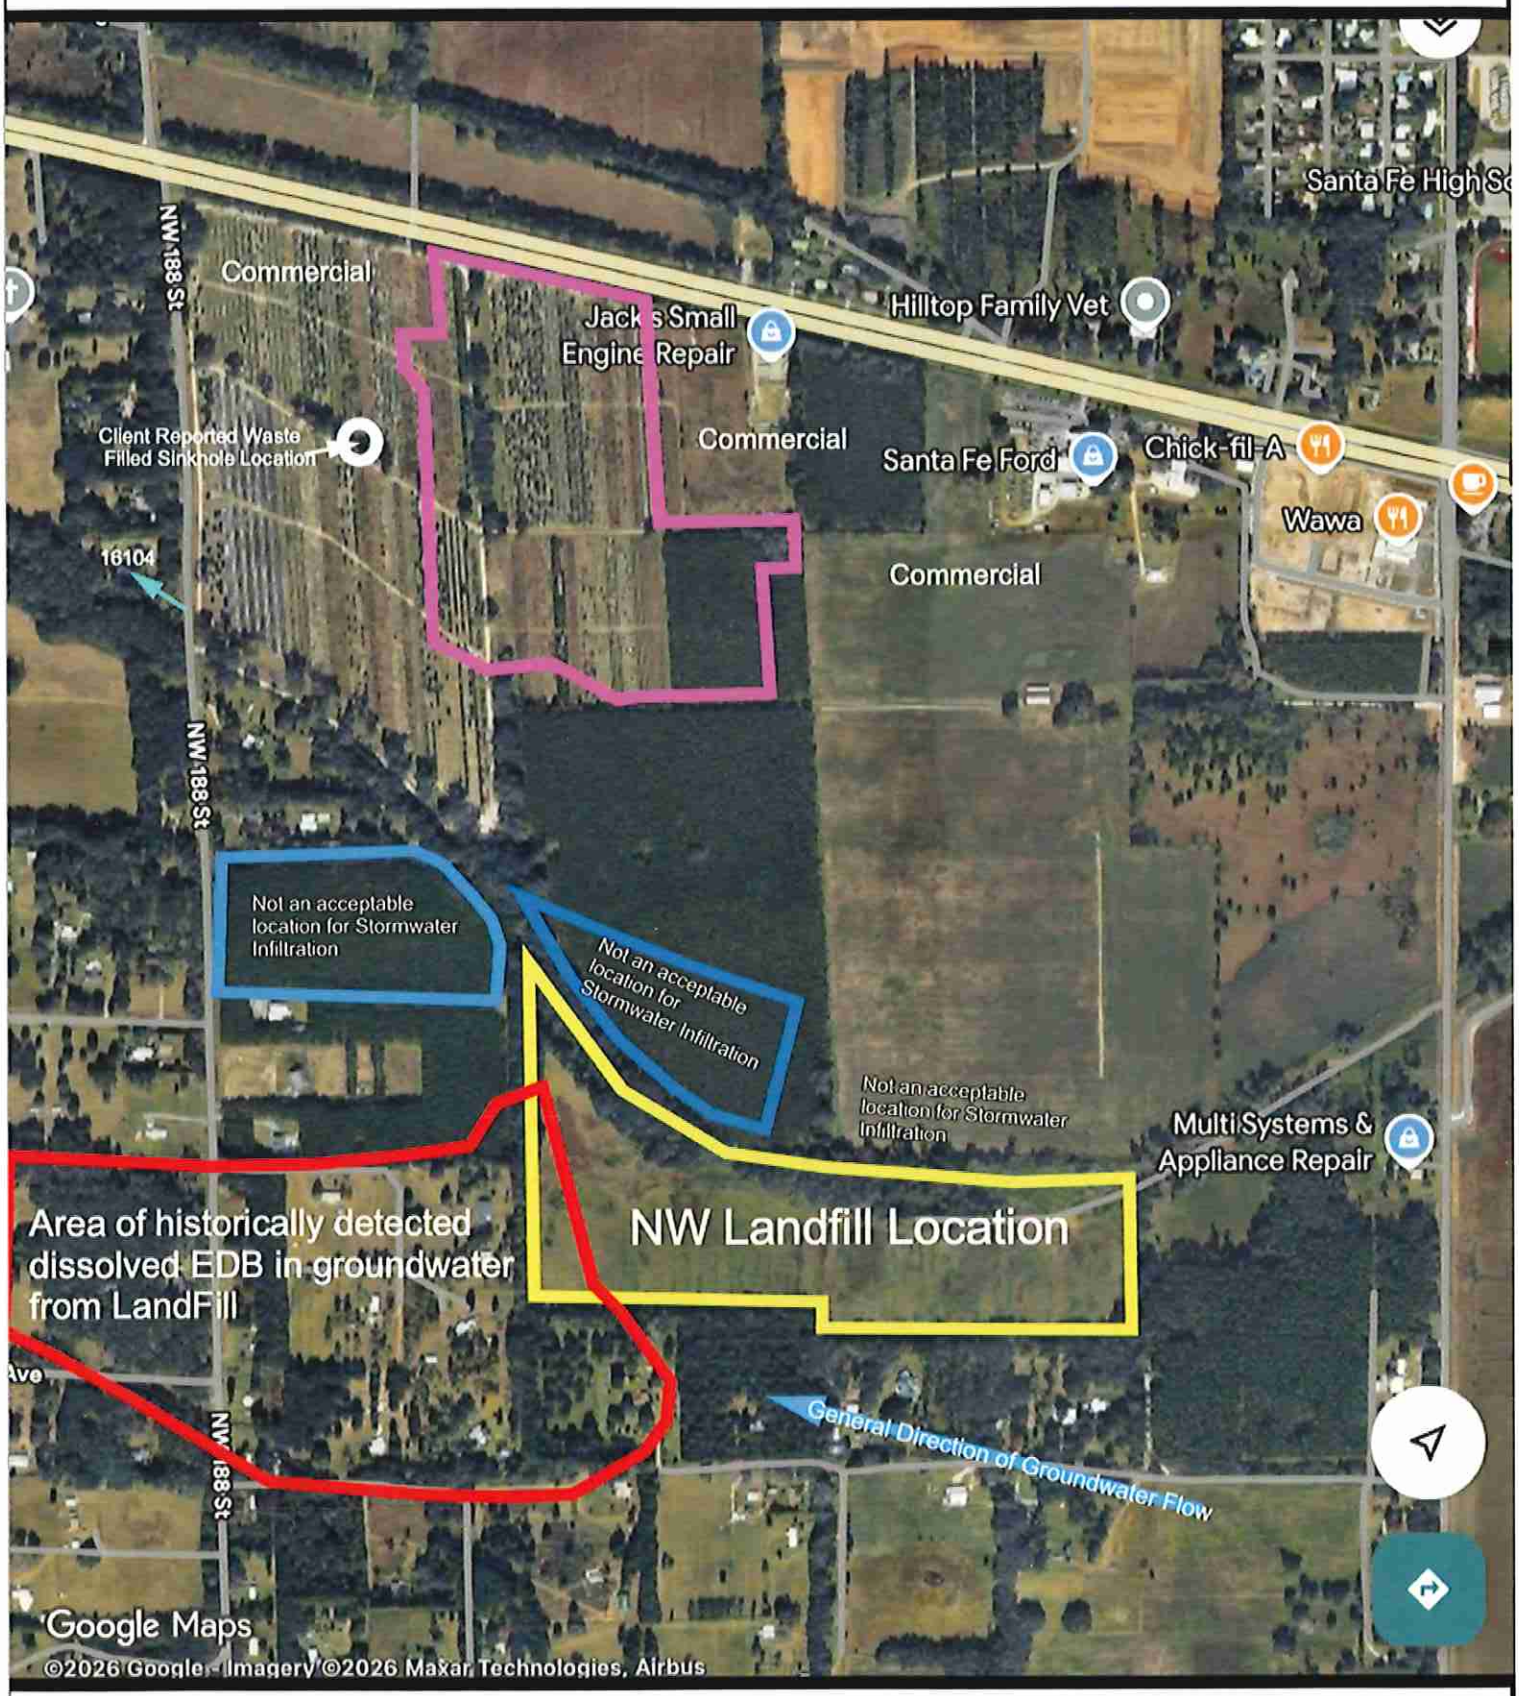
Florida Department of Environmental Regulation, Tallahassee and Tampa, Florida: 1978 - 1984

Hydrogeologist, DER Southwest District, Tampa, Oct. 1982 to April 1984
Technical advisor on all groundwater issues; expert witness in circuit court and administrative hearings; groundwater program development; permit and enforcement case review; site investigations and assessment as well as staff training.

--Hydrogeologist, DER Groundwater Section, Tallahassee - Feb. 1980 to Oct. 1982
Responsible for hydrogeologic and geophysical field investigations of groundwater contamination sites including spills, landfills, and impoundments; soil, water and hazardous materials sampling; and Superfund site assessments and geophysical investigations. Provided technical assistance to the agency's Hazardous Waste, Solid Waste, and Underground Injection Control programs, the Division of Environmental Permitting, Office of General Counsel and the Secretary; developed geophysical (electromagnetic) field methods and sampling techniques now used by the agency to
assess and characterize the impacts of waste sites on groundwater.

--Groundwater Geologist, DER Bureau of Drinking Water and Special Programs, Tallahassee - Aug. 1978 to Jan. 1980
Mapped and described the shallow aquifer systems of Florida; inventoried and assessed the pollution potential of surface impoundments situated in southern Florida.

Geophysical Service, Inc., A Subsidiary of Texas Instruments, Inc.: Geophysical Engineer, GSI, Saudi Arabia, June 1975 to April 1977



Planned, collected, and interpreted data from an uphole program, the evaluation of near-surface seismic velocities in severely weathered limestone and sand terrains; correlation of geologic conditions to seismic velocity anomalies; well shoots; seismic reflection data quality control; drill crew management; seismic field crew management.

--Geophysical Engineer, GSI Field Operations, Chickasha, OK - Jan. 1975 to May 1975
Trained in field positions related to seismic data collection, quality control and surveying.

--Geophysical Engineer - GSI Seismic Processing Center, Midland, TX - Jan. 1975 to May 1975
Vibrasize seismic data computer input, processing and quality control evaluation and final data evaluation and preparation in seismic sections.

ORDINANCE 26-08

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA; EXTENDING THE CORPORATE LIMITS OF THE CITY OF ALACHUA, FLORIDA TO INCLUDE CERTAIN LANDS LYING CONTIGUOUS TO THE EXISTING CORPORATE LIMITS OF THE CITY (TAX PARCEL 03909-000-000; 03910-002-000); PROVIDING THAT ALL EXISTING LAWS, ORDINANCES, RULES AND REGULATIONS SHALL APPLY IN SAID AREA; PROVIDING THAT THE PROPERTY LAND INHABITANTS ARE SUBJECT TO EXISTING INDEBTEDNESS AND LIABLE FOR TAXATION; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

The ± 24.94-acre subject property is generally located 14107 NW 142nd Avenue (tax parcel(s) 03909-000-000; 03910-002-000). Copies of the application, complete legal description of the subject property, and proposed ordinance are available for public inspection at the Planning & Community Development Department in City Hall, located 15100 NW 142nd Terrace, Alachua, Florida on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. and copies can be obtained from the Office of the Deputy City Clerk.

At the public hearing, all interested parties may appear and be heard with respect to the application. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL, 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on June 8, 2026, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following ordinance as titled:

Ordinance 26-09

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE SMALL-SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION OF A ± 46.68-ACRE SUBJECT PROPERTY FROM LOW DENSITY RESIDENTIAL, MODERATE DENSITY RESIDENTIAL, AND COMMUNITY COMMERCIAL TO MODERATE DENSITY RESIDENTIAL, COMMUNITY COMMERCIAL, AND COMMERCIAL; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441 (TAX PARCEL 03042-050-004; 03042-050-005 (PORTION THEREOF); 03046-003-000 (PORTION THEREOF)); REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

PO Box 9
Alachua, Florida 32616-0009

"The Good Life Community"
www.cityofalachua.com

Phone: (386) 418-6121
Fax: (386) 418-6130

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application, staff report, and any related materials are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on August 24, 2026, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following ordinance as titled:

ORDINANCE 26-09

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE SMALL-SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION OF A ± 46.68-ACRE SUBJECT PROPERTY FROM LOW DENSITY RESIDENTIAL, MODERATE DENSITY RESIDENTIAL, AND COMMUNITY COMMERCIAL TO MODERATE DENSITY RESIDENTIAL, COMMUNITY COMMERCIAL, AND COMMERCIAL; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441 (TAX PARCEL 03042-050-004; 03042-050-005 (PORTION THEREOF); 03046-003-000 (PORTION THEREOF)); REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application, staff report, and any related materials are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL, 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

Subject: 6/8 No to Farmlands: Protect Small Businesses
Date: Monday, June 8, 2026 11:24:55 AM

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: ...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make. Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

Mainly I'm concerned about the heavy traffic and trucks it will bring to the US highway 235 where there have already been multiple car accidents in front of the school Alachua Learning Center. More cars means more chances of reckless drivers and accidents!

Also, If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I have experienced this personally with rush hour backed up to Lowe's from Santa Fe HS headed north and the exact opposite headed south in the mornings. This corridor is a main thoroughfare for several counties in the area and the only alternative to I-75 which has frequent crashes and other longstanding issues.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

How about water supply and the ability to process waste water. I read that the City is already at the 85% mark and needs help. Why would we want to burden the water process, and even further, in the middle of a draught. There is already enough uncontrolled development in my area. Off of 441 and 156, there is a huge acreage of trees just cut down, and I saw plans for 100 homes to be built. Where are the roads and water coming from? Road 235 already has had many accidents, and crowding with more traffic will not help safety. What about roads? Why is heavy industrial equipment being allowed where there is barely small paved road (156). This area also creates a fire hazard, with huge piles of dead trees all over. This is in addition to fire hazard of another 25 acres near me which was clear cut about 2 years ago, and huge piles of just ready to burn trees and brush still sits there.

I don’t see how you can vote for more development when current projects are likely going to damage water supply capacities, overstress roads not meant for heavy traffic, and reduce our quality of life by adding yet more cement in place of trees.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: “...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make.” Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Also, stress of water supply at a time of draught. We are asked to reduce our water use at our homes. Why are we asked to conserve, while huge building projects are going to consume more than thousands of homes.

Thank you for your time and consideration.

Sincerely,

Dhira Crunkilton

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: %2��...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make.%2�� Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? I moved here from Long Island NY 12 years ago. My home was in an area where there was acres upon acres of farmland. Over the years developers built new neighborhoods with huge houses on small pieces of property. Before you knew it the majority of the people who had moved to the area to get away from congestion realized that they didn't like driving 15 minutes to a store and they missed all of the conveniences of the area they moved from. Little by little every conceivable creature comfort was built which changed the whole landscape and feel of the town.
In today's world people can shop online and have everything under the sun delivered to their home.
I really would hate to see this same thing happening here.

Thank you for your time and consideration.
Sincerely,
Karen Mott

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice, and the others that have reached out to you, in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs as well as harm local small businesses, which can affect the local charm that defines our community

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street, small businesses, and community character

Thank you for your time and consideration.

Respectfully,
Brooke Watson

Subject: DENY THE FARMLANDS LAND USE CHANGE !!!!!!!!!
Date: Saturday, June 20, 2026 12:19:37 PM

TRAFFIC IS TOO HEAVY ON JUST ABOUT EVERY SINGLE ROAD IN THIS AREA !!!!!! STOP BUILDING DAMN YOU !!!!!! YOU ARE RUINING THE ENTIRE AREA !!!!! NO ONE WANTS IT !!!!

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

This is not a minor adjustment. It is a major land-use decision that would permanently change the character of North Alachua County and open the door to large-scale commercial sprawl along the Highway 441 corridor.

The Comprehensive Plan represents years of public input and community visioning about how and where growth should occur. Expanding commercial development nearly six-fold in this location disregards that vision and creates development pressure that will extend far beyond this single project.

Residents already experience increasing traffic congestion and safety concerns along Highway 441 and County Road 235A. Adding nearly 450,000 square feet of commercial development will bring substantially more vehicles, congestion, noise, and infrastructure demands to an area that was never envisioned as a major commercial center. Once this level of intensity is approved, the impacts will be felt every day by nearby residents, commuters, schools, and businesses.

The proposal also places additional pressure on a high aquifer recharge area that helps replenish the Floridan Aquifer - our source of drinking water and the foundation of North Florida's springs, rivers, and wetlands. As our population grows, protecting clean water should be a priority, not an afterthought.

The burden should be on the applicant to prove that this dramatic increase in commercial intensity is necessary, compatible, and in the public interest. That burden has not been met.

Please vote NO on this amendment. Protect our community vision, our quality of life, our water resources, and the rural character that makes this area special.

This decision is not simply about one development. It is about what kind of future we want for Alachua.

Sincerely,

Sincerely,

Debbie Hagstrom

Subject: Farmlands -- May 4th agenda item
Date: Sunday, April 26, 2026 1:24:50 PM

Dear Mr. Mayor and Commissioners,

On May 4th you will consider Ordinance 26-09 submitted by the so-called "Farmlands" development of Southeastern Tree Farm bordering US 441 and NW 188th Street. I am writing to encourage you to vote "**No**".

Farmlands is asking the City to change 46 acres of its Comprehensive Land Use Map from primarily Residential to Commercial Intensive to make way for a 60 acre shopping center with 450,000 square feet of retail space.

The anchor tenant of this sprawling shopping center will likely be a Walmart Supercenter with its associated gas station and automotive center. A Walmart in this location will attract north and southbound travelers on I-75 and will draw in customers from miles to the east and west. US 441 already experiences heavy congestion throughout the day in this area. The addition of regional traffic to the Walmart will substantially increase daily travel time for residents and will negatively impact the small-town feel of our community. In addition, a Walmart will inevitably pull commercial activity away from downtown Alachua and is likely to drive local mom-and-pop stores out of business.

Please do not allow this bad idea to proceed. Thank you.

As a restaurant owner in downtown Alachua, I believe more commercial/shopping will benefit everyone. Please vote YES for The Farmlands commercial project. Keep in mind the supporters do not show up only the people who oppose everything in Alachua.

The developer has put together a well-designed plan that will serve the residents very well. The part time and full-time local jobs starting from day one will benefit the local community. The Santa Fe high school students will be able to have jobs while in school.

Instead of having several 441 openings where people turn into the different businesses you can have a more comprehensive plan. It's all zoned commercial on that 441 strip. It will all get developed, will it be with 1 plan or all separately. All done together at the same time is significantly better.

This will greatly help the city when the property taxes go away in the near future!

VOTE YES for this project.

Subject: Farmlands Comp Plan
Date: Saturday, May 30, 2026 10:13:04 AM

We just know that this adjustment to the plan will wreak havoc for our wonderful community. These concerns we residents have ned to be taken seriously— Please protect our community and what makes Alachua a good life community with small town vibes and culture. Please protect that.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Denise Lugris Connard

Subject: Farmlands Land Use - May 4th meeting
Date: Monday, April 27, 2026 11:21:09 AM

Good morning Mr. Mayor and Commissioners,

We are writing in regards to the upcoming May 4th agenda item "Farmlands" and the request for changes in the Future Land Use Map. We respectfully and urgently request that you all vote NO on this request as it is proposed.

If it is developed as this request proposes - with possibly a large national anchor tenant, like Walmart - this location will draw immense regional traffic well beyond what the roads can or are designed to handle. Also to be considered are the damaging effects to the environment, our local small businesses and our small town charm.

This change to the type of land use is a policy decision, not an automatic approval. You are not required to approve it and surely you can see it would be a detriment to all of us and our lovely community.

US Hwy 441 already experiences heavy congestion with daily back-ups (both directions), and additional regional traffic would definitely increase the already congested traffic. Growth at this scale will negatively affect us and we will certainly lose the small-town feel that has drawn people to Alachua and which Alachua has promoted and been proud of.

No doubt a large commercial center will pull activity away from our downtown Main Street, decrease purchases at small, family-owned business and affect the charm that defines our community.

Each of you has the ability and authority to decide if this level of intensity is right for this location. Your vote can be NO —— PLEASE vote NO on this proposal and require the applicant to come back with a less intensive proposal. PLEASE consider the consequences of such a proposed land use. Our community needs protection and you can protect it!

Key considerations:
- **Traffic**: Increased regional traffic on an already congested US 441
- **Scale**: A significant increase in commercial intensity
- **Community impact**: Significant impacts to downtown Main Street, other small businesses in the area and our rural character/small town charm

We appreciate your time and consideration in the very important vote.

Steve & Denise Connard

Subject: Farmlands May 4th
Date: Friday, April 24, 2026 6:16:07 PM

I firmly oppose the commercial use of the Farmland Commerical project in Alachua area. Frankly even the name of this project is disgraceful. My family has farmed in Alachua for four generations and the casual disregard for the farming community is repulsive to me.

The rapid development in this town poses a significant threat to our community's well-being. The traffic congestion on 441 is unbearable, and the small town is being gradually displaced from its long-time residents. We have chosen to live here because we desire a peaceful and less crowded environment.

Over the past five years, the Alachua Commission has made decisions that have negatively impacted the town's sustainability. The unsustainable development of farmland has resulted in the destruction of the Mill Creek sink, which is a vital natural resource for our community. It is imperative that the commission consider the long-term consequences of its actions and prioritize the preservation of our environment. These changes are not sustainable with the current resources.

We did not want the hundreds of additional homes that were recently approved. Now Alachua County school board wants to close two of the local schools, which will create the perfect storm for traffic in Alachua each morning. None of these plans are sustainable. Do you commissioners live here and experience this traffic? How can you not be concerned?

As a lifelong resident of Alachua, I am deeply concerned about the direction in which our city is heading. I believe that development should be approached with extreme caution and that any rezoning should be transparent and accountable. The current state of affairs in Alachua is characterized by unethical business practices and a lack of oversight. It is crucial that we take immediate action to address these issues and ensure the future of our beloved city.

Extremely Concerned Citizen ,

Stella Burnham

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

Thank you for your time. Stop building large chains and housing developments here. We don’t need more of the same thirty stores that exist everywhere else in this country. It’s repulsive and is ruining this community.

Dear Mr. Mayor and Commissioners,

I am writing regarding the May 4th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

I believe allowing this land to be developed with a large national anchor tenant, like Walmart, will have negative implications for the cities of Alachua and High Springs alike.

A large commercial center at this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

Lastly, I am extremely concerned about the potential environmental impact of the development of such a large commercial area on our aquifer and springs.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character
-Environmental impact: Protect our natural lands

Thank you for your time.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

As someone who saw the changes in Miami-Dade county as a young child, and eventually moved to Broward after Hurricane Andrew because of the HORRIBLE traffic and congestion I eventually moved to Alachua because of the small town feel and the fact that it wasn’t congested like the cities a lot of Alachua residents have moved away from. Adding something beyond what the roads can handle would cause congestion and traffic like those many residents chose to escape. Please vote no on this change.

Thank you for your time.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

***Please also keep in mind that I personally moved away from Broward County and specifically chose to move to Alachua because of the small town feel, the “road-less travel” type feel, and that it truly felt like the Florida I grew up begging my parents to move to. Adding this would take away from that feeling that not only draws people to Alachua, but keeps people here. Please vote no on this!

Thank you for your time.

Dear Mr. Mayor and Commissioners,

I am writing regarding the May 4th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

I live in the Briarwood development off of CR 235A and experience the already heavy, and increasing congestion on US 441 every time I leave my home. Additional regional traffic could further impact daily travel time, and increase the likelihood of traffic accidents.

Growth at this scale will change the small-town feel that has drawn people to Alachua. The addition of a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community. I am also concerned it will adversely affect our locally owned small businesses.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it. You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

Dear Mr. Mayor and Commissioners,

I am writing regarding the May 4th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

Please listen to those that voted you into office.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it. You should be obligated the people and wildlife that currently live here, not future residents. We don't mind having less shopping choices close to home/ we want our small towns to remain small.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua and the High Springs area.

I am also concerned that a large commercial center will pull activity away from our downtown Main Streets in Alachua and High Springs and affect the charm that defines our communities.

You have the ability to decide if this level of intensity is right for this location. If it is not, you should vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character
- Impact Wildlife including several endangered species.

Thank you for your time.

This pre-written email sums it up nicely. We do not need Walmart (or another car wash for that matter) in this area. Not every small town needs to become Gainesville. High Springs has McDonalds now, and not even one that can accommodate dine-in very well; why? We didn't need McDonalds; we need our town fixed up. We need road repair and we need family-friendly activities. We do not need more discount stores (High Springs has THREE Dollar General stores; Alachua has two), car washes, or fast-food restaurants. Why not entice a business we don't have already? How about a Golden Corral? At least that's something that isn't already within a 30-minute drive. If people want a city with all the stores, then they can move to one. Keep our small towns small!

Dear Mr. Mayor and Commissioners,

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community. You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal. Key considerations: - Traffic: Increased regional traffic on an already congested US 441 - Scale: A significant increase in commercial intensity - Community impact: Potential impacts to downtown Main Street and rural character Thank you for your time. For every big box store that opens a dozen family businesses close. Please help us save our Main street and our small town.

Subject: Farmlands Request PSSC26-0002
Date: Monday, April 27, 2026 2:39:11 PM

Dear Mr. Mayor and Commissioners,

I am writing regarding the May 4th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.
Although a traffic survey suggested that traffic would decrease because the residents would work and shop in the area at the small cupcake store the applicant suggested will be there, we want a guarantee that it will be a small cupcake store and NOT a big box store. If they can't guarantee the names of the store then their traffic survey is meaningless. Likely a commercial business will want to serve many customers beyond the 203 homes in the neighborhood!

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

I would like to say that I am against the zoning change for the development of the Farmlands commercial property. The 441 corridor cannot handle this type of traffic as it is already over burdened with traffic we already have in this area. The commuting and daily traffic is a nightmare now! We do not need big box stores in the city of Alachua. Walmart is 15 minutes to the south along with anything else that is needed. Additional homes in this area will definitely cause more issues as well. The infrastructure of Alachua and neighboring High Springs 5Miles from the proposed location cannot absorb this trype of growth on our roads, in our schools or on our aquifers. Please seriously consider the unwanted and unneeded impact this zoning change and development will cause. Vote no!

Subject: Farmlands: a bad idea for the good life City
Date: Sunday, May 31, 2026 6:01:31 PM

We did not move here to have a Walmart across the street. If that was the case, we would have moved to Gainesville. Do not let an out-of-state developer ruin our city with this massive shopping center. I encourage you to reject this land use application. It is a bad idea for the good life City. Thank you.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Subject: From a resident who lives on this street, please don"t do this to us!!
Date: Monday, June 8, 2026 10:09:14 AM

My family and I live on our family's land that we have owned for the last 50 years. It is special to us. The stars. The birds, the sounds. Beautiful nature. Fresh well water. Growing our own vegetables and enjoying this beautiful setting. To us and our neighbors, this area is an inviting retreat. We don't want more traffic, noise and light pollution. We have seen a dramatic increase in traffic over the past t years and 441 is often bumper to bumper already from this intersection to the interstate. We worry about the environmental repercussions, pollution to air and ground, the water and sewer impact in a small area. We weren't built for this. Our area isn't meant for this. This isn't our vision. There's already a huge burden on this land with the existing developments and tower hill project, new neighborhoods that seemingly pop up overnight. We can't do this to our beautiful land. We are intentionally developing a food forest to pass on to our children. It is being directly threatened.

Mayor and Commissioners,

As an Alachua resident, I support the Farmlands Shopping Center because it will bring jobs, new investment, and much-needed shopping and services closer to home.

Many residents currently have to travel to Gainesville for everyday needs. This project would provide more convenient options locally while creating approximately 1,200 permanent jobs, more than 1,290 construction jobs, and over $151 million in private investment.

The development would also generate significant new tax revenue for the city, helping fund local services without increasing taxes on residents.

I encourage you to vote in favor of the Farmlands Shopping Center and support this opportunity for Alachua's future.

Date: Sunday, May 24, 2026 12:36:33 PM

Dear Mayor and Commissioners,

Please exersize your authority and vote to protect our dwindling natural resources.

I am writing regarding the June 8th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character.

I have lived longer in Alachua longer than any place. It has changed so much in the last 36 years, in my opinion, not for the better.

Thank you for your time.

Dear Mayor and Commissioners,

I'm writing about the Farmlands item on the June 8th agenda, specifically the request for a Future Land Use Map change. I'm asking you to vote no on this as proposed.

I want to be clear about something, this is a policy decision, not an automatic approval. You have the authority to say no, and I hope you will.

If this moves forward with a large national anchor tenant like Walmart, we are talking about regional traffic, not just local trips. US 441 is already one of the more congested corridors in this area, and layering a big-box regional draw on top of that is not a minor adjustment. It changes the character of how people move through our town every day.

Beyond traffic, I'm genuinely worried about what this does to downtown. Main Street has a charm that took a long time to build and is easy to lose. A large commercial center at this scale pulls spending, attention, and energy away from the core of our community. Once that shift happens, it is hard to reverse.

Alachua still has a small-town feel. People moved here, or stayed here, because of that. This kind of intensity at this location puts that at risk.

If the current proposal is too much for this site, you can vote no or ask the applicant to come back with something less intensive. That option is on the table, and I hope you use it.

Thank you for your time and for the work you do on behalf of our community.

Sincerely,
Tim Martin

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

Subject: June 8: Vote NO to Farmlands Request PSSC26-0002
Date: Wednesday, May 13, 2026 8:23:57 AM

Dear Mr. Mayor and Commissioners,

I have am writing as an individual that has multi-generational roots here dating back to before Alachua was incorporated. It is regarding the June 8th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

We need to petition the federal government to grant a new exchange off I-75 directly to the distribution centers as business only exit, not developed, limited to a truck stop/gas station with a restaurant inside similar to Ellisville exit at US 441 in Columbia county. 441, 235 & 235 A along with Peggy road are already dangerous areas with heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Cc: Planning Division
Subject: June 8th agenda. No to Farmlands: Protect Small Businesses
Date: Wednesday, June 3, 2026 1:37:36 PM

Dear Mr. Mayor and Commissioners,

I am writing concerning the June 8 agenda item referred to as Farmlands and the requested amendment to the Future Land Use Map. I respectfully urge you to vote against this proposal in its current form.

Should this site ultimately be developed with a major national retailer, such as Walmart, it has the potential to attract traffic from throughout the region. The resulting increase in vehicle volume could place substantial strain on surrounding roadways that are already heavily utilized.

Because this is a legislative matter, the Commission is under no obligation to approve the request.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained that, outside of quasi-judicial proceedings, elected officials retain the discretion to determine whether a proposal is appropriate for the community. As he stated in the meeting recording: "…As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." I respectfully ask that you take my concerns into account when making that decision.

US 441 already experiences significant traffic congestion, and additional regional draw could further impact travel times, roadway safety, and overall quality of life for residents. Development of this magnitude could also alter the small-town atmosphere that many people value and that makes Alachua unique.

Additionally, I am concerned that a large-scale commercial development

could divert customers and economic activity away from downtown Main Street and High Springs, potentially affecting the locally focused character and businesses that contribute to the area's identity.

If the Commission concludes that this proposal is not the right fit for this location, you have the authority to deny the request or encourage the applicant to return with a proposal of a more appropriate scale and intensity.

Key considerations include:

• Traffic – Increased regional traffic on an already busy US 441 corridor

• Scale – A substantial expansion in commercial intensity for the area

• Community Impact – Potential effects on downtown Main Street, High Springs, and the character of the community

Thank you for your time, service, and thoughtful consideration of this matter.

To: Planning Division
Subject: June 8th Vote: Farmlands Ordinances 26-09 and 26-10
Date: Saturday, June 6, 2026 5:49:56 PM

Mayor and Commissioners,

As someone who works in healthcare, I know our community is growing and more families are choosing to call Alachua home. The growth is already here, and we need the jobs, businesses, and services to keep up with it.

Many residents currently have to drive to Gainesville for shopping, groceries, and other everyday needs. The Farmlands development would make life more convenient for local families while creating good jobs and bringing new investment to our community.

This project would also generate new tax revenue to help support local services without raising taxes on residents. With property taxes likely on the way out, base on our governor's push, this would be more beneficial than property owners for tax purposes. I believe it is a smarter investment in Alachua's future, and I hope you will vote in favor of the Farmlands development.

From: Chris Beatty
To: Planning Division; City Commissioners
Subject: June 8th Vote: Farmlands Ordinances 26-09 and 26-10
Date: Monday, June 8, 2026 9:23:21 AM

Dear Mayor and Alachua City Commissioners,

I support the Farmlands Shopping Center because it will make everyday life more convenient for local families while providing important benefits for our community.

Many residents often have to drive to Gainesville for shopping, groceries, and other errands. Bringing more stores and services to Alachua would save time, reduce travel, and allow residents to spend more of their money locally.

The project would also generate significant new tax revenue for the city. The property currently generates about $15,900 per year in property taxes, but the Farmlands development is projected to generate more than $1.4 million annually. That additional revenue can help support city services, infrastructure, and other community needs without increasing taxes on local residents. I encourage you to vote in favor of the Farmlands Shopping Center.

Chris Beatty
Alachua County, FL Resident

From: Janice Osejo
To: Planning Division
Subject: Just Say NO!!
Date: Monday, June 1, 2026 3:48:46 PM

Highway 441 is overcrowded TODAY! We have Tower Hill Headquarters coming bringing even more traffic plus new neighborhoods. At 5:00 pm it is a bottleneck. Emergency services are impacted as those of us whose homes border 441. Please keep Alachua the Good Life Community and DO NOT OVER CAPACÍTATE our roadway. We do not want to become another Archer Road!!!

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Janice Osejo

Subject: New Walmart here and CR 235 and 235A
Date: Tuesday, July 28, 2026 9:45:12 AM

Good morning,
I understand it was announced that the new Walmart will be built in Alachua when there is already a Walmart about 13 miles away. Traffic here is awful, even on Peggy Road with all of the many distribution centers. We do not need a Walmart. We need a red light at Peggy road and 235A. The things that need to be done are: completely resurface of CR 235 and 235A. Also Peggy Road is now needing repairs.

Alachua is a great place to live, Walmart is a trashy and dangerous place to even buy groceries from. It will definitely decrease anyone's attraction to the small nice town of Alachua.

The residents of Alachua that pay taxes should get a vote and have a voice.

I'm very disappointed that the few nice restaurants downtown and near the old Hitchcocks won't get as much business but my main issue is the infrastructure for Traffic.

We elect city councilman to represent what we the residents want, not what the city wants to make more money for them.

Thank you for your time,
Dianne Beauchamp

Subject: NO to big box!
Date: Monday, June 8, 2026 6:47:11 AM

My husband and I moved her 7 years ago to get away from this development in small towns… if this continues on the High Springs. Side of 441 it will look no different from where we moved from just outside of Tampa…there is no need for these "shopping destinations" to be on every exit on I-75.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Trina Bayle

Dear Mr. Mayor and Commissioners,

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

PLEASE consider listening to the voices of the community.

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

This is not a minor adjustment. It is a major land-use decision that would permanently change the character of North Alachua County and open the door to large-scale commercial sprawl along the Highway 441 corridor.

The Comprehensive Plan represents years of public input and community visioning about how and where growth should occur. Expanding commercial development nearly six-fold in this location disregards that vision and creates development pressure that will extend far beyond this single project.

Residents already experience increasing traffic congestion and safety concerns along Highway 441 and County Road 235A. Adding nearly 450,000 square feet of commercial development will bring substantially more vehicles, congestion, noise, and infrastructure demands to an area that was never envisioned as a major commercial center. Once this level of intensity is approved, the impacts will be felt every day by nearby residents, commuters, schools, and businesses.

The proposal also places additional pressure on a high aquifer recharge area that helps replenish the Floridan Aquifer - our source of drinking water and the foundation of North Florida's springs, rivers, and wetlands. As our population grows, protecting clean water should be a priority, not an afterthought.

The burden should be on the applicant to prove that this dramatic increase in commercial intensity is necessary, compatible, and in the public interest. That burden has not been met.

Please vote NO on this amendment. Protect our community vision, our quality of life, our water resources, and the rural character that makes this area special.

This decision is not simply about one development. It is about what kind of future we want for Alachua.

Sincerely,

Sincerely,

Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use
Date: Tuesday, June 23, 2026 8:22:05 AM

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

This is not a minor adjustment. It is a major land-use decision that would permanently change the character of North Alachua County and open the door to large-scale commercial sprawl along the Highway 441 corridor.

The Comprehensive Plan represents years of public input and community visioning about how and where growth should occur. Expanding commercial development nearly six-fold in this location disregards that vision and creates development pressure that will extend far beyond this single project.

Residents already experience increasing traffic congestion and safety concerns along Highway 441 and County Road 235A. Adding nearly 450,000 square feet of commercial development will bring substantially more vehicles, congestion, noise, and infrastructure demands to an area that was never envisioned as a major commercial center. Once this level of intensity is approved, the impacts will be felt every day by nearby residents, commuters, schools, and businesses.

The proposal also places additional pressure on a high aquifer recharge area that helps replenish the Floridan Aquifer - our source of drinking water and the foundation of North Florida's springs, rivers, and wetlands. As our population grows, protecting clean water should be a priority, not an afterthought.

The burden should be on the applicant to prove that this dramatic increase in commercial intensity is necessary, compatible, and in the public interest. That burden has not been met.

Please vote NO on this amendment. Protect our community vision, our quality of life, our water resources, and the rural character that makes this area special.

This decision is not simply about one development. It is about what kind of future we want for Alachua.

Sincerely,

Sincerely,

Elizabeth Martin

We live in this area and chose to live off-grid here for a reason. It seems you are trying to build this city up, but in doing so you are simply duplicating things that already exist elsewhere. This is a small, old, vintage town. Why not support and preserve that identity instead of bringing in huge corporate stores? Make it a more quaint and unique town. It appears that much of this development is focused around the expressway, giving travelers more reasons to exit there. But that is not needed. There are already plenty of Walmarts and big-box stores off the expressway. Many people enjoy stopping in small towns, especially when they offer charming specialty shops, mom-and-pop businesses, local restaurants, and ice cream shops. If travelers knew they could find those kinds of unique experiences within five or ten minutes of the exit, they would still come. A Walmart in Alachua is not serving those of us who live here. None of us want it. High Springs does not want stores like that in its community either.

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

We HAVE to preserve the aquifer & stop developing land needed to maintain local wildlife habitats. We are killing Florida & our ability to survive.

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

This is not a minor adjustment. It is a major land-use decision that would permanently change the character of North Alachua County and open the door to large-scale commercial sprawl along the Highway 441 corridor.

The Comprehensive Plan represents years of public input and community visioning about how and where growth should occur. Expanding commercial development nearly six-fold in this location disregards that vision and creates development pressure that will extend far beyond this single project.

Residents already experience increasing traffic congestion and safety concerns along Highway 441 and County Road 235A. Adding nearly 450,000 square feet of commercial development will bring substantially more vehicles, congestion, noise, and infrastructure demands to an area that was never envisioned as a major commercial center. Once this level of intensity is approved, the impacts will be felt every day by nearby residents, commuters, schools, and businesses.

The proposal also places additional pressure on a high aquifer recharge area that helps replenish the Floridan Aquifer - our source of drinking water and the foundation of North Florida's springs, rivers, and wetlands. As our population grows, protecting clean water should be a priority, not an afterthought.

The burden should be on the applicant to prove that this dramatic increase in commercial intensity is necessary, compatible, and in the public interest. That burden has not been met.

Please vote NO on this amendment. Protect our community vision, our quality of life, our water resources, and the rural character that makes this area special.

This decision is not simply about one development. It is about what kind of future we want for Alachua.

Sincerely,

Sincerely,

Sarah Pugh

From: Joanne Barber
To: Planning Division
Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use
Date: Wednesday, June 17, 2026 11:16:52 AM

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Kelly Lyon

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.

From where will the water come to support more sprawl?Recently our area has been in a significant rainfall deficit
- and with climate change less rainfall may well become the norm.
It never ceases to amaze me that municipalities continue to approve more development, more sprawl but I never hear anything about the associated increased water demand.
I'm 72 years old and have been in Alachua County since 1979. Personally, I do NOT need more people, more vehicles, more restaurants and stores, more concrete and pavement, to enhance my quality of life.
Alachua County and its municipalites seem hell-bent on turning our area into another Orlando, FL.
STOP IT - STOP IT NOW!

I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Steven Schell

The reason why I moved to Alachua County the High Springs area. This was a house that was already built. I did not take up any land. I bought a house that somebody was moving from love the little town atmosphere by bringing in a big box store. It's just gonna choke out a little home town feeling.
Along with big box, stores comes with unwanted crime that nobody really wants to see move into Alachua or High Springs
Please vote. No, I'll accept the drive further to go to a big box store.

I live in this area and the light at 441 /235A is already congested and there is not a crosswalk going over 441 so children and sometimes workers try to cross that street which can be dangerous. In addition, there is not enough traffic planning in that area to not cause this to be a heavy traffic area and residence, not being able to leave or returned to their homes.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

Box stores force local independents to go out of business.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur. Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

David Spencer

This project greatly alters the communities of Alachua and High Springs. Any small town character that is left will be destroyed by this project. Already, the exit area is quickly becoming Newberry Road. If we wanted any of that, we would live in Gainesville! If I have an urgent need for Walmart, I will drive the few miles down the road to Gainesville. That is as close as I need a Walmart to be!! The speed at which we are losing any small town character is shameful!! Let's save what we have left!!

I was raised in Alachua and High Springs, and I believe that the impact of the proposed future land use for the Farmlands Project will have a negative impact on our local small businesses, infrastructure, and aquifer. Our small city has become increasingly more congested and the rapid growth is also affecting driving and pedestrian safety. As a local resident who lives, works, and volunteers in this community, I want to voice my opposition to this plan. Please vote no to preserve the beauty, safety, and small businesses of our beautiful town.
Sincerely,
Adrienne Paxton

I own a 130-year-old historic soda shop in downtown High Springs. Brad and I have invested heavily in preserving a piece of this town's history because we believe our historic downtown is worth protecting.

A big-box store located close to downtown could have a devastating impact on the small businesses that give High Springs its unique character. Many local businesses are already struggling. Pulling customers away from Main Street risks empty storefronts, lost jobs, and the erosion of the historic district that makes our community special.

I also understand the concerns about rising property taxes. Homeowners deserve relief. But eliminating property tax revenue without a clear plan to fund police, fire protection, roads, parks, and infrastructure is not the answer.

High Springs needs thoughtful growth that strengthens our community, supports local businesses, and preserves our historic identity. We can do better than choosing between our future and our heritage.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

Traffic in town is already crazy. There is plenty of shopping close enough by that we don't need more. Our roads are in horrible shape. People move to towns like Alachua because they want space they don't want traffic and they want the small town feel. The commissioners and city planners seem hell bent on wrecking that. Please stop the madness.

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

Stop with all the development!!! South Florida was beautiful now its trash with all the overdevelopment!!!!

Dear Mayor, Commissioners, and City Staff,
I urge the City of Alachua to deny the proposed Comprehensive Plan / Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.
This is not a minor adjustment. It is a major land-use decision that would permanently change the character, traffic patterns, infrastructure demands, and development pressure along the Highway 441 corridor west of 235A.
The Comprehensive Plan should not be treated as a document to rewrite whenever a developer seeks more intensity. It represents many hours of community visioning, public participation, planning, and compromise. Residents helped shape that plan because they were asked to define Alachua's future. Its limits on commercial land use reflect a public judgment about where intense development belongs, how much is appropriate, and how growth should occur.
Changing this area from 7 acres of commercial use to 40 acres would disregard that community vision. Once the Future Land Use Map is changed, the City will have far less ability to say no later. This amendment would invite large-scale, car-dependent commercial sprawl and set a dangerous precedent for treating the Comprehensive Plan as negotiable instead of protective.
This proposal raises serious concerns about traffic congestion and safety on Highway 441 and 235A; impacts to nearby residents, schools, rural lands, and neighborhoods; increased water, wastewater, stormwater, and utility demands; loss of community character in the Alachua / High Springs region; and piecemeal planning that approves intensity first and addresses consequences later.
The burden should be on the applicant to prove that this major commercial expansion is necessary, compatible, fiscally responsible, and protective of the public interest. That showing has not been made.
I respectfully ask the City Commission to vote NO on the Comprehensive Plan amendment expanding commercial land use from 7 acres to 40 acres. Please honor the community visioning behind the existing plan, protect residents from unnecessary commercial sprawl, and require full review of cumulative impacts before granting any increase in development intensity.
This is not just a development application. It is a decision about what kind of city Alachua intends to become.
Sincerely,

Sincerely,

Michael Oliveira

I moved here from the Tampa Bay area to get away from the heavy traffic and congestion and live in Oak Ridge next to this area. US 441 noise carries into our neighborhood and dread it getting worse! The more congestion, the more impatient, careless drivers...

I have been a resident of Alachua County for almost 50 years, and I have lived in the City of Alachua since 2020. I moved to Alachua to get away from the intensive over development of Gainesville. This proposal is not only a risk for the City of Alachua, due to safety on Hwy 441, it continues to overfill our already overcrowded schools, and loss of our small town! Just because a developer wants to build it shouldn't be an automatic yes. The overall impact is horrible as my message describes. There's not a single resident in the City of Alachua that wants this!

From: Nk Acevedo
To: Planning Division
Subject: Please Deny the Farmlands Comp Plan Amendment Expanding Commercial Land Use
Date: Monday, June 29, 2026 6:01:34 PM

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

This is not a minor adjustment. It is a major land-use decision that would permanently change the character of North Alachua County and open the door to large-scale commercial sprawl along the Highway 441 corridor.

The Comprehensive Plan represents years of public input and community visioning about how and where growth should occur. Expanding commercial development nearly six-fold in this location disregards that vision and creates development pressure that will extend far beyond this single project.

Residents already experience increasing traffic congestion and safety concerns along Highway 441 and County Road 235A. Adding nearly 450,000 square feet of commercial development will bring substantially more vehicles, congestion, noise, and infrastructure demands to an area that was never envisioned as a major commercial center. Once this level of intensity is approved, the impacts will be felt every day by nearby residents, commuters, schools, and businesses.

The proposal also places additional pressure on a high aquifer recharge area that helps replenish the Floridan Aquifer - our source of drinking water and the foundation of North Florida's springs, rivers, and wetlands. As our population grows, protecting clean water should be a priority, not an afterthought.

The burden should be on the applicant to prove that this dramatic increase in commercial intensity is necessary, compatible, and in the public interest. That burden has not been met.

Please vote NO on this amendment. Protect our community vision, our quality of life, our water resources, and the rural character that makes this area special.

This decision is not simply about one development. It is about what kind of future we want for Alachua.

Sincerely,

Sincerely,

Nk Acevedo

Subject:	Postpone Farmlands Rezoning—Investigate the Risks Before Approving Irreversible Development
Date:	Friday, July 24, 2026 4:37:52 PM

Dear Mayor Welch and Commissioners:

On behalf of the Sierra Club Suwannee–St. Johns Group, we respectfully request that the City Commission postpone consideration of the Farmlands rezoning and conduct a properly noticed second reading of the associated Future Land Use Map amendment before taking any further action on the Planned Development.

The FLUM amendment and rezoning are inseparably connected. The rezoning depends upon the expanded commercial land-use designation approved by a narrow 3–2 vote on June 22. Before considering a rezoning that could authorize up to 454,000 square feet of commercial development and 203 residences, the Commission should ensure that the underlying land-use amendment has completed every required procedural step and received the fullest possible public examination.

The applicant should also be required to explain what material circumstances have changed since the property's earlier modification from Agricultural to Community Commercial. The applicant recently obtained that commercial designation but did not develop the property under the approved modification. Instead, it returned seeking a far larger commercial entitlement with substantially greater impacts.

Before this increased request is even considered, the applicant should demonstrate why the existing commercial designation is inadequate, what new need or changed condition justifies this escalation, and why the previously approved development opportunity was not pursued. Without such an explanation, this sequence creates the appearance that the earlier modification served merely as a foothold for obtaining a much larger and more consequential commercial entitlement.

This is not a minor procedural matter. The FLUM amendment fundamentally changes the intensity and character of development permitted along this portion of U.S. 441. A second reading would allow the Commission to consider the significant information and unresolved concerns that have emerged since the June 22 vote.

Sierra Club remains opposed to the Farmlands proposal for the following reasons:

The increased commercial entitlement has not been justified. The applicant did not act upon the property's recent modification from Agricultural to Community Commercial before seeking a substantially larger commercial designation. The record should explain what has materially changed, why the existing entitlement is insufficient, and what demonstrated

community need justifies this escalation. Incremental approvals should not be used to establish a foothold and then leverage it into a development of far greater scale and impact.

The site investigation was preliminary, limited, and incomplete. Based on information presented in the record, the entire property does not appear to have been comprehensively evaluated. The test borings, wells, excavations, or other methods used to characterize site conditions also appear to have been limited in number, location, and depth. If testimony indicated that some investigations extended only approximately 20 feet, the applicant should be required to clarify exactly which investigations reached that depth and distinguish those test depths from the separate estimate of approximately 20 feet between the proposed stormwater-basin bottom and limestone. Limited sampling cannot reliably characterize conditions across a property of this size or rule out deeper karst features, buried sinkholes, landfill materials, groundwater concerns, or contaminant pathways.

Karst and sinkhole risks remain unresolved. The applicant's investigation was preliminary, groundwater conditions were largely undetermined, and no geophysical survey was conducted to identify buried karst features. The City's engineering reviewer warned that excavation of a proposed stormwater basin could leave only about 20 feet above limestone and noted that sinkholes have developed beneath other stormwater facilities with similar separation. The absence of an identified sinkhole is not evidence that none exists when the investigation capable of detecting buried karst has not been performed.

Material site conditions were not adequately disclosed or analyzed. The nearby decommissioned landfill, EDB contamination history, groundwater-monitoring wells, reported sinkhole features, plume information, and other environmental constraints were not meaningfully addressed in the applicant's materials or staff report. These are not peripheral details. They bear directly on whether the proposed development pattern, excavation, and concentrated stormwater infiltration are safe.

The City appears to have relied substantially on the applicant's information without adequate independent verification. The applicant has a direct financial interest in obtaining approval, yet the record does not demonstrate that the applicant's environmental conclusions, site characterization, utility projections, or omissions were subjected to a comprehensive, property-wide, independent technical review. Where the submitted information is incomplete, unverified, or contradicted by other records, it cannot reasonably support definitive findings that the site is suitable and significant adverse effects are unlikely.

The proposal lacks adequate groundwater and stormwater analysis. No site-specific seasonal-high groundwater level, groundwater-flow direction, baseline water-quality assessment, complete stormwater-capacity analysis, or contaminant-transport evaluation has been provided. The record also lacks runoff calculations, required storage volumes, water-quality treatment analysis, emergency-overflow routes, and a karst-collapse

contingency. Critical investigations have been deferred until after the land-use and rezoning decisions.

Wastewater capacity has not been demonstrated for the full range of permitted uses. Staff's estimated 96,150 gallons per day relies on a generic commercial-flow assumption that does not account for potentially intensive uses such as restaurants, hotels, assisted-living facilities, schools, or medical uses. The analysis also does not demonstrate downstream lift-station, force-main, collection-system, peak-flow, or treatment capacity.

The commercial development authorized is not sufficiently limited. Descriptions of a particular retailer or conceptual site plan are not binding protections. Once approved, the PD could allow a much larger or substantially different combination of commercial uses than residents have been led to expect.

Traffic impacts have not been credibly resolved. The proposal relies on questionable internal-capture assumptions and characterizes U.S. 441, a major state highway, as susceptible to "traffic calming." Residents who regularly travel this corridor understand that development of this scale could substantially worsen congestion and safety conditions.

The proposal is incompatible with the community's character and long-term vision. Expanding approximately seven acres of commercial future land use to roughly 40 acres would encourage highway-oriented sprawl and establish a damaging precedent for this largely rural gateway between Alachua and High Springs.

The burden belongs to the applicant to establish—before approval—that the substantially increased commercial intensity is justified, safe, serviceable, and consistent with the Comprehensive Plan. Promises to investigate the decisive questions later do not constitute competent, substantial evidence that the land can support the development now being authorized.

We therefore respectfully request that the Commission:

- Postpone the Farmlands rezoning hearing;
- Direct the City Attorney to explain publicly whether all required readings, notices, transmittals, and adoption procedures for the FLUM amendment have been completed;
- Schedule a properly noticed second reading of the FLUM amendment before considering the dependent rezoning;

- Allow the public to submit evidence and comment on the complete land-use record;
- Require the applicant to identify precisely which portions of the property were investigated, the number and location of all borings, wells, excavations, and other test sites, the methods used, the depths reached, and the basis for concluding that this limited investigation adequately characterizes the entire property;
- Require comprehensive, property-wide karst and hydrogeologic evaluation, including mandatory geophysical screening of proposed stormwater facilities, targeted investigation of identified anomalies, and seasonal-high groundwater measurements;
- Require independent review of the decommissioned landfill, EDB contamination, monitoring-well records, groundwater-plume information, groundwater-flow direction, and potential contaminant-migration pathways;
- Require a complete stormwater-capacity and water-quality analysis and a use-specific, maximum-demand wastewater analysis, including verification of lift-station, force-main, collection-system, treatment, and peak-flow capacity;
- Require substantive independent technical review by qualified professionals retained by or answerable to the City, rather than relying primarily upon the applicant’s representations;
- Require the applicant to provide a documented explanation of what has materially changed since the earlier Agricultural-to-Community Commercial modification, why that approved opportunity was not pursued, and what demonstrated public need justifies the increased commercial acreage and intensity now requested; and
- Deny, or substantially reduce, the proposed commercial intensity unless the applicant establishes through competent, substantial evidence that the increased entitlement is justified, compatible with the surrounding community, within the City’s water, wastewater, stormwater, and transportation capacity, and protective of groundwater and public safety.

What competent, independently verified evidence permits the City to approve this rezoning when the entire property has not been comprehensively investigated, the testing appears limited in scope and depth, material site conditions were not fully disclosed, no geophysical karst survey was performed, and essential environmental and utility studies remain

unfinished?

A decision of this consequence deserves the most thorough examination possible. Once the expanded land-use entitlement and rezoning are granted, the City may have limited ability to correct mistakes revealed by later investigations. Alachua's residents, water resources, infrastructure, and rural character deserve careful planning—not unanswered questions followed by irreversible approvals.

The Commission should not allow a recently granted commercial modification to become merely a foot in the door for a much larger entitlement that was neither contemplated nor justified when the property first transitioned away from agricultural use. Nor should it approve the development intensity first and investigate whether the property can safely support it later.

Respectfully,

Sierra Club Suwannee–St. Johns Group
Executive Committee

From: Haripriya Benedict
To: Planning Division
Subject: Represent the people who voted you in- vote No tonight.
Date: Monday, June 22, 2026 10:19:43 AM

Please vote no to expanding the commercial reach off of 441 and 188th St. 99% of the population ask for a “no” vote. We elect people to represent us, we want to be able to elect you again next time. Work with us, actually do the service of representing our Voice and our Needs. Please vote no tonight. We would love to work together for more years.

Dear Mayor, Commissioners, and City Staff,

I urge the City of Alachua to deny the proposed Comprehensive Plan/Future Land Use Map amendment for the Farmlands project that would expand commercial land use from approximately 7 acres to 40 acres.

This is not a minor adjustment. It is a major land-use decision that would permanently change the character of North Alachua County and open the door to large-scale commercial sprawl along the Highway 441 corridor.

The Comprehensive Plan represents years of public input and community visioning about how and where growth should occur. Expanding commercial development nearly six-fold in this location disregards that vision and creates development pressure that will extend far beyond this single project.

Residents already experience increasing traffic congestion and safety concerns along Highway 441 and County Road 235A. Adding nearly 450,000 square feet of commercial development will bring substantially more vehicles, congestion, noise, and infrastructure demands to an area that was never envisioned as a major commercial center. Once this level of intensity is approved, the impacts will be felt every day by nearby residents, commuters, schools, and businesses.

The proposal also places additional pressure on a high aquifer recharge area that helps replenish the Floridan Aquifer - our source of drinking water and the foundation of North Florida's springs, rivers, and wetlands. As our population grows, protecting clean water should be a priority, not an afterthought.

The burden should be on the applicant to prove that this dramatic increase in commercial intensity is necessary, compatible, and in the public interest. That burden has not been met.

Please vote NO on this amendment. Protect our community vision, our quality of life, our water resources, and the rural character that makes this area special.

This decision is not simply about one development. It is about what kind of future we want for Alachua.

Sincerely,

Sincerely,

Haripriya Benedict

Subject: Support for The Farmlands Commercial Application
Date: Thursday, June 4, 2026 7:44:00 PM

I am writing to express my strong endorsement for The Farmlands commercial application and to respectfully urge a favorable vote. This project presents a well-considered and meticulously planned opportunity to enhance shopping and dining options for residents across the Alachua area. As someone who frequents Alachua for work 5-6 days a week, I have observed the limited shopping and dining establishments available in the area. It is important to note that the proposed development will not detract from the existing downtown businesses. A pertinent example is Gainesville, where despite substantial commercial growth along Archer Road, the downtown area continues to flourish. Furthermore, the Farmlands project is notably less intensive than what the current zoning permits. It is worth highlighting that the entire stretch of 441 in this vicinity is already designated for commercial use, and there are no residential properties adjacent to the Farmlands commercial site or the additional property. In light of these considerations, I firmly believe that this project will bring significant advantages to the community. I would also like to draw attention to the fact that the individuals attending the meetings in person often express opposition to various projects. For instance, they opposed the Publix/Lowes development, yet many of them now patronize these establishments. It is essential to recognize that there are numerous supporters of this project who may not be present at these meetings. Thank you for taking the time to consider my perspective.

Merry Anthony

Subject: Support for the Farmlands Shopping Center Project
Date: Friday, June 5, 2026 10:47:29 AM

The Florida State Hispanic Chamber of Commerce has long championed policies and projects that create economic opportunity, strengthen local communities, and support small business growth across Florida. Representing more than 604,000 Hispanic-owned businesses that contribute over $90 billion annually to our state's economy, we understand the importance of responsible development that creates jobs, expands commerce, and improves quality of life.

The proposed Farmlands Shopping Center in Alachua represents exactly the kind of investment that can help communities thrive. The project is expected to create approximately 1,200 permanent jobs and more than 1,290 construction jobs, providing meaningful employment opportunities and generating economic activity that will benefit local families and businesses alike.

Beyond its economic impact, the development will provide residents with greater access to shopping, services, and everyday necessities closer to home. For working families, seniors, and residents who currently travel outside the community for many basic needs, the project offers increased convenience while keeping more consumer spending and business activity within Alachua.

The Farmlands Shopping Center will also deliver significant long-term benefits to the community through increased tax revenue. The project is projected to generate more than $1.4 million annually in property taxes, substantially increasing resources available for local schools, city services, libraries, and other community priorities, all without raising taxes on residents.

Projects like this help create stronger local economies, support entrepreneurs, attract investment, and provide communities with the resources they need to grow and prosper. For these reasons, the Florida State Hispanic Chamber of Commerce respectfully urges you to support the Farmlands Shopping Center.

Best,

Julio Fuentes

Subject: The Farmlands commercial application
Date: Tuesday, June 2, 2026 11:56:30 AM

I am writing to express my strong support for The Farmlands commercial application and to respectfully encourage a **YES vote.** This project represents a thoughtful, well-planned opportunity to expand shopping and dining options for residents throughout the Alachua area.

The proposed development will not diminish the vitality of downtown businesses. Gainesville provides a clear comparison: despite significant commercial growth along Archer Road, its downtown continues to thrive. The Farmlands project is also far less intensive than what current zoning would allow.

Additionally, the planned interior road network will help reduce traffic pressure on 441 by providing alternative routes within the development. This is a far better solution than multiple separate entrances and unrelated projects along the corridor. The entire stretch of 441 in this area is already zoned for commercial use, and no existing residences border the additional Farmlands commercial property.

For these reasons, I believe this project offers meaningful benefits to the community while aligning with responsible growth and existing land-use plans.

Thank you for your time and consideration.

City Commissioners,

I respectfully urge you to vote in favor of the Farmland project and support responsible growth in our community. This development will create new jobs, generate additional tax revenue, and strengthen our local economy.

Currently, many residents travel outside the city to shop and spend money elsewhere. By expanding local retail and commercial opportunities, we can keep more of those dollars within our community while providing greater convenience for residents. Supporting projects like Farmland helps ensure continued economic growth and enhances the quality of life for those who live and work here.

Thank you for your consideration, and I encourage you to vote yes on the Farmland project.

Best regards,

Paul Norris

Subject: URGENT—Affected Party Registration for July 27 Farmlands Hearing.
Date: Sunday, July 26, 2026 12:14:16 PM

Good morning,
I would like to apply for affected party status for this Monday July 27th hearing at noon. My name is Celine A. Benedict. My address and tax parcel numbers are provided below. I own and reside on 15 acres on NW 188th Street near the proposed development, including 10 acres purchased for agricultural use.

I request Affected Party status because this application may directly and adversely affect my property interests, including my access, groundwater, agricultural use, expenses, health and safety.

NW 188th Street provides my regular access to U.S. 441. I use this route to travel to and from my home, agricultural property, work, my child's school and other daily destinations. The additional traffic and the proposed traffic signals and project access points described in the application would directly affect my ingress and egress. Because of my property's location and reliance on this particular access route, these impacts are more direct and particularized than traffic impacts experienced by the public generally.

In addition, the contaminated-groundwater plume map attached shows that part of my property lies within the documented plume area. I rely on groundwater and use the property for agricultural purposes. Any development-related effects on groundwater movement or contamination could therefore directly affect my water supply, agricultural work and income, and my expenses—including the potential cost of obtaining City water for agricultural use.

I am therefore not affected merely as a member of the general public. I possess specific property interests that may suffer particularized traffic, environmental, agricultural, financial, health and safety impacts from this application. I respectfully request Affected Party status so that I may present evidence and testimony, cross-examine the applicant and City staff, and offer rebuttal as permitted by the City's quasi-judicial procedures.

Please confirm receipt of this registration and its supporting materials and advise me immediately if anything further is required.

Legal name: Celine S. Assouline Benedict
Address: 14828 nw 188th st, we also own the 10 acres next to us.
Tax parcel numbers: 03883-010-003, 03883-004-000, and 03883-001-000
Contact: Realtorbenedict@gmail.com, 305-394-4772

Applying for: Affected party status for the Farmlands Commercial/Rise rezoning application.

Thank you so much,
Mrs Benedict

Subject: Vote No to Farmlands on 06/08/26
Date: Friday, June 5, 2026 5:40:47 PM

Dear Honorable Mayor and Respected Commissioners,

Regarding the June 8 agenda item known as “Farmlands” and the request for a Future Land Use Map change. I respectfully ask that you “vote NO” on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location will draw regional traffic - well beyond what the surrounding roads are designed to reasonably handle.

This is a legislative decision, which means the Commission is not required to approve.

US 441 already experiences heavy daily congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

More concerning is that large commercial centers could pull activity away from downtown Main Street and affect the local charm that defines our community.

Key considerations:

* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and thoughtful consideration!

Respectfully,

John Havlik

Subject: Vote NO to Farmlands Request PSSC26-0002
Date: Monday, May 4, 2026 5:40:25 AM

Dear Mr. Mayor and Commissioners,

I am writing regarding the May 4th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

Dear Mr. Mayor and Commissioners,

I am writing to express my opposition to the May 4th agenda item regarding the "Farmlands" request for a Future Land Use Map change. I respectfully ask that you vote no on this proposal.

A large-scale commercial development at this location, potentially featuring a national anchor tenant, would generate regional traffic exceeding the capacity of our current infrastructure. US 441 already experiences significant congestion, and growth at this scale threatens the small-town character that defines Alachua. Furthermore, I am concerned that such a large commercial center would divert activity away from our downtown Main Street.

Please consider the following key points:

- Traffic: Increased regional pressure on the already congested US 441.
- Scale: An inappropriate increase in commercial intensity for this area.
- Community Impact: Potential negative effects on the vitality of Main Street and our rural character.

This land use change is a policy decision within your discretion. If this level of intensity is not right for this, I urge you to deny the request or ask the applicant to submit a less intensive proposal.

Thank you for your time and for your service to our community.

Sincerely,

Riley Hubbard

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

I am also concerned that a large commercial center will pull activity away from our downtown Main Street and affect the charm that defines our community.

You have the ability to decide if this level of intensity is right for this location. If it is not, you can vote no or ask the applicant to come back with a less intensive proposal.

Key considerations:
- Traffic: Increased regional traffic on an already congested US 441
- Scale: A significant increase in commercial intensity
- Community impact: Potential impacts to downtown Main Street and rural character

Thank you for your time.

-Myles (Gainesville native)

Subject:	Vote NO to Farmlands Request PSSC26-0002
Date:	Thursday, April 30, 2026 8:07:33 AM

Dear Mr. Mayor and Commissioners,

I am writing regarding the May 4th agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, like Walmart, this location will draw regional traffic well beyond what the roads can handle.

This type of land use change is a policy decision, not an automatic approval. You are not required to approve it.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel. Growth at this scale will change the small-town feel that has drawn people to Alachua.

Subject: Vote YES on Farmlands
Date: Thursday, June 4, 2026 7:07:05 PM

I am writing to express my support for The Farmlands commercial application and to respectfully encourage a YES vote. This project represents a well-planned opportunity to expand shopping and dining options for residents throughout the Alachua area. For someone who works in Alachua 5-6 days per week it really lacks shopping/restaurants.
The proposed development will not diminish the downtown businesses. Gainesville provides a clear comparison: despite significant commercial growth along Archer Road, its downtown continues to thrive. The Farmlands project is also far less intensive than what current zoning would allow.
That entire stretch of 441 in this area is already zoned for commercial use, and no existing residences border the Farmlands commercial property or the additional property.
For these reasons, I believe this project offers meaningful benefits to the community.
The only people that attend the meetings in person come to oppose everything. They opposed the Publix/Lowes yet all shop there now?
Please understand there are more people who wants this project they just don't attend the meetings!
Thank you for your time and consideration.

Subject:	We don't need another parking lot and store we need clean air and water!!!
Date:	Tuesday, June 2, 2026 6:39:18 PM

Dear Mr. Mayor and Commissioners,
We don't need another huge parking lot instead of green grass and trees. We don't need another store selling plastic stuff we mostly don't need - which will end up in land fills and be on this planet for up to a thousand years. We don"t need more semi trucks going from the warehouse to a big box store on 441 during morning traffic- as they also drive too fast as they pass Ala unlearning Academy during school morning drop off and pick up - This would also add even more traffic coming off of 75 onto 441 daily with all the added traffic and car pollution washing into our aquifer. We don't need more semi- trucks wrecking our roads that our tax dollars pay to repair.
What we need is clean air and clean water to drink for ourselves and our great-great grand children. The small businesses in High Springs and downtown Alachua would struggle with big store coming in. Please consider these owners - many of whom are residents here as well.

I am writing regarding the June 8 agenda item known as Farmlands and the request for a Future Land Use Map change. I respectfully ask that you vote NO on this request as proposed.

If developed with a large national anchor tenant, such as Walmart, this location could draw regional traffic well beyond what the surrounding roads can reasonably handle.

This is a legislative decision, which means the Commission is not required to approve it.

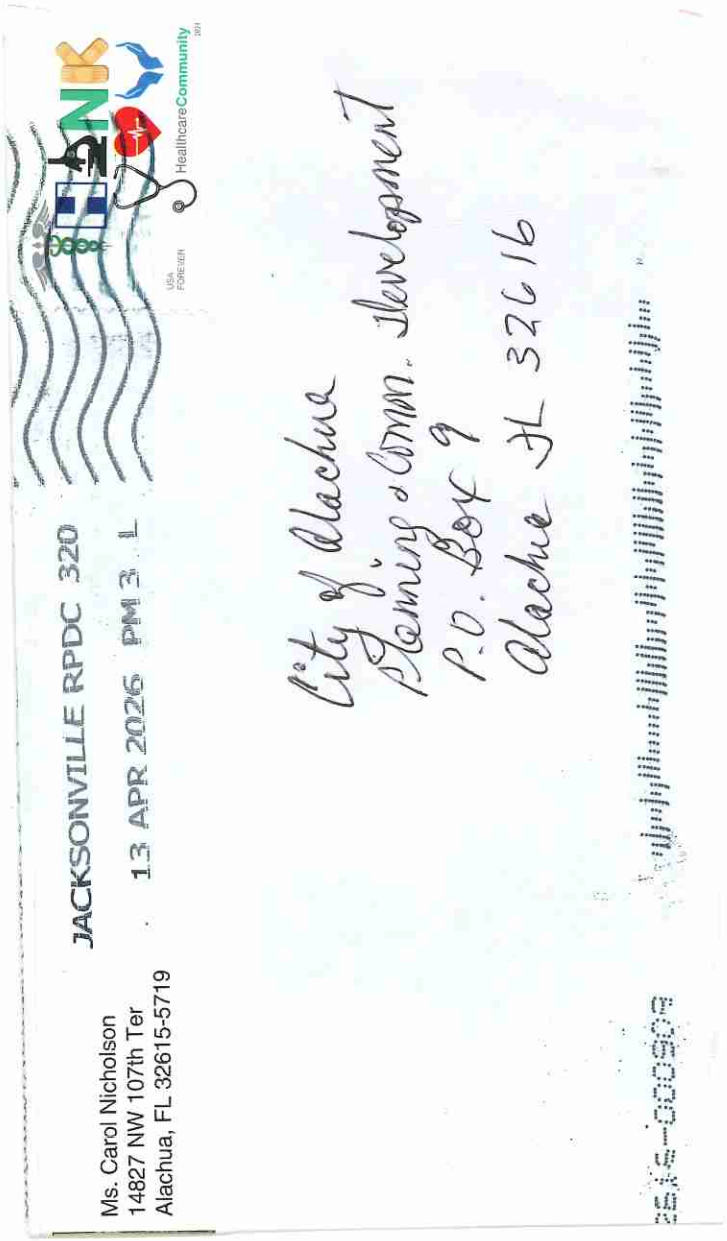
During the joint Planning & Zoning Board and Commission workshop for Our Alachua 2050, Planning Director Bryan Thomas explained this clearly in the recording that outside of quasi-judicial hearings: "...As the deciding body you can decide even though this is legal, do I still think it's good for my community? So, you have that choice to make." Please consider my voice in your decision.

US 441 already experiences heavy congestion, and additional regional traffic could further impact daily travel and quality of life. Growth at this scale would also change the small-town character that draws many people to Alachua.

I am also concerned that a large commercial center could pull activity away from downtown Main Street and High Springs, which can affect the local charm that defines our community.

If the Commission does not believe this proposal is the right fit for this location, you have the ability to vote no or ask the applicant to return with a less intensive proposal.

Key considerations:



* Traffic: Increased regional traffic on an already congested US 441
* Scale: A significant increase in commercial intensity
* Community impact: Potential impacts to downtown Main Street and community character

Thank you for your time and consideration.

Re: application #PSSE 26-0002

I cannot attend the April 21 public hearing but wish to express my opinion as a resident of 37 years.
Please stop approving multi family homes on low acreage such as this. The growth of such units is not supported by the infrastructure. But more importantly, the "Good Life" city of Alachua is becoming the not so Good Life town. People come for the rural environment not for unmanaged growth. Keep acreage at minimum of 1/2 acre per single family home please.

Commission Agenda Item

MEETING DATE: August 24, 2026

SUBJECT: Ordinance 26-10: AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS FROM COMMUNITY COMMERCIAL ("CC"), COMMERCIAL INTENSIVE ("CI"), AND PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") TO PD-R AND PLANNED DEVELOPMENT – COMMERCIAL ("PD-COMM") ON A ± 182-ACRE SUBJECT PROPERTY; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441; TAX PARCELS 03042-050-003; 03042-050-004; 03042-050-005; 03042-050-010; 03042-051-001; 03046-003-000; 03046-003-001; 03046-003-003; 03046-003-004; 03046-003-005; 03875-001-001; 03875-010-001; 03875-010-002; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE (Quasi-Judicial Hearing; Second Reading).

PREPARED BY: Carson Crockett

RECOMMENDED ACTION:

Staff recommends that the City Commission find the site-specific amendment to the Official Zoning Atlas for AYLA LLC, First Coast Road Rangers LLC, Jack's Small Engine Repair LLC, and JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and (1) pass and adopt Ordinance 26-10 upon second and final reading and (2) authorize the Mayor to execute the PD Agreement.

Recommended Motion: *I move that, based upon the competent substantial evidence, the presentation before this Commission, and Staff's recommendation, this Commission finds the application for a site-specific amendment to the Official Zoning Atlas for AYLA LLC, First Coast Road Rangers LLC, Jack's Small Engine Repair LLC, and JTFA LLC to be consistent with the City of Alachua Comprehenisve Plan and in compliance with the City's Land Development Regulations and (1) adopt Ordinance 26-10 upon second and final reading and (2) authorize the Mayor to execute the PD Agreement.*

Summary

This application is a request by eda consultants, inc. (Agent) and NV5, Inc. (Agent) together as the Applicant on behalf of AYLA LLC, First Coast Road Rangers LLC, Jack's Small Engine Repair LLC, and JTFA LLC (Property Owners) for consideration of a site-specific amendment to the Official Zoning Atlas (rezoning). The proposed rezoning would change the zone district from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) on a ± 182.00-

acre subject property.

The subject property is generally located at 16650 NW US Highway 441 (tax parcels 03042-050-003; 03042-050-004; 03042-050-005; 03042-050-010; 03042-051-001; 03046-003-000; 03046-003-001; 03046-003-003; 03046-003-004; 03046-003-005; 03875-001-001; 03875-010-001; 03875-010-002).

The Applicant has submitted a companion application for a small-scale Comprehensive Plan amendment, which proposes to amend the future land use categories from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential, Community Commercial, and Commercial on a ± 46.70-acre portion of the subject property.

Existing Zone Districts

Section 3.5.2(C) of the City's Land Development Regulations (LDRs) establishes the CC zone district with the purpose to "provide lands for business uses that provide goods and services to residents of the entire community." Uses typically consist of retail sales and services, offices, visitor accommodations, and eating establishments; however, the CC zone district is a mixed-use zone district and permits a limited number of residential uses. The maximum floor area ration (FAR) is 1.25 for parcels one-acre or less in size and the maximum density is 15 dwelling units per acre (DUA).

The CI zone district is established by Section 3.5.2(E) of the City's LDRs with the purpose to "provide lands and facilitate highway-oriented development opportunities within the City, for uses that require high public visibility and an accessible location." Uses typically consist of regional retail sales and services, auto-oriented uses, visitor accommodations, and eating establishments. Higher density residential uses and affordable housing may be developed in conjunction with non-residential uses at a maximum density of 15 DUA. The maximum FAR is 1.25 for parcels one-acre or less in size.

Section 3.6.1(A) of the City's LDRs establishes the general purposes of all planned development districts, with Section 3.6.1(B)(1) establishing the specific purpose of the PD-R district to provide a mix of residential uses using innovative and creative design elements, while at the same time providing an efficient use of open space." The existing PD-R district is known as the Farmlands PD and currently permits an aggregate of 275 dwelling units (3.16 DUA) and 4,000 square feet of non-residential floor area for use of an amenity center.

Proposed Zone Districts

The proposed rezoning would retain a portion of the existing PD-R district; however, the total number of dwelling units permitted would be reduced to 203 dwelling units (1.66 DUA). The remainder of the subject property would be rezoned to PD-COMM.

Section 3.6.1(B)(4) of the City's LDRs establishes the specific purpose of the PD-COMM district

to “provide mixed-use retail and office development, with limited moderate and higher density residential uses integrated into the development above street levels and as separate stand-alone uses.” The proposed PD-COMM district would function in conjunction with the PD-R district to provide a mix of compatible uses in close proximity to each other while retaining distinct use areas and characteristics. The proposed PD-COMM district would permit an aggregate of 0 DUA and up to 450,000 square feet of non-residential floor area (0.17 FAR).

Figure 4 shows the proposed PD Master Plan, which is divided into three development areas. Development Area “A” (± 48.00-acres) is principally the commercial use area. Development Area “B” (± 81.00-acres) is principally the residential use area. Development Area “C” (± 53.00-acres), also referred to as common area/stormwater/open space, is principally the location of buffers, necessary infrastructure such as stormwater management facilities, open space, a community center, etc.

On April 21, 2026, the Planning & Zoning Board voted to transmit the application to the City Commission with a recommendation to approve.

On May 4, 2026, the City Commission deferred the hearing of Ordinance 26-10 to a date certain of June 8, 2026.

On June 8, 2026, the City Commission deferred the hearing of Ordinance 26-10 to a date certain of June 22, 2026.

On June 22, 2026, the City Commission continued the hearing of Ordinance 26-10 to a date certain of July 27, 2026.

On July 27, 2026, the City Commission voted to approve the application and pass Ordinance 26-10 upon first reading.

ORDINANCE 26-10

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS FROM COMMUNITY COMMERCIAL ("CC"), COMMERCIAL INTENSIVE ("CI"), AND PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") TO PD-R AND PLANNED DEVELOPMENT – COMMERCIAL ("PD-COMM") ON A ± 182-ACRE SUBJECT PROPERTY; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441; TAX PARCELS 03042-050-003; 03042-050-004; 03042-050-005; 03042-050-010; 03042-051-001; 03046-003-000; 03046-003-001; 03046-003-003; 03046-003-004; 03046-003-005; 03875-001-001; 03875-010-001; 03875-010-002; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, an application for a site-specific amendment to the Official Zoning Atlas ("Amendment") as further described herein has been filed with the City (the "Amendment") by eda consultants, inc. ("Agent") and NV5. Inc. ("Agent") (together as the "Applicant") on behalf of AYLA, LLC; First Coast Road Rangers, LLC; Jack's Small Engine Repair LLC, and JTFA LLC (together as the "Property Owners"); and,

WHEREAS, the Property Owners desire to obtain approval for a Planned Development – Residential ("PD-R") and Planned Development – Commercial ("PD-COMM") in the City, together known as the Farmlands Planned Development ("Project"); and,

WHEREAS, the Property Owners wish to construct the Project, consisting of a maximum of 203 residential dwelling units and a maximum of 454,000 square feet of non-residential floor area on the subject property, the legal description of which is attached hereto as Exhibit "A" and is referred to as the "Property"; and,

WHEREAS, a duly advertised quasi-judicial public hearing was conducted on the Amendment on April 21, 2026, by the City of Alachua Planning and Zoning Board ("PZB"), and the PZB reviewed and considered comments received during the quasi-judicial public hearing concerning the application and made its recommendation for approval to the City Commission; and,

WHEREAS, the City Commission considered the recommendations of the PZB at duly advertised quasi-judicial public hearings on June 22, 2026, (which was later continued to July 27, 2026), and August 24, 2026, and provided for and received public participation at both public hearings; and,

WHEREAS, the City Commission has determined and found the proposed Amendment to be consistent with the City of Alachua Comprehensive Plan and Land Development Regulations; and,

WHEREAS, for reasons set forth in this Planned Development Ordinance ("PD Ordinance") that is hereby adopted and incorporated as findings that the City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare;

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA.

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and incorporated herein by reference.
2. The Amendment is consistent with the City of Alachua Comprehensive Plan.
3. The Amendment is in compliance with the City of Alachua Land Development Regulations.
4. The Amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

Section 2. Official Zoning Atlas Amended

The Official Zoning Atlas is hereby amended from Community Commercial ("CC"), Commercial Intensive ("CI"), and PD-R to PD-R and PD-COMM for the Property in accordance with the legal descriptions found in Exhibit "A" and map found in Exhibit "B" and attached hereto and incorporated herein.

Section 3. Planned Development Master Plan and Planned Development Agreement

The Planned Development Master Plan ("PD Master Plan" found in Exhibit "C" and the Planned Development Agreement ("PD Agreement") found in Exhibit "D" of this PD Ordinance are hereby approved and adopted concurrent with the approval of this PD Ordinance for a period of 10 years from the date of final approval by the City Commission.

Section 4. Development Parameters

These development parameters shall apply to any development proposed within the PD-R or PD-COMM zone districts as adopted by Section 2 of this PD Ordinance and as described by Exhibits "A" and "B".

1. The development shall consist of non-residential and residential uses and be developed in up to five phases. The location of each phase shall be designed in a manner that will create a logical and functional development and infrastructure pattern. More specifically, phasing shall generally occur from north to south with boundaries for each phase determined by access and utility infrastructure. This PD Ordinance and the PD Agreement found in Exhibit "D" shall be valid for a period of no more than 10 years from the date of final approval by the City Commission, unless otherwise extended by the City Commission through an amendment to this PD Ordinance.
2. The development shall consist of uses including single-family detached, uses consistent with the PD-COMM zoning district, and common areas as shown on the PD Master Plan found in Exhibit "C". The density, intensity, allowable uses, and acreage, where applicable, for each development area are as follows:

Maximum Development Area & Density/ Intensity	Allowable Uses [1]	Maximum Potential Development	Acres	Percentage of PD
Development Area 'A' 0 DUA 0.22 FAR	All allowed uses within the PD-COMM district as shown in Table 4.1-1, Table of Allowed Uses, of the City's Land Development Regulations, including, but not limited to: • Child care center; • School;	0 dwelling units 450,000 square feet non-residential	± 48	± 27%

Maximum Development Area & Density/ Intensity	Allowable Uses [1]	Maximum Potential Development	Acres	Percentage of PD
Development Area 'A' (Continued)	• Post office; • Assisted living facility; • Restaurant, indoor seating only; • Restaurant, with outdoor seating; • Restaurant, with drive-through or drive-in service; • Specialty eating establishment; • Offices; • Bar, nightclub, or cocktail lounge; • Drug store or pharmacy (stand alone); • Entertainment establishment; • Financial institution; • Personal services establishment; • Sales establishment; • Large-scale retail establishments; • Microbrewery; and, • Hotel or motel.			
Development Area 'B' 2.5 DUA 0.00 FAR	• Dwelling, single-family detached.	203 dwelling units 0 square feet non-residential	± 81	± 44%

Maximum Development Area & Density/ Intensity	Allowable Uses [1]	Maximum Potential Development	Acres	Percentage of PD

Development Area 'C'
 	
(Common Area/Stormwater/ Open Space)
 	
0 DUA
 	
<0.01 FAR
	• Active & passive use areas:
	  • Trails;
	  • Parks;
	  • Playgrounds;
	  • Clubhouse & pool;
	• Landscaped areas;
	• Utility easements; and,
	• Stormwater management facilities.
		0 dwelling units
		
		4,000 square feet
			± 53	± 29%

1. Utilities and supportive infrastructure improvements, including but not limited to potable water, sanitary sewer, gas, and electric are permitted in all land use areas.				

3. The dimensional standards for the allowable uses, where applicable, for the Project are as follows:

Allowable Use	Min. Lot Area (Sq. Ft.)	Min. Lot Width (Ft.)	Max. Lot Coverage	Min. Setbacks (Ft.)			Max. Height
				Front	Side	Rear	
PD-R [1]							
Yellow (Minimum Lot Size ½ Acre)	21,780	85	40%	20	7.5	15	65
Orange (Minimum Lot Size 1/3 Acre)	14,520	70	40%	20	7.5	15	65
All Other Uses [2]	10,000	50	40%	20	7.5	15	65
PD-COMM							
All Other Uses [2]	0	0	80% (aggregate total in PD-COMM)	20	0	20	65
1. In the PD-R Areas, setbacks and dimensional standards apply only to individual platted lots and all building separation requirements specified in the Florida Building Code are applicable. 2. More active recreation uses such as playgrounds, picnic areas, pavilions & gazebos are only permitted in open space areas that are located in the center/interior of the project. Clubhouse/amenity center and any associated parking or outdoor component (such as playground, pool, or pool deck) shall be setback from NW 188th street right-of-way a minimum of 250'.							

4. A final PD plan shall consist of a site plan and/or preliminary plat. Application for a final PD plan must be submitted to the City within 12-months of from the date of final approval by the City Commission, unless otherwise extended by the City Commission through an amendment to this PD Ordinance. Upon submission, the PD shall be deemed extended until a final determination on the final PD plan has been rendered. In such case where the final determination is to deny and the 12-month period has expired, this PD shall be deemed expired unless otherwise extended by the City Commission through an amendment to this PD Ordinance.

5. A final PD plan for development on the Property shall be consistent with the City of Alachua Comprehensive Plan, the City's Land Development Regulations, approved PD Master Plan, PD Agreement, and this PD Ordinance, and includes the following requirements:

    a. General Requirements:

        i. The Property Owners, their successors and/or assigns, shall be responsible for the provision of infrastructure for the project. This shall include all on-site and off-site improvements, including transportation system or utility improvements, deemed necessary to support the development by the City in the City's sole discretion. Off-site improvements deemed necessary to support the development by the City in the City's sole discretion shall be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations in existence at the time the development requiring the infrastructure is proposed and shall be supported by appropriate data and analysis that identifies a specific impact from the proposed development. If off-site improvements are required by the City, it shall be limited to the areas or infrastructure impacted by the proposed development. The data and analysis used to justify the requirement for off-site improvements will be provided by traffic study data, reports, or other infrastructure analysis that identify proportional impacts from the proposed development. The data and analysis will be provided by the Property Owners, their successors and/or assigns, and reviewed by the City. The Property Owners, their successors and/or assigns, shall pay for any consultants or experts the City deems necessary to review the data and analysis provided.

        ii. Facilities constructed on-site that are not dedicated to the City for maintenance shall be the responsibility of a legally established property owners' association in compliance with Section 7.7 of the City's Land Development Regulations. The property owners' association shall have the responsibility of maintenance of all common areas. In the event common areas and required open space areas, as mandated by Sections 6.7.6, 6.9.3, and 7.8.1 of the City's Land Development Regulations are not owned by a property owners' association, such areas shall be burdened by an easement that requires a property owners' association or another entity approved by the City to maintain such areas, and that restricts such areas in accordance with the City's requirements for such areas.

        iii. The Property Owners, their successors and/or assigns, shall submit a utility system plan as part of the construction plans for the proposed site plan or preliminary plat.

        iv. Utilities shall be extended throughout the Project within areas designated as public rights-of-way to the maximum extent practicable. Utility infrastructure which must run outside a public right-of-way, and which will be maintained by the City, shall be located in easements approved and accepted by the City granting access and maintenance of such infrastructure.

        v. A final PD plan shall include the exact number of residential dwelling units and non-residential floor area, as well as precise information regarding the layout of open space, traffic and pedestrian circulation, and stormwater management.

vi. No construction vehicles shall access the subject property from NW 188th Street during development of the property. Furthermore:

1. Construction activities shall only occur between the hours of 7:00 AM and 7:00 PM, Monday through Friday and between the hours of 9:00 AM and 7:00 PM, Saturday and Sunday; and,

2. Dust and debris from construction activities shall be minimized as to not spread dust and debris off-site. This may include, but is not limited to, dust control achieved through water trucks, removal of mud/soil from vehicle tires before exiting the site, and street cleaning.

b. Transportation Requirements:

i. The ingress/egress points to the Property shall be located as depicted on the approved PD Master Plan. The design of all proposed roadways shall be consistent with the applicable standards of Article 7 of the City's Land Development Regulations, the City's Design and Construction Requirements (latest edition at the time of review of site plan or construction plans), standards of the Florida Department of Transportation (FDOT) and Alachua County where applicable, and the approved PD Master Plan.

ii. Roadway shifts of less than 100 feet (measured centerline to centerline) shall be permitted as minor deviations from the approved PD Master Plan per Section 2.4.3(D)(8) of the City's Land Development Regulations.

iii. The design of proposed roadways shall be reviewed and approved as part of construction plans submitted for the subdivision review process, as further described in Section 2.4.10 of the City's Land Development Regulations, or site plan review or infrastructure plan review process, as further described in Section 2.4.9 of the City's Land Development Regulations.

iv. A phase 2 traffic impact analysis ("TIA") shall be provided at time of submission of any final PD plan application. Additionally, a traffic signal timing study shall be conducted for the entirety of the US 441 corridor within the City of Alachua municipal limits at the cost of the Applicant, and be provided at time of submission of any final PD plan application as necessary to ensure the level of service of transportation systems is maintained. This requirement shall not reserve concurrency nor preclude the City from, in its sole discretion, requiring additional measures to ensure the level of service is maintained if adjusted signal timings and other Transportation System Management (TSM) strategies are insufficient in maintaining the level of service.

v. The ingress/egress point to the Property located on NW 188th Street shall be designated as emergency access only, but shall be paved and designed to have a minimum paved width of 24' and shall be dedicated as right-of-way or have an easement provided. Provided gate shall be constructed of wood, vinyl, wrought iron, or similar material. Gate shall not be constructed of chain link, chicken wire, barbed wire, or similar material. An ungated pedestrian access may be provided granted it is designed to not be accessible by vehicular traffic.

c. Pedestrian and Street Improvements:

i. The Property Owners, their successors and/or assigns, shall be responsible to design, obtain all applicable permits, and construct all pedestrian and street improvements in accordance with Article 7 and any other pertinent section of the City's Land Development Regulations, subject to the following:

1. Block lengths may exceed 600-feet in length. Block lengths greater than 600' in length shall include a minimum 20-foot-wide easement for a pedestrian way through the block. In no case shall block lengths exceed 1,000-feet.

2. Traffic calming measures shall be used to connect mid-block cuts with each other or other elements of the pedestrian circulation network and may include raised pedestrian crossings, change in materials, bulb-outs, or other similar measures approved by the City in its sole discretion. These pedestrian ways shall be privately maintained, unless a separate agreement is made between the Property Owners, their successors and/or assigns, and the City of Alachua Public Services Department.

3. Any easement intended for pedestrian access through a block shall be improved with a 10-foot-wide sidewalk made of concrete, brick pavers, asphalt, or similar hard material.

4. In no instance shall a block length or length of travel through an easement exceed 900 feet.

ii. A minimum 5-foot-wide sidewalk shall be provided on both sides of all public streets.

iii. A minimum 8-foot-wide multi-use path shall be provided along the former seaboard right-of-way as depicted on the PD Master Plan. Construction of this path shall occur, at a minimum, in phases concurrent with the respective phase of development.

iv. The bicycle/pedestrian connection between Development Area 'A' and Development Area 'B' shall consist of an easement a minimum of 20-feet in width with a 10-foot-wide sidewalk made of concrete, brick pavers, asphalt, or similar hard material. Construction of this path shall occur, at a minimum, in phases concurrent with the respective phase of development.

v. Outparcels must be connected to each other with pedestrian infrastructure as well as the external pedestrian network.

d. Off-Street Parking and Loading Requirements:

i. All final PD plans in the PD-R shall be subject to the standards of Section 6.1 of the City's Land Development Regulations in effect at the time of review.

ii. All final PD plans in the PD-COMM shall be subject to the standards of Section 6.1 of the City's Land Development Regulations in effect at the time of review; except for the following deviations granted by the City Commission in accordance with Table 3.6-3 of the City's Land Development Regulations:

1. The proposed parking for the outparcel(s) retail services/business will be per the City of Alachua Land Development Regulations (LDRs). The proposed parking for the shopping center retail services will be as follows: 1 space per 305 SF of gross floor area; maximum=125% of minimum. Shopping center is a unified commercial development containing three or more business establishments, including but not limited to general merchandise stores, retail stores, restaurants, grocery stores, specialty sales establishments, and services users. Any reduction in parking spaces subject to this standard must be set aside as landscaping, functional open space, or pedestrian use in the sole discretion of the City, in addition to the minimum required open space standards of Section 6.7 of the City of Alachua LDRs.

2. Bicycle parking will be provided at a rate of 1 bicycle parking spaces per 5,000 SF of gross floor area. Location of bicycle parking shall be located within 50 to 100' of primary building entrances as practical, placed outside of vehicular aisles and walkways with a bike rack that allows locking of the frame and wheel. The location will be distributed through the retail site and outparcels. Final location will be shown on the design plans. A minimum of 2 bicycle parking spaces are required for structures under 10,000 square feet in gross floor area.

In case of conflict between this subsection of this PD Ordinance and the City's Land Development Regulations at time of review, this subsection of this PD Ordinance shall govern.

e. Signage Requirements:

i. All final PD plans in the PD-R shall be subject to the standards of Section 6.5 of the City's Land Development Regulations in effect at the time of review.

ii. All final PD plans in the PD-COMM shall be subject to the standards of Section 6.5 of the City's Land Development Regulations in effect at the time of review; except for the following deviations granted by the City Commission in accordance with Table 3.6-3 of the City's Land Development Regulations:

1. Wall signage shall be in accordance with Section 6.5.4(C)(3), except that in the case of multi-tenant buildings, each occupant of the multi-tenant building shall be permitted wall signage for the portion of the building elevation which is included as part of the occupant's premises in an amount not to exceed 10% of the respective portion of the building elevation.

In case of conflict between this subsection of this PD Ordinance and the City's Land Development Regulations at time of review, this subsection of this PD Ordinance shall govern.

f. Electric System Requirements:

i. The Property Owners, their successors and/or assigns, shall be responsible for all costs associated with connection to the electric system of the electric service provide as necessary to serve the Project.

g. Potable Water and Wastewater System Requirements:

i. The Property Owners, their successors and or/assigns, shall be responsible for all costs associated with connection to the City's potable water and wastewater systems as necessary to serve the project.

ii. No new wells will be allowed in the Project. No new sceptic or other self-contained waste water systems will be allowed in the Project. All development within the Project will be required to connect to the City's potable water and wastewater systems.

iii. Water systems shall be designed to provide fire flow rates that conform to the current standards of the Florida Fire Prevention Code, the Florida Building Code, and Chapter 633, Florida Statutes.

iv. The locations of proposed lift stations are approximate as depicted in the PD Utility Plan as part of the approved PD Master Plan. The applicant will be required to coordinate exact location and design of future lift stations with the City of Alachua Public Services Department; however, the location of future lift stations shall be generally consistent with the PD Utility Plan.

h. Landscape and Open Space Requirements

i. The Property Owners, their successors and/or assigns, shall submit a landscaping and buffering plan as part of any final PD plan.

ii. All final PD plans in the PD-R shall be subject to the standards of Section 6.2 and Section 6.3 of the City's Land Development Regulations in effect at the time of review.

iii. All final PD plans in the PD-COMM shall be subject to the standards of Section 6.2 and Section 6.3 of the City's Land Development Regulations in effect at the time of review; except for the following deviations granted by the City Commission in accordance with Table 3.6-3 of the City's Land Development Regulations:

1. The proposed PD Master Plan shows the proposed perimeter buffers for the PD-COMM. For the outparcel(s) a minimum 5' landscape buffer strip is required on lot sides as they are created. Any planting that is displaced by the reduced buffer requirements must still be provided elsewhere on site.

In case of conflict between this subsection of this PD Ordinance and the City's Land Development Regulations at time of review, this subsection of this PD Ordinance shall govern.

iv. The Property Owners, their successors and/or assigns, shall submit an open space plan as part of any final PD plan. The open space plan shall meet the minimum requirements established by Section 6.7 of the City's Land Development Regulations in effect at time of review.

i. Stormwater and Environmental Requirements:

i. The Property Owners, their successors and/or assigns, shall design, obtain all applicable permits, and construct a stormwater management system necessary to serve the development. Stormwater management facilities shall be constructed concurrent with development of the Project. Sufficient stormwater capacity consistent with Section 6.9.3 of the City's Land Development Regulations must be provided concurrent with site improvements of the Project. On-site soil shall be appropriately prepared so as to alleviate any drainage issues.

ii. Any final PD plan shall include detailed geotechnical mapping and evaluation to identify and address any potential karst features or active ground loss areas. Evaluations may include the requirement of conducting electric resistivity tests, ground penetrating radar, and/or additional soil borings in the City's sole discretion. The Property Owner's, their successors and/or assigns, shall be responsible for furnishing the cost of the additional evaluations and the City's expert.

1. The listed geologic requirements as outlined in the letter sent to Patrice Boyes on December 23, 2025, by Michael Alfieri, P.G., on behalf of Apex Companies.

iii. All final PD plans shall be consistent with the goals, objectives, and policies of the City of Alachua Comprehensive Plan including, but not limited to, those goals, objectives, and policies related to the stormwater system design in high aquifer recharge areas.

iv. The Property Owners, their successors and/or assigns, shall provide a listed species and habitat survey as part of any final PD plan for the Project, including a 100% gopher tortoise and burrowing owl survey. Standard measures of protection for eastern indigo snakes are required, if documented. The survey shall document if any listed species are observed on the Property. If a listed species is observed on the Property, the updated survey shall provide recommendations to address potential impacts to the listed species and to identify any permitting requirements of any local, state, or federal governmental agencies. Any submitted listed species and habitat survey shall be acceptable to the City for a period of no more than three years from the original date of the survey.

v. If any wetlands are identified on the Property, such areas shall be field-delineated using professionally accepted methodology. All development in and/or near wetland areas shall be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and shall grant conservation easements or other appropriate mechanisms, as determined by the City, to protect

wetland areas. Any submitted wetland delineations shall be acceptable to the City for a period of no more than three years from the original date of delineation.

vi. All final PD plans shall be consistent with the goals, objectives, and policies of the City of Alachua Comprehensive Plan including, but not limited to, those goals, objectives, and policies related to the eradication of invasive exotic plant species.

vii. The Property Owners, or their successors and/or assigns, shall, concurrent with development of the Project, remove and destroy all Category I and II exotic plant species, as published in the most current version of the Florida Exotic Plant Council's List of Invasive Plant Species, located on the Property. Thereafter, the Owner, or their successors and/or assigns, shall assure long-term implementation of an exotic plants management approved with a final development order and which shall be included in covenants and restrictions to be implemented by a property owner's association in conformance with Section 7.7 of the City's Land Development Regulations or other mechanism acceptable to the City.

viii. The planting of any species identified in the most current version of the Florida Exotic Pest Plant Council's List of Invasive Plant Species shall be prohibited. Grasses and sods shall be certified free of noxious weeds by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry.

ix. Regulated trees shall be surveyed and location identified during the design of any final PD plan in order to preserve existing trees to the greatest extent practicable. The PD Master Plan may be slightly adjusted to allow for flexibility in road and lot configuration for the express purposed of preserving on-site canopy areas which will enhance the Project by providing shaded green spaces and buffers.

x. The Applicant shall provide a submittal of an appropriate engineering and environmental study (at time of any final PD Plan application) demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent land fill or the extent, movement, or management of the existing groundwater contamination plume.

6. The Property Owners, their successors and/or assigns, shall obtain all applicable permits from the Suwannee River Water Management District, Alachua County, the Florida Department of Environmental Protection, the Florida Fish and Wildlife Commission, the Florida Department of Transportation, and any other local, state, or federal agency before the commencement of any development on the Property for the Project.

7. The development parameters defined herein do not inordinately burden the Property Owners, their successors and/or assigns, or the development of the Property or the Project.

8. The rezoning of the Property and adoption of this PD Ordinance do not reserve concurrency for the Project or Property. Concurrency will be re-evaluated at time of review for any final PD plan in accordance with Section 2.4.14 of the City's Land Development Regulations.

9. The adoption of this PD Ordinance does not guarantee the approval of any development permits, including, but not limited to, preliminary plats, construction plans, final plats, infrastructure plans, or site plans for the Project, or for any section thereof, for the Property Owners, their successor and/or assigns.

10. All development, including, but not limited to, any final PD plan for the Project shall be governed by the laws, regulations, comprehensive plan, and ordinances in effect at the time of the specific proposed development and not as of the date of this ordinance.

Section 5. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of Alachua, Florida.

Section 6. Repealing Clause

All ordinances or parts of ordinances in conflict with this ordinance are, to the extent they conflict with this ordinance, repealed. More specifically, Ordinance 22-07 (which established the original NW 188th Street/US 441 Planned Development) and any NW 188th Street/US 441 Planned Development PD Master Plan, PD Agreement, or Planned Development governing document is hereby repealed in its entirety and superseded by this PD Ordinance and the PD Master Plan and PD Agreement adopted by Section 3 of this PD Ordinance.

Section 7. Providing for Severability

It is the declared intent of the Alachua City Commission that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by a court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance and the remainder of this ordinance, after the exclusion of such part or parts, shall be deemed to be valid.

Section 8. Effective Date

This Ordinance shall be effective upon its passage and adoption on the second and final reading.

PASSED on first reading on the 27th day of July, 2026.

PASSED and **DULY ADOPTED**, in regular session, with a quorum present and voting, by the City Commission, upon second reading this 24th, day of August, 2026.

CITY COMMISSION OF THE
CITY OF ALACHUA, FLORIDA

Walter Welch, Mayor

APPROVED AS TO FORM

Scott Walker, City Attorney

EXHIBIT "A"

LEGAL DESCRIPTION FOR: Planned Development – Residential District ("PD-R")

A PARCEL OF LAND LYING IN SECTIONS 8 AND 17, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA; THENCE NORTH 05°01'08" WEST, ALONG THE WEST LINE OF SAID SECTION 8, A DISTANCE OF 2816.61 FEET TO THE SOUTHERLY RIGHT-OF-WAY LINE OF US HIGHWAY NO. 441 (STATE ROAD NO. 20 & NO. 25) (200 FOOT WIDE RIGHT-OF-WAY); THENCE SOUTH 77°51'19" EAST, ALONG SAID SOUTHERLY RIGHT-OF-WAY LINE, A DISTANCE OF 1213.56 FEET; THENCE SOUTH 04°44'37" EAST, A DISTANCE OF 319.56 FEET; THENCE NORTH 87°13'16" WEST, A DISTANCE OF 83.33 FEET TO THE POINT OF BEGINNING; THENCE CONTINUE NORTH 87°13'16" WEST, A DISTANCE OF 984.50 FEET TO THE EAST RIGHT-OF-WAY LINE OF NW 188TH STREET; THENCE SOUTH 05°01'00" EAST, ALONG SAID RIGHT-OF-WAY LINE, A DISTANCE OF 604.13 FEET TO AN INTERSECTION WITH A NON-TANGENT CURVE CONCAVE TO THE WEST WITH A RADIUS OF 2341.75 FEET; THENCE SOUTHERLY ALONG THE ARC OF SAID CURVE AND SAID RIGHT-OF-WAY LINE THROUGH A CENTRAL ANGLE OF 05°00'07", A DISTANCE OF 204.44 FEET TO AN INTERSECTION WITH A NON-TANGENT LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING A DISTANCE OF SOUTH 02°31'55" EAST, 204.38 FEET); THENCE SOUTH 00°00'07" WEST, ALONG SAID RIGHT-OF-WAY LINE, A DISTANCE OF 373.78 FEET TO AN INTERSECTION WITH A NON-TANGENT CURVE CONCAVE TO THE EAST WITH A RADIUS OF 2241.75 FEET; THENCE SOUTHERLY ALONG THE ARC OF SAID CURVE AND SAID RIGHT-OF-WAY LINE THROUGH A CENTRAL ANGLE OF 04°59'44", A DISTANCE OF 195.46 FEET TO AN INTERSECTION WITH A NON-TANGENT LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 02°30'35" EAST, 195.40 FEET); THENCE SOUTH 05°04'35" EAST, ALONG SAID RIGHT-OF-WAY LINE, A DISTANCE OF 79.84 FEET TO THE CENTERLINE OF THE ABANDONED ATLANTIC COAST LINE RAILROAD (200 FOOT WIDE ABANDONED RAILROAD RIGHT-OF-WAY); THENCE SOUTH 64°15'51" EAST, ALONG SAID CENTERLINE, A DISTANCE OF 438.30 FEET TO THE POINT OF CURVATURE OF A CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 1910.08 FEET; THENCE SOUTHEASTERLY ALONG THE ARC OF SAID CURVE AND SAID CENTERLINE THROUGH A CENTRAL ANGLE OF 28°50'26", A DISTANCE OF 961.46 FEET TO A POINT ON THE NORTH LINE OF SECTION 17, TOWNSHIP 8 SOUTH, RANGE 18 EAST (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 49°50'38" EAST, 951.35 FEET); THENCE SOUTH 88°40'33" WEST, ALONG SAID NORTH LINE OF SECTION 17, A DISTANCE OF 1049.60 FEET TO A POINT ON THE EAST RIGHT-OF-WAY LINE OF NW 188TH STREET; THENCE SOUTH 02°14'15" EAST, ALONG SAID EAST RIGHT-OF-WAY LINE, A DISTANCE OF 516.52 FEET TO THE MOST NORTHERLY CORNER OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4716, PAGE 1465 OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA; THENCE SOUTH 80°48'56" EAST, A DISTANCE OF 64.80 FEET TO THE MOST EASTERLY CORNER OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4716, PAGE 1465, SAID POINT ALSO BEING ON THE NORTH LINE OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4722, PAGE 2165 OF SAID PUBLIC RECORDS; THENCE NORTH 88°39'21" EAST, ALONG THE NORTH LINE OF SAID LANDS, A DISTANCE OF 1206.50 FEET TO A POINT ON THE EAST LINE OF THE NORTHWEST QUARTER OF THE NORTHWEST QUARTER OF SAID SECTION 17; THENCE NORTH 01°27'43" WEST, ALONG SAID EAST LINE OF THE NORTHWEST QUARTER OF THE NORTHWEST QUARTER, A DISTANCE OF 154.12 FEET TO A POINT ON SAID CENTERLINE OF THE ABANDONED ATLANTIC COAST LINE RAILROAD; THENCE SOUTH 32°39'49" EAST, ALONG SAID CENTERLINE, A DISTANCE OF 371.74 FEET TO THE POINT OF CURVATURE OF A CURVE CONCAVE TO THE NORTHEAST WITH A RADIUS OF 1903.25 FEET; THENCE SOUTHEASTERLY ALONG THE ARC OF SAID CURVE AND SAID CENTERLINE THROUGH A CENTRAL ANGLE OF 26°22'49", A DISTANCE OF 876.30 FEET TO THE SOUTH LINE OF THE NORTH QUARTER OF SAID SECTION 17, TOWNSHIP 8 SOUTH, RANGE 18 EAST (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°51'13" EAST, 868.58 FEET); THENCE NORTH 88°41'22" EAST, ALONG SAID SOUTH LINE OF THE NORTH QUARTER OF SECTION 17, A DISTANCE OF 563.07 FEET TO THE SOUTHEAST CORNER OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727 OF SAID PUBLIC RECORDS; THENCE NORTH 04°14'37" WEST, ALONG THE EAST LINE OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, A DISTANCE OF 2516.95 FEET; THENCE SOUTH 86°48'45" WEST, A DISTANCE OF 687.72 FEET; THENCE SOUTH 03°11'15" EAST, A DISTANCE OF 279.72 TO A POINT OF CURVATURE OF A CURVE CONCAVE TO THE WEST WITH A RADIUS OF 605.00 FEET; THENCE SOUTHERLY ALONG THE ARC OF SAID CURVE THROUGH A

CENTRAL ANGLE OF 26°32’59”, A DISTANCE OF 280.34 FEET TO AN INTERSECTION WITH A RADIAL LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 10°05’15” WEST, 277.84 FEET); THENCE NORTH 66°38’16” WEST, ALONG SAID RADIAL LINE, A DISTANCE OF 410.00 FEET TO A RADIAL INTERSECTION WITH A CURVE CONCAVE TO THE NORTHWEST WITH A RADIUS OF 195.00 FEET; THENCE SOUTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 01°39’36”, A DISTANCE OF 5.65 FEET TO AN INTERSECTION WITH A NON-TANGENT LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 24°11’32” WEST, 5.65 FEET); THENCE SOUTH 87°08’38” WEST, ALONG SAID NONTANGENT LINE, A DISTANCE OF 271.11 FEET TO AN INTERSECTION WITH A NON-TANGENT CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 4000.00 FEET AND A RADIAL BEARING OF SOUTH 38°36’07” WEST AT SAID INTERSECTION; THENCE NORTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 00°40’02”, A DISTANCE OF 46.58 FEET TO THE POINT OF COMPOUND CURVATURE WITH A CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 645.00 FEET (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 51°43’54” WEST, 46.58 FEET); THENCE NORTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 17°36’53”, A DISTANCE OF 198.30 FEET TO AN INTERSECTION WITH A NON-TANGENT CURVE CONCAVE TO THE WEST WITH A RADIUS OF 645.00 FEET (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 60°52’21” WEST, 197.52 FEET); THENCE NORTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 09°04’35”, A DISTANCE OF 102.17 FEET TO THE POINT OF TANGENCY (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 01°21’02” EAST, 102.07 FEET); THENCE NORTH 03°11’15” WEST, A DISTANCE OF 1024.43 FEET; THENCE NORTH 02°45’20” EAST, A DISTANCE OF 50.00 FEET; THENCE NORTH 87°13’16” WEST, A DISTANCE OF 28.99 FEET; THENCE NORTH 02°46’44” EAST, A DISTANCE OF 120.00 FEET TO THE POINT OF BEGINNING.

CONTAINING 122.03 ACRES, MORE OR LESS.

LEGAL DESCRIPTION FOR: Planned Development – Commercial (“PD-COMM”)

A PARCEL OF LAND LYING IN SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCE AT THE SOUTHWEST CORNER OF SECTION 8, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA; THENCE NORTH 05°01'08" WEST, ALONG THE WEST LINE OF SAID SECTION 8, A DISTANCE OF 2816.61 FEET TO THE SOUTHERLY RIGHT-OF-WAY LINE OF US HIGHWAY NO. 441 (STATE ROAD NO. 20 & NO. 25) (200 FOOT WIDE RIGHT-OF-WAY); THENCE SOUTH 77°51'19" EAST, ALONG SAID SOUTHERLY RIGHT-OF-WAY LINE, A DISTANCE OF 1144.33 FEET TO THE POINT OF BEGINNING; THENCE CONTINUE SOUTH 77°51'19" EAST, ALONG SAID SOUTHERLY RIGHT-OF-WAY LINE, A DISTANCE OF 2220.56 FEET TO THE NORTHEAST CORNER OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4831, PAGE 971, OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA; THENCE SOUTH 00°04'58" EAST, A DISTANCE OF 702.21 FEET TO THE SOUTHEAST CORNER OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4831, PAGE 971; THENCE SOUTH 89°32'05" WEST, A DISTANCE OF 516.96 FEET TO THE SOUTHWEST CORNER OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4831, PAGE 971, SAID CORNER ALSO BEING THE NORTHEAST CORNER OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, OF SAID PUBLIC RECORDS; THENCE SOUTH 04°14'37" EAST, ALONG THE EAST LINE OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, A DISTANCE OF 129.71 FEET; THENCE SOUTH 86°48'45" WEST, A DISTANCE OF 687.72 FEET; THENCE SOUTH 03°11'15" EAST, A DISTANCE OF 279.72 TO A POINT OF CURVATURE OF A CURVE CONCAVE TO THE WEST WITH A RADIUS OF 605.00 FEET; THENCE SOUTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 26°32'59", A DISTANCE OF 280.34 FEET TO AN INTERSECTION WITH A RADIAL LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 10°05'15" WEST, 277.84 FEET); THENCE NORTH 66°38'16" WEST, ALONG SAID RADIAL LINE, A DISTANCE OF 410.00 FEET TO A RADIAL INTERSECTION WITH A CURVE CONCAVE TO THE NORTHWEST WITH A RADIUS OF 195.00 FEET; THENCE SOUTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 01°39'36", A DISTANCE OF 5.65 FEET TO AN INTERSECTION WITH A NON-TANGENT LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 24°11'32" WEST, 5.65 FEET); THENCE SOUTH 87°08'38" WEST, ALONG SAID NON-TANGENT LINE, A DISTANCE OF 271.11 FEET TO AN INTERSECTION WITH A NON-TANGENT CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 4000.00 FEET AND A RADIAL BEARING OF SOUTH 38°36'07" WEST AT SAID INTERSECTION; THENCE NORTHWESTERLY ALONG

THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 00°40'02", A DISTANCE OF 46.58 FEET TO THE POINT OF COMPOUND CURVATURE WITH A CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 645.00 FEET (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 51°43'54" WEST, 46.58 FEET); THENCE NORTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 17°36'53", A DISTANCE OF 198.30 FEET TO AN INTERSECTION WITH A NON-TANGENT CURVE CONCAVE TO THE WEST WITH A RADIUS OF 645.00 FEET (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 60°52'21" WEST, 197.52 FEET); THENCE NORTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 09°04'35", A DISTANCE OF 102.17 FEET TO THE POINT OF TANGENCY (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 01°21'02" EAST, 102.07 FEET); THENCE NORTH 03°11'15" WEST, A DISTANCE OF 1024.43 FEET; THENCE NORTH 02°45'20" EAST, A DISTANCE OF 50.00 FEET; THENCE NORTH 87°13'16" WEST, A DISTANCE OF 28.99 FEET; THENCE NORTH 02°46'44" EAST, A DISTANCE OF 120.00 FEET; THENCE NORTH 87°13'16" WEST, A DISTANCE OF 75.80 FEET; THENCE NORTH 02°46'44" EAST, A DISTANCE OF 9.38 FEET TO THE POINT OF CURVATURE OF A CURVE CONCAVE TO THE EAST WITH A RADIUS OF 265.00 FEET; THENCE NORTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 09°21'57", A DISTANCE OF 43.32 FEET TO THE POINT OF TANGENCY (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 07°27'42" EAST, 43.27 FEET); THENCE NORTH 12°08'41" EAST, A DISTANCE OF 279.29 FEET TO A POINT ON SAID SOUTHERLY RIGHT-OF-WAY LINE OF US HIGHWAY NO. 441 AND THE POINT OF BEGINNING.

Staff Report

Planning & Zoning Board Hearing Date: April 21, 2026
Quasi-Judicial Hearing **Application #: PR26-0001**

SUBJECT:	A request to amend the Official Zoning Atlas from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM).
APPLICANT/AGENT:	eda consultants, inc. NV5, Inc.
PROPERTY OWNER:	AYLA LLC First Coast Road Rangers LLC Jack's Small Engine Repair LLC JTFA LLC
LOCATION:	Generally located at 16650 NW US Highway 441
PARCEL ID NUMBER:	03042-050-003; 03042-050-004; 03042-050-005; 03042-050-010; 03042-051-001; 03046-003-000; 03046-003-001; 03046-003-003; 03046-003-004; 03046-003-005; 03875-001-001; 03875-010-001; 03875-010-002
FLUM DESIGNATION:	Low Density Residential; Moderate Density Residential; Community Commercial
ZONING:	Community Commercial (CC); Commercial Intensive (CI); Planned Development – Residential (PD-R)
OVERLAY:	N/A
ACREAGE:	± 182.00
PROJECT PLANNER:	Carson J. Crockett, AICP

RECOMMENDATION:

Staff recommends that the Planning & Zoning Board find the site-specific amendment to the Official Zoning Atlas for AYLA LLC, First Coast Road Rangers LLC, Jack's Small Engine Repair LLC, and JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and transmit such findings to the City Commission with a recommendation to approve.

RECOMMENDED MOTION:

I move that, based upon the competent substantial evidence, the presentation before this Board, and Staff's recommendation, this Board finds the application for a site-specific amendment to the Official Zoning Atlas for AYLA LLC, First Coast Road Rangers LLC, Jack's Small Engine Repair LLC, and JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations and transmit such findings to the City Commission with a recommendation to approve.

SUMMARY

This application is a request by eda consultants, inc. (Agent) and NV5, Inc. (Agent) together as the Applicant on behalf of AYLA LLC, First Coast Road Rangers LLC, Jack's Small Engine Repair LLC, and JTFA LLC (Property Owners) for consideration of a site-specific amendment to the Official Zoning Atlas (rezoning). The proposed rezoning would change the zone district from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) on a ± 182.00-acre subject property.

The subject property is generally located at 16650 NW US Highway 441 (tax parcels 03042-050-003; 03042-050-004; 03042-050-005; 03042-050-010; 03042-051-001; 03046-003-000; 03046-003-001; 03046-003-003; 03046-003-004; 03046-003-005; 03875-001-001; 03875-010-001; 03875-010-002).

The Applicant has submitted a companion application for a small-scale Comprehensive Plan amendment, which proposes to amend the future land use categories from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential, Community Commercial, and Commercial on a ± 46.70-acre portion of the subject property.

Existing Zone Districts

Section 3.5.2(C) of the City's Land Development Regulations (LDRs) establishes the CC zone district with the purpose to "provide lands for business uses that provide goods and services to residents of the entire community." Uses typically consist of retail sales and services, offices, visitor accommodations, and eating establishments; however, the CC zone district is a mixed-use zone district and permits a limited number of residential uses. The maximum floor area ration (FAR) is 1.25 for parcels one-acre or less in size and the maximum density is 15 dwelling units per acre (DUA).

The CI zone district is established by Section 3.5.2(E) of the City's LDRs with the purpose to "provide lands and facilitate highway-oriented development opportunities within the City, for uses that require high public visibility and an accessible location." Uses typically consist of regional retail sales and services, auto-oriented uses, visitor accommodations, and eating establishments. Higher density residential uses and affordable housing may be developed in conjunction with non-residential uses at a maximum density of 15 DUA. The maximum FAR is 1.25 for parcels one-acre or less in size.

Section 3.6.1(A) of the City's LDRs establishes the general purposes of all planned development districts, with Section 3.6.1(B)(1) establishing the specific purpose of the PD-R district to provide a mix of residential uses using innovative and creative design elements, while at the same time providing an efficient use of open space." The existing PD-R district is known as the Farmlands PD and currently permits an aggregate of 275 dwelling units (3.16 DUA) and 4,000 square feet of non-residential floor area for use of an amenity center.

Table 1. Summary of Existing Zone Districts

Summary of Existing Zone Districts		
Zone Districts:	CC, CI, PD-R	
Max Gross Density:	CC	105 dwelling units (15 DUA*)
	CI	306 dwelling units (15 DUA)
	PD-R	275 dwelling units (3.61 DUA)
	TOTAL	686 dwelling units (± 3.76 DUA)
Max Floor Area:	CC	± 182,952 (0.60 FAR*)
	CI	± 534,481.2 (0.60 FAR*)
	PD-R	± 4,000 square feet (<0.01 FAR)
	TOTAL	± 721,433 square feet (0.09 FAR)
Typical Uses: (For a full and comprehensive list, refer to the Table 4.1-1, Table of Allowed Uses, of the City's LDRs)	CC	▪ Dwelling, multiple family; ▪ Upper story dwelling; ▪ Community services; ▪ Medical and dental clinic; ▪ Institutions; ▪ Parks and open areas; ▪ Utilities; ▪ Animal sales, service and care; ▪ Eating establishments; ▪ Offices; ▪ Retail sales and services; and, ▪ Hotel or motel.
	CI	▪ Dwelling, multiple family; ▪ Upper story dwelling; ▪ Health care facilities; ▪ Parks and open areas; ▪ Utilities; ▪ Animal sales, service and care; ▪ Eating establishments; ▪ Conference center; ▪ Industrial services; ▪ Offices; ▪ Retail sales and services; ▪ Sexually oriented business; ▪ Vehicles, sales and services; and, ▪ Hotel or motel.
	PD-R	▪ Single-family detached dwelling units; and, ▪ Community center.
*Density and intensity calculations were completed using the highest densities and intensities permitted in the zone district categories; however, the highest densities and intensities are associated with mixed-use development. Non-mixed-use development would have a lower theoretical development potential.		

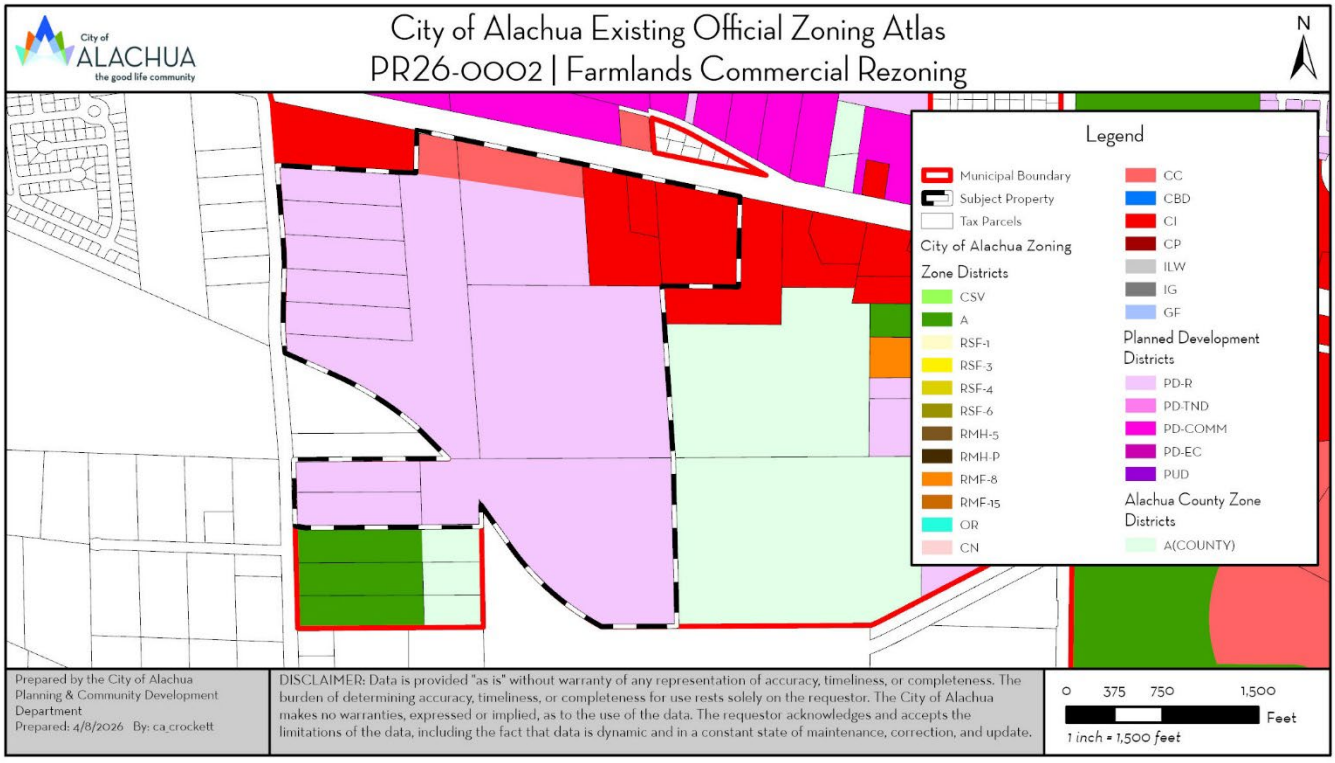

Figure 1. Existing Official Zoning Atlas with Subject Property

Proposed Zone Districts

The proposed rezoning would retain a portion of the existing PD-R district; however, the total number of dwelling units permitted would be reduced to 203 dwelling units (1.66 DUA). The remainder of the subject property would be rezoned to PD-COMM.

Section 3.6.1(B)(4) of the City's LDRs establishes the specific purpose of the PD-COMM district to "provide mixed-use retail and office development, with limited moderate and higher density residential uses integrated into the development above street levels and as separate stand-alone uses." The proposed PD-COMM district would function in conjunction with the PD-R district to provide a mix of compatible uses in close proximity to each other while retaining distinct use areas and characteristics. The proposed PD-COMM district would permit an aggregate of 0 DUA and up to 450,000 square feet of non-residential floor area (0.17 FAR).

Figure 4 shows the proposed PD Master Plan, which is divided into three development areas. Development Area "A" (± 48.00-acres) is principally the commercial use area. Development Area "B" (± 81.00-acres) is principally the residential use area. Development Area "C" (± 53.00-acres), also referred to as common area/stormwater/open space, is principally the location of buffers, necessary infrastructure such as stormwater management facilities, open space, a community center, etc.

Table 2. Summary of Proposed Zone Districts

Summary of Proposed Zone Districts		
Zone Districts:	CC, CI, PD-R	
Max Gross Density:	PD-R	203 dwelling units (1.66 DUA)
	PD-COMM	N/A
	TOTAL	203 dwelling units (± 1.12 DUA)
Max Floor Area:	PD-R	± 4,000 square feet (<0.01 FAR)
	PD-COMM	± 450,000 (0.17 FAR)
	TOTAL	± 454,000 square feet (0.06 FAR)
Typical Uses: (For a full and comprehensive list, refer to the draft PD Ordinance in Exhibit "A")	PD-R	▪ Single-family detached dwelling units; and, ▪ Community center.
	PD-COMM	▪ Community services; ▪ Child care center; ▪ Health care facilities; ▪ Institutions; ▪ Parks and open areas; ▪ Utilities; ▪ Animal sales, service and care; ▪ Eating establishments; ▪ Conference center; ▪ Offices; ▪ Recreation/entertainment, indoor; ▪ Retail sales and services; ▪ Vehicles, sales and services; and, ▪ Visitor accommodations.
Net Increase/ Decrease	***- 483 dwelling units*** ***- 267,433 square feet non-residential floor area***	

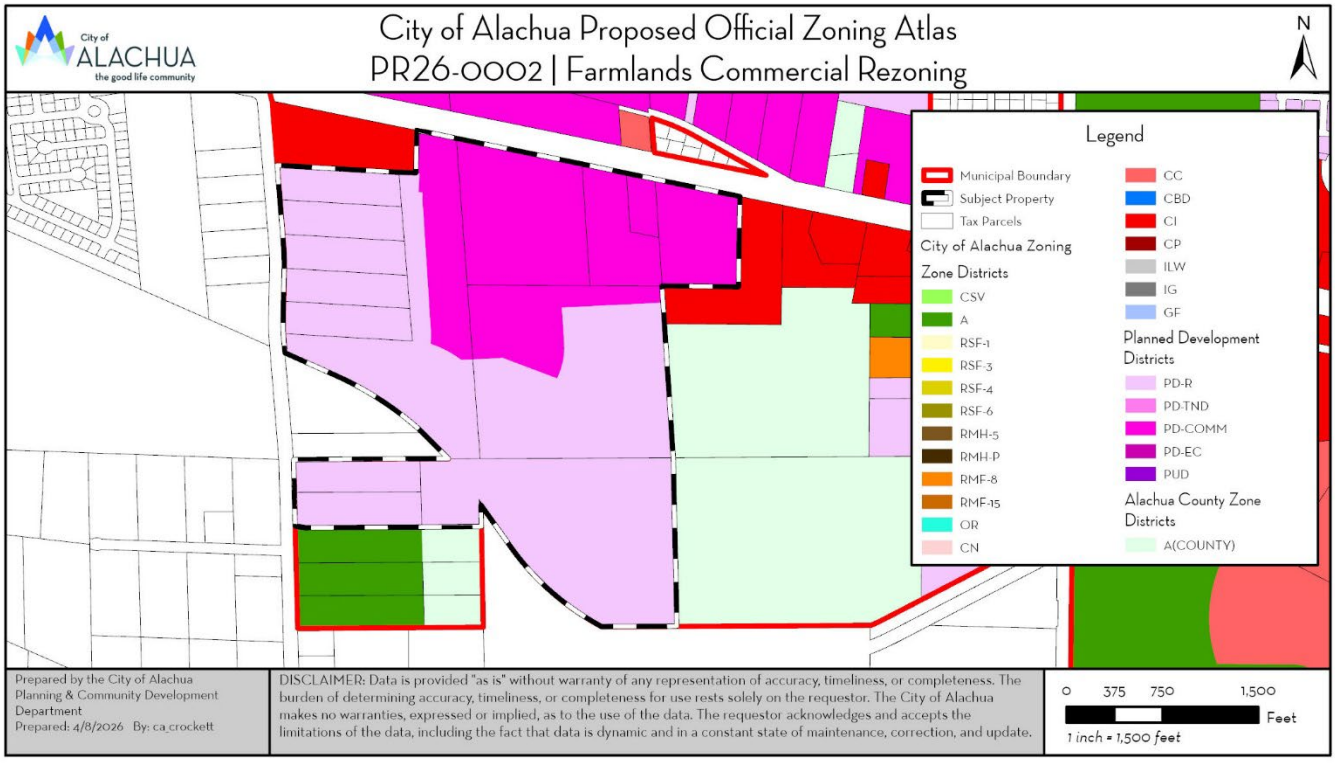

Figure 2. Proposed Official Zoning Atlas with Subject Property

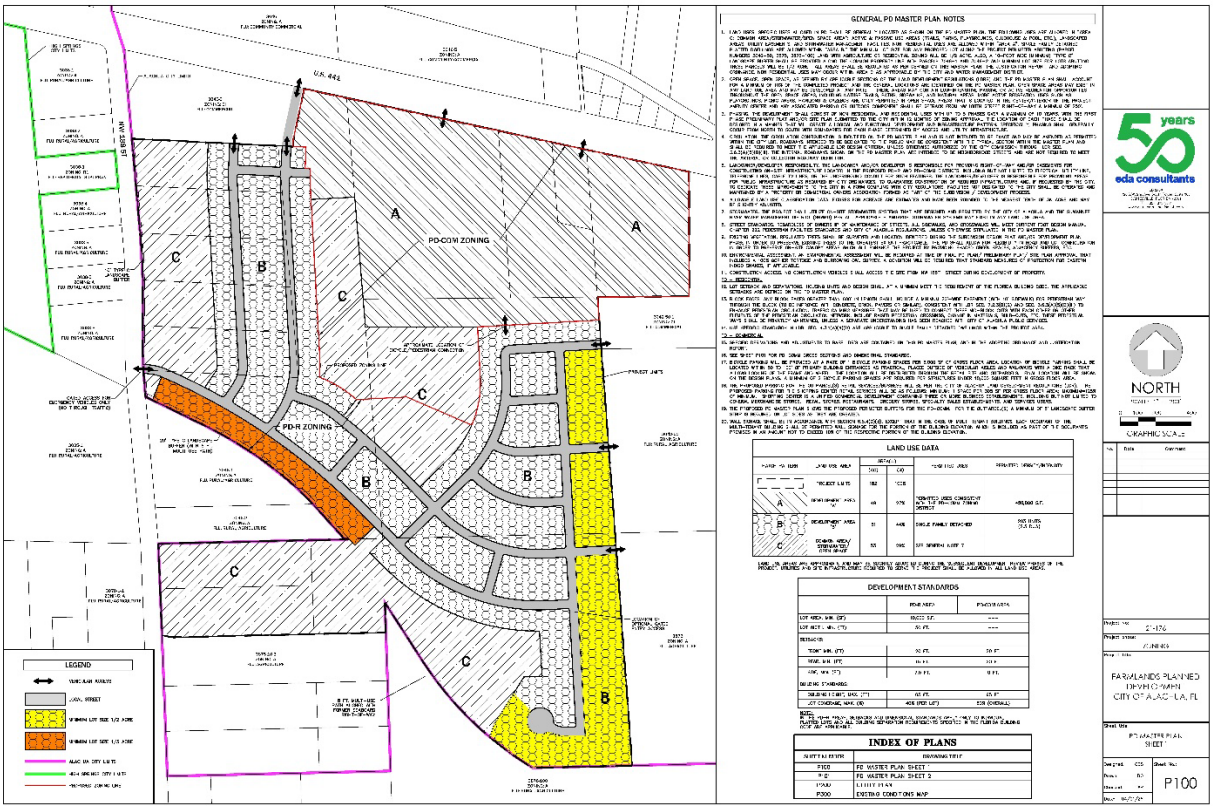

Figure 3. Proposed PD Master Plan

EXISTING USES

The subject property is undeveloped and has been historically used for silviculture; however, the subject property is part of a previously approved PD-R.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 3. Figure 4 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 3. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Agriculture, Vacant Commercial	Community Commercial	Planned Development – Commercial (PD-COMM)
South	Silviculture, Single-Family Residential	Agriculture, Rural/Agriculture (County)	Agricultural (A), Agricultural (A)(County)
East	Agriculture	Agriculture, Commercial	Agricultural (A), Commercial Intensive (CI)
West	Single-Family Residential	Rural/Agriculture (County), Low Density Residential (High Springs)	Agricultural (A)(County), Single-Family Residential (R-1)(High Springs)

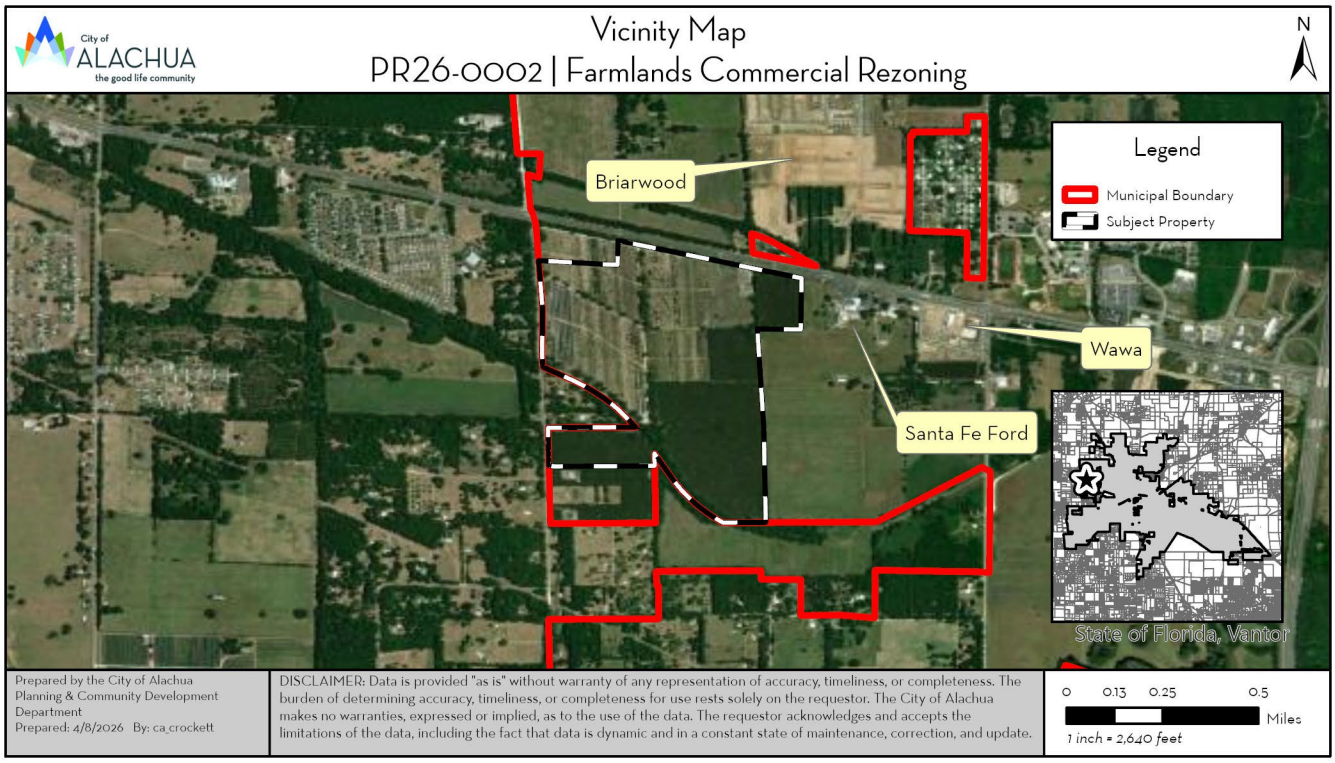

Figure 4. Vicinity Map

NEIGHBORHOOD MEETING

The purpose of a neighborhood meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. Neighborhood meetings are required for site-specific amendments to the Official Zoning Atlas.

A neighborhood meeting was held on September 24, 2025, and October 22, 2025, at Legacy Park. As required by Section 2.2.4 of the City's Land Development Regulations, all property owners within 400 feet of the subject property were notified and notice of the meeting was published in a newspaper of general circulation. The applicant was available to answer questions. Materials submitted by the applicant indicate that the meetings were attended by 16 members of the public in total.

Neighborhood meeting summaries submitted by the Applicant are available in the application materials.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Future Land Use Map 2035*

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Policy 1.2.a: *Low Density Residential* (0 to 1 dwelling unit per acre): The Low Density Residential land use category allows residential development at a maximum density of 1 dwelling unit per acre. This land use category shall provide for a transition between rural residential/agricultural areas and the urban areas of the City. The following uses are permitted in the Low Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Residential Planned Developments; and,
5. Supporting community services such as schools, houses of worship, parks, and community centers.

Evaluation & Findings: The land uses proposed to be located in the Low Density Residential land use category are consistent with the Low Density Residential land use category, comprising single-family detached dwelling units, a community/amenity center, and supporting common areas and infrastructure. The proposed PD Master Plan is consistent with the intent of the Low Density Residential land use category by placing common areas, larger lots, and buffers along adjacent properties in the Agricultural (A) district, providing a transitionary area in the development between the rural residential/agricultural areas and the urban areas of the City. The proposed density in the Low Density Residential land use category is concentrated in a manner that will result in development consistent with a standard of 0 to 1 DUA in aggregate.

Policy 1.2b: *Moderate Density Residential* (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments; and,
8. Supporting community services such as schools, houses of worship, parks, and community centers.

Evaluation & Findings: The land uses proposed to be located in the Moderate Density Residential land use category are consistent with the Moderate Density Residential land use category, comprising single-family detached dwelling units, a community/amenity center, and supporting common areas and infrastructure. The proposed PD Master Plan organizes the residential areas in such a way where density will be concentrated in the Moderate Density Residential land use category rather than the Low Density Residential land use category. This arrangement of residential density results in a gradient of increasing density and intensity towards US Highway 441, resulting in a logical development pattern where lower density and intensity uses are placed near existing rural residential and agricultural areas and higher density and intensity uses are placed near US Highway 441. The proposed density in the Moderate Density Residential land use category is concentrated in a manner that will result in development consistent with a standard of 0 to 4 DUA in aggregate.

Policy 1.3.a: Community Commercial: The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:

1. Neighborhood commercial establishments;
2. Residential/offices and live-work units;
3. Business and professional offices;
4. Personal services;
5. Financial institutions;
6. Retail sales and services that serve the community;
7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;
11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;

13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use

Evaluation & Findings: The land uses proposed to be located in the Community Commercial land use category are consistent with the Community Commercial land use category, principally comprising of common area/stormwater/open space on the proposed PD Master Plan. A portion of the Community Commercial land use category is noted as Development Area "A" on the proposed PD Master Plan, which would permit commercial uses consistent with the Community Commercial land use category.

Policy 1.3.b: *Commercial*: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Recreation and entertainment;
5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Evaluation & Findings: The proposed PD Master Plan designates the Commercial land use category as Development Area "A", which would allow a wide array of regional and highway-oriented uses consistent with the Commercial land use category and Table 4.1-1 of the City's LDRs.

Policy 1.3.f: The creation/promotion of strip pattern commercial development shall be discouraged. Infill within established commercial areas is preferred over extension of a strip commercial pattern. Extension of a commercial land use designation may be considered in circumstances where the extension is compatible with the existing land uses surrounding the land or the land use categories of surrounding lands. Extensions of a commercial land use category shall not encroach into a residential area. The following criteria shall be applied to limit the impacts of commercial development upon surrounding areas:

1. Impacts upon traffic circulation should be anticipated and mitigated through the reservation of right-of-way for road widening and marginal access streets when appropriate.
2. Access points for commercial development shall minimize points of conflict by utilizing frontage roads, providing cross access between parcels, or installing shared use ingress and egress access driveways connections to roadways.
3. Setbacks and landscaped or other appropriate buffers shall be established to mitigate the visual impacts of commercial development upon surrounding land uses.
4. A sidewalk or bicycle path shall be required where appropriate, to provide convenient access to the development from surrounding areas and to reduce traffic volumes on the roadways.

Evaluation & Findings: The proposed Development Area "A" on the PD Master Plan would abut an existing Commercial land use category to the east, and be abutted by Community Commercial as a transition to the west and south, maintaining an orderly and compatible pattern of development. The proposed PD Master Plan encompasses Development Area "A" by common area/stormwater/open space to ensure a logical transition between the commercial and residential use areas so that the Development Area "A" does not extend into the residential areas of the project. Additionally, the proposed PD Master Plan maintains pedestrian connectivity between the commercial and residential areas of the project to ensure that the uses are compatibly mixed.

A phase 1 traffic impact analysis has been submitted as part of this application and has demonstrated that proper consolidation of access points and right-of-way design will be taken into account at time of final design. A more detailed traffic analysis will be required as part of any development application. Pedestrian and bicycle facilities will be required to connect to adjacent properties at time of final design and are noted as such on the proposed PD Master Plan. Setbacks and buffers between residential and non-residential use areas will be required at time of final design and are noted as such on the proposed PD Master Plan.

Policy 1.3.g: The City shall pursue the establishment of activity centers and similar criteria to guide the placement and design of commercial and business areas.

1. The City shall establish and maintain a Gateway Activity Center at the interchange of US 441 and Interstate 75. The boundaries of the Gateway Activity Center shall be based on the Generalized US 441/I-75 Activity Center Map provided in the Future Land Use Map Series. The intent of this activity center is to welcome existing and future residents and visitors to the City, and to promote Alachua as an attractive, vibrant, and economically prosperous community.
2. The City shall establish and maintain the US 441 corridor as a Corporate Corridor Activity Center. The intent of establishing this activity center is to implement economic development objectives and to promote a coordinated development plan to maximize existing and future land use patterns and preserve the function of the US 441 corridor.

Evaluation & Findings: The subject property is within the City's Corporate Corridor Activity Center. Highway-oriented and more intense commercial development is consistent with the objectives of economic development and is consistent with the surrounding development pattern, ensuring a coordinated future land use pattern. The proposed land uses are arranged in a gradient of increasing density and intensity towards US Highway 441, resulting in a logical development pattern where lower density and intensity uses are placed near existing rural residential and agricultural areas and higher density and intensity uses are placed near US Highway 441.

Objective 2.1: *Planned Development (PD) Standards*

In an effort to reduce the impacts of urban sprawl on the community and the region, the City shall provide for a wide array of planned developments to encourage the creation of interrelated neighborhoods and districts to increase the quality of life for all residents of the City.

Evaluation & Findings: The application has been reviewed for compliance, and has been found to comply, with the City's standards for PDs. Further, the application is consistent with the general purposes of the PD zone districts in Section 3.6.1(A) of the LDRs.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications for an amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.3177(6)(a)9.a. and b., Florida Statutes, respectively.

Evaluation & Findings: The companion small-scale Comprehensive Plan amendment application was reviewed against the primary indicators and urban form criteria as set forth in Chapter 163.3177(6)(a)(9), Florida Statutes. Staff found that the application did not constitute urban sprawl.

Policy 5.1.a: *Topography*: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to topography of the existing site. Only moderate limitations related to topography exist for commercial development in a limited portion of the site; however, Development Area "A" is primarily not located in this area of the site. No seepage slopes or potential sinkholes are known to exist on the subject property. The circulation pattern of streets shown on the proposed PD Master Plan generally follows the natural slope of the property, limiting the amount of change to the natural topography that will be required for construction.

All policies and regulations regarding the protection of natural topography will continue to be enforced at time of development review. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to topography, karst-sensitive, and other geologic features. Any development application for the subject property will require additional geotechnical screening and evaluation.

Policy 5.1.b: *Soils*: The City shall ensure soil protection and intervention measures are included in the development review process.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to the nine soil types present on the subject property, which are primarily well or moderately well drained soils. A small portion of the subject property (0.28%) is comprised of Placid Sand, which is a very poorly drained soil; however, the soil area is isolated and can be easily avoided at time of final design. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to soils.

Policy 5.1.c: *Flood prone areas*: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. The subject property is within Flood Zone X; and as such, staff noted no concerns related to flood potential.

Policy 5.1.d: *Wetlands*: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to wetlands on the subject property. No delineated wetlands are known to exist on the subject property. Data from Alachua County notes one potential wetland encroaching on the easternmost portion of the subject property; however, the National Wetlands Inventory does not show any potential wetlands. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to wetlands.

Policy 5.1.e: *Habitat*: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to potential habitat for listed species. A portion of the subject property is identified by the Florida Natural Areas Inventory (FNAI) as a priority 5 (lowest priority) area. The priority 5 area is generally consistent with the southernmost buffer and common area and the remainder of the subject property is not identified. The subject property is not located near an Alachua County Strategic Ecosystem. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of final PD plan.

Objective 9.1: *Connections to Water and Wastewater Systems*

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

Evaluation & Findings: The subject property is located within the City's Community Potable Water Service Area and Community Wastewater Service Area. The proposed PD Master Plan does include a sheet depicting utility connections as the development will be required to connect to City facilities.

Transportation Element

Objective 1.1: *Level of Service*

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation & Findings: A phase 1 traffic impact analysis has been submitted as part of this application and a public facilities impact analysis has been included in this report. Multiple improvements are recommended, and will be assessed in more detail at time of final design. The Applicant contends that while the maximum build-out scenario of the proposed PD would result in an increase to trip generation, the rezoning of the subject property would actually result in a net reduction in potential trip generation compared to the current potential trip generation for the subject property. Concurrency will be reevaluated at time of application for a final development order, at which time the Applicant must demonstrate that the level of service will not be exceeded, or potential fees or improvements will be required in accordance with Chapter 18 of the City's Code of Ordinances. An amendment to the Official Zoning Atlas inherently does not impact the level of service standard.

Objective 1.2: *Access Management*

The City shall establish access management standards and coordinate with Alachua County and the Florida Department of Transportation to maintain access management standards which promote safe and efficient travel.

Evaluation & Findings: Both the phase 1 traffic impact analysis and proposed PD Master Plan demonstrate that proper consolidation of access points and right-of-way design will be taken into account at time of final design. Access to US Highway 441 will only be permitted at the locations shown on the proposed PD Master Plan, subject to review by the Florida Department of Transportation (FDOT).

Policy 1.4.b The City shall require any commercial, industrial, or residential development which must obtain site plan or subdivision approval to provide a sidewalk along the frontage of any collector street or arterial street when a sidewalk is not present along the frontage of the street. A sidewalk shall not be required if a sidewalk does not exist within 2,640 feet of the property on the same side of the collector or arterial street.

Evaluation & Findings: The subject property is within 2,640 feet of a sidewalk on the same side of an arterial street, and as such, will be required to provide a sidewalk at time of development. Further, both the residential and commercial portions of the project will be required to provide connections to the adjacent sidewalk system as required by the City's LDRs.

Policy 1.5.e Where feasible, the City will encourage strategies to facilitate development patterns that support multi-modal solutions, including urban design and appropriate land use mixes, including intensity and density.

Evaluation & Findings: The proposed PD Master Plan includes a mix of residential and commercial uses in an arrangement that will promote walking and cycling between the uses in close proximity. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling. Additionally, an 8-foot multi-use trail is noted on the proposed PD Master Plan along the southern portion of the subject property, providing future multi-modal connections to the east and west.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes, and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Evaluation & Findings: The proposed residential use areas include a variety of lot sizes that will result in a range of single-family detached dwelling sizes and values.

Policy 1.1.i: The City shall establish land use designations and zoning districts that accommodate mixed-use development consisting of residential with commercial and/or retail.

Evaluation & Findings: The proposed PD Master Plan includes a mix of residential and commercial uses in an arrangement that will promote walking and cycling between the uses in close proximity. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling

Community Facilities Element

Policy 1.1.d: The City hereby establishes the following level of service standards for sanitary sewer facilities:

a) *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection (FDEP).
b) *Quantity*: System-wide wastewater collection and treatment will be sufficient to provide a minimum of 250 gallons per day per equivalent residential unit (ERU) on an average annual basis. Plant expansion shall be planned in accordance with Rule 62-600.405, Florida Administrative Code, or subsequent provision.
c) *System capacity*: If the existing demand and reserved capacity of the committed use of the City's wastewater facility reaches 85% of the permitted capacity design, no further development orders for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: An analysis of the expected impacts to sanitary sewer facilities has been provided within this report. The proposed amendment is not anticipated negatively impact the level of service of solid waste facilities. An amendment to the Official Zoning Atlas inherently does not impact the level of service standard and concurrency will be reevaluated at time of application for a final development order.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities for residential uses:

Facility Type	Level of Service Standard
Solid Waste Landfill	0.73 tons per capita per year

Evaluation & Findings: An analysis of the expected impacts to solid waste facilities has been provided within this report. The proposed amendment is not anticipated negatively impact the level of service of solid waste facilities. An amendment to the Official Zoning Atlas inherently does not impact the level of service standard and concurrency will be reevaluated at time of application for a final development order.

Objective 3.5: *Stormwater System Design in High Aquifer Recharge Areas*

The City shall work with the Suwannee River Water Management District and the Florida Department of Environmental Protection criteria for karst stormwater management system design.

Evaluation & Findings: The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map. As such, a development parameter has been added to the proposed PD Ordinance to ensure consistency with the above objective. Stormwater systems will be reviewed at time of final design to ensure consistency with the City's standards for stormwater system design in high aquifer recharge areas.

Policy 4.1.b: The City establishes the following level of service standards for potable water:

1. *Quality*: Compliance with all applicable standards of the U.S. Environmental Protection Agency (EPA) and the Florida Department of Environmental Protection.
2. *Quantity*: System-wide potable water distribution and treatment will be sufficient to provide a minimum of 275 gallons per day per equivalent residential unit (ERU) on an average annual basis.
3. *Capacity*: Plant expansion shall be planned in accordance with Florida Administrative Code. Additionally, if the existing demand and reserved capacity of the City's potable water facility reaches 85% of the permitted design capacity, no further development orders or permits for projects without reserved capacity will be issued until additional capacity becomes available or funds to increase facility capacity are committed in accordance with a development agreement.

Evaluation & Findings: An analysis of the expected impacts to potable water facilities has been provided within this report. The proposed amendment is not anticipated negatively impact the level of service of solid waste facilities. An amendment to the Official Zoning Atlas inherently does not impact the level of service standard and concurrency will be reevaluated at time of application for a final development order.

Policy 5.1.a: The City shall consider the best available hydrogeological information (e.g, Suwannee River Water Management District high aquifer recharge potential maps or site-specific data), and may require the collection of site-specific hydrogeological data, such as soil borings or electric resistivity tests, when assessing the impacts of proposed land use changes and developments in areas of high aquifer recharge potential. This information should be used in the determination of land use decisions on a case-by-case basis.

Evaluation & Findings: The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map.

The Applicant submitted preliminary geotechnical analysis conducted by UES Professional Solutions, which was then reviewed by Kenneth Hill, P.E. of GSE Engineering & Consulting, Inc. on behalf of the City of Alachua. In reviewing the preliminary geotechnical analysis, Hill states that, "generally soil conditions are suitable for the development of commercial and residential projects." Hill does indicate that it is "prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design." As such, any final PD plan will require additional geotechnical screening and evaluation as recommended by Hill in their review of the preliminary geotechnical analysis.

At this stage, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to karst-sensitive and other geologic features.

Conservation and Open Space Element

Objective 1.3: *Listed Species*

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to potential habitat for listed species. A portion of the subject property is identified by the Florida Natural Areas Inventory (FNAI) as a priority 5 (lowest priority) area. The priority 5 area is generally consistent with the southernmost buffer and common area and the remainder of the subject property is not identified. The subject property is not located near an Alachua County Strategic Ecosystem. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of final PD plan

Policy 1.4.f: The City shall promote mixed use and compact development to promote pedestrian, golf cart and bicycle traffic and reduce automobile dependency.

Evaluation & Findings: The proposed PD Master Plan includes a mix of residential and commercial uses in an arrangement that will promote walking and cycling between the uses in close proximity. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling. Additionally, an 8-foot multi-use trail is noted on the proposed PD Master Plan along the southern portion of the subject property, providing future multi-modal connections to the east and west.

Objective 1.7: *Geological Resources*

The City shall identify, protect and conserve significant geological resources and their natural functions.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. There are no potential sinkholes or other geologic features known to exist on the subject property. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to geologic features

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to wetlands on the subject property. No delineated wetlands are known to exist on the subject property. Data from Alachua County notes one potential wetland encroaching on the easternmost portion of the subject property; however, the National Wetlands Inventory does not show any potential wetlands. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to wetlands.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Evaluation & Findings: No delineated wetlands are known to exist on the subject property. Data from Alachua County notes one potential wetland encroaching on the easternmost portion of the subject property; however, the National Wetlands Inventory does not show any potential wetlands. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to wetlands. Should wetlands be discovered on the site, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation & Findings: The subject property is not located within or adjacent to a strategic ecosystem; therefore, no impacts are anticipated to any strategic ecosystem(s) identified within the ecological inventory report. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to strategic ecosystems.

Regulated Plant & Animal Species

The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region.

Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation & Findings: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. A portion of the subject property is identified by the Florida Natural Areas Inventory (FNAI) as a priority 5 (lowest priority) area. The priority 5 area is generally consistent with the southernmost buffer and common area and the remainder of the subject property is not identified. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of final PD plan.

Soil Survey

The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff.) There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have a lower infiltration rate and therefore a higher runoff potential.

There are nine soil types found within the subject property, shown in Table 4.

Table 4. Soil Types

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Arredondo Fine Sand; 0-5% Slope	A	Well Drained	Slight	Slight	40.41%
Fort Meade Fine Sand; 0-5% Slope	A	Well Drained	Slight	Slight	26.09%
Millhopper Sand; 0-5% Slope	A	Moderately-Well Drained	Slight	Slight	13.72%
Arredondo Fine Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	5.15%
Gainesville Loamy Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	4.51%
Norfolk Loamy Fine Sand; 2-5% Slope	B	Well Drained	Slight	Slight	4.29%
Kendrick Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	2.99%

Table 4. Soil Types (Continued)

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Kendrick Sand; 2-5% Slope	A	Well Drained	Slight	Slight	2.57%
Placid Sand; 0-2% Slope	D	Very Poorly Drained	Unrated	Unrated	0.28%

Evaluation & Findings: The nine soils present on the subject property are primarily well or moderately well-draining and are generally conducive to residential and commercial development. Only moderate limitations for commercial development exist, and those limitations are due to slope, not drainage. A small portion of the subject property (0.28%) is comprised of Placid Sand, which is a very poorly drained soil; however, the soil area is isolated and can be easily avoided. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to soils.

Flood Potential

Panel 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the development area is in Flood Zone X (areas determined to be outside of the 500-year floodplain).

Evaluation & Findings: The subject property is located in Flood Zone X. As such, there are no concerns related to flood potential on the subject property.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.

Evaluation & Findings: There are no potential sinkholes or other geologic features known to exist on the subject property. The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map.

The Applicant submitted preliminary geotechnical analysis conducted by UES Professional Solutions, which was then reviewed by Kenneth L. Hill, P.E. of GSE Engineering & Consulting, Inc. on behalf of the City of Alachua. In reviewing the preliminary geotechnical analysis, Hill states that, "generally soil conditions are suitable for the development of commercial and residential projects." Hill does indicate that it is "prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design." The full letter is available for review in Exhibit "C" of this report. Any development application for the subject property will require additional geotechnical screening and evaluation as

recommended by Hill in their review of the preliminary geotechnical analysis. At this stage, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to karst-sensitive and other geologic features.

Wellfield Protection Zones

Policy 7.2.1 of the Future Land Use Element of the City's Comprehensive Plan establishes a 500-foot radius area around each city-owned potable water well.

Evaluation & Findings: The subject property is not located within a wellfield protection zone. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to wellfield protection.

Historic Structures/Markers and Historic Features

The State of Florida and the Alachua County Historic Resources Inventory identify historic structures in addition to the City's Historic Overlay District, as established by Section 3.7 of the City's Land Development Regulations.

Evaluation & Findings: The subject property is not located in the City's Historic Overlay District and no structures identified as historic by the State of Florida or the Alachua County Historic Resources Inventory exist on the subject property. As such, the circulation and layout of land uses shown on the proposed PD Master Plan are generally suitable for the subject property in relation to historic structures or features.

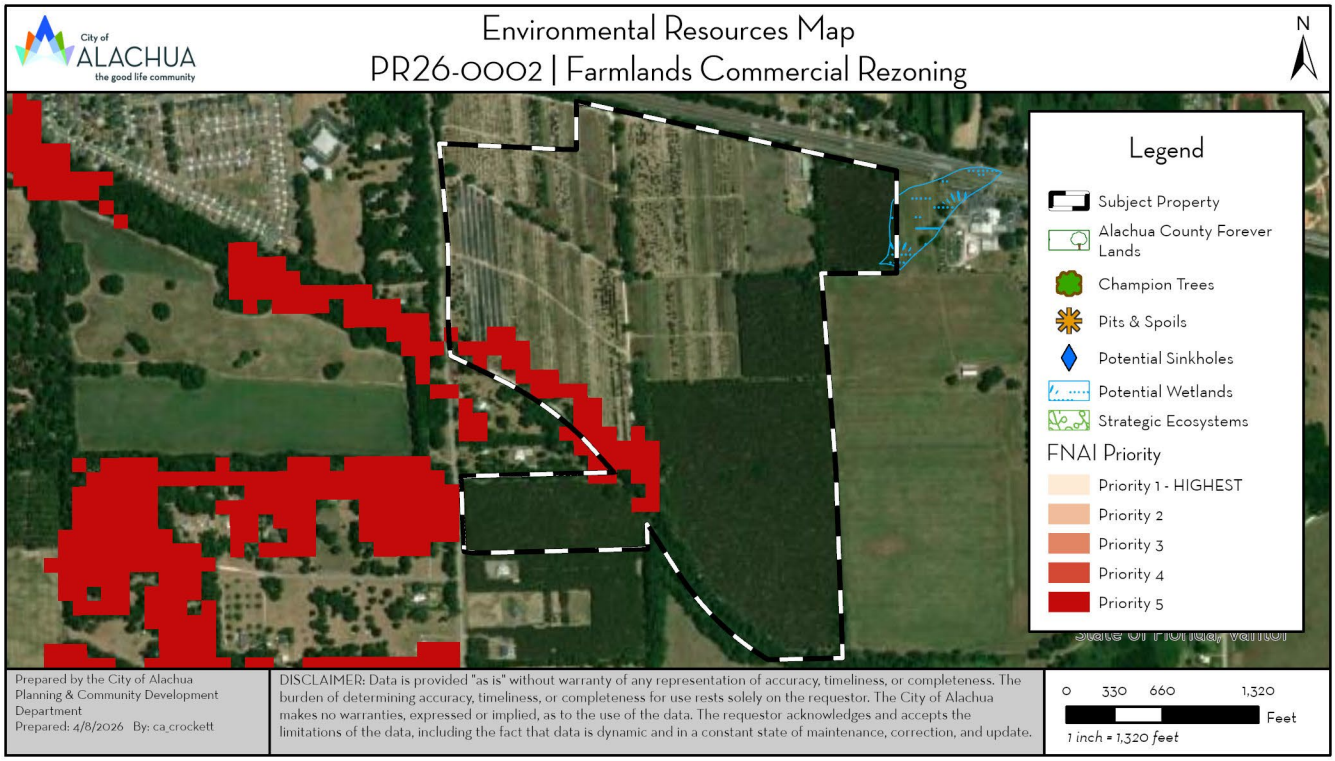

Figure 5. Environmental Resources Map

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Planned Development Standards

Section 2.4.3(2) of the City's Land Development Regulations (LDRs) requires that PDs comply the standards for site-specific amendments to the Official Zoning Atlas establishes in Section 2.4.2(E)(1) and the standards for PD districts in Section 3.6. The application has been reviewed for compliance with the standards of Section 2.4.2(E)(1) and Section 3.6. An evaluation of the findings of the applicant's compliance with the standards of Section 2.4.2(E)(1) and Section 3.6 is provided below.

SITE-SPEICIFC AMENDMENT TO THE OFFICIAL ZONING ATLAS

2.4.2(E)(1) ***Competent substantial evidence provided.*** The applicant has provided competent substantial evidence that is made part of the record of the hearing that:

(a) ***Consistent with the Comprehensive Plan.*** The proposed amendment is consistent with and furthers the goals, objectives and policies of the Comprehensive Plan.

Evaluation & Findings: An analysis of the application's consistency with the Comprehensive Plan has been provided in this report. Staff has found the application to be consistent with the City's Comprehensive Plan.

(b) ***Consistent with ordinances.*** The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

Evaluation & Findings: An analysis of the application's compliance with the LDRs has been provided in this report. The application is not in conflict with any of these LDRs or any other applicable law or ordinance.

(c) ***Logical development pattern.*** The proposed amendment would result in a logical and orderly development pattern.

Evaluation & Findings: The proposed PD Master Plan locates higher intensity and highway-oriented uses along US Highway 441, adjacent to other commercially zoned lands. The density and intensity of development would step down, moving away from US Highway 441, where varying densities of single-family residential development would take place. The single-family residential development includes buffers from the commercial use areas and the rural residential/agricultural lands to the south. This creates a logical transition where higher intensity uses are along US Highway 441, buffers are present to ensure compatibility, and a gradient of decreasing residential density results in a transition space to the existing land uses surrounding the subject property. This development pattern is also consistent with the rest of the development pattern of the US Highway 441 corridor.

(d) *Premature development*. The proposed amendment will not create premature development in undeveloped or rural areas.

Evaluation & Findings: The subject property is already designated with urban future land use categories and urban zone districts. The subject property is also adjacent to existing urban land uses and zone districts. The proposed amendment would not create premature development in undeveloped or rural areas.

(e) *Incompatible with adjacent lands*. The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of the adjacent lands.

Evaluation & Findings: Table 3 of this report identifies the land uses and zone districts of adjacent lands. The proposed PD Master Plan locates commercial uses adjacent to other commercially zoned properties to the north, east, and west. The residential uses proposed by the PD Master Plan are located adjacent to existing single-family residential development or agricultural development, and a mixture of buffers and increased lot sizes are proposed to ensure compatibility.

(f) *Adverse effect on local character*. The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights or other physical effects or nuisances.

Evaluation & Findings: The proposed PD would limit the density and intensity of the land more than the current zoning of the property, resulting in 483 less dwelling units permitted and 267,433 less square feet of non-residential floor area permitted. As such, the proposed amendment reduces the potential for excessive traffic, density and/or intensities of use, building height and bulk, noise, lights and other physical effects and nuisances. Building height and lighting restrictions would remain consistent with the existing zone districts and City's LDRs.

(g) *Not deviate from pattern of development*. The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

Evaluation & Findings: The proposed PD Master Plan locates higher intensity and highway-oriented uses along US Highway 441, adjacent to other commercially zoned lands. The density and intensity of development would step down, moving away from US Highway 441, where varying densities of single-family residential development would take place. The single-family residential development includes buffers from the commercial use areas and the rural residential/agricultural lands to the south. This creates a logical transition where higher intensity uses are along US Highway 441, buffers are present to ensure compatibility, and a gradient of decreasing residential density results in a transition space to the existing land uses surrounding the subject property. This development pattern is also consistent with the rest of the development pattern of the US Highway 441 corridor.

(h) *Encourage sprawl*. The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low-density single dimensional development.

Evaluation & Findings: The companion small-scale Comprehensive Plan amendment application was reviewed against the primary indicators and urban form criteria as set forth in Chapter 163.3177(6)(a)(9), Florida Statutes. Staff found that the application did not constitute urban sprawl.

The proposed PD Master Plan reduces the potential for a ribbon commercial pattern, ensuring that the residential and commercial portions of the subject property are more integrated than the existing zoning districts may permit.

(i) *Spot zoning*. The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

Evaluation & Findings: The proposed PD Master Plan locates land use areas near related and adjacent surrounding zone districts. Development Area "A" is adjacent to CI zoning to the north, east, and west, permitting similar and related uses to the CI zone district. Development Area "B" is adjacent to existing single-family residential uses to the west and south. The two development areas are arranged in an interrelated and compatible manner, resulting in a logical arrangement of related uses. The proposed amendment does not constitute spot zoning.

(j) *Public facilities*. The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, stormwater management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

Evaluation & Findings: The Applicant has provided a PD Utility Plan as part of the proposed PD Master Plan which demonstrates the general location of which public facilities are to be extended into the subject property. Utility extension provisions are assured through development parameters in the proposed PD Ordinance in Exhibit "A".

(k) *No adverse effect on the environment*. The proposed amendment would not result in significantly adverse impacts on the natural environment, including, but not limited to, water, air, noise, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. No significant environmental features are present on the subject property. A listed species assessment and additional geotechnical evaluation will be required at time of final PD plan. The circulation and land uses shown in the proposed PD Master Plan are generally suitable for the subject property. No significantly adverse effect on the environment is anticipated.

3.6.2(A) *Development parameters*. Prior to the approval of a PD zone district designation, the City Commission shall find the application for the PD zoning district designation and the required PD Master Plan complies with the following standards:

(1) *Master Plan*. The PD Master Plan:

(a) Identifies the general location of land uses within individual development areas or development pods and the mix of land uses;

(b) Calculates the number, type, and mix of land uses, including the total number of residential units, residential densities, and nonresidential intensities within each development area or development pods and the total number, type, and mix of land uses for the entire PD Master Plan;

(c) Identifies the general location of open space;

(d) Identifies the location of environmentally sensitive lands, wildlife habitat, and stream corridors;

(e) Identifies the on-site transportation circulation system including arterial and collector roads, existing or projected transit corridors, and pedestrian and bicycle pathways;

(f) Identifies on-site potable water and wastewater facilities; and

(g) Identifies the general location of all public facility sites serving the development, including transportation, potable water, wastewater, parks, fire, police, EMS, stormwater, solid waste and schools.

Evaluation & Findings: A PD Master Plan has been submitted by the applicant. The proposed PD Master Plan identifies the general location of land uses within three development areas, including the densities and intensities permitted within those land use areas. ± 53-acres of open space is identified, which meets the minimum 10% of open space as required by Section 6.7.3 of the City's LDRs. There are no environmentally sensitive lands included as part of the PD. The general circulation pattern of local streets, ingress/egress points, and pedestrian connectivity have been identified. A PD Utility Plan has been submitted as part of the proposed PD Master Plan which identifies the location of on-site potable water, wastewater, and stormwater facilities. No new public parks, fire, police, EMS, solid waste, or school facilities are proposed as part of this PD.

(2) *Consistency with the Comprehensive Plan*. The PD zone district designation and the PD Master Plan is consistent with the Comprehensive Plan.

Evaluation & Findings: An analysis of the application's consistency with the Comprehensive Plan has been provided in this report.

(3) *Compatibility with surrounding residential areas*. Development along the perimeter of a PD district is compatible with adjacent existing or proposed future development. In cases where there are issues of compatibility, the PD Master Plan shall provide for transition areas at the edges of the PD district that provide for appropriate buffering and/or ensure a complimentary character of uses. Complimentary character shall be identified based on densities/intensities; lot size and dimensions; building height; building mass and scale; hours of operation; exterior lighting; and siting of service areas.

Evaluation & Findings: Single-family residential uses exist to the south of the subject property, and agricultural uses exist to the east of a portion of the subject property. The proposed residential lots along the eastern boundary of the subject property have a minimum lot size of 1/2-acre to act as a compatible transition between the more rural area to the east of the subject property and the residential use area of the PD. The proposed residential lots along the southern boundary of the subject property have a minimum lot size of 1/3-acre with a minimum 20-foot buffer, and in some areas, acres of common area and open space to act as a compatible transition between the mire rural area to the south and the residential use area of the PD. The proposed PD Master Plan provides adequate buffering and lot arrangement to ensure compatibility.

(4) *Development phasing plan*. If there are phases of development proposed for the PD, a development phasing plan shall be provided for the PD Master Plan that identifies the general sequence or phases in which the land is proposed to be developed, including how residential and nonresidential development will be timed, how infrastructure and open space will be provided and timed, and how development will be coordinated with the City's capital improvements program. The phasing plan shall be established at the time of approval of the PD Master Plan. It is permissible for a development phasing plan to include only one phase.

Evaluation & Findings: The proposed PD consists of residential and non-residential components that, together, would consist of up to five phases. Phased construction will generally occur from the north of the subject property along US Highway 441, to the south of the subject property.

(5) *Conversion schedule*. The PD Master Plan may include a conversion schedule that identifies the range of conversion that may occur between different types of residential uses and between different types of nonresidential uses (i.e., residential to residential, or nonresidential to nonresidential) within the PD Master Plan. These conversions may occur within development areas and between development areas, as long as they occur within the same scheduled phase of development in the development phasing plan, and are consistent with established ranges of conversion set down in the conversion schedule.

Evaluation & Findings: No conversion schedule is proposed; therefore, this standard is not applicable.

(6) *Public facilities*.

(a) The PD Master Plan shall include a transportation component that demonstrates there is or will be adequate capacity concurrent with impacts of development on the City's road system to accommodate the development proposed in the PD Master Plan.

(b) The PD Master Plan shall include a potable water and wastewater component that demonstrates adequate capacity for potable water and wastewater is available or will be available concurrent with impacts of development at the time development occurs to accommodate the development proposed in the PD Master Plan.

(c) The PD Master Plan shall include a parks component that demonstrates that adequate parks and recreation facilities are available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

(d) The PD Master Plan shall include a solid waste component that demonstrates that adequate capacity for solid waste is available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

(e) The PD Master Plan shall include a stormwater component that demonstrates that adequate capacity for treatment of stormwater runoff is available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

Evaluation & Findings: The PD Utility Plan submitted as part of the proposed PD Master Plan demonstrates the locations of public facilities necessary to serve future development internal to the subject property. A public facilities impact was submitted by the Applicant and a staff analysis has been included in this report. Potential impacts from the proposed PD on potable water, wastewater, recreation, solid waste, public schools, and stormwater facilities are not anticipated to negatively impact the level of service standard of any public facilities. The proposed PD has the potential to exceed the level of service of one roadway segment, segment six. A PD is a preliminary development order and the capacity of roadway segment six must be addressed at time of final PD plan and concurrency reservation. The Applicant contends that the proposed PD is less intensive and has the potential to generate less traffic than the existing zone districts.

(7) *Planned development agreement*. Concurrent with the approval of the adopting ordinance for the PD zone district designation and the PD Master Plan, a PD agreement shall be established binding the PD to any conditions placed in the adopting ordinance and PD Plan. The PD agreement shall include, but not be limited to:

(a) The PD Master Plan, including any PD standards.

(b) Conditions related to the approval of the PD Master Plan.

(c) Conditions related to the form and design of development in the PD.

(d) Provisions addressing how transportation, potable water, wastewater, stormwater management, park, and other public facilities will be provided to accommodate the development proposed for the PD Master Plan, and if phased, how public facilities will be phased accordingly.

(e) Provisions related to environmental protection and monitoring.

(f) Provisions addressing concurrency compliance requirements.

(g) Any other provisions the City Commission determines is relevant and necessary to implement the terms and conditions of the PD Master Plan and any PD terms and conditions statements.

Evaluation & Findings: A draft PD agreement has been included in Exhibit "B" of this staff report and will be adopted by the City Commission concurrent with the approval of the PD Master Plan and PD Ordinance should the application be approved.

ADDITIONAL STANDARDS FOR PD DISTRICTS

3.6.3(A) *PD-R, Planned Development-Residential District*.

(1) *Minimum area*. A PD-R district shall be a minimum of ten acres in area. The City Commission may waive the minimum size requirement based on a finding that creative site planning through zoning to a PD-R district is necessary to address a physical development constraint, protect sensitive natural areas, or promote a community goal when more conventional development or subdivision would be difficult or undesirable given the constraints on development.

Evaluation & Findings: The proposed PD-R district is ± 122.03-acres in size and exceeds the minimum size requirement of ten acres.

(2) *Uses*. The uses allowed in the PD-R district are identified in Table 4.1-1, Table of Allowed Uses. Allowed uses are subject to any use regulations applicable to the PD-R district.

Evaluation & Findings: The only uses proposed to be permitted are dwelling, single-family detached; community center (accessory to the residential uses); recreational trails; parks; and stormwater management facilities. All of the uses proposed to be permitted in the PD-R district are allowed by Table 4.1-1 of the City's LDRs.

(3) *Densities/intensities*. The densities for residential development and the intensities for nonresidential development for the PD Master Plan and PD-R district designation shall be established in the PD Master Plan, and shall be consistent with the Comprehensive Plan. Densities and intensities may exceed that allowed in the base zone districts being replaced by the PD-R district.

Evaluation & Findings: The density and intensity of the PD-R district development areas are identified on the proposed PD Master Plan and in the proposed PD Ordinance. In total, the proposed density is 1.66 dwelling units an acre for a total of 203 dwelling units, which is within the maximum of four dwelling units per acre provided by the Moderate Density Residential future land use category. The maximum non-residential intensity is a FAR of <0.01 for a total of 4,000 square feet and is reserved for use by the community center only, which is considered a supporting community service as an allowed use by the Low Density Residential and Moderate Density Residential future land use categories.

(4) *Dimensional standards*. The dimensional standards of the underlying base zone district being replaced by the PD-R district shall be incorporated into the PD Master Plan and apply to each development area of the PD-R district unless they are modified in ways that are consistent with the general intent and goals for development of the PD-R district and the scale and character of development in the City. Dimensional standards shall include the following:

(a) *Minimum dimensional requirements*. The minimum lot area, minimum lot width, minimum setback, maximum lot coverage, and maximum height for development.

(b) *Setbacks from adjoining residential uses*. Minimum setbacks or buffers from adjoining residential development or zone districts.

Evaluation & Findings: The proposed PD Master Plan and PD Ordinance contain the required minimum dimensional criteria and include minimum setbacks from adjoining residential development or zone districts.

(5) *Development standards*. Unless otherwise specifically modified by a PD Master Plan, development in a PD-R district shall comply with the applicable standards Article 6, Development Standards. All modifications to a development standard in Article 6 shall be consistent with this section, and shall be included as a part of the PD Master Plan.

(a) *General development standards*. The following Table 3.6-1, Development Standards Applicable in the PD-R District, specifies the development standards applicable to development in the PD-R district, and the procedure for modifying a development standard:

TABLE 3.6-1: DEVELOPMENT STANDARDS APPLICABLE IN THE PD-R DISTRICT	
Development Standard	**Procedure for Modification [1]**
Off-Street Parking and Loading (Section 6.1)	Inclusion in a Master Parking Plan
Landscape/Tree Protection (Section 6.2)	Inclusion in an Alternative Landscaping Plan
Exterior Lighting (Section 6.4)	Inclusion in a Master Lighting Plan
Signage (Section 6.5)	Inclusion in a Master Sign Plan
Open Space (Section 6.7)	Modifications prohibited
Environmental Protection (Section 6.9)	
Concurrency Management (Section 2.4.14)	
NOTES: [1] Development standards shall only be modified in ways that are consistent with the general intent and purpose for the PD-R District.	

Evaluation & Findings: The proposed PD-R is not requesting any modifications to any of the sections listed in Table 3.6-1 and all development within the PD-R will be required to comply with the City's LDRs.

(b) ***Public facilities standards***. The PD Master Plan shall ensure that impacts from the development are addressed for the following public facilities:

(i) ***Potable water***. The PD Master Plan shall establish the general location of on-site potable water facilities and how they will connect to the City's potable water system consistent with City laws, and how dedication of land, easements, and/or on-site construction of all potable water facilities/improvements will occur in a manner that complies with City laws.

(ii) ***Wastewater***. The PD Master Plan shall establish the general location of on-site wastewater facilities and how they will connect to the City's or other wastewater lines and mains and sewer interceptor lines consistent with City laws, and how dedication of land, easements, and/or on-site construction of all wastewater facilities/improvements will occur in a manner that complies with City laws.

(iii) ***Streets***. The PD Master Plan District shall establish the design of public streets within the PD-R in ways that comply with all applicable City standards, except that right-of-way, pavement widths, street widths, required materials, turning radii, and other design standards may be modified or reduced by the City Commission where it is found that:

a. The reduction or modification is necessary as a traffic-calming measure;
b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;
c. Access for emergency service vehicles is not substantially impaired;

d. Adequate off-street parking is provided for the uses proposed; and
e. Adequate space for public utilities is provided within the right-of-way.

(iv) *Stormwater*. The PD Master Plan District shall establish the design of a stormwater management system within the PD-R in ways that comply with all applicable City standards.

(v) *Other*. The PD Master Plan shall establish the responsibility of the landowner/developer for providing right-of-way and easements and for constructing on-site facilities for all other infrastructure located on the site of the proposed PD-R district, including but not limited to, electrical utility lines, telephone lines, cable TV lines, or the underground conduit for such features. The PD Master Plan shall also establish the responsibility of the landowner/developer to make any other improvements as required by City ordinances, to guarantee construction of all required improvements, and, if requested by the City, to dedicate these improvements to the City in a form that complies with City laws. The PD Master Plan shall also specify the ownership, operation, and maintenance provisions for all on-site facilities not dedicated to the City.

Evaluation & Findings: The PD Utility Plan submitted as part of the proposed PD Master Plan demonstrates the locations of public facilities necessary to serve future development internal to the subject property. A public facilities impact analysis was submitted by the Applicant and a staff analysis has been included in this report. Potential impacts from the proposed PD on potable water, wastewater, recreation, solid waste, public schools, and stormwater facilities are not anticipated to negatively impact the level of service standard of any public facilities. The proposed PD has the potential to exceed the level of service of one roadway segment, segment six. A PD is a preliminary development order and the capacity of roadway segment six must be addressed at time of final PD plan and concurrency reservation. The Applicant contends that the proposed PD is less intensive and has the potential to generate less traffic than the existing zone districts.

A typical roadway section to be applied throughout the PD-R portion of the subject property has been included on the proposed PD Master Plan and is consistent with the City's roadway design criteria in Section 7.3.1 of the City's LDRs. One modification has been requested regarding the design of public streets, which would allow the block length to exceed 600 feet when a 20-foot-wide easement for a pedestrian way through the block is provided to enhance pedestrian circulation and maintain emergency access. In no case will block lengths be permitted to exceed 1,000 feet. Development Area "C" identifies potential locations of stormwater management facilities. Additional geotechnical evaluation at the location of stormwater facilities for final design will be required at time of final PD plan.

3.6.3(D) *PD-COMM, Planned Development-Commercial District*.

(1) *Minimum area*. A PD-COMM district shall be a minimum of ten acres in area. The City Commission may waive the minimum size requirement based on a finding that creative site planning through zoning to a PD-COMM district is necessary to address a physical development constraint, protect sensitive natural areas, or promote a community goal when more conventional development or subdivision would be difficult or undesirable given the constraints on development.

Evaluation & Findings: The proposed PD-COMM district is ± 60.76-acres in size and exceeds the minimum size requirement of ten acres.

(2) *Uses*. The uses allowed in the PD-COMM district are identified in Table 4.1-1, Table of Allowed Uses. Allowed uses are subject to any use regulations applicable to the PD-COMM district. A mix of retail and office with moderate and higher density residential uses above street levels is encouraged.

Evaluation & Findings: The proposed permitted uses are all those allowed in the PD-COMM district by Table 4.1-1 of the City's LDRs.

(3) *Densities/intensities*. The densities for residential development and the intensities for nonresidential development for the PD Master Plan and PD-COMM district designation shall be established in the PD Master Plan, and shall be consistent with the Comprehensive Plan. Densities and intensities may exceed that allowed in the previously-existing base zoning district being replaced by the PD designation.

Evaluation & Findings: The density and intensity of the PD-COMM district development areas are identified on the proposed PD Master Plan and in the proposed PD Ordinance. In total, the proposed density is 0 dwelling units an acre for a total of 0 dwelling units, which is within the maximum of 15 dwelling units per acre provided by the Commercial and Community Commercial future land use categories. The maximum non-residential intensity is a FAR of 0.17 for a total of 450,000 square feet, which is within the 0.5 floor area ratio provided by the Commercial and Community Commercial future land use categories.

(4) *Dimensional standards*. The dimensional standards of the underlying base zone district being replaced by the PD-COMM district shall be incorporated into the PD Master Plan and apply to each development area of the PD-COMM district unless they are modified in ways that are consistent with the general intent and goals for development of the PD-COMM district and the scale and character of development in the City. Dimensional standards shall include the following:

(a) *Minimum dimensional requirements*. The minimum lot area, minimum lot width, minimum and maximum setbacks, maximum lot coverage, maximum height for development, and maximum individual building size.

(b) *Setbacks from adjoining residential uses*. Minimum setbacks from adjacent residential development or zone districts.

Evaluation & Findings: The proposed PD Master Plan and PD Ordinance contain the required minimum dimensional criteria and include minimum setbacks from adjoining residential development or zone districts.

(5) *Development standards*. Unless otherwise specifically modified by a PD Master Plan, development in a PD-COMM district shall comply with the applicable standards Article 6, Development Standards. All modifications to a development standard in Article 6 shall be consistent with this section, and shall be included as a part of the PD Master Plan.

(a) *General development standards*. The following Table 3.6-3, Development Standards Applicable in the PD-COMM District, specifies the development standards applicable to development in the PD-COMM district, and the procedure for modifying a development standard:

TABLE 3.6-3: DEVELOPMENT STANDARDS APPLICABLE IN THE PD-COMM DISTRICT	
Development Standard	**Procedure for Modification [1]**
Off-Street Parking and Loading (Section 6.1)	Inclusion in a Master Parking Plan
Landscape/Tree Protection (Section 6.2)	Inclusion in an Alternative Landscaping Plan
Exterior Lighting (Section 6.4)	Inclusion in a Master Lighting Plan
Signage (Section 6.5)	Inclusion in a Master Sign Plan
Open Space (Section 6.7)	Modifications prohibited
Environmental Protection (Section 6.9)	
Concurrency Management (Section 2.4.14)	
NOTES: [1] Development standards shall only be modified in ways that are consistent with the general intent and purpose for the PD-Comm District.	

Evaluation & Findings: The proposed PD-COMM has requested two deviations from the standards of Section 6.1, one deviation from the standards of Section 6.2, and one deviation from the standards of Section 6.5. The proposed deviations are shown below in Table 5. The Applicant has included the proposed modifications on the PD Master Plan, acting as the Master Parking Plan, Alternative Landscaping Plan, and Master Sign Plan. Staff has found the proposed deviations to be consistent with the general intent and purpose of the PD-COMM district. Justification is provided by the Applicant in their application materials. All remaining standards of the City's LDRs will remain in full force and effect.

Table 5. Proposed PD-COMM Deviations

LDR Section	Existing Standard	Proposed Deviation
Table 6.1-1 *Minimum Off-Street Parking Standards*	Sales Establishment: Up to 300,000 sq. ft.: 1 space per 305 sq. ft. floor area; 300,001 to 600,000 sq. ft.; 1 space per 285 sq. ft. floor area; Over 600,000 sq. ft.: 1 space per 265 sq. ft. floor area	The proposed parking for the outparcel(s) retail services/business will be per the City of Alachua Land Development Regulations (LDRs). The proposed parking for the shopping center retail services will be as follows: 1 space per 305 SF of gross floor area; maximum=125% of minimum. Shopping center is a unified commercial development containing three or more business establishments, including but not limited to general merchandise stores, retail stores, restaurants, grocery stores, specialty sales establishments, and services users.
Section 6.1.4(D)(1) *Bicycle Parking*	(1) *Required improvements.* All development with off-street surface parking lots with 50 or more parking spaces shall provide bicycle parking facilities in accordance with the following standards: (a) *Rate of provision*. Bicycle parking shall be provided at a rate of one space for every ten required parking spaces; (b) *Located within 50 feet of building's front façade.* Bicycle parking facilities shall be located within 50 linear feet of the building's front façade, and located near the building's main entrance where feasible, and outside of vehicular use areas and pedestrian travel ways; and (c) *Securing device*. Bicycle parking areas shall be equipped with a rack or other device to enabled bicycles to be secured.	Bicycle parking will be provided at a rate of 1 bicycle parking spaces per 5,000 SF of gross floor area. Location of bicycle parking shall be located within 50 to 100' of primary building entrances as practical, placed outside of vehicular aisles and walkways with a bike rack that allows locking of the frame and wheel. The location will be distributed through the retail site and outparcels. Final location will be shown on the design plans. A minimum of 2 bicycle parking spaces are required for structures under 10,000 square feet in gross floor area.

Table 5. Proposed PD-COMM Deviations (Continued)

LDR Section	Existing Standard	Proposed Deviation
Section 6.2.2(D)(3) *Perimeter Buffers*	Refer to Table 6.2-2, Buffer Class Application	The proposed PD Master Plan shows the proposed perimeter buffers for the PD-COMM. For the outparcel(s) a minimum 5' landscape buffer strip is required on lot sides as they are created.
Section 6.5.4(C)(3)(c) *Multi-Tenant Wall Signs*	In the case of multi-tenant buildings, each occupant of the multi-tenant building shall be permitted wall signage for the portion of the building elevation which is included as part of the occupant's premises. Such signage shall be subject to the maximum sign area provisions established in Section 6.5.4(C)(3)(b).	Wall signage shall be in accordance with Section 6.5.4(C)(3), except that in the case of multi-tenant buildings, each occupant of the multi-tenant building shall be permitted wall signage for the portion of the building elevation which is included as part of the occupant's premises in an amount not to exceed 10% of the respective portion of the building elevation.

(b) ***Public facilities standards***. The PD Master Plan shall ensure that impacts from the development are addressed for the following public facilities:

(i) ***Potable water***. The PD Master Plan shall establish the general location of on-site potable water facilities and how they will connect to the City's potable water system consistent with City laws, and how dedication of land, easements, and/or on-site construction of all potable water facilities/improvements will occur in a manner that complies with City laws.

(ii) ***Wastewater***. The PD Master Plan shall establish the general location of on-site wastewater facilities and how they will connect to the City's or other wastewater lines and mains and sewer interceptor lines consistent with City laws, and how dedication of land, easements, and/or on-site construction of all wastewater facilities/improvements will occur in a manner that complies with City laws.

(iii) ***Streets***. The PD Master Plan District shall establish the design of public streets within the PD-COMM in ways that comply with all applicable City standards, except that right-of-way, pavement widths, street widths, required materials, turning radii, and other design standards may be modified or reduced by the City Commission where it is found that:

a. The reduction or modification is necessary as a traffic-calming measure;
b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;
c. Access for emergency service vehicles is not substantially impaired;
d. Adequate off-street parking is provided for the uses proposed; and
e. Adequate space for public utilities is provided within the right-of-way.

(iv) *Stormwater*. The PD Master Plan District shall establish the design of a stormwater management system within the PD-COMM in ways that comply with all applicable City standards.

(v) Other. The PD Master Plan shall establish the responsibility of the landowner/developer for providing right-of-way and easements and for constructing on-site facilities for all other infrastructure located on the site of the proposed PD-COMM district, including, but not limited to, electrical utility lines, telephone lines, cable TV lines, or the underground conduit for such features. The PD Master Plan shall also establish the responsibility of the landowner/developer to make any other improvements as required by City ordinances, to guarantee construction of all required improvements, and, if requested by the City, to dedicate these improvements to the City in a form that complies with City laws. The PD Master Plan shall also specify the ownership, operation, and maintenance provisions for all on-site facilities not dedicated to the City.

Evaluation & Findings: The PD Utility Plan submitted as part of the proposed PD Master Plan demonstrates the locations of public facilities necessary to serve future development internal to the subject property. A public facilities impact analysis was submitted by the Applicant and a staff analysis has been included in this report. Potential impacts from the proposed PD on potable water, wastewater, recreation, solid waste, public schools, and stormwater facilities are not anticipated to negatively impact the level of service standard of any public facilities. The proposed PD has the potential to exceed the level of service of one roadway segment, segment six. A PD is a preliminary development order and the capacity of roadway segment six must be addressed at time of final PD plan and concurrency reservation. The Applicant contends that the proposed PD is less intensive and has the potential to generate less traffic than the existing zone districts.

Typical roadway and drive-aisle sections to be applied throughout the PD-COMM portion of the subject property have been included on the proposed PD Master Plan and are consistent with the City's parking design and maintenance standards in Section 6.1.7 and the City's roadway design criteria in Section 7.3.1 of the City's LDRs. Development Area "C" identifies potential locations of stormwater management facilities. Additional geotechnical evaluation at the location of stormwater facilities for final design will be required at time of final PD plan.

PUBLIC FACILITIES IMPACT ANALYSIS

Section 2.4.14 of the City's Land Development Regulations (LDRs) establishes the standards for a certificate of level of service standard which applies to all preliminary development orders unless exempted by Section 2.4.14(C). The application has been reviewed for impacts to roads, sanitary sewer, solid waste, stormwater management, potable water, and recreation facilities to identify any of the application's potential impacts to the level of service (LOS) for those public facilities.

Traffic Impact

The following impacts are expected on the roadway segments identified in Table 6-1.

Table 6-1. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2]	Segment Description	Lanes	Functional Classification	Area Type	LOS
5	U.S. Hwy 441 from CR25A East Intersection to SR 235	4/D	Principle Arterial	COMM	D
6	U.S. Hwy 441 from I-75 to CR 235A	4/D	Principle Arterial	Urban Trans	D
7	U.S. Hwy 441 from CR 235A to NW 188th Street	4/D	Principle Arterial	Urban Trans	D
16	CR 235A from U.S. Hwy 441 to North City Limit	2/U	Major Collector	Comm	D
17	CR 235A from U.S. Hwy 441 to CR 235	2/U	Major Collector	Comm	D

1 City of Alachua Comprehensive Plan, Transportation Element.
2 For developments generating more than 1,000 trips (AADT), affected roadway segments are identified as all those wholly or partially located within 1/2 mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater AND affected roadway segments are those on which the development's impacts are five percent or greater of the maximum service volume of the roadway [Section 2.4.14(H)(2)(b)of the LDRs].

Table 6-2. Projected Impact on Affected Comprehensive Plan Roadway Segment

Traffic System Category	Segment 5 US 441		Segment 6 US 441		Segment 7 US 441	
	AADT	Peak Hour	AADT	Peak Hour	AADT	Peak Hour
Maximum Service Volume[1]	39,000	3,510	39,000	3,510	43,000	3,870
Existing Traffic[2]	23,500	2,079	32,500	2,782	24,000	2,093
Reserved Trips[3]	1,744	156	2,138	207	1,658	150
Available Capacity[3]	13,756	1,275	4,362	521	17,342	1,627
Increase/Decrease in Trips Generated by Development[4]	6,096	499	8,568	701	16,476	1,348
Residual Capacity	7,660	776	(4,206)	(180)	866	279
Residual Percentage of Permitted Design Capacity Utilized	80.36%	77.89%	110.78%	105.13%	97.99%	92.79%

1 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
2 Florida Department of Transportation. (2026). *2025 Count Data*. Accessed via Florida Traffic Online April 2026.
3 Source: City of Alachua April 13, 2026, Development Monitoring Report.
4 Trip Generation Formula: ITE Trip Generation 12th edition; Trip Distribution: Segment 5 – 37%; Segment 6 – 52%; Segment 7 – 100%; Segment 16 – 6%; Segment 17 – 8%.

Table 6-2. Projected Impact on Affected Comprehensive Plan Roadway Segment (Continued)

Traffic System Category	Segment 16 CR 235A		Segment 17 CR 235A	
	AADT	Peak Hour	AADT	Peak Hour
Maximum Service Volume[1]	15,120	1,359	15,120	1,359
Existing Traffic[2]	2,524	227	7,200	647
Reserved Trips[3]	1,174	117	4,772	448
Available Capacity[3]	11,422	1,015	3,148	264
Increase/Decrease in Trips Generated by Development[4]	989	81	1,318	108
Residual Capacity	10,433	934	1,830	156
Residual Percentage of Permitted Design Capacity Utilized	31.00%	31.27%	87.90%	88.52%

1 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
2 Florida Department of Transportation. (2025). *2025 Count Data*. Accessed via Florida Traffic Online April 2026.
3 Source: City of Alachua April 13, 2026, Development Monitoring Report.
4 Trip Generation Formula: ITE Trip Generation 12th edition; Trip Distribution: Segment 5 – 37%; Segment 6 – 52%; Segment 7 – 100%; Segment 16 – 6%; Segment 17 – 8%.

Evaluation & Findings: The expected impacts of the application will not adversely affect the level of service of road segments 5, 7, 16, and 17. The analysis does show that the application could adversely impact the level of service of road segment 6. As required by Section 2.4.14 of the City's Land Development Regulations, if the development does not have de minimis impacts, and the concurrency requirements are not met, the deficiencies will have to be addressed in the final development order prior to a certificate of concurrency compliance being issued. Accordingly, any application for development on the site will have its concurrency reevaluated, and any deficiency in roadway segment 6 will need addressed prior to receiving a final development order. This application does not constitute a final development order and concurrency will not be reserved.

Potable Water Impacts

Table 7. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity[1]	3,000,000
Less Actual Potable Water Flows[1]	1,447,333
Reserved Capacity[2]	350,100
Available Capacity	1,202,567
Increase/Decrease in Potable Water Demand from Application[3]	101,225
Residual Capacity	1,101,342
Residual Percentage of Permitted Design Capacity Utilized	63.29%

1 City of Alachua Public Services Department, April 2026
2 City of Alachua April 13, 2026, Development Monitoring Report
3 Formula:
Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 4.1.c(2): 275 GPD / unit
Per Florida Administrative Code 64E-6.008: 0.1 GPD/SF
(203 units * 275 GPD / Unit) + (454,000 SF * 0.1 GPD/SF) = 101,225 GPD

Evaluation & Findings: The expected impacts of the application will not adversely affect the level of service of the potable water system. The impacts that will be generated by the application are acceptable. This application does not constitute a final development order and concurrency will not be reserved.

Sanitary Sewer Impacts

Table 8. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Permitted Capacity[1]	1,500,000
Less Actual Treatment Plant Flows[1]	756,000
Reserved Capacity[2]	325,846
Available Capacity	418,154
Increase/Decrease in Sanitary Sewer Demand from Application[3]	96,150
Residual Capacity	322,004
Residual Percentage of Permitted Design Capacity Utilized	78.53%

1 City of Alachua Public Services Department, April 2026
2 City of Alachua April 13, 2026, Development Monitoring Report
3 Formula:
Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 4.1.c(2): 250 GPD / unit
Per Florida Administrative Code 64E-6.008: 0.1 GPD/SF
(203 units * 250 GPD / Unit) + (454,000 SF * 0.1 GPD/SF) = 96,150 GPD

Evaluation & Findings: The expected impacts of the application will not adversely affect the level of service of the sanitary sewer system. The impacts that will be generated by the application are acceptable. This application does not constitute a final development order and concurrency will not be reserved.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Pounds Per Day	Tons Per Year
Existing Demand[1]	45,412.00	8,287.69
Reserved Capacity[2]	43,496.82	7,938.17
Increase/Decrease in Demand Generated by Application[3]	7,599.78	1,386.96
New River Solid Waste Facility Anticipated Capacity[4]	30+ Years	

1 Bureau of Economic & Business Research, University of Florida, Estimates of Population by County and City in Florida (2025); Policy 2.1.a, Community Facilities Element. Formula: 11,353 Persons x 0.73 tons per year.
2 City of Alachua April 13, 2026, Development Monitoring Report
3 Formula:
Per City of Alachua Comprehensive Plan, Community Facilities Element Policy 2.1.a: 0.73 tons / year per capita @ 2.65 persons / unit
Per Cincero & Cincero. (1996). *Environmental Engineering: A Design Approach.*: ((12 lbs / 1,000 SF / day) * 365 days / year) / 2,000 lbs (0.73 tons / year * (203 units * 2.65 persons / unit)) + ((((12 lbs / 1,000 SF / day) * 454,000 SF) * 365 days / year) / 2,000 lbs) = 1,386.96 tons / year
4 New River Solid Waste Association, April 2026

Evaluation & Findings: The expected impacts of the application will not adversely affect the level of service of solid waste facilities. The impacts that will be generated by the application are acceptable. This application does not constitute a final development order and concurrency will not be reserved.

Recreation Facilities

Table 10-1. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	56.77
Reserved Capacity[1]	13.49
Available Capacity	65.23
Increase/Decrease in Recreation Acreage Demand by Development[3]	2.69
Residual Capacity	62.54
Residual Percentage of Recreation Acreage Capacity Utilized	53.84%

1 City of Alachua April 13, 2026, Development Monitoring Report
2 Bureau of Economic & Business Research, University of Florida, Estimates of Population by County and City in Florida (2025); Policy 1.2.b, Recreation Element. Formula: 11,353 Persons x (5 acres / 1,000 persons).
3 Formula: Per City of Alachua Comprehensive Plan, Recreation Element Policy 1.2.b: 2.65 persons per unit * 203 units * (5 acres / 1,000 persons) = 2.69-acres

Table 10-2. Passive Recreational Impacts

System Category	Acreage
Existing Improved Passive Park Space[1]	34.82
Minimum Improved Passive Park Space Required to Serve Existing Population[1, 2]	11.35
Reserved Capacity[1, 2]	2.70
Available Improved Passive Park Space	20.77
Increase/Decrease in Improved Passive Park Space Demand by Development[3]	0.54
Residual Capacity	20.23
Residual Percentage of Improved Passive Park Space Capacity Utilized	41.90%

1 City of Alachua April 13, 2026, Development Monitoring Report
2 Formula: Per City of Alachua Comprehensive Plan, Recreation Element Policy 1.2.b: Acreage Required * 0.20
3 Formula: Per City of Alachua Comprehensive Plan, Recreation Element Policy 1.2.b: 2.65 persons per unit * 203 units * (5 acres / 1,000 persons) * 0.20

Evaluation & Findings: The expected impacts of the application will not adversely affect the level of service of recreation facilities. The impacts that will be generated by the application are acceptable. This application does not constitute a final development order and concurrency will not be reserved.

Public School Facilities

A School Capacity Review was submitted to The School Board of Alachua County (SBAC) in accordance with the City's Comprehensive Plan, specifically Policies 1.1.b, 1.1.c, 1.1.e, and 1.1.f of the Public School Facilities Element. According to the School Capacity Review report submitted to the City by the School Board of Alachua County on February 13, 2026, capacity is currently available at the elementary, middle, and high school levels to support the proposed development.

SITE-SPECIFIC AMENDMENT
TO THE OFFICIAL ZONING ATLAS
STAFF REPORT

DRAFT PD ORDINANCE 26-XX

ORDINANCE 26-XX

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS FROM COMMUNITY COMMERCIAL ("CC"), COMMERCIAL INTENSIVE ("CI"), AND PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") TO PD-R AND PLANNED DEVELOPMENT – COMMERCIAL ("PD-COMM") ON A ± 182-ACRE SUBJECT PROPERTY; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441; TAX PARCELS 03042-050-003; 03042-050-004; 03042-050-005; 03042-050-010; 03042-051-001; 03046-003-000; 03046-003-001; 03046-003-003; 03046-003-004; 03046-003-005; 03875-001-001; 03875-010-001; 03875-010-002; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, an application for a site-specific amendment to the Official Zoning Atlas ("Amendment") as further described herein has been filed with the City (the "Amendment") by eda consultants, inc. ("Agent") and NV5. Inc. ("Agent") (together as the "Applicant") on behalf of AYLA, LLC; First Coast Road Rangers, LLC; Jack's Small Engine Repair LLC, and JTFA LLC (together as the "Property Owners"); and,

WHEREAS, the Property Owners desire to obtain approval for a Planned Development – Residential ("PD-R") and Planned Development – Commercial ("PD-COMM") in the City, together known as the Farmlands Planned Development ("Project"); and,

WHEREAS, the Property Owners wish to construct the Project, consisting of a maximum of 203 residential dwelling units and a maximum of 454,000 square feet of non-residential floor area on the subject property, the legal description of which is attached hereto as Exhibit "A" and is referred to as the "Property"; and,

WHEREAS, a duly advertised quasi-judicial public hearing was conducted on the Amendment on April 21, 2026, by the City of Alachua Planning and Zoning Board ("PZB"), and the PZB reviewed and considered comments received during the quasi-judicial public hearing concerning the application and made its recommendation for _____ to the City Commission; and,

WHEREAS, the City Commission considered the recommendations of the PZB at duly advertised quasi-judicial public hearings on _____, 2026, and _____, 2026, and provided for and received public participation at both public hearings; and,

WHEREAS, the City Commission has determined and found the proposed Amendment to be consistent with the City of Alachua Comprehensive Plan and Land Development Regulations; and,

WHEREAS, for reasons set forth in this Planned Development Ordinance ("PD Ordinance") that is hereby adopted and incorporated as findings that the City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare;

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA.

DRAFT

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and incorporated herein by reference.
2. The Amendment is consistent with the City of Alachua Comprehensive Plan.
3. The Amendment is in compliance with the City of Alachua Land Development Regulations.
4. The Amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

Section 2. Official Zoning Atlas Amended

The Official Zoning Atlas is hereby amended from Community Commercial ("CC"), Commercial Intensive ("CI"), and PD-R to PD-R and PD-COMM for the Property in accordance with the legal descriptions found in Exhibit "A" and map found in Exhibit "B" and attached hereto and incorporated herein.

Section 3. Planned Development Master Plan and Planned Development Agreement

The Planned Development Master Plan ("PD Master Plan" found in Exhibit "C" and the Planned Development Agreement ("PD Agreement") found in Exhibit "D" of this PD Ordinance are hereby approved and adopted concurrent with the approval of this PD Ordinance for a period of 10 years from the date of final approval by the City Commission.

Section 4. Development Parameters

These development parameters shall apply to any development proposed within the PD-R or PD-COMM zone districts as adopted by Section 2 of this PD Ordinance and as described by Exhibits "A" and "B".

1. The development shall consist of non-residential and residential uses and be developed in up to five phases. The location of each phase shall be designed in a manner that will create a logical and functional development and infrastructure pattern. More specifically, phasing shall generally occur from north to south with boundaries for each phase determined by access and utility infrastructure. This PD Ordinance and the PD Agreement found in Exhibit "D" shall be valid for a period of no more than 10 years from the date of final approval by the City Commission, unless otherwise extended by the City Commission through an amendment to this PD Ordinance.
2. The development shall consist of uses including single-family detached, uses consistent with the PD-COMM zoning district, and common areas as shown on the PD Master Plan found in Exhibit "C". The density, intensity, allowable uses, and acreage, where applicable, for each development area are as follows:

Maximum Development Area & Density/ Intensity	Allowable Uses	Maximum Potential Development	Acres	Percentage of PD
Development Area 'A' 0 DUA 0.17 FAR	All allowed uses within the PD-COMM district as shown in Table 4.1-1, Table of Allowed Uses, of the City's Land Development Regulations, including, but not limited to: • Child care center;	0 dwelling units 450,000 square feet non-residential	± 48	± 27%

Maximum Development Area & Density/ Intensity	Allowable Uses	Maximum Potential Development	Acres	Percentage of PD
Development Area 'A' (Continued)	• School; • Post office; • Assisted living facility; • Golf course, public; • Restaurant, indoor seating only; • Restaurant, with outdoor seating; • Restaurant, with drive-through or drive-in service; • Specialty eating establishment; • Offices; • Commercial recreation, indoor; • Commercial recreation, outdoor; • Bar, nightclub, or cocktail lounge; • Drug store or pharmacy (stand alone); • Entertainment establishment; • Financial institution; • Microbrewery; and, • Hotel or motel.			
Development Area 'B' 2.5 DUA 0.00 FAR	• Dwelling, single-family detached.	203 dwelling units 0 square feet non-residential	± 81	± 44%

DRAFT

	  • Parks;
	  • Playgrounds;
	  • Clubhouse & pool;
	• Landscaped areas;
	• Utility easements; and,
	• Stormwater management facilities.
		0 dwelling units
		
		4,000 square feet
			± 10.4	± 10%

3. The dimensional standards for the allowable uses, where applicable, for the Project are as follows:

Allowable Use	Min. Lot Area (Sq. Ft.)	Min. Lot Width (Ft.)	Max. Lot Coverage	Min. Setbacks (Ft.)			Max. Height
				Front[3]	Side[4]	Rear	
PD-R [1]							
Yellow (Minimum Lot Size ½ Acre)	21,780	85	40%	20	7.5	15	65
Orange (Minimum Lot Size 1/3 Acre)	14,520	70	40%	20	7.5	15	65
All Other Uses [2]	10,000	50	40%	20	7.5	15	65
PD-COMM							
All Other Uses [2]	0	0	80% (aggregate total in PD-COMM)	20	0	20	65

1. In the PD-R Areas, setbacks and dimensional standards apply only to individual platted lots and all building separation requirements specified in the Florida Building Code are applicable.
2. More active recreation uses such as playgrounds, picnic areas, pavilions & gazebos are only permitted in open space areas that are located in the center/interior of the project. Clubhouse/amenity center and any associated parking or outdoor component (such as playground, pool, or pool deck) shall be setback from NW 188th street right-of-way a minimum of 250'.

DRAFT

4. A final PD plan shall consist of a site plan or preliminary plat. Application for a final PD plan must be submitted to the City within 12-months of from the date of final approval by the City Commission, unless otherwise extended by the City Commission through an amendment to this PD Ordinance. Upon submission, the PD shall be deemed extended until a final determination on the final PD plan has been rendered. In such case where the final determination is to deny and the 12-month period has expired, this PD shall be deemed expired unless otherwise extended by the City Commission through an amendment to this PD Ordinance.

5. A final PD plan for development on the Property shall be consistent with the City of Alachua Comprehensive Plan, the City's Land Development Regulations, approved PD Master Plan, PD Agreement, and this PD Ordinance, and includes the following requirements:

    a. General Requirements:

        i. The Property Owners, their successors and/or assigns, shall be responsible for the provision of infrastructure for the project. This shall include all on-site and off-site improvements, including transportation system or utility improvements, deemed necessary to support the development by the City in the City's sole discretion. Off-site improvements deemed necessary to support the development by the City in the City's sole discretion shall be consistent with the City of Alachua Comprehensive Plan and in compliance with the City's Land Development Regulations in existence at the time the development requiring the infrastructure is proposed and shall be supported by appropriate data and analysis that identifies a specific impact from the proposed development. If off-site improvements are required by the City, it shall be limited to the areas or infrastructure impacted by the proposed development. The data and analysis used to justify the requirement for off-site improvements will be provided by traffic study data, reports, or other infrastructure analysis that identify proportional impacts from the proposed development. The data and analysis will be provided by the Property Owners, their successors and/or assigns, and reviewed by the City. The Property Owners, their successors and/or assigns, shall pay for any consultants or experts the City deems necessary to review the data and analysis provided.

        ii. Facilities constructed on-site that are not dedicated to the City for maintenance shall be the responsibility of a legally established property owners' association in compliance with Section 7.7 of the City's Land Development Regulations. The property owners' association shall have the responsibility of maintenance of all common areas. In the event common areas and required open space areas, as mandated by Sections 6.7.6, 6.9.3, and 7.8.1 of the City's Land Development Regulations are not owned by a property owners' association, such areas shall be burdened by an easement that requires a property owners' association or another entity approved by the City to maintain such areas, and that restricts such areas in accordance with the City's requirements for such areas.

        iii. The Property Owners, their successors and/or assigns, shall submit a utility system plan as part of the construction plans for the proposed site plan or preliminary plat.

        iv. Utilities shall be extended throughout the Project within areas designated as public rights-of-way to the maximum extent practicable. Utility infrastructure which must run outside a public right-of-way, and which will be maintained by the City, shall be located in easements approved and accepted by the City granting access and maintenance of such infrastructure.

        v. A final PD plan shall include the exact number of residential dwelling units and non-residential floor area, as well as precise information regarding the layout of open space, traffic and pedestrian circulation, and stormwater management.

        vi. No construction vehicles shall access the subject property from NW 188th Street during development of the property. Furthermore:

DRAFT

1. Construction activities shall only occur between the hours of 7:00 AM and 7:00 PM, Monday through Friday and between the hours of 9:00 AM and 7:00 PM, Saturday and Sunday; and,

2. Dust and debris from construction activities shall be minimized as to not spread dust and debris off-site. This may include, but is not limited to, dust control achieved through water trucks, removal of mud/soil from vehicle tires before exiting the site, and street cleaning.

b. Transportation Requirements:

i. The ingress/egress points to the Property shall be located as depicted on the approved PD Master Plan. The design of all proposed roadways shall be consistent with the applicable standards of Article 7 of the City's Land Development Regulations, the City's Design and Construction Requirements (latest edition at the time of review of site plan or construction plans), and the approved PD Master Plan.

ii. Roadway shifts of less than 100 feet (measured centerline to centerline) shall be permitted as minor deviations from the approved PD Master Plan per Section 2.4.3(D)(8) of the City's Land Development Regulations.

iii. The design of proposed roadways shall be reviewed and approved as part of construction plans submitted for the subdivision review process, as further described in Section 2.4.10 of the City's Land Development Regulations, or site plan review or infrastructure plan review process, as further described in Section 2.4.9 of the City's Land Development Regulations.

iv. A phase 2 traffic impact analysis ("TIA") shall be provided at time of submission of any final PD plan application.

v. The ingress/egress point to the Property located on NW 188th Street shall be designated as emergency access only, but shall be paved and designed to have a minimum paved width of 24' and shall be dedicated as right-of-way or have an easement provided. Provided gate shall be constructed of wood, vinyl, wrought iron, or similar material. Gate shall not be constructed of chain link, chicken wire, barbed wire, or similar material. An ungated pedestrian access may be provided granted it is designed to not be accessible by vehicular traffic.

c. Pedestrian and Street Improvements:

i. The Property Owners, their successors and/or assigns, shall be responsible to design, obtain all applicable permits, and construct all pedestrian and street improvements in accordance with Article 7 and any other pertinent section of the City's Land Development Regulations, subject to the following:

1. Block lengths may exceed 600-feet in length. Block lengths greater than 600' in length shall include a minimum 20-foot-wide easement for a pedestrian way through the block. In no case shall block lengths exceed 1,000-feet.

2. Traffic calming measures shall be used to connect mid-block cuts with each other or other elements of the pedestrian circulation network and may include raised pedestrian crossings, change in materials, bulb-outs, or other similar measures approved by the City in its sole discretion. These pedestrian ways shall be privately maintained, unless a separate agreement is made between the Property Owners, their successors and/or assigns, and the City of Alachua Public Services Department.

DRAFT

3. Any easement intended for pedestrian access through a block shall be improved with a 10-foot-wide sidewalk made of concrete, brick pavers, asphalt, or similar hard material.

4. In no instance shall a block length or length of travel through an easement exceed 900 feet.

ii. A minimum 5-foot-wide sidewalk shall be provided on both sides of all public streets.

iii. A minimum 8-foot-wide multi-use path shall be provided along the former seaboard right-of-way as depicted on the PD Master Plan. Construction of this path shall occur, at a minimum, in phases concurrent with the respective phase of development.

iv. The bicycle/pedestrian connection between Development Area 'A' and Development Area 'B' shall consist of an easement a minimum of 20-feet in width with a 10-foot-wide sidewalk made of concrete, brick pavers, asphalt, or similar hard material. Construction of this path shall occur, at a minimum, in phases concurrent with the respective phase of development.

d. Off-Street Parking and Loading Requirements:

i. All final PD plans in the PD-R shall be subject to the standards of Section 6.1 of the City's Land Development Regulations in effect at the time of review.

ii. All final PD plans in the PD-COMM shall be subject to the standards of Section 6.1 of the City's Land Development Regulations in effect at the time of review; except for the following deviations granted by the City Commission in accordance with Table 3.6-3 of the City's Land Development Regulations:

1. The proposed parking for the outparcel(s) retail services/business will be per the City of Alachua Land Development Regulations (LDRs). The proposed parking for the shopping center retail services will be as follows: 1 space per 305 SF of gross floor area; maximum=125% of minimum. Shopping center is a unified commercial development containing three or more business establishments, including but not limited to general merchandise stores, retail stores, restaurants, grocery stores, specialty sales establishments, and services users.

2. Bicycle parking will be provided at a rate of 1 bicycle parking spaces per 5,000 SF of gross floor area. Location of bicycle parking shall be located within 50 to 100' of primary building entrances as practical, placed outside of vehicular aisles and walkways with a bike rack that allows locking of the frame and wheel. The location will be distributed through the retail site and outparcels. Final location will be shown on the design plans. A minimum of 2 bicycle parking spaces are required for structures under 10,000 square feet in gross floor area.

In case of conflict between this subsection of this PD Ordinance and the City's Land Development Regulations at time of review, this subsection of this PD Ordinance shall govern.

e. Signage Requirements:

i. All final PD plans in the PD-R shall be subject to the standards of Section 6.5 of the City's Land Development Regulations in effect at the time of review.

DRAFT

ii. All final PD plans in the PD-COMM shall be subject to the standards of Section 6.5 of the City's Land Development Regulations in effect at the time of review; except for the following deviations granted by the City Commission in accordance with Table 3.6-3 of the City's Land Development Regulations:

1. Wall signage shall be in accordance with Section 6.5.4(C)(3), except that in the case of multi-tenant buildings, each occupant of the multi-tenant building shall be permitted wall signage for the portion of the building elevation which is included as part of the occupant's premises in an amount not to exceed 10% of the respective portion of the building elevation.

In case of conflict between this subsection of this PD Ordinance and the City's Land Development Regulations at time of review, this subsection of this PD Ordinance shall govern.

f. Electric System Requirements:

i. The Property Owners, their successors and/or assigns, shall be responsible for all costs associated with connection to the electric system of the electric service provide as necessary to serve the Project.

g. Potable Water and Wastewater System Requirements:

i. The Property Owners, their successors and or/assigns, shall be responsible for all costs associated with connection to the City's potable water and wastewater systems as necessary to serve the project.

ii. No new wells will be allowed in the Project. No new sceptic or other self-contained waste water systems will be allowed in the Project. All development within the Project will be required to connect to the City's potable water and wastewater systems.

iii. Water systems shall be designed to provide fire flow rates that conform to the current standards of the Florida Fire Prevention Code, the Florida Building Code, and Chapter 633, Florida Statutes.

iv. The locations of proposed lift stations are approximate as depicted in the PD Utility Plan as part of the approved PD Master Plan. The applicant will be required to coordinate exact location and design of future lift stations with the City of Alachua Public Services Department; however, the location of future lift stations shall be generally consistent with the PD Utility Plan.

h. Landscape and Open Space Requirements

i. The Property Owners, their successors and/or assigns, shall submit a landscaping and buffering plan as part of any final PD plan.

ii. All final PD plans in the PD-R shall be subject to the standards of Section 6.2 and Section 6.3 of the City's Land Development Regulations in effect at the time of review.

iii. All final PD plans in the PD-COMM shall be subject to the standards of Section 6.2 and Section 6.3 of the City's Land Development Regulations in effect at the time of review; except for the following deviations granted by the City Commission in accordance with Table 3.6-3 of the City's Land Development Regulations:

1. The proposed PD Master Plan shows the proposed perimeter buffers for the PD-COMM. For the outparcel(s) a minimum 5' landscape buffer strip is required on lot sides as they are created.

DRAFT

In case of conflict between this subsection of this PD Ordinance and the City's Land Development Regulations at time of review, this subsection of this PD Ordinance shall govern.

iv. The Property Owners, their successors and/or assigns, shall submit an open space plan as part of any final PD plan. The open space plan shall meet the minimum requirements established by Section 6.7 of the City's Land Development Regulations in effect at time of review.

i. Stormwater and Environmental Requirements:

i. The Property Owners, their successors and/or assigns, shall design, obtain all applicable permits, and construct a stormwater management system necessary to serve the development. Stormwater management facilities shall be constructed concurrent with development of the Project. Sufficient stormwater capacity consistent with Section 6.9.3 of the City's Land Development Regulations must be provided concurrent with site improvements of the Project. On-site soil shall be appropriately prepared so as to alleviate any drainage issues.

ii. Any final PD plan shall include detailed geotechnical mapping and evaluation to identify and address any potential karst features or active ground loss areas. Evaluations may include the requirement of conducting electric resistivity tests, ground penetrating radar, and/or additional soil borings in the City's sole discretion. The Property Owner's, their successors and/or assigns, shall be responsible for furnishing the cost of the additional evaluations and the City's expert.

iii. All final PD plans shall be consistent with the goals, objectives, and policies of the City of Alachua Comprehensive Plan including, but not limited to, those goals, objectives, and policies related to the stormwater system design in high aquifer recharge areas.

iv. The Property Owners, their successors and/or assigns, shall provide a listed species and habitat survey as part of any final PD plan for the Project, including a 100% gopher tortoise and burrowing owl survey. Standard measures of protection for eastern indigo snakes are required, if documented. The survey shall document if any listed species are observed on the Property. If a listed species is observed on the Property, the updated survey shall provide recommendations to address potential impacts to the listed species and to identify any permitting requirements of any local, state, or federal governmental agencies. Any submitted listed species and habitat survey shall be acceptable to the City for a period of no more than three years from the original date of the survey.

v. If any wetlands are identified on the Property, such areas shall be field-delineated using professionally accepted methodology. All development in and/or near wetland areas shall be consistent with the City of Alachua Comprehensive Plan and in compliance with the City of Alachua Land Development Regulations and shall grant conservation easements or other appropriate mechanisms, as determined by the City, to protect wetland areas. Any submitted wetland delineations shall be acceptable to the City for a period of no more than three years from the original date of delineation.

vi. All final PD plans shall be consistent with the goals, objectives, and policies of the City of Alachua Comprehensive Plan including, but not limited to, those goals, objectives, and policies related to the eradication of invasive exotic plant species.

DRAFT

vii. The Property Owners, or their successors and/or assigns, shall, concurrent with development of the Project, remove and destroy all Category I and II exotic plant species, as published in the most current version of the Florida Exotic Plant Council's List of Invasive Plant Species, located on the Property. Thereafter, the Owner, or their successors and/or assigns, shall assure long-term implementation of an exotic plants management approved with a final development order and which shall be included in covenants and restrictions to be implemented by a property owner's association in conformance with Section 7.7 of the City's Land Development Regulations or other mechanism acceptable to the City.

viii. The planting of any species identified in the most current version of the Florida Exotic Pest Plant Council's List of Invasive Plant Species shall be prohibited. Grasses and sods shall be certified free of noxious weeds by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry.

ix. Regulated trees shall be surveyed and location identified during the design of any final PD plan in order to preserve existing trees to the greatest extent practicable. The PD Master Plan may be slightly adjusted to allow for flexibility in road and lot configuration for the express purposed of preserving on-site canopy areas which will enhance the Project by providing shaded green spaces and buffers.

6. The Property Owners, their successors and/or assigns, shall obtain all applicable permits from the Suwannee River Water Management District, Alachua County, the Florida Department of Environmental Protection, the Florida Fish and Wildlife Commission, the Florida Department of Transportation, and any other local, state, or federal agency before the commencement of any development on the Property for the Project.

7. The development parameters defined herein do not inordinately burden the Property Owners, their successors and/or assigns, or the development of the Property or the Project.

8. The rezoning of the Property and adoption of this PD Ordinance do not reserve concurrency for the Project or Property. Concurrency will be re-evaluated at time of review for any final PD plan in accordance with Section 2.4.14 of the City's Land Development Regulations.

9. The adoption of this PD Ordinance does not guarantee the approval of any development permits, including, but not limited to, preliminary plats, construction plans, final plats, infrastructure plans, or site plans for the Project, or for any section thereof, for the Property Owners, their successor and/or assigns.

10. All development, including, but not limited to, any final PD plan for the Project shall be governed by the laws, regulations, comprehensive plan, and ordinances in effect at the time of the specific proposed development and not as of the date of this ordinance.

Section 5. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of Alachua, Florida.

Section 6. Repealing Clause

All ordinances or parts of ordinances in conflict with this ordinance are, to the extent they conflict with this ordinance, repealed. More specifically, Ordinance 22-07 (which established the original NW 188th Street/US 441 Planned Development) and any NW 188th Street/US 441 Planned Development PD Master Plan, PD Agreement, or Planned Development governing document is hereby repealed in its entirety and superseded by this PD Ordinance and the PD Master Plan and PD Agreement adopted by Section 3 of this PD Ordinance.

DRAFT

Section 7. Providing for Severability

It is the declared intent of the Alachua City Commission that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by a court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance and the remainder of this ordinance, after the exclusion of such part or parts, shall be deemed to be valid.

Section 8. Effective Date

This Ordinance shall be effective upon its passage and adoption on the second and final reading.

PASSED on first reading on the _____ day of _____, 2026.

PASSED and **DULY ADOPTED**, in regular session, with a quorum present and voting, by the City Commission, upon second reading this _____, day of _____ , 2026.

DRAFT PD AGREEMENT

PLANNED DEVELOPMENT REGULATORY AGREEMENT
FOR THE FARMLANDS PLANNED DEVELOPMENT PROJECT

THIS PLANNED DEVELOPMENT REGULATORY AGREEMENT ("PD Agreement") is made as of _____, 2026, by and between the **CITY OF ALACHUA, FLORIDA** ("City"), a Florida municipal corporation, and **AYLA, LLC**, a Florida limited liability company, **FIRST COAST ROAD RANGERS, LLC**, a Florida limited liability company, **JACK'S SMALL ENGINE REPAIR LLC**, a Florida limited liability company, **JTFA LLC**, a Florida limited liability company, and their successors or assigns (together as the "Property Owners" or "Developer"). The City and the Property Owners may jointly be referred to as the "Parties."

RECITALS

WHEREAS, the Owner/Developer desires to obtain approval for a **Planned Development ("PD")** in the City known as the **Farmlands Planned Development ("Project")**, which is proposed to consist of ±182-acres; and,

WHEREAS, the Owner/Developer wishes to improve the land comprising the PD, the legal description for which is described hereto in Exhibit "A," which is incorporated herein by reference ("Property"); and,

WHEREAS, as part of the approval process for the planned development required by the City of Alachua Land Development Regulation Section 2.4.3, an application to rezone the Property from Community Commercial ("CC"), Commercial Intensive ("CI"), and Planned Development – Residential ("PD-R") to PD-R and Planned Development-Commercial ("PD-Comm") has been filed with the City; and,

WHEREAS, the Planning & Zoning Board, serving as the Local Planning Agency ("LPA"), recommended _____ of the proposed rezoning from CC, CI, and PD-R to PD-R and PD-COMM at a quasi-judicial public hearing held on April 21, 2026; and,

WHEREAS, the City Commission held the first of two required quasi-judicial public hearings on _____, 2026, to consider the proposed rezoning of the Property pursuant to Ordinance Number 26-XX; and,

WHEREAS, the City and the Owner/Developer desire to proceed to the second and final reading on the proposed rezoning of the Property pursuant to Ordinance Number 26-XX; and,

WHEREAS, concurrent with the second and final reading of the proposed rezoning for the Property, a PD Agreement and a PD Master Plan are required to be approved.

NOW, THEREFORE, in consideration of the foregoing premises, the Parties hereby agree as follows:

1. The above RECITALS are true and correct and incorporated as material portions of this PD Agreement by reference.

2. The Developer shall plan and construct, at the Developer's sole expense, the Project according to the specifications set forth in the City's LDRs; Ordinance 26-XX, which is attached hereto as Exhibit "B" and agreed to by the Developer; and the PD Master Plan documents, which are attached hereto as Exhibit "C."

3. A **final PD plan** for the Project (a **Preliminary Plat** or a **Site Plan**) must be submitted to the City within one (1) year from the City Commission's approval of this PD Agreement, Ordinance 26-XX, and the PD Master Plan, for any part or section of the plan for development shown in the PD Master Plan. Upon submission, the PD shall be deemed extended until a final determination on the final PD plan has been rendered. In such case where the final determination is to deny and the one (1) year period has expired, this PD shall be deemed expired unless otherwise extended by the City Commission through an amendment to Ordinance 26-XX and this PD Agreement. If a **final PD plan** for the Project is not submitted within the required one (1) year period, it shall result in the expiration of the PD zone district classifications of the Project. If the PD zoning expires, the City shall have the right, but not the obligation, in the City's sole discretion, to conduct any hearings necessary to rezone the lands included within the Project to the previous zoning district of CC, CI, and PD-R.

4. The Developer shall construct the Project in accordance with its approved PD Master Plan. Deviations from the PD Master Plan that constitute substantial changes as described in Section 2.4.3 of the City's LDRs must be approved in advance by the City Commission through an amendment to Ordinance Number 26-XX and this PD Agreement.

5. The approval and execution of this PD Agreement does not reserve concurrency for the Project or Property. Concurrency will be re-evaluated at time of review for any final PD plan in accordance with Section 2.4.14 of the City's Land Development Regulations.

6. The approval and execution of this PD Agreement does not guarantee the approval of any development permits, including but not limited to a preliminary plat, construction plans, final plat, or a site plan for the Project, or for any part or section thereof, for the Developer or their successors or assigns.

7. Nothing contained in this PD Agreement shall relieve the Developer, or their successors, assigns, or anyone acting on the Developer's behalf, from obtaining all local, regional, state, or federal permits or complying with any applicable ordinance, law, rule, or regulation necessary for the development of the Project. In the event that the Developer, and their contractors, subcontractors, or anyone for whose acts the Developer or their contractors or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule, or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person, the City, through its City Manager or designee, shall have the right to stop work until appropriate corrective measures are taken, in addition to any other remedies available to the City.

8. The Developer, or their successors and/or assigns, shall indemnify and hold harmless the City, and its officers, agents, employees, or anyone acting directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in the performance of work, down time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, or their successors and/or assigns, and their contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer, or their contractors or subcontractors, may be liable or responsible. The Developer, or their successors and/or assigns, further agrees that the Developer, or their successors and/or assigns, shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this PD Agreement, or from responsibility under the indemnification clause contained herein by employment of independent contractors or subcontractors or other entities. The Developer, or their successors and/or assigns, shall remain liable to the City notwithstanding any attempt by the Developer, or their successors and/or assigns, to pass any responsibility stated herein to its contractor, subcontractor, or other agent or employee at all times during the existence of this PD Agreement.

9. The Developer, or their successors and/or assigns, shall pay all costs for the recording of this PD Agreement, the PD Master Plan, and Ordinance 26-XX.

10. The City may, in its sole discretion, withhold any and all inspections, permits, certificates, or approvals for the Project if such action is deemed necessary by the City to secure the Developer's, or their successors' and/or assigns', compliance with the terms of this PD Agreement, including all documents attached hereto or referenced herein.

11. Except as otherwise provided in this PD Agreement, any notice, request, or approval from any party to the other parties must be in writing and sent by certified mail, return receipt requested; overnight delivery with proof of delivery; or by personal delivery. Such notice shall be deemed to have been received when either deposited in the United States Postal Service mailbox, delivered by the United States Postal Service, delivered to the courier, or personally delivered with a signed proof of delivery. DRAFT

12. The Parties each bind the other and their respective successors and assigns in all respects to all of the terms, conditions, covenants, and provisions of this PD Agreement.

13. If any section, sentence, clause, phrase, or provision of this PD Agreement is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this PD Agreement, and the remainder of the PD Agreement after the exclusions of such part or parts shall be deemed to be valid.

14. The failure of any of the Parties to exercise any right in this PD Agreement shall not constitute a waiver of such right in the event of any future default or noncompliance with it.

15. This PD Agreement is entered into by the City pursuant to the City's home rule powers, including police powers, as set forth in the Florida Constitution and the laws of the State of Florida to regulate the development of land. The City and the Property Owners expressly acknowledge and agree that this PD Agreement constitutes a regulatory document, and nothing herein, expressed or implied, is intended or shall be construed as establishing a contract upon which a cause of action for breach, monetary damages, or otherwise may be based. Further, no term or condition of this PD Agreement shall be construed as to proscribe, limit, or affect the ability of the City to enforce its Comprehensive Plan, its Land Development Regulations, or any other authority granted by law with respect to the Project, and nothing herein, expressed or implied, contracts away any of the City's police powers, regulatory authority, and/or immunities.

16. The Parties may amend this PD Agreement only by mutual written agreement of the Parties and including the City Commission.

17. This PD Agreement shall not be construed more strictly against one party than against the other party merely by virtue of the fact that it may have been prepared by one of the Parties. It is recognized that all Parties have contributed to the preparation of this PD Agreement and have had the opportunity to consult with legal counsel before signing it.

18. The Property Owners agrees that the terms and requirements of this PD Agreement, PD Master Plan, and Ordinance 26-XX do not inordinately burden the Property described in Exhibit "A", the PD, or the Project.

19. This PD Agreement constitutes the entire agreement of the Parties and supersedes all prior written or oral agreements, understandings, or representations.

20. In the event of any question or dispute arising out of or related to this PD Agreement or action to interpret this PD Agreement, the Property Owners shall exhaust any and all administrative remedies under the City's Land Development Regulations. Thereafter, the Property Owners' remedies in filing a lawsuit shall be limited solely to an action for declaratory judgment. In no event shall the Property Owners, their successors or assigns, have any cause of action for monetary damages against the City for any question or dispute arising out of or related to this PD Agreement or any action to interpret this PD Agreement, and nothing herein, expressed or implied, waives or should be construed as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida.

21. This PD Agreement is governed in accordance with the laws of the State of Florida. Venue for any action arising out of or related to this PD Agreement shall be in the Circuit Court of Alachua County, Florida.

UTILITY PLAN GENERAL NOTES
1. POTABLE WATER: AN 8-INCH POTABLE WATER MAIN RUNS ALONG THE NW 188TH STREET RIGHT-OF-WAY. DIRECT CONNECTION IS ANTICIPATED.
2. SANITARY SEWER: AN 8-INCH SEWER FORCE MAIN AND LIFT STATION ARE LOCATED IMMEDIATELY NORTH EAST OF PROJECT SITE ALONG US HIGHWAY 441. CONNECTION TO THIS FACILITY IS PROPOSED.
3. STORMWATER MANAGEMENT FACILITIES: STORMWATER MANAGEMENT SHALL BE LOCATED ON-SITE AND SHALL BE DESIGNED AND PERMITTED WITH THE CITY OF ALACHUA AND THE SUWANNEE RIVER WATER MANAGEMENT DISTRICT ACCORDING TO ALL APPLICABLE STANDARDS.
4. PUBLIC FACILITIES IMPACT: CONCURRENCY RESERVATION WILL BE MADE AT TIME OF FINAL PD APPROVAL. PROJECT CALCULATIONS ARE PROVIDED IN THE PD JUSTIFICATION REPORT AS INDICATED BELOW TO DEMONSTRATE THAT SUFFICIENT CAPACITY EXISTS TO ACCOMMODATE THE PROPOSED PROJECT.
5. LOCATION OF ALL PROPOSED UTILITIES ARE CONCEPTUAL AND MAY BE ADJUSTED AS PART OF THE FULL ENGINEERING DESIGN OF THE PROJECT, INCLUDING LIFT STATION LOCATION, WHICH WILL BE DETERMINED AT THE TIME OF FINAL DESIGN AND BE COORDINATED WITH CITY OF ALACHUA PUBLIC SERVICES DEPARTMENT FOR MOST APPROPRIATE LOCATION BASED ON SITE CONDITIONS.

Alachua, Florida 32615

Review of Geotechnical Information
Farmlands Commercial PD Rezoning
Alachua, Alachua County, Florida
GSE Project No. 17335

GSE Engineering & Consulting, Inc. (GSE) has performed a review of geotechnical information/reports that was submitted as part of the rezoning application for the Farmlands Commercial PD located in Alachua, Florida. The remainder of this report summarizes our review.

Background Information

The site is located on the south side of U.S. Highway 441 approximately 0.5 miles west of the NW CR 235A intersection in Alachua, Florida. The site includes portions or all of Tax Parcels 03046-003-002, 03042-050-004, 03042-050-005, 03042-050-003, 03042-050-010 and 03042-051-001.

The site is proposed for commercial and residential development. You provided two geotechnical site exploration reports prepared by UES Professional Solutions (UES) that were included as part of the project application. You requested we review the reports to determine if the evaluations demonstrate the sites are suitable for single-story commercial buildings and single-family residential development, or if additional evaluation is appropriate/necessary.

Data Review

We were provided the following geotechnical engineering reports prepared by UES:

1. Preliminary Geotechnical Exploration Services, Proposed Alachua Commercial Center, US Hwy 441, Alachua, Alachua County, Florida. UES Project No. A25140.00683.005, Report No. 2160889 dated December 18, 2025 (Report 1).
2. Preliminary Geotechnical Exploration Services, Tax Parcels 03042-005/003 – US 441, Alachua, Alachua County, Florida. UES Project No. A25140.00683.005, Report No. 2162758 dated March 6, 2026 (Report 2).

GSE Engineering & Consulting, Inc.

www.gseengineering.com

The reports included soil borings and laboratory testing of soil samples considering typical commercial development. Report 1 included twenty-nine (29) Standard Penetration Test (SPT) soil borings advanced to depths ranging from 10 to 40 feet below existing land surface (bls) and accompanying laboratory testing that included sieve analysis, wash 200 tests, Atterberg Limits tests, hydraulic conductivity (permeability) tests, and Limerock Bearing Ratio tests. Report 2 included twenty-five (25) SPT borings advanced to depths of 20 to 25 feet bls along with accompanying laboratory testing that included sieve analysis, wash 200 tests, Atterberg Limits tests, organic content tests, hydraulic conductivity (permeability) tests, corrosion series tests, and Limerock Bearing Ratio tests. Test were also performed on topsoil type materials to evaluate their suitability for reuse and determine fertilizer recommendations.

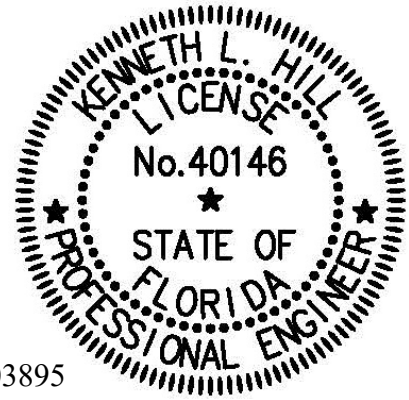
Both geotechnical explorations encountered sandy soil overlying clayey sand, sandy clay, and clay to the explored depths. Laboratory testing on representative soils indicates that some of the clays have a high risk for expansive characteristics. Limestone was encountered in one soil boring at a depth of 39.5 feet bls. Groundwater was generally not encountered within the depths explored or not determined due to the mud rotary method of advancing the boreholes.

Technical Analysis

The geotechnical explorations performed for this project indicate that generally soil conditions are suitable for the development of commercial and residential projects. The soil borings encountered expansive clays in some areas, but this is common in this area of Alachua County and the geotechnical engineer discusses methods for considering and mitigating the effects of the expansive soils on development and building elements.

The geotechnical engineer qualifies both reports as "*preliminary*" and states "***Due to the preliminary design stage of this project, building locations, structural loads, and grading information were unavailable. Therefore, it may be necessary to perform additional geotechnical services including additional test borings once the structure locations, stormwater management system, proposed grades, and structural loadings are available"***. Preliminary geotechnical explorations are generally intended to screen the site for suitability of the proposed development. Preliminary geotechnical explorations are not intended to be used for final design. The number of soil borings performed for the projects are not adequate for final design and additional soil borings should be performed.

The preliminary explorations did not include geophysical screening of the site for karst geological conditions. Sinkhole risk in Alachua County is mostly related to site elevation. Lower elevation sites in the Gulf Coastal Lowlands and Cody Scarp geological regions have a higher risk for sinkhole development than high elevation sites in the Northern Highlands geological region, and this is due to the separation between land surface and the limestone formation. Sinkholes most commonly develop in stormwater management facilities due to stormwater infiltration eroding soil into fractures and cavities in the limestone formation. Sinkhole risk is reduced in impervious areas, due to the absence of stormwater infiltration.



The site is located near the transition of the Cody Scarp to the Gulf Coastal Lowlands geology. The surface of the limestone formation in this area of Alachua is typically on the order of elevation 60 feet. The ground surface at the location of the stormwater management basin for these projects varies from about elevations 90 to 100 feet. If the basin is excavated 10 feet deep, the separation between the bottom of the basin and the limestone formation is expected to be on the order of 20 feet. We have observed multiple sinkholes develop in stormwater management facilities where the separation between the basin bottom and the limestone formation is on the order of 20 feet.

The City of Alachua has policies that allow for the requirement of geophysical screening in its sole discretion and has required this screening on some projects. GSE considers it prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design. The intent is to evaluate, determine, and consider the actual sinkhole potential risk in these areas. This information would then be considered and incorporated into the final design.

Closure

GSE appreciates this opportunity to provide these engineering services to you on this important matter. If you have any questions, or if we can provide any additional information, please contact us.

Sincerely,
GSE Engineering & Consulting, Inc.

RE: Notice of Hearing to be Scheduled for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On April 1, 2026, the City of Alachua received your revised small-scale Comprehensive Plan amendment and site-specific amendment to the Official Zoning Atlas applications for the Farmlands Commercial project. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been scheduled for the **April 21, 2026,** Planning & Zoning Board meeting.

You must provide two *double sided, three-hole punched, color sets* of **each complete** application package, seven full size sets of PD plans, and a digital copy of all materials in PDF format on a CD or by emailing a Cloud/FTP link to download the materials to planning@cityofalachua.org *no later than 10 business days prior to the Planning & Zoning Board meeting at which your application is scheduled to be heard*; therefore, the above referenced materials must be submitted to the City no later than ***Monday, April 6, 2026***. Materials may be submitted earlier than this date.

Additionally, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing; therefore, posted notice signs must be placed on the property no later than ***Monday, April 6, 2026***. These signs will be ready for pickup after 12:00 PM on Thursday, April 2, 2026. You will be notified again when the signs are available.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

Sincerely,

Carson J. Crockett, AICP

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On March 24, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting may be scheduled to review these comments by request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Tuesday, March 31, 2026**. A total of three copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Pursuant to Resolution 24-05, application fees include two (2) PAT reviews, and the reviews associated with each resubmittal to confirm that comments were addressed. **Please note, if an additional PAT review is required, a surcharge of 25% of the application fee will be assessed for the additional PAT review (original application fee - $12,500; 25% surcharge - $3,125).** You will be notified if an additional PAT review is required, and the surcharge must be paid prior to any further review of the application.

Notice, the Applicant has an outstanding fee of $3,125.00 that must be paid upon resubmittal, or review will not continue, per Resolution 24-05.

Address the following insufficiencies:

PSSC26-0002 - Farmlands Rezoning
Staff has no additional comments at this time, but reserves the right to provide additional comments at a later date.

PR26-0002 - Farmlands Rezoning

Remaining Deficiencies to be Addressed
** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Parking Master Plan**
   e. Note 2. The current bicycle parking requirement (assuming a full build-out scenario) would be approximately 148 spaces. A rate of 1 bicycle space per 10,000 square feet would yield a requirement of approximately 45 spaces (less than one-third of the current requirement). A rate of 1 bicycle space per 5,000 square feet may be more appropriate, with a minimum provision for structures under 10,000 square feet, if proper justification can be provided. Revise and provided justification.
   Response: The application has been revised to a rate of 1 bicycle parking space per 5,000 square feet may be more appropriate, with a minimum provision for structures under 10,000 square feet. Based on the business use types, bicycle access to/from the site will be adequately accommodated with parking placed conveniently near business entries and/or between tenants to promote clear access, parking, and visibility to the non-motorized means of travel.
   Remaining Deficiency: Add the following language to the end of General Note 17 on sheet P100: "A minimum of 2 bicycle parking spaces are required for structures under 10,000 square feet in gross floor area."
   h. The Development Standards Table does not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
      ii. Maximum Lot Coverage does not refer to FAR, but rather, impervious surface area. Revise to reflect this standard accordingly.
      Response: The note has been revise to reflect the impervious surface area ratio.
      Remaining Deficiency: Staff notes that a 17% impervious surface area ratio (ISR) seems constrained. Please confirm that this 17% ISR figure is correct.

3. **Miscellaneous**
   b. Remove all code alterations at the end of the justification report. If the deviation is not allowed by Table 3.6-3 and not noted on the PD Master Plan, it will not be incorporated into the PD. Justification as to the deviations can still be included in this report.
   Response: Acknowledged.
   Remaining Deficiency: The Applicant removed all previously proposed code alterations, but included a new one related to Section 6.5. As previously stated, if the deviation is not noted on the PD Master Plan, it will not be incorporated into the PD.

   Regarding the justification provided, the justification addresses what the deviation will accomplish, but not why it's necessary. Revise justification.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

Sincerely,

Carson J. Crockett, AICP

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On March 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting may be scheduled to review these comments by request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 24, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Pursuant to Resolution 24-05, application fees include two (2) PAT reviews, and the reviews associated with each resubmittal to confirm that comments were addressed. **Please note, if an additional PAT review is required, a surcharge of 25% of the site plan application fee will be assessed for the additional PAT review (original application fee - $12,500; 25% surcharge - $3,125).** You will be notified if an additional PAT review is required, and the surcharge must be paid prior to any further review of the application.

Address the following insufficiencies:

PSSC26-0002 - Farmlands Rezoning
Staff has no additional comments at this time, but reserves the right to provide additional comments at a later date.

PR26-0002 - Farmlands Rezoning

Remaining Deficiencies to be Addressed
** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

4. **Compliance with Land Development Regulations**
   a. Per Table 3.6-3, development standards shall only be modified in ways that are consistent with the general intent and purpose of the PD-COMM district. Every proposed modification must be justified in this light. No justification is provided.
      i. Generally, a modification should only be considered if the proposed modification is unachievable via existing administrative remedies.

      Response: In collaboration with City staff and mindful of staff recommendations, limited modifications have been presented on supplements development and design sheets. The site-specific development and design sheets retain consistency with the City of Alachua's Comprehensive Plan and overall vision, while permitting modest modifications to existing zoning performance standards to achieve a unique and cohesive mixed-use project design.

      Remaining Deficiency: Provide justification.

   c. Per Table 3.6-3, a master parking plan must be provided to modify any parking standards. Provide master parking plan as an additional sheet to the PD Master Plan.

      Response: A Master Parking and Circulation Plan has been provided as a supplement to the application materials. In collaboration with staff, the applicant has creatively and thoughtfully proposed a standard that is mindful of pedestrian-scale needs and places safety at the forefront of design.

      Remaining Deficiency: See Additional Deficiency comments related to Parking Master Plan.

   e. Section 6.4.4(A) already does not apply to architectural lighting. Architectural lighting is governed by Section 6.4.4(B)(4). Remove unnecessary modification.

      Response: None provided.

      Remaining Deficiency: Respond.

g. Section 6.8 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.

Response: Proposed modifications have been removed and a development and design plan sheet has been included in the resubmittal, which outlines achievable performance standards that are consistent with the City's Comprehensive Plan and overall community vision for vibrant walkable non-residential areas in proximity to a variety of housing options. These elements also are designed in a manner that promotes non-motorized access for all citizens.

Remaining Deficiency: See Additional Deficiency comments related to Master Architectural Building Plan.

5. **PD Master Plan**

d. Provide development standards, including minimum setbacks, maximum height, etc., for the PD-COMM area.

Response: The development and design plan sheet contains the requested standards. A note (#16) has been added to the PD Master Plan to indicated that development standards for the PD-COMM area will be found on the separate Parking & Circulation Master Plan sheet.

Remaining Deficiency: Development Standards for the PD-COMM should be included on the PD Master Plan, not on the Parking Master Plan. Provide.

Note 16 references three Parking Master Plan sheets, of which there are only two. Revise.

f. Note 4 refers to a typical roadway section that has not been provided. Provide for review or remove note.

Response: Note #4 is proposed to remain and the requested cross sections can be found; 1) PD-R cross sections on Sheet P200, and 2) PD-COMM cross sections on the separate Parking & Circulation Master Plan sheet.

Remaining Deficiency: See Additional Deficiency comments related to Parking Master Plan.

7. **Miscellaneous**

a. In furtherance of Objective 1.4, Conservation & Open Space Element, among others, and the City's Strategic Plan, Staff proposes a multi-use trail dedication that aligns with the former seaboard airline right-of-way.

Response: The applicant has received Preliminary Plat and Construction Plan approval for the portion of the project referenced above. A trail dedication would be a design conflict with the previous and existing City approvals.

Remaining Deficiency: Staff notes that he Preliminary Plat will need amended to reflect all amendments to the PD; therefore, the Applicant's response regarding previous approval without a trail is moot. Further, the trail could be located within the 20' southern landscape buffer, not affecting lot lines and not resulting in any reduction in lots. Staff will work with the Applicant to ensure that this inclusion does not impede the construction of phase 1 as otherwise previously approved, understanding that grading may need slightly adjusted to account for an 8-foot-wide trail.

Additional Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Parking Master Plan**
   a. Sheet 1 of 2 does not depict the approximate location of the emergency access drive to the residential site on NW 188th Street. Revise.
   b. Sheet 1 of 2. Revise to show development areas as shown on the PD Master Plan (A, B, and C).
   c. Note 1. Revise "Landscape islands are required every 8th single row with a 5' sidewalk" to state "Landscape islands/spines are required every 4th single row with a 5' sidewalk."
      i. Staff is amenable to the following alternative language, provided that increased width and landscape areas are provided. "At a minimum, 12' wide landscape islands/spines are required with a 6' sidewalk such that in no case will a pedestrian be required to cross more than one drive aisle to access a landscape island/spine with a 6' sidewalk."
   d. Note 1. Revise "All parking will be impervious to "Required off-street parking spaces must, at a minimum, be surfaced with structurally adequate asphaltic concrete or concrete surface course. Any off-street parking spaces provided in excess of the minimum requirement may be of an alternative surface material in accordance with Section 6.1.3(E) of the LDRs.
   e. Note 2. The current bicycle parking requirement (assuming a full build-out scenario) would be approximately 148 spaces. A rate of 1 bicycle space per 10,000 square feet would yield a requirement of approximately 45 spaces (less than one-third of the current requirement). A rate of 1 bicycle space per 5,000 square feet may be more appropriate, with a minimum provision for structures under 10,000 square feet, if proper justification can be provided. Revise and provided justification.
   f. Note 4. Does not exist. Renumber notes accordingly
   g. Notes 5-7 do not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
   h. The Development Standards Table does not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
      i. Further, the development areas should be consistent with those shown on the PD Master Plan (A, B, and C).
      ii. Maximum Lot Coverage does not refer to FAR, but rather, impervious surface area. Revise to reflect this standard accordingly.
   i. Driveway Cross Sections. Staff notes 14' and 15' wearing surfaces (per lane) are excessive and can contribute to irresponsible driver behavior. The City only requires 12' wearing surfaces per lane. Additionally, unnecessary lane width will further restrict planting of required landscape materials. Revise, reducing the land width on all driveway cross sections to 12' wearing surfaces.
   j. Sheet 2 of 2. The location of bicycle parking is governed by general note 2 on sheet 1. Remove bicycle parking locations from sheet 2 to reduce possible confusion.
   k. Sheet 2 of 2. Extend the eastern future access stub to the property line.
   l. Sheet 2 of 2. Include the approximate location of the multi-modal connection to the PD-R.

2. **Master Architectural Building Plan**
   a. As previously commented and discussed, only additional requirements to those in Section 6.8 are permitted to be included as part of the PD Master Plan. No deviation of a requirement in Section 6.8 that reduces such requirement is permitted. Staff noted the Master Architectural Building Plan currently does not comply with Section 6.8. Revise or remove from PD Master Plan.
3. **Miscellaneous**
   a. Some future land use maps appear to be older versions of the companion application. Check all future land use maps to ensure they are up to date.
   b. Remove all code alterations at the end of the justification report. If the deviation is not allowed by Table 3.6-3 and not noted on the PD Master Plan, it will not be incorporated into the PD. Justification as to the deviations can still be included in this report.
   c. The applicant is put on notice that, for consistency with Policy 5.1.a of the Community Facilities Element, further geologic testing will be required to be conducted, with the results submitted at time of final PD plan application.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

Sincerely,

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On February 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting is scheduled for **1:30 PM on February 17, 2026** to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 18, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Address the following insufficiencies:

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

PSSC26-0002 – Farmlands SSCPA

1. Needs Analysis
   a. While a needs analysis cannot rely solely on population projections, population projections should still be a factor as Florida Statute still requires a minimum amount of lands for a 10 year planning period be provided in the City. Population projections are available in the City's comp plan. Provide such analysis.
   b. Tables use "UPA" for unit per acre. Please use industry acronym "DUA" for dwelling units per acre. This is also how the City's Comprehensive Plan and Land Development Regulations refer to the standard.
   c. The submitted needs analysis does not consider the highest and best use of the property, which includes residential development as part of a mixed-use development. The development scenario for public facilities impact need not posit residential in the commercial land use, but the needs analysis should.
2. Urban Sprawl Analysis
   a. Staff noted only the 13 primary indicators of urban sprawl were evaluated in full. All eight urban form criteria must be analyzed. Revise analysis and include the eight urban form criteria.
   b. This application does not meet the definition of Infill Development established in the City's Comprehensive Plan, and as such, justification stating it is infill development is not proper justification. Revise response to primary indicator ten.
3. Comprehensive Plan Consistency Analysis
   a. Address Policy 1.3.f of the Future Land Use Element, specifically as it relates to the extension of commercial into residential areas.
   b. Objective 5.1 of the Future Land Use Element states that the City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during the review of proposed amendments to the Future Land Use Map. The response provided states this analysis will occur at a later date. Revise response. The proper analysis must occur at time of Future Land Use Map amendment.
   c. In response to Policy 5.2.a, Future Land Use Element, the Applicant states the land use change will not impact the level of service. In response to Objective 1.1, Transportation Element, the Applicant states the land use will impact the level of service. Ensure all responses are consistent. Revise.
   d. In response to Objective 1.8, Conservation & Open Space Element, the Applicant notes that the "mixed-use development is proposed with residential and commercial uses in nature." Staff is unclear on what this analysis means. Revise and clarify.
   e. The Applicant's response to Objective 1.9, Conservation & Open Space Element, is not relevant to this application. Revise or remove.
   f. The proposed amendment includes residential lands. As such, provide an analysis of the Housing Element, and if relevant, the Recreation Element and Public Schools Element.

4. Concurrency Impact Analysis
    a. The Applicant is put on notice that, consistent with the submitted TIA recommendations, a more detailed analysis will be required to address potential impacts of specific development proposals at time of development of the site. These must include ways to address the level of service of segment 6.
5. Outside Review
    a. Comments from City of Alachua Public Services will be provided at a later date and forwarded as soon as received by the Planning & Community Development Department.
6. Miscellaneous
    a. Staff notes that a Commercial land use category abutting the Low Density Residential land use category is not a logical development pattern and does not provide a transition of the higher intensity use area of up to 0.6 FAR and 15 DUA to the lower intensity use area of just one DUA. Staff recommends either a Community Commercial land use category or a Moderate Density Residential land use category be used as a transitionary land use category between the two use areas. This would also be more similar to the established development pattern of the US 441 Corporate Corridor Activity Center.

PR26-0002 - Farmlands Rezoning

1. Statement of Proposed Change/Existing vs. Proposed Zoning
    a. The summary of change in development potential should consider both FAR and DUA for the business zone districts as the CC and CI districts are mixed-use districts.
    b. Tables use "UPA" for unit per acre. Please use industry acronym "DUA" for dwelling units per acre. This is also how the City's Comprehensive Plan and Land Development Regulations refer to the standard.
2. Comprehensive Plan Consistency Analysis
    a. In response to Policy 5.1.b, Future Land Use Element, the Applicant notes five soil types and six soil types are present on site. Revise to be consistent.
    b. In response to Policy 5.2.a, Future Land Use Element, and Objective 1.1, Transportation Element, the Applicant states the land use will not impact the level of service. The associated TIA suggests a negative impact is possible. Revise and clarify.
    c. In response to Objective 1.8, Conservation & Open Space Element, the Applicant notes that the "mixed-use development is proposed with residential and commercial uses in nature." Staff is unclear on what this analysis means. Revise and clarify.
    d. The Applicant's response to Objective 1.9, Conservation & Open Space Element, is not relevant to this application. Revise or remove.
    e. The proposed amendment includes residential lands. As such, provide an analysis of the Housing Element, and if relevant, the Recreation Element and Public Schools Element.
3. Concurrency Impact Analysis
    a. The Applicant is put on notice that, consistent with the submitted TIA recommendations, a more detailed analysis will be required to address potential impacts of specific development proposals at time of development of the site. These must include ways to address the level of service of segment 6.

4. **Compliance with Land Development Regulations**
   a. Per Table 3.6-3, development standards shall only be modified in ways that are consistent with the general intent and purpose of the PD-COMM district. Every proposed modification must be justified in this light. No justification is provided.
      i. Generally, a modification should only be considered if the proposed modification is unachievable via existing administrative remedies.
   b. Article 4 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.
   c. Per Table 3.6-3, a master parking plan must be provided to modify any parking standards. Provide master parking plan as an additional sheet to the PD Master Plan.
      i. Modifying the standard from one bicycle space per ten off-street parking spaces to one per 40 off-street parking spaces is a four-fold reduction. One per 80 off-street parking spaces is an even greater reduction. The PD-COMM shows pedestrian and bicycle connections to the residential area, and per conversations with FDOT, a multi-use trail will be required along US 441. There is no clear justification as to why a reduction of this degree, with a maximum of only ten bicycle spaces site wide, would be necessary. Staff does not support the modification as proposed.
      ii. No clear justification has been provided to modify Section 6.1.8(B)(3). Staff does not support such change as proposed.
      iii. The purpose of Section 6.1.10 is to ensure that a pedestrian has to cross no more than one drive aisle before reaching a dedicated pedestrian facility. Modifying the standard as proposed would result in pedestrians having to cross two drive aisles and potentially have the pedestrian forgo walking on the pedestrian facility altogether. No clear justification has been provided to modify Section 6.1.10. Staff does not support the change as proposed.
   d. Per Table 3.6-3, an alternative landscape plan must be provided to modify any landscape standards. Provide an alternative landscape plan as an additional sheet to the PD Master Plan.
      i. No clear justification has been provided to modify Section 6.2.2(D)(2)(b) or Section 6.2.2(D)(3). Staff does not support the modification as proposed.
   e. Section 6.4.4(A) already does not apply to architectural lighting. Architectural lighting is governed by Section 6.4.4(B)(4). Remove unnecessary modification.
   f. Per Table 3.6-3, a master sign plan must be provided to modify any signage standards. Provide a master sign plan as an additional sheet to the PD Master Plan.
      i. Staff notes that any change to a sign standard must have a compelling justification in conformance with both the PD-COMM district and the general purposes of Section 6.5. No clear justification has been provided. Staff does not support the proposed modification as proposed.
   g. Section 6.8 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.

5. **PD Master Plan**
   a. Show at least one designated bicycle and pedestrian facility from the eastern most portion of Area B to Area A. Exact location is not necessary, only that there will be a connection.
   b. Provide DUA figures in the Land Use Data Table.
   c. The Land Use Data Table note states "land use areas are approximate and may be adjusted." Revise to note that they cannot be adjusted limitlessly.
   d. Provide development standards, including minimum setbacks, maximum height, etc., for the PD-COMM area.
   e. Note three only references PD-R. Revise to include PD-COMM.
   f. Note 4 refers to a typical roadway section that has not been provided. Provide for review or remove note.
   g. Note 13 should require a 20' easement with a 10' sidewalk. Revise.
   h. The City will not permit any private signage in a public-right-of-way. Remove or revise Note 16.
6. **Outside Review**
   a. Comments from City of Alachua Public Services will be provided at a later date and forwarded as soon as received by the Planning & Community Development Department.
7. **Miscellaneous**
   a. In furtherance of Objective 1.4, Conservation & Open Space Element, among others, and the City's Strategic Plan, Staff proposes a multi-use trail dedication that aligns with the former seaboard airline right-of-way.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

- [ ] Final
- [ ] Revised
- [ ] Staff Administrative Review

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

RE: Completeness Review for Farmlands Commercial Small-Scale Comprehensive Plan Amendment (SSCPA) and Amendment to the Official Zoning Atlas (Rezoning)

Dear Clay Sweger & Gerry Dedenbach,

On February 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that **the applications are now complete**.

An in-depth review of the content of the applications will now be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be sent under separate cover.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

RE: Completeness Review for Farmlands Commercial Small-Scale Comprehensive Plan Amendment (SSCPA) and Amendment to the Official Zoning Atlas (Rezoning)

Dear Clay Sweger & Gerry Dedenbach,

On January 26, 2026, the City of Alachua received your applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

According to Section 2.2.6 of the City's Land Development Regulations, a completeness review shall be conducted upon receipt of the applications to determine that the applications contain all the necessary information and materials, are in proper form and of sufficient detail, and are accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned applications for completeness and finds that **the applications are incomplete**. The following deficiencies must be addressed to begin review of the applications. The deficiencies must be addressed no later than **5:00 PM on Thursday, February 5, 2026** to remain on the April Planning & Zoning Board review schedule.

In accordance with Section 2.2.6(B) of the City's Land Development Regulations, the applicant must correct the deficiencies and resubmit the application for completeness determination. *Plans and application materials may be made available for return in order to revise and resubmit as needed.*

The time frame and cycle for review shall be based upon the date the applications are determined to be complete. If the applicant fails to respond to the identified deficiencies within 45 calendar days, the applications shall be considered withdrawn (*, 2025*).

Please note that if an additional completeness review is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the applications.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the content of the application will be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be scheduled after the application is determined to be complete.

PSSC26-0002 - Farmlands SSCPA

1. **Submission Requirement, Electronic Materials** – Per the City's submission requirements, in addition to three printed copies, all materials must be submitted in digital (PDF) format: on a CD or by emailing a cloud/FTP link. Only some electronic materials were received electronically. Provide all materials electronically.

2. **Application Attachment #11, Proof of Payment of Taxes** – Proof of payment of taxes was submitted up through the year 2024. Provide proof of payment of taxes for 2025.

PR26-0002 - Farmlands Rezoning

1. **Submission Requirement, Electronic Materials** – Per the City's submission requirements, in addition to three printed copies, all materials must be submitted in digital (PDF) format: on a CD or by emailing a cloud/FTP link. Only some electronic materials were received electronically. Provide all materials electronically.

2. **Application Attachment #11, Proof of Payment of Taxes** – Proof of payment of taxes was submitted up through the year 2024. Provide proof of payment of taxes for 2025.

City of Alachua
Planning & Community Development Department
Staff Report

Planning & Zoning Board Hearing Date: April 21, 2026
Legislative Hearing **Application #: PSSC26-0001**

SUBJECT:	A request to amend the City of Alachua Comprehensive Plan Future Land Use Map designation from Low Density Residential (± 20.32-acres), Moderate Density Residential (± 19.36-acres), and Community Commercial (± 7.00-acres) to Moderate Density Residential (± 6.37-acres), Community Commercial (± 10.20-acres), and Commercial (± 30.11-acres) on the subject property.
APPLICANT/AGENT:	eda consultants, inc. NV5, Inc.
PROPERTY OWNER:	JTFA LLC
LOCATION:	Generally located at 16650 NW US Highway 441.
PARCEL ID NUMBER:	03042-050-004; 03042-050-005 (portion thereof); 03046-003-000 (portion thereof)
FLUM DESIGNATION:	Low Density Residential; Moderate Density Residential; Community Commercial
ZONING:	Planned Development – Residential (PD-R); Community Commercial (CC)
OVERLAY:	N/A
ACREAGE:	± 46.68
PROJECT PLANNER:	Carson J. Crockett, AICP
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board find the small-scale Comprehensive Plan amendment for JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and transmit such finding to the City Commission with a recommendation to approve.
RECOMMENDED MOTION:	*I move that, based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a small-scale Comprehensive Plan amendment for JTFA LLC to be consistent with the City of Alachua Comprehensive Plan and transmit such finding to the City Commission with a recommendation to approve.*

SUMMARY

This application is a request by eda consultants, inc. (Agent) and NV5, Inc. (Agent), together as the Applicant on behalf of JTFA LLC (Property Owner) for consideration of an amendment to the City of Alachua Future Land Use Map (FLUM). The proposed amendment would change the future land use designation from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential, Community Commercial, and Commercial on a ± 46.70-acre subject property.

The subject property is generally located at 16650 NW US Highway 441 (tax parcels 03042-050-004; 03042-050-005 (portion thereof); 03046-003-000 (portion thereof)).

The Applicant has submitted a companion application for a site-specific amendment to the Official Zoning Atlas (rezoning), which proposes to amend the zoning of the subject property from Planned Development – Residential (PD-R) and Community Commercial (CC) to PD-R and Planned Development – Commercial (PD-COMM).

Existing Future Land Use Map Designations

Policy 1.2.a of the City of Alachua Comprehensive Plan, Future Land Use Element establishes the Low Density Residential land use category which acts as "a transition between rural residential/agricultural areas and the urban areas within the City." Development is limited to one dwelling unit per acre and is typically comprised of single-family detached dwelling units.

The Moderate Density Residential land use category is established by Policy 1.2.b of the City of Alachua Comprehensive Plan, Future Land Use Element. Development is limited to four dwelling units per acre and is primarily comprised of single-family detached dwelling units; however, townhomes and duplexes are also permitted uses.

Policy 1.3.a of the City of Alachua Comprehensive Plan, Future Land Use Element establishes the Community Commercial land use category, which is established to "provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock." Typical uses are primarily commercial in nature; however, limited residential uses are permitted. Development is limited to a floor area ratio of 0.6 for parcels 5-acres or greater in size and 15 dwelling units per acre.

Table 1. Summary of Existing FLUM Designations

Summary of Existing FLUM Designations	
FLUM Designation:	Low Density Residential; Moderate Density Residential; Community Commercial

Table 1. Summary of Existing FLUM Designations (Continued)

Max Gross Density:	Low Density Residential	20 dwelling units (1 DUA)
	Moderate Density Residential	77 dwelling units (4 DUA)
	Community Commercial	105 dwelling units (15 DUA*)
	TOTAL	202 dwelling units (± 4.33 DUA)
Max Floor Area:	Low Density Residential	N/A
	Moderate Density Residential	N/A
	Community Commercial	± 182,952 square feet (0.60 FAR*)
	TOTAL	± 182,952 square feet (0.09 FAR)
Typical Uses: (For a full and comprehensive list, refer to the City of Alachua Comprehensive Plan, Future Land Use Element)	Low Density Residential	▪ Single family detached dwelling units; ▪ Accessory dwelling units; ▪ Manufactured or modular homes meeting certain design criteria; ▪ Residential Planned Developments; and, ▪ Supporting community services.
	Moderate Density Residential	▪ Single family detached dwelling units; ▪ Accessory dwelling units; ▪ Manufactured or modular homes meeting certain design criteria; ▪ Mobile homes only within mobile home parks; ▪ Duplexes and quadplexes; ▪ Townhomes; ▪ Residential Planned Developments; and, ▪ Supporting community services.
	Community Commercial	▪ Neighborhood commercial establishments; ▪ Residential/offices and live-work units; ▪ Personal services; ▪ Financial institutions; ▪ Retail sales and services that serve the community; ▪ Eating establishments; ▪ Indoor recreation/entertainment; ▪ Single-family and multi-family above first floor commercial uses; ▪ Visitor accommodations; ▪ Supporting community services; ▪ Traditional Neighborhood Planned Developments; ▪ Single family attached units; ▪ Apartments and townhomes; and, ▪ Duplexes and quadplexes.
*Density and intensity calculations were completed using the highest densities and intensities permitted in the Commercial land use category; however, the highest densities and intensities are associated with mixed-use development. Non-mixed-use development would have a lower theoretical development potential.		

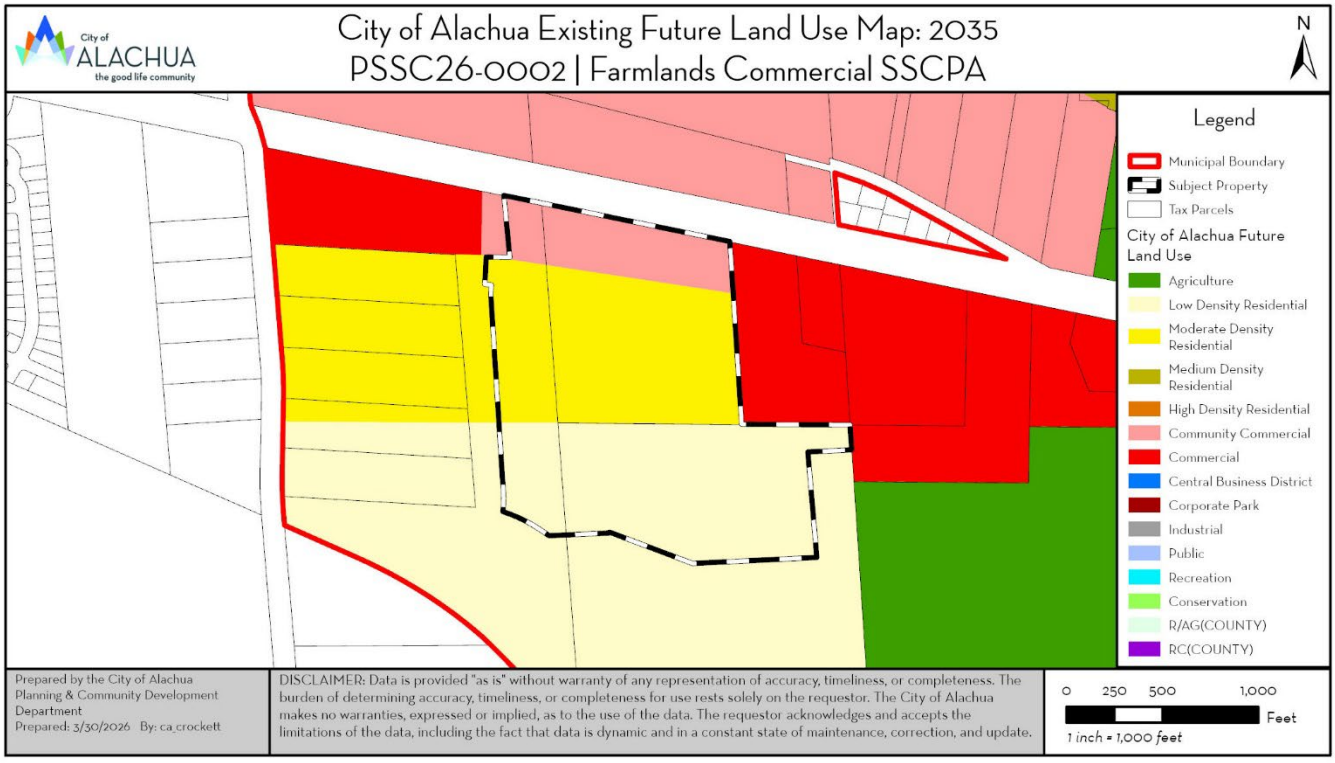

Figure 1. Existing Future Land Use Map with Subject Property

Proposed Future Land Use Map Designations

The proposed amendment would retain some Moderate Density Residential and Community Commercial land use categories on the subject property. The remaining portion would be amended to the Commercial land use category, which is established by Policy 1.3.b of the City of Alachua Comprehensive Plan, Future Land Use Element.

The Commercial land use category provides "for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate." Typical uses are primarily commercial in nature, including regional commercial uses and auto-oriented uses; however, limited residential uses are permitted. Development is limited to a floor area ratio of 0.6 for parcels 5-acres or greater in size and 15 dwelling units per acre.

Table 2. Summary of Proposed FLUM Designations

Summary of Proposed FLUM Designations	
FLUM Designation:	Moderate Density Residential; Community Commercial; Commercial

Table 2. Summary of Proposed FLUM Designations (Continued)

Max Gross Density:	Moderate Density Residential	25 dwelling units (4 DUA)
	Community Commercial	153 dwelling units (15 DUA*)
	Commercial	451 dwelling units (15 DUA)
	TOTAL	629 dwelling units (± 13.47 DUA)
Max Floor Area:	Moderate Density Residential	N/A
	Community Commercial	± 266,587 square feet (0.60 FAR*)
	Commercial	± 786,955 square feet (0.60 FAR*)
	TOTAL	± 1,053,542 square feet (0.52 FAR)
Typical Uses: (For a full and comprehensive list, refer to the City of Alachua Comprehensive Plan, Future Land Use Element)	Moderate Density Residential	▪ Single family detached dwelling units; ▪ Accessory dwelling units; ▪ Manufactured or modular homes meeting certain design criteria; ▪ Mobile homes only within mobile home parks; ▪ Duplexes and quadplexes; ▪ Townhomes; ▪ Residential Planned Developments; and, ▪ Supporting community services.
	Community Commercial	▪ Neighborhood commercial establishments; ▪ Residential/offices and live-work units; ▪ Personal services; ▪ Financial institutions; ▪ Retail sales and services that serve the community; ▪ Eating establishments; ▪ Indoor recreation/entertainment; ▪ Single-family and multi-family above first floor commercial uses; ▪ Visitor accommodations; ▪ Supporting community services; ▪ Traditional Neighborhood Planned Developments; ▪ Single family attached units; ▪ Apartments and townhomes; and, ▪ Duplexes and quadplexes.
	Commercial	▪ Retail sales and services; ▪ Personal services; ▪ Financial institutions; ▪ Recreation and entertainment; ▪ Tourist-related uses; ▪ Visitor accommodations; ▪ Commercial shopping centers; ▪ Auto-oriented uses; ▪ Traditional Neighborhood Planned Developments; ▪ Employment Center Planned Developments; ▪ Commercial recreation centers; ▪ Office/business parks; ▪ Limited industrial services;

Table 2. Summary of Proposed FLUM Designations (Continued)

		▪ Eating establishments; ▪ Single family attached units; ▪ Apartments and townhomes; ▪ Duplexes and quadplexes; ▪ Single-family and multi-family residential above first floor commercial uses; ▪ Convention centers; and, ▪ Supporting community services.
Net Increase/ Decrease	*+ 427 dwelling units* *+ 870,590 square feet non-residential floor area*	
*Density and intensity calculations were completed using the highest densities and intensities permitted in the Commercial land use category; however, the highest densities and intensities are associated with mixed-use development. Non-mixed-use development would have a lower theoretical development potential.		

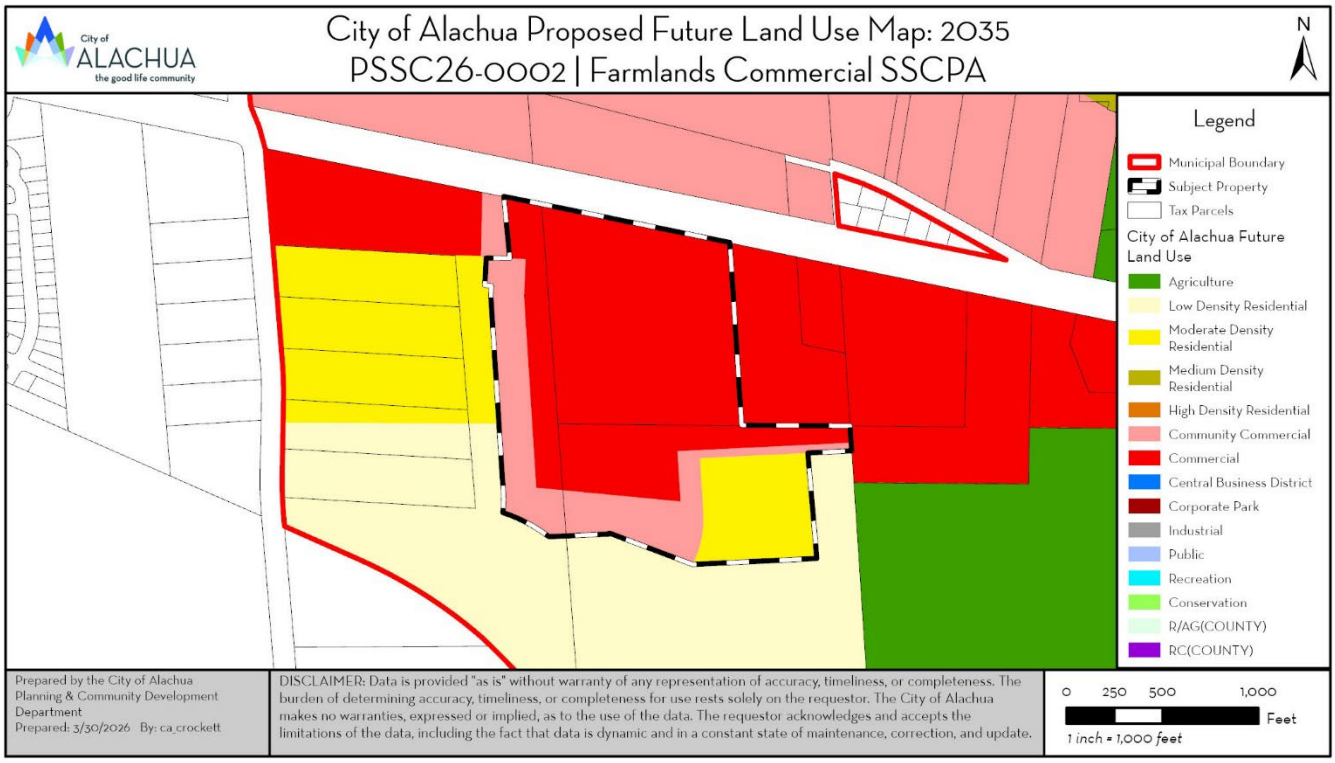

Figure 2. Proposed Future Land Use Map with Subject Property

EXISTING USES

The subject property is undeveloped and has been historically used for silviculture; however, the subject property is part of a previously approved PD-R.

SURROUNDING USES

The existing uses, Future Land Use Map (FLUM) designations, and zoning districts of the surrounding area are identified in Table 3. Figure 3 provides an overview of the vicinity of the subject property. (NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. The information below is not intended to be all-inclusive, and may not identify all existing uses, FLUM designations, and/or zoning districts surrounding the subject property.)

Table 3. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Agriculture, Vacant Commercial	Community Commercial	Planned Development – Commercial (PD-COMM)
South	Silviculture, Vacant Residential	Low Density Residential	Planned Development – Residential (PD-R)
East	Agriculture, Repair and Servicing	Agriculture, Commercial	Agricultural (A); Commercial Intensive (CI)
West	Silviculture, Vacant Residential, Vacant Commercial	Low Density Residential, Moderate Density Residential, Commercial	Planned Development – Residential (PD-R); Commercial Intensive (CI)

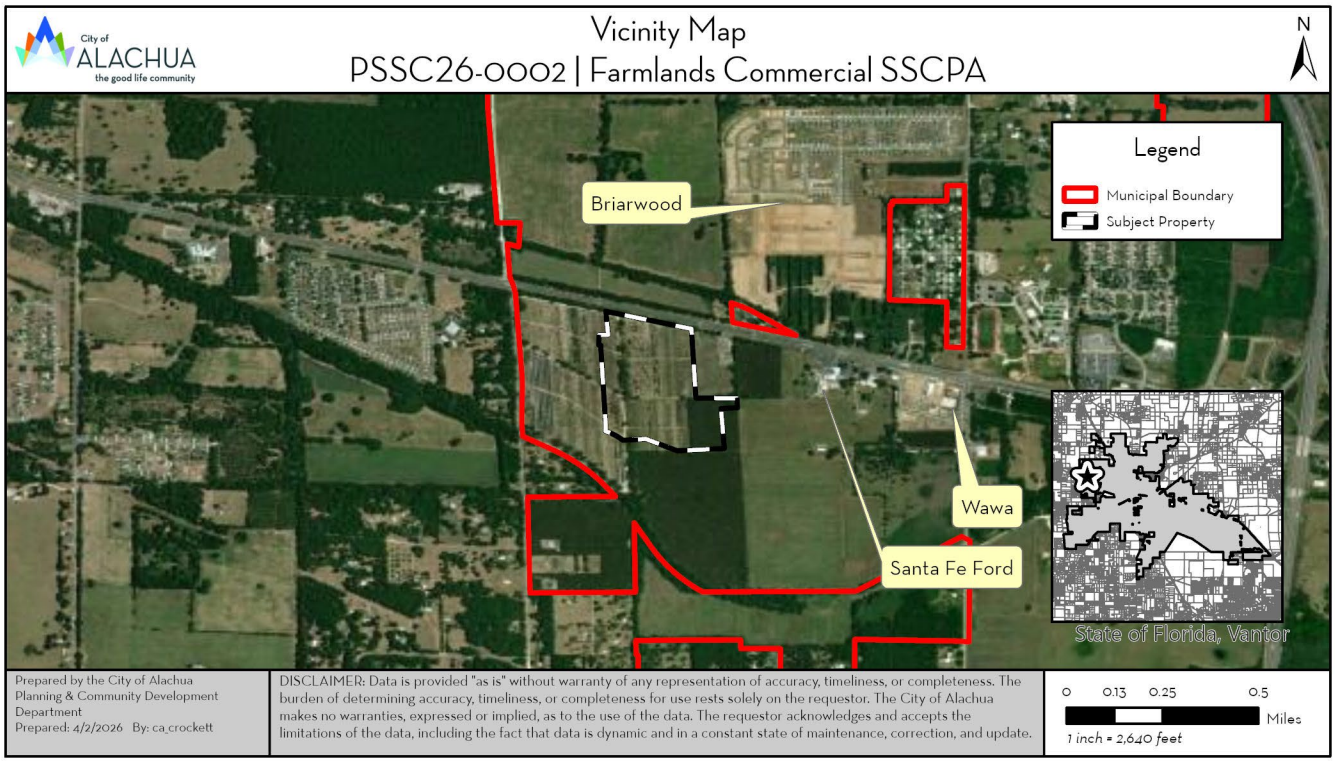

Figure 3. Vicinity Map

NEIGHBORHOOD MEETING

The purpose of a neighborhood meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. Neighborhood meetings are not required for small-scale Comprehensive Plan amendment applications; however, two neighborhood meetings were held regarding the companion site-specific amendment to the Official Zoning Atlas.

A neighborhood meeting was held on September 24, 2025, and October 22, 2025, at Legacy Park. As required by Section 2.2.4 of the City's Land Development Regulations, all property owners within 400 feet of the subject property were notified and notice of the meeting was published in a newspaper of general circulation. The applicant was available to answer questions. Materials submitted by the applicant indicate that the meetings were attended by 16 members of the public in total.

Neighborhood meeting summaries submitted by the Applicant are available in the application materials.

NEEDS ANALYSIS

Chapter 163.3177(6)(a)4., Florida Statues, requires the future land use element of a comprehensive plan to provide a balance of uses that foster vibrant, viable communities and economic development opportunities and address outdated development patterns, such as antiquated subdivisions. The amount of land designated for future land uses should allow the operation of real estate markets to provide adequate choices for permanent and seasonal residents and business and may not be limited solely by the projected population. The element shall accommodate at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year planning period unless otherwise limited under s. 380.05, including related rules of the Administration Commission.

The population of the City of Alachua is currently an estimated 11,296 persons, according to the University of Florida Bureau of Economic and Business Research. The City's Comprehensive Plan has established a population projection of 17,464 persons by the year 2035. The Applicant did provide an analysis demonstrating that the proposed amendment would not adversely impact the amount of land needed for a minimum 10-year planning period.

The Applicant submitted a needs analysis, which is included in the application materials. The Applicant contends the "developed nature and urban character of the US 441 corridor within the City of Alachua indicates this area is continuing its urbanizing form and there is a need for additional commercial and residential options in the City and for residents in the context area and proximate cities of High Springs and Newberry."

URBAN SPRAWL ANALYSIS

Section 163.3177, Florida Statutes, requires any amendment to the Future Land Use Element to discourage the proliferation of urban sprawl. Section 163.3177(6)(a)9.a., Florida Statutes, identifies 13 primary urban sprawl indicators and states that, "[t]he evaluation of the presence of these indicators shall consist of an analysis of the plan or plan amendment within the context of features and characteristics unique to each locality..."

An evaluation of each primary indicator is provided below.

(I) Promotes, allows, or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.

Evaluation & Findings: The proposed amendment includes multiple future land use categories that range in density and intensity and range in allowable uses, providing for a mix of allowable uses on the subject property.

(II) Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.

Evaluation & Findings: The subject property is already designated with urban and urban-transitional future land use categories and is adjacent to other urban land use categories.

(III) Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

Evaluation & Findings: The proposed amendment is consistent with surrounding future land use categories, ensuring isolated and radial development patterns do not occur. The proposed Commercial land use area reduces the existing potential of strip or ribbon patterns by better incorporating the area into the adjacent Moderate Density Residential and Low Density Residential land use areas with a transitionary Community Commercial land use area.

(IV) Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

Evaluation & Findings: No environmentally sensitive features are known to exist on the subject property. The subject property is located in an identified area of high aquifer recharge potential. The Applicant has provided a preliminary geotechnical evaluation to demonstrate the general suitability of the site for the proposed land use categories. Further, detailed evaluation will be required as part of the review of any final development order. This will allow the detailed evaluation to be tailored to the specific type of development in question at time of review.

(V) Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The subject property is adjacent to active silviculture activities; however, both the subject property and adjacent property are already designated with urban and urban-transitional future land use categories. The Applicant contends that the silviculture activities will be relocated by the property owner to another property in the general region.

(VI) Fails to maximize use of existing public facilities and services.

Evaluation & Findings: The subject property exists within the City of Alachua's Community Potable Water Service Area and Community Wastewater Service Area and any development will be required to connect to the respective public facilities as required by the Comprehensive Plan. Connections to public facilities will be the responsibility of the developer of the subject property at time of development.

(VII) Fails to maximize use of future public facilities and services.

Evaluation & Findings: The subject property exists within the City of Alachua's Community Potable Water Service Area and Community Wastewater Service Area and any development will be required to connect to the respective public facilities as required by the Comprehensive Plan. Connections to public facilities will be the responsibility of the developer of the subject property at time of development. Additionally, the subject property exists within the Alachua West Water Distribution Infrastructure Improvement Area.

(VIII) Allows for land use patterns or timing which disproportionately increase the cost in time, money, and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

Evaluation & Findings: The subject property already has urban future land use categories on the site, which are of lower density and intensity. The proposed amendment, increasing density and intensity, would actually be anticipated to decrease the cost in time, money, and energy of public facility and service provision and maintenance as more users in a concentrated area means less cost to furnish facilities and services per user.

(IX) Fails to provide a clear separation between rural and urban uses.

Evaluation & Findings: The proposed amendment maintains a transition of the most intense land use category of Commercial along US Highway 441, stepping down in intensity to Community Commercial and Moderate Density Residential on the subject property. The proposed Moderate Density Residential category also abuts Low Density Residential on the property adjacent to the south. Policy 1.2.a of the Comprehensive Plan, Future Land Use Element describes Low Density Residential as "a transition between rural residential / agricultural areas and the urban areas within the City." As such, the proposed amendment establishes a logical development pattern and maintains a clear separation between rural and urban uses.

(X) Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

Evaluation & Findings: Typical developments in the Commercial land use category would not be development well-suited for infill development as larger scale, regionally facing, and highway-oriented uses are permitted in the Commercial land use category. As such, the proposed amendment including a Commercial land use area would not discourage or inhibit infill development elsewhere in existing neighborhoods and communities where larger scale, regionally facing, and highway-oriented uses are not appropriate.

(XI) Fails to encourage a functional mix of uses.

Evaluation & Findings: The Commercial and Community Commercial land use categories are mixed-use land use categories and permit for a wide array of regionally and locally facing non-residential uses with a limited amount of residential uses. The Moderate Density Residential portion augments the limited amount of residential uses permitted in the Commercial and Community Commercial land use areas, resulting in a functional mix of permitted uses across the subject property.

(XII) Results in poor accessibility among linked or related land uses.

Evaluation & Findings: The proposed amendment is generally linked with related land uses. The Commercial land use category is located along US Highway 441 and connects two existing Commercial land use areas. The Community Commercial land use category is located as a transitionary category as established by Policy 1.3.a of the Comprehensive Plan, Future Land Use Element. "The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories." The Moderate Density Residential land use category is located adjacent to existing residential land use areas. Ultimately, the proposed amendment results in a logical development pattern that will encourage accessibility between the related land uses, including a functional mix of residential and non-residential uses.

(XIII) Results in the loss of significant amounts of functional open space.

Evaluation & Findings: The subject property is in private ownership, is not open to the public, and does not serve as functional open space.

Urban Form Criteria

In addition to the preceding urban sprawl indicators, Chapter 163.3177 also establishes eight "Urban Form" criteria. An amendment to the Future Land Use Map is presumed to not be considered urban sprawl if it meets four of the eight urban form criteria. These urban form criteria, and an evaluation of each as each may relate to this application, are provided below.

The applicant has also provided an analysis of the application's consistency with Chapter 163.3177 within the application materials.

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

Evaluation & Findings: No environmentally sensitive features are known to exist on the subject property. The subject property is located in an identified area of high aquifer recharge potential. The Applicant has provided a preliminary geotechnical evaluation to demonstrate the general suitability of the site for the proposed land use categories. Further, detailed evaluation will be required as part of the review of any final development order. This will allow the detailed evaluation to be tailored to the specific type of development in question at time of review.

(II) Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

Evaluation & Findings: The subject property already has urban future land use categories on the site, which are of lower density and intensity. The proposed amendment, increasing density and intensity, would actually be anticipated to decrease the cost in time, money, and energy of public facility and service provision and maintenance as more users in a concentrated area means less cost to furnish facilities and services per user.

(III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

Evaluation & Findings: The Commercial and Community Commercial land use categories are mixed-use land use categories and permit for a wide array of regionally and locally facing non-residential uses with a limited amount of residential uses. The Moderate Density Residential portion augments the limited amount of residential uses permitted in the Commercial and Community Commercial land use areas, permitting a wide range of housing types.

The City recognizes that mixed-use development reduces transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling. Ultimately, the proposed amendment results in a logical development pattern that will encourage accessibility between the related land uses, including a functional mix of residential and non-residential uses.

(IV) Promotes conservation of water and energy.

Evaluation & Findings: The City recognizes that mixed-use development reduces transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling. The Applicant further contends that a decrease in vehicle miles travelled (VMT) promotes energy conservation of both fossil fuels and electric power.

(V) Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The Applicant contends that the silviculture activities conducted on site will be relocated by the property owner to another property in the general region. Staff notes that the Applicant's contention likely does not meet the burden of preserving agricultural areas and activities.

(VI) Preserves open space and natural lands and provides for public open space and recreation needs.

Evaluation & Findings: The subject property is in private ownership, is not open to the public, and does not serve as functional open space. Additionally, the subject property is not comprised of natural lands and is primarily comprised of silviculture operations. The proposed future land use categories all require open space as part of future development.

(VII) Creates a balance of land uses based upon the demand of the residential population for the nonresidential needs of an area.

Evaluation & Findings: The Commercial and Community Commercial land use categories permit a wide array of non-residential land uses, including regionally facing and more locally facing uses, to meet the need of the residential population of the City of Alachua and context area.

(VIII) Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. 163.3164.

Evaluation & Findings: The Applicant contends that the proposed amendment will discourage urban sprawl; however, the existing future land use categories were found not to constitute urban sprawl when adopted by Ordinance 22-06. Additionally, the proposed amendment does not provide for an innovative development pattern. As such, Staff notes this criterion is likely not met.

Staff notes six of the eight urban form criteria are met, and as such, the proposed amendment does not constitute urban sprawl as established by Florida Statute 163.3177(6)(a)9.b.

COMPREHENSIVE PLAN CONSISTENCY ANALYSIS

The goals, objectives, and policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

Goal 1: *Future Land Use Map 2035*

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Evaluation & Findings: The proposed land use categories would maintain a balance between residential and non-residential uses in the City and maintain a minimum number of lands for a 10-year planning period.

Policy 1.2b: *Moderate Density Residential* (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments; and,
8. Supporting community services such as schools, houses of worship, parks, and community centers.

Evaluation & Findings: The proposed Moderate Density Residential land use category abuts a Community Commercial land use category and Low Density Residential land use category, acting as a step down in density and intensity between the non-residential and residential areas and maintaining an orderly and compatible pattern of development.

Policy 1.3.a: Community Commercial: The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:

1. Neighborhood commercial establishments;
2. Residential/offices and live-work units;
3. Business and professional offices;
4. Personal services;
5. Financial institutions;
6. Retail sales and services that serve the community;
7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;
11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;
13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use

Evaluation & Findings: The proposed Community Commercial land use category would act as a transition from the Commercial land use area to the residential land use areas, which is consistent with the purposes of the Community Commercial land use category and would maintain an orderly and compatible pattern of development.

Policy 1.3.b: *Commercial*: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Recreation and entertainment;
5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Evaluation & Findings: The proposed Commercial land use category would be located along US Highway 441, where more intense and highway-oriented commercial uses are appropriate. The proposed Commercial land use category would abut an existing Commercial land use category to the east, and be abutted by Community Commercial as a transition to the west and south, maintaining and orderly and compatible pattern of development.

Policy 1.3.f: The creation/promotion of strip pattern commercial development shall be discouraged. Infill within established commercial areas is preferred over extension of a strip commercial pattern. Extension of a commercial land use designation may be considered in circumstances where the extension is compatible with the existing land uses surrounding the land or the land use categories of surrounding lands. Extensions of a commercial land use category shall not encroach into a residential area. The following criteria shall be applied to limit the impacts of commercial development upon surrounding areas:

1. Impacts upon traffic circulation should be anticipated and mitigated through the reservation of right-of-way for road widening and marginal access streets when appropriate.
2. Access points for commercial development shall minimize points of conflict by utilizing frontage roads, providing cross access between parcels, or installing shared use ingress and egress access driveways connections to roadways.
3. Setbacks and landscaped or other appropriate buffers shall be established to mitigate the visual impacts of commercial development upon surrounding land uses.
4. A sidewalk or bicycle path shall be required where appropriate, to provide convenient access to the development from surrounding areas and to reduce traffic volumes on the roadways.

Evaluation & Findings: The proposed Commercial land use category would abut an existing Commercial land use category to the east, and be abutted by Community Commercial as a transition to the west and south, maintaining an orderly and compatible pattern of development. Although the Commercial and Community Commercial land use categories are proposed to extend into an existing residential future land use category, the property is undeveloped and not an existing residential neighborhood. As such, concerns with residential compatibility are minimal as (1) residential compatibility can be addressed at time of development review, ensuring proper landscaping and buffering, (2) the proposed commercial land use categories will not interfere with an existing residential area, and (3) the proposed Commercial land use category will be surrounded by a transitionary Community Commercial land use category.

A phase 1 traffic impact analysis has been submitted as part of this application and has demonstrated that proper consolidation of access points and right-of-way design will be taken into account at time of final design. A more detailed traffic analysis will be required as part of any development application. Pedestrian and bicycle facilities will be required to connect to adjacent properties at time of final design. Setbacks and buffers between residential and non-residential use areas will be required at time of final design.

Policy 1.3.g: The City shall pursue the establishment of activity centers and similar criteria to guide the placement and design of commercial and business areas.

1. The City shall establish and maintain a Gateway Activity Center at the interchange of US 441 and Interstate 75. The boundaries of the Gateway Activity Center shall be based on the Generalized US 441/I-75 Activity Center Map provided in the Future Land Use Map Series. The intent of this activity center is to welcome existing and future residents and visitors to the City, and to promote Alachua as an attractive, vibrant, and economically prosperous community.
2. The City shall establish and maintain the US 441 corridor as a Corporate Corridor Activity Center. The intent of establishing this activity center is to implement economic development objectives and to promote a coordinated development plan to maximize existing and future land use patterns and preserve the function of the US 441 corridor.

Evaluation & Findings: The subject property is within the City's Corporate Corridor Activity Center. Highway-oriented and more intense commercial development is consistent with the objectives of economic development and is consistent with the surrounding development pattern, ensuring a coordinated future land use pattern.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications for an amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.3177(6)(a)9.a. and b., Florida Statutes, respectively.

Evaluation & Findings: An urban sprawl analysis conducted by staff has been included in this report. Staff has found the proposed amendment to not constitute urban sprawl as defined in Chapter 163.317(6)(a)9., Florida Statutes.

Policy 5.1.a: *Topography*: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to topography of the existing site. Only moderate limitations related to topography exist for commercial development in a limited portion of the site. No seepage slopes or potential sinkholes are known to exist on the subject property. All policies and regulations regarding the protection of natural topography will be enforced at time of development review. At this stage, the proposed land use categories are generally suitable for the subject property in relation to topography, karst-sensitive, and other geologic features. Any development application for the subject property will require additional geotechnical screening and evaluation.

Policy 5.1.b: *Soils*: The City shall ensure soil protection and intervention measures are included in the development review process.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to the six soil types present on the subject property, which are all well or moderately well drained soils. As such, the proposed land use categories are generally suitable for the subject property in relation to soils.

Policy 5.1.c: *Flood prone areas*: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. The subject property is within Flood Zone X; and as such, staff noted no concerns related to flood potential.

Policy 5.1.d: *Wetlands*: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to wetlands on the subject property. No delineated or potential wetlands are known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to wetlands.

Policy 5.1.e: *Habitat*: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to potential habitat for listed species. The subject property is not identified by the Florida Natural Areas Inventory (FNAI) and not located near an Alachua County Strategic Ecosystem. As such, the proposed land use categories are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of development review.

Objective 9.1: *Connections to Water and Wastewater Systems*

The City will require new development and significant redevelopment projects to connect to the City's potable water and wastewater systems when such connections can be made to such systems.

Evaluation & Findings: The subject property is located within the City's Community Potable Water Service Area and Community Wastewater Service Area. As such, any development of the subject property will be required to connect to City facilities at time of development.

Transportation Element

Objective 1.1: *Level of Service*

The City shall establish a safe, convenient, and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation & Findings: A phase 1 traffic impact analysis has been submitted as part of this application. Multiple improvements are recommended, and will be assessed in more detail at time of final design. The Applicant contends that while the maximum build-out scenario of the proposed future land use categories would result in an increase to trip generation, the companion rezoning application limits the maximum build-out scenario and would actually result in a net reduction in potential trip generation. Concurrency will be reevaluated at time of application for a final development order, at which time the Applicant must demonstrate that the level of service will not be exceeded, or potential fees or improvements will be required in accordance with Chapter 18 of the City's Code of Ordinances. An amendment to the Future Land Use Map inherently does not impact the level of service standard.

Objective 1.2: *Access Management*

The City shall establish access management standards and coordinate with Alachua County and the Florida Department of Transportation to maintain access management standards which promote safe and efficient travel.

Evaluation & Findings: A phase 1 traffic impact analysis has been submitted as part of this application and has demonstrated that proper consolidation of access points and right-of-way design will be taken into account at time of final design. Access to US Highway 441 will be required to be in a consolidated manner that promotes safe and efficient travel at time of final design.

Policy 1.4.b The City shall require any commercial, industrial, or residential development which must obtain site plan or subdivision approval to provide a sidewalk along the frontage of any collector street or arterial street when a sidewalk is not present along the frontage of the street. A sidewalk shall not be required if a sidewalk does not exist within 2,640 feet of the property on the same side of the collector or arterial street.

Evaluation & Findings: The subject property is within 2,640 feet of a sidewalk on the same side of an arterial street, and as such, will be required to provide a sidewalk at time of development.

Policy 1.5.e Where feasible, the City will encourage strategies to facilitate development patterns that support multi-modal solutions, including urban design and appropriate land use mixes, including intensity and density.

Evaluation & Findings: The proposed land use categories include a mix of residential and commercial uses in an arrangement that will promote walking and cycling between the uses in close proximity. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes, and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Evaluation & Findings: The proposed land use categories allow for a variety of housing types in a range of densities. The commercial land use categories also allow for housing stock in close proximity to commercial development in a mixed-use manner.

Policy 1.1.i: The City shall establish land use designations and zoning districts that accommodate mixed-use development consisting of residential with commercial and/or retail.

Evaluation & Findings: The proposed Commercial and Community Commercial land use categories are mixed-use land use categories that accommodate mixed-use development with residential, commercial, and retail in close proximity to each other. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling.

Community Facilities Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which shall include all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity water main exists within 100 feet of the property line of any lot with a residential land use category or an existing single family residence and wastewater service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. Gravity wastewater main exists with 500 feet of the property line of any proposed residential subdivision consisting of 5 units or less and the gravity wastewater system is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation & Findings: The subject property is located within the Community Wastewater Service Area and any future development on the subject property will be required to connect.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within 100 feet of any lot within a residential land use category or an existing single family residence water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. A water main exists within 500 feet of any proposed residential subdivision consisting of 5 units or less and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation & Findings: The subject property is located within the Community Potable Water Service Area and any future development on the subject property will be required to connect.

Policy 5.1.a: The City shall consider the best available hydrogeological information (e.g, Suwannee River Water Management District high aquifer recharge potential maps or site-specific data), and may require the collection of site-specific hydrogeological data, such as soil borings or electric resistivity tests, when assessing the impacts of proposed land use changes and developments in areas of high aquifer recharge potential. This information should be used in the determination of land use decisions on a case-by-case basis.

Evaluation & Findings: The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map.

The Applicant submitted preliminary geotechnical analysis conducted by UES Professional Solutions, which was then reviewed by Kenneth Hill, P.E. of GSE Engineering & Consulting, Inc. on behalf of the City of Alachua. In reviewing the preliminary geotechnical analysis, Hill states that, "generally soil conditions are suitable for the development of commercial and residential projects." Hill does indicate that it is "prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design." As such, any development application for the subject property will require additional geotechnical screening and evaluation as recommended by Hill in their review of the preliminary geotechnical analysis.

At this stage, the proposed land use categories are generally suitable for the subject property in relation to karst-sensitive and other geologic features.

Conservation and Open Space Element

Objective 1.3: *Listed Species*

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to potential habitat for listed species. The subject property is not identified by the Florida Natural Areas Inventory (FNAI) and not located near an Alachua County Strategic Ecosystem. As such, the proposed land use categories are generally suitable for the subject property in relation to regulated plant and animal species and habitat; however, a full listed species inventory will be required at time of development review.

Policy 1.4.f: The City shall promote mixed use and compact development to promote pedestrian, golf cart and bicycle traffic and reduce automobile dependency.

Evaluation & Findings: The proposed Commercial and Community Commercial land use categories are mixed-use land use categories that accommodate mixed-use development with residential, commercial, and retail in close proximity to each other. The City recognizes mixed-use land use arrangements and developments reduce transportation needs by placing necessary shopping and employment within close proximity to housing and supports multi-mobility, including walking and cycling.

Objective 1.7: *Geological Resources*

The City shall identify, protect and conserve significant geological resources and their natural functions.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. There are no potential sinkholes or other geologic features known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to geologic features.

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Evaluation & Findings: An environmental conditions analysis conducted by staff has been included in this report. Staff noted no concerns related to wetlands on the subject property. No delineated or potential wetlands are known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to wetlands.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

Wetlands are areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

Evaluation & Findings: No potential or delineated wetlands are known to exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to wetlands. Should wetlands be discovered on the site, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation & Findings: The subject property is not located within or adjacent to a strategic ecosystem; therefore, no impacts are anticipated to any strategic ecosystem(s) identified within the ecological inventory report. As such, the proposed land use categories are generally suitable for the subject property in relation to strategic ecosystems.

Regulated Plant & Animal Species

The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region.

Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation & Findings: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. No parts of the subject property are identified as a priority area by the FNAI. As such, the proposed land use categories are generally suitable for the subject property in relation to regulated plant and animal species and habitat.

A listed species inventory will be required at time of development plan application to ensure final design is appropriate. Should a regulated plant or animal species be discovered, the Applicant must adhere to the applicable standards in the City's Comprehensive Plan and Land Development Regulations.

Soil Survey

The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff.) There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have a lower infiltration rate and therefore a higher runoff potential.

There are six soil types found within the subject property, shown in Table 4.

Table 4. Soil Types

Soil Type	Hydrologic Group	Drainage Class	Limitations		% of Subject Property (may not total to 100% due to rounding)
			Dwellings Without Basements	Small Commercial Buildings	
Arredondo Fine Sand; 0-5% Slope	A	Well Drained	Slight	Slight	45.01%
Fort Meade Fine Sand; 0-5% Slope	A	Well Drained	Slight	Slight	43.35%
Kendrick Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	7.12%
Arredondo Fine Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	4.27%
Gainesville Loamy Sand; 5-8% Slope	A	Well Drained	Slight	Moderate; Slope	0.21%
Millhopper Sand; 0-5% Slope	A	Moderately-Well Drained	Slight	Slight	0.02%

Evaluation & Findings: The six soils present on the subject property are well or moderately well-draining and are generally conducive to residential and commercial development. Only moderate limitations for commercial development exist, and those limitations are due to slope, not drainage. As such, the proposed land use categories are generally suitable for the subject property in relation to soils.

Flood Potential

Panel 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the development area is in Flood Zone X (areas determined to be outside of the 500-year floodplain).

Evaluation & Findings: The subject property is located in Flood Zone X. As such, there are no concerns related to flood potential on the subject property.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.

Evaluation & Findings: There are no potential sinkholes or other geologic features known to exist on the subject property. The subject property is located within a high aquifer recharge potential area as noted on the Suwannee River Water Management District (SRWMD) High Aquifer Recharge Potential (HARP) Map.

The Applicant submitted preliminary geotechnical analysis conducted by UES Professional Solutions, which was then reviewed by Kenneth Hill, P.E. of GSE Engineering & Consulting, Inc. on behalf of the City of Alachua. In reviewing the preliminary geotechnical analysis, Hill states that, "generally soil conditions are suitable for the development of commercial and residential projects." The full letter is available for review in Exhibit "B" of this report. Hill does indicate that it is "prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design." As such, any development application for the subject property will require additional geotechnical screening and evaluation as recommended by Hill in their review of the preliminary geotechnical analysis.

At this stage, the proposed land use categories are generally suitable for the subject property in relation to karst-sensitive and other geologic features.

Wellfield Protection Zones

Policy 7.2.1 of the Future Land Use Element of the City's Comprehensive Plan establishes a 500-foot radius area around each city-owned potable water well.

Evaluation & Findings: The subject property is not located within a wellfield protection zone. As such, the proposed land use categories are generally suitable for the subject property in relation to wellfield protection.

Historic Structures/Markers and Historic Features

The State of Florida and the Alachua County Historic Resources Inventory identify historic structures in addition to the City's Historic Overlay District, as established by Section 3.7 of the City's Land Development Regulations.

Evaluation & Findings: The subject property is not located in the City's Historic Overlay District and no structures identified as historic by the State of Florida or the Alachua County Historic Resources Inventory exist on the subject property. As such, the proposed land use categories are generally suitable for the subject property in relation to historic structures or features.

SMALL-SCALE COMPREHENSIVE PLAN AMENDMENT
STAFF REPORT

DRAFT ORDINANCE 26-XX

ORDINANCE 26-XX

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO HE SMALL SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION OF A ± 46.68-ACRE SUBJECT PROPERTY FROM LOW DENSITY RESIDENTIAL, MODERATE DENSITY RESIDENTIAL, AND COMMUNITY COMMERCIAL TO MODERATE DENSITY RESIDENTIAL, COMMUNITY COMMERCIAL, AND COMMERCIAL; GENERALLY LOCATED AT 16650 NW US HIGHWAY 441 (TAX PARCEL 03042-050-004; 03042-050-005 (PORTION THEREOF); 03046-003-000 (PORTION THEREOF)); REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, an application for a small scale Comprehensive Plan amendment to the City of Alachua Comprehensive Plan Future Land Use Map as further described herein has been filed with the City (the "Amendment") by eda consultants, inc. ("Agent") and NV5, Inc. ("Agent") (together as the "Applicant") on behalf of JTFA LLC (the "Property Owner"); and,

WHEREAS, a duly advertised public hearing was conducted on the proposed Amendment on _____, 2026, by the Planning and Zoning Board, sitting as the Local Planning Agency ("LPA"), and the LPA reviewed and considered all comments received during the public hearing concerning the application and made its recommendation to the City Commission; and,

WHEREAS, the City Commission held duly advertised public hearings on _____, 2026, and _____, 2026, on the proposed Amendment and provided for and received public participation; and,

WHEREAS, the City Commission has determined and found said application for the Amendment to be consistent with the City of Alachua Comprehensive Plan; and,

WHEREAS, for reasons set forth in this ordinance that is hereby adopted and incorporated as findings of fact, that the City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare;

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA.

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and are incorporated herein by reference.
2. The Amendment is consistent with the City of Alachua Comprehensive Plan.
3. The Amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

DRAFT

Section 2. Comprehensive Plan Future Land Use Map Amended

The City of Alachua Comprehensive Plan Future Land Use Map is hereby amended from Low Density Residential (± 20.32-acres), Moderate Density Residential (± 19.36-acres), and Community Commercial (± 7.00-acres) to Moderate Density Residential (± 6.37-acres), Community Commercial (± 10.20-acres), and Commercial (± 30.11-acres) on a ± 46.68-acre subject property, consisting of Tax Parcel Numbers 03042-050-004; 03042-050-005 (portion thereof), and 03045-003-000 (portion thereof), in accordance with the legal descriptions found in Exhibit "A" and map found in Exhibit "B" attached hereto.

Section 3. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of the City of Alachua, Florida.

Section 4. Repealing Clause

All ordinances or parts of ordinances in conflict with this ordinance are, to the extent they conflict with this ordinance, repealed.

Section 5. Providing for Severability

It is the declared intent of the Alachua City Commission that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by a court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance and the remainder of this ordinance, after the exclusion of such part or parts, shall be deemed to be valid.

Section 6. Effective Date

This Ordinance shall be effective upon its passage and adoption on the second and final reading. The effective date of this Amendment, unless timely challenged, shall be 31 days after adoption in accordance with Chapter 163.3187, Florida Statutes. If timely challenged, this Amendment shall become effective on the date the state land planning agency or Administrative Commission enters a final order determining this adopted Amendment to be in compliance with Chapter 163.3187, Florida Statutes. No development orders, development permit, or land uses dependent on this Amendment may be issued or commenced before this Amendment has become effective.

Review of Geotechnical Information
Farmlands Commercial PD Rezoning
Alachua, Alachua County, Florida
GSE Project No. 17335

GSE Engineering & Consulting, Inc. (GSE) has performed a review of geotechnical information/reports that was submitted as part of the rezoning application for the Farmlands Commercial PD located in Alachua, Florida. The remainder of this report summarizes our review.

Background Information

The site is located on the south side of U.S. Highway 441 approximately 0.5 miles west of the NW CR 235A intersection in Alachua, Florida. The site includes portions or all of Tax Parcels 03046-003-002, 03042-050-004, 03042-050-005, 03042-050-003, 03042-050-010 and 03042-051-001.

The site is proposed for commercial and residential development. You provided two geotechnical site exploration reports prepared by UES Professional Solutions (UES) that were included as part of the project application. You requested we review the reports to determine if the evaluations demonstrate the sites are suitable for single-story commercial buildings and single-family residential development, or if additional evaluation is appropriate/necessary.

Data Review

We were provided the following geotechnical engineering reports prepared by UES:

1. Preliminary Geotechnical Exploration Services, Proposed Alachua Commercial Center, US Hwy 441, Alachua, Alachua County, Florida. UES Project No. A25140.00683.005, Report No. 2160889 dated December 18, 2025 (Report 1).
2. Preliminary Geotechnical Exploration Services, Tax Parcels 03042-005/003 – US 441, Alachua, Alachua County, Florida. UES Project No. A25140.00683.005, Report No. 2162758 dated March 6, 2026 (Report 2).

GSE Engineering & Consulting, Inc.
5590 SW 64th Street, Suite B
Gainesville, Florida 32608

www.gseengineering.com

The reports included soil borings and laboratory testing of soil samples considering typical commercial development. Report 1 included twenty-nine (29) Standard Penetration Test (SPT) soil borings advanced to depths ranging from 10 to 40 feet below existing land surface (bls) and accompanying laboratory testing that included sieve analysis, wash 200 tests, Atterberg Limits tests, hydraulic conductivity (permeability) tests, and Limerock Bearing Ratio tests. Report 2 included twenty-five (25) SPT borings advanced to depths of 20 to 25 feet bls along with accompanying laboratory testing that included sieve analysis, wash 200 tests, Atterberg Limits tests, organic content tests, hydraulic conductivity (permeability) tests, corrosion series tests, and Limerock Bearing Ratio tests. Test were also performed on topsoil type materials to evaluate their suitability for reuse and determine fertilizer recommendations.

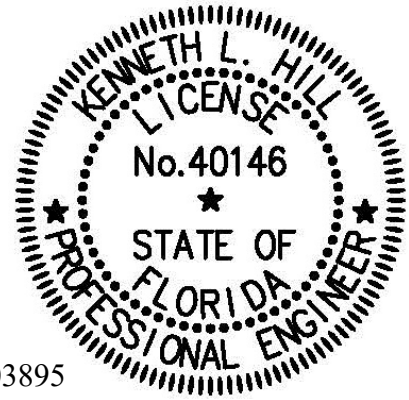
Both geotechnical explorations encountered sandy soil overlying clayey sand, sandy clay, and clay to the explored depths. Laboratory testing on representative soils indicates that some of the clays have a high risk for expansive characteristics. Limestone was encountered in one soil boring at a depth of 39.5 feet bls. Groundwater was generally not encountered within the depths explored or not determined due to the mud rotary method of advancing the boreholes.

Technical Analysis

The geotechnical explorations performed for this project indicate that generally soil conditions are suitable for the development of commercial and residential projects. The soil borings encountered expansive clays in some areas, but this is common in this area of Alachua County and the geotechnical engineer discusses methods for considering and mitigating the effects of the expansive soils on development and building elements.

The geotechnical engineer qualifies both reports as "*preliminary*" and states "***Due to the preliminary design stage of this project, building locations, structural loads, and grading information were unavailable. Therefore, it may be necessary to perform additional geotechnical services including additional test borings once the structure locations, stormwater management system, proposed grades, and structural loadings are available"***. Preliminary geotechnical explorations are generally intended to screen the site for suitability of the proposed development. Preliminary geotechnical explorations are not intended to be used for final design. The number of soil borings performed for the projects are not adequate for final design and additional soil borings should be performed.

The preliminary explorations did not include geophysical screening of the site for karst geological conditions. Sinkhole risk in Alachua County is mostly related to site elevation. Lower elevation sites in the Gulf Coastal Lowlands and Cody Scarp geological regions have a higher risk for sinkhole development than high elevation sites in the Northern Highlands geological region, and this is due to the separation between land surface and the limestone formation. Sinkholes most commonly develop in stormwater management facilities due to stormwater infiltration eroding soil into fractures and cavities in the limestone formation. Sinkhole risk is reduced in impervious areas, due to the absence of stormwater infiltration.



The site is located near the transition of the Cody Scarp to the Gulf Coastal Lowlands geology. The surface of the limestone formation in this area of Alachua is typically on the order of elevation 60 feet. The ground surface at the location of the stormwater management basin for these projects varies from about elevations 90 to 100 feet. If the basin is excavated 10 feet deep, the separation between the bottom of the basin and the limestone formation is expected to be on the order of 20 feet. We have observed multiple sinkholes develop in stormwater management facilities where the separation between the basin bottom and the limestone formation is on the order of 20 feet.

The City of Alachua has policies that allow for the requirement of geophysical screening in its sole discretion and has required this screening on some projects. GSE considers it prudent to conduct geophysical screening and additional geotechnical evaluation at the location of stormwater facilities as part of final design. The intent is to evaluate, determine, and consider the actual sinkhole potential risk in these areas. This information would then be considered and incorporated into the final design.

Closure

GSE appreciates this opportunity to provide these engineering services to you on this important matter. If you have any questions, or if we can provide any additional information, please contact us.

Sincerely,
GSE Engineering & Consulting, Inc.

RE: Notice of Hearing to be Scheduled for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On April 1, 2026, the City of Alachua received your revised small-scale Comprehensive Plan amendment and site-specific amendment to the Official Zoning Atlas applications for the Farmlands Commercial project. Based on review of the materials submitted, the City has determined that this application can now be scheduled for a hearing before the Planning & Zoning Board.

The application has been scheduled for the **April 21, 2026,** Planning & Zoning Board meeting.

You must provide two *double sided, three-hole punched, color sets* of **each complete** application package, seven full size sets of PD plans, and a digital copy of all materials in PDF format on a CD or by emailing a Cloud/FTP link to download the materials to planning@cityofalachua.org *no later than 10 business days prior to the Planning & Zoning Board meeting at which your application is scheduled to be heard*; therefore, the above referenced materials must be submitted to the City no later than ***Monday, April 6, 2026***. Materials may be submitted earlier than this date.

Additionally, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing; therefore, posted notice signs must be placed on the property no later than ***Monday, April 6, 2026***. These signs will be ready for pickup after 12:00 PM on Thursday, April 2, 2026. You will be notified again when the signs are available.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior to the Planning & Zoning Board meeting; therefore, the presentation or materials must be submitted no later than 12:00 PM on ***Monday, April 20, 2026***. Any presentation or materials may be submitted electronically by emailing them to planning@cityofalachua.org.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

Sincerely,

Carson J. Crockett, AICP

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On March 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting may be scheduled to review these comments by request.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 24, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Pursuant to Resolution 24-05, application fees include two (2) PAT reviews, and the reviews associated with each resubmittal to confirm that comments were addressed. **Please note, if an additional PAT review is required, a surcharge of 25% of the site plan application fee will be assessed for the additional PAT review (original application fee - $12,500; 25% surcharge - $3,125).** You will be notified if an additional PAT review is required, and the surcharge must be paid prior to any further review of the application.

Address the following insufficiencies:

PSSC26-0002 - Farmlands Rezoning
Staff has no additional comments at this time, but reserves the right to provide additional comments at a later date.

PR26-0002 - Farmlands Rezoning

Remaining Deficiencies to be Addressed
** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

4. **Compliance with Land Development Regulations**
   a. Per Table 3.6-3, development standards shall only be modified in ways that are consistent with the general intent and purpose of the PD-COMM district. Every proposed modification must be justified in this light. No justification is provided.
      i. Generally, a modification should only be considered if the proposed modification is unachievable via existing administrative remedies.

      Response: In collaboration with City staff and mindful of staff recommendations, limited modifications have been presented on supplements development and design sheets. The site-specific development and design sheets retain consistency with the City of Alachua's Comprehensive Plan and overall vision, while permitting modest modifications to existing zoning performance standards to achieve a unique and cohesive mixed-use project design.

      Remaining Deficiency: Provide justification.

   c. Per Table 3.6-3, a master parking plan must be provided to modify any parking standards. Provide master parking plan as an additional sheet to the PD Master Plan.

      Response: A Master Parking and Circulation Plan has been provided as a supplement to the application materials. In collaboration with staff, the applicant has creatively and thoughtfully proposed a standard that is mindful of pedestrian-scale needs and places safety at the forefront of design.

      Remaining Deficiency: See Additional Deficiency comments related to Parking Master Plan.

   e. Section 6.4.4(A) already does not apply to architectural lighting. Architectural lighting is governed by Section 6.4.4(B)(4). Remove unnecessary modification.

      Response: None provided.

      Remaining Deficiency: Respond.

g. Section 6.8 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.

Response: Proposed modifications have been removed and a development and design plan sheet has been included in the resubmittal, which outlines achievable performance standards that are consistent with the City's Comprehensive Plan and overall community vision for vibrant walkable non-residential areas in proximity to a variety of housing options. These elements also are designed in a manner that promotes non-motorized access for all citizens.

Remaining Deficiency: See Additional Deficiency comments related to Master Architectural Building Plan.

5. **PD Master Plan**

d. Provide development standards, including minimum setbacks, maximum height, etc., for the PD-COMM area.

Response: The development and design plan sheet contains the requested standards. A note (#16) has been added to the PD Master Plan to indicated that development standards for the PD-COMM area will be found on the separate Parking & Circulation Master Plan sheet.

Remaining Deficiency: Development Standards for the PD-COMM should be included on the PD Master Plan, not on the Parking Master Plan. Provide.

Note 16 references three Parking Master Plan sheets, of which there are only two. Revise.

f. Note 4 refers to a typical roadway section that has not been provided. Provide for review or remove note.

Response: Note #4 is proposed to remain and the requested cross sections can be found; 1) PD-R cross sections on Sheet P200, and 2) PD-COMM cross sections on the separate Parking & Circulation Master Plan sheet.

Remaining Deficiency: See Additional Deficiency comments related to Parking Master Plan.

7. **Miscellaneous**

a. In furtherance of Objective 1.4, Conservation & Open Space Element, among others, and the City's Strategic Plan, Staff proposes a multi-use trail dedication that aligns with the former seaboard airline right-of-way.

Response: The applicant has received Preliminary Plat and Construction Plan approval for the portion of the project referenced above. A trail dedication would be a design conflict with the previous and existing City approvals.

Remaining Deficiency: Staff notes that he Preliminary Plat will need amended to reflect all amendments to the PD; therefore, the Applicant's response regarding previous approval without a trail is moot. Further, the trail could be located within the 20' southern landscape buffer, not affecting lot lines and not resulting in any reduction in lots. Staff will work with the Applicant to ensure that this inclusion does not impede the construction of phase 1 as otherwise previously approved, understanding that grading may need slightly adjusted to account for an 8-foot-wide trail.

Additional Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

1. **Parking Master Plan**
   a. Sheet 1 of 2 does not depict the approximate location of the emergency access drive to the residential site on NW 188th Street. Revise.
   b. Sheet 1 of 2. Revise to show development areas as shown on the PD Master Plan (A, B, and C).
   c. Note 1. Revise "Landscape islands are required every 8th single row with a 5' sidewalk" to state "Landscape islands/spines are required every 4th single row with a 5' sidewalk."
      i. Staff is amenable to the following alternative language, provided that increased width and landscape areas are provided. "At a minimum, 12' wide landscape islands/spines are required with a 6' sidewalk such that in no case will a pedestrian be required to cross more than one drive aisle to access a landscape island/spine with a 6' sidewalk."
   d. Note 1. Revise "All parking will be impervious to "Required off-street parking spaces must, at a minimum, be surfaced with structurally adequate asphaltic concrete or concrete surface course. Any off-street parking spaces provided in excess of the minimum requirement may be of an alternative surface material in accordance with Section 6.1.3(E) of the LDRs.
   e. Note 2. The current bicycle parking requirement (assuming a full build-out scenario) would be approximately 148 spaces. A rate of 1 bicycle space per 10,000 square feet would yield a requirement of approximately 45 spaces (less than one-third of the current requirement). A rate of 1 bicycle space per 5,000 square feet may be more appropriate, with a minimum provision for structures under 10,000 square feet, if proper justification can be provided. Revise and provided justification.
   f. Note 4. Does not exist. Renumber notes accordingly
   g. Notes 5-7 do not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
   h. The Development Standards Table does not relate to parking and should be included on the PD Master Plan, not the Parking Master Plan.
      i. Further, the development areas should be consistent with those shown on the PD Master Plan (A, B, and C).
      ii. Maximum Lot Coverage does not refer to FAR, but rather, impervious surface area. Revise to reflect this standard accordingly.
   i. Driveway Cross Sections. Staff notes 14' and 15' wearing surfaces (per lane) are excessive and can contribute to irresponsible driver behavior. The City only requires 12' wearing surfaces per lane. Additionally, unnecessary lane width will further restrict planting of required landscape materials. Revise, reducing the land width on all driveway cross sections to 12' wearing surfaces.
   j. Sheet 2 of 2. The location of bicycle parking is governed by general note 2 on sheet 1. Remove bicycle parking locations from sheet 2 to reduce possible confusion.
   k. Sheet 2 of 2. Extend the eastern future access stub to the property line.
   l. Sheet 2 of 2. Include the approximate location of the multi-modal connection to the PD-R.

2. **Master Architectural Building Plan**
   a. As previously commented and discussed, only additional requirements to those in Section 6.8 are permitted to be included as part of the PD Master Plan. No deviation of a requirement in Section 6.8 that reduces such requirement is permitted. Staff noted the Master Architectural Building Plan currently does not comply with Section 6.8. Revise or remove from PD Master Plan.
3. **Miscellaneous**
   a. Some future land use maps appear to be older versions of the companion application. Check all future land use maps to ensure they are up to date.
   b. Remove all code alterations at the end of the justification report. If the deviation is not allowed by Table 3.6-3 and not noted on the PD Master Plan, it will not be incorporated into the PD. Justification as to the deviations can still be included in this report.
   c. The applicant is put on notice that, for consistency with Policy 5.1.a of the Community Facilities Element, further geologic testing will be required to be conducted, with the results submitted at time of final PD plan application.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

RE: Project Assistance Team Comments for Farmlands Commercial SSCPA & Rezoning

Dear Clay Sweger & Gerry Dedenbach,

On February 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

The application has been reviewed by the City's Planning Assistance Team (PAT). Upon review of the application materials, the following insufficiencies must be addressed. A meeting is scheduled for **1:30 PM on February 17, 2026** to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM on Wednesday, March 18, 2026**. A total of four copies of the application package, plans, and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud/FTP link must be provided by this date. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the Planning & Zoning Board. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time. If all comments are addressed by the resubmission date above, the application may be scheduled for the **April, 2026, Planning & Zoning Board (PZB) Meeting**.

Address the following insufficiencies:

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations **

PSSC26-0002 – Farmlands SSCPA

1. Needs Analysis
   a. While a needs analysis cannot rely solely on population projections, population projections should still be a factor as Florida Statute still requires a minimum amount of lands for a 10 year planning period be provided in the City. Population projections are available in the City's comp plan. Provide such analysis.
   b. Tables use "UPA" for unit per acre. Please use industry acronym "DUA" for dwelling units per acre. This is also how the City's Comprehensive Plan and Land Development Regulations refer to the standard.
   c. The submitted needs analysis does not consider the highest and best use of the property, which includes residential development as part of a mixed-use development. The development scenario for public facilities impact need not posit residential in the commercial land use, but the needs analysis should.
2. Urban Sprawl Analysis
   a. Staff noted only the 13 primary indicators of urban sprawl were evaluated in full. All eight urban form criteria must be analyzed. Revise analysis and include the eight urban form criteria.
   b. This application does not meet the definition of Infill Development established in the City's Comprehensive Plan, and as such, justification stating it is infill development is not proper justification. Revise response to primary indicator ten.
3. Comprehensive Plan Consistency Analysis
   a. Address Policy 1.3.f of the Future Land Use Element, specifically as it relates to the extension of commercial into residential areas.
   b. Objective 5.1 of the Future Land Use Element states that the City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during the review of proposed amendments to the Future Land Use Map. The response provided states this analysis will occur at a later date. Revise response. The proper analysis must occur at time of Future Land Use Map amendment.
   c. In response to Policy 5.2.a, Future Land Use Element, the Applicant states the land use change will not impact the level of service. In response to Objective 1.1, Transportation Element, the Applicant states the land use will impact the level of service. Ensure all responses are consistent. Revise.
   d. In response to Objective 1.8, Conservation & Open Space Element, the Applicant notes that the "mixed-use development is proposed with residential and commercial uses in nature." Staff is unclear on what this analysis means. Revise and clarify.
   e. The Applicant's response to Objective 1.9, Conservation & Open Space Element, is not relevant to this application. Revise or remove.
   f. The proposed amendment includes residential lands. As such, provide an analysis of the Housing Element, and if relevant, the Recreation Element and Public Schools Element.

4. Concurrency Impact Analysis
    a. The Applicant is put on notice that, consistent with the submitted TIA recommendations, a more detailed analysis will be required to address potential impacts of specific development proposals at time of development of the site. These must include ways to address the level of service of segment 6.
5. Outside Review
    a. Comments from City of Alachua Public Services will be provided at a later date and forwarded as soon as received by the Planning & Community Development Department.
6. Miscellaneous
    a. Staff notes that a Commercial land use category abutting the Low Density Residential land use category is not a logical development pattern and does not provide a transition of the higher intensity use area of up to 0.6 FAR and 15 DUA to the lower intensity use area of just one DUA. Staff recommends either a Community Commercial land use category or a Moderate Density Residential land use category be used as a transitionary land use category between the two use areas. This would also be more similar to the established development pattern of the US 441 Corporate Corridor Activity Center.

PR26-0002 - Farmlands Rezoning

1. Statement of Proposed Change/Existing vs. Proposed Zoning
    a. The summary of change in development potential should consider both FAR and DUA for the business zone districts as the CC and CI districts are mixed-use districts.
    b. Tables use "UPA" for unit per acre. Please use industry acronym "DUA" for dwelling units per acre. This is also how the City's Comprehensive Plan and Land Development Regulations refer to the standard.
2. Comprehensive Plan Consistency Analysis
    a. In response to Policy 5.1.b, Future Land Use Element, the Applicant notes five soil types and six soil types are present on site. Revise to be consistent.
    b. In response to Policy 5.2.a, Future Land Use Element, and Objective 1.1, Transportation Element, the Applicant states the land use will not impact the level of service. The associated TIA suggests a negative impact is possible. Revise and clarify.
    c. In response to Objective 1.8, Conservation & Open Space Element, the Applicant notes that the "mixed-use development is proposed with residential and commercial uses in nature." Staff is unclear on what this analysis means. Revise and clarify.
    d. The Applicant's response to Objective 1.9, Conservation & Open Space Element, is not relevant to this application. Revise or remove.
    e. The proposed amendment includes residential lands. As such, provide an analysis of the Housing Element, and if relevant, the Recreation Element and Public Schools Element.
3. Concurrency Impact Analysis
    a. The Applicant is put on notice that, consistent with the submitted TIA recommendations, a more detailed analysis will be required to address potential impacts of specific development proposals at time of development of the site. These must include ways to address the level of service of segment 6.

4. **Compliance with Land Development Regulations**
   a. Per Table 3.6-3, development standards shall only be modified in ways that are consistent with the general intent and purpose of the PD-COMM district. Every proposed modification must be justified in this light. No justification is provided.
      i. Generally, a modification should only be considered if the proposed modification is unachievable via existing administrative remedies.
   b. Article 4 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.
   c. Per Table 3.6-3, a master parking plan must be provided to modify any parking standards. Provide master parking plan as an additional sheet to the PD Master Plan.
      i. Modifying the standard from one bicycle space per ten off-street parking spaces to one per 40 off-street parking spaces is a four-fold reduction. One per 80 off-street parking spaces is an even greater reduction. The PD-COMM shows pedestrian and bicycle connections to the residential area, and per conversations with FDOT, a multi-use trail will be required along US 441. There is no clear justification as to why a reduction of this degree, with a maximum of only ten bicycle spaces site wide, would be necessary. Staff does not support the modification as proposed.
      ii. No clear justification has been provided to modify Section 6.1.8(B)(3). Staff does not support such change as proposed.
      iii. The purpose of Section 6.1.10 is to ensure that a pedestrian has to cross no more than one drive aisle before reaching a dedicated pedestrian facility. Modifying the standard as proposed would result in pedestrians having to cross two drive aisles and potentially have the pedestrian forgo walking on the pedestrian facility altogether. No clear justification has been provided to modify Section 6.1.10. Staff does not support the change as proposed.
   d. Per Table 3.6-3, an alternative landscape plan must be provided to modify any landscape standards. Provide an alternative landscape plan as an additional sheet to the PD Master Plan.
      i. No clear justification has been provided to modify Section 6.2.2(D)(2)(b) or Section 6.2.2(D)(3). Staff does not support the modification as proposed.
   e. Section 6.4.4(A) already does not apply to architectural lighting. Architectural lighting is governed by Section 6.4.4(B)(4). Remove unnecessary modification.
   f. Per Table 3.6-3, a master sign plan must be provided to modify any signage standards. Provide a master sign plan as an additional sheet to the PD Master Plan.
      i. Staff notes that any change to a sign standard must have a compelling justification in conformance with both the PD-COMM district and the general purposes of Section 6.5. No clear justification has been provided. Staff does not support the proposed modification as proposed.
   g. Section 6.8 of the Land Development Regulations is not listed as a modifiable standard in Table 3.6-3. No modifications are permitted. Remove any proposed modifications.

5. **PD Master Plan**
   a. Show at least one designated bicycle and pedestrian facility from the eastern most portion of Area B to Area A. Exact location is not necessary, only that there will be a connection.
   b. Provide DUA figures in the Land Use Data Table.
   c. The Land Use Data Table note states "land use areas are approximate and may be adjusted." Revise to note that they cannot be adjusted limitlessly.
   d. Provide development standards, including minimum setbacks, maximum height, etc., for the PD-COMM area.
   e. Note three only references PD-R. Revise to include PD-COMM.
   f. Note 4 refers to a typical roadway section that has not been provided. Provide for review or remove note.
   g. Note 13 should require a 20' easement with a 10' sidewalk. Revise.
   h. The City will not permit any private signage in a public-right-of-way. Remove or revise Note 16.
6. **Outside Review**
   a. Comments from City of Alachua Public Services will be provided at a later date and forwarded as soon as received by the Planning & Community Development Department.
7. **Miscellaneous**
   a. In furtherance of Objective 1.4, Conservation & Open Space Element, among others, and the City's Strategic Plan, Staff proposes a multi-use trail dedication that aligns with the former seaboard airline right-of-way.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org. We look forward to receiving your revised application.

RE: Completeness Review for Farmlands Commercial Small-Scale Comprehensive Plan Amendment (SSCPA) and Amendment to the Official Zoning Atlas (Rezoning)

Dear Clay Sweger & Gerry Dedenbach,

On February 4, 2026, the City of Alachua received your revised applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that **the applications are now complete**.

An in-depth review of the content of the applications will now be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be sent under separate cover.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

RE: Completeness Review for Farmlands Commercial Small-Scale Comprehensive Plan Amendment (SSCPA) and Amendment to the Official Zoning Atlas (Rezoning)

Dear Clay Sweger & Gerry Dedenbach,

On January 26, 2026, the City of Alachua received your applications for the Farmlands Commercial SSCPA and rezoning. The SSCPA application proposes amending the future land use category of a ± 46.7-acre subject property from Low Density Residential, Moderate Density Residential, and Community Commercial to Moderate Density Residential and Commercial (tax parcels 03042-050-004, 03042-050-005 (portion thereof), and 03046-003-000 (portion thereof)). The rezoning application proposes amending the zone district of a ± 182-acre subject property from Community Commercial (CC), Commercial Intensive (CI), and Planned Development – Residential (PD-R) to PD-R and Planned Development – Commercial (PD-COMM) (tax parcels 03042-0050-003, 03042-0050-004, 03042-050-005, 03042-050-010, 03042-052-001, 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03875-001-001, 03875-010-001, and 03875-010-002).

According to Section 2.2.6 of the City's Land Development Regulations, a completeness review shall be conducted upon receipt of the applications to determine that the applications contain all the necessary information and materials, are in proper form and of sufficient detail, and are accompanied by the appropriate fee. The Planning & Community Development Department has reviewed the aforementioned applications for completeness and finds that **the applications are incomplete**. The following deficiencies must be addressed to begin review of the applications. The deficiencies must be addressed no later than **5:00 PM on Thursday, February 5, 2026** to remain on the April Planning & Zoning Board review schedule.

In accordance with Section 2.2.6(B) of the City's Land Development Regulations, the applicant must correct the deficiencies and resubmit the application for completeness determination. *Plans and application materials may be made available for return in order to revise and resubmit as needed.*

The time frame and cycle for review shall be based upon the date the applications are determined to be complete. If the applicant fails to respond to the identified deficiencies within 45 calendar days, the applications shall be considered withdrawn (*, 2025*).

Please note that if an additional completeness review is required, a resubmittal fee equal to 10% of the application fee will be assessed for each additional completeness review and must be paid prior to further review of the applications.

The comments below are based solely on a preliminary review of your application for completeness. An in-depth review of the content of the application will be performed, and the findings discussed at a Project Assistance Team (PAT) meeting, which will be scheduled after the application is determined to be complete.

PSSC26-0002 - Farmlands SSCPA

1. **Submission Requirement, Electronic Materials** – Per the City's submission requirements, in addition to three printed copies, all materials must be submitted in digital (PDF) format: on a CD or by emailing a cloud/FTP link. Only some electronic materials were received electronically. Provide all materials electronically.

2. **Application Attachment #11, Proof of Payment of Taxes** – Proof of payment of taxes was submitted up through the year 2024. Provide proof of payment of taxes for 2025.

PR26-0002 - Farmlands Rezoning

1. **Submission Requirement, Electronic Materials** – Per the City's submission requirements, in addition to three printed copies, all materials must be submitted in digital (PDF) format: on a CD or by emailing a cloud/FTP link. Only some electronic materials were received electronically. Provide all materials electronically.

2. **Application Attachment #11, Proof of Payment of Taxes** – Proof of payment of taxes was submitted up through the year 2024. Provide proof of payment of taxes for 2025.

If you have any questions regarding the information above, please contact me at (386) 418-6137 or at ccrockett@cityofalachua.org.

Sincerely,

Carson J. Crockett, AICP

Memorandum

Date: August 19, 2026

To: Patrice Boyes, Esq., Holtzman Vogel

From: M.C. Alfieri, P.G., P.Hg., CGWP

Regarding: Technical Review for August 24, 2026 Land Use Designation Hearing Regarding Alachua Farmlands, Alachua, Alachua County, Florida

Digitally signed by Michael Alfieri
DN: cn=Michael Alfieri ou=Users e=Michael.Alfieri@apexcos.com
Location:
Date: 2026-08-19 11:55-04:00

Executive Summary

Apex Companies, LLC (Apex) was retained by the City of Alachua (City) through Holtzman Vogel Baran Torchinsky & Josefiak PLLC (Client/Holtzman Vogel) to conduct an independent professional geologic review of technical information and Ordinance conditions associated with the proposed Alachua Farmlands Land Use and Zoning Applications. The review focused on the impact of the proposed Alachua Farmlands Land Use and Zoning with the local karst system and whether the available information and Ordinance conditions provide reasonable assurance that karst features will not be adversely affected by the proposed land use designation and re-zoning, while meeting environmental requirements set by the City. Apex reviewed geotechnical investigations, geophysical studies, historical aerial photography, City Staff Reports, landfill monitoring reports, and supporting technical correspondence provided by both the City and the Applicant.

Based on the information reviewed, the site is underlain by karst geology typical of Alachua County; however, the available data do not indicate the presence of active sinkhole activity. Multiple phases of geotechnical drilling, laboratory testing, and geophysical investigations conducted by licensed engineering professionals identified no evidence of contemporaneous raveling, progressive subsurface weakening, or other indicators commonly associated with active sinkhole formation. The depressional feature identified on the property is most consistent with a stable paleo sinkhole, supported by subsurface data and historical aerial photography demonstrating little to no change in the feature since at least 1937. Independent review by GSE Engineering & Consulting similarly concluded that the site appears suitable for the proposed development, while recommending additional site-specific investigations during final design to further evaluate stormwater management areas and potential karst risks.

Apex generally concurs that the investigations completed to date provide reasonable assurance that identified karst features are not currently exhibiting active sinkhole behavior and that the proposed land use designation and zoning do not present evidence that karst features will be adversely affected. Nevertheless, additional geotechnical and karst hydrogeologic evaluations during final development design and permitting may be appropriate and would be consistent with standard engineering practice in karst terrain, as Staff's Condition No. 5.i.ii provides.

Concerning the former Northwest Alachua County Landfill, the County requested a condition to the re-zoning requiring the "*submittal of an appropriate engineering and environmental study demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent landfill or the extent, movement, or management of the existing groundwater contamination plume.*" The Applicant agreed to this request and indicated that the scope and timing of the study

will be coordinated between the Applicant and Alachua County. The scope of the study at the time of development plan review will be important to sort out which property is downgradient of any plume.

Introduction

Apex was retained to provide Professional Geologic review of technical data associated with the land use and zoning applications for Alachua Farmlands. Apex focused on potential impacts to the karst system in compliance with City of Alachua Land Development Codes and relevant provisions of the City of Alachua Comprehensive Plan. Apex was tasked with reviewing relevant geologic data, submitted documents (i.e., staff reports, applications, supporting documentation, record evidence) and preparing a brief technical memorandum summarizing the geologic data, its relevance in respect to karst, and whether in our professional geologic opinion reasonable assurances have been provided to demonstrate karst features will remain unaffected by the proposed land use and zoning. The scope of services provided is based on decades of experience as scientific investigator and published lead and/or co-author to numerous peer-reviewed journal articles and conference proceedings related to karst science.

Data Compilation and Review

Project data has been provided by the City of Alachua and the Applicant as follows:

Rise Partners/NV5 (2026) Historical Aerials (1937-2026).

Summary of Site-Specific Data Review

December 2025 and March 2026 UES Geotechnical Evaluations

Geotechnical investigations completed by UES Professional Solutions, LLC (UES) in December 2025 and March 2026 were overseen by two Florida Licensed Professional Engineers, who specifically practice geotechnical engineering, with reports officially signed and sealed per Florida law. These two reports focused on the suitability of the site for future land use (i.e., commercial/retail development). UES completed a review of readily available geologic and geotechnical data and literature references, completed thirty-five (35) geotechnical borings in 2025 and an additional twenty-five (25) geotechnical borings in 2026. The borings were completed to depths ranging from 10 to 40 feet below land surface in the proposed footprint of buildings, parking lots, and stormwater management areas. The UES reports indicate the geotechnical borings were completed in accordance with ASTM D1586.

UES also collected geologic samples during the geotechnical boring phase of the evaluations and completed the following geotechnical laboratory analyses: (a) forty-three (43) Wash #200 fines content determinations (in accordance with ASTM D1140); (b) six (6) Grain Sieve Analysis tests (in accordance with ASTM D-422); (c) ten (10) Atterberg Limits Tests (in accordance with ASTM D4318-05); (d) forty-nine (49) moisture content tests (in accordance with ASTM D-2216); (e) thirteen (13) Laboratory Permeability Tests (in accordance with ASTM D-2434); (f) three (3) Limerock Bearing Ratio (LBR) tests (in accordance with Florida Department of Transportation FM-515); (g) two (2) organic content tests (in accordance with ASTM D2974); (h) two (2) corrosion series; (i) one (1) topsoil series; and (j) one Modified Proctor Test (in accordance with ASTM D1557). Additionally, UES completed two (2) double ring infiltrometers within the footprint of the proposed stormwater management areas to assess percolation rates for the proposed system.

Apex has reviewed all geological logs and geotechnical laboratory reporting provided in the reports. Our findings are highlighted below:

- The data collected at shallow boring locations were completed to determine geotechnical suitability, while the deep boring locations were completed to evaluate the stratigraphy of the property.
- Evidence of contemporaneous raveling was <u>not</u> identified in the SPT data collected and presented by UES in the December 2025 and March 2026 geotechnical reports.

  - Used in industry practice, Florida Statute 627.706(2)(h) and (i) define the following:
    (h) "Sinkhole" means a landform created by subsidence of soil, sediment, or rock as underlying strata are dissolved by groundwater. A sinkhole forms by collapse into subterranean voids created by dissolution of limestone or dolostone or by subsidence as these strata are dissolved.
    (i) "Sinkhole activity" means settlement or systematic weakening of the earth supporting the covered building only if the settlement or systematic weakening results from contemporaneous movement or raveling of soils, sediments, or rock materials into subterranean voids created by the effect of water on a limestone or similar rock formation.
- Groundwater was encountered in some, but not all, SPT borings completed. In locations where the water table was identified, it appears to be perched on clay-rich sediments, which is common.
  - Soil mottling was used by the geotechnical engineers to determine the seasonal high-water levels at the project site.
- Atterberg Limits testing (ASTM D4318) indicates that the clays are not in a flowable state at the property.
  - Testing completed by UES indicates that expansive clays are not present near surface and within the footprint of the proposed project; however, UES indicates that if during construction expansive clays are identified, geotechnical design modifications to footings will be made accordingly.
  - While clay does not ravel due to the properties of the clay minerals comprising the material, if moisture contents are elevated placing the clay in a flowable state and if void space is available, flowing clays can contribute to the formation of sinkholes.

April 2026 GSE Geotechnical Review of December 2025 and March 2026 UES Geotechnical Evaluations

GSE Engineering & Consulting, Inc. (GSE) was retained by the City of Alachua to review the December 2025 and March 2026 UES Geotechnical Evaluations. This was completed by a Florida Licensed Professional Engineer, who specifically practices geotechnical engineering, with the letter officially signed and sealed per Florida law. GSE concluded that the site appears generally suitable for the proposed commercial and residential development, but the geotechnical investigations completed by UES are only preliminary in nature and are not sufficient for final design. GSE notes a data gap related to karst conditions and sinkhole risk beneath proposed stormwater facilities. GSE recommends additional subsurface characterization and geophysical investigations during the final design phase to better evaluate and mitigate the potential risk.

June 2026 UES Limited Sinkhole Potential Evaluation

A supplemental geotechnical investigation was completed by UES in June 2026 and was overseen by two Florida Licensed Professional Engineers, who specifically practice geotechnical engineering, with reports officially signed and sealed per Florida law. The investigation focused on an observed depressional feature within the project site. While not specifically stating, it is unclear if this work was completed based on the GSE review discussed above, or if this was a proactive decision by the Applicant.

UES completed another literature review, completed a geophysical survey consisting of thirteen (13) ground penetrating radar (GPR) traverses and two (2) electrical resistivity imaging (ERI). Geohazards, a UES Company (Geohazards) was retained by UES to complete this limited sinkhole evaluation. While no anomalies were identified during the GPR traverses, Geohazards did identify two (2) ERI anomalies. Apex has reviewed the ERI data provided within the report and find the modeling results to be acceptable (i.e., Root Mean Square Error

[RMS] under 10 percent). Geohazards recommended geotechnical testing of the observed ERI anomalies for confirmation of the observed features.

UES completed two SPT borings (in accordance with ASTM D1586) to evaluate the geophysical anomalies. Boring B-1 was completed within the heart of the ERI anomalies, while boring B-2 was completed outside of the identified ERI anomalies. The geologic logs do not indicate evidence of contemporaneous raveling. Clay rich sediment overlaying the limestone was not indicated to be in a flowable state and more than likely contributed to the loss of signal with the GPR evaluation. The discrete drop in penetration resistance between sand-rich sediment and underlying clay-rich sediment is also a normal occurrence and does not constitute a progressive weakening of sediments with depth. While not synonymous with a sinkhole or sinkhole activity per the Florida Statutes, the variable depth to the top of limestone appears to indicate a paleo-chimney sinkhole at this location. The loss of drilling fluid at the epikarst, the ancient erosional surface of the limestone, is a common occurrence with mud rotary drilling and, in this case, is not indicative of active sinkhole formation. While paleo sinkholes can reactivate under the right conditions, the June 2026 SPT data indicates that this is not the case.

1937 to 2026 Aerial Photography Provided by NV5

Apex reviewed the aerial photography presented by NV5. The figures provided focused on the depressional feature investigated by UES in June 2026. While the depressional feature is observed in each of the time periods presented, the relative shape and size has not significantly changed since 1937 (approximately 90 years). This provides another line of evidence for the paleo sinkhole and lack of reactivation.

Summary of Off-Site-Specific Data Review

June 2026 Alachua County Northwest Landfill Report by Jones Edmunds

The June 2026 Jones Edmunds & Associates, Inc. (Jones Edmunds) Alachua County Northwest Landfill report was provided was provided by both the City and the Applicant. Our findings are highlighted below:

- The groundwater sampling was completed on January 6, 7, 8, 19, and 20 and February 5, 2026.
    - Monitor well schematics were not identified in the report. It is unclear as to what aquifer is specifically being monitored.
    - Laboratory data indicates pH, TDS, Iron, Manganese, 1,2-Dibromoethene, 1,2-Dichloropropane, Trichloroethene, and Vinyl Chloride concentrations were at or outside Florida Department of Environmental Protection (FDEP) groundwater standards.
- Groundwater elevation data used to prepare the groundwater contour map was on January 6, 2026.
    - As presented, groundwater flow on site is westerly at a gradient of approximately $1x10^{-4}$-feet per foot then doglegs to the north at a gradient of approximately $2x10^{-3}$-feet per foot.
        - This is based on nine (9) monitor wells located on the landfill property boundary and numerous off-site wells and appears to be generated from Surfer (Golden Software version unknown) or another data contouring program and imported into AutoCAD.
        - The dogleg north is attributed to one measurement at the northwestern-most monitor on the landfill property boundary.
        - The groundwater elevation map is drawn with 0.5-foot contour intervals, but there are no notes as to the accuracy of the water level indicator used in the study.

July 2026 Letter from Applicant to Alachua County Regarding Affected Party Status

In correspondence between the City and Alachua County, Alachua County requested a condition to the re-zoning requiring the "*submittal of an appropriate engineering and environmental study demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent landfill or the extent, movement, or management of the existing groundwater contamination plume.*" The Applicant agreed to this request and indicated that the scope and timing of the study will be coordinated between the Applicant and Alachua County. The scope of the study at the time of development plan review will be important to sort out the which property is downgradient of any plume.

Discussion of Ordinances and Proposed Conditions

City of Alachua Zoning Ordinance 26-10

This ordinance, if adopted on Second Reading, would re-zone approximately 182 acres known as the "Farmlands Planned Development" from Community Commercial (CC), Commercial Intensive (CI), and existing Planned Development Residential (PD-R) zoning to a combination of PD-R and Planned Development Commercial (PD-COMM). The ordinance authorizes a mixed-use development consisting of up to 203 single-family residential units and up to 454,000 square feet of commercial development, to be built in as many as five phases over a 10-year period.

Conditions to the Ordinance would establish detailed development standards addressing transportation, utilities, stormwater management, environmental protection, landscaping, open space, pedestrian connectivity, parking, and infrastructure requirements, including extensive geotechnical and karst evaluations, groundwater protection measures, species surveys, and coordination with applicable regulatory agencies. On First Reading, the City Commission found the Application consistent with the City's Comprehensive Plan and Land Development Regulations.

Apex has reviewed the Environmental Conditions to Zoning Ordinance 26-10 and provides the following comments:

- The required geotechnical and karst evaluations in Condition 5.i.ii, as drafted by Staff, are appropriately timed to occur at Final PD Development Plan Review, which is better aligned for later efforts regarding the actual development of the project site, not the land use and re-zoning stage.
- The text added by the Commission at First Reading (to include the "*geologic requirements outlined in the letter sent to Patrice Boyes on December 23, 2025, by Michael Alfieri, P.G., on behalf of Apex Comp*anies") is not appropriate at this juncture. These requirements were developed for a specific project based on those site conditions, available data, and identified geologic concerns at that location. Given the variability of subsurface conditions across different properties, automatically imposing the same geological/geophysical/geotechnical requirements on unrelated properties is not appropriate or technically defensible. Geologic and geotechnical investigation programs should be developed using a site-specific, risk-based approach that reflects the unique characteristics of a proposed project and property.

City of Alachua Land Use Designation Ordinance 26-09

Objective 1.7: Geological Resources The City shall identify, protect and conserve significant geological resources and their natural function.

Policy 1.7.a: The City shall work with the Florida Geological Survey (FGS), Florida Department of Environmental Protection (FDEP), Suwannee River Water Management District, and the Alachua County Environmental Protection Department, to identify and map significant geological resources, including karst features such as sinkholes, caves, and entire stream to sink basins. Significance of a feature should reflect its potential contribution to the area's network of natural resources.

Policy 1.7.b: The City may utilize FGS Florida Aquifer Vulnerability Assessment (FAVA) maps, in conjunction with site-specific data, when available, to determine karst related aquifer contamination potentials. The City may utilize the FAVA map created specifically for Alachua County.

Policy 1.7.c: The City shall prepare an emergency management plan to address the opening of a sinkhole when it poses a threat to public infrastructure, and the public's health, safety or welfare.

Policy 1.7.d: The City shall review the possibility of acquiring and managing, when feasible, unique geological features and their surrounding natural areas. If a subject feature is privately owned, the City shall encourage the owner to create a management plan in cooperation with the appropriate agencies, and investigate the possibility of acquiring and preserving the surrounding property.

Policy 1.7.e: The City shall utilize regulatory and stewardship techniques to ensure that stormwater, wastewater and landscaping practices do not negatively impact the structural integrity, hydrology, biodiversity and other natural functions of significant geologic resources.

Apex generally concurs that the investigations completed to date support the suitability of the property for the proposed land use amendment from a geologic and karst perspective. However, consistent with standard engineering practice in karst terrain, additional site-specific geotechnical and hydrogeologic evaluations should continue during final development design and permitting to support the stormwater management system design, foundation recommendations, and other project-specific engineering considerations. Such evaluations are customary and represent an appropriate progression from preliminary planning to detailed design.

City of Alachua Planning & Community Development Department (April 21, 2026) Staff Report: Quasi-Judicial Hearing Application #: PR26-0001

Apex reviewed the Staff Report, which recommended the approval of Zoning Ordinance 26-10 with Conditions (Application PR26-0002). The proposal would modify the existing zoning framework by retaining a residential component of 203 single-family dwelling units, while creating a new planned commercial development district allowing up to 450,000 square feet of non-residential development. Apex focused specifically on the environmental analysis in the Staff Report for purposes of this Technical Memorandum. Apex concluded that the Staff Report provides the City Commission with a technical basis to consider approval of the re-zoning.

Apex provides the following comments:

- On page 43 of the PDF document indicates working with the Suwannee River Water Management District (SRWMD) and the FDEP criteria for karst stormwater management system design. This should be site specific and focused on the stormwater management system.
- On page 49, there is a common misnomer under "Karst-Sensitive Features". As written, "*karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations.*" There are no underground streams, rivers, or oceans. Water can be transported via conduits with the limestone and can capture water from streams

and rivers via swallets/sinkholes (referred to as stream piracy), but these are not "underground streams". Karst features are the result of non-uniform dissolution of carbonates (or similar rock types). For example, the rates of dissolution and weathering are not uniform and can result nonuniform peaks and valleys in the limestone surface and/or variable sized dissolution "holes" (i.e., vugs, conduits, caves) in the rock.

Conclusions

Apex generally concurs that the investigations completed to date support the suitability of the site for the proposed land use and rezoning from a geologic and karst perspective. Nevertheless, additional geotechnical and karst hydrogeologic evaluations during final development design and permitting may be appropriate and would be consistent with standard engineering practice in karst terrain, as Staff's Condition No. 5.i.ii provides. Such evaluations are customary and represent an appropriate progression from preliminary planning to detailed design.

Based on Apex's review of the materials provided, the project site is underlain by karst geology typical of north-central Florida; however, the data reviewed do not indicate the presence of active sinkhole activity on the property. Multiple phases of subsurface exploration, laboratory testing, geophysical surveys, and supplemental sinkhole evaluations completed under the supervision of licensed geotechnical professionals did not identify evidence of contemporaneous raveling, progressive subsurface weakening, or other indicators commonly associated with active sinkhole formation. Furthermore, the depressional feature evaluated by UES appears most consistent with a stable paleo sinkhole, a conclusion supported by geotechnical data, geophysical testing, and historical aerial photography demonstrating little to no change in the feature over approximately 90 years.

Concerning the former Northwest Alachua County Landfill, the County requested a condition to the re-zoning requiring the "*submittal of an appropriate engineering and environmental study demonstrating that the proposed development activities, including the proposed stormwater management facilities, will not adversely affect the integrity of the adjacent landfill or the extent, movement, or management of the existing groundwater contamination plume.*" The Applicant agreed to this request and indicated that the scope and timing of the study will be coordinated between the Applicant and Alachua County. The scope of the study at the time of development plan review will be important to sort out the which property is downgradient of any plume.

PLANNED DEVELOPMENT REGULATORY AGREEMENT
FOR THE FARMLANDS PLANNED DEVELOPMENT PROJECT

THIS PLANNED DEVELOPMENT REGULATORY AGREEMENT ("PD Agreement") is made as of _____, 2026, by and between the **CITY OF ALACHUA, FLORIDA** ("City"), a Florida municipal corporation, and **AYLA, LLC**, a Florida limited liability company, **FIRST COAST ROAD RANGERS, LLC**, a Florida limited liability company, **JACK'S SMALL ENGINE REPAIR LLC**, a Florida limited liability company, **JTFA LLC**, a Florida limited liability company, and their successors or assigns (each a "Property Owner" or "Developer" and together as the "Property Owners" or "Developers"). The City and the Property Owners may jointly be referred to as the "Parties."

RECITALS

WHEREAS, the Property Owners desire to obtain approval for a **Planned Development ("PD")** in the City known as the **Farmlands Planned Development ("Project")**, which is proposed to consist of ±182-acres; and,

WHEREAS, the Property Owners wish to improve the land comprising the PD, the legal description for which is described hereto in Exhibit "A," which is incorporated herein by reference ("Property"); and,

WHEREAS, as part of the approval process for the planned development required by the City of Alachua Land Development Regulation Section 2.4.3, an application to rezone the Property from Community Commercial ("CC"), Commercial Intensive ("CI"), and Planned Development – Residential ("PD-R") to PD-R and Planned Development-Commercial ("PD-Comm") has been filed with the City; and,

WHEREAS, the Planning & Zoning Board, serving as the Local Planning Agency ("LPA"), recommended approval of the proposed rezoning from CC, CI, and PD-R to PD-R and PD-COMM at a quasi-judicial public hearing held on April 21, 2026; and,

WHEREAS, the City Commission held the first of two required quasi-judicial public hearings on June 8, 2026, to consider the proposed rezoning of the Property pursuant to Ordinance Number 26-10; and,

WHEREAS, the City and the Property Owners desire to proceed to the second and final reading on the proposed rezoning of the Property pursuant to Ordinance Number 26-10; and,

WHEREAS, concurrent with the second and final reading of the proposed rezoning for the Property, a PD Agreement and a PD Master Plan are required to be approved.

NOW, THEREFORE, in consideration of the foregoing premises, the Parties hereby agree as follows:

1. The above RECITALS are true and correct and incorporated as material portions of this PD Agreement by reference.

2. Each Developer shall plan and construct, at the Developer's sole expense, the portion of the Project located on the portion of Property owned by such Developer, according to the specifications set forth in the City's LDRs; Ordinance 26-10, which is attached hereto as Exhibit "B" and agreed to by the Developer; and the PD Master Plan documents, which are attached hereto as Exhibit "C."

3. A **final PD plan** for the Project (a **Preliminary Plat** or a **Site Plan**) must be submitted to the City within one (1) year from the City Commission's approval of this PD Agreement, Ordinance 26-10, and the PD Master Plan, for any part or section of the plan for development shown in the PD Master Plan. Upon submission, the PD shall be deemed extended until a final determination on the final PD plan has been rendered. In such case where the final determination is to deny and the one (1) year period has expired, this PD shall be deemed expired unless otherwise extended by the City Commission through an amendment to Ordinance 26-10 and this PD Agreement. If a **final PD plan** for any portion of the Project is not submitted within the required one (1) year period, it shall result in the expiration of the PD zone district classifications of the Project. If the PD zoning expires, the City shall have the right, but not the obligation, in the City's sole discretion, to conduct any hearings necessary to rezone the lands included within the Project to the previous zoning district of CC, CI, and PD-R.

4. Each Developer shall construct the portion of the Project that relates to such Developer's portion of the Property in accordance with the approved PD Master Plan. Deviations from the PD Master Plan that constitute substantial changes as described in Section 2.4.3 of the City's LDRs must be approved in advance by the City Commission through an amendment to Ordinance Number 26-10 and this PD Agreement.

5. The approval and execution of this PD Agreement does not reserve concurrency for the Project or Property. Concurrency will be re-evaluated at time of review for any final PD plan in accordance with Section 2.4.14 of the City's Land Development Regulations.
6. The approval and execution of this PD Agreement does not guarantee the approval of any development permits, including but not limited to a preliminary plat, construction plans, final plat, or a site plan for the Project, or for any part or section thereof, for the Developer or their successors or assigns.

7. Nothing contained in this PD Agreement shall relieve any of the Developers, or their successors, assigns, or anyone acting on the Developers' behaves, from obtaining all local, regional, state, or federal permits or complying with any applicable ordinance, law, rule, or regulation necessary for the development of the Project. In the event that a Developer, and their contractors, subcontractors, or anyone for whose acts the Developer or their contractors or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule, or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person, the City, through its City Manager or designee, shall have the right to stop work until appropriate corrective measures are taken, in addition to any other remedies available to the City.

8. The Developer, or their successors and/or assigns, shall indemnify and hold harmless the City, and its officers, agents, employees, or anyone acting directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in the performance of work, down time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Developer, or their successors and/or assigns, and their contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Developer for whose acts the Developer, or their contractors or subcontractors, may be liable or responsible. The Developer, or their successors and/or assigns, further agrees that the Developer, or their successors and/or assigns, shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this PD Agreement, or from responsibility under the indemnification clause contained herein by employment of independent contractors or subcontractors or other entities. The Developer, or their successors and/or assigns, shall remain liable to the City notwithstanding any attempt by the Developer, or their successors and/or assigns, to pass any responsibility stated herein to its contractor, subcontractor, or other agent or employee at all times during the existence of this PD Agreement.

9. The Developer, or their successors and/or assigns, shall pay all costs for the recording of this PD Agreement, the PD Master Plan, and Ordinance 26-10.

10. The City may, in its sole discretion, withhold any and all inspections, permits, certificates, or approvals for the Project if such action is deemed necessary by the City to secure a Developer's, or their successors' and/or assigns', compliance with the terms of this PD Agreement, including all documents attached hereto or referenced herein.

11. Except as otherwise provided in this PD Agreement, any notice, request, or approval from any party to the other parties must be in writing and sent by certified mail, return receipt requested; overnight delivery with proof of delivery; or by personal delivery. Such notice shall be deemed to have been received when either deposited in the United States Postal Service mailbox, delivered by the United States Postal Service, delivered to the courier, or personally delivered with a signed proof of delivery. For purposes of notice, the Parties and their respective representatives and addresses (or such Parties and address as may be later specified by notice pursuant to this Section) are:

City:

ATTN: Planning Division
City of Alachua
P.O. Box 9

14276 SW 4th Place
Newberry, Florida 32669

12. The Parties each bind the other and their respective successors and assigns in all respects to all of the terms, conditions, covenants, and provisions of this PD Agreement.

13. If any section, sentence, clause, phrase, or provision of this PD Agreement is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or

unconstitutionality shall not affect the remaining provisions of this PD Agreement, and the remainder of the PD Agreement after the exclusions of such part or parts shall be deemed to be valid.

14. The failure of any of the Parties to exercise any right in this PD Agreement shall not constitute a waiver of such right in the event of any future default or noncompliance with it.

15. This PD Agreement is entered into by the City pursuant to the City's home rule powers, including police powers, as set forth in the Florida Constitution and the laws of the State of Florida to regulate the development of land. The City and the Property Owners expressly acknowledge and agree that this PD Agreement constitutes a regulatory document, and nothing herein, expressed or implied, is intended or shall be construed as establishing a contract upon which a cause of action for breach, monetary damages, or otherwise may be based. Further, no term or condition of this PD Agreement shall be construed as to proscribe, limit, or affect the ability of the City to enforce its Comprehensive Plan, its Land Development Regulations, or any other authority granted by law with respect to the Project, and nothing herein, expressed or implied, contracts away any of the City's police powers, regulatory authority, and/or immunities.

16. The Parties may amend this PD Agreement only by mutual written agreement of the Parties and including the City Commission.

17. This PD Agreement shall not be construed more strictly against one party than against the other party merely by virtue of the fact that it may have been prepared by one of the Parties. It is recognized that all Parties have contributed to the preparation of this PD Agreement and have had the opportunity to consult with legal counsel before signing it.

18. The Property Owners agree that the terms and requirements of this PD Agreement, PD Master Plan, and Ordinance 26-10 do not inordinately burden the Property described in Exhibit "A", the PD, or the Project.

19. This PD Agreement constitutes the entire agreement of the Parties and supersedes all prior written or oral agreements, understandings, or representations.

20. In the event of any question or dispute arising out of or related to this PD Agreement or action to interpret this PD Agreement, the Property Owners shall exhaust any and all administrative remedies under the City's Land Development Regulations. Thereafter, the Property Owners' remedies in filing a lawsuit shall be limited solely to an action for declaratory judgment. In no event shall the Property Owners, their successors or assigns, have any cause

of action for monetary damages against the City for any question or dispute arising out of or related to this PD Agreement or any action to interpret this PD Agreement, and nothing herein, expressed or implied, waives or should be construed as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida.

21. This PD Agreement is governed in accordance with the laws of the State of Florida. Venue for any action arising out of or related to this PD Agreement shall be in the Circuit Court of Alachua County, Florida.

UTILITY PLAN GENERAL NOTES
1. POTABLE WATER: AN 8-INCH POTABLE WATER MAIN RUNS ALONG THE NW 188TH STREET RIGHT-OF-WAY. DIRECT CONNECTION IS ANTICIPATED.
2. SANITARY SEWER: AN 8-INCH SEWER FORCE MAIN AND LIFT STATION ARE LOCATED IMMEDIATELY NORTH EAST OF PROJECT SITE ALONG US HIGHWAY 441. CONNECTION TO THIS FACILITY IS PROPOSED.
3. STORMWATER MANAGEMENT FACILITIES: STORMWATER MANAGEMENT SHALL BE LOCATED ON-SITE AND SHALL BE DESIGNED AND PERMITTED WITH THE CITY OF ALACHUA AND THE SUWANNEE RIVER WATER MANAGEMENT DISTRICT ACCORDING TO ALL APPLICABLE STANDARDS.
4. PUBLIC FACILITIES IMPACT: CONCURRENCY RESERVATION WILL BE MADE AT TIME OF FINAL PD APPROVAL. PROJECT CALCULATIONS ARE PROVIDED IN THE PD JUSTIFICATION REPORT AS INDICATED BELOW TO DEMONSTRATE THAT SUFFICIENT CAPACITY EXISTS TO ACCOMMODATE THE PROPOSED PROJECT.
5. LOCATION OF ALL PROPOSED UTILITIES ARE CONCEPTUAL AND MAY BE ADJUSTED AS PART OF THE FULL ENGINEERING DESIGN OF THE PROJECT, INCLUDING LIFT STATION LOCATION, WHICH WILL BE DETERMINED AT THE TIME OF FINAL DESIGN AND BE COORDINATED WITH CITY OF ALACHUA PUBLIC SERVICES DEPARTMENT FOR MOST APPROPRIATE LOCATION BASED ON SITE CONDITIONS.

GENERAL PD MASTER PLAN NOTES

1. LAND USES. SPECIFIC USES ALLOWED IN PD SHALL BE GENERALLY LOCATED AS SHOWN ON THE PD MASTER PLAN. THE FOLLOWING USES ARE ALLOWED IN "AREA C; COMMON AREA/STORMWATER/OPEN SPACE AREA": ACTIVE & PASSIVE USE AREAS (TRAILS, PARKS, PLAYGROUNDS, CLUBHOUSE & POOL, ETC.), LANDSCAPED AREAS, UTILITY EASEMENTS, AND STORMWATER MANAGEMENT FACILITIES. NON-RESIDENTIAL USES ARE ALLOWED WITHIN "AREA A". SINGLE FAMILY DETACHED PLATTED DWELLINGS ARE ALLOWED WITHIN "AREA B." THE MINIMUM LOT SIZE FOR ANY PROPOSED LOT ALONG THE PROJECT PERIMETER ABUTTING (PARCEL NUMBERS 3042-50, 3875, 3876-100) LAND WITH AGRICULTURE OR RESIDENTIAL ZONING WILL BE 1/2 ACRE. ALSO, A 10-FOOT WIDE (MINIMUM) "TYPE C" LANDSCAPE BUFFER SHALL BE PROVIDED ALONG THE COMMON PROPERTY LINE WITH PARCELS 3046-1 AND 3046-2 AND MINIMUM LOT SIZE FOR LOTS ABUTTING THESE PARCELS WILL BE 1/3 ACRE. ALL AREAS SHALL BE REGULATED AS PER DEFINED ON THIS MASTER PLAN, THE JUSTIFICATION REPORT, AND ADOPTING ORDINANCE. NON RESIDENTIAL USES MAY OCCUR WITHIN AREA C AS APPROVABLE BY THE CITY AND WATER MANAGEMENT DISTRICT.
2. OPEN SPACE. OPEN SPACE, AS DEFINED BY APPLICABLE SECTIONS OF THE LAND DEVELOPMENT REGULATIONS (LDRS) AND THE PD MASTER PLAN SHALL ACCOUNT FOR A MINIMUM OF 10% OF THE COMPLETED PROJECT AND THE GENERAL LOCATIONS ARE IDENTIFIED ON THE PD MASTER PLAN. OPEN SPACE AREAS MAY EXIST IN ANY LAND USE AREA AND MAY BE DEVELOPED AT ANY RATE. THESE AREAS MAY CONTAIN LOW-INTENSITIVE PASSIVE OR ACTIVE RECREATION OPPORTUNITIES THROUGHOUT THE OPEN SPACE AREAS, INCLUDING NATURE TRAILS, PATHS, SIDEWALKS, AND NATURAL AREAS. MORE ACTIVE RECREATION USES SUCH AS PLAYGROUNDS, PICNIC AREAS, PAVILIONS & GAZEBOS ARE ONLY PERMITTED IN OPEN SPACE AREAS THAT IS LOCATED IN THE CENTER/INTERIOR OF THE PROJECT. AMENITY CENTER AND ANY ASSOCIATED PARKING OR OUTDOOR COMPONENT SHALL BE SETBACK FROM NW 188TH STREET RIGHT-OF-WAY A MINIMUM OF 250'.
3. PHASING. THE DEVELOPMENT SHALL CONSIST OF NON-RESIDENTIAL AND RESIDENTIAL USES WITH UP TO 5 PHASES OVER A MAXIMUM OF 10 YEARS, WITH THE FIRST PHASE PRELIMINARY PLAT AND/OR SITE PLAN SUBMITTED TO THE CITY WITHIN 12 MONTHS OF ZONING APPROVAL. THE LOCATION OF EACH PHASE SHALL BE DESIGNED IN A MANNER THAT WILL CREATE A LOGICAL AND FUNCTIONAL DEVELOPMENT AND INFRASTRUCTURE PATTERN. SPECIFICALLY, PHASING SHALL GENERALLY OCCUR FROM NORTH TO SOUTH WITH BOUNDARIES FOR EACH PHASE DETERMINED BY ACCESS AND UTILITY INFRASTRUCTURE.
4. CIRCULATION. THE CIRCULATION CONFIGURATION IS IDENTIFIED ON THE PD MASTER PLAN AND IS NOT INTENDED TO BE EXACT AND MAY BE AMENDED AS PERMITTED WITHIN THE CITY LDR. ROADWAYS INTENDED TO BE DEDICATED TO THE PUBLIC MAY BE CONSISTENT WITH THE TYPICAL SECTION WITHIN THE MASTER PLAN AND SHALL BE REQUIRED TO MEET THE APPLICABLE LDR DESIGN CRITERIA, UNLESS OTHERWISE AUTHORIZED BY THE CITY COMMISSION THROUGH LDR SEC. 3.6.3(A)(5)(B)(III). THE INTERNAL ROADWAYS SHOWN ON THE PD MASTER PLAN ARE INTENDED TO BE NEIGHBORHOOD STREETS AND ARE NOT REQUIRED TO MEET THE ARTERIAL OR COLLECTOR ROADWAY DEFINITION.
5. LANDOWNER/DEVELOPER RESPONSIBILITY. THE LANDOWNER AND/OR DEVELOPER IS RESPONSIBLE FOR PROVIDING RIGHT-OF-WAY AND/OR EASEMENTS FOR CONSTRUCTING ON-SITE INFRASTRUCTURE LOCATED IN THE PROPOSED PD-R AND PD-COMM DISTRICTS, INCLUDING BUT NOT LIMITED TO ELECTRICAL UTILITY LINE, TELEPHONE LINES, CABLE TV LINES, OR THE UNDERGROUND CONDUIT FOR SUCH FEATURES. THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING AREAS FOR PUBLIC INFRASTRUCTURE AS REQUIRED BY CITY ORDINANCES, TO GUARANTEE CONSTRUCTION OF REQUIRED INFRASTRUCTURE AND, IF REQUESTED BY THE CITY, TO DEDICATE THESE IMPROVEMENTS TO THE CITY IN A FORM COMPLING WITH CITY REGULATIONS. FACILITIES NOT DEDICATED TO THE CITY SHALL BE OPERATED AND MAINTAINED BY A PROPERTY OR COMMERCIAL OWNERS ASSOCIATION FORMED AS PART OF THE SUBDIVISION / DEVELOPMENT PROCESS.
6. ALLOWABLE LAND USE CLASSIFICATION DATA. FIGURES FOR ACREAGE ARE ESTIMATES AND HAVE BEEN ROUNDED TO THE NEAREST TENTH OF AN ACRE AND MAY BE SLIGHTLY ADJUSTED.
7. STORMWATER. THE PROJECT SHALL UTILIZE ON-SITE STORMWATER SYSTEMS THAT ARE DESIGNED AND PERMITTED BY THE CITY OF ALACHUA AND THE SUWANNEE RIVER WATER MANAGEMENT DISTRICT (SRWMD) PER ALL APPLICABLE STANDARDS. STORMWATER SYSTEMS MAY EXIST IN ANY LAND USE AREA.
8. STREET STANDARDS. REGARDLESS OF OWNERSHIP OF MAINTENANCE OF STREETS, ALL SIDEWALKS, AND CROSSWALKS WILL MEET CURRENT FDOT DESIGN MANUAL CHAPTER 222 PEDESTRIAN FACILITIES STANDARDS AND CITY OF ALACHUA REGULATIONS, UNLESS OTHERWISE STIPULATED IN THE PD MASTER PLAN.
9. EXISTING VEGETATION. REGULATED TREES SHALL BE SURVEYED AND LOCATION IDENTIFIED DURING THE SUBDIVISION DESIGN PLAT AND/OR DEVELOPMENT PLAN PHASE IN ORDER TO PRESERVE EXISTING TREES TO THE GREATEST EXTENT PRACTICABLE. THE PD SHALL ALLOW FOR FLEXIBILITY IN ROAD AND LOT CONFIGURATION IN ORDER TO PRESERVE ON-SITE CANOPY AREAS WHICH WILL ENHANCE THE PROJECT BY PROVIDING SHADED GREEN SPACES, ADJACENCY BUFFERS, ETC.
10. ENVIRONMENTAL ASSESSMENT. AN ENVIRONMENTAL ASSESSMENT WILL BE REQUIRED AT TIME OF FINAL PD PLAN/ PRELIMINARY PLAT/ SITE PLAN APPROVAL THAT INCLUDES A 100% GOPHER TORTOISE AND BURROWING OWL SURVEY. A CONDITION WILL BE REQUIRED THAT STANDARD MEASURES OF PROTECTION FOR EASTERN INDIGO SNAKES, IF APPLICABLE.
11. CONSTRUCTION ACCESS. NO CONSTRUCTION VEHICLES SHALL ACCESS THE SITE FROM NW 188TH STREET DURING DEVELOPMENT OF PROPERTY.

PD – RESIDENTIAL

12. LOT SETBACK AND SEPARATIONS. HOUSING UNITS AND DESIGN SHALL AT A MINIMUM MEET THE REQUIREMENT OF THE FLORIDA BUILDING CODE. THE APPLICABLE SETBACKS ARE DEFINED ON THE PD MASTER PLAN.
13. BLOCK FACES. ANY BLOCK FACES GREATER THAN 600' IN LENGTH SHALL INCLUDE A MINIMUM 20'-WIDE EASEMENT (WITH 10' SIDEWALK) FOR PEDESTRIAN WAY THROUGH THE BLOCK (TO BE IMPROVED WITH CONCRETE, BRICK, PAVERS OR SIMILAR), CONSISTENT WITH LDR SEC. 7.2.3(B)(2) AND SEC. 3.6.3(A)(5)(B)(III) TO ENHANCE PEDESTRIAN CIRCULATION. TRAFFIC CALMING MEASURES THAT MAY BE USED TO CONNECT THESE MID-BLOCK CUTS WITH EACH OTHER OR OTHER ELEMENTS OF THE PEDESTRIAN CIRCULATION NETWORK, INCLUDE RAISED PEDESTRIAN CROSSINGS, CHANGE IN MATERIALS, BULB-OUTS, ETC. THESE PEDESTRIAN WAYS SHALL BE PRIVATELY MAINTAINED, UNLESS A SEPARATE UNDERSTANDING HAS BEEN REACHED WITH CITY OF ALACHUA PUBLIC SERVICES.
14. USE SPECIFIC STANDARDS IN LDR. SEC. 4.3.1(A)(4)(D) ARE APPLICABLE TO SINGLE FAMILY DETACHED DWELLINGS WITHIN THE PROJECT AREA.

PD – COMMERCIAL

15. SPECIFIC DERIVATIONS AND ADJUSTMENTS TO BASE LDR'S ARE CONTAINED ON THIS PD MASTER PLAN, AND IN THE ADOPTING ORDINANCE AND JUSTIFICATION REPORT.
16. SEE SHEET P101 FOR PD-COMM CROSS SECTIONS AND DIMENSIONAL STANDARDS.
17. BICYCLE PARKING WILL BE PROVIDED AT A RATE OF 1 BICYCLE PARKING SPACES PER 5,000 SF OF GROSS FLOOR AREA. LOCATION OF BICYCLE PARKING SHALL BE LOCATED WITHIN 50 TO 100' OF PRIMARY BUILDING ENTRANCES AS PRACTICAL, PLACED OUTSIDE OF VEHICULAR AISLES AND WALKWAYS WITH A BIKE RACK THAT ALLOWS LOCKING OF THE FRAME AND WHEEL. THE LOCATION WILL BE DISTRIBUTED THROUGH THE RETAIL SITE AND OUTPARCELS. FINAL LOCATION WILL BE SHOWN ON THE DESIGN PLANS. A MINIMUM OF 2 BICYCLE PARKING SPACES ARE REQUIRED FOR STRUCTURES UNDER 10,000 SQUARE FEET IN GROSS FLOOR AREA.
18. THE PROPOSED PARKING FOR THE OUTPARCEL(S) RETAIL SERVICES/BUSINESS WILL BE PER THE CITY OF ALACHUA LAND DEVELOPMENT REGULATIONS (LDR). THE PROPOSED PARKING FOR THE SHOPPING CENTER RETAIL SERVICES WILL BE AS FOLLOWS: MINIMUM: 1 SPACE PER 305 SF PER GROSS FLOOR AREA; MAXIMUM=125% OF MINIMUM. SHOPPING CENTER IS A UNIFIED COMMERCIAL DEVELOPMENT CONTAINING THREE OR MORE BUSINESS ESTABLISHMENTS, INCLUDING BUT NOT LIMITED TO GENERAL MERCHANDISE STORES, RETAIL STORES, RESTAURANTS, GROCERY STORES, SPECIALTY SALES ESTABLISHMENTS, AND SERVICES USERS.
19. THE PROPOSED PD MASTER PLAN SHOWS THE PROPOSED PERIMETER BUFFERS FOR THE PD-COMM. FOR THE OUTPARCEL(S) A MINIMUM OF 5' LANDSCAPE BUFFER STRIP IS REQUIRED ON LOT SIDES AS THEY ARE CREATED.
20. WALL SIGNAGE SHALL BE IN ACCORDANCE WITH SECTION 6.5.4(C)(3), EXCEPT THAT IN THE CASE OF MULTI-TENANT BUILDINGS, EACH OCCUPANT OF THE MULTI-TENANT BUILDING SHALL BE PERMITTED WALL SIGNAGE FOR THE PORTION OF THE BUILDING ELEVATION WHICH IS INCLUDED AS PART OF THE OCCUPANT'S PREMISES IN AN AMOUNT NOT TO EXCEED 10% OF THE RESPECTIVE PORTION OF THE BUILDING ELEVATION.

A. PROJECT

1. Project Name: Farmlands Planned Development
2. Address of Subject Property: 16400 - 18800 block of US Highway 441
3. Parcel ID Number(s): 3046-3-0, 3046-3-1, 3046-3-2, 3046-3-3, 3046-3-4, 3046-3-5, 3042-50-3, 3042-50-4, 3042-50-10, 3042-51-1, 3042-50-5, 3875-1-1, 3875-10-1 & 3875-10-2
4. Existing Use of Property: Undeveloped / Tree Farm
5. Future Land Use Map Designation : Commercial, Community Commercial, Moderate Density Residential & Low Density Residential
6. Existing Zoning Designation: CI, CC & PD-R
7. Proposed Zoning Designation: PD-COMM & PD-R
8. Acreage: 182 +/-

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☒ Agent
2. Name of Applicant(s) or Contact Person(s): Clay Sweger, AICP, LEED AP Title: Director of Planning
   Company (if applicable): eda consultants, inc.
   Mailing address: 720 SW 2nd Avenue, South Tower, Suite 300
   City: Gainesville State: FL ZIP: 32601
   Telephone: ( ) 352-373-3541 FAX: ( ) N/A e-mail: csweger@edafl.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): See attached list of owners.
   Mailing Address: _____
   City: _____ State: _____ ZIP: _____
   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☐ Yes ☒ No
   If yes, list names of all parties involved: Current property owners and Rise Development.
   If yes, is the contract/option contingent or absolute? ☒ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change, including a map showing the proposed zoning change and zoning designations on surrounding properties
2. A current aerial map or plat of the property. (may be obtained from the Alachua County Property Appraiser.)
3. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.
4. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

5. Analysis of compliance with the Standards for Site Specific Amendments to the Official Zoning Atlas, as defined in Section 2.4.2 of the Land Development Regulations (LDRs), and listed below:

   i. *Consistent with Comprehensive Plan*
   The proposed amendment is consistent with and furthers the goals, objectives, and policies of the Comprehensive Plan.

   ii. *Consistent with Ordinances*
   The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

   iii. *Logical Development Pattern*
   The proposed amendment would result in a logical and orderly development pattern.

   iv. *Pre-Mature Development*
   The proposed amendment will not create premature development in undeveloped or rural areas.

   v. *Incompatible with Adjacent Lands*
   The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

   vi. *Adverse Effect on Local Character*
   The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights, or other physical effects or nuisances.

   vii. *Not Deviate from Pattern of Development*
   The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

   viii. *Encourage Sprawl*
   The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low density single dimensional development.

   ix. *Spot Zoning*
   The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

   x. *Public Facilities*
   The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, storm water management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

   xi. *No Adverse Effect on the Environment*
   The proposed amendment would not result in significantly adverse impacts on the natural environment, including but not limited to water, air, noise, storm water management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

6. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's Land Development Regulations
   ii. Copy of written notice (letter) sent to all property owners within 400 feet, and mailing labels or list of those who received written notice
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

8. For applications requesting a zoning which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

Site Specific Amendment to the Official Zoning Atlas Amendment (Rezoning) Application

Reference City of Alachua Land Development Regulations Article 2.4.2

A. PROJECT

1. Project Name: Farmlands Planned Development
2. Address of Subject Property: 16400 - 18800 block of US Highway 441
3. Parcel ID Number(s): 3046-3-0, 3046-3-1, 3046-3-2, 3046-3-3, 3046-3-4, 3046-3-5, 3042-50-3, 3042-50-4, 3042-50-10, 3042-51-1, 3042-50-5, 3875-1-1, 3875-10-1 & 3875-10-2
4. Existing Use of Property: Undeveloped / Tree Farm
5. Future Land Use Map Designation : Commercial, Community Commercial, Moderate Density Residential & Low Density Residential
6. Existing Zoning Designation: CI, CC & PD-R
7. Proposed Zoning Designation: PD-COMM & PD-R
8. Acreage: 182 +/-

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☒ Agent
2. Name of Applicant(s) or Contact Person(s): Gerry Dedenbach, AICP, LEED AP Title: VP Infrastructure Florida
   Company (if applicable): 11801 Research Circle
   Mailing address: 11801 Research Circle
   City: Alachua State: FL ZIP: 32615
   Telephone: ( ) 352-518-5120 FAX: ( ) N/A e-mail: gerry.dedenbach@nv5.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): See attached list of owners.
   Mailing Address: _____
   City: _____ State: _____ ZIP: _____
   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☐ Yes ☒ No
   If yes, list names of all parties involved: Current property owners and Rise Development.
   If yes, is the contract/option contingent or absolute? ☒ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change, including a map showing the proposed zoning change and zoning designations on surrounding properties
2. A current aerial map or plat of the property. (may be obtained from the Alachua County Property Appraiser.)
3. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.
4. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

5. Analysis of compliance with the Standards for Site Specific Amendments to the Official Zoning Atlas, as defined in Section 2.4.2 of the Land Development Regulations (LDRs), and listed below:

   i. *Consistent with Comprehensive Plan*
   The proposed amendment is consistent with and furthers the goals, objectives, and policies of the Comprehensive Plan.

   ii. *Consistent with Ordinances*
   The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

   iii. *Logical Development Pattern*
   The proposed amendment would result in a logical and orderly development pattern.

   iv. *Pre-Mature Development*
   The proposed amendment will not create premature development in undeveloped or rural areas.

   v. *Incompatible with Adjacent Lands*
   The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

   vi. *Adverse Effect on Local Character*
   The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights, or other physical effects or nuisances.

   vii. *Not Deviate from Pattern of Development*
   The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

   viii. *Encourage Sprawl*
   The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low density single dimensional development.

   ix. *Spot Zoning*
   The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

   x. *Public Facilities*
   The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, storm water management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

   xi. *No Adverse Effect on the Environment*
   The proposed amendment would not result in significantly adverse impacts on the natural environment, including but not limited to water, air, noise, storm water management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

6. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's Land Development Regulations
   ii. Copy of written notice (letter) sent to all property owners within 400 feet, and mailing labels or list of those who received written notice
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

8. For applications requesting a zoning which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

PUBLIC SCHOOL STUDENT GENERATION CALCULATION FORM

PROJECT # | **APPLICATION DATE** Oct. 30, 2025

NAME & DESCRIPTION OF PROJECT Farmlands Planned Development - Rezoning

A proposed rezoning that reduces the maximum permitted density from 275 to 203 units (-72).

PROJECT ADDRESS (Contact 911 Addressing @ 352.338.7361) 16600-18800 block of US Hwy 441

Tax Parcel Numbers 3046-3-0, 3046-3-1, 3046-3-2, 03046-3-3, 3046-3-4, 3046-3-5, 3042-50-3

3042-50-4, 3042-50-10, 3042-51-1, 3042-50-5, 3875-1-1, 3875-10-1 & 3875-10-2

Acreage 182+/-

DEVELOPMENT DATA (check all that apply)

- [x] Single Family — Number of Units: -72
- [ ] Multi Family — Number of Units:
- [ ] Exempt (See exemptions on page 2)

Level of Review

- [ ] Pre-Application Conference
- [ ] Preliminary
- [ ] Final
- [ ] Revised
- [ ] Staff Administrative Review

A determination that there is adequate school capacity for a specific project will satisfy requirements for review for school concurrency for the periods of time consistent with the Interlocal Agreement and specified in local government land development regulations; an agreement by the School Board with the developer and local government is required to extend the period for approvals for phased projects beyond the generally applicable time period

EXPLANATION OF STUDENT GENERATION CALCULATION

Student Generation is calculated based on the type of residential development and the type of schools. The number of student stations (by school type - Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. Calculations are rounded to the nearest whole number. Student Generation for each school type is calculated individually to assess the impact on the **School Concurrency Service Area (SCSA)** for each school type (Elementary, Middle and High School).

SCHOOL CONCURRENCY SERVICE AREAS (SCSA) FOR PROJECT LOCATION

Based on the project location, please identify the corresponding School Concurrency Service Areas for each school type. Maps of the SCSAs may be viewed on the Alachua County Public Schools website.

SCHOOL CONCURRENCY SERVICE AREAS (SCSA)

Elementary Northwest Alachua | **Middle** Mebane | **High** Santa Fe

SINGLE FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY	-72	**units X 0.12 Elementary School Multiplier**	-9	**Student Stations**
MIDDLE	-72	**units X 0.06 Middle School Multiplier**	-5	**Student Stations**
HIGH	-72	**units X 0.09 High School Multiplier**	-7	**Student Stations**

MULTI FAMILY RESIDENTIAL DEVELOPMENT STUDENT GENERATION CALCULATIONS

ELEMENTARY		**units X 0.06 Elementary School Multiplier**		**Student Stations**
MIDDLE		**units X 0.03 Middle School Multiplier**		**Student Stations**
HIGH		**units X 0.03 High School Multiplier**		**Student Stations**

EXEMPT DEVELOPMENTS (click all that apply)

☐ *Existing legal lots eligible for a building permit*

☐ *Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired*

☐ *Amendments to final development orders for residential development approved prior to the effective date for public school concurrency, and which do not increase the number of students generated by the development*

☐ *Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public School Facilities Element or the ILA*

☐ *Group quarters that do not generate public school students, as described in the ILA*

Warranty Deed

This Warranty Deed made this **14th** day of **August, 2019** between **GOLDEN POND FARMS, INC., a Florida corporation** whose post office address is **P.O. Box 357133, Gainesville, FL 32635**, grantor, and **JTFA LLC, a Florida limited liability company** whose post office address is **4881 N.W. 8th Ave., Ste. 4 , Gainesville, FL 32605**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Alachua County**, **Florida** to-wit:

A tract of land lying in Sections 8 and 17, Township 8 South, Range 18 East, Alachua County, Florida, being more particularly described as follows:

Commence at the Southwest corner of said Section 8 and thence run N 87°26'55" E along the South line of said Section 8, a distance of 50.03 feet to the East right-of-way line of NW 188th Street and the POINT OF BEGINNING; thence continuing N 87°26'55" E along said South line, a distance of 1265.99 feet to the West line of the East Half of the Southwest 1/4 of said Section 8; thence run N 05°57'06" W, along said West line, a distance of 1355.00 feet; thence run N 88°18'49" E, a distance of 1323.39 feet; thence run S 05°28'46" E, a distance of 2646.72 feet to the South line of the North Quarter of Section 17, Township 8 South, Range 18 East; thence run S 87°27'46" W, along said South line, a distance of 563.44 feet to the centerline of Old Railroad 200 foot right-of-way, being the point of curvature of a non-tangent curve, concave to the Northeast, having a radius of 1903.25 feet, a central angle of 26°22'58", and a chord distance of 868.66 feet and bearing of N 47°05'05" W; thence run Northwesterly along said curve, an arc distance of 876.38 feet to the Point of Tangency of said curve; thence run N 33°53'26" W, along said centerline, a distance of 387.32 feet to the East line of the Northwest 1/4 of the Northwest 1/4 of said Section 17; thence run S 03°10'53" E, along said East line, a distance of 167.35 feet; thence run S 87°25'30" W, a distance of 1199.80 feet; thence run N 82°03'26" W, a distance of 64.91 feet to the aforesaid East right-of-way line of NW 188th Street; thence run N 03°27'31" W, along said right-of-way line, a distance of 516.55 feet to the Point of Beginning.

Containing 88.98 acres, more or less.

Parcel Identification Number: 03875-001-000, 010-001, 010-002;03042-050-005

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

DoubleTime®

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2018**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Warranty Deed

This Warranty Deed made this **4th** day of **November, 2020** between **GOLDEN POND FARMS, INC., a Florida corporation** whose post office address is **P.O. Box 357133, Gainesville, FL 32635**, grantor, and **AYLA, LLC, a Florida limited liability company** whose post office address is **4881 N.W. 8th Ave., Ste. 4 , Gainesville, FL 32605**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Alachua County, Florida** to-wit:

A tract of land lying in Section 8, Township 8 South, Range 18 East, Alachua County, Florida, being more particularly described as follows:
Commencing at the Southeast corner of said Section 8 and thence run S 87° 26' 55" W, along the South line of said section, a distance of 1332.40 feet; thence N 1° 54' 18" W, a distance of 1190.19 feet; thence S 88° 18' 49" W, a distance of 122.29 feet to an iron pin; thence N 7° 06' 04" E, a distance of 122.68 feet to an iron pin; thence S 88° 18' 49" W, a distance of 496.85 feet to an iron pin; thence N 1° 19' 51" W, a distance of 636.63 feet to iron pin on the South right-of-way line of US Highway No. 441; thence N 79° 04' 33" W, along said right-of-way line, a distance of 300.00 feet to Point of Beginning; thence continue N 79° 04' 33" W, along said right-of-way line, a distance of 590.53 feet to a concrete monument on the West line of old George Smyder lands; thence S 5° 28' 46" E, along said West line, a distance of 832.86 feet; thence N 88° 18' 49" E, a distance of 516.83 feet; thence N 1° 19' 51" W, a distance of 702.12 feet to the South right-of-way line of US Highway No. 441 and the Point of Beginning.

Parcel Identification Number: 03042-051-001

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2019**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

SPECIAL WARRANTY DEED

THIS INDENTURE, made as of and effective the 28th day of September, 2020, by and between **SOUTHERN WRECKER & RECOVERY, L.L.C.**, a Florida limited liability company (the "Grantor"), whose address is 6831 West Beaver Street, Jacksonville, Florida 32254 and **FIRST COAST ROAD RANGERS, LLC**, a Florida limited liability company (the "Grantee"), whose address is 11461 Boote Blvd., Jacksonville, Florida 32218.

W I T N E S S E T H:

THAT THE GRANTOR, for and in consideration of the sum of Ten and No/100 Dollars ($10.00), to Grantor in hand paid by the Grantee, the receipt of which is hereby acknowledged, have granted, bargained and sold to the Grantee, and does hereby grant, bargain and sell to the Grantee, its successors and assigns forever, the following described lands, situate, lying and being in the County of Alachua, State of Florida (the "Land") described on Exhibit A attached.

TOGETHER WITH all of the improvements now or hereafter erected on the Land, and all easements, tenements, hereditaments, appurtenances, and fixtures now or hereafter a part of the Land (collectively with the Land, being the "Property"), subject only to the matters set forth on Exhibit B attached (the "Permitted Exceptions"), but the reference herein shall not serve to reimpose the same.

To have and to hold the Property in fee simple forever.

Subject to the Permitted Exceptions, Grantor does hereby fully warrant the title to said Property and that Grantor has good right and lawful authority to sell and convey the Property and will defend the same against the lawful claims of all persons claiming by, through or under the Grantor, but against none other.

Without warranty or representation, Grantor also conveys to Grantee any interest it may have in the following: (i) the land lying in the bed of any street, highway, road or avenue, opened or proposed, public or private, in front of or adjoining the Property to the center line thereof, (ii) any rights of way, appendages, appurtenances, easements, sidewalks, alleys, gores or strips of land adjoining or appurtenant to the Property or any portion thereof and used in conjunction therewith, (iii) any development rights appurtenant to the Property or any portion thereof, and (iv) any award or payment made or to be made in lieu of any of the foregoing or any portion thereof and any unpaid award for damage to the Property.

IN WITNESS WHEREOF, Grantor has hereunto set its hand and seal the day and year first above written.

Warranty Deed

This Warranty Deed made this 25th day of March, 2021, between **Gregory S. Gerard**, whose post office address is 440 Jeff Clements Road, Marion, KY 42064, grantor, and **Jack's Small Engine Repair LLC, a Florida limited liability company**, whose post office address is 16530 N. W. US Highway 441, Alachua, FL 32615, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in Alachua County, Florida to-wit:

A part of the E 1/2 of the SW 1/4 of Section 8, Township 8 South, Range 18 East, Alachua County, Florida, being more particularly described as follows:

Commence at the Southwest corner of said Section 8 and run thence N.87°26'55"E., along the south boundary of said section, 1316.02 feet to the West line of said E 1/2 of SW 1/4, thence N.05°57'06"W., along said West line, 2491.84 feet to a concrete monument (PLS 509) on the Southerly right-of-way line of U. S. Highway 441 (200' R/W) (aka State Road 25), thence S.79°04'33"E.,along said right-of-way line, 1186.29 feet to rebar and cap (PLS 1824) and the POINT OF BEGINNING; thence continue S.79°04'33"E. along said right-of-way line, 200.00 feet to a concrete monument (PLS 509), thence S.05°28'46"E. 454.09 feet to a rebar and cap (PLS 1824), thence N.79°04'33" W., 200.00 feet to a rebar and cap (PLS 1824), thence N.05°28'46"W., 454.09 feet to the P.O.B.

Subject to and together with covenants, easements, reservations and restrictions of record, and taxes for the year **2021** and all subsequent years.

THE LAND DESCRIBED HEREIN IS NOT THE HOMESTEAD OF THE GRANTOR, OR HIS SPOUSE, NOR IS IT CONTIGUOUS TO OR A PART OF HOMESTEAD PROPERTY, AND NEITHER THE GRANTOR NOR THE GRANTOR'S SPOUSE, NOR ANYONE FOR WHOSE SUPPORT THE GRANTOR IS RESPONSIBLE, RESIDE ON OR ADJACENT TO SAID LAND.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2020**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Signed, sealed and delivered in our presence:

THENCE NORTH 88°39'21" EAST, ALONG THE NORTH LINE OF SAID LANDS, A DISTANCE OF 1206.50 FEET TO A POINT ON THE EAST LINE OF THE NORTHWEST QUARTER OF THE NORTHWEST QUARTER OF SAID SECTION 17; THENCE NORTH 01°27'43" WEST, ALONG SAID EAST LINE OF THE NORTHWEST QUARTER OF THE NORTHWEST QUARTER, A DISTANCE OF 154.12 FEET TO A POINT ON SAID CENTERLINE OF THE ABANDONED ATLANTIC COAST LINE RAILROAD; THENCE SOUTH 32°39'49" EAST, ALONG SAID CENTERLINE, A DISTANCE OF 371.74 FEET TO THE POINT OF CURVATURE OF A CURVE CONCAVE TO THE NORTHEAST WITH A RADIUS OF 1903.25 FEET; THENCE SOUTHEASTERLY ALONG THE ARC OF SAID CURVE AND SAID CENTERLINE THROUGH A CENTRAL ANGLE OF 26°22'49", A DISTANCE OF 876.30 FEET TO THE SOUTH LINE OF THE NORTH QUARTER OF SAID SECTION 17, TOWNSHIP 8 SOUTH, RANGE 18 EAST (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 45°51'13" EAST, 868.58 FEET); THENCE NORTH 88°41'22" EAST, ALONG SAID SOUTH LINE OF THE NORTH QUARTER OF SECTION 17, A DISTANCE OF 563.07 FEET TO THE SOUTHEAST CORNER OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727 OF SAID PUBLIC RECORDS; THENCE NORTH 04°14'37" WEST, ALONG THE EAST LINE OF SAID LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 4710, PAGE 1727, A DISTANCE OF 2516.95 FEET; THENCE SOUTH 86°48'45" WEST, A DISTANCE OF 687.72 FEET; THENCE SOUTH 03°11'15" EAST, A DISTANCE OF 279.72 TO A POINT OF CURVATURE OF A CURVE CONCAVE TO THE WEST WITH A RADIUS OF 605.00 FEET; THENCE SOUTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 26°32'59", A DISTANCE OF 280.34 FEET TO AN INTERSECTION WITH A RADIAL LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 10°05'15" WEST, 277.84 FEET); THENCE NORTH 66°38'16" WEST, ALONG SAID RADIAL LINE, A DISTANCE OF 410.00 FEET TO A RADIAL INTERSECTION WITH A CURVE CONCAVE TO THE NORTHWEST WITH A RADIUS OF 195.00 FEET; THENCE SOUTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 01°39'36", A DISTANCE OF 5.65 FEET TO AN INTERSECTION WITH A NON–TANGENT LINE (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF SOUTH 24°11'32" WEST, 5.65 FEET); THENCE SOUTH 87°08'38" WEST, ALONG SAID NON–TANGENT LINE, A DISTANCE OF 271.11 FEET TO AN INTERSECTION WITH A NON–TANGENT CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 4000.00 FEET AND A RADIAL BEARING OF SOUTH 38°36'07" WEST AT SAID INTERSECTION; THENCE NORTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 00°40'02", A DISTANCE OF 46.58 FEET TO THE POINT OF COMPOUND CURVATURE WITH A CURVE CONCAVE TO THE SOUTHWEST WITH A RADIUS OF 645.00 FEET (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 51°43'54" WEST, 46.58 FEET); THENCE NORTHWESTERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 17°36'53", A DISTANCE OF 198.30 FEET TO AN INTERSECTION WITH A NON–TANGENT CURVE CONCAVE TO THE WEST WITH A RADIUS OF 645.00 FEET (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 60°52'21" WEST, 197.52 FEET); THENCE NORTHERLY ALONG THE ARC OF SAID CURVE THROUGH A CENTRAL ANGLE OF 09°04'35", A DISTANCE OF 102.17 FEET TO THE POINT OF TANGENCY (SAID ARC BEING SUBTENDED BY A CHORD HAVING A BEARING AND DISTANCE OF NORTH 01°21'02" EAST, 102.07 FEET); THENCE NORTH 03°11'15" WEST, A DISTANCE OF 1024.43 FEET; THENCE NORTH 02°45'20" EAST, A DISTANCE OF 50.00 FEET; THENCE NORTH 87°13'16" WEST, A DISTANCE OF 28.99 FEET; THENCE NORTH 02°46'44" EAST, A DISTANCE OF 120.00 FEET TO THE POINT OF BEGINNING.

CONTAINING 122.03 ACRES, MORE OR LESS.

Surveyor's Notes

1. The bearings shown hereon are based upon the West line of Section 08, Township 08 South, Range 18 East as being North 05 Degrees, 01 Minute, 08 Seconds West.
2. The distances shown are in feet and are in the horizontal plane.
3. No search of the public records has been conducted by this office.
4. This description and sketch or the copies thereof are not valid without the signature and the original raised seal of a Florida licensed surveyor and mapper, unless accompanied by an electronic signature in accordance with Chapter 5J–17.062, Florida Administrative Code.
5. Abbreviations:

POC	Point of Commencement
POB	Point of Beginning
Sec	Section
Twn	Township
Rng	Range
PB	Plat Book
ORB	Official Records Book
Pg(s)	Page or Pages
R/W	Right–of–Way
R	Radius
L	Arc Length
D	Delta (Central) Angle
CB	Chord Bearing
CD	Chord Distance
(R)	Radial

NOTICE OF NEIGHBORHOOD WORKSHOP

Date: Wednesday, September 24, 2025

Time: 6:00 p.m.

Place: Legacy Park Multipurpose Center - Meeting Room 1
15400 Peggy Road, Alachua, Fl 32615

Contact: eda consultants, inc.
(352) 373-3541
permitting@edafl.com

A neighborhood workshop will be held to discuss proposed future land use map changes for all or a portion of 3 tax parcels (03046-003-000, 03042-050-005, and 03042-050-004) from Community Commercial, Low Density Residential and Moderate Density Residential to Commercial and from Low Density Residential to Moderate Density Residential and a rezoning from Community Commercial (CC) and PD-R to Commercial Intensive (CI). There is also a proposed Planned Development – Residential (PD-R) zoning amendment application on all or portions of 10 tax parcels (03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03042-050-005, 03875-001-001, 03875-010-001 & 03875-010-002). These properties are generally located in the 16600 block of US Highway 441 (south side). This is not a public hearing. The purpose of this meeting is to inform members of the public of the proposal and to seek their comments.

PUBLIC NOTICE

Neighborhood Meeting – Alachua Solar I Project

Alachua Solar I, LLC invites the public to attend a Neighborhood Meeting to discuss the proposed Alachua Solar I project, a planned 7.0 MW DC / 5.0 MW AC ground-mounted solar energy facility to be located on approximately 38 acres located at the City of Alachua Wastewater Treatment Plant property.

The purpose of the Neighborhood Meeting is to provide nearby property owners and interested members of the public an opportunity to:
- Learn more about the proposed solar project;
- Ask questions directly to the project representatives;
- Provide early input and feedback on the development.

Meeting Details:
- Date: Thursday, September 18th, 2025
- Time: 5:00 PM to 7:30 PM
- Location: 13302 Progress Blvd.
  Alachua, FL 32615 (Project Site)

This meeting is intended to encourage open communication between the project stakeholders, nearby property owners, and the community. The Neighborhood Meeting provides an important opportunity for early public involvement and discussion.

For more information, or if you need special assistance, please contact:
Craig Fisher
Alachua Solar I, LLC
Phone: (305) 773-6993
Email: craig@morenienergy.com

ALACHUA COUNTY TODAY

Published Weekly
Alachua, Alachua County, FLORIDA

STATE OF FLORIDA
COUNTY OF ALACHUA:

Before the undersigned authority personally appeared **Bryan Boukari**, who on oath and in my physical presence says that he is the Manager of *Alachua County Today*, a weekly newspaper published at Alachua in Alachua County, Florida; that the attached copy of advertisement, **eda consultants – Neighborhood Workshop Notice - Farmlands Commerical LUC-ZON**, being a Public Notice in the Matter set forth at the beginning of the attached notice, was published in said newspaper in the issue(s) dated **September 4, 2025**.

Affiant further says that the website or newspaper complies with all legal requirements for publication in chapter 50, Florida Statutes. More specifically, *Alachua County Today* is a newspaper published at Alachua, in said Alachua County, Florida, and that the said newspaper has heretofore been continuously published in said Alachua County, Florida, each week and has been entered as periodicals matter at the post office in Alachua, in said Alachua County, Florida, for a period of one year next preceding the first publication of the attached copy of advertisement; and affiant further says that he (she) has neither paid nor promised any person, firm or corporation any discount, rebate, commission or refund for the purpose of securing this advertisement for publication in the said newspaper.

Sworn to and subscribed before me this **6th day of September 2025** by Bryan Boukari, who is personally known to me.

(Signature of Affiant)

Neighborhood Meeting Minutes

Project: Farmlands Commercial Land Use Change & Rezoning

Meeting Date & Time: September 24, 2025 at 6:00 p.m.

Community Participants: 12 participants in total (2 did not sign in)

Project Representatives: Clay Sweger, AICP, LEED AP – eda
Stephanie Sutton – eda
Ashley Scannella – eda
Sam Berry – Rise
Matt Phillips – Rise
Keith Lerner – Property Owner
Gerry Dedebach – NV5

Meeting Minutes:

The meeting was conducted open-house style. There were project representatives stationed throughout the room, with printed graphics on posters. As community participants arrived, they circulated throughout the room and asked questions about the proposed action. Below is the collected feedback from participants.

Q: What is the acreage of the subject property?
A: As shown on the maps on display, the future land use map change includes a reduction of 7 acres of Community Commercial land, reduction of approx. 20 acres of Moderate Density Residential land and a reduction of approx. 20 acres of Low Density Residential land. The future land use map proposes to add approx. 40 acres of Commercial land and 6 acres of Moderate Density Residential land. The zoning map proposes to reduce approx. 33 acres from PD-R and add 33 acres to Commercial Intensive. The PD-R will be amended in conjunction with these map changes.

Q: There are concerns with existing traffic and speed limits along US 441. What can be done?
A: The project will include a traffic study to be conducted to analyze the existing and proposed traffic conditions and the developer will be responsible for improvements to the roadway related to operational and safety improvements. The developer understands local concerns about traffic safety and the desire to request a reduction in posted speed along this portion of the roadway.

Q: Will there be a stoplight put in? Where?
A: Yes, the plan is to install a new traffic light in front of the commercial area as part of the future commercial development. A traffic study will be provided and coordination and permitting with FDOT.

Q: The posted speed is too high? What can be done?

A: FDOT makes decisions related traffic speeds. We will discuss this issue with FDOT as the traffic study is prepared. The reduced speed may be a recommendation from our traffic study which will be prepared shortly.

Q: What are the minimum lot sizes of the lots in the PD-R area?
A: The smallest lots are 10,000 SF and some are minimum 1/3 acre and ½ acre in size in certain labeled areas. These requirements are not proposed to change from the approved zoning.

Q: How many less lots will there be?
A: The proposal is to reduce the number of lots allowed from 275 to 203 (-72 lots).

Q: Will anything change in the already-approved residential Ph. 1 along the west side?
A: No, the plan is to develop Ph. 1 exactly the same as originally approved.

Q: How far is the commercial zoning area from 188th Street?
A: The commercial zoning area that's proposed is approximately 1,000 feet away from 188th Street.

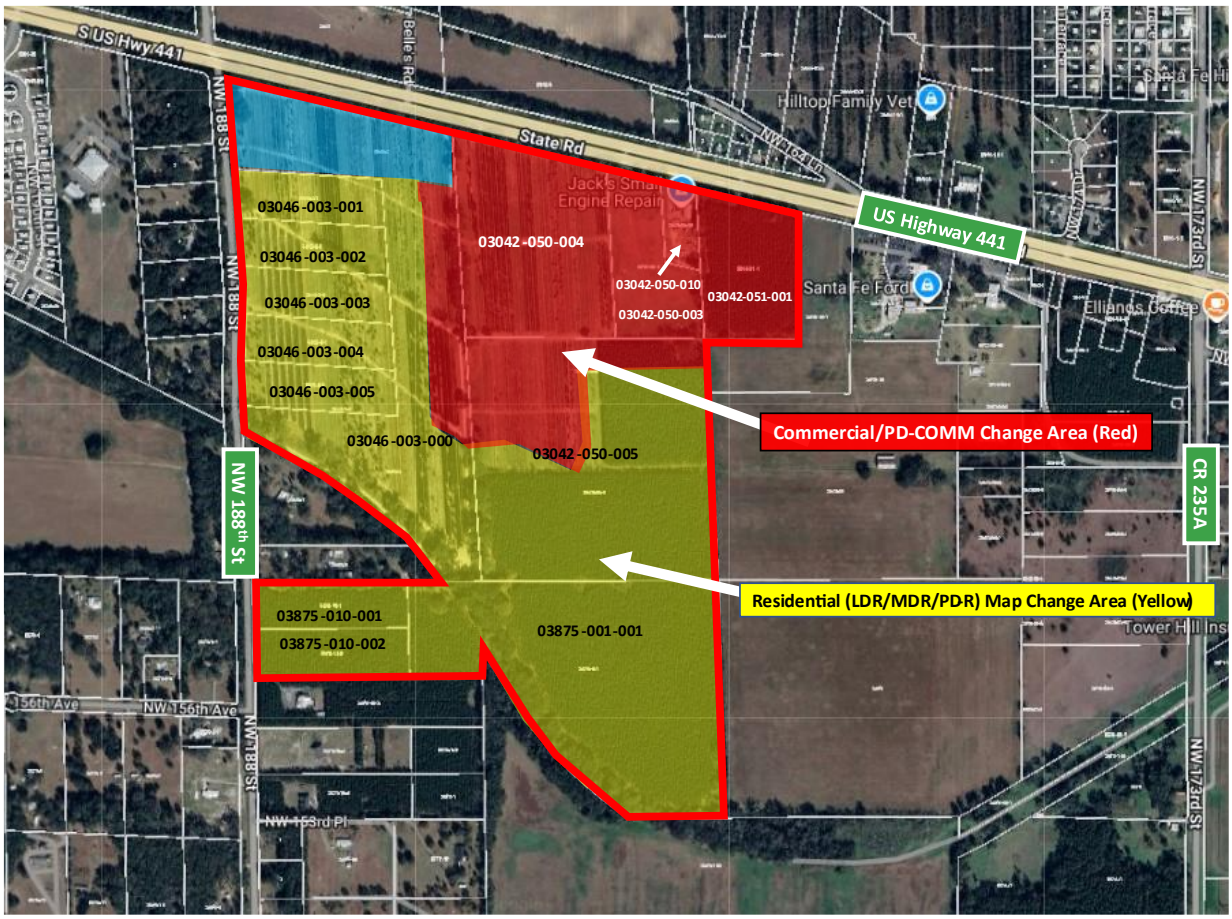
Q: Will the stormwater basin still remain along 188th Street?
A: Yes, the basin will remain, as originally permitted.

Q: The access from the property to 188th Street will remain emergency-only, correct?
A: Yes, the access will be gated for emergency access only.

Q: Who are the commercial users that will be located on-site?
A: The developer is not able to announce the specific tenants at this time, but they are all national retailers and will include a variety of types to serve the public.

Q: What is the schedule of review and approval for this project?
A: We plan to submit the land use and zoning change at the end of this month and anticipate that the review process will take approximately 5 months. After that, a Site Plan for the commercial development would be submitted, which would likely be under review for the remainder of 2026. Construction would commence shortly thereafter.

NOTICE OF NEIGHBORHOOD WORKSHOP



Date: Wednesday, October 22, 2025

Time: 6:00 p.m.

Place: Legacy Park Multipurpose Center - Meeting Room 1
15400 Peggy Road, Alachua, FL 32615

Contact: eda consultants, inc.
(352) 373-3541
permitting@edafl.com

A neighborhood workshop will be held to discuss proposed future land use map changes from Community Commercial, Low Density Residential and Moderate Density Residential to Commercial and from Low Density Residential to Moderate Density Residential and a rezoning from Community Commercial (CC) and Planned Development - Residential (PD-R) to Planned Development - Commercial (PD-COMM) and Planned Development - Residential (PD-R) generally located in the 16400 to 18800 blocks of US Highway 441 (south side) on all or a portion of 14 tax parcels (03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03042-050-003, 03042-050-004, 03042-050-010, 03042-051-001, 03042-050-005, 03875-001-001, 03875-010-001 and 03875-010-002). The overall approximate map modification acreage is 182 (+/-) acres. This is not a public hearing. The purpose of this meeting is to inform members of the public of the proposal and to seek their comments.

FESTIVAL:
Continued from page A1

Festival raises funds, supports local charities

seemed easier." That nostalgic theme carried throughout the free, family-friendly festival, where attendees were encouraged to don vintage attire and join in a lively costume contest.

This year's festival was a collaborative effort between NMSO and Gainesville Street Rods, which helped raise money for charity. Nearly $2,000 was collected to support Homes 4 Heroes, while a clothing drive gathered donations for St. Francis House. Organizers said both causes benefitted significantly from the enthusiastic response of festivalgoers.

Entertainment was central to the event, with music from the 1950s and 1960s filling the streets courtesy of Newberry's Twisted H Productions. A live DJ kept energy high throughout the day, while food trucks and local vendors offered refreshments and merchandise. The highlight for many was the classic car show, billed as "awesome" by organizers, which drew car enthusiasts eager to showcase vintage rides.

While the Fabulous 50's Festival is one of NMSO's smaller events, organizers said they were encouraged by the turnout. An estimated 3,000 visitors attended, enjoying not only the festival itself but also the restaurants and shops in historic downtown Newberry.

Mack said the strong community response reaffirmed the festival's growing role in highlighting downtown as a hub for both residents and visitors. The event not only showcased local businesses but also fostered a sense of pride in Newberry's historic core.

With live music, classic cars, nostalgic costumes and charitable giving, the Fabulous 50's Festival once again blended entertainment with community spirit—leaving organizers optimistic about the festival's future as a fixture on Newberry's event calendar.

Neighborhood Meeting Minutes

Project: Farmlands Commercial Land Use Change & Rezoning

Meeting Date & Time: October 22, 2025 at 6:00 p.m.

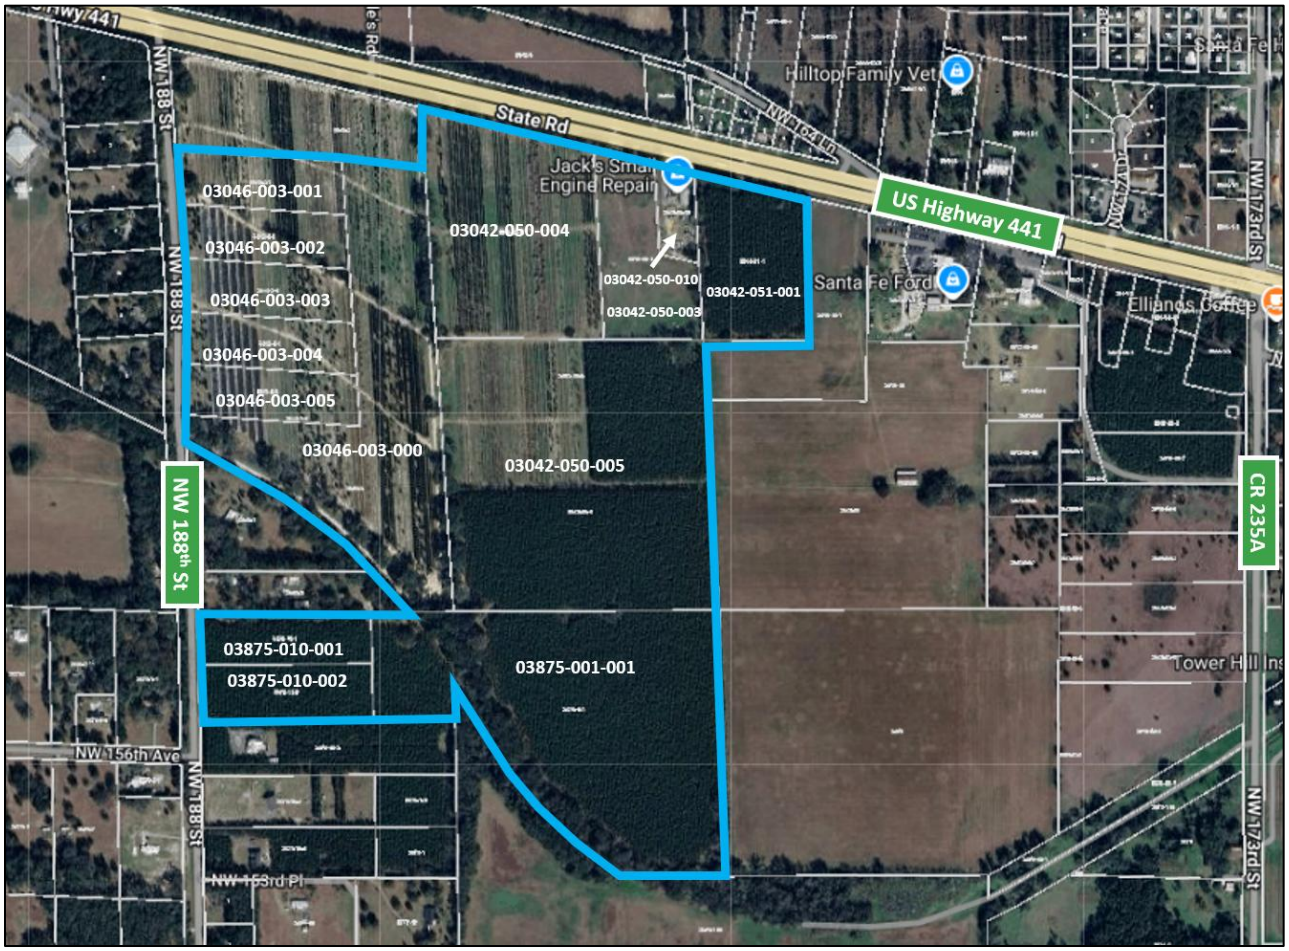
Community Participants: 4 participants in total

Project Representatives:
Clay Sweger - eda
Sergio Reyes - eda
Stephanie Sutton - eda
Heather Hartman - eda
Keith Lerner - Property Owner
David Lerner - Property Owner
David Buckle - Foresite Group
Craig Brashier - NV5

Meeting Minutes:
The meeting was conducted open-house style. There were project representatives stationed throughout the room, with printed graphics on posters. As community participants arrived, they circulated throughout the room and asked questions about the proposed action. Below is the collected feedback from participants.

Q: What are the changes between the first workshop and the second?
A: Essentially, the change is the addition of 3 parcels along US 441 into the proposed rezoning area. In addition, the portion of the property proposed for commercial use are now proposed to be zoned 'PD-CCOMM' instead of 'Commercial Intensive.'

Q: There are concerns with existing traffic and speed limits along US 441. What can be done?
A: The project will include a traffic study to be conducted to analyze the existing and proposed traffic conditions and the developer will be responsible for improvements to the roadway related to operational and safety improvements. The developer understands local concerns about traffic safety and the desire to request a reduction in posted speed along this portion of the roadway.



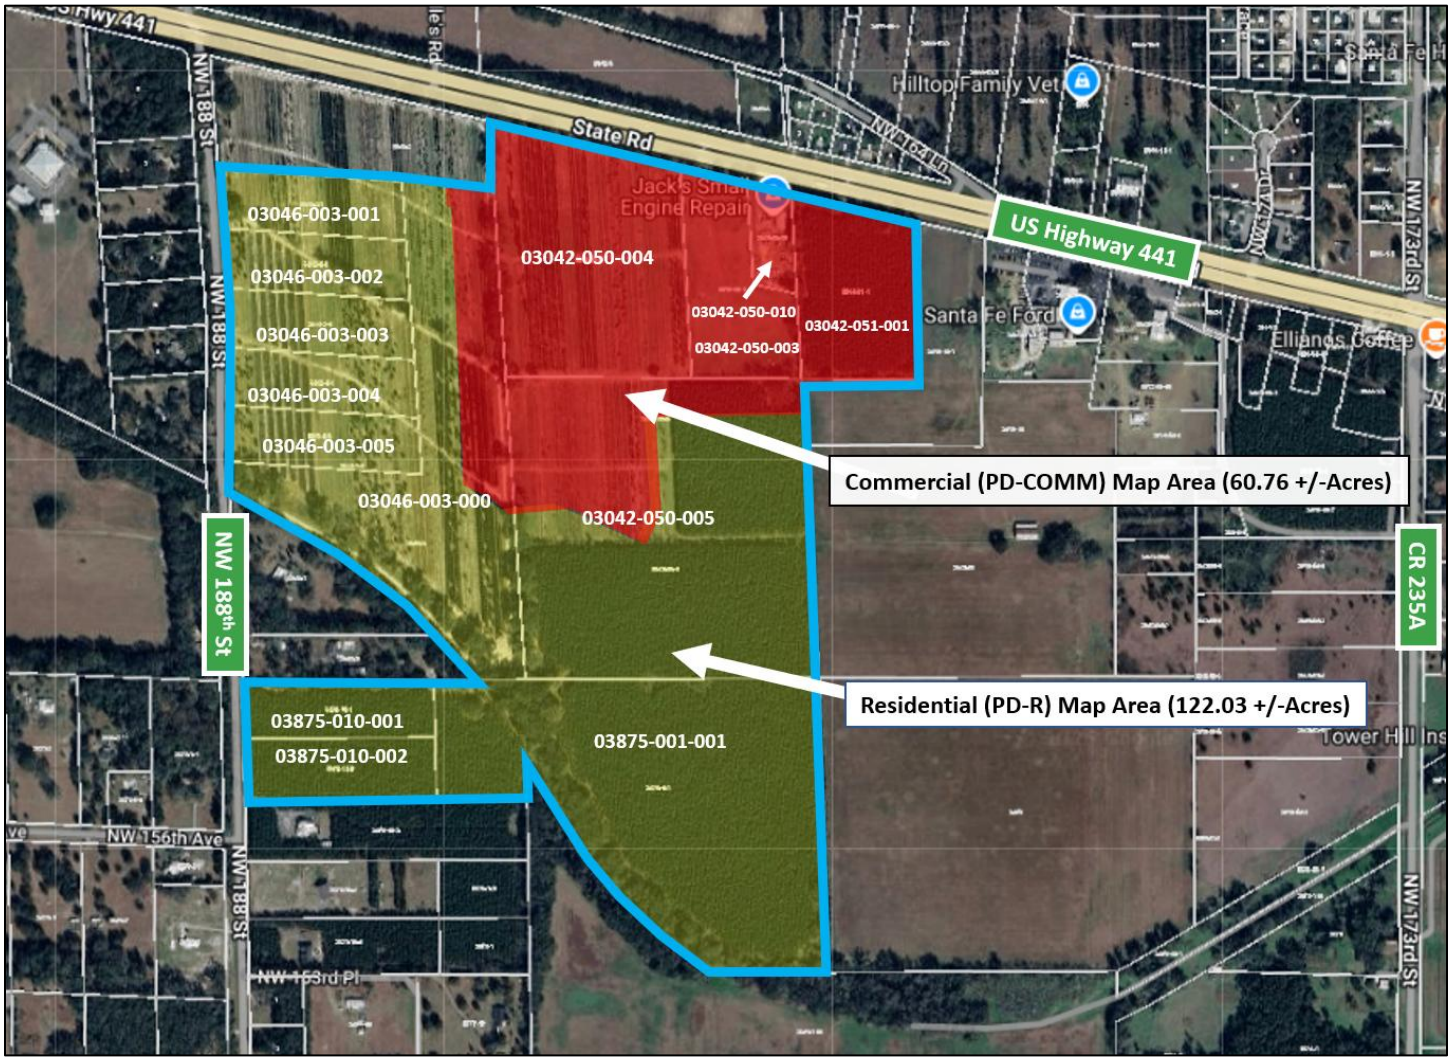
Q: What are the minimum lot sizes of the lots in the PD-R area?
A: The smallest lots are 10,000 SF and some are minimum 1/3 acre and ½ acre in size. These requirements are not proposed to change from the approved zoning.

Q: How many less lots will there be?
A: The proposal is to reduce the number of lots allowed from 275 to 203 (-72 lots).

Q: Are there City utilities that serve the site?
A: Yes, the City serves water and sewer to the site.

Q: What is the schedule of review and approval for this project?
A: We plan to submit the land use and zoning change at the end of this month and anticipate that the review process will take approximately 5 months. After that, a Site Plan for the commercial development would be submitted, which would likely be under review for the remainder of 2026. Construction would commence shortly thereafter.

Rezoning Justification Report



Request:	A proposed rezoning from Community Commercial and Planned Development-Residential (PD-R) to Planned Development-Commercial (PD-COMM) and amendments to an existing Planned Development-Residential (PD-R) zoning district.
Location:	16400 to 18800 blocks of US Highway 441
Parcel Numbers:	03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03042-050-003, 03042-050-004, 03042-050-010, 03042-051-001, 03042-050-005, 03875-001-001, 03875-010-001 and 03875-010-002
Acreage:	±182 Acres
Prepared By:	Clay Sweger, AICP, LEED AP Gerry Dedenbach, AICP, LEED AP
Date:	January 26, 2026 Revised March 4, 2026, March 24, 2026

Background

The subject property is located in the 16400-18800 block of US Highway 441 in the City of Alachua. The property is located south of US Highway 441 and a commercial parcel, west of commercial and agricultural land, east of NW 188th Street and north of residential and undeveloped properties. The proposal concerns an approximately 182-acre undeveloped property, that currently is utilized as a tree farm and contains timberland.

The tax parcel numbers are 03046-003-000, 03046-003-001, 03046-003-002, 03046-003-003, 03046-003-004, 03046-003-005, 03042-050-003, 03042-050-004, 03042-050-010, 03042-051-001, 03042-050-005, 03875-001-001, 03875-010-001 and 03875-010-002. The subject property is located within Section 8 & 17, Township 8, Range 18. The parcel currently is undeveloped and is classified as timber land and grazing land, according to the Alachua County Property Appraiser's records.

Statement of Proposed Change

The property owner requests to rezone the property from Community Commercial to Planned Development-Commercial (PD-COMM) on approximately 7.0 acres, from Commercial Intensive to PD-COMM on approximately 20.45 acres, from Planned Development-Residential (PD-R) to Planned Development-Commercial (PD-COMM) on approximately 33.31 acres. In addition, the applicant proposes amendments to an existing Planned Development-Residential (PD-R) zoning district on approximately 122.03 acres. The following tables summarize the proposed rezoning request and the associated net development scenario changes:

Summary of Proposed Change in Zoning Map

Zoning District	Area (+/-) Existing	Area (+/-) Proposed	Change (+/-)
Community Commercial (CC)	7.0 Ac.	0.0 Ac.	-7.0 Ac.
Commercial Intensive (CI)	20.45 Ac.	0.0 Ac.	-20.45 Ac.
Planned Development-Residential (PD-R)	155.34 Ac.	122.03 Ac.	-33.31 Ac.
Planned Development-Commercial (PD-COMM)	0.0 Ac.	60.76 Ac.	+60.76 Ac.

Summary of Proposed Rezoning (From / To)

Zoning Districts	Acreage (+/-)
Community Commercial to PD-COMM	7.0
Commercial Intensive to PD-COMM	20.45
PD-R to PD-COMM	33.31
PD-R Amendment	122.03
Total	**182.79**

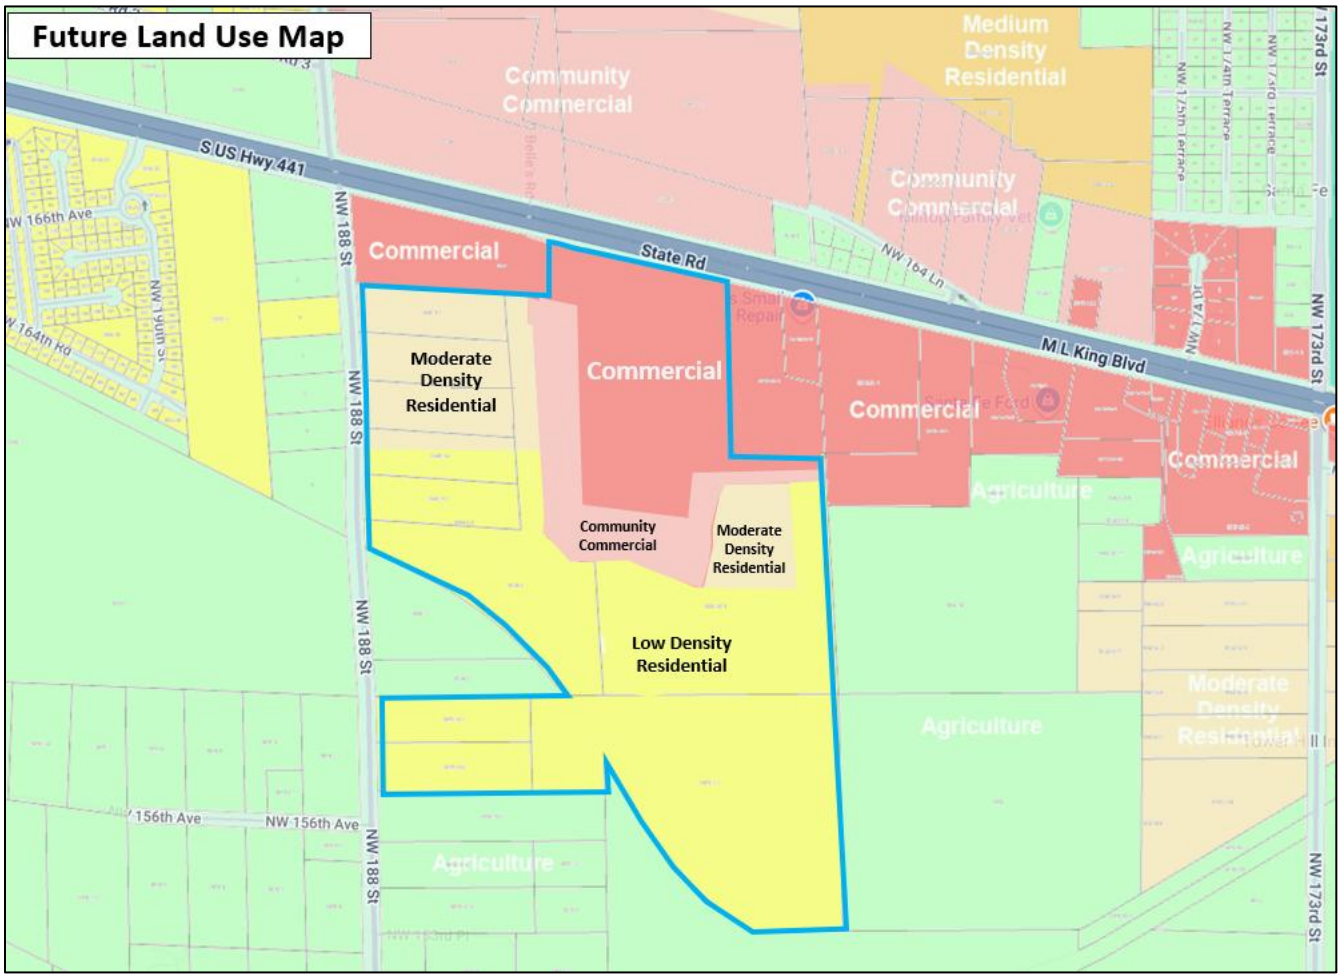
Summary of Change in Zoning Scenario (Existing vs. Proposed)

Existing Zoning Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
CC & CI	27.45	0.5 FAR[1] 15 DUA[2]	597,861 SF 411 Units
PD-R	155.34	1.77 DUA	275 Units
Total	**182.79**		**597,861 SF / 686 Units**

Proposed Zoning Map

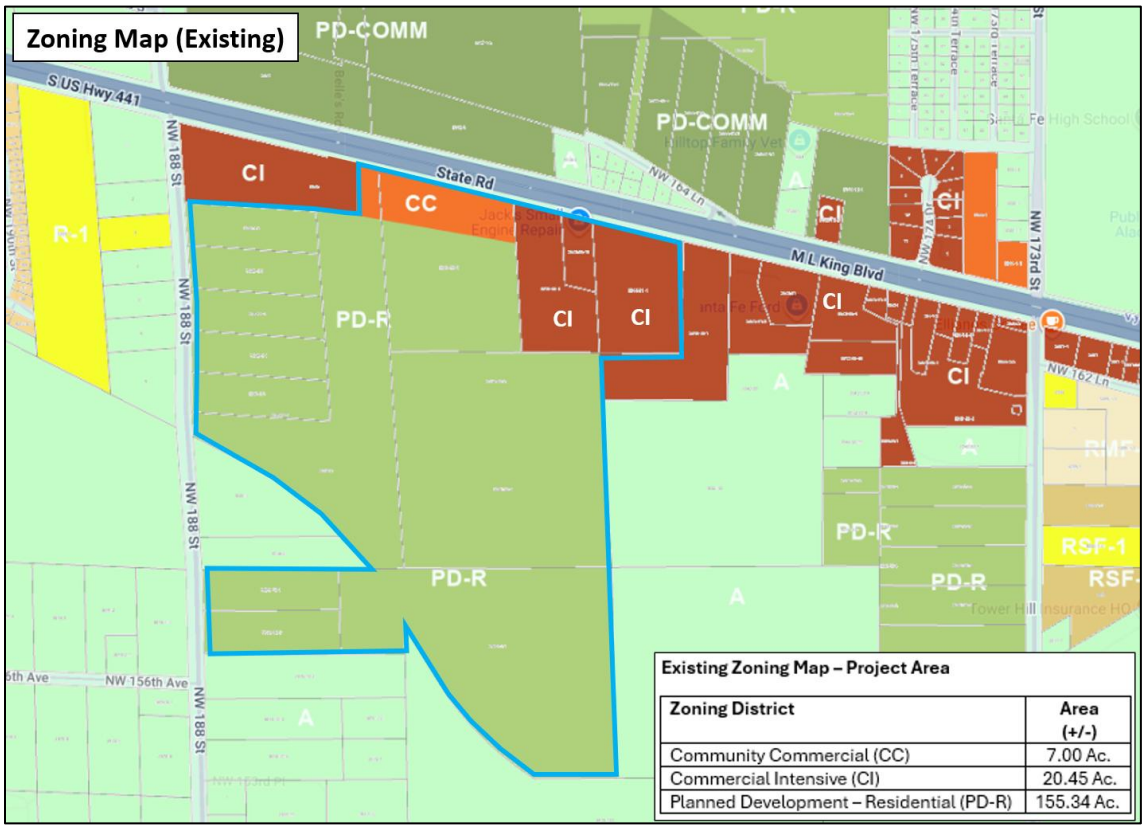
Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Planned Development-Commercial (PD-COMM)	60.76	0.17 FAR[3]	450,000 SF
Planned Development-Residential (PD-R)	122.03	1.66 DUA	203 Units
Total	**182.79**		**450,000 SF / 203 Units**



[1] *FAR per Comprehensive Plan*
[2] *DUA allowed per LDR Table 5.1-4*
[3] *FAR per proposed PD-COMM zoning for Site*

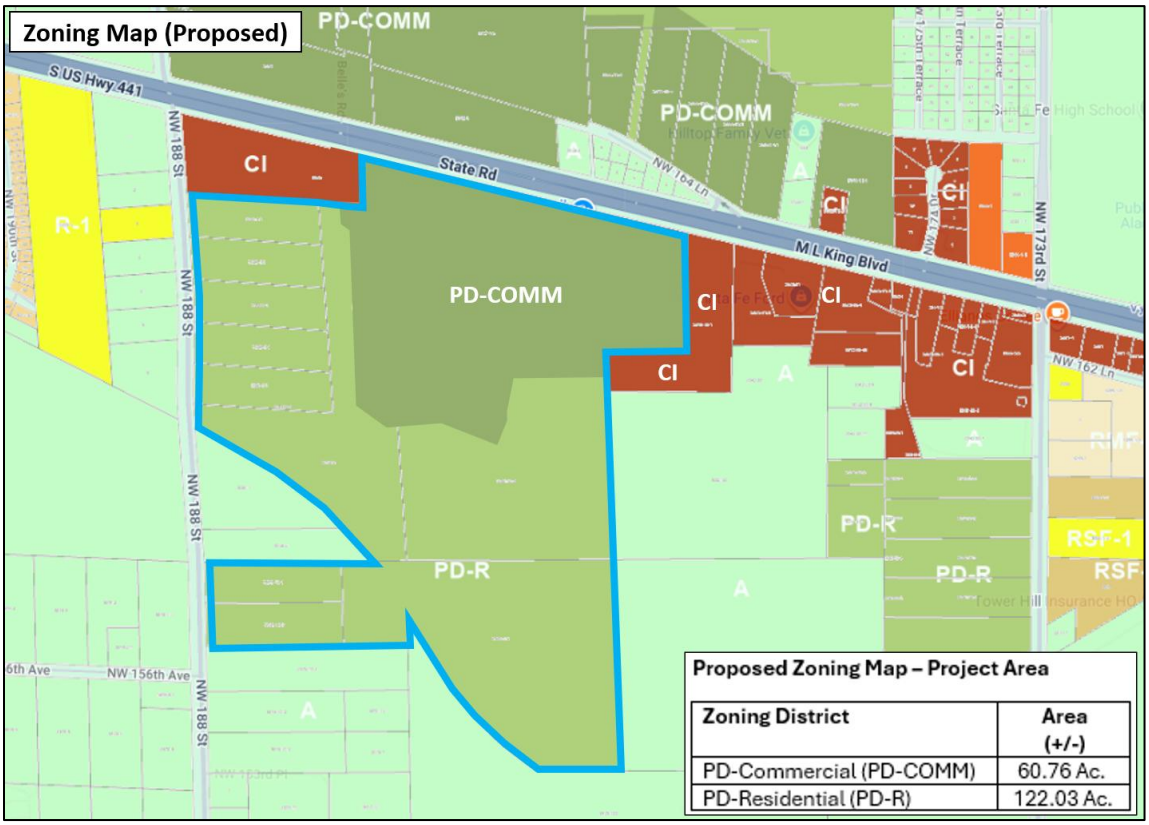
Net Change

Non-Residential	**-147,861 SF**	Residential	**-483 Units**



The proposed rezoning will result in zoning districts that are compatible with the underlying Future Land Use map designations of Commercial, Community Commercial, Medium Density Residential and Low Density Residential.

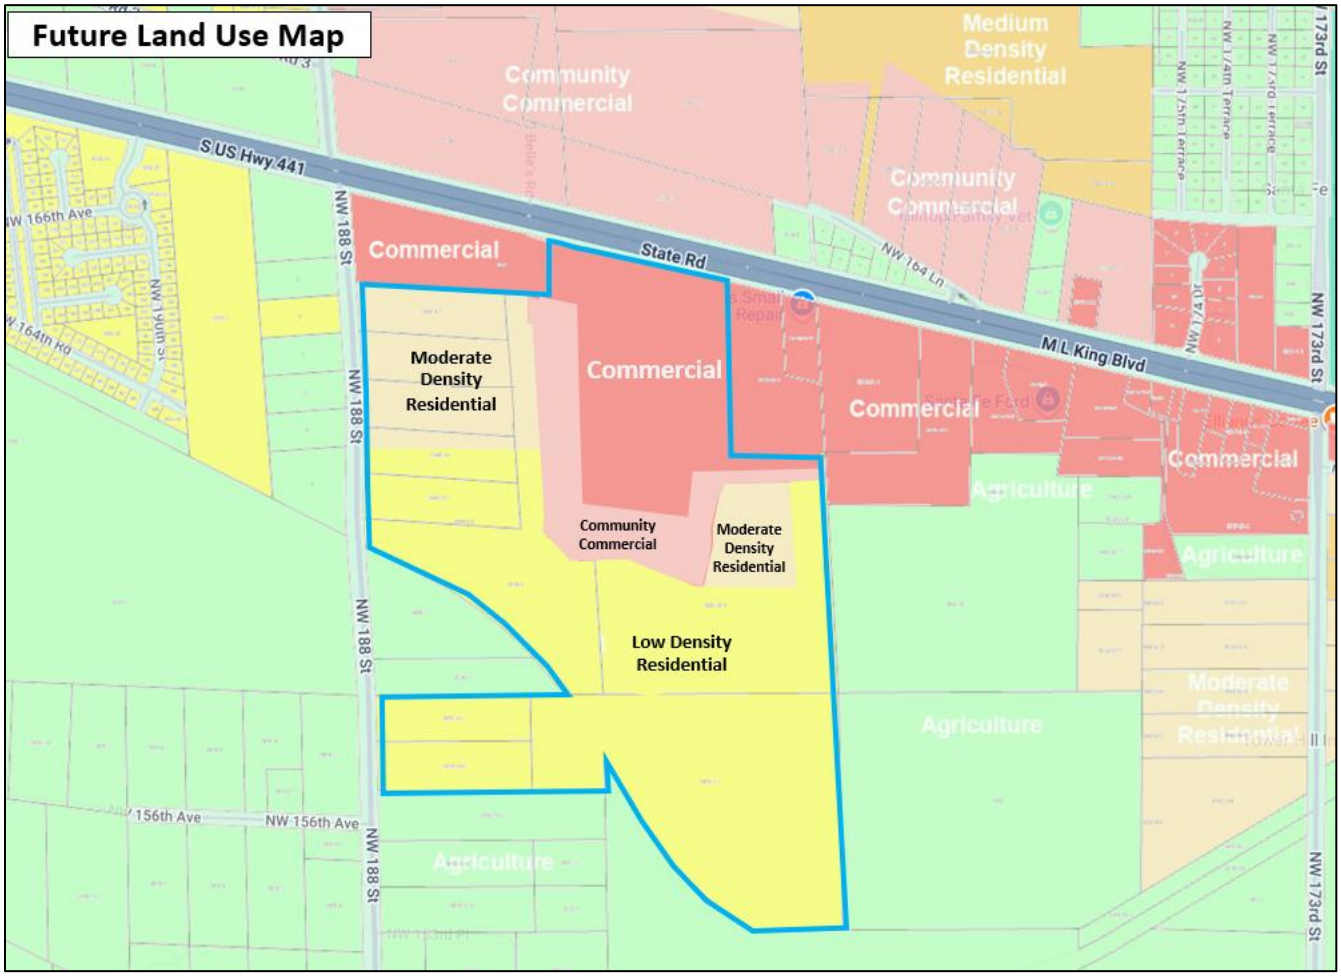
The Future Land Use Map (including proposed FLUM amendments) for the project site and surrounding area is illustrated below:



The subject parcel has Commercial, Community Commercial, Moderate and Low Density Residential future land use designations (with amendments proposed concurrently and consistent with the rezoning request) and is bounded by a mix of commercial and residential designations, including to the north and portions of the east & west by land with a commercial future land use designation. Portions of land to the west have a residential future land use designation. Portions of land to the east, south and west of the property have an agriculture future land use designation.

The existing and proposed Zoning Maps for the project site and surrounding area are shown on the following page:

Existing Zoning Map – Project Area



Zoning District	Area (+/-)
Community Commercial (CC)	7.00 Ac.
Commercial Intensive (CI)	20.45 Ac.
Planned Development – Residential (PD-R)	155.34 Ac.

Proposed Zoning Map – Project Area

Zoning District	Area (+/-)
PD-Commercial (PD-COMM)	60.76 Ac.
PD-Residential (PD-R)	122.03 Ac.

The proposed rezoning would amend the City of Alachua Zoning Map to place Planned Development zoning designations consistent with the requested future land use map designation of Commercial, Community Commercial, Moderate Density Residential, and Low Density Residential on the property. The proposed Future Land Use Map amendment, is illustrated below:

The City of Alachua Comprehensive Plan Future Land Use Element describes the Commercial future land use category as shown below, with desired uses in bold:

Policy 1.3.b: Commercial: *The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:*

1. *Retail sales and services;*
2. *Personal services;*
3. *Financial institutions;*
4. *Recreation and entertainment;*

5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers.

Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Policy 1.3.a: Community Commercial: *The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:*

1. Neighborhood commercial establishments;
2. Residential/offices and live-work units;
3. Business and professional offices;
4. Personal services;
5. Financial institutions;
6. Retail sales and services that serve the community;
7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;
11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;
13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use.

The permitted uses in the Commercial and Community Commercial future land use categories listed above are consistent with the permitted use identified in the Planned Development-Commercial (PD-COMM) zoning application for the subject property. More specifically, the PD-COMM zoning request includes a list of permitted uses that include some of the permitted uses identified above.

The proposed rezoning would also amend the property's existing Planned Development – Residential (PD-R) zoning to be consistent with the amended future land use map designation of Moderate and Low Density Residential. The Moderate and Low Density Residential future land use designation allow a variety of residential use types compatible with the surrounding development pattern in the vicinity, including single family detached units.

The City of Alachua Comprehensive Plan Future Land Use Element describes the Moderate and Low Density future land use categories as shown below, with desired uses in bold:

Policy 1.2b: Moderate Density Residential (0 to 4 dwelling units per acre): *The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre.*

The following uses are allowed in the Moderate Density Residential land use category:

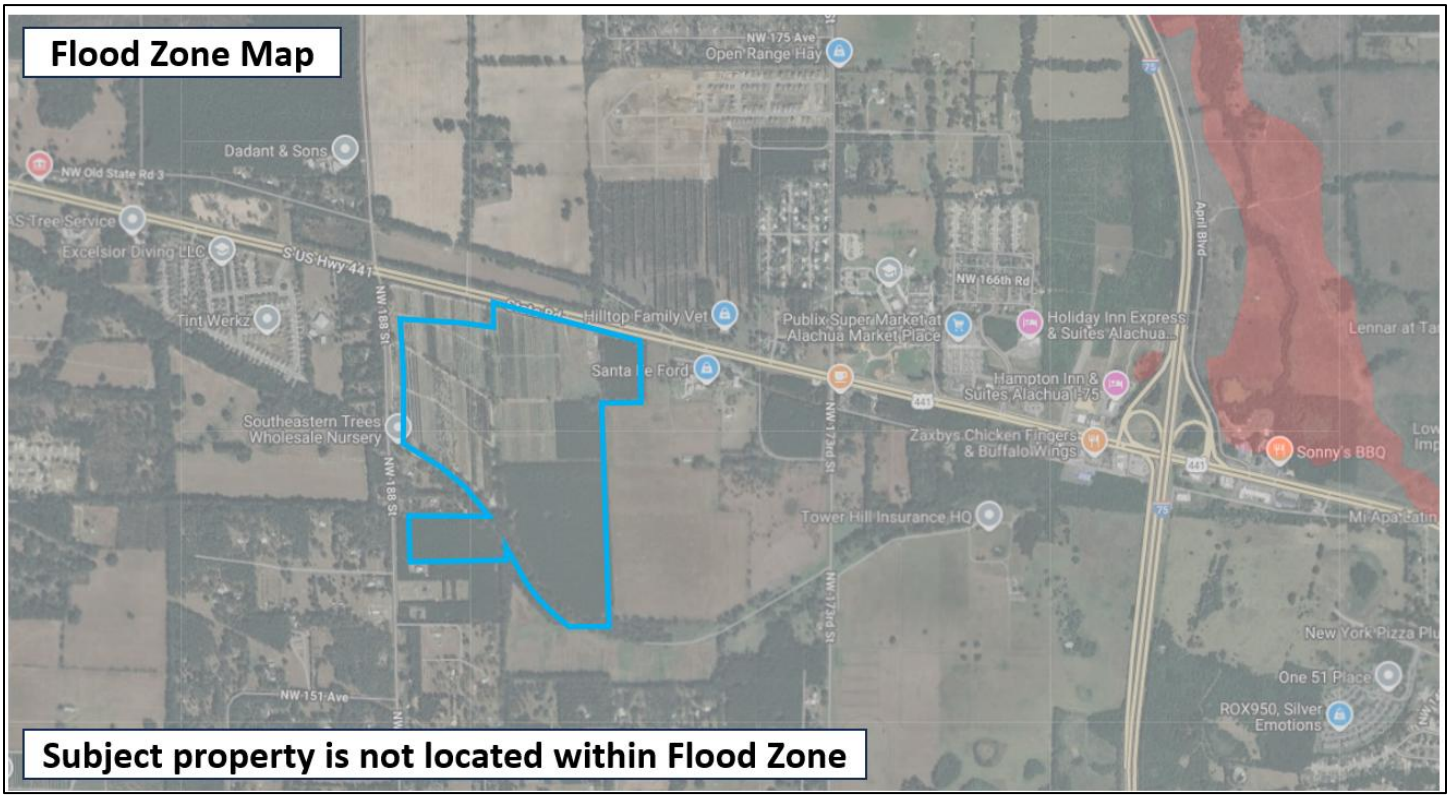
1. Single family detached dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
***7. Residential Planned Developments**; and,*
8. Supporting community services such as schools, houses of worship, parks, and community centers.

Policy 1.2.a: Low Density Residential (0 to 1 dwelling unit per acre): *The Low Density Residential land use category allows residential development at a maximum density of 1 dwelling unit per acre. This land use category shall provide for a transition between rural residential / agricultural areas and the urban areas within the City.*

The following uses are allowed in the Low Density Residential land use category:

1. Single family detached dwelling units;
2. Accessory Dwelling Units;
3. Manufactured or modular homes meeting certain design criteria;
***4. Residential Planned Developments**; and,*
5. Supporting community services such as schools, houses of worship, parks, and community centers.

As described in the policies listed above, the Moderate and Low Density Residential future land use designations consider residential planned developments (PD-R's) as an allowable use and as such, are consistent with the underlying Moderate / Low Density Residential future land use designations and are appropriate for the subject property as illustrated in the previous land use map exhibits. The



proposed zoning districts are appropriate due to their location in an area with a mix of commercial and residential development areas well suited to accommodate a mix of development types that are compatible in nature. In addition, the property is served by all necessary public facilities to serve future development of the site.

Environmental / Suitability Analysis

The subject property has no environmental constraints based on an analysis of wetlands, strategic ecosystem, soils, flood zones, topography, and surrounding uses and is suitable for urban development.

100-Year Flood Zone / Flood Potential:

The subject parcel is fully within Flood Zone X (the gray area shading on the map), which is outside the 0.2% annual chance of flood hazard. There are no FEMA flood plain areas on the property and therefore, is not an issue for future development. The figure below illustrates the flood zones:

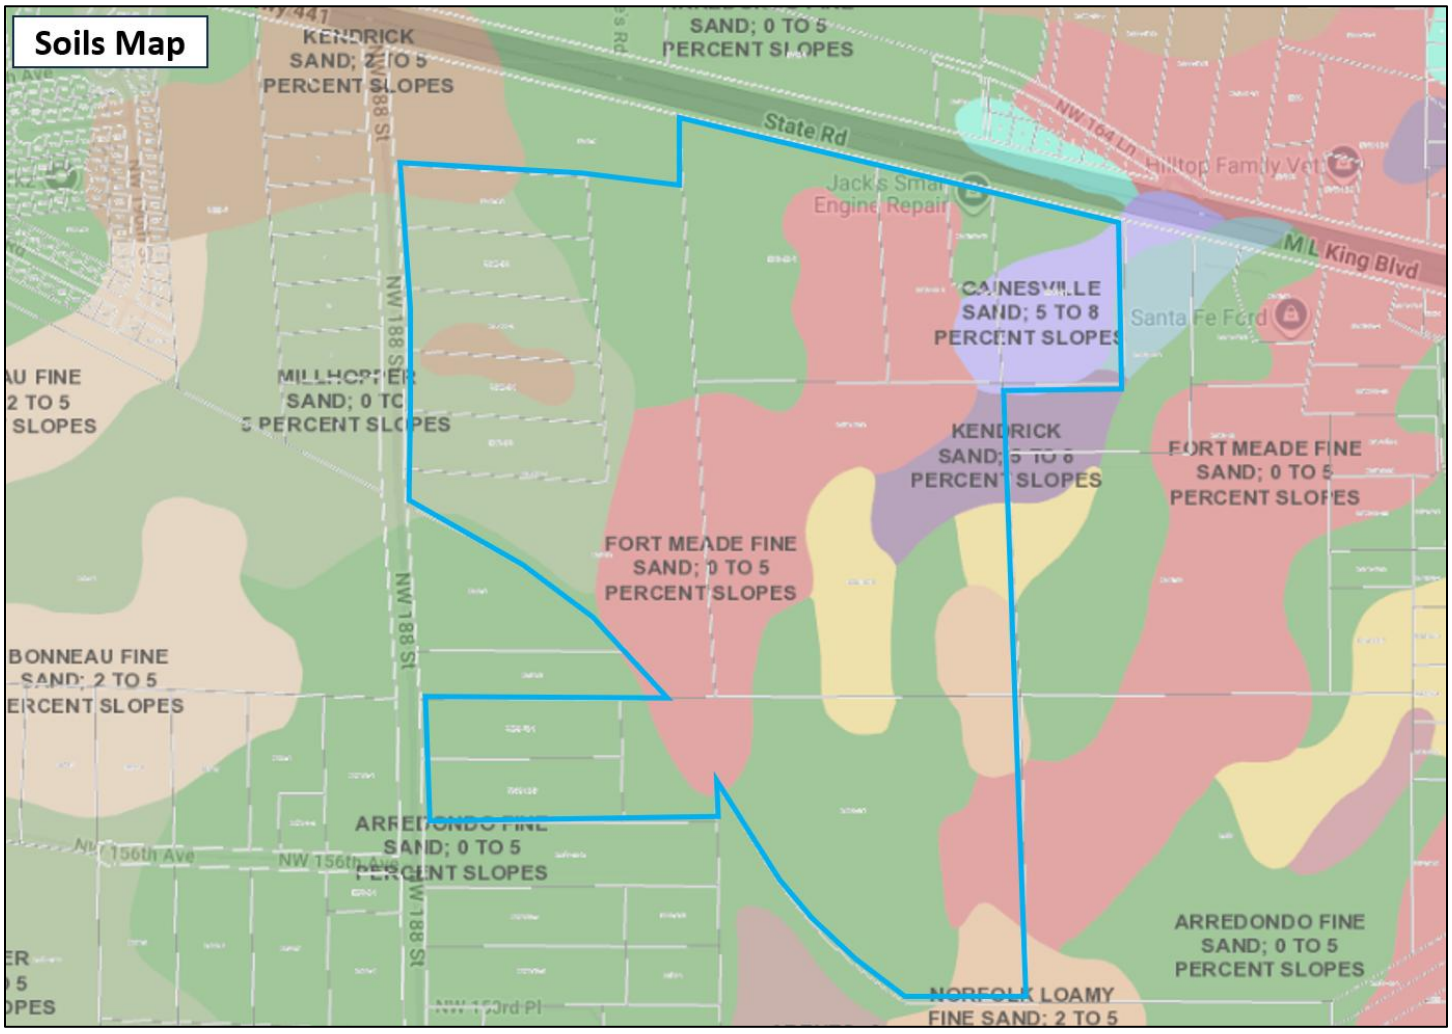
Strategic Ecosystems:

The subject property is not located within a Strategic Ecosystem overlay as indicated in the figure below and therefore, is not an issue for future development.

Soils:

Soils on the site are indicated in the narrative and exhibit below. Based on the soil information analysis, the proposed land use application is complies with Future Land Use Element Objective 5.1 and its sub-policy concerning soils (Policy 5.1.b.).

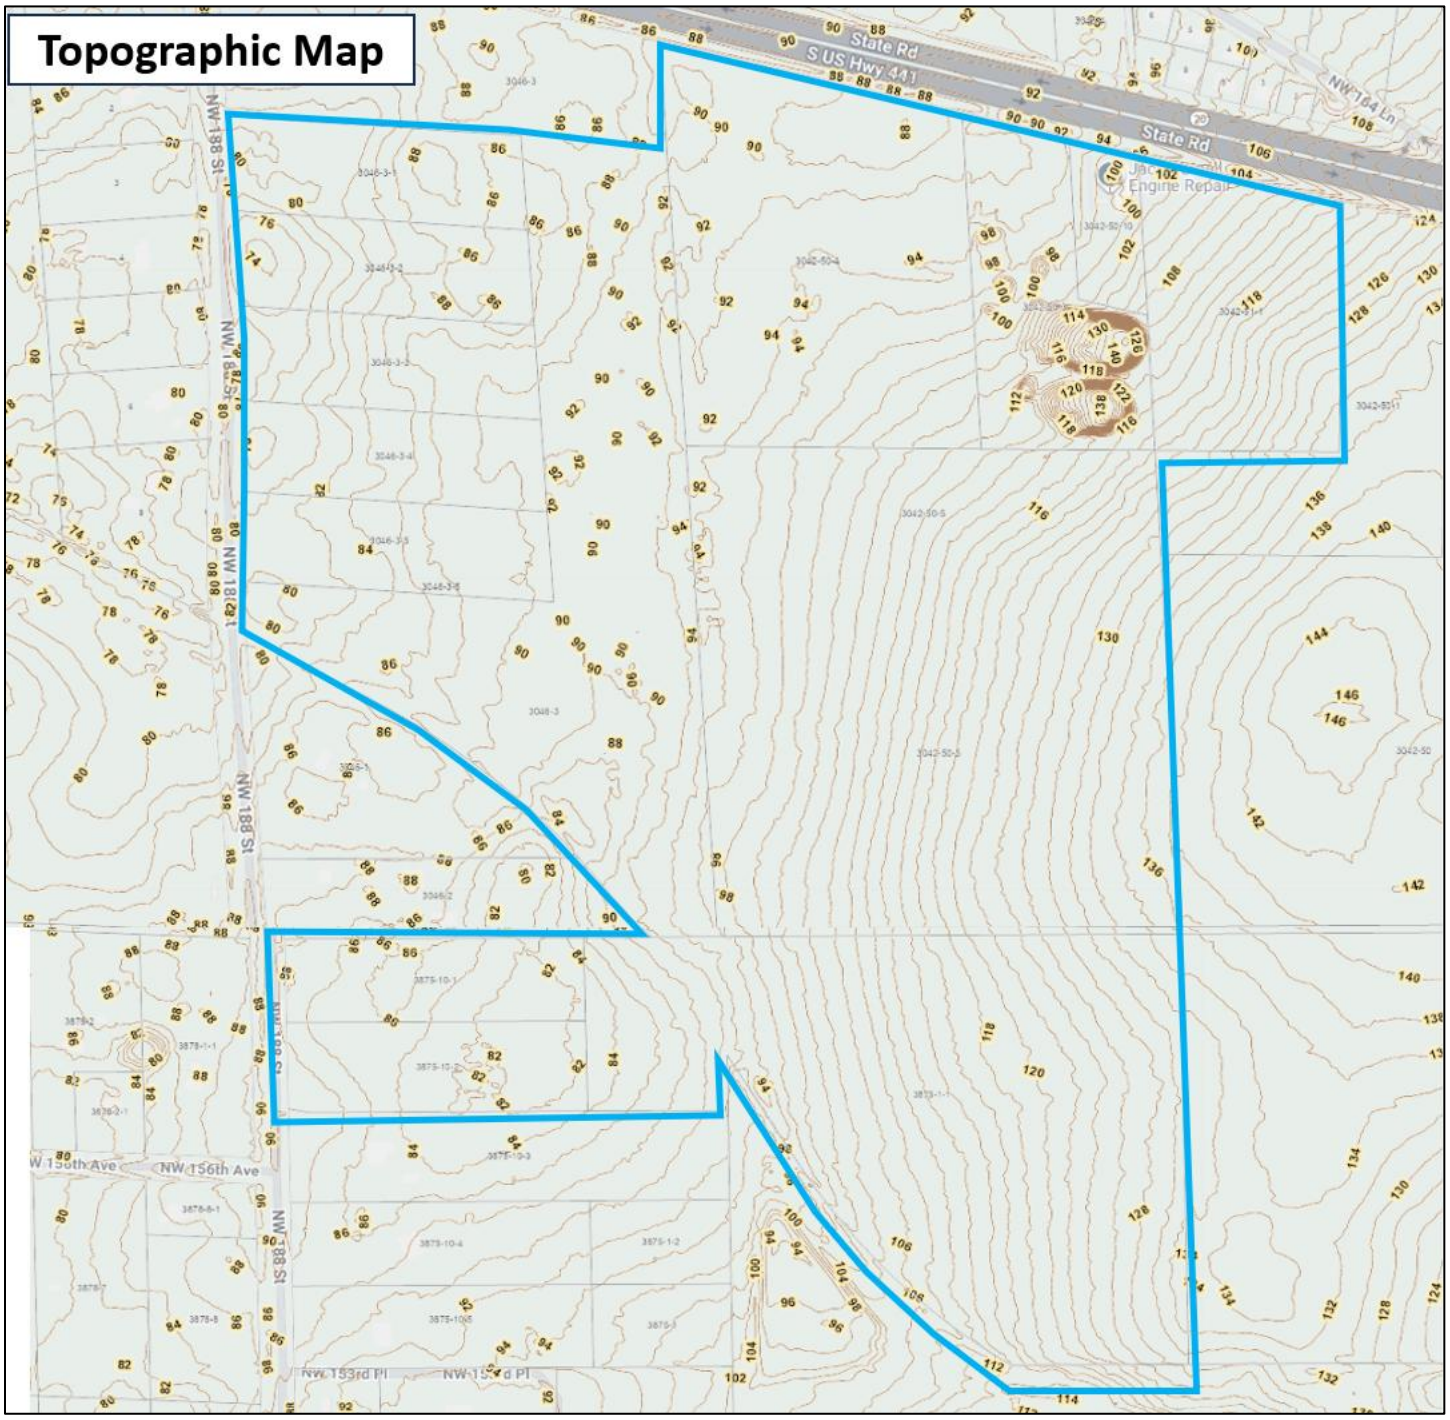
According to the *Soil Survey of Alachua County Florida*, Arredondo fine sand, 0 to 5 and 5 to 8 percent slopes consist of nearly level to gently sloping, fairly well drained soils. This soil has only slight limitations as sites for septic tank absorption fields, dwellings, small commercial buildings, trench landfills, and local roads and streets.



Millhopper Sand, 0 to 5 percent slopes consist of nearly level to sloping, moderately well drained soils in broad areas of gently rolling uplands and is slightly convex areas of the flatwoods. Limitations for dwellings without basements, small commercial buildings, and local roads and streets are slight.

Norfolk loamy fine sand, 0 to 5 & 2-5 percent slopes consist of gently sloping to sloping, well drained soils are slightly convex, gentle slopes and located on rolling hillsides of uplands. This soil has only slight limitations as sites for homes, small commercial buildings, absorption fields for septic tanks, and local roads and streets.

Kendrick sand, 5 to 8 percent slopes, is a gently sloping, well-drained soil in both small and large areas on the gently rolling upland. This soil has only slight limitations as sites for septic tank absorption fields, dwellings, small commercial buildings, trench landfills, and local roads and streets.

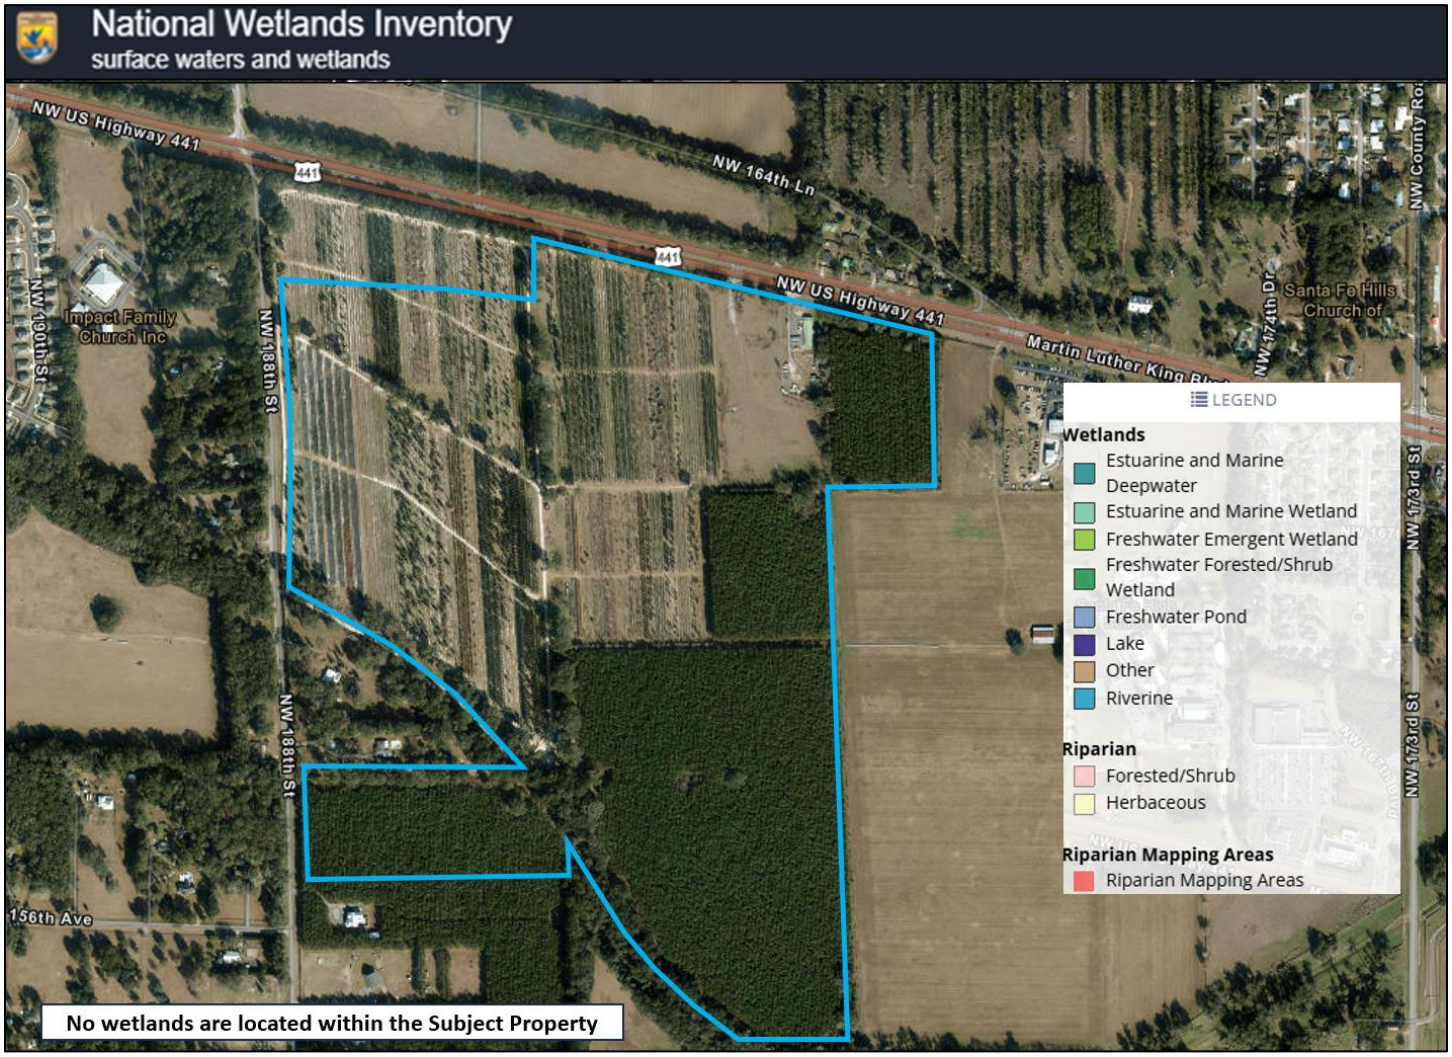


Fort Meade fine sand, 0 to 5 percent slopes is a nearly level to gently sloping, well-drained soil in both small and large areas on the gently rolling uplands. This soil has slight limitations for use as sites for dwellings, for local roads and streets, and for septic tank absorption fields.

Gainesville sand, 5 to 8 percent slopes are gently sloping, fairly well drained soils. This soil has only slight limitations as sites for homes, small commercial buildings, absorption fields for septic tanks, and local roads and streets.

Topography:

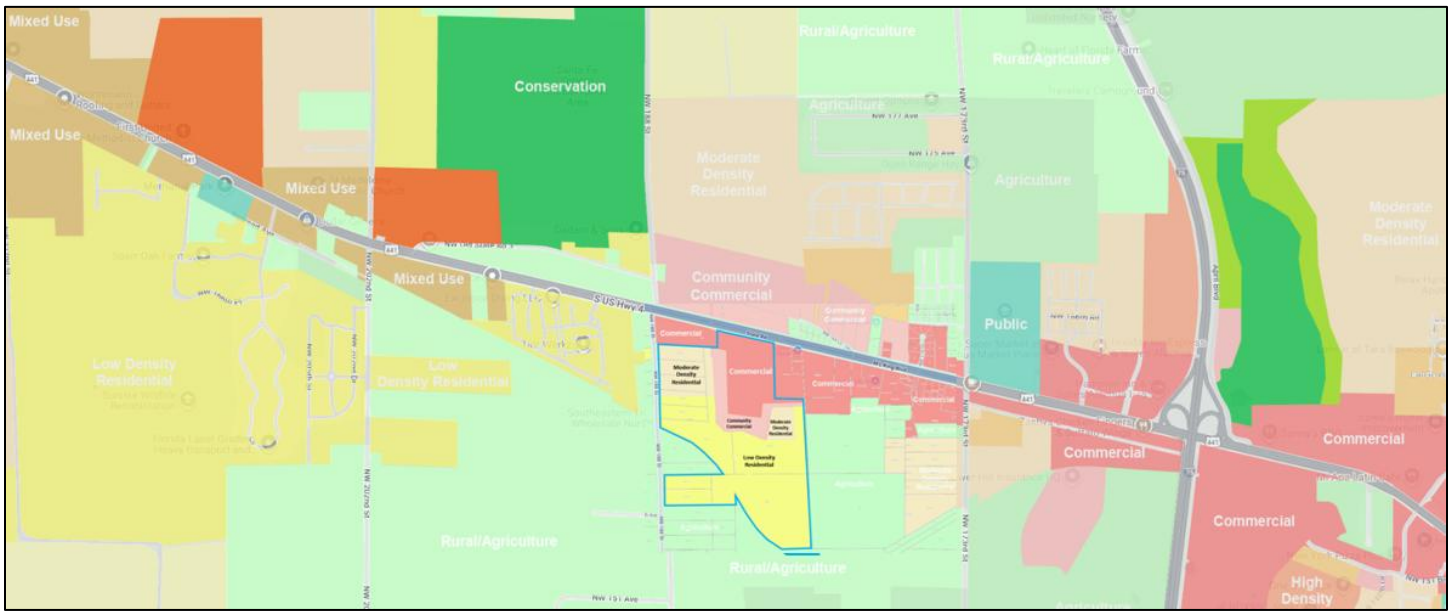
The following figure illustrates the site's topography. The site slopes from 136 feet in the eastern portion to approximately 74 feet in the western portion of the property, spanning over a large expanse of land and poses no impediments to site's proposed urban mixed-use development program.



Wellfield Protection Zone:

The subject parcel is not located in a wellfield protection zone. Please see the City of Alachua's Wellfield Protection Zones map dated December 2019 in the Future Land Use Element map series for confirmation the property is not located in the wellfield protection zone.

Wetlands:



The figure below illustrates that there are no wetlands located on the subject property, according to the National Wetlands Inventory (NWI) map below:

Existing vs. Proposed Zoning Designations

This proposed zoning change is proposed in an area which includes existing nearby urban development in multiple directions with all urban utility infrastructure services available. The site is located within the urbanizing portion of the City of Alachua, with access along a major state arterial roadway (US 441) and within close proximity to Interstate 75. Public services (centralized water & sewer utilities, electric, telecommunications, police/fire protection, etc.) are readily available with adequate capacity to serve the site and fully accommodate on-site urban development. There is also existing residential and commercial development in the immediate vicinity of the parcel.

As indicated on the combined future land use maps for Alachua & High Springs, almost every property abutting US 441 has an urban land use designation, which supports the development of these properties with a mix of residential and non-residential urbanized uses.

Existing vs. Proposed Designations

The application proposes to rezone the property from Community Commercial to Planned Development-Commercial (PD-COMM) on approximately 7.0 acres, from Commercial Intensive to PD-COMM on approximately 20.45 acres, from Planned Development-Residential (PD-R) to Planned Development-Commercial (PD-COMM) on approximately 33.31 acres. In addition, the applicant proposes amendments to an existing approved Planned Development-Residential (PD-R) zoning district on approximately 122.03 acres.

The proposed zoning changes result in modest modifications to potential density & intensity for the site based on its existing designations and approved Planned Development Zoning Master Plan. The "Public Facilities Impact Analysis" section will analyze capacity to serve a potential development scenario on the site.

In summary, the tables below outline the net change in zoning entitlements that would result in the proposed future land use map change:

Summary of Change in Zoning Scenario (Existing vs. Proposed)

Existing Zoning Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
CC & CI	27.45	0.5 FAR(1) 15 DUA(2)	597,861 SF 411 Units
PD-R	155.34	1.77 DUA	275 Units
Total	**182.79**		**597,861 SF / 686 Units**

Proposed Zoning Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Planned Development-Commercial (PD-COMM)	60.76	0.17 FAR(3)	450,000 SF
Planned Development-Residential (PD-R)	122.03	1.66 DUA	203 Units
Total	**182.79**		**450,000 SF / 203 Units**

(1) *FAR per Comprehensive Plan*
(2) *DUA allowed per LDR Table 5.1-4*
(3) *FAR per proposed PD-COMM zoning for Site*

Net Change

Non-Residential	**-147,861 SF**	Residential	**-483 Units**

The site is located within an urbanizing portion of the City of Alachua, abutting US 441 and in proximity to Interstate 75. The existing developed nature and urban character of the US 441 corridor within the City of Alachua indicates this area is continuing its urbanizing form area and there is a need for additional commercial and residential use options in the City and for residents in the context area and proximate Cities of High Springs and Newberry.

The zoning change creates an approximately 182-acre master planned development consisting of an approximately 60.76 acre Planned Development-Commercial (PD-COMM) area along US 441 and an approximately 122.03 acre Planned Development-Residential (PD-R) area that is interconnected to the south and east of the PD-COMM area, creating an overall mixed-use community. The City of Alachua Comprehensive Plan supports this type of master-planned, mixed-use development and the Planned Development zoning mechanism allows for an enhanced final project design.

Public Facilities Analysis

A zoning map amendment may result in changes in overall impacts on public facilities if the amendment changes the allowable uses or density/intensity for the property. The following tables analyze the change in public facilities impacts based on the associated existing and proposed zoning categories, relative to the City's Level of Service (LOS) standards.

In accordance with LDR *Article 2, Section 2.4.14(H)* and *Comprehensive Plan Future Land Use Element Policy 5.2.a*, adequate public facilities are available to serve on-site mixed-use development scenario.

Specifically, the LDR states that "the necessary public facilities will be deemed available concurrent with the impacts of the proposed development if the sum of proposed development impacts when added to the existing demand and the capacity reservations are less than the maximum service volume on the affected facilities." Based upon the realistic maximum development scenario, any new development allowed in the proposed zoning categories will operate within the City's LOS standards outlined in the Comprehensive Plan and LDRs.

Development Scenario Impact: The net difference between the existing and proposed zoning districts is described below:

Existing Zoning Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
CC & CI	27.45	0.5 FAR(1) 15 DUA(2)	597,861 SF 411 Units
PD-R	155.34	1.77 DUA	275 Units
Total	**182.79**		**597,861 SF / 686 Units**

Proposed Zoning Map

Designation	Acreage (+/-)	Density/Intensity	Development Scenario
Planned Development-Commercial (PD-COMM)	60.76	0.17 FAR(3)	450,000 SF
Planned Development-Residential (PD-R)	122.03	1.66 DUA	203 Units
Total	**182.79**		**450,000 SF / 203 Units**

(1) *FAR per Comprehensive Plan*
(2) *DUA allowed per LDR Table 5.1-4*
(3) *FAR per proposed PD-COMM zoning for Site*

Net Change

Non-Residential	**-147,861 SF**	Residential	**-483 Units**

Note that the proposed rezoning will result in a reduction of potential development maximum scenarios above that is already permitted on the adopted zoning map. The following public facilities impact information is based on the net changes indicated above.

Traffic:

Please refer to the Roadway Segment and LOS Analysis Report prepared by Optimus Traffic Solutions.

While there are existing segments of US 441 currently functioning either at or slightly over currently adopted Level of Service standards, the proposed project does not overly exacerbate existing conditions and brings forth opportunities to implement both capacity and safety strategies to the US 441 corridor and City as a whole. Items to be considered during the site plan approval process such as, but not limited to, Transportation System Management (TSM), Transportation Demand Management (TDM), Roadway Segment reclassification, Speed limit reductions, and overall re-evaluation of Level of Services / Quality Level of Service standards are all items the City of Alachua could consider moving forward.

Notably, at the two (2) Neighborhood meetings, our public engagement had several participants sharing how historic traffic volumes have increased over the last several decades and their desire for operational and/or safety modifications being greatly appreciated, during the course of site plan approval process. Many local participants stated their turning movements onto US 441 now take longer and they would appreciate operational modifications be considered and approved by the Florida Department of Transportation during the course of site plan review.

In addition, it was noted by many the introduction of service and retail establishments closer to their homes will reduce overall trip lengths, which equates to lower Vehicle Miles Traveled (VMT) in the transportation network. In addition, the introduction of a mixed-use component to the existing approved residential community will create greater opportunities for daily and specific trips being satisfied by non-motorized travel options. These items represent and reinforce many of the City of Alachua's recently adopted Land Development Regulations contained in Section 4.7 and the City's Strategic Goals, Objectives, and Policies contained within the Comprehensive Plan.

Sanitary Sewer:

Goal 1: Wastewater The City shall plan for and provide adequate and economical wastewater service while protecting the environment, especially groundwater resources.

Objective 1.2 Wastewater Service New development may only occur within areas where wastewater service is available or shall be made available as a part of the proposed development. For purposes of this objective, development does not include an addition to an existing development of less than 33% of the existing floor area of the development or an addition of less than 33% of the existing impervious surface area within a five-year period.

The following analysis examines public facilities net impacts to City wastewater facilities. For residential uses, the flow rates were calculated using the ratio of 250 GPD / unit (-483 Units x 250 GPD = -120,750 GPD. For the proposed commercial uses, the flow rates were calculated using *64E-6.008, F.A.C. (Shopping Center): (-147,861 SF x 0.1 GAL/SF = -14,786 GPD).* Net generation (reduction) between residential and commercial changes is -135,536 GPD. Adequate capacity is available to support this development and will not negatively impact the City's adopted LOS for this system.

Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plan Current Permitted Capacity	1,500,000
Less Actual Treatment Plant Flows	813,000
Reserved Capacity	314,385
Site Demand	-135,536
Residual Capacity	**508,151**

1. *Source: City of Alachua Public Services Department, October 2025*
2. *Commercial calculations per 64E-6.008, F.A.C. (Shopping Center): -147,861 SF x 0.1 GAL/SF = -14,786 GPD*
3. *Single Family Calculations: 250 Gal/Unit per day x -483 Units = -120,750 GPD*

Potable Water:

Goal 4: Potable Water The City shall provide an adequate supply of potable water to customers throughout the water service area.

Objective 4.1 Water System Level of Service Standards The City shall achieve and maintain acceptable levels of service for potable water quantity and quality.

The following analysis examines public facilities net impacts to City potable water facilities. For residential uses, the flow rates were calculated using the ratio of 275 GPD / unit (-483 Units x 275 GPD = -132,825 GPD). For the proposed commercial uses, the flow rates were calculated using *64E-6.008, F.A.C. (Shopping Center): (-147,861 SF x 0.1 GAL/SF = -14,786 GPD.* Net generation (reduction) between residential and commercial changes is -147,611 GPD. Adequate capacity is available to support this development and will not negatively impact the City's adopted LOS for this system.

Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity	2,300,000
Less Actual Potable Water Flows	1,565,000
Reserved Capacity[2]	338,499
Site Demand	-147,611
Residual Capacity	**544,112**

1. *Source: City of Alachua Public Services Department, October 2025*
2. *Commercial calculations per 64E-6.008, F.A.C. (Shopping Center): -147,861 x 0.1 GAL/SF = -14,786 GPD*
3. *Single Family Calculations: 275 Gal/Unit per day x -483 Units= -132,825 GPD*

Solid Waste:

Goal 2: Solid Waste The City will provide for solid waste disposal service in a sanitary, economic, and environmentally safe manner.

Maximum Development Scenario Net Project Impact: Residential uses will generate a net reduction of 810 tons per year (based on calculation indicated in footnote #1 below. Commercial uses will generate a net reduction of 323 tons (based on calculation indicated in Footnote #2 below).

The following table indicates the projected net solid waste generation, which will not exceed the City's overall Level of Service standards:

Solid Waste Impact

Solid Waste Impact – Residential Uses[1]	-810 Tons
Solid Waste Impact – Commercial Uses[2]	-323 Tons
Net Increase	-1,133 Tons

1. *Formula: (0.73 tons / year per capita @ 2.3 residents per unit)= -810 Tons/Year*
2. *Formula: ((12 lbs per 1,000 SF/day x -147,861 SF) x 365 days/year) / 2,000 = -323 Tons/Year*
   **Source: Environmental Engineering: A Design Approach, Cincero and Cincero, 1996*

PUBLIC SCHOOLS

The proposed Zoning Map amendment will result in a net reduction of permitted residential density of 483 dwelling units. As such, there will be a reduction of potential student station generation and a reduced impact to public schools. Based on this, the amendment will lessen impacts on public school facilities adopted LOS standard.

RECREATION

The proposed amendment to the Zoning Map will result in a net reduction of permitted residential density of 483 dwelling units. As such, there will be a reduction of recreation area demand. Based on this, the amendment will lessen impacts on the City's recreation adopted LOS standard.

Recreation Impact Table

System Category	Acreage
Existing City of Alachua Recreation Acreage	135.48
Acreage Required to Serve Existing Population	56.48
Reserved Capacity	11.64
Site Demand	-6.6
Available Recreation Acreage	**73.96**

1. *Source: City of Alachua Public Services Department, October 2025*
2. *Calculations for Proposed Project: -483 Units x 2.76 persons/household x 5 acres / 1,000 persons = -6.6 acres*

Stormwater:

Goal 3: Stormwater The City shall develop and maintain a stormwater management system that minimizes flooding, protects, preserves and enhances desirable water quality conditions, and, where possible, preserves and utilizes existing natural features.

The minimum LOS standard for development in the City of Alachua requires a floor elevation of one (1) foot above the 100-year/24-hour storm elevation. Any new/future development on the portion of this property proposed for the subject property will be required to meet these standards and the Suwannee River Water Management District (SRWMD) requirements at the time of final development approval.

FIRE / EMS

The proposed development will be served by Fire Station #21 located at 16121 NW 173rd Street.

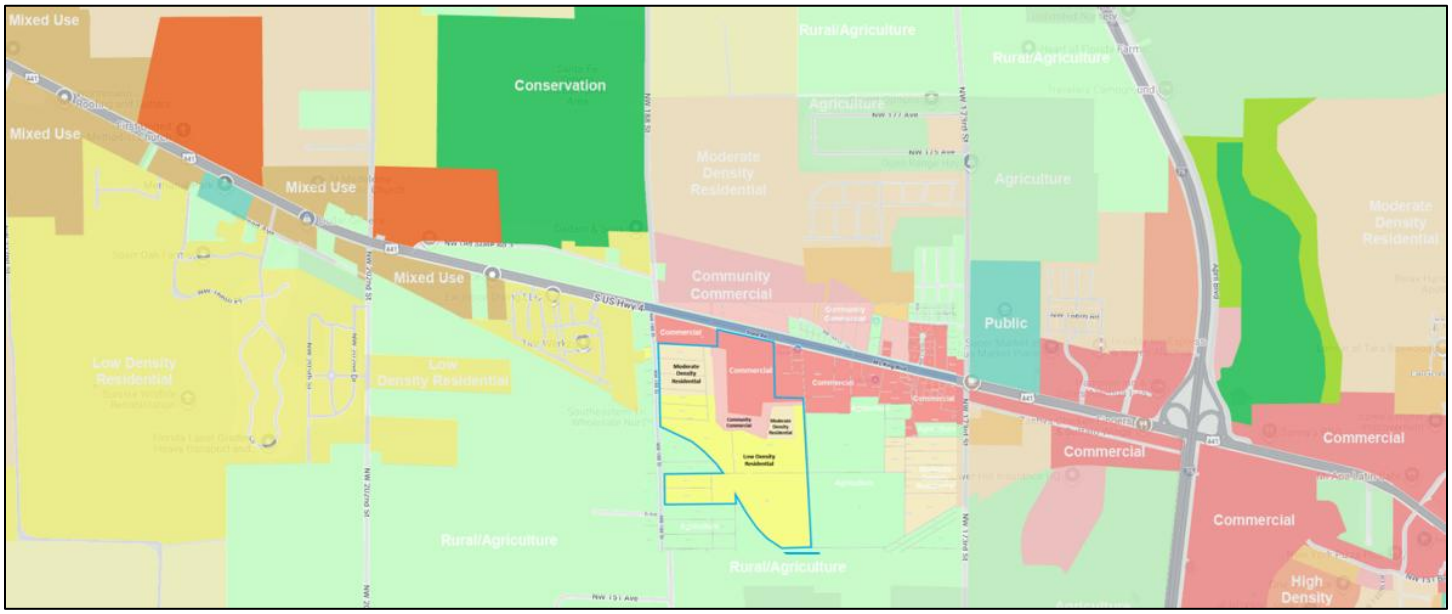
POLICE

The proposed development will be served by the City of Alachua Police Department located at 15000 NW 142nd Avenue.

Compatibility Analysis

Compatibility with adjacent land uses is a consideration when considering a proposed zoning change. The following list of adjacent uses illustrate the existing land uses for the surrounding properties:

The existing land uses and future land use designations of the adjacent properties are as follows:



North: US Highway 441, Undeveloped Property
Community Commercial future land use designation

East: Undeveloped Properties
Commercial & Agriculture future land use designations

West: NW 188th Street, Residential Properties
Commercial, Residential and Agriculture future land use designations

South: Residential & Undeveloped Property
Agriculture future land use designation

The proposed PD-COMM and PD-R zoning designations are compatible with the overall surrounding land use designations, zoning districts and the existing development pattern in the area. As previously stated, the site is located within the urbanizing portion of the City of Alachua, with access along a major state arterial roadway (US 441) and within close proximity to Interstate 75. Public services (centralized water & sewer utilities, electric, telecommunications, police/fire protection, etc.) are readily available to serve the site at adequate capacity to accommodate on-site development. There is also existing residential and commercial development in the immediate vicinity of the parcel. As indicated on the combined future land use maps for Alachua & High Springs on the following page, almost all properties abutting US 441 have urban designations.

Comprehensive Plan Consistency

This rezoning Justification Report, along with the following summary of the applicable Comprehensive Plan elements, demonstrates that the application is consistent with the City of Alachua Comprehensive Plan. The proposed rezoning application is consistent with the Goals, Objectives, and Policies included within the Future Land Use Element, the Transportation Element, Community Facilities Element, Conservation/Open Space Element, Intergovernmental Coordination Element, Economic Element and Capital Improvements Element

Future Land Use Element:

The following Goals, Objectives and Policies are applicable to the proposed rezoning application:

Policy 1.2.a: Low Density Residential (0 to 1 dwelling unit per acre): The Low Density Residential land use category allows residential development at a maximum density of 1 dwelling unit per acre. This land use category shall provide for a transition between rural residential / agricultural areas and the urban areas within the City. The following uses are allowed in the Low Density Residential land use category:

1. *Single family detached dwelling units;*
2. *Accessory Dwelling Units;*
3. *Manufactured or modular homes meeting certain design criteria;*
4. ***Residential Planned Developments**; and,*
5. *Supporting community services such as schools, houses of worship, parks, and community centers.*

Policy 1.2b: Moderate Density Residential (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre.

The following uses are allowed in the Moderate Density Residential land use category:

1. *Single family detached dwelling units;*
2. *Accessory dwelling units;*
3. *Manufactured or modular homes meeting certain design criteria;*
4. *Mobile homes only within mobile home parks;*
5. *Duplexes and quadplexes;*
6. *Townhomes;*
7. ***Residential Planned Developments**; and,*
8. *Supporting community services such as schools, houses of worship, parks, and community centers.*

Consistency: The Moderate Density and Low Density Residential future land use designations promote use types that are compatible with the surrounding development pattern in the vicinity, including single-family detached units and single-family subdivisions.

Policy 1.3.b: Commercial: *The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:*

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Recreation and entertainment;
5. Tourist-related uses;
6. Visitor accommodations;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services;
14. Eating establishments;
15. Single family attached units;
16. Apartments and townhomes;
17. Duplexes and quadplexes;
18. Single-family and multi-family residential above first floor commercial uses;
19. Convention centers; and,
20. Supporting community services such as schools, houses of worship, parks, and community centers. Development in the Commercial land use category may occur as mixed-use or non-mixed-use.

Policy 1.3.a: Community Commercial: *The Community Commercial land use category is a mixed-use land use category established to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas while allowing for the development of a diverse and affordable housing stock. The Community Commercial land use category also serves as a transitionary land use category between residential and commercial land use categories. The following uses are allowed within the Community Commercial land use category:*

1. Neighborhood commercial establishments;
2. Residential/offices and live-work units;
3. Business and professional offices;
4. Personal services;
5. Financial institutions;
6. Retail sales and services that serve the community;
7. Eating establishments;
8. Indoor recreation/entertainment;
9. Single-family and multi-family residential above first floor commercial uses;
10. Visitor accommodations;

11. Supporting community services such as schools, houses of worship, parks, and community centers;
12. Traditional Neighborhood Planned Developments;
13. Single family attached units;
14. Apartments and townhomes; and,
15. Duplexes and quadplexes.

Development in the Community Commercial land use category may occur as mixed-use or non-mixed-use.

Consistency: As described in the policies listed above, the Commercial, Community Commercial, Moderate Density Residential and Low Density Residential future land use designations support the proposed PD-COMM and PD-R zoning districts, which will serve to implement the underlying Comprehensive Plan future land use designations, illustrated in the previous land use map exhibits. The proposed future land use map designations are appropriate due to their location in an area with a mix of commercial and residential development areas well suited to accommodate a mix of development types that will be compatible in nature. In addition, the property is served by all necessary public facilities to serve the site's future development.

Policy 1.3.d: Design and performance standards:

The following criteria shall apply when evaluating commercial development proposals in the commercial & mixed use future land use categories:

1. *Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;*
2. *Buffering from adjacent existing/potential uses;*
3. *Open space provisions and balance of proportion between gross floor area and site size;*
4. *Adequacy of pervious surface area in terms of drainage requirements;*
5. *Placement of signage;*
6. *Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;*
7. *Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout, drive aisles, and points of conflict;*
8. *Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;*
9. *Unique features and resources which may constrain site development such as soils, existing vegetation and historic significance; and,*
10. *Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design.*

<u>Consistency</u>: The proposed mixed-use community includes the integration of vehicular and non-vehicular access into the site and access management features of site, in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access. Consistent with the site's adopted Zoning, the site retains all agreed upon buffering area from adjacent existing/potential uses. The site's integrated mixed-use design provides open space provisions, balancing the proportion between gross floor area and the site's overall size. Open space shall be accounted across the holistic site. The site also functions in accordance with the original approval in relation to adequacy of pervious surface area in terms of drainage requirements. Placement of signage will be conducive with the context area and provide not only visual branding but wayfinding within the site.

Site lighting and potential impacts of lighting upon the surrounding area are minimized by generous landscape buffers within and around the site. Lighting will be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where not intended;

Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout, drive aisles, and points of conflict have been considered in the PD-Res and PD-Comm areas and will be finalized during Development Plan Approval, with appropriate traffic control and calming mechanisms.

Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations, will be addressed and finalized during Development Plan Approval.

No known unique features and resources which may constrain site development such as soils, existing vegetation and historic significance; and performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design are not germane to this specific site due to its location and small scale.

Policy 1.3.e: Density and intensity standards.

2. *Mixed-uses. The following density and intensity standards shall apply to mixed-use development proposals in the commercial & mixed-use land use categories:*

    a. *Density. Residential uses are limited to a density of 15 dwelling units per acre in the Community Commercial and Commercial future land use categories and 20 dwelling units per acre in the Central Business District land use category.*
    b. *Intensity. Non-residential uses are limited to an intensity of 0.6 floor area ratio for parcels 5 acres or greater, 0.85 for parcels less than 5 acres but greater than 1 acre, and 1.25 floor area ratio for parcels less than 1 acre.*

<u>Consistency</u>: The proposed Floor Area Ratio (FAR) is 0.17, far below existing City of Alachua Land Development Regulations standards, based on the mixed-use design.

Policy 1.3.f: The creation/promotion of strip pattern commercial development shall be discouraged. Infill within established commercial areas is preferred over extension of a strip commercial pattern. Extension of a commercial land use designation may be considered in circumstances where the extension is compatible with the existing land uses surrounding the land or the land use categories of surrounding lands. Extensions of a commercial land use category shall not encroach into a residential area. The following criteria shall be applied to limit the impacts of commercial development upon surrounding areas:

1. *Impacts upon traffic circulation should be anticipated and mitigated through the reservation of right-of-way for road widening and marginal access streets when appropriate.*
2. *Access points for commercial development shall minimize points of conflict by utilizing frontage roads, providing cross access between parcels, or installing shared use ingress and egress access driveways connections to roadways. City of Alachua Comprehensive Plan*
3. *Setbacks and landscaped or other appropriate buffers shall be established to mitigate the visual impacts of commercial development upon surrounding land uses.*
4. *A sidewalk or bicycle path shall be required where appropriate, to provide convenient access to the development from surrounding areas and to reduce traffic volumes on the roadways.*

Consistency: No radial, strip, isolated, or ribbon patterns will be created by this land use change. The proposed development upon the subject property is mixed-use and internally connected, thus not promoting strip development. The mixed-use development form promotes consistency with the Comprehensive Plans overall goals for the land use pattern along the US 441 corridor and throughout the City of Alachua. In addition, the proposed Planned Development is designed to include a master plan that includes appropriate access management, interconnectivity, setbacks, buffers, and pedestrian facilities.

Policy 1.3.g: The City shall pursue the establishment of activity centers and similar criteria to guide the placement and design of commercial and business areas.

2. *The City shall establish and maintain the US 441 corridor as a Corporate Corridor Activity Center. The intent of establishing this activity center is to implement economic development objectives and to promote a coordinated development plan to maximize existing and future land use patterns and preserve the function of the US 441 corridor.*

Consistency: Creation of a mixed-use development program, such as proposed in this application supports the City's establishment of Activity Centers, through the combined placement of commercial and business areas in a master planned community. Mixed-use development creates both short- and long-term benefits in transportation management and the creation of multi-modal opportunities within the community and City as a whole.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PD's for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices, and densities. The allowed uses within a residential PD are not subject to the permitted uses in the

underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.

Consistency: As shown in the PD-COMM / PD-R Master Plan submitted with this application, all onsite dwelling units shall be a variety of detached, single-family homes, which are consistent with Policy 2.1.a.1.

2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.

Consistency: No non-residential activities are being proposed within the proposed PD-R zoning area. However, the overall project does include commercial uses in the proposed PD-COMM zoning area, which will provide access to goods and services to the future neighborhood residents, the City of Alachua, and community as a whole.

3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.

Consistency: The subject PD-COMM / PD-R zoning will meet or exceed the minimum amount of open space required by Policy 2.5.a. of the Comprehensive Plan, through holistic design across the entire site. Permitted onsite activities are indicated on the PD Master Plan documents.

4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.

Consistency: As will be indicated during the subsequent development review process, the site shall be designed to support multiple methods of internal transportation by promoting pedestrian-friendly block sizes, sidewalk infrastructure, and street lighting systems.

5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Consistency: The proposed project is designed in a manner to provide efficient use of land and infrastructure and public facilities, including roads, utilities, and other local services.

Policy 2.1.d: Commercial Planned Development: The City shall establish commercial planned development (PD) zoning district regulations as a development option for planned commercial development within commercial and high density residential land use categories. Those regulations shall be developed to achieve the following: 1. A functional mix of mixed-use retail, commercial, and office development. A limited amount of medium to high density residential development may be integrated with commercial and retail uses.

Consistency: The City has established the PD districts, which the applicant is seeking to utilize.

Objective 2.5: *Open Space Standards: The City shall utilize open space requirements to preserve the rural character of Alachua, protect natural resources, and provide spaces for people to recreate and gather.*

Policy 2.5.a: *There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.*

Policy 2.5.b: *Open space shall not be limited to unusable portions of project sites. A portion of open space shall be usable and functional.*

Consistency: **As illustrated in the proposed PD-R / PD-COMM Master Plan submitted with this report, the proposed development will meet or exceed required 10% minimum across the holistic site. Permitted uses in the open space area are identified on the PD Master Plan documents.**

GOAL 5: Development Standards: The City shall include provisions through its comprehensive plan amendment process, development review process and in its land development regulations for development standards that address natural features and availability of facilities and services. These development standards will strive to protect natural resources and public facility resources while allowing for innovative and flexible development patterns.

Consistency: This application and the related materials demonstrate how the proposed plan is consistent with the development standards set forth by the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 5.1: *Natural features: The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.*

Policy 5.2.a: *All new development shall meet level of service requirements for roadways, potable water, sanitary sewer, stormwater, solid waste, and public schools in accordance with LOS standards adopted in the elements addressing these facilities.*

Consistency: **As described in the "Public Facilities Analysis" portion of this report, adequate facilities (capacity) are currently available to serve the site and will not negatively affect the City's adopted LOS standards. The subject property abuts a State arterial roadway for full access (US Highway 441). In addition, public utilities are available to serve the site and connections to such utilities will be provided by the developer. According to the City Public Services Department, utilities are available to serve the site's future development.**

New development on the site (when proposed) will be required to meet concurrency standards as stated in the Comprehensive Plan.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Consistency: There are no steep slopes onsite that will impede site development.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Consistency: There are currently six types of soils located onsite. According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations.

The City shall establish standards for a limitation on filling in flood prone areas.

Consistency: There are no FEMA flood zone areas located on the project site.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Consistency: There are no wetland areas located on the project site.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Consistency: No listed species are known onsite.

Objective 5.2: Availability of facilities and services The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water, sanitary sewer, stormwater, solid waste, and public schools in

accordance with LOS standards adopted in the elements addressing these facilities.

Consistency: **As described in the "Public Facilities Analysis" portion of this report, adequate facilities (capacity) are currently available to serve the site and will not negatively affect the City's adopted LOS standards. The subject property abuts a State arterial roadway for full access (US Highway 441). In addition, public utilities are available to serve the site and connections to such utilities will be provided by the developer. According to the City Public Services Department, utilities are available to serve the site's future development.**

Development Plan(s) proposed for the site (when proposed) will be required to meet concurrency standards as stated in the Comprehensive Plan.

GOAL 9: *Water and Wastewater Service: The City will ensure that new development within the corporate limits shall connect to the City's potable water and wastewater systems, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the Comprehensive Plan*

Consistency: **Any new development on this site will be required to connect to public potable water and wastewater facilities as indicated above.**

Objective 1.1: *Level of Service The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.*

Consistency: **An analysis of the proposed land use change impacts is included in this report (see the "Public Facilities Analysis" section of this Justification Report) based on potential land use maximum net development scenarios indicate that the proposed rezoning will not result in an increase in traffic impact that will negatively affect the adopted Level of Service (LOS) standards, consistent with the Transportation Element.**

Community Facilities Element:

Goal 1: *The City shall plan for and provide adequate and economical wastewater service while protecting the environment, especially the groundwater resources.*

Objective 1.2 *New development may only occur within areas where wastewater service is available or shall be made available as a part of the proposed development. For purposes of this objective, development does not include an addition to an existing development of less than 33% of the existing floor area of the development or an addition of less than 33% of the existing impervious surface area within a five-year period.*

Goal 2: *The City will provide for solid waste disposal service in a sanitary, economic, and environmentally safe manner.*

Goal 3: *The City shall develop and maintain a stormwater management system that minimizes flooding and protects, preserves and enhances desirable water quality conditions, and, where possible, preserves and utilizes existing natural features.*

Goal 4: *The City shall provide an adequate supply of potable water to customers throughout the water service area.*

Objective 4.1 *The City shall achieve and maintain acceptable levels of service for potable water quantity and quality.*

Consistency: **Consistency with this element is demonstrated in the "Public Facilities Analysis" and the "Environmental Analysis" sections of the report. Future development on the site will be required to connect with potable water and wastewater facilities consistent with the above Goals and Objectives. Stormwater management facilities for development upon the site will be required consistent with adopted engineering standards.**

Conservation & Open Space Element:

Consistency: The proposed rezoning is consistent with this element. Specifically, the application is consistent with each of the following objectives listed within the element:

Objective 1.4: Air Quality The City shall institute the following measures to maintain air quality at the levels established in the National Ambient Air Quality "Standards (NAAQX).

Consistency: **The proposed PD-R/PD-COMM zoning does not permit any industrial-type non residential uses, which are more likely to create concerns with air quality. Any future development proposal associated with the site will meet the City's air quality standards.**

Objective 1.5: Soils The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

Consistency: As described in the Environmental Analysis section of this application, the existing soil types on site have minimal to no limitations for urban development.

Policy 1.5.c: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Consistency: The subject property does not contain any known seepage slopes. In addition, the site topography will be taken into consideration with the site's future development and ultimately, the drainage design. In addition, future on-site development will include stormwater management areas complying with all applicable City, County, and water management district standards for water quality and quantity and shall be designed to minimize negative impacts on the natural terrain and topographic pattern.

Objective 1.6: Mineral Resources The City shall ensure that extraction activities do not pose a threat to natural resources, protected habitats and ecosystems, and human health.

Consistency: **There are no known mineral resources within the subject property.**

Objective 1.7: Geological Resources The City shall identify, protect and conserve significant geological resources and their natural functions.

Consistency: **The Environmental Analysis section of this report did not identify any geological resources on the property.**

Objective 1.10: Wetlands The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Consistency: **No wetlands are located on the subject property.**

Objective 1.11: Open and Green Space The City shall work to preserve native ecosystems and the natural aesthetic beauty and charm of Alachua by ensuring the provision of open spaces and green linkages throughout the City, designed for the enjoyment of the citizenry.

Consistency: **The required open and green space requirements shall be met upon subsequent development of the site.**

Objective 1.12: Water Resources The City shall protect and conserve the quantity and quality of water resources, not only for the benefit of residents of the City, but for all in North Florida who depend on the Floridian Aquifer for drinking water, and for the benefit of all connected springs, streams, and rivers which may be impacted by the City's land use and development practices.

Consistency: **The site's future development will be connected to centralized water and sewer facilities consistent with the requirements in the Community Facilities Element Policies 1.2.a, 4.1.b, and 4.2.a. Connections to utilities will be provided by the developer. According to the City Public Services Department, utilities are available to service future development on the parcel. This will involve connection to potable water and wastewater lines at the developer's expense.**

Policy 1.12.d: The City shall require the following buffers for development along surface water bodies…

Response: **There are no surface water bodies located on the project site.**

Capital Improvements Element:

Objective 1.2: *The City shall require that all decisions regarding the issuance of development orders and permits shall be consistent with the development requirements of the Comprehensive Plan, the Land Development Regulations, and that public facilities and services necessary to support such development are available while also maintaining the adopted level of service standards.*

Consistency: Any new development of the subject parcel would require an analysis for availability of public facilities consistent with adopted LOS standards. Development on the parcel will be subject to development review and concurrency analysis at the time of development application.

New development or redevelopment at the site will be required to connect to the "public sanitary sewer system if abutting any street or right-of-way in which there is located a public sanitary sewer" (Section 38-137 Code of Ordinances). Policies 1.2.a and 4.1.b in the Community Facilities Element establish the requirements for connection to the public wastewater and potable water systems.

Public facilities currently are operating within the acceptable level of service standards outlined within the Comprehensive Plan (see the "Public Facilities Impact Analysis" section of this report). However, any future development plan applications would be subject to review for required capital improvements.

Public Schools Element

Objective 2.2: Level of Service Standards The City shall ensure, in coordination with the School Board, that the capacity of public schools is sufficient to support new residential subdivisions, plats and/or site plans at the adopted level of service (LOS) standards within the period covered by the five-year schedule of capital improvements.

Consistency: An analysis of the impacts to public schools facilities has been provided within 'Public Facilities Analysis' section of the Report. The proposed Zoning Map amendment will result in a net reduction of permitted residential density of 72 dwelling units. As such, there will be a reduction of potential student station generation and a reduced impact to public schools. Based on this, the amendment will lessen impacts on the City's public school facilities adopted LOS.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Consistency: This amendment would support additional housing within the PD by including a residential component, thereby furthering Policy 1.1.a.

Recreation Element

Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Consistency: An analysis of the impacts to recreation facilities has been provided within 'Public Facilities Analysis' section of the Report. As stated, the proposed zoning map amendment will result in a reduction of recreation area demand. Based on this, the amendment will lessen impacts on recreation adopted Level of Service.

Consistency with the Land Development Code

The analysis below indicates how this rezoning application complies with the Standards for Site Specific Amendments to the Official Zoning Atlas. Responses to each requirement are shown in bold.

2.4.2(E) Standards for Site Specific Amendments to Official Zoning Atlas

(1) Competent Substantial Evidence Provided

The applicant has provided competent substantial evidence that is made part of the record of the hearing that:

(a) Consistent with Comprehensive Plan. The proposed amendment is consistent with and furthers the goals, objectives and policies of the Comprehensive Plan.

Consistency: The rezoning application is consistent with the Comprehensive Plan as indicated in the "Comprehensive Plan Consistency" section of this report. The proposed Community PD-COMM and PD-R zoning are appropriate implementing districts for the underlying Commercial, Community Commercial, Moderate and Low Density Residential future land use categories (concurrent application).

(b) Consistent with Ordinances

Consistency: As demonstrated in this application, the rezoning request is consistent with all applicable City Land Development Regulations Ordinances and the Comprehensive Plan.

Prior to the submittal of this rezoning application, the applicant held the required pre-application meeting with staff and two (2) neighborhood meetings with the public. If the property is rezoned to PD-COMM and PD-R, on-site development will comply with applicable development standards (parking, tree protection, landscaping, open space, lighting, etc.) as outlined in Article 6 of the City of Alachua's Land Development Regulations or as proposed in accompanying documents

(c) Logical Development Pattern

Consistency: The rezoning request to PD-COMM will take place on land fronting US 441, which will take advantage of the high visibility along and direct access to this corridor and is aligned with the adjacent existing commercially zoned properties to both the east and west and north. The PD-R zoning also creates a logical development pattern for the subject property and the surrounding area, as it provides a step-down approach and transitional density buffer from

development on the US 441 corridor and commercially zoned properties southward toward other residential uses, and further to the south where rural residential homes are located. In addition, larger lots are approved where abutting agriculturally zoned properties.

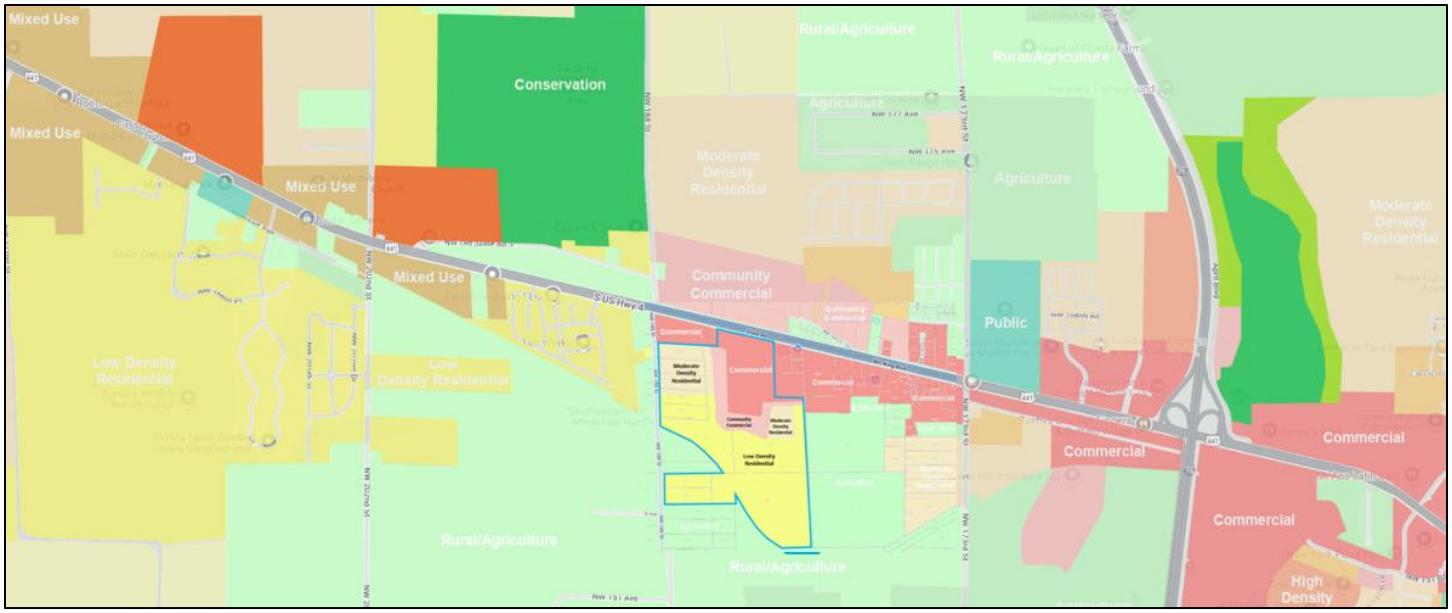
(d) Pre-Mature Development

Consistency: This rezoning request will not result in a pre-mature development pattern as it is served by all necessary City public services, is located along a State arterial roadway, within close proximity to Interstate 75 and is in direct proximity to urban development land use and zoning designations.

(e) Incompatible with Adjacent Lands

Consistency: This zoning change request will not result in any incompatibility with adjacent lands. Compatibility with adjacent land uses is a consideration when considering a proposed change in zoning. The following list of adjacent uses illustrates the existing land uses for the surrounding properties:

The existing land uses and future land use designations of the adjacent properties are as follows:



North: US Highway 441, Undeveloped Property
Community Commercial future land use designation

East: Undeveloped Properties
Commercial & Agriculture future land use designations

West: NW 188th Street, Residential Properties
Commercial, Residential and Agriculture future land use designations

South: Residential & Undeveloped Property
Agriculture future land use designation

The proposed PD-COMM and PD-R zoning designations are compatible with the overall surrounding land use designations, zoning districts and the existing development pattern in the area. As previously stated, the site is located within the urbanizing portion of the City of Alachua, with access along a major state arterial roadway (US 441) and within close proximity to Interstate 75. Public services (centralized water & sewer utilities, police/fire protection, etc.) are readily available to serve the site at adequate capacity to accommodate on-site development. There is also existing residential and commercial development in the immediate vicinity of the parcel. As indicated on the combined future land use maps for Alachua & High Springs on the following page, almost all properties abutting US 441 have an urban designation:

(f) Adverse Effect on Local Character

Consistency: The proposed rezoning will not result in an adverse effect on the local character of the area. The immediate area includes a mix of non-residential and residential development types that are part of an overall master planned project strategically located near US 441 and Interstate 75. The site's future development as a master planned PD promotes quality development and is consistent with established development pattern in the immediate area.

(g) Not Deviate from Pattern of Development

Consistency: The proposed rezoning does not deviate from the overall pattern of development in the area. The immediate area includes a mix of residential development types and densities and commercial areas in the vicinity that are strategically located near US 441 and Interstate 75. The proposed PD-COMM zoning area completes a portion of land along US 441 currently bounded by other commercial lands on the west, north, and east sides.

Specifically, regarding residential development in the PD-R area, the proposed maximum PD density maximum of approximately 1.66 units per acre is low for single family development, and provides a transitional density buffer between properties closer to the Interstate and lower density lands to the south and west. The site's development as a mixed-use community containing both PD-Res and PD-Comm promotes a logical urban development pattern with supportive nearby commercial components.

(h) Encourage Sprawl

Consistency: The following Urban Sprawl Analysis indicates that the rezoning application does not encourage sprawl based on the following:

Urban Sprawl Indicators

This zoning map amendment has been analyzed to determine that the amendment incorporates a development pattern or urban form that achieves at least four of the following criteria indicating that it discourages urban sprawl (Ch. 163.3177(6)(a)(9)(b), F.S.).

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.
