February 28, 2022, City Commission Meeting Minutes

City of Alachua
THE GOOD LIFE COMMUNITY

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Presentation to Commissioner Robert Wilford
PREPARED BY: Mike DaRoza, City Manager

RECOMMENDED ACTION:
Receive the presentation.

Summary

Commissioner Robert Wilford was elected to the City Commission in April 2010. He has since served in the capacity as City Commissioner and Vice Mayor. Commissioner Wilford chose not to seek reelection. This item provides an opportunity to recognize Commissioner Wilford for his 12 years of service to the City of Alachua.

City of Alachua
THE GOOD LIFE COMMUNITY

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Mi Apa to Present Donation to Alachua Dream Team, Relay for Life
PREPARED BY: LeAnne Williams, Deputy City Clerk

RECOMMENDED ACTION:
Receive the presentation.

Summary

Every year Mi Apá Latin Café of Alachua supports the Alachua Dream Team as they raise funds for Relay for Life and the American Cancer Society by allowing the Dream Team to come in and serve tables during lunch and dinner. The restaurant generously donates 25% of the entire day's proceeds to their efforts. This year, the servers were:

City Manager Mike DaRoza
Mayor Gib Coerper
Commissioner Jennifer Blalock
Commissioner Dayna Miller
Mitch Glaeser, San Felasco Tech City

This year, the Alachua Dream Team raised $1,355.66. Owners Peter and Aurora Ynigo and Restaurant Manager Vanessa Marin are here to make the presentation.

City of Alachua
THE GOOD LIFE COMMUNITY

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Ordinance 22-03: Second Reading, an Ordinance of the City of Alachua, Florida relating to the amendment of the City's Comprehensive Plan; Amending the City's Comprehensive Plan to Add a Property Rights Element; Providing a Repealing Clause; Providing Severability; and Providing an Effective Date. (Legislative Hearing)
PREPARED BY: Kathy Winburn, AICP

RECOMMENDED ACTION:
Staff recommends that the City Commission adopt Ordinance 22-03 upon Second and Final Reading.

Summary

The proposed Comprehensive Plan Text Amendment is a request by the City of Alachua to amend the text of the City of Alachua Comprehensive Plan by adding a Property Rights Element, as required by recent changes to the State of Florida Community Planning Act that were enacted through Florida House Bill 59. The proposed Property Rights Element is intended to meet the new statutory requirement in Section 163.3177(6)(i), Florida Statutes (F.S.) that, effective July 1, 2021, requires all comprehensive plans in the State of Florida to include a Property Rights Element.

According to the new statutory language, local governments shall adopt the required property rights element by earlier of the date of its adoption of its next proposed comprehensive plan amendment that is initiated after July 1, 2021, or the date of the next scheduled evaluation and appraisal of its comprehensive plan pursuant to Florida Statutes.

The text proposed to be adopted into the Comprehensive Plan uses the model statement of property rights that is provided in Florida Statute. The proposed amendment is formatted as a Goal, Objective and a Policy, to be consistent with the formatting of the other Elements.

The proposed amendment is as follows:

Goal 1: The City of Alachua will respect constitutionally protected and judicially acknowledged private property rights.

Objective .11: The City of Alachua will consider private property rights as part of the decision-making process.

Policy 1.1a: The following rights shall be considered in local decision-making:

1. The right of a property owner to physically possess and control his or her interests in the property, including easements, leases and mineral rights.
2.The right of a property owner to use, maintain, develop, and improve his or her property for personal use or for the use of any person, subject to state law and local ordinances.
3.The right of the property owner to privacy and to exclude others from the property to protect the owner's possessions and property.

The Planning & Zoning Board held a public hearing on December 14, 2021, and voted 4-0 to transmit the proposed amendment to the City Commission with a recommendation of approval.
The City Commission held a public hearing on January 10, 2022, and voted 5-0 to approve Ordinance 22-03 on First Reading and transmit the amendment to the Department of Economic Opportunity (DEO) for review.

On January 20, 2022, DEO issued its review letter, indicating no comments on the proposed amendment.

ORDINANCE 22-03

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE CITY'S COMPREHENSIVE PLAN; AMENDING THE CITY'S COMPREHENSIVE PLAN TO ADD A PROPERTY RIGHTS ELEMENT; PROVIDING A REPEALING CLAUSE; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

RECITALS

WHEREAS, the Community Planning Act (Section 163.3161 et. seq), Florida Statutes, requires each local government to maintain a comprehensive plan; and,

WHEREAS, the City Commission of the City of Alachua adopted its Comprehensive Plan on January 22, 1992, by Ordinance No. 0-91-23 and last updated its Comprehensive Plan on July 31, 2020; and,

WHEREAS, a duly advertised public hearing was conducted on the proposed amendment on December 14, 2021, by the Planning and Zoning Board, sitting as the Local Planning Agency (LPA) and the LPA reviewed and considered comments received during the public hearing concerning the application and made its recommendation to the City Commission; and,

WHEREAS, the City Commission considered the recommendation of the LPA at a duly advertised public hearing on January 10, 2022, provided for and received public participation, and approved the amendment for transmittal to the Florida Department of Economic Opportunity (DEO) and reviewing agencies; and

WHEREAS, the DEO has reviewed the proposed amendment and issued its comment letter on January 20, 2022; and,

WHEREAS, the City Commission considered the comments received from the DEO and reviewing agencies; and

WHEREAS, the City Commission held a duly advertised public hearing on adoption of the proposed amendment and provided for and received public participation, and approved the amendment on March 28, 2022 with no changes since the transmittal hearing; and

WHEREAS, for reasons set forth in this ordinance that is hereby adopted and incorporated as findings of fact, that the Alachua City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare;

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA:

Section 1. Interpretation of Recitals

The above recitals are true and correct and incorporated in this ordinance.

Section 2. Findings of Fact and Conclusions of Law

The authority for the enactment of this ordinance is Chapter 163, Part I, Florida Statutes; Sections 166.021 and 166.041; and the City's Comprehensive Plan.

Section 3. Comprehensive Plan Amendment to Add a Property Rights Element

The City of Alachua Comprehensive Plan is hereby amended as follows (text that is ~~underlined~~ is to be added and text that is shown as ~~strikethrough~~ is to be removed):

PROPERTY RIGHTS ELEMENT

Goal 1: The City of Alachua will respect constitutionally-protected and judicially acknowledged private property rights.

Objective 1.1: The City of Alachua will consider private property rights as part of the local decision-making process.

Policy 1.1.a: The following rights shall be considered in local decision-making:

1. The right of a property owner to physically possess and control his or her interests in the property, including easement, leases and mineral rights.
2. The right of a property owner to use, maintain, develop and improve his or her property for personal use or for the use of any person, subject to state law and local ordinances.
3. The right of the property owner to privacy and to exclude others from the property to protect the owner's possessions and property.
4. The right of a property owner to dispose of his or her property through sale or gift.

Section 4. Codification of and Correction of Scrivener's Errors

The City Manager or designee, without public hearing, is authorized to correct any typographical errors which do not affect the intent of this ordinance. A corrected copy shall be posted in the public record.

Section 5. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of the City of Alachua, Florida.

Section 6. Repealing Clause

All ordinances or parts of ordinances in conflict herewith are, to the extent of the conflict, hereby repealed.

Section 7. Severability

It is the declared intent of the City Commission of the City of Alachua that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance, and the remainder of the ordinance after the exclusions of such part or parts shall be deemed to be valid.

Section 7. Effective Date

This ordinance shall become effective immediately upon passage and adoption. The effective date of these plan amendments shall be at the time the state land planning agency issues its Notice of Intent, if the plan

amendment is found to be in compliance and no challenge has been filed by an effective party at the time that the Notice of Intent is posted to the state land planning agency's website. If timely challenged, this plan amendment shall become effective on the date the state land planning agency or Administrative Commission enters a final order determining this adopted amendment to be in compliance in accordance with Chapter 163.3184, Florida Statutes. No development orders, development permit, or land uses dependent on this amendment may be issued or commenced before this plan amendment has become effective.

Passed on First Reading the 10th day of January, 2022.

PASSED and ADOPTED, in regular session, with a quorum present and voting, by the City Commission, upon second and final reading this 28th day of March, 2022.

Staff Report

Planning & Zoning Board Hearing Date: December 14, 2021
Legislative Hearing

SUBJECT:	A request to amend the text of the City of Alachua Comprehensive Plan to add a Property Rights Element.
APPLICANT/AGENT:	City of Alachua
PROJECT PLANNER:	Kathy Winburn, AICP
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board find the proposed Comprehensive Plan Text Amendment to add a Property Rights Element to the City of Alachua Comprehensive Plan to be consistent with the City of Alachua Comprehensive Plan and transmit such finding to the City Commission with a recommendation to approve.
RECOMMENDED MOTION:	*Based upon the presentation to this Board and Staff's recommendation, this Board finds the proposed Comprehensive Plan Text Amendment to add a Property Rights Element to the City of Alachua Comprehensive Plan to be consistent with the Comprehensive Plan and transmit such finding to the City Commission with a recommendation to approve.*

SUMMARY

The proposed Comprehensive Plan Text Amendment is a request by the City of Alachua to amend the City of Alachua Comprehensive Plan by adding a new Property Rights Element to the Plan as required by recent changes to the State of Florida Community Planning Act that were enacted through Florida House Bill 59. The proposed Property Rights Element is intended to meet the new statutory requirement in Section 163.3177(6)(i), Florida Statutes (F.S.), that, effective July 1, 2021, requires all local comprehensive plans in Florida to include a Property Rights Element.

The State of Florida's Community Planning Act (Sec. 163.3161 et. seq., (F.S.)) governs community planning in the State of Florida. Section 163.3177 of the Community Planning Act specifies specific elements that are required to be included within local government comprehensive plans. The City of Alachua Comprehensive Plan currently includes 13 total elements, 8 of which are required elements pursuant to Florida Statutes, including: Future Land Use; Transportation, Housing; Community Facilities; Conservation & Open Space; Recreation; Intergovernmental Coordination; and Capital Improvements. The adopted City of Alachua Comprehensive Plan also contains 5 additional optional elements, including: Economic; Public School Facilities; Vision; Administration and Implementation; and Monitoring and Evaluation.

Florida House Bill 59, which became law on June 29, 2021, added Subsection 163.3177(6)(i), F.S., to the Community Planning Act providing that, effective July 1, 2021, each local government shall adopt a property rights element into its comprehensive plan to ensure that private property rights are considered in local decision-making. The Property Rights Element is now therefore a required element for comprehensive plans.

The new statutory language in Subsection 163.3177(6)(i), F.S., provides that the local government may adopt its own Property Rights Element or use the statement of property rights that is provided within the language of the statute.

The statute also provides that, if the local government adopts its own Property Rights Element, it may not conflict with the statement of property rights provided within the statute.

According to the new statutory language, local governments shall adopt the required property rights element by earlier of the date of its adoption of its next proposed comprehensive plan amendment that is initiated after July 1, 2021, or the date of the next scheduled evaluation and appraisal of its comprehensive plan pursuant to Section 163.3191, F.S. (the date is January 1, 2026 for the City of Alachua).

PROPOSED COMPREHENSIVE PLAN TEXT AMENDMENT

The Property Rights Element language that is proposed to be adopted into the City of Alachua Comprehensive Plan uses the model statement of property rights that is provided within the language of the statute. The proposed amendment is structured in the comprehensive plan format of goals, objectives and policies, therefore the amendment proposes a goal and an objective, along with the model statement of property rights.

In accordance with the model statement of property rights in the statute, the proposed Property Rights Element would require the City to consider property owners' rights to:

1. Physically possess the property and control his or her interests in the property, including easements, leases and mineral rights;
2. Use, maintain, develop and improve the property for personal use or the use of another, subject to state law and local ordinances;
3. Privacy and exclusion of others from the property to protect his or her possessions and property; and
4. Dispose of the property through sale or gift.

The proposed amendment to add the Property Rights Element to the City of Alachua Comprehensive Plan is necessary in order to maintain the Plan's compliance with the state's Community Planning Act. According to the Florida Department of Economic Opportunity (DEO), a local government must have

adopted a Private Property Rights Element within its Comprehensive Plan before DEO will review any transmitted Comprehensive Plan Amendments. This has the effect of prohibiting the City from adopting any future Comprehensive Plan Amendments until the Property Rights Element has been adopted by the City and is officially part of the City's Comprehensive Plan. By adopting the proposed element, the City will henceforth consider its goals, objectives and policies when reviewing various land use actions for consistency with the Comprehensive Plan.

The language of the proposed Property Rights Element to be added to the City of Alachua Comprehensive Plan is as follows:

PROPERTY RIGHTS ELEMENT

Goal 1: The City of Alachua will respect constitutionally-protected and judicially acknowledged private property rights.

Objective 1.1: The City of Alachua will consider private property rights as part of the local decision-making process.

Policy 1.1.a: The following rights shall be considered in local decision-making:
1. The right of a property owner to physically possess and control his or her interests in the property, including easement, leases and mineral rights.
2. The right of a property owner to use, maintain, develop and improve his or her property for personal use or for the use of any person, subject to state law and local ordinances.
3. The right of the property owner to privacy and to exclude others from the property to protect the owner's possessions and property.
4. The right of a property owner to dispose of his or her property through sale or gift.

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The proposed amendment is intended to meet the new state comprehensive planning requirement recently enacted through House Bill 59 (2021) that each local government must adopt a Property Rights Element as part of its comprehensive plan. The proposed new element specifically provides for the consideration of certain constitutionally protected and judiciously acknowledged property rights as part of the City's decision making process, in accordance with Section 163.3177(6)(i), F.S. Staff finds that the proposed amendment is internally consistent with the City of Alachua Comprehensive Plan as a whole because it is necessary to comply with the new requirement of state planning law.

Ron DeSantis
GOVERNOR

FLORIDA DEPARTMENT of ECONOMIC OPPORTUNITY

Dane Eagle
SECRETARY

January 20, 2022

The Honorable Gib Coerper
Mayor, City of Alachua
5100 NW 142 Terrace
Alachua, Florida 32615

Dear Mayor Coerper:

The Department of Economic Opportunity ("Department") has reviewed the proposed comprehensive plan amendment for the City of Alachua (Amendment No. 22-01ESR) received on January 12, 2022. The review was completed under the expedited state review process. We have no comment on the proposed amendment.

The City should act by choosing to adopt, adopt with changes, or not adopt the proposed amendment. For your assistance, we have enclosed the procedures for adoption and transmittal of the comprehensive plan amendment. In addition, the City is reminded that:

- Section 163.3184(3)(b), F.S., authorizes other reviewing agencies to provide comments directly to the City. **If the City receives reviewing agency comments and they are not resolved, these comments could form the basis for a challenge to the amendment after adoption**.

- **The second public hearing,** which shall be a hearing on whether to adopt one or more comprehensive plan amendments, **must be held within 180 days** of your receipt of agency comments or the amendment shall be **deemed withdrawn** unless extended by agreement with notice to the Department and any affected party that provided comment on the amendment pursuant to Section 163.3184(3)(c)1., F.S.

- **The adopted amendment must be rendered to the Department.** Under Section 163.3184(3)(c)2. and 4., F.S., the **amendment effective date** is 31 days after the Department notifies the City that the amendment package is complete or, if challenged, until it is found to be in compliance by the Department or the Administration Commission.

An equal opportunity employer/program. Auxiliary aids and service are available upon request to individuals with disabilities. All voice telephone numbers on this document may be reached by persons using TTY/TTD equipment via the Florida Relay Service at 711.

If you have any questions concerning this review, please contact Benjamin Naselius, Planning Analyst, by telephone at (850) 717-8421 or by email at Benjamin.Naselius@deo.myflorida.com.

Sincerely,

Barbara Powell

Re: Alachua 22-01ESR – Expedited State Review of Proposed Comprehensive Plan Amendment

The Office of Intergovernmental Programs of the Florida Department of Environmental Protection (Department) has reviewed the above-referenced amendment package under the provisions of Chapter 163, Florida Statutes. The Department conducted a detailed review that focused on potential adverse impacts to important state resources and facilities, specifically: air and water pollution; wetlands and other surface waters of the state; federal and state-owned lands and interest in lands, including state parks, greenways and trails, conservation easements; solid waste; and water and wastewater treatment.

Based on our review of the submitted amendment package, the Department has found no provision that, if adopted, would result in adverse impacts to important state resources subject to the Department's jurisdiction.

Please submit all future amendments by email to Plan.Review@FloridaDEP.gov. If your submittal is too large to send via email or if you need other assistance, contact Lindsay Weaver at (850) 717-9037.

CAUTION: This email originated from outside the City.

DO NOT respond, click, or open attachments unless you recognize the sender **(name AND email address)** and know the content is safe.

Should there still be any question on the origin of this email, contact the IT Department immediately.

SECRETARY

February 10, 2022

Kathy Winburn, AICP
Planning and Community Development Director
City of Alachua
PO Box 9
Alachua, Fl 32616

SUBJECT: City of Alachua Proposed Comprehensive Plan Amendment (22-1ESR)

Dear Ms. Winburn,

Pursuant to Section 163.3184(3), Florida Statutes, (F.S.) in its role as a reviewing agency as identified in Section 163.3184(1)(c), F.S., the Florida Department of Transportation (FDOT) reviewed proposed amendment, City of Alachua 22-1ESR. The proposed amendment package consists of two (2) ordinances: 22-03 and 22-04.

Ordinance 22-03
The City of Alachua has transmitted a text amendment to add a Property Rights Element to the City's Comprehensive Plan. The new Element is required by Section 163.3177(6)(i), Florida Statues. The proposed text amendment is not anticipated to have significant adverse impacts to transportation resources or facilities of state importance.

Ordinance 22-04
The City of Alachua has transmitted a Large Scale Future Land Use Map (FLUM) Amendment to re-designate the land use of 160.2 acres, located south of US-441 and east of Cellon Creek Boulevard. The amendment changes the land use from Moderate Density Residential (±102.5 acres), High Density Residential (±16.1 acres), Commercial (±25.4 acres), and Community Commercial (±16.3 acres) to Corporate Park. The existing land uses allows a total of 651 dwelling units and 908,226 sq. ft. of commercial uses, while the proposed land use allows a maximum of 3,489,156 sq. ft. of corporate park uses.

As proposed, the amendment will result in 2,577 PM Peak Hour trips, an increase of 128 PM Peak Hour trips over the existing land uses (See Attachment A) and may have adverse impacts to the State Highway System. FDOT recommends that a traffic operational analysis is provided to address the specific external impacts as a result of this land use amendment. FDOT is available to assist in a methodology meeting and determine any assumptions used.

FLORIDA REGIONAL COUNCILS ASSOCIATION
LOCAL GOVERNMENT COMPREHENSIVE PLAN AMENDMENT REVIEW FORM 01

Regional Planning Council: North Central Fl
Review Date: 1/27/22
Amendment Type: Draft Amendment

Regional Planning Council Item No.: 45
Local Government: City of Alachua
Local Government Item No.: Ord. Nos. 22-03, 22-04
State Land Planning Agency Item No.: 22-1 ESR

Date Mailed to Local Government and State Land Planning Agency: 1/28/22 (estimated)

Pursuant to Section 163.3184, Florida Statutes, Council review of local government comprehensive plan amendments is limited to adverse effects on regional resources and facilities identified in the strategic regional policy plan and extrajurisdictional impacts that would be inconsistent with the comprehensive plan of any affected local government within the region. A written report containing an evaluation of these impacts, pursuant to Section 163.3184, Florida Statutes, is to be provided to the local government and the state land planning agency within 30 calendar days of receipt of the amendment.

DESCRIPTION OF AMENDMENT

The amendment adds a new Property Rights Element to the City's Comprehensive Plan and reclassifies approximately 160.2 acres from Commercial (25.4 acres), Community Commercial (16.3 acres), High Density Residential (16.1 acres), and Moderate Density Residential (102.5 acres) to Corporate Park (See attached).

1. ADVERSE EFFECTS TO SIGNIFICANT REGIONAL RESOURCES AND FACILITIES IDENTIFIED IN THE STRATEGIC REGIONAL POLICY PLAN

The subject property is located adjacent to U.S. Highway 441 which is identified and mapped in the regional plan as part of the Regional Road Network. The City Transportation Element contains objectives and policies which implement of one or more practices consistent with Transportation Planning Best Practices contained in the North Central Florida Strategic Regional Policy Plan. Regional Plan Transportation Element Policy 5.1.1 states that within municipalities where local government comprehensive plans contain goals and policies which implement Transportation Planning Best Practices, adverse impacts to the Regional Road Network are adequately mitigated and local government plans and plan amendments are not subject to a Regional Planning Council determination impacts to the Regional Road Network. Therefore, significant adverse transportation impacts to the Regional Road Network are adequately mitigated.

The subject property is located in a Stream to Sink area and an Area of High Recharge Potential to the Floridan Aquifer, identified and mapped as a Natural Resource of Regional Significance in the North Central Florida Strategic Regional Policy Plan. Nevertheless, no significant adverse impacts to Natural Resources of Regional Significance are anticipated as the City Comprehensive Plan contains adequate policy direction to prevent significant adverse impacts to the natural resources.

2. EXTRAJURISDICTIONAL IMPACTS INCONSISTENT WITH THE COMPREHENSIVE PLANS OF LOCAL GOVERNMENTS WITHIN THE REGION

The City Comprehensive Plan, as amended, is not anticipated to create significant adverse impacts to adjoining local governments.

Council Action: At its January 27, 2022 meeting, the Council voted to adopt this report.

F.S. 163.3177(6)(i)

(h)1. An intergovernmental coordination element showing relationships and stating principles and guidelines to be used in coordinating the adopted comprehensive plan with the plans of school boards, regional water supply authorities, and other units of local government providing services but not having regulatory authority over the use of land, with the comprehensive plans of adjacent municipalities, the county, adjacent counties, or the region, with the state comprehensive plan and with the applicable regional water supply plan approved pursuant to s. 373.709, as the case may require and as such adopted plans or plans in preparation may exist. This element of the local comprehensive plan must demonstrate consideration of the particular effects of the local plan, when adopted, upon the development of adjacent municipalities, the county, adjacent counties, or the region, or upon the state comprehensive plan, as the case may require.

a. The intergovernmental coordination element must provide procedures for identifying and implementing joint planning areas, especially for the purpose of annexation, municipal incorporation, and joint infrastructure service areas.

b. The intergovernmental coordination element shall provide for a dispute resolution process, as established pursuant to s. 186.509, for bringing intergovernmental disputes to closure in a timely manner.

c. The intergovernmental coordination element shall provide for interlocal agreements as established pursuant to s. 333.03(1)(b).

2. The intergovernmental coordination element shall also state principles and guidelines to be used in coordinating the adopted comprehensive plan with the plans of school boards and other units of local government providing facilities and services but not having regulatory authority over the use of land. In addition, the intergovernmental coordination element must describe joint processes for collaborative planning and decisionmaking on population projections and public school siting, the location and extension of public facilities subject to concurrency, and siting facilities with countywide significance, including locally unwanted land uses whose nature and identity are established in an agreement.

3. Within 1 year after adopting their intergovernmental coordination elements, each county, all the municipalities within that county, the district school board, and any unit of local government service providers in that county shall establish by interlocal or other formal agreement executed by all affected entities, the joint processes described in this subparagraph consistent with their adopted intergovernmental coordination elements. The agreement must:

a. Ensure that the local government addresses through coordination mechanisms the impacts of development proposed in the local comprehensive plan upon development in adjacent municipalities, the county, adjacent counties, the region, and the state. The area of concern for municipalities shall include adjacent municipalities, the county, and counties adjacent to the municipality. The area of concern for counties shall include all municipalities within the county, adjacent counties, and adjacent municipalities.

b. Ensure coordination in establishing level of service standards for public facilities with any state, regional, or local entity having operational and maintenance responsibility for such facilities.

(i)1. In accordance with the legislative intent expressed in ss. 163.3161(10) and 187.101(3) that governmental entities respect judicially acknowledged and constitutionally protected private property rights, each local government shall include in its comprehensive plan a property rights element to ensure that private property rights are considered in local decisionmaking. A local government may adopt its own property rights element or use the following statement of rights:

The following rights shall be considered in local decisionmaking:

1. The right of a property owner to physically possess and control his or her interests in the property, including easements, leases, or mineral rights.

2. The right of a property owner to use, maintain, develop, and improve his or her property for personal use or for the use of any other person, subject to state law and local ordinances.

3. The right of the property owner to privacy and to exclude others from the property to protect the owner's possessions and property.

4. The right of a property owner to dispose of his or her property through sale or gift.

2. Each local government must adopt a property rights element in its comprehensive plan by the earlier of the date of its adoption of its next proposed plan amendment that is initiated after July 1, 2021, or the date of the next scheduled evaluation and appraisal of its comprehensive plan pursuant to s. 163.3191. If a local government adopts its own property rights element, the element may not conflict with the statement of rights provided in subparagraph 1.

(7)(a) The Legislature finds that:

1. There are a number of rural agricultural industrial centers in the state that process, produce, or aid in the production or distribution of a variety of agriculturally based products, including, but not limited to, fruits, vegetables, timber, and other crops, and juices, paper, and building materials. Rural agricultural industrial centers have a significant amount of existing associated infrastructure that is used for processing, producing, or distributing agricultural products.

2. Such rural agricultural industrial centers are often located within or near communities in which the economy is largely dependent upon agriculture and agriculturally based products. The centers significantly enhance the economy of such communities. However, these agriculturally based communities are often socioeconomically challenged and designated as rural areas of opportunity. If such rural agricultural industrial centers are lost and not replaced with other job-creating enterprises, the agriculturally based communities will lose a substantial amount of their economies.

3. The state has a compelling interest in preserving the viability of agriculture and protecting rural agricultural communities and the state from the economic upheaval that would result from short-term or long-term adverse changes in the agricultural economy. To protect these communities and promote viable agriculture for the long term, it is essential to encourage and permit diversification of existing rural agricultural industrial centers by providing for jobs that are not solely dependent upon, but are compatible with and complement, existing agricultural industrial operations and to encourage the creation and expansion of industries that use agricultural products in innovative ways. However, the expansion and diversification of these existing centers must be accomplished in a manner that does not promote urban sprawl into surrounding agricultural and rural areas.

(b) As used in this subsection, the term "rural agricultural industrial center" means a developed parcel of land in an unincorporated area on which there exists an operating agricultural industrial facility or facilities that employ at least 200 full-time employees in the aggregate and process and prepare for transport a farm product, as defined in s. 163.3162, or any biomass material that could be used, directly or indirectly, for the production of fuel, renewable energy, bioenergy, or alternative fuel as defined by law. The center may also include land contiguous to the facility site which is not used for the cultivation of crops, but on which other existing activities essential to the operation of such facility or facilities are located or conducted. The parcel of land must be located within, or within 10 miles of, a rural area of opportunity.

(c)1. A landowner whose land is located within a rural agricultural industrial center may apply for an amendment to the local government comprehensive plan for the purpose of designating and expanding the existing agricultural industrial uses of facilities located within the center or expanding the existing center to include industrial uses or facilities that are not dependent upon but are compatible with agriculture and the existing uses and facilities. A local government comprehensive plan amendment under this paragraph must:

a. Not increase the physical area of the existing rural agricultural industrial center by more than 50 percent or 320 acres, whichever is greater.

b. Propose a project that would, upon completion, create at least 50 new full-time jobs.

STATE BRIEFS

Police: Officers wound man to protect innocent bystander

ORLANDO – Police officers shot a man who had been acting erratically as he ran toward a vehicle entering an Orlando apartment complex early Wednesday, officials said.

Multiple residents called 911 just before 1 a.m. Wednesday about a man who was knocking on windows at the Vista Verde Apartments, Deputy Chief Eric Smith said during a news conference.

When officers arrived at the complex, they saw a man running with a gun.

"They caught up to him as they saw him get into somebody's vehicle, somebody was driving into the parking lot, he jumped into the passenger side of that vehicle," Smith said. "Officers approached him and at that point, they saw a firearm. Officers fired multiple rounds at the suspect, striking the suspect to protect the civilian that was still in the vehicle."

The man was being treated at Orlando Regional Medical Center, Smith said.

The Florida Department of Law Enforcement is investigating the shooting. Five officers who were involved in the incident have been placed on paid administrative leave.

Driver accused of killing 2 kids disrupts courtroom

FORT LAUDERDALE – A 27-year-old man accused in a hit-and-run crash that killed two children and injured four others caused a disturbance during his first court appearance Wednesday, hours after sheriff's deputies arrested him.

Sean Charles Greer was arrested late Tuesday after physical evidence led detectives to him following the Monday afternoon crash in Wilton Manors, the Broward Sheriff's Office said.

During a court appearance Wednesday, deputies led Greer away after he apparently objected to attending the proceeding, news outlets reported. The court session was delayed for a minute as he was taken from the room.

Guns

Continued from Page 3A

2019.

Teenagers were killed and wounded. Teenagers pulled the triggers in some cases. A young man shot and killed the mother of his baby. A 13-year-old girl was fatally shot.

Shootings occurred outside downtown Gainesville nightclubs, in convenience store parking lots, at a teen's birthday party at the American Legion Hall and in drive-bys on the streets.

Especially troubling to officials is the gunshots by teens, often members of feuding gangs from different neighborhoods.

Meanwhile, the violence witnessed by teenagers will have a lasting impact that is not being addressed as it should, said Darry Lloyd, chief investigator for the Eighth Judicial Circuit State Attorney's Office and a leader of the Black on Black Crime Task Force.

"The unseen scars, the trauma in the kids who have witnessed it, that's what we have to really address and we are not doing a very good job of that at all," Lloyd said. "As we depart 2021, 2022 is starting at a different place for these young people. We have to heal from that."

Dozens of kids witnessed what authorities said was a shooting involving two rival groups of teens at a June 24 birthday party at the American Legion Hall. Killed was Christopher Scott, 13, and four other teens were injured. Arrests have been made.

A teenager was wounded in an early morning shooting downtown on Aug. 1, the night after a Stop the Violence rally curb shootings.

A 12-year-old boy was shot and wounded in Southwest Gainesville in July. An 18-year-girl was later charged in the shooting.

Maliyah Godwin, 13, was shot and killed at her Southwest Gainesville apartment complex. A 37-year-old man has been indicted for first-degree murder in connection with the case.

Gun violence has increased nationwide this year and law enforcement agencies are trying to figure out why. Stress caused by the ongoing COVID-19 pandemic, the easy availability of guns and cultural changes likely play a role.

"I don't think it is one thing, and that's what complicates it. It's a lot of different things," Behl said. "It is sometimes hard to predict but we are working on it."

GPD this year is planning to launch a violence interruption program in which trained mediators will work in neighborhoods to identify potential trouble and bring rivals together to try to prevent shootings and other crimes.

"It is community driven," GPD Chief Tony Jones said. "They will be doing conflict mediation. They will also be working with some of the individuals who have a propensity for violence and actually get out and mobilize the community."

Other cities in the U.S. are trying the tactic.

Jacksonville began its Cure Violence program in 2019. Data from a Washington D.C. pilot program, Cure the Streets, indicates mixed results from the neighborhoods in which it operates.

Jones said he hopes the program will begin sometime in the spring.

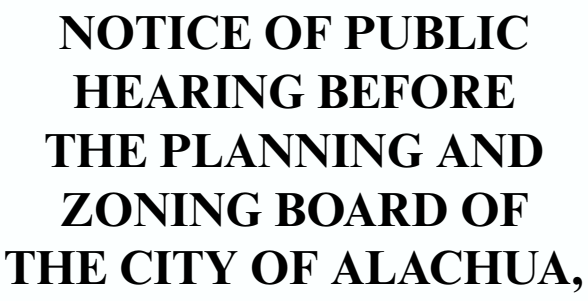
PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on January 10, 2022, at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-03

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE CITY'S COMPREHENSIVE PLAN; AMENDING THE CITY'S COMPREHENSIVE PLAN TO ADD A PROPERTY RIGHTS ELEMENT; PROVIDING A REPEALING CLAUSE; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.



At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

GF-28009242

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning and Zoning Board of the City of Alachua will hold a public hearing on January 11, 2022, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following:

A request by Larry J. Longenecker, of Eisman & Russo, Inc., applicant and agent for the Waco Properties, Inc., property owner, for consideration of a Site Plan proposing the construction of a ±51,140 square foot building with associated site improvements on a ±20.50 acre subject property and comprised of a ±3.35 acre project area; Tax Parcel Number 03983-007-000; FLUM: Industrial; Zoning: Industrial General (IG).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

8th Mexican journalist killed this year

Country deemed most dangerous place for press

Fabiola Sánchez
ASSOCIATED PRESS

Photos of slain journalists are posted on the gate of Mexico's Attorney General's office during a vigil on Feb. 14. EDUARDO VERDUGO/AP

MEXICO CITY – Another journalist was shot to death in Mexico on Tuesday, the eighth murdered this year in an unprecedented spate of killings that has made Mexico the most dangerous place in the world for the press.

Reporters and photographers have been murdered this year in Mexico at the rate of almost one a week, while the government claims the situation is under control.

Prosecutors in the western state of Michoacan said reporter Armando Linares was shot to death at a home in the town of Zitacuaro. His killing came six weeks after the slaying of a colleague, Roberto Toledo, from the same outlet Monitor Michoacan. It was Linares who announced Toledo's death Jan. 31 in a video posted to social media.

Zitacuaro is one of the closest towns to the monarch butterfly wintering grounds in the mountains west of Mexico City.

The area has been plagued by illegal logging and drug gangs, local governance disputes and deforestation linked to expanding avocado production. Logging has damaged the pine and fir forests where the butterflies spend the winter after migrating from the United States and Canada.

Linares served as director at the Monitor Michoacan website, which on Tuesday continued to show an article he had written about a cultural festival celebrating monarch butterflies.

There was no immediate information on a possible motive in the killing.

Toledo, a camera operator and video editor for Monitor Michoacan, was shot Jan. 31 as he prepared for an interview in Zitacuaro.

At the time of Toledo's death, Linares said he had received several death threats after enrolling in a government journalist protection program.

Asked who he thought was behind the threats, Linares said, "They pass themselves off as an armed group, they pass themselves off as a criminal gang. We can't verify whether it is true or not that they are this armed gang."

Criminals in Mexico often claim they are part of a drug cartel in order to instill fear in their victims, whether or not they really are.

"We have organized crime, just like in the rest of the country, and Monitor worked on a lot of issues like illegal logging, given that we are near the monarch reserve," Linares said in early February. "We wrote a lot about illegal logging and also a lot of issues like corruption in the municipal government."

Drug cartels in Mexico often make money by protecting illegal logging, or extorting protection payments from avocado growers.

"The nightmare continues for the press in Mexico," the press group Reporters Without Borders wrote in its social media accounts.

Mexican President Andrés Manuel López Obrador has reacted angrily to worldwide criticism of the killings.

In February, López Obrador said U.S. Secretary of State Antony Blinken was misinformed, after Blinken wrote "I join those calling for greater accountability and protections for Mexican journalists."

The Inter American Press Association called on Mexican President Andrés Manuel López Obrador to "immediately suspend the aggressions and insults, because such attacks from the top of power encourage violence against the press."

López Obrador claims the government is investigating all of the killings and suggested Blinken received bad information from other U.S. agencies, mentioning the CIA, FBI and Drug Enforcement Administration.

"They're [illegible]cking him," he said. "We don't tolerat[illegible]e impunity of anyone."

And la[illegible] López Obrador issued an irate resp[illegible]o European Parliament criticism [illegible]rnalist killings in Mexico, accusing the Europeans of having a "colonialist mentality."

The Mexican president criticized EU support for Ukraine, and called European Parliament members "sheep."

"It is unfortunate that you vote like sheep to join the reactionary and coup-mongering strategy of the corrupt group opposed to the Fourth Transformation," as López Obrador calls his administration, he wrote in an open letter to the parliament.

The EU Parliament approved a resolution last Thursday urging López Obrador to stop his harsh verbal attacks on reporters who criticize him, and ensure their safety.

Press groups say López Obrador's daily criticisms of journalists, whom he calls "conservatives" and "mercenaries," make them more vulnerable to violence.

In February, the Inter American Press Association called on the president to "immediately suspend the aggressions and insults, because such attacks from the top of power encourage violence against the press."

The EU resolution "calls on the authorities, and in particular the highest ones, to refrain from issuing any communication which could stigmatize human rights defenders, journalists and media workers, exacerbate the atmosphere against them or distort their lines of investigation."

Journalists are often the targets of Mexico's drug cartels, which seek to intimidate and manipulate coverage of their activities and their rivals. Local politicians and government officials are also frequently linked to murders, according to the government, which has acknowledged that impunity in those killings runs above 90%.

In early March, gunmen killed Juan Carlos Muñiz, who covered crime for the online news site Testigo Minero in the state of Zacatecas.

Jorge Camero, the director of an online news site who was until recently a municipal worker in the northern state of Sonora, was killed in late February.

In early February, Heber López, director of the online news site Noticias Web, was shot to death in the southern state of Oaxaca.

Former NFL, Gators running back faces charges in road rage assault

Alexander Lugo
Fresh Take Florida

Former Florida Gators running back Mark Thompson is facing a slew of felony charges stemming from two criminal incidents this past month. EMMA GREEN/WUFT NEWS

A former University of Florida running back who signed to play in the NFL is accused of brandishing an assault rifle during a road-rage incident in Gainesville last month. It's the second criminal case alleging the player was violent in recent weeks.

Mark Anthony Thompson, 26, is facing felony assault and robbery charges in the latest incident, which involved a pair of female teens just east of the UF campus the afternoon of Nov. 21, according to a complaint filed by Gainesville police. He had not been arrested by Wednesday, but a judge has issued a warrant for police to pick him up, according to court records.

Thompson – part of the Gators football team from 2016 to 2018 – followed the women's SUV for four blocks to the parking lot of a nearby food truck cooperative, according to police.

Thompson is accused of removing an assault-style rifle from his car, looking at both women and saying, "I should shoot you." He also was accused of forcefully pulling the 19-year-old driver out of the SUV and throwing away her cell phone, which she had been using to record the encounter. That was the basis for the robbery charge.

Thompson's attorney, Dean Galigani, earlier this week asked a judge to reduce the $175,000 bond associated with his pending arrest warrant. In his court motion, Galigani identified Thompson as a professional football player and said he was training in Gainesville. Neither Thompson nor his attorney have responded to multiple requests for comment.

After Thompson left Florida, he signed with the Baltimore Ravens' practice squad as well as the Detroit Lions' practice squad. The Las Vegas Raiders signed him in January, but he was waived in April.

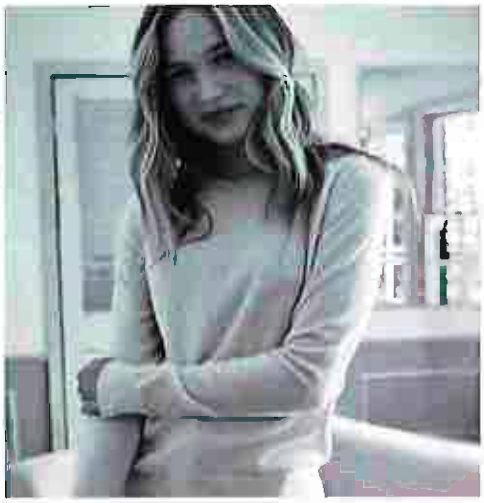
The latest incident follows a mid-October misdemeanor complaint alleging the football player assaulted a city parking enforcement officer.

In that case, police said Thompson started an argument with the parking employee over a ticket. When the officer attempted to walk away, Thompson followed and eventually struck the man with an open palm.

The October assault took place just one block from November's road-rage incident.

Thompson has had other encounters with police.

In 2016, while a football player at UF, Thompson was charged with misdemeanors on two separate occasions, according to court records.



Thompson was cited for possession of marijuana in October of that year. In December, police found him inside a tow truck compound in the middle of the night.

Thompson told police he was trying to get in touch with employees on the lot, but was ultimately charged with trespassing. Both the possession charge and the trespassing charge were dropped after Thompson pleaded guilty to a single paraphernalia charge.

Thompson was suspended from play following the possession charge.

In May 2017, university police pulled over Thompson for a broken taillight. When he opened a compartment containing his driver's license and registration, police said Thompson attempted to conceal a small amount of marijuana. He was charged with possession and issued a notice to appear in court. He again pleaded guilty to a reduced paraphernalia charge.

THE GOOD LIFE COMMUNITY

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Ordinance 22-04, Second Reading: Large Scale Comprehensive Plan Amendment (LSCPA) – Cellon Creek: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for San Felasco Research Ventures, LLC, property owner, for consideration of a Large Scale Comprehensive Plan Amendment on a ±160.2 acre subject property to amend the Future Land Use Map (FLUM) from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park. Tax Parcel Number 05949-000-000 (Legislative Hearing).
PREPARED BY: Justin Tabor, AICP, Principal Planner

RECOMMENDED ACTION:
Based upon the presentation before the Commission and Staff's recommendation, adopt Ordinance 22-04 on second and final reading.

Summary

The proposed Large Scale Comprehensive Plan Amendment (LSCPA) is a request by Seth Wood of Causseaux, Hewett, & Walpole, Inc., applicant and agent for San Felasco Research Ventures, LLC, for the consideration of an amendment to the City of Alachua Future Land Use Map (FLUM). The proposed amendment would change the FLUM Designation on a ±160.2 acre subject property from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park.

The applicant has submitted a companion application for a Site-Specific Amendment to the Official Zoning Atlas (a rezoning) which proposes to amend the zoning on the subject property from Agricultural (A) to Corporate Park (CP).

The FLUM Designations of the property were amended from Agriculture to is current designations in March 2008. There were several applications received (in 2012, 2014, 2016, and 2017) to amend the zoning to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM), however, each of these applications were ultimately withdrawn.

The subject property is generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard. The property undeveloped and is primarily comprised of cleared pasture, however, there are some naturally wooded areas located in the south-central portion of the property and along the south property line.

portion of the property and along the south property line.

Existing FLUM Designations

Policy 1.3.b of the Future Land Use Element (FLUE) establishes the Commercial land use category, and states that this category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. The following uses are examples of uses permitted within the Commercial land use category: retail sales and services; personal services; financial institutions; tourist-related uses; hotels, motels; commercial shopping centers; auto-oriented uses; office/business parks; limited industrial services; and eating establishments.

Policy 1.3.a of the FLUE establishes the Community Commercial land use category, and states that this category is intended to provide neighborhood and community scale goods and services to adjacent neighborhoods and residential areas. The following uses are examples of uses permitted within the Community Commercial land use category: neighborhood commercial establishments; office/residences; business and professional offices; personal services; financial institutions; retail sales and services that serve the community; eating establishments; indoor recreation/entertainment; single-family and multi-family residential above first floor commercial; and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.2.a of the FLUE establishes the Moderate Density Residential land use category, and states that this category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are examples of uses permitted within the Moderate Density Residential land use category: single family, conventional dwelling units; accessory dwelling units; residential planned developments; and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.2.c of the FLUE establishes the High Density Residential land use category, and states that this category allows residential development at a density of 8 dwelling units per acre to 15 dwelling units per acre, as well as certain complementary uses, such as a limited range of neighborhood-scale retail and services. The following uses are examples of uses permitted within the High Density Residential land use category: single family, conventional dwelling units and single family, attached dwelling units; accessory dwelling units; apartments and townhomes; live/work units; residential planned developments; traditional mixed-use neighborhood planned developments; neighborhood-scale retail and services under 30,000 square feet designed specifically to serve the surrounding neighborhood (i.e., a convenience store without gas pumps, dry cleaners, pharmacies, green grocers, or business and professional offices); group living; and supporting community services, such as schools, houses of worship, parks, and community centers.

and community centers.

Proposed FLUM Designation

Objective 1.4 and Policy 1.4.a of the FLUE establishes the Corporate Park land use category, and states that this category is intended to provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology. The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential (provided certain criteria is met), building industry uses, and accessory storage facilities (including outdoor storage yards).

Planning & Zoning Board Recommendation

At the December 14, 2021 Planning and Zoning Board Meeting, the Board voted 4-0 in favor of forwarding the application to the City Commission with a recommendation to approve.

City Commission First Reading

At the January 10, 2022 City Commission Meeting, the Commission voted 5-0 to approve Ordinance 22-04 on first reading and to authorize City Staff to transmit the proposed Amendment to the Florida Department of Economic Opportunity (DEO) under the Expedited State Review Process.

Expedited State Review

In accordance with Chapter 163.3184(3), Florida Statutes, the City submitted the proposed Amendment to the DEO and the following agencies/jurisdictions: The Florida Department of Environmental Protection (FDEP), the Florida Department of Transportation - District 2 Office (FDOT), the Florida Department of State, the North Central Florida Regional Planning Council, the Department of Economic Opportunity (Bureau of Economic Development), the Suwannee River Water Management District, the Department of Education, the City of Gainesville, the City of High Springs, Alachua County Department of Growth Management, and the School Board of Alachua County.

The City received correspondence from DEO, the FDEP, NCFRPC and FDOT. There were no objections raised by these agencies regarding this application.

ORDINANCE 22-04

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE LARGE SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION ON ±160.2 ACRES FROM COMMERCIAL (±25.4 ACRES), COMMUNITY COMMERCIAL (±16.3 ACRES), HIGH DENSITY RESIDENTIAL (±16.1 ACRES), AND MODERATE DENSITY RESIDENTIAL (±102.5 ACRES) TO CORPORATE PARK ON A PARCEL OF LAND GENERALLY LOCATED SOUTH OF THE INTERSECTION OF NW US HIGHWAY 441 AND SOUTHERN PRECAST DRIVE AND EAST OF CELLON CREEK BOULEVARD; CONSISTING OF TAX PARCEL NUMBER 05949-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

R E C I T A L S

WHEREAS, an application for a large scale comprehensive plan amendment, as described below, to the Comprehensive Plan Future Land Use Map has been filed with the City; and,

WHEREAS, a duly advertised public hearing was conducted on the proposed amendment on December 14, 2021 by the Planning and Zoning Board, sitting as the Local Planning Agency (LPA) and the LPA reviewed and considered comments received during the public hearing concerning the application and made its recommendation for approval to the City Commission; and,

WHEREAS, the City Commission considered the recommendations of the LPA at a duly advertised public hearing on January 10, 2022 provided for and received public participation, and approved the amendment for transmittal to the Florida Department of Economic Opportunity (DEO) and reviewing agencies under the Expedited State Review process; and,

WHEREAS, the City Commission considered the recommendations of the LPA, DEO, and reviewing agencies at a duly advertised public hearing on March 28, 2022 and provided for and received public participation; and,

WHEREAS, the City Commission has determined and found said application for the amendment, to be consistent with the City of Alachua Comprehensive Plan and Land Development Regulations; and,

WHEREAS, for reasons set forth in this Ordinance that is hereby adopted and incorporated as findings of fact, that the Alachua City Commission finds and declares that the enactment of this amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare.

NOW, THEREFORE, BE IT ORDAINED BY THE PEOPLE OF THE CITY OF ALACHUA, FLORIDA:

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and incorporated herein by reference.
2. The proposed Future Land Use Map amendment is consistent with the Comprehensive Plan.
3. The amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

Section 2. Comprehensive Plan, Future Land Use Map Amended

The Comprehensive Plan Future Land Use Map is hereby amended on Tax Parcel Number 05949-000-000 from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park on ±160.2 acres, in accordance with the legal description found in Exhibit "A" and map found in Exhibit "B" attached hereto and incorporated herein.

Section 3. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety and welfare of the citizens and residents of Alachua, Florida.

Section 4. Repealing Clause

All ordinance or parts of ordinances in conflict herewith are, to the extent of the conflict, hereby repealed.

Section 5. Severability

It is the declared intent of the City Commission of the City of Alachua that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance, and the remainder of the ordinance after the exclusions of such part or parts shall be deemed to be valid.

Section 6. Effective Date

The effective date of this plan amendment, if the amendment is not timely challenged, shall be 31 days after the state land planning agency notifies the City that the plan amendment package is complete in accordance with Chapter 163.3184 F.S. If timely challenged, this amendment shall become effective on the date the state land planning agency or the Administrative Commission enters a final order determining this adopted amendment to be in compliance in accordance with Chapter 163.3184 F.S. No development orders, development permits, or land uses dependent on this amendment may be issued or commenced before this plan amendment has become effective.

PASSED on first reading the 10th day of January, 2022.

PASSED and **ADOPTED,** in regular session, with a quorum present and voting, by the City Commission, upon second and final reading this 28th day of March, 2022.

Staff Report

Planning & Zoning Board Hearing Date: December 14, 2021
Legislative Hearing

SUBJECT:	A request to amend the Future Land Use Map (FLUM) Designation on a ±160.2 acre subject property from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park
APPLICANT/AGENT:	Seth Wood Causseaux, Hewett, & Walpole, Inc.
PROPERTY OWNER:	University of Florida Foundation, Inc.
LOCATION:	Generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard
PARCEL ID NUMBER:	05949-000-000
ACREAGE:	±160.2 acres
PROJECT PLANNER:	Justin Tabor, AICP
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board transmit the proposed Large Scale Comprehensive Plan Amendment submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to the City Commission with a recommendation to approve.
RECOMMENDED MOTION:	*Based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Large Scale Comprehensive Plan Amendment submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve.*

SUMMARY

The proposed Large Scale Comprehensive Plan Amendment (LSCPA) is a request by Seth Wood of Causseaux, Hewett, & Walpole, Inc., for the consideration of an amendment to the City of Alachua Future Land Use Map (FLUM). The proposed amendment would change the FLUM Designation on a ±160.2 acre subject property from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park.

The applicant has submitted a companion application for a Site-Specific Amendment to the Official Zoning Atlas (a rezoning) which proposes to amend the zoning on the subject property from Agricultural (A) to Corporate Park (CP).

The FLUM Designations of the property were amended from Agriculture to is current designations in March 2008. There were several applications received (in 2012, 2014, 2016, and 2017) to amend the zoning to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM), however, each of these applications were ultimately withdrawn.

The subject property is generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard. The property undeveloped and is primarily comprised of cleared pasture, however, there are some naturally wooded areas located in the south-central portion of the property and along the south property line.

Existing FLUM Designations

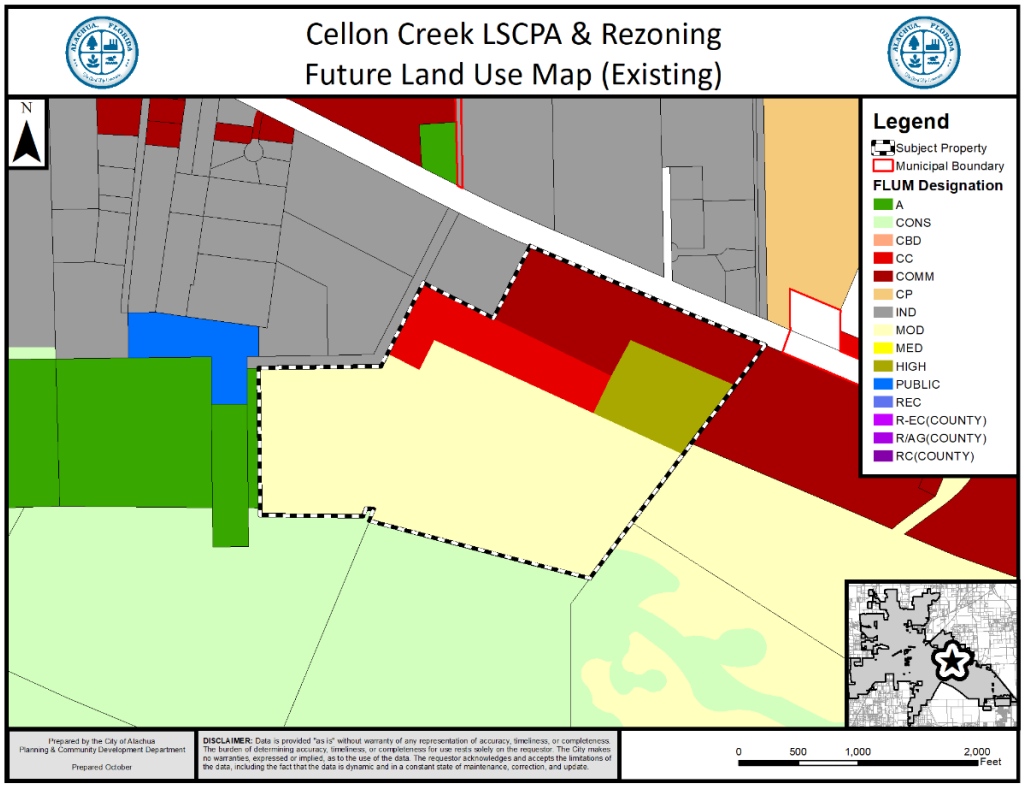
Policy 1.3.b of the Future Land Use Element (FLUE) establishes the Commercial land use category, and states that this category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. The following uses are examples of uses permitted within the Commercial land use category: retail sales and services; personal services; financial institutions; tourist-related uses; hotels, motels; commercial shopping centers; auto-oriented uses; office/business parks; limited industrial services; and eating establishments.

Policy 1.3.a of the FLUE establishes the Community Commercial land use category, and states that this category is intended to provide neighborhood and community scale goods and services to adjacent neighborhoods and residential areas. The following uses are examples of uses permitted within the Community Commercial land use category: neighborhood commercial establishments; office/residences; business and professional offices; personal services; financial institutions; retail sales and services that serve the community; eating establishments; indoor recreation/entertainment; single-family and multi-family residential above first floor commercial; and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.2.a of the FLUE establishes the Moderate Density Residential land use category, and states that this category allows residential development at a maximum density of 4 dwelling

units per acre. The following uses are examples of uses permitted within the Moderate Density Residential land use category: single family, conventional dwelling units; accessory dwelling units; residential planned developments; and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.2.c of the FLUE establishes the High Density Residential land use category, and states that this category allows residential development at a density of 8 dwelling units per acre to 15 dwelling units per acre, as well as certain complementary uses, such as a limited range of neighborhood-scale retail and services. The following uses are examples of uses permitted within the High Density Residential land use category: single family, conventional dwelling units and single family, attached dwelling units; accessory dwelling units; apartments and townhomes; live/work units; residential planned developments; traditional mixed-use neighborhood planned developments; neighborhood-scale retail and services under 30,000 square feet designed specifically to serve the surrounding neighborhood (i.e., a convenience store without gas pumps, dry cleaners, pharmacies, green grocers, or business and professional offices); group living; and supporting community services, such as schools, houses of worship, parks, and community centers.



Proposed FLUM Designation

Objective 1.4 and Policy 1.4.a of the FLUE establishes the Corporate Park land use category, and states that this category is intended to provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology. The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential (provided certain criteria is met), building industry uses, and accessory storage facilities (including outdoor storage yards).

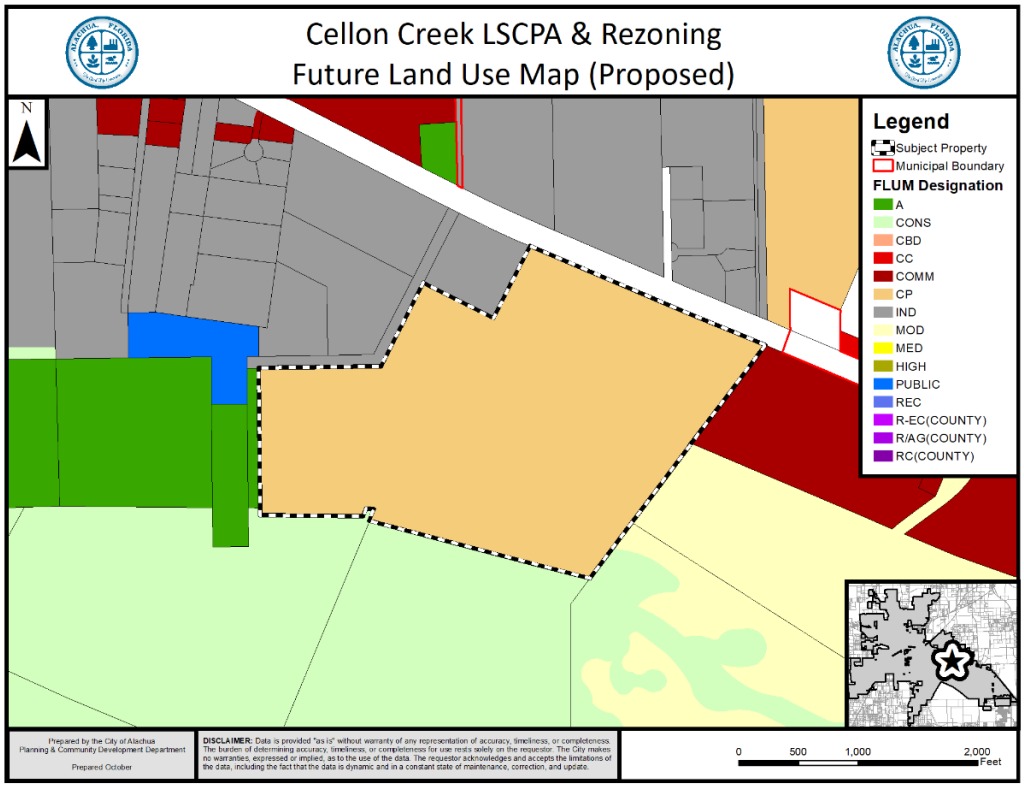


Table 1. Comparison of Existing / Proposed FLUM Designations

	Existing FLUM Designation	Proposed FLUM Designation
FLUM Designation:	Commercial (±25.4 acres); Community Commercial (±16.3 acres); High Density Residential (±16.1 acres); Moderate Density Residential (±102.5 acres)	Corporate Park
Max. Gross Density:	651 dwellings	640 dwellings
Max. Floor Area:	908,226 square feet	3,489,156 square feet
Typical Uses:	See Description Above	See Description Above
Net Increase/ Decrease:	***Decrease of 11 dwellings*** ***Increase of 2,580,930 square feet non-residential uses***	

Map 1. Existing Future Land Use Map with Subject Property

Map 2. Proposed Future Land Use Map with Subject Property

EXISTING USES

The property undeveloped and is primarily comprised of cleared pasture, however, there are some naturally wooded areas located in the south-central portion of the property and along the south property line.

SURROUNDING USES

The existing uses, FLUM Designations, and zone districts of the surrounding area are identified in Table 1. Map 3 provides an overview of the vicinity of the subject property.

NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. It is not intended to be all-inclusive, and may not identify all existing uses, FLUM Designations, and/or zoning districts surrounding the subject property.

Map 3. Vicinity Map

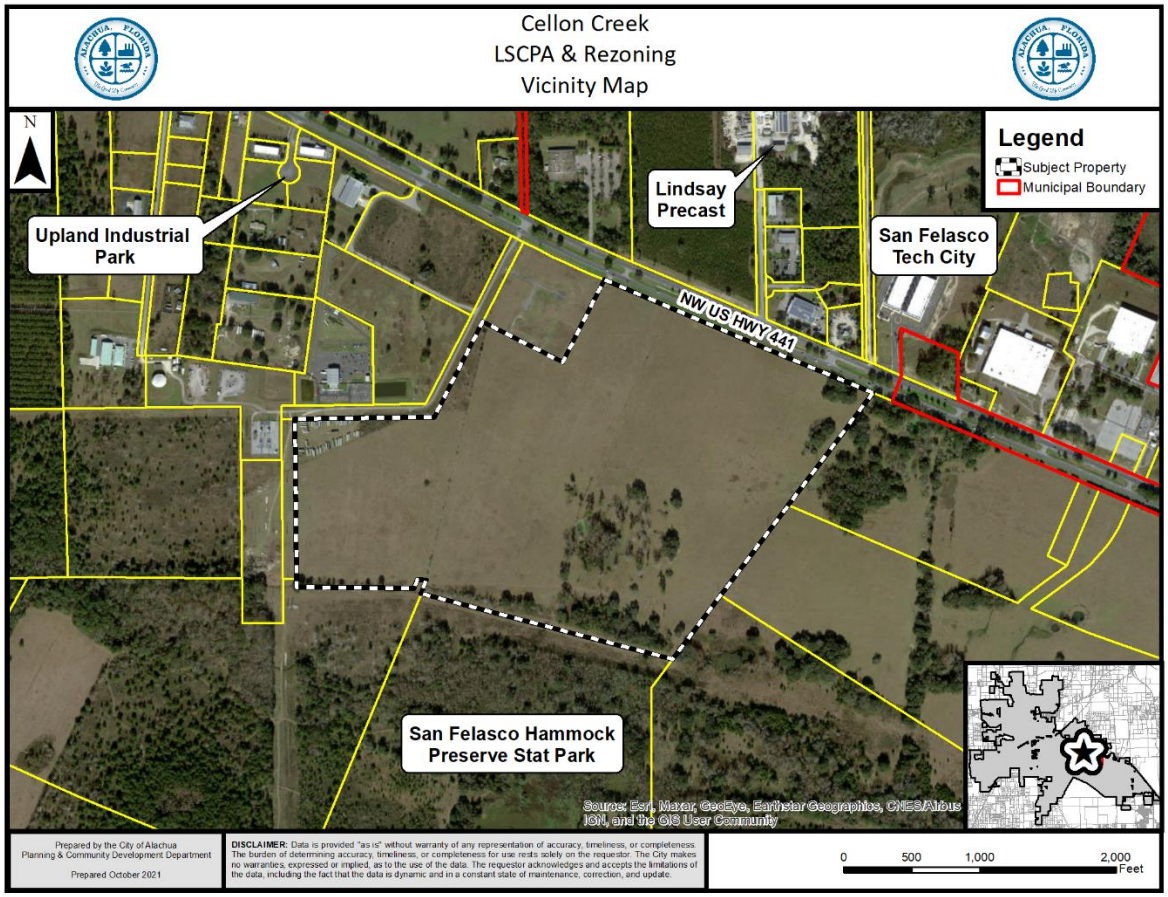

Table 2. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	US 441; Lindsay Precast; Busby Cabinets; San Felasco Tech City	Industrial; Corporate Park	Light & Warehouse Industrial (ILW); Corporate Park (CP)
South	San Felasco Hammock Preserve State Park	Conservation	Conservation (CSV)
East	Vacant Commercial & Residential Lands*	Commercial; Moderate Density Residential; Conservation	Commercial Intensive (CI); Planned Development – Residential (PD-R)
West	San Felasco Hammock Preserve State Park; City of Alachua Ground Storage Facility; Vemo Auto Auctions; Vacant Industrial Lands	Agriculture; Public; Industrial	Agricultural (A); Public Facilities (PF); Light & Warehouse Industrial (ILW)

** Residential lands to the east of the subject property were acquired by Alachua County through the Alachua County Forever program.*

NEIGHBORHOOD MEETING

The purpose of a Neighborhood Meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project.

Neighborhood meetings are not required for Comprehensive Plan Amendment applications, but are required for Rezoning applications. Since the applicant has submitted a companion Rezoning application, which includes the LSCPA subject property, a Neighborhood Meeting was held.

As required by Section 2.2.4 of the LDRs, all property owners within 400 feet of the subject property and those persons / organizations registered with the City were notified of the meeting. Notice of the meeting was also published in a newspaper of general circulation.

The Neighborhood Meeting was held on September 23, 2021 at 6:00 p.m. at the offices of CHW, located at 11801 Research Drive, Alachua, FL. The applicant was available to answer questions during the meeting. As evidenced by materials submitted by the applicant, one (1) person attended the meeting. A summary of the discussion which occurred at the Neighborhood Meeting has been provided by the applicant and is included within the application materials.

NEEDS ANALYSIS

Section 163.3177(6)(a)4., Florida Statues, requires the Future Land Use Element of a Comprehensive Plan to ensure that the amount of land designated for future planned uses provides a balance of uses that foster vibrant, viable communities and economic development opportunities. The Future Land Use Element must also address outdated development

patterns, and allow the operation of real estate markets to provide adequate choices for permanent and seasonal residents and business. The amount of land designated for future land uses may not be limited solely by the projected population. Additionally, the Future Land Use Element must provide for at least the minimum amount of land required to accommodate the medium projections as published by the Office of Economic and Demographic Research for at least a 10-year planning period unless otherwise limited under Section 380.05, including related rules of the Administration Commission.

The applicant contends that it is anticipated that the City's population could grow by 7,100 persons by 2035 and that as growth continues, increased housing stock and diversified housing options will be necessary to meet the demand of new residents. The applicant notes that approximately 75% of the City's current housing stock is made up of single-family dwelling units, compared to less than 50% of the County housing stock. The applicant notes that the proposed amendment would allow the City to meet the housing needs of the larger population as well as offer housing at a range of price points and in a range of dwelling types.

The applicant also contends that the size and location of the subject property along US Highway 441 make it ideal for the type of development permitted within the Corporate Park land use category. The applicant notes that the City's Comprehensive Plan establishes the US 441 corridor as a Corporate Corridor Activity Center and that this activity center is intended to implement economic development objectives and to promote a coordinated development plan to maximize existing future land use patterns and preserve the function of the US 441 corridor.

Additionally, the applicant contends that the mixed-use nature of the Corporate Park land use category provides for reduced commute times and offers an opportunity for a more optimal live/work environment in which residents can live in moderately priced housing in close proximity to their jobs.

URBAN SPRAWL ANALYSIS

Section 163.3177, Florida Statutes, requires that any amendment to the Future Land Use Element to discourage the proliferation of urban sprawl. Section 163.3177(6)(a)9.a., Florida Statutes, identifies 13 primary urban sprawl indicators and states that, "[t]he evaluation of the presence of these indicators shall consist of an analysis of the plan or plan amendment within the context of features and characteristics unique to each locality…"

An evaluation of each primary indicator is provided below.

(I) Promotes, allows, or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.

Evaluation & Findings: The Corporate Park land use category is a mixed-use category permitting a residential density of up to four (4) dwelling units per acre and a maximum non-residential floor area ratio (FAR) of 0.50. The Corporate Park land use category is intended to provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology. The

subject property is located between existing employment centers and residential communities along the US 441 corridor.

(II) Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.

Evaluation & Findings: The subject property is located between existing employment centers and residential communities along the US 441 corridor. The potential development of the subject property would reduce the potential for urban development to occur within the periphery of these developed areas of the City.

(III) Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

Evaluation & Findings: The subject property is located between existing employment centers and residential communities along the US 441 corridor. The potential development of the subject property would not cause development to occur in a radial, strip, or ribbon pattern that projects away from existing urban development, rather, it would result in development of land located between developed areas.

(IV) Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

Evaluation & Findings: The subject property is undeveloped primarily consists of open pasture. There are some naturally wooded areas located in the south-central portion of the property and along the south property line. In addition, there are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

(V) Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The property is not presently used for any active agricultural or silvicultural operations. The adjacent lands to the north, east, and west are designated for urban uses on the FLUM. While San Felasco Hammock Preserve State Park is located to the south and west of the subject property, the proposed amendment would

not result in any extension of an urban land use category or increase the amount of lands designated for urban uses within proximity to the Park.

(VI) Fails to maximize use of existing public facilities and services.

Evaluation & Findings: Potable water, sanitary sewer, and electric utilities are located within the US 441 corridor and areas proximate to the subject property, and are available to serve future development of the subject property.

(VII) Fails to maximize use of future public facilities and services.

Evaluation & Findings: Potable water, sanitary sewer, and electric utilities are located within the US 441 corridor and areas proximate to the subject property, and are available to serve future development of the subject property.

(VIII) Allows for land use patterns or timing which disproportionately increase the cost in time, money, and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

Evaluation & Findings: The property is proximate to existing industrial and commercial uses along the US 441 corridor. The proposed amendment would not result in a significant increase of time, money, or energy to provide public services to the site.

(IX) Fails to provide a clear separation between rural and urban uses.

Evaluation & Findings: The subject property is located between existing employment centers and residential communities along the US 441 corridor. The property is proximate to existing industrial and commercial uses along the US 441 corridor, and presently is designated for urban uses.

(X) Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

Evaluation & Findings: The proposed amendment would have no discernible effect on infill development or redevelopment of existing neighborhoods and facilities.

(XI) Fails to encourage a functional mix of uses.

Evaluation & Findings: The Corporate Park land use category is a mixed-use category permitting a residential density of up to four (4) dwelling units per acre and a maximum non-residential floor area ratio (FAR) of 0.50. The Corporate Park land use category is intended to provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology. The subject property is located between existing employment centers and residential communities along the US 441 corridor. The development of the subject property under the Corporate Park land use category will provide for a functional mix of residential and non-residential uses.

(XII) Results in poor accessibility among linked or related land uses.

Evaluation & Findings: The Corporate Park land use category is intended to provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology. The Corporate Park land use category is compatible with the existing non-residential land uses surrounding to the north, east, and west of the subject property.

(XIII) Results in the loss of significant amounts of functional open space.

Evaluation & Findings: While located contiguous to San Felasco Hammock Preserve State Park, the preservation of the subject property for conservation would not provide for further connection of existing conservation lands.

In addition to the preceding urban sprawl indicators, Section 163.3177 also establishes eight (8) "Urban Form" criteria. An amendment to the Future Land Use Map is presumed to not be considered urban sprawl if it meets four (4) of the (8) urban form criteria. These urban form criteria, and an evaluation of each as each may relate to this application, are provided below. The applicant has also provided an analysis of the application's consistency with Section 163.3177 within the application materials.

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

Evaluation & Findings: The subject property is located in an area proximate to existing commercial and industrial development. There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

(II) Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

Evaluation & Findings: Potable water, sanitary sewer, and electric utilities are located within the US 441 corridor and areas proximate to the subject property, and are available to serve future development of the subject property.

(III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices

and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

Evaluation & Findings: Policy 1.4.b of the Comprehensive Plan Future Land Use Element states that development within the Corporate Park land use category should be designed in a campus-like or "corporate park" setting with generous, linked open space to maximize value and to promote visual quality and compatibility with the surrounding area. Pedestrian-friendly features, such as buildings placed near the street, sidewalks, and trails leading to nearby uses, such as retail and housing, is encouraged.

(IV) Promotes conservation of water and energy.

Evaluation & Findings: The amendment would have no perceivable impact upon the conservation of water and energy resources.

(V) Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The property is not presently used for any active agricultural or silvicultural operations. The adjacent lands to the north, east, and west are designated for urban uses on the FLUM.

(VI) Preserves open space and natural lands and provides for public open space and recreation needs.

Evaluation & Findings: The amendment would not result in the loss of functional open space nor would it result in the functional loss of recreational space. The applicable protection standards set forth in the Conservation and Open Space Element of the Comprehensive Plan for natural lands and open space requirements will further preserve open space and natural lands and provide for public open space and recreational areas.

(VII) Creates a balance of land uses based upon demands of the residential population for the nonresidential needs of an area.

Evaluation & Findings: The Corporate Park land use category is a mixed-use category permitting a residential density of up to four (4) dwelling units per acre and a maximum non-residential floor area ratio (FAR) of 0.50. The Corporate Park land use category is intended to provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology. The subject property is located between existing employment centers and residential communities along the US 441 corridor. The development of the subject property under the Corporate Park land use category will provide for a functional mix of residential and non-residential uses.

(VIII) Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it

provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. 163.3164.

Evaluation & Findings: The amendment would have no affect or remediation of a development pattern in the vicinity that consitutes sprawl or is supportive of transit-oriented developments or new towns.

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The Goals, Objectives, and Policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

GOAL 1: Future Land Use Map 2035:

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Objective 1.4: *Corporate Park*

The City shall establish one mixed-use land use category: Corporate Park. This land use category shall provide a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. The Corporate Park category is intended to:

1. provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology, with provisions for a variety of residential uses; and,
2. provide a variety of employment opportunities to the citizens of Alachua and the North Central Florida Region.

Policy 1.4.a: The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential, live-work units, building industry uses, and accessory storage facilities (including outdoor storage yards) either as allowed uses or with a special exception permit. Such uses shall be developed in a manner compatible with surrounding land uses, and to minimize potential nuisances or damage to the environment.

Policy 1.4.b: Development within the Corporate Park land use category should be designed in a campus-like or "corporate park" setting with generous,

linked open space to maximize value and to promote visual quality and compatibility with the surrounding area. Pedestrian-friendly features, such as buildings placed near the street, sidewalks, and trails leading to nearby uses, such as retail and housing, is encouraged.

Policy 1.4.c: Non-residential Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio (F.A.R.) for parcels 5 acres or greater, 0.75 F.A.R. for parcels less than 5 acres but greater than 1 acre, and 1.0 F.A.R. for parcels 1 acre or less.

Evaluation & Findings: The proposed amendment would apply the Corporate Park land use category to the subject property. The lands contiguous to the east and west of the subject property are presently designated for commercial and industrial uses and are consistent with the Corporate Park category.

Objective 5.1: Natural Features: The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known

to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities and services necessary for the development.

Policy 5.2a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools in accordance with LOS standards adopted in the elements addressing these facilities.

Evaluation and Findings: An analysis of the proposed amendment's potential impact to public facilities has been provided within this report. This analysis indicates that the proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Based upon current facility capacities, future development of the subject property would not adversely affect the LOS Standard of any other monitored public facilities. Further evaluation of facility capacity will be required, and capacity must be available, at the time of any future development proposal.

GOAL 9: Water and Wastewater Service:

The City will ensure that new development and redevelopment within the corporate limits shall connect to the City's potable water and wastewater system, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the Comprehensive Plan.

Policy 9.1: Any new development or redevelopment within a Commercial or Industrial land use category within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the City's Comprehensive Plan, shall connect to the City's potable water and wastewater system.

Evaluation and Findings: The subject property is located within the City's potable water and wastewater service areas. Future development would be required to be served by City potable water and wastewater services.

Transportation Element

Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation and Findings: An analysis of the impacts to transportation facilities is provided within this report. This analysis indicates that the proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Community Facilities Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which shall include all areas where wastewater service is available. Wastewater service shall be deemed available if:

3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family

residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation and Findings: The subject property is located within the City's wastewater service area. Future development would be required to be served by City wastewater services.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities for residential uses:

Facility Type	Level of Service Standard
Solid Waste Landfill	0.73 tons per capita per year

Evaluation and Findings: An analysis of the impacts to solid waste facilities is provided within this report. Based upon current demand, development of the subject property will not adversely affect the Level of Service (LOS) standards for solid waste facilities.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation and Findings: The subject property is located within the City's potable water service area. Future development would be required to be served by City potable water services.

Conservation and Open Space Element

Objective 1.2: *Native Communities and Ecosystems*
The City shall preserve and protect native communities and ecosystems, particularly those considered endangered or threatened.

Policy 1.2.a: The City shall ensure that land use designations, development practices and regulations protect native communities and ecosystems, and environmentally sensitive lands.

OBJECTIVE 1.3: *Listed Species*

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.a: The City shall ensure that its ordinances, regulations and policies protect listed species and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.c: The City shall obtain data from the Florida Fish and Wildlife Conservation Commission, Alachua County Environmental Protection Department, Florida Department of Environmental Protection, to maintain a periodically updated inventory of listed species and habitats located within City limits or immediately adjacent to City limits. The City will use the Florida Natural Areas Inventory as a base inventory.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Policy 1.10.a: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code and regulations adopted by the DEP and the Suwannee River Water Management District.

Evaluation and Findings: There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable

Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

Policy 1.12.e: The City shall protect the natural function of floodplains, recognizing the role of flood patterns in maintaining water quality and quantity. Flood plain regulations will be based on Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM).

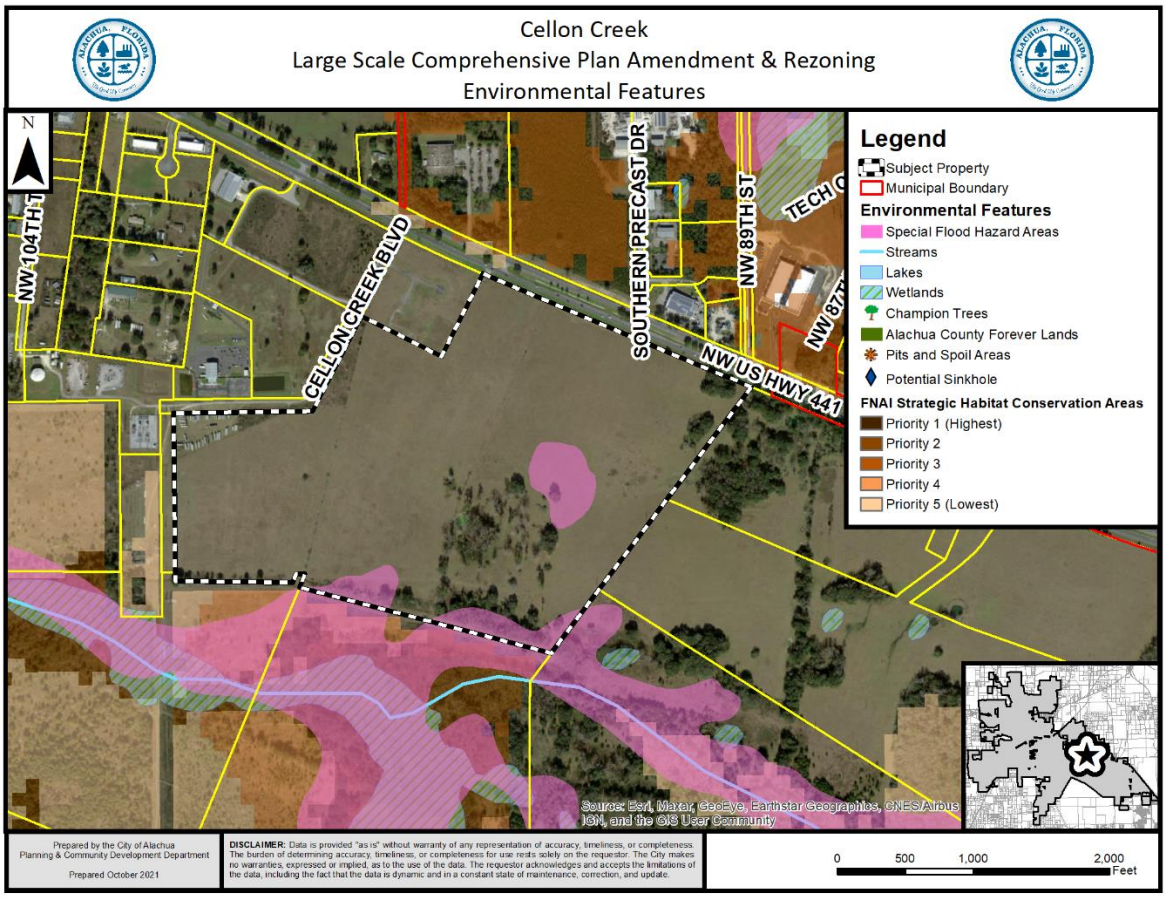
Policy 1.12.f: The City shall work with FEMA, SRWMD, DEP and the County to regulate development within special flood hazard areas susceptible to the one percent (1%) annual chance flood established by FEMA. The City will require development activity to occupy only the non-floodplain portion of a site when feasible; allow dredging and filling within floodplains only if it preserves the natural function of the floodplain and adequately provides for stormwater management; require the minimum floor elevation of any structure to be at least one foot above the established base flood elevation; and will prohibit the storage of hazardous materials or waste within the floodplain, and development activity that threatens to raise the base flood elevation.

Evaluation and Findings: There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations.

ENVIRONMENTAL CONDITIONS & SITE SUITIBILITY ANALYSIS

Wetlands

According to best available data, there are no wetlands identified on the subject property.



Evaluation: If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

Creeks and Streams

There are no known creeks or streams located on the subject property.

Evaluation: Objective 1.12 and Policy 1.12.d of the City of Alachua Comprehensive Plan Conservation & Open Space Element require minimum buffers from surface water bodies. Should a surface water body be found to exist on or proximate to the subject property, buffers as set forth in Policy 1.12.d shall be required.

Map 3. Environmental Features

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation: The subject property is not located within a Strategic Ecosystem, however, the subject property is located to the east of the North San Felasco Hammock Strategic Ecosystem, which is partially located on the parcel adjacent to the subject property. A portion of the North San Felasco Hammock Strategic Ecosystem was acquired by Alachua County in 2011, and includes a portion of the land adjacent to the east of the subject property.

Regulated Plant & Animal Species

The subject property is not known to contain any species identified as endangered, threatened, or of special concern. The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated

by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region. Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. While the FNAI PNA data layer provides an indicator of potential of lands to feature habitat which could support species identified as endangered, threatened, or of special concern, this data is not intended for use in a regulatory decision making process. The data must be referenced only as a resource to indicate the potential of land to support wildlife.

If a regulated plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations.

Soil Survey

Each soil type found on the subject property is identified below. The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff). There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have very lower infiltration rates and therefore a higher runoff potential.

There are nine (9) soil types found on the subject property:

Arredondo Fine Sand (0% - 5% slopes)
Hydrologic Soil Group: A

> This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes and local roads and moderate limitations for small commercial buildings.

Arredondo Fine Sand (5% - 8% slopes)
Hydrologic Soil Group: A

> This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes and local roads and moderate limitations for small commercial buildings.

Blichton Sand (2% – 5% slopes)
Hydrologic Soil Group: D

This soil type is poorly drained. Permeability is rapid at the surface. This soil type poses severe limitations for urban uses, including dwellings, and small commercial buildings, due to wetness.

Fort Meade Fine Sand (0% – 5% slopes)
Hydrologic Soil Group: A

This soil type is well drained and permeability is surface runoff is slow. This soil type poses only slight limitations as sites for homes and local roads.

Millhopper Sand (0% – 5% slopes)
Hydrologic Soil Group: A

This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes, local roads, and small commercial buildings.

Millhopper Sand (5% – 8% slopes)
Hydrologic Soil Group: A

This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes and small commercial buildings.

Lochloosa Fine Sand (2% – 5% slopes)
Hydrologic Soil Group: C

This soil type is somewhat poorly drained. Permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes, local roads, and small commercial buildings.

Lochloosa Fine Sand (5% – 8% slopes)
Hydrologic Soil Group: C

This soil type is somewhat poorly drained. Permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes, local roads, and small commercial buildings.

Pomona Sand
Hydrologic Soil Group: B/D

This soil type poorly drained. Permeability is rapid at the surface. This soil type poses severe limitations for urban uses, including dwellings, and small commercial buildings, due to wetness.

Evaluation: While some soil types pose limitations to urban uses, the majority of the site consists of soil types which pose only slight limitations for development. Development which may occur on the subject property will consider any limitations presented by soils present on-site.

Flood Potential

Panel 0140D of the Federal Emergency Management Agency ("FEMA") Flood Insurance Rate Map ("FIRM") Series, dated June 16, 2006, indicates that the subject property is in Flood Zones X (areas determined to be outside of the 500-year floodplain) and Flood Zone A (areas determined to be subject to flooding by the 1% annual chance flood [100-year flood], with no Base Flood Elevation [BFE] determined.) Map 4 indicates the areas of special flood hazard.

Evaluation: Any development which occurs on the subject property within areas identified as Flood Zone A will be required to comply with the applicable provisions of the City's Comprehensive Plan and Land Development Regulations, which may require the determination of a Base Flood Elevation. All development within these areas must comply with Section 6.9 of the LDRs, which requires structures to be elevated above the Base Flood Elevation.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations. The subject property is located within an area where sinkholes may potentially allow hydrologic access to the Floridan Aquifer System. Best available data indicates there are no known geologic features on the subject property.

Evaluation: There are no concerns at this time based upon the best available data, which indicates there are no known geologic features on the subject property.

Wellfield Protection Zone

Policy 7.2.1 of the Future Land Use Element of the Comprehensive Plan establishes a 500 foot radial buffer around city-owned potable water well.

Evaluation: The subject property is not located within a City of Alachua wellhead protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures and Markers

The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventory.

Evaluation: There are no issues related to historic markers or structures.

PUBLIC FACILITIES IMPACT

The existing maximum development potential and proposed maximum development potential is provided within the following matrix.

	Existing FLUM Designations	Proposed FLUM Designation
FLUM Designation:	Commercial (±25.4 acres); Community Commercial (±16.3 acres); High Density Residential (±16.1 acres); Moderate Density Residential (±102.5 acres)	Corporate Park
Max. Gross Density:	4 dwellings/acre (Moderate Density Residential) 15 dwellings/acre (High Density Residential)	4 dwellings/acre
Floor Area Ratio:	0.50 FAR	0.50 FAR
Maximum Density:	651 dwelling units	640 dwelling units
Maximum Intensity:	908,226 square feet	3,489,156 square feet

The analysis of each public facility provided below represents an analysis of the maximum development potential proposed by the amendment.

The proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Based upon current facility capacities, future development of the subject property would not adversely affect the LOS Standard of any other monitored public facilities. Further evaluation of facility capacity will be required, and capacity must be available, at the time of any future development proposal.

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2,3]	Segment Description	Lanes	Functional Classification	Area Type	LOS
3 (4127)	US 441 (From MPO Boundary to CR 25A East Intersection)	4/D	Principle Arterial	Urban Trans	D
4 (106)	US 441 (From CR 25A East Intersection to SR 235)	4/D	Principle Arterial	Urban Trans	D
5 (107)	US 441 (from SR 235 to I-75)	4/D	Principle Arterial	Urban Trans	D
6 (106)	US 441 (from I-75 to CR 235A)	4/D	Principle Arterial	Urban Trans	D
8 (108)	SR 235 (from NW 143rd Place to US 441)	2/U	Major Collector	Comm	D
9 (109)	SR 235 (from US 441 to NW 140th Street)	2/U	Major Collector	Comm	D
11	CR 235 (from NW 143rd Place to South City Limit)	2/U	Major Collector	Comm	D
13	CR 241 (from CR 235 to South City Limit)	2/U	Major Collector	Comm	D
14	CR 2054 (from SR 235 to West City Limit)	2/U	Major Collector	Comm	D
15	CR 2054 (from SR 235 to US 441)	2/U	Major Collector	Comm	D

Existing Traffic[3]	2,118	1,941	2,299	2,861	967	765	539	572	278	325
Reserved Trips[4]	196	447	309	293	41	21	13	43	0	138
Available Capacity[4]	1,556	1,722	902	356	282	504	807	1,266	1,081	896
Maximum PM Peak Hour Trips Generated by Amendment[5]	1,289	2,557	515	258	129	129	129	258	129	258
Residual Capacity After Potential Development's Impacts[6]	267	-835	387	98	153	375	678	1,008	952	638

1 *FDOT roadway segment number shown in parenthesis (when applicable.) For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity.*
2 *AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facility AADT counts provided by Alachua County Public Works, April 2021.*
3 *Florida State Highway System Level of Service Report, Florida Department of Transportation, District Two.*
4 *Source: City of Alachua October 2021 Development Monitoring Report.*
5 *Trip Distribution: Segment 3 - 50%; Segment 4 - 100%; Segment 5 - 20%; Segment 6 - 10%; Segment 8 - 5%; Segment 9 - 5%; Segment 11 - 10%; Segment 13- 10%; Segment 14 - 5%; Segment 15 - 10%.*
6 *The application is for a Preliminary Development Order. Facility capacity and concurrency will **not** be reserved.*

Evaluation: Policy 1.1.a of the Comprehensive Plan Transportation Element establishes the Level of Service ("LOS") Standards for transportation facilities. For roadways monitored for concurrency, the LOS Standard is evaluated based upon the project's impact to the PM Peak Hour. The proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity[1]	2,300,000
Less Actual Potable Water Flows[1]	1,300,250
Reserved Capacity[2]	168,234
Available Capacity	831,516
Projected Potable Water Demand from Application[3]	523,373
Residual Capacity	**308,143**
Percentage of Permitted Design Capacity Utilized	**86.60%**

Sources:
1 City of Alachua Public Services Department, April 2021.
2 City of Alachua December 2021 Development Monitoring Report.
3 Source: Chapter 64E-6, Florida Administrative Code; Formula: Shopping Center - 15 gallons per 100 square feet x 3,489,156 square feet.

Evaluation: It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of the potable water system and the development of the property at its maximum development potential is therefore acceptable. Concurrency and impacts to the City's potable water system will be reevaluated at the site plan or preliminary plat review stage.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity	1,500,000
Less Actual Treatment Plant Flows[1]	677,000
Reserved Capacity[2]	149,453
Available Capacity	673,547
Projected Sanitary Sewer Demand from Application[3]	523,373
Residual Capacity	**150,174**
Percentage of Permitted Design Capacity Utilized	**89.99%**

Sources:
1 City of Alachua Public Services Department, April 2021.
2 City of Alachua December 2021 Development Monitoring Report.
3 Source: Chapter 64E-6, Florida Administrative Code; Formula: Shopping Center - 15 gallons per 100 square feet x 3,489,156 square feet.

Evaluation: It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of the wastewater system and the development of the property at its maximum development potential is therefore acceptable. Concurrency and impacts to the City's wastewater system will be reevaluated at the site plan or preliminary plat review stage.

Solid Waste Impacts

Table 8. Solid Waste Impacts

System Category	Pounds Per Day	Tons Per Year
Demand from Existing Development[1]	41,880.00	7,643.10
Reserved Capacity[2]	15,609.14	2,848.67
Demand Generated by Application[3]	41,869.86	7,641.25
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
1 *University of Florida, Bureau of Economic & Business Research, Estimates of Population (2020); Policy 2.1.a, CFNGAR Element (Formula: 10,574 persons x 0.73 tons per person per year).*
2 *City of Alachua December 2021 Development Monitoring Report.*
3 *Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996*
4 *New River Solid Waste Facility, April 2021.*

Evaluation: It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for solid waste facilities, and the impacts are therefore acceptable. This analysis is based on the maximum development potential proposed by the amendment. Concurrency and impacts to the City's solid waste system will be reevaluated at site plan review or preliminary plat review stage.

Recreational Impacts

Table 9a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	52.87
Reserved Capacity[1]	2.20
Potential Demand Generated by Development[3]	8.32
Residual Recreational Capacity After Impacts	**72.09**

Sources:
1 *City of Alachua December 2021 Development Monitoring Report.*
2 *University of Florida, Bureau of Economic & Business Research, Estimates of Population by County and City in Florida, April 1, 2020; Policy 1.2.b, Recreation Element (Formula: 10,574 persons / [5 acres/1,000 persons])*
3 *US Census Bureau; Policy 1.2.b, Recreation Element (Formula: 2.6 persons per dwelling x 640 dwellings / [5 acres/1,000 persons])*

Table 9b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	11.01 acres
Acreage Required to Serve Demand Generated by Development[2]	1.66 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	12.67 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**36.39%**

1 *Source: City of Alachua December 2021 Development Monitoring Report.*
2 *Formula: Recreation Demand Generated by Development (8.32 acres) x 20%.*
3 *Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)*

Evaluation: The proposed development would increase the maximum potential demand of recreational facilities by 8.23 acres, and would increase the demand of passive park space by 1.66 acres. It is anticipated that the proposed development will not adversely affect the LOS of recreational facilities; therefore, the impacts are acceptable. Concurrency and impacts to the City's recreation system will be reevaluated at site plan review or preliminary plat review stage.

Public School Impact

A School Capacity Review was submitted to The School Board of Alachua County (SBAC) in accordance with the City's Comprehensive Plan, specifically Policies 1.1.b, 1.1.c, 1.1.e, and 1.1.f of the Public School Facilities Element. According to the School Capacity Review report submitted to the City by the School Board of Alachua County on November 30, 2021, capacity is available at the elementary, middle, and high school levels to support the proposed development.

Upon submittal of a final development order for residential development (e.g., a site plan or final plat), a concurrency review will occur and determination of the availability of school capacity will rendered. Facility capacity must be available in order for a final development order to be granted.

November 30, 2021

RE: ACPS – Cellon Creek Comprehensive Plan Amendment / Rezoning

Alachua County Public Schools ("ACPS") has received notification of a Planned Development Amendment (rezoning) within the city limits of Alachua. The project encompasses 160 acres identified as Parcel 05949-000-000. This project is reviewed in accordance with *Objective 1.1: of the High Springs Comprehensive Plan* and *Section 6 of the Alachua County Public School Interlocal Agreement.*

The subject property is designated as Commercial, Community Commercial, Moderate Density Residential and High Density Residential in the Alachua *Future Land Use Element* and is currently designated as *Agriculture by the Alachua* zoning atlas. The proposed amendment will amend the FLUM designation to *Corporate Park.* This letter is being sent as a response to the impact that will be created by the maximum increase of 320 single family units and 320 multi-family units upon Alachua County schools. At buildout, the subject property is projected to generate students as shown by the following table.

Table 1: Projected Student Generation

	Units	*Elementary*	*Middle*	*High*
Single Family	320	45	19	29
Multi Family	320	29	10	10
Total	640	74	29	39

Pursuant to Chapter 1003, Florida Statutes, the School Board is charged with the operation and control of public K-12 education within the Alachua County School District. Its responsibilities include school facility planning, construction and maintenance and student assignment to maintain adequate and efficient utilization of educational facilities.

Please be advised that the School Board is undertaking a district wide evaluation of its capital investment priorities and policies and its student assignment policies. This review will involve an examination of school capital financing and the allocation of present and future funds among new construction, renovation and maintenance as required to maintain a uniform level of service throughout the District.

This evaluation will involve a comprehensive review of all public schools, including their attendance zones and the educational programs offered. As a result of anticipated redistricting, areas of the County and the towns/cities currently zoned for a school may no longer be zoned for the same school when the redistricting process is completed. Any new residential development located in an existing school zone is not guaranteed to remain in that same zone after the redistricting process is completed. It is anticipated that a new school-zoning plan will be in place for the start of the 2023-2024 school year.

The following table shows the current and projected utilization of public schools serving the City of Alachua.

Table 2: Capacity Utilization				
School	Capacity	Current	5 Years	10 Years
Alachua Elem	525	306	329	354
Irby Elem	536	381	410	441
Mebane Middle	876	336	362	389
Santa Fe High	1,435	1,134	1,220	1,313

To facilitate satisfactory and long-term solutions to our capacity needs, it is recommended that the City encourage developers to contribute to the expansion of educational facilities through "Capacity Enhancement Agreements.

If you have additional, questions please contact me at 352.955.7400 ext. 1445.

Sincerely,

Suzanne Wynn, Director
ACPS Facilities Community Planning

RE: Planning & Zoning Board (PZB) Public Hearing: Cellon Creek Large Scale Comprehensive Plan Amendment (LSCPA) Application and Site-Specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Mr. Wood:

On November 4, 2021, the City of Alachua received your revised applications for a Large Scale Comprehensive Plan Amendment (LSCPA) and a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) on behalf of the University of Florida Foundation, Inc. Based upon a review of the revised applications, the City has determined that the applications can now be scheduled for hearings before the Planning and Zoning Board (PZB).

You must provide two (2) *double-sided, three-hole punched, color sets* of each **complete** application package and a digital copy of all materials in PDF format on a CD or by emailing a Cloud / FTP link to download the materials to planning@cityofalachua.com *no less than 10 business days prior to the PZB Meeting at which your applications are scheduled to be heard.* The applications have been scheduled for the **December 14, 2021** PZB Meeting, therefore, the above referenced materials must be submitted to the City no later than ***Tuesday, November 30, 2021.*** Materials may be submitted earlier than this date.

In addition, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearings. Therefore, posted notice signs must be placed on the property no later than ***Tuesday, November 30, 2021***. Staff will contact notify you when the signs are available for pick up at City Hall.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearings, please submit the presentation or materials no later than 12:00 PM on the last business day prior the PZB meeting (no later than ***Monday, December 13, 2021***). Any presentation or materials may be submitted by emailing them to planning@cityofalachua.com.

Should you have any questions, please feel free to contact me at (386) 418-6100, x 1602 or via email at jtabor@cityofalachua.com.

Sincerely,

Justin Tabor, AICP
Principal Planner

RE: Response to Planning Assistance Team (PAT) Comments regarding:
Cellon Creek Large-scale Comprehensive Plan Amendment (LsCPA) Application
Cellon Creek Site-specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Justin:

Please find below detailed responses to the comments issued in the October 19 PAT Summary Letter regarding the above-mentioned applications. Original comments are provided in standard font; responses are provided in **bold font.**

LSCPA & REZONING APPLICATIONS

1. Maximum Development Potential
    a. In several areas of each application, it is stated that the proposed amendments would result in ±199,287 fewer square feet of nonresidential use compared to the current land use and zoning of the property. Based upon a note in the concurrency analysis, these statements are concluded by considering a maximum intensity where 25% of the project site will be dedicated to nonresidential uses. Maximum development potential must be considered based upon the maximum permitted by the proposed land use and zoning categories. Please revise throughout each application as needed.

Per the advisement of staff in the October 21 PAT Meeting, the maximum development potential mentioned throughout the application has been revised to reflect a scenario in which the entirety of the ±160.2-acre property is developed at a nonresidential intensity of 0.5 FAR.

2. Concurrency Impact Analysis
    a. Revise the impacts to all transportation, potable water, sanitary sewer, and solid waste to address comment 1.a.

These calculations have been revised in Section 3 of both reports. These revisions also followed the advice of city staff and demonstrate a maximum development scenario in which the entirety of the project site is developed at a nonresidential intensity of 0.5 FAR.

    b. Section 2.4.14(H) defines affected roadway segments as any roadway segment located within 1/2 mile of the subject property and those roadway segments for which the project's impacts are 5% or greater of the MSV of the roadway segment. Segment 4 is the only roadway segment identified as an affected roadway segment. Revisions to the projected trip generation to address comments 1.a. and 2.a. will likely result in additional roadway segments meeting the definition of 'affected roadway segment'. Revise Table 4 as needed to consider all affected roadway segments.

Table 4 in both reports has been revised to address this comment. Road segments now included are Segment 3, Segment 4, Segment 5, Segment 6, Segment 8, Segment 9, Segment 11, Segment 13, Segment 14, and Segment 15.

Gainesville | 11801 Research Drive, Alachua, Florida 32615 (352) 331-1976 | www.chw-inc.com

c. Evaluate and reconsider trip distribution to Segments 8 and 9.

Trip distribution for Segments 8 and 9 have been reconsidered. This change is reflected on the resubmitted Transportation Concurrency map exhibit.

d. While it is understood that Table 5 is intended to illustrate the increase/decrease in net impacts between existing and proposed land use/zoning categories, available capacity would not be applicable to such an analysis as it is not reflective of potential impacts from the proposed land use/zoning amendments. Please remove this information from Table 5.

Table 5 has been removed from both reports.

3. Comprehensive Plan Consistency Analysis
   a. The applicant states, in response to Objective 4.1 of the FLUE, "[t]he project site for this application will be infill development." Infill development is generally characterized as development occurring within an urban area on a vacant or underutilized property. The subject property is largely surrounded by other vacant lands. Please clarify the statement that this project represents infill development.

The response to Objective 4.1 of the FLUE has been revised in both reports to further explain what was meant by the term "infill development." The intention behind using this terminology was to make reference to the fact that the project site is a centrally located property on the US 441 corridor that currently sits vacant. It is surrounded by existing nonresidential uses and is nearby existing residential uses. Changing the Future Land Use (FLU) Classification and Zoning of the site to Corporate Park FLU and Corporate Park zoning will make possible site development with a mixture of complementary residential, commercial, and service offerings, and create adjacencies with other nonresidential uses along the corridor. This will also bring additional supportive uses to existing and future nearby residential communities in the City of Alachua.

LSCPA APPLICATION

4. Needs Analysis
   a. Revise the impacts to address comment 1.a.

References to impacts in the Needs Analysis have been revised in response to comment 1.a.

b. Suggest incorporating the memorandum within the justification report.

The Needs Analysis memorandum has been incorporated into the LsCPA Justification Report as Section 6.

c. Suggest utilizing the 2020 US Census for population data (10,574 persons).

The Needs Analysis has been revised to use the 2020 US Census population data when refencing City of Alachua population.

5. Urban Sprawl Analysis
   a. In response to Ch. 163.3177(6)(a)9.a.(II), please clarify the statement that this project represents infill development.

The response to Ch. 163.3177(6)(a)9.a.(II), Florida Statute, has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

b. In response to Ch. 163.3177(6)(a)9.a.(V):
    i. Please clarify statement referring to redevelopment of the site.

The statement referring to "redevelopment" of the site was a typographical error. The term "redevelopment" has been replaced with the term "development" in this response.

    ii. Note: Lands adjacent to the west and designated Agriculture land use/Agricultural zoning are owned by the State of Florida and are a part of San Felasco Hammock Preserve State Park.

This comment has been noted.

c. In response to Ch. 163.3177(6)(a)9.a.(VI), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)

The response to Ch. 163.3177(6)(a)9.a.(VI), Florida Statute, has been revised to expand upon the availability of existing utilities to state the following: for water services, there is a 16" water main along US 441; for wastewater services, there is a 10" force main along US 441, an 8" gravity main west of the project site, and a Lift Station at the northwest corner of the project site; and for electric services, there is a primary overhead electric line on Cellon Creek Boulevard to the west of the site and a primary overhead electric line on US 441 to the north of the site.

d. In response to Ch. 163.3177(6)(a)9.a.(X), please clarify the statement that this project represents infill development.

The response to Ch. 163.3177(6)(a)9.a.(X), Florida Statute, has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

e. Response to Ch. 163.3177(6)(a)9.b.(I) does not address specifically how the amendment would direct or locate economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on an protects natural resources and ecosystems.

The response to Ch. 163.3177(6)(a)9.b.(I), Florida Statute, has been revised to further explain how the amendment would locate economic growth in a manner that does not have adverse impact on and protects natural resources. This response now details how the type of development allowed by the Corporate Park FLU classification will spur economic growth by allowing more homes in the community and allowing more businesses to locate in the City. The response also explains that the property is an appropriate location for the Corporate Park-style of development, due to its proximity to US 441 and similar developments. Finally, the response explains how adverse impacts will be minimized and natural resources will be protected through the use of a development gradient and implementation of appropriate buffering.

6. LDR Consistency Analysis
    a. Please remove or update statement related to the recently approved LDR text amendments.

Reference to the recent approval of Land Development Regulations (LDR) amendments has been removed from this report.

    b. In response to Section 2.4.2(E)(1)(d), please clarify the statement that this project represents infill development.

The response to Section 2.4.2(E)(1)(d) has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

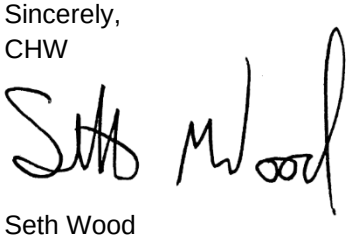
    c. Upon revising the Concurrency Impact Analysis to address comment 1.a., review response to Section 2.4.2(E)(1)(f) in relation to traffic impacts.

The response to Section 2.4.2(E)(1)(f) has been revised upon revision to the Concurrency Impact Analysis.

    d. In response to Section 2.4.2(E)(1)(f), please clarify the statement that this project represents infill development.

The response to Section 2.4.2(E)(1)(f) has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

    e. In response to Section 2.4.2(E)(1)(j), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.



The response to Section 2.4.2(E)(1)(j) has been revised to expand upon the availability of existing utilities to state the following: for water services, there is a 16" water main along US 441; for wastewater services, there is a 10" force main along US 441, an 8" gravity main west of the project site, and a Lift Station at the northwest corner of the project site; and for electric services, there is a primary overhead electric line on Cellon Creek Boulevard to the west of the site and a primary overhead electric line on US 441 to the north of the site.

    f. In response to Section 2.4.2(E)(1)(k), please expand upon protection measures for environmental features, including but not limited to on-site wetlands, special flood hazard areas, and San Felasco Hammock Preserve State Park.

The response to Section 2.4.2(E)(1)(k) has been expanded to make reference to specific protection measures, including Comprehensive Plan Conservation and Open Space Element Policy 1.10.g. regarding adequate wetland buffering; Comprehensive Plan Conservation and Open Space Element Policy 1.12.d. regarding adequate surface water buffering; and Comprehensive Plan Conservation and Open Space Element Policy 1.12.f. regarding appropriate development within special flood hazard areas. The revised response also explains that site development will be done in a density and intensity gradient, placing the highest density and intensity closest to US 441, and the lowest density closest to the San Felasco Hammock Preserve.

Thank you for your thorough review of our application materials. I look forward to our further discussion on these requests to amend the City's Future Land Use Map and Official Zoning Atlas.

Sincerely,
CHW

RE: Planning Assistance Team (PAT) Summary:
Cellon Creek Large Scale Comprehensive Plan Amendment (LSCPA) Application
Cellon Creek Site-Specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Mr. Wood:

On September 30, 2021, the City of Alachua received your applications for a Large Scale Comprehensive Plan Amendment (LSCPA) and a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) on behalf of the University of Florida Foundation, Inc. The applications propose to amend the FLUM and the zoning of a ±160.2 acre subject property (Tax Parcel Number 05949-000-000). The LSCPA application proposes to amend the FLUM from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and the Rezoning application proposes to amend the zoning from Agricultural (A) to Corporate Park (CP). A completeness review was performed on October 6, 2021 and the applications were determined to be complete on the same date.

The applications have been reviewed by the City's Planning Assistance Team (PAT). Upon review of the applications and materials, the following insufficiencies must be addressed. A meeting is scheduled for **11:30 AM** on **Thursday, October 21, 2021** to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM** on **Thursday, November 4, 2021**. A total of four (4) copies of each application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date. If all comments are addressed by the resubmission date above, the application may be scheduled for the **December 14, 2021 Planning & Zoning Board (PZB) Meeting.**

Please address the following:

LSCPA & Rezoning Applications

1. *Maximum Development Potential*
   a. In several areas of each application, it is stated that the proposed amendments would result in ±199,287 fewer square feet of nonresidential use compared to the current land use and zoning of the property. Based upon a note in the concurrency analysis, these statements are concluded by considering a maximum intensity where 25% of the project site will be dedicated to nonresidential uses. Maximum development potential must be considered based upon the maximum permitted by the proposed land use and zoning categories. Please revise throughout each application as needed.

2. *Concurrency Impact Analysis*
   a. Revise the impacts to all transportation, potable water, sanitary sewer, and solid waste to address comment 1.a.
   b. Section 2.4.14(H) defines affected roadway segments as any roadway segment located within 1/2 mile of the subject property and those roadway segments for which the project's impacts are 5% or greater of the MSV of the roadway segment. Segment 4 is the only roadway segment identified as an affected roadway segment. Revisions to the projected trip generation to address comments 1.a. and 2.a. will likely result in additional roadway segments meeting the definition of 'affected roadway segment'. Revise Table 4. as needed to consider all affected roadway segments.
   c. Evaluate and reconsider trip distribution to Segments 8 and 9.
   d. While it is understood that Table 5 is intended to illustrate the increase/decrease in net impacts between existing and proposed land use/zoning categories, available capacity would not be applicable to such an analysis as it is not reflective of potential impacts from the proposed land use/zoning amendments. Please remove this information from Table 5.

3. *Comprehensive Plan Consistency Analysis*
   a. The applicant states, in response to Objective 4.1 of the FLUE, "[t]he project site for this application will be infill development." Infill development is generally characterized as development occurring within an urban area on a vacant or underutilized property. The subject property is largely surrounded by other vacant lands. Please clarify the statement that this project represents infill development.

LSCPA Application

4. *Needs Analysis*
   a. Revise the impacts to address comment 1.a.
   b. Suggest incorporating the memorandum within the justification report.
   c. Suggest utilizing the 2020 US Census for population data (10,574 persons).

5. *Urban Sprawl Analysis*
   a. In response to Ch. 163.3177(6)(a)9.a.(II), please clarify the statement that this project represents infill development.

b. In response to Ch. 163.3177(6)(a)9.a.(V):
   i. Please clarify statement referring to redevelopment of the site.
   ii. Note: Lands adjacent to the west and designated Agriculture land use/Agricultural zoning are owned by the State of Florida and are a part of San Felasco Hammock Preserve State Park.
c. In response to Ch. 163.3177(6)(a)9.a.(VI), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)
d. In response to Ch. 163.3177(6)(a)9.a.(X), please clarify the statement that this project represents infill development.
e. Response to Ch. 163.3177(6)(a)9.b.(I) does not address specifically how the amendment would direct or locate economic growth and associated land development to geographic areas of the community in a manner that *does not have an adverse impact on an protects natural resources and ecosystems*.

Rezoning Application

6. *LDR Consistency Analysis*
   a. Please remove or update statement related to the recently approved LDR text amendments.
   b. In response to Section 2.4.2(E)(1)(d), please clarify the statement that this project represents infill development.
   c. Upon revising the Concurrency Impact Analysis to address comment 1.a., review response to Section 2.4.2(E)(1)(f) in relation to traffic impacts.
   d. In response to Section 2.4.2(E)(1)(f), please clarify the statement that this project represents infill development.
   e. In response to Section 2.4.2(E)(1)(j), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.
   f. In response to Section 2.4.2(E)(1)(k), please expand upon protection measures for environmental features, including but not limited to on-site wetlands, special flood hazard areas, and San Felasco Hammock Preserve State Park.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1602 or via e-mail at jtabor@cityofalachua.com. We look forward to receiving your revised applications.

Sincerely,

Justin Tabor, AICP

Deficiencies to be Addressed

LSCPA & Rezoning Applications

1. *Maximum Development Potential*
   a. In several areas of each application, it is stated that the proposed amendments would result in ±199,287 fewer square feet of nonresidential use compared to the current land use and zoning of the property. Based upon a note in the concurrency analysis, these statements are concluded by considering a maximum intensity where 25% of the project site will be dedicated to nonresidential uses. Maximum development potential must be considered based upon the maximum permitted by the proposed land use and zoning categories. Please revise throughout each application as needed.

2. *Concurrency Impact Analysis*
   a. Revise the impacts to all transportation, potable water, sanitary sewer, and solid waste to address comment 1.a.
   b. Section 2.4.14(H) defines affected roadway segments as any roadway segment located within 1/2 mile of the subject property and those roadway segments for which the project's impacts are 5% or greater of the MSV of the roadway segment. Segment 4 is the only roadway segment identified as an affected roadway segment. Revisions to the projected trip generation to address comments 1.a. and 2.a. will likely result in additional roadway segments meeting the definition of 'affected roadway segment'. Revise Table 4. as needed to consider all affected roadway segments.
   c. Evaluate and reconsider trip distribution to Segments 8 and 9.
   d. While it is understood that Table 5 is intended to illustrate the increase/decrease in net impacts between existing and proposed land use/zoning categories, available capacity would not be applicable to such an analysis as it is not reflective of potential impacts from the proposed land use/zoning amendments. Please remove this information from Table 5.

3. *Comprehensive Plan Consistency Analysis*
   a. The applicant states, in response to Objective 4.1 of the FLUE, "[t]he project site for this application will be infill development." Infill development is generally characterized as development occurring within an urban area on a vacant or underutilized property. The subject property is largely surrounded by other vacant lands. Please clarify the statement that this project represents infill development.

LSCPA Application

4. *Needs Analysis*
   a. Revise the impacts to address comment 1.a.
   b. Suggest incorporating the memorandum within the justification report.
   c. Suggest utilizing the 2020 US Census for population data (10,574 persons).

5. *Urban Sprawl Analysis*
   a. In response to Ch. 163.3177(6)(a)9.a.(II), please clarify the statement that this project represents infill development.

b. In response to Ch. 163.3177(6)(a)9.a.(V):
   i. Please clarify statement referring to redevelopment of the site.
   ii. Note: Lands adjacent to the west and designated Agriculture land use/Agricultural zoning are owned by the State of Florida and are a part of San Felasco Hammock Preserve State Park.
c. In response to Ch. 163.3177(6)(a)9.a.(VI), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)
d. In response to Ch. 163.3177(6)(a)9.a.(X), please clarify the statement that this project represents infill development.
e. Response to Ch. 163.3177(6)(a)9.b.(I) does not address specifically how the amendment would direct or locate economic growth and associated land development to geographic areas of the community in a manner that *does not have an adverse impact on an protects natural resources and ecosystems*.

Rezoning Application

6. *LDR Consistency Analysis*
   a. Please remove or update statement related to the recently approved LDR text amendments.
   b. In response to Section 2.4.2(E)(1)(d), please clarify the statement that this project represents infill development.
   c. Upon revising the Concurrency Impact Analysis to address comment 1.a., review response to Section 2.4.2(E)(1)(f) in relation to traffic impacts.
   d. In response to Section 2.4.2(E)(1)(f), please clarify the statement that this project represents infill development.
   e. In response to Section 2.4.2(E)(1)(j), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)
   f. In response to Section 2.4.2(E)(1)(k), please expand upon protection measures for environmental features, including but not limited to on-site wetlands, special flood hazard areas, and San Felasco Hammock Preserve State Park.

Request for Capacity Review: Cellon Creek CPA & Rezoning

From : Justin Tabor <jtabor@cityofalachua.com> Wed, Oct 13, 2021 12:49 PM
Subject : Request for Capacity Review: Cellon Creek CPA & Rezoning 1 attachment
To : Suzanne M Wynn <wynnsm@gm.sbac.edu>
Cc : Gene Boles <geneboles@gmail.com>

Suzanne,

The City of Alachua has received a Large Scale Comprehensive Plan Amendment (LSCPA) application and a Rezoning application from CHW on behalf of the University of Florida Foundation, Inc. The applications propose to amend the FLUM and the zoning of a ±160.2 acre subject property (Tax Parcel Number 05949-000-000). The LSCPA application proposes to amend the FLUM from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and the Rezoning application proposes to amend the zoning from Agricultural (A) to Corporate Park (CP).

Please find the Public School Student Generation Form for this project attached for review and approval.

If any additional information is needed, please feel free to contact me.

Sincerely,

Justin Tabor, AICP

RE: Response to Completeness Review of:
Cellon Creek Large-scale Comprehensive Plan Amendment (LsCPA) Application
Cellon Creek Site-specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Justin:

Please find below detailed responses to the comments issued in the October 6 Completeness Review letter regarding the above-mentioned applications. Original comments are provided in standard font; responses are provided in **bold font.**

LsCPA Application

1. Authorized Agent Affidavit:
    a. Please identify the authorized agent contact person.
    b. The date in the notary block is incomplete. Please confirm the year the document was signed.

    A revised Authorized Agent Affidavit, reflective of these comments, has been included as attachment [Attachment I], as has written permission from the property owner to alter the affidavit [Attachment II].

2. Comprehensive Plan Amendment Application, Section B., Applicant: Please identify the contact person.
    The contact person is Seth Wood of CHW.
    Phone: (352) 331-1976
    Email: sethw@chw-inc.com

    A revised LsCPA application form has been provided as attachment [Attachment III].

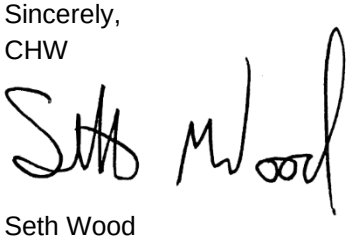
3. Comprehensive Plan Amendment Application Attachment #4, Needs Analysis: The application does not include a needs analysis demonstrating the necessity for the proposed increase in the proposed FLUM Designation.
    A Needs Analysis is provided as attachment [Attachment IV], demonstrating the necessity of the proposed FLUM designation. Of note, the proposed FLUM Designation may allow a *decrease*, rather than an increase, of up to ±199,287 fewer square feet of nonresidential use compared to what is currently allowed on the property. The proposed FLUM designation may allow an increase of up to only ±31 additional dwelling units compared to what is currently permitted.

4. Comprehensive Plan Amendment Application Attachment #8, Public School Student Generation Form, Section 8, Development Data: The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.
    A revised version of the Public School Student Generation Form is included as attachment [Attachment V] with revision to section 8 in order to identify the number of multifamily residential dwellings contemplated for the future development of the site.

Rezoning Application

1. Authorized Agent Affidavit:
    a. Please identify the authorized agent contact person.
    b. The date in the notary block is incomplete. Please confirm the year the document was signed.

    A revised Authorized Agent Affidavit, reflective of these comments, has been included as attachment [Attachment I], as has written permission from the property owner to alter the affidavit [Attachment II].



2. Rezoning Application, Section B., Applicant: Please identify the contact person.
    The contact person is Seth Wood of CHW.
    Phone: (352) 331-1976
    Email: sethw@chw-inc.com

    A revised application form has been provided as attachment [Attachment VI].

3. Rezoning Application Attachment #8, Public School Student Generation Form, Section 8, Development Data: The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.
    A revised version of the Public School Student Generation Form is included as attachment [Attachment VII] with revision to section 8 in order to identify the number of multifamily residential dwellings contemplated for the future development of the site.

Thank you for your prompt preliminary review of these applications for completeness. We look forward to hearing the findings of your in-depth review at the forthcoming Project Assistance Team (PAT) Meeting.

Sincerely,
CHW

RE: Completeness Review of:
Cellon Creek Large Scale Comprehensive Plan Amendment (LSCPA) Application
Cellon Creek Site-Specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Mr. Wood:

On September 30, 2021, the City of Alachua received your applications for a proposed Large Scale Comprehensive Plan Amendment (LSCPA) to the Future Land Use Map (FLUM) and for a proposed Site-Specific Amendment to the Official Zoning Atlas (Rezoning). The applications propose to amend the FLUM and the zoning of a ±160.2 acre subject property (Tax Parcel Number 05949-000-000). The LSCPA application proposes to amend the FLUM from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and the Rezoning application proposes to amend the zoning from Agricultural (A) to Corporate Park (CP).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that the applications are complete, contingent upon receiving the information as noted below. Please provide materials addressing the comments below by **5:00 PM on Wednesday, October 13, 2021**. Digital submission of the materials to the project planner is acceptable.

The comments below are based solely on a preliminary review of your applications for completeness. An in-depth review of the content of each application will be performed, and the findings of the in-depth review will be discussed at a Project Assistance Team (PAT) Meeting, which will be scheduled under separate cover.

In order to provide complete applications, you must address the following:

LSCPA Application

1. **Authorized Agent Affidavit:**
   a. Please identify the authorized agent contact person.
   b. The date in the notary block is incomplete. Please confirm the year the document was signed.

2. **Comprehensive Plan Amendment Application, Section B., Applicant:** Please identify the contact person.

3. **Comprehensive Plan Amendment Application Attachment #4, Needs Analysis:** The application does not include a needs analysis demonstrating the necessity for the proposed increase in the proposed FLUM Designation.

4. **Comprehensive Plan Amendment Application Attachment #8, Public School Student Generation Form, Section 8, Development Data:** The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.

Rezoning Application

1. **Authorized Agent Affidavit:**
   a. Please identify the authorized agent contact person.
   b. The date in the notary block is incomplete. Please confirm the year the document was signed.

2. **Rezoning Application, Section B., Applicant:** Please identify the contact person.

3. **Rezoning Application Attachment #8, Public School Student Generation Form, Section 8, Development Data:** The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1602 or via e-mail at jtabor@cityofalachua.com.

Sincerely,

Justin Tabor, AICP
Principal Planner

RE: Cellon Creek – Large-scale Comprehensive Plan Amendment (LsCPA)
(Alachua County tax parcel 05949-000-000)

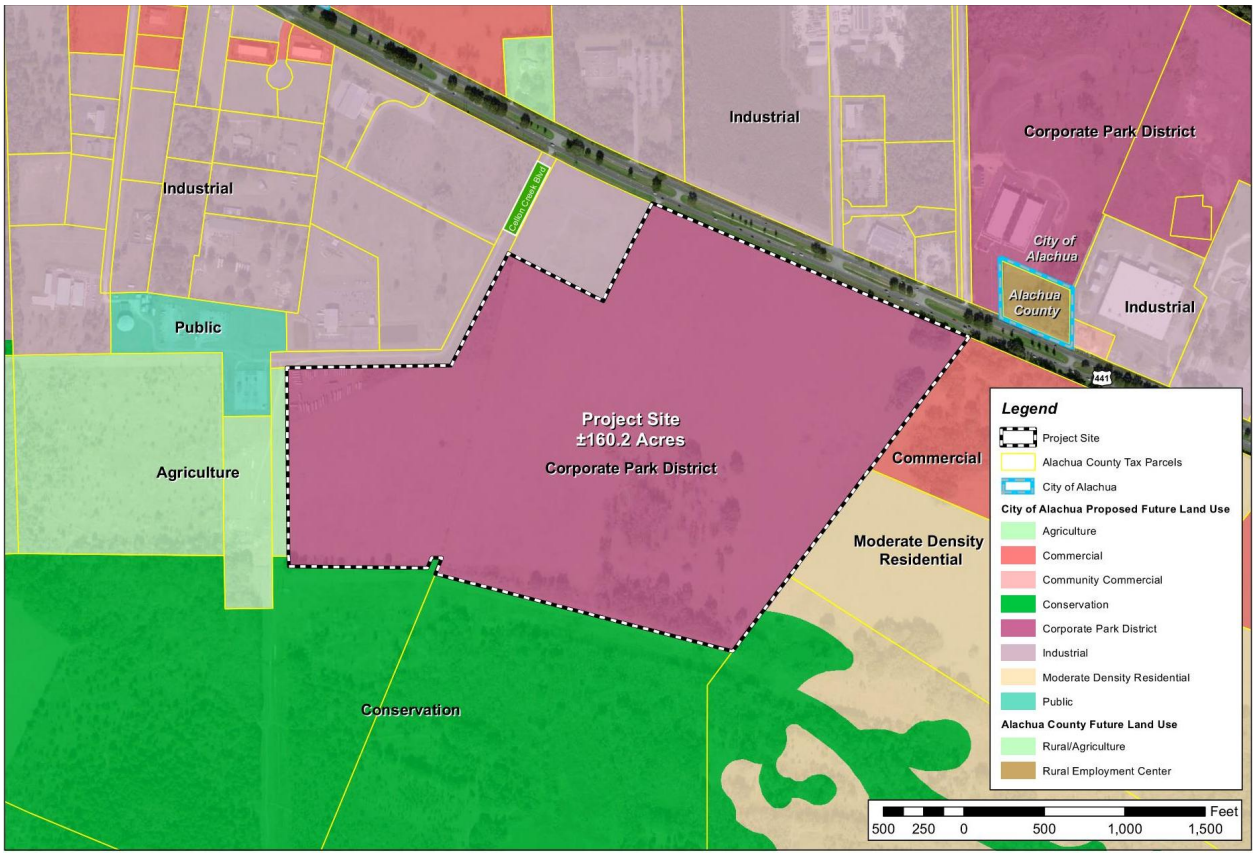
Dear Kathy:

Please find the following items enclosed for review and approval of the above reference project:

- LsCPA Application;
- Property Owner Affidavit;
- Legal Description;
- Deed, Property Appraiser Data Sheet, Tax Records;
- Neighborhood Meeting Materials;
- Justification Report;
- Student Generation Form; and
- Map Set of Project Site

Additionally, included in the submittal is one (1) check in the amount of $9,000.00 made payable to the City of Alachua and three (3) sets of mailing labels for property owners within 400 feet of the subject property boundary. This check is intended to cover the fee for both this LsCPA application, as well as a concurrently-submitted rezoning application.

This application requests a LsCPA to change the Future Land Use (FLU) classifications of the site from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park. This application is submitted concurrently with a rezoning application requesting to change the zoning of the project site from Agriculture (A) to Corporate Park (CP). The intent is to facilitate the development of a mixed-use project with focus on employment-generating opportunities, in line with the spirit and intent of the Corporate Park FLU classification.



We trust you will find this submittal package is sufficient for review and approval. Please feel free to contact me at (352) 331-1976 or at sethw@chw-inc.com should you have any questions or require any additional information to complete your review.

Sincerely,
CHW

6. Proposed Future Land Use Map Designation: _____
7. Acreage: _____

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☐ Agent
2. Name of Applicant(s) or Contact Person(s): _____ Title: _____
   Company (if applicable): _____
   Mailing address: _____
   City: _____ State: _____ ZIP: _____
   Telephone: (352) _____ FAX: ( ) _____ e-mail: _____
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): _____
   Mailing Address: _____
   City: _____ State: _____ ZIP: _____
   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☐ Yes ☐ No
   If yes, list names of all parties involved: _____
   If yes, is the contract/option contingent or absolute? ☐ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change and maps which illustrate the proposed change.

2. Urban Sprawl Analysis which evaluates as to whether the plan amendment incorporates a development pattern or urban form that achieves four or more of the following eight criteria:

   (I) Directs growth and development to areas of the community in a manner that does not adversely impact natural resources;
   (II) Promotes the efficient and cost effective provision or extension of public infrastructure and services;
   (III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that support a range of housing choices and a multimodal transportation system;
   (IV) Promotes conservation of water and energy;
   (V) Preserves agricultural areas and activities;

(VI) Preserves open space and natural lands and provides for public open space and recreation needs;
(VII) Creates a balance of land uses based on demands of residential population for the nonresidential needs of an area; and,
(VIII) Provides uses, densities and intensities of use and urban form that would remediate an existing or planned sprawl development pattern or provides for an innovative development pattern such as transit oriented development or new towns.

3. Concurrency Impact Analysis which considers the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.

4. Needs Analysis which demonstrates the necessity for the proposed increase in the proposed Future Land Use Map Designation. This analysis may consist, in whole or part, of a market impact study or real estate needs analysis.

5. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

6. A current aerial map of the property (may be obtained from the Alachua County Property Appraiser).

7. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

8. If the application includes any Future Land Use Map Designation which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. **A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.**

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

WARRANTY DEED

THIS INDENTURE, made this 24th day of February, 1983, between CONTEXT DEVELOPMENT CO., a Delaware corporation, Grantor, and UNIVERSITY OF FLORIDA FOUNDATION, INC., a Florida corporation, whose post office address is Post Office Box 14425, Gainesville, Florida 32604, Grantee,

WITNESSETH:

That said Grantor, for and in consideration of the sum of Ten Dollars ($10.00) and other good and valuable considerations to said Grantor in hand paid by said Grantee, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the said Grantee, and Grantee's successors and assigns, forever, the following described land, situate, lying and being in Alachua County, Florida, to-wit:

A part of Sections 13, 14, 23 and 24, Fractional Sections 25 and 26, the F. R. Sanchez Grant, and the Fernandez Grant in Township 8 South, Range 18 East, together with a part of Fractional Sections 19, 20 and 29, the J. S. Sanchez Grant, the John Sanchez Grant and the Fernandez Grant in Township 8 South, Range 19 East, all in Alachua County, Florida, being more particularly described as follows:

Commence at the northwest corner of said Fractional Section 26 and run thence North 89 deg. 11 min. 05 sec. East along the North boundary thereof, 40.11 feet to the easterly right-of-way line of County Road No. 241 (80 foot R/W) and the Point of Beginning; thence run South 01 deg. 06 min. 36 sec. East, along said right-of-way line, 333.27 feet to the beginning of a curve, concave easterly, and having a radius of 11,419.20 feet, thence southeasterly along and with the arc of said curve and along said right-of-way line, through a central angle of 03 deg. 07 min. 37 sec., an arc distance of 623.21 feet to the end of said curve, thence South 04 deg. 22 min. 27 sec. East, along said right-of-way line, 370.99 feet to the South boundary of the North one-half (N½) of the Northwest quarter (NW¼) of said Fractional Section 26, thence North 89 deg. 21 min. 05 sec. East along said south boundary, 583.29 feet to a Permanent Reference Monument (PRM) at the northwesternmost corner of Shaw Farms of Alachua, according to a plat thereof recorded in Plat Book L, Page 64 of the public records of Alachua County, Florida, thence continue North 89 deg. 21 min. 05 sec. East along said south boundary of North one-half (N½) of Northwest quarter (NW¼) and along the north boundary of said Shaw Farms of Alachua, 2397.15 feet to a PRM at the northeast corner of Lot 6 of said Shaw Farms of Alachua and the southeast corner of said North one-half (N½) of Northwest quarter (NW¼), thence North 01 deg. 07 min. 32 sec. West, along the east boundary of said North one-half (N½) of Northwest quarter (NW¼) and along the west boundary of said Shaw Farms of Alachua, 1335.02 feet to the northwest corner of Lot 22 of said Shaw Farms of Alachua and the northeast corner of said North one-half (N½) of Northwest quarter (NW¼), said point also being the southwest corner of Government Lot 2 of said Section 23, thence North 89 deg. 11 min. 53 sec. East, along the north boundary of said Shaw Farms of Alachua and

the south boundary of said Section 23, a distance of 1637.45 feet, to an intersection with the northerly boundary of the F. R. Sanchez Grant, thence South 65 deg. 00 min. 32 sec. East, along the northerly boundary of said Shaw Farms and the northerly boundary of the F. R. Sanchez Grant, 3132.95 feet to the northeasterly corner of said Shaw Farms of Alachua; thence continue South 65 deg. 00 min. 32 sec. East along said northerly boundary of the Sanchez Grant, 2113.89 feet to the northwest corner of Lot 1 of Haile Estates in the F. R. Sanchez Grant according to a plat thereof recorded in Plat Book A, Page 56, of the public records of Alachua County, Florida; thence South 25 deg. 29 min. 34 sec. West, along the west boundary of said Lot 1, a distance of 1638.16 feet to the northwest corner of Lot 9 of said Haile Estates, said point also being the northeasterly corner of Alachua Highlands, Unit No. 1, according to a plat thereof recorded in Plat Book K, Page 56, of the public records of Alachua County, Florida; thence South 25 deg. 22 min. 48 sec. West, along the westerly boundary of said Lot 9 and the easterly boundary of Lots 1, 2 and 3 of said Alachua Highlands, Unit No. 1, a distance of 949.80 feet to the northerly boundary of the Hammock Lands conveyed to the State of Florida and recorded in Official Records Book 908 at pages 858 through 860, thence North 81 deg. 31 min. 14 sec. East, along said northerly boundary, 4009.08 feet, thence North 86 deg. 31 min. 58 sec. East, along said northerly boundary, 3610.46 feet, thence South 81 deg. 38 min. 52 sec. East, along said northerly boundary, 1949.33 feet, thence North 06 deg. 47 min. 16 sec. East, 1404.87 feet, thence South 71 deg. 05 min. 04 sec. East, 92.64 feet, thence North 34 deg. 13 min. 59 sec. East, 1476.82 feet, thence North 88 deg. 22 sec. 53 sec. East, 1252.57 feet, thence North 00 deg. 38 min. 14 sec. East, 1301.36 feet to the southerly right-of-way line of State Road 25, U. S. 441 (200 foot R/W) thence North 72 deg. 58 min. 52 sec. West, along said southerly right-of-way line, 225.69 feet to the beginning of a curve concave northeasterly and having a radius of 11,609.20 feet, thence northwesterly along and with the arc of said curve and along said right-of-way line through a central angle of 06 deg. 52 min. 00 sec. an arc distance of 1391.32 feet to the end of said curve, thence North 66 deg. 03 min. 55 sec. West, along said right-of-way line, 345.63 feet, thence South 23 deg. 56 min. 05 sec. West, 607.82 feet, thence North 60 deg. 14 min. 54 sec. West, 160.83 feet, thence North 23 deg. 56 min. 05 sec. East, 591.52 feet to said southerly right-of-way line, thence North 66 deg. 03 min. 55 sec. West, along said southerly right-of-way line, 3888.56 feet to the beginning of a curve, concave northeasterly and having a radius of 5896.58 feet, thence northwesterly along and with the arc of said curve and along said right-of-way line through a central angle of 04 deg. 05 min. 00 sec. an arc distance of 420.24 feet to the end of said curve, thence North 61 deg. 57 min. 50 sec. West, along said southerly right-of-way line 1681.47 feet, thence South 08 deg. 50 min. 07 sec. West, 1680.29 feet, thence North 81 deg. 10 min. 24 sec. West, 944.33 feet, thence North 08 deg. 49 min. 45 sec. East, 2008.91 feet to the aforementioned southerly right-of-way line of State Road No. 25, thence North 61 deg. 59 min. 14 sec. West,

along said right-of-way line, 882.07 feet, thence South 00 deg. 35 min. 40 sec. East, 1523.91 feet, thence South 89 deg. 22 min. 03 sec. West, 399.61 feet to a point on the east boundary of Section 24, Township 8 South, Range 18 East, thence South 00 deg. 35 min. 54 sec. East along said east boundary, 1245.81 feet to the northeast corner of the Southeast quarter (SE¼) of Southeast quarter (SE¼) of said Section 24, thence North 89 deg. 46 min. 15 sec. West, along the north boundary of said Southeast quarter (SE¼) of Southeast quarter (SE¼), 1218.03 feet to the southeast corner of the South one-half (S½) of the Northwest quarter (NW¼) of Southeast quarter (SE¼) of said Section 24, thence North 01 deg. 01 min. 46 sec. West, along the east boundary of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼), 661.14 feet to the northeast corner of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼), thence North 89 deg. 43 min. 32 sec. West along the north boundary of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼), 1222.41 feet to the northwest corner of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼) and the East boundary of Government Lot 4 of said Section 24, thence North 01 deg. 27 min. 18 sec. West, along the east boundary of Government Lots 4 and 1, a distance of 2782.53 feet to the southerly right-of-way line of State Road No. 25 (U.S. Highway 441) thence continue North 01 deg. 27 min. 18 sec. West, along the east boundary of said Government Lot 1, a distance of 201.49 feet to the North right-of-way line of said State Road No. 25, thence continue North 01 deg. 27 min. 18 sec. West, along said east boundary, 294.67 feet to the southeast corner of the Southwest quarter (SW¼) of Section 13, Township 8 South, Range 18 East, thence North 00 deg. 53 min. 56 sec. West, along the east boundary of said Southwest quarter (SW¼), 245.86 feet to the southerly right-of-way line of County Road No. S-340-A (66 foot R/W) thence North 81 deg. 38 min. 13 sec. West, along said southerly right-of-way line, 2307.19 feet to the beginning of a curve, concave northeasterly and having a radius of 1178.92 feet, thence northwesterly along and with said curve and along said right-of-way line, through a central angle of 12 deg. 00 min. 00 sec., an arc distance of 246.91 feet to the end of said curve, thence North 69 deg. 38 min. 13 sec. West, along said southerly right-of-way line, 99.39 feet to the beginning of a curve, concave southerly and having a radius of 539.96 feet, thence northwesterly along and with the arc of said curve and along said right-of-way line through a central angle of 30 deg. 54 min. 45 sec. an arc distance of 291.32 feet to said northerly right-of-way line of State Road No. 25, said arc being subtended by a chord having a bearing and distance of North 85 deg. 05 min. 36 sec. West, 287.80 feet, thence South 76 deg. 57 min. 08 sec. West, 254.78 feet to said southerly right-of-way line of State Road No. 25 (the right-of-way of County Road No. S-340-A becomes 50 feet at this point and remains 50 feet to the west) said point being on the arc of a curve, concave southeasterly and having a radius of 547.96 feet, thence southwesterly along and with the arc of said curve and along said southerly right-of-way line through a central angle of 11 deg. 39 min. 42 sec. an arc

distance of 111.53 feet to the end of said curve, said arc being subtended by a chord having a bearing and distance of South 60 deg. 48 min. 38 sec. West, 111.34 feet, thence South 54 deg. 58 min. 47 sec. West, along said southerly right-of-way line of County Road S-340-A, 123.99 feet to the beginning of a curve, concave northwesterly and having a radius of 843.51 feet, thence southwesterly along and with the arc of said curve and along said southerly right-of-way line, through a central angle of 14 deg. 48 min. 00 sec., an arc distance of 217.88 feet to the end of said curve, thence South 69 deg. 46 min. 47 sec. West, along said southerly right-of-way line, 248.93 feet to the beginning of a curve, concave northwesterly and having a radius of 1934.86 feet, thence southwesterly along and with the arc of said curve and along said southerly right-of-way line through a central angle of 05 deg. 50 min. 26 sec., an arc distance of 197.23 feet, said arc being subtended by a chord having a bearing and distance of South 72 deg. 42 min. 00 sec. West, 197.15 feet to the west boundary of the Southeast quarter (SE¼) of Southeast quarter (SE¼) of Section 14, Township 8 South, Range 18 East, thence South 01 deg. 35 min. 12 sec. East, along said west boundary of Southeast quarter (SE¼) of Southeast quarter (SE¼), 84.01 feet to the intersection with the easterly right-of-way line of an 80 foot right-of-way owned by the City of Alachua and recorded in Official Records Book 1279 at pages 840 through 841 of the public records of Alachua County, Florida; thence South 47 deg. 28 min. 41 sec. East, along said easterly right-of-way line 55.70 feet, thence South 01 deg. 35 min. 12 sec. East, 40.00 feet from and parallel to said west boundary of Southeast quarter (SE¼) of Southeast quarter (SE¼), 121.89 feet to the north boundary of the Northeast quarter (NE¼) of Northeast quarter (NE¼) of Section 23, Township 8 South, Range 18 East, thence North 89 deg. 31 min. 38 sec. East, along said north boundary, 191.44 feet, thence South 77 deg. 25 min. 05 sec. East, 833.14 feet, thence South 01 deg. 24 min. 55 sec. East, 465.34 feet, thence South 89 deg. 31 min. 38 sec. West, parallel to said north boundary, 1000.11 feet to said east right-of-way line, thence South 01 deg. 24 min. 04 sec. East, 40 feet from and parallel to the west boundary of said Northeast quarter (NE¼) of Northeast quarter (NE¼), 678.82 feet to the south boundary of said Northeast quarter (NE¼) of Northeast quarter (NE¼), thence North 89 deg. 14 min. 54 sec. East, along said south boundary, 1280.72 feet to the west boundary of the aforementioned Section 24, thence South 01 deg. 24 min. 48 sec. East, along said west boundary, 1959.51 feet to the southeast corner of property owned by the City of Alachua and recorded in Official Records Book 908 at pages 844 through 845 of the public records of Alachua County, Florida; thence South 88 deg. 57 min. 05 sec. West, along the south boundary of said City of Alachua property, 4165.85 feet; thence South 01 deg. 27 min. 01 sec. East, 659.40 feet to the north boundary of the South one-half (S½) of the Southwest quarter (SW¼) of said Section 23, thence South 89 deg. 20 min. 34 sec. West, along said north boundary, 1502.00 feet to the east right-of-way line of County Road No. 241 (80 foot R/W) thence South 01 deg. 06 min. 36 sec. East, along said east right-of-way line, 1334.44 feet to the Point of Beginning. Less the rights-of-way of U. S. Highway 441 and State Road 25.

Containing 2124.36 acres more or less excluding the area lying within the right-of-way of State Road No. 25.

ALSO:

Lots 5, 6, 9, 14, and the East 1/2 of Lot 13 of Haile Estates in Fractional Section 35, Township 8 South, Range 18 East, Alachua County, Florida, according to a plat thereof recorded in Plat Book "A", Page 56, of the public records of Alachua County, Florida; less rights of way for Interstate Highway No. I-75 (State Road 93) and a County Graded Road; and being more particularly described as follows:

Commence at the Southwest Corner of said Fractional Section 35 and run thence South 89 deg. 16 min. 33 sec. East, along the South boundary of said Fractional Section, 1984.75 feet to the Southwest Corner of said East Half (E-1/2) of Lot 13, and the Point of Beginning; thence continue South 89 deg. 16 min. 33 sec. East, along said South boundary, 1831.88 feet, to a point on the Southwesterly right of way line of said Interstate Highway No. I-75 (State Road No. 93), said point lying on the arc of a curve concave Southwesterly and having a radius of 14,217.94 feet; thence Northwesterly along the arc of said curve and along said right of way line through a central angle of 07 deg. 19 min. 25 sec., an arc distance of 1817.39 feet, said arc being subtended by a chord having a bearing and distance of North 41 deg. 08 min. 24 sec. West, 1816.15 feet, to the end of said curve; thence North 44 deg. 48 min. 07 sec. West, along said Southwesterly right of way line, 15.28 feet, to a point on the West boundary of said Lot 9; thence South 01 deg. 29 min. 15 sec. East, along said West boundary of Lot 9, a distance of 18.24 feet, to the Northeast Corner of said East Half (E-1/2) of Lot 13; thence North 89 deg. 40 min. 56 sec. West, along the North boundary of said East Half (E-1/2) of Lot 13, a distance of 659.66 feet, to the Northwest Corner of said East Half (E-1/2) of Lot 13; thence South 01 deg. 24 min. 44 sec. East, along the West boundary of said East Half (E-1/2) of Lot 13, a distance of 1341.28 feet to the point of beginning. Containing 39.51 acres, more or less.

ALSO:

Commence at the Southwest Corner of said Fractional Section 35, and run thence North 01 deg. 11 min. 18 sec. West, along the West boundary of said Fractional Section, 2654.12 feet, to the Southwest Corner of the Northwest Quarter (NW-1/4) of said Fractional Section; thence South 89 deg. 43 min. 54 sec. East, 1315.86 feet, to the Southwest Corner of said Lot 5 and the Point of Beginning; thence continue South 89 deg. 43 min. 54 sec. East, along the South boundary of said Lot 5, a distance of 42.13 feet, to a point on the Southwesterly right of way line of said Interstate Highway No. I-75 (State Road No. 93); thence North 44 deg. 48 min. 07 sec. West, along said right of way line 61.49 feet; to a point on the West boundary of said Lot 5; thence South 01 deg. 34 min. 27 sec. East, along said West boundary 43.45 feet to the point of beginning. Containing 0.02 of an acre, more or less.

O.R. BOOK 1466 PAGE 381

ALSO:

Commence at the Southwest Corner of said Fractional Section 35 and run thence North 01 deg. 11 min. 18 sec. West, along the West boundary of said Fractional Section 2654.12 feet to the Southwest Corner of the Northwest Quarter (NW-1/4) of said Fractional Section; thence South 89 deg. 43 min. 54 sec. East, 1876.24 feet, to the intersection of the South boundary of said Lot 5 and the Northeasterly right of way line of said County Graded Road (66 foot right of way) and the Point of Beginning; thence continue South 89 deg. 43 min. 54 sec. East, along said South boundary of Lot 5, a distance of 755.48 feet, to the Northwest Corner of said Lot 9; thence South 01 deg. 29 min. 15 sec. East, along the West boundary of said Lot 9, a distance of 777.77 feet, to a point on said Northeasterly right of way line; thence South 44 deg. 48 min. 07 sec. East, along said right of way line, 1563.68 feet, to the beginning of a curve concave Southwesterly and having a radius of 7855.44 feet, thence Southeasterly along the arc of said curve and along said right of way line through a central angle of 02 deg. 44 min. 52 sec., an arc distance of 376.73 feet, said arc being subtended by a chord having a bearing and distance of South 43 deg. 25 min. 41 sec. East, 376.69 feet, to a point on the East boundary of said Lot 14; thence North 01 deg. 30 min. 45 sec. West, along the East boundary of said Lots 14, 9 and 6, a distance of 3515.19 feet, to the Northeast Corner of said Lot 6; thence North 89 deg. 59 min. 25 sec. West, along the North boundary of said Lots 6 and 5, a distance of 2641.10 feet to the Northwest Corner of said Lot 5; thence South 01 deg. 34 min. 27 sec. East, along the West boundary of said Lot 5, a distance of 770.34 feet to a point on said Northeasterly right of way line; thence South 44 deg. 48 min. 07 sec. East, along said right of way line, 817.76 feet to the Point of Beginning. Containing 122.72 acres, more or less.

SUBJECT TO THE FOLLOWING:

That certain oil and gas lease dated 29 March 1923, and recorded 24 April 1923, in Miscellaneous Records Book 11, Page 125, to Florida Mineral Oil and Sulphur Company.

Easement from H. C. Edwards and his wife, Susie S. Edwards, to Florida Power Corporation to construct, operate and maintain a single pole H-Frame tower line for the transmission and distribution of electricity, etc., over Lot 18 of L. L. Dell Estates, dated 3 February 1959, and recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida.

Special Warranty Deed from H. C. Edwards and wife, Susie S. Edwards, to the State of Florida for road right-of-way SE-93, over Lots 9, 14 and E-1/2 of Lot 13 of John Haile Estates Subdivision varying in width from 106 feet to 216 feet dated 23 February 1962, and recorded in Official Records Book 180, Page 594, together with a drainage easement covering the same lands recorded in Official Records Book 180, Page 596, of the public records of Alachua County, Florida.

Easement from H. C. Edwards and his wife, Susie S. Edwards, to Florida Power Corporation as in Easement recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida, dated 27 December 1962, and recorded in Official Records Book 219, Page 565, of the public records of Alachua County, Florida.

Easement from Donald M. Hough and his wife, Susie Mae Hough, to Florida Power Corporation as in Easement given by H. C. Edwards and his wife, Susie S. Edwards and recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida, dated 3 February 1959, covering Lot 18 of L. L. Dell Estates Subdivision and recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida.

Easement and right-of-way for construction, operation and maintenance of a pole line for transmission and distribution of electricity dated 4 October 1926, and recorded in Deed Book 226, Page 131, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 27 January 1927, and recorded in Deed Book 226, Page 201, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 6 November 1926, and recorded in Deed Book 226, at Page 280, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 2 November 1926, and recorded in Deed Book 226, at Page 281, of the public records of Alachua County, Florida.

Easement to Florida Power Corporation dated 4 March 1963, and recorded in Official Records Book 221, Page 219, of the public records of Alachua County, Florida.

Easement to Florida Power Corporation dated 11 April 1963, and recorded in Official Records Book 227, Page 391, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 29 November 1926, and recorded 25 July 1946, in Deed Book 226, Page 156, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 1 December 1926, and recorded 25 July 1946, in Deed Book 226, Page 222, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 29 November 1926, and recorded 25 July 1946, in Deed Book 226, Page 155, of the public records of Alachua County, Florida.

O.R. BOOK 1466 PAGE 383

Easement to Florida Power Corporation dated 9 October 1959, and recorded in Official Records Book 73, Page 517, of the public records of Alachua County, Florida.

Reservation of an undivided one-half (1/2) interest of all petroleum and petroleum products and title to an undivided three-fourths (3/4) of all other minerals as to the East Half (E-1/2) of the Southeast Quarter (SE-1/4) of the Southeast Quarter (SE-1/4) of Section 24, Township 8 South, Range 18 East, reserved to State of Florida in Deed recorded in Deed Book 320, at Page 186, of the public records of Alachua County, Florida.

Easement to City of Alachua dated 12 March 1974, and filed 16 October 1979, in Official Records Book 1241, Page 113, of the public records of Alachua County, Florida.

Easement condemned by the City of Gainesville in Case Number 82-1735-CA in the Circuit Court of Alachua County, Florida.

An outstanding one-half (1/2) interest in oil, gas and minerals on the East Half (E-1/2) of Lot 16, of L. L. Dell Estates according to plat thereof recorded in Plat Book "A", Page 47, of the public records of Alachua County, Florida.

Easement to City of Alachua dated the 30th day of March 1979, filed for record 12 April 1979, in Official Records Book 1201, at Page 430, of the public records of Alachua County, Florida.

Taxes for the year 1983 and subsequent years.

and said Grantor does hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the Grantor has caused this deed to be executed in its name by its duly authorized officers and its corporate seal to be affixed, the day and year first above written.

NEIGHBORHOOD MEETING NOTIFICATION

PN 21-0191

To: Neighbors of the US 441 / Cellon Creek Boulevard Intersection

From: Ryan Thompson, AICP

Date: 09 September 2021

RE: Neighborhood Meeting Public Notice

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and

2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).

The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

Date: 23 September 2021
Time: 6:00 PM
Location: 11801 Research Drive, Alachua, FL, 32615
Contact: Ryan Thompson, AICP
11801 Research Drive
Alachua, FL 32615
(352) 331-1976
Live@CHW-inc.com

This is not a public hearing. The purpose of the neighborhood meeting is to inform the public about the nature of the proposal and seek their comments.

If you are unable to attend the meeting, please contact CHW using the information above, and we will provide materials after the meeting is held. Comments may also be submitted in writing to the address or email above or by phone at the phone number above.

PUBLIC NOTICE

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and
2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).

The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposals and seek their comments.

Time: 6:00 pm on September 23, 2021
Location: 11801 Research Drive, Alachua, FL, 32615

Contact: Ryan Thompson, AICP
Address: 11801 Research Drive, Alachua, FL, 32615

Museum

Continued from Page 1A

let museum staffers review their work before publication and to adopt "any text changes" the museum proposed as a condition of getting the institution's "consent" to publish.

The rules said the institution was entitled to pursue "legal remedies" if a researcher didn't comply, though the museum says it never did so and is now scrapping the review requirements and legal threat.

Early on, "our paramount concern was the misuse of donated materials to the museum for purposes of misrepresentation" by people trying to prove conspiracy theories about the 9/11 terror attacks, museum Executive Vice President Clifford Chanin said.

"We've learned from our experience," he said.

Archives, museums and their donors vary in what they ask of researchers, but experts say the 9/11 museum's rules seemed unusually onerous.

"I've never seen anything quite like that," said Stephanie Brown, who teaches museum studies at Johns Hopkins University and has been a museum director, curator and archivist. She said the policy could prompt scholars to look elsewhere for material: "It just feels very micro-managing."

Indeed, at least two researchers have balked at the rules in the last few years,

Archives, museums and their donors vary in what they ask of researchers, but experts say the National Sept. 11 Memorial & Museum's rules seemed unusually onerous. MARY ALTAFFER/AP, FILE

said Chanin, who said the museum agreed to the interviews anyway and began reconsidering the policy after the latest scholarly objection came this summer.

Williams College sociology professor Christina Simko inquired in July about interviewing staffers for a project on terrorism-related museums. She says she was willing to share an eventual draft for feedback but wouldn't give the museum the authority essentially to edit her work.

"I was especially surprised that an institution of national memory would maintain that, because freedom of speech is a core democratic value," said Simko, who said she's pleased the museum quickly reconsidered.

Meanwhile, an attorney for two filmmakers who gave a trove of 9/11-related video to the museum – but later made a critical documentary about it – accused it in an Aug. 13 letter of "restricting free historic research, exploration and use."

"We don't think there should be any restrictions on what people publish," filmmaker Steven Rosenbaum said.

He and his wife and co-director, Pamela Yoder, tangled with the museum this year over its objections to their documentary, "The Outsider." While the museum's review of their film was negotiated separately from the research rules, Rosenbaum argues that both show the institution wants "to control the story" of 9/11.

"There's a fact pattern here that's really troubling," he said, for "the place where America remembers this story and investigates it."

The museum's top lawyer criticized Rosenbaum and Yoder in an Aug. 27 letter for their own restrictions on the donated video: They collect licensing fees from anyone else seeking to use the footage in films or other work. Rosenbaum says that's "beyond irrelevant" and there's no comparison between a small film company and a nonprofit museum's archives.

The Sept. 11 museum has the complex responsibility of serving as a memorial and a place for education and research about an event with living survivors. Still, some other institutions with similar missions don't ask as much of scholars.

The Oklahoma City National Memorial & Museum's website calls for researchers to submit summaries of their projects and where they plan to publish, but not for a review in advance. Nor does the U.S. Holocaust Memorial Museum in Washington, where the website simply asks applicants the purpose of their research, such as coursework, a book or genealogy.

"Access should be available as unencumbered as humanly possible," says Michael Berenbaum, an American Jewish University professor of Jewish studies who oversaw the creation of the Holocaust museum. He favors "maximum openness, minimum restrictions, even if it means sensitive material."

The Sept. 11 museum began fielding research requests long before its 2014 opening, said Chanin, who has been involved since 2005. He couldn't specify when the scholarly research rules took effect but said they were an effort to "systematize" the institution's dealings with researchers seeking access to materials or interviews with staffers.

The museum has asked researchers to see their work before publication but has never insisted on it, tried to block publication or taken legal action, Chanin said. Few scholarly requests, if any, ended up raising alarms about "misuse" or misquoting, he added.

Deciding the policy "is something we need to move on from," museum leaders have taken it off the website and plan soon to draft a new one, Chanin said.

He expects it will distinguish between scholarly requests for interviews and materials.

TODAY IN HISTORY

Today is Thursday, Sept. 9, the 252nd day of 2021. There are 113 days left in the year.

On this date:

1776: The second Continental Congress made the term "United States" official, replacing "United Colonies."

1850: California became the 31st state of the union.

1893: Frances Cleveland, wife of President Grover Cleveland, gave birth to a daughter, Esther, in the White House; it was the first (and, to date, only) time a president's child was born in the executive mansion.

1919: Some 1,100 members of Boston's 1,500-man police force went on strike. (The strike was broken by Massachusetts Gov. Calvin Coolidge with replacement officers.)

1932: The steamboat Observation exploded in New York's East River, killing 72 people.

1948: The People's Democratic Republic of Korea (North Korea) was declared.

1956: Elvis Presley made the first of three appearances on "The Ed Sullivan Show."

1957: President Dwight D. Eisenhower signed the first civil rights bill to pass Congress since Reconstruction, a measure primarily concerned with protecting voting rights and which also established a Civil Rights Division in the U.S. Department of Justice.

1960: In the first regular-season American Football League game, the Denver Broncos defeated the Boston Patriots, 13-10.

1971: Prisoners seized control of the maximum-security Attica Correctional Facility near Buffalo, New York, beginning a siege that claimed 43 lives.

1991: Boxer Mike Tyson was indicted in Indianapolis on a charge of raping Desiree Washington, a beauty pageant contestant. (Tyson was convicted and ended up serving three years of a six-year prison sentence.)

2005: Federal Emergency Management Agency Director Michael Brown, the principal target of harsh criticism of the Bush administration's response to Hurricane Katrina, was relieved of his onsite command.

SUN PHOTO REPRINTS: To request a copy of a photo shot by a Sun photographer, send an email to news@gainesville.com. Include the date of publication and other identifying information. Photos are not to be republished in print or online.

The Gainesville Sun (ISSN 0163-4925) is published daily by the Gainesville Sun, 2700 SW 13th St. Gainesville, FL 32608. Periodicals postage paid at Gainesville, FL 32608.

POSTMASTER: Send address changes to The Gainesville Sun, 2700 SW 13th Street, Gainesville, Florida 32608.

All material herein is the property of The Gainesville Sun. Reproduction in whole or in part is forbidden without the written permission of the publisher.

Print delivery available within the newspaper distribution area only. By submitting your address and/or email, you understand that you may receive promotional offers from Gannett and its related companies. You may unsubscribe from receiving any such email offers at any time by clicking on the unsubscribe link in any of the emails you may receive. Payment collected will be applied first to any previous outstanding balance. Prices include applicable sales tax. The advertised price does not include the charges for any premium editions. Premium editions are published to provide additional information and value to our readers. You agree that you will be charged up to an additional $9.00 for each premium edition published and delivered to you during your subscription period, in addition to the cost of your subscription. The length of your subscription will be shortened by the publication of premium editions if those premium editions are delivered to you during your subscription. As an illustrative example, if you select a subscription of up to 12 weeks at a cost of $48.00, and two premium editions at $2.00 each are published and delivered to you during that subscription period, your subscription will be shortened by 1 week because the weekly cost of the subscription is $4.00 per week and the premium edition charges total $4.00. Depending upon the length of your subscription and the timing of the publication and delivery of premium editions, you will not be charged for any premium editions if none are published and delivered to you during your subscription. As such, in that case only, the length of your subscription will not be shortened. The timing of the publication and delivery of premium editions is variable. There will be no more than 2 premium editions published each month during the subscription term. Print subscribers may suspend print delivery during vacation periods. For vacation periods less than 14 consecutive days billing continues and subscriber maintains access to the digital portion of subscription. Credit days will be issued for any days in excess of the first 14 days.

Subscribers also have the option to have print copies held as Vacation Pack or may donate the newspaper value to our Newspaper in Education (NIE) program. If you sign up for our Eppay program, your subscription will automatically be charged to your credit card 0 to 14 days prior to your current expiration date, for the duration of your subscription or until you notify us otherwise. For more information or to cancel your subscription please call 1-352-378-1416.

Large-Scale Comprehensive Plan Amendment (LsCPA) & Rezoning Applications

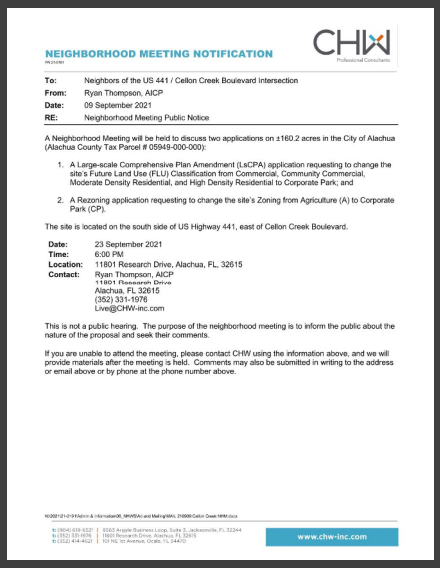
CHW Professional Consultants

City of Alachua
Neighborhood Meeting
September 23, 2021

1

The purpose of the neighborhood meeting:

The City of Alachua requires LsCPA and Rezoning applicants to host a neighborhood meeting *prior* to application submittal.



The purpose is to inform neighbors of the proposed action's nature and to get feedback early in the process.

This meeting provides the applicant with an opportunity to identify concerns prior to the application's submission.

2

PUBLIC NOTIFICATION

PUBLIC NOTICE

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and
2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).

The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposals and seek their comments.

Time: 6:00 pm on September 23, 2021
Location: 11801 Research Drive, Alachua, FL, 32615

Contact: Ryan Thompson, AICP
Address: 11801 Research Drive, Alachua, FL, 32615
Phone Number: (352) 331-1976
Email: Live@CHW-inc.com

21-0191: Cellon Creek LsCPA & Rezoning

3

REQUESTS:

- LsCPA Application
  - *FROM*: **Commercial, Community Commercial, Moderate Density Residential**, and **High Density Residential**
  - *TO*: **Corporate Park**
- Rezoning Application
  - *FROM*: **Agriculture (A)**
  - *TO*: **Corporate Park (CP)**

21-0191: Cellon Creek LsCPA & Rezoning

4

INTENT:

Develop a mixed-use project with residential and non-residential uses

OPPORTUNITIES:

- Expand City of Alachua employment opportunities;
- Enable new Alachua businesses to grow, develop, and succeed;
- Expand City of Alachua's housing options; and
- Facilitate property's highest & best use

Place:	CHW Office – 11801 Research Drive, Alachua, FL, 32615
Re:	Large-scale Comprehensive Plan Amendment (LsCPA) and Rezoning Applications

CHW (Agent) Attendees: Gerry Dedenbach, AICP; Seth Wood; Olivia Lee
Public Attendees: 1

CHW, on behalf of San Felasco Research Ventures, LLC, hosted the required Neighborhood Meeting and presented the following: the meeting's purpose; the applications' requests and intents; the opportunities presented by the applications; the general application review process and estimated project timeline; and maps illustrating the site's regulatory and physical characteristics. Questions and comments from public attendees are described below, with agent responses.

Comment: San Felasco Hammock Preserve State Park is managed with controlled burns. The location of residential development on the project site, or the location of certain service-oriented commercial development, may impact the prescribed burn program.
Response: The project site is part of a larger master plan, which includes multiple developments along the San Felasco Parkway. The applicant is communicating with the San Felasco Hammock Preserve park manager on these developments, and hopes to continue this relationship when development programming begins for the project site. This matter can be discussed. These concerns will be taken into consideration when a development program is underway.

Comment: There are currently drainage easements on the project site that allow drainage into San Felasco Hammock Preserve State Park. Specifically, the drainage flows into Cellon Creek, which is classified as an Outstanding Florida Water (OFW). Because of this, stormwater drainage from development is a concern for the Preserve.
Response: All required stormwater quality and quantity attenuation regulations will be adhered to in development of the property. An intention of this project is to design and develop the property in a way that respects the surrounding natural areas, rather than in a way that works in opposition to them.

Comment: LiDAR data indicates a likely sinkhole on the property. Onsite soils and topography would cause water from this sinkhole to flow into the Santa Fe River and ultimately into the Floridan aquifer.
Response: All pertinent requirements regarding development and sinkholes will be adhered to in development of the property. An intention of this project is to design and develop the property in a way that respects the surrounding natural areas, rather than in a way that works in opposition to them.

Question: When is development of the site anticipated?
Response: This project site is part of a larger master planned project, which includes land along the San Felasco Parkway. That land is being developed with four separate development plans—two of which having been submitted prior to this September 23rd meeting. Once that area's development program is underway, focus will shift to the project site. That is anticipated to occur approximately in 2024 or 2025.

The meeting was adjourned at approximately 7:00 p.m.

1. Executive Summary

To: Kathy Winburn, AICP, City of Alachua Planning & Community Dev. Director
From: Seth Wood, Project Planner, CHW
Date: ~~September 30, 2021~~ November 4, 2021
Re: Cellon Creek – Large-scale Comprehensive Plan Amendment (LsCPA) Application

Jurisdiction: City of Alachua	**Intent of Application:** To appropriately entitle the project site for the creation of a mixed-use development
Description of Location: 13270 block of US Highway 441	
Parcel Number: 05949-000-000	**Acres:** ±160.2 acres (ac) *(Source: Alachua County Property Appraiser)*
Existing Future Land Use (FLU) Classification: *Commercial* The Commercial land use category provides for general commercial uses. This is a land use category where large-scale, regional commercial uses may locate. *Community Commercial* The Community Commercial land use category provides for neighborhood- and community-scale goods and services, adjacent to residential areas. *High Density Residential (8-15 du/ac)* The High Density Residential land use category provides for residential development up to 15 dwelling units per acre, as well as complementary nonresidential uses. *Moderate Density Residential (0-4 du/ac)* The Moderate Density Residential land use category provides for residential development up to 4 dwelling units per acre.	**Proposed FLU Classification:** *Corporate Park* The Corporate Park land use category is the City's mixed-use land use category. It is intended to provide for a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. This land use category is meant to provide an appropriate location for mixed-use, office-oriented development, and foster growth of established industries within the City.
Existing Zoning District: *A: Agriculture (0.2 du/ac)* The A district is intended to provide for areas primarily consisting of agriculture uses and agriculture support uses and also allow low-density single-family residential development. The maximum residential density allowed in the district is one dwelling unit per five acres, except that homesteaded lots may be developed at one unit per two acres.	**Proposed Zoning District:** *CP: Corporate Park (4 du/ac)* The CP District is established and intended to accommodate a range of research and development, technology and life sciences/biotechnology industries, office, and supporting retail. Complementary residential uses may also be permitted within the CP District as set forth in Subsection 3.5.2(F)(2). By allowing a range of permitted uses, the CP District is intended to accommodate the

1. Executive Summary

Residential cluster development is encouraged through the use of the Conservation Subdivision option.	development of "flex space" arrangements. Flex space allows a developer to establish different combinations of uses on a site over time.
Existing Max. Permitted Density/Intensity: Density: High Density Residential: ±15 ac * 15 du/ac = ±225 dwelling units Moderate Density Residential: ±96 ac * 4 du/ac = ±384 dwelling units Total: ±609 dwelling units Intensity: Commercial: ±27.6 ac * 0.5 FAR = ±601,128 square feet Community Commercial: ±21.6 ac * 0.5 FAR = ±470,448 square feet Total: ±1,071,576 square feet	**Proposed Max. Permitted Density/Intensity*:** Density: ±160.2 ac * 4 du/ac = ±640 dwelling units Intensity: ±160.2 ac * 0.5 FAR = ±3,489,156 square feet
Net Change This LsCPA application may allow up to ±31 additional *gross* dwelling units and up to ±2,417,580 additional *gross* square feet of nonresidential use compared to what is currently allowed by the existing land use classifications upon the property.	

2. STATEMENT OF PROPOSED CHANGE

This Large-scale Comprehensive Plan Amendment (LsCPA) application requests to amend the City of Alachua Future Land Use (FLU) Map on Alachua County tax parcel 05949-000-000 from Commercial, Community Commercial, High Density Residential, and Moderate Density Residential to Corporate Park. The subject parcel is located along US 441, southeast of Cellon Creek Boulevard. An aerial is provided as **Figure 1** that shows the site's exact location and conditions.

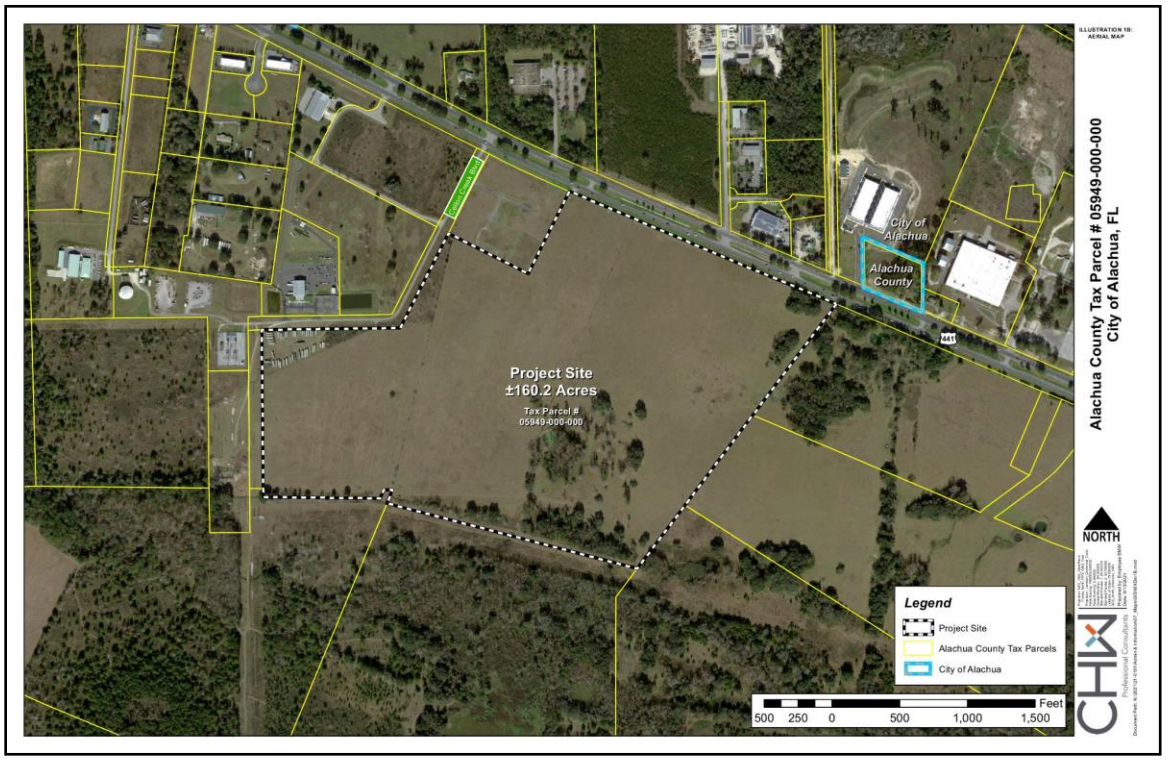

Figure 1: Aerial Map

This application is submitted concurrently with a rezoning application, requesting to change the site's zoning district from Agricultural (A) to Corporate Park (CP). The intent of this request is to appropriately entitle the project site for the creation of a mixed-use project that will provide a variety of opportunities for businesses in a range of disciplines to thrive, as well as complimentary residential development.

Existing FLU and Zoning designations of adjacent parcels are identified in **Table 1** and illustrated in **Figures 2** and **4**. The proposed FLU classification is illustrated in **Figure 3.** The proposed Zoning District is illustrated in **Figure 5.**

Table 1: Surrounding Future Land Use and Zoning Designations

Direction	Future Land Use Designation	Zoning Designation
North	US 441 ROW; Industrial	US 441 ROW; Industrial Light and Warehousing (ILW)
East	Commercial; Moderate Density Residential; Conservation	Commercial, Intensive (CI); Planned Development-Residential (PD-R)
South	Conservation	Conservation (CSV)

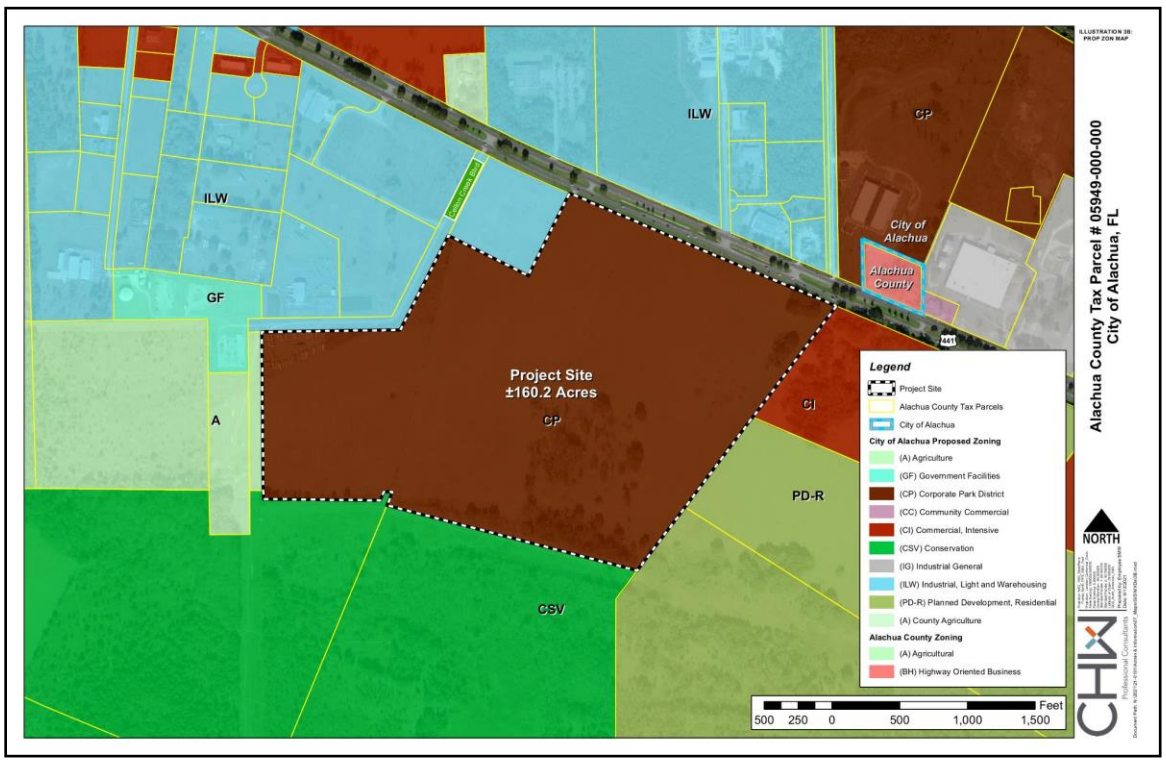

Figure 5: Proposed Zoning Map

3. CONCURRENCY ANALYSIS

This application requests to change the ±160.2-acre site's FLU classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park District. Approval of this application will change the site's maximum permitted density and intensity.

Existing maximum density and intensity, proposed maximum density and intensity, and a realistic expectation of density and intensity for the project site are as follows:

Table 2. Existing and Proposed Maximum Density and Intensity Comparison

Existing Maximum Permitted Density[1] *High Density Residential; Moderate Density Residential*	**Proposed Maximum Permitted Density** *Corporate Park*	**Realistic Expectation of Density[2]** *Corporate Park*
High Density Residential: ±15 ac * 15 du/ac = ±225 dwelling units Moderate Density Residential: ±96 ac * 4 du/ac = ±384 dwelling units Total: **±609 dwelling units**	±160.2 ac * 4 du/ac = **±640 dwelling units**	±160.2 ac * 4 du/ac = **±640 dwelling units**
Existing Maximum Permitted Intensity[1] *Commercial; Community Commercial*	**Proposed Maximum Permitted Intensity** *Corporate Park*	**Realistic Expectation of Intensity[2]** *Corporate Park*
Commercial: ±27.6 ac * 0.5 FAR = ±601,128 square feet Community Commercial: ±21.6 ac * 0.5 FAR = ±470,448 square feet Total: **±1,071,576 square feet**	±160.2 ac * 0.5 FAR = **±3,489,156 square feet**	±40.05 ac * 0.5 FAR = **±872,289 square feet**
Net Change This LsCPA application may allow up to ±31 additional *gross* dwelling units and up to ±2,417,580 additional *gross* square feet of nonresidential use compared to what is currently allowed by the existing land use classifications upon the property. *While this increase in dwelling units and nonresidential square footage may be allowed by the requested FLU classification, such increases are not anticipated to be realized in development of the project site.*		

1. *To calculate maximum permitted density and intensity permitted with existing FLU classifications, approximate acreages were determined based on the City of Alachua Future Land Use map. Residential FLU classification acreage was used for density calculations, and nonresidential FLU classification acreage was used for intensity calculations.*
2. *To calculate the realistic expectation for development of the site, density calculation was based on the entire gross acreage of the project site, and intensity calculation was based on an assumption that 25% of the project site will be devoted to nonresidential uses.*

While the following section reflects the maximum theoretical density and intensity *possible* under the requested FLU classification, *the figures utilized for the sake of theoretical analysis*

are unlikely to be achieved in subsequent development of the property. Factors such as roadways, setbacks, buffers, and other components necessary within developments of this size must be taken into account when development occurs. The impact of market forces on development must also be considered, as well as the influence of community character. These factors will greatly reduce actual yield in development of the site.

Trip generation figures are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition. Data for subsequent tables are from the City of Alachua June 2021 Development Monitoring Report, as well as data obtained within the City Comprehensive Plan and Florida Administrative Code (FAC).

Roadways / Transportation

Net Total Difference (Proposed – Existing)			11,247	1,508	1,592	-84	-73	-955	882

Source: ITE Trip Generation 10th Edition

1. *The ITE Trip Generation Manual does not provide pass-by rates for daily and AM peaks, therefore the PM rate of 34% is used for all scenarios.*
2. *The average rate was used as opposed to the fitted curve equation, under all scenarios of the Research and Development land use, since the proposed land use is outside of the ITE trip generation study area.*
3. *Per the advisement of City staff in the October 21, 2021, Project Assistance Team (PAT) Meeting for this application, only the 0.5 FAR intensity was used to calculate the maximum potential trips generated.*

Conclusion: Approval of this LsCPA application results in a potential for the number of trips generated by the proposed FLU classification to be larger than the number of trips generated by the existing FLU classifications.

Per City of Alachua Land Development Regulations §2.4.14.(H)(2)(b), affected roadway segments for developments generating more than 1,000 external Average Daily Trips (ADT) are those on which the development's potential impacts are 5% or greater of the Maximum Service Volume (MSV) of the roadway, as well as all roadway segments located partially or wholly within one-half mile of the developments ingress/egress. Based on this, affected roadway segments were determined to be Segment 3, Segment 4, Segment 5, Segment 6, Segment 8, Segment 9, Segment 11, Segment 13, Segment 14, and Segment 15. **Tables 4** calculates projected impacts on these roadway segments.

Table 4: Projected Impacts on Affected Roadway Segments

Traffic System Category	Segment 3		Segment 4		Segment 5		Segment 6		Segment 8		Segment 9		Segment 11		Segment 13		Segment 14		Segment 15	
	US 441		US 441		US 441		US 441		SR 235		SR 235		CR 235		CR 241		CR 2054 West		CR 2054 East	
	From MPO Boundary to CR 25A East Intersection		From CR 25A East Intersection to SR 235		From SR 235 to I-75		From I-75 to CR 235A		From NW 143rd Place to US 441		From US 441 to NW 140th Street		From NW 143rd Place to South City Limit		From CR 235 to South City Limit		From SR 235 to West City Limit		From SR 235 to US 441	
	AADT	PM	AADT	PM	AADT	PM	AADT	PM	AADT	PM	AADT	PM	AADT	PM	AADT	PM	AADT	PM	AADT	PM
Maximum Service Volume[1]	43,000	3,870	45,700	4,110	39,000	3,510	39,000	3,510	14,400	1,290	1,440	1,290	15,120	1,359	20,880	1,881	15,120	1,359	15,120	1,359
Existing Traffic[1]	23,536	2,118	20,435	1,941	24,204	2,299	30,111	2,861	10,180	967	8,054	765	5,672	539	6,025	572	2,930	278	3,425	325
Reserved Trips[1]	2,317	196	5,375	509	3,430	309	3,197	293	157	41	167	21	79	13	0	0	0	0	2,157	158
Available Capacity[1]	17,147	1,556	19,890	1,660	11,366	902	5,692	356	4,063	282	6,179	504	9,369	807	14,855	1,309	12,190	1,081	9,538	876
Projected Trip Generation[2]	18,317	1,289	36,633	2,577	7,327	515	3,663	258	1,832	129	1,832	129	1,832	129	3,663	258	1,832	129	3,663	258
Residual Capacity with Application Approval	**-1,170**	**268**	**-16,743**	**-917**	**4,039**	**387**	**2,029**	**98**	**2,231**	**153**	**4,347**	**375**	**7,537**	**678**	**11,192**	**1,051**	**10,358**	**952**	**5,875**	**618**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Projected trip distribution percentage is estimated to be 50% for Segment 3; 100% for Segment 4; 20% for Segment 5; 10% for Segment 6; 5% for Segment 8; 5% for Segment 9; 5% for Segment 11; 10% for Segment 13; 5% for Segment 14; and 10% for Segment 15.*

Conclusion: When assessing the maximum theoretical development potential upon affected roadway segments, the vast majority of segments are projected to maintain residual capacity. The residual capacity of two segments—Segment 3 and Segment 4—is shown to be deficient in Table 4, indicating that, were the project site to be developed at its maximum theoretical development potential, the number of trips generated has the potential to exceed the residual capacity of the roadway segments listed in the June 2021 Development Monitoring Report. *In reality, development of this type will produce fewer trips than the maximum theoretical amount, due to factors such as roadways, setbacks, buffers, and other components necessary for the development, as well as the influence of market forces and community character*. In addition, because this project represents a multi-year implementation, it is envisioned additional transportation options will emerge during the project's lifetime.

Potable Water / Sanitary Sewer / Solid Waste

Potable water, sanitary sewer, and solid waste calculations are based on the site's **maximum** theoretical development potential. Per the advisement of City staff in the October 21, 2021, Project Assistance Team (PAT) Meeting for this application, maximum development potential was determined using a calculation of 0.5 FAR for the entire project site.

Table 5: Projected Potable Water Impacts

System Category	Gallons Per Day (GPD)
Current Permitted Capacity[1]	2,300,000
Less actual Potable Water Flows[1]	1,300,250
Reserved Capacity[1]	156,701
Residual Capacity[1]	843,049
Percentage of Permitted Design Capacity Utilized[1]	63.35%
Projected Potable Water Demand from Proposed Project[2]	523,373.4
Residual Capacity after Proposed Project	**319,675.6**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: Chapter 64-E, F.A.C.*
    a. *Formula used: 3,489,156 sq. ft. * 15 gallons per 100 sq. ft. of floor space = 523,373.4 sq. ft.*

Conclusion: The project site will be served by existing City of Alachua potable water infrastructure. The maximum possible allowable impacts from approval of this application will not exceed capacity of the City's adopted LOS for potable water.

For the sake of conducting concurrency calculations with the maximum theoretical development potential of the site, the highest possible intensity for the project site was utilized in this projected impact determination. In reality, these numbers are unlikely to be achieved or desired in development of the site, and the realistic impacts on potable water infrastructure will be lower.

Table 6: Projected Sanitary Sewer Impacts

System Category	Gallons Per Day (GPD)
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less actual Treatment Plant Flows[1]	677,000
Reserved Capacity[1]	137,740
Residual Capacity[1]	685,260
Percentage of Permitted Design Capacity Utilized[1]	54.32%
Projected Sanitary Sewer Demand from Proposed Project[2]	523,373.4
Residual Capacity after Proposed Project	**161,886.6**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: Chapter 64-E, F.A.C.*
    a. *Formula used: 3,489,156 sq. ft. * 15 gallons per 100 sq. ft. of floor space = 523,373.4 sq. ft.*

Conclusion: The project site will be served by existing City of Alachua wastewater infrastructure. The potential impacts from approval of this application *will not* exceed capacity of the City's adopted LOS for sanitary sewer.

For the sake of conducting concurrency calculations with the maximum theoretical development potential of the site, the highest possible intensity for the project site was utilized in this projected impact determination. In reality, these numbers are unlikely to be achieved or desired in development of the site, and the realistic impacts on potable water infrastructure will be lower.

Table 7: Projected Solid Waste Impacts

System Category	LBs Per Day	Tons Per Year
Existing Demand[1]	41,880.00	7,643.10
Reserved Capacity[1]	17,139.34	3,127.93
New River Solid Waste Facility Capacity[1]	50 years	
Solid Waste Generated By Proposed Project[2]		**7,641.25**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996.*
   a. *Formula used: (((12 lbs. / 1,000 ft²/day * 3,489,156 sq. ft.) * 365)/2,000) = 7,641.25*

Conclusion: Solid waste facility capacity exists to adequately serve development of the subject property. Thus, the potential impacts from approval of this application will not negatively impact the City's adopted LOS for this system.

For the sake of conducting concurrency calculations with the maximum theoretical development potential of the site, the highest possible intensity for the project site was utilized in this projected impact determination. In reality, these numbers are unlikely to be achieved or desired in development of the site, and the realistic impacts on potable water infrastructure will be lower.

Public School and Recreation Impact

The City of Alachua requires all LsCPA applications involving residential developments to include an estimated Public School Generation analysis. This is conducted by completing the City's Public School Student Generation Calculation Form. A completed copy of this form has been included within this application's submittal. The development's estimated impact on the City's Public School System is found in **Table 9**.

Table 8: Projected Public School Demand

Land Use	Units[1]	Elem.		Middle		High	
		Rate[2]	Total	Rate[2]	Total	Rate[2]	Total
Single-Family Residential	320	0.15	**48**	0.07	**23**	0.09	**29**
Multi-family Residential	320	0.09	**29**	0.03	**10**	0.03	**10**
Total	**640**	-	**77**	-	**33**	-	**39**

1. *Units for proposed land use calculated based on gross acreage of project site. This calculation assumes 50% of gross density devoted to single-family residential use and 50% of gross density devoted to multi-family residential use.*
2. *Source: City of Alachua June 2021 Development Monitoring Report*

Conclusion: The potential impacts from approval of this application *will not* negatively impact the Public School System.

Table 9: Recreational Impacts

System Category	Acreage
Existing City of Alachua Acreage[1]	135.48
Acreage Required to Serve Existing Population[1]	52.35
Reserved Capacity[1]	2.2
Available Recreation Acerage[1]	80.93
Proposed Recreational Impact[2]	8.32
Residual Recreational Capacity After Proposed Development	**72.61**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: 640 units * 2.6 persons per du * (5 acres/1,000 persons)*

Conclusion: The City of Alachua and surrounding areas currently possess considerable acreage for local recreation activities. Thus, the intended mixed-use development is expected to have a minimal impact on the City's current recreational infrastructure.

4. CONSISTENCY WITH CITY OF ALACHUA COMPREHENSIVE PLAN

This section identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this application is consistent with each. Text from the City of Alachua is provided in normal font while consistency statements are provided in **bold**.

FUTURE LAND USE ELEMENT

Objective 1.4: Corporate Park

The City shall establish one mixed-use land use category: Corporate Park. This land use category shall provide a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. The Corporate Park category is intended to:

1. provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology, with provisions for a variety of residential uses; and

The project site location, in close proximity to Progress Park, Convergence Research Park, San Felasco Tech City, and other nonresidential as well as residential developments, is an appropriate location for the intended mixed-use development. This LsCPA, as well as the associated rezoning request to Corporate Park, would appropriately entitle the project site to meet the area's development patterns, foster the growth of the City of Alachua's industries, expand employment opportunities, and address the City of Alachua's growing housing need proactively.

2. Provide a variety of employment opportunities to the citizens of Alachua and the North Central Florida Region.

The development made possible by the LsCPA, and its associated rezoning, will vastly expand the types of nonresidential uses permitted on the property, thus expanding employment opportunities to the citizens of Alachua and the North Central Florida Region.

Policy 1.4.a: The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential, live-work units, building industry uses, and accessory storage facilities (including outdoor storage yards) either as allowed uses or with a special exception permit. Such uses shall be developed in a manner compatible with surrounding land uses, and to minimize potential nuisances or damage to the environment.

The development made possible by this LsCPA will include a mixture of nonresidential and residential uses. The site will be developed in a manner compatible with its neighbors in scale, massing, density, and intensity. One such example is San Felasco Tech City to the north, across US 441.

Policy 1.4.b Development within the Corporate Park land use category should be designed in a campus-like or "corporate park" setting with generous, linked open space to maximize value and to promote visual quality and compatibility with the surrounding area. Pedestrian-friendly features, such as buildings placed near the street, sidewalks, and trails leading to nearby uses, such as retail and housing, is encouraged.

Development on the project site, made possible by the requested LsCPA and rezoning, will be designed to work with nature, offering open space, pedestrian friendly features, and connections between uses. Development will be compatible with other surrounding developments, including the higher-intensity uses along US 441 and the moderate-density residential uses nearby. Development of the site will also work to be visually and environmentally compatible with the San Felasco Hammock Preserve State Park, with adequate consideration of the impacts of development on preservation and management efforts of the Preserve.

Policy 1.4.c: Non-residential Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio (F.A.R.) for parcels 5 acres or greater, 0.75 F.A.R. for parcels less than 5 acres but greater than 1 acre, and 1.0 F.A.R. for parcels 1 acre or less.

Development of the project site will adhere to the 0.50 FAR maximum standard. This is taken into consideration in Section 3 of this report.

Policy 1.4.d: Development within the Corporate Park land use category that consists of greater than 50 acres of contiguous land may provide clustered residential development. Residential uses within the Corporate Park land use category shall be limited to a gross density of 4 dwelling units per gross acre. Residential development must be developed consistent with the specific criteria identified within the Land Development Regulations for residential development in the Corporate Park zoning district.

Residential development of the project site will adhere to the gross density limit of 4 dwelling units per gross acre and be developed in a manner consistent with the specific criteria of the city's Land Development Regulations.

Policy 1.4.e: Corporate Park uses shall be located and designed in such a manner as to prevent undesirable impacts to adjacent properties.

1. The Corporate Park land use category may include material distribution facilities and manufacturing facilities subject to the following standards and maximums:

Type of Use	Max. Area: Manufacturing Area/Storage	Maximum Building Size	Maximum Building Area Coverage
Regional Warehouse	None permitted	100,000 sq. ft.	50%
Manufacturing/assembly	75% of total area	100,000 sq. ft.	40%

2. The Corporate Park land use category may include flex facilities subject to the following standards and maximums:

Type of Flex	Maximum Building Size	Max. Area: Manufacturing	Maximum Area: Warehousing	Maximum Building Area Coverage
Research and Development	150,000 sq. ft.	75% of total area	75% of total area	50%
Office Showroom	150,000 sq. ft.	None permitted	60% warehousing / 20% retail showroom	50%
Multitenant	120,000 sq. ft.	None permitted	60% retail / 40% warehousing	50%

If development on the property subsequent to this application approval includes the uses described by this policy, it will adhere to these standards.

Policy 1.4.f: The City shall develop performance standards for uses in the Corporate Park land use category in order to address the following:

1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
2. Buffering from adjacent existing/potential uses and use of landscaping to create an integrated design;
3. Open space provisions and balance of proportion between gross floor area and site size;
4. Adequacy of pervious surface area in terms of drainage requirements;
5. Placement of signage;
6. Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;
7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout and drive aisles, and points of conflict;
8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;
9. Unique site features and resources which may constrain site development, such as soils, existing vegetation and historic significance;
10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design;
11. Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less; and,
12. Complementary residential uses.

The development that will be made possible by the requested LsCPA will adhere to all performance standards for the Corporate Park FLU classification. The end result will

exemplify the Corporate Park FLU classification, with a mixed-use development that offers integrated, safe access and mobility for multiple travel modes; generous open space; and adequate buffering for its neighbors.

Objective 2.4: Landscaping and Tree Protection Standards
The City shall adopt landscaping and tree protection standards in order to achieve the aesthetic design values of the community and preserve tree canopies, as well as to protect exceptional specimens and champion trees.

Any development on the project site occurring subsequent to these applications' approval will adhere to the policies within this objective.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications for an amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.317(6)(a)9.a. and b., Florida Statutes, respectively.

The Corporate Park FLU is the City of Alachua's mixed use land use category, focused on employment-based development. It allows a range of uses that may be co-located; a moderate density of up to 4 dwelling units per acre, achievable in a variety of residential forms; as well as a moderate intensity of up to 0.5 FAR. The FLU category is designed to discourage the proliferation of urban sprawl.

Chapter 163.317(6)(a)9.a. and b., Florida Statutes, is addressed in detail in Section 5 of this justification report.

Objective 4.1: Infill development shall be encouraged in order to protect the unique character of existing neighborhoods and commercial developments, provide for a safe urban environment, increase densities and intensities in a manner compatible with existing uses, provide open spaces, and restore or maintain economic vitality and cultural diversity.

The project site for this application will be infill development. The property, currently vacant land, sits in a central location on US 441, designated as the City of Alachua's Corporate Corridor. It is surrounded by various local, regional, and national nonresidential uses along the corridor, including but not limited to Phoenix Commercial Park, Novabone, Southern Custom, Helena Chemical, and San Felasco Tech City. Development of the site, made possible through the requested LsCPA and zoning change, will facilitate development of the site, filling in this gap along the Corporate Corridor. Furthermore, the Corporate Park FLU and zoning specifically will allow development of the site with a mixture of uses complementary to the area—both commercial and service uses that contribute to the City's various industries, and complementary residential uses that will place more City residents proximate to retail, service, and job opportunities.

The unique character of surrounding neighborhoods will be protected in the process, and the developments resulting from this LsCPA will be complementary to existing surrounding commercial developments. The resulting development will provide a safe, mixed-use environment for both residents and those that come to the site for work opportunities.

The requested LsCPA will also enhance economic vitality and cultural diversity by expanding what is possible for the property; expanding employment opportunities within

the City of Alachua; expanding housing opportunity in the City of Alachua; and creating a space for new businesses to thrive.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

There are wetlands on the project site, and certain portions of the site are within FEMA floodplain. These natural features will be protected from development in accordance with all relevant regulations. The topography and soils onsite are suitable to mixed-use development.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Development that occurs onsite will include techniques to minimize negative impacts on the natural terrain. The project site generally slopes south/southwest, away from US 441; this natural function will be retained to the maximum extent practicable.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently eight (8) types of soils located onsite:

- **Arredondo Fine Sand, 0 t 5 Percent Slopes (Hydro. Group A)**
- **Fort Meade Fine Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Pomona Sand, 0 to 2 Percent Slopes (Hydro. Group A/D)**
- **Lochloosa Fine Sand, 2 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 5 to 8 Percent Slopes (Hydro. Group A)**
- **Lochloosa Fine Sand, 5 to 8 Percent Slopes (Hydro. Group B)**
- **Blichton Sand, 2 to 5 Percent Slopes (Hydro. Group C/D)**

Soils types will be considered as necessary during the course of site design and development.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

FEMA Flood Zone Areas are identified in the map set included with this submittal package. All pertinent requirements for development in flood prone areas will be adhered to in development of the site, subsequent to the requested Future Land Use amendment.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements in development.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

There are no known listed wildlife or plant species onsite. When development plans are submitted for the project site, a survey will be included per this policy requirement.

Objective 5.2: Availability of facilities and services: The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

Section 3 of this report demonstrates the impacts that a maximum theoretical development scenario would have on available facilities and services. As explained in Section 3, no facilities and/or services will operate below the adopted level of service in a realistic development scenario.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools, and improved recreation in accordance with LOS standards adopted in the elements addressing these facilities.

Section 3 demonstrates how the proposed plan for the project site will impact City of Alachua facilities and adopted level of service.

Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Ch. 163, Florida Statutes, development agreement has commenced.

A certification of level of service compliance shall be issued during development plan review, following the approval of this application.

CONSERVATION AND OPEN SPACE ELEMENT

Objective 1.5: Soils. The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

There are currently eight (8) types of soils located onsite:

- **Arredondo Fine Sand, 0 t 5 Percent Slopes (Hydro. Group A)**
- **Fort Meade Fine Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Pomona Sand, 0 to 2 Percent Slopes (Hydro. Group A/D)**

- **Lochloosa Fine Sand, 2 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 5 to 8 Percent Slopes (Hydro. Group A)**
- **Lochloosa Fine Sand, 5 to 8 Percent Slopes (Hydro. Group B)**
- **Blichton Sand, 2 to 5 Percent Slopes (Hydro. Group C/D)**

Soils types will be considered as necessary during the course of site design and development.

Objective 1.10: Wetlands. The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Any wetlands found onsite will be adequately protected in development of the project site.

HOUSING ELEMENT

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes, and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

The Corporate Park (CP) zoning district, which implements the requested Corporate Park FLU classification, permits a wide variety of housing types, including cottage neighborhoods, live/work dwellings, multifamily dwellings, single-family detached and attached dwellings, townhouses, two- to four-family dwellings, and upper story dwellings. A concurrently-submitted rezoning application requests to change the project site's zoning district from Agricultural (A) to Corporate Park (CP).

This LsCPA and the associated rezoning will help the City encourage development of a variety of housing types by implementing the appropriate land use designation and zoning district to accommodate a broad range of housing choice. Creation of more diverse housing choices benefits the City of Alachua and creates added opportunities for home ownership.

5. URBAN SPRAWL ANALYSIS

The approval of this LsCPA does not constitute urban sprawl. As defined in Florida Statutes, "urban sprawl" means "a development pattern characterized by low density, automobile-dependent development with either a single use or multiple uses that are not functionally related, requiring the extension of public facilities and services in an inefficient manner, and failing to provide a clear separation between urban and rural uses" (§ 163.3164(51)).

The thirteen (13) indicators of urban sprawl are formally identified in Chapter 163.3177(6)(a)9.a, Florida Statutes, which states that, "the evaluation of the presence of these indicators shall consist of an analysis of the plan or plan amendment within the context of features and characteristics unique to each locality in order to determine whether the plan or plan amendments. . ." meets the 13 indicators, as listed below.

As demonstrated by the following analysis, the proposed LsCPA does not trigger any urban sprawl indicators, and adoption of this application will discourage the proliferation of urban sprawl within the City of Alachua or the surrounding area. All indicators are shown in normal font, while consistency statements are provided in **bold font**.

(I) Promotes, allows or designates for substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.

The proposed Future Land Use classification, Corporate Park, is the City of Alachua's mixed-use land use category. A moderate intensity of up to 0.5 Floor Area Ratio (FAR) is permitted; a moderate density of up to 4 dwelling units per acre is permitted; and a mixture of uses is encouraged and required via the land development regulations of the associated zoning district, Corporate Park. This LsCPA, and its associated rezoning, will promote a mixed-use, moderate-density and -intensity development within the City.

(II) Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while leaping over undeveloped lands which are available and suitable for development.

The project site is ±3.2 miles from the intersection of US 441 and Main Street, per Google Maps. Between the city center and the project site, and in the area surrounding the project site, there are few available large tracts of land—the majority is already developed. Existing surrounding uses include Phoenix Commercial Park, Novabone, Southern Custom, Helena Chemical, and the San Felasco Tech City. Thus, this LsCPA does not designate urban development to occur in a rural area, substantial distances from existing development. Instead, this site creates opportunity for infill development along the City's Corporate Corridor via the provision of a FLU classification that can enable the property's highest and best use.

This project will represent infill development by "filling in" ±160 acres of land, currently bordering existing development, with a mixture of complementary residential, commercial, and service offerings. This will create adjacencies with existing and future nonresidential uses along the corridor and bring additional supportive uses to nearby residential communities.

(III) Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

The land uses on the project site will be planned cohesively within the context area, creating a complete, integrated, mixed-use site, not radial, strip, isolated, or ribbon patterns.

(IV) Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

All onsite natural resources will be adequately protected when the project site is developed, in accordance will all pertinent regulations.

(V) Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.

As can be seen in Figures 2, 3, 4, and 5, some property to the west of the project site is designated with agricultural FLU classification and zoning. Other properties to the west of the project site are designated with the industrial FLU classification and zoning. These properties will be protected in development of the project site.

The project site also currently has an agricultural zoning designation. However, it differs from its agricultural neighbors due to its substantial frontage on US 441 and proximity to similar commercial uses. The project site is ideal for the Corporate Park FLU classification and the subsequent development proposed will discourage the conversion of agricultural lands not capable of providing the mix of density and intensity for a development such as the one to follow this LsCPA.

(VI) Fails to maximize use of existing public facilities and services.

Approval of this request will continue to maximize the use of existing public facilities and services by converting ±160.2 acres of land from agricultural property to a mixed-use FLU that allows urban density and intensity. Future onsite development will utilize public facilities and services provided by the City of Alachua. Current public facilities in the area include a 16" water main along US 441 for water services; a 10" force main along US 441, an 8" gravity main to the west of the site, and a Lift Station at the northwest corner of the project site for wastewater services; and primary overhead electric lines on Cellon Creek Boulevard to the west and US 441 to the north for electric services.

(VII) Fails to maximize use of future public facilities and services.

Development on the project site will connect to existing City of Alachua public facilities and services.

(VIII) Allows for land use patterns or timing which disproportionately increase the cost in time, money and energy, of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

The Corporate Park FLU classification is the City of Alachua's mixed use land use category, focused on employment-based development. It both allows and encourages a functional mix of residential and nonresidential uses. The CP zoning district, requested for the project site in a concurrently-submitted rezoning application, further encourages this mix of uses through various LDR provisions.

Through the colocation of business and housing in one master planned, mixed-use area, a land use pattern will develop that can decrease the cost in time, money, and energy for a range of public facilities and services. Compact, urban development of the property, made possible with the requested LsCPA, can allow for efficient utilization of city

services and provide for increase in homes and nonresidential space in the City of Alachua without tremendous strains on existing facilities and government functions.

(IX) Fails to provide a clear separation between rural and urban uses.

The project site currently has urban FLU classifications, indicating the intention of the City to locate urban-style development in this area. The requested FLU classification is similarly urban, in terms of density and intensity yields, and allows for unified mixed-use development.

(X) Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

Site development constitutes infill development. Much of the surrounding area is developed, developing, or permanently reserved for conservation. Development of this property, made possible by the proposed LsCPA, would fill in an existing gap in the US 441 corridor as one enters the City of Alachua driving north, or leaves the City of Alachua driving south on US 441.

Surrounding existing development includes Phoenix Commercial Park, Novabone, Southern Custom, Helena Chemical, and San Felasco Tech City. The Corporate Park FLU classification would make possible a mixed-use development along the corridor, complementing existing commercial, business, and service uses, and providing additional housing for customers, employees, and all others who will utilize and patronize the nonresidential offerings.

(XI) Fails to encourage a functional mix of uses.

The Corporate Park FLU classification is the City of Alachua's mixed-use land use category, focused on employment-based development. As demonstrated in Section 4 of this report, the Goals, Objectives, and Policies of the Corporate Park FLU classification encourage a functional mix of uses. Furthermore, this application is submitted concurrently with a rezoning application, requesting the Corporate Park (CP) zoning district. The Land Development Regulations of this zoning district further encourage a functional mix of uses.

(XII) Results in poor accessibility among linked or related land uses.

Development that will result from the requested Corporate Park FLU classification will collocate linked, related land uses - both residential and nonresidential - on one piece of property, allowing for ease of accessibility via various modes. Such linkages between uses are encouraged in the Corporate Park FLU classification.

(XIII) Results in the loss of significant amounts of functional open space.

The Corporate Park FLU classification is intended to provide for a mixed-use, efficient development pattern. By permitting the colocation of a range of uses in one consolidated space, larger swaths of linked open space further from the city center can be preserved, rather than lost to sprawling, single-use development. Additionally, the project site is not currently functional open space, but rather, vacant agricultural land.

In addition to the thirteen (13) indicators of urban sprawl, Florida Statutes section 163.3177(6)(a)9.b identifies eight (8) development pattern or urban form criteria for use when evaluating a future land use or plan amendment. This section states that, if four (4) or more of the eight (8) criteria are met, one can presume that the amendment discourages urban sprawl.

The proposed amendment and corresponding development are found to meet the following four (4) criteria as identified in §163.3177(6)(a)9.b.(I), (III), (VI), and (VII).

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

The Corporate Park FLU classification allows for compact, mixed-use development, through the collocation of residential and nonresidential uses in one space. Such a built form allows for efficient, smart growth, and a clear delineation of built and natural spaces. This LsCPA request will allow for such development to occur on the project site. The result, a mixed-use community with ample space for new residents and new businesses, will spur economic growth for the City of Alachua by allowing more individuals and families to live in the community and allowing existing and future business owners to locate their businesses in the City. Furthermore, this property is an appropriate location for a development of this sort, due to its proximity to US Highway 441, and similar developments, such as Progress Park and San Felasco Tech City.

Adverse impacts to natural resources and ecosystems will be minimized to the maximum extent practicable, and natural resources and ecosystems will be protected to the maximum extent practicable.

The project site will be designed in a gradient of density and intensity. The highest intensity of purely commercial development will be located in the northern portion of the project site, proximate to US 441. South of this development will be a mixture of residential and nonresidential uses, located centrally on the project site. South of this mixture of uses will be exclusively residential development. At the southernmost area of the project site, closest to the San Felasco Hammock Preserve State Park, will be the lowest density residential development of the entire development. This gradient, gradually decreasing density and intensity in proximity to protected natural resources, will help ensure compatibility with surrounding natural areas.

Furthermore, all requirements related to buffering and environmental consideration will be adhered to for protected environmental features internal to and surrounding the site. These buffering requirements include those described in the City of Alachua Land Development Regulations, Section 6.2, and those described in the City of Alachua Comprehensive Plan Conservation and Open Space Element. These include, but are not limited to, adequate wetland buffering as detailed in Conservation and Open Space Element Policy 1.10.g; adequate surface waters buffering as detailed in Conservation and Open Space Element Policy 1.12.d.; and appropriate development within special flood hazard areas as detailed in Conservation and Open Space Element Policy 1.12.f.

(III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

The Corporate Park FLU classification is intended for "campus-like" development with generous and linked open space, pedestrian-friendly features, and multimodal

connections. The classification also supports a range of housing types, including single-family attached, single-family detached, townhomes, and cottages.

(VI) Preserves open space and natural lands and provides for public open space and recreation needs.

Provision of functional open space is required of developments in the Corporate Park FLU classification. Furthermore, the Corporate Park FLU classification will allow for expanded housing opportunity and nonresidential square footage in one location. This compact, mixed-use form allows for development without the need to encroach on open space or natural lands further from the city center.

(VII) Creates a balance of land uses based upon demands of the residential population for the nonresidential needs of an area.

The Corporate Park FLU classification, as well as its implementing zoning district Corporate Park (CP), create a functional balance of land uses in one location, by encouraging the colocation of residential and nonresidential development. Furthermore, the CP zoning district has requirements for minimum nonresidential floor areas to be provided in development based on the number of dwelling units, which ensures a balanced mix of residential space and nonresidential space.

6. NEEDS ANALYSIS

The Cellon Creek Large-scale Comprehensive Plan Amendment (LsCPA) Application requests to amend the City of Alachua's Future Land Use (FLU) Map on Alachua County tax parcel # 05949-000-000 (hereinafter "the property" or "the project site") from Commercial, Community Commercial, High Density Residential, and Moderate Density Residential to Corporate Park. This requested change may potentially result in an allowance of up to ±31 additional dwelling units compared to what is presently allowed on the property, and as many as ±2,417,580 additional square feet of nonresidential uses compared to what is currently allowed on the property.

Existing Maximum Permitted Density[1] *High Density Residential; Moderate Density Residential*	**Proposed Maximum Permitted Density** *Corporate Park*	**Practicable Expectation of Density[2]** *Corporate Park*
High Density Residential: ±15 ac * 15 du/ac = ±225 dwelling units Moderate Density Residential: ±96 ac * 4 du/ac = ±384 dwelling units Total: **±609 dwelling units**	±160.2 ac * 4 du/ac = **±640 dwelling units**	±160.2 ac * 4 du/ac = **±640 dwelling units**
Existing Maximum Permitted Intensity[1] *Commercial; Community Commercial*	**Proposed Maximum Permitted Intensity** *Corporate Park*	**Practicable Expectation of Intensity[2]** *Corporate Park*
Commercial: ±27.6 ac * 0.5 FAR = ±601,128 square feet Community Commercial: ±21.6 ac * 0.5 FAR = ±470,448 square feet Total: **±1,071,576 square feet**	±160.2 ac * 0.5 FAR = **±3,489,156 square feet**	±40.05 ac * 0.5 FAR = **±872,289 square feet**
Net Change This LsCPA application may allow up to ±31 additional *gross* dwelling units and up to ±2,417,580 additional *gross* square feet of nonresidential use compared to what is currently allowed by the existing land use classifications upon the property. *While this increase in dwelling units and nonresidential square footage may be allowed by the requested FLU classification, such increases are not anticipated to be realized in development of the project site.*		

The intent of this LsCPA application is to appropriately entitle the property to allow for the creation of a mixed-use development, in which businesses from the City of Alachua's growing sectors can locate, grow, and thrive, and in which the people that make those businesses succeed can live in a "campus-like", pedestrian-friendly setting with generous open space and a mix of uses, in close proximity to both work and personal needs. Though the Corporate Park FLU classification allows a somewhat lower intensity than the existing Commercial and Community Commercial FLU, the spirit and intent of the Corporate Park FLU more appropriately

aligns with business and development trends in the City of Alachua and will allow the City to proactively meet business needs.

POPULATION

The United States Census Bureau reported the population of the City of Alachua as 10,574 as of April 1, 2020. From 2010 to 2019, the population of the city had a percent change of 9.5%, exceeding the population change rate of Alachua County overall, which was 8.8% in the same time period (United States Census Bureau, 2021). It is anticipated that the City could grow by approximately 7,100 people by 2035 (City of Alachua Comprehenisve Plan Evaluation and Appraisal). As growth continues, increased housing stock and diversified housing options will be necessary to meet the demand of new residents. Currently, approximately 75% of the City's housing stock is made up of single-family dwelling units, compared to less than 50% of the County housing stock (City of Alachua Comprehenisve Plan Evaluation and Appraisal). Median home value from 2015 to 2019 was $179,500 (United States Census Bureau, 2021). The moderate increase in density proposed by this LsCPA, as well as the expanded range of dwelling types made possible by this LsCPA, will enable the City to not only proactively meet the housing needs of a larger population, but to offer housing at a range of price points and in a range of dwelling types, thanks to the housing diversity and housing density allowed in the Corporate Park FLU category.

BUSINESS

The City of Alachua is home to multiple international corporations, several of which are Fortune 500 Companies (City of Alachua Strategic Plan 2021). The City is also home to various research arms of Santa Fe College and the University of Florida. Prominent industries in the City include biotechnology, medical research and technology, and life sciences. Examples of industry in the City include Progress Park, home to numerous businesses across multiple industries; Convergence Park, a new development along the San Felasco Parkway currently underway that will soon be home to multiple forms of housing, a business incubator space, office space, and retail space; Foundation Park, a life sciences research facility with adaptable workspaces; and San Felasco Tech City, an incubator space soon to also offer housing options and a microbrewery.

The project site's size and location on US 441 make it a prime candidate for development like those mentioned above and for meeting the City's business trends. City of Alachua's Comprehensive Plan Future Land Use Element establishes the US 441 corridor as a Corporate Corridor Activity Center, in Policy 1.3.f. The intent of this designation is to "implement economic development objectives and to promote a coordinated development plan to maximize existing and future land use patterns and preserve the function of the US 441 corridor" (City of Alachua Comprehensive Plan - Future Land Use Element). The City has expressed an intention to focus on welcoming and encouraging business development along the US 441 corridor (City of Alachua Strategic Plan 2021). However, the project site's current FLU, listed above, and zoning, Agriculture (A), inhibit it from developing with the focus and intent the City has expressed interest in for the area. The Corporate Park FLU, accompanied by the Corporate Park zoning, would appropriately entitle ±160 acres along the Corporate Corridor to meet industry needs and welcome the City's business future.

HOMES AND JOBS

The City of Alachua was incorporated in 1905 with the traditional downtown as its original and traditional economic core (City of Alachua Comprehenisve Plan Evaluation and Appraisal). As the City grew and developed, the private automobile became the dominant form of transportation. Today, the average travel time to work for residents of the City of Alachua is 27.9 minutes, compared to the County average of 22.4 minutes (United States Census Bureau, 2021). This increased commute time has downstream impacts, including added traffic congestion, additional air pollution, and less time for residents to spend with family and to engage in civic life in the Good Life Community. The Corporate Park FLU offers the opportunity

for a more optimal live/work environment, in which residents can live in moderately priced, modern housing in close proximity to their jobs, allowing them more time to contribute to professional and civic life by reducing the amount of time spent traveling. This opportunity is unique to the Corporate Park FLU, as it is the City's only mixed-use FLU category.

CONCLUSION

The requested LsCPA to change the project site's FLU category to Corporate Park will proactively entitle ±160 acres of City land to address trends in the City and make sensibly welcoming growth possible. This change will address the City's population growth through a moderate increase in density; will address the City's thriving industries by designating land with a FLU that caters to industry needs; and proactively combat urban sprawl by making possible a mixed-use, campus-style development that will allow residents to have a more optimal live/work balance and use more time to enjoy the Good Life Community.

Public School Student Generation Form for Residential Development in the City of Alachua

A. APPLICANT

1. Applicant's Status (check one):

   □ Owner (title holder) ■ Agent

2. Name of Applicant(s) or Contact Person(s): Seth Wood Title: Project Planner

   Company (if applicable): CHW

   Mailing address: 11801 Research Drive

   City: Alachua State: FL ZIP: 32615

   Telephone: 352-331-1976 FAX: 352-331-1976 e-mail: sethw@chw-inc.com

3. If the applicant is agent for the property owner*:

   Name of Owner (title holder): University of Florida Foundation, Inc

   Mailing Address: PO Box 14425

   City: Gainesville State: Florida ZIP: 32604

   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

B. PROJECT

1. Project Name: Cellon Creek
2. Address of Subject Property: _____
3. Parcel ID Number(s): 05949-000-000
4. Section 00 Township 08 Range 19 Grant Fernandez Acreage: 160.2
5. Existing Use of Property: Vacant
6. Future Land Use Map Designation: Commercial; Community Commercial; Moderate Density Residential; High Density Residential
7. Zoning Designation: Agricultural (A)
8. Development Data (check all that apply):

   ■ Single Family Residential Number of Units 320

   ■ Multi-Family Residential Number of Units 320

   □ Exempt (*see exempt developments on page 2*)

9. Review Type:

Preliminary Development Order	***Final Development Order***
■ Comprehensive Plan Amendment	□ Preliminary Plat
■ Large Scale	□ Final Plat
□ Small Scale	□ Site Plan
□ Site Specific Amendment to the Official Zoning Atlas (Rezoning)	
■ *Revised*	

10. School Concurrency Service Areas (SCSA): Based on the project location, identify the corresponding SCSA for each school type. Maps of the SCSAs can be obtained from the Alachua County Growth Management Department Map Gallery by clicking on the "Public Schools" tab: http://growth-management.alachuacounty.us/gis_services/map_gallery/

    Elementary: Alachua

    Middle: Mebane

    High: Santa Fe

Explanation of Student Generation Calculation: Student Generation is calculated based on the type of residential development and the type of schools. The number of students stations (by school type – Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. **Calculations are rounded to the nearest whole number.** Student Generation for each school type is calculated individually, in order to correctly assess the impact on the School Concurrency Service Area (SCSA) for each school type (Elementary, Middle and High School).

# of Elementary School Student Stations = # of housing units x Elementary school student generation multiplier
# of Middle School Student Stations = # of housing units x Middle school student generation multiplier
# of High School Student Stations = # of housing units x High school student generation multiplier

Student Generation Calculations: Single Family Residential Development

Elementary School	320	units	x	0.15	Elementary School Multiplier*	48	Student Stations**
Middle School	320	units	x	0.07	Middle School Multiplier*	23	Student Stations**
High School	320	units	x	0.09	High School Multiplier*	29	Student Stations**

Student Generation Calculations: Multi-Family Residential Development

Elementary School	320	units	x	0.09	Elementary School Multiplier*	29	Student Stations**
Middle School	320	units	x	0.03	Middle School Multiplier*	10	Student Stations**
High School	320	units	x	0.03	High School Multiplier*	10	Student Stations**

* ***Student generation multipliers may be obtained from SBAC at:***
http://www.sbac.edu/pages/ACPS/Departments_Programs/DepartmentsAF/D_thru_F/FacilitiesMainConstr/Local_Certification_Packets/City_of_Alachua
*** Round to the nearest whole number***

EXEMPT DEVELOPMENTS (check all that apply):

- ☐ Existing legal lots eligible for a building permit.
- ☐ Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired.
- ☐ Amendments to final development orders for residential development approved prior to the effective date of public school concurrency, and which do not increase the number of students generated by the development.
- ☐ Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public Schools Facilities Element or the ILA.
- ☐ Group quarters that do not generate public school students, as described in the ILA.

A completeness review of the application will be conducted within 5 business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

(2) Affected roadway segments. For the purposes of making concurrency determinations, affected roadway facilities shall be determined as follows:

(a) Development generating 1,000 or fewer trips. For proposed developments generating less than or equal to 1,000 external average daily trips (ADT), affected roadway segments are all those wholly or partially located within one-half mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater.

(b) Developments generating more than 1,000 trips.
(i) For proposed developments generating greater than 1,000 external average daily trips (ADT), affected roadway segments are those on which the development's impacts are five percent or greater of the maximum service volume of the roadway; and
(ii) The study area for proposed developments generating greater than 1,000 external average daily trips (ADT) shall include all roadway segments located partially or wholly within one-half mile of the development's ingress/egress, or to the nearest major intersection,

Former NFL, Gators running back faces charges in road rage assault

Alexander Lugo
Fresh Take Florida

Former Florida Gators running back Mark Thompson is facing a slew of felony charges stemming from two criminal incidents this past month.
EMMA GREEN/WUFT NEWS

A former University of Florida running back who signed to play in the NFL is accused of brandishing an assault rifle during a road-rage incident in Gainesville last month. It's the second criminal case alleging the player was violent in recent weeks.

Mark Anthony Thompson, 26, is facing felony assault and robbery charges in the latest incident, which involved a pair of female teens just east of the UF campus the afternoon of Nov. 21, according to a complaint filed by Gainesville police. He had not been arrested by Wednesday, but a judge has issued a warrant for police to pick him up, according to court records.

Thompson – part of the Gators football team from 2016 to 2018 – followed the women's SUV for four blocks to the parking lot of a nearby food truck cooperative, according to police.

Thompson is accused of removing an assault-style rifle from his car, looking at both women and saying, "I should shoot you." He also was accused of forcefully pulling the 19-year-old driver out of the SUV and throwing away her cell phone, which she had been using to record the encounter. That was the basis for the robbery charge.

Thompson's attorney, Dean Galigani, earlier this week asked a judge to reduce the $175,000 bond associated with his pending arrest warrant. In his court motion, Galigani identified Thompson as a professional football player and said he was training in Gainesville. Neither Thompson nor his attorney have responded to multiple requests for comment.

After Thompson left Florida, he signed with the Baltimore Ravens' practice squad as well as the Detroit Lions' practice squad. The Las Vegas Raiders signed him in January, but he was waived in April.

The latest incident follows a mid-October misdemeanor complaint alleging the football player assaulted a city parking enforcement officer.

In that case, police said Thompson started an argument with the parking employee over a ticket. When the officer attempted to walk away, Thompson followed and eventually struck the man with an open palm.

The October assault took place just one block from November's road-rage incident.

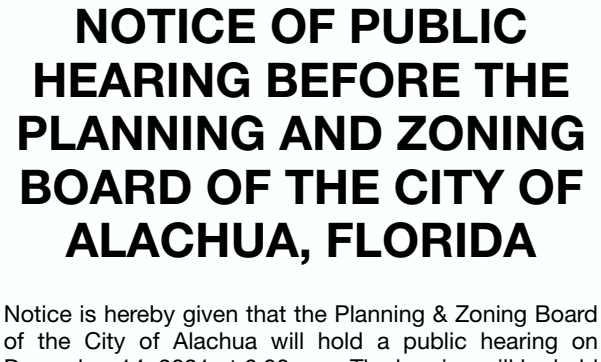
Thompson has had other encounters with police.

In 2016, while a football player at UF, Thompson was charged with misdemeanors on two separate occasions, according to court records.

Thompson was cited for possession of marijuana in October of that year. In December, police found him inside a tow truck compound in the middle of the night.

Thompson told police he was trying to get in touch with employees on the lot, but was ultimately charged with trespassing. Both the possession charge and the trespassing charge were dropped after Thompson pleaded guilty to a single paraphernalia charge.

Thompson was suspended from play following the possession charge.



In May 2017, university police pulled over Thompson for a broken taillight. When he opened a compartment containing his driver's license and registration, police said Thompson attempted to conceal a small amount of marijuana. He was charged with possession and issued a notice to appear in court. He again pleaded guilty to a reduced paraphernalia charge.

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning & Zoning Board of the City of Alachua will hold a public hearing on December 14, 2021 at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., property owner, for consideration of a Large Scale Comprehensive Plan Amendment on a ±160.2 acre subject property to amend the Future Land Use Map (FLUM) from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park on a parcel of land generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard; consisting of Tax Parcel Number 05949-000-000. Existing FLUM: Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres); and Proposed FLUM: Corporate Park; Existing Zoning: Agriculture.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

AFFIDAVIT FOR POSTED LAND USE SIGN

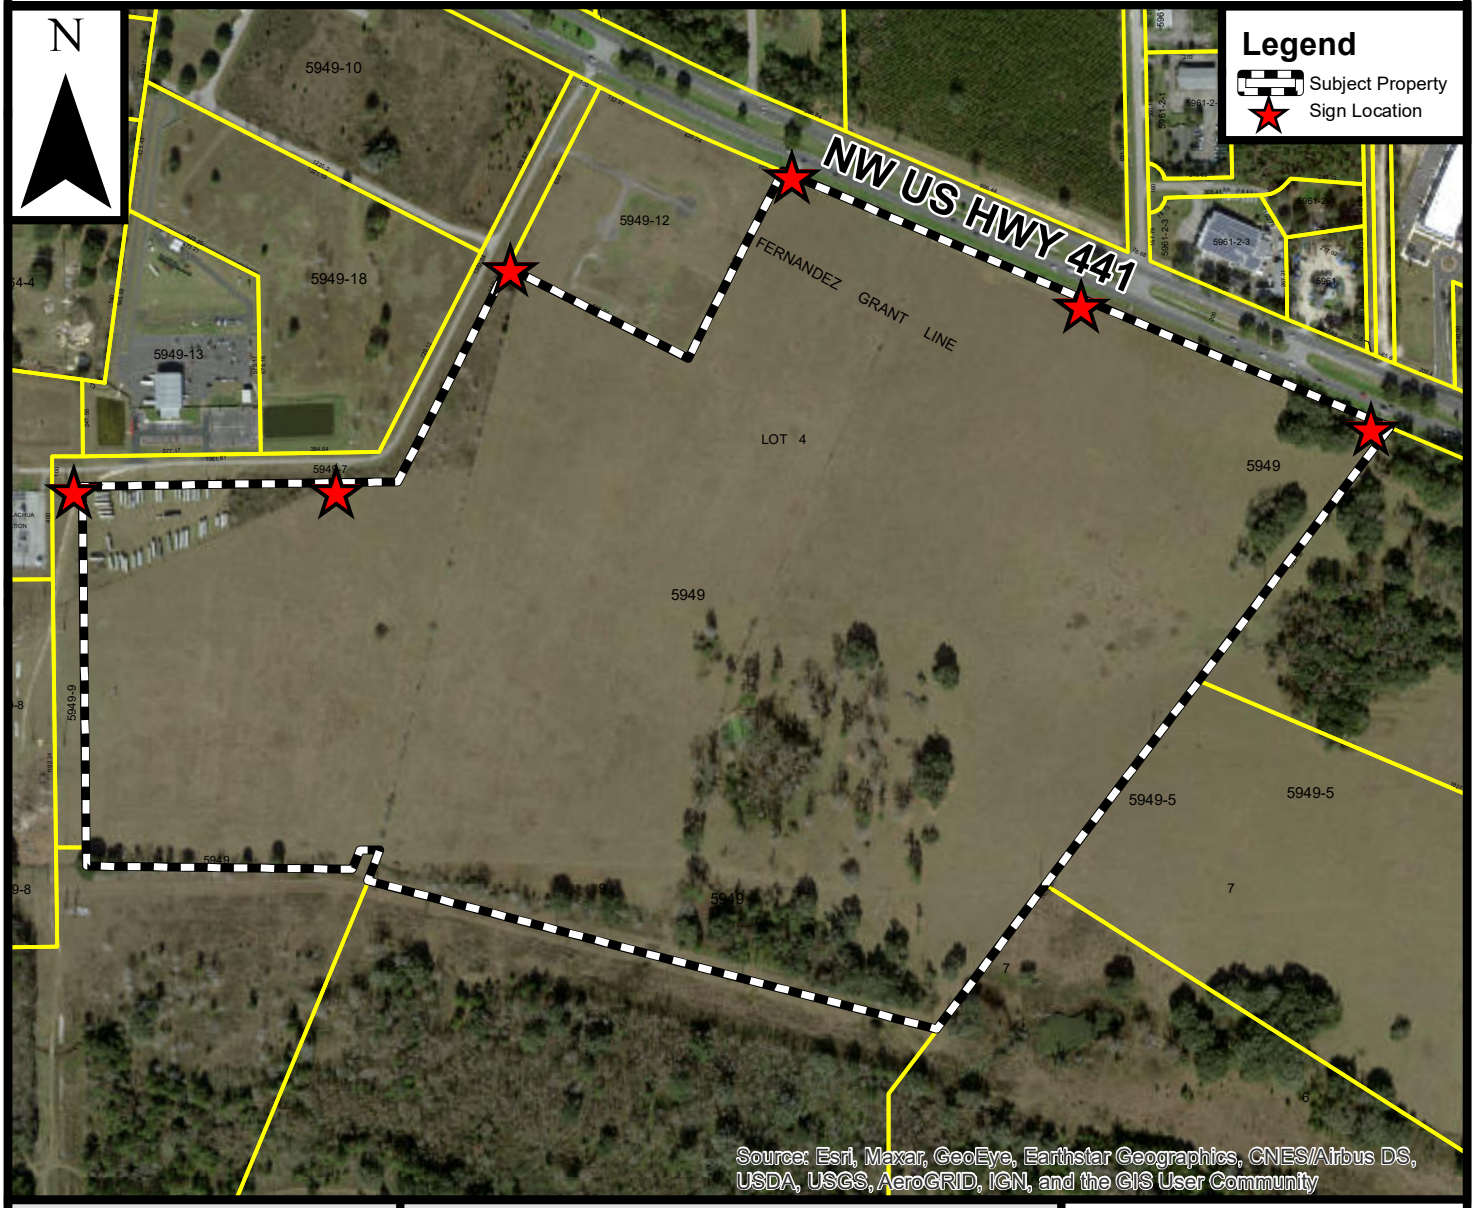
I Seth Wood (name), POSTED THE LAND USE SIGN ON 11/30/24 (date) FOR THE Cellon Creek LSCPA & RZ - PZB & CCOM1 (state type of action and project name) LAND USE ACTION.

AS PER ARTICLE 2.2.9 D OF THE LAND DEVELOPMENT REGULATIONS.

THIS WILL BE INCLUDED IN THE STAFF REPORT.

Seth Wood
(signature)

Six (6)
(number of signs)



IMPORTANT INFORMATION REGARDING POSTED NOTICE SIGNS

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

Signs must be removed by the applicant and returned to the City within ten days after the final decision on the application.

Planning and Zoning Board
Minutes
December 14, 2021

Chair Sandy Burgess
Vice Chair Edward Potts
Member Joe Hancock
Member Virginia Johns
Member Gary Thomas
School Board Member Tina Certain

City Manager Mike DaRoza

Planning and Zoning Board
At 6:00 PM
to address the item(s) below.

Meeting Date: December 14, 2021

Meeting Location: James A. Lewis Commission Chambers

Notice given pursuant to Section 286.0105, Florida Statutes. In order to appeal any decision made at this meeting, you will need a verbatim record of the proceedings. It will be your responsibility to ensure such a record is made.

PLANNING AND ZONING BOARD MEETING MINUTES

CALL TO ORDER

Chair Sandy Burgess called the meeting to order. School Board Member Tina Certain and Member Gary Thomas were absent.

INVOCATION

Chair Burgess led the invocation.

PLEDGE TO THE FLAG

Led by the Board.

APPROVAL OF THE AGENDA

Member Virginia Johns moved to approve the agenda; seconded by Vice Chair Ed Potts.

I. OLD BUSINESS

None.

II. NEW BUSINESS

A. Approval of the Minutes of the November 9, 2021 PZB Meeting

Member Johns moved to approve the minutes; seconded by Vice Chair Potts.

Passed by unanimous consent.

B. Site Plan Development Order Extension: A request by Clay Sweger, AICP, LEED AP, of EDA Consultants, Inc., for a 12 month extension to the Development Order granted on December 8, 2020 to Ray's Metal Works, Inc. for the construction of a ±2,550 square foot building addition with associated site improvements.

Principal Planner Justin Tabor, AICP, presented the Staff Report.

Vice Chair Potts moved to approve the request for a 12 month extension; seconded by Member Joe Hancock.

Motion Passed 4-0 in a roll call vote.

C. Large Scale Comprehensive Plan Amendment (LSCPA) – Cellon Creek: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., property owner, for consideration of a Large Scale Comprehensive Plan Amendment on a ±160.2 acre subject property to amend the Future Land Use Map (FLUM) from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park. Tax Parcel Number 05949-000-000 (Legislative Hearing).

Principal Planner Tabor, AICP, presented the Staff Report.

Gerry Dedenbach, AICP, and Seth Wood of Causseaux, Hewett, & Walpole, Inc., presented additional information and availed themselves for questions.

Member Johns moved that based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Large Scale Comprehensive Plan Amendment submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve; seconded by Vice Chair Potts.

Motion Passed 4-0 in a roll call vote.

D. Site-Specific Amendment to the Official Zoning Atlas (Rezoning) – Cellon Creek: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., property owner, for consideration of a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to amend the Official Zoning Atlas on a ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP). Tax Parcel Number 05949-000-000

(Quasi-Judicial Hearing).

Planning Assistant Kenyata Curtis swore in all parties entering testimony during the hearing.

Principal Planner Tabor, AICP, presented the Staff Report.

Gerry Dedenbach, AICP, and Seth Wood of Causseaux, Hewett, & Walpole, Inc., presented additional information and availed themselves for questions.

Vice Chair Potts moved that based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Site-Specific Amendment to the Official Zoning Atlas submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve; seconded by Member Johns.

Motion Passed 4-0 in a roll call vote.

E. Amend the City of Alachua Comprehensive Plan by adding a Property Rights Element

Department Director Kathy Winburn, AICP, presented the Staff Report.

Member Hancock moved that based upon the presentation presented before this Board and Staff's recommendation, this Board finds the proposed Comprehensive Plan Text Amendment to add a Property Rights Element to the City of Alachua Comprehensive Plan to be consistent with the Comprehensive Plan and transmits such finding to the City Commission with a recommendation to approve; seconded by Member Johns.

Motion Passed 4-0 in a roll call vote.

III. BOARD COMMENTS/DISCUSSION

Department Director Winburn stated that there will be a meeting January 11, 2021 at 6:00 p.m.

IV. CITIZENS COMMENTS

None.

ADJOURN

Chair Burgess called the meeting adjourned.

ATTEST:

Presiding Officer

PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Staff Liaison

STATE BRIEFS

Police: Officers wound man to protect innocent bystander

ORLANDO – Police officers shot a man who had been acting erratically as he ran toward a vehicle entering an Orlando apartment complex early Wednesday, officials said.

Multiple residents called 911 just before 1 a.m. Wednesday about a man who was knocking on windows at the Vista Verde Apartments, Deputy Chief Eric Smith said during a news conference.

When officers arrived at the complex, they saw a man running with a gun.

"They caught up to him as they saw him get into somebody's vehicle, somebody was driving into the parking lot, he jumped into the passenger side of that vehicle," Smith said. "Officers approached him and at that point, they saw a firearm. Officers fired multiple rounds at the suspect, striking the suspect to protect the civilian that was still in the vehicle."

The man was being treated at Orlando Regional Medical Center, Smith said.

The Florida Department of Law Enforcement is investigating the shooting. Five officers who were involved in the incident have been placed on paid administrative leave.

Driver accused of killing 2 kids disrupts courtroom

FORT LAUDERDALE – A 27-year-old man accused in a hit-and-run crash that killed two children and injured four others caused a disturbance during his first court appearance Wednesday, hours after sheriff's deputies arrested him.

Sean Charles Greer was arrested late Tuesday after physical evidence led detectives to him following the Monday afternoon crash in Wilton Manors, the Broward Sheriff's Office said.

During a court appearance Wednesday, deputies led Greer away after he apparently objected to attending the proceeding, news outlets reported. The court session was delayed for a minute as he was taken from the room.

Guns

Continued from Page 3A

2019.

Teenagers were killed and wounded. Teenagers pulled the triggers in some cases. A young man shot and killed the mother of his baby. A 13-year-old girl was fatally shot.

Shootings occurred outside downtown Gainesville nightclubs, in convenience store parking lots, at a teen's birthday party at the American Legion Hall and in drive-bys on the streets.

Especially troubling to officials is the gunshots by teens, often members of feuding gangs from different neighborhoods.

Meanwhile, the violence witnessed by teenagers will have a lasting impact that is not being addressed as it should, said Darry Lloyd, chief investigator for the Eighth Judicial Circuit State Attorney's Office and a leader of the Black on Black Crime Task Force.

"The unseen scars, the trauma in the kids who have witnessed it, that's what we have to really address and we are not doing a very good job of that at all," Lloyd said. "As we depart 2021, 2022 is starting at a different place for these young people. We have to heal from that."

Dozens of kids witnessed what authorities said was a shooting involving two rival groups of teens at a June 24 birthday party at the American Legion Hall. Killed was Christopher Scott, 13, and four other teens were injured. Arrests have been made.

A teenager was wounded in an early morning shooting downtown on Aug. 1, the night after a Stop the Violence rally curb shootings.

A 12-year-old boy was shot and wounded in Southwest Gainesville in July. An 18-year-girl was later charged in the shooting.

Maliyah Godwin, 13, was shot and killed at her Southwest Gainesville apartment complex. A 37-year-old man has been indicted for first-degree murder in connection with the case.

Gun violence has increased nationwide this year and law enforcement agencies are trying to figure out why. Stress caused by the ongoing COVID-19 pandemic, the easy availability of guns and cultural changes likely play a role.

"I don't think it is one thing, and that's what complicates it. It's a lot of different things," Behl said. "It is sometimes hard to predict but we are working on it."

GPD this year is planning to launch a violence interruption program in which trained mediators will work in neighborhoods to identify potential trouble and bring rivals together to try to prevent shootings and other crimes.

"It is community driven," GPD Chief Tony Jones said. "They will be doing conflict mediation. They will also be working with some of the individuals who have a propensity for violence and actually get out and mobilize the community."

Other cities in the U.S. are trying the tactic.

Jacksonville began its Cure Violence program in 2019. Data from a Washington D.C. pilot program, Cure the Streets, indicates mixed results from the neighborhoods in which it operates.

Jones said he hopes the program will begin sometime in the spring.

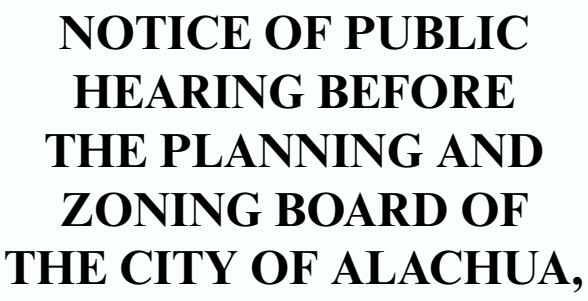
PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on January 10, 2022, at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-03

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE CITY'S COMPREHENSIVE PLAN; AMENDING THE CITY'S COMPREHENSIVE PLAN TO ADD A PROPERTY RIGHTS ELEMENT; PROVIDING A REPEALING CLAUSE; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.



At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

GF-28009242

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning and Zoning Board of the City of Alachua will hold a public hearing on January 11, 2022, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following:

A request by Larry J. Longenecker, of Eisman & Russo, Inc., applicant and agent for the Waco Properties, Inc., property owner, for consideration of a Site Plan proposing the construction of a ±51,140 square foot building with associated site improvements on a ±20.50 acre subject property and comprised of a ±3.35 acre project area; Tax Parcel Number 03983-007-000; FLUM: Industrial; Zoning: Industrial General (IG).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

GF-28009193

AFFIDAVIT FOR POSTED LAND USE SIGN

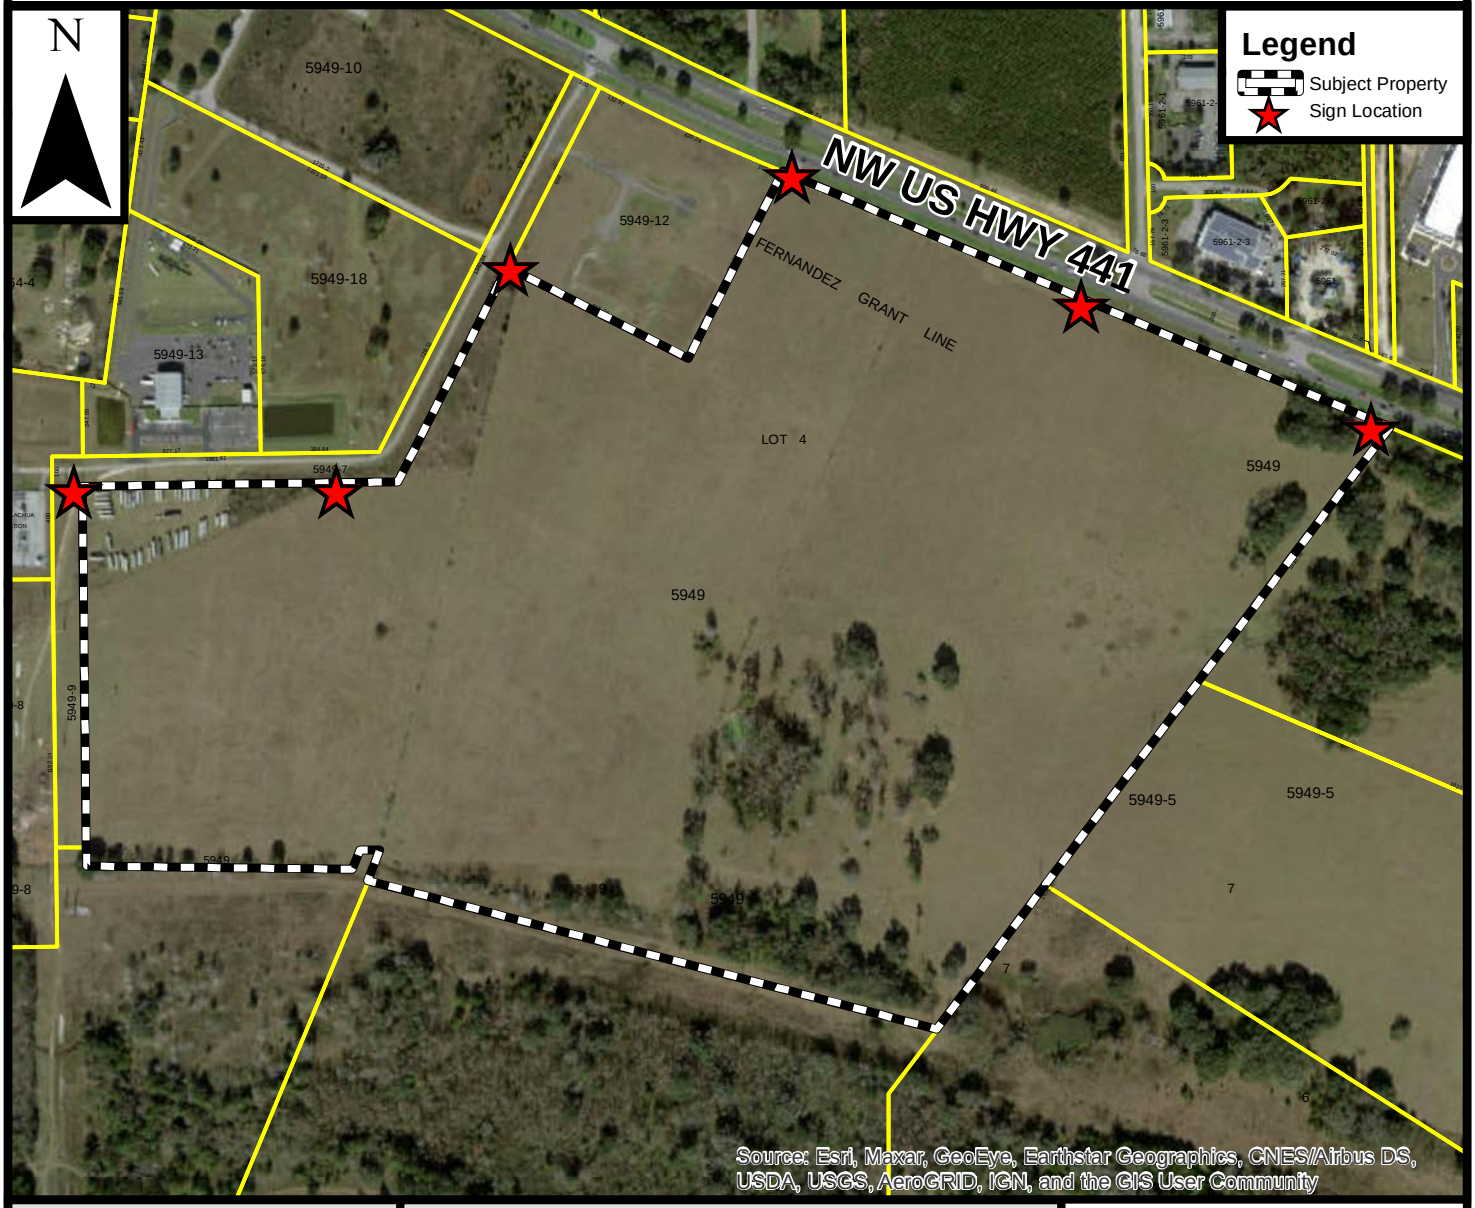
I Seth Wood (name), POSTED THE LAND USE SIGN ON 11/30/24 (date) FOR THE Cellon Creek LSCPA & RZ - PZB & CCOM1 (state type of action and project name) LAND USE ACTION.

AS PER ARTICLE 2.2.9 D OF THE LAND DEVELOPMENT REGULATIONS.

THIS WILL BE INCLUDED IN THE STAFF REPORT.

Seth Wood
(signature)

Six (6)
(number of signs)



IMPORTANT INFORMATION REGARDING POSTED NOTICE SIGNS

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

Signs must be removed by the applicant and returned to the City within ten days after the final decision on the application.

RE: Property Rights Element and University of Florida Foundation

Dear Ms. Winburn:

Thank you for submitting Alachua City's proposed comprehensive plan amendment for our review pursuant to the Expedited State Review process. The reference number for this amendment package is 22-01ESR.

The proposed submission package will be reviewed pursuant to Section 163.3184(3), Florida Statutes. Once the review is underway, you may be asked to provide additional supporting documentation by the review team to ensure a thorough review. You will receive the Department's Comment Letter no later than February 11, 2022.

If you have any questions please contact Donna Harris, Plan Processor at (850) 717-8491 or Barbara Powell, Regional Program Administrator, who will be overseeing the review of the amendments, at (850)717-8504.

Sincerely,

D. Ray Eubanks, Administrator

RE: TRANSMITTAL OF PROPOSED COMPREHENSIVE PLAN AMENDMENTS PURSUANT TO THE EXPEDITED STATE REVIEW PROCESS

CITY OF ALACHUA ORDINANCES 22-03 AND 22-04

Dear Mr. Eubanks:

Enclosed please find two (2) proposed Comprehensive Plan Amendments (the "Amendments") and supporting data and analysis, submitted through the Florida Department of Economic Opportunity's electronic amendment submittal portal pursuant to the Expedited State Review Process as set forth in Section 163.3184(3), Florida Statutes.

The City of Alachua Planning and Zoning Board, serving as the City's Local Planning Agency (LPA), held a public hearing on each of the Amendments on December 14, 2021 and recommended approval of each Amendment to the City Commission. On January 10, 2022, the City of Alachua City Commission held a public hearing on each of the Amendments and approved transmittal of each Amendment pursuant to the Expedited State Review Process.

This transmittal includes two (2) Amendments to the City of Alachua Comprehensive Plan, as described below. The Amendments are not within an area of critical state concern, a rural land stewardship area, or an area subject to a sector plan. The City of Alachua anticipates the adoption hearing for the Amendments will be held in March 2022.

This transmittal includes:

1. Ordinance 22-03: A request by the City of Alachua to amend the text of the City of Alachua Comprehensive Plan by adding a Property Rights Element; and,

2. Ordinance 22-04: A request by Seth Wood of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., for the consideration of an amendment to the City of Alachua Future Land Use Map (FLUM). The proposed amendment would change the FLUM Designation on a ±160.2 acre subject property from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park.

I certify that the complete amendment package including supporting data and analysis was transmitted on January 13, 2022 to the following agencies: The Florida Department of Environmental Protection; the Florida Department of Transportation - District 2; the Florida Department of State; the North Central Florida Regional Planning Council; the Department of Economic Opportunity, Bureau of Economic Development; the Suwannee River Water Management District; the Department of Education; Alachua County; the School Board of Alachua County; the City of Gainesville; and the City of High Springs. As such, the proposed amendment has been submitted to all parties required by Chapter 163.3184(3)(b), Florida Statutes.

The name, title, address, e-mail, telephone number, and fax number of the local contact person is:

GOVERNOR

FLORIDA DEPARTMENT of ECONOMIC OPPORTUNITY

Dane Eagle
SECRETARY

January 20, 2022

The Honorable Gib Coerper
Mayor, City of Alachua
5100 NW 142 Terrace
Alachua, Florida 32615

Dear Mayor Coerper:

The Department of Economic Opportunity ("Department") has reviewed the proposed comprehensive plan amendment for the City of Alachua (Amendment No. 22-01ESR) received on January 12, 2022. The review was completed under the expedited state review process. We have no comment on the proposed amendment.

The City should act by choosing to adopt, adopt with changes, or not adopt the proposed amendment. For your assistance, we have enclosed the procedures for adoption and transmittal of the comprehensive plan amendment. In addition, the City is reminded that:

- Section 163.3184(3)(b), F.S., authorizes other reviewing agencies to provide comments directly to the City. **If the City receives reviewing agency comments and they are not resolved, these comments could form the basis for a challenge to the amendment after adoption.**

- **The second public hearing,** which shall be a hearing on whether to adopt one or more comprehensive plan amendments, **must be held within 180 days** of your receipt of agency comments or the amendment shall be **deemed withdrawn** unless extended by agreement with notice to the Department and any affected party that provided comment on the amendment pursuant to Section 163.3184(3)(c)1., F.S.

- **The adopted amendment must be rendered to the Department.** Under Section 163.3184(3)(c)2. and 4., F.S., the **amendment effective date** is 31 days after the Department notifies the City that the amendment package is complete or, if challenged, until it is found to be in compliance by the Department or the Administration Commission.

An equal opportunity employer/program. Auxiliary aids and service are available upon request to individuals with disabilities. All voice telephone numbers on this document may be reached by persons using TTY/TTD equipment via the Florida Relay Service at 711.

SUBMITTAL OF ADOPTED COMPREHENSIVE PLAN AMENDMENTS

FOR EXPEDITED STATE REVIEW

Section 163.3184(3), Florida Statutes

NUMBER OF COPIES TO BE SUBMITTED: Please submit electronically using the Department's electronic amendment submittal portal "**Comprehensive Plan and Amendment Upload**" (*https://floridajobs.secure.force.com/cp/*) **or** submit three complete copies of all comprehensive plan materials, of which one complete paper copy and two complete electronic copies on CD ROM in Portable Document Format (PDF) to the State Land Planning Agency and one copy to each entity below that provided timely comments to the local government: the appropriate Regional Planning Council; Water Management District; Department of Transportation; Department of Environmental Protection; Department of State; the appropriate county (municipal amendments only); the Florida Fish and Wildlife Conservation Commission and the Department of Agriculture and Consumer Services (county plan amendments only); and the Department of Education (amendments relating to public schools); and for certain local governments, the appropriate military installation and any other local government or governmental agency that has filed a written request.

SUBMITTAL LETTER: Please include the following information in the cover letter transmitting the adopted amendment:

_____ State Land Planning Agency identification number for adopted amendment package;

_____ Summary description of the adoption package, including any amendments proposed but not adopted;

_____ Identify if concurrency has been rescinded and indicate for which public facilities. (Transportation, schools, recreation and open space).

_____ Ordinance number and adoption date;

_____ Certification that the adopted amendment(s) has been submitted to all parties that provided timely comments to the local government;

_____ Name, title, address, telephone, FAX number and e-mail address of local government contact;

_____ Letter signed by the chief elected official or the person designated by the local government.

ADOPTION AMENDMENT PACKAGE: Please include the following information in the amendment package:

_____ In the case of text amendments, changes should be shown in strike-through/underline format.

_____ In the case of future land use map amendments, an adopted future land use map, **in color format,** clearly depicting the parcel, its future land use designation, and its adopted designation.

_____ A copy of any data and analyses the local government deems appropriate.

Note: If the local government is relying on previously submitted data and analysis, no additional data and analysis is required;

_____ Copy of the executed ordinance adopting the comprehensive plan amendment(s);

Suggested effective date language for the adoption ordinance for expedited review:

> "The effective date of this plan amendment, if the amendment is not timely challenged, shall be 31 days after the state land planning agency notifies the local government that the plan amendment package is complete. If the amendment is timely challenged, this amendment shall become effective on the date the state land planning agency or the Administration Commission enters a final order determining this adopted amendment to be in compliance."

_____ List of additional changes made in the adopted amendment that the State Land Planning Agency did not previously review;

_____ List of findings of the local governing body, if any, that were not included in the ordinance and which provided the basis of the adoption or determination not to adopt the proposed amendment;

_____ Statement indicating the relationship of the additional changes not previously reviewed by the State Land Planning Agency in response to the comment letter from the State Land Planning Agency.

FLORIDA REGIONAL COUNCILS ASSOCIATION
LOCAL GOVERNMENT COMPREHENSIVE PLAN AMENDMENT REVIEW FORM 01

Regional Planning Council: North Central Fl
Review Date: 1/27/22
Amendment Type: Draft Amendment

Regional Planning Council Item No.: 45
Local Government: City of Alachua
Local Government Item No.: Ord. Nos. 22-03, 22-04
State Land Planning Agency Item No.: 22-1 ESR

Date Mailed to Local Government and State Land Planning Agency: 1/28/22 (estimated)

Pursuant to Section 163.3184, Florida Statutes, Council review of local government comprehensive plan amendments is limited to adverse effects on regional resources and facilities identified in the strategic regional policy plan and extrajurisdictional impacts that would be inconsistent with the comprehensive plan of any affected local government within the region. A written report containing an evaluation of these impacts, pursuant to Section 163.3184, Florida Statutes, is to be provided to the local government and the state land planning agency within 30 calendar days of receipt of the amendment.

DESCRIPTION OF AMENDMENT

The amendment adds a new Property Rights Element to the City's Comprehensive Plan and reclassifies approximately 160.2 acres from Commercial (25.4 acres), Community Commercial (16.3 acres), High Density Residential (16.1 acres), and Moderate Density Residential (102.5 acres) to Corporate Park (See attached).

1. ADVERSE EFFECTS TO SIGNIFICANT REGIONAL RESOURCES AND FACILITIES IDENTIFIED IN THE STRATEGIC REGIONAL POLICY PLAN

The subject property is located adjacent to U.S. Highway 441 which is identified and mapped in the regional plan as part of the Regional Road Network. The City Transportation Element contains objectives and policies which implement of one or more practices consistent with Transportation Planning Best Practices contained in the North Central Florida Strategic Regional Policy Plan. Regional Plan Transportation Element Policy 5.1.1 states that within municipalities where local government comprehensive plans contain goals and policies which implement Transportation Planning Best Practices, adverse impacts to the Regional Road Network are adequately mitigated and local government plans and plan amendments are not subject to a Regional Planning Council determination impacts to the Regional Road Network. Therefore, significant adverse transportation impacts to the Regional Road Network are adequately mitigated.

The subject property is located in a Stream to Sink area and an Area of High Recharge Potential to the Floridan Aquifer, identified and mapped as a Natural Resource of Regional Significance in the North Central Florida Strategic Regional Policy Plan. Nevertheless, no significant adverse impacts to Natural Resources of Regional Significance are anticipated as the City Comprehensive Plan contains adequate policy direction to prevent significant adverse impacts to the natural resources.

2. EXTRAJURISDICTIONAL IMPACTS INCONSISTENT WITH THE COMPREHENSIVE PLANS OF LOCAL GOVERNMENTS WITHIN THE REGION

The City Comprehensive Plan, as amended, is not anticipated to create significant adverse impacts to adjoining local governments.

Request a copy of the adopted version of the amendment?

SUBJECT: City of Alachua Proposed Comprehensive Plan Amendment (22-1ESR)

Dear Ms. Winburn,

Pursuant to Section 163.3184(3), Florida Statutes, (F.S.) in its role as a reviewing agency as identified in Section 163.3184(1)(c), F.S., the Florida Department of Transportation (FDOT) reviewed proposed amendment, City of Alachua 22-1ESR. The proposed amendment package consists of two (2) ordinances: 22-03 and 22-04.

Ordinance 22-03
The City of Alachua has transmitted a text amendment to add a Property Rights Element to the City's Comprehensive Plan. The new Element is required by Section 163.3177(6)(i), Florida Statues. The proposed text amendment is not anticipated to have significant adverse impacts to transportation resources or facilities of state importance.

Ordinance 22-04
The City of Alachua has transmitted a Large Scale Future Land Use Map (FLUM) Amendment to re-designate the land use of 160.2 acres, located south of US-441 and east of Cellon Creek Boulevard. The amendment changes the land use from Moderate Density Residential (±102.5 acres), High Density Residential (±16.1 acres), Commercial (±25.4 acres), and Community Commercial (±16.3 acres) to Corporate Park. The existing land uses allows a total of 651 dwelling units and 908,226 sq. ft. of commercial uses, while the proposed land use allows a maximum of 3,489,156 sq. ft. of corporate park uses.

As proposed, the amendment will result in 2,577 PM Peak Hour trips, an increase of 128 PM Peak Hour trips over the existing land uses (See Attachment A) and may have adverse impacts to the State Highway System. FDOT recommends that a traffic operational analysis is provided to address the specific external impacts as a result of this land use amendment. FDOT is available to assist in a methodology meeting and determine any assumptions used.

We appreciate the opportunity to review the proposed comprehensive plan amendment and request that a copy of the amendment, along with the supporting data and analysis be transmitted to the FDOT upon its adoption.

If you have any questions, please do not hesitate to contact me by email: brian.austin@dot.state.fl.us or call: (904) 360-5664.

Sincerely,

Brian Austin

SUBJECT: City of Alachua Proposed Comprehensive Plan Amendment (22-1ESR)

Technical Assistance

Trip Generation

The City of Alachua has transmitted a Large Scale Future Land Use Map (FLUM) Amendment to re-designate the land use of 160.2 acres, located south of US-441 and east of Cellon Creek Boulevard. The amendment changes the land use from Moderate Density Residential (±102.5 acres), High Density Residential (±16.1 acres), Commercial (±25.4 acres), and Community Commercial (±16.3 acres) and to Corporate Park. The existing land uses allows a total of 651 dwelling units and 908,226 sq. ft. of commercial uses, while the proposed land use allows a maximum of 3,489,156 sq. ft. of corporate park uses. Table 1 shows the estimated trip generation using ITE's *Trip Generation Manual, 10th Edition.*

Table 1

Scenario	Land Use	ITE Code	Size	Units	Daily Trips	AM Peak Trips	PM Peak Trips
Existing	Single Family Residential	210	651	Dwelling Units	5,827	467	614
	Shopping Center	820	908,226	1,000 Sq. Ft.	17,788*	400*	1,835*
				Total	**23,615**	**867**	**2,449**
Proposed	General Office Building	710	1,744,578	1,000 Sq. Ft.	16,989	1,666	1,722
	Research and Development Center	760	1,744,578	1,000 Sq. Ft.	18,052	733	855
				Total	**35,041**	**2,399**	**2,577**
				Net Difference	**+11,426**	**+733**	**+128**

**34% Pass-By*

The proposed FLUM amendment will increase PM Peak Hour trips by 128 trips.

Re: Alachua 22-01ESR – Expedited State Review of Proposed Comprehensive Plan Amendment

The Office of Intergovernmental Programs of the Florida Department of Environmental Protection (Department) has reviewed the above-referenced amendment package under the provisions of Chapter 163, Florida Statutes. The Department conducted a detailed review that focused on potential adverse impacts to important state resources and facilities, specifically: air and water pollution; wetlands and other surface waters of the state; federal and state-owned lands and interest in lands, including state parks, greenways and trails, conservation easements; solid waste; and water and wastewater treatment.

Based on our review of the submitted amendment package, the Department has found no provision that, if adopted, would result in adverse impacts to important state resources subject to the Department's jurisdiction.

Please submit all future amendments by email to Plan.Review@FloridaDEP.gov. If your submittal is too large to send via email or if you need other assistance, contact Lindsay Weaver at (850) 717-9037.

CAUTION: This email originated from outside the City.

DO NOT respond, click, or open attachments unless you recognize the sender **(name AND email address)** and know the content is safe.

Should there still be any question on the origin of this email, contact the IT Department immediately.

Russia destroys Ukrainian refugee shelter

Two sides express optimism in negotiations to end the fighting

Andrea Rosa
ASSOCIATED PRESS

KYIV, Ukraine – Russian forces destroyed a theater in Mariupol where hundreds of people were sheltering Wednesday and rained fire on other cities, Ukrainian authorities said, even as the two sides projected optimism over efforts to negotiate an end to the fighting.

The airstrike ripped apart the center of the once-elegant building, where hundreds of civilians had been living since their homes had been destroyed in the fighting, Ukraine's foreign ministry said in a statement.

Many people were buried in the rubble, officials said, though there was no immediate word on how many had been killed or injured. Satellite imagery from Monday showed the word "children" written in large white letters in Russian in front of and behind the building, the Maxar space technology company said.

"Another horrendous war crime in Mariupol," Ukrainian Foreign Minister Dmytro Kuleba said on Twitter, calling the bombing a "massive Russian attack."

The Russian defense ministry denied bombing the theater or anywhere else in Mariupol on Wednesday.

In Kyiv, residents huddled in homes and shelters amid a citywide curfew that runs until Thursday morning, as Russian troops shelled areas in and around the city, including a residential neighborhood 1.5 miles from the presidential palace. A 12-story apartment building in central Kyiv erupted in flames after being hit by shrapnel.

Ten people were killed while standing in line for bread in the northern city of Chernihiv, the Ukrainian General Prosecutor's Office said.

Ukrainian President Volodymyr Zelenskyy, meanwhile, went before the U.S. Congress via video and, invoking Pearl Harbor and 9/11, pleaded with America for more weapons and tougher sanctions against Russia, saying: "We need you right now."

U.S. President Joe Biden announced the U.S. is sending an additional $800 million in military aid to Ukraine, including more anti-aircraft and anti-tank weapons and drones. He also called Vladimir Putin a "war criminal" in his sharpest condemnation of the Russian leader since the invasion began.

International pressure against the Kremlin mounted and its isolation deepened as the International Court of Justice, also known as the World Court, ordered Russia to stop attacking Ukraine, though there was little hope it would comply. Also, the 47-nation Council of Europe, the continent's foremost human rights body, expelled Russia.

While Moscow's ground advance on the Ukrainian capital appeared largely stalled, Putin said the operation was unfolding "successfully, in strict accordance with pre-approved plans." He also decried Western sanctions against Moscow, accusing the West of trying to "squeeze us, to put pressure on us, to turn us into a weak, dependent country."

Hopes for diplomatic progress to end the war rose after Zelenskyy acknowledged Tuesday in the most explicit terms yet that Ukraine is unlikely to realize its goal of joining NATO.

Another round of talks between the two sides was scheduled for Wednesday. After Tuesday's negotiations, Russian Foreign Minister Sergey Lavrov said a neutral military status for Ukraine was being "seriously discussed" by the two sides, while Zelenskyy said Russia's demands for ending the war were becoming "more realistic."

Hopes for diplomatic progress to end the war rose after Zelenskyy acknowledged Tuesday in the most explicit terms yet that Ukraine is unlikely to realize its goal of joining NATO. Putin has long depicted Ukraine's NATO aspirations as a threat to Russia.

Lavrov welcomed Zelenskyy's comment and said "the businesslike spirit" starting to surface in the talks "gives hope that we can agree on this issue."

"A neutral status is being seriously discussed in connection with security guarantees," Lavrov said on Russian TV. "There are concrete formulations that in my view are close to being agreed."

Russia's chief negotiator, Vladimir Medinsky, said the sides were discussing a possible compromise for a Ukraine with a smaller, non-aligned military.

Prospects for a diplomatic breakthrough were highly uncertain, however, given the gulf between Ukraine's demand that the invading forces withdraw completely and Russia's suspected aim of replacing Kyiv's Westward-looking government with a pro-Moscow regime.

Ukrainian presidential adviser Mykhailo Podolyak denied Russian claims that Ukraine was open to adopting a model of neutrality comparable to Sweden or Austria. Podolyak said Ukraine needs powerful allies and "clearly defined security guarantees" to keep it safe.

Another source of dispute is the status of Crimea, which was seized and annexed by Russia in 2014, and the separatist-held Donbas region in eastern Ukraine, which Russia recognizes as independent. Ukraine considers both part of its territory.

The fighting has sent more than 3 million people fleeing Ukraine, by the United Nations' estimate. The U.N. reported that over 700 civilians have been confirmed killed, but that the real number is higher.

In going before Congress, Zelenskyy said that Russia "has turned the Ukrainian sky into a source of death for thousands of people." But Biden has rejected Zelenskyy's requests to send warplanes to Ukraine or establish a no-fly zone over the country because of the risk of triggering war between the U.S. and Russia.

The head of the International Committee of the Red Cross, Peter Maurer, arrived in Ukraine to try to obtain greater access for aid groups and increased protection for civilians.

Amid the vast humanitarian crisis caused by the war, the Red Cross has helped evacuate civilians from besieged areas and has delivered 200 tons of aid, including medical supplies, blankets, water and over 5,200 body bags to help "ensure the dead are treated in a dignified manner."

Nowhere has suffered more than the encircled city of Mariupol, where local officials say missile strikes and shelling have killed more than 2,300 people. The southern seaport of 430,000 has been under attack for almost all of the three-week war in a siege that has left people struggling for food, water, heat and medicine.

Local authorities said Russian forces took hundreds of people hostage at a Mariupol hospital and were using them as human shields.

Bodies have been buried in trenches in Mariupol, and more corpses lay in the streets and in a hospital basement.

Using the flashlight on his cellphone to illuminate the basement, Dr. Valeriy Drengar pulled back a blanket to show the body of an infant 22 days old. Other wrapped bodies also appeared to be children, given their size.

"These are the people we could not save," Drengar said.

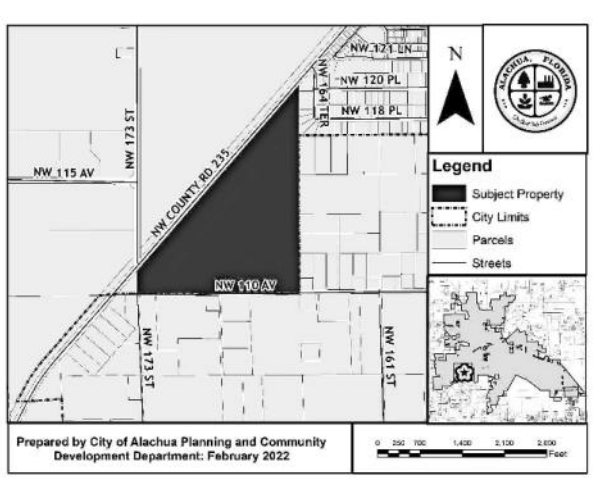
Nearly 30,000 people managed to escape the city on Tuesday in thousands of vehicles by way of a humanitarian corridor, city officials said.

But with humanitarian aid unable to get in amid the constant bombardment, people burn scraps of furniture to warm their hands and cook the little food still available.

Kyiv regional leader Oleksiy Kuleba said Russian forces had intensified fighting in the Kyiv suburbs and a highway leading west, and that across the capital region, "kindergartens, museums, churches, residential blocks and engineering infrastructure are suffering from the endless firing."

In other developments, the mayor of the city of Melitopol, who was seized by Russian forces five days ago, has been freed, said Zelenskyy chief of staff Andriy Yermak. No details were given about how he became free.

Ukraine also appeared to have successes, with satellite photos from Planet Labs PBC analyzed by The Associated Press showing helicopters and vehicles ablaze at the Russian-held Kherson airport and air base after a suspected Ukrainian strike on Tuesday.



PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on March 28, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

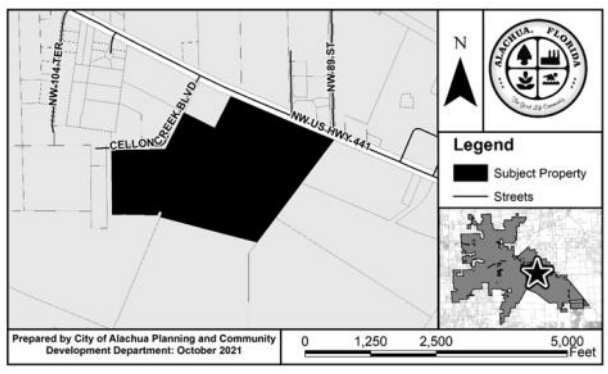
The ordinance title is as follows:

ORDINANCE 22-10

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS; AMENDING THE OFFICIAL ZONING ATLAS FROM AGRICULTURAL ("A") TO PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") ON APPROXIMATELY 118 ACRES; LOCATED SOUTH OF THE PILOT FOREST SUBDIVISION AND EAST OF CR 235; TAX PARCEL NUMBER 03980-002-001; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

GF-29206541



PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on March 28, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-04

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE LARGE SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION ON ±160.2 ACRES FROM COMMERCIAL (±25.4 ACRES), COMMUNITY COMMERCIAL (±16.3 ACRES), HIGH DENSITY RESIDENTIAL (±16.1 ACRES), AND MODERATE DENSITY RESIDENTIAL (±102.5 ACRES) TO CORPORATE PARK ON A PARCEL OF LAND GENERALLY LOCATED SOUTH OF THE INTERSECTION OF NW US HIGHWAY 441 AND SOUTHERN PRECAST DRIVE AND EAST OF CELLON CREEK BOULEVARD; CONSISTING OF TAX PARCEL NUMBER 05949-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on March 28, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-04

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE LARGE SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION ON ±160.2 ACRES FROM COMMERCIAL (±25.4 ACRES), COMMUNITY COMMERCIAL (±16.3 ACRES), HIGH DENSITY RESIDENTIAL (±16.1 ACRES), AND MODERATE DENSITY RESIDENTIAL (±102.5 ACRES) TO CORPORATE PARK ON A PARCEL OF LAND GENERALLY LOCATED SOUTH OF THE INTERSECTION OF NW US HIGHWAY 441 AND SOUTHERN PRECAST DRIVE AND EAST OF CELLON CREEK BOULEVARD; CONSISTING OF TAX PARCEL NUMBER 05949-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

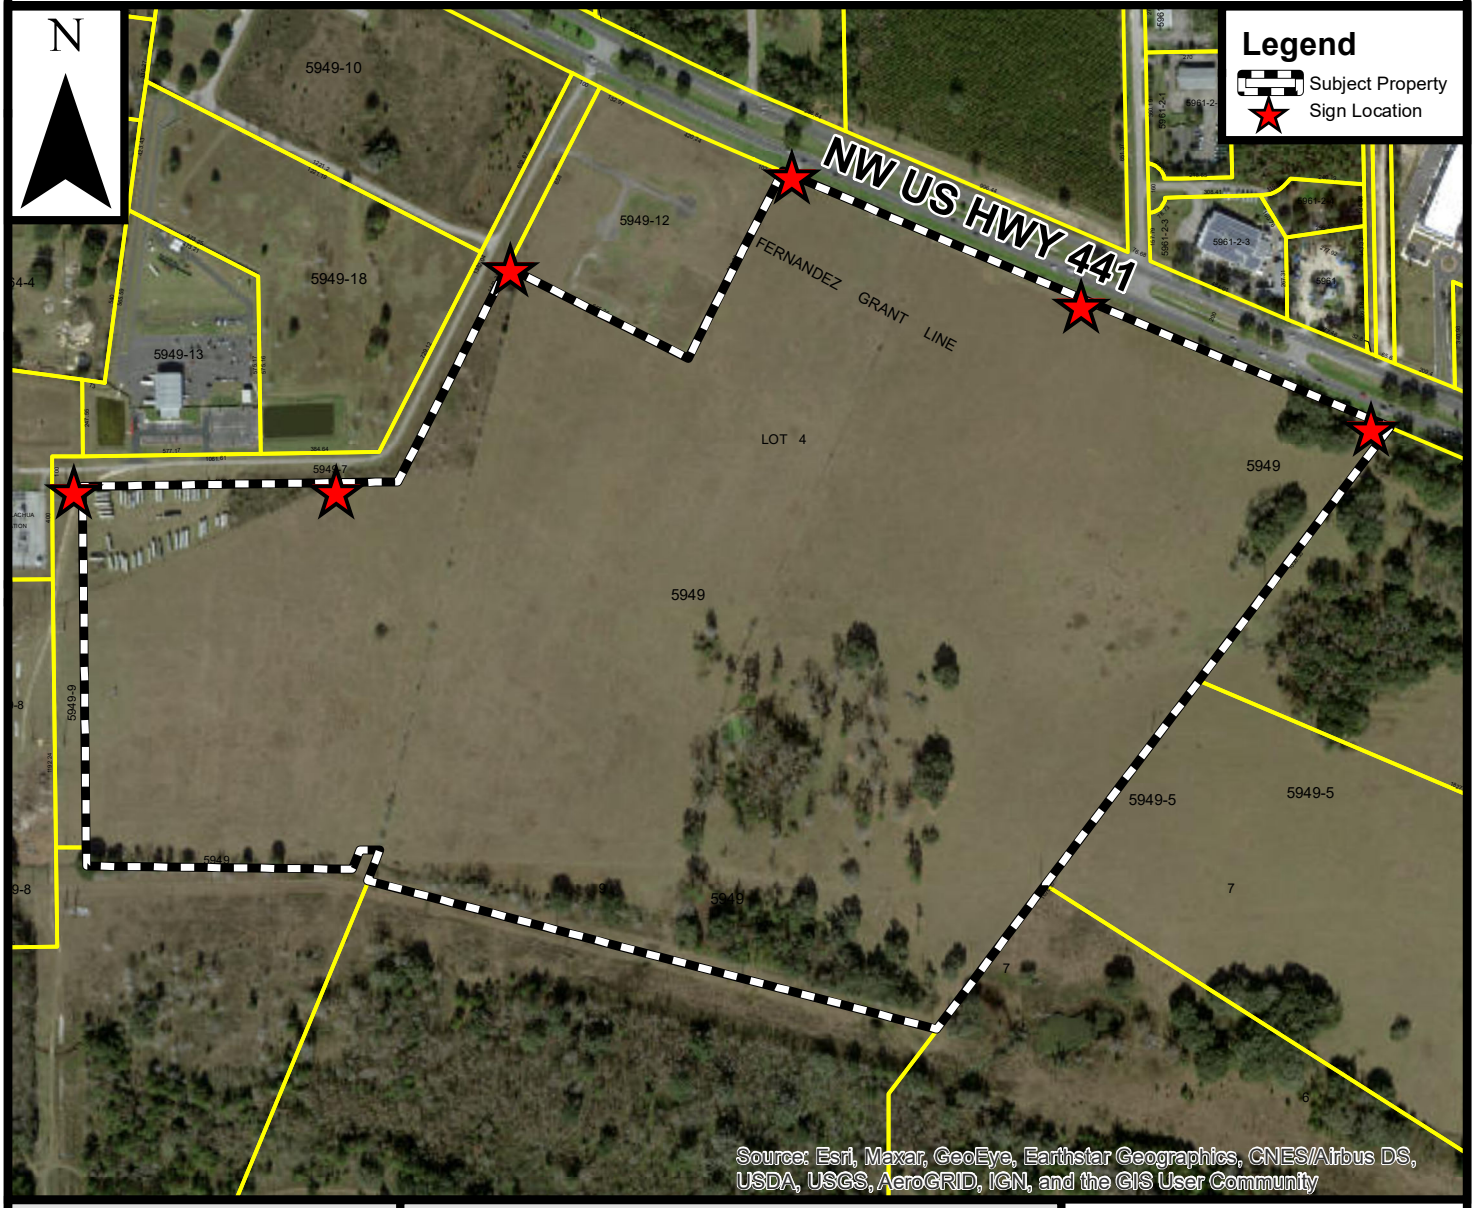
(number of signs)



IMPORTANT INFORMATION REGARDING POSTED NOTICE SIGNS

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

Signs must be removed by the applicant and returned to the City within ten days after the final decision on the application.

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Ordinance 22-05, Second Reading: Site-Specific Amendment to the Official Zoning Atlas (Rezoning) – Cellon Creek: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for San Felasco Research Ventures, LLC, property owner, for consideration of a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to amend the Official Zoning Atlas on a ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP). Tax Parcel Number 05949-000-000 (Quasi-Judicial Hearing).
PREPARED BY: Justin Tabor, AICP, Principal Planner

RECOMMENDED ACTION:
Staff recommends that the City Commission adopt Ordinance 22-05 on second and final reading upon making the following motion:

Based upon the competent substantial evidence presented at this hearing, the presentation before this Commission, and Staff's recommendation, this Commission finds the application for a Site-Specific Amendment to the Official Zoning Atlas submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of San Felasco Research Ventures, LLC for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and adopts Ordinance 22-05 on second and final reading.

Summary

The proposed Site-Specific Amendment to the Official Zoning Atlas (Rezoning) is a request by Seth Wood of Causseaux, Hewett, & Walpole, Inc., applicant and agent for San Felasco Research Ventures, LLC, for the consideration of an amendment to the Official Zoning Atlas to amend the zoning on a ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP).

The applicant has submitted a companion Large Scale Comprehensive Plan Amendment which proposes to amend the Future Land Use Map (FLUM) Designation of the subject property from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park.

Density Residential (±102.5 acres) to Corporate Park.
The FLUM Designations of the property were amended from Agriculture to is current designations in March 2008. There were several applications received (in 2012, 2014, 2016, and 2017) to amend the zoning to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM), however, each of these applications were ultimately withdrawn.
The subject property is generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard. The property undeveloped and is primarily comprised of cleared pasture, however, there are some naturally wooded areas located in the south-central portion of the property and along the south property line.

The general purposes of the Business zone districts are established and described in Section 3.5.1 of the City's Land Development Regulations (LDRs):
3.5.1 *General purposes.* The business zone districts are established for the general purpose of ensuring there are lands in the City that provide a wide range of office, retail, service, light industrial and related uses to meet household and business needs, and more specifically:

(A) *Provide appropriately located lands for business uses consistent with Comprehensive Plan.* Provide appropriately located lands in areas served by water and sewer for the full range of business uses needed by Alachua's residents, businesses, and workers, consistent with the goals, objectives, and policies of the Comprehensive Plan;
(B) *Strengthen economic base.* Strengthen the City's economic base, and provide employment opportunities close to home for residents of the City and surrounding communities;
(C) *Provide suitable environment for business uses.* Create suitable environments for various types of business uses, and protect them from the adverse effects of incompatible uses; and
(D) *Minimize impact of business development on residential districts and uses.* Minimize the impact of business development on residential districts and uses.

The specific purpose of the Corporate Park (CP) zone district is established and described in Section 3.5.2(F)(1) of the City's Land Development Regulations (LDRs):
3.5.2(F) *CP, Corporate Park District.*

(1) The CP District is established and intended to accommodate a range of research and development, technology and life sciences/biotechnology industries, office, and supporting retail. Complementary residential uses may also be permitted within the CP District as set forth in Subsection

may also be permitted within the CP District as set forth in Subsection 3.5.2(F)(2). By allowing a range of permitted uses, the CP District is intended to accommodate the development of "flex space" arrangements. Flex space allows a developer to establish different combinations of uses on a site over time.

At the December 14, 2021 Planning and Zoning Board Meeting, the Board voted 4-0 in favor of forwarding the application to the City Commission with a recommendation to approve.

At the January 10, 2022 City Commission Meeting, the Commission voted 5-0 to approve Ordinance 22-05 on first reading.

ORDINANCE 22-05

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS; AMENDING THE OFFICIAL ZONING ATLAS ON ±160.2 ACRES FROM AGRICULTURAL (A) TO CORPORATE PARK (CP) ON A PARCEL OF LAND GENERALLY LOCATED SOUTH OF THE INTERSECTION OF NW US HIGHWAY 441 AND SOUTHERN PRECAST DRIVE AND EAST OF CELLON CREEK BOULEVARD; CONSISTING OF TAX PARCEL NUMBER 05949-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

R E C I T A L S

WHEREAS, an application for a Site-Specific Amendment to the Official Zoning Atlas ("Amendment"), as described below, has been filed with the City; and

WHEREAS, on December 2, 2021 the City advertised a public hearing to be held before the Planning and Zoning Board, sitting as the Local Planning Agency ("LPA"); and

WHEREAS, on December 14, 2021 the LPA conducted a quasi-judicial public hearing on the proposed Amendment and the LPA reviewed and considered all comments received during the public hearing concerning the proposed Amendment and made its recommendation to the City Commission; and

WHEREAS, on December 30, 2021 and on March 17, 2022 the City advertised public hearings to be held before the City Commission; and

WHEREAS, on January 10, 2022 and on March 28, 2022 the City Commission conducted quasi-judicial public hearings on the proposed Amendment and provided for and received public participation at both public hearings; and

WHEREAS, the City Commission has determined and found the proposed Amendment to be consistent with the City's Comprehensive Plan and the City's Land Development Regulations ("LDRs"); and

WHEREAS, for reasons set forth in this ordinance that is hereby adopted and incorporated as findings of fact, the Alachua City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare.

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA:

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and are incorporated herein by reference.
2. The proposed Amendment is in compliance with the City's LDRs.
3. The proposed Amendment will not cause a reduction in the adopted level of service standards for transportation, water, sewer, waste, stormwater, recreation, and public schools.

Section 2. Official Zoning Atlas Amended

The Official Zoning Atlas is hereby amended on Tax Parcel Number 05949-000-000 from Agricultural (A) to Corporate Park (CP), in accordance with the legal description found in Exhibit "A" and map found in Exhibit "B" attached hereto and incorporated herein.

Section 3. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of Alachua, Florida.

Section 4. Repealing Clause

All ordinances or parts of ordinances in conflict herewith are, to the extent of the conflict, hereby repealed.

Section 5. Severability

It is the declared intent of the City Commission of the City of Alachua that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance, and the remainder of the ordinance after the exclusions of such part or parts shall be deemed to be valid.

Section 6. Effective Date

This ordinance shall take effect immediately upon its adoption by the City Commission and the signature of the Mayor.

PASSED on First Reading the 10th day of January, 2022.

PASSED and **ADOPTED**, in regular session, with a quorum present and voting, by the City Commission, upon second and final reading this 28th day of March, 2022.

- Legal Description;
- Deed, Property Appraiser Data Sheet, Tax Records;
- Neighborhood Meeting Materials;
- Justification Report;
- Student Generation Form; and
- Map Set of Project Site

This application requests a rezoning from Agriculture (A) to Corporate Park (CP) on approximately 160.2 acres within the City of Alachua, with the intent of facilitating the development of a mixed-use project with focus on employment-generating opportunities, in line with the spirit and intent of the Corporate Park district. This Rezoning application is submitted concurrently with a Large-scale Comprehensive Plan Amendment application, requesting to change the Future Land Use (FLU) classifications of the site from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park.

We trust you will find this submittal package is sufficient for review and approval. Please feel free to contact me at (352) 331-1976 or at sethw@chw-inc.com should you have any questions or require any additional information to complete your review.

Sincerely,
CHW

Seth Wood

Site Specific Amendment to the Official Zoning Atlas Amendment (Rezoning) Application

Reference City of Alachua Land Development Regulations Article 2.4.2

A. PROJECT

1. Project Name: Cellon Creek
2. Address of Subject Property: _____
3. Parcel ID Number(s): 05949-000-000
4. Existing Use of Property: Vacant
5. Future Land Use Map Designation : Commercial, Community Commercial, Moderate Density Residential, and High Density Residential
6. Existing Zoning Designation: Agriculture (A)
7. Proposed Zoning Designation: Corporate Park District (CP)
8. Acreage: ±160.2

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☒ Agent
2. Name of Applicant(s) or Contact Person(s): Seth Wood Title: Project Planner
   Company (if applicable): CHW
   Mailing address: 11801 Research Drive
   City: Alachua State: Florida ZIP: 32615
   Telephone: (352) 331 - 1976 FAX: ( ) e-mail: sethw@chw-inc.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): University of Florida Foundation Inc.
   Mailing Address: PO Box 144425
   City: Gainesville State: Florida ZIP: 32604-2425

   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☐ Yes ☒ No
   If yes, list names of all parties involved: _____
   If yes, is the contract/option contingent or absolute? ☐ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change, including a map showing the proposed zoning change and zoning designations on surrounding properties
2. A current aerial map or plat of the property. (may be obtained from the Alachua County Property Appraiser.)
3. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.
4. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

5. Analysis of compliance with the Standards for Site Specific Amendments to the Official Zoning Atlas, as defined in Section 2.4.2 of the Land Development Regulations (LDRs), and listed below:

   i. Consistent with Comprehensive Plan
   The proposed amendment is consistent with and furthers the goals, objectives, and policies of the Comprehensive Plan.

   ii. Consistent with Ordinances
   The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

   iii. Logical Development Pattern
   The proposed amendment would result in a logical and orderly development pattern.

   iv. Pre-Mature Development
   The proposed amendment will not create premature development in undeveloped or rural areas.

   v. Incompatible with Adjacent Lands
   The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

   vi. Adverse Effect on Local Character
   The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights, or other physical effects or nuisances.

   vii. Not Deviate from Pattern of Development
   The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

   viii. Encourage Sprawl
   The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low density single dimensional development.

   ix. Spot Zoning
   The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

   x. Public Facilities
   The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, storm water management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

   xi. No Adverse Effect on the Environment
   The proposed amendment would not result in significantly adverse impacts on the natural environment, including but not limited to water, air, noise, storm water management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

6. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's Land Development Regulations
   ii. Copy of written notice (letter) sent to all property owners within 400 feet, and mailing labels or list of those who received written notice
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

8. For applications requesting a zoning which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

WARRANTY DEED

THIS INDENTURE, made this 24th day of February, 1983, between CONTEXT DEVELOPMENT CO., a Delaware corporation, Grantor, and UNIVERSITY OF FLORIDA FOUNDATION, INC., a Florida corporation, whose post office address is Post Office Box 14425, Gainesville, Florida 32604, Grantee,

WITNESSETH:

That said Grantor, for and in consideration of the sum of Ten Dollars ($10.00) and other good and valuable considerations to said Grantor in hand paid by said Grantee, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the said Grantee, and Grantee's successors and assigns, forever, the following described land, situate, lying and being in Alachua County, Florida, to-wit:

A part of Sections 13, 14, 23 and 24, Fractional Sections 25 and 26, the F. R. Sanchez Grant, and the Fernandez Grant in Township 8 South, Range 18 East, together with a part of Fractional Sections 19, 20 and 29, the J. S. Sanchez Grant, the John Sanchez Grant and the Fernandez Grant in Township 8 South, Range 19 East, all in Alachua County, Florida, being more particularly described as follows:

Commence at the northwest corner of said Fractional Section 26 and run thence North 89 deg. 11 min. 05 sec. East along the North boundary thereof, 40.11 feet to the easterly right-of-way line of County Road No. 241 (80 foot R/W) and the Point of Beginning; thence run South 01 deg. 06 min. 36 sec. East, along said right-of-way line, 333.27 feet to the beginning of a curve, concave easterly, and having a radius of 11,419.20 feet, thence southeasterly along and with the arc of said curve and along said right-of-way line, through a central angle of 03 deg. 07 min. 37 sec., an arc distance of 623.21 feet to the end of said curve, thence South 04 deg. 22 min. 27 sec. East, along said right-of-way line, 370.99 feet to the South boundary of the North one-half (N½) of the Northwest quarter (NW¼) of said Fractional Section 26, thence North 89 deg. 21 min. 05 sec. East along said south boundary, 583.29 feet to a Permanent Reference Monument (PRM) at the northwesternmost corner of Shaw Farms of Alachua, according to a plat thereof recorded in Plat Book L, Page 64 of the public records of Alachua County, Florida, thence continue North 89 deg. 21 min. 05 sec. East along said south boundary of North one-half (N½) of Northwest quarter (NW¼) and along the north boundary of said Shaw Farms of Alachua, 2397.15 feet to a PRM at the northeast corner of Lot 6 of said Shaw Farms of Alachua and the southeast corner of said North one-half (N½) of Northwest quarter (NW¼), thence North 01 deg. 07 min. 32 sec. West, along the east boundary of said North one-half (N½) of Northwest quarter (NW¼) and along the west boundary of said Shaw Farms of Alachua, 1335.02 feet to the northwest corner of Lot 22 of said Shaw Farms of Alachua and the northeast corner of said North one-half (N½) of Northwest quarter (NW¼), said point also being the southwest corner of Government Lot 2 of said Section 23, thence North 89 deg. 11 min. 53 sec. East, along the north boundary of said Shaw Farms of Alachua and

the south boundary of said Section 23, a distance of 1637.45 feet, to an intersection with the northerly boundary of the F. R. Sanchez Grant, thence South 65 deg. 00 min. 32 sec. East, along the northerly boundary of said Shaw Farms and the northerly boundary of the F. R. Sanchez Grant, 3132.95 feet to the northeasterly corner of said Shaw Farms of Alachua; thence continue South 65 deg. 00 min. 32 sec. East along said northerly boundary of the Sanchez Grant, 2113.89 feet to the northwest corner of Lot 1 of Haile Estates in the F. R. Sanchez Grant according to a plat thereof recorded in Plat Book A, Page 56, of the public records of Alachua County, Florida; thence South 25 deg. 29 min. 34 sec. West, along the west boundary of said Lot 1, a distance of 1638.16 feet to the northwest corner of Lot 9 of said Haile Estates, said point also being the northeasterly corner of Alachua Highlands, Unit No. 1, according to a plat thereof recorded in Plat Book K, Page 56, of the public records of Alachua County, Florida; thence South 25 deg. 22 min. 48 sec. West, along the westerly boundary of said Lot 9 and the easterly boundary of Lots 1, 2 and 3 of said Alachua Highlands, Unit No. 1, a distance of 949.80 feet to the northerly boundary of the Hammock Lands conveyed to the State of Florida and recorded in Official Records Book 908 at pages 858 through 860, thence North 81 deg. 31 min. 14 sec. East, along said northerly boundary, 4009.08 feet, thence North 86 deg. 31 min. 58 sec. East, along said northerly boundary, 3610.46 feet, thence South 81 deg. 38 min. 52 sec. East, along said northerly boundary, 1949.33 feet, thence North 06 deg. 47 min. 16 sec. East, 1404.87 feet, thence South 71 deg. 05 min. 04 sec. East, 92.64 feet, thence North 34 deg. 13 min. 59 sec. East, 1476.82 feet, thence North 88 deg. 22 sec. 53 sec. East, 1252.57 feet, thence North 00 deg. 38 min. 14 sec. East, 1301.36 feet to the southerly right-of-way line of State Road 25, U. S. 441 (200 foot R/W) thence North 72 deg. 58 min. 52 sec. West, along said southerly right-of-way line, 225.69 feet to the beginning of a curve concave northeasterly and having a radius of 11,609.20 feet, thence northwesterly along and with the arc of said curve and along said right-of-way line through a central angle of 06 deg. 52 min. 00 sec. an arc distance of 1391.32 feet to the end of said curve, thence North 66 deg. 03 min. 55 sec. West, along said right-of-way line, 345.63 feet, thence South 23 deg. 56 min. 05 sec. West, 607.82 feet, thence North 60 deg. 14 min. 54 sec. West, 160.83 feet, thence North 23 deg. 56 min. 05 sec. East, 591.52 feet to said southerly right-of-way line, thence North 66 deg. 03 min. 55 sec. West, along said southerly right-of-way line, 3888.56 feet to the beginning of a curve, concave northeasterly and having a radius of 5896.58 feet, thence northwesterly along and with the arc of said curve and along said right-of-way line through a central angle of 04 deg. 05 min. 00 sec. an arc distance of 420.24 feet to the end of said curve, thence North 61 deg. 57 min. 50 sec. West, along said southerly right-of-way line 1681.47 feet, thence South 08 deg. 50 min. 07 sec. West, 1680.29 feet, thence North 81 deg. 10 min. 24 sec. West, 944.33 feet, thence North 08 deg. 49 min. 45 sec. East, 2008.91 feet to the aforementioned southerly right-of-way line of State Road No. 25, thence North 61 deg. 59 min. 14 sec. West,

along said right-of-way line, 882.07 feet, thence South 00 deg. 35 min. 40 sec. East, 1523.91 feet, thence South 89 deg. 22 min. 03 sec. West, 399.61 feet to a point on the east boundary of Section 24, Township 8 South, Range 18 East, thence South 00 deg. 35 min. 54 sec. East along said east boundary, 1245.81 feet to the northeast corner of the Southeast quarter (SE¼) of Southeast quarter (SE¼) of said Section 24, thence North 89 deg. 46 min. 15 sec. West, along the north boundary of said Southeast quarter (SE¼) of Southeast quarter (SE¼), 1218.03 feet to the southeast corner of the South one-half (S½) of the Northwest quarter (NW¼) of Southeast quarter (SE¼) of said Section 24, thence North 01 deg. 01 min. 46 sec. West, along the east boundary of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼), 661.14 feet to the northeast corner of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼), thence North 89 deg. 43 min. 32 sec. West along the north boundary of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼), 1222.41 feet to the northwest corner of said South one-half (S½) of Northwest quarter (NW¼) of Southeast quarter (SE¼) and the East boundary of Government Lot 4 of said Section 24, thence North 01 deg. 27 min. 18 sec. West, along the east boundary of Government Lots 4 and 1, a distance of 2782.53 feet to the southerly right-of-way line of State Road No. 25 (U.S. Highway 441) thence continue North 01 deg. 27 min. 18 sec. West, along the east boundary of said Government Lot 1, a distance of 201.49 feet to the North right-of-way line of said State Road No. 25, thence continue North 01 deg. 27 min. 18 sec. West, along said east boundary, 294.67 feet to the southeast corner of the Southwest quarter (SW¼) of Section 13, Township 8 South, Range 18 East, thence North 00 deg. 53 min. 56 sec. West, along the east boundary of said Southwest quarter (SW¼), 245.86 feet to the southerly right-of-way line of County Road No. S-340-A (66 foot R/W) thence North 81 deg. 38 min. 13 sec. West, along said southerly right-of-way line, 2307.19 feet to the beginning of a curve, concave northeasterly and having a radius of 1178.92 feet, thence northwesterly along and with said curve and along said right-of-way line, through a central angle of 12 deg. 00 min. 00 sec., an arc distance of 246.91 feet to the end of said curve, thence North 69 deg. 38 min. 13 sec. West, along said southerly right-of-way line, 99.39 feet to the beginning of a curve, concave southerly and having a radius of 539.96 feet, thence northwesterly along and with the arc of said curve and along said right-of-way line through a central angle of 30 deg. 54 min. 45 sec. an arc distance of 291.32 feet to said northerly right-of-way line of State Road No. 25, said arc being subtended by a chord having a bearing and distance of North 85 deg. 05 min. 36 sec. West, 287.80 feet, thence South 76 deg. 57 min. 08 sec. West, 254.78 feet to said southerly right-of-way line of State Road No. 25 (the right-of-way of County Road No. S-340-A becomes 50 feet at this point and remains 50 feet to the west) said point being on the arc of a curve, concave southeasterly and having a radius of 547.96 feet, thence southwesterly along and with the arc of said curve and along said southerly right-of-way line through a central angle of 11 deg. 39 min. 42 sec. an arc

distance of 111.53 feet to the end of said curve, said arc being subtended by a chord having a bearing and distance of South 60 deg. 48 min. 38 sec. West, 111.34 feet, thence South 54 deg. 58 min. 47 sec. West, along said southerly right-of-way line of County Road S-340-A, 123.99 feet to the beginning of a curve, concave northwesterly and having a radius of 843.51 feet, thence southwesterly along and with the arc of said curve and along said southerly right-of-way line, through a central angle of 14 deg. 48 min. 00 sec., an arc distance of 217.88 feet to the end of said curve, thence South 69 deg. 46 min. 47 sec. West, along said southerly right-of-way line, 248.93 feet to the beginning of a curve, concave northwesterly and having a radius of 1934.86 feet, thence southwesterly along and with the arc of said curve and along said southerly right-of-way line through a central angle of 05 deg. 50 min. 26 sec., an arc distance of 197.23 feet, said arc being subtended by a chord having a bearing and distance of South 72 deg. 42 min. 00 sec. West, 197.15 feet to the west boundary of the Southeast quarter (SE¼) of Southeast quarter (SE¼) of Section 14, Township 8 South, Range 18 East, thence South 01 deg. 35 min. 12 sec. East, along said west boundary of Southeast quarter (SE¼) of Southeast quarter (SE¼), 84.01 feet to the intersection with the easterly right-of-way line of an 80 foot right-of-way owned by the City of Alachua and recorded in Official Records Book 1279 at pages 840 through 841 of the public records of Alachua County, Florida; thence South 47 deg. 28 min. 41 sec. East, along said easterly right-of-way line 55.70 feet, thence South 01 deg. 35 min. 12 sec. East, 40.00 feet from and parallel to said west boundary of Southeast quarter (SE¼) of Southeast quarter (SE¼), 121.89 feet to the north boundary of the Northeast quarter (NE¼) of Northeast quarter (NE¼) of Section 23, Township 8 South, Range 18 East, thence North 89 deg. 31 min. 38 sec. East, along said north boundary, 191.44 feet, thence South 77 deg. 25 min. 05 sec. East, 833.14 feet, thence South 01 deg. 24 min. 55 sec. East, 465.34 feet, thence South 89 deg. 31 min. 38 sec. West, parallel to said north boundary, 1000.11 feet to said east right-of-way line, thence South 01 deg. 24 min. 04 sec. East, 40 feet from and parallel to the west boundary of said Northeast quarter (NE¼) of Northeast quarter (NE¼), 678.82 feet to the south boundary of said Northeast quarter (NE¼) of Northeast quarter (NE¼), thence North 89 deg. 14 min. 54 sec. East, along said south boundary, 1280.72 feet to the west boundary of the aforementioned Section 24, thence South 01 deg. 24 min. 48 sec. East, along said west boundary, 1959.51 feet to the southeast corner of property owned by the City of Alachua and recorded in Official Records Book 908 at pages 844 through 845 of the public records of Alachua County, Florida; thence South 88 deg. 57 min. 05 sec. West, along the south boundary of said City of Alachua property, 4165.85 feet; thence South 01 deg. 27 min. 01 sec. East, 659.40 feet to the north boundary of the South one-half (S½) of the Southwest quarter (SW¼) of said Section 23, thence South 89 deg. 20 min. 34 sec. West, along said north boundary, 1502.00 feet to the east right-of-way line of County Road No. 241 (80 foot R/W) thence South 01 deg. 06 min. 36 sec. East, along said east right-of-way line, 1334.44 feet to the Point of Beginning. Less the rights-of-way of U. S. Highway 441 and State Road 25.

Containing 2124.36 acres more or less excluding the area lying within the right-of-way of State Road No. 25.

ALSO:

Lots 5, 6, 9, 14, and the East 1/2 of Lot 13 of Haile Estates in Fractional Section 35, Township 8 South, Range 18 East, Alachua County, Florida, according to a plat thereof recorded in Plat Book "A", Page 56, of the public records of Alachua County, Florida; less rights of way for Interstate Highway No. I-75 (State Road 93) and a County Graded Road; and being more particularly described as follows:

Commence at the Southwest Corner of said Fractional Section 35 and run thence South 89 deg. 16 min. 33 sec. East, along the South boundary of said Fractional Section, 1984.75 feet to the Southwest Corner of said East Half (E-1/2) of Lot 13, and the Point of Beginning; thence continue South 89 deg. 16 min. 33 sec. East, along said South boundary, 1831.88 feet, to a point on the Southwesterly right of way line of said Interstate Highway No. I-75 (State Road No. 93), said point lying on the arc of a curve concave Southwesterly and having a radius of 14,217.94 feet; thence Northwesterly along the arc of said curve and along said right of way line through a central angle of 07 deg. 19 min. 25 sec., an arc distance of 1817.39 feet, said arc being subtended by a chord having a bearing and distance of North 41 deg. 08 min. 24 sec. West, 1816.15 feet, to the end of said curve; thence North 44 deg. 48 min. 07 sec. West, along said Southwesterly right of way line, 15.28 feet, to a point on the West boundary of said Lot 9; thence South 01 deg. 29 min. 15 sec. East, along said West boundary of Lot 9, a distance of 18.24 feet, to the Northeast Corner of said East Half (E-1/2) of Lot 13; thence North 89 deg. 40 min. 56 sec. West, along the North boundary of said East Half (E-1/2) of Lot 13, a distance of 659.66 feet, to the Northwest Corner of said East Half (E-1/2) of Lot 13; thence South 01 deg. 24 min. 44 sec. East, along the West boundary of said East Half (E-1/2) of Lot 13, a distance of 1341.28 feet to the point of beginning. Containing 39.51 acres, more or less.

ALSO:

Commence at the Southwest Corner of said Fractional Section 35, and run thence North 01 deg. 11 min. 18 sec. West, along the West boundary of said Fractional Section, 2654.12 feet, to the Southwest Corner of the Northwest Quarter (NW-1/4) of said Fractional Section; thence South 89 deg. 43 min. 54 sec. East, 1315.86 feet, to the Southwest Corner of said Lot 5 and the Point of Beginning; thence continue South 89 deg. 43 min. 54 sec. East, along the South boundary of said Lot 5, a distance of 42.13 feet, to a point on the Southwesterly right of way line of said Interstate Highway No. I-75 (State Road No. 93); thence North 44 deg. 48 min. 07 sec. West, along said right of way line 61.49 feet; to a point on the West boundary of said Lot 5; thence South 01 deg. 34 min. 27 sec. East, along said West boundary 43.45 feet to the point of beginning. Containing 0.02 of an acre, more or less.

O.R. BOOK 1466 PAGE 381

ALSO:

Commence at the Southwest Corner of said Fractional Section 35 and run thence North 01 deg. 11 min. 18 sec. West, along the West boundary of said Fractional Section 2654.12 feet to the Southwest Corner of the Northwest Quarter (NW-1/4) of said Fractional Section; thence South 89 deg. 43 min. 54 sec. East, 1876.24 feet, to the intersection of the South boundary of said Lot 5 and the Northeasterly right of way line of said County Graded Road (66 foot right of way) and the Point of Beginning; thence continue South 89 deg. 43 min. 54 sec. East, along said South boundary of Lot 5, a distance of 755.48 feet, to the Northwest Corner of said Lot 9; thence South 01 deg. 29 min. 15 sec. East, along the West boundary of said Lot 9, a distance of 777.77 feet, to a point on said Northeasterly right of way line; thence South 44 deg. 48 min. 07 sec. East, along said right of way line, 1563.68 feet, to the beginning of a curve concave Southwesterly and having a radius of 7855.44 feet, thence Southeasterly along the arc of said curve and along said right of way line through a central angle of 02 deg. 44 min. 52 sec., an arc distance of 376.73 feet, said arc being subtended by a chord having a bearing and distance of South 43 deg. 25 min. 41 sec. East, 376.69 feet, to a point on the East boundary of said Lot 14; thence North 01 deg. 30 min. 45 sec. West, along the East boundary of said Lots 14, 9 and 6, a distance of 3515.19 feet, to the Northeast Corner of said Lot 6; thence North 89 deg. 59 min. 25 sec. West, along the North boundary of said Lots 6 and 5, a distance of 2641.10 feet to the Northwest Corner of said Lot 5; thence South 01 deg. 34 min. 27 sec. East, along the West boundary of said Lot 5, a distance of 770.34 feet to a point on said Northeasterly right of way line; thence South 44 deg. 48 min. 07 sec. East, along said right of way line, 817.76 feet to the Point of Beginning. Containing 122.72 acres, more or less.

SUBJECT TO THE FOLLOWING:

That certain oil and gas lease dated 29 March 1923, and recorded 24 April 1923, in Miscellaneous Records Book 11, Page 125, to Florida Mineral Oil and Sulphur Company.

Easement from H. C. Edwards and his wife, Susie S. Edwards, to Florida Power Corporation to construct, operate and maintain a single pole H-Frame tower line for the transmission and distribution of electricity, etc., over Lot 18 of L. L. Dell Estates, dated 3 February 1959, and recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida.

Special Warranty Deed from H. C. Edwards and wife, Susie S. Edwards, to the State of Florida for road right-of-way SE-93, over Lots 9, 14 and E-1/2 of Lot 13 of John Haile Estates Subdivision varying in width from 106 feet to 216 feet dated 23 February 1962, and recorded in Official Records Book 180, Page 594, together with a drainage easement covering the same lands recorded in Official Records Book 180, Page 596, of the public records of Alachua County, Florida.

Easement from H. C. Edwards and his wife, Susie S. Edwards, to Florida Power Corporation as in Easement recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida, dated 27 December 1962, and recorded in Official Records Book 219, Page 565, of the public records of Alachua County, Florida.

Easement from Donald M. Hough and his wife, Susie Mae Hough, to Florida Power Corporation as in Easement given by H. C. Edwards and his wife, Susie S. Edwards and recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida, dated 3 February 1959, covering Lot 18 of L. L. Dell Estates Subdivision and recorded in Official Records Book 50, Page 302, of the public records of Alachua County, Florida.

Easement and right-of-way for construction, operation and maintenance of a pole line for transmission and distribution of electricity dated 4 October 1926, and recorded in Deed Book 226, Page 131, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 27 January 1927, and recorded in Deed Book 226, Page 201, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 6 November 1926, and recorded in Deed Book 226, at Page 280, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 2 November 1926, and recorded in Deed Book 226, at Page 281, of the public records of Alachua County, Florida.

Easement to Florida Power Corporation dated 4 March 1963, and recorded in Official Records Book 221, Page 219, of the public records of Alachua County, Florida.

Easement to Florida Power Corporation dated 11 April 1963, and recorded in Official Records Book 227, Page 391, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 29 November 1926, and recorded 25 July 1946, in Deed Book 226, Page 156, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 1 December 1926, and recorded 25 July 1946, in Deed Book 226, Page 222, of the public records of Alachua County, Florida.

Easement to Pinellas County Power Company dated 29 November 1926, and recorded 25 July 1946, in Deed Book 226, Page 155, of the public records of Alachua County, Florida.

O.R. BOOK 1466 PAGE 383

Easement to Florida Power Corporation dated 9 October 1959, and recorded in Official Records Book 73, Page 517, of the public records of Alachua County, Florida.

Reservation of an undivided one-half (1/2) interest of all petroleum and petroleum products and title to an undivided three-fourths (3/4) of all other minerals as to the East Half (E-1/2) of the Southeast Quarter (SE-1/4) of the Southeast Quarter (SE-1/4) of Section 24, Township 8 South, Range 18 East, reserved to State of Florida in Deed recorded in Deed Book 320, at Page 186, of the public records of Alachua County, Florida.

Easement to City of Alachua dated 12 March 1974, and filed 16 October 1979, in Official Records Book 1241, Page 113, of the public records of Alachua County, Florida.

Easement condemned by the City of Gainesville in Case Number 82-1735-CA in the Circuit Court of Alachua County, Florida.

An outstanding one-half (1/2) interest in oil, gas and minerals on the East Half (E-1/2) of Lot 16, of L. L. Dell Estates according to plat thereof recorded in Plat Book "A", Page 47, of the public records of Alachua County, Florida.

Easement to City of Alachua dated the 30th day of March 1979, filed for record 12 April 1979, in Official Records Book 1201, at Page 430, of the public records of Alachua County, Florida.

Taxes for the year 1983 and subsequent years.

and said Grantor does hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the Grantor has caused this deed to be executed in its name by its duly authorized officers and its corporate seal to be affixed, the day and year first above written.

NEIGHBORHOOD MEETING NOTIFICATION

PN 21-0191

To: Neighbors of the US 441 / Cellon Creek Boulevard Intersection

From: Ryan Thompson, AICP

Date: 09 September 2021

RE: Neighborhood Meeting Public Notice

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and

2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).

The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

Date: 23 September 2021
Time: 6:00 PM
Location: 11801 Research Drive, Alachua, FL, 32615
Contact: Ryan Thompson, AICP
11801 Research Drive
Alachua, FL 32615
(352) 331-1976
Live@CHW-inc.com

This is not a public hearing. The purpose of the neighborhood meeting is to inform the public about the nature of the proposal and seek their comments.

If you are unable to attend the meeting, please contact CHW using the information above, and we will provide materials after the meeting is held. Comments may also be submitted in writing to the address or email above or by phone at the phone number above.

PUBLIC NOTICE

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and
2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).

The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposals and seek their comments.

Time: 6:00 pm on September 23, 2021
Location: 11801 Research Drive, Alachua, FL, 32615

Museum

Continued from Page 1A

let museum staffers review their work before publication and to adopt "any text changes" the museum proposed as a condition of getting the institution's "consent" to publish.

The rules said the institution was entitled to pursue "legal remedies" if a researcher didn't comply, though the museum says it never did so and is now scrapping the review requirements and legal threat.

Early on, "our paramount concern was the misuse of donated materials to the museum for purposes of misrepresentation" by people trying to prove conspiracy theories about the 9/11 terror attacks, museum Executive Vice President Clifford Chanin said.

"We've learned from our experience," he said.

Archives, museums and their donors vary in what they ask of researchers, but experts say the 9/11 museum's rules seemed unusually onerous.

"I've never seen anything quite like that," said Stephanie Brown, who teaches museum studies at Johns Hopkins University and has been a museum director, curator and archivist. She said the policy could prompt scholars to look elsewhere for material: "It just feels very micro-managing."

Indeed, at least two researchers have balked at the rules in the last few years,

Archives, museums and their donors vary in what they ask of researchers, but experts say the National Sept. 11 Memorial & Museum's rules seemed unusually onerous. MARY ALTAFFER/AP, FILE

said Chanin, who said the museum agreed to the interviews anyway and began reconsidering the policy after the latest scholarly objection came this summer.

Williams College sociology professor Christina Simko inquired in July about interviewing staffers for a project on terrorism-related museums. She says she was willing to share an eventual draft for feedback but wouldn't give the museum the authority essentially to edit her work.

"I was especially surprised that an institution of national memory would maintain that, because freedom of speech is a core democratic value," said Simko, who said she's pleased the museum quickly reconsidered.

Meanwhile, an attorney for two filmmakers who gave a trove of 9/11-related video to the museum – but later made a critical documentary about it – accused it in an Aug. 13 letter of "restricting free historic research, exploration and use."

"We don't think there should be any restrictions on what people publish," filmmaker Steven Rosenbaum said.

He and his wife and co-director, Pamela Yoder, tangled with the museum this year over its objections to their documentary, "The Outsider." While the museum's review of their film was negotiated separately from the research rules, Rosenbaum argues that both show the institution wants "to control the story" of 9/11.

"There's a fact pattern here that's really troubling," he said, for "the place where America remembers this story and investigates it."

The museum's top lawyer criticized Rosenbaum and Yoder in an Aug. 27 letter for their own restrictions on the donated video: They collect licensing fees from anyone else seeking to use the footage in films or other work. Rosenbaum says that's "beyond irrelevant" and there's no comparison between a small film company and a nonprofit museum's archives.

The Sept. 11 museum has the complex responsibility of serving as a memorial and a place for education and research about an event with living survivors. Still, some other institutions with similar missions don't ask as much of scholars.

The Oklahoma City National Memorial & Museum's website calls for researchers to submit summaries of their projects and where they plan to publish, but not for a review in advance. Nor does the U.S. Holocaust Memorial Museum in Washington, where the website simply asks applicants the purpose of their research, such as coursework, a book or genealogy.

"Access should be available as unencumbered as humanly possible," says Michael Berenbaum, an American Jewish University professor of Jewish studies who oversaw the creation of the Holocaust museum. He favors "maximum openness, minimum restrictions, even if it means sensitive material."

The Sept. 11 museum began fielding research requests long before its 2014 opening, said Chanin, who has been involved since 2005. He couldn't specify when the scholarly research rules took effect but said they were an effort to "systematize" the institution's dealings with researchers seeking access to materials or interviews with staffers.

The museum has asked researchers to see their work before publication but has never insisted on it, tried to block publication or taken legal action, Chanin said. Few scholarly requests, if any, ended up raising alarms about "misuse" or misquoting, he added.

Deciding the policy "is something we need to move on from," museum leaders have taken it off the website and plan soon to draft a new one, Chanin said.

He expects it will distinguish between scholarly requests for interviews and materials.

TODAY IN HISTORY

Today is Thursday, Sept. 9, the 252nd day of 2021. There are 113 days left in the year.

On this date:

1776: The second Continental Congress made the term "United States" official, replacing "United Colonies."

1850: California became the 31st state of the union.

1893: Frances Cleveland, wife of President Grover Cleveland, gave birth to a daughter, Esther, in the White House; it was the first (and, to date, only) time a president's child was born in the executive mansion.

1919: Some 1,100 members of Boston's 1,500-man police force went on strike. (The strike was broken by Massachusetts Gov. Calvin Coolidge with replacement officers.)

1932: The steamboat Observation exploded in New York's East River, killing 72 people.

1948: The People's Democratic Republic of Korea (North Korea) was declared.

1956: Elvis Presley made the first of three appearances on "The Ed Sullivan Show."

1957: President Dwight D. Eisenhower signed the first civil rights bill to pass Congress since Reconstruction, a measure primarily concerned with protecting voting rights and which also established a Civil Rights Division in the U.S. Department of Justice.

1960: In the first regular-season American Football League game, the Denver Broncos defeated the Boston Patriots, 13-10.

1971: Prisoners seized control of the maximum-security Attica Correctional Facility near Buffalo, New York, beginning a siege that claimed 43 lives.

1991: Boxer Mike Tyson was indicted in Indianapolis on a charge of raping Desiree Washington, a beauty pageant contestant. (Tyson was convicted and ended up serving three years of a six-year prison sentence.)

2005: Federal Emergency Management Agency Director Michael Brown, the principal target of harsh criticism of the Bush administration's response to Hurricane Katrina, was relieved of his onsite command.

Print delivery available within the newspaper distribution area only. By submitting your address and/or email, you understand that you may receive promotional offers from Gannett and its related companies. You may unsubscribe from receiving any such email offers at any time by clicking on the unsubscribe link in any of the emails you may receive. Payment collected will be applied first to any previous outstanding balance. Prices include applicable sales tax. The advertised price does not include the charges for any premium editions. Premium editions are published to provide additional information and value to our readers. You agree that you will be charged up to an additional $9.00 for each premium edition published and delivered to you during your subscription period, in addition to the cost of your subscription. The length of your subscription will be shortened by the publication of premium editions if those premium editions are delivered to you during your subscription. As an illustrative example, if you select a subscription of up to 12 weeks at a cost of $48.00, and two premium editions at $2.00 each are published and delivered to you during that subscription period, your subscription will be shortened by 1 week because the weekly cost of the subscription is $4.00 per week and the premium edition charges total $4.00. Depending upon the length of your subscription and the timing of the publication and delivery of premium editions, you will not be charged for any premium editions if none are published and delivered to you during your subscription. As such, in that case only, the length of your subscription will not be shortened. The timing of the publication and delivery of premium editions is variable. There will be no more than 2 premium editions published each month during the subscription term. Print subscribers may suspend print delivery during vacation periods. For vacation periods less than 14 consecutive days billing continues and subscriber maintains access to the digital portion of subscription. Credit days will be issued for any days in excess of the first 14 days.

Subscribers also have the option to have print copies held as Vacation Pack or may donate the newspaper value to our Newspaper in Education (NIE) program. If you sign up for our Eppay program, your subscription will automatically be charged to your credit card 0 to 14 days prior to your current expiration date, for the duration of your subscription or until you notify us otherwise. For more information or to cancel your subscription please call 1-352-378-1416.

Workshop Presentation

Cellon Creek

Large-Scale Comprehensive Plan Amendment (LsCPA) & Rezoning Applications

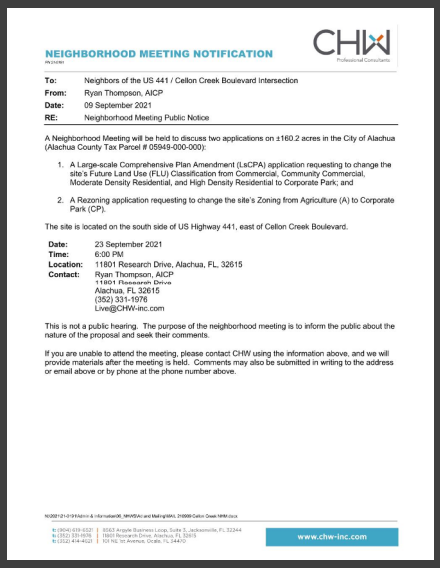
CHW Professional Consultants

City of Alachua
Neighborhood Meeting
September 23, 2021

1

The purpose of the neighborhood meeting:

The City of Alachua requires LsCPA and Rezoning applicants to host a neighborhood meeting *prior* to application submittal.



The purpose is to inform neighbors of the proposed action's nature and to get feedback early in the process.

This meeting provides the applicant with an opportunity to identify concerns prior to the application's submission.

2

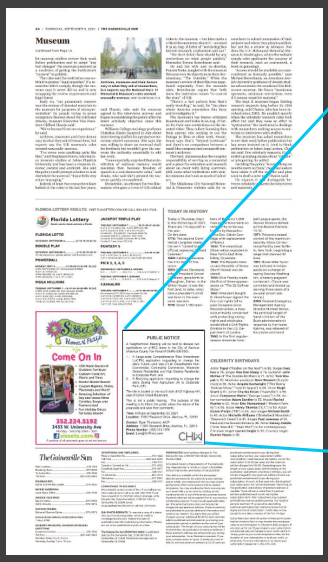
PUBLIC NOTIFICATION

NEIGHBORHOOD MEETING NOTIFICATION

To: Neighbors of the US 441 / Cellon Creek Boulevard Intersection
From: Ryan Thompson, AICP
Date: 09 September 2021
RE: Neighborhood Meeting Public Notice

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and
2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).



The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

Date: 23 September 2021
Time: 6:00 PM
Location: 11801 Research Drive, Alachua, FL, 32615
Contact: Ryan Thompson, AICP
11801 Research Drive
Alachua, FL 32615
(352) 331-1976
Live@CHW-inc.com

This is not a public hearing. The purpose of the neighborhood meeting is to inform the public about the nature of the proposal and seek their comments.

If you are unable to attend the meeting, please contact CHW using the information above, and we will provide materials after the meeting is held. Comments may also be submitted in writing to the address or email above or by phone at the phone number above.

PUBLIC NOTICE

A Neighborhood Meeting will be held to discuss two applications on ±160.2 acres in the City of Alachua (Alachua County Tax Parcel # 05949-000-000):

1. A Large-scale Comprehensive Plan Amendment (LsCPA) application requesting to change the site's Future Land Use (FLU) Classification from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park; and
2. A Rezoning application requesting to change the site's Zoning from Agriculture (A) to Corporate Park (CP).

The site is located on the south side of US Highway 441, east of Cellon Creek Boulevard.

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposals and seek their comments.

Time: 6:00 pm on September 23, 2021
Location: 11801 Research Drive, Alachua, FL, 32615

21-0191: Cellon Creek LsCPA & Rezoning

3

REQUESTS:

- LsCPA Application
  - *FROM*: **Commercial, Community Commercial, Moderate Density Residential**, and **High Density Residential**
  - *TO*: **Corporate Park**
- Rezoning Application
  - *FROM*: **Agriculture (A)**
  - *TO*: **Corporate Park (CP)**

21-0191: Cellon Creek LsCPA & Rezoning

4

INTENT:

Develop a mixed-use project with residential and non-residential uses

OPPORTUNITIES:

- Expand City of Alachua employment opportunities;
- Enable new Alachua businesses to grow, develop, and succeed;
- Expand City of Alachua's housing options; and
- Facilitate property's highest & best use

5

Place:	CHW Office – 11801 Research Drive, Alachua, FL, 32615
Re:	Large-scale Comprehensive Plan Amendment (LsCPA) and Rezoning Applications

CHW (Agent) Attendees: Gerry Dedenbach, AICP; Seth Wood; Olivia Lee
Public Attendees: 1

CHW, on behalf of San Felasco Research Ventures, LLC, hosted the required Neighborhood Meeting and presented the following: the meeting's purpose; the applications' requests and intents; the opportunities presented by the applications; the general application review process and estimated project timeline; and maps illustrating the site's regulatory and physical characteristics. Questions and comments from public attendees are described below, with agent responses.

Comment: San Felasco Hammock Preserve State Park is managed with controlled burns. The location of residential development on the project site, or the location of certain service-oriented commercial development, may impact the prescribed burn program.
Response: The project site is part of a larger master plan, which includes multiple developments along the San Felasco Parkway. The applicant is communicating with the San Felasco Hammock Preserve park manager on these developments, and hopes to continue this relationship when development programming begins for the project site. This matter can be discussed. These concerns will be taken into consideration when a development program is underway.

Comment: There are currently drainage easements on the project site that allow drainage into San Felasco Hammock Preserve State Park. Specifically, the drainage flows into Cellon Creek, which is classified as an Outstanding Florida Water (OFW). Because of this, stormwater drainage from development is a concern for the Preserve.
Response: All required stormwater quality and quantity attenuation regulations will be adhered to in development of the property. An intention of this project is to design and develop the property in a way that respects the surrounding natural areas, rather than in a way that works in opposition to them.

Comment: LiDAR data indicates a likely sinkhole on the property. Onsite soils and topography would cause water from this sinkhole to flow into the Santa Fe River and ultimately into the Floridan aquifer.
Response: All pertinent requirements regarding development and sinkholes will be adhered to in development of the property. An intention of this project is to design and develop the property in a way that respects the surrounding natural areas, rather than in a way that works in opposition to them.

Question: When is development of the site anticipated?
Response: This project site is part of a larger master planned project, which includes land along the San Felasco Parkway. That land is being developed with four separate development plans—two of which having been submitted prior to this September 23rd meeting. Once that area's development program is underway, focus will shift to the project site. That is anticipated to occur approximately in 2024 or 2025.

The meeting was adjourned at approximately 7:00 p.m.

1. Executive Summary

To: Kathy Winburn, AICP, City of Alachua Planning & Community Dev. Director
From: Seth Wood, Project Planner, CHW
Date: ~~September 30, 2021~~ November 4, 2021
Re: Cellon Creek – Rezoning Application

Jurisdiction: City of Alachua	**Intent of Application:** Mixed Use Development
Description of Location: 13270 block of US Highway 441	
Parcel Number: 05949-000-000	**Acres:** ±160.2 acres (ac) *(Source: Alachua County Property Appraiser)*
Existing Future Land Use (FLU) Classification: *Commercial* The Commercial land use category provides for general commercial uses. This is a land use category where large-scale, regional commercial uses may locate. *Community Commercial* The Community Commercial land use category provides for neighborhood- and community-scale goods and services, adjacent to residential areas. *High Density Residential (8-15 du/ac)* The High Density Residential land use category provides for residential development up to 15 dwelling units per acre, as well as complementary nonresidential uses. *Moderate Density Residential (0-4 du/ac)* The Moderate Density Residential land use category provides for residential development up to 4 dwelling units per acre.	**Proposed FLU Classification:** *Corporate Park* The Corporate Park land use category is the City's mixed-use land use category. It is intended to provide for a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. This land use category is meant to provide an appropriate location for mixed-use, office-oriented development, and foster growth of established industries within the City.
Existing Zoning District: *A: Agriculture (0.2 du/ac)* The A district is intended to provide for areas primarily consisting of agriculture uses and agriculture support uses and also allow low-density single-family residential development. The maximum residential density allowed in the district is one dwelling unit per five acres, except that homesteaded lots may be developed at one unit per two acres. Residential cluster development is encouraged	**Proposed Zoning District:** *CP: Corporate Park (4 du/ac)* The CP District is established and intended to accommodate a range of research and development, technology and life sciences/biotechnology industries, office, and supporting retail. Complementary residential uses may also be permitted within the CP District as set forth in Subsection 3.5.2(F)(2). By allowing a range of permitted uses, the CP District is intended to accommodate the development of "flex space" arrangements.

1. Executive Summary

through the use of the Conservation Subdivision option.	Flex space allows a developer to establish different combinations of uses on a site over time.
Existing Max. Permitted Density/Intensity: Density: ±160.2 acres * 0.2 du/ac = ±32 dwelling units	**Proposed Max. Permitted Density/Intensity:** Density: ±160.2 ac * 4 du/ac = ±640 dwelling units Intensity: ±160.2 ac * 0.5 FAR = ±3,489,156 square feet
Net Change This Rezoning application may allow up to ±608 additional *gross* dwelling units and up to ±3,489,156 *gross* square feet of additional nonresidential use compared to what is currently permitted by the existing Agriculture (A) zoning district. It should be noted, the existing zoning category of Agriculture is not consistent with the underlying four (4) land use classifications. Following the previous LsCPA in approximately 2010, the owner explored the options of a Planned Development zoning category but did not obtain a rezoning.	

2. STATEMENT OF PROPOSED CHANGE

This application requests to rezone Alachua County tax parcel 05949-000-000 from Agriculture (A) to Corporate Park (CP). The subject parcel is located along US 441, southeast of Cellon Creek Boulevard. An aerial is provided as **Figure 1** that shows the site's exact location and conditions. It should be noted, the existing zoning category of Agriculture is not consistent with the underlying four (4) land use classifications. Following the previous Ls-CPA in approximately 2010, the owner explored the options of a Planned Development zoning category but did not obtain a rezoning.

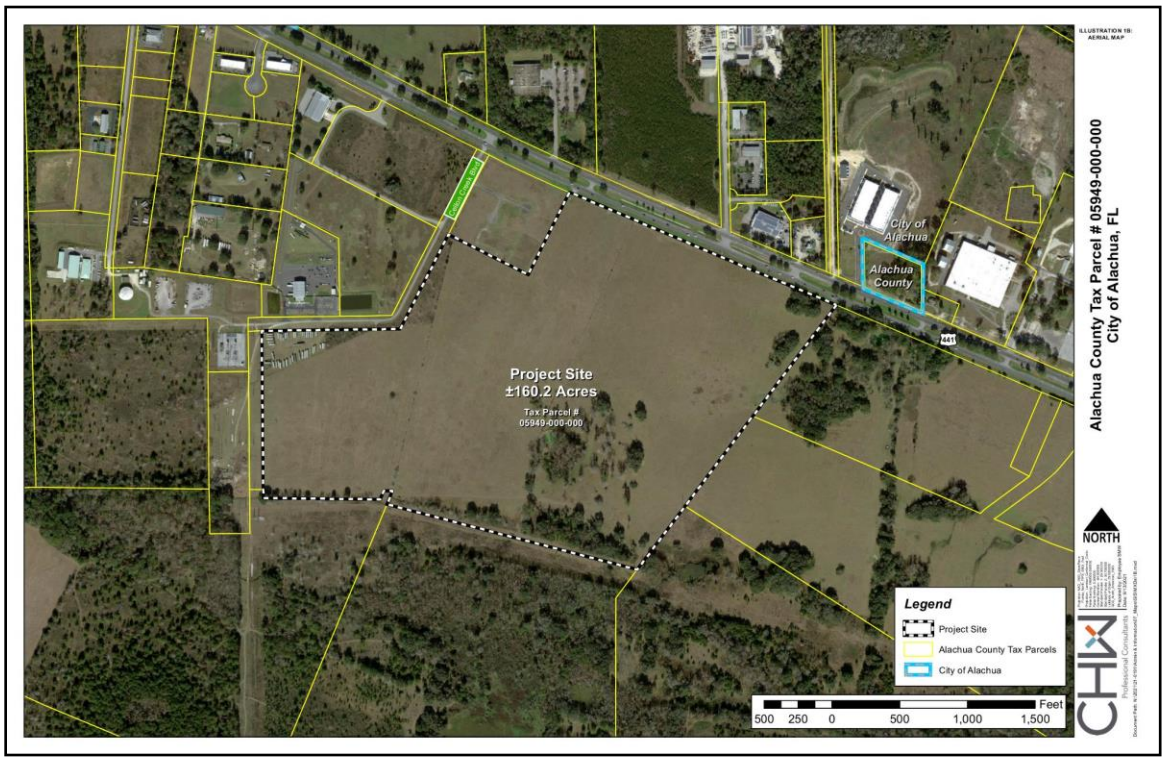

Figure 1: Aerial Map

This application is submitted concurrently with a Large-scale Comprehensive Plan Amendment (LsCPA) application, requesting to change the site's existing Future Land Use (FLU) classification to Corporate Park. The intent of this request is to appropriately entitle the project site to implement the Corporate Park FLU, with the ultimate intent of creating a mixed-use project that will provide a variety of opportunities for businesses in a range of disciplines to thrive, as well as complimentary residential development.

Existing FLU and Zoning designations of adjacent parcels are identified in **Table 1** and illustrated in **Figures 2** and **4**. The proposed FLU classification is illustrated in **Figure 3.** The proposed Zoning District is illustrated in **Figure 5.**

Table 1: Surrounding Future Land Use and Zoning Designations

Direction	Future Land Use Designation	Zoning Designation
North	US 441 ROW; Industrial	US 441 ROW; Industrial Light and Warehousing (ILW)
East	Commercial; Moderate Density Residential; Conservation	Commercial, Intensive (CI); Planned Development-Residential (PD-R)
South	Conservation	Conservation (CSV)
West	Cellon Creek Boulevard ROW; Industrial; Agriculture; Conservation	Cellon Creek Boulevard ROW; ILW; Agriculture (A)

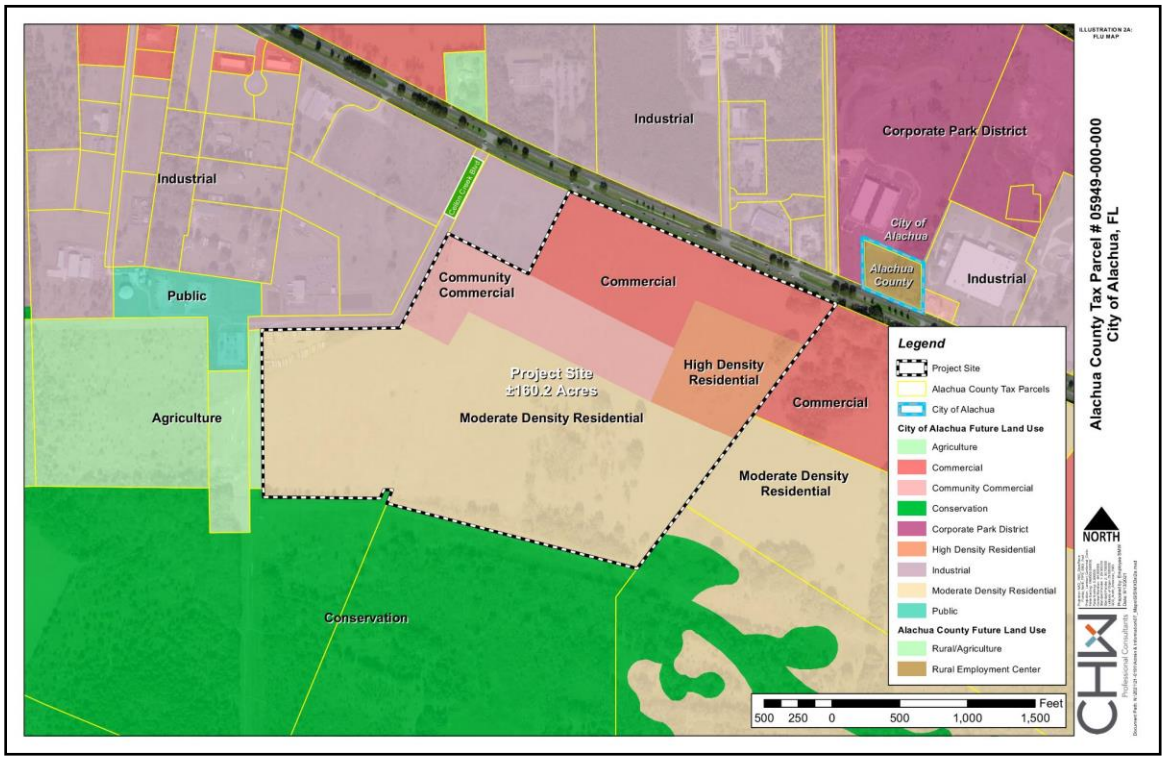

Figure 2: Existing Future Land Use Map

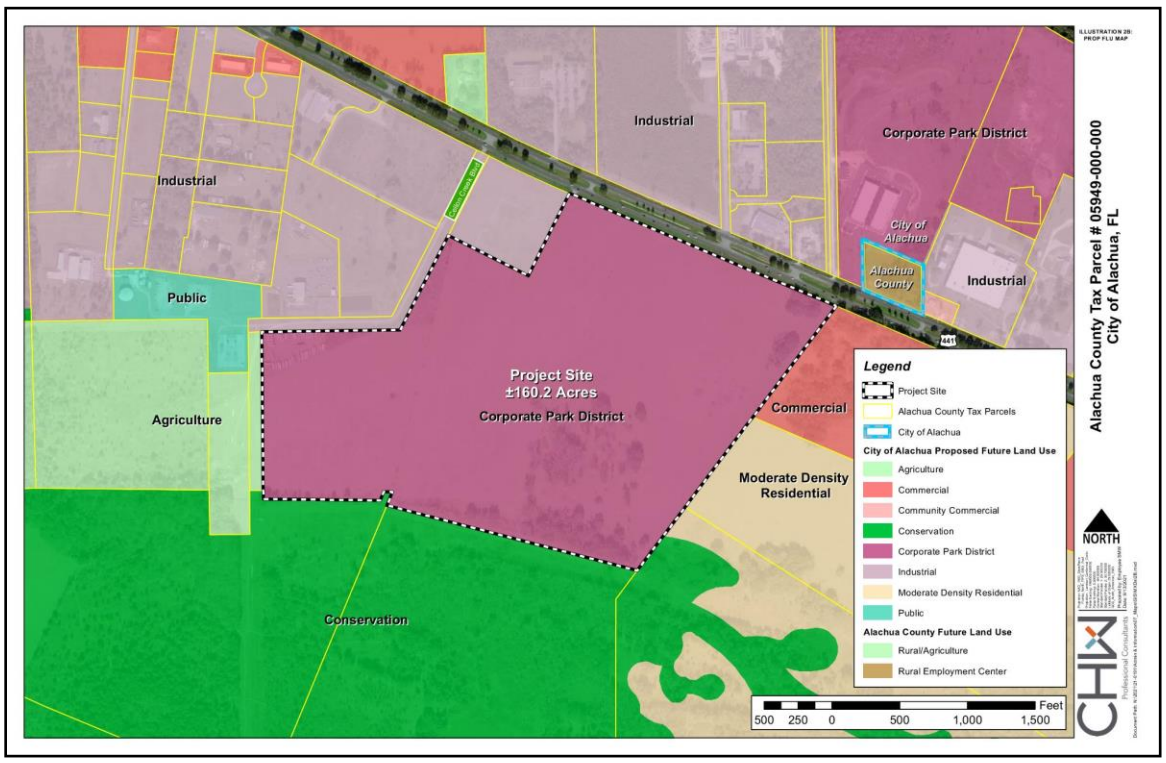

Figure 3: Proposed Future Land Use Map

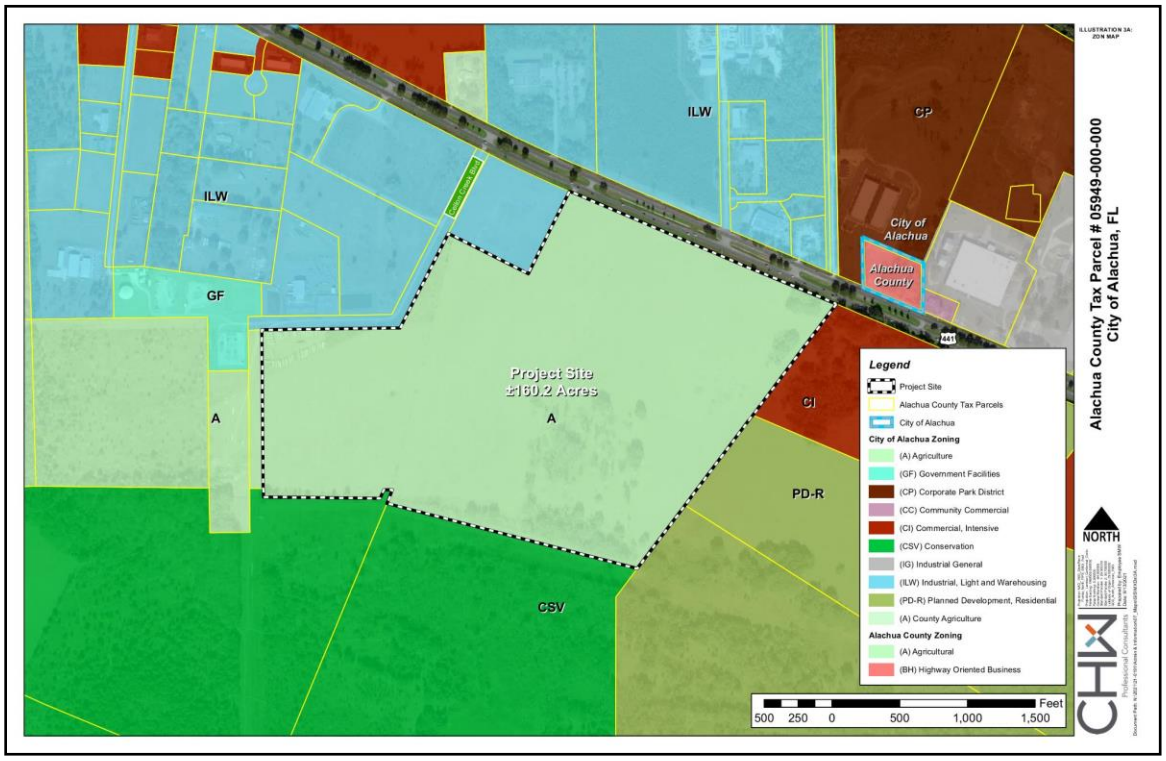

Figure 4: Existing Zoning Map

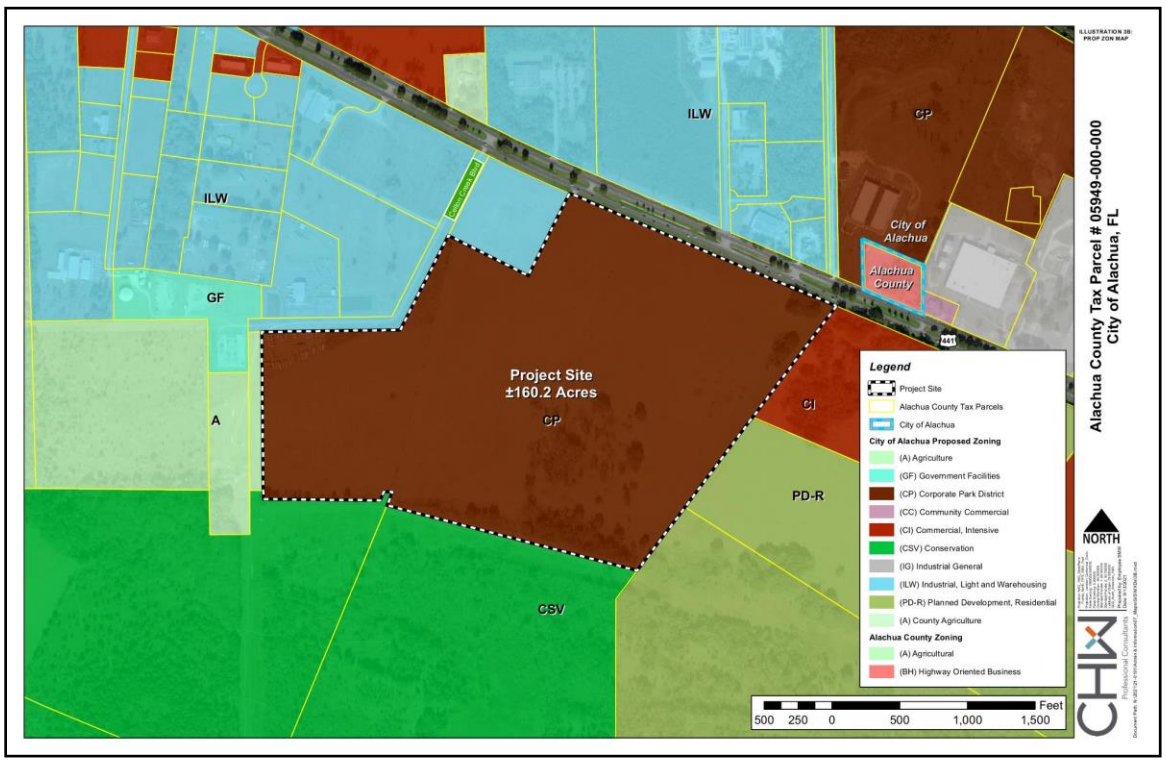

Figure 5: Proposed Zoning Map

3. CONCURRENCY ANALYSIS

This Rezoning application requests to change the ±160.2-acre site's zoning designation from Agriculture (A) to Corporate Park (CP). Approval of this application will change the site's maximum permitted density and intensity.

Existing maximum density and intensity, proposed maximum density and intensity, and a realistic expectation of density and intensity for the project site are as follows:

Table 2. Existing and Proposed Maximum Density and Intensity Comparison

Existing Maximum Permitted Density *A Zoning District*	**Proposed Maximum Permitted Density** *Corporate Park*	**Realistic Expectation of Density[1]** *Corporate Park*
±160.2 acres * 0.2 du/ac = **±32 dwelling units**	±160.2 ac * 4 du/ac = **±640 dwelling units**	±160.2 ac * 4 du/ac = **±640 dwelling units**
Existing Maximum Permitted Intensity *A Zoning District*	**Proposed Maximum Permitted Intensity** *Corporate Park*	**Realistic Expectation of Intensity[1]** *Corporate Park*
-	±160.2 ac * 0.5 FAR = **±3,489,156 square feet**	±40.05 ac * 0.5 FAR = **±872,289 square feet**
Net Change This rezoning application may allow up to ±608 additional *gross* dwelling units and up to ±3,489,156 additional *gross* square feet of nonresidential use compared to what is currently allowed by the existing land use classifications upon the property. *While this increase in dwelling units and nonresidential square footage may be allowed by the requested FLU classification, such increases are not anticipated to be realized in development of the project site.*		

1. To calculate the realistic expectation for development of the site, density calculation was based on the entire gross acreage of the project site, and intensity calculation was based on an assumption that 25% of the project site will be devoted to nonresidential uses.

While the following section reflects the maximum theoretical density and intensity *possible* under the requested FLU classification, *the figures utilized for the sake of theoretical analysis are unlikely to be achieved in subsequent development of the property*. Factors such as roadways, setbacks, buffers, and other components necessary within developments of this size must be taken into account when development occurs. The impact of market forces on development must also be considered, as well as the influence of community character. These factors will greatly reduce actual yield in development of the site.

Trip generation figures are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition. Data for subsequent tables are from the City of Alachua June 2021 Development Monitoring Report, as well as data obtained within the City Comprehensive Plan and Florida Administrative Code (FAC).

Roadways / Transportation

Table 3: Trip Generation

Land Use	ITE LU Code	Variable Dwelling Units, KSF	Daily	AM Peak			PM Peak		
			Total	Total	In	Out	Total	In	Out

Proposed Net Total			36,633	2,399	1,983	416	2,577	404	2,173
Net Total Difference			36,269	2,371	1,976	395	2,543	383	2,160

Source: ITE Trip Generation 10th Edition

1. *The average rate was used as opposed to the fitted curve equation, under all scenarios of the Research and Development land use, since the proposed land use is outside of the ITE trip generation study area.*
2. *Per the advisement of City staff in the October 21, 2021, Project Assistance Team (PAT) Meeting for this application, only the 0.5 FAR intensity was used to calculate the maximum potential trips generated.*

Conclusion: Approval of this rezoning application results in a potential for the number of trips generated by the proposed zoning district to be larger than the number of trips generated by the existing zoning district.

Per City of Alachua Land Development Regulations §2.4.14.(H)(2)(b), affected roadway segments for developments generating more than 1,000 external Average Daily Trips (ADT) are those on which the development's potential impacts are 5% or greater of the Maximum Service Volume (MSV) of the roadway, as well as all roadway segments located partially or wholly within one-half mile of the developments ingress/egress. Based on this, affected roadway segments were determined to be Segment 3, Segment 4, Segment 5, Segment 6, Segment 8, Segment 9, Segment 11, Segment 13, Segment 14, and Segment 15. **Tables 4** calculates projected impacts on these roadway segments.

Table 4: Projected Impacts on Affected Roadway Segments

Traffic System Category	Segment 3		Segment 4		Segment 5		Segment 6		Segment 8		Segment 9		Segment 11		Segment 13		Segment 14		Segment 15

Available Capacity[1]	17,147	1,556	19,890	1,660	11,366	902	5,692	356	4,063	282	6,179	504	9,369	807	14,855	1,309	12,190	1,081	9,538	876
Projected Trip Generation[2]	18,317	1,289	36,633	2,577	7,327	515	3,663	258	1,832	129	1,832	129	1,832	129	3,663	258	1,832	129	3,663	258
Residual Capacity with Application Approval	**-1,170**	**268**	**-16,743**	**-917**	**4,039**	**387**	**2,029**	**98**	**2,231**	**153**	**4,347**	**375**	**7,537**	**678**	**11,192**	**1,051**	**10,358**	**952**	**5,875**	**618**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Projected trip distribution percentage is estimated to be 50% for Segment 3; 100% for Segment 4; 20% for Segment 5; 10% for Segment 6; 5% for Segment 8; 5% for Segment 9; 5% for Segment 11; 10% for Segment 13; 5% for Segment 14; and 10% for Segment 15.*

Conclusion: When assessing the maximum theoretical development potential in the rezoning application upon affected roadway segments, the vast majority of segments are projected to maintain residual capacity. The residual capacity of two segments—Segment 3 and Segment 4—is shown to be deficient in Table 4, indicating that, were the project site to be developed at its maximum theoretical development potential, the number of trips generated has the potential to exceed the residual capacity of the roadway segments listed in the June 2021 Development Monitoring Report. *In reality, development of this type will produce fewer trips than the maximum theoretical amount, due to factors such as roadways, setbacks, buffers, and other components necessary for the development, as well as the influence of market forces and community character.* In addition, because this project represents a multi-year implementation, it is envisioned additional transportation options will emerge during the project's lifetime.

Potable Water / Sanitary Sewer / Solid Waste

Potable water, sanitary sewer, and solid waste calculations are based on the site's **maximum** development potential.

Table 5: Projected Potable Water Impacts

System Category	Gallons Per Day (GPD)
Current Permitted Capacity[1]	2,300,000
Less actual Potable Water Flows[1]	1,300,250
Reserved Capacity[1]	156,701
Residual Capacity[1]	843,049
Percentage of Permitted Design Capacity Utilized[1]	63.35%
Projected Potable Water Demand from Proposed Project[2]	523,373.4
Residual Capacity after Proposed Project	**319,675.6**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: Chapter 64-E, F.A.C.*
    a. *Formula used: 3,489,156 sq. ft. * 15 gallons per 100 sq. ft. of floor space = 523,373.4 sq. ft.*

Conclusion: The project site will be served by existing City of Alachua potable water infrastructure. The potential impacts from approval of this application *will not* negatively impact the City's adopted LOS for potable water.

For the sake of conducting concurrency calculations with the maximum theoretical development potential of the site, the highest possible density and intensity for the project site were utilized in this projected impact determination. In reality, these numbers are unlikely to be achieved or desired in development of the site, and the realistic impacts on potable water infrastructure will be lower.

Table 6: Projected Sanitary Sewer Impacts

System Category	Gallons Per Day (GPD)
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less actual Treatment Plant Flows[1]	677,000
Reserved Capacity[1]	137,740
Residual Capacity[1]	685,260
Percentage of Permitted Design Capacity Utilized[1]	54.32%
Projected Sanitary Sewer Demand from Proposed Project[2]	523,373.4
Residual Capacity after Proposed Project	**161,886.6**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Chapter 64-E, F.A.C.*
    a. *Formula used: 3,489,156 sq. ft. * 15 gallons per 100 sq. ft. of floor space = 523,373.4 sq. ft.*

Conclusion: The project site will be served by existing City of Alachua wastewater infrastructure. The potential impacts from approval of this application *will not* negatively impact the City's adopted LOS for sanitary sewer.

For the sake of conducting concurrency calculations with the maximum theoretical development potential of the site, the highest possible density and intensity for the project site were utilized in this projected impact determination. In reality, these numbers are unlikely to be achieved or desired in development of the site, and the realistic impacts on sanitary sewer infrastructure will be lower.

Table 7: Projected Solid Waste Impacts

System Category	LBs Per Day	Tons Per Year
Existing Demand[1]	41,880.00	7,643.10
Reserved Capacity[1]	17,139.34	3,127.93
New River Solid Waste Facility Capacity[1]	50 years	
Solid Waste Generated By Proposed Project[2]		**7,641.25**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996.72*
   a. *Formula used: (((12 lbs. / 1,000 ft²/day * 3,489,156 sq. ft.) * 365)/2,000) = 7,641.25*

Conclusion: Solid waste facility capacity exists to adequately serve development of the subject property. Thus, the potential impacts from approval of this application will not negatively impact the City's adopted LOS for this system.

For the sake of conducting concurrency calculations with the maximum theoretical development potential of the site, the highest possible density and intensity for the project site were utilized in this projected impact determination. In reality, these numbers are unlikely to be achieved or desired in development of the site, and the realistic impacts on solid waste infrastructure will be lower.

Public School and Recreation Impact

The City of Alachua requires all Rezoning applications involving residential developments to include an estimated Public School Generation analysis. This is conducted by completing the City's Public School Student Generation Calculation Form. A completed copy of this form has been included within this application's submittal. The development's estimated impact on the City's Public School System is found in **Table 9**.

Table 8: Projected Public School Demand

Land Use	Units[1]	Elem.		Middle		High	
		Rate[2]	Total	Rate[2]	Total	Rate[2]	Total
Single-Family Residential	320	0.15	**48**	0.07	**23**	0.09	**29**
Multi-family Residential	320	0.09	**29**	0.03	**10**	0.03	**10**
Total	**640**	-	**77**	-	**33**	-	**39**

1. *Units for proposed land use calculated based on gross acreage of project site. This calculation assumes 50% of gross density devoted to single-family residential use and 50% of gross density devoted to multi-family residential use.*
2. *Source: City of Alachua June 2021 Development Monitoring Report.*

Conclusion: The potential impacts from approval of this application *will not* negatively impact the Public School System.

Table 9: Recreational Impacts

System Category	Acreage
Existing City of Alachua Acreage[1]	135.48
Acreage Required to Serve Existing Population[1]	52.35
Reserved Capacity[1]	2.2
Available Recreation Acerage[1]	80.93
Proposed Recreational Impact[2]	8.32
Residual Recreational Capacity After Proposed Development	**72.61**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: 640 units * 2.6 persons per du * (5 acres/1,000 persons)*

Conclusion: The City of Alachua and surrounding areas currently possess considerable acreage for local recreation activities. Thus, the intended mixed-use development is expected to have a minimal impact on the City's current recreational infrastructure.

4. CONSISTENCY WITH CITY OF ALACHUA COMPREHENSIVE PLAN

This section identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this application is consistent with each. Text from the City of Alachua is provided in normal font while consistency statements are provided in **bold**.

FUTURE LAND USE ELEMENT

Objective 1.4: Corporate Park

The City shall establish one mixed-use land use category: Corporate Park. This land use category shall provide a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. The Corporate Park category is intended to:

1. provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology, with provisions for a variety of residential uses; and

The project site location, in close proximity to Progress Park, Convergence Research Park, San Felasco Tech City, and other nonresidential as well as residential developments, is an appropriate location for the mixed-use development ultimately intended. This rezoning application, as well as the associated LsCPA, would appropriately entitle the project site to meet the area's development patterns, foster the growth of the City of Alachua's industries, expand employment opportunities, and address the City of Alachua's growing housing need proactively.

2. Provide a variety of employment opportunities to the citizens of Alachua and the North Central Florida Region.

The development made possible by this rezoning, and its associated LsCPA, will vastly expand the types of nonresidential uses permitted on the property, thus expanding employment opportunities to the citizens of Alachua and the North Central Florida Region.

Policy 1.4.a: The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential, live-work units, building industry uses, and accessory storage facilities (including outdoor storage yards) either as allowed uses or with a special exception permit. Such uses shall be developed in a manner compatible with surrounding land uses, and to minimize potential nuisances or damage to the environment.

The development made possible by this rezoning will include a mixture of nonresidential and residential uses. The site will be developed in a manner compatible with its neighbors in scale, massing, density, and intensity, one such example being the San Felasco Tech City to the north, across US 441.

Policy 1.4.b Development within the Corporate Park land use category should be designed in a campus-like or "corporate park" setting with generous, linked open space to maximize value and to promote visual quality and compatibility with the surrounding area. Pedestrian-friendly features, such as buildings placed near the street, sidewalks, and trails leading to nearby uses, such as retail and housing, is encouraged.

Development on the project site, made possible by the requested LsCPA and rezoning, will be designed to work with nature, offering open space, pedestrian friendly features, and connections between uses. Development will be compatible with other surrounding developments, including the higher-intensity uses along US 441 and the moderate-density residential uses nearby. Development of the site will also work to be visually and environmentally compatible with the San Felasco Hammock Preserve State Park, with adequate consideration of the impacts of development on preservation and management efforts of the Preserve.

Policy 1.4.c: Non-residential Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio (F.A.R.) for parcels 5 acres or greater, 0.75 F.A.R. for parcels less than 5 acres but greater than 1 acre, and 1.0 F.A.R. for parcels 1 acre or less.

Development of the project site will adhere to the 0.50 FAR maximum standard. This is taken into consideration in Section 3 of this report.

Policy 1.4.d: Development within the Corporate Park land use category that consists of greater than 50 acres of contiguous land may provide clustered residential development. Residential uses within the Corporate Park land use category shall be limited to a gross density of 4 dwelling units per gross acre. Residential development must be developed consistent with the specific criteria identified within the Land Development Regulations for residential development in the Corporate Park zoning district.

Residential development of the project site will adhere to the gross density limit of 4 dwelling units per gross acre and be developed in a manner consistent with the specific criteria of the city's Land Development Regulations.

Policy 1.4.e: Corporate Park uses shall be located and designed in such a manner as to prevent undesirable impacts to adjacent properties.

1. The Corporate Park land use category may include material distribution facilities and manufacturing facilities subject to the following standards and maximums:

Type of Use	Max. Area: Manufacturing Area/Storage	Maximum Building Size	Maximum Building Area Coverage
Regional Warehouse	None permitted	100,000 sq. ft.	50%
Manufacturing/assembly	75% of total area	100,000 sq. ft.	40%

2. The Corporate Park land use category may include flex facilities subject to the following standards and maximums:

Type of Flex	Maximum Building Size	Max. Area: Manufacturing	Maximum Area: Warehousing	Maximum Building Area Coverage
Research and Development	150,000 sq. ft.	75% of total area	75% of total area	50%
Office Showroom	150,000 sq. ft.	None permitted	60% warehousing / 20% retail showroom	50%
Multitenant	120,000 sq. ft.	None permitted	60% retail / 40% warehousing	50%

If development on the property subsequent to this application approval includes the uses described by this policy, it will adhere to these standards.

Policy 1.4.f: The City shall develop performance standards for uses in the Corporate Park land use category in order to address the following:

1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
2. Buffering from adjacent existing/potential uses and use of landscaping to create an integrated design;
3. Open space provisions and balance of proportion between gross floor area and site size;
4. Adequacy of pervious surface area in terms of drainage requirements;
5. Placement of signage;
6. Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;
7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout and drive aisles, and points of conflict;
8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;
9. Unique site features and resources which may constrain site development, such as soils, existing vegetation and historic significance;
10. Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design;
11. Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 5 acres or greater, a 0.75 floor area ratio for parcels less than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less; and,
12. Complementary residential uses.

The development that will be made possible by the requested rezoning and associated LsCPA will adhere to all performance standards for the Corporate Park FLU

classification. The end result will exemplify the Corporate Park FLU classification and zoning district, with a mixed-use development that offers integrated, safe access and mobility for multiple travel modes; generous open space; and adequate buffering for its neighbors.

Objective 2.4: Landscaping and Tree Protection Standards
The City shall adopt landscaping and tree protection standards in order to achieve the aesthetic design values of the community and preserve tree canopies, as well as to protect exceptional specimens and champion trees.

Any development on the project site occurring subsequent to these applications' approval will adhere to the policies within this objective.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications for an amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.317(6)(a)9.a. and b., Florida Statutes, respectively.

The Corporate Park FLU, requested in a concurrently-submitted LsCPA application, is the City of Alachua's mixed use land use category, focused on employment-based development. It allows a range of uses that may be co-located; a moderate density of up to 4 dwelling units per acre, achievable in a variety of residential forms; as well as a moderate intensity of up to 0.5 FAR. The FLU category is designed to discourage the proliferation of urban sprawl.

The associated Corporate Park zoning district, requested by this application, implements the Corporate Park FLU category, regulating a built form that will further discourage the proliferation of urban sprawl.

Chapter 163.317(6)(a)9.a. and b., Florida Statutes, is addressed in detail in Section 5 of the justification report included as part of the concurrently-submitted LsCPA application.

Objective 4.1: Infill development shall be encouraged in order to protect the unique character of existing neighborhoods and commercial developments, provide for a safe urban environment, increase densities and intensities in a manner compatible with existing uses, provide open spaces, and restore or maintain economic vitality and cultural diversity.

The project site for this application will be infill development. The property, currently vacant land, sits in a central location on US 441, a roadway designated as the City of Alachua's Corporate Corridor. It is surrounded by various local, regional, and national nonresidential uses along the corridor, including but not limited to Phoenix Commercial Park, Novabone, Southern Custom, Helena Chemical, and the San Felasco Tech City. Development of the site, made possible through the requested Comprehensive Plan amendment and zoning change, will facilitate development of the site, filling in this gap along the Corporate Corridor. Furthermore, the Corporate Park FLU and zoning specifically will allow development of the site with a mixture of uses complementary to the area—both commercial and service uses that contribute to the City's various industries, and complementary residential uses that will place more City residents proximate to retail, service, and job opportunities.

The unique character of surrounding neighborhoods will be protected in the process, and the developments resulting from this rezoning will be complementary to existing surrounding commercial developments. The resulting development will provide a safe,

mixed-use environment for both residents and those that come to the site for work opportunities.

The requested zoning district will also enhance economic vitality and cultural diversity by expanding what is possible for the property; expanding employment opportunities within the City of Alachua; expanding housing opportunity in the City of Alachua; and creating a space for new businesses to thrive.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

There are wetlands on the project site, and certain portions of the site are within FEMA floodplain. These natural features will be protected from development in accordance with all relevant regulations. The topography and soils onsite are suitable to mixed-use development.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Development that occurs onsite will include techniques to minimize negative impacts on the natural terrain. The project site generally slopes south/southwest, away from US 441; this natural function will be retained to the maximum extent practicable.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently eight (8) types of soils located onsite:

- **Arredondo Fine Sand, 0 t 5 Percent Slopes (Hydro. Group A)**
- **Fort Meade Fine Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Pomona Sand, 0 to 2 Percent Slopes (Hydro. Group A/D)**
- **Lochloosa Fine Sand, 2 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 5 to 8 Percent Slopes (Hydro. Group A)**
- **Lochloosa Fine Sand, 5 to 8 Percent Slopes (Hydro. Group B)**
- **Blichton Sand, 2 to 5 Percent Slopes (Hydro. Group C/D)**

Soil types will be considered as necessary during the course of site design and development.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

FEMA Flood Zone Areas are identified in the map set included with this submittal package. All pertinent requirements for development in flood prone areas will be adhered to in development of the site, subsequent to the requested Future Land Use amendment.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements in development.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

There are no known listed wildlife or plant species onsite. When development plans are submitted for the project site, a survey will be included per this policy requirement.

Objective 5.2: Availability of facilities and services: The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

Section 3 of this report demonstrates the impacts that a maximum theoretical development scenario would have on available facilities and services. As explained in Section 3, no facilities and/or services will operate below the adopted level of service in a realistic development scenario.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools, and improved recreation in accordance with LOS standards adopted in the elements addressing these facilities.

Section 3 demonstrates how the proposed plan for the project site will impact City of Alachua facilities and adopted level of service.

Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Ch. 163, Florida Statutes, development agreement has commenced.

A certification of level of service compliance shall be issued during development plan review, following the approved of this application.

CONSERVATION AND OPEN SPACE ELEMENT

Objective 1.5: Soils. The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

There are currently eight (8) types of soils located onsite:

- **Arredondo Fine Sand, 0 t 5 Percent Slopes (Hydro. Group A)**
- **Fort Meade Fine Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 0 to 5 Percent Slopes (Hydro. Group A)**
- **Pomona Sand, 0 to 2 Percent Slopes (Hydro. Group A/D)**
- **Lochloosa Fine Sand, 2 to 5 Percent Slopes (Hydro. Group A)**
- **Millhopper Sand, 5 to 8 Percent Slopes (Hydro. Group A)**
- **Lochloosa Fine Sand, 5 to 8 Percent Slopes (Hydro. Group B)**
- **Blichton Sand, 2 to 5 Percent Slopes (Hydro. Group C/D)**

Soils types will be considered as necessary during the course of site design and development.

Objective 1.10: Wetlands. The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Any wetlands found onsite will be adequately protected in development of the project site.

HOUSING ELEMENT

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes, and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

The Corporate Park (CP) zoning district permits a wide variety of housing types, including cottage neighborhoods, live/work dwellings, multifamily dwellings, single-family detached and attached dwellings, townhouses, two- to four-family dwellings, and upper story dwellings.

This rezoning from Agricultural (A) to Corporate Park (CP) will help the City encourage development of a variety of housing types by implementing the appropriate land use designation and zoning district to accommodate a broad swath of housing choice.

5. CONSISTENCY WITH THE LAND DEVELOPMENT REGULATIONS

The following identifies how this application is consistent with the City of Alachua's Land Development Regulations (LDR). Language from the LDC is provided in normal font, and the consistency statements are provided in **bold** font.

Sec. 2.4.2. Site specific amendments to Official Zoning Atlas

(E) *Standards for site-specific amendments to the Official Zoning Atlas.* The advisability of making a site-specific amendment to the Official Zoning Atlas is a matter subject to quasi-judicial review by the City Commission and constitutes the implementation of the general land use policies established in these LDRs and the Comprehensive Plan. In determining whether to approve a proposed site-specific amendment to the Official Zoning Atlas, the City Commission shall find that:

(1) Competent substantial evidence provided. The applicant has provided competent substantial evidence that is made part of the record of the hearing that:

(a) *Consistent with Comprehensive Plan.* The proposed amendment is consistent with and furthers the goals, objectives and policies of the Comprehensive Plan.

As demonstrated in Section 4 of this report, this application's intent is compatible with all applicable goals, objectives, and policies found within the City of Alachua Comprehensive Plan. In addition, this application is submitted concurrently with a LsCPA application, requesting to change the project site's FLU to Corporate Park. The contents of that application further demonstrate consistency with the City's Comprehensive Plan.

(b) *Consistent with ordinances.* The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

Section 5 of this report demonstrates how this application is consistent with all relevant sections of the City LDR and Code of Ordinances. Specifically, code language regarding site-specific amendments to the City's Official Zoning Atlas and regarding the requested zoning district, Corporate Park, are addressed in detail.

(c) *Logical development pattern.* The proposed amendment would result in a logical and orderly development pattern.

The requested rezoning will result in a logical and orderly extension of the existing development pattern on the US 441 corridor and in the area, exemplified by developments such as the Progress Park, Convergence Research Park, and San Felasco Tech City. As the City of Alachua continues to grow, the need for commercial, office, and residential space grows with it. This rezoning will place appropriate entitlements on a large tract of land within the city to ensure development at the density, intensity, and scale necessary to meet the need can proactively occur.

The development to follow this rezoning will include residential dwelling units of various types, as well as nonresidential offerings to help foster the City of Alachua's growing industries and provide new space for businesses to start and to grow. The density of the dwelling units will be at a compatible scale to surrounding established neighborhoods, and the nonresidential components will allow for continued economic growth along the US Highway 441 transportation corridor, which has seen plentiful commercial development in recent years.

Finally, a ±82-acre tract of land northeast of the project site, across US 441, currently holds the CP zoning district, demonstrating that the project site is a suitable location for the CP zoning district and making the project site a logical site for expansion of the zoning district.

(d) *Premature development.* The proposed amendment will not create premature development in undeveloped or rural areas.

This application does not propose the creation of onsite premature development, but rather, onsite *proactive* development. This amendment seeks to put appropriate entitlements in place for an infill development opportunity in a largely developed area that has seen further development in recent years. Existing surrounding development includes, but is not limited to, the Phoenix Commercial Park, Novabone, San Felasco Tech City, and Southern Custom. As the City continues to grow in population and in industry, rezoning the property to the CP zoning district will put in place appropriate entitlements for a development that can help meet both residential and nonresidential demand in the coming years. This development will "fill in" ±160 currently vacant acres on the City of Alachua's Corporate Corridor, complementing existing development and providing additional housing in the area.

(e) *Incompatible with adjacent lands.* The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

As depicted in Figures 4 and 5 and conveyed in Table 1, the surrounding zoning districts to the project site include: Commercial Intensive (CI); Industrial, Light and Warehousing (ILW); Conservation (CSV); Planned Development—Residential (PD-R); and Corporate Park (CP). The uses permitted by the requested zoning district will allow the project site to be compatible with its neighbors fronting US 441, which have higher-intensity, commercially-oriented zoning districts, while not being disruptive or incompatible with its neighbors off of US 441 with less-intensive zoning districts.

This is possible with the CP zoning district due to its flexible design standards, mix of permitted dwelling unit types, and array of permitted nonresidential uses. The moderate-density, moderate-intensity CP zoning district will allow for a built form on the project site compatible with all neighbors.

The project site also neighbors the San Felasco Hammock Preserve State Park to the south. Site design will work with the natural landscape to ensure compatibility with this existing preservation area.

(f) *Adverse effect on local character.* The proposed amendment will not adversely affect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights or other physical effects or nuisances.

The proposed amendment will be compatible with existing surrounding development and character. While Section 3 of this report demonstrates the impacts on traffic and utility infrastructure if the site were to be developed at maximum potential, in reality, such development is not likely or practicable when factors such as setbacks, buffers, and supporting infrastructure are considered. A more realistic development scenario for the project site would have a lesser impact on the City's utility infrastructure relative to what is demonstrated in Section 3. Any potential for adverse impacts on City infrastructure will be addressed proactively when a development program is underway.

The density and intensity of uses allowed by the CP zoning district, as well as the zoning district's regulations on issues of building height, bulk, noise, lights, and other such matters, are comparable to the project site's surroundings, ensuring no adverse effect on local character. Instead, this rezoning will allow the project site to have a positive effect on local character, through infill development of the Corporate Corridor that creates housing opportunity and economic growth.

This project represents infill development because the project site is a large, well-located piece of land on the US 441 corridor, surrounded by existing development, that currently sits vacant. The development made possible by the requested zoning change, as well as the concurrently submitted LsCPA, will bring a mixture of complementary residential, commercial, and service offerings to the property, and create adjacencies with nonresidential uses in the area, including the Phoenix Commercial Park, Novabone, VEMO Auto Auctions, and the San Felasco Tech City.

(g) *Not deviate from pattern of development.* The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

The existing FLU classifications of the site—High Density Residential; Moderate Density Residential; Commercial; and Community Commercial—indicate a desire by the City for this area to be developed in an urban style, with a mix of residential and nonresidential uses. These FLU classifications were put in place before the Corporate Park FLU classification existed but share a similar intent—a mix of uses on one site, with a focus on expanding employment opportunities.

This rezoning will align the zoning district of the project site with the intentions the City has indicated it has for this area. This rezoning request is submitted concurrently with an LsCPA application to change the site's FLU classification to Corporate Park, consolidating the property into a unified, mixed-use FLU classification, focused on expanded employment opportunities.

Furthermore, the US 441 corridor is defined by a mixture of nonresidential and residential uses. Approval of this application to change the project site's existing zoning will allow the development of similar nonresidential uses along the corridor, as well as the development of residential uses within the project site.

(h) *Encourage sprawl.* The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low-density single dimensional development.

The project site, which currently sits vacant, is in an area of the City experiencing growth, near the City's downtown core. Approval of this application will assist the City in limiting local sprawl by permitting a moderate density, moderate intensity, mixed use development within the City limits, with access to utility services. By locating employment opportunities and housing in this area, the development of the project site with the CP zoning district will actively discourage sprawl through mixed-use, urban infill development.

An urban sprawl analysis is submitted as part of the concurrently-submitted LsCPA application. This analysis details how the requested LsCPA and Zoning Atlas amendment do not meet the definition of urban sprawl, as defined in Ch. 163.3177, Florida Statutes.

(i) *Spot zoning.* The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

The project site sits on US 441 across from property currently zoned CP. Furthermore, the project site abuts property with related zoning districts, including the Commercial, Intensive (CI) zoning district; the Industrial, Light and Warehousing (ILW) zoning district, and the Planned Development—Residential (PD-R) zoning district. These zoning districts include a mix of uses reflective of what the CP zoning district allows. Rezoning the project site to CP will not create a spot zoning, but instead, will allow the property to be developed in a manner compatible with all of its neighbors, both in terms of the commercial intensity of the US 441 corridor, and the residential density of the surrounding community.

(j) *Public facilities.* The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, stormwater management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

The site is located in an area with existing utility facilities. For electric service, there are primary overhead electric lines on Cellon Creek Boulevard to the west and US 441 to the north. For water services, there is a 16" water main on US 441. For wastewater services, there is a 10" force main along US 441, an 8" gravity main to the west of the site, and a Lift Station at the northwest corner of the project site. A cursory assessment by Public Services staff indicates no expected major issues with development of the site. When a development program is underway, a more thorough investigation of capacity will be done. It will be ensured that any potential for adverse impacts to city infrastructure and utilities is mitigated appropriately.

(k) *No adverse effect on the environment.* The proposed amendment would not result in significantly adverse impacts on the natural environment, including, but not limited to, water, air, noise, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

The proposed amendment will not result in significant adverse impacts on the natural environment. The development made possible by this request will be engineered and designed to work alongside the area's rich environmental features, rather than in opposition to them. For example, stormwater management facilities will respect the site's natural topography by draining to the lowest portions of the site. In addition, local noise and lighting pollution will be minimized to the maximum extent practicable, as the subsequent mixed-use development will be compatible with surrounding nonresidential and residential developments.

Compatibility with surrounding development, as well as surrounding natural features, will be ensured through the development of the project site in a gradient of density and intensity. The highest intensity of purely commercial development will be located in the northern portion of the project site, proximate to US 441. South of this development, more centrally located in the project site, will be a mixture of residential and nonresidential uses. South of this mixture of uses will be exclusively residential development. At the southernmost area of the project site, in the area closest to the San Felasco Hammock Preserve State Park, will be the lowest density residential development of the entire development. This gradient, gradually decreasing density and

intensity in proximity to protected natural resources, will help ensure compatibility with surrounding natural areas.

Compatibility with surrounding and internal natural features will be further ensured through adherence to the regulations detailed in City of Alachua Land Development Regulations Article 6 and City of Alachua Comprehensive Plan Conservation and Open Space Element. These include, but are not limited to, adequate buffering of wetlands as detailed in Conservation and Open Space Element Policy 1.10.g; adequate buffering of surface waters as detailed in Conservation and Open Space Element Policy 1.12.d.; and appropriate development within special flood hazard areas as detailed in Conservation and Open Space Element Policy 1.12.f.

Sec. 3.5.2 – Business District Specific Purposes.
(F) CP, Corporate Park District.

1) The CP District is established and intended to accommodate a range of research and development, technology and life sciences/biotechnology industries, office, and supporting retail. Complementary residential uses may also be permitted within the CP District as set forth in Subsection 3.5.2(F)(2). By allowing a range of permitted uses, the CP District is intended to accommodate the development of "flex space" arrangements. Flex space allows a developer to establish different combinations of uses on a site over time.

The intended development to follow the proposed rezoning will align with the intent of the CP District. The development will provide a host of nonresidential offerings for the City's burgeoning industries, as well as office and retail space. There will also be complementary residential uses, to enable residents of the community to live, work, and play in a compact, mixed-use environment.

2) *Residential development criteria.* Development within the CP District that consists of greater than 50 acres of contiguous land may provide complementary residential development. Residential development within the CP District shall comply with the performance standards set forth in subsections(a) – (e) below and with the dimensional standards and maximum gross residential density as set forth in Table 5.1-3.

The project site is ±160.2 acres. Thus, development of the property can provide complementary residential development. Residential development on the project site will adhere to all performance standards as set forth in subsections 3.5.2.(F)(2)(a) – (e), as well as the dimensional and density standards as set forth in Table 5.1-3.

a. In order to ensure that the purpose and intent of the CP District is achieved, development within the Corporate Park zoning district that includes residential uses as permitted by this subsection shall include a functional mix of residential and non-residential uses. The number of residential units within the CP District shall be limited. A final development order for residential units shall not be granted unless the minimum floor area of non-residential uses as set forth in Table 3.5-1, Residential to Non-Residential Ratios within the CP District, has been constructed within the CP District, or shall be constructed concurrent with residential units as a part of a mixed-use development.

Table 3.5-1, Residential to Non-residential Ratios within the CP District	
Number of Residential Units	Minimum Floor Area of Non-residential Uses
1-199	0 square feet
200-299	37,500 square feet
300-399	75,000 square feet
400-499	150,000 square feet
500-599	250,000 square feet
600-699	375,000 square feet
700-999	500,000 square feet
1,000 or more	700,000 square feet

Section 3 of this report demonstrates a development scenario in which the minimum nonresidential floor area is met and exceeded, per the above table. This scenario is reflective of a maximum theoretical development scenario. The numbers utilized in this theoretical analysis are not likely to be feasible in development of the project site. The required ratios of this section will be met in development.

b. For purposes of calculating gross residential density, the maximum number of dwelling units permitted in a contiguous area shall be determined by the total acreage contained in the property in common ownership as of the effective date of the ordinance adopting the rezoning to Corporate Park.

Per available Alachua County Property Appraiser data, no land abutting the project site is in common ownership with the project site.

Table 5.1-3. Table of Dimensional Standards in the Business Zoning Districts										
District and Use	Lots		Minimum Yards and Setbacks				Max. Height (ft)	Max. Lot Coverage	Max. FAR	Max. Gross Residential Density (DU/acre)
	Min. Area (sq. ft.)	Min. Width (sq. ft.)	Front (ft)	Side (ft)	Rear(ft)	Wetland and Watercourse (ft)				
CP										
Dwelling, Single-family residential	3,500 See note [6]	40 See note [6]	20 See note [7]	5 for each See note [7]	10 See note [7]	Sec. 5.2.2(B)	65	60%	N/A	4
Dwelling, single-family attached, townhouse, and multiple-family	2,700 See note [6]	30 See note [6]	10 See note [7]	5 for each building side See note [7]	10 See note [7]					
Cottage Home	2,700 See note [6]	30 See note [6]	5 See notes [7], [9]	5 for each building side See not [7]	10 See notes [7], [9]		35	70%		
All other uses	None	None	20	15, except where railroad spur abuts side or rear property line, then none			100 See note [8]	None	See note [8]	N/A

Notes:

[1] The maximum lot coverage in the OR district may be increased up to 65 percent by the provision of three or more upper story dwelling units above retail or office uses, provided such units are deed-restricted as affordable housing for low-income residents. The maximum lot coverage for cottage homes shall be measured over the entire cottage neighborhood, not individual lots.

[2] The building square footage occupied by upper story dwelling units that are deed-restricted as affordable housing for low-income residents shall not be counted towards the maximum FAR. Floor area ratios for business districts are as follows: 0.5 FAR for parcels five acres or greater; 0.75 FAR for parcels less than five acres, but greater than one acre; 1.0 FAR for parcels one acre or less.

[3] Minimum lot area, minimum lot width, minimum yard, and minimum setback standards may be reduced by up to 75 percent in the CI Districts to accommodate deed-restricted affordable housing units.

[4] Residential uses in the CP District shall be consistent with the criteria specified in Section 3.5.2(F).

[5] Front setbacks shall be consistent with the definition of "yard, front" as provided in Subsection 5.2.2(A)(7).

[6] Lot dimensional standards apply only to individual platted lots.

[7] Building setbacks apply only to individual platted lots or if no platting is proposed, the setback standards apply to the project perimeter. However, all building separation requirements specified in the Florida Building Code are applicable. As used within Table 5.1-3, "project" shall mean all contiguous land zoned CP.

[8] The maximum height for structures in the CI and CP zoning districts may be increased up to a maximum of 200 feet using the Special Exception process consistent with the applicable standards found in Sections 2.4.4(D) and 5.2.3(B)).

[9] If a garage is provided, then the garage face shall be set back a minimum 20-feet to prevent parked vehicles from blocking the sidewalk.

The development program made possible by this rezoning request will adhere to all pertinent development standards of the CP district.

Public School Student Generation Form for Residential Development in the City of Alachua

A. APPLICANT

1. Applicant's Status (check one):

□ Owner (title holder) ■ Agent

2. Name of Applicant(s) or Contact Person(s): Seth Wood Title: Project Planner

Company (if applicable): CHW

Mailing address: 11801 Research Drive

City: Alachua State: FL ZIP: 32615

Telephone: 352-331-1976 FAX: 352-331-1976 e-mail: sethw@chw-inc.com

3. If the applicant is agent for the property owner*:

Name of Owner (title holder): University of Florida Foundation, Inc

Mailing Address: PO Box 14425

City: Gainesville State: Florida ZIP: 32604

* Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

B. PROJECT

1. Project Name: Cellon Creek
2. Address of Subject Property: _____
3. Parcel ID Number(s): 05949-000-000
4. Section 00 Township 08 Range 19 Grant Fernandez Acreage: 160.2
5. Existing Use of Property: Vacant
6. Future Land Use Map Designation: Commercial; Community Commercial; Moderate Density Residential; High Density Residential
7. Zoning Designation: Agricultural (A)
8. Development Data (check all that apply):

■ Single Family Residential Number of Units 320

■ Multi-Family Residential Number of Units 320

□ Exempt (*see exempt developments on page 2*)

9. Review Type:

Preliminary Development Order

□ Comprehensive Plan Amendment

□ Large Scale

□ Small Scale

Final Development Order

□ Preliminary Plat

□ Final Plat

□ Site Plan

■ Site Specific Amendment to the Official Zoning Atlas (Rezoning)

■ *Revised*

10. School Concurrency Service Areas (SCSA): Based on the project location, identify the corresponding SCSA for each school type. Maps of the SCSAs can be obtained from the Alachua County Growth Management Department Map Gallery by clicking on the "Public Schools" tab: http://growth-management.alachuacounty.us/gis_services/map_gallery/

Elementary: Alachua

Middle: Mebane

High: Santa Fe

Explanation of Student Generation Calculation: Student Generation is calculated based on the type of residential development and the type of schools. The number of students stations (by school type – Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. **Calculations are rounded to the nearest whole number.** Student Generation for each school type is calculated individually, in order to correctly assess the impact on the School Concurrency Service Area (SCSA) for each school type (Elementary, Middle and High School).

# of Elementary School Student Stations = # of housing units x Elementary school student generation multiplier
# of Middle School Student Stations = # of housing units x Middle school student generation multiplier
# of High School Student Stations = # of housing units x High school student generation multiplier

Student Generation Calculations: Single Family Residential Development

Elementary School	320	units	x	0.15	Elementary School Multiplier*	48	Student Stations**
Middle School	320	units	x	0.07	Middle School Multiplier*	23	Student Stations**
High School	320	units	x	0.09	High School Multiplier*	29	Student Stations**

Student Generation Calculations: Multi-Family Residential Development

Elementary School	320	units	x	0.09	Elementary School Multiplier*	29	Student Stations**
Middle School	320	units	x	0.03	Middle School Multiplier*	10	Student Stations**
High School	320	units	x	0.03	High School Multiplier*	10	Student Stations**

* ***Student generation multipliers may be obtained from SBAC at:***
http://www.sbac.edu/pages/ACPS/Departments_Programs/DepartmentsAF/D_thru_F/FacilitiesMainConstr/Local_Certification_Packets/City_of_Alachua
*** Round to the nearest whole number***

EXEMPT DEVELOPMENTS (check all that apply):

- ☐ Existing legal lots eligible for a building permit.
- ☐ Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired.
- ☐ Amendments to final development orders for residential development approved prior to the effective date of public school concurrency, and which do not increase the number of students generated by the development.
- ☐ Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public Schools Facilities Element or the ILA.
- ☐ Group quarters that do not generate public school students, as described in the ILA.

A completeness review of the application will be conducted within 5 business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

(2) Affected roadway segments. For the purposes of making concurrency determinations, affected roadway facilities shall be determined as follows:

(a) Development generating 1,000 or fewer trips. For proposed developments generating less than or equal to 1,000 external average daily trips (ADT), affected roadway segments are all those wholly or partially located within one-half mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater.

(b) Developments generating more than 1,000 trips.
(i) For proposed developments generating greater than 1,000 external average daily trips (ADT), affected roadway segments are those on which the development's impacts are five percent or greater of the maximum service volume of the roadway; and
(ii) The study area for proposed developments generating greater than 1,000 external average daily trips (ADT) shall include all roadway segments located partially or wholly within one-half mile of the development's ingress/egress, or to the nearest major intersection,

City of Alachua

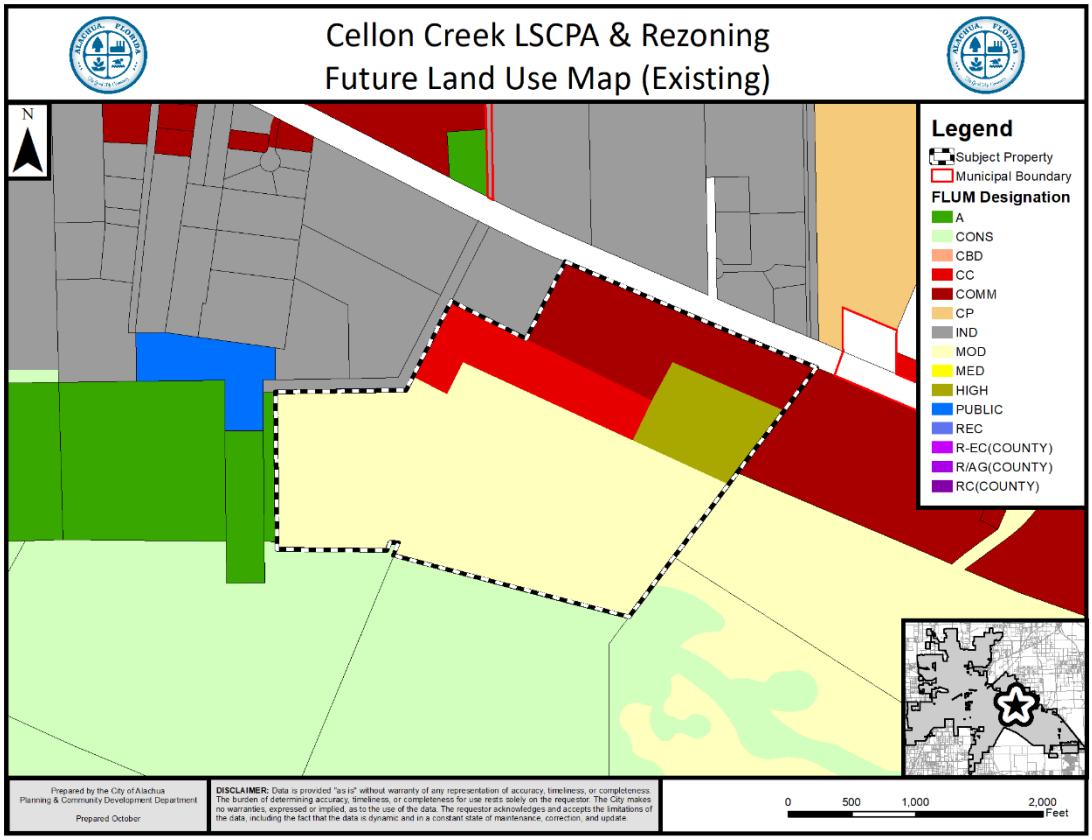
Planning & Community Development Department

Staff Report

Planning & Zoning Board Hearing Date: December 14, 2021
Quasi-Judicial Hearing

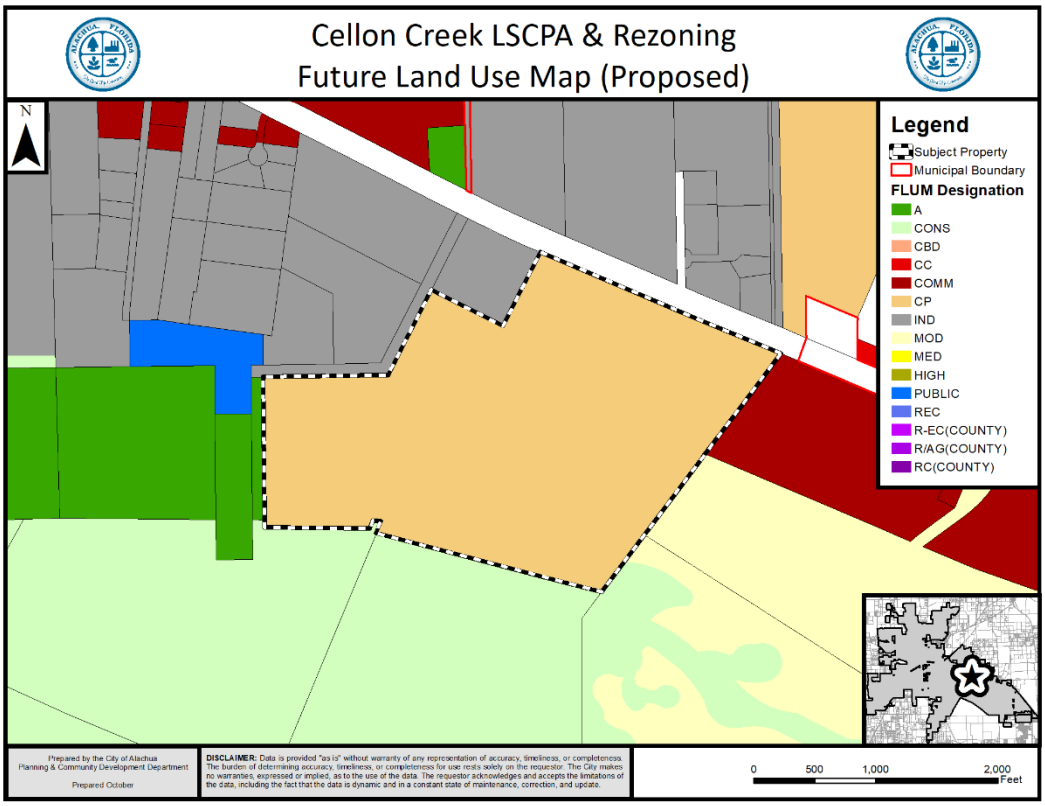
SUBJECT:	A request to amend the Official Zoning Atlas on a ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP)
APPLICANT/AGENT:	Seth Wood Causseaux, Hewett, & Walpole, Inc.
PROPERTY OWNER:	University of Florida Foundation, Inc.
LOCATION:	Generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard
PARCEL ID NUMBER:	05949-000-000
ACREAGE:	±160.2 acres
PROJECT PLANNER:	Justin Tabor, AICP
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board transmit the proposed Site-Specific Amendment to the Official Zoning Atlas submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to the City Commission with a recommendation to approve.
RECOMMENDED MOTION:	*Based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Site-Specific Amendment to the Official Zoning Atlas submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve.*

SUMMARY



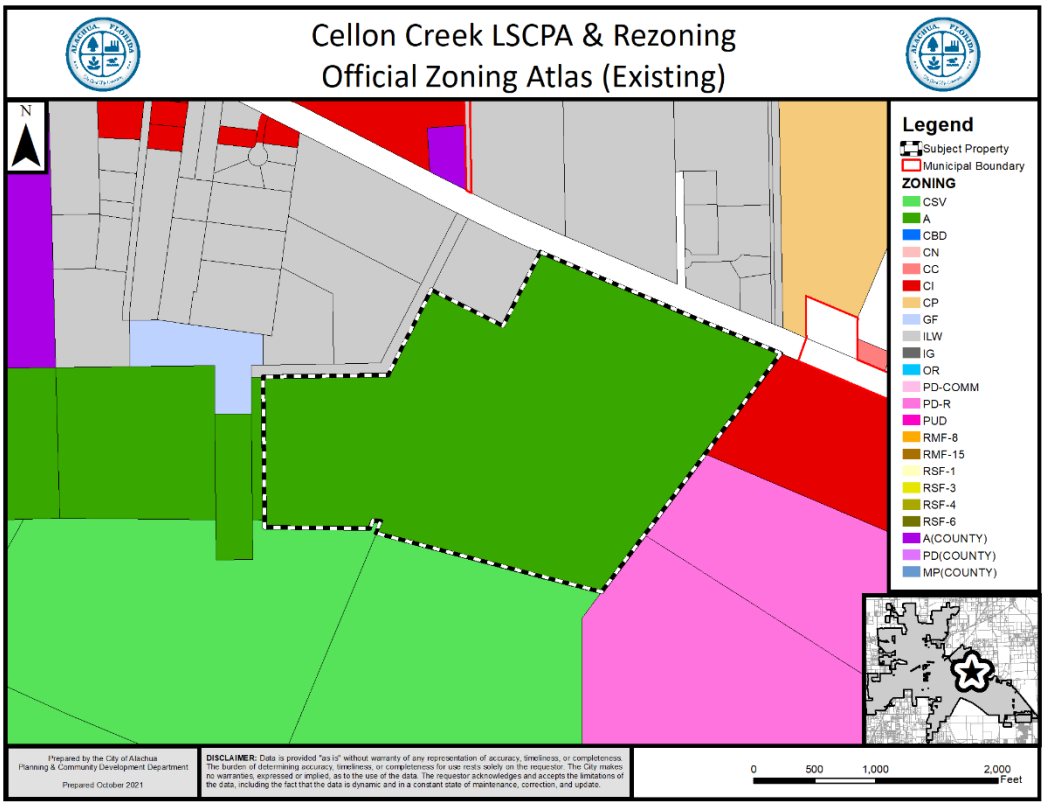
The proposed Site-Specific Amendment to the Official Zoning Atlas (Rezoning) is a request by Seth Wood of Causseaux, Hewett, & Walpole, Inc., for the consideration of an amendment to the Official Zoning Atlas to amend the zoning on a ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP).

The applicant has submitted a companion Large Scale Comprehensive Plan Amendment which proposes to amend the Future Land Use Map (FLUM) Designation of the subject property from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park.

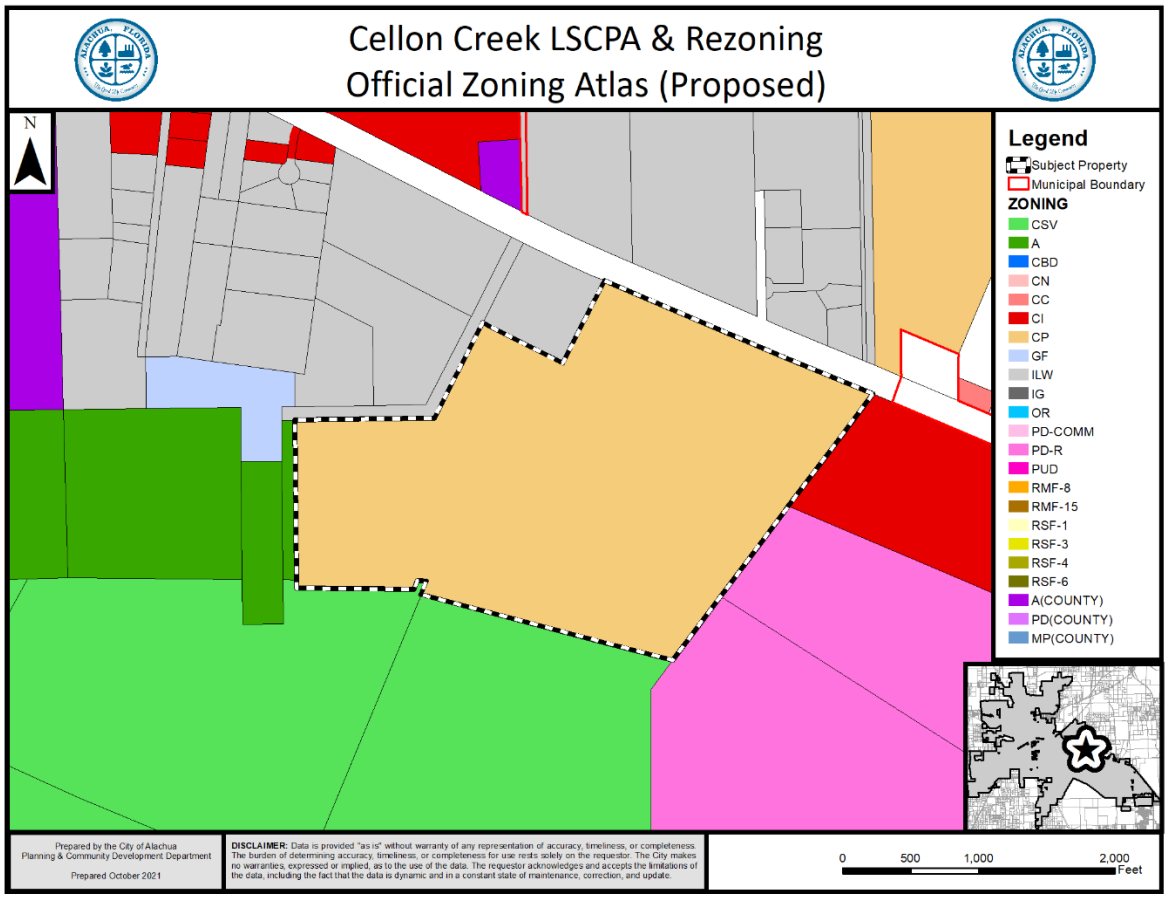


The FLUM Designations of the property were amended from Agriculture to is current designations in March 2008. There were several applications received (in 2012, 2014, 2016, and 2017) to amend the zoning to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM), however, each of these applications were ultimately withdrawn.

The subject property is generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard. The property undeveloped and is primarily comprised of cleared pasture, however, there are some naturally wooded areas located in the south-central portion of the property and along the south property line.



Map 1. Existing Future Land Use Map with Subject Property



Map 2. Proposed Future Land Use Map with Subject Property

Map 3. Existing Official Zoning Atlas with Subject Property

Map 4. Proposed Official Zoning Atlas with Subject Property

The general purposes of the Business zone districts are established and described in Section 3.5.1 of the City's Land Development Regulations (LDRs):

3.5.1 *General purposes.* The business zone districts are established for the general purpose of ensuring there are lands in the City that provide a wide range of office, retail, service, light industrial and related uses to meet household and business needs, and more specifically:

(A) *Provide appropriately located lands for business uses consistent with Comprehensive Plan.* Provide appropriately located lands in areas served by water and sewer for the full range of business uses needed by Alachua's residents, businesses, and workers, consistent with the goals, objectives, and policies of the Comprehensive Plan;

(B) *Strengthen economic base.* Strengthen the City's economic base, and provide employment opportunities close to home for residents of the City and surrounding communities;

(C) *Provide suitable environment for business uses.* Create suitable environments for various types of business uses, and protect them from the adverse effects of incompatible uses; and

(D) *Minimize impact of business development on residential districts and uses.* Minimize the impact of business development on residential districts and uses.

The specific purpose of the Corporate Park (CP) zone district is established and described in Section 3.5.2(F)(1) of the City's Land Development Regulations (LDRs):

3.5.2(F) *CP, Corporate Park District.*

(1) The CP District is established and intended to accommodate a range of research and development, technology and life sciences/biotechnology industries, office, and supporting retail. Complementary residential uses may also be permitted within the CP District as set forth in Subsection 3.5.2(F)(2). By allowing a range of permitted uses, the CP District is intended to accommodate the development of "flex space" arrangements. Flex space allows a developer to establish different combinations of uses on a site over time.

Table 1. Comparison of Existing / Proposed Zoning Districts

	Existing FLUM Designation	Proposed FLUM Designation
FLUM Designation:	Agricultural (A)	Corporate Park
Max. Gross Density*:	0.2 dwellings/acre *Maximum 62 dwelling units on the subject property**	640 dwellings
Max. Floor Area:	N/A	3,489,156 square feet
Typical Uses:	Agriculture, animal husbandry, agricultural support and services, animal sales and care; single family residential units	Medical and dental labs, restaurants with indoor seating only, business, financial, and professional services, financial institution, light manufacturing
Net Increase/ Decrease*:	***Increase of 608 dwellings**** ***Increase of 3,489,156 square feet non-residential uses****	

* *The current Future Land Use Map Designations of the subject property are Commercial, Community Commercial, High Density Residential, and Moderate Density Residential. Based upon the current FLUM Designations, the maximum gross density would be 651 dwellings and the maximum floor area would be 908,226 square feet. Thus, the net increase/decrease would be a decrease of 11 dwellings and an increase of 2,580,930 square feet of nonresidential uses.*

EXISTING USES

The property undeveloped and is primarily comprised of cleared pasture, however, there are some naturally wooded areas located in the south-central portion of the property and along the south property line.

SURROUNDING USES

The existing uses, FLUM Designations, and zone districts of the surrounding area are identified in Table 1. Map 3 provides an overview of the vicinity of the subject property.

NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. It is not intended to be all-inclusive, and may not identify all existing uses, FLUM Designations, and/or zoning districts surrounding the subject property.

Map 3. Vicinity Map

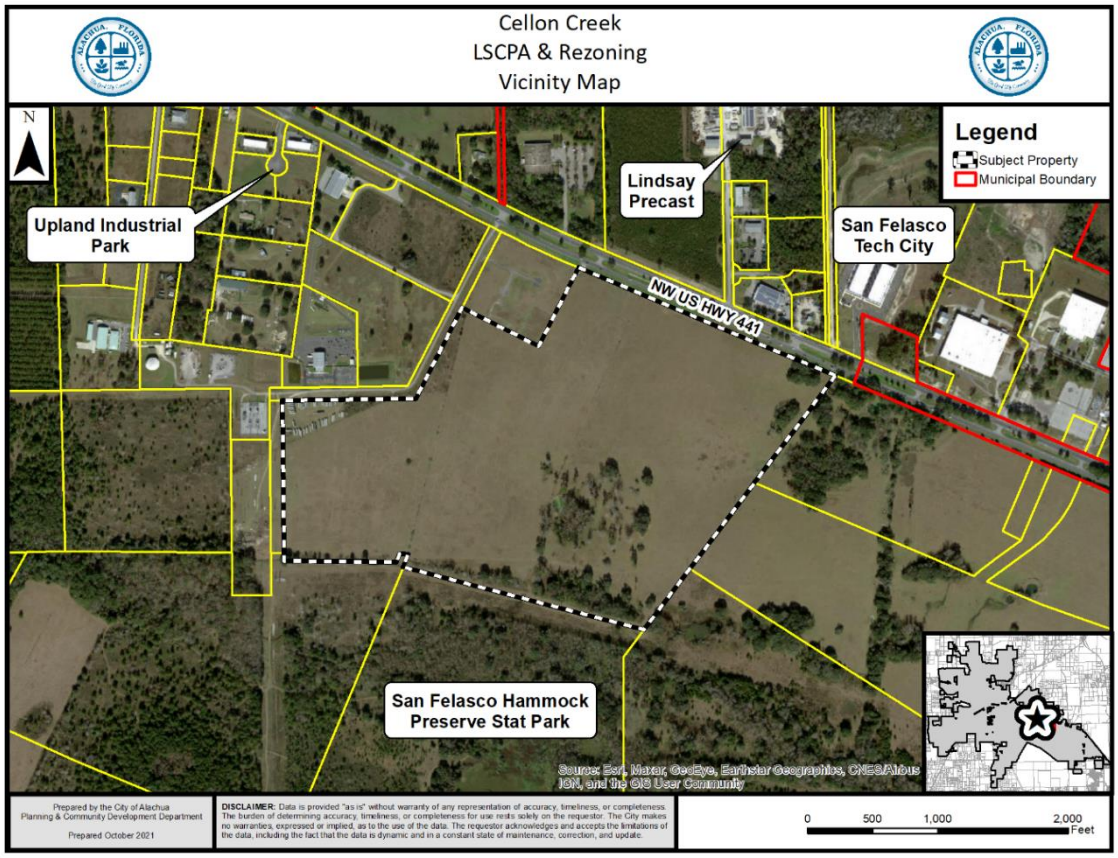


Table 2. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	US 441; Lindsay Precast; Busby Cabinets; San Felasco Tech City	Industrial; Corporate Park	Light & Warehouse Industrial (ILW); Corporate Park (CP)
South	San Felasco Hammock Preserve State Park	Conservation	Conservation (CSV)
East	Vacant Commercial & Residential Lands*	Commercial; Moderate Density Residential; Conservation	Commercial Intensive (CI); Planned Development – Residential (PD-R)
West	San Felasco Hammock Preserve State Park; City of Alachua Ground Storage Facility; Vemo Auto Auctions; Vacant Industrial Lands	Agriculture; Public; Industrial	Agricultural (A); Public Facilities (PF); Light & Warehouse Industrial (ILW)

** Residential lands to the east of the subject property were acquired by Alachua County through the Alachua County Forever program.*

NEIGHBORHOOD MEETING

The purpose of a Neighborhood Meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project.

As required by Section 2.2.4 of the LDRs, all property owners within 400 feet of the subject property and those persons / organizations registered with the City were notified of the meeting. Notice of the meeting was also published in a newspaper of general circulation.

The Neighborhood Meeting was held on September 23, 2021 at 6:00 p.m. at the offices of CHW, located at 11801 Research Drive, Alachua, FL. The applicant was available to answer questions during the meeting. As evidenced by materials submitted by the applicant, one (1) person attended the meeting. A summary of the discussion which occurred at the Neighborhood Meeting has been provided by the applicant and is included within the application materials.

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The applicant proposes to amend the zoning of the of the ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP).

Table 3 shows the proposed FLUM Designations and the proposed corresponding zoning designations. The proposed zoning designations consistent with the proposed FLUM Designations for the properties subject to this application.

Table 3. Subject Property & Consistency with FLUM Designation

Parcel No.	Acreage	Proposed FLUM	Proposed Zoning Designation	Consistent?
05949-000-000	±160.2	Corporate Park	Corporate Park (CP)	☑

The Goals, Objectives, and Policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

Future Land Use Element

GOAL 1: Future Land Use Map 2035:

The City shall maintain a Future Land Use Map in order to effectively guide development in a sustainable manner and to ensure economic prosperity and stability while maintaining a high quality of life for all of its present and future citizens, businesses, and visitors.

Objective 1.4: *Corporate Park*

The City shall establish one mixed-use land use category: Corporate Park. This land use category shall provide a range of research and development, technology and biotechnology industries, office, supporting retail, and limited residential uses located near major transportation corridors. The Corporate Park category is intended to:

1. provide appropriate locations for mixed use office-oriented development to promote and foster the growth of established industries within the City, including but not limited to research and development and technology and biotechnology, with provisions for a variety of residential uses; and,
2. provide a variety of employment opportunities to the citizens of Alachua and the North Central Florida Region.

Policy 1.4.a: The Corporate Park land use category may include office/business parks, biotechnology and other technologies, business incubators, a limited amount of retail sales and services, single-family and multi-family residential, live-work units, building industry uses, and accessory storage facilities (including outdoor storage yards) either as allowed uses or with a special exception permit. Such uses shall be developed in a manner compatible with surrounding land uses, and to minimize potential nuisances or damage to the environment.

Policy 1.4.b: Development within the Corporate Park land use category should be designed in a campus-like or "corporate park" setting with generous, linked open space to maximize value and to promote visual quality and compatibility with the surrounding area. Pedestrian-friendly features, such as buildings placed near the street, sidewalks, and trails leading to nearby uses, such as retail and housing, is encouraged.

Policy 1.4.c: Non-residential Corporate Park uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio (F.A.R.) for parcels 5 acres or greater, 0.75 F.A.R. for parcels less than 5 acres but greater than 1 acre, and 1.0 F.A.R. for parcels 1 acre or less.

Evaluation & Findings: In addition to the proposed rezoning, the applicant has submitted a companion application that proposes to amend the land use of the property to Corporate Park. The proposed amendment would rezone the subject property to Corporate Park. The proposed zoning designation would be consistent with the Corporate Park land use category proposed by the companion application.

Objective 5.1: Natural Features: The City shall coordinate land use categories with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for

properties required to complete the inventory may be established in the City's Land Development Regulations.

Evaluation & Findings: There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities and services necessary for the development.

Policy 5.2a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools in accordance with LOS standards adopted in the elements addressing these facilities.

Evaluation and Findings: An analysis of the proposed amendment's potential impact to public facilities has been provided within this report. This analysis indicates that the proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Based upon current facility capacities, future development of the subject property would not adversely affect the LOS Standard of any other monitored public facilities. Further evaluation of facility capacity will be required, and capacity must be available, at the time of any future development proposal.

GOAL 9: Water and Wastewater Service:

The City will ensure that new development and redevelopment within the corporate limits shall connect to the City's potable water and wastewater system, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the Comprehensive Plan.

Policy 9.1: Any new development or redevelopment within a Commercial or Industrial land use category within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the City's Comprehensive Plan, shall connect to the City's potable water and wastewater system.

Evaluation and Findings: The subject property is located within the City's potable water and wastewater service areas. Future development would be required to be served by City potable water and wastewater services.

Transportation Element

Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Evaluation and Findings: An analysis of the impacts to transportation facilities is provided within this report. This analysis indicates that the proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Community Facilities Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which shall include all areas where wastewater service is available. Wastewater service shall be deemed available if:

3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family

residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation and Findings: The subject property is located within the City's wastewater service area. Future development would be required to be served by City wastewater services.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities for residential uses:

Facility Type	Level of Service Standard
Solid Waste Landfill	0.73 tons per capita per year

Evaluation and Findings: An analysis of the impacts to solid waste facilities is provided within this report. Based upon current demand, development of the subject property will not adversely affect the Level of Service (LOS) standards for solid waste facilities.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Evaluation and Findings: The subject property is located within the City's potable water service area. Future development would be required to be served by City potable water services.

Conservation and Open Space Element

Objective 1.2: *Native Communities and Ecosystems*
The City shall preserve and protect native communities and ecosystems, particularly those considered endangered or threatened.

Policy 1.2.a: The City shall ensure that land use designations, development practices and regulations protect native communities and ecosystems, and environmentally sensitive lands.

OBJECTIVE 1.3: *Listed Species*

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.a: The City shall ensure that its ordinances, regulations and policies protect listed species and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.c: The City shall obtain data from the Florida Fish and Wildlife Conservation Commission, Alachua County Environmental Protection Department, Florida Department of Environmental Protection, to maintain a periodically updated inventory of listed species and habitats located within City limits or immediately adjacent to City limits. The City will use the Florida Natural Areas Inventory as a base inventory.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Objective 1.10: *Wetlands*

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Policy 1.10.a: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code and regulations adopted by the DEP and the Suwannee River Water Management District.

Evaluation and Findings: There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable

Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

Policy 1.12.e: The City shall protect the natural function of floodplains, recognizing the role of flood patterns in maintaining water quality and quantity. Flood plain regulations will be based on Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM).

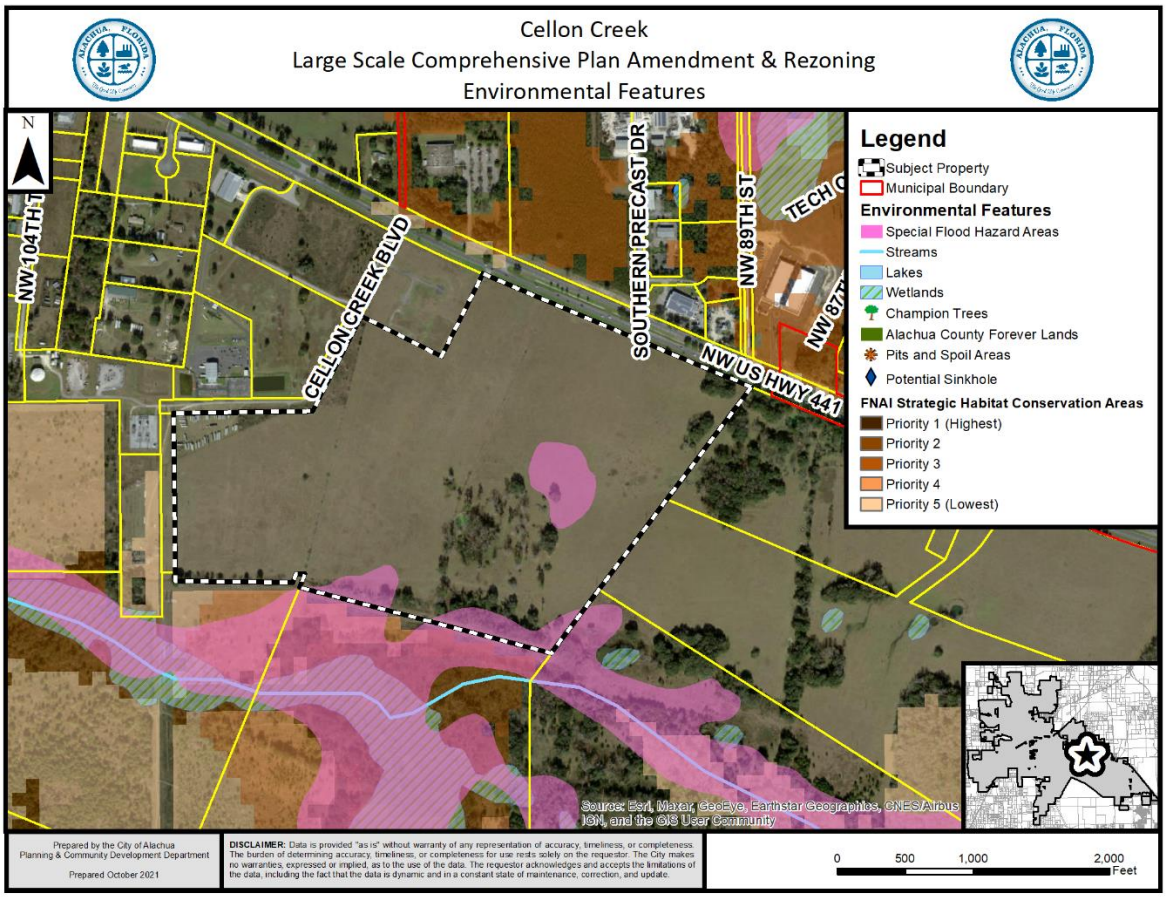
Policy 1.12.f: The City shall work with FEMA, SRWMD, DEP and the County to regulate development within special flood hazard areas susceptible to the one percent (1%) annual chance flood established by FEMA. The City will require development activity to occupy only the non-floodplain portion of a site when feasible; allow dredging and filling within floodplains only if it preserves the natural function of the floodplain and adequately provides for stormwater management; require the minimum floor elevation of any structure to be at least one foot above the established base flood elevation; and will prohibit the storage of hazardous materials or waste within the floodplain, and development activity that threatens to raise the base flood elevation.

Evaluation and Findings: There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations.

ENVIRONMENTAL CONDITIONS & SITE SUITIBILITY ANALYSIS

Wetlands

According to best available data, there are no wetlands identified on the subject property.



Evaluation: If any wetlands are identified on subject property at a later time and as part of the development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

Creeks and Streams

There are no known creeks or streams located on the subject property.

Evaluation: Objective 1.12 and Policy 1.12.d of the City of Alachua Comprehensive Plan Conservation & Open Space Element require minimum buffers from surface water bodies. Should a surface water body be found to exist on or proximate to the subject property, buffers as set forth in Policy 1.12.d shall be required.

Map 3. Environmental Features

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1987 and updated in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation: The subject property is not located within a Strategic Ecosystem, however, the subject property is located to the east of the North San Felasco Hammock Strategic Ecosystem, which is partially located on the parcel adjacent to the subject property. A portion of the North San Felasco Hammock Strategic Ecosystem was acquired by Alachua County in 2011, and includes a portion of the land adjacent to the east of the subject property.

Regulated Plant & Animal Species

The subject property is not known to contain any species identified as endangered, threatened, or of special concern. The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated

by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region. Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. While the FNAI PNA data layer provides an indicator of potential of lands to feature habitat which could support species identified as endangered, threatened, or of special concern, this data is not intended for use in a regulatory decision making process. The data must be referenced only as a resource to indicate the potential of land to support wildlife.

If a regulated plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations.

Soil Survey

Each soil type found on the subject property is identified below. The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff). There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have very lower infiltration rates and therefore a higher runoff potential.

There are nine (9) soil types found on the subject property:

Arredondo Fine Sand (0% - 5% slopes)
Hydrologic Soil Group: A

> This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes and local roads and moderate limitations for small commercial buildings.

Arredondo Fine Sand (5% - 8% slopes)
Hydrologic Soil Group: A

> This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes and local roads and moderate limitations for small commercial buildings.

Blichton Sand (2% – 5% slopes)
Hydrologic Soil Group: D

This soil type is poorly drained. Permeability is rapid at the surface. This soil type poses severe limitations for urban uses, including dwellings, and small commercial buildings, due to wetness.

Fort Meade Fine Sand (0% – 5% slopes)
Hydrologic Soil Group: A

This soil type is well drained and permeability is surface runoff is slow. This soil type poses only slight limitations as sites for homes and local roads.

Millhopper Sand (0% – 5% slopes)
Hydrologic Soil Group: A

This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes, local roads, and small commercial buildings.

Millhopper Sand (5% – 8% slopes)
Hydrologic Soil Group: A

This soil type is well drained and permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes and small commercial buildings.

Lochloosa Fine Sand (2% – 5% slopes)
Hydrologic Soil Group: C

This soil type is somewhat poorly drained. Permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes, local roads, and small commercial buildings.

Lochloosa Fine Sand (5% – 8% slopes)
Hydrologic Soil Group: C

This soil type is somewhat poorly drained. Permeability is rapid at the surface. This soil type poses only slight limitations as sites for homes, local roads, and small commercial buildings.

Pomona Sand
Hydrologic Soil Group: B/D

This soil type poorly drained. Permeability is rapid at the surface. This soil type poses severe limitations for urban uses, including dwellings, and small commercial buildings, due to wetness.

Evaluation: While some soil types pose limitations to urban uses, the majority of the site consists of soil types which pose only slight limitations for development. Development which may occur on the subject property will consider any limitations presented by soils present on-site.

Flood Potential

Panel 0140D of the Federal Emergency Management Agency ("FEMA") Flood Insurance Rate Map ("FIRM") Series, dated June 16, 2006, indicates that the subject property is in Flood Zones X (areas determined to be outside of the 500-year floodplain) and Flood Zone A (areas determined to be subject to flooding by the 1% annual chance flood [100-year flood], with no Base Flood Elevation [BFE] determined.) Map 4 indicates the areas of special flood hazard.

Evaluation: Any development which occurs on the subject property within areas identified as Flood Zone A will be required to comply with the applicable provisions of the City's Comprehensive Plan and Land Development Regulations, which may require the determination of a Base Flood Elevation. All development within these areas must comply with Section 6.9 of the LDRs, which requires structures to be elevated above the Base Flood Elevation.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations. The subject property is located within an area where sinkholes may potentially allow hydrologic access to the Floridan Aquifer System. Best available data indicates there are no known geologic features on the subject property.

Evaluation: There are no concerns at this time based upon the best available data, which indicates there are no known geologic features on the subject property.

Wellfield Protection Zone

Policy 7.2.1 of the Future Land Use Element of the Comprehensive Plan establishes a 500 foot radial buffer around city-owned potable water well.

Evaluation: The subject property is not located within a City of Alachua wellhead protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures and Markers

The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventory.

Evaluation: There are no issues related to historic markers or structures.

FINDINGS OF FACT: COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

Rezoning Standards

Section 2.4.2(E)(1) of the Land Development Regulations ("LDRs") establishes standards with which all rezoning applications must be found to be compliant. Staff's evaluation of the application's compliance with the applicable standards of Section 2.4.2(E)(1) is provided below.

(a) ***Consistent with Comprehensive Plan*** – The proposed amendment is consistent with and furthers the goals, objectives, and policies of the Comprehensive Plan.

Evaluation and Findings: An analysis of the application's consistency with the Comprehensive Plan is provided within this report.

(b) ***Consistent with Ordinances*** – The amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

Evaluation and Findings: An analysis of the application's compliance with the LDRs is provided within this report. The amendment does not conflict with any applicable requirements of the City's Code of Ordinances.

(c) ***Logical Development Pattern*** – The proposed amendment would result in a logical and orderly development pattern.

Evaluation and Findings: The lands located to the east and west of the subject property are zoned for commercial and industrial uses. While the Corporate Park (CP) zoning district is a mixed-use district that allows residential development, the specific purpose of this district is to accommodate a range of research and development, technology and life sciences/biotechnology industries, office, and supporting retail with complementary residential uses. The subject property is also located along US Highway 441, a principle arterial, in an area of the City with existing nonresidential uses. Lands to the northwest of the subject property are also zoned Corporate Park (San Felasco Tech City).

(d) ***Pre-Mature Development*** – The proposed amendment will not create premature development in undeveloped or rural areas.

Evaluation and Findings: The subject property is located in an area with existing commercial and industrial development. Future development of the property would not create premature development in an undeveloped or rural area.

(e) ***Incompatible with Adjacent Lands*** – The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

Evaluation and Findings: The lands located to the east and west of the subject property are zoned for commercial and industrial uses. The subject property is also located along US Highway 441, a principle arterial, in an area of the City with existing nonresidential uses. San Felasco Hammock Preserve State Park is located to the south of the subject property. It is expected that the environmental protection standards set forth in the City's Comprehensive Plan and LDRs will provide adequate protection of environmental resources.

(f) *Adverse Effect on Local Character* – The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights, or other physical effects or nuisances.

Evaluation and Findings: The subject property is located along a US Highway 441, a principle arterial. Adjacent and nearby properties are presently zoned and used for commercial and industrial uses. It is not expected that the proposed amendment would adversely affect the general area where it is located as the potential impacts that may result from the rezoning of the property to Corporate Park (CP) would be similar in impact to those commercial and industrial uses that are presently located on nearby properties.

(g) *Not Deviate from Pattern of Development* – The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by the surrounding zone districts) of the area where the proposed amendment is located.

Evaluation and Findings: The lands located to the east and west of the subject property are zoned for commercial and industrial uses. Surrounding properties are presently zoned and used for commercial and industrial uses. The uses permitted within the Corporate Park (CP) zoning district are generally similar to those permitted within the commercial and industrial zoning designations of nearby properties.

(h) *Encourage Sprawl* – The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low density single dimensional development.

Evaluation and Findings: Chapter 163.3164(51), Florida Statues, defines "urban sprawl" as, "a development pattern characterized by low density, automobile-dependent development with either a single use or multiple uses that are not functionally related, requiring the extension of public facilities and services in an inefficient manner, and failing to provide a clear separation between urban and rural uses." Staff finds that the proposed amendment does not constitute urban sprawl.

(i) *Spot Zoning* – The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

Evaluation and Findings: The lands located to the east and west of the subject property are zoned for commercial and industrial uses. Surrounding properties are

presently zoned and used for commercial and industrial uses. The proposed amendment will not result in creation of isolated zoning districts.

(j) *Public Facilities* – The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, storm water management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

Evaluation and Findings: The subject property is located within the City of Alachua's utility service area. Future development would be served by the City's potable water and wastewater systems. Potable water and sanitary sewer utilities are located within the US 441 right-of-way adjacent to the subject property.

An analysis of the proposed amendment's potential impact to public facilities has been provided within this report. This analysis indicates that the proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Based upon current facility capacities, future development of the subject property would not adversely affect the LOS Standard of any other monitored public facilities. Further evaluation of facility capacity will be required, and capacity must be available, at the time of any future development proposal.

(k) *No Adverse Effect on the Environment* – The proposed amendment would not result in significantly adverse impacts on the natural environment, including but not limited to water, air, noise, storm water management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

Evaluation and Findings: A comprehensive analysis of environmental features has been provided in this report. The proposed amendment would not result in significant adverse impacts to any environmental features. There are areas along the south property line and located within the subject property that are designated as Zone A on the FEMA flood maps. Special flood hazard areas are subject to the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations. These special flood hazard areas and the surrounding lands could potentially include wetland areas. Further analysis will be required during the site planning and development stages. If any wetlands are identified on subject property at a later time and as part of the

development review process, the applicable protection standards in the City's Comprehensive Plan and Land Development Regulations, as well as all applicable Suwannee River Water Management District (SRWMD) regulations, would apply to those areas identified as wetlands.

PUBLIC FACILITIES IMPACT

The existing maximum development potential and proposed maximum development potential is provided within the following matrix.

	Existing Zoning District	Proposed Zoning District
Zoning District:	Agricultural	Corporate Park (CP)
Max. Gross Density:	0.2 dwelling units/acre	4 dwelling units/acre
Floor Area Ratio:	N/A	0.50 FAR
Maximum Density:	32 dwelling units	N/A
Maximum Intensity:	N/A	3,489,156 square feet
* *The current Future Land Use Map Designations of the subject property are Commercial, Community Commercial, High Density Residential, and Moderate Density Residential. Based upon the current FLUM Designations, the maximum gross density would be 651 dwellings and the maximum floor area would be 908,226 square feet. Thus, the net increase/decrease would be a decrease of 11 dwellings and an increase of 2,580,930 square feet of nonresidential uses.*		

The analysis of each public facility provided below represents an analysis of the maximum development potential proposed by the amendment.

The proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Based upon current facility capacities, future development of the subject property would not adversely affect the LOS Standard of any other monitored public facilities. Further evaluation of facility capacity will be required, and capacity must be available, at the time of any future development proposal.

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2,3]	Segment Description	Lanes	Functional Classification	Area Type	LOS
3 (4127)	US 441 (From MPO Boundary to CR 25A East Intersection)	4/D	Principle Arterial	Urban Trans	D
4 (106)	US 441 (From CR 25A East Intersection to SR 235)	4/D	Principle Arterial	Urban Trans	D
5 (107)	US 441 (from SR 235 to I-75)	4/D	Principle Arterial	Urban Trans	D

Available Capacity[4]	1,556	1,722	902	356	282	504	807	1,266	1,081	896
Maximum PM Peak Hour Trips Generated by Amendment[5]	1,289	2,557	515	258	129	129	129	258	129	258
Residual Capacity After Potential Development's Impacts[6]	267	-835	387	98	153	375	678	1,008	952	638

1 *FDOT roadway segment number shown in parenthesis (when applicable.) For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity.*
2 *AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facility AADT counts provided by Alachua County Public Works, April 2021.*
3 *Florida State Highway System Level of Service Report, Florida Department of Transportation, District Two.*
4 *Source: City of Alachua October 2021 Development Monitoring Report.*
5 *Trip Distribution: Segment 3 - 50%; Segment 4 - 100%; Segment 5 - 20%; Segment 6 - 10%; Segment 8 - 5%; Segment 9 - 5%; Segment 11 - 10%; Segment 13- 10%; Segment 14 - 5%; Segment 15 - 10%.*
6 *The application is for a Preliminary Development Order. Facility capacity and concurrency will **not** be reserved.*

Evaluation: Policy 1.1.a of the Comprehensive Plan Transportation Element establishes the Level of Service ("LOS") Standards for transportation facilities. For roadways monitored for concurrency, the LOS Standard is evaluated based upon the project's impact to the PM Peak Hour. The proposed amendment, at a maximum build-out scenario, would cause Segment 4 (US 441 from SR 25A to SR 235) to operate below the LOS Standard mandated by Policy 1.1.a of the Comprehensive Plan Transportation Element. However, it is unlikely that full build-out of the subject property would result in a maximum build-out scenario. As development of the subject property occurs, concurrency and impacts to the City's transportation network will be reevaluated during the review of any application for a final development order, such as a site plan or final plat. Facility capacity must be available at the time of the review of a final development order for the final development order to be granted. Alternatively, if facility capacity is not available at the time of review of a final development order, proportionate share mitigation will be required as set forth in Chapter 18 of the City of Alachua Code of Ordinances.

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity[1]	2,300,000
Less Actual Potable Water Flows[1]	1,300,250
Reserved Capacity[2]	168,234
Available Capacity	831,516
Projected Potable Water Demand from Application[3]	523,373
Residual Capacity	**308,143**
Percentage of Permitted Design Capacity Utilized	**86.60%**

Sources:
1 City of Alachua Public Services Department, April 2021.
2 City of Alachua December 2021 Development Monitoring Report.
3 Source: Chapter 64E-6, Florida Administrative Code; Formula: Shopping Center - 15 gallons per 100 square feet x 3,489,156 square feet.

Evaluation: It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of the potable water system and the development of the property at its maximum development potential is therefore acceptable. Concurrency and impacts to the City's potable water system will be reevaluated at the site plan or preliminary plat review stage.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity	1,500,000
Less Actual Treatment Plant Flows[1]	677,000
Reserved Capacity[2]	149,453
Available Capacity	673,547
Projected Sanitary Sewer Demand from Application[3]	523,373
Residual Capacity	**150,174**
Percentage of Permitted Design Capacity Utilized	**89.99%**

Sources:
1 City of Alachua Public Services Department, April 2021.
2 City of Alachua December 2021 Development Monitoring Report.
3 Source: Chapter 64E-6, Florida Administrative Code; Formula: Shopping Center - 15 gallons per 100 square feet x 3,489,156 square feet.

Evaluation: It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of the wastewater system and the development of the property at its maximum development potential is therefore acceptable. Concurrency and impacts to the City's wastewater system will be reevaluated at the site plan or preliminary plat review stage.

Solid Waste Impacts

Table 8. Solid Waste Impacts

System Category	Pounds Per Day	Tons Per Year
Demand from Existing Development[1]	41,880.00	7,643.10
Reserved Capacity[2]	15,609.14	2,848.67
Demand Generated by Application[3]	41,869.86	7,641.25
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
1 *University of Florida, Bureau of Economic & Business Research, Estimates of Population (2020); Policy 2.1.a, CFNGAR Element (Formula: 10,574 persons x 0.73 tons per person per year).*
2 *City of Alachua December 2021 Development Monitoring Report.*
3 *Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996*
4 *New River Solid Waste Facility, April 2021.*

Evaluation: It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for solid waste facilities, and the impacts are therefore acceptable. This analysis is based on the maximum development potential proposed by the amendment. Concurrency and impacts to the City's solid waste system will be reevaluated at site plan review or preliminary plat review stage.

Recreational Impacts

Table 9a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	52.87
Reserved Capacity[1]	2.20
Potential Demand Generated by Development[3]	8.32
Residual Recreational Capacity After Impacts	**72.09**

Sources:
1 *City of Alachua December 2021 Development Monitoring Report.*
2 *University of Florida, Bureau of Economic & Business Research, Estimates of Population by County and City in Florida, April 1, 2020; Policy 1.2.b, Recreation Element (Formula: 10,574 persons / [5 acres/1,000 persons])*
3 *US Census Bureau; Policy 1.2.b, Recreation Element (Formula: 2.6 persons per dwelling x 640 dwellings / [5 acres/1,000 persons])*

Table 9b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	11.01 acres
Acreage Required to Serve Demand Generated by Development[2]	1.66 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	12.67 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**36.39%**

1 *Source: City of Alachua December 2021 Development Monitoring Report.*
2 *Formula: Recreation Demand Generated by Development (8.32 acres) x 20%.*
3 *Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)*

Evaluation: The proposed development would increase the maximum potential demand of recreational facilities by 8.23 acres, and would increase the demand of passive park space by 1.66 acres. It is anticipated that the proposed development will not adversely affect the LOS of recreational facilities; therefore, the impacts are acceptable. Concurrency and impacts to the City's recreation system will be reevaluated at site plan review or preliminary plat review stage.

Public School Impact

A School Capacity Review was submitted to The School Board of Alachua County (SBAC) in accordance with the City's Comprehensive Plan, specifically Policies 1.1.b, 1.1.c, 1.1.e, and 1.1.f of the Public School Facilities Element. According to the School Capacity Review report submitted to the City by the School Board of Alachua County on November 30, 2021, capacity is available at the elementary, middle, and high school levels to support the proposed development.

Upon submittal of a final development order for residential development (e.g., a site plan or final plat), a concurrency review will occur and determination of the availability of school capacity will rendered. Facility capacity must be available in order for a final development order to be granted.

RE: ACPS – Cellon Creek Comprehensive Plan Amendment / Rezoning

Alachua County Public Schools ("ACPS") has received notification of a Planned Development Amendment (rezoning) within the city limits of Alachua. The project encompasses 160 acres identified as Parcel 05949-000-000. This project is reviewed in accordance with *Objective 1.1: of the High Springs Comprehensive Plan* and *Section 6 of the Alachua County Public School Interlocal Agreement.*

The subject property is designated as Commercial, Community Commercial, Moderate Density Residential and High Density Residential in the Alachua *Future Land Use Element* and is currently designated as *Agriculture by the Alachua* zoning atlas. The proposed amendment will amend the FLUM designation to *Corporate Park.* This letter is being sent as a response to the impact that will be created by the maximum increase of 320 single family units and 320 multi-family units upon Alachua County schools. At buildout, the subject property is projected to generate students as shown by the following table.

Table 1: Projected Student Generation

	Units	*Elementary*	*Middle*	*High*
Single Family	320	45	19	29
Multi Family	320	29	10	10
Total	640	74	29	39

Pursuant to Chapter 1003, Florida Statutes, the School Board is charged with the operation and control of public K-12 education within the Alachua County School District. Its responsibilities include school facility planning, construction and maintenance and student assignment to maintain adequate and efficient utilization of educational facilities.

Please be advised that the School Board is undertaking a district wide evaluation of its capital investment priorities and policies and its student assignment policies. This review will involve an examination of school capital financing and the allocation of present and future funds among new construction, renovation and maintenance as required to maintain a uniform level of service throughout the District.

This evaluation will involve a comprehensive review of all public schools, including their attendance zones and the educational programs offered. As a result of anticipated redistricting, areas of the County and the towns/cities currently zoned for a school may no longer be zoned for the same school when the redistricting process is completed. Any new residential development located in an existing school zone is not guaranteed to remain in that same zone after the redistricting process is completed. It is anticipated that a new school-zoning plan will be in place for the start of the 2023-2024 school year.

The following table shows the current and projected utilization of public schools serving the City of Alachua.

Table 2: Capacity Utilization				
School	Capacity	Current	5 Years	10 Years
Alachua Elem	525	306	329	354
Irby Elem	536	381	410	441
Mebane Middle	876	336	362	389
Santa Fe High	1,435	1,134	1,220	1,313

To facilitate satisfactory and long-term solutions to our capacity needs, it is recommended that the City encourage developers to contribute to the expansion of educational facilities through "Capacity Enhancement Agreements.

If you have additional, questions please contact me at 352.955.7400 ext. 1445.

Sincerely,

Suzanne Wynn, Director
ACPS Facilities Community Planning

RE: Planning & Zoning Board (PZB) Public Hearing: Cellon Creek Large Scale Comprehensive Plan Amendment (LSCPA) Application and Site-Specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Mr. Wood:

On November 4, 2021, the City of Alachua received your revised applications for a Large Scale Comprehensive Plan Amendment (LSCPA) and a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) on behalf of the University of Florida Foundation, Inc. Based upon a review of the revised applications, the City has determined that the applications can now be scheduled for hearings before the Planning and Zoning Board (PZB).

You must provide two (2) *double-sided, three-hole punched, color sets* of each **complete** application package and a digital copy of all materials in PDF format on a CD or by emailing a Cloud / FTP link to download the materials to planning@cityofalachua.com *no less than 10 business days prior to the PZB Meeting at which your applications are scheduled to be heard.* The applications have been scheduled for the **December 14, 2021** PZB Meeting, therefore, the above referenced materials must be submitted to the City no later than ***Tuesday, November 30, 2021.*** Materials may be submitted earlier than this date.

In addition, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearings. Therefore, posted notice signs must be placed on the property no later than ***Tuesday, November 30, 2021***. Staff will contact notify you when the signs are available for pick up at City Hall.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearings, please submit the presentation or materials no later than 12:00 PM on the last business day prior the PZB meeting (no later than ***Monday, December 13, 2021***). Any presentation or materials may be submitted by emailing them to planning@cityofalachua.com.

Should you have any questions, please feel free to contact me at (386) 418-6100, x 1602 or via email at jtabor@cityofalachua.com.

Sincerely,

Justin Tabor, AICP
Principal Planner

RE: Response to Planning Assistance Team (PAT) Comments regarding:
Cellon Creek Large-scale Comprehensive Plan Amendment (LsCPA) Application
Cellon Creek Site-specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Justin:

Please find below detailed responses to the comments issued in the October 19 PAT Summary Letter regarding the above-mentioned applications. Original comments are provided in standard font; responses are provided in **bold font.**

LSCPA & REZONING APPLICATIONS

1. Maximum Development Potential
    a. In several areas of each application, it is stated that the proposed amendments would result in ±199,287 fewer square feet of nonresidential use compared to the current land use and zoning of the property. Based upon a note in the concurrency analysis, these statements are concluded by considering a maximum intensity where 25% of the project site will be dedicated to nonresidential uses. Maximum development potential must be considered based upon the maximum permitted by the proposed land use and zoning categories. Please revise throughout each application as needed.

Per the advisement of staff in the October 21 PAT Meeting, the maximum development potential mentioned throughout the application has been revised to reflect a scenario in which the entirety of the ±160.2-acre property is developed at a nonresidential intensity of 0.5 FAR.

2. Concurrency Impact Analysis
    a. Revise the impacts to all transportation, potable water, sanitary sewer, and solid waste to address comment 1.a.

These calculations have been revised in Section 3 of both reports. These revisions also followed the advice of city staff and demonstrate a maximum development scenario in which the entirety of the project site is developed at a nonresidential intensity of 0.5 FAR.

    b. Section 2.4.14(H) defines affected roadway segments as any roadway segment located within 1/2 mile of the subject property and those roadway segments for which the project's impacts are 5% or greater of the MSV of the roadway segment. Segment 4 is the only roadway segment identified as an affected roadway segment. Revisions to the projected trip generation to address comments 1.a. and 2.a. will likely result in additional roadway segments meeting the definition of 'affected roadway segment'. Revise Table 4 as needed to consider all affected roadway segments.

Table 4 in both reports has been revised to address this comment. Road segments now included are Segment 3, Segment 4, Segment 5, Segment 6, Segment 8, Segment 9, Segment 11, Segment 13, Segment 14, and Segment 15.

Gainesville | 11801 Research Drive, Alachua, Florida 32615 (352) 331-1976 | www.chw-inc.com

c. Evaluate and reconsider trip distribution to Segments 8 and 9.

Trip distribution for Segments 8 and 9 have been reconsidered. This change is reflected on the resubmitted Transportation Concurrency map exhibit.

d. While it is understood that Table 5 is intended to illustrate the increase/decrease in net impacts between existing and proposed land use/zoning categories, available capacity would not be applicable to such an analysis as it is not reflective of potential impacts from the proposed land use/zoning amendments. Please remove this information from Table 5.

Table 5 has been removed from both reports.

3. Comprehensive Plan Consistency Analysis
   a. The applicant states, in response to Objective 4.1 of the FLUE, "[t]he project site for this application will be infill development." Infill development is generally characterized as development occurring within an urban area on a vacant or underutilized property. The subject property is largely surrounded by other vacant lands. Please clarify the statement that this project represents infill development.

The response to Objective 4.1 of the FLUE has been revised in both reports to further explain what was meant by the term "infill development." The intention behind using this terminology was to make reference to the fact that the project site is a centrally located property on the US 441 corridor that currently sits vacant. It is surrounded by existing nonresidential uses and is nearby existing residential uses. Changing the Future Land Use (FLU) Classification and Zoning of the site to Corporate Park FLU and Corporate Park zoning will make possible site development with a mixture of complementary residential, commercial, and service offerings, and create adjacencies with other nonresidential uses along the corridor. This will also bring additional supportive uses to existing and future nearby residential communities in the City of Alachua.

LSCPA APPLICATION

4. Needs Analysis
   a. Revise the impacts to address comment 1.a.

References to impacts in the Needs Analysis have been revised in response to comment 1.a.

b. Suggest incorporating the memorandum within the justification report.

The Needs Analysis memorandum has been incorporated into the LsCPA Justification Report as Section 6.

c. Suggest utilizing the 2020 US Census for population data (10,574 persons).

The Needs Analysis has been revised to use the 2020 US Census population data when refencing City of Alachua population.

5. Urban Sprawl Analysis
   a. In response to Ch. 163.3177(6)(a)9.a.(II), please clarify the statement that this project represents infill development.

The response to Ch. 163.3177(6)(a)9.a.(II), Florida Statute, has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

b. In response to Ch. 163.3177(6)(a)9.a.(V):
    i. Please clarify statement referring to redevelopment of the site.

The statement referring to "redevelopment" of the site was a typographical error. The term "redevelopment" has been replaced with the term "development" in this response.

    ii. Note: Lands adjacent to the west and designated Agriculture land use/Agricultural zoning are owned by the State of Florida and are a part of San Felasco Hammock Preserve State Park.

This comment has been noted.

c. In response to Ch. 163.3177(6)(a)9.a.(VI), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)

The response to Ch. 163.3177(6)(a)9.a.(VI), Florida Statute, has been revised to expand upon the availability of existing utilities to state the following: for water services, there is a 16" water main along US 441; for wastewater services, there is a 10" force main along US 441, an 8" gravity main west of the project site, and a Lift Station at the northwest corner of the project site; and for electric services, there is a primary overhead electric line on Cellon Creek Boulevard to the west of the site and a primary overhead electric line on US 441 to the north of the site.

d. In response to Ch. 163.3177(6)(a)9.a.(X), please clarify the statement that this project represents infill development.

The response to Ch. 163.3177(6)(a)9.a.(X), Florida Statute, has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

e. Response to Ch. 163.3177(6)(a)9.b.(I) does not address specifically how the amendment would direct or locate economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on an protects natural resources and ecosystems.

The response to Ch. 163.3177(6)(a)9.b.(I), Florida Statute, has been revised to further explain how the amendment would locate economic growth in a manner that does not have adverse impact on and protects natural resources. This response now details how the type of development allowed by the Corporate Park FLU classification will spur economic growth by allowing more homes in the community and allowing more businesses to locate in the City. The response also explains that the property is an appropriate location for the Corporate Park-style of development, due to its proximity to US 441 and similar developments. Finally, the response explains how adverse impacts will be minimized and natural resources will be protected through the use of a development gradient and implementation of appropriate buffering.

6. LDR Consistency Analysis
    a. Please remove or update statement related to the recently approved LDR text amendments.

Reference to the recent approval of Land Development Regulations (LDR) amendments has been removed from this report.

    b. In response to Section 2.4.2(E)(1)(d), please clarify the statement that this project represents infill development.

The response to Section 2.4.2(E)(1)(d) has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

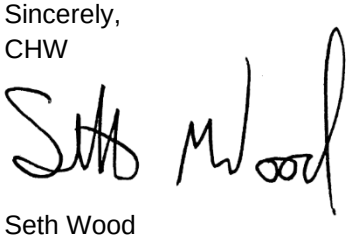
    c. Upon revising the Concurrency Impact Analysis to address comment 1.a., review response to Section 2.4.2(E)(1)(f) in relation to traffic impacts.

The response to Section 2.4.2(E)(1)(f) has been revised upon revision to the Concurrency Impact Analysis.

    d. In response to Section 2.4.2(E)(1)(f), please clarify the statement that this project represents infill development.

The response to Section 2.4.2(E)(1)(f) has been revised to further clarify the statement that this project represents infill development, as described in response to Comment 3.a.

    e. In response to Section 2.4.2(E)(1)(j), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.



The response to Section 2.4.2(E)(1)(j) has been revised to expand upon the availability of existing utilities to state the following: for water services, there is a 16" water main along US 441; for wastewater services, there is a 10" force main along US 441, an 8" gravity main west of the project site, and a Lift Station at the northwest corner of the project site; and for electric services, there is a primary overhead electric line on Cellon Creek Boulevard to the west of the site and a primary overhead electric line on US 441 to the north of the site.

    f. In response to Section 2.4.2(E)(1)(k), please expand upon protection measures for environmental features, including but not limited to on-site wetlands, special flood hazard areas, and San Felasco Hammock Preserve State Park.

The response to Section 2.4.2(E)(1)(k) has been expanded to make reference to specific protection measures, including Comprehensive Plan Conservation and Open Space Element Policy 1.10.g. regarding adequate wetland buffering; Comprehensive Plan Conservation and Open Space Element Policy 1.12.d. regarding adequate surface water buffering; and Comprehensive Plan Conservation and Open Space Element Policy 1.12.f. regarding appropriate development within special flood hazard areas. The revised response also explains that site development will be done in a density and intensity gradient, placing the highest density and intensity closest to US 441, and the lowest density closest to the San Felasco Hammock Preserve.

Thank you for your thorough review of our application materials. I look forward to our further discussion on these requests to amend the City's Future Land Use Map and Official Zoning Atlas.

Sincerely,
CHW

RE: Planning Assistance Team (PAT) Summary:
Cellon Creek Large Scale Comprehensive Plan Amendment (LSCPA) Application
Cellon Creek Site-Specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Mr. Wood:

On September 30, 2021, the City of Alachua received your applications for a Large Scale Comprehensive Plan Amendment (LSCPA) and a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) on behalf of the University of Florida Foundation, Inc. The applications propose to amend the FLUM and the zoning of a ±160.2 acre subject property (Tax Parcel Number 05949-000-000). The LSCPA application proposes to amend the FLUM from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and the Rezoning application proposes to amend the zoning from Agricultural (A) to Corporate Park (CP). A completeness review was performed on October 6, 2021 and the applications were determined to be complete on the same date.

The applications have been reviewed by the City's Planning Assistance Team (PAT). Upon review of the applications and materials, the following insufficiencies must be addressed. A meeting is scheduled for **11:30 AM** on **Thursday, October 21, 2021** to review these comments.

Please address all insufficiencies in writing and provide an indication as to how they have been addressed by **5:00 PM** on **Thursday, November 4, 2021**. A total of four (4) copies of each application package and a digital copy of all materials in PDF format on a CD or sent by emailing a Cloud / FTP link must be provided by this date. If all comments are addressed by the resubmission date above, the application may be scheduled for the **December 14, 2021 Planning & Zoning Board (PZB) Meeting.**

Please address the following:

LSCPA & Rezoning Applications

1. *Maximum Development Potential*
   a. In several areas of each application, it is stated that the proposed amendments would result in ±199,287 fewer square feet of nonresidential use compared to the current land use and zoning of the property. Based upon a note in the concurrency analysis, these statements are concluded by considering a maximum intensity where 25% of the project site will be dedicated to nonresidential uses. Maximum development potential must be considered based upon the maximum permitted by the proposed land use and zoning categories. Please revise throughout each application as needed.

2. *Concurrency Impact Analysis*
   a. Revise the impacts to all transportation, potable water, sanitary sewer, and solid waste to address comment 1.a.
   b. Section 2.4.14(H) defines affected roadway segments as any roadway segment located within 1/2 mile of the subject property and those roadway segments for which the project's impacts are 5% or greater of the MSV of the roadway segment. Segment 4 is the only roadway segment identified as an affected roadway segment. Revisions to the projected trip generation to address comments 1.a. and 2.a. will likely result in additional roadway segments meeting the definition of 'affected roadway segment'. Revise Table 4. as needed to consider all affected roadway segments.
   c. Evaluate and reconsider trip distribution to Segments 8 and 9.
   d. While it is understood that Table 5 is intended to illustrate the increase/decrease in net impacts between existing and proposed land use/zoning categories, available capacity would not be applicable to such an analysis as it is not reflective of potential impacts from the proposed land use/zoning amendments. Please remove this information from Table 5.

3. *Comprehensive Plan Consistency Analysis*
   a. The applicant states, in response to Objective 4.1 of the FLUE, "[t]he project site for this application will be infill development." Infill development is generally characterized as development occurring within an urban area on a vacant or underutilized property. The subject property is largely surrounded by other vacant lands. Please clarify the statement that this project represents infill development.

LSCPA Application

4. *Needs Analysis*
   a. Revise the impacts to address comment 1.a.
   b. Suggest incorporating the memorandum within the justification report.
   c. Suggest utilizing the 2020 US Census for population data (10,574 persons).

5. *Urban Sprawl Analysis*
   a. In response to Ch. 163.3177(6)(a)9.a.(II), please clarify the statement that this project represents infill development.

b. In response to Ch. 163.3177(6)(a)9.a.(V):
   i. Please clarify statement referring to redevelopment of the site.
   ii. Note: Lands adjacent to the west and designated Agriculture land use/Agricultural zoning are owned by the State of Florida and are a part of San Felasco Hammock Preserve State Park.
c. In response to Ch. 163.3177(6)(a)9.a.(VI), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)
d. In response to Ch. 163.3177(6)(a)9.a.(X), please clarify the statement that this project represents infill development.
e. Response to Ch. 163.3177(6)(a)9.b.(I) does not address specifically how the amendment would direct or locate economic growth and associated land development to geographic areas of the community in a manner that *does not have an adverse impact on an protects natural resources and ecosystems*.

Rezoning Application

6. *LDR Consistency Analysis*
   a. Please remove or update statement related to the recently approved LDR text amendments.
   b. In response to Section 2.4.2(E)(1)(d), please clarify the statement that this project represents infill development.
   c. Upon revising the Concurrency Impact Analysis to address comment 1.a., review response to Section 2.4.2(E)(1)(f) in relation to traffic impacts.
   d. In response to Section 2.4.2(E)(1)(f), please clarify the statement that this project represents infill development.
   e. In response to Section 2.4.2(E)(1)(j), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.
   f. In response to Section 2.4.2(E)(1)(k), please expand upon protection measures for environmental features, including but not limited to on-site wetlands, special flood hazard areas, and San Felasco Hammock Preserve State Park.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1602 or via e-mail at jtabor@cityofalachua.com. We look forward to receiving your revised applications.

Sincerely,

PROJECT ASSISTANCE TEAM SUMMARY

PROJECT NAME: Cellon Creek

APPLICATION TYPE: LSCPA and Rezoning

APPLICANT/AGENT: Seth Wood, Causseaux, Hewett, & Walpole, Inc.

PROPERTY OWNER: University of Florida Foundation, Inc.

PAT MEETING DATE: October 19, 2021

PAT MEETING TYPE: Staff

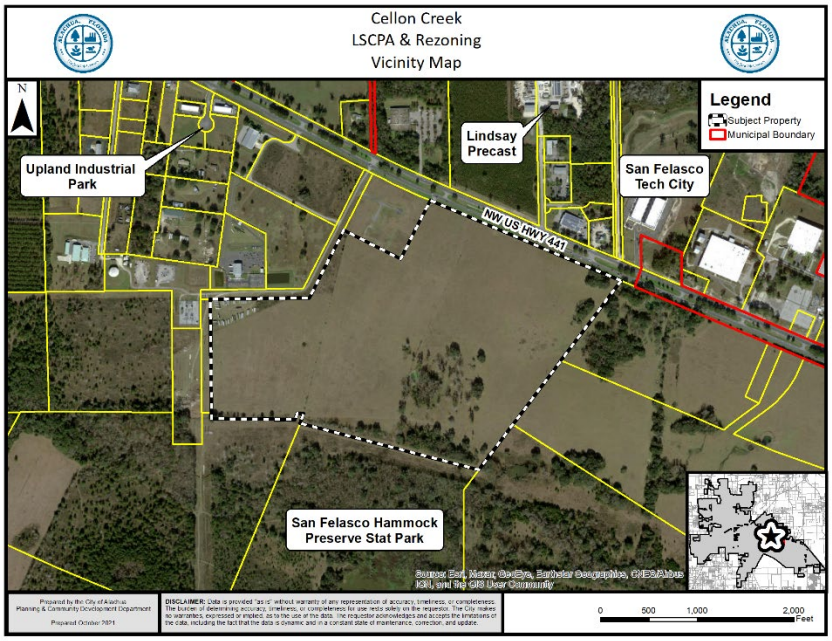
CURRENT FLUM DESIGNATION: Commercial, Community Commercial, Moderate Density Residential, and High Density Residential

PROPOSED FLUM DESIGNATION: Corporate Park

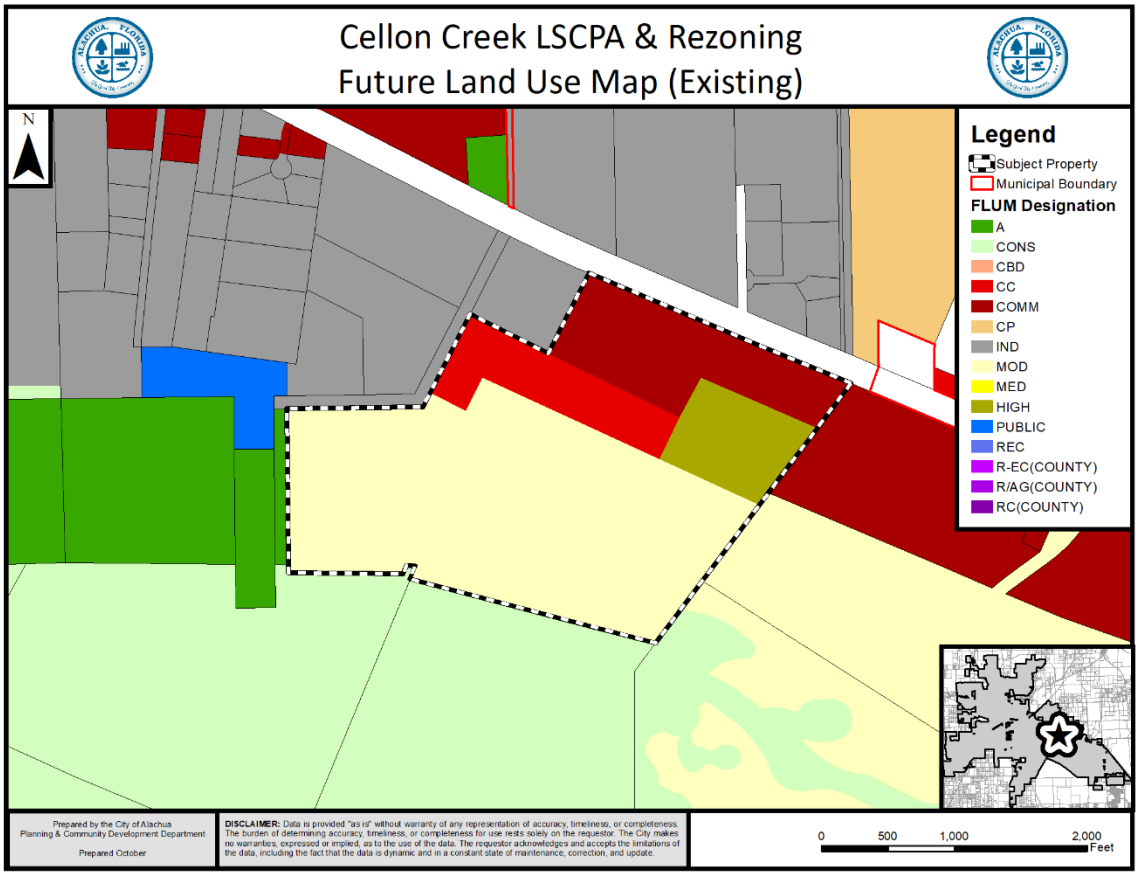
CURRENT ZONING: Agricultural

PROPOSED ZONING: Corporate Park

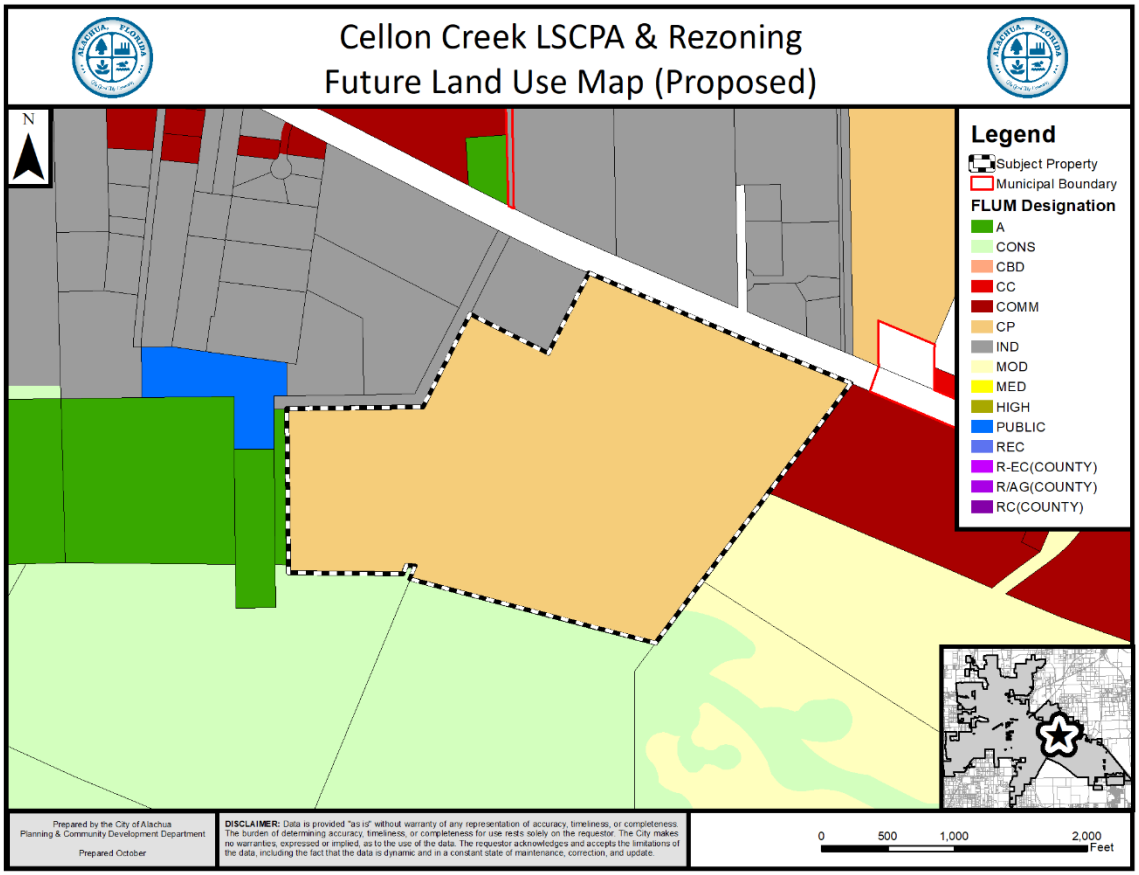
OVERLAY: N/A



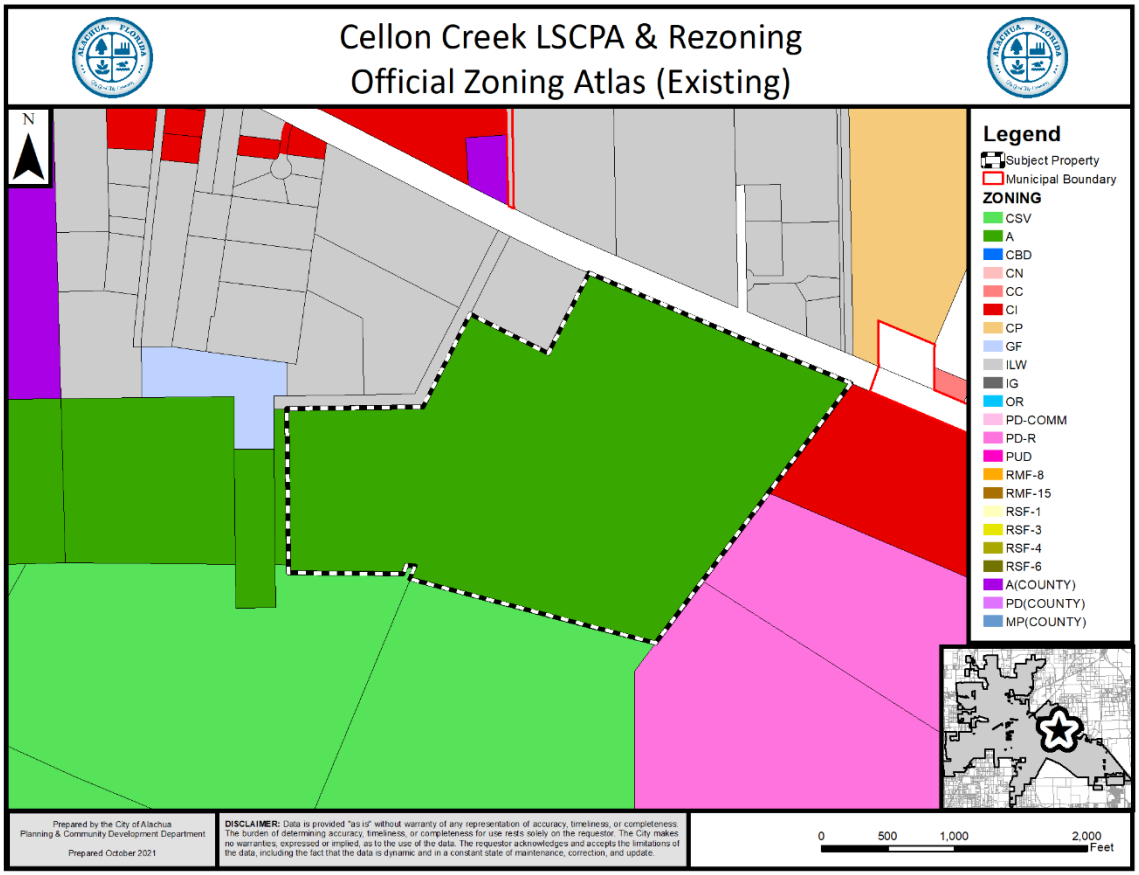
ACREAGE: ±160.2 acres



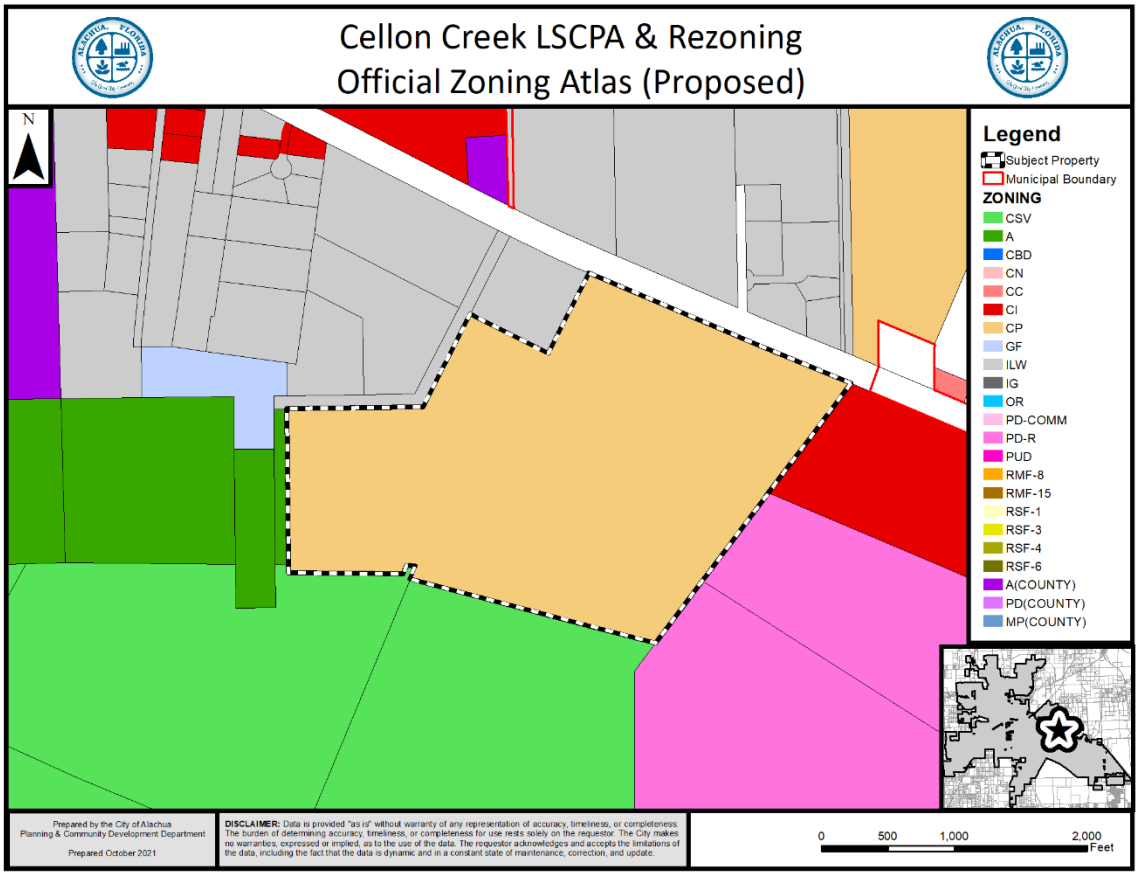
PARCEL(S): 05949-000-000



PROJECT SUMMARY: A request to amend the Future Land Use Map (FLUM) Designation of a ±160.2 acre property from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and a request to amend the zoning of a the Rezoning application proposes to amend the zoning of a ±160.2 acre property from Agricultural (A) to Corporate Park (CP)



RESUBMISSION DUE DATE: All data, plans, and documentation addressing the insufficiencies identified below must be received by the Planning Department on or before **5:00 PM** on **Thursday, November 4, 2021**



TENTATIVE PZB DATE: If all comments are addressed by the resubmission date above, the application may be scheduled for the **December 14, 2021 PZB Meeting.**

Deficiencies to be Addressed

LSCPA & Rezoning Applications

1. *Maximum Development Potential*
   a. In several areas of each application, it is stated that the proposed amendments would result in ±199,287 fewer square feet of nonresidential use compared to the current land use and zoning of the property. Based upon a note in the concurrency analysis, these statements are concluded by considering a maximum intensity where 25% of the project site will be dedicated to nonresidential uses. Maximum development potential must be considered based upon the maximum permitted by the proposed land use and zoning categories. Please revise throughout each application as needed.

2. *Concurrency Impact Analysis*
   a. Revise the impacts to all transportation, potable water, sanitary sewer, and solid waste to address comment 1.a.
   b. Section 2.4.14(H) defines affected roadway segments as any roadway segment located within 1/2 mile of the subject property and those roadway segments for which the project's impacts are 5% or greater of the MSV of the roadway segment. Segment 4 is the only roadway segment identified as an affected roadway segment. Revisions to the projected trip generation to address comments 1.a. and 2.a. will likely result in additional roadway segments meeting the definition of 'affected roadway segment'. Revise Table 4. as needed to consider all affected roadway segments.
   c. Evaluate and reconsider trip distribution to Segments 8 and 9.
   d. While it is understood that Table 5 is intended to illustrate the increase/decrease in net impacts between existing and proposed land use/zoning categories, available capacity would not be applicable to such an analysis as it is not reflective of potential impacts from the proposed land use/zoning amendments. Please remove this information from Table 5.

3. *Comprehensive Plan Consistency Analysis*
   a. The applicant states, in response to Objective 4.1 of the FLUE, "[t]he project site for this application will be infill development." Infill development is generally characterized as development occurring within an urban area on a vacant or underutilized property. The subject property is largely surrounded by other vacant lands. Please clarify the statement that this project represents infill development.

LSCPA Application

4. *Needs Analysis*
   a. Revise the impacts to address comment 1.a.
   b. Suggest incorporating the memorandum within the justification report.
   c. Suggest utilizing the 2020 US Census for population data (10,574 persons).

5. *Urban Sprawl Analysis*
   a. In response to Ch. 163.3177(6)(a)9.a.(II), please clarify the statement that this project represents infill development.

b. In response to Ch. 163.3177(6)(a)9.a.(V):
    i. Please clarify statement referring to redevelopment of the site.
    ii. Note: Lands adjacent to the west and designated Agriculture land use/Agricultural zoning are owned by the State of Florida and are a part of San Felasco Hammock Preserve State Park.
c. In response to Ch. 163.3177(6)(a)9.a.(VI), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)
d. In response to Ch. 163.3177(6)(a)9.a.(X), please clarify the statement that this project represents infill development.
e. Response to Ch. 163.3177(6)(a)9.b.(I) does not address specifically how the amendment would direct or locate economic growth and associated land development to geographic areas of the community in a manner that *does not have an adverse impact on an protects natural resources and ecosystems*.

Rezoning Application

6. *LDR Consistency Analysis*
    a. Please remove or update statement related to the recently approved LDR text amendments.
    b. In response to Section 2.4.2(E)(1)(d), please clarify the statement that this project represents infill development.
    c. Upon revising the Concurrency Impact Analysis to address comment 1.a., review response to Section 2.4.2(E)(1)(f) in relation to traffic impacts.
    d. In response to Section 2.4.2(E)(1)(f), please clarify the statement that this project represents infill development.
    e. In response to Section 2.4.2(E)(1)(j), please expand upon the availability of existing utilities (proximity of existing potable water mains, size of potable water mains, proximity of existing wastewater gravity mains and force mains, lift station locations, etc.)
    f. In response to Section 2.4.2(E)(1)(k), please expand upon protection measures for environmental features, including but not limited to on-site wetlands, special flood hazard areas, and San Felasco Hammock Preserve State Park.

Request for Capacity Review: Cellon Creek CPA & Rezoning

Subject : Request for Capacity Review: Cellon Creek CPA & Rezoning 1 attachment
To : Suzanne M Wynn <wynnsm@gm.sbac.edu>
Cc : Gene Boles <geneboles@gmail.com>

Suzanne,

The City of Alachua has received a Large Scale Comprehensive Plan Amendment (LSCPA) application and a Rezoning application from CHW on behalf of the University of Florida Foundation, Inc. The applications propose to amend the FLUM and the zoning of a ±160.2 acre subject property (Tax Parcel Number 05949-000-000). The LSCPA application proposes to amend the FLUM from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and the Rezoning application proposes to amend the zoning from Agricultural (A) to Corporate Park (CP).

Please find the Public School Student Generation Form for this project attached for review and approval.

If any additional information is needed, please feel free to contact me.

Sincerely,

Justin Tabor, AICP

RE: Response to Completeness Review of:
Cellon Creek Large-scale Comprehensive Plan Amendment (LsCPA) Application
Cellon Creek Site-specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Justin:

Please find below detailed responses to the comments issued in the October 6 Completeness Review letter regarding the above-mentioned applications. Original comments are provided in standard font; responses are provided in **bold font.**

LsCPA Application

1. Authorized Agent Affidavit:
    a. Please identify the authorized agent contact person.
    b. The date in the notary block is incomplete. Please confirm the year the document was signed.

    A revised Authorized Agent Affidavit, reflective of these comments, has been included as attachment [Attachment I], as has written permission from the property owner to alter the affidavit [Attachment II].

2. Comprehensive Plan Amendment Application, Section B., Applicant: Please identify the contact person.
    The contact person is Seth Wood of CHW.
    Phone: (352) 331-1976
    Email: sethw@chw-inc.com

    A revised LsCPA application form has been provided as attachment [Attachment III].

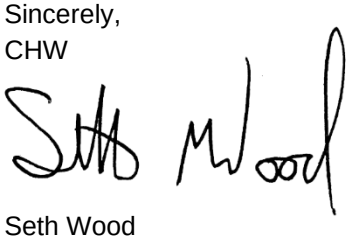
3. Comprehensive Plan Amendment Application Attachment #4, Needs Analysis: The application does not include a needs analysis demonstrating the necessity for the proposed increase in the proposed FLUM Designation.
    A Needs Analysis is provided as attachment [Attachment IV], demonstrating the necessity of the proposed FLUM designation. Of note, the proposed FLUM Designation may allow a *decrease*, rather than an increase, of up to ±199,287 fewer square feet of nonresidential use compared to what is currently allowed on the property. The proposed FLUM designation may allow an increase of up to only ±31 additional dwelling units compared to what is currently permitted.

4. Comprehensive Plan Amendment Application Attachment #8, Public School Student Generation Form, Section 8, Development Data: The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.
    A revised version of the Public School Student Generation Form is included as attachment [Attachment V] with revision to section 8 in order to identify the number of multifamily residential dwellings contemplated for the future development of the site.

Rezoning Application

1. Authorized Agent Affidavit:
    a. Please identify the authorized agent contact person.
    b. The date in the notary block is incomplete. Please confirm the year the document was signed.

    A revised Authorized Agent Affidavit, reflective of these comments, has been included as attachment [Attachment I], as has written permission from the property owner to alter the affidavit [Attachment II].



2. Rezoning Application, Section B., Applicant: Please identify the contact person.
    The contact person is Seth Wood of CHW.
    Phone: (352) 331-1976
    Email: sethw@chw-inc.com

    A revised application form has been provided as attachment [Attachment VI].

3. Rezoning Application Attachment #8, Public School Student Generation Form, Section 8, Development Data: The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.
    A revised version of the Public School Student Generation Form is included as attachment [Attachment VII] with revision to section 8 in order to identify the number of multifamily residential dwellings contemplated for the future development of the site.

Thank you for your prompt preliminary review of these applications for completeness. We look forward to hearing the findings of your in-depth review at the forthcoming Project Assistance Team (PAT) Meeting.

Sincerely,
CHW

RE: Completeness Review of:
Cellon Creek Large Scale Comprehensive Plan Amendment (LSCPA) Application
Cellon Creek Site-Specific Amendment to the Official Zoning Atlas (Rezoning) Application

Dear Mr. Wood:

On September 30, 2021, the City of Alachua received your applications for a proposed Large Scale Comprehensive Plan Amendment (LSCPA) to the Future Land Use Map (FLUM) and for a proposed Site-Specific Amendment to the Official Zoning Atlas (Rezoning). The applications propose to amend the FLUM and the zoning of a ±160.2 acre subject property (Tax Parcel Number 05949-000-000). The LSCPA application proposes to amend the FLUM from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park, and the Rezoning application proposes to amend the zoning from Agricultural (A) to Corporate Park (CP).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned applications for completeness and finds that the applications are complete, contingent upon receiving the information as noted below. Please provide materials addressing the comments below by **5:00 PM on Wednesday, October 13, 2021**. Digital submission of the materials to the project planner is acceptable.

The comments below are based solely on a preliminary review of your applications for completeness. An in-depth review of the content of each application will be performed, and the findings of the in-depth review will be discussed at a Project Assistance Team (PAT) Meeting, which will be scheduled under separate cover.

In order to provide complete applications, you must address the following:

LSCPA Application

1. **Authorized Agent Affidavit:**
   a. Please identify the authorized agent contact person.
   b. The date in the notary block is incomplete. Please confirm the year the document was signed.

2. **Comprehensive Plan Amendment Application, Section B., Applicant:** Please identify the contact person.

3. **Comprehensive Plan Amendment Application Attachment #4, Needs Analysis:** The application does not include a needs analysis demonstrating the necessity for the proposed increase in the proposed FLUM Designation.

4. **Comprehensive Plan Amendment Application Attachment #8, Public School Student Generation Form, Section 8, Development Data:** The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.

Rezoning Application

1. **Authorized Agent Affidavit:**
   a. Please identify the authorized agent contact person.
   b. The date in the notary block is incomplete. Please confirm the year the document was signed.

2. **Rezoning Application, Section B., Applicant:** Please identify the contact person.

3. **Rezoning Application Attachment #8, Public School Student Generation Form, Section 8, Development Data:** The application does not identify the number of multi-family residential dwellings contemplated for the future development of the site.

RE: Cellon Creek – Rezoning
(Alachua County tax parcel 05949-000-000)

Dear Kathy:

Please find three the following items enclosed for review and approval of the above reference project:

- Rezoning Application;
- Property Owner Affidavit;
- Legal Description;
- Deed, Property Appraiser Data Sheet, Tax Records;
- Neighborhood Meeting Materials;
- Justification Report;
- Student Generation Form; and
- Map Set of Project Site

Additionally, included in the submittal is one (1) check in the amount of $9,000.00 made payable to the City of Alachua and three (3) sets of mailing labels for property owners within 400 feet of the subject property boundary. This check is intended to cover the fee for both this rezoning application, as well as a concurrently-submitted Large-scale Comprehensive Plan Amendment (LsCPA) application.

This application requests a rezoning from Agriculture (A) to Corporate Park (CP) on approximately 160.2 acres within the City of Alachua, with the intent of facilitating the development of a mixed-use project with focus on employment-generating opportunities, in line with the spirit and intent of the Corporate Park district. This Rezoning application is submitted concurrently with a Large-scale Comprehensive Plan Amendment application, requesting to change the Future Land Use (FLU) classifications of the site from Commercial, Community Commercial, Moderate Density Residential, and High Density Residential to Corporate Park.

We trust you will find this submittal package is sufficient for review and approval. Please feel free to contact me at (352) 331-1976 or at sethw@chw-inc.com should you have any questions or require any additional information to complete your review.

Sincerely,
CHW

Former NFL, Gators running back faces charges in road rage assault

Alexander Lugo
Fresh Take Florida

Former Florida Gators running back Mark Thompson is facing a slew of felony charges stemming from two criminal incidents this past month.
EMMA GREEN/WUFT NEWS

A former University of Florida running back who signed to play in the NFL is accused of brandishing an assault rifle during a road-rage incident in Gainesville last month. It's the second criminal case alleging the player was violent in recent weeks.

Mark Anthony Thompson, 26, is facing felony assault and robbery charges in the latest incident, which involved a pair of female teens just east of the UF campus the afternoon of Nov. 21, according to a complaint filed by Gainesville police. He had not been arrested by Wednesday, but a judge has issued a warrant for police to pick him up, according to court records.

Thompson – part of the Gators football team from 2016 to 2018 – followed the women's SUV for four blocks to the parking lot of a nearby food truck cooperative, according to police.

Thompson is accused of removing an assault-style rifle from his car, looking at both women and saying, "I should shoot you." He also was accused of forcefully pulling the 19-year-old driver out of the SUV and throwing away her cell phone, which she had been using to record the encounter. That was the basis for the robbery charge.

Thompson's attorney, Dean Galigani, earlier this week asked a judge to reduce the $175,000 bond associated with his pending arrest warrant. In his court motion, Galigani identified Thompson as a professional football player and said he was training in Gainesville. Neither Thompson nor his attorney have responded to multiple requests for comment.

After Thompson left Florida, he signed with the Baltimore Ravens' practice squad as well as the Detroit Lions' practice squad. The Las Vegas Raiders signed him in January, but he was waived in April.

The latest incident follows a mid-October misdemeanor complaint alleging the football player assaulted a city parking enforcement officer.

In that case, police said Thompson started an argument with the parking employee over a ticket. When the officer attempted to walk away, Thompson followed and eventually struck the man with an open palm.

The October assault took place just one block from November's road-rage incident.

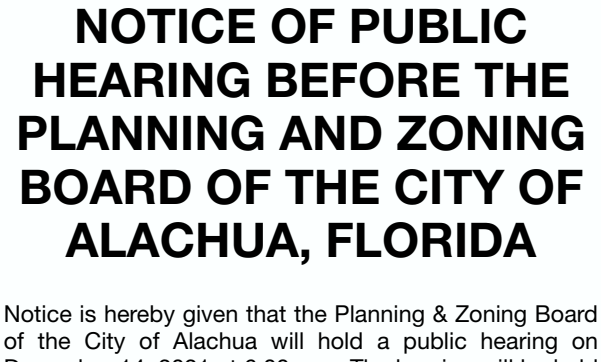
Thompson has had other encounters with police.

In 2016, while a football player at UF, Thompson was charged with misdemeanors on two separate occasions, according to court records.

Thompson was cited for possession of marijuana in October of that year. In December, police found him inside a tow truck compound in the middle of the night.

Thompson told police he was trying to get in touch with employees on the lot, but was ultimately charged with trespassing. Both the possession charge and the trespassing charge were dropped after Thompson pleaded guilty to a single paraphernalia charge.

Thompson was suspended from play following the possession charge.



In May 2017, university police pulled over Thompson for a broken taillight. When he opened a compartment containing his driver's license and registration, police said Thompson attempted to conceal a small amount of marijuana. He was charged with possession and issued a notice to appear in court. He again pleaded guilty to a reduced paraphernalia charge.

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning & Zoning Board of the City of Alachua will hold a public hearing on December 14, 2021 at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., property owner, for consideration of a Large Scale Comprehensive Plan Amendment on a ±160.2 acre subject property to amend the Future Land Use Map (FLUM) from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park on a parcel of land generally located south of the intersection of NW US Highway 441 and Southern Precast Drive and east of Cellon Creek Boulevard; consisting of Tax Parcel Number 05949-000-000. Existing FLUM: Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres); and Proposed FLUM: Corporate Park; Existing Zoning: Agriculture.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

AFFIDAVIT FOR POSTED LAND USE SIGN

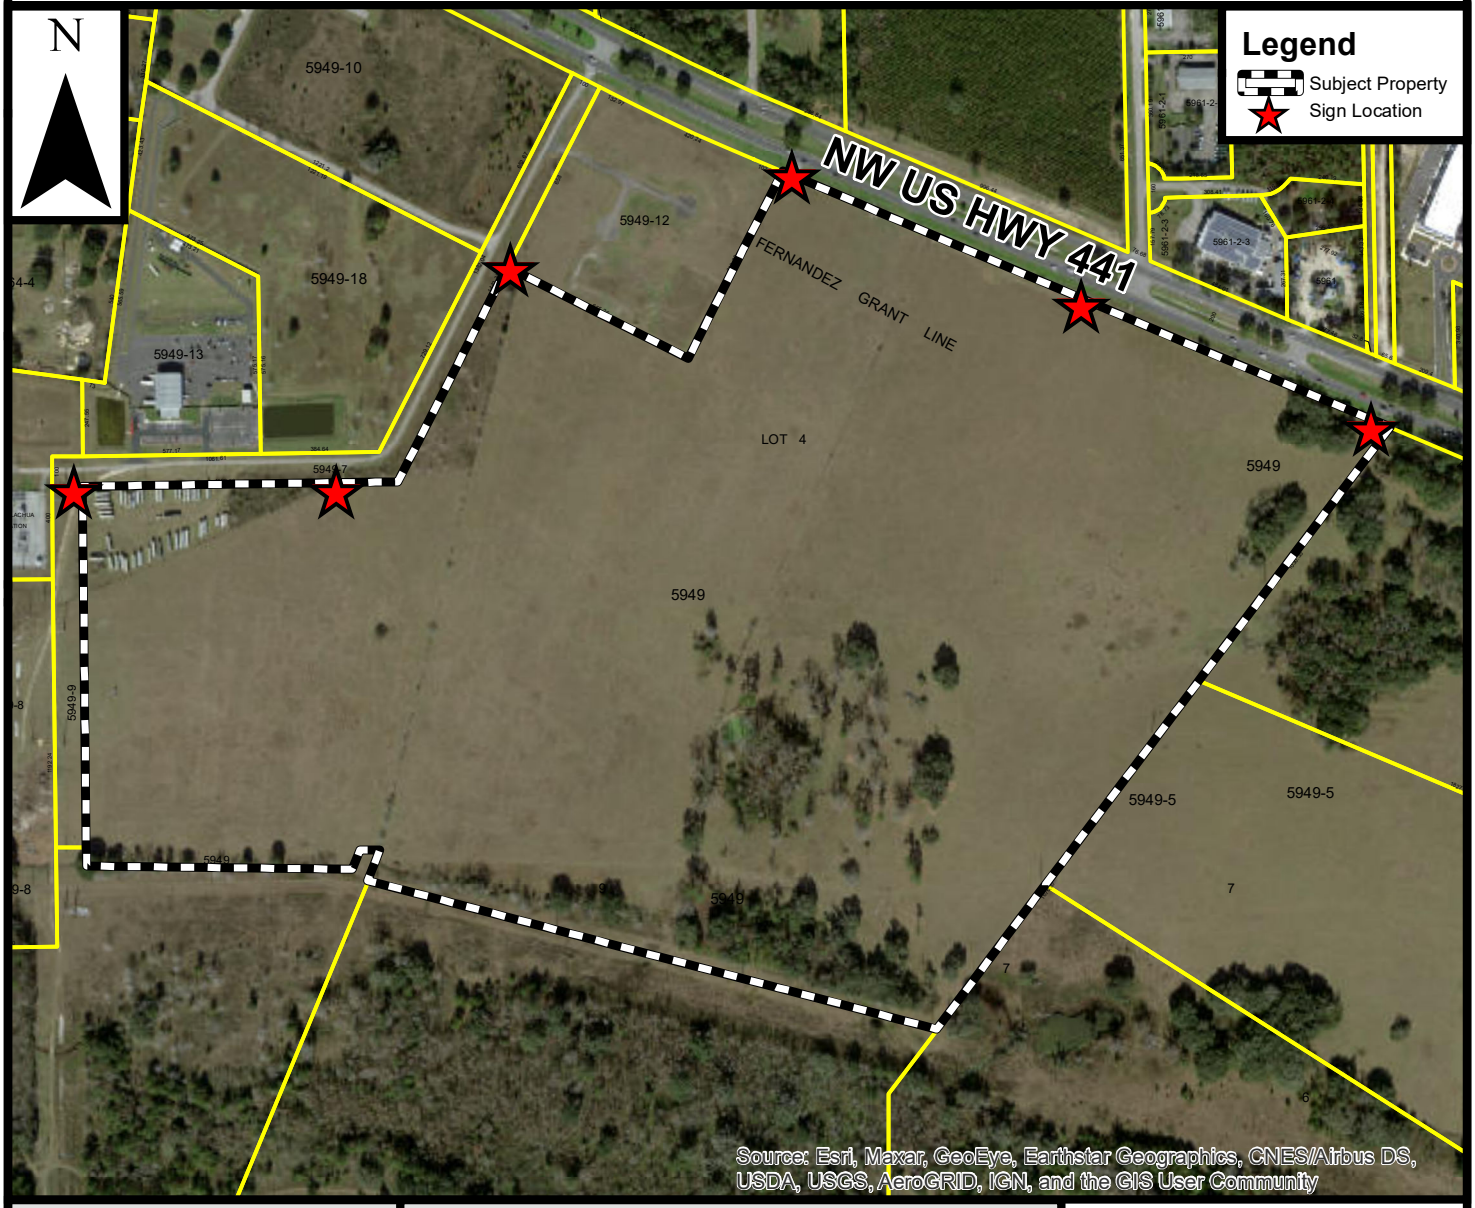
I Seth Wood (name), POSTED THE LAND USE SIGN ON 11/30/24 (date) FOR THE Cellon Creek LSCPA & RZ - PZB & CCOM1 (state type of action and project name) LAND USE ACTION.

AS PER ARTICLE 2.2.9 D OF THE LAND DEVELOPMENT REGULATIONS.

THIS WILL BE INCLUDED IN THE STAFF REPORT.

Seth Wood
(signature)

Six (6)
(number of signs)



IMPORTANT INFORMATION REGARDING POSTED NOTICE SIGNS

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

Signs must be removed by the applicant and returned to the City within ten days after the final decision on the application.

Planning and Zoning Board
Minutes
December 14, 2021

Chair Sandy Burgess
Vice Chair Edward Potts
Member Joe Hancock
Member Virginia Johns
Member Gary Thomas
School Board Member Tina Certain

City Manager Mike DaRoza

Planning and Zoning Board
At 6:00 PM
to address the item(s) below.

Meeting Date: December 14, 2021

Meeting Location: James A. Lewis Commission Chambers

Notice given pursuant to Section 286.0105, Florida Statutes. In order to appeal any decision made at this meeting, you will need a verbatim record of the proceedings. It will be your responsibility to ensure such a record is made.

PLANNING AND ZONING BOARD MEETING MINUTES

CALL TO ORDER

Chair Sandy Burgess called the meeting to order. School Board Member Tina Certain and Member Gary Thomas were absent.

INVOCATION

Chair Burgess led the invocation.

PLEDGE TO THE FLAG

Led by the Board.

APPROVAL OF THE AGENDA

Member Virginia Johns moved to approve the agenda; seconded by Vice Chair Ed Potts.

I. OLD BUSINESS

None.

II. NEW BUSINESS

A. Approval of the Minutes of the November 9, 2021 PZB Meeting

Member Johns moved to approve the minutes; seconded by Vice Chair Potts.

Passed by unanimous consent.

B. Site Plan Development Order Extension: A request by Clay Sweger, AICP, LEED AP, of EDA Consultants, Inc., for a 12 month extension to the Development Order granted on December 8, 2020 to Ray's Metal Works, Inc. for the construction of a ±2,550 square foot building addition with associated site improvements.

Principal Planner Justin Tabor, AICP, presented the Staff Report.

Vice Chair Potts moved to approve the request for a 12 month extension; seconded by Member Joe Hancock.

Motion Passed 4-0 in a roll call vote.

C. Large Scale Comprehensive Plan Amendment (LSCPA) – Cellon Creek: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., property owner, for consideration of a Large Scale Comprehensive Plan Amendment on a ±160.2 acre subject property to amend the Future Land Use Map (FLUM) from Commercial (±25.4 acres), Community Commercial (±16.3 acres), High Density Residential (±16.1 acres), and Moderate Density Residential (±102.5 acres) to Corporate Park. Tax Parcel Number 05949-000-000 (Legislative Hearing).

Principal Planner Tabor, AICP, presented the Staff Report.

Gerry Dedenbach, AICP, and Seth Wood of Causseaux, Hewett, & Walpole, Inc., presented additional information and availed themselves for questions.

Member Johns moved that based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Large Scale Comprehensive Plan Amendment submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve; seconded by Vice Chair Potts.

Motion Passed 4-0 in a roll call vote.

D. Site-Specific Amendment to the Official Zoning Atlas (Rezoning) – Cellon Creek: A request by Seth Wood, of Causseaux, Hewett, & Walpole, Inc., applicant and agent for the University of Florida Foundation, Inc., property owner, for consideration of a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to amend the Official Zoning Atlas on a ±160.2 acre subject property from Agricultural (A) to Corporate Park (CP). Tax Parcel Number 05949-000-000

(Quasi-Judicial Hearing).

Planning Assistant Kenyata Curtis swore in all parties entering testimony during the hearing.

Principal Planner Tabor, AICP, presented the Staff Report.

Gerry Dedenbach, AICP, and Seth Wood of Causseaux, Hewett, & Walpole, Inc., presented additional information and availed themselves for questions.

Vice Chair Potts moved that based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Site-Specific Amendment to the Official Zoning Atlas submitted by Causseaux, Hewett, & Walpole, Inc. on behalf of the University of Florida Foundation, Inc. for Cellon Creek to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve; seconded by Member Johns.

Motion Passed 4-0 in a roll call vote.

E. Amend the City of Alachua Comprehensive Plan by adding a Property Rights Element

Department Director Kathy Winburn, AICP, presented the Staff Report.

Member Hancock moved that based upon the presentation presented before this Board and Staff's recommendation, this Board finds the proposed Comprehensive Plan Text Amendment to add a Property Rights Element to the City of Alachua Comprehensive Plan to be consistent with the Comprehensive Plan and transmits such finding to the City Commission with a recommendation to approve; seconded by Member Johns.

Motion Passed 4-0 in a roll call vote.

III. BOARD COMMENTS/DISCUSSION

Department Director Winburn stated that there will be a meeting January 11, 2021 at 6:00 p.m.

IV. CITIZENS COMMENTS

None.

Police: Officers wound man to protect innocent bystander

ORLANDO – Police officers shot a man who had been acting erratically as he ran toward a vehicle entering an Orlando apartment complex early Wednesday, officials said.

Multiple residents called 911 just before 1 a.m. Wednesday about a man who was knocking on windows at the Vista Verde Apartments, Deputy Chief Eric Smith said during a news conference.

When officers arrived at the complex, they saw a man running with a gun.

"They caught up to him as they saw him get into somebody's vehicle, somebody was driving into the parking lot, he jumped into the passenger side of that vehicle," Smith said. "Officers approached him and at that point, they saw a firearm. Officers fired multiple rounds at the suspect, striking the suspect to protect the civilian that was still in the vehicle."

The man was being treated at Orlando Regional Medical Center, Smith said.

The Florida Department of Law Enforcement is investigating the shooting. Five officers who were involved in the incident have been placed on paid administrative leave.

Driver accused of killing 2 kids disrupts courtroom

FORT LAUDERDALE – A 27-year-old man accused in a hit-and-run crash that killed two children and injured four others caused a disturbance during his first court appearance Wednesday, hours after sheriff's deputies arrested him.

Sean Charles Greer was arrested late Tuesday after physical evidence led detectives to him following the Monday afternoon crash in Wilton Manors, the Broward Sheriff's Office said.

During a court appearance Wednesday, deputies led Greer away after he apparently objected to attending the proceeding, news outlets reported. The court session was delayed for a minute as he was taken from the room.

Guns

Continued from Page 3A

2019.

Teenagers were killed and wounded. Teenagers pulled the triggers in some cases. A young man shot and killed the mother of his baby. A 13-year-old girl was fatally shot.

Shootings occurred outside downtown Gainesville nightclubs, in convenience store parking lots, at a teen's birthday party at the American Legion Hall and in drive-bys on the streets.

Especially troubling to officials is the gunshots by teens, often members of feuding gangs from different neighborhoods.

Meanwhile, the violence witnessed by teenagers will have a lasting impact that is not being addressed as it should, said Darry Lloyd, chief investigator for the Eighth Judicial Circuit State Attorney's Office and a leader of the Black on Black Crime Task Force.

"The unseen scars, the trauma in the kids who have witnessed it, that's what we have to really address and we are not doing a very good job of that at all," Lloyd said. "As we depart 2021, 2022 is starting at a different place for these young people. We have to heal from that."

Dozens of kids witnessed what authorities said was a shooting involving two rival groups of teens at a June 24 birthday party at the American Legion Hall. Killed was Christopher Scott, 13, and four other teens were injured. Arrests have been made.

A teenager was wounded in an early morning shooting downtown on Aug. 1, the night after a Stop the Violence rally curb shootings.

A 12-year-old boy was shot and wounded in Southwest Gainesville in July. An 18-year-girl was later charged in the shooting.

Maliyah Godwin, 13, was shot and killed at her Southwest Gainesville apartment complex. A 37-year-old man has been indicted for first-degree murder in connection with the case.

Gun violence has increased nationwide this year and law enforcement agencies are trying to figure out why. Stress caused by the ongoing COVID-19 pandemic, the easy availability of guns and cultural changes likely play a role.

"I don't think it is one thing, and that's what complicates it. It's a lot of different things," Behl said. "It is sometimes hard to predict but we are working on it."

GPD this year is planning to launch a violence interruption program in which trained mediators will work in neighborhoods to identify potential trouble and bring rivals together to try to prevent shootings and other crimes.

"It is community driven," GPD Chief Tony Jones said. "They will be doing conflict mediation. They will also be working with some of the individuals who have a propensity for violence and actually get out and mobilize the community."

Other cities in the U.S. are trying the tactic.

Jacksonville began its Cure Violence program in 2019. Data from a Washington D.C. pilot program, Cure the Streets, indicates mixed results from the neighborhoods in which it operates.

Jones said he hopes the program will begin sometime in the spring.

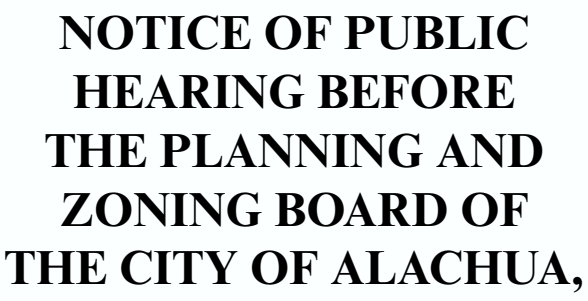
PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on January 10, 2022, at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-03

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE CITY'S COMPREHENSIVE PLAN; AMENDING THE CITY'S COMPREHENSIVE PLAN TO ADD A PROPERTY RIGHTS ELEMENT; PROVIDING A REPEALING CLAUSE; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.



At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

GF-28009242

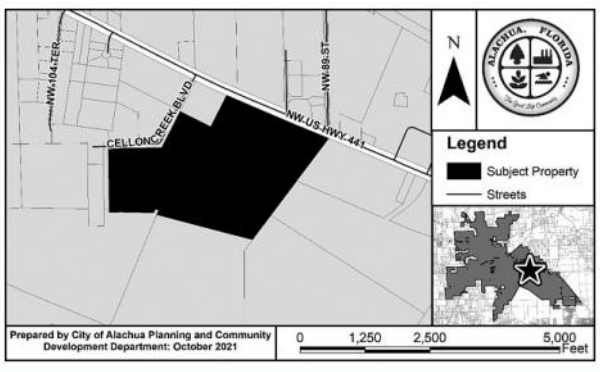
NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning and Zoning Board of the City of Alachua will hold a public hearing on January 11, 2022, at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following:

A request by Larry J. Longenecker, of Eisman & Russo, Inc., applicant and agent for the Waco Properties, Inc., property owner, for consideration of a Site Plan proposing the construction of a ±51,140 square foot building with associated site improvements on a ±20.50 acre subject property and comprised of a ±3.35 acre project area; Tax Parcel Number 03983-007-000; FLUM: Industrial; Zoning: Industrial General (IG).

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

GF-28009193



PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on January 10, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-04

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE LARGE SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION ON ±160.2 ACRES FROM COMMERCIAL (±25.4 ACRES), COMMUNITY COMMERCIAL (±16.3 ACRES), HIGH DENSITY RESIDENTIAL (±16.1 ACRES), AND MODERATE DENSITY RESIDENTIAL (±102.5 ACRES) TO CORPORATE PARK ON A PARCEL OF LAND GENERALLY LOCATED SOUTH OF THE INTERSECTION OF NW US HIGHWAY 441 AND SOUTHERN PRECAST DRIVE AND EAST OF CELLON CREEK BOULEVARD; CONSISTING OF TAX PARCEL NUMBER 05949-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Six (6)
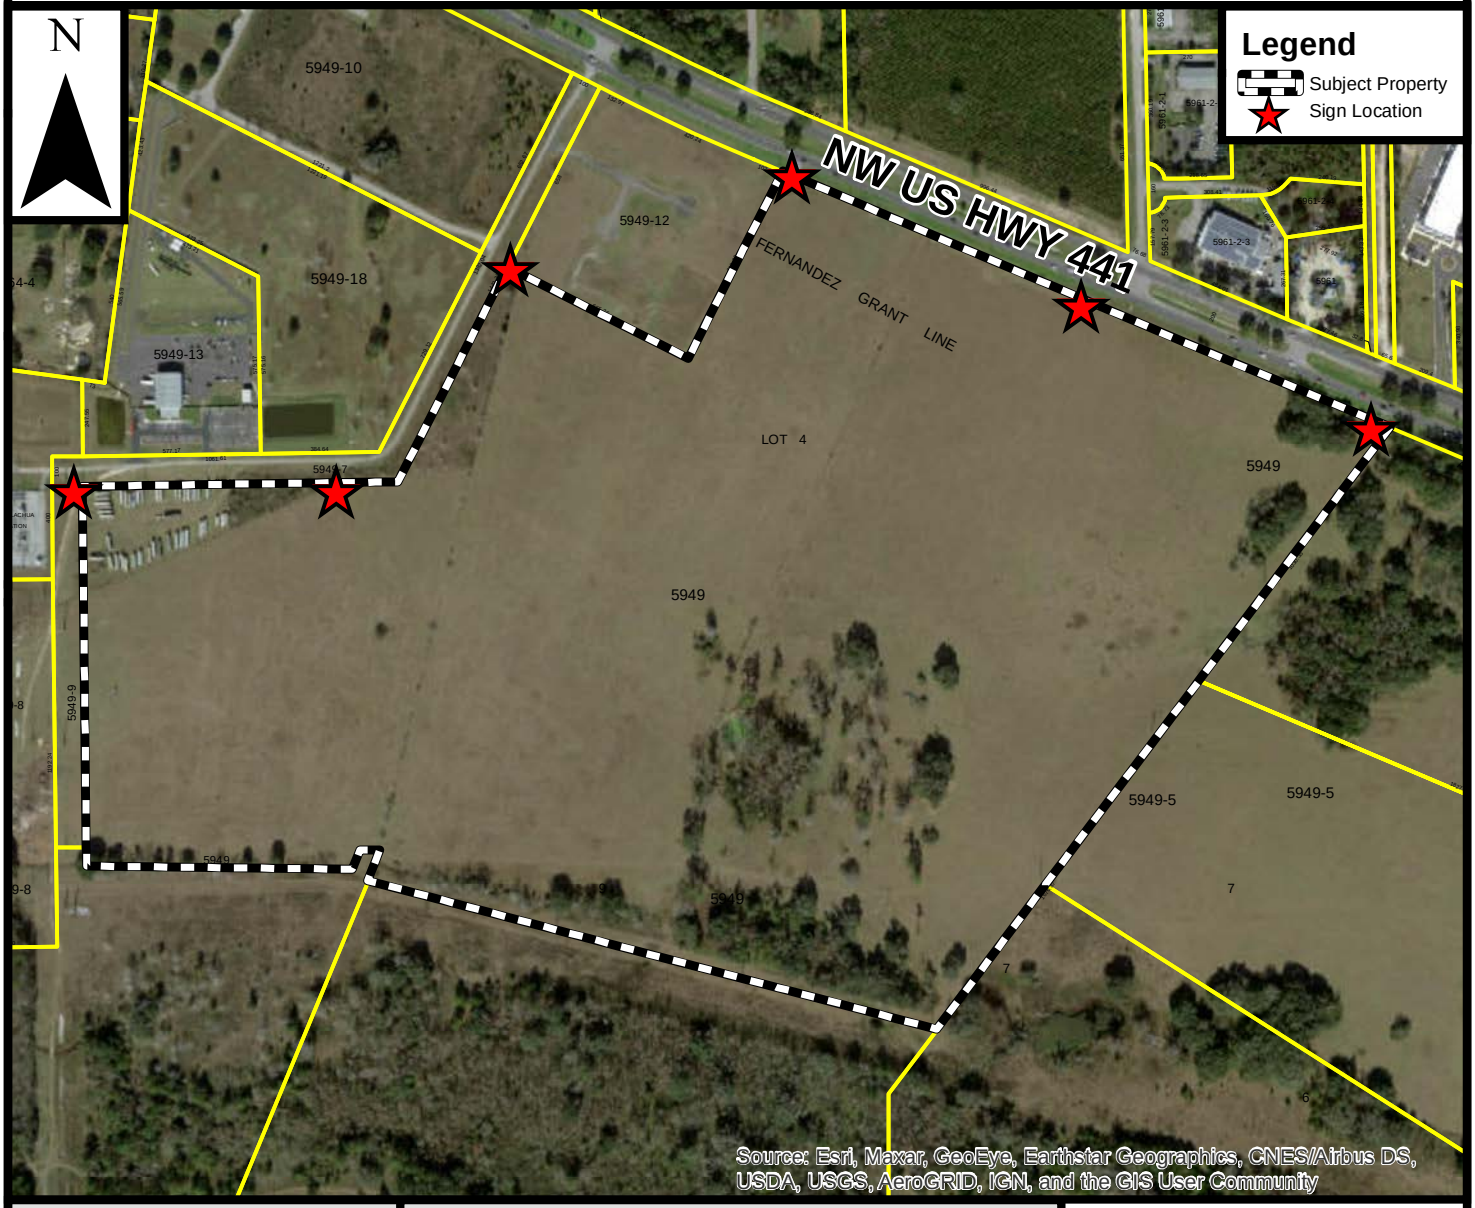
(number of signs)



IMPORTANT INFORMATION REGARDING POSTED NOTICE SIGNS

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

Signs must be removed by the applicant and returned to the City within ten days after the final decision on the application.

Russia destroys Ukrainian refugee shelter

Two sides express optimism in negotiations to end the fighting

Andrea Rosa
ASSOCIATED PRESS

KYIV, Ukraine – Russian forces destroyed a theater in Mariupol where hundreds of people were sheltering Wednesday and rained fire on other cities, Ukrainian authorities said, even as the two sides projected optimism over efforts to negotiate an end to the fighting.

The airstrike ripped apart the center of the once-elegant building, where hundreds of civilians had been living since their homes had been destroyed in the fighting, Ukraine's foreign ministry said in a statement.

Many people were buried in the rubble, officials said, though there was no immediate word on how many had been killed or injured. Satellite imagery from Monday showed the word "children" written in large white letters in Russian in front of and behind the building, the Maxar space technology company said.

"Another horrendous war crime in Mariupol," Ukrainian Foreign Minister Dmytro Kuleba said on Twitter, calling the bombing a "massive Russian attack."

The Russian defense ministry denied bombing the theater or anywhere else in Mariupol on Wednesday.

In Kyiv, residents huddled in homes and shelters amid a citywide curfew that runs until Thursday morning, as Russian troops shelled areas in and around the city, including a residential neighborhood 1.5 miles from the presidential palace. A 12-story apartment building in central Kyiv erupted in flames after being hit by shrapnel.

Ten people were killed while standing in line for bread in the northern city of Chernihiv, the Ukrainian General Prosecutor's Office said.

Ukrainian President Volodymyr Zelenskyy, meanwhile, went before the U.S. Congress via video and, invoking Pearl Harbor and 9/11, pleaded with America for more weapons and tougher sanctions against Russia, saying: "We need you right now."

U.S. President Joe Biden announced the U.S. is sending an additional $800 million in military aid to Ukraine, including more anti-aircraft and anti-tank weapons and drones. He also called Vladimir Putin a "war criminal" in his sharpest condemnation of the Russian leader since the invasion began.

International pressure against the Kremlin mounted and its isolation deepened as the International Court of Justice, also known as the World Court, ordered Russia to stop attacking Ukraine, though there was little hope it would comply. Also, the 47-nation Council of Europe, the continent's foremost human rights body, expelled Russia.

While Moscow's ground advance on the Ukrainian capital appeared largely stalled, Putin said the operation was unfolding "successfully, in strict accordance with pre-approved plans." He also decried Western sanctions against Moscow, accusing the West of trying to "squeeze us, to put pressure on us, to turn us into a weak, dependent country."

Hopes for diplomatic progress to end the war rose after Zelenskyy acknowledged Tuesday in the most explicit terms yet that Ukraine is unlikely to realize its goal of joining NATO.

Another round of talks between the two sides was scheduled for Wednesday. After Tuesday's negotiations, Russian Foreign Minister Sergey Lavrov said a neutral military status for Ukraine was being "seriously discussed" by the two sides, while Zelenskyy said Russia's demands for ending the war were becoming "more realistic."

Hopes for diplomatic progress to end the war rose after Zelenskyy acknowledged Tuesday in the most explicit terms yet that Ukraine is unlikely to realize its goal of joining NATO. Putin has long depicted Ukraine's NATO aspirations as a threat to Russia.

Lavrov welcomed Zelenskyy's comment and said "the businesslike spirit" starting to surface in the talks "gives hope that we can agree on this issue."

"A neutral status is being seriously discussed in connection with security guarantees," Lavrov said on Russian TV. "There are concrete formulations that in my view are close to being agreed."

Russia's chief negotiator, Vladimir Medinsky, said the sides were discussing a possible compromise for a Ukraine with a smaller, non-aligned military.

Prospects for a diplomatic breakthrough were highly uncertain, however, given the gulf between Ukraine's demand that the invading forces withdraw completely and Russia's suspected aim of replacing Kyiv's Westward-looking government with a pro-Moscow regime.

Ukrainian presidential adviser Mykhailo Podolyak denied Russian claims that Ukraine was open to adopting a model of neutrality comparable to Sweden or Austria. Podolyak said Ukraine needs powerful allies and "clearly defined security guarantees" to keep it safe.

Another source of dispute is the status of Crimea, which was seized and annexed by Russia in 2014, and the separatist-held Donbas region in eastern Ukraine, which Russia recognizes as independent. Ukraine considers both part of its territory.

The fighting has sent more than 3 million people fleeing Ukraine, by the United Nations' estimate. The U.N. reported that over 700 civilians have been confirmed killed, but that the real number is higher.

In going before Congress, Zelenskyy said that Russia "has turned the Ukrainian sky into a source of death for thousands of people." But Biden has rejected Zelenskyy's requests to send warplanes to Ukraine or establish a no-fly zone over the country because of the risk of triggering war between the U.S. and Russia.

The head of the International Committee of the Red Cross, Peter Maurer, arrived in Ukraine to try to obtain greater access for aid groups and increased protection for civilians.

Amid the vast humanitarian crisis caused by the war, the Red Cross has helped evacuate civilians from besieged areas and has delivered 200 tons of aid, including medical supplies, blankets, water and over 5,200 body bags to help "ensure the dead are treated in a dignified manner."

Nowhere has suffered more than the encircled city of Mariupol, where local officials say missile strikes and shelling have killed more than 2,300 people. The southern seaport of 430,000 has been under attack for almost all of the three-week war in a siege that has left people struggling for food, water, heat and medicine.

Local authorities said Russian forces took hundreds of people hostage at a Mariupol hospital and were using them as human shields.

Bodies have been buried in trenches in Mariupol, and more corpses lay in the streets and in a hospital basement.

Using the flashlight on his cellphone to illuminate the basement, Dr. Valeriy Drengar pulled back a blanket to show the body of an infant 22 days old. Other wrapped bodies also appeared to be children, given their size.

"These are the people we could not save," Drengar said.

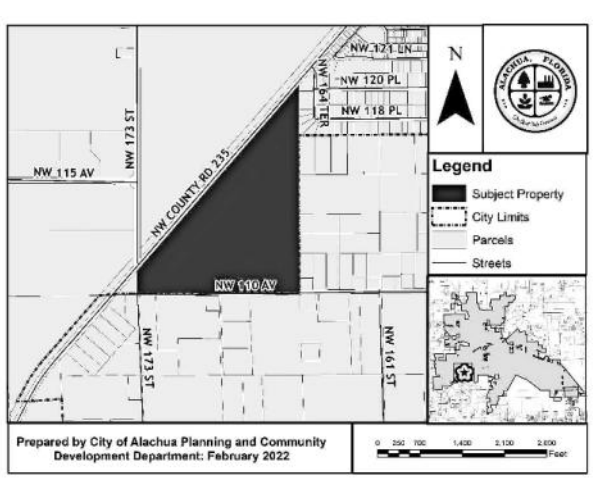
Nearly 30,000 people managed to escape the city on Tuesday in thousands of vehicles by way of a humanitarian corridor, city officials said.

But with humanitarian aid unable to get in amid the constant bombardment, people burn scraps of furniture to warm their hands and cook the little food still available.

Kyiv regional leader Oleksiy Kuleba said Russian forces had intensified fighting in the Kyiv suburbs and a highway leading west, and that across the capital region, "kindergartens, museums, churches, residential blocks and engineering infrastructure are suffering from the endless firing."

In other developments, the mayor of the city of Melitopol, who was seized by Russian forces five days ago, has been freed, said Zelenskyy chief of staff Andriy Yermak. No details were given about how he became free.

Ukraine also appeared to have successes, with satellite photos from Planet Labs PBC analyzed by The Associated Press showing helicopters and vehicles ablaze at the Russian-held Kherson airport and air base after a suspected Ukrainian strike on Tuesday.



PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on March 28, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-10

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS; AMENDING THE OFFICIAL ZONING ATLAS FROM AGRICULTURAL ("A") TO PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") ON APPROXIMATELY 118 ACRES; LOCATED SOUTH OF THE PILOT FOREST SUBDIVISION AND EAST OF CR 235; TAX PARCEL NUMBER 03980-002-001; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

IMPORTANT INFORMATION REGARDING POSTED NOTICE SIGNS

Pursuant to Section 2.2.9(D) of the City's Land Development Regulations, posted notice signs must be placed on the land that is the subject of the application, along each street which is adjacent to or runs through the land in a manner that makes them clearly visible. Signs shall be posted at intervals of not more than 400 feet when the land subject to the application has less than 1,500 feet of road frontage. When the land subject to the application has 1,500 feet or more of road frontage, signs shall be posted at intervals of not more than 1,320 feet.

Signs shall be inspected by the City subsequent to their posting. The applicant shall be responsible for ensuring that the posted notice is maintained on the land subject to the application until the completion of the final public hearing on the application.

Signs must be removed by the applicant and returned to the City within ten days after the final decision on the application.

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Ordinance 22-10, First Reading: Site-Specific Amendment to the Official Zoning Atlas (Rezoning) - Savannah Station Phase 3: a request by Ryan Thompson, AICP, of CHW, Inc, applicant and agent for Waco Properties, Inc. ,property owner, for the consideration of the rezoning of the subject property from Agricultural ("A") to Planned Development – Residential ("PD-R") on a ±118.2 acre subject property. Consisting of Parcel Number 03980-002-001(Quasi-Judicial Hearing).
PREPARED BY: Adam Hall, AICP, Principal Planner

RECOMMENDED ACTION:
Staff recommends that the City Commission approve Ordinance 22-10 on first reading, upon making the following motion:

> Based upon the competent substantial evidence presented at this hearing, the presentation before this Commission, Staff's recommendation, and the recommendation by the Planning and Zoning Board, this Commission finds the application for a Site-Specific Amendment to the Official Zoning Atlas for a Planned Development to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and approves Ordinance 22-10 on first reading.

Summary

The proposed Site-Specific Amendment to the City of Alachua Official Zoning Atlas (Rezoning) is a request by Ryan Thompson, AICP of CHW, Inc., on behalf of Waco Properties, Inc., property owner, for the consideration of the rezoning of the subject property from Agricultural ("A") to Planned Development – Residential ("PD-R").

The subject property is comprised of Tax Parcel Number 03980-002-001 and is approximately 118.2 acres in size. The subject property is located east of CR235, north of NW 110th Avenue, and south of the Pilot Forest Subdivision.

The subject property presently has a Moderate Density Residential Future Land Use Designation, which permits up to 4 dwelling units per acre (472 total units' maximum for the subject property). The proposed PD-R zoning district would permit a maximum of 472 residential units, which is consistent with the maximum density of the existing FLUM Designations for the subject property.

density of the existing FLUM Designations for the subject property.
Development would consist primarily of single family detached structures, but approximately 22.5 % of the units could be developed as single family attached units, with up to eight (8) units in a single building. Two ingress/egresses are proposed to connect to CR 235. CR 235 is a County maintained collector therefore Alachua County Public Works is responsible for ultimately permitting the connections to the subject property.
The proposed development would be constructed in one or more phases. The Planned Development Ordinance and Agreement will be valid for 10 years after date of final approval of the PD Zoning ordinance.
The general purpose of the Planned Development zoning districts is described by Section 3.6.1(A) of the Land Development Regulations (LDRs) as follows:

> The Planned Development (PD) districts are established for the purpose of encouraging innovative land planning and site design concepts that conform to community quality of life benchmarks and that achieve a high quality of development, environmental sensitivity, energy efficiency, and other City goals by:
>
> (1) Increasing Flexibility
> Reducing or diminishing the uniform design that results from the strict application of zoning and development standards that are designed primarily for individual lots;
>
> (2) Greater Freedom to Provide Access, Open Space, and Amenities
> Allowing greater freedom in selecting the means to provide access, open space, and design amenities;
>
> (3) Greater Freedom to Provide Mix of Uses and Housing Types
> Allowing greater freedom in providing a mix of land uses in the same development, including a mix of housing types, lot sizes, and densities;
>
> (4) Providing Greater Opportunity for More Efficient Land Use Patterns
> Providing for an efficient use of land resulting in smaller networks of utilities and streets and thereby lowering development and housing costs;
>
> (5) Promoting Quality Design and Environmentally Sensitive Development Through Site Characteristics
> Promoting quality design and environmentally sensitive development by allowing development to take advantage of special site characteristics, locations, and land uses; and
>
> (6) Quality Design Through Density Increases
> In specific instances, encouraging quality design and environmentally sensitive development by allowing increases in base densities or floor area ratios when such increases can be justified by superior design or

area ratios when such increases can be justified by superior design or the provision of additional amenities such as public open space.

The purpose of the PD-R zoning district is described by Section 3.6.1(B)(1) of the LDRs as follows:

> The purpose of the Planned Development-Residential (PD-R) District is to provide a mix of residential uses using innovative and creative design elements, while at the same time providing an efficient use of open space. Commercial uses may be allowed in the PD-R District primarily to serve the needs of the residents in the development.

At the March 8, 2022 Planning and Zoning Board meeting, the Board voted 5-0 in favor of transmitting the application to the City Commission with a recommendation to approve.

ORDINANCE 22-10

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS; AMENDING THE OFFICIAL ZONING ATLAS FROM AGRICULTURAL ("A") TO PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") ON APPROXIMATELY 118 ACRES; LOCATED SOUTH OF THE PILOT FOREST SUBDIVISION AND EAST OF CR 235; TAX PARCEL NUMBER 03980-002-001; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

RECITALS

WHEREAS, an application for a Site-Specific Amendment to the Official Zoning Atlas ("Amendment"), as described below, has been filed with the City by Waco Properties, Inc, a Florida corporation ("Owner"); and

WHEREAS, the Owners desire to obtain approval for a Planned Development ("PD") in the City known as Savannah Station Phase 3 Planned Development ("PD-R" or "Project"); and

WHEREAS, the Owner wishes to construct the Project, consisting of a maximum of 472 residential units on the subject property, the legal description for which is attached hereto as Exhibit "A" and is herein referred to as the "Property"; and

WHEREAS, the City advertised a public hearing to be held before the Planning and Zoning Board, sitting as the Local Planning Agency ("LPA"), on February 24, 2022; and

WHEREAS, the LPA conducted a quasi-judicial public hearing on the proposed Amendment on March 8, and the LPA reviewed and considered all comments received during the public hearing concerning the proposed Amendment and made its recommendation to the City Commission; and

WHEREAS, the City advertised public hearings to be held before the City Commission on March 17, 2022 and on _____ and

WHEREAS, the City Commission conducted quasi-judicial public hearings on the proposed Amendment on March 28, 2022, and _____, and provided for and received public participation at both public hearings; and

WHEREAS, the City Commission has determined and found the proposed Amendment to be consistent with the City's Comprehensive Plan and the City's Land Development Regulations ("LDRs"); and

WHEREAS, for reasons set forth in this ordinance that is hereby adopted and incorporated as findings of fact, the Alachua City Commission finds and declares that the enactment of this Amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare.

NOW THEREFORE BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF ALACHUA, FLORIDA.

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and are incorporated herein by reference.
2. The proposed Amendment is in compliance with the City's LDRs.
3. The proposed Amendment will not cause a reduction in the adopted level of service standards for transportation, water, sewer, waste, stormwater, recreation, and public schools.

Section 2. Official Zoning Atlas Amended

The Official Zoning Atlas is hereby amended from Agricultural ("A") to Planned Development–Residential ("PD-R") for Tax Parcel Number 03980-002-001 ("Property"), in accordance with the legal description found in Exhibit "A" and map found in Exhibit "B" attached hereto and incorporated herein.

Section 3. Development Parameters

The development shall consist of single-family residential development, community recreation, and stormwater/open space development areas as shown on the PD Master Plan. The density, intensity, allowable uses, acreage, and dimensional standards, where applicable, for each Development Area are as follows:

1. The development shall consist of single–family detached, single family attached, community recreation, and stormwater/open space development areas as shown on the PD Master Plan. The density, intensity, allowable uses, acreage, and dimensional standards, where applicable, for each Development Area are as follows:

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD
Development Area 'A' 8 du/acre	Single Family Detached Residential on Platted Lots, Community Amenity Center, Pedestrian Pathways,	311 dwelling units[1] 2,500 square feet for neighborhood amenity center	±42.30	*Minimum Lot Area* 4,000 square feet *Minimum Lot Width* 40 feet *Setbacks* Front (Primary) = 10'	±40.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD
	Stormwater Drainage Areas			Side = 5' Rear=5' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' Amenity Center Front (Primary) = 20' Side = 10' Rear=10' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 60% *Minimum Parking Spaces* 2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards		Percentage of PD
Development Area 'B' 9du/acre	Single Family Detached on Platted Lots, Community Amenity Center, Single Family Attached on Platted Lots, Pedestrian Pathways, Stormwater Drainage Areas	106 dwelling units 2,500 square feet for neighborhood amenity center	±11.4	**Single Family Detached** *Minimum Lot Area* 4,000 square feet *Minimum Lot Width* 40 feet *Setbacks* Front (Primary) = 10' Side = 5' Rear=5' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' Amenity Center	**Single Family Attached** *Minimum Lot Area* 1,800 square feet *Minimum Lot Width* 18 feet *Setbacks* Front (Primary) = 10' Side (end unit/lot)= 5' Side (all other lots/units) = 0' Rear=5' Garage Face =18' Accessory Structure Side = 5'	±10.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards		Percentage of PD
				Front (Primary) = 20' Side = 10' Rear=10' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 60% *Minimum Parking Spaces* 2 per unit **Stormwater Management Facilities** 5' from property lines	Rear=0' Amenity Center Front (Primary) = 20' Side = 10' Rear=10' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 75% *Minimum Parking Spaces* 2 per unit **Stormwater Management Facilities** 5' from property lines	

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards		Percentage of PD
				Pedestrian Trails (Paved or Unpaved) 7.5' from property lines	**Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	
Development Area 'C' 0 du/acre	Single Family Detached Residential on Platted Lots, Amenity Center, Pedestrian Pathways, Stormwater Drainage Areas	28 dwelling units	±4.7	*Minimum Lot Area* 6,000 square feet *Minimum Lot Width* 60 feet *Setbacks* Front (Primary) = 10' Side = 5' Rear=12' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 60% *Minimum Parking Spaces*		±4.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD
				2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	
Development Area 'D' 0 du/acre	Single Family Detached Residential on Platted Lots, Amenity Center, Pedestrian Pathways, Stormwater Drainage Areas	27 dwelling units	±4.5	*Minimum Lot Area* 4,000 square feet *Minimum Lot Width* 40 feet *Setbacks* Front (Primary) = 10' Side = 5' Rear=12' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' *Maximum Building Height*	±4.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD
				45 feet *Maximum Lot Coverage* 60% *Minimum Parking Spaces* 2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	
Development Area 'E' 0 du/acre	Buffer Pedestrian Pathways, Stormwater Drainage Areas	N/A	±5.5	N/A	±5.00%
Development Area 'F' 0 du/acre	Common Area/ Open Space/ Stormwater Management Facilities	N/A	±33.9	**Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	29.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD
Development Area 'G' 0 du/acre	Roadways, Utilities, Parking, Driveways, Bicycle & Pedestrian Pathways, Signage, and Supportive Infrastructure Improvements	N/A	±15.9	**Streets** Minimum Right-of-Way Width – 50 feet Minimum Wearing Surface – 24 feet	13.00%
1 Development Area A maximum units may be increased up to 379 by reduction in maximum units within Development Areas B, C, and D. Maximum number of units shall not exceed 472 for the Project.					

2. The Project shall be developed in one or more phases. The Planned Development Ordinance and Agreement shall be valid for 10 years from the date of final approval by City Commission.

3. The applicant shall provide a listed species and habitat survey as part of any Final PD Plan for the Project. The survey shall document if any listed species are observed on the Property. If a listed species is observed on the Property, the updated survey shall provide recommendations to address potential impacts to the listed species and to identify any permitting requirements of any local, State, or Federal governmental agencies. Any submitted listed species and habitat survey shall be acceptable to the City for a period of no more than three years from the original date of the survey.

4. If any wetlands are identified on the Property described in Exhibit "A", such areas shall be field-delineated using professionally accepted methodology. All development in and/or near wetland areas shall be consistent with the City's Comprehensive Plan and in compliance with the City's LDRs, as may be amended from time to time, and shall grant conservation easements or other appropriate protective mechanisms, as determined by the City, to protect wetland areas. Any

submitted wetlands delineation shall be acceptable to the City for a period of no more than three years from the original date of the delineation.

5. All Final PD Plans shall be consistent with the Goals, Objectives, and Policies of the Comprehensive Plan, as it may be amended from time to time, including, but not limited to those Goals, Objectives, and Policies related to the eradication of invasive exotic plant species.

6. The Owner, or its successors and/or assigns, shall, concurrent with development of the Project, remove and destroy all Category I and II exotic plant species, as published in the most current version of the Florida Exotic Plant Council's List of Invasive Plant Species, located on the Property described in Exhibit "A". Thereafter, the Owner, or its successors and/or assigns, shall assure long-term implementation of an exotic plants management plan approved with the new final development order and which shall be included in covenants and restrictions to be implemented by a properly structured property owner's association or other mechanism acceptable to the City.

7. The planting of any species identified in the most current version of the Florida Exotic Pest Plant Council's List of Invasive Plant Species shall be prohibited. Grasses and sods shall be certified free of noxious weeds by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry.

8. The Owner, or its successors and/or assigns, shall utilize methods of minimizing impacts, such as appropriate Best Management Practices of the Suwannee River Water Management District, in order to reduce the potential for flash flooding, to avoid adverse impacts to water quality, and to incorporate existing drainage patterns to the greatest extent practicable. Upon approval from the City of Alachua and the Suwannee River Water Management District, enhancements may be permitted to the existing, natural conveyance system to mitigate for existing erosion and sedimentation, restoration of historical erosion and sedimentation damage, and preventing future adverse erosion and sedimentation.

9. A Final PD Plan consists of development requiring Preliminary Plat (single family detached on platted lots) review. The Owner, or its successors and/or assigns, shall submit a utility system plan as part of the Construction Plans for the proposed subdivision or site plan.

10. Development on the Property described in Exhibit "A" shall be consistent with PD Master Plan for the Project, and includes the following requirements:

    a. The ingress/egress points to the Property described in Exhibit "A" shall be located as depicted on the PD Master Plan. The design of all proposed roadways shall be consistent

with the applicable standards of Article 7 of the City's LDRs and the City's Design and Construction Requirements (latest edition at the time of review of Construction Plans) and the PD Master Plan drawing. The design of the proposed roadway shall be reviewed and approved as part of Construction Plans submitted for the subdivision review process, as further defined in Section 2.4.10 of the City's LDRs. Shifts of less than 50' shall be permitted as minor deviations from the approved PD Master Plan per Section 2.4.3 (D)(8) of the City's LDRs.

b. The Owner, or its successors and/or assigns, shall design, obtain all applicable permits, and construct a stormwater management system necessary to serve the development. Stormwater management facilities shall be constructed concurrent with development of the Project. Sufficient stormwater capacity consistent with Section 6.9.3 of the City's LDRs must be provided concurrent with site improvements of the Project. On-site soil shall be appropriately prepared so as to alleviate any drainage issues.

c. Utilities shall be extended throughout the Project within areas designated as public right-of-ways, where practical. Utility infrastructure which must run outside the right-of-way, and which will be maintained by the City, shall be located in easements approved and accepted by the City granting access and maintenance of such infrastructure.

d. The Owner, or its successors and/or assigns, shall be responsible for the provision of infrastructure for the Project. This shall include all on-site improvements and off-site improvements, including transportation infrastructure improvements, deemed necessary to support the development by the City in the City's sole discretion. Offsite improvements, including transportation infrastructure improvements deemed necessary by the City, shall be consistent with City's Comprehensive Plan and Land Development Regulations in existence at the time of the proposed development requiring the infrastructure, and shall be supported by appropriate data and analysis that identifies a specific impact from the proposed development. If offsite improvements are required by the City, it shall be limited to the areas or infrastructure impacted by the proposed development. The data and analysis used to justify the requirement for offsite improvements will be provided by traffic study data, reports, or other infrastructure analysis that identifies the development's impact on the affected infrastructure, and determines a reasonable proportional impact from the proposed development. The data and analysis will be provided by the Developer and reviewed

by the City. The Developers shall pay for any consultants or experts the City deems necessary to review the data and analysis provided by the Developer.

e. Facilities constructed on-site that are not dedicated to the City for maintenance shall be the responsibility of a legally established property owners' association. The property owners' association shall have the responsibility of maintenance of all common areas. In the event that common areas and required open space areas, as mandated by Sections 6.7.6, 6.9.3(E)(2), and 7.8.1 of the City's LDRs, or any amendments thereto, are not owned by a property owner's association, such areas shall be burdened by an easement that requires a property owner's association or another entity approved by the City to maintain such areas, and that restricts such areas in accordance with the City's requirements for such areas.

11. Electric System Requirements:

a. The Owner, or its successors and/or assigns, shall be responsible for all costs associated with connection to the electric system of the electric service provider as necessary to serve the Project.

12. Water System Requirements:

a. The Owner, or its successors and/or assigns, shall be responsible for all costs associated with connection to the City's potable water system as necessary to serve the Project.

b. Water systems shall be designed to provide fire flow rates that conform to the current standards of the Florida Fire Prevention Code, Chapter 633, Florida Statutes, and the Florida Building Code.

13. Wastewater System Requirements:

a. The Owner, or its successors and/or assigns, shall be responsible to design, permit, and construct wastewater main extensions and any other improvements, including but not limited to any lift station required and necessary to serve the Project.

14. Pedestrian and Street Improvements:

a. The Owner, or its successors and/or assigns, shall be responsible to design, obtain all applicable permits, and construct all pedestrian and street improvements in

accordance with Section 7.3, *Required Improvements*, Section 7.2.3, *Block Standards,* and any other pertinent section of the City's LDRs subject to the following:

i. Block lengths may exceed 600 feet when all of the following conditions are met:

1. An easement or common area permitting pedestrian access through blocks longer than 600 feet is provided. This easement or common area shall be a minimum of 20 feet in width and recorded in the Public Records of Alachua County.

2. Where these means of pedestrian access intersect with any rights-of-way, a pedestrian crossing shall be provided across the right-of-way that includes one or more of the following elements intended to serve as traffic calming and clearly delineate pedestrian space: change in materials, bulb-outs, or a raised pedestrian crossing.

3. Any easement intended for pedestrian access through a block shall be improved with concrete, brick pavers, asphalt or similar hard material.

4. In no instance, shall a block length or length of travel through an easement exceed 1000 feet.

ii. Pavement widths may not be less than 24 feet.

iii. A minimum 5 foot wide sidewalk shall be provided on both sides of all public streets.

15. The Owner, or its successors and/or assigns, shall submit a landscaping and buffering plan as part of any Final PD Plan. The landscaping and buffering plan shall meet the requirements established by the adopted PD Master Plan, Section 6.2.2, Landscaping Standards or Section 6.3, Fencing Standards, of the City's LDRs, or any amendments thereto.

16. The Owner, or its successors and/or assigns, shall submit an open space plan as part of any new Final PD Plan. The open space plan shall meet the minimum requirements established by Section 6.7, *Open Space Standards*, of the City's LDRs, or any amendments thereto.

17. Open spaces and conservation areas shall account for a minimum of ten percent (10%) of the complete project.

18. The Owner, or its successors and/or assigns, shall obtain all applicable permits from the Suwannee River Water Management District, Alachua County Public Works, the Florida Department of Environmental Protection, the Florida Fish and Wildlife Commission, and any

other Federal, State, or Local agency before the commencement of any development in the Project.

19. Any Final PD plan shall include detailed geotechnical mapping and evaluation to identify and address any potential karst features or active ground loss areas.

20. The Final PD Plan shall be a Preliminary Plat for single-family detached or single family attached, the City's Comprehensive Plan, and the City's LDRs. The Final PD Plan shall also adhere to all requirements of the PD Master Plan and the PD Agreement for this Project.

21. Any Final PD Plan shall include the exact number of residential dwelling units, as well as precise information regarding the layout of open space, circulation, and stormwater management.

22. A valid Planned Development Agreement shall be adopted concurrent with the approval of this ordinance and the PD Master Plan.

23. The development parameters defined herein do not inordinately burden the development of the Property described in Exhibit "A", the PD, or the Project.

24. The rezoning of the Property described in Exhibit "A" does not reserve concurrency for the Project.

25. The adoption of this Ordinance does not guarantee the approval of any development permits, including but not limited to, a Preliminary Plat, Construction Plans, Site Plan or a Final Plat for the Project, or for any part or section thereof, for the Owner/Developer or its successors or assigns.

26. All development, including but not limited to any Final PD Plan for the Project, shall be governed by the laws, regulations, comprehensive plan and ordinances in effect at the time of the specific proposed development, and not as of the date of this ordinance.

Section 4. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety, and welfare of the citizens and residents of Alachua, Florida.

Section 5. Repealing Clause

All ordinances or parts of ordinances in conflict with this ordinance are, to the extent they conflict with this ordinance, repealed.

Section 6. Providing for Severability

It is the declared intent of the Alachua City Commission that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by a court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance and the remainder of this ordinance, after the exclusion of such part or parts, shall be deemed to be valid.

Section 7. Effective Date

This Ordinance shall be effective upon its passage and adoption on the second and final reading.

PASSED on first reading on the _____ th day of _____, 20__.

PASSED and **DULY ADOPTED**, in regular session, with a quorum present and voting, by the City Commission, upon second reading this _____ day of _____, 20__.

SAVANNAH STATION, PHASE 3
PLANNED DEVELOPMENT
MASTER PLAN

GENERAL NOTES

1. **LAND USES.** LAND USES SHALL BE GENERALLY LOCATED AS SHOWN ON THE PD MASTER PLAN. THE FOLLOWING USES ARE ALLOWED IN ANY LAND USE AREA: RECREATIONAL TRAILS, PARKS, AND STORMWATER MANAGEMENT FACILITIES. AN AMENITY CENTER MAY BE PERMITTED IN DEVELOPABLE AREAS A OR B ONLY. SINGLE-FAMILY DETACHED RESIDENTIAL MAY BE ALLOWED WITHIN DEVELOPABLE AREAS A -C, ATTACHED DWELLINGS WITH UP TO EIGHT FAMILIES PER BUILDING MAY BE ALLOWED WITHIN DEVELOPABLE AREA B ONLY.
2. **PHASING.** THE DEVELOPMENT SHALL CONSIST OF ONE PHASE AND MAY BE DEVELOPED ACCORDING TO MARKET CONDITIONS. THE DEVELOPMENT MAY BE FURTHER DIVIDED INTO SMALLER UNITS ACCORDING TO THE FINAL PD PLAN TO CREATE A LOGICAL AND/OR FUNCTIONAL DEVELOPMENT OR INFRASTRUCTURE PATTERNS. EACH PHASE OR UNIT SHALL CONSTRUCT NECESSARY UTILITY SERVICES AND STORMWATER MANAGEMENT FACILITIES TO ENSURE PUBLIC HEALTH, SAFETY, AND WELFARE. THE AMENITY CENTER WILL BE PERMITTED AT THE SAME TIME AS RESIDENTIAL DEVELOPMENT OR AFTER, BUT NOT BEFORE. IF ATTACHED SINGLE-FAMILY UNITS ARE PERMITTED PER SITE PLAN, AN INFRASTRUCTURE PLAN WILL BE REQUIRED FOR UTILITY SERVICE AND RIGHT-OF-WAY ACCESS TO SERVE DEVELOPMENT.
3. **LOT SETBACK AND SEPARATIONS.** HOUSING UNITS AND DESIGN SHALL AT A MINIMUM MEET THE REQUIREMENT OF THE FLORIDA BUILDING CODE. NOTWITHSTANDING THE SETBACKS ESTABLISHED WITHIN EACH DEVELOPABLE AREA AND DEFINED ON THE PD MASTER PLAN, AN ACCESSORY STRUCTURE, SUCH AS A DETACHED GARAGE, MAY SHARE A COMMON WALL WITH ACCESSORY STRUCTURES ON ADJACENT LOTS.
4. **OPEN SPACE.** OPEN SPACE, AS DEFINED BY APPLICABLE SECTIONS OF THE LDRs AND THE PD MASTER PLAN SHALL ACCOUNT FOR A MINIMUM OF 10% OF THE COMPLETED PROJECT. OPEN SPACE AREAS MAY EXIST IN ANY LAND USE AREA AND MAY BE DEVELOPED AT ANY RATE. THESE AREAS MAY CONTAIN LOW-INTENSITY PASSIVE OR ACTIVE RECREATION OPPORTUNITIES SUCH AS NATURE TRAILS, WILDLIFE VIEWING AREAS, AND OTHER RECREATION ACTIVITIES.
5. **CIRCULATION.** THE CIRCULATION CONFIGURATION IS IDENTIFIED AS LAND USE AREA F AND IS NOT INTENDED TO BE EXACT AND MAY BE AMENDED AS PERMITTED WITHIN THE CITY LDR. ROADWAYS INTENDED TO BE DEDICATED TO THE PUBLIC MAY BE CONSISTENT WITH THE TYPICAL SECTION WITHIN THE MASTER PLAN AND SHALL BE REQUIRED TO MEET THE APPLICABLE LDR DESIGN CRITERIA, UNLESS OTHERWISE AUTHORIZED BY THE CITY COMMISSION THROUGH LDR §3.6.3 (A)(5)(b)(iii). THE INTERNAL ROADWAYS NOT SHOWN ON THE PD MASTER PLAN ARE INTENDED TO BE NEIGHBORHOOD STREETS AND MAY NOT MEET THE ARTERIAL OR COLLECTOR ROADWAY DEFINITION.
6. **LANDOWNER/DEVELOPER RESPONSIBILITY.** THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING RIGHT-OF-WAY AND EASEMENTS FOR CONSTRUCTING ON-SITE INFRASTRUCTURE LOCATED IN THE PROPOSED PD-R DISTRICT, INCLUDING BUT NOT LIMITED TO ELECTRICAL UTILITY LINE, TELEPHONE LINES, CABLE TV LINES, OR THE UNDERGROUND CONDUIT FOR SUCH FEATURES. THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING AREAS FOR PUBLIC INFRASTRUCTURE, AS REQUIRED BY CITY ORDINANCES, TO GUARANTEE CONSTRUCTION OF REQUIRED INFRASTRUCTURE, AND IF REQUESTED BY THE CITY, TO DEDICATE THESE IMPROVEMENTS TO THE CITY IN A FORM THAT COMPLIES WITH CITY REGULATIONS. ALL FACILITIES NOT DEDICATED TO THE CITY SHALL BE OPERATED AND MAINTAINED BY A PROPERTY OWNERS ASSOCIATION FORMED AS PART OF THE SUBDIVISION PROCESS.
7. **ALLOWABLE LAND USE CLASSIFICATION DATA.** FIGURES FOR ACREAGE ARE ESTIMATES AND HAVE BEEN ROUNDED TO THE NEAREST TENTH OF AN ACRE.
8. **BLOCK FACES.** BLOCK FACES GREATER THAN 600' IN LENGTH SHALL INCLUDE A MINIMUM 10'-WIDE EASEMENT FOR A PEDESTRIAN WAY THROUGH THE BLOCK, CONSISTENT WITH LDR §7.2.3(B)(2) AND §3.6.3(A)(5)(b)(iii) TO ENHANCE PEDESTRIAN CIRCULATION. IN NO CASE SHALL A BLOCK FACE EXCEED 1,000' IN LENGTH. TRAFFIC CALMING MEASURES THAT MAY BE USED TO CONNECT THESE MID-BLOCK CUTS WITH EACH OTHER OR OTHER ELEMENTS OF THE PEDESTRIAN CIRCULATION NETWORK INCLUDE RAISED PEDESTRIAN CROSSINGS, CHANGE IN MATERIALS, BULB-OUTS, ETC. THESE PEDESTRIAN WAYS SHALL BE PRIVATELY MAINTAINED, UNLESS A SEPARATE UNDERSTANDING HAS BEEN REACHED WITH CITY OF ALACHUA PUBLIC SERVICES.
9. **ARCHITECTURAL STANDARDS.** ARCHITECTURAL VARIABILITY STANDARDS AS SET OUT IN SECTION 4.3.1 (A)(4)(D) ARE APPLICABLE TO SINGLE FAMILY DETACHED DWELLINGS WITHIN PHASE 3. DESIGN FEATURES AS REQUIRED BY USE-SPECIFIC STANDARDS IN SECTION 4.3.1 (A)(3)(D) ARE APPLICABLE TO SINGLE FAMILY ATTACHED, TOWNHOME OR TWO TO FOUR FAMILY DWELLINGS WITHIN PHASE 3.
10. **ROADWAY STANDARDS.** REGARDLESS OF OWNERSHIP OR MAINTENANCE OF STREETS, ALL SIDEWALKS AND CROSSWALKS WILL MEET FDOT DESIGN MANUAL CHAPTER 222 PEDESTRIAN FACILITIES, UNLESS OTHERWISE STIPULATED IN THE PD MASTER PLAN.
11. **ACCESS EASEMENTS.** DEVELOPABLE AREA B UNITS MAY REQUIRE DRIVEWAYS TO PARTIALLY BE LOCATED ON ADJACENT LOTS, IF SIDE LOTS LINES ARE OTHER THAN 90-DEGREES TO THE RIGHT-OF-WAY. IN THIS CASE, LOTS WILL HAVE ACCESS EASEMENTS OVER THE PORTION OF DRIVEWAY LOCATED ON AN ADJACENT LOT.
12. **ENVIRONMENTAL ASSESSMENT.** AN ENVIRONMENTAL ASSESSMENT WILL BE REQUIRED AT TIME OF FINAL PD PLAN/ PRELIMINARY PLAT/ SITE PLAN APPROVAL THAT INCLUDES A 100% GOPHER TORTOISE AND BURROWING OWL SURVEY. A CONDITION WILL BE REQUIRED THAT STANDARD MEASURES OF PROTECTION FOR EASTERN INDIGO SNAKES, IF APPLICABLE.

LAND USE DATA

HATCH PATTERN	LAND USE AREA	AREA (AC)	AREA (%)
	PROJECT SITE	118.2	100%

1. MAXIMUM DENSITY FOR THE OVERALL SITE IS 4 DWELLING UNITS PER ACRE, 472 TOTAL UNITS. DWELLING UNIT-ALLOCATIONS MAY SHIFT FROM ONE DEVELOPABLE AREA TO ANOTHER, AS LONG AS THE MAXIMUM NUMBER OF UNITS IS NOT EXCEEDED.
2. FOR STREET-FACING GARAGES, THE GARAGE PORTION OF THE STRUCTURE SHALL BE SET BACK A MINIMUM 18 FEET.
3. THE SIDE SETBACK MAY BE REDUCED TO 0' ON ONE SIDE OF THE LOT AS LONG AS A MINIMUM SEPARATION CONSISTENT WITH FLORIDA BUILDING CODE IS MAINTAINED.
4. THE AMENITY CENTER MAY BE LOCATED IN DEVELOPABLE AREA A OR B ONLY.

SAVANNAH STATION, PHASE 3
PLANNED DEVELOPMENT
UTILITY PLAN

GENERAL NOTES

1. **POTABLE WATER.** POTABLE WATER. AN 8-INCH POTABLE WATER MAIN RUNS ALONG THE CR 235 RIGHT-OF-WAY. DIRECT CONNECTION IS ANTICIPATED WITHOUT THE NEED FOR JACK AND BORE OF CR 235.
2. **SANITARY SEWER.** THE PROJECT PROPOSES TO TIE INTO THE EXISTING 16-INCH SEWER MAIN LOCATED ON NW 173RD STREET APPROXIMATELY 1,200 FEET NORTH OF THE CR 235 AND NW 173RD STREET INTERSECTION. THE PROJECT WILL INSTALL A FORCEMAIN FROM THE ONSITE LIFT STATION TO THIS 16-INCH SEWER MAIN. A DIRECTIONAL BORE UNDER CR 235 AND THE EXISTING CRX (RAILROAD) RIGHT OF WAY IS EXPECTED.
3. **STORMWATER MANAGEMENT FACILITIES.** STORMWATER MANAGEMENT FACILITIES (SMF) ARE LOCATED THROUGHOUT THE DEVELOPMENT, INCLUDING ALONG CR 235, THE SITE'S LOW AREA, AND THE TOPOGRAPHIC FEATURE ADJACENT TO NW 157TH STREET. THIS PLAN ILLUSTRATES APPROXIMATELY 15% OF THE PROJECT SITE. FINAL SIZE AND LOCATION OF SMFs WILL BE DETERMINED DURING SITE PLAN REVIEW.
4. **PUBLIC FACILITIES IMPACT.** CONCURRENCY RESERVATION WILL BE MADE AT TIME OF FINAL PD APPROVAL. THE FOLLOWING IMPACT CALCULATIONS HAVE BEEN PREPARED TO DEMONSTRATE THAT SUFFICIENT CAPACITY EXISTS TO ACCOMMODATE THE PROPOSED PROJECT.

NOTE: ONLY ONE OF SEVERAL FEASIBLE WASTEWATER CONVEYANCE OPTIONS IS SHOWN. ENGINEERING DESIGN SHALL CONSIDER ALL AVAILABLE OPTIONS FOR SANITARY SEWER CONNECTION AND WORK WITH CITY OF ALACHUA PUBLIC SERVICES DEPARTMENT TO ENSURE THE MOST SUITABLE AND EFFICIENT DESIGN IS ACHIEVED DURING THE PLATTING PROCESS.

Planning & Community Development Department

Staff Report

Planning & Zoning Board Hearing Date: March 8, 2022 *
Quasi-Judicial Hearing

SUBJECT:	A request to amend the Official Zoning Atlas from Agricultural ("A") to Planned Development – Residential ("PD-R")
APPLICANT/AGENT:	Ryan Thompson, AICP of CHW, Inc.
PROPERTY OWNER:	Waco Properties, Inc.
LOCATION:	East of CR 235, North of NW 110th Avenue, south of Pilot Forest subdivision
PARCEL ID NUMBERS:	03980-002-001
ACREAGE:	± 118.2
PROJECT PLANNER:	Adam Hall, AICP, Principal Planner
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board transmit the Site-Specific Amendment to the Official Zoning Atlas for a Planned Development to the City Commission with a recommendation to approve the application, subject to the 26 conditions provided in Exhibit "A" of this Staff Report.
RECOMMENDED MOTION:	*Based upon the competent substantial evidence presented at this hearing, the presentation before this Board, and Staff's recommendation, this Board finds the application for a Site-Specific Amendment to the Official Zoning Atlas for a Planned Development to be consistent with the City of Alachua Comprehensive Plan and in compliance with the Land Development Regulations and transmits the application to the City Commission, with a recommendation to approve, subject to the 26 conditions provided in Exhibit "A" and located on page 38 of the March 8, 2022, Staff Report to the Planning & Zoning Board.*

**After consideration by the Planning and Zoning Board, the Report was amended to address several typographical or formatting issues*

SUMMARY

The proposed Site-Specific Amendment to the City of Alachua Official Zoning Atlas (Rezoning) is a request by Ryan Thompson, AICP of CHW, Inc., on behalf of Waco Properties, Inc., property owner, for the consideration of the rezoning of the subject property from Agricultural ("A") to Planned Development – Residential ("PD-R").

The subject property is comprised of Tax Parcel Number 03980-002-001 and is approximately 118.2 acres in size. The subject property is located east of CR235, north of NW 110th Avenue, and south of the Pilot Forest Subdivision.

The subject property presently has a Moderate Density Residential Future Land Use Designation, which permits up to 4 dwelling units per acre (472 total units maximum for the subject property). The proposed PD-R zoning district would permit a maximum of 472 residential units, which is consistent with the maximum density of the existing FLUM Designations for the subject property.

Development would consist primarily of single family detached structures, but approximately 22.5 % of the units could be developed as single family attached units, with up to eight (8) units in a single building. Two ingress/egresses are proposed to connect to CR 235. CR 235 is a County maintained collector therefore Alachua County Public Works is responsible for ultimately permitting the connections to the subject property.

The proposed development would be constructed in one or more phases. The Planned Development Ordinance and Agreement will be valid for 10 years after date of final approval of the PD Zoning ordinance.

The general purpose of the Planned Development zoning districts is described by Section 3.6.1(A) of the Land Development Regulations (LDRs) as follows:

> The Planned Development (PD) districts are established for the purpose of encouraging innovative land planning and site design concepts that conform to community quality of life benchmarks and that achieve a high quality of development, environmental sensitivity, energy efficiency, and other City goals by:
>
> **(1)** *Increasing Flexibility*
> Reducing or diminishing the uniform design that results from the strict application of zoning and development standards that are designed primarily for individual lots;
>
> **(2)** *Greater Freedom to Provide Access, Open Space, and Amenities*
> Allowing greater freedom in selecting the means to provide access, open space, and design amenities;
>
> **(3)** *Greater Freedom to Provide Mix of Uses and Housing Types*
> Allowing greater freedom in providing a mix of land uses in the same development, including a mix of housing types, lot sizes, and densities;

(4) *Providing Greater Opportunity for More Efficient Land Use Patterns*
Providing for an efficient use of land resulting in smaller networks of utilities and streets and thereby lowering development and housing costs;

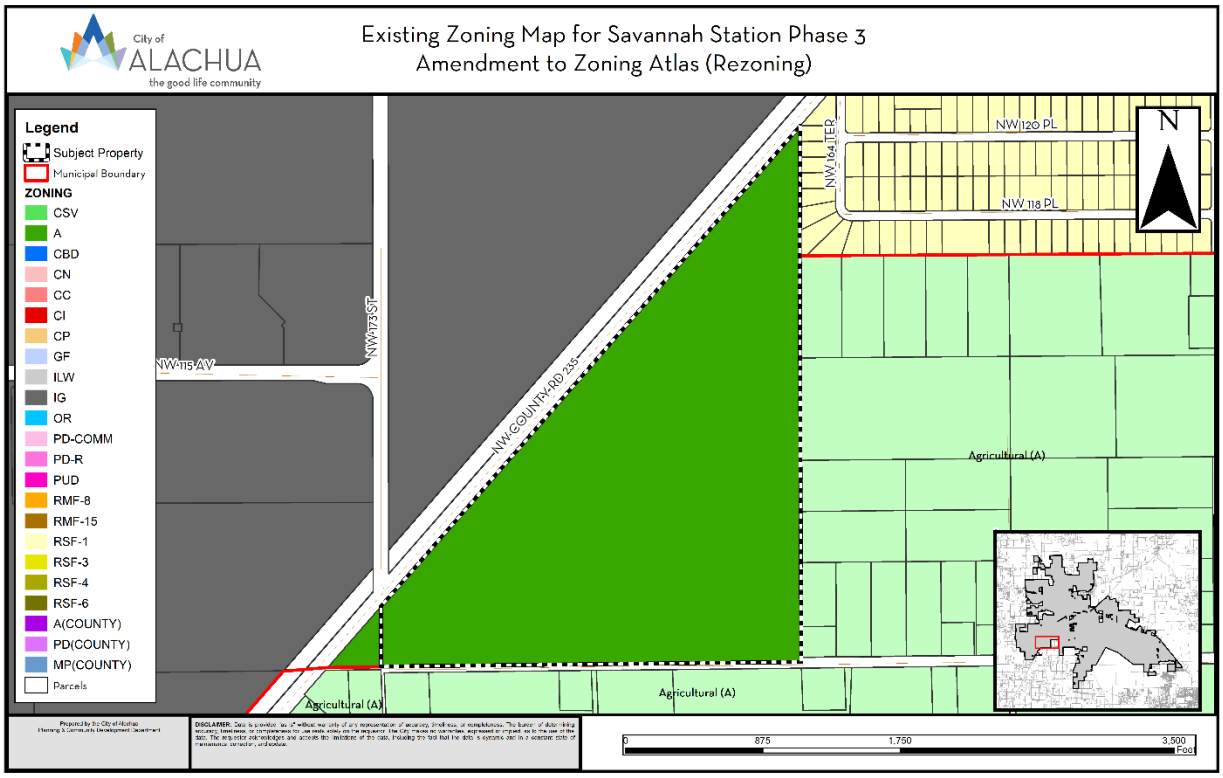
(5) *Promoting Quality Design and Environmentally Sensitive Development Through Site Characteristics*
Promoting quality design and environmentally sensitive development by allowing development to take advantage of special site characteristics, locations, and land uses; and

(6) *Quality Design Through Density Increases*
In specific instances, encouraging quality design and environmentally sensitive development by allowing increases in base densities or floor area ratios when such increases can be justified by superior design or the provision of additional amenities such as public open space.

The purpose of the PD-R zoning district is described by Section 3.6.1(B)(1) of the LDRs as follows:

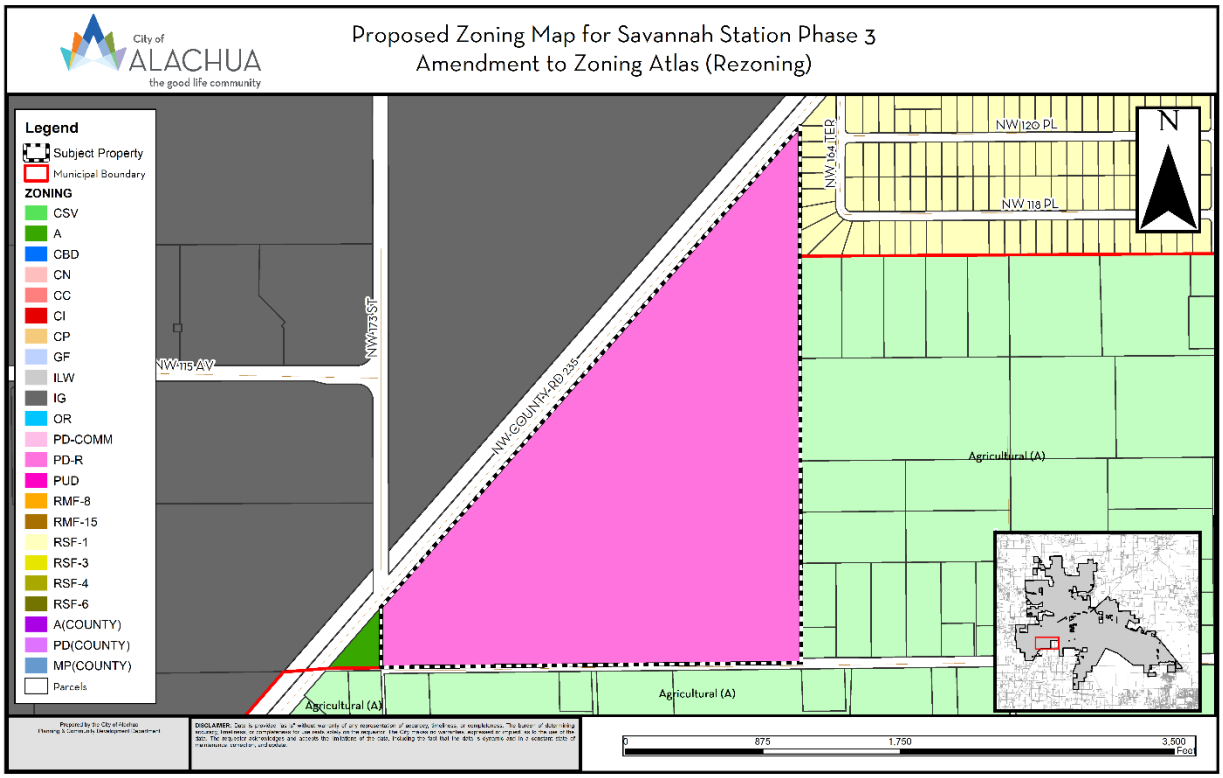
> The purpose of the Planned Development-Residential (PD-R) District is to provide a mix of residential uses using innovative and creative design elements, while at the same time providing an efficient use of open space. Commercial uses may be allowed in the PD-R District primarily to serve the needs of the residents in the development.

EXISTING USES



The subject property is vacant and has historically been used for agricultural cultivation.

EXISTING/PROPOSED ZONING DISTRICT COMPARISON



The matrix below provides an analysis of the maximum gross density, floor area ratio, and typical uses permitted within the existing and proposed zoning districts:

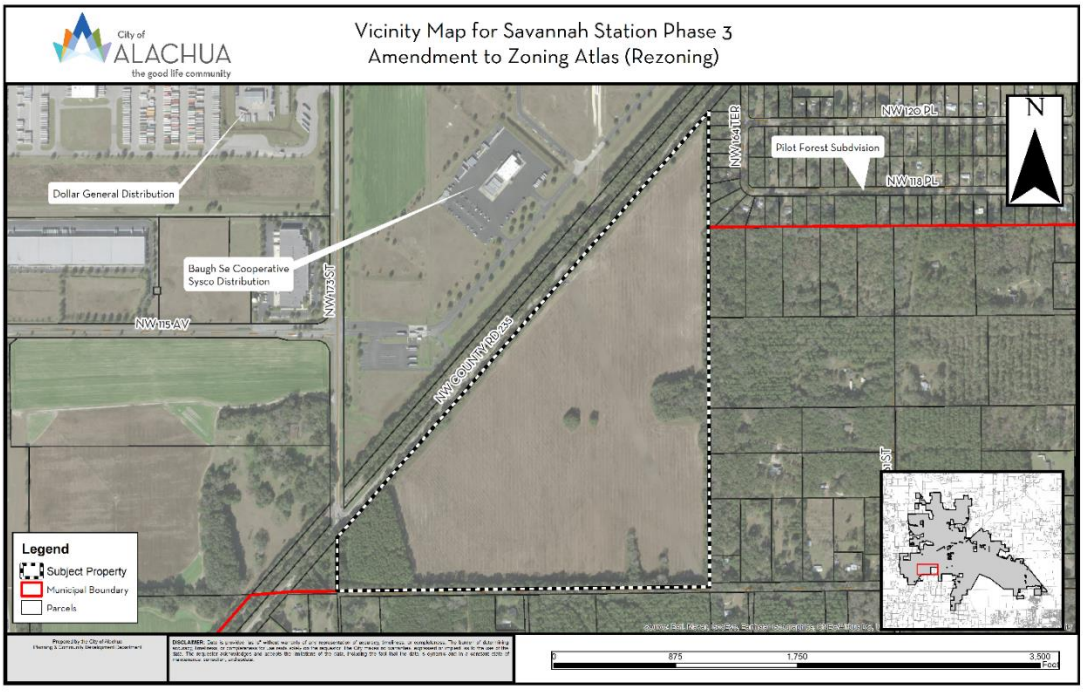
	Existing Zoning Districts	Proposed Zoning District
Zoning District:	Agricultural (A) 118.2 acres	Planned Development – Residential (PD-R) 118.2 acres
Max. Gross Density:	.2 dwelling units per acre *Maximum of 23 dwelling units*	Established by PD Master Plan *472 dwelling units*
Floor Area Ratio:	N/A	Established by PD Master Plan *2,500 square feet maximum for neighborhood amenity center building*
Typical Permitted Uses:	Residential uses, community services, agricultural activities including agricultural production and education, animal husbandry, horticulture, farmers markets, agriculture support services, and agri-tourism	Single family attached and detached, townhouse, stormwater management facilities, common areas, open space,

Map 1. Existing Official Zoning Atlas with Subject Property

Map 2. Proposed Official Zoning Atlas with Subject Property

SURROUNDING USES

The subject property is located east of CR235, north of NW 110th Avenue, and south of the Pilot Forest Subdivision.



The existing uses, Future Land Use Map ("FLUM") Designations, and zone districts of the surrounding area are identified in Table 1. Map 3 provides an overview of the vicinity of the subject property.

NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. It is not intended to be all-inclusive, and may not identify all existing uses, FLUM Designations, and/or zoning districts surrounding the subject property.

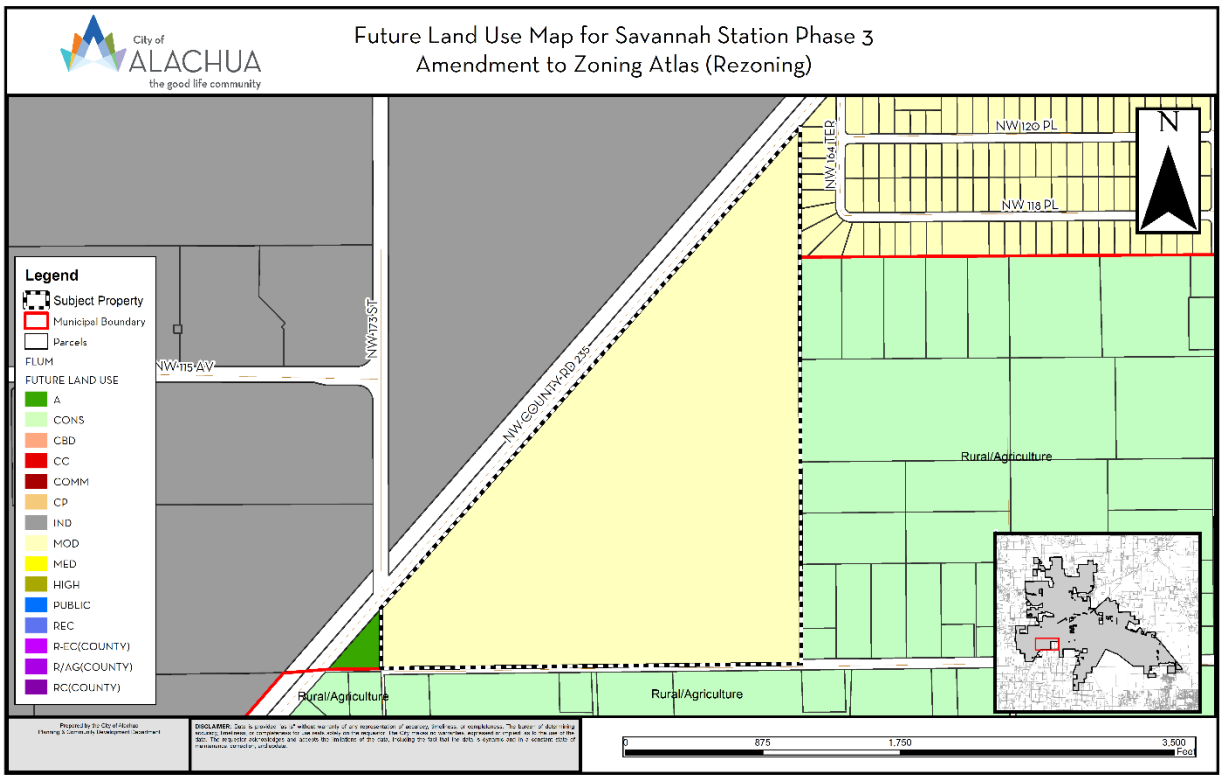


Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Industrial	Industrial	IG
East	Residential	Rural/ Agriculture (Alachua County) and Moderate Density Residential	A (Alachua County)/ RSF-1
West	Industrial	Industrial	IG
South	Residential	Rural/Agriculture (Alachua County)	A (Alachua County)

Map 3. Vicinity Map

Map 4. Future Land Use Map

NEIGHBORHOOD MEETING

The purpose of a Neighborhood Meeting is to educate the owners of nearby land and any other interested members of the public about the project and to receive comments regarding the project. As required by Section 2.2.4 of the LDRs, all property owners within 400 feet of the subject property and any organizations or persons who have registered to receive notification of applications for development are notified of the meeting and notice of the meeting is published in a newspaper of general circulation.

A Neighborhood Meeting was held on August 30, 2021, at the CHW offices in Progress Park, to educate the owners of nearby land and any other interested members of the public about the application. The applicant's agent was present and available to answer questions. As evidenced by materials submitted by the applicant, the meeting was attended by 3 members of the public.

Concerns included potential emergency or pedestrian access to NW 110th Avenue.

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The Goals, Objectives, and Policies (GOPs) identified below are provided to establish a basis of the application's consistency with the Comprehensive Plan. There may be additional GOPs which the application is consistent with that are not identified within this report. An evaluation and findings of consistency with the identified GOPs is also provided below.

The property currently has a Future Land Use Map Designation of Moderate Density Residential, which permits up to 4 units per acre. The following Comprehensive Plan Elements have Goals, Objectives, and Policies (GOPs) that support the proposed amendment to the Future Land Use Map of the City of Alachua's Comprehensive Plan:

- Future Land Use Element
- Transportation Element
- Housing Element
- Recreation Element
- Community Facilities Natural Groundwater Aquifer Recharge Element
- Conservation and Open Space Element

The applicant has provided an analysis of the proposed amendment's consistency with the Comprehensive Plan. Based upon the applicant's Comprehensive Plan Consistency Analysis and information presented below, staff finds the application consistent with the Comprehensive Plan and the Goals, Objectives, and Policies (GOPs) therein.

Future Land Use Element

Policy 1.2.a of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Moderate Density Residential FLUM Designation, and states the following:

> *Policy 1.2.a:* Moderate density residential (0 to 4 dwelling units per acre): The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:
>
> 1. Single family, conventional dwelling units;
> 2. Accessory dwelling units;
> 3. Manufactured or modular homes meeting certain design criteria
> 4. Mobile homes only within mobile home parks;
> 5. Duplexes and quadplexes;
> 6. Townhomes;
> 7. **Residential Planned Developments;**
> 8. Supporting community services, such as schools, houses of worship, parks, and community centers

Analysis of Consistency with Policy 1.2.a: The proposed zoning to Residential Planned Development is permitted under this policy.

Objective 2.1 establishes the standards for Planned Developments (PD), including Residential Planned Developments.

> **Objective 2.1:** Planned Development (PD) Standards
>
> In an effort to reduce the impacts of urban sprawl on the community and the region, the City of Alachua shall provide for a wide array of planned developments to

encourage the creation of interrelated neighborhoods and districts to increase the quality of life for all residents of the City.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PDs for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.
2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.
3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.
4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.
5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Analysis of Consistency with Goal 2, Objective 2.1, and Policy 2.1.a: This application proposes to rezone the subject property to PD-R, which is a zoning districts established pursuant to Goal 2 of the Future Land Use Element. Goal 2, Objective 2.1, and Policy 2.1. and are implemented through Section 3.6 of the City's LDRs. An analysis of the application's compliance with Section 3.6 is provided within this Staff Report.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Analysis of Consistency with Objective 5.1 and Policies 5.1.a – e: The subject property has historically been used for cultivation of crops. There are no known listed species, wetlands, special flood hazard areas, or other significant natural features. If any regulated plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations. GIS Data from Alachua County indicates that a karst feature may be present on the site. As a condition of the Planned Development, additional geotechnical information for this area will be required.

Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities and services necessary for the development.

Analysis of Consistency with Objective 5.2: Prior to the issuance of any preliminary or final development order, any development must demonstrate that all necessary facilities or services are in place. Based on the concurrency analysis completed, there are no Public Facilities monitored for concurrency that would be deficient as a result of this development. Prior to any preliminary or final development order, the applicant must demonstrate how this potential deficiency will be addressed.

GOAL 9: Water and Wastewater Service:

The City will ensure that new development within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge

Element of the Comprehensive Plan, shall connect to the City of Alachua's potable water and wastewater system.

Policy 9.2: Any new residential subdivision within the corporate limits, where potable water service is available, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within either a Residential or Agriculture Future Land Use Map Designation shall connect to the City of Alachua's potable water system. Any new residential subdivision within the corporate limits, where wastewater service is available, as defined in Policy 1.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within a Residential Future Land Use Map Designation shall connect to the City of Alachua's wastewater system.

Analysis of Consistency with Goal 9 and Policy 9.2: Potable water is available to the site, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Analysis of Consistency with Policy 1.1.a: This project would support additional housing within the City, thereby furthering Policy 1.1.a.

Recreation Element

Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Analysis of Consistency with Policy 1.2.b: An analysis of the impacts to recreation facilities has been provided within this report.

Transportation Element

Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Analysis of Consistency with Objective 1.1: An analysis of the impacts to transportation facilities has been provided within this report. There are no transportation facilities that would be deficient as a result of this application.

Community Facilities & Natural Groundwater Aquifer Recharge Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which includes all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity water main exists within 100 feet of the property line of any lot with a residential land use category or an existing single family residence and wastewater service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. Gravity wastewater main exists with 500 feet of the property line of any proposed residential subdivision consisting of 5 units or less and the gravity wastewater system is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A gravity wastewater main, wastewater pumping station, or force main exists within 2,640 feet of the property line of any proposed residential subdivision comprised of more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 1.2.a: The subject property is located within the wastewater service area, and any future development on the subject property will be required to connect to a wastewater system.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill	.73 tons per capita per year

Analysis of Consistency with Objective 2.1.a: An analysis of the impacts to solid waste facilities has been provided within this report.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within 100 feet of any lot within a residential land use category or an existing single family residence water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
2. A water main exists within 500 feet of any proposed residential subdivision consisting of 5 units or less and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.
3. A water main exists within 2,640 feet of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service is accessible through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 4.1.b: The subject property is located within the potable water service area, and any future development on the subject property will be required to connect to a potable water system.

<u>Conservation and Open Space Element</u>

OBJECTIVE 1.3: Listed Species

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.a: The City shall ensure that its ordinances, regulations and policies protect listed species and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.c: The City shall obtain data from the Florida Fish and Wildlife Conservation Commission, Alachua County Environmental Protection Department, Florida Department of Environmental Protection, to maintain a periodically updated inventory of listed

species and habitats located within City limits or immediately adjacent to City limits. The City will use the Florida Natural Areas Inventory as a base inventory.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Analysis of Consistency with Objective 1.3 and Policies 1.3.a – e:

An environmental conditions and site suitability analysis has been provided separately in this report. Future development of the site must comply with the environmental protections established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 1.10: Wetlands

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Policy 1.10.a: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code and regulations adopted by the DEP and the Suwannee River Water Management District.

Policy 1.10.b: The City shall conserve wetlands by prohibiting, where the alternative of clustering all structures in the non-wetland portion of the site exists, any development or dredging and filling which would alter their natural functions. If no other alternative for development exists, the City shall allow only minimal development activity in those areas designated as wetlands within this Comprehensive Plan and that such development activity comply with the following performance standards:

I. Residential dwelling units no denser than 1 dwelling unit per 5 acres, subject to the following minimum performance standards:

a. Residences and any support buildings must be built on pilings of sufficient height to exceed by 1 foot the highest recorded flood level in the wetland. If there is not flooding data available, residences and any support buildings must be built at least 2 feet above the highest seasonal water level.

b. Clearing or removal of native vegetation shall not exceed 1/2 acre per 5 acres, except that where a ratio of 1 dwelling unit per 5 acres is utilized, the clearing or removal of native vegetation shall not exceed a total of 1/4 acre per 5 acres. Exotic vegetation may be removed without regard to this limitation provided that, of the area cleared of exotic vegetation exceeds the applicable 1/2 acre or 1/4 acre limitation, or is replanted with native wetland vegetation.
c. No dredging or filling (except for pilings to support the residence and support buildings or poles providing utility services) shall be allowed, except that a walking path or driveway to the residence may use permeable fill of it is designed with a sufficient number and size of culverts to allow the natural flow of water to continue.
d. Drain fields for septic tanks and gray water shall be located outside the wetland.
e. Where a ratio of 1 dwelling unit per 5 acres is employed the following provisions shall also apply:

    i. Clustering of units shall be located in the perimeter areas of the wetlands; and

    ii. A restrictive or conservation easement to preserve open space shall be established.

OR:

II. Residential dwelling units not more dense that 1 dwelling unit per 3 acres such to the following minimum performance standards:

    a. Residences must be built on pilings of sufficient height to exceed by 1 foot the highest recorded flood level in the wetland. If there is no flooding data available, residences must be built at least 2 feet above the highest seasonal water level.
    b. All support buildings and other support facilities shall be constructed outside the wetland.
    c. Clearing or removal of vegetation shall not exceed 1/4 acre per 3 acres, except that where a ratio of 1 dwelling unit per 3 acres is employed, the clearing or removal of native vegetation shall not exceed a total of 1/8 acre per 3 acres. Exotic vegetation may be removed without regard to this limitation provided that, if the area is cleared of exotic vegetation exceeds the applicable 1/4 or 1/8 acre limitation, it is replanted with native wetland vegetation.
    d. No driveways, paths or other construction requiring fill (other than pilings for the residence or poles for utilities) will be allowed within the wetland.
    e. All residences shall be connected to a central sewage system owned and operated by the City.
    f. Where a ratio of 1 dwelling unit per 3 acres is utilized, the following

provisions shall also apply:

i. Clustering of units shall be located along the perimeter area of the wetland; and
ii. A restrictive or conservation easement to preserve the open space shall be required.

OR:

III. Limited development activity with impacts to isolated wetlands (and/or associated buffers) that meet all of the following conditions:

a. Less than .25 acres in size; and,
b. Determined to be of poor quality by a certified environmental specialist; and,
c. The applicant has demonstrated that every reasonable step has been taken to minimize impact to wetland; and,
d. The applicant has provided for appropriate on-site or off-site mitigation for impact to wetland.

Limited development activity includes, but is not limited to, park amenities such as trails or boardwalks, minimum necessary roadways and/or sidewalks for access or internal site connectivity, and underground utility line crossings.

Policy 1.10.c: The City shall review wetland mitigation and monitoring proposals to allow limited development activity in wetlands and wetland buffers. Applicants must provide documentation which indicates that the following steps have been taken: the applicant has attempted every reasonable measure to avoid adverse impacts; the applicant has taken every reasonable measure to minimize unavoidable adverse impacts; the applicant has provided adequate mitigation to compensate for wetland impacts. The property owner shall incur any and all expenses associated with wetland mitigation.

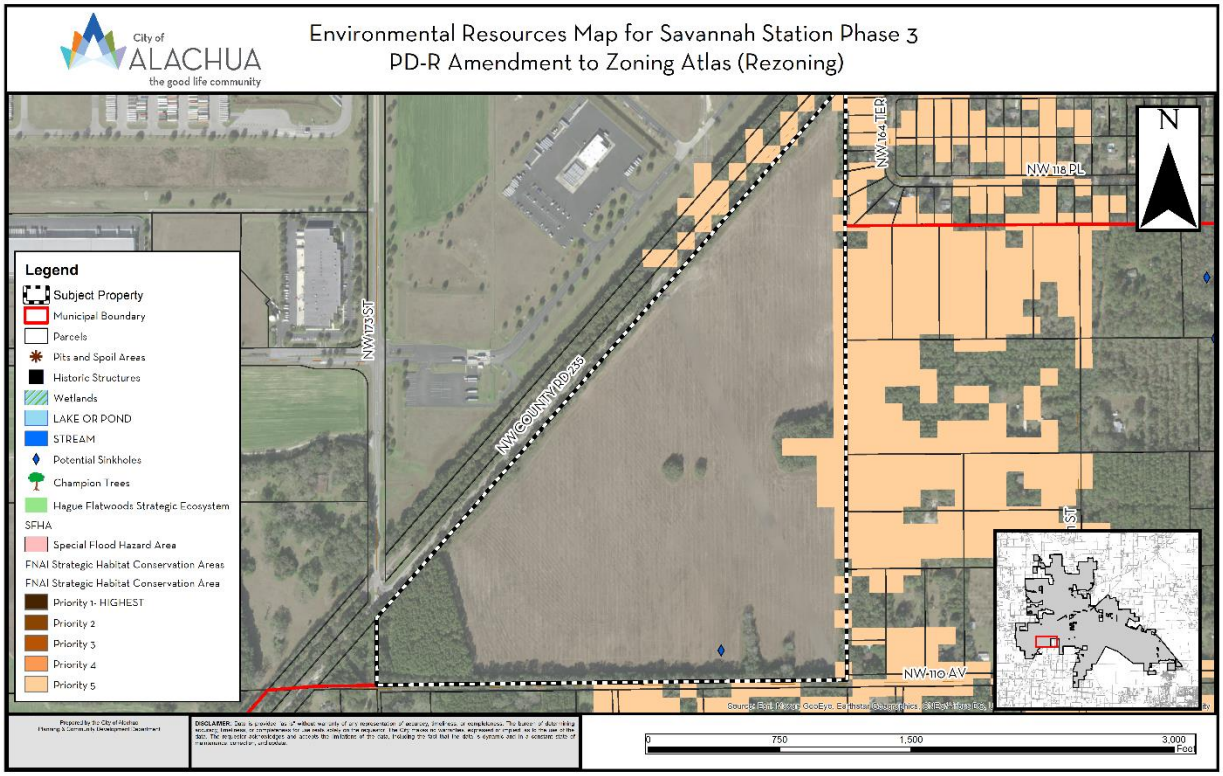
Policy 1.10.d: The City shall provide all wetland mitigation and monitoring proposals for review by the County, Suwannee River Water Management District and any other applicable agencies.

Policy 1.10.e: The City shall encourage the dedication of conservation easements to the State, County, water management district or private conservation trust, for wetland preservation.

Policy 1.10.f: The City shall encourage the creation, restoration and preservation of wetlands through partnerships with public and private entities.

Policy 1.10.g: The City shall require natural vegetative buffers around wetlands to protect the fragile ecosystems they sustain. Buffers, measured from the outer edge of the wetland, shall be created as established in the following table:

Resource Addressed	Required Buffer (feet)
Wetlands less than or equal to 0.5 acre that do not support federally and/or state regulated vertebrate wetland/aquatic dependent animal species.	50' average 35' minimum
Wetlands greater than 0.5 acre that do not support the animal species described above.	75' average 50' minimum
Areas where the animal species described above have been documented within 300 feet of a wetland.	100' average 75' minimum



Policy 1.10.h: As an alternative to Policy 1.10.g, where scientific data is available, specific buffering requirements may vary according to the nature of the individual wetland and the proposed land use, but in no case will the buffer be less than 35 feet. Buffering requirements will be based on the best available science regarding impacted ecosystems, listed species, wetland function, and hydrologic considerations.

Analysis of Consistency with Objective 1.10:

There are no known wetlands on the subject property. If wetlands are discovered, applicable Goals, Objectives, and Policies of the City's Comprehensive Plan as well as applicable requirements of Alachua County will have to be conformed to.

ENVIRONMENTAL CONDITIONS & SITE SUITIBILITY ANALYSIS

Map 4. Environmental Features

Wetlands

According to the best available data, there are no wetlands on the subject property.

Evaluation: Applicable standards in the City's Comprehensive Plan, Land Development Regulations, and Suwannee River Water Management District (SRWMD) regulations would apply to those areas identified as wetlands. There are no identifiable wetlands on the subject property, therefore, there are no issues related to wetland protection.

Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1996. The purpose of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation: The subject property is not located within or adjacent to a Strategic Ecosystem, therefore, the development will have no impact upon any Strategic Ecosystem(s) identified within the ecological inventory report.

Regulated Plant & Animal Species

The subject property is not known to contain any species identified as endangered, threatened, or of special concern, other than those described below. The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for each regional planning council. These workshops were attended by experts familiar with natural areas in the region. Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation: No species identified as endangered, threatened, or of special concern are known to exist on the subject property. If any regulated plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations.

Soil Survey

Each soil type found on the subject property is identified below. The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff). There are four hydrologic groups: A, B, C, and D. “Group A” soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. “Group D” soils have very lower infiltration rates and therefore a higher runoff potential.

There are six (6) soil types found on the subject property:

Soil Type	Hydrologic Group	Drainage Class	Dwellings without basements	% of Subject Property (may not total to 100% due to rounding)
Arredondo fine sand, 0 to 5 percent slopes	A	Well drained	Not limited	32.8
Millhopper sand, 0 to 5 percent slopes	A	Moderately well drained	Not limited	10.8
Kendrick sand, 2 to 5 percent slopes	B	Well drained	Not limited	0.2
Gainesville sand, 0 to 5 percent slopes	A	Well drained	Not limited	46.5
Arredondo fine sand, 5 to 8 percent slopes	A	Well drained	Not limited	6.8
Lochloosa fine sand, 5 to 8 percent slopes	B	Somewhat poorly drained	Not limited	3.0

Evaluation: The soil types located within the subject property do not pose any significant limitations for dwellings without basements.

Flood Potential

Panels 12001C0120D of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated June 16, 2006 indicates that the subject property contains areas with Flood Zone "X" designations (areas determined to be outside of the 500-year floodplain).

Evaluation: No portion of the subject property appears to be located within a special flood hazard area, therefore, no issues elated to flood potential.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations. GIS Data from Alachua County indicates that a karst feature may be present on the site. As a condition of the Planned Development, additional geotechnical information for this area will be required.

Evaluation: GIS Data from Alachua County indicates that a karst feature may be present on the site. As a condition of the Planned Development, additional geotechnical information for this area will be required.

Wellfield Protection Zone

Policy 7.2.1 of the Future Land Use Element of the Comprehensive Plan establishes a 500 foot radial buffer around city-owned potable water well.

Evaluation: The subject property is not currently located within a City of Alachua wellhead protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures and Markers

The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventory.

Evaluation: The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventor, therefore, no issues related to historic structures or markers.

COMPLIANCE WITH LAND DEVELOPMENT REGULATIONS

REZONING STANDARDS

Section 2.4.2(E)(1) of the Land Development Regulations ("LDRs") establishes standards with which all rezoning applications must be found to be compliant. Staff's evaluation of the application's compliance with the applicable standards of Section 2.4.2(E)(1) is provided below.

(a) ***Consistent with Comprehensive Plan*** – The proposed amendment is consistent with and furthers the goals, objectives, and policies of the Comprehensive Plan.

Evaluation: An analysis of the application's consistency with the Comprehensive Plan has been provided in this report.

(b) ***Consistent with Ordinances*** – The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

Evaluation: An analysis of the application's compliance with the LDRs has been provided in this report. Please reference those sections of this report for further analysis of compliance with the City's LDRs.

(c) *Logical Development Pattern* – The proposed amendment would result in a logical and orderly development pattern.

Evaluation: The proposed amendment would be adjacent to existing residential uses.

(d) *Pre-Mature Development* – The proposed amendment will not create premature development in undeveloped or rural areas.

Evaluation: Lands in the vicinity to the north, east and west are all developed with residential uses or industrial (warehouse) uses.

(e) *Incompatible with Adjacent Lands* – The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

Evaluation: The uses permitted by the PD-R Zoning are compatible with adjacent lands or uses or appropriate buffers and separation are provided. Furthermore, certain uses are not permitted in Development Areas A and C, such as the single family attached units. The amenity center is not permitted within Development Area C as well. A 50' buffer exists between Development area C and the lots to the east of the subject property.

(f) *Adverse Effect on Local Character* – The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights, or other physical effects or nuisances.

Evaluation: The proposed amendment would permit single-family residential uses near existing residential development and existing major employment centers (warehouses).

(g) *Not Deviate from Pattern of Development* – The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by the surrounding zone districts) of the area where the proposed amendment is located.

Evaluation: Similar residential exists in the vicinity – Savannah Station Phases 1 and 2, Pilot Forest, and Tara Village.

(h) *Encourage Sprawl* – The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low density single dimensional development.

Evaluation: Chapter 163.3164(51), Florida Statues, defines "urban sprawl" as, "a development pattern characterized by low density, automobile-dependent development with either a single use or multiple uses that are not functionally related,

requiring the extension of public facilities and services in an inefficient manner, and failing to provide a clear separation between urban and rural uses."

The subject property is located adjacent to developed residential properties, and is located near major employment centers.

The subject property is located proximate to existing water and wastewater facilities, which will be extended to connect the developed property.

The uses proposed by the PD-R are consistent with surrounding area, which consists primarily of residential and industrial uses.

(i) ***Spot Zoning*** – The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

Evaluation: The lands to the north and west are all developed residential areas; the lands to the south and east are low density residential uses. The proposed zoning application provides for additional residential adjacent to existing residential.

(j) ***Public Facilities*** – The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, storm water management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

Evaluation: The PD Utility plan indicates that the City's water and wastewater lines will be extended to serve the subject property.

(k) ***No Adverse Effect on the Environment*** – The proposed amendment would not result in significantly adverse impacts on the natural environment, including but not limited to water, air, noise, storm water management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

Evaluation: There are no significant impacts on the environment that would be caused by this application.

PLANNED DEVELOPMENT STANDARDS

Section 3.6.2(A)(1) of the Land Development Regulations (LDRs) establishes standards with which all Planned Development applications must be found to be compliant. The application has been reviewed for compliance with the standards of Section 3.6.2(A)(1). An evaluation and findings of the application's compliance with the standards of Section 3.6.2(A)(1) is provided below.

(1) *Master Plan*

The PD Master Plan:

(a) Identifies the general location of land uses within individual development areas or development pods and the mix of land uses;

Evaluation: The PD Master Plan identifies seven (7) development areas: Development Area 'A', Development Area 'B', Development Area 'C', Development Area 'D", Buffer, Common Area, and Rights-of-way. Single family detached is permitted in Development Areas A, B or C or D. Single family attached is permitted in Development Area B only. A neighborhood amenity center is permitted within Development Areas A or B only.

(b) Calculates the number, type, and mix of land uses, including the total number of residential units, residential densities, and non-residential intensities within each development area or development pods and the total number, type, and mix of land uses for the entire PD Master Plan;

Evaluation: The PD Master Plan identifies the number, type, and permitted land uses, including the total number of residential units and nonresidential intensities for the Planned Development and each development area.

(c) Identifies the general location of open space;

Evaluation: The applicant has shown the location of open space by a identifying Stormwater/Open Space area on the PD Master Plan.

(d) Identifies the location of environmentally-sensitive lands, wildlife habitat, and stream corridors;

Evaluation: There are no environmentally sensitive lands to be mapped.

(e) Identifies the on-site transportation circulation system including arterial and collector roads, existing or projected transit corridors, and pedestrian and bicycle pathways;

Evaluation: The PD Master Plan identifies the location of the on-site transportation circulation system and connection points to external roadways. No roads within the proposed development are classified as arterial or collector roads.

(f) Identifies on-site potable water and wastewater facilities; and

Evaluation: The PD Master Plan identifies the location of proposed on-site potable water and wastewater facilities, and the location of connection to off-site wastewater facilities.

(g) Identifies the general location of all public facility sites serving the development, including transportation, potable water, wastewater, parks, fire, police, EMS, stormwater, solid waste, and schools.

Evaluation: The applicant has identified on the PD Master Plan the location of internal circulation. The PD Master Plan identifies the general location of stormwater management facilities serving the development. The development will utilize existing public facilities for parks, fire, police, EMS, and schools, as noted on the PD Master Plan.

(2) *Consistency with the Comprehensive Plan*

The PD zone district designation and the PD Master Plan is consistent with the Comprehensive Plan.

Evaluation: An analysis of the application's consistency with the Comprehensive Plan has been provided in this report.

(3) *Compatibility with Surrounding Residential Areas*

Development along the perimeter of a PD District is compatible with adjacent existing or proposed future development. In cases where there are issues of compatibility, the PD Master Plan shall provide for transition areas at the edges of the PD District that provide for appropriate buffering and/or ensure a complimentary character of uses. Complimentary character shall be identified based on densities/intensities; lot size and dimensions; building height; building mass and scale; hours of operation; exterior lighting; and siting of service areas.

Evaluation: The uses permitted by the proposed PD-R zoning district is comparable to those presently located on nearby properties. Areas to the east, south, and north of the subject property are developed with residential uses. The proposed Development Areas adjacent to existing development have been so designed so as to provide complimentary character. The lots located along the shared property line (in Development Area C) have been increased in size by 50% to address compatibility concerns. In addition, a 50' buffer area (Development Area E) has been provided between these lots and existing adjacent residential and agricultural properties.

(4) *Development Phasing Plan*

If there are phases of development proposed for the PD, a development phasing plan shall be provided for the PD Master Plan that identifies the general sequence or phases in which the land is proposed to be developed, including how residential and non-residential development will be timed, how infrastructure and open space will be provided and timed, and how development will be coordinated with the City's capital improvements program. The phasing plan shall be established at the time of approval of the PD Master Plan. It is permissible for a development phasing plan to include only one phase.

Evaluation: The proposed development may be constructed in one or more phases. Each phase would be required to meet the conditions created by the Planned Development Ordinance, the PD Master Plan, and applicable standards of the City's Comprehensive

Plan and Land Development Regulations. The PD Master Plan shall be valid for a period of ten years.

(5) *Conversion Schedule*

The PD Master Plan may include a conversion schedule that identifies the range of conversion that may occur between different types of residential uses and between different types of non-residential uses (i.e., residential to residential, or non-residential to non-residential) within the PD Master Plan. These conversions may occur within development areas and between development areas, as long as they occur within the same scheduled phase of development in the development phasing plan, and are consistent with established ranges of conversion set down in the conversion schedule.

Evaluation: No conversion scheduled is proposed.

(6) *Public Facilities*

(a) The PD Master Plan shall include a transportation component that demonstrates there is or will be adequate capacity concurrent with impacts of development on the City's road system to accommodate the development proposed in the PD Master Plan.

Evaluation: The PD Master Plan identifies the location of transportation facilities within the project. In addition, the PD Master Plan calculates the number of trips which would be generated by the proposed development and identifies the project's impact on the three (3) roadway segments affected by this project and monitored for concurrency CR235 (from NW 143rd Place to South City Limit), CR235A (from SR235 to West City Limit), and CR2054 (CR235A South(from US 441 to CR235).

(b) The PD Master Plan shall include a potable water and wastewater component that demonstrates adequate capacity for potable water and wastewater is available or will be available concurrent with impacts of development at the time development occurs to accommodate the development proposed in the PD Master Plan.

Evaluation: The PD Master Plan requires on-site potable water and wastewater facilities to be in public right-of-ways and/or dedicated easements along internal right-of-ways. In addition, the PD Master Plan identifies the project's impact on the water and wastewater systems. This analysis indicates that the project's impacts to potable water and sanitary sewer facilities is acceptable, and would not degrade the Level of Service (LOS) Standard for potable water and sanitary sewer facilities to an unacceptable level. A final determination of facility capacity availability and a concurrency reservation will be made during the final subdivision plat review stage.

(c) The PD Master Plan shall include a parks component that demonstrates that adequate parks and recreation facilities are available or will be available

concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

Evaluation: The PD Master Plan identifies the project's impact on the recreational facilities. This analysis indicates that the project's impact to recreational facilities is acceptable, and would not degrade the Level of Service (LOS) Standard for recreational facilities to an unacceptable level. A final determination of facility capacity availability and a concurrency reservation will be made during the final subdivision plat review stage.

(d) The PD Master Plan shall include a solid waste component that demonstrates that adequate capacity for solid waste is available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

Evaluation: The PD Master Plan identifies the project's impact on the solid waste facilities. This analysis indicates that the project's impact to solid waste facilities is acceptable, and would not degrade the Level of Service (LOS) Standard for solid waste facilities to an unacceptable level. A final determination of facility capacity availability and a concurrency reservation will be made during the final subdivision plat review stage.

(e) The PD Master Plan shall include a stormwater component that demonstrates that adequate capacity for treatment of stormwater runoff is available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

Evaluation: The applicant has identified the location of development areas where stormwater facilities on the PD Master Plan. All stormwater management facilities shall be designed to comply with the regulations of the City of Alachua and Suwannee River Water Management District (SRWMD). Stormwater management areas shall not be permitted within Development Area E.

(7) ***Planned Development Agreement***

Concurrent with the approval of the adopting ordinance for the PD zone district designation and the PD Master Plan, a PD Agreement shall be established binding the PD to any conditions placed in the adopting ordinance and PD Plan. The PD Agreement shall include, but not be limited to:

(a) The PD Master Plan including any PD Standards.

Evaluation: The PD Master Plan will be included as an exhibit to the PD Agreement. PD Standards and conditions of the development will be incorporated into the PD Ordinance (a draft of which is attached to this report in Exhibit "B"). The PD Ordinance will be attached as an Exhibit to the PD Agreement.

(b) Conditions related to the approval of the PD Master Plan.

Evaluation: Conditions related to the approval of the PD Master Plan will be incorporated into the PD Ordinance which will be attached as an Exhibit to the PD Agreement.

(c) Conditions related to the form and design of development in the PD.

Evaluation: Conditions related to the form and design of development in the PD are provided in the PD Master Plan, which will be included as an Exhibit to the PD Agreement.

(d) Provisions addressing how transportation, potable water, wastewater, stormwater management, park, and other public facilities will be provided to accommodate the development proposed for the PD Master Plan, and if phased, how public facilities will be phased accordingly.

Evaluation: Provisions addressing how transportation, potable water, wastewater, stormwater management, parks, and other public facilities will be provided to accommodate the development are provided in the PD Master Plan as well as in the conditions recommended by Staff, attached as Exhibit "A" to this report. The conditions of the development will be incorporated into the PD Ordinance. These documents will be included as Exhibits to the PD Agreement.

(e) Provisions related to environmental protection and monitoring.

Evaluation: For more information please see the Environmental Conditions and Site Suitability Analysis found above.

Conditions 3, 4, 5, 6, 7 and 8 all provide for provisions related to environmental protection. These provisions include the applicant providing a listed species and habitat survey as part of any Final PD Plan (Condition 3), the developer removing and destroying all Category I and II exotic plants species and assuring a long term exotic plants management plan is in place (Conditions 5 and 6), prohibiting the planting of any invasive plant species (Condition 7), and ensuring that the development utilizes best management practices to avoid flooding and erosion (Condition 8).

(f) Provisions addressing concurrency compliance requirements.

Evaluation: Concurrency will be reevaluated at the time of review of each Final PD Plan and final subdivision plat.

(g) Any other provisions the City Commission determines is relevant and necessary to implement the terms and conditions of the PD Master Plan and any PD terms and conditions statements.

Evaluation: Staff's recommended conditions are provided in Exhibit "A" to this report.

PLANNED DEVELOPMENT – RESIDENTIAL (PD-R) STANDARDS

Section 3.6.3(A) of the Land Development Regulations (LDRs) establishes additional standards for the Planned Development – Residential (PD-R) district. The application has been reviewed for compliance with the standards of the aforementioned section. Staff's evaluation of the application's compliance with the applicable standards of Section 3.6.3(A) is provided below.

(1) *Minimum Area*

A PD-R District shall be a minimum of 10 acres in area. The City Commission may waive the minimum size requirement based on a finding that creative site planning through zoning to a PD-R District is necessary to address a physical development constraint, protect sensitive natural areas, or promote a community goal when more conventional development or subdivision would be difficult or undesirable given the constraints on development.

Evaluation: The proposed PD-R district is approximately 118.2 acres in area, exceeding the minimum 10 acre size requirement.

(2) *Uses*

The uses allowed in the PD-R District are identified in Table 4.1-1, *Table of Allowed Uses*. Allowed uses are subject to any use regulations applicable to the PD-R District.

Evaluation: The allowable uses are identified on the PD Master Plan, and comply with the uses allowed within the PD-R district as identified in Table 4.1-1.

(3) *Densities/Intensities*

The densities for residential development and the intensities for non-residential development for the PD Master Plan and PD-R District designation shall be established in the PD Master Plan, and shall be consistent with the Comprehensive Plan. Densities and intensities may exceed that allowed in the base zone district(s) being replaced by the PD designation.

Evaluation: The density of the residential development area is established on the PD Master Plan. The density identified on the PD Master Plan is consistent with the existing Moderate Density Residential Future .

(4) *Dimensional Standards*

The dimensional standards of the underlying base zone district being replaced by the PD-R District shall be incorporated into the PD Master Plan and apply to each development area of the PD-R District unless they are modified in ways that are consistent with the general intent and goals for development of the PD-R District and the scale and character of development in the City. Dimensional standards shall include the following:

(a) *Minimum Dimensional Requirements*

The minimum lot area, minimum lot width, minimum setback, maximum lot coverage, and maximum height for development.

Evaluation: The minimum lot area, minimum lot width, minimum setbacks, maximum lot coverage, and maximum height for development within each development area are identified on the PD Master Plan.

(b) *Setbacks from Adjoining Residential Uses*
Minimum setbacks or buffers from adjoining residential development or zone districts.

Evaluation: The PD Master Plan establishes the minimum setbacks for development within the subject property. A 50' separation is shown from lots in Development Area C and any adjacent existing residential lots.

(5) *Development Standards*
Unless otherwise specifically modified by a PD Master Plan, development in a PD-R District shall comply with the applicable standards Article 6: *Development Standards,* and Article 7: *Subdivision Standards*. All modifications to a development standard in Article 6 or Article 7 shall be consistent with this section, and shall be included as a part of the PD Master Plan.

(a) *General Development Standards*
Table 3.6-1, *Development Standards Applicable in the PD-R District*, specifies the development standards applicable to development in the PD-R District, and the procedure for modifying a development standard.

TABLE 3.6-1: DEVELOPMENT STANDARDS APPLICABLE IN THE PD-R DISTRICT

Development Standard	Procedure for Modification [1]
Off-Street Parking and Loading (Section 6.1)	Inclusion in a Master Parking Plan
Landscape/Tree Protection (Section 6.2)	Inclusion in an Alternative Landscaping Plan
Exterior Lighting (Section 6.4)	Inclusion in a Master Lighting Plan
Signage (Section 6.5)	Inclusion in a Master Sign Plan
Open Space (Section 6.7)	Modifications prohibited
Environmental Protection (Section 6.9)	
Concurrency Management (Section 2.4.14)	
NOTES: [1] Development standards shall only be modified in ways that are consistent with the general intent and purpose for the PD-R District.	

Evaluation: The applicant has not proposed any modifications to the development standards identified in Table 3.6-1. At the time of each Final PD Plan, the applicant shall be required to comply with all applicable standards of Article 6, Development Standards.

(b) *Public Facilities Standards*

The PD Master Plan shall ensure that impacts from the development are addressed for the following public facilities:

Potable Water

The PD Master Plan shall establish the general location of on-site potable water facilities and how they will connect to the City's potable water system consistent with City laws, and how dedication of land, easements, and/or on-site construction of all potable water facilities/ improvements will occur in a manner that complies with City laws.

Wastewater

The PD Master Plan shall establish the general location of on-site wastewater facilities and how they will connect to the City's or other wastewater lines and mains and sewer interceptor lines consistent with City laws, and how dedication of land, easements, and/or on-site construction of all wastewater facilities/ improvements will occur in a manner that complies with City laws.

Streets

The PD Master Plan District shall establish the design of public streets within the PD-R in ways that comply with all applicable City standards, except that right-of-way, pavement widths, street widths, required materials, turning radii, and other design standards may be modified or reduced by the City Commission where it is found that:

a. The reduction or modification is necessary as a traffic-calming measure;

b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;

c. Access for emergency service vehicles is not substantially impaired;

d. Adequate off-street parking is provided for the uses proposed; and

e. Adequate space for public utilities is provided within the right-of-way.

Stormwater

The PD Master Plan District shall establish the design of a stormwater management system within the PD-R in ways that comply with all applicable City standards.

Other

The PD Master Plan shall establish the responsibility of the landowner/developer for providing right-of-way and easements and for constructing on-site facilities for all other infrastructure located on the site of the proposed PD-R District, including but not limited, electrical utility

lines, telephone lines, cable TV lines, or the underground conduit for such features. The PD Master Plan shall also establish the responsibility of the landowner/developer to make any other improvements as required by City ordinances, to guarantee construction of all required improvements, and, if requested by the City, to dedicate these improvements to the City in a form that complies with City laws. The PD Master Plan shall also specify the ownership, operation, and maintenance provisions for all on-site facilities not dedicated to the City.

Evaluation: As demonstrated within this report, the applicant has sufficiently addressed public facility standards as provided in Section 3.6.3(A)(5)(b)(i)-(iv). The applicant has requested modifications to Article 7 requirements for required subdivision improvements.

Land Development Regulations Section	Summary of Required Improvement Standard	Summary of Proposed Improvement Standard
7.2.3 (B)	Maximum block length of 600'	Where block length of 600' is exceeded a midblock crossing such as a speed table or bulbout must be provided. See condition 14.a of proposed PD Ordinance.

The PD Master Plan provides a note which contains the provisions required by this section, and indicates all on-site facilities not dedicated to the City shall be maintained by a property-owner's association.

PUBLIC FACILITIES IMPACT

The analysis of each public facility provided below represents an analysis of the net change in impacts generated by the proposed FLUM Designation – 472 dwelling units.

At present, the total impacts generated by the amendment are acceptable and are not anticipated to degrade the Level of Service (LOS) of any public facility. If development is proposed in the future, the applicant will be required to provide a comprehensive analysis of the impacts generated by such development upon public facilities. Facility capacity must be available to support the proposed development prior to the issuance of a final development order.

Per Section 2.4.14, amendments to the Future Land Use Map of the Comprehensive Plan are not preliminary development orders. Prior to any preliminary development order, the applicant will need to demonstrate how any deficiencies will be addressed. No final development order can be issued if the development would result in a deficiency for any public facility monitored for concurrency.

Traffic Impact

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2, 3]	Segment Description	Lanes	Functional Classification	Area Type	LOS
11	CR 235 (from NW 143rd Place to South City Limit)	2/U	Major Collector	COMM	D
14	CR2054 West (from SR235 to West City Limit)	2/U	Major Collector	COMM	D
17	CR235A South (from US 441 to CR235)	2/U	Major Collector	COMM	D

1 *Source: City of Alachua Comprehensive Plan, Traffic Circulation Element.*
2 *For developments generating 1,000 trips or greater, affected roadway segments are identified as all those wholly or partially located within · mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater, and all roadway segments for which the proposed development's impacts are 5% or greater on the Maximum Service Volume (MSV) of the roadway [Section 2.4.14(H)(2)(b) of the LDRs].*
3 *FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity*

Table 4. Potential Trip Generation

	Land Use	AADT (Enter/Exit)	AM Peak Hour (Enter/Exit)	PM Peak Hour (Enter/Exit)
Proposed Rezoning	Residential [1]	4,493 (2,246/2,246)	363 (94/269)	481 (307/174)
Potential Trips		4,493 (2,246/2,246)	363 (94/269)	481 (307/174)

1 *ITE Trip Generation (ITE 210). AADT: 9.52 trips per unit = 472 x 9.52 = 4,493 (50% enter/50% exit). PM 1.02 trips per unit = 472 x 1.02 = 418. (64% enter/36% exit). AM: .77 trips per unit = 472 x .77=363 (26% enter/74% exit).*

Table 5. Potential Impact of Affected Comprehensive Plan Roadway Segments

Traffic System Category	11 CR 235 (from NW 143rd Place to South City Limit) [1]	14 CR2054 West (from SR235 to West City Limit)[1]	17 CR235A South (from US 441 to CR235)
Maximum Service Volume[2]	15,120	15,120	15,120
Existing Traffic[3]	5,672	2,930	5,209
Reserved Trips[4]	1,370	53	287
Available Capacity[4]	8,078	12,137	9,624
Potential Impact Generated by Proposed Zoning Amendment[5]	4,493	1,059	2,118
Residual Capacity after Proposed Zoning Amendment[6]	**3,585**	**11,078**	**7,506**
PM Peak Hour Traffic Analysis	11 CR 235 (from NW 143rd Place to South City Limit) [1]	14 CR2054 West (from SR235 to West City Limit)[1]	17 CR235A South (from US 441 to CR235)
Maximum Service Volume[2]	1,359	1,359	1,359
Existing Traffic[3]	539	325	495
Reserved Trips[4]	148	128	31
Available Capacity[4]	672	906	833
Potential Impact Generated by Proposed Zoning Amendment [5]	481	114	227
Residual Capacity after Proposed Zoning Amendment[6]	**191**	**792**	**606**

1 FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity.

2 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.

3 Florida Department of Transportation, District Two, Level of Service Reporting Tool 2019, accessed April 7, 2021

4 Source: City of Alachua January 2022 Development Monitoring Report.

5 Source: Buckholz Traffic Concurrency Study, October 2021.

The application is for a Preliminary Development Order. Concurrency will not be reserved.

Evaluation: As shown in Table 5, affected segments 11,14,17 will not be deficient after the proposed comprehensive plan amendment. Concurrency and impacts to the City's transportation network will be reevaluated when any application for a final development order (final plat).

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity*	2,300,000
Less Actual Potable Water Flows*	1,300,250
Reserved Capacity*	200,907
Potential Potable Water Demand from Proposed Amendment **	127,440
Residual Capacity	**671,403**
Percentage of Permitted Design Capacity Utilized	**70.81%**
Sources: ** City of Alachua January 2022 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 275 gallons/du/ day x 472 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 127,440 gallons per day at build out. This analysis is based on the practicable development potential of 472 residential dwellings that would be permitted by the proposed PD-R Designation Concurrency and impacts to the City's utility systems will be reevaluated at the preliminary plat or site plan review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for potable water facilities, and the impacts are therefore acceptable.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity*	1,500,000
Less Actual Treatment Plant Flows*	677,000
Reserved Capacity*	180,101
Projected Potential Wastewater Demand from Proposed Amendment **	118,000
Residual Capacity	**524,899**
Percentage of Permitted Design Capacity Utilized	**70.60%**
Sources: ** City of Alachua January 2022 Development Monitoring Report* ***City of Alachua Comprehensive Plan Potable Water Level of Service of 250 gallons/du/ day x 472 units*	

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 118,000 gallons per day. This analysis is based on the practicable development potential of 472 residential dwellings that would be permitted by the proposed PD-R Designation. Concurrency and impacts to the City's utility systems will be reevaluated at the preliminary plat or site plan review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for sanitary sewer facilities, and the impacts are therefore acceptable.

Recreational Impacts

Table 8a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	52.87
Reserved Capacity[1]	3.94
Potential Demand Generated by Development[3]	6.14
Residual Recreational Capacity After Impacts	**72.53**

Sources:
1 *City of Alachua January 2022 Development Monitoring Report.*
2 *University of Florida, Bureau of Economic & Business Research, Estimates of Population by County and City in Florida, April 1, 2016; Policy 1.2.b, Recreation Element (Formula: 9,892 persons / [5 acres/1,000 persons])*
3 *US Census Bureau; Policy 1.2.b, Recreation Element (Formula: 2.76 persons per dwelling x 472 dwellings / [5 acres/1,000 persons])*

Table 8b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	11.36 acres
Acreage Required to Serve Demand Generated by Development[2]	1.23 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	12.59 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**36.16 %**

1 *Source: City of Alachua January 2022 Development Monitoring Report.*
2 *Formula: Recreation Demand Generated by Development (6.14 acres) x 20%.*
3 *Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 6.14 recreational acres, and for passive park space by 1.23 acres. Concurrency and impacts to the City's recreation system will be reevaluated at the preliminary plat review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of recreational facilities; therefore, the impacts are acceptable.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Lbs Per Day	Tons Per Year
Existing Demand[1]	42,296	7,719.02
Reserved Capacity[2]	17,754.19	3,240.14
Projected Solid Waste Demand from Application[3]	4,909	895.9
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
1 *University of Florida, Bureau of Economic & Business Research, Estimates of Population by County and City in Florida, April 1, 2016; Policy 2.1.a, CFNGAR Element (Formula: 10,470persons x 0.73 tons per year)*
2 *City of Alachua January 2022 Development Monitoring Report*
3 *Policy 2.1.a, CFNGAR Element (Formula: .73 tons x 472 dwellings)*
4 *New River Solid Waste Facility, April 2021*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 895.9 tons per year. Concurrency and impacts to the solid waste system will be reevaluated at the preliminary plat or site plan review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of solid waste facilities; therefore, the impacts are acceptable.

Public School Impact

The School Board of Alachua County (SBAC) has not issued a School Capacity Review determination for the proposed amendment. A determination will be required prior to issuance of any final development order in accordance with the City's Comprehensive Plan, specifically Policies 1.1.b, 1.1.c, 1.1.e, and 1.1.f of the Public School Facilities Element. At this time, it is anticipated that the proposed amendment will result in a demand of 145 total student stations (70 for elementary, 33 for middle, and 42 for high school). The School Board of Alachua County provided a determination on February 28, 2022 that the school capacity would remain sufficient at build out of this project.

Any future determination must find that the students generated by the proposed amendment can be reasonably accommodated for the five, ten, and twenty year planning periods at the elementary, middle, and high school levels.

Upon submittal of any final subdivision plat or site plan, the development will be subject to a concurrency review and determination of the availability of school capacity at the time of such review.

SITE SPECIFIC AMENDMENT TO THE OFFICIAL ZONING ATLAS

SAVANNAH STATION PHASE 3 – PLANNED DEVELOPMENT RESIDENTIAL (PD-R)

STAFF REPORT

1. The development shall consist of single-family detached, single family attached, community recreation, and stormwater/open space development areas as shown on the PD Master Plan. The density, intensity, allowable uses, acreage, and dimensional standards, where applicable, for each Development Area are as follows:

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD
Development Area 'A' 8 du/acre	Single Family Detached Residential on Platted Lots, Community Amenity Center, Pedestrian Pathways, Stormwater Drainage Areas	311 dwelling units[1] 2,500 square feet for neighborhood amenity center	±42.30	*Minimum Lot Area* 4,000 square feet *Minimum Lot Width* 40 feet *Setbacks* Front (Primary) = 10' Side = 5' Rear=5' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' Amenity Center Front (Primary) = 20' Side = 10' Rear=10' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 60%	±40.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards		Percentage of PD
				Minimum Parking Spaces 2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines		
Development Area 'B' 9du/acre	Single Family Detached on Platted Lots, Community Amenity Center, Single Family Attached on Platted Lots, Pedestrian Pathways, Stormwater Drainage Areas	106 dwelling units 2,500 square feet for neighborhood amenity center	±11.4	**Single Family Detached** *Minimum Lot Area* 4,000 square feet *Minimum Lot Width* 40 feet *Setbacks* Front (Primary) = 10' Side = 5' Rear=5' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' Amenity Center Front (Primary) = 20' Side = 10' Rear=10' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 60% *Minimum Parking Spaces*	**Single Family Attached** *Minimum Lot Area* 1,800 square feet *Minimum Lot Width* 18 feet *Setbacks* Front (Primary) = 10' Side (end unit/lot)= 5' Side (all other lots/units) = 0' Rear=5' Garage Face =18' Accessory Structure Side = 5' Rear=0' Amenity Center Front (Primary) = 20' Side = 10' Rear=10' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 75%	±10.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards		Percentage of PD
				2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	*Minimum Parking Spaces* 2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	
Development Area 'C' 0 du/acre	Single Family Detached Residential on Platted Lots, Amenity Center, Pedestrian Pathways, Stormwater Drainage Areas	28 dwelling units	±4.7	*Minimum Lot Area* 6,000 square feet *Minimum Lot Width* 60 feet *Setbacks* Front (Primary) = 10' Side = 5' Rear=12' Garage Face =18' Accessory Structure Side = 2.5' Rear=2.5' *Maximum Building Height* 45 feet *Maximum Lot Coverage* 60% *Minimum Parking Spaces* 2 per unit **Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines		±4.00%
Development Area 'D' 0 du/acre	Single Family Detached Residential on Platted Lots, Amenity Center, Pedestrian Pathways,	27 dwelling units	±4.5	*Minimum Lot Area* 4,000 square feet *Minimum Lot Width* 40 feet		±4.00%

Maximum Development Area & Density/ Intensity	Allowable Uses[1]	Maximum Potential Development	Acres	Dimensional Standards	Percentage of PD

Development Area 'E' 0 du/acre	Buffer Pedestrian Pathways, Stormwater Drainage Areas	N/A	±5.5	N/A	±5.00%
Development Area 'F' 0 du/acre	Common Area/ Open Space/ Stormwater Management Facilities	N/A	±33.9	**Stormwater Management Facilities** 5' from property lines **Pedestrian Trails (Paved or Unpaved)** 7.5' from property lines	29.00%
Development Area 'G' 0 du/acre	Roadways, Utilities, Parking, Driveways, Bicycle & Pedestrian Pathways, Signage, and Supportive Infrastructure Improvements	N/A	±15.9	**Streets** Minimum Right-of-Way Width - 50 feet Minimum Wearing Surface - 24 feet	13.00%
1 Development Area A maximum units may be increased up to 379 by reduction in maximum units within Development Areas B, C, and D. Maximum number of units shall not exceed 472 for the Project.					

2. The Project shall be developed in one or more phases. The Planned Development Ordinance and Agreement shall be valid for 10 years from the date of final approval by City Commission.

3. The applicant shall provide a listed species and habitat survey as part of any Final PD Plan for the Project. The survey shall document if any listed species are observed on the Property. If a listed

species is observed on the Property, the updated survey shall provide recommendations to address potential impacts to the listed species and to identify any permitting requirements of any local, State, or Federal governmental agencies. Any submitted listed species and habitat survey shall be acceptable to the City for a period of no more than three years from the original date of the survey.

4. If any wetlands are identified on the Property described in Exhibit "A", such areas shall be field-delineated using professionally accepted methodology. All development in and/or near wetland areas shall be consistent with the City's Comprehensive Plan and in compliance with the City's LDRs, as may be amended from time to time, and shall grant conservation easements or other appropriate protective mechanisms, as determined by the City, to protect wetland areas. Any submitted wetlands delineation shall be acceptable to the City for a period of no more than three years from the original date of the delineation.

5. All Final PD Plans shall be consistent with the Goals, Objectives, and Policies of the Comprehensive Plan, as it may be amended from time to time, including, but not limited to those Goals, Objectives, and Policies related to the eradication of invasive exotic plant species.

6. The Owner, or its successors and/or assigns, shall, concurrent with development of the Project, remove and destroy all Category I and II exotic plant species, as published in the most current version of the Florida Exotic Plant Council's List of Invasive Plant Species, located on the Property described in Exhibit "A". Thereafter, the Owner, or its successors and/or assigns, shall assure long-term implementation of an exotic plants management plan approved with the new final development order and which shall be included in covenants and restrictions to be implemented by a properly structured property owner's association or other mechanism acceptable to the City.

7. The planting of any species identified in the most current version of the Florida Exotic Pest Plant Council's List of Invasive Plant Species shall be prohibited. Grasses and sods shall be certified free of noxious weeds by the Florida Department of Agriculture and Consumer Services, Division of Plant Industry.

8. The Owner, or its successors and/or assigns, shall utilize methods of minimizing impacts, such as appropriate Best Management Practices of the Suwannee River Water Management District, in order to reduce the potential for flash flooding, to avoid adverse impacts to water quality, and to incorporate existing drainage patterns to the greatest extent practicable. Upon approval from the City of Alachua and the Suwannee River Water Management District, enhancements may be permitted to the existing, natural conveyance system to mitigate for existing erosion and sedimentation, restoration of historical erosion and sedimentation damage, and preventing future adverse erosion and sedimentation.

9. A Final PD Plan consists of development requiring Preliminary Plat (single family detached on platted lots) review. The Owner, or its successors and/or assigns, shall submit a utility system plan as part of the Construction Plans for the proposed subdivision or site plan.

10. Development on the Property described in Exhibit "A" shall be consistent with PD Master Plan for the Project, and includes the following requirements:

    a. The ingress/egress points to the Property described in Exhibit "A" shall be located as depicted on the PD Master Plan. The design of all proposed roadways shall be consistent with the applicable standards of Article 7 of the City's LDRs and the City's Design and Construction Requirements (latest edition at the time of review of Construction Plans) and the PD Master Plan drawing. The design of the proposed roadway shall be reviewed and

approved as part of Construction Plans submitted for the subdivision review process, as further defined in Section 2.4.10 of the City's LDRs. Shifts of less than 50' shall be permitted as minor deviations from the approved PD Master Plan per Section 2.4.3 (D)(8) of the City's LDRs.

b. The Owner, or its successors and/or assigns, shall design, obtain all applicable permits, and construct a stormwater management system necessary to serve the development. Stormwater management facilities shall be constructed concurrent with development of the Project. Sufficient stormwater capacity consistent with Section 6.9.3 of the City's LDRs must be provided concurrent with site improvements of the Project. On-site soil shall be appropriately prepared so as to alleviate any drainage issues.

c. Utilities shall be extended throughout the Project within areas designated as public right-of-ways, where practical. Utility infrastructure which must run outside the right-of-way, and which will be maintained by the City, shall be located in easements approved and accepted by the City granting access and maintenance of such infrastructure.

d. The Owner, or its successors and/or assigns, shall be responsible for the provision of infrastructure for the Project. This shall include all on-site improvements and off-site improvements, including transportation infrastructure improvements, deemed necessary to support the development by the City in the City's sole discretion. Offsite improvements, including transportation infrastructure improvements deemed necessary by the City, shall be consistent with City's Comprehensive Plan and Land Development Regulations in existence at the time of the proposed development requiring the infrastructure, and shall be supported by appropriate data and analysis that identifies a specific impact from the proposed development. If offsite improvements are required by the City, it shall be limited to the areas or infrastructure impacted by the proposed development. The data and analysis used to justify the requirement for offsite improvements will be provided by traffic study data, reports, or other infrastructure analysis that identifies the development's impact on the affected infrastructure, and determines a reasonable proportional impact from the proposed development. The data and analysis will be provided by the Developer and reviewed by the City. The Developers shall pay for any consultants or experts the City deems necessary to review the data and analysis provided by the Developer.

e. Facilities constructed on-site that are not dedicated to the City for maintenance shall be the responsibility of a legally established property owners' association. The property owners' association shall have the responsibility of maintenance of all common areas. In the event that common areas and required open space areas, as mandated by Sections 6.7.6, 6.9.3(E)(2), and 7.8.1 of the City's LDRs, or any amendments thereto, are not owned by a property owner's association, such areas shall be burdened by an easement that requires a property owner's association or another entity approved by the City to maintain such areas, and that restricts such areas in accordance with the City's requirements for such areas.

11. Electric System Requirements:

a. The Owner, or its successors and/or assigns, shall be responsible for all costs associated with connection to the electric system of the electric service provider as necessary to serve the Project.

12. Water System Requirements:

a. The Owner, or its successors and/or assigns, shall be responsible for all costs associated with connection to the City's potable water system as necessary to serve the Project.

b. Water systems shall be designed to provide fire flow rates that conform to the current standards of the Florida Fire Prevention Code, Chapter 633, Florida Statutes, and the Florida Building Code.

13. Wastewater System Requirements:

a. The Owner, or its successors and/or assigns, shall be responsible to design, permit, and construct wastewater main extensions and any other improvements, including but not limited to any lift station required and necessary to serve the Project.

14. Pedestrian and Street Improvements:

a. The Owner, or its successors and/or assigns, shall be responsible to design, obtain all applicable permits, and construct all pedestrian and street improvements in accordance with Section 7.3, *Required Improvements*, Section 7.2.3, *Block Standards,* and any other pertinent section of the City's LDRs subject to the following:

i. Block lengths may exceed 600 feet when all of the following conditions are met:

1. An easement or common area permitting pedestrian access through blocks longer than 600 feet is provided. This easement or common area shall be a minimum of 20 feet in width and recorded in the Public Records of Alachua County.

2. Where these means of pedestrian access intersect with any rights-of-way, a pedestrian crossing shall be provided across the right-of-way that includes one or more of the following elements intended to serve as traffic calming and clearly delineate pedestrian space: change in materials, bulb-outs, or a raised pedestrian crossing.

3. Any easement intended for pedestrian access through a block shall be improved with concrete, brick pavers, asphalt or similar hard material.

4. In no instance, shall a block length or length of travel through an easement exceed 1000 feet.

ii. Pavement widths may not be less than 24 feet.

iii. A minimum 5 foot wide sidewalk shall be provided on both sides of all public streets.

15. The Owner, or its successors and/or assigns, shall submit a landscaping and buffering plan as part of any Final PD Plan. The landscaping and buffering plan shall meet the requirements established by the adopted PD Master Plan, Section 6.2.2, Landscaping Standards or Section 6.3, Fencing Standards, of the City's LDRs, or any amendments thereto.

16. The Owner, or its successors and/or assigns, shall submit an open space plan as part of any new Final PD Plan. The open space plan shall meet the minimum requirements established by Section 6.7, *Open Space Standards*, of the City's LDRs, or any amendments thereto.

17. Open spaces and conservation areas shall account for a minimum of ten percent (10%) of the complete project.

18. The Owner, or its successors and/or assigns, shall obtain all applicable permits from the Suwannee River Water Management District, Alachua County Public Works, the Florida Department of Environmental Protection, the Florida Fish and Wildlife Commission, and any other Federal, State, or Local agency before the commencement of any development in the Project.

19. Any Final PD plan shall include detailed geotechnical mapping and evaluation to identify and address any potential karst features or active ground loss areas.

20. The Final PD Plan shall be a Preliminary Plat for single-family detached or single family attached, the City's Comprehensive Plan, and the City's LDRs. The Final PD Plan shall also adhere to all requirements of the PD Master Plan and the PD Agreement for this Project.

21. Any Final PD Plan shall include the exact number of residential dwelling units, as well as precise information regarding the layout of open space, circulation, and stormwater management.

22. A valid Planned Development Agreement shall be adopted concurrent with the approval of this ordinance and the PD Master Plan.

23. The development parameters defined herein do not inordinately burden the development of the Property described in Exhibit "A", the PD, or the Project.

24. The rezoning of the Property described in Exhibit "A" does not reserve concurrency for the Project.

25. The adoption of this Ordinance does not guarantee the approval of any development permits, including but not limited to, a Preliminary Plat, Construction Plans, Site Plan or a Final Plat for the Project, or for any part or section thereof, for the Owner/Developer or its successors or assigns.

26. All development, including but not limited to any Final PD Plan for the Project, shall be governed by the laws, regulations, comprehensive plan and ordinances in effect at the time of the specific proposed development, and not as of the date of this ordinance.

RE: Notice of Hearing to be Scheduled for Savannah Station Phase 3 PD-R Rezoning

Dear Mr Thompson:

On February 15, 2022 the City of Alachua received your updated applications for the above referenced projects.

Based on review of the materials submitted, the City has determined that these applications can now be scheduled for a hearing before the Planning and Zoning Board.

You must provide two (2) *double-sided, three-hole punched, color sets* of each **complete** application package, seven (7) full size sets of site plans, and a digital copy of all materials in PDF format on a CD *no later than 10 business days prior to the PZB Meeting at which your application is scheduled to be heard.* The application has been scheduled for the **March 8, 2022** Planning and Zoning Board meeting; therefore, the above referenced materials must be submitted to the City no later than ***Tuesday, February 22, 2022.*** Materials may be submitted earlier than this date.

In addition, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing. Therefore, posted notice signs must be placed on the property no later than Thursday, February 17, 2022, as City Hall be closed on Monday, February 21, 2022. These signs will be ready for pick up after 12 PM on Thursday, February 17, 2022.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than 12:00 PM on the last business day prior the PZB meeting (no later than Monday, February 7, 2022).Any presentation or materials may be submitted by emailing them to planning@cityofalachua.com .

Should you have any questions, please feel free to contact me at (386) 418-6100, ext. 1603 or via email at ahall@cityofalachua.com.

Sincerely,

Adam Hall, AICP
Principal Planner

February 28, 2022

RE: ACPS – Savannah Station Phase III

Alachua County Public Schools ("ACPS") has received notification of a Comprehensive Plan Amendment (CPA) and rezoning within the City of Alachua. The project encompasses 118.2 acres identified as Parcel 03980-002-001 This project is reviewed in accordance with *Objective 1.1: of the City of Alachua County Comprehensive Plan* and *Section 6 of the Alachua County Public School Interlocal Agreement*.. The proposed amendment will entitle 472 single family units.

Pursuant to Chapter 1003, Florida Statutes, the School Board is charged with the operation and control of public K-12 education within the Alachua County School District. Its responsibilities include school facility planning, construction, maintenance, and student assignment to maintain adequate and efficient utilization of educational facilities.

Please be advised that the School Board may be launching a district wide evaluation of its capital investment priorities and policies and its student assignment policies. This review will involve an examination of school capital financing and the allocation of present and future funds among new construction, renovation and maintenance as required to maintain a uniform level of service throughout the District.

This evaluation will involve a comprehensive review of all public schools, including their attendance zones and the educational programs offered. As a result of anticipated redistricting, areas of the County and the towns/cities currently zoned for a school may no longer be zoned for the same school when the redistricting process is completed. Any new residential development located in an existing school zone is not guaranteed to remain in that same zone after the redistricting process is completed. It is anticipated that a new school zoning plan will be in place for the start of the 2023-2024 school year.

Additionally, please be advised that many of Alachua County Public Schools do not have adequate space for additional students.

The Santa Fe High School CSA currently accommodates an enrollment of 1,193 high students and is operating at 84% of its permanent capacity of 1,414 student stations. At buildout, this project is projected to generate 42 high students. High school capacity is projected to remain adequate during the five year and ten year planning periods.

The **Mebane Middle School CSA** currently accommodates an enrollment of 339 middle students and is operating at 43% of its permanent capacity of 796 student stations. At buildout, this project is projected to generate 28 middle students. Middle school capacity is projected to remain adequate during the five year and ten year planning periods.

The **Northwest Alachua Elementary CSA** currently accommodates an enrollment of 1,307 elementary students and is operating at 80% of its permanent capacity of 1,639 student stations. At buildout, this

project is projected to generate 57 elementary students. Elementary school capacity is projected to remain adequate during the five year and ten year planning periods.

A resolution of capacity issues within the District will not be clear until the comprehensive evaluation noted above has been completed. To facilitate a satisfactory and long term solutions, it is recommended that the City encourage developers to contribute to the expansion of educational facilities through "Capacity Enhancement Agreements" (refer to ILA Section 6.5).

If you have additional questions please contact Suzanne Wynn, Director of Community Planning @ 352-955-7400 x 1445

Sincerely,

FOR Supt.

RE: Project Assistance Team (PAT) Comments for Savannah Station Phase III Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to Planned Development – Residential (PD-R)

Dear Mr Thompson:

On February 3, 2022 the City of Alachua received your revised application for a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to Planned Development – Residential (PD-R), which proposes to amend the zoning of the subject property from Agricultural (A) to PD-R on a ±118.19 acre property, consisting of Tax Parcel Number 03980-002-001. A project assistance team meeting was held on September 23, 2021 to discuss the application.

The application has been reviewed for compliance with the applicable review standards, including the City's Comprehensive Plan and Land Development Regulations (LDRs). Based upon Staff's review, revisions must be made to the application before it may be scheduled for a public hearing before the City's Planning & Zoning Board (PZB). Please address all insufficiencies outlined below in writing and provide an indication as to how they have been addressed by 5:00 PM on Thursday, March 3, 2022. A total of four (4) copies of the complete application package (i.e., all application materials and attachments) and a CD containing a PDF of all application materials must be provided by this date. Submission of an incomplete package may delay your tentative hearing at the Planning and Zoning Board. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the PZB. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time.

Please address the following insufficiencies (begins on next page):

Deficiencies to be Addressed

Unless otherwise noted, references to code Sections refer to City of Alachua Land Development Regulations.

1. *PD Master Plan: Compliance with Applicable LDR Provisions*
    c. Section 3.6.2 (A)(1)(b), Master Plan identifies amenity center as potential use in Development Areas A through D, however does not identify maximum intensity (in square feet). Additionally, Development Area A is adjacent to large single family development and an amenity center may not be an appropriate adjacent to these uses. A separate development area should be created that precludes amenity center from being located adjacent to those existing uses.

    New Comment: Propose PD Master Plan indicates that the Amenity Center would be permitted in Development Area C. This area is not appropriate for this use as it is adjacent to eastern property boundary. Please revise to remove Amenity Center as permitted within Development Area C.

    g. Section 3.6.3 (A)(4) Dimensional Standards. Rear setback of 5 feet is not compatible with surrounding properties. Lots located along south and east property lines should have a minimum rear setback of 30'. A separate development area should be created with this new rear setback.

    New Comment: Rear setbacks for Development Area C and for Lots along southern property boundary must be a minimum of 15'.

3. *Consistency with City's Land Development Regulations*
    c. Section 3.6.1 (A) identifies a general purpose of the PD district is to promote environmentally sensitive development. A substantial tree line exists along western right-of-way line. A 25' landscaped buffer intended to preserve existing tree line along CR235 is required. This buffer area may include the screening required under Section 6.2.3 (E), Arterial frontage.

    New Comment: Proposed landscape buffer along CR235 must be shown on PD Master Plan.

4. *Concurrency Impact Analysis*
    a. Provided concurrency impact analysis references impacts to CR235A North roadway segment, but description and actual impacted roadway is CR235A South. Please correct references to CR235A North on Page 6 and 7 of Justification Report submitted with application.

    New Comment: Page 7 of Justification Report still references CR235A North, when Staff believes it means to reference CR235A South.

5. *Public Services Comments*
    a. Applicant must acknowledge comments provided by Rodolfo Valladares, P.E., Public Services Director and Tom Ridgik, P.E., Engineering Supervisor, in a memo dated February 10, 2022 (attached).

6. *Miscellaneous*
    a. **New Comment:** While Staff understands the PD Project name may ultimately be different from platted name of any future subdivision, there are concerns regarding the use of the name "Savannah Station" for any future development within the PD as confusion may arise. Acknowledgement only needed.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

RE: Project Assistance Team (PAT) Comments for Savannah Station Phase III Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to Planned Development – Residential (PD-R)

Dear Mr Thompson:

On August 31, 2021 the City of Alachua received your application for a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to Planned Development – Residential (PD-R), which proposes to amend the zoning of the subject property from Agricultural (A) to PD-R on a ±118.19 acre property, consisting of Tax Parcel Number 03980-002-001. A project assistance team meeting is scheduled for September 23, 2021 to discuss the application.

The application has been reviewed for compliance with the applicable review standards, including the City's Comprehensive Plan and Land Development Regulations (LDRs). Based upon Staff's review, revisions must be made to the application before it may be scheduled for a public hearing before the City's Planning & Zoning Board (PZB). Please address all insufficiencies outlined below in writing and provide an indication as to how they have been addressed by 5:00 PM on Thursday, October 7, 2021. A total of four (4) copies of the complete application package (i.e., all application materials and attachments) and a CD containing a PDF of all application materials must be provided by this date. Submission of an incomplete package may delay your tentative hearing at the Planning and Zoning Board. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the PZB. Please note that if Staff determines that the revised submission requires outside technical review by the City, your application may be delayed in order to allow for adequate review time.

Please address the following insufficiencies (begins on next page):

Deficiencies to be Addressed

Unless otherwise noted, references to code Sections refer to City of Alachua Land Development Regulations.

1. *PD Master Plan: Compliance with Applicable LDR Provisions*
    a. Section 3.6.2 (A)(1)(a), General Note 1 of Master Plan states that single family attached dwelling units with up to 8 families per building may be allowed within Development Area A. Development Area A appears to be intended for single family detached dwellings, and Development Area B appears to be intended for single family attached dwellings. Please verify.
    b. Section 3.6.2 (A)(1)(b), Master Plan does not identify number of total residential units permitted under each Development Area. Master Plan does not provide residential densities under each Development Area. Please revise.
    c. Section 3.6.2 (A)(1)(b), Master Plan identifies amenity center as potential use in Development Areas A through D, however does not identify maximum intensity (in square feet). Additionally, Development Area A is adjacent to large single family development and an amenity center may not be an appropriate adjacent to these uses. A separate development area should be created that precludes amenity center from being located adjacent to those existing uses.
    d. Per Section 3.6.2 (A)(3), the PD Master Plan must ensure development along the perimeter of the PD District is compatible with adjacent existing or proposed future development. Complimentary character shall be identified based on densities/intensities and lot size and dimensions. Lots located along south and east property boundary would be significantly different and incompatible with existing lot sizes. Lots along this boundary should be a minimum a 20,000 square feet with a minimum width of 100'. A separate development area should be created with these new minimum lot sizes and lot widths.
    e. Per Section 3.6.2 (A)(3), the PD Master Plan must ensure development along the perimeter of the PD District is compatible with adjacent existing or proposed future development. Complimentary character shall be identified based on densities/intensities and lot size and dimensions. Lot coverages are significantly different as proposed (75% of lot coverage compared to 20% maximum lot coverage in Agricultural zoning districts). A separate development area should be created with a more compatible lot coverage.
    f. Section 3.6.3 (A)(4) Dimensional Standards. Minimum front setback of 10' presents issues for blocking of sidewalk and pedestrian travel. A minimum garage setback of 18' must be provided in order to provide adequate parking area for vehicles. Remainder of structure at 10' from property line is acceptable.
    g. Section 3.6.3 (A)(4) Dimensional Standards. Rear setback of 5 feet is not compatible with surrounding properties. Lots located along south and east property lines should have a minimum rear setback of 30'. A separate development area should be created with this new rear setback.
    h. Section 3.6.3 (A)(4) Dimensional Standards. Side setback of 5 feet is not compatible with surrounding properties. Lots located along south and east property lines should have a minimum side setback of 15'. A separate development area should be created with this side setback.
    i. Section 3.6.3 (A)(4) Dimensional Standards. Proposed lot coverage area of 75% for Development Area A is incompatible with typical single family residential

development in the vicinity and within the City in general. Revise proposed lot coverage to a maximum of 60% for Development Area A.

j. Section 3.6.3 (A)(4) Dimensional Standards. Proposed lot width is 40' for both single family detached and single family attached. Typically, the single family attached units minimum lot width is 18' to 20'. Please verify requested lot width for attached single family within Development Area B.

k. Section 3.6.3 (A)(4) Dimensional Standards. Minimum lot area for single family attached units are approximately 2,000 square feet. Proposed minimum lot area is 4,000 square feet for single family attached lots within Development Area B. Please verify.

l. Per Section 3.6.3 (A)(5)(b)(iii)c, a 25' stabilized access pathway from NW 110th Avenue must be provided to internal street network. Pathway does not need to be paved, but should be so designed such that an emergency vehicle could utilize as alternative entrance/exit.

m. Per Section 3.6.2 (A)(4), a development phasing plan must be provided. Please indicate timing of provision of needed utility services and stormwater management facilities. Indicate that the amenity center will be permitted at the same time as residential development or after, but not before.

n. Per Section 3.6.2 (A)(4), a development phasing plan must be provided. If the attached single family residential units are permitted using site plan (as townhomes which are multifamily under common ownership) please indicate in phasing plan that an infrastructure plan will be required for utility service and right-of-way access to serve development.

2. *Consistency with City of Alachua Comprehensive Plan Analysis*

a. Page 8 of Justification Report provides analysis of Policy 2.1.a of the City's Future Land Use Element. Analysis states that all units will be single family detached, however, permitted uses under proposed PD Master Plan would allow single family attached units. Please verify and correct.

b. Page 12 of Justification Report provides analysis of Policy 2.4.b of the City's Future Land Use Element. Analysis states that compatibility buffering is not required. This is not necessarily the case as the surrounding uses and lot sizes require buffering consideration. See Comment 1.g above related to this comment.

c. Page 13 of Justification Report provides analysis of Objective 4.1 of the City's Future Land Use Element. Analysis states that the project is located within a developed area. Substantial areas to the south and east of the subject property are not "developed" but rather in active agricultural or silvicultural operations.

3. *Consistency with City's Land Development Regulations*

a. Page 17 of Justification Report provides analysis of Section 2.4.2 (E)(1)(g) of the City's Land Development Regulations. Analysis states that the development will not deviate from the pattern of development as the corridor (CR 235) is predominately residential. Please provide greater detail and address the size of residential lots adjacent to this property, especially to the south and east of the subject property.

b. Page 18 of Justification Report provides analysis of Section 2.4.2 (E)(1)(j) of the City's Land Development Regulations. Analysis references Savannah Station located less than 400 north on CR 235. Please clarify. Phase 3 will be located less

than 400 (feet?) from the existing Savannah Station development? How is this measured?

c. Section 3.6.1 (A) identifies a general purpose of the PD district is to promote environmentally sensitive development. A substantial tree line exists along western right-of-way line. A 25' landscaped buffer intended to preserve existing tree line along CR235 is required. This buffer area may include the screening required under Section 6.2.3 (E), Arterial frontage.

d. Page 20 of Justification Report provides analysis of Section 3.6.2 (A)(1)(g) of the City's Land Development Regulations. Provided master plan does not provide location of all listed facilities. This can be provided in graphical or tabular form. If in tabular form, addresses and travel distances from those facilities to the subject property should be provided.

e. Page 24 of Justification Report provides analysis of Section 3.6.3 (A)(2) of the City's Land Development Regulations. Analysis indicates that only single family detached dwelling units are permitted within proposed PD zoning district, however, listed allowed uses includes single family attached units.

f. Page 24 of Justification Report provides analysis of Section 3.6.3 (A)(4)(b) of the City's Land Development Regulations. Analysis indicates no setbacks or buffers are required between proposed and existing large lot development. A 100' separation of between existing lots and any proposed lots within the subject property must be provided. 25' of the 100' separation must include 25' natural buffer that will only utilized for ingress/egress and for underground potable water, sewer, electrical, or stormwater lines. No grading or tree removal permitted within this buffer area.

g. Per Section 7.3.2 (A), sidewalks are required along both sides of the street given the proposed density of the project. Please revise typical roadway section shown on PD Master plan that shows second sidewalk as optional.

4. *Concurrency Impact Analysis*

   a. Provided concurrency impact analysis references impacts to CR235A North roadway segment, but description and actual impacted roadway is CR235A South. Please correct references to CR235A North on Page 6 and 7 of Justification Report submitted with application.

   b. Provided concurrency impact analysis does not utilize City level of service standard for water concurrency (275 gallons per day per unit). Please correct.

   c. Provided concurrency impact analysis does not utilize City level of service for wastewater concurrency (250 gallons per day per unit). Please correct.

5. *Public Services Comments*

   a. Applicant must respond to comments provided by Rodolfo Valladares, P.E., Public Services Director and Tom Ridgik, P.E., Engineering Supervisor, in a memo dated September 22, 2021 (attached).

6. *Miscellaneous*

   a. Add note as condition of approval: architectural variability standards as set out in Section 4.3.1 (A)(4)(d) are applicable to single family detached dwellings within Phase 3.

b. Add note as condition of approval: design features as required by use-specific standards in Section 4.3.1 (A)(3)(d) are applicable to single family attached, townhome or two to four family dwellings within Phase 3.

c. Add note as condition of approval: regardless of ownership or maintenance of streets, all sidewalks and crosswalks will meet FDOT Design Manual Chapter 222 Pedestrian Facilities, unless otherwise stipulated in the PD Master Plan. This may require revision to street section typical provided in PD Master Plan (minimum sidewalk width should be 6').

d. Add note as condition of approval: an environmental assessment will be required at time of final PD plan/ preliminary plat/ site plan approval that includes a 100% gopher tortoise and burrowing owl survey. A condition will be required that standard measures of protection for Eastern Indigo Snakes, if applicable.

e. Note 5 of the PD Master Plan identifies Development Area C as circulation development area, however, on the map it appears that Development Area D is the circulation development area. Please confirm.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

RE: Completeness Review of Savannah Station Phase III Site-Specific Amendment to the Official Zoning Atlas (Rezoning) to Planned Development – Residential (PD-R)

Dear Mr. Thompson:

On August 31, 2021, the City of Alachua received your application for a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) which proposes to amend the zoning of the subject property from Agricultural (A) to Planned Development – Residential (PD-R) on a ±118.19 acre property, consisting of Tax Parcel Number 03980-002-001.

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned application for completeness and finds that the application is **complete**. Detailed comments will be provided at a later date after the City's Project Assistance Team (PAT) has reviewed the application for compliance with all applicable City standards and regulations.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com.

PLANNED DEVELOPMENT REGULATORY AGREEMENT
FOR SAVANNAH STATION PHASE 3 PLANNED DEVELOPMENT (PD-R) PROJECT

THIS PLANNED DEVELOPMENT REGULATORY AGREEMENT ("PD Agreement") is made as of _____, by and between the **CITY OF ALACHUA, FLORIDA** ("City"), a political subdivision of the State of Florida, and **WACO PROPERTIES, INC.**, Florida corporations, their successors or assigns ("Owner/Developer"). The City and the Owner/Developer may jointly be referred to as the "Parties."

RECITALS

WHEREAS, the Owner/Developer desires to obtain approval for a **Planned Development ("PD")** in the City known as **Savannah Station Phase 3 Planned Development ("PD-R" or "Project")**, which is proposed to consist of ±118.2 acres;

WHEREAS, the Owner/Developer wishes to improve the land comprising the PD-R, the legal description for which is described hereto in Exhibit "A," which is incorporated herein by reference ("Property");

WHEREAS, as part of the approval process for the PD-R, required by the City of Alachua Land Development Regulation Section 2.4.3, an application to rezone the Property from Agricultural ("A") to Planned Development – Residential ("PD-R") has been filed with the City;

WHEREAS, the Planning & Zoning Board, serving as the Local Planning Agency ("LPA"), recommended approval of the proposed rezoning from Agricultural ("A") to Planned Development – Residential ("PD-R") at a quasi-judicial public hearing held on March 8, 2022;

WHEREAS, the City Commission held the first of two required quasi-judicial public hearings on March 28, 2022, to consider the proposed rezoning of the Property pursuant to Ordinance Number 22-10;

WHEREAS, the City and the Owner/Developer desire to proceed to the second and final reading on the proposed rezoning of the Property pursuant to Ordinance Number 22-10;

WHEREAS, concurrent with the second and final reading of the proposed rezoning for the Property, a PD Agreement and a PD Master Plan are required to be approved;

NOW, THEREFORE, in consideration of the foregoing premises, the Parties hereby agree as follows:

1. The above RECITALS are true and correct and incorporated as material portions of this PD Agreement by reference.

2. The Owner/Developer shall plan and construct, at the Owner/Developer's sole expense, the Project according to the specifications set forth in the City's LDRs; Ordinance Number 22-10, which is attached hereto as Exhibit "B" and agreed to by the Owner/Developer; and the PD Master Plan documents, which are attached hereto as Exhibit "C."

3. A **Final PD Plan** for the Project (known as a **Preliminary Plat** for single-family detached or attached residential development) must be submitted to the City within one (1) year from the City Commission's approval of this PD Agreement, Ordinance Number 22-10, and the PD Master Plan, for any part or section of the plan for development shown in the PD Master Plan. If a **Final PD Plan** for the Project is not submitted within the required one (1) year period, it shall result in the expiration of the PD-R zone district classification of the Project. If the PD-R zoning expires, the City shall have the right, but not the obligation, in the City's sole discretion, to conduct any hearings necessary to rezone the lands included within the Project to the previous zoning districts of Agricultural ("A").

4. The Owner/Developer shall construct the Project in accordance with its approved PD Master Plan. Deviations from the PD Master Plan that constitute substantial changes as described in Section 2.4.3 of the City's LDRs must be approved in advance by the City Commission.

5. The approval and execution of this PD Agreement does not guarantee the approval of any development permits, including but not limited to a Preliminary Plat, Construction Plans, Final Plat, or a Site Plan for the Project, or for any part or section thereof, for the Owner/Developer or its successors or assigns.

6. Nothing contained in this PD Agreement shall relieve the Owner/Developer, or its successors, assigns, or anyone acting on the Owner/Developer's behalf, from obtaining all local, regional, state, or federal permits or complying with any applicable ordinance, law, rule, or regulation necessary for the development of the Project. In the event that the Owner/Developer, and its contractors, subcontractors, or anyone for whose acts the Owner/Developer or its contractors or subcontractors may be liable or responsible, fails to comply with any applicable ordinance, law, rule, or regulation and such failure tends to or does pose an imminent threat or danger to life or of great bodily injury to any person, the City, through its City Manager or designee, shall have the right to stop work until appropriate corrective measures are taken, in addition to any other remedies available to the City.

7. The Owner/Developer ,or its successors and/or assigns, shall indemnify and hold harmless the City, and its officers, agents, employees, or anyone acting directly or indirectly on behalf of the City, from and against all claims, damages, losses, and expenses, including reasonable attorney's fees, arising out of or resulting from a loss in the performance of work, down time of equipment, or any claim that may arise from bodily injury, sickness, disease or death, or the injury to or destruction of tangible property, including the loss of use resulting therefrom, caused in whole or in part by a negligent or wrongful act or omission on the part of the Owner/Developer, or its successors and/or assigns, and its contractor, subcontractors, or anyone directly or indirectly employed or working on behalf of the Owner/Developer for whose acts the Owner/Developer, or its contractors or subcontractors, may be liable or responsible. The Owner/Developer, or its successors and/or assigns, further agrees that the Owner/Developer, or its successors and/or assigns, shall not insulate itself from liability or responsibility to the City for a default in or failure to perform any of the terms of this PD Agreement, or from responsibility under the indemnification clause contained herein by employment of independent contractors or subcontractors or other entities. The Owner/Developer, or its successors and/or assigns, shall remain liable to the City notwithstanding any attempt by the Owner/Developer, or its successors and/or assigns, to pass any responsibility stated herein to its contractor, subcontractor, or other agent or employee at all times during the existence of this PD Agreement.

8. The Owner/Developer shall pay all costs for the recording of this PD Agreement, the PD Master Plan, and Ordinance Number 22-10.

9. The City may, in its sole discretion, withhold any and all inspections, permits, certificates, or approvals for the Project if such action is deemed necessary by the City to secure the Owner/Developer's compliance with the terms of this PD Agreement, including all documents attached hereto or referenced herein.

10. Except as otherwise provided in this PD Agreement, any notice, request, or approval from either party to the other party must be in writing and sent by certified mail, return receipt requested; overnight delivery with proof of delivery; or by personal delivery. Such notice shall be deemed to have been received when either deposited in the United States Postal Service mailbox, delivered by the United States Postal Service, delivered to the courier, or personally delivered with a signed proof of delivery. For purposes of notice, the Parties and their respective representatives and addresses are:

City:

City of Alachua
ATTN: Department of Planning & Community Development
P.O. Box 9
Alachua, Florida 32616

Owner/Developers:

Waco Properties, Inc.
569 S. Edgewood Avenue
Jacksonville, FL 32205

11. The Parties each bind the other and their respective successors and assigns in all respects to all of the terms, conditions, covenants, and provisions of this PD Agreement.

12. If any section, sentence, clause, phrase, or provision of this PD Agreement is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this PD Agreement, and the remainder of the PD Agreement after the exclusions of such part or parts shall be deemed to be valid.

13. The failure of any of the Parties to exercise any right in this PD Agreement shall not constitute a waiver of such right in the event of any future default or noncompliance with it.

14. This PD Agreement is entered into by the City pursuant to the City's home rule powers, including police powers, as set forth in the Florida Constitution and the laws of the State of Florida to regulate the development of land. The City and the Owner/Developer expressly acknowledge and agree that this PD Agreement constitutes a regulatory document, and nothing herein, expressed or implied, is intended or shall be construed as establishing a contract upon which a cause of action for breach, monetary damages, or otherwise may be

based. Further, no term or condition of this PD Agreement shall be construed as to proscribe, limit, or affect the ability of the City to enforce its Comprehensive Plan, its Land Development Regulations, or any other authority granted by law with respect to The Project, and nothing herein, expressed or implied, contracts away any of the City's police powers, regulatory authority, and/or immunities.

15. The Parties may amend this PD Agreement only by mutual written agreement of the Parties and including the City Commission.

16. This PD Agreement shall not be construed more strictly against one party than against the other party merely by virtue of the fact that it may have been prepared by one of the Parties. It is recognized that all Parties have contributed to the preparation of this PD Agreement and have had the opportunity to consult with legal counsel before signing it.

17. The Owner/Developer agrees that the terms and requirements of this PD Agreement, PD Master Plan, and Ordinance Number 22-10 do not inordinately burden the Property described in Exhibit "A", the PD, or the Project.

18. This PD Agreement constitutes the entire agreement of the Parties and supersedes all prior written or oral agreements, understandings, or representations.

19. In the event of any question or dispute arising out of or related to this PD Agreement or action to interpret this PD Agreement, the Owner/Developer shall exhaust any and all administrative remedies under the City's Land Development Regulations. Thereafter, Owner/Developer's remedies in filing a lawsuit shall be limited solely to an action for declaratory judgment. In no event shall Owner/Developer have any cause of action for monetary damages against the City for any question or dispute arising out of or related to this PD Agreement or any action to interpret this PD Agreement, and nothing herein, expressed or implied, waives or should be construed as a waiver or attempted waiver by the City of its sovereign immunity under the Florida Constitution and the laws of the State of Florida.

20. This PD Agreement is governed in accordance with the laws of the State of Florida. Venue for any action arising out of or related to this PD Agreement shall be in the Circuit Court of Alachua County, Florida.

IN WITNESS WHEREOF, the Parties have hereunto set their hands and seals the day and year first above written.

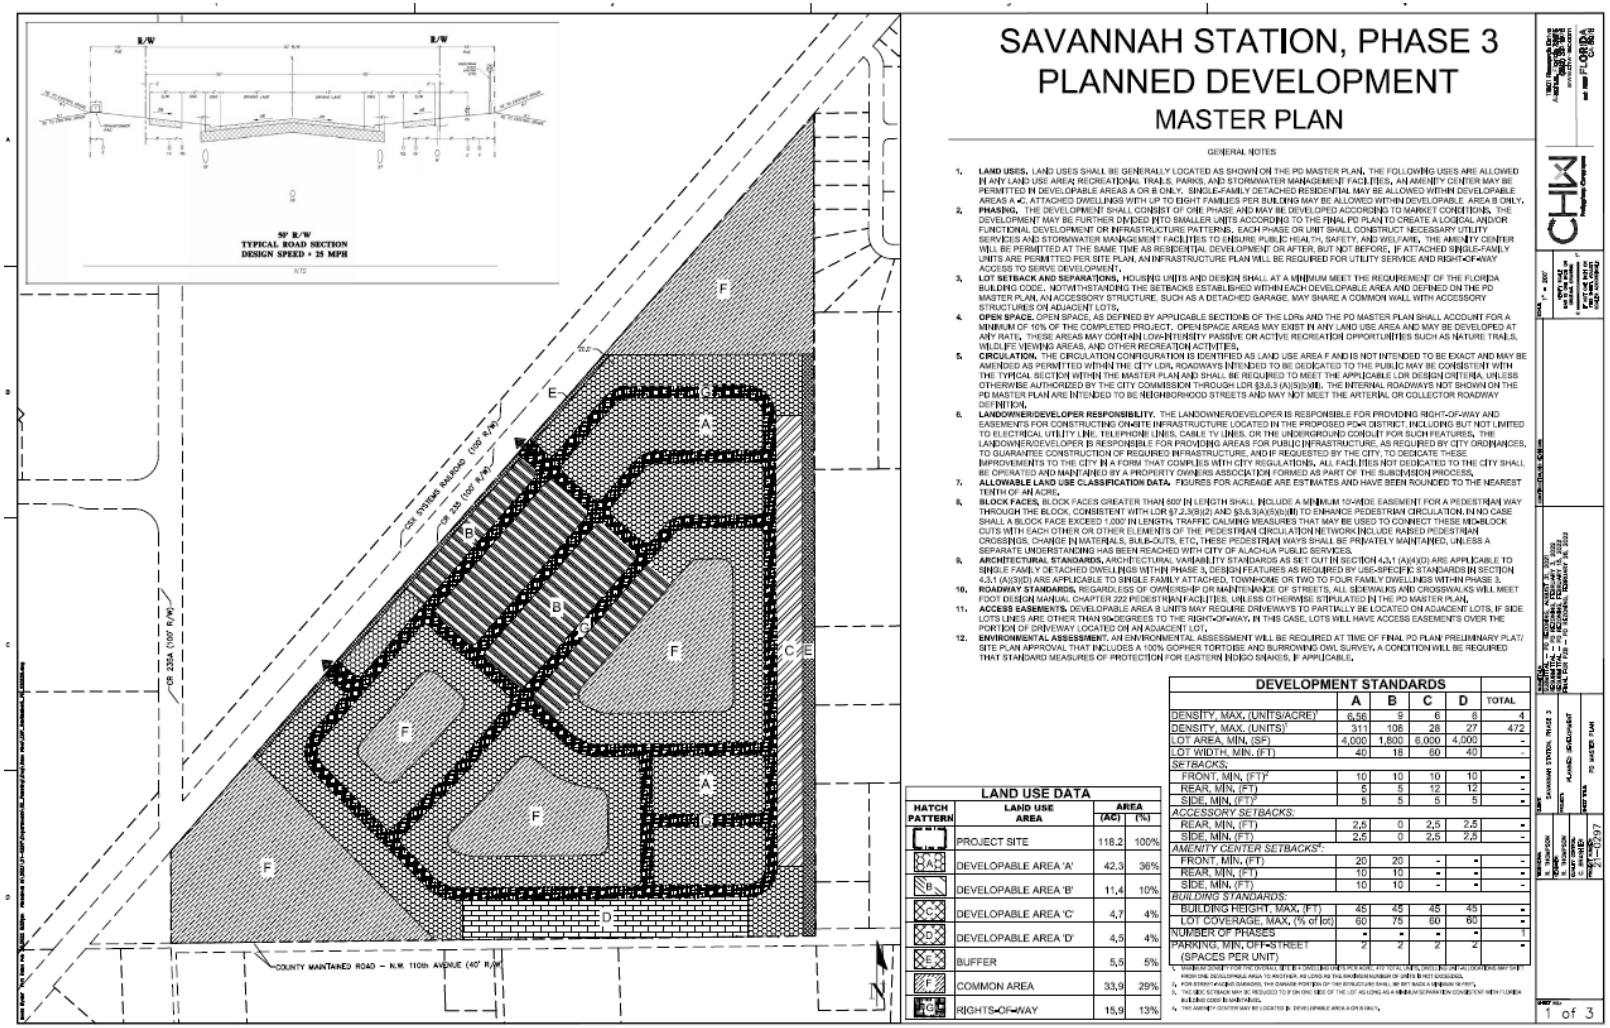
A TRACT OF LAND SITUATED IN SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST, ALACHUA COUNTY, FLORIDA, SAID TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:



COMMENCE AT AN IRON PIPE AT THE SOUTHWEST CORNER OF THE AFOREMENTIONED SECTION 28, TOWNSHIP 8 SOUTH, RANGE 18 EAST FOR THE POINT OF BEGINNING AND RUN N.00°42'43"E., ALONG THE WEST LINE OF SAID SECTION, A DISTANCE OF 402.89 FEET TO THE SOUTHEASTERLY RIGHT OF WAY LINE OF COUNTY ROAD NO. 235 (100 FOOT RIGHT OF WAY); THENCE RUN N.41°53'43"E., ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 4071.41 FEET TO A CONCRETE MONUMENT; THENCE RUN S.01°01'49"W., A DISTANCE OF 827.97 FEET TO A CONCRETE MONUMENT AT THE NORTHWEST CORNER OF THE SOUTHEAST ¼ OF SAID SECTION 28; THENCE RUN S.00°32'41"W., ALONG THE WEST LINE OF SAID SOUTHEAST ¼, A DISTANCE OF 2612.87 FEET TO AN IRON PIPE AT THE SOUTHEAST CORNER OF THE SOUTHWEST ¼ OF SAID SECTION 28; THENCE RUN N.89°50'54W., ALONG THE SOUTH LINE OF SAID SECTION 28, A DISTANCE OF 2684.07 FEET TO THE POINT OF BEGINNING, CONTAINING 118.191 ACRES MORE OR LESS.

SUBJECT TO THE MAINTANED RIGHT OF WAY OF COUNTY ROAD NW, 110TH AVENUE (FORMERLY KNOWN AS COUNTY ROAD N.W. 28TH) ALONG THE SOUTH BOUNDARY THEREOF.

EXHIBIT "B"

[EXECUTED/SIGNED ORDINANCE 22-10]

EXHIBIT “C”

SAVANNAH STATION, PHASE 3
PLANNED DEVELOPMENT
MASTER PLAN

GENERAL NOTES

1. **LAND USES.** LAND USES SHALL BE GENERALLY LOCATED AS SHOWN ON THE PD MASTER PLAN. THE FOLLOWING USES ARE ALLOWED IN ANY LAND USE AREA: RECREATIONAL TRAILS, PARKS, AND STORMWATER MANAGEMENT FACILITIES, AN AMENITY CENTER MAY BE PERMITTED IN DEVELOPABLE AREAS A OR B ONLY. SINGLE-FAMILY DETACHED RESIDENTIAL MAY BE ALLOWED WITHIN DEVELOPABLE AREAS A, C, ATTACHED DWELLINGS WITH UP TO EIGHT FAMILIES PER BUILDING MAY BE ALLOWED WITHIN DEVELOPABLE AREA B ONLY.
2. **PHASING.** THE DEVELOPMENT SHALL CONSIST OF ONE PHASE AND MAY BE DEVELOPED ACCORDING TO MARKET CONDITIONS. THE DEVELOPMENT MAY BE FURTHER DIVIDED INTO SMALLER UNITS ACCORDING TO THE FINAL PD PLAN TO CREATE A LOGICAL AND/OR FUNCTIONAL DEVELOPMENT OR INFRASTRUCTURE PATTERNS. EACH PHASE OR UNIT SHALL CONSTRUCT NECESSARY UTILITY SERVICES AND STORMWATER MANAGEMENT FACILITIES TO ENSURE PUBLIC HEALTH, SAFETY, AND WELFARE. THE AMENITY CENTER WILL BE PERMITTED AT THE SAME TIME AS RESIDENTIAL DEVELOPMENT OR AFTER, BUT NOT BEFORE. IF ATTACHED SINGLE-FAMILY UNITS ARE PERMITTED PER SITE PLAN, AN INFRASTRUCTURE PLAN WILL BE REQUIRED FOR UTILITY SERVICE AND RIGHT-OF-WAY ACCESS TO SERVE DEVELOPMENT.
3. **LOT SETBACK AND SEPARATIONS.** HOUSING UNITS AND DESIGN SHALL AT A MINIMUM MEET THE REQUIREMENT OF THE FLORIDA BUILDING CODE. NOTWITHSTANDING THE SETBACKS ESTABLISHED WITHIN EACH DEVELOPABLE AREA AND DEFINED ON THE PD MASTER PLAN, AN ACCESSORY STRUCTURE, SUCH AS A DETACHED GARAGE, MAY SHARE A COMMON WALL WITH ACCESSORY STRUCTURES ON ADJACENT LOTS.
4. **OPEN SPACE.** OPEN SPACE, AS DEFINED BY APPLICABLE SECTIONS OF THE LDRs AND THE PD MASTER PLAN SHALL ACCOUNT FOR A MINIMUM OF 10% OF THE COMPLETED PROJECT. OPEN SPACE AREAS MAY EXIST IN ANY LAND USE AREA AND MAY BE DEVELOPED AT ANY RATE. THESE AREAS MAY CONTAIN LOW-INTENSITY PASSIVE OR ACTIVE RECREATION OPPORTUNITIES SUCH AS NATURE TRAILS, WILDLIFE VIEWING AREAS, AND OTHER RECREATION ACTIVITIES.
5. **CIRCULATION.** THE CIRCULATION CONFIGURATION IS IDENTIFIED AS LAND USE AREA F AND IS NOT INTENDED TO BE EXACT AND MAY BE AMENDED AS PERMITTED WITHIN THE CITY LDR. ROADWAYS INTENDED TO BE DEDICATED TO THE PUBLIC MAY BE CONSISTENT WITH THE TYPICAL SECTION WITHIN THE MASTER PLAN AND SHALL BE REQUIRED TO MEET THE APPLICABLE LDR DESIGN CRITERIA, UNLESS OTHERWISE AUTHORIZED BY THE CITY COMMISSION THROUGH LDR §3.6.3 (A)(5)(a)(II). THE INTERNAL ROADWAYS NOT SHOWN ON THE PD MASTER PLAN ARE INTENDED TO BE NEIGHBORHOOD STREETS AND MAY NOT MEET THE ARTERIAL OR COLLECTOR ROADWAY DEFINITION.
6. **LANDOWNER/DEVELOPER RESPONSIBILITY.** THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING RIGHT-OF-WAY AND EASEMENTS FOR CONSTRUCTING ON-SITE INFRASTRUCTURE LOCATED IN THE PROPOSED PDR DISTRICT, INCLUDING BUT NOT LIMITED TO ELECTRICAL UTILITY LINE, TELEPHONE LINES, CABLE TV LINES, OR THE UNDERGROUND CONDUIT FOR SUCH FEATURES. THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING AREAS FOR PUBLIC INFRASTRUCTURE, AS REQUIRED BY CITY ORDINANCES, TO GUARANTEE CONSTRUCTION OF REQUIRED INFRASTRUCTURE, AND IF REQUESTED BY THE CITY, TO DEDICATE THESE IMPROVEMENTS TO THE CITY IN A FORM THAT COMPLIES WITH CITY REGULATIONS. ALL FACILITIES NOT DEDICATED TO THE CITY SHALL BE OPERATED AND MAINTAINED BY A PROPERTY OWNERS ASSOCIATION FORMED AS PART OF THE SUBDIVISION PROCESS.
7. **ALLOWABLE LAND USE CLASSIFICATION DATA.** FIGURES FOR ACREAGE ARE ESTIMATES AND HAVE BEEN ROUNDED TO THE NEAREST TENTH OF AN ACRE.
8. **BLOCK FACES.** BLOCK FACES GREATER THAN 500' IN LENGTH SHALL INCLUDE A MINIMUM 10'-WIDE EASEMENT FOR A PEDESTRIAN WAY THROUGH THE BLOCK, CONSISTENT WITH LDR §7.2.3(B)(2) AND §3.6.3(A)(5)(b)(III) TO ENHANCE PEDESTRIAN CIRCULATION. IN NO CASE SHALL A BLOCK FACE EXCEED 1,000' IN LENGTH. TRAFFIC CALMING MEASURES THAT MAY BE USED TO CONNECT THESE MID-BLOCK CUTS WITH EACH OTHER OR OTHER ELEMENTS OF THE PEDESTRIAN CIRCULATION NETWORK INCLUDE RAISED PEDESTRIAN CROSSINGS, CHANGE IN MATERIALS, BULB-OUTS, ETC. THESE PEDESTRIAN WAYS SHALL BE PRIVATELY MAINTAINED, UNLESS A SEPARATE UNDERSTANDING HAS BEEN REACHED WITH CITY OF ALACHUA PUBLIC SERVICES.
9. **ARCHITECTURAL STANDARDS.** ARCHITECTURAL VARIABILITY STANDARDS AS SET OUT IN SECTION 4.3.1 (A)(4)(D) ARE APPLICABLE TO SINGLE FAMILY DETACHED DWELLINGS WITHIN PHASE 3. DESIGN FEATURES AS REQUIRED BY USE-SPECIFIC STANDARDS IN SECTION 4.3.1 (A)(3)(D) ARE APPLICABLE TO SINGLE FAMILY ATTACHED, TOWNHOME OR TWO TO FOUR FAMILY DWELLINGS WITHIN PHASE 3.
10. **ROADWAY STANDARDS.** REGARDLESS OF OWNERSHIP OR MAINTENANCE OF STREETS, ALL SIDEWALKS AND CROSSWALKS WILL MEET FDOT DESIGN MANUAL CHAPTER 222 PEDESTRIAN FACILITIES, UNLESS OTHERWISE STIPULATED IN THE PD MASTER PLAN.
11. **ACCESS EASEMENTS.** DEVELOPABLE AREA B UNITS MAY REQUIRE DRIVEWAYS TO PARTIALLY BE LOCATED ON ADJACENT LOTS, IF SIDE LOTS LINES ARE OTHER THAN 90-DEGREES TO THE RIGHT-OF-WAY. IN THIS CASE, LOTS WILL HAVE ACCESS EASEMENTS OVER THE PORTION OF DRIVEWAY LOCATED ON AN ADJACENT LOT.
12. **ENVIRONMENTAL ASSESSMENT.** AN ENVIRONMENTAL ASSESSMENT WILL BE REQUIRED AT TIME OF FINAL PD PLAN/ PRELIMINARY PLAT/ SITE PLAN APPROVAL THAT INCLUDES A 100% GOPHER TORTOISE AND BURROWING OWL SURVEY. A CONDITION WILL BE REQUIRED THAT STANDARD MEASURES OF PROTECTION FOR EASTERN INDIGO SNAKES, IF APPLICABLE.

RE: Savannah Station Phase 3 – PD-R Rezoning (REVISED)
(Alachua County tax parcel 03980-002-001)

Dear Kathy:

The above-referenced application has been revised to address comments received by the Project Assistance Team (PAT) on February 10, 2022. Revised materials include this cover letter, the Justification Report, the PD Master Plan, and the PD Utility Plan. Notable revisions include:

- Ensuring the Amenity Center is only permitted in Developable Areas A and B,
- Amending the rear setback for lots abutting the east and south property boundaries,
- Adding a 20'-wide landscape buffer along the CR 235,
- Amending the Justification report to reflect the appropriate roadway impact, and
- Adding a note to the PD Utility Plan per Public Service Department.

A complete list of responses to the PAT comments is attached hereto for reference and reflected in the materials.

We trust you will find this submittal package is sufficient for review and approval. Please feel free to contact me at (352) 331-1976 or at ryant@chw-inc.com should you have any questions or require any additional information to complete your review.

Sincerely,
CHW

C. Ryan Thompson, AICP
Sr. Project Manager
N:\2021\21-0297\Departments\02_Planning\City-County\Working Files\LTR 220215 SS PH3 - Cover Letter.docx

1. PD Master Plan: Compliance with Applicable LDR Provisions

c. Section 3.6.2 (A)(1)(b), Master Plan identifies amenity center as potential use in Development Areas A through D, however does not identify maximum intensity (in square feet). Additionally, Development Area A is adjacent to large single family development and an amenity center may not be an appropriate adjacent to these uses. A separate development area should be created that precludes amenity center from being located adjacent to those existing uses.

New Comment: Propose PD Master Plan indicates that the Amenity Center would be permitted in Development Area C. This area is not appropriate for this use as it is adjacent to eastern property boundary. Please revise to remove Amenity Center as permitted within Development Area C.

Response: The Amenity Center is permitted in Development Areas A and B only, as reflected on the PD Master Plan.

g. Section 3.6.3 (A)(4) Dimensional Standards. Rear setback of 5 feet is not compatible with surrounding properties. Lots located along south and east property lines should have a minimum rear setback of 30'. A separate development area should be created with this new rear setback.

New Comment: Rear setbacks for Development Area C and for Lots along southern property boundary must be a minimum of 15'.

Response: Due to potential building footprints on these sites, a 12' minimum rear setback is proposed. This minor modification is requested to meet high demand for specific units provided by the applicant.

3. Consistency with City's Land Development Regulations

c. Section 3.6.1 (A) identifies a general purpose of the PD district is to promote environmentally sensitive development. A substantial tree line exists along western right-of-way line. A 25' landscaped buffer intended to preserve existing tree line along CR235 is required. This buffer area may include the screening required under Section 6.2.3 (E), Arterial frontage.

New Comment: Proposed landscape buffer along CR235 must be shown on PD Master Plan.

Response: A 20'-wide buffer is proposed along CR 235, as illustrated on the PD Master Plan.

4. Concurrency Impact Analysis

a. Provided concurrency impact analysis references impacts to CR235A North roadway segment, but description and actual impacted roadway is CR235A South. Please correct references to CR235A North on Page 6 and 7 of Justification Report submitted with application.

New Comment: Page 7 of Justification Report still references CR235A North, when Staff believes it means to reference CR235A South.

Response: The reference to CR 235A North on Page 6 and 7 of the Justification Report has been amended.

5. Public Services Comments a. Applicant must acknowledge comments provided by Rodolfo Valladares, P.E., Public Services Director and Tom Ridgik, P.E., Engineering Supervisor, in a memo dated February 10, 2022 (attached).

6. Miscellaneous

a. New Comment: While Staff understands the PD Project name may ultimately be different from platted name of any future subdivision, there are concerns regarding the use of the name “Savannah Station” for any future development within the PD as confusion may arise. Acknowledgement only needed.

Response: The note requested by Public Services was added to the PD Utility Plan.

A. PROJECT

1. Project Name: Savannah Station Phase 3
2. Address of Subject Property: _____
3. Parcel ID Number(s): 03980-002-001
4. Existing Use of Property: vacant
5. Future Land Use Map Designation : Moderate Density Residential
6. Existing Zoning Designation: A
7. Proposed Zoning Designation: PD-R
8. Acreage: ±118 ac.

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☒ Agent
2. Name of Applicant(s) or Contact Person(s): Ryan Thompson Title: Project Manager
   Company (if applicable): CHW
   Mailing address: 11801 Research Drive, Alachua, FL 32615
   City: Gainesville State: FL ZIP: 32607
   Telephone: (352) 331-1976 FAX: (352) 331-2476 e-mail: ryant@chw-inc.com
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): Waco Properties, Inc.
   Mailing Address: 569 S. Edgewood Avenue
   City: Jacksonville State: FL ZIP: 32205

   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☒ Yes ☐ No
   If yes, list names of all parties involved: The Fletcher Family Companies
   If yes, is the contract/option contingent or absolute? ☒ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change, including a map showing the proposed zoning change and zoning designations on surrounding properties
2. A current aerial map or plat of the property. (may be obtained from the Alachua County Property Appraiser.)
3. Concurrency Impact Analysis showing the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.
4. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

5. Analysis of compliance with the Standards for Site Specific Amendments to the Official Zoning Atlas, as defined in Section 2.4.2 of the Land Development Regulations (LDRs), and listed below:

   i. Consistent with Comprehensive Plan
   The proposed amendment is consistent with and furthers the goals, objectives, and policies of the Comprehensive Plan.

   ii. Consistent with Ordinances
   The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

   iii. Logical Development Pattern
   The proposed amendment would result in a logical and orderly development pattern.

   iv. Pre-Mature Development
   The proposed amendment will not create premature development in undeveloped or rural areas.

   v. Incompatible with Adjacent Lands
   The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

   vi. Adverse Effect on Local Character
   The proposed amendment will not adversely effect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights, or other physical effects or nuisances.

   vii. Not Deviate from Pattern of Development
   The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

   viii. Encourage Sprawl
   The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low density single dimensional development.

   ix. Spot Zoning
   The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

   x. Public Facilities
   The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, storm water management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

   xi. No Adverse Effect on the Environment
   The proposed amendment would not result in significantly adverse impacts on the natural environment, including but not limited to water, air, noise, storm water management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

6. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

7. Neighborhood Meeting Materials, including:
   i. Copy of the required published notice (advertisement) – must be published a newspaper of general circulation, as defined in Article 10 of the City's Land Development Regulations
   ii. Copy of written notice (letter) sent to all property owners within 400 feet, and mailing labels or list of those who received written notice
   iii. Written summary of meeting – must include (1) those in attendance; (2) a summary of the issues related to the development proposal discussed; (3) comments by those in attendance about the development proposal; and, (4) any other information deemed appropriate.

8. For applications requesting a zoning which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED made the ___ day of November, 1997, by International Business Machines Corporation, a New York corporation, hereinafter called the Grantor, to Waco, Inc., qualified to do business in Florida as Waco of Alabama, Inc., an Alabama corporation, having an address at 569 S. Edgewood Avenue, Jacksonville, FL 32205, hereinafter called the Grantee:

(Wherever used herein, the terms "Grantor" and "Grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

WITNESSETH: That the Grantor, for and in consideration of the sum of $10.00 and other good and valuable consideration, receipt and sufficiency whereof are hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the Grantee, all those certain parcels of land situated in Alachua County, Florida, and more particularly described in **Exhibit A** attached hereto and made a part hereof.

TOGETHER with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

SUBJECT TO:

1. Taxes for the year 1998 and subsequent years not yet due and payable.

2. Easements, restrictions, reservations, limitations and conditions of record, if any, provided this shall not operate to reimpose same.

3. All applicable zoning ordinances, other land use laws and regulations, and all applicable regulations and restrictions imposed by governmental authorities.

TO HAVE AND TO HOLD, the same in fee simple forever.

AND the Grantor hereby covenants with the Grantee that the Grantor is lawfully seized of said land in fee simple; that the Grantor has good right and lawful authority to sell and convey said land, and hereby warrants the title to said land and will defend the same against the lawful claims of all persons claiming by, through or under the said Grantor and none other.

IN WITNESS WHEREOF, the said Grantor has hereunto set its hand and seal the day and year first above written.

Signed, sealed and delivered
in our presence:

NEIGHBORHOOD MEETING NOTIFICATION

PN 21-0297

To: Neighbors of the County Road 235 / County Road 235A Intersection

From: Ryan Thompson, AICP

Date: 13 August 2021

RE: Neighborhood Meeting Public Notice

A Neighborhood Meeting will be held to discuss a rezoning application on ±116.95 acres in the City of Alachua (Alachua County Tax Parcel # 03980-002-001). The application requests to change the zoning of the property from Agriculture (A) to Planned Development—Residential (PD-R). The PD-R will be for a residential subdivision. The meeting will also address the platting process. The site is located on the southern side of County Road 235, approximately between NW 110th Avenue and NW 164th Terrace.

Date: August 30, 2021

Time: 6:00 p.m.

Location: 11801 Research Drive, Alachua, FL, 32615

Contact: Ryan Thompson, AICP
11801 Research Drive
Alachua, FL 32615
(352) 331-1976
Live@CHW-inc.com

This is not a public hearing. The purpose of the neighborhood meeting is to inform the public about the nature of the proposal and seek their comments.

If you are unable to attend the meeting, please contact CHW using the information above, and we will provide materials after the meeting is held. Comments may also be submitted in writing to the address or email above or by phone at the phone number above.

PUBLIC NOTICE

A Neighborhood Meeting will be held to discuss a rezoning application on ±116.95 acres in the City of Alachua (Alachua County Tax Parcel # 03980-002-001). The application requests to change the zoning of the property from Agriculture (A) to Planned Development—Residential (PD-R). The PD-R will be for a residential subdivision. The meeting will also address the platting process. The site is located on the southern side of County Road 235, approximately between NW 110th Avenue and NW 164th Terrace.

This is not a public hearing. The purpose of this meeting is to inform the public about the nature of the proposals and seek their comments.

Time: 6:00 pm on August 30, 2021
Location: 11801 Research Drive, Alachua, FL, 32615

Surfside

Continued from Page 3A

complete further assessments.

It is indicative of how potentially pervasive structural issues might be with older complexes, particularly on the water, and underscores the need for a timely and thorough investigation into what caused the Champlain collapse and how other buildings might or might not face similar problems, officials said at Tuesday's meeting.

"We need to know how safe our community is," said Commissioner Nelly Velasquez. "We need to know how safe our Earth is beneath our feet, and we need to know that as soon as possible."

Burkett agreed.

Miami-Dade County Mayor Daniella Levine Cava "did a marvelous job, and has done and continues to do a marvelous job," Burkett said. "However, with respect to this very, very narrow issue, I think there is a loss of focus."

Leaning forward in his chair in a conference room at Surfside Town Hall recently, Burkett pulled no punches when he told The Palm Beach Post that he believes the glacial pace of the county to either pursue its own investigation or enable the town to complete theirs, could result in tragedy.

"The people that eventually make the decisions on whether to immediately proceed with an investigation as to why the building fell down are the ones that are ultimately going to be responsible if, God forbid, we end up with a catastrophe in our town again," Burkett said. "And that's not something I want to be anywhere near."

In a strongly-worded July 23 letter toLevine Cava, Burkett said as much, questioning why the county seems to be hindering the town's investigation.

"If we are denied the ability to access the site, a property within our own municipality, and we cannot do the investigations that our expert has prescribed because of the County's refusal to give us access, then the County must assume full and complete responsibility for any loss of life and any other damages that may result," Burkett wrote.

When asked why Kilsheimer has not been granted access to the debris, Cava's office referred The Post to Cava's July 29 reply to Burkett, in which Cava wrote that it is "essential that we get answers and accountability about exactly what happened," and that the "safety and well-being of every single resident of Miami-Dade" is her "top priority."

Cava in that reply also encouraged Surfside to continue inspecting Champlain Towers North, which is the "sister" building to the one that collapsed, as well as any other buildings within the town's jurisdiction.

She wrote that the county's process of hiring a forensic engineer to investigate the collapse was "well underway," and that it is "vital that the investigation move forward as speedily as possible while maintaining the integrity of the collapse site and all evidence."

As such, she concluded, "access to the site has been limited."

'They want this to go away as fast as possible'

But seven weeks after the collapse, the county still has not hired an engineer. And Kilsheimer still has not been granted access to the debris, Burkett pointed out. In fact, the county did not even put out an online post for the forensic engineer position until July 28 — five weeks after the collapse.

"At the present time, we have not extended a contract to a forensic engineer, we are still in the procurement process," a spokesperson from the department wrote in a recent statement to The Post.

Surfside commissioner and former prosecutor Eliana Salzhauer thinks she might know why.

"I don't think anybody wants to hear the truth, because the truth is going to cost them money," she said at Tuesday night's meeting. "They want this to go away as fast as possible."

The reason, Salzhauer said, is simple: The receiver wants to get as much money as possible for the families and the county wants the spotlight off a problem that could devalue properties.

"That value can be decimated if it turns out there is a sinkhole, if it turns out there is a structural problem — that that ground is now worthless," she said. "There are so many unknowns here and nobody really wants to know ... they're hoping everyone will not pay attention, they'll get their money, the thing will be sold and will pass on. We're trying to stop that speeding train."

Kilsheimer said the investigation currently being conducted by the Miami-Dade police, in conjunction with the state attorney, is a criminal, not structural, investigation, which is the reason police have given for not allowing Surfside access to the debris. And the federal investigation being conducted by NIST is focused on policy, not cause, he said.

"NIST is not going to determine why the building fell down," Kilsheimer said. "They are going to come up with what materials should be used in certain environments, change building codes, make suggestions — like a bureau of standards. They are not forensic collapse experts."

Kilsheimer stands ready, willing and able to proceed with an investigation into the cause of the Champlain collapse, he said, be it on behalf of Surfside or the county. Residents are scared, he said, and they want answers.

"And we, on almost a daily basis, get several phone calls from people that live in that area that want us to talk about if their building is safe, are they safe," Kilsheimer said.

The commission discussed at Tuesday's meeting that one reason for the cold shoulder from the county might be because Surfside potentially could be a defendant in a future lawsuit relating to the collapse, and the county might question Kilsheimer's allegiances.

Kilsheimer bristled at the notion, saying that, if released from his contract with Surfside and hired by the county, he will in no way conduct an investigation or render a report based on any form of bias, favoritism or protection for any person or entity.

"In my mind, they're concerned I am going to say something to cover Surfside's ass in some way shape or form, and that's not how we do things," Kilsheimer said. "I've never had anybody say that I wouldn't tell it the way it was no matter who I was working for, and I personally take this as an insult that they are questioning my honesty."

Burkett agreed, writing in his letter to Levine Cava that "the investigation we conduct and the preservation of any remaining evidence are not mutually exclusive," and that the town would "happily work" with the county to "do our investigation and carefully and thoughtfully as possible," while "freely sharing all raw data that we collect from our testing with any agency or interested party."

Levine Cava's office, however, said that it is not the county, but the court-appointed receiver for Champlain Towers South — an attorney out of Fort Lauderdale — who is prohibiting Kilsheimer access to the debris. Her office provided The Post a letter from the receiver dated July 29 saying as much.

That receiver, Michael Goldberg, did not respond to verbal and written requests from the Post to explain why or at who's directive he determined Kilsheimer should not have access to the collapse site or the stored debris, and if, or when he has any intention of granting that access.

Debris, deemed critical to collapse investigation, being destroyed

While Kilsheimer is being denied access to both the warehoused debris and the collapse site, he said that, against the judge's orders, he has heard NIST has been conducting "destructive testing" on evidence. That means, he said, that NIST could be destroying critical evidence that might reveal the cause of the collapse.

"NIST is not sharing with us what they are doing," Kilsheimer said. "They can be doing things ... that make it impossible for us to do what we need to do in the ground. Maybe they found the one spot that's really bad, but we'll never find that spot because they took it and won't tell us what they did."

At a hearing Wednesday morning in Miami, a judge handling the receivership warned Goldberg that no destruction or alteration of evidence will be permitted.

In response, Goldberg said that he spoke with NIST official Judith Mitrani-Reiser, who has been co-leading the team of scientists conducting a preliminary investigation into Surfside, and she stressed that NIST was doing its testing in the least invasive way possible.

Burkett said he is beyond frustrated that NIST is processing evidence without Kilsheimer, and that the county is not yet investigating the cause of the collapse at all.

He offered to release Kilsheimer from his contract with Surfside or assign that contract over to the county so an investigation can move forward expeditiously but said the county has not accepted that offer.

"We all just want to find out why the building fell," Burkett said. "We don't need Surfside to do the investigation; we just need an investigation to be done quickly."

Levine Cava's office told The Post that neither Burkett nor Kilsheimer offered Kilsheimer's services to the county, and that Kilsheimer failed to formally apply for the job when it was posted online.

But Burkett said Kilsheimer had already been conducting an investigation for five weeks at that point and "everyone" knew it.

"It's really hard for me to believe that anybody was confused about the fact that Surfside would be willing to make Mr. Kilsheimer available to do any work whatsoever related to determining the cause of the collapse, which would have included un-contracting his services with us and helping him to get on board with the county," Burkett said. "We still have lives at risk, and we need to get to the bottom of this."

The Miami Dade Police Department did not respond to a request to explain if Kilsheimer was ever considered for the county job and why or why not.

Allyn Kilsheimer, center, who has spent the past half-century examining debris from calamitous disasters, conducts a structural examination at Champlain Towers North in Surfside on July 9. Kilsheimer is examining the nearby sister tower of the collapsed Champlain Towers South condominium for clues to the causes of the deadly catastrophe.

'Rolling the dice on their lives'

Kilsheimer, a 64-year veteran of building collapse investigations, has investigated about 30 to 40 collapses, he said, including the Pentagon after 9/11, the Florida International University bridge collapse in 2018, the Oklahoma City bombing in 1995, and probes around the world, including in Kuwait, Saudi Arabia and Turkey.

He said that inspecting the south tower debris is critical to determining not only why the south tower fell, but if the "sister" building — Champlain Towers North — which has been subject to voluntary evacuation since shortly after the south tower fell, is safe for occupancy.

"The odds of that happening are very low, and I recognize that, but here's the question — can we take that chance?" Burkett said. "Who's willing to roll the dice on the lives of those people in that building? And if you are not focusing on that as your No. 1 concern, I would submit you are rolling the dice on their lives."

Champlain Towers North, located three lots north of the south tower, was built at the same time by the same developer and with similar plans, Burkett pointed out in his letter to Levine Cava, and probably used the same contractor and similar materials.

And until there is an official determination as to what caused the south tower to fall, there is an imminent concern for the safety of those in the surrounding areas.

"The safety of the residents living in the Champlain Towers North building and other oceanfront buildings must not be ignored, nor can action to protect them be delayed," Burkett wrote.

Kilsheimer agreed. While he initially said the north tower was safe, he says now that a deeper investigation of the south tower needs to be done to confirm that, and that not enough is known about the construction of either tower to ascertain any risks to north tower residents.

"On neither building is there any information about load tests, and they don't even give the length of the pilings," he said about records that would typically indicate the standards to which both towers were initially built. "They don't exist. The only records we have are the drawings this town has. Things like load tests, concrete breaks, they don't get filed with cities."

Kilsheimer based his earlier, rosier assessment of the north tower based on preliminary inspections, engineering analyses and "random" concrete samplings of that building.

But because it is virtually impossible to safely access the foundation in an occupied complex, he said, he cannot unequivocally guarantee a zero risk of structural failure.

"My level of concern is, there are things that I don't know," he said. "That's my concern — the things that I don't know."

Unfortunately, it seems, neither does anyone else.

NIST has said its investigation could take years. Cava's spokesperson would not give an estimate on how long the county's investigation might take once an engineer is hired, and Miami Dade police did not respond to a request for a time frame.

Kilsheimer said if given access to the debris, he could conclude his investigation within "months."

"I don't understand why, whoever is really trying to understand why this building fell down, can't go with the team we have or somebody equal to that team," he said. "They have a reason. Why? I don't know."

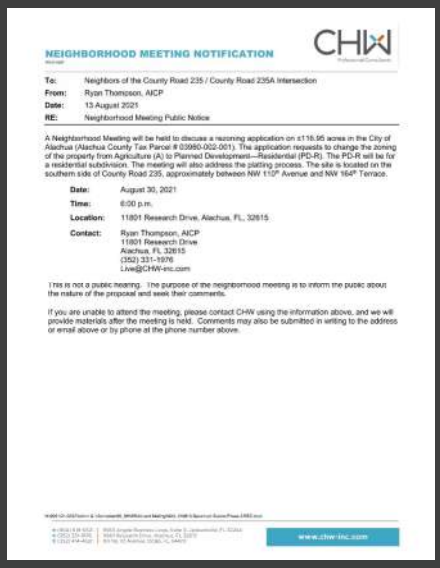
1

The purpose of the neighborhood meeting:

The City of Alachua requires Rezoning applicants to host a neighborhood meeting *prior* to application submittal.

The purpose is to inform neighbors of the proposed action's nature and to get feedback early in the process.



This meeting provides the applicant with an opportunity to identify concerns prior to the application's submission.

Place:	CHW Office – 11801 Research Drive, Alachua, FL, 32615
Re:	Rezoning Application

CHW (Agent) Attendees: Ryan Thompson, AICP; Seth Wood; Olivia Lee; Michael Hutchinson
Public Attendees: 3

CHW, on behalf of Waco Properties, Inc., hosted the required Neighborhood Meeting and presented the following: the meeting's purpose; the application's request and intent; the Rezoning and Plat review process and estimated project timeline; maps illustrating the site's regulatory and physical characteristics; and a conceptual master plan for the Planned Development. Questions from public attendees are described below, with agent responses.

Question: What is the expected lot size?
Response: The typical lot is expected to be 5,000 sf and 50'-wide, the same as Savannah Station Phase 2. However, to allow a different housing product, the minimum lot size for the project is proposed to be 4,000 square feet, with a minimum lot width of 40 feet.

Question: Will the homes be detached or attached?
Response: Single-family detached homes will be the only residential unit form permitted on the majority of the project site. An area central to the project site, as depicted on the PD Master Plan, will allow for single-family detached and attached residential units. Whether or not single-family attached residential units are constructed in this area will be based on market conditions.

Question: Will there be rentals included in this project?
Response: That is beyond the scope of this rezoning application. No more than a typical neighborhood like existing Savannah Station is expected.

Question: What will happen to trees currently on the property?
Response: This will be determined during the platting process. All development will conform to City of Alachua tree protection and preservation guidelines. Trees in the NW 110th Avenue right-of-way will not be touched. However, trees located on the subject property may be removed for home sites or stormwater management facilities.

Question: Will the streets have streetlights?
Comment: New streets constructed as part of this subdivision will have streetlights that conform to all pertinent City of Alachua regulations. It will be similar to the new phases of Savannah Station.

Question: Will this have any impacts on NW 110th Avenue?
Response: No direct access is proposed on NW 110th Avenue. Therefore, no paving or other improvements are required/planned. All ingress/egress points to the development will be located on County Road 235 exclusively. An emergency access consisting of a locked gate may be requested along NW 110th Avenue.

Comment: I do not want emergency or pedestrian access along NW 110th Avenue.

Question: What is the anticipated timeline for this development to occur? And how will it be phased?
Response: We estimate the rezoning portion of this project to conclude early 2022. Then, we will move into the platting process (outlined in presentation), which may take another 12 months. Phasing will be 20 -50 lots at a time, depending on market conditions, and will start near one of the CR 235 access points.
The meeting was adjourned at approximately 6:35 p.m.

Description of Location: Located along CR 235, north of NW 110th Avenue	
Parcel Number: 03980-002-001	**Acres:** ±118.2 acres (ac) *(Source: CHW)*
Existing Future Land Use (FLU) Classification: *Moderate Density Residential* The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units (du) per acre. This FLU category permits uses such as single-family dwelling units, townhomes, and Residential Planned Developments.	
Existing Zoning District: *A: Agriculture* The A district is intended to provide for areas primarily consisting of agriculture uses and agriculture support uses and also allow low-density single-family residential development. The maximum residential density allowed in the district is one dwelling unit per five acres, except that homesteaded lots may be developed at one unit per two acres. Residential cluster development is encouraged through the use of the Conservation Subdivision option.	**Proposed Zoning District:** *PD-R: Planned Development-Residential District* The PD-R district is established to provide a mix of residential uses using innovative and creative design elements, while at the same time providing an efficient use of open space. Commercial uses may be allowed in the PD-R district primarily to serve the needs of the residents in the development.
Existing Max. Permitted Density: ±118.2 ac * 1 du/5 ac = 23 du	**Proposed Max. Permitted Density:** ±118.2 ac * 4 du/ac = 472 du
Net Change This Rezoning application will permit 449 additional dwelling units.	

2. STATEMENT OF PROPOSED CHANGE

This application requests to rezone a ±118.2-acre portion of Alachua County tax parcel 03980-002-001 from Agriculture (A) to Planned Development-Residential (PD-R). The subject parcel is located along CR 235, north of NW 110th Avenue. An aerial is provided as **Figure 1** that shows the site's exact location and conditions.

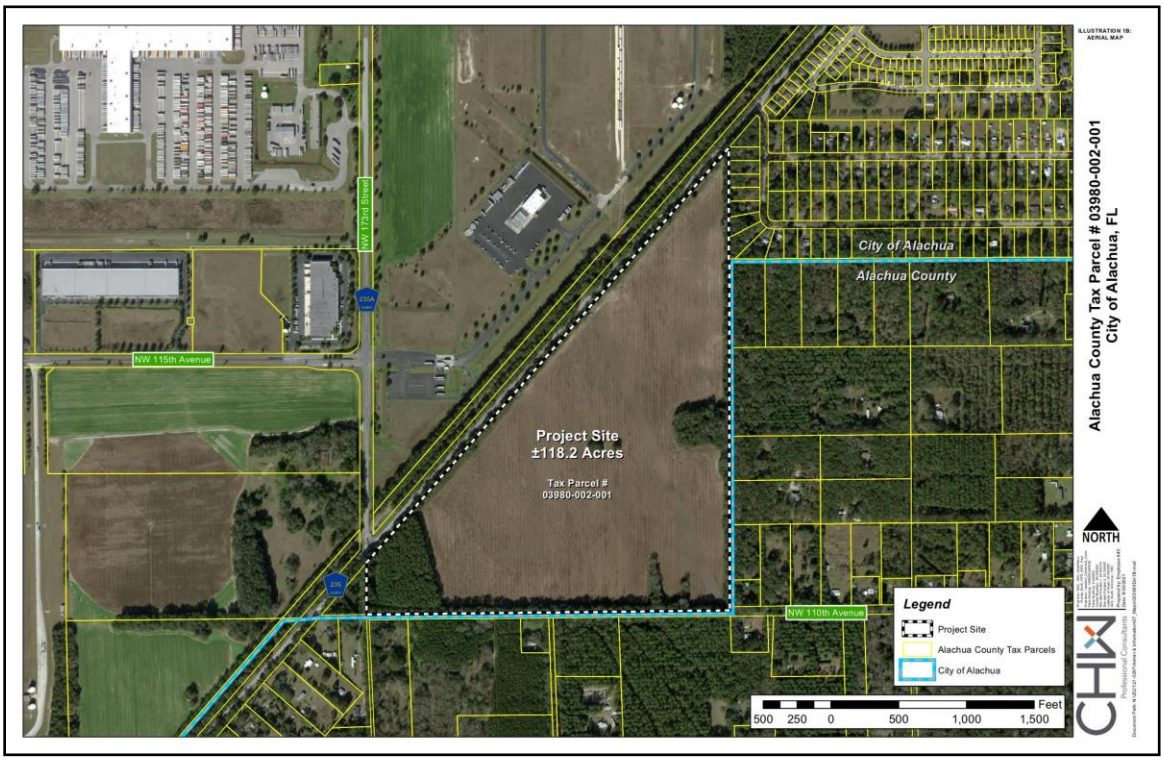

Figure 1: Aerial Map

The intent of this PD-R Rezoning application is to permit a residential subdivision. To obtain the maximum lot yield that is consistent with the underlying Moderate Density Residential Future Land Use (FLU) category (four units per acre), a PD-R is necessary. The PD-R shall be based on the Residential Single-Family – 4 (RSF-4) zoning district with modifications to the minimum lot size and lot width and other development standards, as specified on the PD Master Plan.

Existing FLU and Zoning designations of adjacent parcels are identified in **Table 1** and illustrated in **Figures 2 and 3**. The proposed Zoning District is illustrated in **Figure 4**.

Table 1: Surrounding Future Land Use and Zoning Designations

Direction	Future Land Use Designation	Zoning Designation
North	CR 235 ROW; Industrial	CR 235 ROW; Industrial General (IG)
East	Moderate Density Residential; Rural/Agriculture (County)	RSF-1; A (County)
South	NW 110th Ave ROW; Agriculture (County)	NW 110th Ave ROW; A (County)
West	Agriculture	A

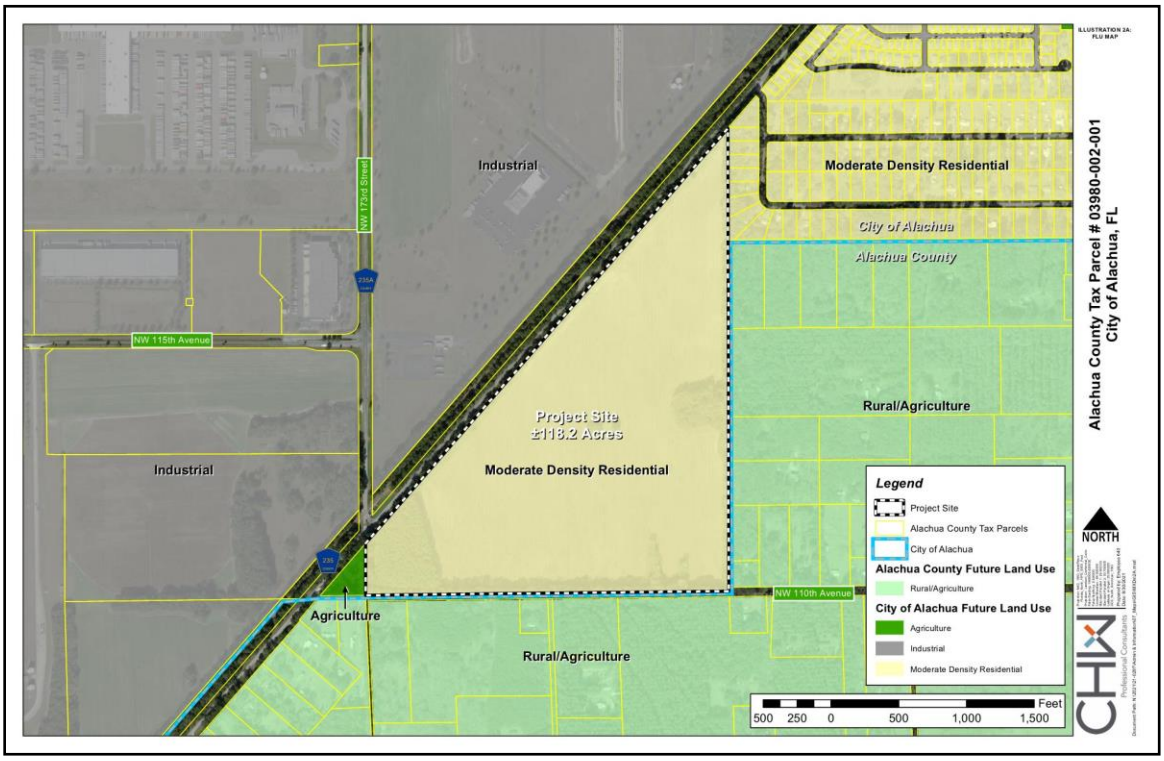

Figure 2: Existing Future Land Use Map

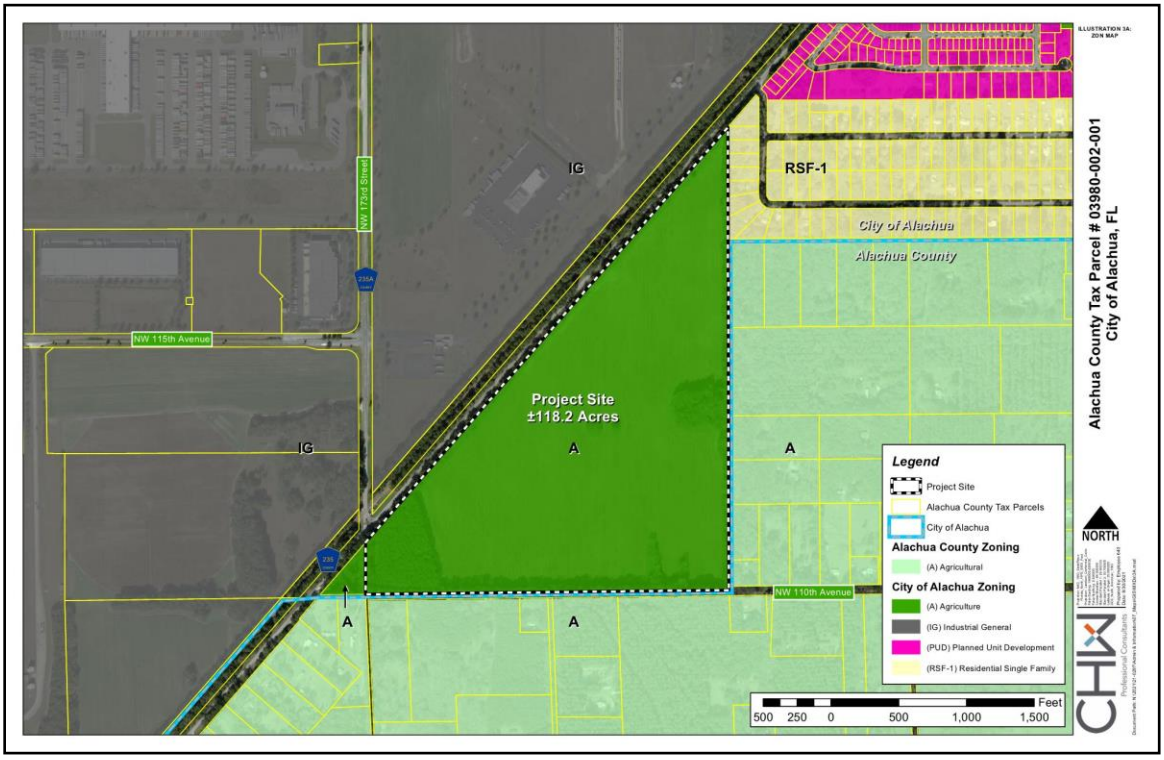

Figure 3: Existing Zoning Map

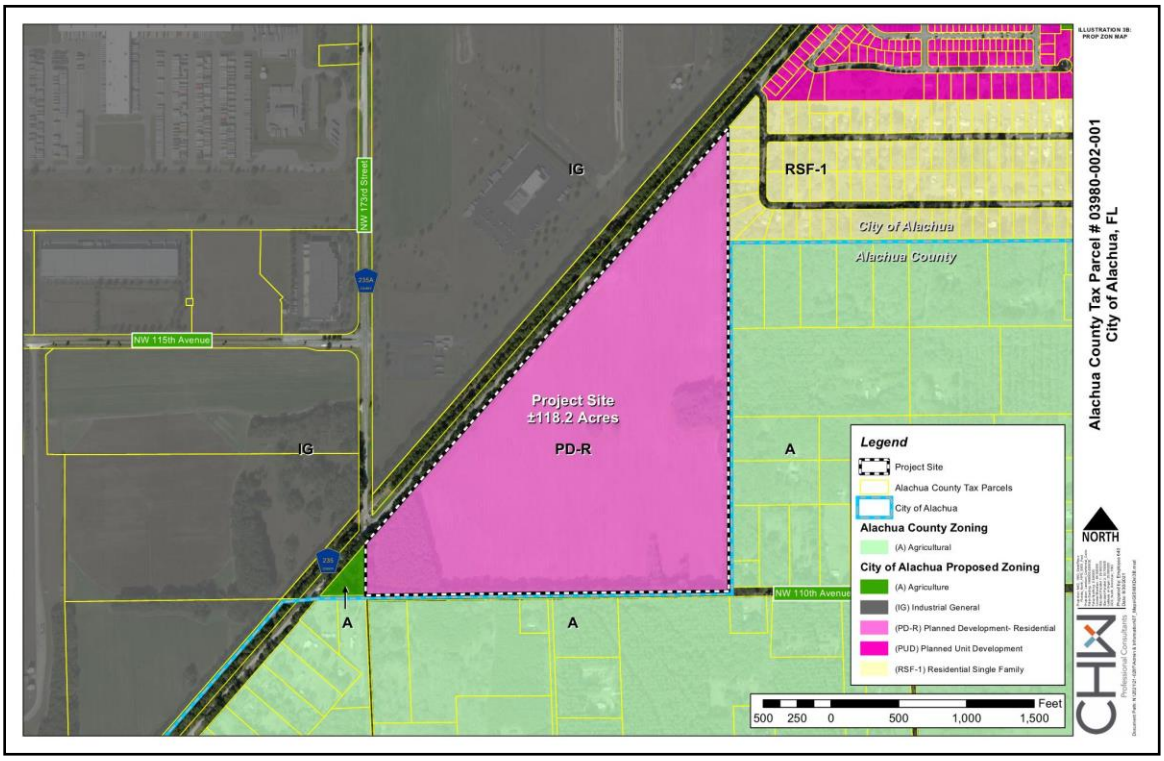

Figure 4: Proposed Zoning Map

In addition to single-family detached, a finite area also allows attached residential (up to nine (9) units per building) as an *option*. The attached product allows the developer to respond to market conditions by offering a more diverse housing type within the area, which has been successful in several Alachua County subdivisions. The optional attached units are only permitted in a centrally located area (Developable Area 'B' highlighted in yellow in **Figure 5**) to ensure compatibility with adjacent properties. If attached units are constructed, overall density shall remain at or below four (4) dwelling units per acre.

To further ensure compatibility, a 50'-wide buffer is located along the east property boundary and the single-family residential lots located along the east property boundary are 50% wider than the other single-family residential lots within the development. The wider lots are in Developable Area C on the PD Master Plan and highlighted in blue in **Figure 5**.

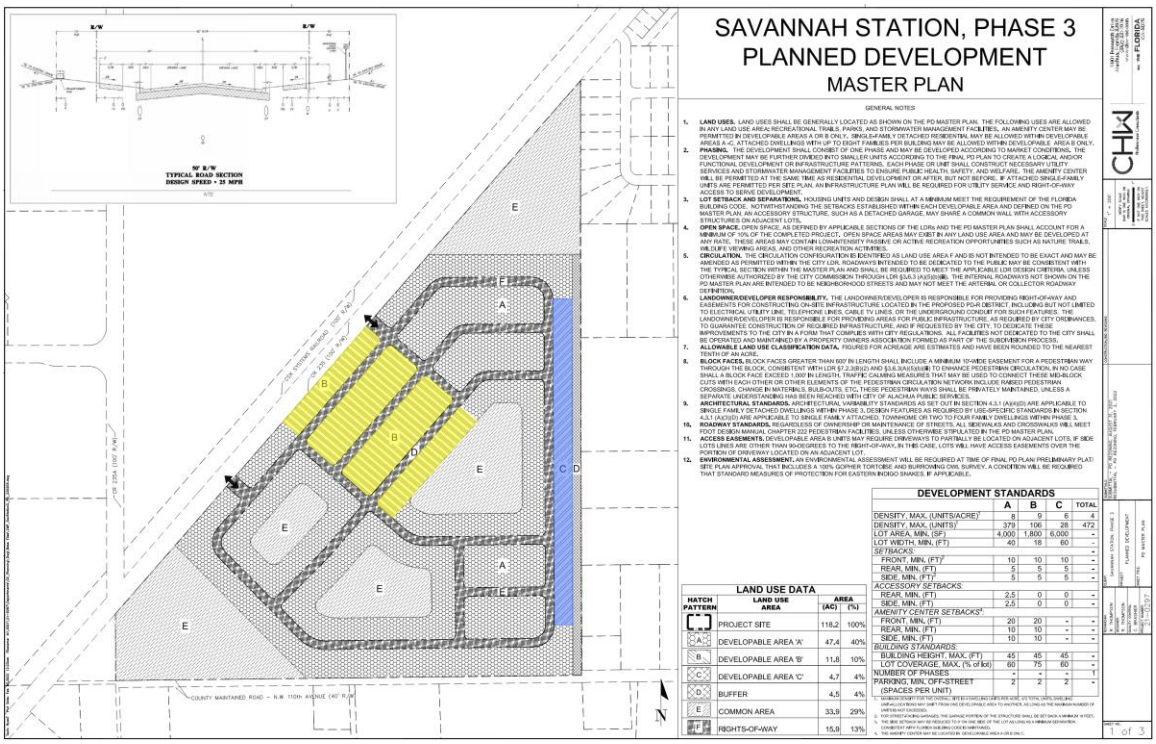

Figure 5: Proposed PD Master Plan

3. IMPACT ANALYSIS

LEVEL OF SERVICE CONCURRENCY

This Rezoning application requests to change the ±118.2-acre site's existing zoning designation from A to PD-R at a density consistent with the subject parcels' underlying Moderate Density Residential FLU. This impact analysis is based on *both the net difference* between the existing and proposed impacts *and the proposed maximum* development potential to transportation and public facility infrastructure, with one exception: potable water and sanitary sewer are based on maximum development potential only. Existing and proposed density for the project site are as follows:

- Existing Maximum Permitted Density ('A' Zoning district):
  - ±118.2 ac * 1 du/5 ac = 23 du
- Proposed Maximum Permitted Density ('PD-R' Zoning district):
  - ±118.2 ac * 4 du/ac = 472 du

Trip generation figures are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual, 10th Edition. Data for subsequent tables are from the City of Alachua June 2021 Development Monitoring Report, as well as, data obtained within the City Comprehensive Plan and Florida Administrative Code (FAC).

Roadways / Transportation

Table 2: Projected Net Trip Generation

Land Use[1] (ITE)	Units	Daily		AM Peak		PM Peak	
		Rate	Trips	Rate	Trips	Rate	Trips
Proposed							
Single-Family Detached Housing (ITE 210)	472	9.52	4,493	0.77	363	1.02	481

1. *Source: ITE Trip Generation 10th Edition*

Conclusion: Approval of this Rezoning application increases the subject property's maximum development potential and thus, result in a potential net increase of daily vehicle trips generated by the site. However, approval of this application *will not* negatively impact the adopted LOS for adjacent and nearby roadways.

Tables 4a, 4b, and 4c calculate projected impacts on adjacent roadways based on the site's net difference between existing and proposed maximum development potential.

Table 4a: Projected Net Impacts on Roadways, CR 235

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *NOTE: Projected trip distribution percentage is estimated to be **50%**.*

Conclusion: Conclusion: Since both scenarios are estimated to generate more than 1,000 external average daily trips (ADT), LDR §2.4.14(H)(2)(b) identifies affected roadways as those on which the development's impacts are five percent (5%) or greater of the Maximum Service Volume (MSV) of the roadway and all roadway segments located partially or wholly within one-half mile of the development's ingress/egress, or the nearest major intersection.

In both scenarios, the only affected roadways are CR 235, which the project site is directly fronting, CR 2054 East, which is estimated to receive 25% of the total projected AADT, and CR 235A South, which is estimated to receive 50% of the total projected AADT. This development will not contribute more than 5% to any other roadway's maximum service volume within the City of Alachua. Tables 4a through 5c demonstrate that each affected roadway segment will continue to retain sufficient roadway capacity during both AADT and PM Peak. In fact, none of the affected roadway segments will experience a failing roadway LOS because of this Rezoning application's approval.

Potable Water / Sanitary Sewer / Solid Waste

Potable water, sanitary sewer, and solid waste calculations are based on the site's maximum development potential, rather than the net difference between the existing and proposed maximum impacts.

Table 6: Projected Potable Water Impacts

System Category	Gallons Per Day (GPD)
Current Permitted Capacity[1]	2,300,000
Less actual Potable Water Flows[1]	1,300,250
Reserved Capacity[1]	156,701
Residual Capacity[1]	843,049
Percentage of Permitted Design Capacity Utilized[1]	63.35%
Projected Potable Water Demand from Proposed Project[2]	127,440
Residual Capacity after Proposed Project	**715,609**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan & Chapter 64-E, F.A.C. Formula used: (472 du x 275 gallons per unit per day)*

Conclusion: The project site will be served by existing City of Alachua potable water infrastructure. The potential net impacts from the intended residential development *will not* negatively impact the City's adopted LOS for potable water.

Table 7: Projected Sanitary Sewer Impacts

System Category	Gallons Per Day (GPD)
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less actual Treatment Plant Flows[1]	677,000
Reserved Capacity[1]	137,740
Residual Capacity[1]	685,260
Percentage of Permitted Design Capacity Utilized[1]	54.32%
Projected Sanitary Sewer Demand from Proposed Project[2]	118,000
Residual Capacity after Proposed Project	**567,260**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan & Chapter 64-E, F.A.C. Formula used: (472 du x 250 gallons per unit per day)*

Conclusion: The project site will be served by existing City of Alachua wastewater infrastructure. The potential net impacts from the intended residential development *will not* negatively impact the City's adopted LOS for sanitary sewer.

Table 8: Projected Solid Waste Impacts

System Category	LBs Per Day	Tons Per Year
Existing Demand[1]	41,880.00	7,643.10
Reserved Capacity[1]	17,139.34	3,127.93
New River Solid Waste Facility Capacity[1]	50 years	
Solid Waste Generated By Proposed Project[2]		**895.9**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: Sincero and Sincero; Environmental Engineering: A Design Approach. Prentice Hall, New Jersey, 1996. Formula used: (472 du x 2.6 persons per du x .73 per capita)*

Conclusion: Solid waste facility capacity exists to adequately serve the intended residential development for the subject property. Thus, approval of this Rezoning application will not negatively impact the City's adopted LOS for this system.

Public School and Recreation Impact

The City of Alachua requires all Rezoning applications involving residential developments to include an estimated Public School Generation analysis. This is conducted by completing the City's Public School Student Generation Calculation Form. A completed copy of this form has been included within this application's submittal. The development's estimated impact on the City's Public School System is found in **Table 9**.

Table 9: Projected Public School Demand

Land Use (ITE)	Units	Elem.		Middle		High	
		Rate[1]	Total	Rate[1]	Total	Rate[1]	Total
Proposed							
Single-Family Residential	472	.15	70	.07	33	.09	42

1. *Source: City of Alachua School Concurrency Form*

Conclusion: Approval of this Rezoning application *will not* negatively impact the Public School System.

Table 10a: Recreational Impacts

System Category	Acreage
Existing City of Alachua Acreage[1]	135.48
Acreage Required to Serve Existing Population[1]	52.35
Reserved Capacity[1]	2.2
Available Recreation Acerage[1]	80.93
Proposed Recreational Impact[2]	6.136
Residual Recreational Capacity After Proposed Development	**74.794**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: 472 units x 2.6 person per du x (5 acres/1,000 persons)*

Table 10b: Improved Passive Park Space Analysis

System Category	Acreage
Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	10.91
Existing Improved Passive Park Space Provided[1]	34.82
Improved Passive Park Space Utilized by Existing Population & Reserved Capacity[1]	**31.33%**
Proposed Recreational Impact[2]	1.23
Improved Passive Park Space Utilized After Proposed Development	**34.9%**

1. *Source: City of Alachua June 2021 Development Monitoring Report*
2. *Source: City of Alachua Comprehensive Plan Recreation Element. Formula used: 472 units x 2.6 person per du x (5 acres/1,000 persons) x 20%*

Conclusion: The City of Alachua currently possesses considerable excess acreage for local recreation activities. In addition, both Phases of Savannah Station will have recreational facilities onsite including, but not limited to, outdoor workout facilities and passive trails. Thus, the intended residential development is expected to have a minimal impact on the City's current recreational infrastructure.

4. CONSISTENCY WITH CITY OF ALACHUA COMPREHENSIVE PLAN

This section identifies specific City of Alachua Comprehensive Plan Goals, Objectives, and Policies and explains how this Rezoning application is consistent with each. Text from the City of Alachua is provided in normal font while consistency statements are provided in **bold**.

FUTURE LAND USE ELEMENT

Policy 1.2.a: Moderate density residential (0 to 4 dwelling units per acre): The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:

1. Single family, conventional dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria;
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments (PD-R);
8. Supporting community services, such as schools, houses of worship, parks, and community centers

This application seeks to rezone the project site from A to PD-R—consistent with the list of uses permitted within the site's existing Moderate Density Residential FLU designation. Overall density shall not exceed four (4) dwelling units per acre.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PD's for use within residential land use categories. Those regulations shall be developed to achieve the following:

1. High quality residential development through a mixture of housing types, prices, and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.

As shown in the PD Master Plan submitted with this application, all onsite dwelling units shall be single-family homes, both detached and attached—consistent with Policy 2.1.a.1. of the City of Alachua Comprehensive Plan, other Savannah Station phases, and nearby single-family developments.

2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.

No non-residential activities are being proposed within the site at this time. However, if nonresidential onsite uses are desired in the future, a Rezoning will be required to include all current and proposed uses for project area.

3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.

The subject PD-R will far exceed the minimum amount of open space required by Policy 2.5.a. of the Comprehensive Plan. Onsite activities for residents will include passive trails, outdoor workout facilities, and/or community gathering spaces.

4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, nonvehicular and vehicular modes of transportation.

The site shall be designed to support multiple methods of internal transportation by promoting pedestrian-friendly block sizes, sidewalk infrastructure, and streetlighting systems. Block lengths that exceed the maximum 600', as per LDR §7.2.3(B)(2), shall include a 10' easement for a pedestrian way, as described in LDR §7.2.3(B)(4). In no case shall a block face exceed 1,000' in length.

5. Conservation of materials, financial resources and energy through efficient design of infrastructure.

Savannah Station Phase 3 is the logical expansion of existing City of Alachua potable water and sanitary sewer infrastructure currently serving area residential and non-residential uses.

To avoid constructing roadway infrastructure that is not necessary to enhance roadway capacity, 10' easement for pedestrian ways are proposed on blocks that exceed 600' in length. The pedestrian ways will ensure a walkable neighborhood while the reduced roadway infrastructure will conserve materials, financial resources, and pervious surface area.

Policy 2.4.b: Landscaping: Buffering – A buffer consists of horizontal space (land) and vertical elements (plants, berms, fences, walls) that physically separate and visually screen adjacent land uses. The City shall establish buffer yard requirements that are based on the compatibility of the adjacent uses and the desired result of the buffer.

As demonstrated on the PD Master Plan submitted with this application, Land Use Area D is a 50'-wide buffer along the east boundary, adjacent to legal non-conforming residential lots in unincorporated Alachua County.

Policy 2.5.a: There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.

As illustrated in the proposed PD Master Plan submitted with this report, the proposed development far exceeds the required 10% minimum. Onsite open spaces shall be comprised of common area, stormwater management facilities, landscaping.

Objective 4.1: Infill development shall be encouraged in order to protect the unique character of existing neighborhoods and commercial developments, provide for a safe urban environment, increase densities and intensities in a manner compatible with existing uses, provide open spaces, and restore or maintain economic vitality and cultural diversity.

The project site is located within a growing area of the City. Approval of this Rezoning will encourage urban infill development on adjacent properties with access to City of Alachua public facilities and services. The proposed residential development is consistent with the existing residential development pattern located along the CR 235 corridor and helps reduce development pressures in the urban fringe and in more rural areas of the City not served by public facilities and services.

GOAL 5: Development Standards: The City shall include provisions through its comprehensive plan amendment process, development review process and in its land development regulations for development standards that address natural features and availability of facilities and services. These development standards will strive to protect natural resources and public facility resources while allowing for innovative and flexible development patterns.

Section 4 and 5 of this report demonstrate how the proposed plan is consistent with the development standards set forth by the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

There are no onsite wetlands or flood areas that would make this project site unable to support the proposed plan.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

There are two (2) small locations on site with steep slopes (5-8%) that are utilized for stormwater management facilities.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

There are currently six (6) types of soils located onsite:

- **Kendrick Sand, 2 – 5% Slopes (Hydro Group: B)**
- **Arredondo Fine Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Arredondo Fine Sand, 5 – 8% Slopes (Hydro Group: A)**
- **Gainesville Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Lochloosa Fine Sand 5 – 8% Slopes (Hydro group: B)**
- **Millhopper Sand, 0 – 5% Slopes (Hydro Group: A)**

According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

There are no FEMA flood zone areas located on the project site.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

The subject property does not contain onsite wetland features, as evidenced by the best available desktop data and analysis. During site plan preparation, a professional environmental scientist shall review the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

No listed species are known onsite. An environmental resource assessment shall be conducted onsite during development review.

Objective 5.2: Availability of facilities and services: The City shall utilize a concurrency management system to ensure that the adopted level of service standards are maintained.

Section 3 of this report demonstrates the impacts this site will have on available facilities and services. As shown in Section 3, no facilities and/or services will operate below the adopted level of service.

Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water and sanitary sewer, stormwater, solid waste, public schools, and improved recreation in accordance with LOS standards adopted in the elements addressing these facilities.

Section 3 demonstrates how the proposed plan for the project site will not cause City of Alachua facilities to operate below the adopted level of service.

Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Ch. 163, Florida Statutes, development agreement has commenced.

A certification of level of service compliance shall be issued during development plan review, following the approved of this rezoning application.

CONSERVATION AND OPEN SPACE ELEMENT

Objective 1.5: Soils. The City shall protect soil resources through erosion and sedimentation control, by requiring proper design criteria on specific soils.

There are currently six (6) types of soils located onsite:

- **Kendrick Sand, 2 – 5% Slopes (Hydro Group: B)**
- **Arredondo Fine Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Arredondo Fine Sand, 5 – 8% Slopes (Hydro Group: A)**
- **Gainesville Sand, 0 – 5% Slopes (Hydro Group: A)**
- **Lochloosa Fine Sand 5 – 8% Slopes (Hydro group: B)**
- **Millhopper Sand, 0 – 5% Slopes (Hydro Group: A)**

According to the NRCS soil database, each of the six (6) sandy soil types mentioned above are conducive to residential developments of this nature with minimal limitations. No soil protection or intervention measures are required. Site design will address these soil composition limitations with properly-designed drainage and stormwater management facilities.

Objective 1.10: Wetlands. The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

The subject property does not contain onsite wetland features, as evidenced by the best available desktop data and analysis. During site plan preparation, a professional environmental scientist shall review the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

5. CONSISTENCY WITH THE LAND DEVELOPMENT REGULATIONS

The following identifies how this application is consistent with the City of Alachua's LDR. Language from the LDC is provided in normal font, and the consistency statements are provided in **bold** font.

2.4.2. Site specific amendments to Official Zoning Atlas

(E) Standards for site-specific amendments to the Official Zoning Atlas. The advisability of making a site-specific amendment to the Official Zoning Atlas is a matter subject to quasi-judicial review by the City Commission and constitutes the implementation of the general land use policies established in these LDRs and the Comprehensive Plan. In determining whether to approve a proposed site-specific amendment to the Official Zoning Atlas, the City Commission shall find that:

(1) Competent substantial evidence provided. The applicant has provided competent substantial evidence that is made part of the record of the hearing that:

(a) *Consistent with Comprehensive Plan.* The proposed amendment is consistent with and furthers the goals, objectives and policies of the Comprehensive Plan.

As demonstrated in Section 4 of this report, this application's intent is compatible with all appropriate goals, objectives, and policies found within the City of Alachua Comprehensive Plan. In addition, the proposed Rezoning to the PD-R district is compatible with the site's existing Moderate Density Residential FLU designation.

(b) *Consistent with ordinances.* The proposed amendment is not in conflict with any portion of these LDRs or any of the City Code of Ordinances.

Section 5 of this report demonstrates how this application is consistent with all relevant sections of the City LDR and Code of Ordinances. Items that are applicable to this proposal have been addressed diligently in the following pages to ensure that the proposed Rezoning is consistent with the standards discussed within both City of Alachua documents.

(c) *Logical development pattern.* The proposed amendment would result in a logical and orderly development pattern.

The proposed infill development is located along an existing residential corridor, as evidenced by the site's adjacency to other residential developments, including Savannah Station Phases 1 and 2, Pilot Forest, Shady Lane Acres, and Tara Village.

(d) *Premature development.* The proposed amendment will not create premature development in undeveloped or rural areas.

This application does not propose the opportunity for onsite premature development. This amendment seeks to permit the availability for residential infill development along a major corridor.

(e) *Incompatible with adjacent lands.* The uses permitted by the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands.

The site is located immediately adjacent to CR 235 and NW 110th Avenue. Property abutting the project site include Pilot Forest five to six (5-6) large residential lots. The proposed PD-R district permits compatible residential uses. In addition, the residential intent of this development is consistent with Phases 1 and 2 and nearby residential developments including Pilot Forest, Shady Lane Acres, and Tara Village. The optional attached units are only permitted in a centrally located area (Developable Area 'B' highlighted in Figure 5) to ensure compatibility with adjacent properties.

To further ensure compatibility, a 50'-wide buffer is located along the east property boundary and the single-family residential lots located along the east property boundary are 50% wider than the other single-family residential lots within the development.

(f) *Adverse effect on local character.* The proposed amendment will not adversely affect the character of the general area where it is proposed to be located by creating excessive traffic, density and/or intensities of use, building height and bulk, noise, lights or other physical effects or nuisances.

The proposed residential development is located within close proximity to multiple single-family neighborhoods and lots. The site's development standards are compatible with the underlying Moderate Density Residential FLU and the development pattern established by nearby single-family homes. Therefore, approval of this application for PD-R Zoning will not generate traffic, uses, noise, or lighting that is unlike what is already found within this area of the City.

(g) *Not deviate from pattern of development.* The uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located.

The site is located along CR 235 at the City's limits. The south side of this section of CR 235 is predominantly residential development from the project site to the I-75 overpass to the northeast. Approval of this application to change the project site's existing zoning will allow the development of similar residential uses within this area, such as Savannah Station Phases 1 and 2 and Pilot Forest, consistent with the development pattern that has formed over the last 60 years.

The north side of this section of CR 235 is a portion of the City's industrial area, characterized by several distribution centers. Land south and east of the site consistent of legal non-conforming residential lots in unincorporated Alachua County. These parcels are within the City's Urban Reserve and outside the County's Growth Management Area. As the City of Alachua continues to grow, these lots can redevelop by voluntarily annexing into the City of Alachua and requesting residential density and development standards consistent with this application.

(h) *Encourage sprawl.* The proposed amendment will not encourage urban sprawl, either by resulting in strip or ribbon commercial development, leap-frog development or low-density single dimensional development.

This undeveloped project site currently resides within an area of the City with strong single-family character. Approval of this application assists the City in limiting local sprawl by permitting residential infill opportunities for the project site along an existing residential corridor.

(i) *Spot zoning.* The proposed amendment will not result in the creation of an isolated zone district unrelated to adjacent and surrounding zone districts (spot zoning).

The proposed PD will permit phase 3 of Savannah Station, located less than 400 north on CR 235. Savannah Station Phase 2 and Tara Village have PD-R zoning designations.

(j) *Public facilities.* The proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, stormwater management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development.

The site is located adjacent to City of Alachua potable water and sanitary sewer systems. Phase 3 will connect to this utility system for the intended residential development's potable water and wastewater needs.

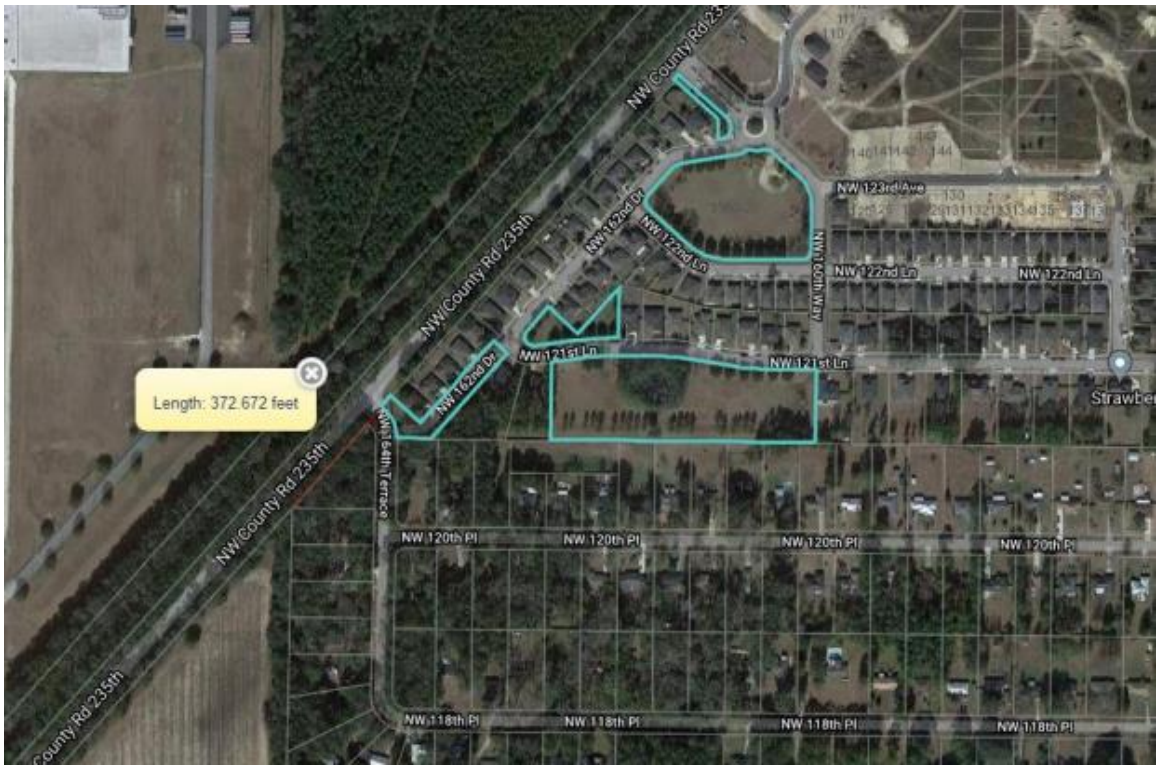

Figure 6: Proximity to Savannah Station Phase 1

(k) *No adverse effect on the environment.* The proposed amendment would not result in significantly adverse impacts on the natural environment, including, but not limited to, water, air, noise, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment.

According to the most updated National Wetlands Inventory (NWI) and Federal Emergency Management Agency's (FEMA) data, no wetland and floodplain areas were found within the site. In addition, onsite soils are conducive to residential development. Onsite stormwater management facilities will respect the site's natural topography by draining to the lowest portions of the site. During site plan preparation, a professional environmental scientist shall review the site and determine the significance of natural features, as required by City LDR. Significant onsite natural features, if present, shall be avoided to the maximum extent practicable or mitigated consistent with City LDR requirements.

In addition, local noise and lighting pollution will be minimal as the proposed residential development is not unlike the noise and light currently being generated from other nearby residential developments such as Savannah Station Phases 1 and 2, Pilot Forest, Shady Lane Acres, and Tara Village.

3.6.1 General Provisions

(A) *General Purpose.* The planned development (PD) districts are established for the purpose of encouraging innovative land planning and site design concepts that conform to community quality of life benchmarks and that achieve a high quality of development, environmental sensitivity, energy efficiency, and other City goals by:

(3) Greater freedom to provide mix of uses and housing types. Allowing greater freedom in providing a mix of land uses in the same development, including a mix of housing types, lot sizes, and densities;

The proposed Savannah Station Phase 3 will include a maximum of 472 residential units, four (4) units/acre with varying lot sizes and unit types. The site is adjacent to City of Alachua potable water and sanitary sewer and Alachua County Arterial roadways, all with adequate capacity to serve the proposed development. The proposed PD-R zoning is necessary to establish minimum lot sizes, lot width, and other development standards. As illustrated on the PD Master Plan, a ±20'-wide common area is proposed along CR 235 where existing trees are located along the right-of-way line.

(B) *Types of PD districts.* There are four types of PD options. They are subject to the development review procedures of Section 2.4.3, Planned development, the general standards of Subsection 3.6.2 of this section, General standards for all PD districts, and the specific standards for the individual PD options in Subsection 3.6.3 of this section, Additional standards for PD districts. The four PD options are described more specifically as follows:

(1) *Planned Development-Residential District (PD-R).* The purpose of the Planned Development-Residential (PD-R) District is to provide a mix of residential uses using innovative and creative design elements, while at the same time providing an efficient use of open space. Commercial uses may be allowed in the PD-R district primarily to serve the needs of the residents in the development.

In part, the intent of this PD-R Rezoning application is to reduce the site's minimum required lot size to ensure that Phase 3 can achieve the residential units permitted by the site's underlying Moderate Density Residential FLU designation while meeting City of Alachua requirements for roadway block lengths, open spaces, and stormwater management facilities. Rezoning this property to PD-R allows the applicant to use innovative and efficient use of dwelling units, infrastructure, and open spaces to develop the site consistent with the entitlements permitted by the site's underlying Moderate Density Residential FLU designation.

3.6.2. *General Standards for all PD districts.*

(A) *Development parameters.* Prior to the approval of a PD zone district designation, the City Commission shall find the application for the PD zoning district designation and the required PD Master Plan complies with the following standards:

(1) *Master Plan.* The PD Master Plan:

(a) Identifies the general location of land uses within individual development areas or development pods and the mix of land uses;

As shown on the PD Master Plan, the subject property will contain residential units and open spaces for stormwater management facilities and public enjoyment. No nonresidential uses are proposed at this time.

(b) Calculates the number, type, and mix of land uses, including the total number of residential units, residential densities, and nonresidential intensities within each development area or development pods and the total number, type, and mix of land uses for the entire PD Master Plan;

The PD Master Plan demonstrates that 472 dwelling units are being requested for Savannah Station Phase 3—consistent with the site's underlying Moderate Density Residential FLU. No nonresidential uses are proposed at this time.

(c) Identifies the general location of open space;

Onsite open spaces shall be located within the common area delineated on the PD Master Plan and is comprised of stormwater management facilities, landscaping, and gathering space.

(d) Identifies the location of environmentally sensitive lands, wildlife habitat, and stream corridors;

As discussed in earlier sections of this report, no significant environmental features such as wetlands, floodplains, waterbodies, or protected species are located within the site.

(e) Identifies the on-site transportation circulation system including arterial and collector roads, existing or projected transit corridors, and pedestrian and bicycle pathways;

The PD Master Plan shows all proposed internal roadways and a typical cross-section. The site was designed with the pedestrian in mind by including pedestrian-friendly block sizes, lighting systems, and sidewalk infrastructure internal to the development. Blocks that exceed 600' in length shall include a 10' easement for a pedestrian way consistent with that described in LDR §7.2.3(B)(4). In no case shall a block face exceed 1,000' in length.

(f) Identifies on-site potable water and wastewater facilities; and

The PD Utility Plan shows all proposed internal potable water and sanitary sewer mains.

(g) Identifies the general location of all public facility sites serving the development, including transportation, potable water, wastewater, parks, fire, police, EMS, stormwater, solid waste and schools.

As shown on the PD Master Plan, the site is adjacent to City of Alachua potable water and sanitary sewer systems. Phase 3 will connect to this utility system for the intended residential development's potable water and wastewater needs. Figure 7 illustrates the site's proximity to public facilities.

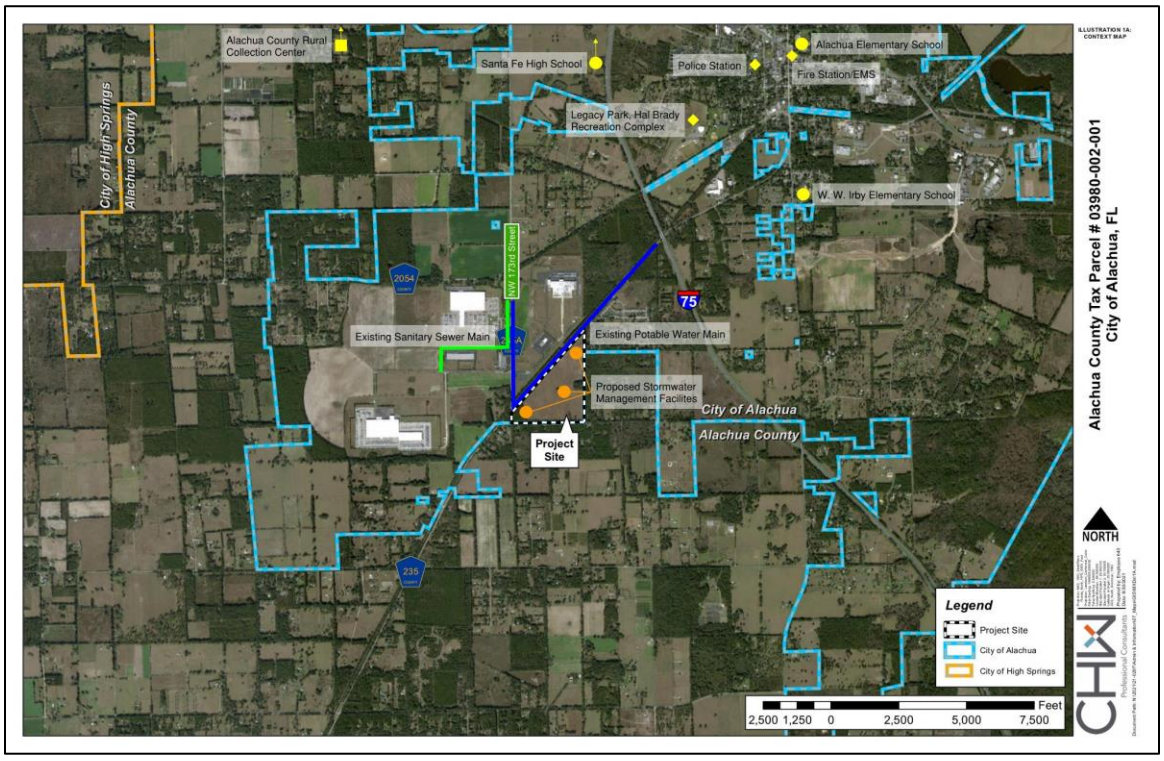

Figure 7: Proximity to Public Facilities

(2) *Consistency with the Comprehensive Plan.* The PD zone district designation and the PD Master Plan is consistent with the Comprehensive Plan.

As demonstrated in Section 4 of this report, this application's intent is compatible with all appropriate goals, objectives, and policies found within the City of Alachua Comprehensive Plan. In addition, the proposed Rezoning to the PD-R district is compatible with the site's existing Moderate Density Residential FLU designation.

(3) Compatibility with surrounding residential areas. Development along the perimeter of a PD district is compatible with adjacent existing or proposed future development. In cases where there are issues of compatibility, the PD Master Plan shall provide for transition areas at the edges of the PD district that provide for appropriate buffering and/or ensure a complimentary character of uses. Complimentary character shall be identified based on densities/intensities; lot size and dimensions; building height; building mass and scale; hours of operation; exterior lighting; and siting of service areas.

The proposed residential development is located adjacent to, and within close proximity to, multiple single-family neighborhoods and lots including Savannah Station Phases I and 2, Shady Acres, Pilot Forest, and Tara Village. No

compatibility buffers are required between the proposed and existing residential uses. The optional attached units are only permitted in a centrally located area (Developable Area 'B' highlighted in Figure 5) to ensure compatibility with adjacent properties.

To further ensure compatibility, a 50'-wide buffer is located along the east property boundary and the single-family residential lots located along the east property boundary are 50% wider than the other single-family residential lots within the development.

(4) *Development phasing plan.* If there are phases of development proposed for the PD, a development phasing plan shall be provided for the PD Master Plan that identifies the general sequence or phases in which the land is proposed to be developed, including how residential and nonresidential development will be timed, how infrastructure and open space will be provided and timed, and how development will be coordinated with the City's capital improvements program. The phasing plan shall be established at the time of approval of the PD Master Plan. It is permissible for a development phasing plan to include only one phase.

The development shall consist of one phase and may be developed according to market conditions, The development may be further divided into smaller units according to the Final PD Plan to create a logical and/or functional development or infrastructure patterns.

(5) *Conversion schedule.* The PD Master Plan may include a conversion schedule that identifies the range of conversion that may occur between different types of residential uses and between different types of nonresidential uses (i.e., residential to residential, or nonresidential to nonresidential) within the PD Master Plan. These conversions may occur within development areas and between development areas, as long as they occur within the same scheduled phase of development in the development phasing plan, and are consistent with established ranges of conversion set down in the conversion schedule.

A conversion schedule is unnecessary for this submittal, as non-residential uses are not proposed.

(6) *Public facilities.*

(a) The PD Master Plan shall include a transportation component that demonstrates there is or will be adequate capacity concurrent with impacts of development on the City's road system to accommodate the development proposed in the PD Master Plan.

The PD Utility Plan submitted with this report shall contain a reference to the transportation concurrency calculations shown in Tables 2 – 5c of this report. As shown in these tables, adequate capacity exists for the intended residential development along all major City of Alachua roadway segments.

(b) The PD Master Plan shall include a potable water and wastewater component that demonstrates adequate capacity for potable water and wastewater is available or will be available concurrent with impacts of development at the time development occurs to accommodate the development proposed in the PD Master Plan.

As shown on the PD Utility Plan, the site will be serviced by City of Alachua potable water and sanitary sewer systems. As reflected in both Section 3 of this report and the PD Utility Plan, onsite uses shall not negatively impact potable water and wastewater LOS.

(c) The PD Master Plan shall include a parks component that demonstrates that adequate parks and recreation facilities are available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

As shown in both Section 3 of this report and the PD Utility Plan, the City of Alachua currently possesses considerable excess acreage for local recreation activities. In addition, the proposed PD Master Plan illustrates that Savannah Station Phase 3 has common area suitable for resident recreation. Thus, the intended residential development is expected to have a minimal impact on the City's current recreational infrastructure.

(d) The PD Master Plan shall include a solid waste component that demonstrates that adequate capacity for solid waste is available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

As calculated in both Section 3 of this report and the PD Utility Plan, local solid waste capacity exists to adequately facilitate the intended residential development's estimated solid waste demands. Approval of this rezoning application will not negatively impact the City's adopted LOS.

(e) The PD Master Plan shall include a stormwater component that demonstrates that adequate capacity for treatment of stormwater runoff is available or will be available concurrent with impacts of development to accommodate the development proposed in the PD Master Plan.

As identified on the PD Master Plan submitted with this report, onsite stormwater management facilities will be installed so that the peak rate of post-development runoff will not exceed the peak-rate of pre-development runoff for storm events. In addition, these facilities will be designed to be aesthetically pleasing, protect natural features, promote multiple uses (such as functional open space), and minimize erosion, sedimentation, and stormwater runoff wherever practicable.

(7) Planned development agreement. Concurrent with the approval of the adopting ordinance for the PD zone district designation and the PD Master Plan, a PD agreement shall be established binding the PD to any conditions placed in the adopting ordinance and PD Plan. The PD agreement shall include, but not be limited to:

(a) The PD Master Plan, including any PD standards.

(b) Conditions related to the approval of the PD Master Plan.

(c) Conditions related to the form and design of development in the PD.

(d) Provisions addressing how transportation, potable water, wastewater, stormwater management, park, and other public facilities will be provided to accommodate the development proposed for the PD Master Plan, and if phased, how public facilities will be phased accordingly.

(e) Provisions related to environmental protection and monitoring.

(f) Provisions addressing concurrency compliance requirements.

(g) Any other provisions the City Commission determines is relevant and necessary to implement the terms and conditions of the PD Master Plan and any PD terms and conditions statements.

The applicant shall comply with this section of the LDR by accepting the terms and conditions of the planned development agreement at the appropriate stage of the development review process.

3.6.3 Additional Standards for PD districts

(A) *PD-R, Planned Development-Residential District*

(1) *Minimum area.* A PD-R district shall be a minimum of ten acres in area. The City Commission may waive the minimum size requirement based on a finding that creative site planning through zoning to a PD-R district is necessary to address a physical development constraint, protect sensitive natural areas, or promote a community goal when more conventional development or subdivision would be difficult or undesirable given the constraints on development.

The project site is ±118.2 acres which far exceeds the ten-acre minimum identified in 3.6.3(A)(1) of the City LDR.

(2) *Uses.* The uses allowed in the PD-R district are identified in Table 4.1-1, Table of Allowed Uses. Allowed uses are subject to any use regulations applicable to the PD-R district.

Table 4.1-1 of the LDR shows that the intended use of single-family dwelling units, both detached and attached, are permitted within the proposed PD-R district and are also consistent with the uses permitted within the site's underlying Moderate Density Residential FLU designation.

(3) *Densities/intensities.* The densities for residential development and the intensities for nonresidential development for the PD Master Plan and PD-R district designation shall be established in the PD Master Plan, and shall be consistent with the Comprehensive Plan. Densities and

intensities may exceed that allowed in the base zone districts being replaced by the PD-R district.

This Rezoning application requests to change the site's existing zoning designation from A to PD-R at a density consistent with the subject parcels' underlying Moderate Density Residential FLU. This density is also comparable to density found within Phases 1 and 2.

(4) *Dimensional standards.* The dimensional standards of the underlying base zone district being replaced by the PD-R district shall be incorporated into the PD Master Plan and apply to each development area of the PD-R district unless they are modified in ways that are consistent with the general intent and goals for development of the PD-R district and the scale and character of development in the City. Dimensional standards shall include the following:

(a) *Minimum dimensional requirements.* The minimum lot area, minimum lot width, minimum setback, maximum lot coverage, and maximum height for development.

As shown on the PD Master Plan submitted with this report, the proposed Savannah Station Phase 3 will include a maximum of 472 single-family residential units. The proposed PD-R zoning is necessary to establish a minimum lot size of 4,000 sq. ft. for detached single-family in Developable Area 'A', 1,800 sq. ft. for attached single-family in Developable Area 'B', and a minimum lot size of 6,000 sq. ft. for detached single-family in Developable Area 'C', as illustrated on the PD Master Plan. All other dimensional requirements mentioned in the LDR section such as minimum setback, maximum lot coverage, and maximum building height are identified on the PD Master Plan.

(b) *Setbacks from adjoining residential uses.* Minimum setbacks or buffers from adjoining residential development or zone districts.

Property abutting the project site include Pilot Forest and six (6) legal non-conforming residential lots in unincorporated Alachua County to the east. As shown on the PD Master Plan, a 50'-wide common area is proposed along the site's east property boundary.

(5) *Development standards.* Unless otherwise specifically modified by a PD Master Plan, development in a PD-R district shall comply with the applicable standards Article 6, Development Standards, and Article 7, Subdivision Standards. All modifications to a development standard in Article 6 or Article 7 shall be consistent with this section, and shall be included as a part of the PD Master Plan.

Unless, otherwise noted on the PD Master Plan or in the final PD conditions, the subject property shall be designed consistent with applicable development standards discussed in Article 6 and 7 of the City of Alachua LDR.

(a) General development standards. The following Table 3.6-1, Development Standards Applicable in the PD-R District, specifies the

development standards applicable to development in the PD-R district, and the procedure for modifying a development standard.

To the maximum extent practicable, the development standards referenced in Table 3.6-1. shall be adhered to throughout the site's design process. If modification to these standards are necessary for optimal site development, then the appropriate procedures for modifications included in the previously-mentioned table will be adhered to.

(b) *Public facilities standards.* The PD Master Plan shall ensure that impacts from the development are addressed for the following public facilities:

(i) *Potable water.* The PD Master Plan shall establish the general location of on-site potable water facilities and how they will connect to the City's potable water system consistent with City laws, and how dedication of land, easements, and/or on-site construction of all potable water facilities/improvements will occur in a manner that complies with City laws.

(ii) *Wastewater.* The PD Master Plan shall establish the general location of on-site wastewater facilities and how they will connect to the City's or other wastewater lines and mains and sewer interceptor lines consistent with City laws, and how dedication of land, easements, and/or on-site construction of all wastewater facilities/improvements will occur in a manner that complies with City laws.

The PD Utility Plan submitted with this report illustrates the approximate location of existing and proposed potable water and sanitary lines. In addition, the proposed PD Utility Plan will reference Section 3 of this report to illustrate that the site's projected potable water and wastewater demand will not cause City infrastructure to drop below its adopted LOS standards.

(iii) *Streets.* The PD Master Plan District shall establish the design of public streets within the PD-R in ways that comply with all applicable City standards, except that right-of-way, pavement widths, street widths, required materials, turning radii, and other design standards may be modified or reduced by the City Commission where it is found that:

a. The reduction or modification is necessary as a traffic-calming measure;
b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;
c. Access for emergency service vehicles is not substantially impaired;
d. Adequate off-street parking is provided for the uses proposed; and
e. Adequate space for public utilities is provided within the right-of-way.

The PD Master Plan submitted concurrently with this report shows the proposed design of the Phase 3 roadway and pedestrian infrastructure. Roadways shall have a typical cross-section, as illustrated on the PD Master Plan, that is consistent with LDR standards.

Blocks that exceed 600' in length shall include a 10' easement for a pedestrian way consistent with LDR §7.2.3(B)(4). In no case shall a block face exceed 1,000'

in length. These pedestrian ways are considered public streets with reduced right-of-way and pavement widths. The intent is to provide pedestrian corridors separate from vehicles. The intersection of the typical roadways and these pedestrian ways may be utilized for traffic calming. Typical roadways shall have sufficient right-of-way and interconnection to meet emergency service vehicles, off-street parking, and public utility needs.

(iv) *Stormwater.* The PD Master Plan District shall establish the design of a stormwater management system within the PD-R in ways that comply with all applicable City standards.

As identified on the PD Utility Plan submitted with this report, onsite stormwater management facilities will be installed so that the peak rate of post-development runoff will not exceed the peak-rate of pre-development runoff for storm events. In addition, these facilities will be designed consistent with the City LDR to ensure that these systems are aesthetically pleasing, protect natural features, promote multiple uses (such as functional open space), and minimize erosion, sedimentation, and stormwater runoff wherever practicable.

(V) *Other.* The PD Master Plan shall establish the responsibility of the landowner/developer for providing right-of-way and easements and for constructing on-site facilities for all other infrastructure located on the site of the proposed PD-R district, including but not limited to, electrical utility lines, telephone lines, cable TV lines, or the underground conduit for such features. The PD Master Plan shall also establish the responsibility of the landowner/developer to make any other improvements as required by City ordinances, to guarantee construction of all required improvements, and, if requested by the City, to dedicate these improvements to the City in a form that complies with City laws. The PD Master Plan shall also specify the ownership, operation, and maintenance provisions for all on-site facilities not dedicated to the City.

The applicant understands these responsibilities and will provide all necessary right-of-way and easements necessary to facilitate the site's intended development.

10. School Concurrency Service Areas (SCSA): Based on the project location, identify the corresponding SCSA for each school type. Maps of the SCSAs can be obtained from the Alachua County Growth Management Department Map Gallery by clicking on the "Public Schools" tab: http://growth-management.alachuacounty.us/gis_services/map_gallery/

    Elementary: Alachua Elementary School

    Middle: Mebane Middle School

    High: Santa Fe High School

Explanation of Student Generation Calculation: Student Generation is calculated based on the type of residential development and the type of schools. The number of students stations (by school type – Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. **Calculations are rounded to the nearest whole number.** Student Generation for each school type is calculated individually, in order to correctly assess the impact on the School Concurrency Service Area (SCSA) for each school type (Elementary, Middle and High School).

# of Elementary School Student Stations = # of housing units x Elementary school student generation multiplier
# of Middle School Student Stations = # of housing units x Middle school student generation multiplier
# of High School Student Stations = # of housing units x High school student generation multiplier

Student Generation Calculations: Single Family Residential Development

Elementary School	472	units	x	.15	Elementary School Multiplier*	70	Student Stations**
Middle School	472	units	x	.07	Middle School Multiplier*	33	Student Stations**
High School	472	units	x	.09	High School Multiplier*	42	Student Stations**

Student Generation Calculations: Multi-Family Residential Development

Elementary School		units	x		Elementary School Multiplier*		Student Stations**
Middle School		units	x		Middle School Multiplier*		Student Stations**
High School		units	x		High School Multiplier*		Student Stations**

Student generation multipliers may be obtained from SBAC at:

EXEMPT DEVELOPMENTS (check all that apply):

- ☐ Existing legal lots eligible for a building permit.
- ☐ Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired.
- ☐ Amendments to final development orders for residential development approved prior to the effective date of public school concurrency, and which do not increase the number of students generated by the development.
- ☐ Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public Schools Facilities Element or the ILA.
- ☐ Group quarters that do not generate public school students, as described in the ILA.

A completeness review of the application will be conducted within 5 business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

CoA LDR §2.4.14(H)(2)

(2) Affected roadway segments. For the purposes of making concurrency determinations, affected roadway facilities shall be determined as follows:

(a) Development generating 1,000 or fewer trips. For proposed developments generating less than or equal to 1,000 external average daily trips (ADT), affected roadway segments are all those wholly or partially located within one-half mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater.

(b) Developments generating more than 1,000 trips.
(i) For proposed developments generating greater than 1,000 external average daily trips (ADT), affected roadway segments are those on which the development's impacts are five percent or greater of the maximum service volume of the roadway; and
(ii) The study area for proposed developments generating greater than 1,000 external average daily trips (ADT) shall include all roadway segments located partially or wholly within one-half mile of the development's ingress/egress, or to the nearest major intersection,

SAVANNAH STATION, PHASE 3
PLANNED DEVELOPMENT
MASTER PLAN

GENERAL NOTES

1. **LAND USES.** LAND USES SHALL BE GENERALLY LOCATED AS SHOWN ON THE PD MASTER PLAN. THE FOLLOWING USES ARE ALLOWED IN ANY LAND USE AREA: RECREATIONAL TRAILS, PARKS, AND STORMWATER MANAGEMENT FACILITIES. AN AMENITY CENTER MAY BE PERMITTED IN DEVELOPABLE AREAS A OR B ONLY. SINGLE-FAMILY DETACHED RESIDENTIAL MAY BE ALLOWED WITHIN DEVELOPABLE AREAS A -C, ATTACHED DWELLINGS WITH UP TO EIGHT FAMILIES PER BUILDING MAY BE ALLOWED WITHIN DEVELOPABLE AREA B ONLY.
2. **PHASING.** THE DEVELOPMENT SHALL CONSIST OF ONE PHASE AND MAY BE DEVELOPED ACCORDING TO MARKET CONDITIONS. THE DEVELOPMENT MAY BE FURTHER DIVIDED INTO SMALLER UNITS ACCORDING TO THE FINAL PD PLAN TO CREATE A LOGICAL AND/OR FUNCTIONAL DEVELOPMENT OR INFRASTRUCTURE PATTERNS. EACH PHASE OR UNIT SHALL CONSTRUCT NECESSARY UTILITY SERVICES AND STORMWATER MANAGEMENT FACILITIES TO ENSURE PUBLIC HEALTH, SAFETY, AND WELFARE. THE AMENITY CENTER WILL BE PERMITTED AT THE SAME TIME AS RESIDENTIAL DEVELOPMENT OR AFTER, BUT NOT BEFORE. IF ATTACHED SINGLE-FAMILY UNITS ARE PERMITTED PER SITE PLAN, AN INFRASTRUCTURE PLAN WILL BE REQUIRED FOR UTILITY SERVICE AND RIGHT-OF-WAY ACCESS TO SERVE DEVELOPMENT.
3. **LOT SETBACK AND SEPARATIONS.** HOUSING UNITS AND DESIGN SHALL AT A MINIMUM MEET THE REQUIREMENT OF THE FLORIDA BUILDING CODE. NOTWITHSTANDING THE SETBACKS ESTABLISHED WITHIN EACH DEVELOPABLE AREA AND DEFINED ON THE PD MASTER PLAN, AN ACCESSORY STRUCTURE, SUCH AS A DETACHED GARAGE, MAY SHARE A COMMON WALL WITH ACCESSORY STRUCTURES ON ADJACENT LOTS.
4. **OPEN SPACE.** OPEN SPACE, AS DEFINED BY APPLICABLE SECTIONS OF THE LDRs AND THE PD MASTER PLAN SHALL ACCOUNT FOR A MINIMUM OF 10% OF THE COMPLETED PROJECT. OPEN SPACE AREAS MAY EXIST IN ANY LAND USE AREA AND MAY BE DEVELOPED AT ANY RATE. THESE AREAS MAY CONTAIN LOW-INTENSITY PASSIVE OR ACTIVE RECREATION OPPORTUNITIES SUCH AS NATURE TRAILS, WILDLIFE VIEWING AREAS, AND OTHER RECREATION ACTIVITIES.
5. **CIRCULATION.** THE CIRCULATION CONFIGURATION IS IDENTIFIED AS LAND USE AREA F AND IS NOT INTENDED TO BE EXACT AND MAY BE AMENDED AS PERMITTED WITHIN THE CITY LDR. ROADWAYS INTENDED TO BE DEDICATED TO THE PUBLIC MAY BE CONSISTENT WITH THE TYPICAL SECTION WITHIN THE MASTER PLAN AND SHALL BE REQUIRED TO MEET THE APPLICABLE LDR DESIGN CRITERIA, UNLESS OTHERWISE AUTHORIZED BY THE CITY COMMISSION THROUGH LDR §3.6.3 (A)(5)(b)(iii). THE INTERNAL ROADWAYS NOT SHOWN ON THE PD MASTER PLAN ARE INTENDED TO BE NEIGHBORHOOD STREETS AND MAY NOT MEET THE ARTERIAL OR COLLECTOR ROADWAY DEFINITION.
6. **LANDOWNER/DEVELOPER RESPONSIBILITY.** THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING RIGHT-OF-WAY AND EASEMENTS FOR CONSTRUCTING ON-SITE INFRASTRUCTURE LOCATED IN THE PROPOSED PD-R DISTRICT, INCLUDING BUT NOT LIMITED TO ELECTRICAL UTILITY LINE, TELEPHONE LINES, CABLE TV LINES, OR THE UNDERGROUND CONDUIT FOR SUCH FEATURES. THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING AREAS FOR PUBLIC INFRASTRUCTURE, AS REQUIRED BY CITY ORDINANCES, TO GUARANTEE CONSTRUCTION OF REQUIRED INFRASTRUCTURE, AND IF REQUESTED BY THE CITY, TO DEDICATE THESE IMPROVEMENTS TO THE CITY IN A FORM THAT COMPLIES WITH CITY REGULATIONS. ALL FACILITIES NOT DEDICATED TO THE CITY SHALL BE OPERATED AND MAINTAINED BY A PROPERTY OWNERS ASSOCIATION FORMED AS PART OF THE SUBDIVISION PROCESS.
7. **ALLOWABLE LAND USE CLASSIFICATION DATA.** FIGURES FOR ACREAGE ARE ESTIMATES AND HAVE BEEN ROUNDED TO THE NEAREST TENTH OF AN ACRE.
8. **BLOCK FACES.** BLOCK FACES GREATER THAN 600' IN LENGTH SHALL INCLUDE A MINIMUM 10'-WIDE EASEMENT FOR A PEDESTRIAN WAY THROUGH THE BLOCK, CONSISTENT WITH LDR §7.2.3(B)(2) AND §3.6.3(A)(5)(b)(iii) TO ENHANCE PEDESTRIAN CIRCULATION. IN NO CASE SHALL A BLOCK FACE EXCEED 1,000' IN LENGTH. TRAFFIC CALMING MEASURES THAT MAY BE USED TO CONNECT THESE MID-BLOCK CUTS WITH EACH OTHER OR OTHER ELEMENTS OF THE PEDESTRIAN CIRCULATION NETWORK INCLUDE RAISED PEDESTRIAN CROSSINGS, CHANGE IN MATERIALS, BULB-OUTS, ETC. THESE PEDESTRIAN WAYS SHALL BE PRIVATELY MAINTAINED, UNLESS A SEPARATE UNDERSTANDING HAS BEEN REACHED WITH CITY OF ALACHUA PUBLIC SERVICES.
9. **ARCHITECTURAL STANDARDS.** ARCHITECTURAL VARIABILITY STANDARDS AS SET OUT IN SECTION 4.3.1 (A)(4)(D) ARE APPLICABLE TO SINGLE FAMILY DETACHED DWELLINGS WITHIN PHASE 3. DESIGN FEATURES AS REQUIRED BY USE-SPECIFIC STANDARDS IN SECTION 4.3.1 (A)(3)(D) ARE APPLICABLE TO SINGLE FAMILY ATTACHED, TOWNHOME OR TWO TO FOUR FAMILY DWELLINGS WITHIN PHASE 3.
10. **ROADWAY STANDARDS.** REGARDLESS OF OWNERSHIP OR MAINTENANCE OF STREETS, ALL SIDEWALKS AND CROSSWALKS WILL MEET FDOT DESIGN MANUAL CHAPTER 222 PEDESTRIAN FACILITIES, UNLESS OTHERWISE STIPULATED IN THE PD MASTER PLAN.
11. **ACCESS EASEMENTS.** DEVELOPABLE AREA B UNITS MAY REQUIRE DRIVEWAYS TO PARTIALLY BE LOCATED ON ADJACENT LOTS, IF SIDE LOTS LINES ARE OTHER THAN 90-DEGREES TO THE RIGHT-OF-WAY. IN THIS CASE, LOTS WILL HAVE ACCESS EASEMENTS OVER THE PORTION OF DRIVEWAY LOCATED ON AN ADJACENT LOT.
12. **ENVIRONMENTAL ASSESSMENT.** AN ENVIRONMENTAL ASSESSMENT WILL BE REQUIRED AT TIME OF FINAL PD PLAN/ PRELIMINARY PLAT/ SITE PLAN APPROVAL THAT INCLUDES A 100% GOPHER TORTOISE AND BURROWING OWL SURVEY. A CONDITION WILL BE REQUIRED THAT STANDARD MEASURES OF PROTECTION FOR EASTERN INDIGO SNAKES, IF APPLICABLE.

SAVANNAH STATION, PHASE 3
PLANNED DEVELOPMENT
UTILITY PLAN

GENERAL NOTES

1. **POTABLE WATER.** POTABLE WATER. AN 8-INCH POTABLE WATER MAIN RUNS ALONG THE CR 235 RIGHT-OF-WAY. DIRECT CONNECTION IS ANTICIPATED WITHOUT THE NEED FOR JACK AND BORE OF CR 235.
2. **SANITARY SEWER.** THE PROJECT PROPOSES TO TIE INTO THE EXISTING 16-INCH SEWER MAIN LOCATED ON NW 173RD STREET APPROXIMATELY 1,200 FEET NORTH OF THE CR 235 AND NW 173RD STREET INTERSECTION. THE PROJECT WILL INSTALL A FORCEMAIN FROM THE ONSITE LIFT STATION TO THIS 16-INCH SEWER MAIN. A DIRECTIONAL BORE UNDER CR 235 AND THE EXISTING CRX (RAILROAD) RIGHT OF WAY IS EXPECTED.
3. **STORMWATER MANAGEMENT FACILITIES.** STORMWATER MANAGEMENT FACILITIES (SMF) ARE LOCATED THROUGHOUT THE DEVELOPMENT, INCLUDING ALONG CR 235, THE SITE'S LOW AREA, AND THE TOPOGRAPHIC FEATURE ADJACENT TO NW 157TH STREET. THIS PLAN ILLUSTRATES APPROXIMATELY 15% OF THE PROJECT SITE. FINAL SIZE AND LOCATION OF SMFs WILL BE DETERMINED DURING SITE PLAN REVIEW.
4. **PUBLIC FACILITIES IMPACT.** CONCURRENCY RESERVATION WILL BE MADE AT TIME OF FINAL PD APPROVAL. THE FOLLOWING IMPACT CALCULATIONS HAVE BEEN PREPARED TO DEMONSTRATE THAT SUFFICIENT CAPACITY EXISTS TO ACCOMMODATE THE PROPOSED PROJECT.

NOTE: ONLY ONE OF SEVERAL FEASIBLE WASTEWATER CONVEYANCE OPTIONS IS SHOWN. ENGINEERING DESIGN SHALL CONSIDER ALL AVAILABLE OPTIONS FOR SANITARY SEWER CONNECTION AND WORK WITH CITY OF ALACHUA PUBLIC SERVICES DEPARTMENT TO ENSURE THE MOST SUITABLE AND EFFICIENT DESIGN IS ACHIEVED DURING THE PLATTING PROCESS.

how fields were plowed for spring plantings using different types of field plows and antique tractors. View a display of farming equipment circa 1930s and 1940s, a reflection of rural American history. Admission to the park is $5. per car with up to eight occupants. The park is located at 18730 W. Newberry Road, Newberry.

March 12: Sixth Annual Art at the Archer Depot Festival. The event will take place from 9 a.m. - 3:30 p.m. at 16994 S.W. 134th Avenue, at the old railroad station in Archer. This family-friendly event

– 11:30 a.m. Call City Hall at 352-468-1001 for a list of documents to bring to your appointment.

- **Tuesdays: Codebotics Club - The Cade invites third - sixth graders** into a highly interactive robotics and coding lab, Jan. 18 – May 2022, Tuesdays, 5 p.m. -7 p.m., grades 3-6. Like jedi learning to harness the force, participants of the Cade's Codebotics Club will wield the powerful language of code to command robots through exciting challenges. Participants will be placed into teams to work through puzzles together, and each week, new coding concepts

NOTICE OF ELECTION CITY OF ARCHER

Notice is hereby given that a regular Election for the City of Archer, Alachua County, Florida will be held Tuesday, April 12th, 2022. The purpose of the election will be to fill City Commission seats;

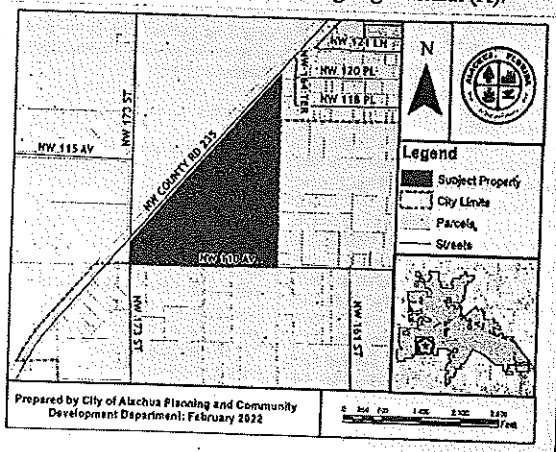
To elect a Commissioner for seat #4, for a term of four years
To elect a Commissioner for seat #5, for a term of four years

Qualifying for these seats will occur from noon (12pm), February 15th, 2022, through noon (12pm), March 2nd, 2022.

If no candidate receives a majority of the votes cast for the Seat in the regular election, a run-off election will be held April 26th, 2022, between the two (2) candidates for that seat who receive the highest number of votes cast in the regular election.

Voting site will be the Archer Community Center located at 16671 SW 137th Ave, Archer, Florida. Polls will be open from 7:00a.m. to 7:00p.m.

For more information call Archer City Hall at 352-495-2880.



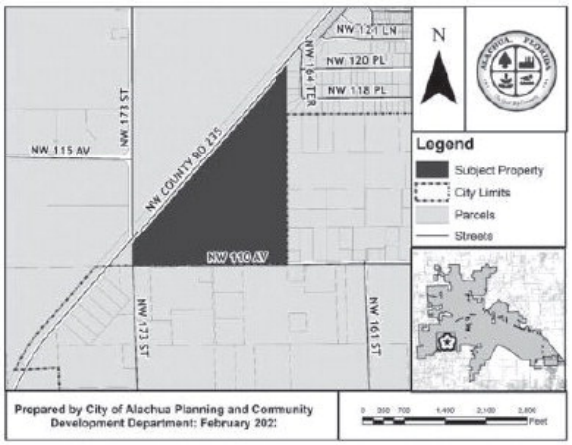
Joanna Alltop, Deputy City Clerk
Charles Hammond, City Manager

(Published: Alachua County Today - February 24, 2022)

City of ALACHUA

NOTICE OF PUBLIC HEARING BEFORE THE PLANNING AND ZONING BOARD OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the Planning & Zoning Board of the City of Alachua will hold a public hearing on March 8, 2022 at 6:00 p.m. The hearing will be held in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida, to consider the following: A request by Ryan Thompson, AICP of CHW, Inc. agent for Waco Properties, Inc., property owner, for consideration of a Site-Specific Amendment to the Official Zoning Atlas (Rezoning) on a ±118 acre subject property from Agricultural (A) to Planned Development- Residential (PD-R); southeast of the Pilot Forest subdivision, north of NW 110th Avenue, and east of NW CR 235; Tax Parcel Number 03980-002-001. Existing FLUM: Moderate Density Residential Existing Zoning: Agricultural (A).



At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 101 at least 48 hours prior to the public hearing.

Russia destroys Ukrainian refugee shelter

Two sides express optimism in negotiations to end the fighting

Andrea Rosa
ASSOCIATED PRESS

KYIV, Ukraine – Russian forces destroyed a theater in Mariupol where hundreds of people were sheltering Wednesday and rained fire on other cities, Ukrainian authorities said, even as the two sides projected optimism over efforts to negotiate an end to the fighting.

The airstrike ripped apart the center of the once-elegant building, where hundreds of civilians had been living since their homes had been destroyed in the fighting, Ukraine's foreign ministry said in a statement.

Many people were buried in the rubble, officials said, though there was no immediate word on how many had been killed or injured. Satellite imagery from Monday showed the word "children" written in large white letters in Russian in front of and behind the building, the Maxar space technology company said.

"Another horrendous war crime in Mariupol," Ukrainian Foreign Minister Dmytro Kuleba said on Twitter, calling the bombing a "massive Russian attack."

The Russian defense ministry denied bombing the theater or anywhere else in Mariupol on Wednesday.

In Kyiv, residents huddled in homes and shelters amid a citywide curfew that runs until Thursday morning, as Russian troops shelled areas in and around the city, including a residential neighborhood 1.5 miles from the presidential palace. A 12-story apartment building in central Kyiv erupted in flames after being hit by shrapnel.

Ten people were killed while standing in line for bread in the northern city of Chernihiv, the Ukrainian General Prosecutor's Office said.

Ukrainian President Volodymyr Zelenskyy, meanwhile, went before the U.S. Congress via video and, invoking Pearl Harbor and 9/11, pleaded with America for more weapons and tougher sanctions against Russia, saying: "We need you right now."

U.S. President Joe Biden announced the U.S. is sending an additional $800 million in military aid to Ukraine, including more anti-aircraft and anti-tank weapons and drones. He also called Vladimir Putin a "war criminal" in his sharpest condemnation of the Russian leader since the invasion began.

International pressure against the Kremlin mounted and its isolation deepened as the International Court of Justice, also known as the World Court, ordered Russia to stop attacking Ukraine, though there was little hope it would comply. Also, the 47-nation Council of Europe, the continent's foremost human rights body, expelled Russia.

While Moscow's ground advance on the Ukrainian capital appeared largely stalled, Putin said the operation was unfolding "successfully, in strict accordance with pre-approved plans." He also decried Western sanctions against Moscow, accusing the West of trying to "squeeze us, to put pressure on us, to turn us into a weak, dependent country."

Hopes for diplomatic progress to end the war rose after Zelenskyy acknowledged Tuesday in the most explicit terms yet that Ukraine is unlikely to realize its goal of joining NATO.

Another round of talks between the two sides was scheduled for Wednesday. After Tuesday's negotiations, Russian Foreign Minister Sergey Lavrov said a neutral military status for Ukraine was being "seriously discussed" by the two sides, while Zelenskyy said Russia's demands for ending the war were becoming "more realistic."

Hopes for diplomatic progress to end the war rose after Zelenskyy acknowledged Tuesday in the most explicit terms yet that Ukraine is unlikely to realize its goal of joining NATO. Putin has long depicted Ukraine's NATO aspirations as a threat to Russia.

Lavrov welcomed Zelenskyy's comment and said "the businesslike spirit" starting to surface in the talks "gives hope that we can agree on this issue."

"A neutral status is being seriously discussed in connection with security guarantees," Lavrov said on Russian TV. "There are concrete formulations that in my view are close to being agreed."

Russia's chief negotiator, Vladimir Medinsky, said the sides were discussing a possible compromise for a Ukraine with a smaller, non-aligned military.

Prospects for a diplomatic breakthrough were highly uncertain, however, given the gulf between Ukraine's demand that the invading forces withdraw completely and Russia's suspected aim of replacing Kyiv's Westward-looking government with a pro-Moscow regime.

Ukrainian presidential adviser Mykhailo Podolyak denied Russian claims that Ukraine was open to adopting a model of neutrality comparable to Sweden or Austria. Podolyak said Ukraine needs powerful allies and "clearly defined security guarantees" to keep it safe.

Another source of dispute is the status of Crimea, which was seized and annexed by Russia in 2014, and the separatist-held Donbas region in eastern Ukraine, which Russia recognizes as independent. Ukraine considers both part of its territory.

The fighting has sent more than 3 million people fleeing Ukraine, by the United Nations' estimate. The U.N. reported that over 700 civilians have been confirmed killed, but that the real number is higher.

In going before Congress, Zelenskyy said that Russia "has turned the Ukrainian sky into a source of death for thousands of people." But Biden has rejected Zelenskyy's requests to send warplanes to Ukraine or establish a no-fly zone over the country because of the risk of triggering war between the U.S. and Russia.

The head of the International Committee of the Red Cross, Peter Maurer, arrived in Ukraine to try to obtain greater access for aid groups and increased protection for civilians.

Amid the vast humanitarian crisis caused by the war, the Red Cross has helped evacuate civilians from besieged areas and has delivered 200 tons of aid, including medical supplies, blankets, water and over 5,200 body bags to help "ensure the dead are treated in a dignified manner."

Nowhere has suffered more than the encircled city of Mariupol, where local officials say missile strikes and shelling have killed more than 2,300 people. The southern seaport of 430,000 has been under attack for almost all of the three-week war in a siege that has left people struggling for food, water, heat and medicine.

Local authorities said Russian forces took hundreds of people hostage at a Mariupol hospital and were using them as human shields.

Bodies have been buried in trenches in Mariupol, and more corpses lay in the streets and in a hospital basement.

Using the flashlight on his cellphone to illuminate the basement, Dr. Valeriy Drengar pulled back a blanket to show the body of an infant 22 days old. Other wrapped bodies also appeared to be children, given their size.

"These are the people we could not save," Drengar said.

Nearly 30,000 people managed to escape the city on Tuesday in thousands of vehicles by way of a humanitarian corridor, city officials said.

But with humanitarian aid unable to get in amid the constant bombardment, people burn scraps of furniture to warm their hands and cook the little food still available.

Kyiv regional leader Oleksiy Kuleba said Russian forces had intensified fighting in the Kyiv suburbs and a highway leading west, and that across the capital region, "kindergartens, museums, churches, residential blocks and engineering infrastructure are suffering from the endless firing."

In other developments, the mayor of the city of Melitopol, who was seized by Russian forces five days ago, has been freed, said Zelenskyy chief of staff Andriy Yermak. No details were given about how he became free.

Ukraine also appeared to have successes, with satellite photos from Planet Labs PBC analyzed by The Associated Press showing helicopters and vehicles ablaze at the Russian-held Kherson airport and air base after a suspected Ukrainian strike on Tuesday.

PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on March 28, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-10

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS; AMENDING THE OFFICIAL ZONING ATLAS FROM AGRICULTURAL ("A") TO PLANNED DEVELOPMENT – RESIDENTIAL ("PD-R") ON APPROXIMATELY 118 ACRES; LOCATED SOUTH OF THE PILOT FOREST SUBDIVISION AND EAST OF CR 235; TAX PARCEL NUMBER 03980-002-001; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

PUBLIC NOTICE OF ENACTMENT OF AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA

Notice is hereby given that the City Commission of the City of Alachua will hold a public hearing on a proposed ordinance. The hearing will be held on March 28, 2022 at 6:00 p.m., in the James A. Lewis Commission Chambers in City Hall, located at 15100 NW 142nd Terrace, Alachua, Florida.

The ordinance title is as follows:

ORDINANCE 22-05

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE AMENDMENT OF THE OFFICIAL ZONING ATLAS; AMENDING THE OFFICIAL ZONING ATLAS ON ±160.2 ACRES FROM AGRICULTURAL (A) TO CORPORATE PARK (CP) ON A PARCEL OF LAND GENERALLY LOCATED SOUTH OF THE INTERSECTION OF NW US HIGHWAY 441 AND SOUTHERN PRECAST DRIVE AND EAST OF CELLON CREEK BOULEVARD; CONSISTING OF TAX PARCEL NUMBER 05949-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

At the public hearing, all interested parties may appear and be heard with respect to the application. Copies of the application are available for public inspection at the Planning and Community Development Department, 15100 NW 142nd Terrace, Alachua, Florida, on any regular business day between the hours of 7:30 a.m. to 6:00 p.m. Written comments on the application may be sent to the following address: City of Alachua, Planning and Community Development, P.O. Box 9, Alachua, FL 32616. Notice is given pursuant to Section 286.0105, Florida Statutes, that, in order to appeal any decision made at the public hearing, you will need a record of the proceedings, and that, for such purpose, you may need to ensure that a verbatim record of the proceedings is made, which includes the testimony and evidence upon which the appeal is to be based. In accordance with the Americans with Disabilities Act, any persons with a disability requiring reasonable accommodation in order to participate in this meeting should call the City Clerk at (386) 418-6100 x 1501 at least 48 hours prior to the public hearing.

Commission Agenda Item

MEETING DATE: 3/28/2022
SUBJECT: Ordinance 22-08, First Reading: Large Scale Comprehensive Plan Amendment -Schmidt Farms: A request by David Meeks, applicant and agent for DM Alachua Investments, LLC, property owner, to amend the Future Land Use Map (FLUM) Designation from Commercial (±48.4 acres) and Agriculture (±72.7 acres) to Commercial (±14.4 acres), High Density Residential (±17.8 acres), Moderate Density Residential (±53.2 acres), Conservation (±35.7 acres) on a ±121.1 acre subject property . Consisting of Tax Parcel Numbers 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, and 05945-000-000 (Legislative Hearing)
PREPARED BY: Adam Hall, AICP, Principal Planner

RECOMMENDED ACTION:
Based upon the presentation before the Commission and Staff's recommendation:

1. Approve Ordinance 22-08 on first reading; and,
2. Authorize City Staff to transmit the proposed Large-Scale Comprehensive Plan Amendment to the Florida Department of Economic Opportunity under the Expedited State Review Process.

Summary

The proposed Large Scale Comprehensive Plan Amendment (LSCPA) is a request by David Meeks, applicant and agent for DM Alachua Investments, LLC, property owner, for the consideration of a Large Scale Comprehensive Plan Amendment (LSCPA) to the City of Alachua Future Land Use Map (FLUM), to amend the FLUM of the subject property from Commercial (±48.4 acres) and Agriculture (±72.7 acres) to Commercial (±14.4 acres), High Density Residential (±17.8 acres), Moderate Density Residential (±53.2 acres), and Conservation (±35.7 acres) on a ±121.1 acre subject property. The subject property is comprised of Tax Parcel Numbers 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, and 05945-000-000. The subject property is located southeast of the intersection of US 441 and NW 43rd Street. The subject property has three principal structures – two vacant commercial buildings and one residential building. In addition, there are also several accessory structures related to the previous agricultural uses on the subject property.
The subject property presently has Commercial and Agricultural FLUM

The subject property presently has Commercial and Agricultural FLUM Designations. The proposed amendment would change the FLUM Designation to Commercial, High Density Residential, Moderate Density Residential, and Conservation. The Moderate Density Residential FLUM Designation permits a density of 0 – 4 dwelling units per acre (a maximum of 212 dwelling units for the subject property); the High Density Residential FLUM Designation permits a density of 8-15 dwelling units per acre (a maximum of 267 dwelling units for the subject property); the Commercial FLUM designation permits a maximum intensity of 1.0 FAR (a maximum of 627,264 square feet of non-residential development for the subject property).

Policy 1.2.a of the Future Land Use Element establishes the Moderate Density Residential land use category, and states that this category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are examples of uses permitted within the Moderate Density Residential land use category: single family, conventional dwelling units; accessory dwelling units; residential planned developments; and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.2.d of the Future Land Use Element establishes the High-Density Residential land use category and states that this category allows residential development a maximum density of 15 dwelling units per acre. The following uses are examples of uses permitted within the High-Density Residential land use category: single family attached and detached dwelling units, apartments and townhomes, duplexes and quadplexes, live/work units, residential planned developments, Traditional Neighborhood Planned Developments, neighborhood-scale retail and services and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.3.b of the Future Land Use Element establishes the Commercial land use category, and states that this category allows non-residential development, with a maximum intensity (expressed in Floor to Area ratio F.A.R.) based on the size of the parcel. The assumed maximum development scenario is a maximum FAR of 1.0. The following uses are examples of uses permitted within the

Commercial land use category: retail sales and services, personal services, financial institutions, outdoor recreation and entertainment, tourist-related uses, hotels and motels, commercial shopping centers, auto-oriented uses, office/business parks, and eating establishments.

Policy 1.8.a of the Future Land Use Element establishes the Conservation land use category. This policy states that the uses within this land use category shall be limited to public access, low-intensity resource-based recreation, (i.e., greenways and trails), native vegetative community restoration, residential and non-residential uses necessary to manage such conservation lands.

This application is for an amendment to the Future Land Use Map. A related rezoning application for the subject property proposes to amend the Future Zoning Atlas from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM).

At the March 8, 2022 Planning and Zoning Board Meeting, the Board voted 5-0 in favor of forwarding the application to the City Commission with a recommendation to approve

ORDINANCE 22-08

AN ORDINANCE OF THE CITY OF ALACHUA, FLORIDA, RELATING TO THE LARGE SCALE AMENDMENT OF THE CITY OF ALACHUA COMPREHENSIVE PLAN FUTURE LAND USE MAP; AMENDING THE FUTURE LAND USE MAP CLASSIFICATION ON ±121.1 ACRES FROM COMMERCIAL (±48.4 ACRES) AND AGRICULTURE (±72.7 ACRES) TO COMMERCIAL (±14.4 ACRES), HIGH DENSITY RESIDENTIAL (±17.8 ACRES), MODERATE DENSITY RESIDENTIAL (±53.2 ACRES) AND CONSERVATION (±35.7 ACRES) ON A PARCEL OF LAND GENERALLY LOCATED SOUTHWEST OF THE INTERSECTION OF NW 43RD STREET AND US HWY 441, EAST OF THE MORGAN MANOR SUBDIVISION, NORTH OF THE SANS SOUCI SUBDIVISION AND SOUTH OF THE BROOKE POINTE SUBDIVISION; TAX PARCEL NUMBERS 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, AND 05945-000-000; REPEALING ALL ORDINANCES IN CONFLICT; PROVIDING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

R E C I T A L S

WHEREAS, an application for a large scale comprehensive plan amendment, as described below, to the Comprehensive Plan Future Land Use Map has been filed with the City; and,

WHEREAS, a duly advertised public hearing was conducted on the proposed amendment on March 8, 2022 by the Planning and Zoning Board, sitting as the Local Planning Agency (LPA) and the LPA reviewed and considered comments received during the public hearing concerning the application and made its recommendation for approval to the City Commission; and,

WHEREAS, the City Commission considered the recommendations of the LPA at a duly advertised public hearing on March 28, 2022 provided for and received public participation, and approved the amendment for transmittal to the Florida Department of Economic Opportunity (DEO) and reviewing agencies under the Expedited State Review process; and,

WHEREAS, the City Commission considered the recommendations of the LPA, DEO, and reviewing agencies at a duly advertised public hearing on _____, 2022 and provided for and received public participation; and,

WHEREAS, the City Commission has determined and found said application for the amendment, to be consistent with the City of Alachua Comprehensive Plan and Land Development Regulations; and,

WHEREAS, for reasons set forth in this Ordinance that is hereby adopted and incorporated as findings of fact, that the Alachua City Commission finds and declares that the enactment of this amendment is in the furtherance of the public health, safety, morals, order, comfort, convenience, appearance, prosperity, or general welfare.

NOW, THEREFORE, BE IT ORDAINED BY THE PEOPLE OF THE CITY OF ALACHUA, FLORIDA:

Section 1. Findings of Fact and Conclusions of Law

1. The above recitals are true and correct and incorporated herein by reference.
2. The proposed Future Land Use Map amendment is consistent with the Comprehensive Plan.
3. The amendment will not cause a reduction in the adopted level of service standards for transportation, potable water, sanitary sewer, solid waste, stormwater, recreation, or public schools.

Section 2. Comprehensive Plan, Future Land Use Map Amended

The Comprehensive Plan Future Land Use Map is hereby amended on Tax Parcel Numbers 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, and 05945-000-000 from Commercial (±48.4 acres) and Agriculture (±72.7 acres) to Commercial (±14.4 acres), High Density Residential (±17.8 acres), Moderate Density Residential (±53.2 acres) and Conservation (±35.7 acres) in accordance with the legal description found in Exhibit "A" and map found in Exhibit "B" attached hereto and incorporated herein.

Section 3. Ordinance to be Construed Liberally

This ordinance shall be liberally construed in order to effectively carry out the purposes hereof which are deemed to be in the best interest of the public health, safety and welfare of the citizens and residents of Alachua, Florida.

Section 4. Repealing Clause

All ordinance or parts of ordinances in conflict herewith are, to the extent of the conflict, hereby repealed.

Section 5. Severability

It is the declared intent of the City Commission of the City of Alachua that, if any section, sentence, clause, phrase, or provision of this ordinance is for any reason held or declared to be unconstitutional, void, or inoperative by any court or agency of competent jurisdiction, such holding of invalidity or unconstitutionality shall not affect the remaining provisions of this ordinance, and the remainder of the ordinance after the exclusions of such part or parts shall be deemed to be valid.

Section 6. Effective Date

The effective date of this plan amendment, if the amendment is not timely challenged, shall be 31 days after the state land planning agency notifies the City that the plan amendment package is complete in accordance with Chapter 163.3184 F.S. If timely challenged, this amendment shall become effective on the date the state land planning agency or the Administrative Commission enters a final order determining this adopted amendment to be in compliance in accordance with Chapter 163.3184 F.S. No development orders, development permits, or land uses dependent on this amendment may be issued or commenced before this plan amendment has become effective.

PASSED on first reading the 28th day of March 2022.

PASSED and **ADOPTED,** in regular session, with a quorum present and voting, by the City Commission, upon second and final reading this _____ day of _____, 2022.

21" WEST, A DISTANCE OF 89.93 FEET; THENCE NORTH 46° 00' 55" WEST, A DISTANCE OF 126.95 FEET TO A CURVE
TURNING TO THE LEFT THROUGH A CENTRAL ANGLE OF 25° 55' 04", HAVING A RADIUS OF 100.00 FEET, AND A CHORD
BEARING AND DISTANCE OF NORTH 58° 58' 26" WEST AND 44.85 FEET; THENCE RUN ALONG THE ARC OF SAID CURVE A
DISTANCE OF 45.23 FEET; THENCE NORTH 71° 55' 58" WEST, A DISTANCE OF 296.74 FEET TO A CURVE TURNING TO THE
LEFT THROUGH A CENTRAL ANGLE OF 59° 00' 27", HAVING A RADIUS OF 100.00 FEET, AND A CHORD BEARING AND
DISTANCE OF SOUTH 78° 33' 48" WEST AND 98.50 FEET; THENCE RUN ALONG THE ARC OF SAID CURVE A DISTANCE OF
102.99 FEET; THENCE SOUTH 49° 03' 34" WEST, A DISTANCE OF 53.64 FEET; THENCE NORTH 18° 04' 02" EAST, A DISTANCE
OF 104.49 FEET; THENCE NORTH 71° 55' 58" WEST, A DISTANCE OF 135.26 FEET TO A CURVE TURNING TO THE RIGHT
THROUGH A CENTRAL ANGLE OF 69° 35' 35", HAVING A RADIUS OF 630.00 FEET, AND A CHORD BEARING AND DISTANCE OF
NORTH 37° 08' 11" WEST AND 719.04 FEET; THENCE RUN ALONG THE ARC OF SAID CURVE A DISTANCE OF 765.22 FEET;
THENCE NORTH 02° 20' 23" WEST, A DISTANCE OF 291.21 FEET TO A CURVE TURNING TO THE RIGHT THROUGH A CENTRAL
ANGLE OF 18° 49' 49", HAVING A RADIUS OF 530.00 FEET, AND A CHORD BEARING AND DISTANCE OF NORTH 07° 04' 31"
EAST AND 173.40 FEET; THENCE RUN ALONG THE ARC OF SAID CURVE A DISTANCE OF 174.18 FEET; THENCE NORTH 16°

29' 26" EAST, A DISTANCE OF 84.65 FEET TO A CURVE TURNING TO THE RIGHT THROUGH A CENTRAL ANGLE OF 83° 38' 56",
HAVING A RADIUS OF 380.00 FEET, AND A CHORD BEARING AND DISTANCE OF NORTH 58° 18' 54" EAST AND 506.81 FEET;
THENCE RUN ALONG THE ARC OF SAID CURVE A DISTANCE OF 554.78 FEET TO A POINT ON A NONTANGENT COMPOUND
CURVE, TURNING TO THE LEFT THROUGH A CENTRAL ANGLE OF 27° 50' 05", HAVING A RADIUS OF 270.00 FEET, AND A
CHORD BEARING AND DISTANCE OF NORTH 86° 13' 20" EAST AND 129.88 FEET; THENCE RUN ALONG THE ARC OF SAID
CURVE A DISTANCE OF 131.17 FEET; THENCE NORTH 18° 12' 04" WEST, A DISTANCE OF 117.83 FEET; THENCE NORTH 72°
23' 52" EAST, A DISTANCE OF 638.32 FEET; ; THENCE SOUTH 85° 22' 35" EAST, A DISTANCE OF 2.53 FEET TO THE POINT OF
BEGINNING.

Legal Description of Conservation Area

PARCEL 1
A TRACT OF LAND SITUATED SECTIONS 34, TOWNSHIP 08 SOUTH, RANGE 19 EAST, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:
COMMENCE AT THE SOUTHEAST CORNER OF STAGHORN UNIT NO. 1 AS RECORDED IN PLAT BOOK J, PAGES 93 AND 94 OF THE PUBLIC RECORDS OF ALACHUA COUNTY, FLORIDA; SAID POINT BEING ON THE WESTERLY RIGHT OF WAY OF U.S. HIGHWAY 441; THENCE RUN ALONG SAID WESTERLY RIGHT OF WAY
S 39° 18' 51" E, A DISTANCE OF 496.87 FEET; THENCE N 85° 22' 03" W, A DISTANCE OF 483.70 FEET; THENCE S 72° 23' 52" W, A DISTANCE OF 638.40 FEET; THENCE N 22° 57' 20" W, A DISTANCE OF 96.98 FEET; THENCE N 65° 31' 20" W, A DISTANCE OF 77.71 FEET TO THE POINT OF BEGINNING; THENCE, S 12° 55' 11" W

Staff Report

Planning and Zoning Board Hearing Date: March 8, 2022
Quasi-Judicial Hearing

SUBJECT:	A request to amend the Future Land Use Map (FLUM) Designation from Commercial (±48.4 acres) and Agriculture (±72.7 acres) to Commercial (±14.4 acres), High Density Residential (±17.8 acres), Moderate Density Residential (±53.2 acres), Conservation (±35.7 acres) on a ±121.1 acre subject property
APPLICANT/AGENT:	David Meeks
PROPERTY OWNER:	DM Alachua Investments, LLC
LOCATION:	Southwest of the intersection of US 441 and NW 43rd Street
PARCEL ID NUMBERS:	05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, and 05945-000-000
OVERLAY:	NA
ACREAGE:	± 121.1 total
PROJECT PLANNER:	Adam Hall, AICP, Principal Planner
RECOMMENDATION:	Staff recommends that the Planning & Zoning Board transmit the proposed Large Scale Comprehensive Plan Amendment to the City Commission with a recommendation of Approval.
RECOMMENDED MOTION:	*Based upon the presentation before this Board and Staff's recommendation, this Board finds the application for a Large Scale Comprehensive Plan Amendment to be consistent with the City of Alachua Comprehensive Plan and transmits the application to the City Commission, with a recommendation to approve.*

SUMMARY

The proposed Large Scale Comprehensive Plan Amendment (LSCPA) is a request by David Meeks, applicant and agent for DM Alachua Investments, LLC, property owner, for the consideration of a Large Scale Comprehensive Plan Amendment (LSCPA) to the City of Alachua Future Land Use Map (FLUM), to amend the FLUM of the subject property from Commercial (±48.4 acres) and Agriculture (±72.7 acres) to Commercial (±14.4 acres), High Density Residential (±17.8 acres), Moderate Density Residential (±53.2 acres), and Conservation (±35.7 acres) on a ±121.1 acre subject property. The subject property is comprised of Tax Parcel Numbers 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, and 05945-000-000. The subject property is located southeast of the intersection of US 441 and NW 43rd Street. The subject property has three principal structures – two vacant commercial buildings and one residential building. In addition, there are also several accessory structures related to the previous agricultural uses on the subject property.

The subject property presently has Commercial and Agricultural FLUM Designations. The proposed amendment would change the FLUM Designation to Commercial, High Density Residential, Moderate Density Residential, and Conservation. The Moderate Density Residential FLUM Designation permits a density of 0 – 4 dwelling units per acre (a maximum of 212 dwelling units for the subject property); the High Density Residential FLUM Designation permits a density of 8-15 dwelling units per acre (a maximum of 267 dwelling units for the subject property); the Commercial FLUM designation permits a maximum intensity of 1.0 FAR (a maximum of 627,264 square feet of non-residential development for the subject property).

Policy 1.2.a of the Future Land Use Element establishes the Moderate Density Residential land use category, and states that this category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are examples of uses permitted within the Moderate Density Residential land use category: single family, conventional dwelling units; accessory dwelling units; residential planned developments; and supporting community services, such as schools, houses of worship, parks, and community centers.

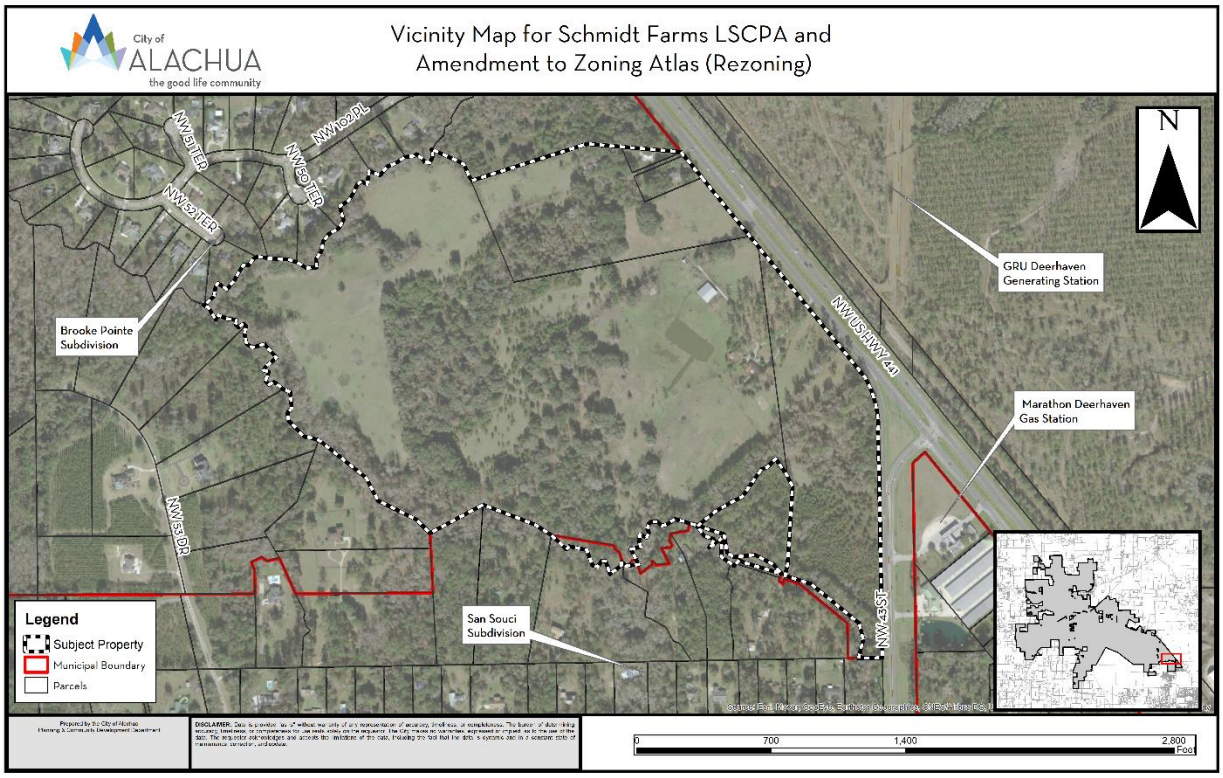
Policy 1.2.d of the Future Land Use Element establishes the High Density Residential land use category and states that this category allows residential development an a maximum density of 15 dwelling units per acre. The following uses are examples of uses permitted within the High Density Residential land use category: single family attached and detached dwelling units, apartments and townhomes, duplexes and quadplexes, live/work units, residential planned developments, Traditional Neighborhood Planned Developments, neighborhood-scale retail and services and supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.3.b of the Future Land Use Element establishes the Commercial land use category, and states that this category allows non-residential development, with a maximum intensity (expressed in Floor to Area ratio F.A.R.) based on the size of the parcel. The assumed maximum development scenario is a maximum FAR of 1.0. The following uses are examples of uses permitted within the Commercial land use category: retail sales and services, personal services, financial institutions, outdoor recreation and entertainment, tourist-related uses, hotels and motels, commercial shopping centers, auto-oriented uses, office/business parks ,and eating establishments.

Policy 1.8.a of the Future Land Use Element establishes the Conservation land use category. This policy states that the uses within this land use category shall be limited to public access, low-intensity resource-based recreation, (i.e., greenways and trails), native vegetative community restoration, residential and non-residential uses necessary to manage such conservation lands.

This application is for an amendment to the Future Land Use Map. A related rezoning application for the subject property proposes to amend the Future Zoning Atlas from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM).

REMAINDER OF PAGE INTENTIONALLY BLANK

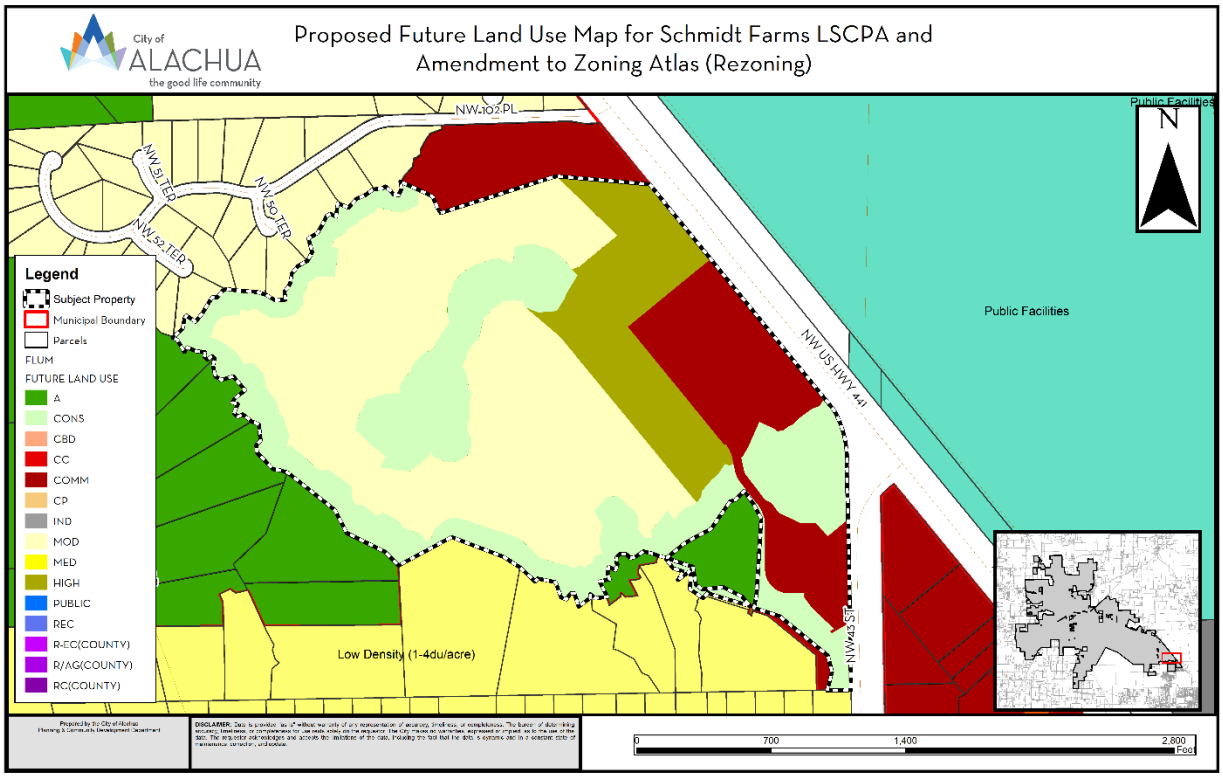


FLUM DESIGNATION COMPARISON

The matrix below provides an analysis of the maximum gross density, floor area ratio, and typical uses permitted within the existing and proposed Future Land Use Map ("FLUM") Designations:

	Existing FLUM Designations		Proposed FLUM Designations			
FLUM District:	Agriculture (72.7 acres)	Commercial (48.4 acres)	Conservation (35.7 acres)	Moderate Density Residential (53.2 acres)	High Density Residential (17.8 acres)	Commercial (14.4 acres)
Max. Gross Density:	.2 dwellings/acre 14 dwelling units	NA	NA	4 du/ac 212 dwelling units	15 du/ac 267 dwelling units	NA
Floor Area Ratio:	NA	1.0 FAR 2,108,304 square feet nonresidential	NA	NA	NA	1.0 FAR 627,264 square feet non-residential
Typical Uses*:	Residential uses, community services, agricultural activities including agricultural production and education, animal husbandry, horticulture, farmers markets, agriculture support services, and agri-tourism	Retail sales and services, personal services, financial institutions, outdoor recreation and entertainment, tourist-related uses, hotels and motels, commercial shopping centers, auto-oriented uses, office/business parks ,and eating establishments.	Low-intensity resource-based recreation, (i.e., greenways and trails), native vegetative community restoration, residential and non-residential uses necessary to manage such conservation lands	Single Family Dwelling Units, Accessory Dwelling Units, Manufactured Homes, Duplexes, Quadplexes, Townhomes, Residential Planned Unit Developments, Supporting Community Services such as Schools, Parks, Houses of Worship	Single family attached and detached dwelling units, apartments and townhomes, duplexes and quadplexes, residential planned developments, neighborhood-scale retail and services and supporting community services, such as schools, houses of worship, and parks,	Retail sales and services, personal services, financial institutions, outdoor recreation and entertainment, hotels and motels, commercial shopping centers, auto-oriented uses, office/business parks, and eating establishments.

* *The typical uses identified do not reflect all uses permitted within the FLUM Designation. For a complete list, reference the Future Land Use Element of the Comprehensive Plan.*



Map 1. Vicinity Map

Map 2. Future Land Use Map with Subject Property

Map 3. Proposed Amendment to the Future Land Use Map

Policy 1.3.b. of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Commercial FLUM Designation, and states the following:

> ***Policy 1.3.b:*** ***Commercial:*** The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:
>
> 1. Retail sales and services;
> 2. Personal services;
> 3. Financial institutions;
> 4. Outdoor recreation and entertainment;
> 5. Tourist-related uses;
> 6. Hotels and motels;
> 7. Commercial shopping centers;
> 8. Auto-oriented uses;
> 9. Traditional Neighborhood Planned Developments;
> 10. Employment Center Planned Developments;
> 11. Commercial recreation centers;
> 12. Office/business parks;
> 13. Limited industrial services; and,

14. Eating establishments.

Policy 1.2.a of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Moderate Density Residential FLUM Designation, and states the following:

> ***Policy 1.2.a:*** **Moderate density residential (0 to 4 dwelling units per acre):** The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:
>
> 1. Single family, conventional dwelling units;
> 2. Accessory dwelling units;
> 3. Manufactured or modular homes meeting certain design criteria
> 4. Mobile homes only within mobile home parks;
> 5. Duplexes and quadplexes;
> 6. Townhomes;
> 7. Residential Planned Developments;
> 8. Supporting community services, such as schools, houses of worship, parks, and community centers

Policy 1.2.d of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the High Density Residential FLUM Designation, and states the following:

> ***Policy 1.2.d*** **High Density Residential (8 to 15 dwelling units per acre):** The High Density Residential land use category allows residential development at a density of 8 dwelling units per acre to 15 dwelling units per acre, as well as certain complementary uses, such as a low intensity neighborhood-scale retail and services. The following uses are allowed within the High Density Residential land use category:
>
> 1. Single family attached and detached dwelling units ;
> 2. Accessory dwelling units;
> 3. Apartments and townhomes;
> 4. Duplexes and quadplexes;
> 5. Live/work units;
> 6. Residential Planned Developments;
> 7. Traditional Neighborhood Planned Developments;
> 8. Group living;
> 9. Neighborhood-scale retail and services, where the area dedicated to such uses is less than or equal to 30,000 square feet of floor area and is designed specifically to serve the surrounding neighborhood, including, but not limited to, a convenience stores without gas pumps, dry cleaners, pharmacies, local markets, restaurants, personal services, and professional offices; and,
> 10. Supporting community services, such as schools, houses of worship, parks, and community centers.

Policy 1.8.a. of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Conservation FLUM Designation, and states the following:

> ***Policy 1.8.a:*** ***Conservation uses:*** Conservation uses shall be limited to public access, low-intensity resource-based recreation, (i.e., greenways and trails), native vegetative community restoration, residential and non-residential uses necessary to manage such conservation lands (i.e., ranger stations, research stations, and park amenities).

EXISTING USES

The subject property has one single-family residence with several associated accessory farm structures. The subject property also has two vacant commercial structures.

SURROUNDING USES

The subject property is located southeast of the intersection of US 441 and NW 43rd Street.

The existing uses, Future Land Use Map ("FLUM") Designations, and zone districts of the surrounding area are identified in Table 1. Map 3 provides an overview of the vicinity of the subject property.

NOTE: The information below is intended to provide a general overview of the area surrounding the subject property and to generally orient the reader. It is not intended to be all-inclusive, and may not identify all existing uses, FLUM Designations, and/or zoning districts surrounding the subject property.

Table 1. Surrounding Land Uses

Direction	Existing Use(s)	FLUM Designation(s)	Zoning District(s)
North	Residential / Major Utility (Deerhaven Generating Plant)/ Vacant Commercial	Moderate Density Residential/ Public Facilities (City of Gainesville)/ Commercial	RSF-1, CI, PS (City of Gainesville)
East	Major Utility (Deerhaven Generating Plant)/ Commercial	Public Facilities (City of Gainesville)/ Commercial	PS (City of Gainesville), CI
West	Residential	Agriculture	A
South	Residential	Low Density (Alachua County)	RE-1 (Alachua County)

NEEDS ANALYSIS

Per Chapter 163.3177, Florida Statutes, need shall be based upon the amount of land designated for future uses and shall:

1) Provide a balance of uses that foster vibrant, viable communities and economic opportunities and address outdated development patterns, such as antiquated subdivisions; and,

2) Allow the operation of real estate markets to provide adequate choices for residents and business, with the amount of land designated for future use not limited solely by the projected population. The minimum amount of land use required to accommodate at least a 10-year planning period must be included in the comprehensive plan.

The applicant identifies the need for an additional 1,160 home within the City of Alachua over the next 9 years, which this project will aid in addressing. The applicant also identifies the need for additional commercial lands to serve the increasing population within the City.

URBAN SPRAWL ANALYSIS

Section 163.3177, Florida Statutes, requires that any amendment to the Future Land Use Element to discourage the proliferation of urban sprawl. Section 163.3177(6)(a)9.a., Florida Statutes, identifies 13 primary urban sprawl indicators and states that, "[t]he evaluation of the presence of these indicators shall consist of an analysis of the plan or plan amendment within the context of features and characteristics unique to each locality…"

An evaluation of each primary indicator is provided below.

(I) Promotes, allows, or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.

Evaluation & Findings: The subject property is presently designated for agricultural and commercial uses. The proposed amendment would change the FLUM Designation of the property from Agriculture and Commercial to Conservation, Moderate Density Residential, High Density Residential, and Commercial. This would provide for a mixed use development with a range of housing types and densities.

(II) Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.

Evaluation & Findings: The subject property is located at the intersection of US Highway 441 and NW 43rd Street. The property is located in proximity to developed residential areas including Turkey Creek, Brooke Pointe, and Westchester (City of Gainesville), and Turkey Creek Forest (City of Gainesville).

(III) Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

Evaluation & Findings: The subject property is located between developed areas of the City of Alachua and the City of Gainesville and unincorporated Alachua County.

(IV) Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

Evaluation & Findings: Environmental information provided by the applicant and GIS data indicates the presence of wetlands and surface water features. These natural resources are proposed to be protected and conserved through placement of the features and associated buffer areas in the Conservation land use category, which permits only low intensity resource based recreation uses, such as trails.

(V) Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.

Evaluation & Findings: The subject property is primarily adjacent to residential and commercial uses. Potential adjacent agricultural uses are sufficiently separated or of a nature that impacts will be limited.

(VI) Fails to maximize use of existing public facilities and services.

Evaluation & Findings: Water and wastewater will be provided through extensions of the City of Alachua systems, which exist in the vicinity.

(VII) Fails to maximize use of future public facilities and services.

Evaluation & Findings: Water and wastewater will be provided through extensions of the City of Alachua systems, which exist in the vicinity.

(VIII) Allows for land use patterns or timing which disproportionately increase the cost in time, money, and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

Evaluation & Findings: The subject property is located proximate to existing residential and commercial development along NW US Highway 441. Utility services and lines, including service and lines for water, wastewater, and electric, are located within the vicinity of the subject property.

(IX) Fails to provide a clear separation between rural and urban uses.

Evaluation & Findings: The subject property is located along US Highway 441 and is located in proximity to existing commercial, residential, and major public utility infrastructure.

(X) Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

Evaluation & Findings: The development of the site could be considered both infill and redevelopment. A portion of the property has historically been used for commercial uses. The subject property is also located adjacent to existing commercial, residential, and major public utility uses.

(XI) Fails to encourage a functional mix of uses.

Evaluation & Findings: The subject property is located proximate to a mix of commercial, residential and institutional uses.

(XII) Results in poor accessibility among linked or related land uses.

Evaluation & Findings: The typical development pattern within the City of Alachua consists of commercial uses located along US 441 with decreasing density of residential uses as development moves away from the US 441 corridor. The proposed land use designations support this development pattern and provide adequate protections for wetlands and surface water bodies located on the subject property.

(XIII) Results in the loss of significant amounts of functional open space.

Evaluation & Findings: The proposed application would result in approximately 35.7 acres being designated as Conservation, would remain as functional open space.

In addition to the preceding urban sprawl indicators, Section 163.3177 also establishes eight (8) "Urban Form" criteria. An amendment to the Future Land Use Map is presumed to not be considered urban sprawl if it meets four (4) of the (8) urban form criteria. These urban form criteria, and an evaluation of each as each may relate to this application, are provided below. The applicant has provided an analysis of the application's consistency with Section 163.3177 within the application materials, and contends that the proposed amendment will not encourage urban sprawl by showing it meets four of the eight urban form criteria.

1. Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

Evaluation & Findings: *Environmental information provided by the applicant and GIS data indicates the presence of wetlands and surface water features. These natural resources are being protected and conserved through placement of the features and associated buffer areas in the Conservation land use category, which permits only low intensity resource-based recreation uses, such as trails. The subject property also contains Special Flood*

Hazard areas. Development will be required to meet applicable City regulations regarding development within these areas.

2. Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

   Evaluation & Findings: *The subject property is located proximate to existing public facilities. Any development that may occur on the subject property will be required to connect to City Potable Water and Sanitary Sewer at the time of development. Prior to the issuance of any preliminary development order, the applicant will need to demonstrate that any extension of public infrastructure will be efficient and cost-effective.*

3. Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

   Evaluation & Findings: *The proposed amendment would provide for residential development opportunities with a mix of commercial uses that will create a walkable urban form.*

4. Promotes conservation of water and energy.

   Evaluation & Findings: *The proposed amendment would result in a higher density and more efficient urban form. Potential exists for reduction in overall VMT (vehicle miles travelled) for residents of the development and for existing development located nearby.*

5. Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

   Evaluation & Findings: *Development of this property will result in a partial loss of an agricultural area and activity.*

6. Preserves open space and natural lands and provides for public open space and recreation needs.

   Evaluation & Findings: *The proposed amendment would not result in the loss of functional open space nor would it result in the functional loss of recreational space. The applicable protection standards set forth in the Conservation and Open Space Element of the Comprehensive Plan for natural lands and open space requirements will further preserve open space and natural lands and provide for public open space and recreational areas.*

7. Creates a balance of land uses based upon demands of the residential population for the nonresidential needs of an area.

   Evaluation & Findings: *The City of Alachua population is growing and will require adequate housing opportunities to accommodate the increased population. The proposed*

amendment would provide for additional residential lands in an area of the City where limited residential lands presently exist, located proximate to existing and proposed commercial and residential development.

8. Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. 163.3164.

Evaluation & Findings: *The proposed amendment would result in an increase in the permitted residential density of the subject property, and is located near existing residential subdivisions. The provision of commercial land use will increase mix of uses in area. The application does not constitute transit-oriented development or a new town.*

CONSISTENCY WITH THE COMPREHENSIVE PLAN

The applicant proposes to amend the FLUM Designation from Agriculture and Commercial to Conservation, Moderate Density Residential, High Density Residential and Commercial on the subject property. The following Comprehensive Plan Elements have Goals, Objectives, and Policies (GOPs) that support the proposed amendment to the Future Land Use Map of the City of Alachua's Comprehensive Plan:

- Future Land Use Element
- Transportation Element
- Housing Element
- Recreation Element
- Community Facilities Natural Groundwater Aquifer Recharge Element
- Conservation and Open Space Element

The applicant has provided an analysis of the proposed amendment's consistency with the Comprehensive Plan. Based upon the applicant's Comprehensive Plan Consistency Analysis and information presented below, staff finds the application consistent with the Comprehensive Plan and the Goals, Objectives, and Policies (GOPs) therein.

Future Land Use Element

Policy 1.3.b. of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Commercial FLUM Designation, and states the following:

> ***Policy 1.3.b:*** ***Commercial***: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which large-scale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category:

1. Retail sales and services;
2. Personal services;
3. Financial institutions;
4. Outdoor recreation and entertainment;
5. Tourist-related uses;
6. Hotels and motels;
7. Commercial shopping centers;
8. Auto-oriented uses;
9. Traditional Neighborhood Planned Developments;
10. Employment Center Planned Developments;
11. Commercial recreation centers;
12. Office/business parks;
13. Limited industrial services; and,
14. Eating establishments.

Analysis of Consistency with Policy 1.3.b: An associated rezoning application has been submitted along with this proposed amendment to the Future Land Use Map. The proposed zoning would be Commercial Planned Development which is permitted under Policy 2.1.d of the Future Land Use Element. Should the PD zoning expire or not proceed, any proposed future development or zoning proposals would be required to conform with this Policy.

Policy 1.2.a of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Moderate Density Residential FLUM Designation, and states the following:

Policy 1.2.a: **Moderate density residential (0 to 4 dwelling units per acre):** The moderate density residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the moderate density residential land use category:

1. Single family, conventional dwelling units;
2. Accessory dwelling units;
3. Manufactured or modular homes meeting certain design criteria
4. Mobile homes only within mobile home parks;
5. Duplexes and quadplexes;
6. Townhomes;
7. Residential Planned Developments;
8. Supporting community services, such as schools, houses of worship, parks, and community centers

Analysis of Consistency with Policy 1.2.a: An associated rezoning application has been submitted along with this proposed amendment to the Future Land Use Map. The proposed zoning would be Residential Planned Development which is permitted under this policy. Should the PD zoning expire or not proceed, any proposed future development or zoning proposals would be required to conform with this Policy.

Policy 1.2.d of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the High Density Residential FLUM Designation, and states the following:

> ***Policy 1.2.d*** **High Density Residential (8 to 15 dwelling units per acre):** The High Density Residential land use category allows residential development at a density of 8 dwelling units per acre to 15 dwelling units per acre, as well as certain complementary uses, such as a low intensity neighborhood-scale retail and services. The following uses are allowed within the High Density Residential land use category:
>
> 1. Single family attached and detached dwelling units ;
> 2. Accessory dwelling units;
> 3. Apartments and townhomes;
> 4. Duplexes and quadplexes;
> 5. Live/work units;
> 6. Residential Planned Developments;
> 7. Traditional Neighborhood Planned Developments;
> 8. Group living;
> 9. Neighborhood-scale retail and services, where the area dedicated to such uses is less than or equal to 30,000 square feet of floor area and is designed specifically to serve the surrounding neighborhood, including, but not limited to, a convenience stores without gas pumps, dry cleaners, pharmacies, local markets, restaurants, personal services, and professional offices; and,
> 10. Supporting community services, such as schools, houses of worship, parks, and community centers.

Analysis of Consistency with Policy 1.2.d: An associated rezoning application has been submitted along with this proposed amendment to the Future Land Use Map. The proposed zoning would be Commercial Planned Development which is permitted under Policy 2.1.d of the Future Land Use Element. Should the PD zoning expire or not proceed, any proposed future development or zoning proposals would be required to conform with this Policy.

Policy 1.8.a. of the City of Alachua Comprehensive Plan Future Land Use Element (FLUE) establishes the Conservation FLUM Designation, and states the following:

> ***Policy 1.8.a:*** ***Conservation uses:*** Conservation uses shall be limited to public access, low-intensity resource-based recreation, (i.e., greenways and trails), native vegetative community restoration, residential and non-residential uses necessary to manage such conservation lands (i.e., ranger stations, research stations, and park amenities).

Analysis of Consistency with Policy 1.8.a: Any proposed future development within the Conservation land use area would be required to conform with this Policy.

Objective 5.1: Natural features: The City shall coordinate Future Land Use designations with appropriate topography, soils, areas of seasonal flooding, wetlands and habitat during review of proposed amendments to the Future Land Use Map and the development review process. Natural features may be included as amenities within a development project.

Policy 5.1.a: Topography: The City shall protect the natural topography of the City, including steep and seepage slopes, by requiring new development to include techniques to minimize negative impacts on the natural terrain. An emphasis will be placed on retaining the natural function of seepage slopes during development. Additionally, retention of existing native vegetation will be encouraged as one method of protecting slopes.

Policy 5.1.b: Soils: The City shall ensure soil protection and intervention measures are included in the development review process.

Policy 5.1.c: Flood prone areas: The City shall require as part of the development review process the identification of FEMA flood zone areas. Where necessary, base flood elevations and minimum finished floor elevations shall be established. The City shall also require finished floor elevations on subdivision plats, site plans and building permit plans when necessary to determine compliance with flood prone area regulations. The City shall establish standards for a limitation on filling in flood prone areas.

Policy 5.1.d: Wetlands: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code (FAC) and regulations adopted by the FDEP and the Suwannee River Water Management District.

Policy 5.1.e: Habitat: The City shall require as part of the development review process, an inventory of listed species for all new developments in areas identified as known habitat for listed species if listed species are known to exist in close proximity to the development. The survey shall include detailed information regarding type, quantity, location, and habitat requirements for any listed species identified. A de minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Analysis of Consistency with Objective 5.1 and Policies 5.1.a – e: The subject property has historically been used as a farm with two commercial structures along US 441. The subject property contains surface water bodies, wetlands, special flood hazard areas. Additionally, an environmental analysis indicated potential presence of migratory birds (Killdeer) on the subject property. A special condition has been added to the Planned Development zoning approval that addresses this issue. A separate analysis of the environmental conditions can be found below in this report.

Objective 5.2: Availability of facilities and services: All new development shall be planned and constructed concurrently with the availability of facilities

and services necessary for the development.

Analysis of Consistency with Objective 5.2: Prior to the issuance of any preliminary or final development order, any development must demonstrate that all necessary facilities or services are in place. Based on the concurrency analysis completed, there are no Public Facilities monitored for concurrency that would be deficient as a result of this development. Prior to any preliminary or final development order, the applicant must demonstrate how this potential deficiency will be addressed.

GOAL 9: Water and Wastewater Service:

The City will ensure that new development within the corporate limits, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the Comprehensive Plan, shall connect to the City of Alachua's potable water and wastewater system.

Policy 9.2: Any new residential subdivision within the corporate limits, where potable water service is available, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within either a Residential or Agriculture Future Land Use Map Designation shall connect to the City of Alachua's potable water system. Any new residential subdivision within the corporate limits, where wastewater service is available, as defined in Policy 1.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan, regardless of size, that is within a Residential Future Land Use Map Designation shall connect to the City of Alachua's wastewater system.

Analysis of Consistency with Goal 9 and Policy 9.2: Potable water is available to the site, as defined in Policy 4.2.a of the Community Facilities and Natural Groundwater Aquifer Recharge Element of the City of Alachua Comprehensive Plan.

Housing Element

Policy 1.1.a: The City shall encourage development of a variety of housing types including conventional single family homes, accessory dwelling units, multi-family units, group homes, assisted living facilities, foster care facilities, mobile homes and manufactured housing, and shall ensure that appropriate land use designations and zoning districts exist to accommodate each type.

Analysis of Consistency with Policy 1.1.a: This project would support additional housing within the City, thereby furthering Policy 1.1.a.

Recreation Element

Policy 1.2.b: The City shall adhere to a minimum level of service of five (5.0) acres of community, neighborhood or pocket park, per 1,000 persons, with a minimum of 20 percent of this in improved, passive parks.

Analysis of Consistency with Policy 1.2.b: An analysis of the impacts to recreation facilities has been provided within this report.

Transportation Element

Objective 1.1: Level of Service: The City shall establish a safe, convenient and efficient level of service standard for all motorized and non-motorized transportation systems.

Analysis of Consistency with Objective 1.1: An analysis of the impacts to transportation facilities has been provided within this report. There are no transportation facilities that would be deficient as a result of this application.

Community Facilities & Natural Groundwater Aquifer Recharge Element

Policy 1.2.a: The City shall establish a Community Wastewater Service Area, which includes all areas where wastewater service is available. Wastewater service shall be deemed available if:

1. A gravity wastewater system, wastewater pumping station, or force main exists within · mile of the property line of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and the gravity wastewater system, wastewater pumping station, or force main can be accessed through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 1.2.a: The subject property is located within the wastewater service area, and any future development on the subject property will be required to connect to a wastewater system.

Policy 2.1.a: The City hereby establishes the following level of service standards for solid waste disposal facilities:

FACILITY TYPE	LEVEL OF SERVICE STANDARD
Solid Waste Landfill	.73 tons per capita per year

Analysis of Consistency with Objective 2.1.a: An analysis of the impacts to solid waste facilities has been provided within this report. The proposed amendment would result in

a net reduction in the permitted density of the subject property, thereby reducing impacts to solid waste facilities.

Policy 4.1.b: The City shall establish a Community Potable Water Service Area, which includes all areas where potable water service is available. Water service shall be deemed available if:

1. A water main exists within · mile of any residential subdivision with more than 5 units, or any multi-family residential development, or any commercial development, or any industrial development and water service can be accessed through public utility easements or right of ways. The distance shall be measured as required for construction of the infrastructure along public utility easements and right of ways.

Analysis of Consistency with Policy 4.1.b: The subject property is located within the potable water service area, and any future development on the subject property will be required to connect to a potable water system.

Conservation and Open Space Element

OBJECTIVE 1.3: Listed Species

The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Policy 1.3.a: The City shall ensure that its ordinances, regulations and policies protect listed species and their habitats.

Policy 1.3.b: The City shall utilize the development review process, land acquisition programs, environmental regulatory partnerships, stewardship programs and public education to protect listed species and their habitat, and prevent extinction of or reduction in populations of listed species.

Policy 1.3.c: The City shall obtain data from the Florida Fish and Wildlife Conservation Commission, Alachua County Environmental Protection Department, Florida Department of Environmental Protection, to maintain a periodically updated inventory of listed species and habitats located within City limits or immediately adjacent to City limits. The City will use the Florida Natural Areas Inventory as a base inventory.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold

for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Policy 1.3.e: The City's land use designations shall provide for the protection of threatened and endangered species.

Analysis of Consistency with Objective 1.3 and Policies 1.3.a – e:

An environmental conditions and site suitability analysis has been provided separately in this report. Future development of the site must comply with the environmental protections established in the City of Alachua Comprehensive Plan and Land Development Regulations.

Objective 1.10: Wetlands

The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.

Policy 1.10.a: The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code and regulations adopted by the DEP and the Suwannee River Water Management District.

Policy 1.10.b: The City shall conserve wetlands by prohibiting, where the alternative of clustering all structures in the non-wetland portion of the site exists, any development or dredging and filling which would alter their natural functions. If no other alternative for development exists, the City shall allow only minimal development activity in those areas designated as wetlands within this Comprehensive Plan and that such development activity comply with the following performance standards:

I. Residential dwelling units no denser than 1 dwelling unit per 5 acres, subject to the following minimum performance standards:

a. Residences and any support buildings must be built on pilings of sufficient height to exceed by 1 foot the highest recorded flood level in the wetland. If there is not flooding data available, residences and any support buildings must be built at least 2 feet above the highest seasonal water level.
b. Clearing or removal of native vegetation shall not exceed 1/2 acre per 5 acres, except that where a ratio of 1 dwelling unit per 5 acres is utilized, the clearing or removal of native vegetation shall not exceed a total of 1/4 acre per 5 acres. Exotic vegetation may be removed without regard to this limitation provided that, of the area cleared of exotic vegetation exceeds the applicable 1/2 acre or 1/4 acre limitation, or is replanted with

native wetland vegetation.

c. No dredging or filling (except for pilings to support the residence and support buildings or poles providing utility services) shall be allowed, except that a walking path or driveway to the residence may use permeable fill of it is designed with a sufficient number and size of culverts to allow the natural flow of water to continue.
d. Drain fields for septic tanks and gray water shall be located outside the wetland.
e. Where a ratio of 1 dwelling unit per 5 acres is employed the following provisions shall also apply:

    i. Clustering of units shall be located in the perimeter areas of the wetlands; and

    ii. A restrictive or conservation easement to preserve open space shall be established.

OR:

II. Residential dwelling units not more dense that 1 dwelling unit per 3 acres such to the following minimum performance standards:

    a. Residences must be built on pilings of sufficient height to exceed by 1 foot the highest recorded flood level in the wetland. If there is no flooding data available, residences must be built at least 2 feet above the highest seasonal water level.
    b. All support buildings and other support facilities shall be constructed outside the wetland.
    c. Clearing or removal of vegetation shall not exceed 1/4 acre per 3 acres, except that where a ratio of 1 dwelling unit per 3 acres is employed, the clearing or removal of native vegetation shall not exceed a total of 1/8 acre per 3 acres. Exotic vegetation may be removed without regard to this limitation provided that, if the area is cleared of exotic vegetation exceeds the applicable 1/4 or 1/8 acre limitation, it is replanted with native wetland vegetation.
    d. No driveways, paths or other construction requiring fill (other than pilings for the residence or poles for utilities) will be allowed within the wetland.
    e. All residences shall be connected to a central sewage system owned and operated by the City.
    f. Where a ratio of 1 dwelling unit per 3 acres is utilized, the following provisions shall also apply:
        i. Clustering of units shall be located along the perimeter area of the wetland; and
        ii. A restrictive or conservation easement to preserve the open space shall be required.

OR:

III. Limited development activity with impacts to isolated wetlands (and/or associated buffers) that meet all of the following conditions:

a. Less than .25 acres in size; and,
b. Determined to be of poor quality by a certified environmental specialist; and,
c. The applicant has demonstrated that every reasonable step has been taken to minimize impact to wetland; and,
d. The applicant has provided for appropriate on-site or off-site mitigation for impact to wetland.

Limited development activity includes, but is not limited to, park amenities such as trails or boardwalks, minimum necessary roadways and/or sidewalks for access or internal site connectivity, and underground utility line crossings.

Policy 1.10.c: The City shall review wetland mitigation and monitoring proposals to allow limited development activity in wetlands and wetland buffers. Applicants must provide documentation which indicates that the following steps have been taken: the applicant has attempted every reasonable measure to avoid adverse impacts; the applicant has taken every reasonable measure to minimize unavoidable adverse impacts; the applicant has provided adequate mitigation to compensate for wetland impacts. The property owner shall incur any and all expenses associated with wetland mitigation.

Policy 1.10.d: The City shall provide all wetland mitigation and monitoring proposals for review by the County, Suwannee River Water Management District and any other applicable agencies.

Policy 1.10.e: The City shall encourage the dedication of conservation easements to the State, County, water management district or private conservation trust, for wetland preservation.

Policy 1.10.f: The City shall encourage the creation, restoration and preservation of wetlands through partnerships with public and private entities.

Policy 1.10.g: The City shall require natural vegetative buffers around wetlands to protect the fragile ecosystems they sustain. Buffers, measured from the outer edge of the wetland, shall be created as established in the following table:

Resource Addressed	Required Buffer (feet)
Wetlands less than or equal to 0.5 acre that do not support federally and/or state regulated vertebrate wetland/aquatic dependent animal species.	50' average 35' minimum
Wetlands greater than 0.5 acre that do not support the animal species described above.	75' average 50' minimum
Areas where the animal species described above have been documented within 300 feet of a wetland.	100' average 75' minimum

Policy 1.10.h: As an alternative to Policy 1.10.g, where scientific data is available, specific buffering requirements may vary according to the nature of the individual wetland and the proposed land use, but in no case will the buffer be less than 35 feet. Buffering requirements will be based on the best available science regarding impacted ecosystems, listed species, wetland function, and hydrologic considerations.

Analysis of Consistency with Objective 1.10:

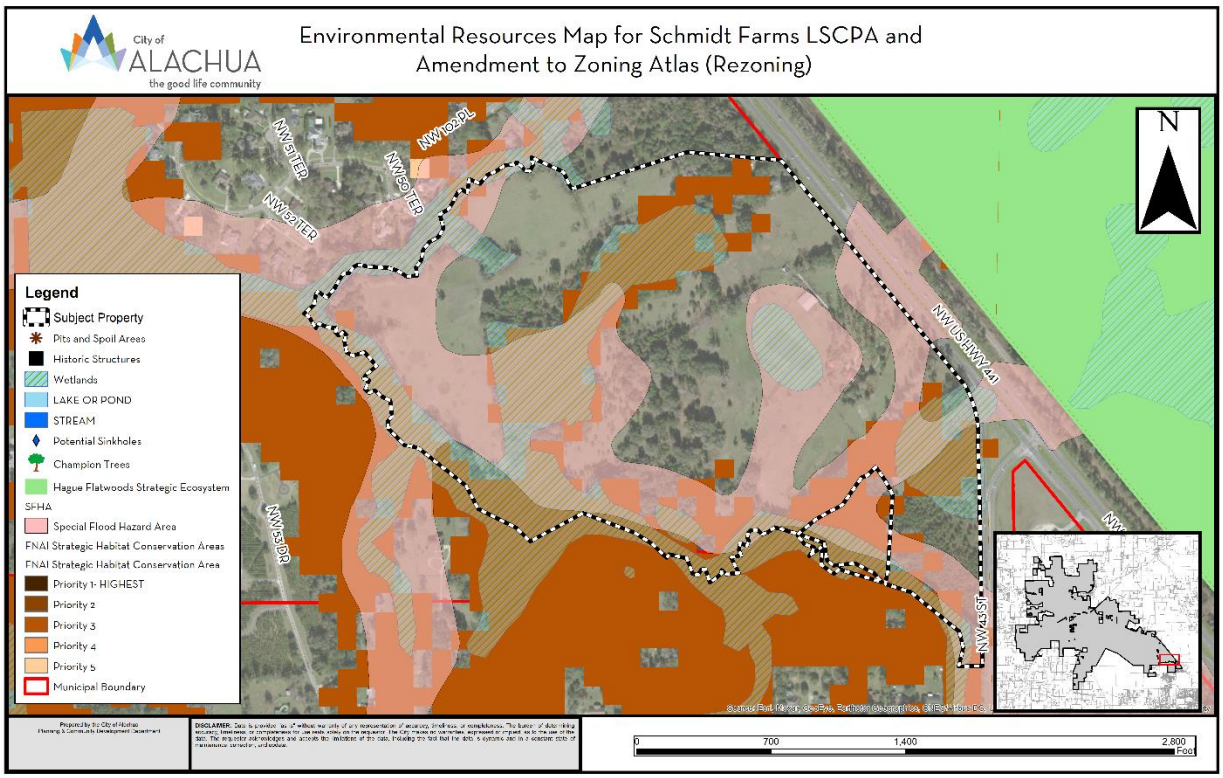
The existing wetlands and associated wetland buffers required under Policy 1.10.g are primarily located within the Conservation Future Land Use category.

ENVIRONMENTAL CONDITIONS ANALYSIS

Wetlands

According to the wetlands delineation provided by the applicant there are wetlands on the subject property.

Evaluation: Applicable standards in the City's Comprehensive Plan, Land Development Regulations, and Suwannee River Water Management District (SRWMD) regulations would apply to those areas identified as wetlands. The vast majority of wetlands and the associated required buffer areas are being proposed to be placed within the Conservation Future Land Use designation; therefore, there are no issues related to wetland protection.



Strategic Ecosystems

Strategic Ecosystems were identified by an ecological inventory project in a report prepared for Alachua County Department of Growth Management in 1996. The purpose

of the inventory was to identify, inventory, map, describe, and evaluate the most significant natural biological communities in private ownership in Alachua County.

Evaluation: The subject property is not located within a Strategic Ecosystem. The subject property is adjacent to the Hague Flatwoods Strategic Ecosystem. The GRU Deerhaven Generating Station is also located within this Strategic Ecosystem. The impacts from the proposed Future Land Use Map Amendment are anticipated to not be significant, therefore, the development will have no impact upon any Strategic Ecosystem(s) identified within the ecological inventory report.

Map 4. Environmental Features

Regulated Plant & Animal Species

The subject property is not known to contain any species identified as endangered, threatened, or of special concern, other than those described below. The Florida Natural Areas Inventory (FNAI) has identified areas throughout the State of Florida which may contain good quality natural communities. This data layer is known as the Potential Natural Areas (PNA) data layer, and identifies privately owned lands that are not managed or listed for conservation purposes. These areas were delineated by FNAI scientific staff through interpretation of natural vegetation from 1988-1993 FDOT aerial photographs and from input received during Regional Ecological Workshops held for

each regional planning council. These workshops were attended by experts familiar with natural areas in the region. Potential Natural Areas were assigned ranks of Priority 1 through Priority 5 based on size, perceived quality, and type of natural community present. The areas included in Priority 5 are exceptions to the above criteria. These areas were identified through the same process of aerial photographic interpretation and regional workshops as the PNA 1 through 4 ranked sites, but do not meet the standard criteria.

Evaluation: No species identified as endangered, threatened, or of special concern are known to exist on the subject property, other The subject property contains an amount of Priority 3 lands under the Florida Natural Areas inventory. A migratory bird species was observed on site (Killdeer). A state regulated plant, Florida shiny-pod (*Matelea floridana)* was observed within the Conservation land use area. As a condition of the associated Planned Development rezoning application, conditions have been added that would require special consideration for these. If any other regulated plant or animal species is identified during development, the applicant must adhere to the applicable standards in the City of Alachua Comprehensive Plan and the Land Development Regulations.

Soil Survey

Each soil type found on the subject property is identified below. The hydrologic soil group is an indicator of potential soil limitations. The hydrologic soil group, as defined for each specific soil, refers to a group of soils which have been categorized according to their runoff-producing characteristics. These hydrologic groups are defined by the Soil Survey of Alachua County, Florida, dated August 1985. The chief consideration with respect to runoff potential is the capacity of each soil to permit infiltration (the slope and kind of plant cover are not considered, but are separate factors in predicting runoff). There are four hydrologic groups: A, B, C, and D. "Group A" soils have a higher infiltration rate when thoroughly wet and therefore have a lower runoff potential. "Group D" soils have very lower infiltration rates and therefore a higher runoff potential.

There are five (5) soil types found on the subject property:

Soil Type	Hydrologic Group	Drainage Class	Dwellings without basements / small commercial buildings	% of Subject Property (may not total to 100% due to rounding)
Kanapaha sand, 0 to 5 percent slopes	A/D	Poorly drained	Very limited/ Very limited	12.3
Millhopper sand, 0 to 5 percent slopes	A	Moderately well drained	Not limited/ Not limited	4.2
Pomona sand, 0 to 2 percent slopes	A/D	Poorly drained	Very limited/ Very limited	19.7
Floridana sand, frequently ponded, 0 to 2 percent slopes	C/D	Very poorly drained	Very limited/ Very limited	2.3
Mulat sand	C/D	Poorly drained	Very limited/ Very limited	59.4

Evaluation: The soil types located within the subject property pose limitations for development of residential and small commercial buildings. Special engineering, drainage, soil reclamation and foundation design will be required to overcome site limitations.

Flood Potential

Panels 12001C0282E of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Series, dated November 2, 2018, indicates that the subject property contains areas with Flood Zone "X" designations (areas determined to be outside of the 500-year floodplain), Flood Zone "A" (areas determined to be in the 500-year floodplain for which base flood elevations have not been established, and Flood Zone "AE" (areas determined to be in the 500-year floodplain for which base flood elevations have been established).

Evaluation: Portions of the subject property contains areas located within Special Flood Hazard Areas (Areas A and AE). Compliance with applicable requirements of the City's Land Development Regulations will be required as a part of any future proposed development.

Karst-Sensitive Features

Karst sensitive areas include geologic features, such as fissures, sinkholes, underground streams, and caverns, and are generally the result of irregular limestone formations. The subject property is located within an area where sinkholes may potentially allow hydrologic access to the Floridan Aquifer System, however, best available data indicates

that no sinkholes or known indicators of sinkhole activity are located on the subject property.

Evaluation: GIS data available from Alachua County does not indicate any karst sensitive areas on the subject property. If any environmentally sensitive lands are found prior to the development of the site, applicable protection standards must be followed for any development within those environmentally sensitive lands.

Wellfield Protection Zone

Policy 7.2.1 of the Future Land Use Element of the Comprehensive Plan establishes a 500 foot radial buffer around city-owned potable water well.

Evaluation: The subject property is not currently located within a City of Alachua wellhead protection zone as identified on the City of Alachua Wellfield Primary Protection Zones Map of the Comprehensive Plan, therefore, there are no issues related to wellfield protection.

Historic Structures and Markers

The subject property does not contain any historic structures or markers as determined by the State of Florida and the Alachua County Historic Resources Inventory.

Evaluation: There are two historic structures located on the subject property, as indicated in the Florida Master Site File. Placement on the Florida Master Site File does not necessarily indicate historic significance, but rather that the structure is documented to be greater than 50 years old. The Site file is not a state historic registry.

PUBLIC FACILITIES IMPACT

The analysis of each public facility provided below represents an analysis of the gross change in impacts generated by the proposed FLUM Designation. The traffic impact data are obtained from a traffic concurrency report drafted by Buckholz Traffic.

At present, the total impacts generated by the amendment are acceptable and are not anticipated to degrade the Level of Service (LOS) of any public facility. If development is proposed in the future, the applicant will be required to provide a comprehensive analysis of the impacts generated by such development upon public facilities. Facility capacity must be available to support the proposed development prior to the issuance of a final development order.

Per Section 2.4.14, amendments to the Future Land Use Map of the Comprehensive Plan are not preliminary development orders. Prior to any preliminary development order, the applicant will need to demonstrate how any deficiencies will be addressed. No final development order can be issued if the development would result in a deficiency for any public facility monitored for concurrency.

Traffic Impact

Table 3. Affected Comprehensive Plan Roadway Segments[1]

Segment Number[2,3]	Segment Description	Lanes	Functional Classification	Area Type	LOS
3 (4127)	US 441 (from MPO Boundary to CR 25A East Intersection)	4/D	Principle Arterial	Urban Trans	D
4 (106)	US 441 (from CR25A East Intersection to SR235)	4/D	Principle Arterial	Urban Trans	D

1 Source: City of Alachua Comprehensive Plan, Traffic Circulation Element.
2 For developments generating 1,000 trips or greater, affected roadway segments are identified as all those wholly or partially located within · mile of the development's ingress/egress, or to the nearest intersecting major street, whichever is greater, and all roadway segments for which the proposed development's impacts are 5% or greater on the Maximum Service Volume (MSV) of the roadway [Section 2.4.14(H)(2)(b) of the LDRs].
3 FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity

Table 4. Potential Trip Generation

	Land Use	AADT (Enter/Exit)	AM Peak Hour (Enter/Exit)	PM Peak Hour (Enter/Exit)
Proposed FLUM Amendment	Residential [1]	2,790 (1,395/1,395)	266 (66/200)	133 (84/49)
	Commercial[1]	4,654 (2,327/2,327)	147 (91/56)	412 (198/214)
Potential Trips		**7,444 (3,722/3,722)**	**413 (157/256)**	**545 (282/263)**

1 Buckholz Concurrency Study, October 2021

Table 5. Potential Impact of Affected Comprehensive Plan Roadway Segments

Traffic System Category	3 US 441 (from MPO Boundary to CR 25A East Intersection) [1]	4 US 441 (from CR25A East Intersection to SR235)[1]
Maximum Service Volume[2]	43,000	45,700
Existing Traffic[3]	25,536	20,435
Reserved Trips[4]	43	4,323
Available Capacity[4]	19,421	20,942
Potential Impact Generated by Proposed Comprehensive Plan Amendment[5]	7,444	1,712
Residual Capacity after Proposed Comprehensive Plan Amendment[6]	**11,977**	**19,230**
PM Peak Hour Traffic Analysis	**3 US 441 (from MPO Boundary to CR 25A East Intersection) [1]**	**4 US 441 (from CR25A East Intersection to SR235)[1]**
Maximum Service Volume[2]	3,870	4,110
Existing Traffic[3]	2,118	1,941
Reserved Trips[4]	5	298
Available Capacity[4]	1,747	1,871
Potential Impact Generated by Proposed Comprehensive Plan Amendment [5]	545	109
Residual Capacity after Proposed Comprehensive Plan Amendment[6]	**1,202**	**1,762**

1 FDOT roadway segment number shown in parenthesis. For the purposes of concurrency management, COA Comprehensive Plan segments that make up a portion of a larger FDOT roadway segment will be evaluated together when determining post development roadway capacity.
2 AADT & Peak Hour MSVs calculated using LOSPLAN 2012. County Facilities reflect a 10 percent reduction in the MSV calculated within LOSPLAN 2012 as set forth in the Generalized Tables for AADT / Peak Hour Volumes, FDOT 2018 Q/LOS Handbook.
3 Florida Department of Transportation, District Two, Level of Service Reporting Tool 2019, accessed April 7, 2021
4 Source: City of Alachua January 2022 Development Monitoring Report.
5 Source: Buckholz Traffic Concurrency Study, October 2021.
6 The application is for a Preliminary Development Order. Concurrency will not be reserved.

Evaluation: As shown in Table 5, affected segments 3 and 4 will not be deficient after the proposed comprehensive plan amendment. Concurrency and impacts to the City's transportation network will be reevaluated when any application for a final development order (site plan or final plat).

Potable Water Impacts

Table 6. Potable Water Impacts

System Category	Gallons Per Day
Current Permitted Capacity*	2,300,000
Less Actual Potable Water Flows*	1,300,250
Reserved Capacity*	200,907
Potential Potable Water Demand from Proposed Amendment **	214,760
Residual Capacity	**584,083**
Percentage of Permitted Design Capacity Utilized	**74.61%**

Sources:
** City of Alachua January 2022 Development Monitoring Report*
***City of Alachua Comprehensive Plan Potable Water Level of Service of 275 gallons/du/ day x 514 units + .15 gallons/ day/ square foot non-residential x 489,400 square feet*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 214,760 gallons per day at build out. This analysis is based on the practicable development potential of 514 residential dwellings and 489,400 square feet of non-residential that would be permitted by the proposed FLUM Designation Concurrency and impacts to the City's utility systems will be reevaluated at the preliminary plat or site plan review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for potable water facilities, and the impacts are therefore acceptable.

Sanitary Sewer Impacts

Table 7. Sanitary Sewer Impacts

System Category	Gallons Per Day
Treatment Plant Current Permitted Capacity*	1,500,000
Less Actual Treatment Plant Flows*	677,000
Reserved Capacity*	180,101
Projected Potential Wastewater Demand from Proposed Amendment **	201,910
Residual Capacity	**440,989**
Percentage of Permitted Design Capacity Utilized	**70.60%**

Sources:
** City of Alachua March 2018 Development Monitoring Report*
***City of Alachua Comprehensive Plan Potable Water Level of Service of 250 gallons/du/ day x 514 units + .15 gallons/ day/ square foot non-residential x 489,400 square feet*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 201,910 gallons per day. This analysis is based on the practicable development potential of 514 residential dwellings and 489,400 square feet of non-residential that would be permitted by the proposed FLUM Designation. Concurrency and impacts to the City's utility systems will be reevaluated at the preliminary plat or site plan review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") for sanitary sewer facilities, and the impacts are therefore acceptable.

Recreational Impacts

Table 8a. Recreational Impacts

System Category	Acreage
Existing City of Alachua Recreation Acreage[1]	135.48
Acreage Required to Serve Existing Population[2]	52.87
Reserved Capacity[1]	3.94
Potential Demand Generated by Development[3]	7.09
Residual Recreational Capacity After Impacts	**71.58**

Sources:
1 *City of Alachua January 2022 Development Monitoring Report.*
2 *University of Florida, Bureau of Economic & Business Research, Estimates of Population by County and City in Florida, April 1, 2016; Policy 1.2.b, Recreation Element (Formula: 9,892 persons / [5 acres/1,000 persons])*
3 *US Census Bureau; Policy 1.2.b, Recreation Element (Formula: 2.76 persons per dwelling x 514 dwellings / [5 acres/1,000 persons])*

Table 8b. Improved Passive Park Space Analysis

Minimum Improved Passive Park Space Required to Serve Existing Population & Reserved Capacity[1]	11.36 acres
Acreage Required to Serve Demand Generated by Development[2]	1.42 acres
Total Area Required to Serve Existing Population, Reserved Capacity, & Demand Generated by Development	12.78 acres
Existing Improved Passive Park Space[1]	34.82 acres
Improved, Passive Park Space Utilized by Existing Population, Reserved Capacity, & Demand Generated by Development[3]	**36.70 %**

1 *Source: City of Alachua January 2022 Development Monitoring Report.*
2 *Formula: Recreation Demand Generated by Development (7.09 acres) x 20%.*
3 *Formula: Total Improved Passive Park Space / (Acreage Required to Serve Existing Population + Reserved Capacity + Acreage Required to Serve Demand Generated by Development.)*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 7.09 recreational acres, and for passive park space by 1.42 acres. Concurrency and impacts to the City's recreation system will be reevaluated at the preliminary plat review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of recreational facilities; therefore, the impacts are acceptable.

Solid Waste Impacts

Table 9. Solid Waste Impacts

System Category	Lbs Per Day	Tons Per Year
Existing Demand[1]	42,296	7,719.02
Reserved Capacity[2]	17,754.19	3,240.14
Projected Solid Waste Demand from Application[3]	20,065.75	3,662
New River Solid Waste Facility Capacity[4]	**50 years**	

Sources:
1 *University of Florida, Bureau of Economic & Business Research, Estimates of Population by County and City in Florida, April 1, 2016; Policy 2.1.a, CFNGAR Element (Formula: 10,470persons x 0.73 tons per year)*
2 *City of Alachua January 2022 Development Monitoring Report*
3 *Policy 2.1.a, CFNGAR Element (Formula: .73 tons x 514 dwellings +5.5 lbs per/1ksf nonresidential/ day)*
4 *New River Solid Waste Facility, April 2021*

Evaluation: The proposed amendment would increase the maximum potential demand from the development of the subject property by 3,663 tons per year. Concurrency and impacts to the solid waste system will be reevaluated at the preliminary plat or site plan review stage. It is anticipated that the proposed amendment will not adversely affect the Level of Service ("LOS") of solid waste facilities; therefore, the impacts are acceptable.

Public School Impact

The School Board of Alachua County (SBAC) has not issued a School Capacity Review determination for the proposed amendment. A determination will be required prior to issuance of any final development order in accordance with the City's Comprehensive Plan, specifically Policies 1.1.b, 1.1.c, 1.1.e, and 1.1.f of the Public School Facilities Element. At this time, it is anticipated that the proposed amendment will result in a demand of 189 total student stations (44 for elementary, 22 for middle, and 28 for high school). On February 28, 2022 the City received a letter from the Alachua County School Board indicating that the capacity for the Santa Fe High School, Mebane Middle School, and Northwest Alachua Elementary School Concurrency Areas will be adequate considering the impacts of the proposed development.

Any future determination must find that the students generated by the proposed amendment can be reasonably accommodated for the five, ten, and twenty year planning periods at the elementary, middle, and high school levels.

Upon submittal of any final subdivision plat or site plan, the development will be subject to a concurrency review and determination of the availability of school capacity at the time of such review.

RE: Notice of Hearing to be Scheduled for:

-Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
-Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Mr Potts:

On January 18, 2022 the City of Alachua received your updated applications for the above referenced projects.

Based on review of the materials submitted, the City has determined that these applications can now be scheduled for a hearing before the Planning and Zoning Board.

You must provide two (2) *double-sided, three-hole punched, color sets* of each **complete** application package, seven (7) full size sets of site plans, and a digital copy of all materials in PDF format on a CD *no later than 10 business days prior to the PZB Meeting at which your application is scheduled to be heard.* The application has been scheduled for the **March 8, 2022** Planning and Zoning Board meeting; therefore, the above referenced materials must be submitted to the City no later than ***Tuesday, February 22, 2022.*** Materials may be submitted earlier than this date.

In addition, Section 2.2.9(D) of the Land Development Regulations requires the applicant to place posted notice signs on the subject property at least 14 days prior to the public hearing. Therefore, posted notice signs must be placed on the property no later than Thursday, February 17, 2022, as City Hall be closed on Monday, February 21. 2022. These signs will be ready for pick up after 12 PM on Thursday, February 17, 2022.

If you plan to utilize a PowerPoint presentation or would like other materials to be available for reference during the public hearing, please submit the presentation or materials no later than

12:00 PM on the last business day prior the PZB meeting (no later than Monday, February 7, 2022).Any presentation or materials may be submitted by emailing them to planning@cityofalachua.com .

Should you have any questions, please feel free to contact me at (386) 418-6100, ext. 108 or via email at ahall@cityofalachua.com.

Sincerely,

Adam Hall, AICP
Planner

February 28, 2022

RE: ACPS – Schmidt Farms

Alachua County Public Schools ("ACPS") has received notification of a Comprehensive Plan Amendment (CPA) and rezoning within the City of Alachua. The project encompasses 118.2 acres identified as Parcels 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, and 05945-000-000 This project is reviewed in accordance with *Objective 1.1: of the City of Alachua County Comprehensive Plan* and *Section 6 of the Alachua County Public School Interlocal Agreement.*. The proposed amendment will entitle 213 single family units and 301 multi-family units.

Pursuant to Chapter 1003, Florida Statutes, the School Board is charged with the operation and control of public K-12 education within the Alachua County School District. Its responsibilities include school facility planning, construction and maintenance, and student assignment to maintain adequate and efficient utilization of educational facilities.

Please be advised that the School Board may be launching a district wide evaluation of its capital investment priorities and policies and its student assignment policies. This review will involve an examination of school capital financing and the allocation of present and future funds among new construction, renovation and maintenance as required to maintain a uniform level of service throughout the District.

This evaluation will involve a comprehensive review of all public schools, including their attendance zones and the educational programs offered. As a result of anticipated redistricting, areas of the County and the towns/cities currently zoned for a school may no longer be zoned for the same school when the redistricting process is completed. Any new residential development located in an existing school zone is not guaranteed to remain in that same zone after the redistricting process is completed. It is anticipated that a new school zoning plan will be in place for the start of the 2023-2024 school year.

Additionally, please be advised that many of Alachua County Public Schools do not have adequate space for additional students.

The Santa Fe High School CSA currently accommodates an enrollment of 1,193 high students and is operating at 84% of its permanent capacity of 1,414 student stations. At buildout, this project is projected to generate 28 high students. High school capacity is projected to remain adequate during the five year and ten year planning periods.

The **Mebane Middle School CSA** currently accommodates an enrollment of 339 middle students and is operating at 43% of its permanent capacity of 796 student stations. At buildout, this project is projected to generate 22 middle students. Middle school capacity is projected to remain adequate during the five year and ten year planning periods.

The **Northwest Alachua Elementary CSA** currently accommodates an enrollment of 1,307 elementary students and is operating at 80% of its permanent capacity of 1,639 student stations. At buildout, this

project is projected to generate 44 elementary students. Elementary school capacity is projected to remain adequate during the five year and ten year planning periods.

A resolution of capacity issues within the District will not be clear until the comprehensive evaluation noted above has been completed. To facilitate a satisfactory and long term solutions, it is recommended that the City encourage developers to contribute to the expansion of educational facilities through "Capacity Enhancement Agreements" (refer to ILA Section 6.5).

If you have additional questions please contact Suzanne Wynn, Director of Community Planning @ 352-955-7400 x 1445

Sincerely,

Carlee Simon, Ph.D.

RE: -Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
-Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Mr Potts:

On January 18, 2022 the City of Alachua received your revised, completed application for a Comprehensive Plan Amendment to the Future Land Use Map for the Schmidt Farms project which proposes amending the City of Alachua Future Land Use Map designations from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial, and Conservation on a 121.56-acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The City also received your, revised completed Site Specific Amendment to the Official Zoning Atlas (Rezoning) application, which proposes rezoning the subject property from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM) on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The proposed rezoning would permit a maximum of 489,400 square feet of non-residential uses and 515 dwelling units on the subject property. A Project Assistance Team meeting was held on October 11, 2021 to discuss this application.

The applications have been reviewed for compliance with the applicable review standards, including the City's Comprehensive Plan and Land Development Regulations (LDRs). Based upon Staff's review, revisions must be made to the applications before they may be scheduled for a public hearing before the City's Planning & Zoning Board (PZB). Please address all insufficiencies outlined below in writing and provide an indication as to how they have been addressed by 5:00 PM on **Tuesday, February 22, 2022.** These materials may be submitted electronically. Submission of an incomplete package may delay your tentative hearing at the Planning and Zoning Board. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the PZB.

Please address the following insufficiencies :

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations. **

PD-COMM and PD-R Rezoning Review Comments

1. *New Comments*
    a. Combine Allowable Use cells for Development Areas A and B to clarify allowable uses. Possible language:
        - All allowed uses in the PD-Comm Zoning District per Table 4.1-1 except that the following uses shall not be allowed in Development Area B: automobile rental and sales, automobile repair and servicing, automobile service station, boat and marine rental and sales, carwash and auto detailing, recreational vehicle rental and sales, taxicab service, tire sales and mounting, towing service, transmission or muffler shop, pawn shop, light manufacturing, airplane landing strip, and helicopter landing facilities.
        - Stormwater Water Management Facilities
        - Common Area and Open Space

    b. Combine cells for maximum development potential for Development Areas and B.
    c. Add additional note to Development Area C Maximum Development Potential limiting number of cottage style homes to 82 (50% of permitted maximum of dwelling units proposed)
    d. If there is going to be a neighborhood amenity center (pool, clubhouse, etc) maximum development potential need to be provided (maximum floor area, parking rate, and permitted development areas (suggest B and C).

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

RE: -Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
-Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Mr Potts:

On December 13, 2021 the City of Alachua received your revised, completed application for a Comprehensive Plan Amendment to the Future Land Use Map for the Schmidt Farms project which proposes amending the City of Alachua Future Land Use Map designations from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial, and Conservation on a 121.56-acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The City also received your, revised completed Site Specific Amendment to the Official Zoning Atlas (Rezoning) application, which proposes rezoning the subject property from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM) on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The proposed rezoning would permit a maximum of 489,400 square feet of non-residential uses and 515 dwelling units on the subject property. A Project Assistance Team meeting was held on October 11, 2021 to discuss this application.

The applications have been reviewed for compliance with the applicable review standards, including the City's Comprehensive Plan and Land Development Regulations (LDRs). Based upon Staff's review, revisions must be made to the applications before they may be scheduled for a public hearing before the City's Planning & Zoning Board (PZB). Please address all insufficiencies outlined below in writing and provide an indication as to how they have been addressed by 5:00 PM on **Monday, January 17, 2022.** These materials may be submitted electronically. Submission of an incomplete package may delay your tentative hearing at the Planning and Zoning Board. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the PZB.

Please address the following insufficiencies :

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations. **

LSCPA Review Comments

1. *General*
   a. **New Comment: Revision to proposed land use designations appears to remove "community commercial" designation. However, application narrative and application cover sheet still reference community commercial. Please verify and correct throughout.**

PD-COMM and PD-R Rezoning Review Comments

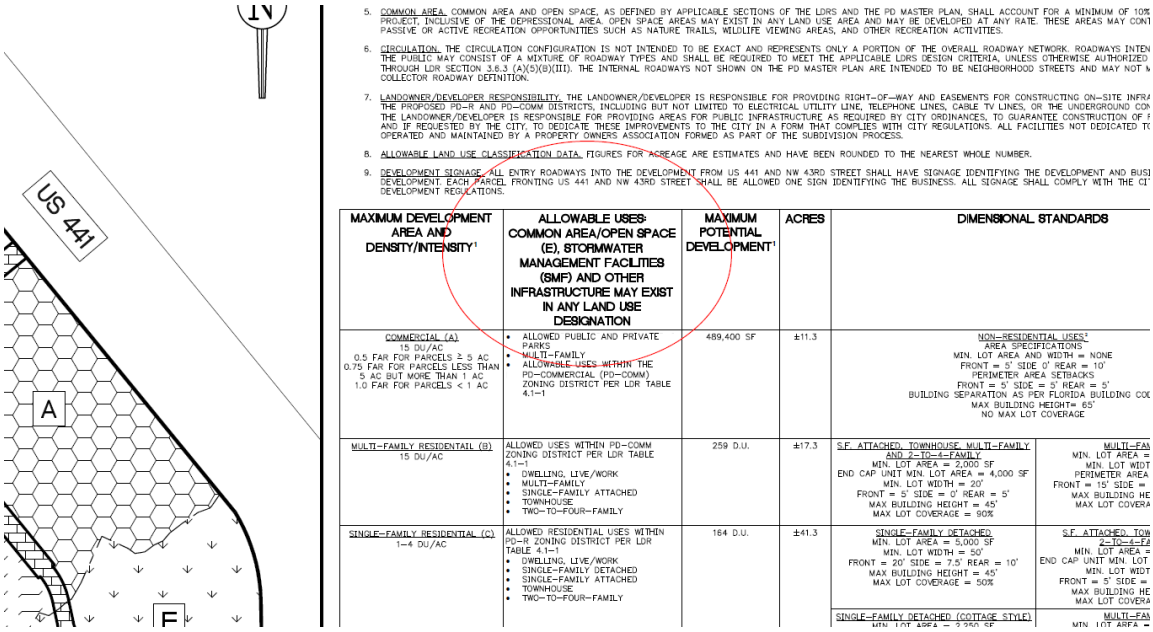
3. *Additional Standards for PD Districts (Section 3.6.3 (A)) – PD-R)*
   a. Per Section 3.6.3 (A)(5)(iii), design standards may be reduced where it is found that:
   a. The reduction or modification is necessary as a traffic-calming measure;
   b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;
   c. Access for emergency service vehicles is not substantially impaired;
   d. Adequate off-street parking is provided for the uses proposed; and
   e. Adequate space for public utilities is provided within the right-of-way.

   New Comment: This comment does not appear to have been addressed. Please provide justification for modification to street design standards that address items a-e above.

   b. **NEW COMMENT: Development Area (B) is named multi-family residential, which may indicate that only that use or similar uses are intended or permitted in that development area. Please consider renaming or modifying allowed uses to match current name of development area. Current maximum development potentials as found in PD Masters plan would indicate that only non-residential would go into Development Area A and only Residential would go into Development Area B.**

   c. **NEW COMMENT: Allowable uses column requires clarification for each development area. Are listed uses exclusive or in addition to? All specific uses listed appear to be permitted within PD-Comm zoning district.**

5. *Comprehensive Plan Analysis*
   a. Please provide calculation for number of permitted residential units. Application request 53.4 acres of Moderate Density Residential, which results in a maximum residential development of 213 dwelling units. However, the application states that the maximum number of residential units is 515. Please address. It may be



necessary to include a portion as medium density residential or high density residential.

New Comment: Revision to proposed land use designations appears to remove "community commercial" designation. However, application narrative and application cover sheet still reference community commercial. Please verify and correct throughout.

7. *Miscellaneous / General Comments*

a. Allowable uses column in Table on Master Plan sheet has typo in column title.

New Comment: This does not appear to have been addressed. Please see image below. Please verify column title is correct.

b. **New Comment: In Development Area C, the side setback for the single family detached is 7.5 feet, which would yield a potential maximum building envelope of 35 feet. Please confirm.**

c. **New Comment: A description or definition of cottage style should be included. Staff assumes these would be single family detached structures in appearance on a common parcel. Please confirm.**

d. **New Comment: Please provide legal descriptions (in word format) and sketches for the following:**

i. Overall subject property
ii. Area proposed to be amended to Moderate Density Residential Future Land Use Designation
iii. Area proposed to be amended to High Density Residential Future Land Use Designation
iv. Area proposed to be amended to Commercial Future Land Use Designation
v. Area proposed to be amended to Conservation Future Land Use Designation
vi. Area proposed to be rezoned to PD-Commercial

vii. Area proposed to be rezoned to PD-Residential

If possible, please provide in shapefile format as well.

9. Potential Development Conditions (Revised 01/06/22)
   a. The following are preliminary potential conditions that are in the process of being developed and will be based on submitted data and information as well as consultation with outside experts and other agencies. Other conditions may be incorporated after review of subsequent approvals:
      i. All roadway improvements to US HWY 441 and NW 43rd Street noted in the submitted traffic study shall be permitted and completed in conjunction with any subdivision, site plan, or infrastructure plan proposed for the subject property. Revised traffic studies shall be submitted as a part of any development application that meets the conditions in accordance with the schedule below.

Study	Cumulative Non-Residential Floor Area Exceeds (square feet)	Cumulative Residential Units Exceeds (Dwelling units)	Date Development Application Submitted
Initial	NA	NA	NA
Update 1	125,000	200	01/01/2025
Update 2	250,000	400	01/01/2028

      The traffic study shall be valid for a period of 3 years or until the next Update is required. Unless otherwise required by the City's Land Development Regulations, Alachua County, or Florida Department of Transportation, no more than 2 additional traffic studies shall be required.
      ii. Per the Independent Review of the Schmidt Farms Traffic Study provided by Brian Kanely, P.E., and communication from the Florida Department of Transportation, a structural analysis of the traffic signal mast arms at the intersection of US Highway 441 and NW 43rd Street must be performed. This analysis shall be performed and submitted in conjunction with a final PD Plan application.
      iii. Because of the location in relation to surrounding wetlands, sustainable landscaping practices including limitations on use of pesticides and irrigation systems must be considered. These practices include:
         1. Requiring Compost fertilizing (as opposed to traditional/ synthetic fertilizers)
         2. No new wells permitted on the property
         3. All non-residential development shall be required to utilize Florida Friendly Landscaping practices
      iv. Sidewalks will be provided along or within US Highway 441 right-of-way and NW 43rd Street right-of-way. Such sidewalks will be extended to NW 102nd Place and NW 93rd Ave. Sidewalks shall be installed as adjacent property within the project is developed. Sidewalks within the rights-of-way shall be permitted through the Florida Department of Transportation or Alachua County Public Works, as applicable. If necessary, sidewalks or

pedestrian connections may be provided on the subject property with provision of public access/sidewalk easement.

v. A limit of 1 use that includes gasoline sales located within Development Areas located within PD-COMM district.

vi. A maximum 15,000 square feet of restaurant with drive-through use shall be permitted in PD-COMM development areas.

vii. No more than 225,000 square feet of non-residential shall be permitted through site plan until Certificates of Occupancy on 100 residential dwelling units have been issued within the PD-R or PD-COMM districts located on the subject property. A minimum of 25,000 square feet non-residential uses must be constructed with a Certificate of Occupancy prior to issuance of any development order for more than 100 dwelling units within the PD-COMM district.

viii. Prior to demolition of the existing structures on the property greater than 100 years old, the applicant must provide evidence from a licensed architect or structural engineer that rehabilitating the structures would not be cost feasible. Prior to demolition, the applicant shall supply a historic structure report that includes photos, architectural descriptions of the interior and exterior of the structure, known history of the structures and sites, and locations (longitude/latitude) of the structures.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

1.0 Introduction

1.1 Purpose

Wood Environment & Infrastructure Solutions, Inc. (Wood) was authorized by the City of Alachua (the City) to perform technical review of the Environmental Resource Assessment report prepared by Ecosystem Research Corporation (ERC) (2021) for the Schmidt Farms Market Site.

1.2 Background

Schmidt Farms– DM Alachua Investments LLC submitted an Environmental Assessment Report for the Schmidt Farms Market Site (October 2021) in support of a City of Alachua Land Use Comprehensive Plan Amendment and Re-zoning Amendments. Wood scientists have reviewed the Environmental Assessment Report to verify if the report findings are professionally acceptable. The findings of the review of the Environmental Assessment are presented in Section 2 and 3.

The 121.56 planned development area is located within the southwest quadrant of the intersection of US 441 and NW 43rd Street. Currently, the majority of the Planning Parcel for the proposed Project Site is undeveloped except for minimal constructed buildings associated with a single-family residence and multiple small agriculture related buildings that have historically been used for dairy, pasture, and silvicultural operations. Parcels **05936-007-001** and **05936-007-002** have historic structures that were associated with small commercial enterprises used on these parcels in the past that include Angel Gardens, a Bike Shop, and a restaurant to name a few.

2.0 Environmental Assessment Review

Wood environmental scientists conducted a desktop review and site assessment to confirm or deny the findings of the Environmental Assessment report. The site assessment included review of wetland delineation lines for consistency with 1987 United States Army Corps of Engineers (USACE) "Corps of Engineers Wetlands Delineation Manual" and the Florida wetland delineation method, "Delineation of the Landward Extent of Wetlands and Surface Waters" (Chapter 62-340). In addition, the site was reviewed for potential presence of protected species or their habitat.

2.1 Wetland Delineation Review

ERC performed a desktop review of readily available geographic information system resources to assess the wetland and upland habitats on and adjacent to the subject property. Resources reviewed included current and historic aerial photographs, national wetland inventory, USGS quadrangle maps, Alachua County 2001 LiDAR Topography maps, FEMA flood zone maps, NRCS soils maps, and FDEP land use maps.

ERC scientists conducted a field delineation in 2008 which was reviewed by SRWMD and approved. A more recent delineation was performed by ERC in 2021 according to the *Delineation of the Landward Extent of Wetlands and Surface Waters* (Chapter 62-340 Florida Administrative Code [F.A.C.]) and the wetlands delineation lines were updated. The 2021 wetland delineation lines were approved by Alachua County.

On December 3, 2021, Wood scientists visited the site, reviewed the wetland delineation, and agreed with the general location of the wetland boundary lines. There were no wetland flags, and Wood scientists did not have access to the GPS points referred to in the ERC report; therefore, it should be noted that this review of the wetland delineation does not constitute a verification. Furthermore, prior to development, the wetland delineation will also need to be verified by Suwannee River Water Management District (SRWMD).

2.2 Threatened & Endangered Species Review

ERC scientists performed a desktop survey for the potential presence of threatened and endangered species using Florida Natural Areas Inventory (FNAI) and USFWS Information for Planning and Consultation (IPaC) Resource List Report (USFWS, 2021a) and performed a site investigation for evidence of listed species and their habitat. Wood scientists reviewed the ERC assessment. The methods used by ERC are consistent with methods that Wood scientists follow for listed species evaluations. **Table 1** outlines the species listed by FNAI and IPaC resource lists, their preferred habitat, if that preferred habitat is found on the subject property, and ERC's effects determination.

In December 2020, the USFWS determined the monarch butterfly (*Danaus plexippus*) should be a candidate for listing under the Endangered Species Act. The monarch butterfly is not yet listed or proposed for listing, and there are no Section 7 of the Endangered Species Act requirements at this time (USFWS, 2021b). This species was not included in the ERC report and has been included in **Table 1**.

On December 3, 2021, Wood scientists evaluated the onsite habitat compared with preferred habitats for the listed species identified by FNAI and IPaC. Wood scientists generally agreed with the habitat assessments made by ERC scientists.

Wood scientists observed killdeer (*Charadrius vociferus)* during the site visit. The killdeer is a migratory bird species that is common and can be found in the project area year round. During breeding season, the project area would be a common area for nesting as the killdeer are ground nesting birds preferring open areas with high visibility such as bare soil or short-grass fields (Audubon, 2021). The Migratory Bird Treaty Act (MBTA) of 1918 protects all migratory birds. MBTA makes it illegal for people to "take" migratory birds, their eggs, feathers or nests.#

No threatened or endangered wildlife species were observed during Wood's site assessment. The state endangered, Florida spiny-pod (*Matelea floridana),* was observed within the project site within the area that will be conservation easement.

2.3 Tree Protection

The ERC report notes that no Champion Trees have been reported for the project area and most of the historical large trees on the site were removed through silvicultural and agricultural practices. Wood scientists observed many large trees on the property. If large trees are to be removed as part of the development, a City of Alachua Tree Removal Permit will be required.

Table 1. Threatened and Endangered Species with Potential for Occurrence on the Project Area

Scientific Name[a]	Common Name[a]	Listing Status [a]	Preferred Habitat [b]	Habitat Present on Project Site[d]	ERC Impact Determination
Laterallus jamaicensis ssp. *jamaicensis*	Eastern Black Rail	PT	Salt, brackish, and freshwater marshes[c]	No	No effect
Mycteria americana	Wood Stork	FT	Nesting: mixed hardwood swamps, sloughs, mangroves, cypress domes/strands; Foraging: freshwater and estuarine marshes	Yes- foraging habitat No-nesting habitat	No effect
Picoides borealis	Red-cockaded Woodpecker	FE	Slash, longleaf, and loblolly pines	Yes	No effect
Aphelocoma coerulescens	Florida Scrub-Jay	FT	Sand pine and xeric oak scrub, and scrubby flatwoods	No	No effect
Falco sparverius paulus	American Kestrel	ST	Primarily open woodlands, sandhill, and fire-maintained savannah pine, pastures and open fields	Yes	Not Likely to Adversely Affect - Most of the nesting habitat is within a Conservation Easement
Egretta caerulea	Little Blue Heron	ST	Swamps, estuaries, ponds, lakes, and river [b]	No	No effect
Grus canadensis pratensis	Florida Sandhill Crane	ST	Freshwater marshes, prairies, and pastures	Yes – Forage habitat No - Nesting habitat	No effect- forage habitat will be maintained in the post development condition
Drymarchon couperi	Eastern Indigo Snake	FT	Pine flatwoods, hardwood forests, edges of cypress swamps, and hydric hammocks	Yes	Not Likely to Adversely Affect
Stilosoma extenuatum	*Short-tailed Snake*	ST	Sandy soils, particularly longleaf pine and xeric oak sandhills, scrub and xeric hammock	No	No effect
Pituophis melanoleucus mugitus	Florida Pine Snake	ST	Well-drained sandy soils with a moderate to open canopy	No	No effect
Gopherus polyphemus	Gopher Tortoise	ST, FC	Well-drained, sandy soils, longleaf pine sandhills, xeric oak hammocks, scrub, pine flatwoods, dry prairies and coastal dunes	No	No effect

Scientific Name[a]	Common Name[a]	Listing Status [a]	Preferred Habitat [b]	Habitat Present on Project Site[d]	ERC Impact Determination
Ambystoma cingulatum	Frosted Flatwoods Salamander	FT	Slash and longleaf pine flatwoods with a wiregrass floor and scattered wetlands	No, subject property outside current range of species	No effect
Notophthalmus perstriatus	Striped Newt	FC	Dry upland habitats. Depression marshes, dome swamps and sinkhole ponds. Natural, ephemeral, isolated Wetlands.	Yes – Natural, ephemeral, isolated Wetlands.	No effect
Danaus plexippus	Monarch Butterfly	FC	Milkweed host plant (primarily *Asclepias spp.*)[c]	No	No effect. Not mentioned in ERC Report
Palaemonetes cummingi	Squirrel Chimney Cave Shrimp	FT	Only found in Squirrel Chimney, a small, deep sinkhole that leads to a flooded cave system of unknown size	No	No effect

Prepared by: JLM Checked by: SEM

Note:

PT = Federally Proposed Threatened
FT = Federally Designated Threatened
FE = Federally Designated Endangered
ST = State Designated Threatened
FC = Federal Candidate

3.0 Geological Assessment

According to the ERC report, depressions caused by sinkhole activity have been observed on site. Whether or not any of these are active will need to be determined by a more thorough site assessment.

The ERC report included discussion of geotechnical investigations including borings. The majority of the borings (90%) have very loose soil conditions at the surface to a depth of approximately 7 ft. This observation is consistent with active ground loss and internal erosion and is often associated with active karst development in this part of Florida. 8 of the 55 borings (about 15%) have very loose conditions at depths ranging from about 12 ft to 22 ft below ground surface. These very loose soils are often found in heavily karstified topographies and could be indicative of active karst development.

Based on a comparison of historical topographic maps (1966 to present), ground loss appears to be occurring.

3.1 Recommendations

Based on the geological investigations provided in the ERC report, Wood recommends the following:

1) Perform a detailed mapping and evaluation of potential sinkhole features
2) Conduct limited geophysical surveys to detect the presence of caverns or other karst features that could affect development
3) Choose building locations based on avoiding any identified active ground loss areas

4.0 Summary and Conclusions

Wood scientists generally agree with the Environmental Resource Assessment Report for the Schmidt Farms property prepared by ERC. Wood environmental scientists conducted a desktop review and site assessment to confirm or deny the findings of the Environmental Resource Assessment Report. The site assessment included review of wetland delineation lines, reviewed the property for potential presence of protected species or their habitat, and review of the geological assessment. In general, Wood agreed with the findings and conclusions made by ERC.

Appendix A
USFWS Information for Planning and Consultation (IPaC) Resource List Report

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

7915 Baymeadows Way, Suite 200
Jacksonville, FL 32256-7517

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Log in to IPaC.
2. Go to your My Projects list.
3. Click PROJECT HOME for this project.
4. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

NOT FOR CONSULTATION

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information. IPaC only shows species that are regulated by USFWS (see FAQ).
2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Birds

NAME	STATUS

Eastern Black Rail Laterallus jamaicensis ssp. jamaicensis — Threatened
Wherever found
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/10477

Wood Stork Mycteria americana — Threatened
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/8477

Reptiles

NAME	STATUS

Eastern Indigo Snake Drymarchon corais couperi — Threatened
Wherever found
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/646

Gopher Tortoise Gopherus polyphemus — Candidate
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/6994

Amphibians

NAME	STATUS

Frosted Flatwoods Salamander Ambystoma cingulatum — Threatened
Wherever found
There is **final** critical habitat for this species. The location of the critical habitat is not available.
https://ecos.fws.gov/ecp/species/4981

Insects

NAME	STATUS

Monarch Butterfly Danaus plexippus — Candidate
Wherever found
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/9743

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

THERE ARE NO CRITICAL HABITATS AT THIS LOCATION.

NOT FOR CONSULTATION

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act[1] and the Bald and Golden Eagle Protection Act[2].

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described below.

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php
- Measures for avoiding and minimizing impacts to birds http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php
- Nationwide conservation measures for birds http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf

The birds listed below are birds of particular concern either because they occur on the USFWS Birds of Conservation Concern (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ below. This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the E-bird data mapping tool (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found below.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE

NOT FOR CONSULTATION

	WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)
American Kestrel Falco sparverius paulus This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9587	Breeds Apr 1 to Aug 31
Bald Eagle Haliaeetus leucocephalus This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Sep 1 to Jul 31
Great Blue Heron Ardea herodias occidentalis This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Jan 1 to Dec 31
Henslow's Sparrow Ammodramus henslowii This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3941	Breeds elsewhere
Lesser Yellowlegs Tringa flavipes This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9679	Breeds elsewhere
Magnificent Frigatebird Fregata magnificens This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Oct 1 to Apr 30
Prairie Warbler Dendroica discolor This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 1 to Jul 31
Red-headed Woodpecker Melanerpes erythrocephalus This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 10 to Sep 10

NOT FOR CONSULTATION

Short-billed Dowitcher *Limnodromus griseus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9480	Breeds elsewhere
Swallow-tailed Kite *Elanoides forficatus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/8938	Breeds Mar 10 to Jun 30

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

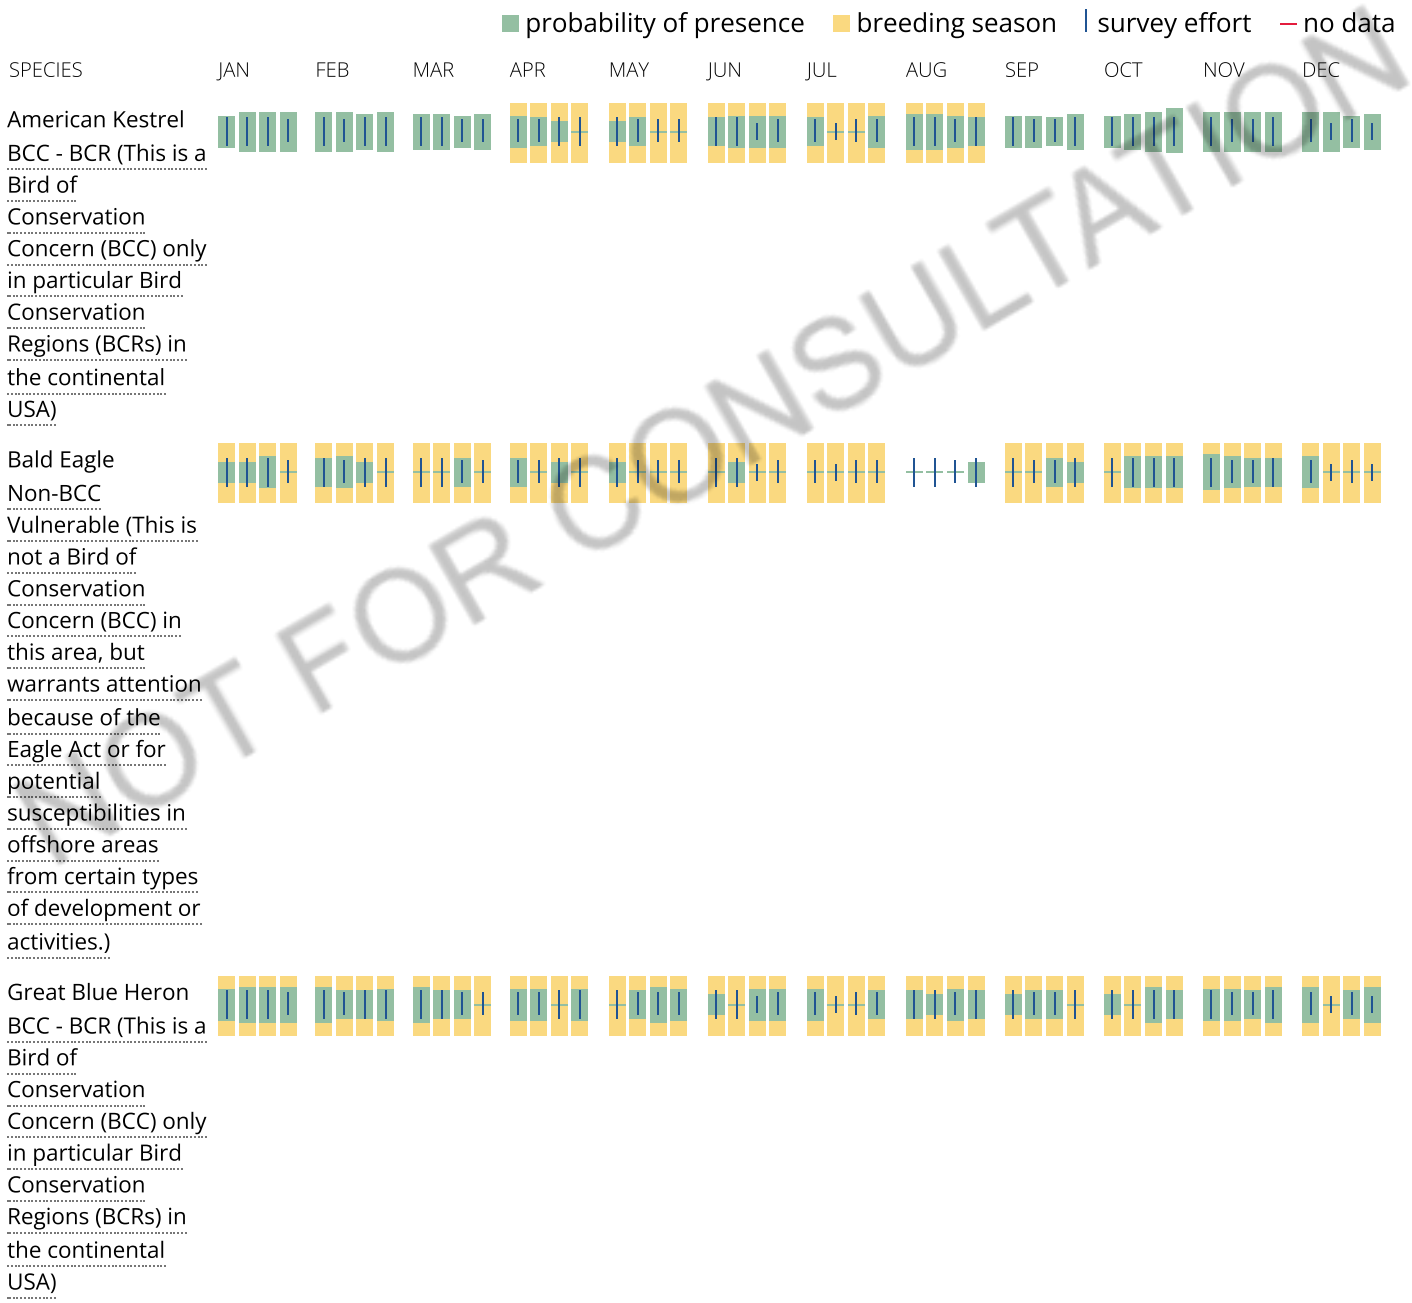
How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)



NOT FOR CONSULTATION

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

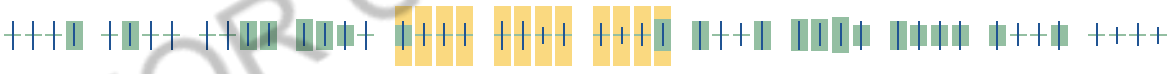
To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

NOT FOR CONSULTATION

Henslow's Sparrow BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

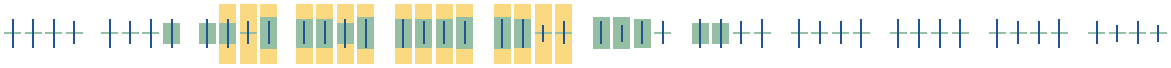


Lesser Yellowlegs BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Magnificent Frigatebird BCC - BCR (This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA)

Prairie Warbler BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Red-headed Woodpecker BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)



NOT FOR CONSULTATION

Short-billed Dowitcher BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

Swallow-tailed Kite BCC Rangewide (CON) (This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.)

NOT FOR CONSULTATION

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the AKN Phenology Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets .

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The Cornell Lab of Ornithology All About Birds Bird Guide, or (if you are unsuccessful in locating the bird of interest there), the Cornell Lab of Ornithology Neotropical Birds guide. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring

NOT FOR CONSULTATION

in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

WETLAND INFORMATION IS NOT AVAILABLE AT THIS TIME

This can happen when the National Wetlands Inventory (NWI) map service is unavailable, or for very large projects that intersect many wetland areas. Try again, or visit the NWI map to view wetlands at this location.

NOT FOR CONSULTATION

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

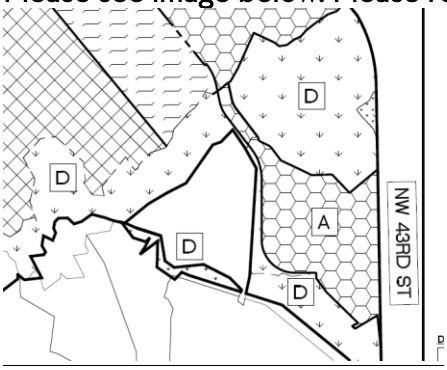
RE: -Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
-Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Mr Potts:

On October 21, 2021 the City of Alachua received your revised, completed application for a Comprehensive Plan Amendment to the Future Land Use Map for the Schmidt Farms project which proposes amending the City of Alachua Future Land Use Map designations from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial, and Conservation on a 121.56-acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The City also received your, revised completed Site Specific Amendment to the Official Zoning Atlas (Rezoning) application, which proposes rezoning the subject property from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM) on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The proposed rezoning would permit a maximum of 489,400 square feet of non-residential uses and 515 dwelling units on the subject property. A Project Assistance Team meeting was held on October 11, 2021 to discuss this application.

The applications have been reviewed for compliance with the applicable review standards, including the City's Comprehensive Plan and Land Development Regulations (LDRs). Based upon Staff's review, revisions must be made to the applications before they may be scheduled for a public hearing before the City's Planning & Zoning Board (PZB). Please address all insufficiencies outlined below in writing and provide an indication as to how they have been addressed by 5:00 PM on **Monday, December 6, 2021.** A total of four (4) copies of the complete application package (i.e., all application materials and attachments) and a CD containing a PDF of all application materials must be provided by this date. Submission of an incomplete package may delay your tentative hearing at the Planning and Zoning Board. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the PZB.



Please address the following insufficiencies :

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations. **

LSCPA Review Comments

1. *General*
   a. **New Comment: Map appears to display development area off of the subject property. Please see image below. Please review and amend map as needed.**

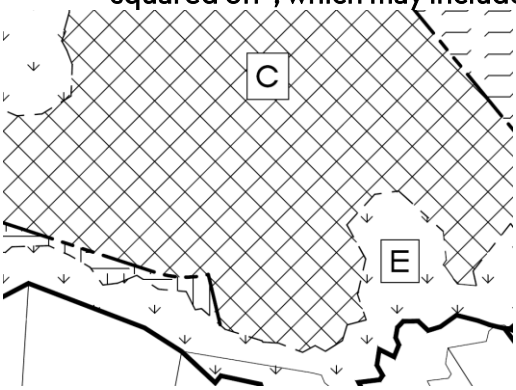
2. *Concurrency Impact Analysis*
   a. **New Comment: Provided traffic analysis appears to be incomplete/ have portions of pages cut off. Please resubmit. Submitted analysis did not appear to reflect impacts to Segment 3 (US 441 from MPO Boundary to CR 25A).**

PD-COMM and PD-R Rezoning Review Comments

1. *Site Specific Amendments to the Official Zoning Atlas (Section 2.4.2) and Planned Development Standards (Section 2.4.3)*
   a. Per Section 2.4.2 (E)(1)(e), the proposed zoning amendment must demonstrate that the uses permitted under the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands. Please provide further detailed analysis including:
      i. Zoning and land use designations of all surrounding lands, regardless of jurisdiction.
      ii. Location of proposed uses proposed in relation to surrounding uses.
      iii. Location of existing uses in vicinity including commercial, industrial, or residential.
      iv. Any other information that address compatibly between proposed uses and existing uses.

      New Comment: Applicant response identifies current uses of property, however, compatibility is based on adjacent land uses not uses on the subject property. Please identify uses near the subject property and characterize those uses in terms of residential densities, land uses (e.g., industrial, commercial, etc).

b. Per Section 2.4.3 (E)(1)(g), the proposed zoning amendment must demonstrate that the uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located. Please elaborate on development pattern in area. Are there existing commercial or business uses already in the vicinity? Is there substantial residential development in the area?



New Comment: Applicant response identifies current uses of property, however, compatibility is based on adjacent land uses not uses on the subject property. Please identify uses near the subject property and characterize those uses in terms of residential densities, land uses (e.g., industrial, commercial, etc).

c. Per Section 2.4.3 (D)(3)(d), an analysis of the site's environmental conditions must be submitted during the rezoning process, as 1) environmental conditions may warrant design considerations and 2) certain standards or conditions may be required based on results of the environmental analysis. Please provide updated environmental analysis.

New Comment: Outside review of environmental impacts are currently underway. Once received, these will be forwarded to the applicant.

2. *General Standards for all PD Districts (Section 3.6.2)*
   a. Per Section 3.6.2 (A)(1), the Master Plan must show the following:
      i. Master Plan must identify location of land use development areas with maximum number, type, and mix of land uses including residential densities and non-residential intensities within each development area. Proposed master plan must address the following:
         1. Additional sub areas should be considered as all uses provided in application materials may not be appropriate when adjacent to single family residential uses or multifamily uses or may require special design considerations. For example, the development area located in the southeast area of the site should not include gasoline sales or restaurants with drive-through/drive-in service. An additional development area within the PD-R zoning district should be considered to provide for larger lots along the south and west property boundaries adjacent to Turkey Creek.

New Comment: A portion of this newly designated development area appears to be narrow and of odd geometry. Staff suggests modifying development area to be more "squared off", which may include enlarging or reducing the size of the development area.

2. Please revise transportation development area (E), to show how Development Area C will be accessed. If roadways are to be public, please create note that such roadways will be dedicated to the Public via platting process or infrastructure plan process.
   New Comment: Response indicates that the transportation/circulation development area is "E" but displayed map indicates that the circulation development area is "D".
3. Note E.2), regarding signage. If signage is to vary from requirements of Section 6.5, a master sign plan will be required. Please review signage standards found in Section 6.5, especially 6.5.4 (C)(2)(b)(iii) and Section 6.5.4 (F)(5), which specifically reference signage within PD Districts.
   New Comment: Unless otherwise modified through the PD Master Plan, the sign regulations regarding multi-tenant development would govern the signage. The standards can be found in Section 6.5.4 (C)(2).

b. Per Section 3.6.2 (A)(3), development along the perimeter of a PD district must be compatible with adjacent existing or proposed future development. A new development area should be created along south and west area of the subject property to provide for larger lots (minimum 10,000 square feet for single family detached; 15,000 square feet for 2 family; 20,000 square feet for 3 family, 30,000 square feet for 4 family).
   New Comment: A portion of this newly designated development area appears to be narrow and of odd geometry. Staff suggests modifying development area to be more "squared off", which may include enlarging or reducing the size of the development area.

3. *Additional Standards for PD Districts (Section 3.6.3 (A)) – PD-R)*
   a. Per Section 3.6.3 (A)(4)(b), provide minimum setbacks/ separations of Development Areas from adjoining residential uses.
      New Comment: Response addresses setbacks from property lines. Please provide separation distances from surrounding residential uses. For example, Development Area C is located, at the closest x' from nearest residential use to the west. Development Area A is located at the closest x' from nearest residential use.
   b. Per Section 3.6.3 (A)(5)(iii), design standards may be reduced where it is found that:
      a. The reduction or modification is necessary as a traffic-calming measure;
      b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;
      c. Access for emergency service vehicles is not substantially impaired;
      d. Adequate off-street parking is provided for the uses proposed; and
      e. Adequate space for public utilities is provided within the right-of-way.
   c. Please include note in PD Master Plan that the alleys permitted will be private/ common area not to be maintained by the City.

4. *Additional Standards for PD Districts (Section 3.6.3 (D)) – PD-COMM*
   a. Note 4) i. provides for on street parallel parking to be permitted. This is acceptable, but please clarify if the parking is included in the pavement width or separate from. Will traffic lanes be obstructed?

New Comment: In locations where on street parallel parking is provided, the minimum right-of-way provided for any subdivision, site plan, or infrastructure plan shall be 60' to provide for adequate spacing of travel lanes, sidewalks, parking areas, and utility infrastructure.

b. Given the dimensional standards (no maximum lot coverage and reduced setbacks), an alternative landscape plan may be advisable to provide maximum flexibility in internal site design. While no final landscape plan is required at this time, the alternative landscape plan may provide general parameters that future landscape plans for future development within the PD districts may use.
New Comment: If no alternatives plan is provided, future development will be required to comply with current LDR standards at time of proposed site plan/ infrastructure plan, or subdivision.

c. Given the dimensional standards (no maximum lot coverage and reduced setbacks), a master parking plan may be advisable to provide maximum flexibility in internal site design. While no final detailed parking plan is required at this time, the alternative landscape plan may provide general parameters that future landscape plans for future development within the PD districts may use.
New Comment: If no alternatives plan is provided, future development will be required to comply with current LDR standards at time of proposed site plan/ infrastructure plan, or subdivision.

5. *Comprehensive Plan Analysis*

a. Please provide calculation for number of permitted residential units. Application request 53.4 acres of Moderate Density Residential, which results in a maximum residential development of 213 dwelling units. However, the application states that the maximum number of residential units is 515. Please address. It may be necessary to include a portion as medium density residential or high density residential.
New Comment: While medium and high density residential development is permitted within the PD-Comm zoning district, there is no minimum or maximum residential density established by the Commercial or Community Commercial land use districts proposed by the associated large scale comprehensive plan amendment. At a high density residential maximum rate of 15 dwelling units per acre, 20.07 acres would be required, leaving 8.53 acres to establish maximum floor to area ratio (FAR). At a FAR of 1.0, the maximum permittable non-residential development would be 371,566 square feet, which exceeds the proposed non-residential of 489,400 square feet of non-residential development in Development Areas A and B. Further, Policy 2.1.d, of the Future Land Use Element states that the Planned Development Commercial zoning is permitted as an options within the commercial and high density residential land use categories, which would indicate that the drafters envisioned a Commercial PD zoning with both residential and commercial uses proposed would require a mix of future land use designations associated with the PD.

b. Application does not address consistency with Policy 1.10.b of the Conservation and Open Space Element. Please address.
New Comment: Proposed allowable use table indicates that stormwater management facilities and public infrastructure are permitted within Development

Area E. Development Area E appears to have been designed to match the minimum water body/ wetland natural buffer area setback requirements per the City's Comprehensive Plan. As such, this area is intended to be left in natural state and not to be developed. Therefore, unless otherwise permitted by the Comprehensive Plan, stormwater management facilities and utilities would not be permitted within Development Area E. Please revise Development Table on Sheet PD-1.

c. Application does not address consistency with Policy 1.12.d of the Conservation and Open Space Element. Please address.
New Comment: Proposed allowable use table indicates that stormwater management facilities and public infrastructure are permitted within Development Area E. Development Area E appears to have been designed to match the minimum water body/ wetland natural buffer area setback requirements per the City's Comprehensive Plan. As such, this area is intended to be left in natural state and not to be developed. Therefore, unless otherwise permitted by the Comprehensive Plan, stormwater management facilities and utilities would not be permitted within Development Area E. Please revise Development Table on Sheet PD-1.

6. *Concurrency Impact Analysis*
   a. New Comment: Provided traffic analysis appears to be incomplete/ have portions of pages cut off. Please resubmit. Submitted analysis did not appear to reflect impacts to Segment 3 (US 441 from MPO Boundary to CR 25A).

7. *Miscellaneous / General Comments*
   a. Allowable uses column in Table on Master Plan sheet has typo in column title.
   New Comment: This does not appear to have been addressed.

8. *Outside Review/ Public Services*
   a. New Comment: See attached review of Traffic Study in a letter dated October 30, 2021 from Brian Kanely, P.E. The City is working to coordinate with FDOT on the issues raised by the letter. Also, please note that the referenced roundabout would require a PD Plan amendment if pursued at a later date.
   b. New Comment: Environmental review is currently underway. We anticipate to have a response from Wood Environmental by December 13, 2021.
   c. New Comment: Please see information from Public Services Department in the attached memo from Rodolfo Valladares, P.E., Public Services Director, and Tom Ridgik, P.E., Engineering Supervisor, dated November 2, 2021.

9. Potential Development Conditions (Revised 11/16/21)
   a. The following are preliminary potential conditions that are in the process of being developed and will be based on submitted data and information as well as consultation with outside experts and other agencies. Other conditions may be incorporated after review of subsequent approvals:
      i. All roadway improvements to US HWY 441 and NW 43rd Street noted in the submitted traffic study shall be permitted and completed in conjunction with any subdivision, site plan, or infrastructure plan proposed for the subject property. Revised traffic studies shall be submitted as a part of any

development application that meets the conditions in accordance with the schedule below.

Study	Cumulative Non-Residential Floor Area Exceeds (square feet)	Cumulative Residential Units Exceeds (Dwelling units)	Date Development Application Submitted
Initial	NA	NA	NA
Update 1	125,000	200	01/01/2025
Update 2	250,000	400	01/01/2028

The traffic study shall be valid for a period of 3 years or until the next Update is required. Unless otherwise required by the City's Land Development Regulations, Alachua County, or Florida Department of Transportation, no more than 2 additional traffic studies shall be required.

ii. Because of the location in relation to surrounding wetlands, sustainable landscaping practices including limitations on use of pesticides and irrigation systems must be considered. These practices include:
    1. Requiring Compost fertilizing (as opposed to traditional/ synthetic fertilizers)
    2. No new wells permitted on the property
    3. All non-residential development shall be required to utilize Florida Friendly Landscaping practices

iii. Sidewalks will be provided along or within US Highway 441 right-of-way and NW 43rd Street right-of-way. Such sidewalks will be extended to NW 102nd Place and NW 93rd Ave.

iv. A limit of 1 use that includes gasoline sales located within Development Areas located within PD-COMM district.

v. A maximum 15,000 square feet of restaurant with drive-through use shall be permitted in PD-COMM development areas.

vi. No more than 225,000 square feet of non-residential shall be permitted through site plan until Certificates of Occupancy on 100 residential dwelling units have been issued within the PD-R or PD-COMM districts located on the subject property. A minimum of 25,000 square feet non-residential uses must be constructed with a Certificate of Occupancy prior to issuance of any development order for more than 100 dwelling units within the PD-COMM district.

vii. Prior to demolition of the existing structures on the property greater than 100 years old, the applicant must provide evidence from a licensed architect or structural engineer that rehabilitating the structures would not be cost feasible. Prior to demolition, the applicant shall supply a historic structure report that includes photos, architectural descriptions of the interior and exterior of the structure, known history of the structures and sites, and locations (longitude/latitude) of the structures.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

Independent Review of the Schmidt Farms (Updated US 441 Traditional Neighborhood) Traffic Study for the City of Alachua, Florida; Project Located in the Southwest Quadrant of US 441 & NW 43rd Street; Prepared by Volkert, Inc. October 2021

At the request of the City of Alachua, FL, Planning and Community Development Department, Volkert, Inc., conducted an independent review of the Schmidt Farms (Updated US 441 Traditional Neighborhood) Traffic Study located in the southwest quadrant of the intersection of US 441 & NW 43rd Street. The Traffic Study was prepared by Buckholz Traffic in October 2021.

The Schmidt Farms Project is in the southwest quadrant of the signalized intersection of US 441 (FDOT State Highway) and NW 43rd Street (Alachua County highway). The proposed Project contains 214 single family homes, 130 apartment units, 171 "residential-over commercial units", and 300,000 gross square feet of retail space. The Project is expected to generate 9,918 external trips with 763 external trips (386 entering and 377 exiting) during the PM peak hour. The Project anticipates having a driveway onto US 441 (north driveway) and a driveway onto NW 43rd Street (south driveway) that will align with the Marathon Gas Station driveway. The build out year for the project is 2031.

The independent review of the Traffic Study will include the following:

- Review of existing traffic volumes.
- Review of trip generation of site traffic.
- Review of distribution and assignment of site traffic onto US 441 and NW 43rd Street.
- Review of future traffic volumes.
- Review of turn lane analysis.
- Review of signalized intersection capacity analysis.
- Review of non-signalized intersection capacity analysis.
- Review of access management evaluation.
- Review of the traffic study recommendations.
- Additional Volkert comments/recommendations for the Schmidt Farms (Updated US 441 Traditional Neighborhood) Traffic Study.

This project was originally reviewed by Volkert in September 2019. The updated project is similar to the 2019 project with respect to land use. Access to the project from US 441 and NW 43rd Street is identical to the proposed 2019 project.

Review of the Traffic Study

Existing Traffic Volumes

This section of the Traffic Study documents (1) how the existing traffic volumes were obtained and (2) how the directional traffic enter/exit counts were obtained from nearby roadways and driveways. This information is correct and there are no comments or suggestions

Trip Generation of Site Traffic

This section of the Traffic Study describes and documents the trip generation for the Project. The total daily trips, AM peak hour trips and PM peak hour trips are correctly calculated per the ITE *Trip Generation Manual, 10th Edition.* It is important to note that there were no adjustments for pass-by traffic in the trip generation (pass-by traffic is traffic that does not originate in the project, is already on the adjacent roadways and the motorist stops by the project land use for a product or service; a gas station is a good example of pass-by traffic). The primary goal of the traffic study is to analyze the total driveway volumes accessing the site and this includes traffic that originates in the project and pass-by traffic. Not reducing the driveway volumes produces site traffic volumes that are conservatively high. The trip generation information is correct and there are no comments or suggestions.

Distribution and Assignment of Site Traffic

This section of the Traffic Study distributes and assigns site traffic onto the streets adjacent to the Project. Manual traffic counts that were obtained at nearby side streets onto US 441 in the Project area resulted in 75% - 80% of traffic headed south towards Gainesville and 20% - 25% of traffic headed north towards Alachua. This distribution of traffic is consistent with previous traffic studies that Volkert has reviewed for the City of Alachua for projects along this portion of US 441.

The assignment of project southbound traffic to 36% US 441 and 36% to NW 43rd Street is reasonable. The University of Florida, Shands Hospital and city and county government offices are east of NW 43rd Street and the Oaks Mall, Butler Plaza/Celebration Point, I-75, and large residential areas are west of NW 43rd Street. Assigning traffic equally to southbound US 441 and southbound NW 43rd Street is a reasonable assumption.

The distribution and assignment of site traffic is correct and there are no comments or suggestions.

Future Traffic Volumes

This section of the Traffic Study describes and documents how the future traffic volumes were calculated. The existing traffic volumes were adjusted by the appropriate FDOT seasonal adjustment factor and then adjusted forward in time by a growth factor from nearby FDOT historical traffic count stations. Site traffic was then added to the future traffic volumes to produce 2031 total traffic volumes for the project. The future traffic volumes are correctly calculated and there are no comments or suggestions.

Turn Lane Analysis

This section of the Traffic Study describes and documents how the determination for left and/or right turn lanes at the Project north driveway onto US 441 and the Project south driveway onto NW 43rd Street were determined. The documentation and methodology for making the determination for the warrants for right and left turn lanes support the conclusions of the Traffic Study. The turn lane analysis was correctly performed and there are no comments or suggestions.

Signalized Intersection Capacity Analysis

This section of the Traffic Study describes and documents how the capacity calculations were performed for the signalized intersection at US 441 and NW 43rd Street. The traffic volume inputs for the Highway Capacity Software were checked and are accurate. This section of the report documents the capacity calculations for this intersection for the existing (2021), 2031 No Build and 2031 Build conditions; there are no comments or suggestions.

Non-signalized Intersection Capacity Analysis

This section of the Traffic Study describes and documents how the capacity calculations were performed for the non-signalized intersections of NW 43rd Street/Project south driveway/Marathon Gas Station Driveway and the US 441/Project north driveway. The traffic volume inputs for the Highway Capacity Software were checked and are accurate. This section of the report accurately documents the capacity calculations for these intersections for the existing, 2031 No Build and 2031 Build conditions; and there are no comments or suggestions.

Access Management Evaluation

The Traffic Study recommends that the existing full median opening on US 441 just north of the proposed Project north driveway be closed and consideration be given to providing a directional median opening on US 441 at the proposed Project north driveway. A directional median opening allows right in/right out/left in traffic and prohibits left out traffic. Given the high-speed conditions on US 441 at this location, Volkert concurs with the Traffic Study recommendation for a directional median opening at this location.

Volkert also concurs with the Traffic Study recommendation to align the proposed Project south driveway onto NW 43rd street with the existing Marathon Gas Station driveway.

Traffic Study Recommendations

This section of the Traffic Study lists the recommendations for modifications to the adjacent roadways that are needed to accommodate the Project site traffic. These recommendations are:

- Relocate the existing median opening on US 441 that is just north of the proposed Project north driveway to the south, so it aligns with the Project north driveway and construct this median opening as a directional median opening (allows right in/right out/left in traffic and prohibits left out traffic.).
- Construct a southbound right turn lane on US 441 at the Project north driveway.
- Construct a northbound left turn lane on NW 43rd Street at the Project south driveway. The Project south driveway will align with the Marathon Gas Station driveway.
- At the Project south driveway, construct two westbound egress lanes, a right only and left/straight.
- As the Project develops, monitor traffic conditions at the Project south driveway on NW 43rd Street to determine if any additional traffic operational modifications are required.

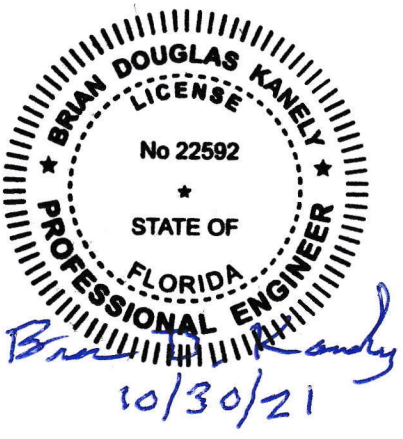
Volkert concurs with these recommendations.

Additional Volkert Comments/Recommendations for the Schmidt Farms (Updated US 441 Traditional Neighborhood) Traffic Study

1. The US 441 Traditional Neighborhood Project is a large project that will most likely be developed in phases. If this is the case, the traffic improvements required by the FDOT for US 441 and by Alachua County for NW 43rd Street may need to be phased as the project develops. The issues of (a) a follow-up traffic study and (b) phasing of roadway improvements on US 441 and NW 43rd Street needs to be discussed between the City of Alachua, the FDOT, Alachua County and the developer as the Project moves forward through the approval process.
2. The Traffic Study mentioned the possibility of a roundabout on NW 43rd Street at the Project south driveway. The right of way required for a roundabout or other roadway modification at the Project south driveway needs to be dedicated at the initial approval stage of the Project. This will guarantee that right of way is available at a future time when the Project trip generation dictates the need for such improvements. A roundabout has significantly different right of way requirements than a standard intersection. The minimum dimension for the inscribed circle of a single lane roundabout on an arterial street like NW 43rd Street is approximately one hundred feet (distance from outside edge of pavement though the central island to the other outside edge of pavement). You then add two feet of curb and gutter, a five-foot grass strip, an eight-foot-wide sidewalk to accommodate bicycles and pedestrians, and a five-foot grass strip for utilities. This results in a right of way width of approximately *one hundred fifty feet* for planning purposes for a one lane roundabout. The minimum dimension for the inscribed circle of a two-lane roundabout is approximately one hundred thirty feet. When you add in the other roadway design features, the right of way width for planning purposes for a two-lane roundabout is approximately *one hundred and eighty feet*. If a roundabout is proposed at the Project south driveway/NW 43rd it is important that the right of way be dedicated when the project is initially approved.
3. As part of the review and approval process for this Project, the FDOT needs to review the issue of adding protected only traffic signal phasing at the US 441/NW 43rd Street traffic signal for the southbound to northbound U-turn maneuver. A protected only traffic signal phasing is the red arrow/yellow arrow/green arrow operation. There is no flashing yellow arrow for permissive left turns. Adding the protected only signal phasing for the southbound to northbound U-turn on US 441 would require adding a three section traffic signal head on the end of the existing mast arm for southbound traffic on US 441. This raises the question as to whether the traffic signal mast arm pole was structurally designed to accommodate the additional traffic signal head that would be needed. Structural design requirements for mast arm poles change over time and what was acceptable when this traffic signal was constructed may not be acceptable with respect to current FDOT structural mast arm pole design requirements and specifications. The City of Gainesville Traffic Operations – Traffic Signals Section maintains all the traffic signals in Alachua County. They were contacted in conjunction with the 2019 traffic study to find out what information was available with respect to the mast arm poles at the US 441/NW 43rd Street traffic signal. Their response was the signal was constructed in August 2004. However, the traffic signal construction plans do not state whether the mast arm

pole for southbound traffic on US 441 was designed to accommodate an additional traffic signal head at the end of the mast arm. A more complete review of the traffic signal plans and whether the existing southbound mast arm pole could accommodate an additional three section traffic signal head needs be explored as part of the approval of the roadway modifications for this project. This is a significant issue due to costs. The current FDOT historical cost information for a seventy (70) foot mast arm pole is approximately $50,000 (this is just the cost for the mast arm pole, it does not include the associated engineering and construction costs). If a new mast arm pole is necessary, the total replacement cost would need to be factored into the costs associated with the highway improvements portion of the project. There is also a traffic safety issue for the U-turn traffic at the traffic signal associated with being able to see northbound oncoming traffic. This section of US 441 would be classified as a high-speed location (greater than 45 mph), plus the left turn lanes on US 441 are offset, which can make it difficult to see oncoming traffic under certain conditions. To summarize this discussion, as part of the review of highway improvements associated with this Project, the City of Alachua should request the FDOT review the following with respect to the traffic signal at US 441/NW 43rd Street:

a. Should the southbound to northbound U-turn be signalized due to the increased volume of traffic from the Project that will be making the U-turn movement and/or due to the high-speed classification of US 441 at NW 43rd Street and the associated traffic safety concerns?



b. If the U-turn movement is signalized, the movement should be a protected only movement. Note: At this traffic signal the existing northbound left turn/U-turn movement is signalized as a protected only movement (three section traffic signal head).

c. If the U-turn movement is signalized, a structural analysis should be performed to determine if the existing mast arm pole can accommodate the additional traffic signal head required for the southbound to northbound U-turn movement

Volkert, Inc. appreciates the opportunity to assist the City of Alachua with this independent review of the Schmidt Farms (Updated US 441 Traditional Neighborhood) Traffic Study. Please contact me if you have any questions or need additional information.

RE: -Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
-Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Mr Potts:

On August 25, 2021 the City of Alachua received your revised, completed application for a Comprehensive Plan Amendment to the Future Land Use Map for the Schmidt Farms project which proposes amending the City of Alachua Future Land Use Map designations from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial, and Conservation on a 121.56-acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The City also received your, revised completed Site Specific Amendment to the Official Zoning Atlas (Rezoning) application, which proposes rezoning the subject property from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM) on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The proposed rezoning would permit a maximum of 489,400 square feet of non-residential uses and 515 dwelling units on the subject property. A Project Assistance Team meeting is scheduled to be held on October 4, 2021 to discuss this application.

The applications have been reviewed for compliance with the applicable review standards, including the City's Comprehensive Plan and Land Development Regulations (LDRs). Based upon Staff's review, revisions must be made to the applications before they may be scheduled for a public hearing before the City's Planning & Zoning Board (PZB). Please address all insufficiencies outlined below in writing and provide an indication as to how they have been addressed by 5:00 PM on **Monday, October 18, 2021.** A total of four (4) copies of the complete application package (i.e., all application materials and attachments) and a CD containing a PDF of all application materials must be provided by this date. Submission of an incomplete package may delay your tentative hearing at the Planning and Zoning Board. Upon receipt of your revised application, Staff will notify you of any remaining insufficiencies which must be resolved, if any, before the item may be scheduled for a public hearing before the PZB.

Please address the following insufficiencies :

Deficiencies to be Addressed

** Unless otherwise noted, references to code sections are to the City of Alachua Land Development Regulations. **

LSCPA Review Comments

1. *General*
   a. Revise application cover and application to reflect change in agent for application. It is staff's understanding that Carter Thompson is no longer employed by JBPro.
   b. Revise application signature to reflect actual applicant or agent signature. Currently, Section B of the Application lists the agent as the applicant, however, the owner/ title holder of the property has signed the application.
   c. Identify small triangular shape area located near intersection of US 441 and NW 43rd Street that does not appear to be part of Conservation (D) area.
   d. Application provides legal description of overall property. Please provide legal description for each land use area (legal description for each area to be Moderate Density Residential, Commercial, Community Commercial, and Conservation).

2. *Urban Sprawl Analysis*
   a. Response II. a. located on Page 6 of Justification Report which relates to the application's consistency with Section 163.3177 (6)(a)(1)9.b(I), F.S, states the development abuts Turkey Creek. Please detail design considerations, including placement of lands within Conservation land use category that demonstrates compliance with this Section. Additionally, the response states that the buffer area will be undisturbed, but this area is identified on the related PD Master Plan application as being eligible for development including stormwater management facilities, roadways, utilities, etc.
   b. Response II. h. located on Page 7 of Justification Report which relates to the application's consistency with Section 163.3177 (6)(a)(1)9.b(VII), F.S., is unclear. Please reword to be clearer.

3. *Concurrency Impact Analysis*
   a. Submitted concurrency impact analysis for potable water, wastewater, traffic, solid waste only provides analysis for proposed residential dwelling units and not any of the proposed non-residential area. Please revise.
   b. Recreation impact analysis states that the proposed development will provide 1.29 acres in improved passive park space. Please clarify. Is this area intended to be dedicated to the City as a public park? If so, please provide location and call out in related PD Master Plan application.

4. *Needs Analysis*
   a. Submitted needs analysis provides state level data and analysis showing need for proposed development. Analysis should be more refined and include local analysis

showing need for residential and non-residential uses that would be permitted under this land use action.

5. *Comprehensive Plan Consistency Analysis*
   a. Page 18 of justification report states that the application is requesting medium density residential, however, map submitted with application and application cover indicate the application requesting moderate density residential. Please verify and correct throughout application.
   b. Page 25 of justification report addressed Objective 5.2 of the Future Land Use Element. The analysis states that the application has "clouted" their concurrency requirements. Please clarify or elaborate.
   c. Please provide calculation for number of permitted residential units. Application request 53.4 acres of Moderate Density Residential, which results in a maximum residential development of 213 dwelling units. However, the application states that the maximum number of residential units is 515. Please address. It may be necessary to include a portion as medium density residential or high density residential to achieve the 515 units on the subject property.
   d. Application does not address consistency with Objective 1.3 and Policy 1.3.d of the Conservation and Open Space Element. Please address.
   e. Application does not address consistency with Policy 1.10.b of the Conservation and Open Space Element. Please address.
   f. Application does not address consistency with Policy 1.12.d of the Conservation and Open Space Element. Please address.

6. *Outside Review Comments*
   a. See attached comments in an email dated September 13, 2021 from Brian Kanely of Volkert, Inc regarding submitted traffic study. Please revise and resubmit traffic study with corrections.
7. *Completeness Review Comments*
   a. Updated environmental report(s) must be provided.

PD-COMM and PD-R Rezoning Review Comments

1. *Site Specific Amendments to the Official Zoning Atlas (Section 2.4.2) and Planned Development Standards (Section 2.4.3)*
   a. Per Section 2.4.2 (E)(1)(e), the proposed zoning amendment must demonstrate that the uses permitted under the proposed amendment are not incompatible with existing land uses of adjacent lands and/or the uses permitted by the zone district classifications of adjacent lands. Please provide further detailed analysis including:
      i. Zoning and land use designations of all surrounding lands, regardless of jurisdiction.
      ii. Location of proposed uses proposed in relation to surrounding uses.
      iii. Location of existing uses in vicinity including commercial, industrial, or residential.
      iv. Any other information that address compatibly between proposed uses and existing uses.

b. Per Section 2.4.3 (E)(1)(g), the proposed zoning amendment must demonstrate that the uses permitted by the proposed amendment will not deviate from the development pattern (both established and as proposed by surrounding zone districts) of the area where the proposed amendment is located. Please elaborate on development pattern in area. Are there existing commercial or business uses already in the vicinity? Is there substantial residential development in the area?
c. Per Section 2.4.3 (E)(1)(j), the proposed zoning amendment must demonstrate that the proposed amendment will not result in development in a location where there are no plans by the City or other governmental entities to provide public facilities to serve the development (roads, potable water, wastewater, parks, stormwater management, and solid wastes), and there are no assurances by the private sector that public facilities are planned and will be available to adequately accommodate development. The rezoning application includes an infrastructure area improvement report that appears to be related to the financing of the needed improvements to serve the development. Please note that this may be a separate matter for the City Administration and Commission to consider. It is ultimately the developer's responsibility to finance and install any required improvements needed to serve the development site. Staff recommends the applicant work with the Public Services Department and/or City Manager's office to obtain feedback on the submitted infrastructure area improvement report.
d. Per Section 2.4.3 (E)(1)(k), the proposed zoning amendment must demonstrate that the proposed amendment would not result in significantly adverse impacts on the natural environment, including, but not limited to, water, air, noise, stormwater management, wildlife, vegetation, wetlands, and the natural functioning of the environment. Please elaborate on protections to be included. Please note the Conservation land use and development area, and permitted uses within those categories.
e. Per Section 2.4.3 (D)(3)(d), an analysis of the site's environmental conditions must be submitted during the rezoning process, as 1) environmental conditions may warrant design considerations and 2) certain standards or conditions may be required based on results of the environmental analysis. Please provide updated environmental analysis.

2. *General Standards for all PD Districts (Section 3.6.2)*
   a. The information provided within the justification narrative for development standards must be incorporated into the PD Master Plan sheets. A PD Master Plan may be multiple sheets.
   b. Per Section 3.6.2 (A)(1), the Master Plan must show the following:
      i. Master Plan must identify location of land use development areas with maximum number, type, and mix of land uses including residential densities and non-residential intensities within each development area. Proposed master plan must address the following:
         1. Additional sub areas should be considered as all uses provided in application materials may not be appropriate when adjacent to single family residential uses or multifamily uses or may require special design considerations. For example, the development area located in the southeast area of the site should not include gasoline sales or restaurants with drive-through/drive-in service. An additional development area within the PD-R zoning district should be

considered to provide for larger lots along the south and west property boundaries adjacent to Turkey Creek.

2. The location of all public facility sites serving the subject property including transportation, potable water, wastewater, parks, fire, police, EMS, storm water, solid waste and schools. This may be in graphical form or through a table displayed on the PD-Master Plan. If in tabular form, the table must show the distance in driving miles from site to public facility.
3. Please address inclusion of agricultural uses in PD-COMM zoning district.
4. Please address inclusion of upper-story dwellings in PD-COMM zoning areas. These are already permitted uses within the PD-Comm district. Does the applicant intend to preclude all other residential development types?
5. As residential is permitted within Development Areas A and B, dimensional standards must be provided for that development type.
6. Dimensional standards for cottage style residential uses located within Development Area C must be adjusted to have minimum width of 25', minimum side setback of 2.5', minimum lot size of 2,250 square feet.
7. For new residential development area to be created within PD-R District, cottage style and single family attached, and townhouses may be not be acceptable. Single family detached and 2 to 4 family may be appropriate.
8. If multiple family is proposed to be permitted in Development Area C, then dimensional standards need to be included.
9. For single family attached uses in any Development Area, please add dimensional standard that the "end cap" units must have a minimum 4,000 square feet lot size. For townhouse uses, please clarify that minimum lot size is 2,000 square per unit plus 4,000 square feet for each end unit.
10. Please revise transportation development area (E), to show how Development Area C will be accessed. If roadways are to be public, please create note that such roadways will be dedicated to the Public via platting process or infrastructure plan process.
11. Please include environmentally sensitive area map with future submittals showing wetlands and water bodies, with appropriate buffers as well as any special flood hazard areas.
12. PD Master Plan should clearly delineate areas to be zoned PD-R and PD-COMM.
13. Pages 23- 25 of the justification report includes multiple notes that relate to or modify the PD Master Plan. These notes, as corrected considering other comments made within this latter, must be incorporated into the PD Master Plan.
14. Note 2, a. -g., of the development standards notes list uses that are already permitted within the PD-COMM. Please clarify why these uses are separated and listed separately.
15. Note E.2), regarding signage. If signage is to vary from requirements of Section 6.5, a master sign plan will be required. Please review signage standards found in Section 6.5, especially 6.5.4 (C)(2)(b)(iii) and Section 6.5.4 (F)(5), which specifically reference signage within PD Districts.

16. Note 3) located page 25 of the justification report references Development Area F, but this area is not located on the PD Master Plan. Please verify/ clarify throughout application.

17. For cottage style uses, include minimum unit size of 600 square feet in dimensional standards.

c. Per Section 3.6.2 (A)(3), development along the perimeter of a PD district must be compatible with adjacent existing or proposed future development. A new development area should be created along south and west area of the subject property to provide for larger lots (minimum 10,000 square feet for single family detached; 15,000 square feet for 2 family; 20,000 square feet for 3 family, 30,000 square feet for 4 family).

d. Per Section 3.6.2 (A)(3), development along the perimeter of a PD district must be compatible with adjacent existing or proposed future development. The portion of development area A located in the southeast quadrant of the site immediately adjacent to NW 43rd Street, is in proximity to single family residential uses. Please include a development or dimensional standard that would require a 25' Type C buffer from all internal and external roadways, and any development area boundary.

e. PD Master Plan does not include a conversion schedule. While not required, a conversion schedule may be useful to ensure maximum flexibility.

f. The PD Master Plan must include a transportation, potable water and wastewater, parks, solid waste and stormwater component demonstrating that concurrency requirements have been met. Generally, this is provided through inclusion of Table from concurrency report into PD Master Plan.

3. *Additional Standards for PD Districts (Section 3.6.3 (A)) – PD-R)*

a. Per Section 3.6.3 (A)(4)(b), provide minimum setbacks/ separations of Development Areas from adjoining residential uses.

b. Per Section 3.6.3 (A)(5)(iii), design standards may be reduced where it is found that:

a. The reduction or modification is necessary as a traffic-calming measure;

b. The PD Master Plan provides for separation of vehicular, pedestrian, and bicycle traffic;

c. Access for emergency service vehicles is not substantially impaired;

d. Adequate off-street parking is provided for the uses proposed; and

e. Adequate space for public utilities is provided within the right-of-way.

c. Please include note in PD Master Plan that the alleys permitted will be private/ common area not to be maintained by the City.

4. *Additional Standards for PD Districts (Section 3.6.3 (D)) – PD-COMM*

a. Note 4) provided on Page 25 of justification report outlines rights-of-way/street standards. These are generally acceptable for the residential areas, but separate standards should be outlined or deferred to best engineering design as a maximum roadway width may not accommodate the retail/ commercial uses allowed in PD-COMM district.

b. Note 4) i. provides for on street parallel parking to be permitted. This is acceptable, but please clarify if the parking is included in the pavement width or separate from. Will traffic lanes be obstructed?

c. Given the dimensional standards (no maximum lot coverage and reduced setbacks), an alternative landscape plan may be advisable to provide maximum flexibility in internal site design. While no final landscape plan is required at this time, the alternative landscape plan may provide general parameters that future landscape plans for future development within the PD districts may use.
d. Given the dimensional standards (no maximum lot coverage and reduced setbacks), a master parking plan may be advisable to provide maximum flexibility in internal site design. While no final detailed parking plan is required at this time, the alternative landscape plan may provide general parameters that future landscape plans for future development within the PD districts may use.

5. *Comprehensive Plan Analysis*
   a. Page 11 of justification report states that the application is requesting medium density residential, however, map submitted with application and application cover indicate the application requesting moderate density residential. Please verify and correct throughout application.
   b. Page 18 of justification report addressed Objective 5.2 of the Future Land Use Element. The analysis states that the application has "clouted" their concurrency requirements. Please clarify or elaborate.
   c. Please provide calculation for number of permitted residential units. Application request 53.4 acres of Moderate Density Residential, which results in a maximum residential development of 213 dwelling units. However, the application states that the maximum number of residential units is 515. Please address. It may be necessary to include a portion as medium density residential or high density residential.
   d. Application does not address consistency with Objective 1.3 and Policy 1.3.d of the Conservation and Open Space Element. Please address.
   e. Application does not address consistency with Policy 1.10.b of the Conservation and Open Space Element. Please address.
   f. Application does not address consistency with Policy 1.12.d of the Conservation and Open Space Element. Please address
   g. Provide analysis of Objective 3.4, Objective 3.5, and Policy 3.7.a, Future Land Use Element regarding preservation of existing structures located on property.

6. *Concurrency Impact Analysis*
   a. Submitted concurrency impact analysis for potable water, wastewater, traffic, solid waste only provides analysis for proposed residential dwelling units and not any of the proposed non-residential area. Please revise.
   b. Recreation impact analysis states that the proposed development will provide 1.29 acres in improved passive park space. Please clarify. Is this area intended to be dedicated to the City as a public park? If so, please provide location and call out in related PD Master Plan application.

7. *Development and Subdivision Standards*
   a. Section 6.9.4 of the City's LDRs creates the Floodprone Area Standards for the City. Portions of the site appear to be located within Flood Zone A, AE, and X. Please note applicable code subsections within Section 6.9.4 for reference.

b. Section 7.3.9 requires fire protection improvements to be provided when a subdivision is connected to a publicly owned water system. The development must demonstrate compliance with the provisions of Section 7.3.9 prior to the approval of any Final PD Plan (preliminary plat or site plan). Applicant must coordinate with Alachua County Fire Rescue and City Public Services Department concerning compliance with applicable fire protection improvements or design requirements.

8. *Miscellaneous / General Comments*
   a. Certain uses, such as gasoline sales, for example, may be prohibited or conditioned based on environmental constraints of property.
   b. Provide legal descriptions for each area to be zoned PD-COMM and PD-R.
   c. Allowable uses column in Table on Master Plan sheet has typo in column title.
   d. Revise application cover and application to reflect change in agent for application. It is staff's understanding that Carter Thompson is no longer employed by JBPro.
   e. Revise application signature to reflect actual applicant or agent signature. Currently, the applicant lists the agent as the applicant, however, the owner/ title holder of the property has signed the application.
   f. In PD Master Plan Development Area Table, please bullet point or otherwise list the allowed uses for clarification purposes.

9. *Completeness Review Comments*
   a. Please submit updated environmental report(s).

10. *Outside Review*
    a. See attached comments in an email dated September 13, 2021 from Brian Kanely of Volkert, Inc regarding submitted traffic study. Please revise and resubmit traffic study with corrections.

11. Potential Development Conditions
    a. The following are preliminary potential conditions that are in the process of being developed and will be based on submitted data and information as well as consultation with outside experts and other agencies. Other conditions may be incorporated after review of subsequent approvals:
       i. Based on potential impacts to the surrounding roadway network and the recommendations by Brian Kanely, P.E., of Volkert Engineering, a condition may be considered that would require additional traffic studies at determined intervals in the future to ensure that the proposed development is not creating deficiencies, and if deficiencies are identified creating a method by which they will be addressed.
       ii. Because of the location in relation to surrounding wetlands, sustainable landscaping practices including limitations on use of pesticides and irrigation systems must be considered. These practices include:
          1. Requiring Compost fertilizing (as opposed to traditional/ synthetic fertilizers)
          2. Residential lots shall not be irrigated with potable water
          3. No new wells permitted on the property

4. All non-residential development shall be required to utilize Florida Friendly Landscaping practices

iii. Sidewalks will be provided along or within US Highway 441 right-of-way and NW 43rd Street right-of-way. Such sidewalks will be extended to NW 102nd Place and NW 93rd Ave.

iv. A limit of 12 gasoline pump stations located within Development Areas located within PD-COMM district.

v. A maximum 15,000 square feet of restaurant with drive-through use shall be permitted in PD-COMM development areas.

vi. No more than 225,000 square feet of non-residential shall be permitted through site plan until Certificates of Occupancy on 100 residential dwelling units have been issued within the PD-R or PD-COMM districts located on the subject property. A minimum of 40,000 square feet non-residential uses must be constructed with a Certificate of Occupancy prior to issuance of any development order for more than 100 dwelling units within the PD-COMM district.

vii. Prior to demolition of the existing structures on the property greater than 100 years old, the applicant must provide evidence from a licensed architect or structural engineer that rehabilitating the structures would not be cost feasible. Prior to demolition, the applicant shall supply a historic structure report that includes photos, architectural descriptions of the interior and exterior of the structure, known history of the structures and sites, and locations (longitude/latitude) of the structures.

If you have any questions regarding the information above, please contact me at 386-418-6100 x 1603 or via e-mail at ahall@cityofalachua.com. We look forward to receiving your revised application.

Sincerely,

Adam Hall, AICP
Principal Planner

Updated US 441 Traditional Neighborhood Traffic Study

From : brian kanely <briank5030@outlook.com> Mon, Sep 13, 2021 02:31 PM

Subject : Updated US 441 Traditional Neighborhood Traffic Study

To : Adam Hall <ahall@cityofalachua.com>, Kathy Winburn <kwinburn@cityofalachua.org>

Adam:
I have reviewed the Traffic Study. There are some presentation errors that need to be cleaned up (listed below). The various calculations in the Study are correct and I agree with the conclusions. The errors that need to be cleaned up are as follows:

1. Study page 2 - the traffic volumes referenced should be 2031 volumes.
2. Figure 3 - this figure is 2019 data; it needs to be replaced with the 2021 data.
3. Figure 4 - this figure is 2019 data; it needs to be replaced with the 2021 data.
4. Figure 5 - this figure is 2019 data; it needs to be replaced with the 2021 data.
5. Figure 6 - this figure is 2019 data; it needs to be replaced with the 2021 data.
6. Figure 7 - this figure is 2019 data; it needs to be replaced with the 2021 data and retitled as 2031 Build Traffic.
7. Figure 8 - this figure is 2019 data; it needs to be replaced with the 2021 data and retitled as 2031 Build Traffic.
8. Figure 9 - this figure is 2019 data; it needs to be replaced with the 2021 data and retitled as 2031 Build Traffic.
9. Figure 10 - this figure is 2019 data; it needs to be replaced with the 2021 data and retitled as 2031 Build Traffic.
10. Table 13 - the title of this table needs to be changed to SIGNALIZED INTERSECTION CAPACITY RESULTS - US 441/43RD STREET - MINOR MOVEMENTS.
11. Table 14 - the title of this table needs to be changed to UNSIGNALIZED INTESECTION CAPACITY RESULTS - NW 43RD STREET/ SOUTH SITE DRIVE/MARATHON DWY.

To be consistent with other traffic studies submitted to the City, copies of the appropriate pages from the ITE Trip Generation Manual should be included in the Study.

I will proceed to work up the draft Independent Review and submit it to you in the next several days. You can then submit it to Buckholz Traffic with the above minor corrections.

Another issue with this traffic study is has it been submitted to FDOT and Alachua County for review? There are modifications recommended on US 441 and NW 43rd Street that should require review and comment by FDOT and Alachua County. Has there been any coordination with FDOT and the County to date?

Have you received the proposal letter yet?

Call me if you have any questions on the above (352-262-3580).

Brian

CAUTION: This email originated from outside the City.

DO NOT respond, click, or open attachments unless you recognize the sender **(name AND email address)** and know the content is safe.

Should there still be any question on the origin of this email, contact the IT Department immediately.

RE: Completeness Review for:
- Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
- Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Ms Thompson:

On August 25, 2021 the City of Alachua received your revised application for a Comprehensive Plan Amendment to the Future Land Use Map for the Schmidt Farms project which proposes amending the City of Alachua Future Land Use Map designations from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial, and Conservation on a 121.56-acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The City also received your Site Specific Amendment to the Official Zoning Atlas (Rezoning) application, which proposes rezoning the subject property from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM) on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. Upon additional review of the submitted applications, the Planning Department has reviewed the aforementioned applications for completeness and finds that the application is incomplete. Failure to respond the identified deficiencies within 45 calendar days will result in administrative withdrawal of the applications.

Please note, the comments below are based solely on a preliminary review of your application for completeness. The contents of the applications **have not** been thoroughly reviewed. An in-depth review of the content of the application will be performed subsequently and any further issues with content will be provided to you at the Project Assistance Team (PAT) meeting.

Please address the following:

1. Comprehensive Plan Amendment Application
    a. Please provide Traffic Impact Analysis or Statement.
    b. Please provide Environmental Assessment or Study.
2. Rezoning Application:
    a. Please provide Traffic Impact Analysis or Statement.
    b. Please provide Environmental Assessment or Study.

Should you have any questions, please feel free to contact me at (386) 418-6100 x 1603 or via email at ahall@cityofalachua.com.

Sincerely,

Adam Hall, AICP

RE: Completeness Review for:
- Schmidt Farms (2021) Large Scale Comprehensive Plan Amendment (LSCPA)
- Schmidt Farms (2021) Site-Specific Amendment to the Official Zoning Atlas (Rezoning)

Dear Ms Thompson:

On August 17, 2021 the City of Alachua received your application for a Comprehensive Plan Amendment to the Future Land Use Map for the Schmidt Farms project which proposes amending the City of Alachua Future Land Use Map designations from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial, and Conservation on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000). The City also received your Site Specific Amendment to the Official Zoning Atlas (Rezoning) application, which proposes rezoning the subject property from Agricultural (A) and Commercial Intensive (CI) to Planned Development – Residential (PD-R) and Planned Development – Commercial (PD-COMM) on a 121.56 acre subject property (Parcel Nos. 05936-001-000, 05936-007-000, 05936-007-002, and 05945-000-000).

According to Section 2.2.6 of the Land Development Regulations (LDRs), upon receipt of an application, a completeness review shall be conducted to determine that the application contains all the necessary information and materials, is in proper form and of sufficient detail, and is accompanied by the appropriate fee. The Planning Department has reviewed the aforementioned application for completeness and finds that the application is incomplete, conditional upon submission of certain information found below. Failure to respond the identified deficiencies within 45 calendar days will result in administrative withdrawal of the applications.

Please note, the comments below are based solely on a preliminary review of your application for completeness. The contents of the applications **have not** been thoroughly reviewed. An in-depth review of the content of the application will be performed subsequently and any further issues with content will be provided to you at the Project Assistance Team (PAT) meeting.

Please address the following:

1. Comprehensive Plan Amendment Application
    a. Mailing labels not provided for those organizations and individuals registered with the City to receive notice. The list can be found on the City's website at: https://www.cityofalachua.com/home/showpublisheddocument/535/637473599620070000 .
    b. Proposed application sheet identifies proposed future land use categories as Medium Density Residential and Commercial, but provided application narrative and submitted proposed future land use map identifies Moderate Density Residential, Commercial, Community Commercial, and Conservation as proposed Future Land Use Categories. Please verify and revise.
2. Rezoning Application:
    a. Mailing labels not provided for those organizations and individuals registered with the City to receive notice. The list can be found on the City's website at: https://www.cityofalachua.com/home/showpublisheddocument/535/637473599620070000 .
    b. Per Section 3.6.2 (A)(1), the PD Master Plan:

        (a)Identifies the general location of land uses within individual development areas or development pods and the mix of land uses;
        (b)Calculates the number, type, and mix of land uses, including the total number of residential units, residential densities, and nonresidential intensities within each development area or development pods and the total number, type, and mix of land uses for the entire PD Master Plan;
        (c)Identifies the general location of open space;
        (d)Identifies the location of environmentally sensitive lands, wildlife habitat, and stream corridors;
        (e)Identifies the on-site transportation circulation system including arterial and collector roads, existing or projected transit corridors, and pedestrian and bicycle pathways;
        (f)Identifies on-site potable water and wastewater facilities; and
        (g)Identifies the general location of all public facility sites serving the development, including transportation, potable water, wastewater, parks, fire, police, EMS, stormwater, solid waste and schools.

        The provided PD Master Plan does not appear to identify the location of environmentally sensitive lands, such as wetlands or stream corridors. The PD Master Plan does not appear to identify on-site potable water and wastewater facilities. The PD Master Plan does not appear to identify the general location of all public facility sites serving the development such as potable water, wastewater, parks, fire, police, EMS, storm water, solid waste and schools. Please note that the PD Master Plan may be multiple sheets in order to display all required information. Please provide a revised PD Master Plan.

Should you have any questions, please feel free to contact me at (386) 418-6100 x 1603 or via email at ahall@cityofalachua.com.

Sincerely,

Adam Hall, AICP
Planner

IV. Needs Analysis: 18

V. Comprehensive Plan Consistency: 20

VI. Conclusions: 35

VII. References 37

VIII. List of Attachments 38

I. Statement of Proposed Change:

On behalf DM Alachua Investments, LLC, JB Pro is requesting a Large-Scale Comprehensive Plan Amendment to the 121. 56 acres that encompasses, parcels 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001 and 05945-000-000. The current Future Land Use Designations are Agriculture and Commercial to the front of the property along Highway 441.

The proposed project is located near the intersection of HWY 441 and NW 43rd Street and abuts Turkey Creek at the rear of the property. There are five lots that make up the proposed development. The largest lot is 96.69 acres and has a house and barn on it. There are two lots, 17.78 and 14.13 acres, that are vacant. Two of the smallest lots, 05936-007-002 and 5936-007-001, have structures on them, a 1,444 SF restaurant, and a 2,135 SF retail store. Both former businesses are currently closed.

The Applicant is requesting 53.2 acres of Moderate Density Residential (C) for the residential sections of the development. The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category: 1. Single family detached dwelling units; 2. Accessory dwelling units; 3. Manufactured or modular homes meeting certain design criteria; 4. Mobile homes only within mobile home parks; 5. Duplexes and quadplexes; 6. Townhomes; 7. Residential Planned Developments; and 8. Supporting community services such as schools, houses of worship, parks, and community centers.

The Commercial portion of the Comprehensive Plan Amendment will request High-Density Residential for the interior and Commercial along Highway 441. The High-Density Residential Land Use Category intent is to provide neighborhood and community scale goods and services to adjacent neighborhood and residential areas. The applicant is requesting 17.8 acres of High-Density Residential (B) and 53.2 acres of Moderate Density Residential (C). The Commercial Land Use intent is to provide for general commercial uses, as well as more intense commercial highway commercial uses and largescale and regional commercial uses. Commercial uses shall be limited to an intensity of not more than 0.50 floor area ratio for parcels 5 acres or larger. The applicant is requesting

14.4 acres of Commercial (A). Lastly, the Applicant is proposing 35.7 acres of Conservation (D). The allowed uses for the Future Land Uses Designations are provided as ***Table 1*** on the following page.

The development is proposing a rezone to Planned Development that will contain both commercial and a variety of residential uses. The rezone will request Planned Development Commercial District (PD-COMM) and Planned Development Residential (PD-R). The mixture of residential and commercial uses will be dictated by market demand.

Table 1 - Permitted Uses by Future Land Use Designation

Moderate Density Residential (0 to 4 units per acre)	Commercial FAR of .50	High-Density Residential (8 to 15 units per acre)
Single family detached dwelling units.	Retail sales and services.	Single family attached and detached dwelling units
Accessory dwelling units.	Personal services.	Accessory dwelling units
Manufactured or modular homes meeting certain design criteria.	Financial institutions.	Apartments and townhomes
Mobile homes only within mobile home parks.	Outdoor recreation and entertainment.	Duplexes and quadplexes
Duplexes and quadplexes.	Tourist-related uses.	Live/work units
Townhomes.	Hotels and motels.	Residential Planned Developments
Residential Planned Developments.	Commercial shopping centers.	Traditional Neighborhood Planned Developments
Supporting community services such as schools, houses of worship, parks, and community centers.	Auto-oriented uses.	Neighborhood-scale retail and services, where the area dedicated to such uses is less than or equal to 30,000 square feet of floor area and is designed specifically to serve the surrounding neighborhood, including, but not limited to, a convenience stores without gas pumps, dry cleaners, pharmacies, local markets, restaurants, personal services, and professional offices
	Traditional Neighborhood Planned Developments.	Group living
	Employment Center Planned Developments.	Supporting community services, such as schools, houses of worship, parks, and community centers

	Commercial recreation centers.	
	Office/business parks.	
	Limited industrial services.	
	Eating establishments.	

II. Urban Sprawl Analysis:

The project is proposed as a mixed used development that by virtue of its nature this planning principle was created to deter Urban Sprawl.

a. Directs growth and development to areas of the community in a manner that does not adversely impact natural resources.

Response: The proposed development does abut Turkey Creek. Larger residential lots will be placed along the boundary of the development that abuts Turkey Creek and the surrounding residential developments. This will ensure compatibility along the southern and northwestern property boundaries. The applicant will be required to have the wetlands delineated and provide an undisturbed buffer around the wetlands. The wetlands and undisturbed upland buffers will be included and maintained as green space.

b. Promotes the efficient and cost-effective provision or extension of public infrastructure and service.

Response: The proposed development will improve the area and contribute to the infrastructure of the City of Alachua. The applicant will be proposing a lift station and the necessary potable water and service extensions as well fire hydrants. The applicant has submitted an infrastructure plan that demonstrates that other users near the Development will benefit from the lift station and other and infrastructure improvements.

c. Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that support a range of housing choices and a multimodal transportation system.

Response: The Development will be a mixed-use community with walkable areas from residential to commercial uses. The applicant is exploring multiple types of residential uses, such as multi-family, single family, live and work units. Commercial uses will be mostly neighborhood commercial uses, but market demand and company interests in the area will dictate final users for both commercial and residential uses.

d. Promotes conservation of water and energy.

Response: The Development will follow all the building regulations for the City of Alachua for water and energy conservation.

e. Preserves agricultural areas and activities.

Response: The property is vacant, and it not being used for any uses.

f. Preserves open space and natural lands and provides for public open space and recreation needs.

Response: The Development will provide the required amount of open space and buffers as required with the PD-R and PD-Comm zoning.

g. Creates a balance of land uses based on demands of residential population for the nonresidential needs of an area.

Response: Residential population demands are the driving factor for the residential and commercial markets. The proposed development will have a direct effect of attracting new businesses by adding to the City of Alachua population overall. In addition, commercial industries use a term called "roof tops" to decide where they will open new locations or franchises. These secondary affects will generate more jobs and tax revenue for the City of Alachua.

h. Provides uses, densities and intensities of use and urban form that would remediate an existing or planned sprawl development pattern or provides for an innovative development pattern such as transit oriented development or new towns.

Response: The proposed development will provide a mixed-use, walkable community which will support the surrounding residential communities with retail and services. Although the development will not be a traditional neighborhood development (TND) or a Transit Oriented Development (TOD), it will have characteristics of these type of developments which do not promote urban sprawl. Additionally, the development is on the southeastern limits of the City.

III. Concurrency Impact Analysis:

Concurrency is a shorthand expression for a set of land use regulations that local governments are required (by the Florida Legislature) to ensure that new development does not outstrip local government's ability to provide services or strain current level of service. In the following paragraphs, the proposed Comprehensive Plan Amendment will discuss the impacts to potable water, wastewater, stormwater, school student projection needs, stormwater, and transportation.

Potable Water

Policy 4.1.c of the Community Facilities and Natural Groundwater Aquifer Recharge (CFNGAR) Element of the Comprehensive Plan establishes a potable water LOS Standard of 275 gallons per day per equivalent residential dwelling unit on an average annual basis. Policy 4.1.c of the CFNGAR Element if the City's potable water facility reaches 85% of the permitted design capacity, no further development orders or permits will be issued until additional capacity becomes available. The current level of capacity for the City is 62.88%, therefore the City has 22.12% capacity for proposed developments. Table 4.2 was provided by the City's 2021 Annual Concurrency Status Report. Table 4.2 shows the City's current utilization rate is 62.88% and a residual rate of 853,649 gallons per day.

Potable Water Available Capacity

Table 4.2 Potable Water Public Facilities Impacts	
System Category	**Gallons Per Day**
Current Permitted Capacity[1]	2,300,000
Less Actual Potable Water Flows[1]	1,300,250
Reserved Capacity[2]	**146,101**
Residual Capacity	**853,649**
Percentage of Permitted Design Capacity Utilized	**62.88%**
Sources: *1. City of Alachua Public Services Department, April 2021* *2. City of Alachua May 2021 Development Monitoring Report*	

Potable Water Project Impact

Below in Table 1 that utilizes a 275 gallons per day for residential potable water and 0.15 gallons per day for office/retail. The proposed development will utilize 275 gallons per day for each residential unit, with a total of 514 residential units. The total gallons per day for residential development of potable water will be 141,350 gallons and 73,410 gallons for non-residential. The total potential development potable water is 214,760 gallons, which leaves 638,889 gallons of residual capacity remaining.

Table 1 - Potable Water	Density	Gallons Per Day
Single Family Detached	213 units	58,575
Multi-Family	301 units	82,775
Office/Retail	489,400 sf	73,410
Totals	-	214,760
Based off a LOS of 275 gallons per day for Residential Units and 0.15 gallons per day for office/retail.		

Wastewater

Policy 1.1.d of the CFNGAR Element of the Comprehensive Plan establishes a sanitary sewer LOS Standard of 250 gallons per day per equivalent residential dwelling unit on an average annual basis. Table 4.3 shows a sanitary sewer capacity Policy 1.1.d of the CFNGAR Element reaches 85% of the permitted design capacity, no further development orders or permits will be issued until

additional capacity becomes available. Table 4.3 below shows capacity at 53.61%, therefore there 695, 850 gallons or 31.39%.

Wastewater Available Capacity

Table 4.3 Wastewater Public Facilities Impacts	
System Category	**Gallons Per Day**
Treatment Plant Current Permitted Capacity[1]	1,500,000
Less Actual Treatment Plant Flows[2]	677,000
Reserved Capacity[2]	**127,140**
Residual Capacity	**695,860**
Percentage of Permitted Design Capacity Utilized	**53.61%**
Sources: *1. City of Alachua Public Services Department, April 2021* *2. City of Alachua May 2021 Development Monitoring Report*	

Wastewater Project Impact

Table 2 that utilizes a 250 gallons per day for residential wastewater. The proposed development will utilize 250 gallons per day for each residential unit, with a total of 514 residential units and 0.15 gallons per day for non-residential. The total potential development wastewater is 201,910 gallons, which leaves 493,950 gallons of residual capacity remaining.

Table 2 - Wastewater	Density	Gallons Per Day
Single Family Detached	213 units	53,250
Multi-Family	301 units	75,250
Office/Retail	489,400 sf	73,410
Totals	-	201,910
Based off a LOS of 250 gallons per day for Residential Units and 0.15 gallons per day for office/retail.		

Transportation

In June 2020, the City of Alachua adopted amendments to the Comprehensive Plan as part of the seven-year evaluation and appraisal update to the City's Comprehensive Plan. As part of this update, Policy 1.1.a was amended to establish additional road segments to be monitored for concurrency, to assign

segment numbers to County roads, and to update the Comprehensive Plan Road segments to be consistent with the segments defined by the Florida Department of Transportation. These updates provide an enhancement to the structure of the City's transportation concurrency monitoring system.

Table 4.1 below identifies each monitored roadway segment, as well as the adopted LOS Standard for each segment, existing traffic, reserved trips, available capacity, and the percentage of capacity utilized. Table 4.1 indicates that presently there are no imminent deficiencies for any monitored roadway segments. However, Segment 6 – US 441 from Interstate 75 to County Road 235A – is presently at 90.66 percent of the capacity of the segment and is therefore approaching a potential imminent deficiency. Continued monitoring of this segment will be required to evaluate if the segment exceeds 95 percent of the capacity of the segment and thus presents an imminent deficiency.

Transportation Available Capacity

Table 4.1
Transportation Public Facilities Impacts

Roadway Segment (FDOT Segment #, CoA Comp Plan #)	Segment Description	AADT/ Peak Hour	Comp Plan MSV^^	Existing Traffic*^	Reserved Trips	Available Capacity**	Percentage of Capacity Utilized

Solid Waste

Policy 2.1.a of the CFNGAR Element of the Comprehensive Plan establishes a LOS Standard for solid waste facilities of 0.73 tons per capita per year for residential development. The demand generated by nonresidential uses can vary substantially between different use types, therefore a LOS Standard for nonresidential uses is not adopted in the Comprehensive Plan.

Table 4.7
Solid Waste Public Facilities Impacts

Based off a LOS of .73 tons per capita per day for residential and 5.5 pounds per thousand sf of non-residential		

Recreation

Policy 1.2.b of the Recreation Element of the Comprehensive Plan establishes a LOS Standard for recreational facilities of five (5) acres of community, neighborhood, or pocket park area per 1,000 persons, with a minimum of 20 percent of the required acreage consisting of improved, passive parks.

The US Census Bureau estimates the number of persons per household for the City to be 2.76 persons per household (2015-2019). The method to determine recreational impacts, multiple the total number of units proposed by the level of service standard (0.005) and the total number of persons per household (2.76).

Recreation Available Capacity

Table 4.6 Improved Passive Park Space Analysis	
System Category	**Acreage**
Minimum Improved Passive Park Space Required to Serve Existing Population and Reserved Capacity[1]	10.91
Existing Improved Passive Park Space Provided[2]	34.82
Improved Passive Park Space Utilized by Existing Population & Reserved Capacity[3]	**31.33%**

1. Policy 1.2.b, Recreation Element, City of Alachua May 2021 Development Monitoring Report
2. Area consists all improved passive lands which are part of San Felasco Conservation Corridor (27.73 acres), Swick House (3.84 acres), Legacy Park (3.18 acres, and Theater Park (0.07 acres)
3. Formula: Total Improved Passive Park Space / Acreage Required to Serve Existing Population + Projected Impacts from Recent Development Orders

Recreation Project Impact

The proposed development will potentially utilize 2.58 acres of recreational impact per Table 4 below. The proposed development will provide passive recreational and open space areas for the development's residential units but these facilities will not be open to the public.

Table 4 – Recreational	Residential Units	Acres
Single Family Detached	213	1.07
Multi-Family	301	1.51
Totals	514	2.58
Based off a LOS of .0.005		

Stormwater

Policy 3.1.a of the CFNGAR Element of the Comprehensive Plan adopts the LOS Standard for stormwater facilities. Policy 3.1.a requires that the peak rate of post-development not exceed the peak rate of pre-development runoff for storm events up to the 100- year critical duration rainfall depth for all development (with the exception of agricultural, silvicultural, conservation, or recreational uses, which are subject to a different standard). Additionally, stormwater basins must be designed to treat the first inch of runoff and must be designed in accordance with and to perform to the standards established in Chapters 40C-42.025 and 40C-42.035, Florida Administrative Code.

Stormwater Impact

The proposed development will comply with Chapters 40C-42.025 and 40C-42.03 of the Florida Administrative Code. and all of the permitting requirements for the Suwannee River Water Management District.

Public Schools Impact

The proposed development in in the following school concurrency areas. The Elementary School is NW Alachua, the Middle School is Mebane the High School, and the High School is Santa Fe concurrency area. The proposed development shows a generation rate for total students at 189. The multi-family developments generates more students overall than single-family developments. The greatest need will be at the elementary school level and middle school level at 42 students each. The Public-School Generation form is provided as Attachment H.

Table 5 – School	Density	Elementary (.14)	Middle (.16)	High School (.08)	Grand Total
Single Family Detached	213	30	34	17	81
Multi-Family	301	42	42	24	108
Totals	514	72	76	41	189

IV. Needs Analysis:

Jobs Created

The National Home Builder's Association estimates that 3.05 jobs are directly created from building one average new single-family home. The most obvious impacts are the work opportunities created in the housing industry, as well as in other industries that provide products or services to home builders and buyers. Workers are employed to directly engage in the construction activity. Jobs are generated in the industries where lumber, concrete, lighting fixtures, heating equipment, and other products that go into a home are produced. Secondary and tertiary jobs are created when real estate agents, lawyers, and brokers provide services to home builders and home buyers. Based on the 3.05 jobs created calculation, the proposed development would have the potential to add approximately 653 direct just from the residential competent of the Planned Development jobs in the City of Alachua.

Tax Revenue Generation

The proposed development will contribute to the tax rolls based anywhere from $1,670,324.25 to $3,816,680.00 for the 215 units single family detached homes. The commercial component of the proposed development is more difficult to quantify, because there is a such a large variance based on commercial uses.

For single family detached residential uses and based on the 2020 millage rate of 22.1970:

At a 350K Valuation = $7,768.95 annual property tax per unit

- 214 Units X $7,768.95 = $1,662,555.30 in annual property taxes at residential single family detached full build out

At an 800K Valuation = $17,757.00 annual property tax per unit

- 214 Units x $17,757.00 = $3,799,998.00 in annual property taxes at full residential single family detached build out

Housing Variety

According to Angie Di Michele from the Sarasota Herald Tribune, nearly 1,000 people move to Florida every day, making Florida the second fastest-growing state in the country. One problem that popularity has created is housing demand increases and that there are not enough options to meet the demand of those who need affordable housing.

One way to address housing shortages and cost burdened households is through supply and a variety of housing choices. According to the American Planning Association, "they support the development of mixed use, mixed income livable communities where people choose to live, work, and play because they are attractive and offer economical options rather than forced decisions. Smart Growth is largely about retrofitting communities to offer more choices both in terms of housing types and prices but also in terms of transportation options. This approach to growth and planning can not only deliver dynamic attractive communities with greater choices for consumers but can be a powerful tool for farmland, open space and habitat preservation".

The American Planning Association recognizes that the efficient development of small towns and rural areas is critical to their long-term survival and sustainability. The preservation of smaller towns and rural areas considering development pressures caused by sprawling development patterns is often more economically efficient. Making housing choices available to a range of households, ages, and incomes, all while maintaining the character of the community and the quality of life is important to new and existing residents alike.

Ryan Kilpatrick of housing Next, references of Housing Choice vs Housing Affordability. Housing Choice references the amount of housing that is available and the different kinds of housing that can be found to satisfy a variety of household needs and desires in any community. Housing Affordability, on the other hand, references the amount of money that a given household will spend on their housing relative to their income. The general rule of thumb is that no one should be spending more than 30% of their gross income on housing related expenses each year. The theory goes that, with enough overall supply and choices in the market relative to the number of households, the market will find some balance and we will achieve housing affordability at all price points. Housing Choice leads to more affordability... eventually.

Local Analysis

Parcel 05936-001-000 is planned to be a part of the Schmidt Farms PD. Currently 80 acres +/- of that parcel has a land use designation of Rural / Agriculture and Agriculture (A) zoning. Typically, Agriculture zoned lands are allowed to have 1 unit per 5 acres of property. The existing Agriculture zoned property will have the right for 16 residential units.

The proposed moderate density residential land use amendment would allow up to 4 units per acre. 53.4 acres of the 80 acres is proposed to have the moderate density residential land use, and would therefore allow by right 53.4 * 4 = 213 units. Based on information provided within the City of Alachua's Data and Analysis for Evaluation and Appraisal, the population of Alachua currently could be estimated at approximately 11,911. The projected growth in the population by 2025 is estimated to be approximately 12,950 and 14,985 in year 2030. Per the 2010 US Census Bureau the average American home is approximately 2.65 persons, meaning in the next 9 years the City of Alachua could have an expected need of approximately 1,160 homes. As a result, the potential of up to 213 new homes within the Schmidt Farms development will provide much needed opportunities for market rate housing availability within the City to meet the needs of the growing population.

To support the growing population of the City, there is only approximately 570 acres (2.58%) of developable land for commercial. The proposed land use amendment proposes a total of 29.1 acres for commercial land use which is 26.6% of the proposed Schmidt Farms development. This will expand the available land for commercial development to serve the residents of the City.

V. Comprehensive Plan Consistency:

Future Land Use Element

Objective 1.2: Residential: The City shall establish four Residential land use categories to ensure an orderly urban growth pattern that will provide a variety of housing options to its residents and provides for the best use of available lands for residential development.

Response: The proposed development is requesting Moderate Density Residential, which allows for 0 to 4 units per acre, High-Density Residential, which allows for 8 to 15 units per acre, and will be in accordance with the City of Alachua Comprehensive Plan.

Policy 1.2b: Moderate Density Residential (0 to 4 dwelling units per acre): The Moderate Density Residential land use category allows residential development at a maximum density of 4 dwelling units per acre. The following uses are allowed in the Moderate Density Residential land use category: 1. Single family detached dwelling units; 2. Accessory dwelling units; 3. Manufactured or modular homes meeting certain design criteria; 4. Mobile homes only within mobile home parks; 5. Duplexes and quadplexes; 6. Townhomes; 7. Residential Planned Developments; and 8. Supporting community services such as schools, houses of worship, parks, and community centers.

Response: The proposed development is requesting moderate density residential, which allows for 0 to 4 units per acre and will be in accordance with the City of Alachua Comprehensive Plan.

Policy 1.2.d: High Density Residential (8 to 15 dwelling units per acre): The High Density Residential land use category allows residential development at a density of 8 dwelling units per acre to 15 dwelling units per acre, as well as certain complementary uses, such as a low intensity neighborhood-scale Future Land Use Element | 4-4 City of Alachua Comprehensive Plan Effective July 31, 2020 retail and services. The following uses are allowed within the High Density Residential land use category: 1. Single family attached and detached dwelling units ; 2. Accessory dwelling units; 3. Apartments and townhomes; 4. Duplexes and quadplexes; 5. Live/work units; 6. Residential Planned Developments; 7. Traditional Neighborhood Planned Developments; 8. Group living; 9. Neighborhood-scale retail and services, where the area dedicated to such uses is less than or equal to 30,000 square feet of floor area and is designed specifically to serve the surrounding neighborhood, including, but not limited to, a convenience stores without gas pumps, dry cleaners, pharmacies, local markets, restaurants, personal services, and professional offices; and, 10.Supporting community services, such as schools, houses of worship, parks, and community centers.

Response: The proposed development is requesting high-density residential, which allows for 8 to 15 units per acre and will be in accordance with the City of Alachua Comprehensive Plan.

Objective 1.3: Commercial: The City shall establish three commercial land use categories: Community Commercial, Commercial, and Central Business District. These land use categories shall provide a broad range of commercial uses, including retail sales and services, personal services, offices, and tourist-oriented uses, to provide for the availability of goods and services, both to the citizens and visitors of Alachua and to the citizens of the North Central Florida region.

Response: The proposed development is requesting Commercial in accordance with the City of Alachua Comprehensive Plan.

Policy 1.3.b: Commercial: The Commercial land use category is established to provide for general commercial uses, as well as more intense commercial and highway commercial uses. This is the land use category in which largescale, regional commercial uses may locate. The following uses are allowed within the Commercial land use category: 1. Retail sales and services; 2. Personal services; 3. Financial institutions; 4. Outdoor recreation and entertainment; 5. Tourist-

related uses; 6. Hotels and motels; 7. Commercial shopping centers; 8. Auto-oriented uses; 9. Traditional Neighborhood Planned Developments; 10.Employment Center Planned Developments; 11.Commercial recreation centers; 12.Office/business parks; 13.Limited industrial services; and, 14.Eating establishments.

Response: The proposed development will be compliance with the uses that are allowed under the Commercial Land Use Category and in accordance with the City of Alachua Comprehensive Plan.

Policy 1.3.d: Design and performance standards: The following criteria shall apply when evaluating commercial development proposals:
1. Integration of vehicular and non-vehicular access into the site and access management features of site in terms of driveway cuts and cross access between adjacent sites, including use of frontage roads and/or shared access;
2. Buffering from adjacent existing/potential uses;
3. Open space provisions and balance of proportion between gross floor area and site size;
4. Adequacy of pervious surface area in terms of drainage requirements;
5. Placement of signage;
6. Adequacy of site lighting and potential impacts of lighting upon the surrounding area. Lighting should be designed to minimize impacts to preserve the ambiance and quality of the nighttime sky by reducing light trespass and light pollution on adjacent properties by utilizing lighting at appropriate intensities, directions and times to ensure light is not overused or impacting areas where it is not intended;
7. Safety of on-site circulation patterns (patron, employee, and delivery vehicles), including parking layout, drive aisles, and points of conflict;
8. Landscaping, as it relates to the requirements and goals of the Comprehensive Plan and Land Development Regulations;
9. Unique features and resources which may constrain site development such as soils, existing vegetation, and historic significance;
10.Performance based zoning requirements, which may serve as a substitute for or accompany land development regulations in attaining acceptable site design; and,
11.Commercial uses shall be limited to an intensity of less than or equal to 0.50 floor area ratio for parcels 5 acres or greater, 0.75 floor area ratio for parcels less

than 5 acres but greater than 1 acre, and 1.0 floor area ratio for parcels 1 acre or less.

Response: All the standards will be evaluated and met when the proposed development will submit for Site Plan Review of Phase 1 of the project.

Goal 2: Innovative Design Standards: The City shall utilize innovative design standards to discourage urban sprawl, provide aesthetic standards, promote open space, and preserve rural character.

Response: Planned Development by their very nature allows for more creative design that will still have to comply with the land development regulations.

Objective 2.1: Planned Development (PD) Standards In an effort to reduce the impacts of urban sprawl on the community and the region, the City shall provide for a wide array of planned developments to encourage the creation of interrelated neighborhoods and districts to increase the quality of life for all residents of the City

Response: The applicant is proposing a mixed-use development that will be rezoned to Planned Development. The mixed use, walkable communities character creates and external and internal interrelated neighborhood.

Policy 2.1.a: Residential Planned Developments (PD): The City shall establish flexible development and use regulations for residential PDs for use within residential land use categories. Those regulations shall be developed to achieve the following:
1. Residential development through a mixture of housing types, prices, and densities. The allowed uses within a residential PD are not subject to the permitted uses in the underlying land use category but shall be subject to the permitted uses as set forth in the Land Development Regulations or Ordinance adopting the PD. Single-family homes, zero lot line homes, and townhomes are examples of the allowable housing types within residential PDs.
2. The opportunity to improve quality of life by placing activities necessary for daily living in close proximity to residences through the allowance of a limited amount of neighborhood commercial uses, and with special design criteria, community commercial uses, within the residential PD at appropriate densities and intensities.

3. A range of parks and open space, from playgrounds to community gardens to active recreation facilities within the neighborhood.
4. Streets and public spaces that are safe, comfortable, and designed to respect pedestrians, non-vehicular and vehicular modes of transportation.

Response: The proposed development will be a mixed-use development that will provide high-density residential and commercial use near residential uses. The proposed development will also have open spaces and passive uses for the enjoyment to the residents.

5. Conservation of materials, financial resources, and energy through efficient design of infrastructure

Response: The applicant is proposing a mixed-use development that will be rezoned to Planned Development. The mixed use, walkable communities character creates walkability to different land uses such as residential, commercial, conservation, open space areas, which not only improves the quality for internal residents, but also improves the quality of life for the City of Alachua by reducing dependency on vehicles and allows residents to walk to adjacent uses, provides job creation and economic development opportunities, as well as the ability for residents to work from home.

Policy 2.1.d: Commercial Planned Development: The City shall establish commercial planned development (PD) zoning district regulations as a development option for planned commercial development within commercial and high-density residential land use categories. Those regulations shall be developed to achieve the following: 1. A functional mix of mixed-use retail, commercial, and office development. A limited amount of medium to high density residential development may be integrated with commercial and retail uses.

Response: The applicant is proposing a mixed-use development that will provide variety of commercial and residential in accordance with the allowable densities under the moderate residential, high-density residential and commercial land uses.

Objective 2.5: Open Space Standards: The City shall utilize open space requirements to preserve the rural character of Alachua, protect natural resources, and provide spaces for people to recreate and gather.

Response: The proposed development will provide the 10% Open Space as provided by Section 6.7.

Policy 2.5.a: There shall be a minimum of 10% percent open space required. The City shall establish incentives for the provision of open space beyond minimum requirements.

Response: The proposed development will provide the 10% Open Space as provided by Section 6. 7 of the City of Alachua Land Development Regulations.

Policy 2.5.b: Open space shall not be limited to unusable portions of project sites. A portion of open space shall be usable and functional.

Response: The proposed development will comply all sections of Section 6.7 of the City of Alachua Land Development Regulations.

Objective 2.4: Landscaping and Tree Protection Standards: The City shall adopt landscaping and tree protection standards in order to achieve the aesthetic design values of the community and preserve tree canopies, as well as to protect exceptional specimens and champion trees.

Response: The proposed development has acknowledged and will comply.

Policy 2.4.a: Landscaping: General – The City shall require landscaping plans to be submitted with each nonresidential and multiple family residential site plan. The minimum landscaped area shall be 10% of the development site, not inclusive of any designated open space areas. Landscaping designs shall incorporate principles of xeriscaping, where feasible. The City shall develop a list of preferred planting materials to assist in the landscape design. Landscape plans shall include perimeter and internal site landscaping.

Response: The proposed development has acknowledged and will comply with this requirement.

Policy 2.4.b: Landscaping: Buffering – A buffer consists of horizontal space (land) and vertical elements (plants, berms, fences, walls) that physically separate and visually screen adjacent land uses. The City shall establish buffer yard requirements that are based on the compatibility of the adjacent uses and the desired result of the buffer.

Response: The property abuts RSF-1, Agriculture and property that is located in Alachua County. A wetland buffer is being proposed along the perimeter abutting adjacent residential and agriculture zoning.

Policy 2.4.c: Tree Protection: Heritage Trees and Champion Trees – The City shall require the preservation of heritage trees and champion trees when possible. Standards shall be set for determining the health and safety risks associated with heritage and champion trees both on individual residential lots, and existing and proposed developments.

Response: The proposed development has acknowledged and will comply with the requirement.

Policy 2.4.d: Tree Protection: Regulated Trees – The City shall establish standards for the preservation of regulated trees. Particular attention shall be given to preserving specimen and preferred species of regulated trees, where feasible.

Response: The proposed development has acknowledged and will comply with the requirement.

Policy 2.4.e Tree Protection: Removal and Mitigation – Along with establishing standards for tree removal and mitigation, the City shall establish a tree banking program to provide flexibility for re-planting trees through the mitigation process. Funds within the tree bank may be utilized to plant landscaping on city-owned properties, in public parks, and in road rights of way, where appropriate.

Response: The proposed development has acknowledged and will comply with the requirement.

Objective 2.7: Discouragement of Urban Sprawl: The City shall discourage the proliferation of urban sprawl as set for the in Chapter 163, Florida Statutes.

Response: The project is proposed as a mixed used development. By virtue of its nature, a mixed used development is a planning principle to deter Urban Sprawl.

Policy 2.7.a.: The City shall discourage the proliferation of urban sprawl. Applications for an amendment to the land use category of a property shall include an analysis of the application's discouragement of the proliferation of urban sprawl. Such analysis shall consider the primary indicators or the urban form criteria as set forth in Chapter 163.317(6)(a) 9.a. and b., Florida Statutes, respectively.

Response: The proposed development has acknowledged and will comply with the requirement and State Statute 163.317(6)(a) 9.a. and b.

Objective 5.2: Availability of facilities and services The City shall utilize a concurrency management system to ensure that the adopted levels of service standards are maintained. Policy 5.2.a: All new development shall meet level of service requirements for roadways, potable water, sanitary sewer, stormwater, solid waste, and public schools in accordance with LOS standards adopted in the elements addressing these facilities. Policy 5.2.b: The concurrency management system shall specify the period for which certification of level of service compliance shall be valid until actual development pursuant to a final development order or Chapter 163 Development Agreement has commenced. Policy 5.2.c: The City shall prepare and annually update the 5-year Capital Improvement Program as an implementation mechanism of this document in accordance with the Capital Improvements Element of this Plan. The 5-year Capital Improvement Program shall be incorporated by reference into the Capital Improvements Element.

Response: The proposed development will meet the level of service of the City of Alachua.

Goal 9: Water and Wastewater Service: The City will ensure that new development and redevelopment within the corporate limits shall connect to the City's potable water and wastewater systems, where potable water and wastewater service are available, as defined in Policy 1.2.a and Policy 4.2.b of the Community Facilities Element of the Comprehensive Plan.

Response: The proposed mixed-use development will connect to the City's water and wastewater systems.

Economic Development Element

Objective 1.6: Mixed Use, Workforce Housing: The City shall encourage the development of quality workforce housing, proximate to employment locations, at affordable prices to create opportunities for corporate investment in the City of Alachua. In order to accomplish this goal, the City of Alachua may, by way of illustration, but not by way of limitation:

Response: The proposed mixed-use development will provide a variety of housing and adjacent commercial uses that will generate new employment opportunities.

Policy 1.6.b: Consider a mix of owner-occupied and rental housing for employees that will maintain the neighborhood character and community fabric.

Response: The Development is proposing a variety of housing types, single family detached, townhomes multifamily and perhaps live work units. This will allow for ownership and rental opportunities.

Policy 1.6.c: Allow single-family and multi-family residential housing in close proximity to employment centers within appropriate land use categories and zoning districts.

Response: The proposed mixed-use development will provide a variety of housing and adjacent commercial uses that will generate new employment opportunities. The commercial uses withing the Planned development could be considered an employment center, upon full build out.

Policy 1.6.d: Encourage planned neighborhoods that have amenities such as sidewalks and other recreational opportunities that achieve walkable communities in close proximity to employers.

Response: The proposed development will provide passive recreational opportunities.

Policy 1.6.e: Forge partnerships with private and public sectors to create an atmosphere that attracts employers to our community by planning for the availability of safe and energy efficient workforce housing.

Response: The Developer is currently marketing for tenants for commercial out parcels and will have a variety of housing types.

Policy 1.6.f: Consider incentives for investors, who develop workforce housing for diverse housing types and prices, by supporting grant proposals and funding requests to various agencies and organizations.

Response: The developer has acknowledged this statement. Market demand and other factors will influence the price and housing types as well as commercial tenant.

Conservation and Open Space Element

Objective 1.3: Listed Species The City shall protect species listed by State and Federal agencies as endangered, threatened or of special concern, and their habitats.

Response: An environmental assessment has been performed on the mixed-use development and the proposed development will protect all listed species. The existing wetlands and upland buffers will be protected and remain undisturbed.

Policy 1.3.d: The City shall require prior to development approval, an inventory of listed species for all new developments in areas identified as known habitat for listed species. The inventory shall include detailed information regarding type, quantity, location and habitat requirements for any listed species identified. De minimus threshold for properties required to complete the inventory shall be established in the City's Land Development Regulations.

Response: An environmental assessment has been performed on the mixed-use development which will identify all listed species that shall be protected.

Objective 1.8: Conservation: The City shall create a Conservation land use category for lands on which certain identifiable features, such as flowing surface water bodies, wetland systems, flood plains, wellfield protection areas, unique geologic characteristics, and listed plant and wildlife habitat require enhanced oversight and regulatory protection. Land use regulations for designated conservation areas will consider the vulnerability of susceptible features and vary accordingly. Conservation areas will allow a diverse range of activities and opportunities, depending on the nature and degree of vulnerability of the susceptible features present.

Response: There are four (4) wetlands along with required buffer along Turkey Creek. The proposed development will follow State procedures for wetlands preservation and water of the State.

Policy 1.8.a: Conservation uses: Conservation uses shall be limited to public access, low-intensity resource-based recreation, (i.e., greenways and trails), native vegetative community restoration, residential and non-residential uses necessary to manage such conservation lands (i.e., ranger stations, research stations, and park amenities).

Response: The proposed development acknowledged this regulation and will comply. The proposed development will have 36.7 acres of open spaces that will include conservation areas.

Policy 1.10.b: The City shall conserve wetlands by prohibiting, where the alternative of clustering all structures in the non-wetland portion of the site exists, any development or dredging and filling which would alter their natural functions. If no other alternative for development exists, the City shall allow only minimal development activity in those areas designated as wetlands within this Comprehensive Plan and that such development activity comply with the following performance standards:

I. Residential dwelling units no denser than 1 dwelling unit per 5 acres, subject to the following minimum performance standards:
a. Residences and any support buildings must be built on pilings of sufficient height to exceed by 1 foot the highest recorded flood level in the wetland. If there

is not flooding data available, residences and any support buildings must be built at least 2 feet above the highest seasonal water level.
b. Clearing or removal of native vegetation shall not exceed 1/2 acre per 5 acres, except that where a ratio of 1 dwelling unit per 5 acres is utilized, the clearing or removal of native vegetation shall not exceed a total of 1/4 acre per 5 acres. Exotic vegetation may be removed without regard to this limitation provided that, of the area cleared of exotic vegetation exceeds the applicable 1/2 acre or 1/4 acre limitation or is replanted with native wetland vegetation.
c. No dredging or filling (except for pilings to support the residence and support buildings or poles providing utility services) shall be allowed, except that a walking path or driveway to the residence may use permeable fill of it is designed with a sufficient number and size of culverts to allow the natural flow of water to continue.
d. Drain fields for septic tanks and gray water shall be located outside the wetland.
e. Where a ratio of 1 dwelling unit per 5 acres is employed the following provisions shall also apply:

i. Clustering of units shall be located in the perimeter areas of the wetlands; and
ii. A restrictive or conservation easement to preserve open space shall be established.
OR:

II. Residential dwelling units not more dense that 1 dwelling unit per 3 acres such to the following minimum performance standards:
a. Residences must be built on pilings of sufficient height to exceed by 1 foot the highest recorded flood level in the wetland. If there is no flooding data available, residences must be built at least 2 feet above the highest seasonal water level.
b. All support buildings and other support facilities shall be constructed outside the wetland.
c. Clearing or removal of vegetation shall not exceed 1/4 acre per 3 acres, except that where a ratio of 1 dwelling unit per 3 acres is employed, the clearing or removal of native vegetation shall not exceed a total of 1/8 acre per 3 acres. Exotic vegetation may be removed without regard to this limitation provided that, if the area is cleared of exotic vegetation exceeds the applicable 1/4 or 1/8 acre limitation, it is replanted with native wetland vegetation.
d. No driveways, paths or other construction requiring fill (other than pilings for the residence or poles for utilities) will be allowed within the wetland.

e. All residences shall be connected to a central sewage system owned and operated by the City.
f. Where a ratio of 1 dwelling unit per 3 acres is utilized, the following provisions shall also apply:

i. Clustering of units shall be located along the perimeter area of the wetland; and

ii. A restrictive or conservation easement to preserve the open space shall be required.

OR:

III. Limited development activity with impacts to isolated wetlands (and/or associated buffers) that meet all of the following conditions: a. Less than .25 acres in size; and, b. Determined to be of poor quality by a certified environmental specialist; and, c. The applicant has demonstrated that every reasonable step has been taken to minimize impact to wetland; and, d. The applicant has provided for appropriate on-site or off-site mitigation for impact to wetland. Limited development activity includes, but is not limited to, park amenities such as trails or boardwalks, minimum necessary roadways and/or sidewalks for access or internal site connectivity, and underground utility line crossings.

Response: The proposed development will comply with the City's wetland impacts. If wetlands are impacted, the environmental report will identify the quality and reasonable assurances for the impact.

Policy 1.12.d: The City shall require the following buffers for development along surface water bodies. Buffers shall be measured from the outer edge of the water body, and created as established in the following table.

Resource Addressed	Required Buffer (feet)
Surface waters less than or equal to 0.5 acre that do not support federally and/or state regulated vertebrate wetland/aquatic dependent animal species.	50' average 35' minimum
Surface waters greater than 0.5 acre that do not support the animal species described above.	75' average 50' minimum
Areas where the animal species described above have been documented within 300 feet of a surface water.	100' average 75' minimum

Response: The proposed development will comply with the City's wetland buffers and will provide a minimum 50' buffer and average 75' buffer.

Recreation Element

Objective 1.3: New Development Recreation Requirements: The City shall consider providing incentives for new development to enhance the City's recreation lands and facilities.

Response: The proposed development acknowledges this statement and will comply with the City's recommendations.

Policy 1.3.a: The City may investigate using recreation impact fees on new residential developments to offset the demand created by the new development to the extent allowed in 163.31801.

Response: The proposed development acknowledges this statement and will comply with the City's recommendations.

Policy 1.3.b: The City shall consider incentives for new industrial, institutional, and commercial development to encourage the inclusion of linear and pocket parks, particularly within proximity to the downtown core.

Response: The proposed development will provide commercial uses and will include a pocket park.

Policy 1.3.c: The City shall consider incentives for new development to provide pedestrian and bicycle paths, connecting to a network of like paths, wherever possible. The City shall consider establishing a sidewalk/pathway fund as an alternative to the provision of onsite paths within new developments. Policy 1.3.d: The City shall consider providing a density bonus for developments that include onsite recreation set asides and/or developed recreation.

Response: The proposed development will provide walking path and sidewalks and passive recreation uses that can be utilized by the citizen of the City of Alachua.

VI. Conclusions:

Job Creation

The proposed development will contribute to the housing variety for the City of Alachua. As well as will contribute to the local job growth with potential for direct creation of 656 jobs from the development of the single family detached component. Jobs are generated in the industries where lumber, concrete, lighting fixtures, heating equipment, and other products that go into a home are produced. Secondary and tertiary jobs are created when real estate agents, lawyers, and brokers provide services to home builders, home buyers as well as building supplies required for building of those homes.

Tax Revenue Generation

The proposed development will contribute to the tax rolls based anywhere from $1,670,324.25 to $3,816,680.00 for the 215 units single family detached homes. The commercial component of the proposed development is more difficult to quantify, because there is a such a large variance based on commercial uses.

For single family detached residential uses and based on the 2020 millage rate of 22.1970:

At a 350K Valuation = $7,768.95 annual property tax per unit

- 215 Units X $7,768.95 = $1,670,324.25 in annual property taxes at residential single family detached full build out

At a 800K Valuation = $17,757.00 annual property tax per unit

- 215 Units x $17,757.00 = $3,816,680.00 in annual property taxes at full residential single family detached build out

Housing Variety

According to Angie Di Michele from the Sarasota Herald Tribune, nearly 1,000 people move to Florida every day, making Florida the second fastest-growing state in the country. One problem that popularity has created is housing demand increases and that there are not enough options to meet the demand of those who need affordable housing.

One way to address housing shortages and cost burdened households is through supply and a variety of housing choices. According to the American Planning Association, is to support the development of mixed use, mixed income livable communities where people choose to live, work, and play because they are attractive and economical options rather than forced decisions. Smart Growth is largely about retrofitting communities to offer more choices both in terms of housing types and prices but also in terms of transportation options.

Because of the benefits to the infrastructure, job creation, housing variety and job created by the project, JBPro on behalf DM Alachua Investments, LLC, JB Pro is requesting approval of a Large-Scale Comprehensive Plan Amendment to the 121. 1 acres to change the Future Land Use designations, from Agriculture and Commercial to Moderate Density Residential (0 to 4 units), as well as High-Density Residential (8 to 15 units) and Commercial designation.

FOR PLANNING USE ONLY
Case #: _____
Application Fee: $_____
Filing Date: _____ Acceptance Date: _____
Review Type: P&Z, CC

City of Alachua
Comprehensive Plan Amendment Application

☐ **Large** Scale Comprehensive Plan Amendment (greater than 10 acres)

☐ **Small** Scale Comprehensive Plan Amendment (10 acres or less)

NOTE: It is the burden of the applicant to be familiar with the requirements of Chapter 163, Florida Statutes, which are related to Comprehensive Plan Amendments. Requirements for Comprehensive Plan Amendments may change with each Legislative Session. Please contact the Planning and Community Development Department if you need assistance with locating this information.

A. PROJECT

1. Project Name: _____
2. Address of Subject Property: _____
3. Parcel ID Number(s): _____
4. Existing Use of Property: _____
5. Existing Future Land Use Map Designation: _____
6. Proposed Future Land Use Map Designation: _____
7. Acreage: _____

B. APPLICANT

1. Applicant's Status ☐ Owner (title holder) ☐ Agent
2. Name of Applicant(s) or Contact Person(s): _____ Title: _____
   Company (if applicable): _____
   Mailing address: _____
   City: _____ State: _____ ZIP: _____
   Telephone: (___) _____ FAX: (___) _____ e-mail: _____
3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): _____
   Mailing Address: _____
   City: _____ State: _____ ZIP: _____
   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

C. ADDITIONAL INFORMATION

1. Is there any additional contact for sale of, or options to purchase, the subject property? ☐ Yes ☐ No
   If yes, list names of all parties involved: _____
   If yes, is the contract/option contingent or absolute? ☐ Contingent ☐ Absolute

D. ATTACHMENTS

1. Statement of proposed change and maps which illustrate the proposed change.

2. Urban Sprawl Analysis which evaluates as to whether the plan amendment incorporates a development pattern or urban form that achieves four or more of the following eight criteria:

   (I) Directs growth and development to areas of the community in a manner that does not adversely impact natural resources;
   (II) Promotes the efficient and cost effective provision or extension of public infrastructure and services;
   (III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that support a range of housing choices and a multimodal transportation system;
   (IV) Promotes conservation of water and energy;
   (V) Preserves agricultural areas and activities;

(VI) Preserves open space and natural lands and provides for public open space and recreation needs;
(VII) Creates a balance of land uses based on demands of residential population for the nonresidential needs of an area; and,
(VIII) Provides uses, densities and intensities of use and urban form that would remediate an existing or planned sprawl development pattern or provides for an innovative development pattern such as transit oriented development or new towns.

3. Concurrency Impact Analysis which considers the impact on public facilities, including potable water, sanitary sewer, transportation, solid waste, recreation, stormwater, and public schools in accordance with Article 2.4.14 of the Land Development Regulations.

4. Needs Analysis which demonstrates the necessity for the proposed increase in the proposed Future Land Use Map Designation. This analysis may consist, in whole or part, of a market impact study or real estate needs analysis.

5. Analysis of Consistency with the City of Alachua Comprehensive Plan (analysis must identify specific Goals, Objectives, and Policies and describe in detail how the application complies with the noted Goal, Objective, or Policy.)

6. A current aerial map of the property (may be obtained from the Alachua County Property Appraiser).

7. Three (3) sets of labels for all property owners within 400 feet of the subject property boundaries – even if property within 400 feet falls outside of City limits. (Obtain from the Alachua County Property Appraiser).

8. If the application includes any Future Land Use Map Designation which permits residential uses, Public School Student Generation Form.

9. Legal description with tax parcel number.

10. Proof of ownership.

11. Proof of payment of taxes.

12. **Fee.** Please see fee schedule for fee determination. No application shall be accepted for processing until the required application fee is paid in full by the applicant. Any necessary technical review will be billed to the applicant at the rate of the reviewing entity. The invoice shall be paid in full prior to any legislative and/or quasi-judicial action of any kind on the petition, appeal, or development application.

All 12 attachments are required for a complete application. **A completeness review of the application will be conducted within five (5) business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.**

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

Warranty Deed

This Warranty Deed made this **10th** day of **May, 2017** between **Jule L. Schmidt, a single man,** whose post office address is **960 Oak Street, Merritt Island, FL 32953, Thomas Alan Schmidt and Mary Lynn Schmidt, his wife**, whose post office address is **1103 North Washington, Nevada, MO 64772**, and **Patricia M. Schmidt Richard and Shepherd Richard, her husband**, whose post office address is **7305 Mystic Way, Port St. Lucie, FL 34986**, together, grantor, and **DM Alachua Investments, LLC, a Florida limited liability company,** whose post office address is **4045 NW 43rd St, Gainesville, FL 32606**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Alachua County, Florida** to-wit:

See legal description attached as Exhibit A.

NOTE: The property herein described is not the homestead of the grantor(s) and neither the grantor(s) nor the grantor(s) spouse(s), nor anyone for whose support the grantor is responsible, resides on or adjacent to said land. AND, THE DEED WAS PREPARED WITHOUT BENEFIT OF A SURVEY.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2016**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Warranty Deed

This Warranty Deed made this **10th** day of **May, 2017** between **Jule L. Schmidt, a single man,** whose post office address is **960 Oak Street, Merritt Island, FL 32953, Thomas Alan Schmidt and Mary Lynn Schmidt, his wife**, whose post office address is **1103 North Washington, Nevada, MO 64772**, and **Patricia M. Schmidt Richard and Shepherd Richard, her husband**, whose post office address is **7305 Mystic Way, Port St. Lucie, FL 34986**, together, grantor, and **DM Alachua Investments, LLC, a Florida limited liability company,** whose post office address is **4045 NW 43rd St, Gainesville, FL 32606**, grantee:

(Whenever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives, and assigns of individuals, and the successors and assigns of corporations, trusts and trustees)

Witnesseth, that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Alachua County, Florida** to-wit:

See legal description attached as Exhibit A.

NOTE: The property herein described is not the homestead of the grantor(s) and neither the grantor(s) nor the grantor(s) spouse(s), nor anyone for whose support the grantor is responsible, resides on or adjacent to said land. AND, THE DEED WAS PREPARED WITHOUT BENEFIT OF A SURVEY.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to **December 31, 2016**.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

Public School Student Generation Form for Residential Development in the City of Alachua

A. APPLICANT

1. Applicant's Status (check one):

   □ Owner (title holder) ■ Agent

2. Name of Applicant(s) or Contact Person(s): Christopher Potts, PE Title: Director of Engineering
   Company (if applicable): JBPro
   Mailing address: 3530 NW 43rd Street
   City: Gainesville State: Florida ZIP: 32606
   Telephone: 352-375-8999 FAX: _____ e-mail: chris.potts@jbpro.com

3. If the applicant is agent for the property owner*:
   Name of Owner (title holder): DM Alachua Investments LLC
   Mailing Address: 4045 NW 43rd Street
   City: Gainesville State: Florida ZIP: 32609

   * Must provide executed Property Owner Affidavit authorizing the agent to act on behalf of the property owner.

B. PROJECT

1. Project Name: Schmidt Farms
2. Address of Subject Property: 10100 NW US HWY 441
3. Parcel ID Number(s): 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001, 05945-000-000
4. Section 34 Township 08 Range 19 Grant _____ Acreage: 121.1
5. Existing Use of Property: Vacant
6. Future Land Use Map Designation: Agriculture and Commercial
7. Zoning Designation: PD-R and PD-Comm
8. Development Data (check all that apply):

   ■ Single Family Residential Number of Units 213
   ■ Multi-Family Residential Number of Units 301
   □ Exempt (*see exempt developments on page 2*)

9. Review Type:

Preliminary Development Order	***Final Development Order***
■ Comprehensive Plan Amendment	□ Preliminary Plat
■ Large Scale	□ Final Plat
□ Small Scale	□ Site Plan
■ Site Specific Amendment to the Official Zoning Atlas (Rezoning)	
□ *Revised*	

10. School Concurrency Service Areas (SCSA): Based on the project location, identify the corresponding SCSA for each school type. Maps of the SCSAs can be obtained from the Alachua County Growth Management Department Map Gallery by clicking on the "Public Schools" tab: http://growth-management.alachuacounty.us/gis_services/map_gallery/
    Elementary: NW Alachua CSA
    Middle: Mebane CSA
    High: Santa Fe CSA

Explanation of Student Generation Calculation: Student Generation is calculated based on the type of residential development and the type of schools. The number of students stations (by school type – Elementary, Middle and High School) used for calculating the school concurrency impacts is equal to the number of dwelling units by housing type multiplied by the student generation multiplier (for housing type & school type) established by the School Board. **Calculations are rounded to the nearest whole number.** Student Generation for each school type is calculated individually, in order to correctly assess the impact on the School Concurrency Service Area (SCSA) for each school type (Elementary, Middle and High School).

# of Elementary School Student Stations = # of housing units x Elementary school student generation multiplier
# of Middle School Student Stations = # of housing units x Middle school student generation multiplier
# of High School Student Stations = # of housing units x High school student generation multiplier

Student Generation Calculations: Single Family Residential Development

Elementary School	213	units	x	0.14	Elementary School Multiplier*	30	Student Stations**
Middle School	213	units	x	0.06	Middle School Multiplier*	13	Student Stations**
High School	213	units	x	0.08	High School Multiplier*	17	Student Stations**

Student Generation Calculations: Multi-Family Residential Development

Elementary School	301	units	x	0.09	Elementary School Multiplier*	27	Student Stations**
Middle School	301	units	x	0.03	Middle School Multiplier*	9	Student Stations**
High School	301	units	x	0.03	High School Multiplier*	9	Student Stations**

** Student generation multipliers may be obtained from SBAC at:*
http://www.sbac.edu/pages/ACPS/Departments_Programs/DepartmentsAF/D_thru_F/FacilitiesMainConstr/Local_Certification_Packets/City_of_Alachua
*** Round to the nearest whole number*

EXEMPT DEVELOPMENTS (check all that apply):

- ☐ Existing legal lots eligible for a building permit.
- ☐ Development that includes residential uses that has received final development plan approval prior to the effective date for public school concurrency, or has received development plan approval prior to June 24, 2008, provided the development approval has not expired.
- ☐ Amendments to final development orders for residential development approved prior to the effective date of public school concurrency, and which do not increase the number of students generated by the development.
- ☐ Age-restricted developments that prohibit permanent occupancy by persons of school age, provided this condition is satisfied in accordance with the standards of the Public Schools Facilities Element or the ILA.
- ☐ Group quarters that do not generate public school students, as described in the ILA.

A completeness review of the application will be conducted within 5 business days of receipt. If the application is determined to be incomplete, the application will be returned to the applicant.

I/We certify and acknowledge that the information contained herein is true and correct to the best of my/our knowledge.

Neighborhood Meeting Advertisement For NW 43rd Street Planned Development and Large-Scale Comprehensive Plan Amendment

As a property owner located within the required 400-foot radius of a proposed development, you are hereby being notified of a proposal for a Rezoning and a Large-Scale Comprehensive Plan Amendment as required by, Section 2.2.4 Neighborhood Meetings, of the City of Alachua Land Development Regulations. DM Alachua Investments, LLC, 914 SW 131 ST, Newberry, FL, 32669 is requesting a Large-Scale Comprehensive Plan Amendment and a rezoning to Planned Development for 121. 56 acres, located the intersection of 441 and NW 43rd Street in the City of Alachua. The proposed Rezoning and Comprehensive Plan amendment will encompass, parcels numbers 05936-001-000, 05936-007-000, 05936-007-002, 05936-007-001 and 05945-000-000.

The Neighborhood Meeting will discuss the proposed development, share a conceptual plan, and receive comments from the public and adjacent property owners. The neighborhood meeting will be held at City of Alachua Public Library located at 14913 NW 140 Street Alachua, FL 32615 on August 12th , 2021 from 5:00PM to 5:45PM. You may also submit your comments electronically to the Representative for the Developer of the project, JBPro, Carter Maria Thompson, Director of Land Planning, 3530 NW 43rd Street Gainesville FL 32606, 352-375-8999 or by email at carter.thompson@jbpro.com.

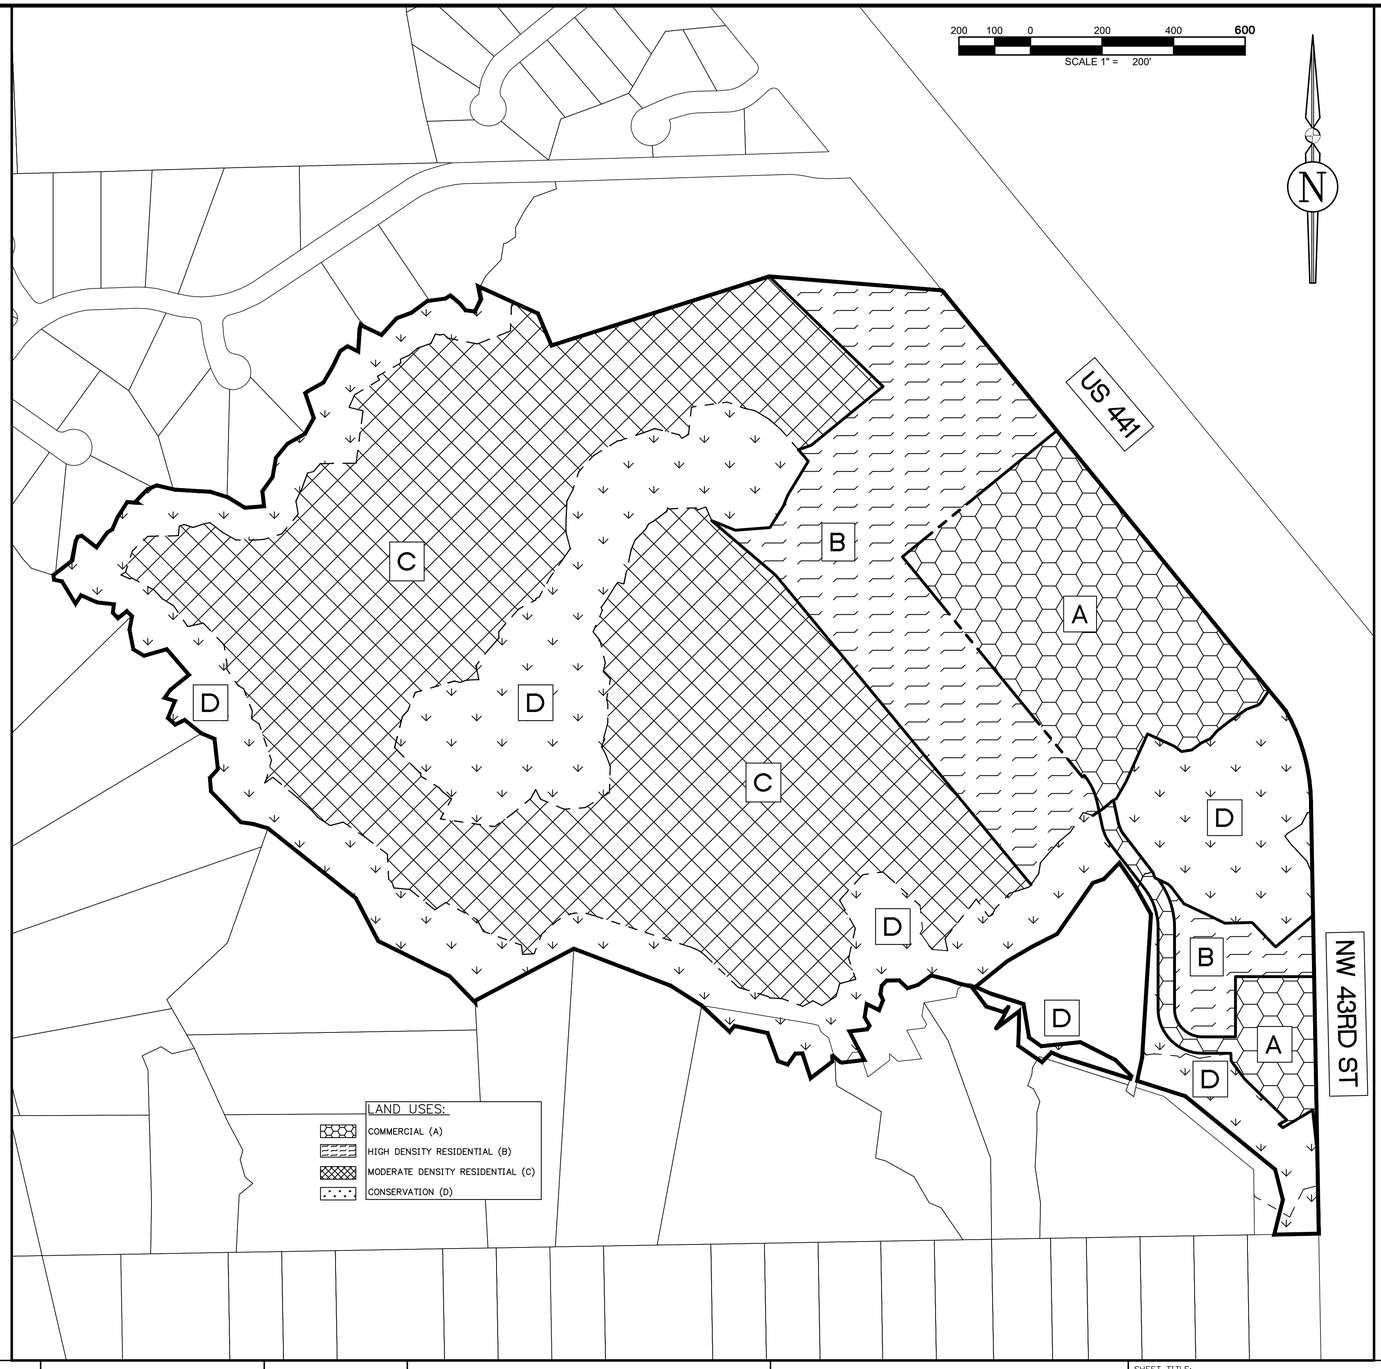
NW 43rd Street TND Neighborhood Workshop Summary

Meeting Location: Alachua Branch Library
Meeting Date and Time: August 12th at 5pm
Meeting Presenter: Chris Potts, P.E., JBPro

The neighborhood meeting began on time, with approximately 30 neighbors in attendance. Mr. Potts gave a PowerPoint presentation which described the nature of the application for a rezoning and land use change and provided a visual representation of the Concept Layout for the development at this stage of the permitting and review process. Many questions were asked, and sparked a good discussion on topics like utility connections, wetland and environmental impacts, traffic concerns, and flooding impacts to adjacent properties. The timeline to final buildout was also discussed. Specific questions are listed below, with responses.

1. What is the breakdown of the types of developments, i.e. single family homes, multi-family homes, and commercial/retail area?
   Response: There are approximately 140 single family homes and 24 multi-family buildings proposed, along with approximately 500,000 sf set aside for commercial use. The single family homes will likely be about 1,200 sf in size, the multi-family units will be approximately 2,000 sf, and the homes will most likely sell for anywhere between $300,000-$800,000. Additionally, due to the existing wetlands on site, buffers will be provided between this development and neighboring communities.



2. How will the development dispose of wastewater?
   Response: Because this project is within the limits of the City of Alachua, all homes will be required to connect to City of Alachua Public Services utilities. A lift station will be required for the development to pump wastewater to the treatment plant.

3. What water management district is the project located in, and where does the treated water eventually end? Many neighbors voiced concerns regarding current and future flooding of their property and the adjacent wetlands.
   Response: This project is located in the SRWMD, and waters eventually discharge to the Gulf of Mexico. Mr. Potts explained the local and state standards of design regarding treatment and discharge of any stormwater runoff that makes its way onto the proposed development. This will likely include wet detention basins to attenuate the runoff, and if discharge from the

basins is necessary the development will comply with volume and rate control regulations. Mr. Potts explained that as developers and engineers, we cannot create a worse situation than what is existing; however, improvements to the development may or may not improve offsite conditions depending on the existing topography.

4. Many neighbors voiced concerns regarding impacts to the wildlife and wetlands on the development property.
   Response: Mr. Potts explained the local and state regulations regarding impacts to wetlands and the ecosystems they support. He explained that being in Alachua County, this development must maintain an average 75-foot minimum buffer from all wetland limits as delineated by an Environmental Specialist and that wetlands cannot be disturbed or changed. Many neighbors voiced concerns regarding the flooding occurring from Turkey Creek, so a brief history and description of the potential causes was discussed, including the impacts from the GRU plant nearby. Mr. Potts explained that it is not the intent of this development to adjust or manipulate any runoff coming from or directed to US 441, but that any impacts due to the proposed development will be mitigated against and designed for with this development.

5. Many neighbors voiced concerns regarding the additional traffic load this development will generate, and expressed a lack of faith in the ability of a roundabout to calm traffic and mitigate for the additional volume. Additionally, cost of construction and maintenance was discussed.
   Response: Mr. Potts explained that a Traffic Study is a requirement for a development of this size, and that all roadway improvements will adhere to the recommendations of the traffic study once it is obtained. Concerns regarding speed of traffic coming to the proposed roundabout from US 441 were expressed, as well as pedestrian safety concerns. Mr. Potts explained that this development will undergo review by FDOT and Alachua County as it connects to roads falling within the jurisdiction of both entities, and that any improvements will be approved by each agency in accordance with their standards for design and safety. Neighbors requested a traffic light in lieu of a roundabout, and Mr. Potts explained that the roundabout was a suggestion by both Alachua County and FDOT, but more discussions will be had prior to final approval. Lastly, Mr. Potts explained that any improvements to existing roads, as well as construction of new roads, will be the responsibility of the developer. Once constructed, Mr. Potts explained that maintenance responsibilities fall to the jurisdiction having authority for each roadway.

DEVELOPMENT SITE AREA

	AREA	PERCENTAGE
TOTAL PROJECT	5,274,244.8 SF (121.1 AC)	100%
COMMERCIAL (A)	623,993.6 SF (14.4 AC)	11.9%

Re: **Updated US 441 Traditional Neighborhood Development Traffic Study; Alachua County, Florida**

Dear Mr. Potts:

Attached is the requested traffic study. If you have any questions or comments regarding this study, please contact me.

Sincerely,

Jeffrey W. Buckholz, P.E., PTOE
Principal

This item has been digitally signed and sealed by Jeffrey W. Buckholz, P.E. on 9/6/21. Printed copies of this document are not considered signed and sealed and the signature must be verified on any electronic copies.

INTRODUCTION

This Traditional Neighborhood Development (TND) will contain 214 single family homes, 130 apartment units, 171 ñresidential-over-commercialò residential units, and 300,000 gsf of retail space. The site plan is provided in Appendix A.

The development will be located in the southwest quadrant of the US 441/NW 43rd Street intersection in northern Alachua County, Florida and it is currently anticipated that there will be two site drives. The North Drive will be a full access driveway on US 441 located north of the US 441/NW 43rd Street intersection and the South Drive will form the fourth (west) leg of the NW 43rd Street/Marathon Gas Station West Driveway intersection. It is proposed that the currently unused median opening on US 441 be moved approximately 250 feet to the south to serve this new development.

US 441 is a four lane divided urban principal arterial with exclusive left turn lanes accommodated within a grass median. It has a posted speed limit of 60 mph in each direction in the vicinity of the site and an FDOT access management classification of 3. NW 43rd Street is a two lane undivided urban minor arterial with a posted speed limit of 50 mph near the site.

Figure 1 shows the site location and surrounding road network while Figure 2 provides the current intersection and mainline lane configuration near the site. The development is expected to be complete and fully occupied by the beginning of 2031, therefore 2031 was chosen as the design year for this study.

EXISTING TRAFFIC VOLUMES

Buckholz Traffic personnel conducted weekday AM peak period (6:45 am to 8:45 am) and PM peak period (3:30 pm to 6:00 pm) turning movement counts at the US 441/NW 43rd Street intersection and the NW 43rd Street/Marathon West Driveway intersection during late August of 2021 with all schools in session. These counts, which were collected at 15-minute intervals, are provided in Appendix B with the peak hour volumes summarized in Figures 3 and 4.

Buckholz Traffic personnel also conducted a set of morning and afternoon directional enter/exit counts at a series of roadways located just north of the US 441/NW 43rd Street intersection. These 2019 counts are included in Appendix B. Three of the roadways serve residential developments while the fourth roadway serves the Gainesville Regional Utilities complex.

TRIP GENERATION OF SITE TRAFFIC

Trip generation calculations were carried out using the 10th edition of ITE's Trip Generation Manual and referencing land use codes 210 (Single Family), 220 (Multi-Family Low Rise), 231 (Mid-Rise Residential with First Floor Commercial) and 820 (Shopping Center).. Tables 1 through 4 contain the daily, AM peak hour, and PM peak hour trip generation calculations while Tables 5 through 7 provide the calculations which estimate the peak hour internal trip-making between the residential, retail and office land uses. Tables 8 through 10 summarize the expected weekday, weekday AM peak hour, and weekday PM peak hour trip generation results.

During an average weekday the development is expected to generate 9918 **external** weekday trips (4959 entering and 4959 exiting) with 491 external trips (206 entering and 285 exiting) occurring during the weekday AM peak hour and 763 external trips (386 entering and 377 exiting) occurring during the weekday PM peak hour. Since the primary goal of this study is to analyze the access situation for the planned development, we are interested in total driveway volumes and thus no adjustment has been made for pass-by capture. This results in site traffic volumes at the US 441/NW 43rd Street intersection that are conservatively high.

DISTRIBUTION AND ASSIGNMENT OF SITE TRAFFIC

Site trips were directionally distributed based on the results of our traffic counts (see Table B2 in Appendix B). The directional enter/exit counts taken at nearby side roads along US 441 were used to determine that, in the morning, 26% of the site trips are expected to be oriented to the north with the remaining 74% oriented to the south. In the afternoon, 21% of site trips are expected to be oriented towards the north with 79% oriented towards the south.

These trip distribution percentages were multiplied by the weekday AM and PM peak hour trip generation results to produce the site traffic assignment for external trips shown in Figures 5 and 6.

FUTURE TRAFFIC VOLUMES

The expected weekday AM and PM peak hour background (No Build) traffic volumes and total (Build) traffic volumes near the site are graphically depicted in Figures 7 through 10. The 2029 background traffic volumes were obtained by multiplying the existing traffic volumes by the appropriate FDOT seasonal adjustment factor (0.97) and then by a corresponding average annual growth rate (2.2%) obtained from two nearby historical FDOT counts (see Appendix C). The 2029 total traffic volumes were obtained by adding the external traffic generated by the new development to the 2029 background traffic volumes.

TURN LANE ANALYSIS

Using the 2031 Build traffic volumes a formal analysis was be made to determine if a right turn lane is warranted on US 441 at the North Site Entrance or on NW 43rd Street at the South Site Entrance. The methodology contained in NCHRP Report 279 was used to conduct this analysis. As is indicated in Figure 11, right turn volumes into the site will be high enough to warrant a right turn lane on US 441 at the North Site Entrance. This result is supported by NCHRP Report 420 which requires 40 right turns per hour to warrant a right turn lane on a multi-lane roadway with a posted speed greater than 45 mph.

However, Figure 12 reveals that right turn volumes into the site will not be high enough to warrant a right turn lane on NW 43rd Street at the South Site Entrance. This result is also supported by NCHRP Report 420 which requires 30 right turns per hour to warrant a right turn lane on a 2-lane roadway with a posted speed greater than 45 mph.

Using the 2031 Build traffic volumes a formal analysis was also made to determine if a left turn lane is warranted on NW 43rd Street at the South Site Entrance. The methodology contained in a paper written by M.D. Harmelink entitled: "Volume Warrants for Left Turn Storage Lanes at Unsignalized Grade Intersections" was used to conduct this evaluation. The results, which are depicted in Figures 13 and 14, indicate that 2031 Build traffic volumes will be high enough to warrant a left turn lane at the site drive.

SIGNALIZED INTERSECTION CAPACITY ANALYSIS

2021 Existing, 2031 No Build, and 2031 Build weekday AM and PM peak hour signalized intersection capacity analyses were performed for the US 441/NW 43rd Street intersection using the methodology discussed in Chapter 19 of the Sixth Edition of the Highway Capacity Manual. The existing signal timings for this intersection are provided in Appendix D. The intersection capacity results are summarized in Table 11 while Appendix E provides the supporting capacity analysis calculations. The intersection currently operates at level of service B during both weekday peak hours and is expected to continue to operate at level of service B under both 2031 No Build and Build conditions.

UNSIGNALIZED INTERSECTION CAPACITY ANALYSIS

Using 2021 Existing, 2031 No Build, and 2031 Build traffic volumes, capacity analyses for the unsignalized NW 43rd Street/Marathon West Drive/South Site Drive intersection were conducted using the two-way stop control methodology contained in Chapter 20 of the Sixth Edition of the Highway Capacity Manual. 2031 Build analyses were also performed at the new US 441/North Site Drive intersection. Appendix F contains the capacity analysis calculations with the capacity results summarized in Tables 12 through 14.

A review of Table 12 indicates that level of service F operation with moderate queueing and delay will occur for the side street left turn movement during both weekday peak hours if a full median opening is provided at the North Site Entrance. Table 12 also provides capacity analysis results with the installation of a directional median opening. Redirection of the northbound site traffic through the signalized US 441/NW 43rd Street intersection should have minimal impact on this intersection since an exclusive U-turn lane already exists on the north approach.

A review of Table 13 indicates that all minor movements at the US 441/NW 43rd Street intersection currently operate at an acceptable level of service B or higher and, under 2031 No Build conditions, are expected to operate at an acceptable level of service C or higher with minimal queueing and delay. Table 14 shows that, under 2031 Build conditions, all minor movements at this intersection will operate at an acceptable level of service C or better during the weekday AM peak hour. However, during the weekday PM peak hour the westbound approach is expected to operate at level of service F with moderate queueing and delay.

ACCESS MANAGEMENT EVALUATION

Eliminating the unused full median opening located approximately 250 feet north of the proposed North Site Entrance and replacing it with a directional median opening located at this entrance will improve the access management situation along US 441. The existing median opening is only 850 feet from NW 102nd Place to the north and only 1450 feet from NW 43rd Street to the south, both of which are much less than the required 2640 feet for a full median opening. The new median opening will be 1100 feet from NW 102nd Place and 1200 feet from NW 43rd Street and, although it will still violate the 1320 foot required spacing for a directional median opening, it will just barely do so.

RECOMMENDATIONS

The existing full median opening on US 441 should be relocated to the south at the new site entrance and consideration should be given to converting it into a directional median opening. An exclusive southbound right turn lane should be added on US 441 at the new driveway. A northbound left turn lane should be added at the entrance on NW 43rd Street and two egress lanes should be provided at this entrance. Traffic operations at the NW 43rd Street entrance should be monitored and additional measures taken if unsuitable conditions arise. These measures could include the installation of a roundabout at this location.

43RD STREET TND PLANNED DEVELOPMENT (PD) SPECIFICATIONS

1. LAND USES. LAND USES SHALL BE GENERALLY LOCATED AS SHOWN ON THE PD MASTER PLAN. THE MAXIMUM NUMBER OF DWELLING UNITS ALLOWED ON THE SITE SHALL BE 515 AND THE MAXIMUM NON-RESIDENTIAL AREA ALLOWED SHALL BE 489,400 SQ. FT. DWELLING UNITS MAY BE SINGLE-FAMILY DETACHED, ATTACHED, OR MULTI-FAMILY. LAND USES OTHER THAN RESIDENTIAL PERMITTED ON THE SITE ARE IDENTIFIED IN THE TABLE BELOW. THE FOLLOWING USES ARE ALLOWED IN DEVELOPMENT AREAS A, B, C, & D; COMMUNITY CENTER, POST OFFICE, PUBLIC SAFETY USES, RECREATIONAL TRAILS, PARKS, AND STORMWATER MANAGEMENT FACILITIES. USES FOR AREA E ARE AS LISTED BELOW.
2. PHASING. THE DEVELOPMENT SHALL CONSIST OF ONE PHASE AND MAY BE DEVELOPED ACCORDING TO MARKET CONDITIONS. THE DEVELOPMENT MAY BE FURTHER DIVIDED INTO SMALLER UNITS ACCORDING TO THE FINAL PD PLAN TO CREATE A LOGICAL AND/OR FUNCTIONAL DEVELOPMENT OR INFRASTRUCTURE PATTERNS.
3. ROADWAY BUFFERS. A TWENTY-FOOT (20') BUFFER SHALL BE PROVIDED ADJACENT TO ROADWAYS THAT EXIST ALONG EXTERNAL PROJECT BOUNDARIES. THE BUFFER MAY INCLUDE STORMWATER MANAGEMENT FACILITIES, PEDESTRIAN CIRCULATION, LANDSCAPING, AND SIGNAGE. ROADWAY BUFFERS MAY NOT BE PART OF PLATTED LOTS. LANDSCAPING SHALL BE CONSISTENT WITH APPLICABLE SECTIONS OF THE LAND DEVELOPMENT REGULATIONS (LDRS).
4. LOT SETBACK AND SEPARATIONS. HOUSING UNITS AND DESIGN SHALL AT A MINIMUM MEET THE REQUIREMENT OF THE FLORIDA BUILDING CODE. NOTWITHSTANDING THE SETBACKS ESTABLISHED WITHIN EACH DEVELOPMENT AREA AND DEFINED ON THE PD MASTER PLAN, AN ACCESSORY STRUCTURE, SUCH AS A DETACHED GARAGE, MAY SHARE A COMMON WALL WITH ACCESSORY STRUCTURES ON ADJACENT LOTS.
5. COMMON AREA. COMMON AREA AND OPEN SPACE, AS DEFINED BY APPLICABLE SECTIONS OF THE LDRS AND THE PD MASTER PLAN, SHALL ACCOUNT FOR A MINIMUM OF 10% OF THE COMPLETED PROJECT, INCLUSIVE OF THE DEPRESSIONAL AREA. OPEN SPACE AREAS MAY EXIST IN ANY LAND USE AREA AND MAY BE DEVELOPED AT ANY RATE. THESE AREAS MAY CONTAIN LOW-INTENSITY PASSIVE OR ACTIVE RECREATION OPPORTUNITIES SUCH AS NATURE TRAILS, WILDLIFE VIEWING AREAS, AND OTHER RECREATION ACTIVITIES.
6. CIRCULATION. THE CIRCULATION CONFIGURATION IS NOT INTENDED TO BE EXACT AND REPRESENTS ONLY A PORTION OF THE OVERALL ROADWAY NETWORK. ROADWAYS INTENDED TO BE DEDICATED TO THE PUBLIC MAY CONSIST OF A MIXTURE OF ROADWAY TYPES AND SHALL BE REQUIRED TO MEET THE APPLICABLE LDRS DESIGN CRITERIA, UNLESS OTHERWISE AUTHORIZED BY THE CITY COMMISSION THROUGH LDR SECTION 3.6.3 (A)(5)(B)(III). THE INTERNAL ROADWAYS NOT SHOWN ON THE PD MASTER PLAN ARE INTENDED TO BE NEIGHBORHOOD STREETS AND MAY NOT MEET THE ARTERIAL OR COLLECTOR ROADWAY DEFINITION.
7. LANDOWNER/DEVELOPER RESPONSIBILITY. THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING RIGHT-OF-WAY AND EASEMENTS FOR CONSTRUCTING ON-SITE INFRASTRUCTURE LOCATED IN THE PROPOSED PD-R AND PD-COMM DISTRICTS, INCLUDING BUT NOT LIMITED TO ELECTRICAL UTILITY LINE, TELEPHONE LINES, CABLE TV LINES, OR THE UNDERGROUND CONDUIT FOR SUCH FEATURES. THE LANDOWNER/DEVELOPER IS RESPONSIBLE FOR PROVIDING AREAS FOR PUBLIC INFRASTRUCTURE AS REQUIRED BY CITY ORDINANCES. TO GUARANTEE CONSTRUCTION OF REQUIRED INFRASTRUCTURE, AND IF REQUESTED BY THE CITY, TO DEDICATE THESE IMPROVEMENTS TO THE CITY IN A FORM THAT COMPLIES WITH CITY REGULATIONS. ALL FACILITIES NOT DEDICATED TO THE CITY SHALL BE OPERATED AND MAINTAINED BY A PROPERTY OWNERS ASSOCIATION FORMED AS PART OF THE SUBDIVISION PROCESS.
8. ALLOWABLE LAND USE CLASSIFICATION DATA. FIGURES FOR ACREAGE ARE ESTIMATES AND HAVE BEEN ROUNDED TO THE NEAREST WHOLE NUMBER.

Introduction and Project Description

Ecosystem Research Corporation (ERC) was retained by DM Alachua Investments LLC **(DMAI)** to perform an Environmental Resource Assessment (ERA) and Listed Species Survey of a Planning Parcel designated for a City of Alachua Land Use Comprehensive Plan Amendment and various Re-zoning Amendments. These administrative and planning activities are being implemented to facilitate future effective development within the Planning Parcel. DMAI currently owns the designated Planning Parcel, which represents the extent of the contiguous lands owned by the LLC in this specific area. **DMAI** proposes to develop the Planning Parcel consistent with the Land Use and Zoning guidelines that are established pursuant to this Land Use and Rezoning Application.

The Planning Parcel lies within the southwest quadrant of the intersection of US 441 and NW 43rd Street (**Figure 1**). The northern perimeter of the Planning Parcel is formed by the US 441 Right-of-Way (ROW) while the east boundary of the Site lies adjacent to the NW 43rd Street ROW. Currently, land uses in the vicinity of the Planning Parcel are described, as follows:

NORTH	ROW–US 441: a high volume local & regional access road
	Gainesville Regional Utilities and City of Gainesville owned Agricultural Zoned Properties
	Silvicultural Land Use
EAST	Commercial Land Use: individual Fuel and Gasoline Supply and Sales
	Convenience Store
	Small-volume Storge Facilities for Individuals and Businesses
	Vacant Land
SOUTH and Southwest	ROW—low volume local access road: NW 93rd Avenue
	Vacant land: Natural Area of Turkey Creek Stream Channel and Floodplain
	South: Low Density Rural single family residential. Southwest: Morgan Manor, Agricultural (Low Density Single Family Residential)
WEST	ROW—low volume local & regional access road: ROW NW 102nd Place
	Moderate Density Single Family Residential Development: Brooke Pointe Subdivision
	Natural Drainage Feature: Brooke Pointe Creek
	Small scale commercial development: Angel Gardens
	Vacant lands

The Planning Parcel consists of five (5) Alachua County tax parcels defined as follows (**Figure 2**):

Parcel No. 05945-000-000	17.78
Parcel No. 05936-001-000	88.14
Parcel No. 05936-007-000	14.13
Parcel No. 05936-007-001	1.00
Parcel No. 05936-007-002	0.51
Total Acreage	**121.56**

The total acreage of the Tax Parcels as indicated within the Alachua County Property Appraiser's website equals **121.56** acres. The total acreage of the five (5) Tax Parcels as determined by the Site-Specific Professional Survey equals **121.09** acres. For the purposes of this report presentation and all data calculations contained in this assessment, the surveyed acreage of **121.09** acres is used and is provided on all report maps.

The five (5) Tax Parcels represent the "Planning Parcel," which is the concept for the area of environmental resource studies used by the City of Gainesville and Alachua County. In the Gainesville Code, "Planning Parcel" is defined within ***Chapter 30: City of Gainesville Land Development Code – Section 30-2.1. Definitions (Planning Parcel), as follows:***

> Planning parcel means a land area within city limits made up of the parcel on which development or alteration is proposed and all contiguous parcels within city limits under common ownership or control as of the date of application submittal. Common ownership or control means the contiguous parcels that are owned by the owner/applicant or by entities owned or controlled by the owner/applicant.

"Planning Parcel" is also the concept study area used by Alachua County for the basis of study for determination of the occurrence of Regulated Natural Resources as defined within ***Chapter 406. Natural and Historic Resources Protection*** of the Unified Land Development Code (ULDC). The "Planning Parcel" as described within the County Code is defined in ***Chapter 410. Definitions as*** follows,

> Planning parcel: The parcels included within the entire contiguous land area under common ownership or control as of May 2, 2005, even if the project proposal or application includes only a portion of such lands.

"Planning Parcel" represents the "Project Site or Project Area" where all activities described in this report, to include Land Use and Zoning Amendments as well as development activities, are proposed. The "Planning Parcel" in both the Gainesville and Alachua County Codes may be further defined as the Resource Assessment Area (RAA),

which is the total area encompassed by the ground verification process that is used in the site review. The City of Alachua Comprehensive Plan does not define a comparable concept to the "Planning Parcel" for Environmental Resource Assessments. Neither does the Comp Plan describe a detailed Comprehensive Environmental Resource Assessment Methodology to be used for preparation of Land Use, Re-zoning, or Development Applications within the City limits. Therefore, the Environmental Checklist Methodology described by Alachua Conty and the City of Gainesville was used as a template for this Resource Assessment.

In addition to the requirements for environmental review defined in the City of Alachua Comp Plan, the Gainesville Land Development Code, and the Alachua County Unified Land Development Code, Alachua County has recently adopted two (2) Natural Resource Protection Codes that apply to Land Use, Re-Zoning, and Development Applications submitted within Municipalities (i.e., Cities of Gainesville, Alachua, Newberry, Hawthorn, and others). These Codes provide for County Staff review of all Proposed Projects at the discretion of County Staff and provide for County protection of existing Regulated Natural Resources that are affected by the proposed activity. These codes are listed and described, as follows:

Chapter 77. Alachua County Water Quality and Management Practices Code that was recently *amended* (23 January 2018) with **"*Article II–Countywide Wetland Protection Code.*"**

> This code provides for protections of all floodplains, surface waters, and wetlands and other resources that occur within the municipal limits of Towns and Cities within Alachua County. It provides most of the protections that are described within ***Chapter 406. Natural and Historic Resources Protection (ULDC***) for the municipal areas within the county.

Chapter 78. Countywide Natural Resources Protection Code

> This is an Upland Protection Code that provides resource protections for upland habitat areas within County Municipal Areas and is similar to the protection standards defined in ***Chapter 406. Natural and Historic Resources Protection (ULDC)***

Currently, the majority of the Planning Parcel for the proposed Project Site is undeveloped except for minimal constructed buildings associated with a single-family residence and multiple small agriculture related buildings that have historically been used for dairy, pasture, and silvicultural operations. Parcels **05936-007-001** and **05936-007-002** have historic structures that were associated with small commercial enterprises used on these parcels in the past to include Angel Gardens, a Bike Shop, and a restaurant to name a few.

History of Land Use and Zoning Amendments for the "Planning Parcel"

The Planning Parcel in the past has been the subject of several proposed Land Use and Zoning Amendments. In 2007–2008, Mesa-Sand Realty LLC (Indianapolis, Indiana) retained Ecosystem Research Corporation to provide an Environmental Resource Assessment and Listed Species Survey in support of a Large-Scale Comprehensive Plan Amendment for the Project Site. In addition, they applied for Site-Specific Amendments to the Official Zoning Atlas. The Large-Scale Comprehensive Plan Amendment (CPA) proposed creating a Mixed-Use Development on a ±131.6-acre Planning Parcel. The site at that time carried a Future Land Use designation of Agriculture (Ag) and Commercial (COM). The proposal involved amending the Future Land Use Map classification from Agriculture and Commercial to Commercial, Conservation, and Moderate Density Residential. As part of the application, certain Site-Specific Amendments to the Official Zoning Atlas were also requested. The Application was reviewed by the City and **Ordinance 09 12** describing the Land Use Amendment was prepared, and a Public Notice was issued 26 January 2009. The application was withdrawn prior to final approval. The Public Notice is provided as **Attachment 1** to this ERA.

As part of this application, the City as well as the applicants' consultants evaluated the effects that a Conceptual Development Plan instituting the policies of the Comp Plan and Zoning amendments would have on the adjacent communities as well as the onsite Regulated Natural Resources. At that time, proposed construction on the site would remove **0.882 acres** of very disturbed man-made Surface Water habitat. To evaluate if the proposed plan were permittable and the mitigation for the proposed surface water impacts were acceptable, a Conceptual Environmental Resource Permit Application was submitted to the Suwannee River Water Management District (SRWMD) for approval of the proposed impacts that would occur, and mitigation activities proposed to offset the impacts. **Conceptual ERP08-0278** was issued to Mesa-Sand Realty LLC on 13 January 2009. The Permit expired 13 January 2014, but it did establish that the requested impacts were minimal, and the Mitigation was consistent with the Requirements of ***Chapter 62-345. F.A.C. Uniform Mitigation Assessment Method.*** The Conceptual ERP also provides at least a guideline for all reviewing municipalities with reference to Surface Water Impacts in case there is disagreement among the City, County, and District about what is determined to be acceptable surface water impacts and subsequent acceptable mitigation to offset impacts for this Project. ***Chapter 373.414. Florida Statutes. Additional Criteria for Activities in Surface Waters and Wetlands,*** which is the legislation that mandates the creation of the Uniform Mitigation Assessment Method, establishes in ***Section 414(1)(b)(4)*** that if mitigation for impacts required by a Municipal interest cannot be reconciled with mitigation established by an ERP, then the criteria defined in the ERP takes precedent.

For the current proposed activity, impacts to impaired Surface Waters will occur consistent with those defined in the **ERP08-0278** previously issued and the previous

Comp Plan Amendment proposed by Mesa-Sand Realty. Therefore, the impacts and mitigation proposed to offset those impacts were totally consistent with all State criteria. In addition, within the City Staff report they state that the proposed impacts and mitigation were consistent with the Comprehensive Plan requirements for Wetland and Surface Water protections. The ERP and District Staff report are included as **Attachment 2** to this document. The City of Alachua Staff report submitted 16 December 2008 is provided as **Attachment 3.**

As part of the Comp Plan Amendment submittal in 2008, ERC prepared a comprehensive ERA Report that was submitted to the City and reviewed by City of Alachua staff and staff from the SRWMD. The ERA Report entitled "*Environmental Resource Assessment: Large-Scale Comprehensive Plan Amendment, The Market at Schmidt Farms, City of Alachua, Alachua County Florida (Date: 7 July 2008)* is provided as **Attachment 4.** Also, as part of the submittal documents, a Mitigation Plan document was also prepared and submitted to the City and District. The document is entitled *"Conceptual Environmental Resource Permit Application: Description of the Uniform Mitigation Assessment (UMAM) to Assess Wetland Impacts Associated with the Conceptual Development Plan for the Market at Schmidt Farms, City of Alachua, Florida (Date: 3 August 2008)* and is provided as **Attachment 5**.

On 29 August 2019, JMJ Consulting Engineering LLC representing **DMAI** applied to the City of Alachua for Land Use and Rezoning amendments for the "Planning Parcel." The Project was named "121 Traditional Neighborhood Development" and two (2) actions were requested from the City, as follows:

1. *Large-Scale Comprehensive Plan Amendment (LSCPA)*

   This amendment proposed amending the Future Land Use Designations from Agriculture and Commercial to Moderate Density Residential.

2. *Site-Specific Amendment to the Official Zoning Atlas (Rezoning)*

   The rezoning application proposed rezoning from Agriculture (A) and Commercial Intensive (CI) to Planned Development–Traditional Neighborhood Development (PD-TND)

A copy of the completeness summary issued 5 September 2019 by the City of Alachua for the proposed activity is provided as **Attachment 6.**

On 25 August 2021, JBPro applied to the City of Alachua on behalf of **DMAI** for Land Use and Rezoning amendments for the Planning Parcel. The Project is named "Schmidt Farms Planned Development" and the application requests two (2) actions from the City, as follows:

1. *Large-Scale Comprehensive Plan Amendment (LSCPA)*

   This amendment proposes to change the existing land use from Agriculture and Commercial to Moderate Density Residential, Commercial, Community Commercial and Conservation.

2. *Site-Specific Amendments to the Official Zoning Atlas (Rezoning)*

   This amendment proposes to rezone the site from Agriculture (A) and Commercial Intensive (CI) to Planned Development-Residential (PD-R) and Planned Development-Commercial (PD-COMM).

A copy of the Completeness Summary issued 30 September 2021 is provided as **Attachment 7.**

Environmental Resource Assessment Methodology

Field Survey

Field surveys of the Planning Parcel were performed 4–6 November 2019, 22–23 November 2019, 23 November 2020, and 4 October 2021 to determine the general ecological condition of the area and determine if any listed plant or animal species or other environmental constraints were present within the boundaries of the Planning Parcel or immediately adjacent habitat areas. Surveys were performed by Peter M. Wallace, MS (Certified Gopher Tortoise Agent #GTA-14-00037A), and Robert A. Garren, MS (Certified Gopher Tortoise Agent #GTA-09-00057E), of ERC. Surveys were performed by repeatedly traversing the site with a series of pedestrian transects. Observations regarding plant species composition were recorded at **2,721** locations within the Project Site and adjacent areas. At each location, plant species, plant habitat type, observations of animal occurrences, and GPS position coordinates were recorded with a hand-held Garmin GPSmap 76CSx unit. Photographs were taken to document the general plant communities, land uses, and historical activities within the Project Site as determined during the survey. Photographs that show the general physical appearance of the Project Site are contained within **Appendix A**.

Data Search

To complement the data obtained from the field surveys, published GIS databases were queried to obtain site-specific information for the Project Site and surrounding areas. These databases include:

1. USGS Gainesville West Quadrangle Map
2. Geologic Regions of Florida
3. Physiographic Divisions of Florida
4. Surficial Geologic Formations of Florida
5. Alachua County 2001 LiDAR Topography (NAVD 88)
6. USGS Closed Topographic Depressions Database

7. Natural Resource Conservation Service (NRCS) Soils
8. NRCS Soils Feature Point Database
9. Federal Emergency Management Agency (FEMA)
10. National Wetland Inventory (NWI) Database and Alachua County Composite Wetlands Database
11. Alachua County Aquifer Recharge Areas
12. Floridan Aquifer Drastic Vulnerability Areas within Alachua County
13. Alachua County Sinkholes and Stream-to-Sink GIS Coverage
14. Hydrologic Basins of Alachua County
15. Level IV Ecoregions of Florida
16. Florida Department of Environmental Protection Statewide Florida Land Use, Cover and Forms Classification Systems (FLUCCS)
17. Florida Game Commission Cooperative Florida Land Cover Classification System
18. Alachua County Strategic Ecosystems Overlay
19. Alachua County Conservation Lands and Parks and Recreation Areas
20. Alachua County Historical Structures Database
21. Alachua County Hazardous Materials Monitoring Database
22. Alachua County Well/Wellfield Protection Areas
23. Florida Fish and Wildlife Conservation Commission (FWC) Eagle Nest Locator
24. FWC Water Bird and Wading Bird Rookery and Nest Sites Locator
25. United States Fish & Wildlife Service (FWS) Federally Listed Species Database
26. FWS Wood Stork Regulated Buffers Database
27. FWS Red-cockaded Woodpecker Consultation Area and Observation Locations Database
28. FWS Scrub-Jay Consultation Area, Habitat, and Observation Locations Database
29. FWC 2016 Florida Black Bear Forage Range and Habitat Database and Bear Nuisance Report records
30. Florida Natural Areas Inventory (FNAI) Element Occurrence Database
31. Alachua County Champion Trees
32. State of Florida Biodiversity Hot-Spots

The field assessment and data review assessment performed for the Planning Parcel addresses the specific requirements of the Alachua County and City of Gainesville Comprehensive Plan and Unified Land Development Regulations and Alachua County's ***Article II Countywide Wetlands Protection Code*** defined within ***Chapter 77 Water Quality Standards and Management Practices*** of the Alachua County Land Development Code. In addition, the assessment addressed the Environmental Resource Protection requirements outlined within the City of Alachua ***Conservation and Open***

Space Element Specifically ***Objective 1.10: Wetlands*** and ***Objective 1.12: Water Resources.*** As part of this survey, the entire limits of the Planning Parcel were evaluated. For the ERA described, the total Project Area as described on Figure 2 represents the entire holdings proposed for evaluation by the Applicant. Therefore, the Planning Parcel represents the Resource Assessment Area (RAA).

In addition to the GIS databases evaluated above, several site-specific Professional Land Surveys and Geotechnical Investigations were performed in support of future development activities proposed for the Planning Parcel. These technical reports were reviewed by ERC for evaluation of Regulated Natural Resources that are described by each investigation. The references for these reports are as follows:

1. A Boundary Survey of the Schmidt Farms Property dated 27 March 2018, Prepared by Lochrane Engineering, Inc., 3008 NW 13th Street, Suite B, Gainesville, Florida 32609.
2. Summary Report of a Geotechnical Site Exploration: Proposed 121-Acre TND Stormwater, City of Alachua, Alachua County, Florida. GSE Project No. 13967, Certificate of Authorization No. 27430, May 2019.

Results of Data Review

Published Geographic, Hydrologic, Ecological, and Historical Data Review

USGS Gainesville West Quadrangle Map–Site Topography and Site-Specific Drainage

The Planning Parcel lies within the geographic area defined by the USGS Gainesville West Quadrangle map (**Figure 3**). The Planning Parcel lies along the north boundary of the Arredondo Grant within Fractional Sections 2 and 3, Township 9 South, and Range 19 East and within Sections 34 and 35, Township 8 South, Range 19 East. As shown on the Quad Map the Planning Parcel is a rural residential farm site located in a relatively sparsely populated area along US 441 southeast of Hague.

The site is located within the Turkey Creek Drainage Basin. There are three (3) flowing water creeks that lie within or form the perimeter of the Planning Parcel **(Figure 4).** Turkey Creek forms the south and southwest perimeter of the Site. An un-named tributary to Turkey Creek that originates on the GRU-Deerhaven Property located north of the Site across US 441 forms the northwest boundary of the Planning Parcel. This creek also forms a partial boundary of the Brooke Pointe Subdivision; therefore, for the purposes of this assessment, this creek is referred to as Brooke Pointe Creek. There are several headwater areas of Turkey Creek that originate on the City of Gainesville Deerhaven property that flow into Brooke Pointe Creek. From the Deerhaven site, the

main branch of Turkey Creek originates east of the Planning Parcel, is culverted under US 441, then traverses west under NW 43rd Street via two large circular culverts (see **Photo 1** in Attachment 4) that route water along the southern boundary of the Schmidt Farms property. Turkey Creek forms the south and southwest boundary of the property and extends from NW 43rd Street northwest to the intersection of Brooke Pointe Creek that runs southwest along the east boundary of the Brooke Pointe Development. This creek drainage originates in multiple large wetland areas north of US 441 on the City of Gainesville Deerhaven property, crosses under NW 102nd Place (**Photo 2** in Attachment 4), then runs southwest to the confluence with Turkey Creek at the southwest corner of the Schmidt Farms property. A third creek located within the Planning Parcel boundaries also drains water from the City of Gainesville Deerhaven property through a culvert located under US 441 just west of the terminus of NW 43rd Street (**Photo 3** in Attachment 4) at US 441. For the purposes of this report, this creek is referred to as Schmidt Creek. The creek extends through a Mixed Hardwood Swamp (**Photo 4** in Attachment 4) that also receives substantial subsurface seepage from the adjacent uplands. The Mixed Hardwood Swamp narrows abruptly where a small agricultural road crossing occurs (**Photos 5** and **6**, Attachment 4), which was built prior to 1937. This road is proposed for widening to allow development to take place on the property and access lands east of Schmidt Creek. From this point, the creek width becomes substantially narrower (**Photo 7**, Attachment 4) and slopes to the adjacent upland are abrupt. The drainage ultimately flows into Turkey Creek at the southwestern corner of Parcel 05936-001-001 (Figure 2).

A unique mosaic of intermittent seepage and depression Surface Waters and Wetlands forms a diffuse drainage system in the western third of the Project Site. This system is described as an Isolated Seepage/Drainage as shown on Figure 4. This drainage system has the same general northeast to southwest orientation as both Schmidt Creek and Brooke Pointe Creek. Groundwater seeps to the surface at the north end of this system and flows southwest through a small, intermittent, and partially excavated stream drainage (**Photo 8**, Attachment 4) to a series of small depressional Surface Waters that are probably relic sinkholes where water flows back into the ground. Based on **Rule 62-340 FAC. Delineation of the Landward Extent of Wetlands and Surface Waters,** in 2008 some of the depressions within this system were determined to be Uplands while others were determined to be Wetlands or intermittent Surface Waters. The Wetlands are in the north extent of the system, which have dense clay soils and where muck accumulates. The Surface Water areas are in the south half of the system closer to Turkey Creek. In this area the depressions are relic sand-filled depressions that flood intermittently during periods of extreme rainfall. During periods of excessive rainfall causing floods, this system may provide Surface Water discharge directly to Turkey Creek. In 2007–2008 all these areas were extremely dry, and vegetation consisted of pasture grasses, pasture herbs, shrubs, and briers. Extensive flooding in the area occurred following Hurricane Irma in 2017, which caused Surface Waters to flood several feet above the ground surface. Extensive rains in 2021 have resulted in more recent

intermittent flooding of the southern depressions. Following these extensive rainfall periods, these areas dry down quickly and substantially.

There is a small, excavated drainage ditch that routes water to Turkey Creek from an excavated agricultural pond located west of the Schmidt residence (Figure 4). The pond area has been variously disturbed and excavated since 1937 however a final major excavation occurred circa 1979. The drainage ditch is excavated for most of the distance extending from the pond to Turkey Creek. The general appearance of this drainage is shown in **Photo 9** (Attachment 4). All Wetland and Surface Water areas on the Planning Parcel have historically received substantial direct impacts from cattle use. Cattle grazing has resulted in removal of native vegetation, intense invasion by exotic species, and disturbance of the ground surface to a point that no naturally occurring native vegetation groundcover currently exists. All Surface Waters within depressions as well as the creeks have historically and are presently contaminated with cattle wastes such that waters are eutrophic and filled with algae and floating aquatic plants characteristic of contaminated waters.

The USGS Quad Map (Figure 3) shows the Planning Parcel lies in a prominent Geographic Valley ranging in elevation from 174 ft (NGVD 29) at the northeast boundary of the site adjacent to US 441 to approximately 142 ft at the southwest corner of the Site at the confluence of Turkey Creek and Brooke Pointe Creek. The “Creek Valley” lies between two very prominent, large, elevated landscape ridges or plateaus that are broad and generally flat and extend to elevations of 190 ft to the north and 195 ft to the south. These are among some of the higher elevations in the County and create several large headwater creek systems associated with Turkey Creek, Cellon Creek, Rocky Creek, and Blues Creek. The slope on the south side of Turkey Creek is much dryer and steeper than the creek slope that extends north from the creek onto the Planning Parcel. The ridge tops are associated with the Hawthorn Formation, which would extend from 150 ft in elevation and above, while the Cody Escarpment, which is evident on the topo, extends from 150 ft and below.

The Cody Escarpment is the western erosional face of the Hawthorn Formation that extends from 150 ft downslope to below 100 ft and represents the boundary of the Wicomico Terrace or shoreline that existed in Florida from 1.8 million years ago to 11,800 years ago. The Turkey Creek Valley and neighboring prominent ridge tops are more easily observed on the 2001 Alachua County LiDAR Topography provided on **Figure 5.** On this coverage the lower elevation areas at the confluence of Brooke Pointe Creek and Turkey Creek are easily seen as well as the 32-ft elevation range that occurs within the boundaries of the Planning Parcel. The LiDAR topo datum is represented by NAVD 88 as compared to the NGVD 29 vertical datum shown on the USGS coverage.

To supplement the data provided on the USGS quad map, the USGS Closed Depression Database is provided on **Figure 6.** This database shows the general location of closed-contour drainage depressions in and around the Project Site based on the USGS

topographic data. The closed depressions on this map are generally represented by small, isolated Wetland drainages; however, most Wetlands in this area are associated with the numerous headwater creek systems that typically flow downhill to lower elevations within well-defined channels. The occurrence of closed depressions within the landscape increases substantially westward of the Planning Parcl represented by the eroded areas of the Hawthorn Formation and development of relic and active sinkholes or landscape depressions. In this area underlying clay may be continuous, which results in persistent Surface Waters, or clays may be perforated, which results in direct recharge to the underlying Ocala Limestone.

Surface Water and Groundwater Drainage Basins and Potentiometric Groundwater Contours

The Planning Parcel shown in relation to the delineated drainage basins within Alachua County is shown on **Figure 7**. The Planning Parcel lies within the Sanchez Prairie Drainage Basin, which includes the Turkey Creek and Blues Creek systems. Both these creeks disappear into a large sinkhole within Sanchez Prairie. There are many sub-basins of Turkey Creek that flow into Brooke Pointe Creek, Schmidt Creek, and Turkey Creek on the Planning Parcel. A large amount of this drainage comes into the creeks from North of US 441. Based on previous work performed by ERC in the drainage basins within and surrounding the Project Site, a basin map was constructed for the GRU property and is provided for review with respect to this Project Site **(Figure 8)**. As shown on Figure 8, there are more than 20 sub-basins north of US 441 that contribute flow to the creeks on the Planning Parcel. Sub-basin **TC-4D** is the sub-basin that directly discharges to Brooke Pointe Creek. Sub-basin **TC-3** discharges to Schmidt Creek. Multiple sub-basins discharge into Turkey Creek prior to its entrance to the Site at NW 43rd Street. Sub-basins **TC-1** and **TC-2** discharge into Turkey Creek under US 441 from the GRU property east of the Site. Farther east, sub-basins **TC-1A**, **TC-8**, **TC-8A**, and **TC-9** through **14** direct waters to Turkey Creek west from the drainage divide adjacent to the Rocky Creek Drainage Basin. This is a substantial drainage basin that provides water to the Planning Parcel, and compared to the onsite drainage area, represents substantially more flow that would affect adjacent neighborhoods than would be expected as run-off from the Project Site.

The potentiometric contours of the surface of the Floridan aquifer as determined in a 2010 hydrologic study are shown as schematic on **Figure 9** and on a 2017 aerial photograph on **Figure 10**. This study shows the elevations of the Floridan in the vicinity of the site to be at approximately the 40-ft contour interval, or 102 ft below the lowest contour of 142 ft found on the Planning Parcel. A hydrologic study conducted in 1980 showed the Floridan aquifer surface at 45 ft (**Figure 11**) in the area of the Planning Parcel. Both contour maps show a substantial depression in the aquifer level of below 40 ft that occurs at the Murphree Wellfield east of the site. The Tertiary Wellfield Protective Buffer shown on **Figure 12** is at least **4.0** miles east of the Planning Parcel. The groundwater contours shown on the springshed map on **Figure 13** show the Planning

Parcel is located within the Hornsby-Treehouse Springshed near the boundary of the Wellfield Capture Zone. On this figure, the Planning Parcel is shown in relation to the County Springshed and Wellfield Protective Zone and Recapture Area. The contours, at least suggest, that Floridan flows in the vicinity of the Planning Parcel may flow to the east to the Capture Zone or northwest into the Hornsby-Treehouse Springshed (Figure 13). Please note that these data are not provided to suggest any avenue of unconfined aquifer flows but are provided to summarize the general data available in the County. The small commercial wells that are monitored in the County are shown on **Figure 14**. There are several wells located northwest of the Planning Parcel along US 441 that have associated protective buffers.

Geographic Setting of the Planning Parcel

Geologically, the eastern quarter of Alachua County is covered with variable surface deposits of undifferentiated Pleistocene sediments that reflect the geologic time-period and ancient sea level terraces (**Figure 15**) when they were deposited. In the vicinity of the Planning Parcel, the Coosahatchee Formation typically occurs at elevations extending higher than 100 ft and overlies the Hawthorn Formation. This layer is of Miocene origin and consists of unconsolidated clayey and phosphatic sands. The underlying Hawthorn Formation is composed of dense variously layered silts and clays. The western boundary of the Coosahatchee Formation (Figure15) more or less corresponds to the western base of slope of the Cody Scarp. The Cody Scarp is the most prominent geological erosional feature in Florida. The Scarp corresponds to the westward facing erosional slope of the Hawthorn Formation that was eroded during the sea level rise of the Wicomico Shoreline that existed from 1.8 million years ago to 11,800 years ago.

On Figure15, the surficial geology of the area of Alachua County occurring west of the Planning Parcel is shown as Ocala Limestone. In these geological areas, the Crystal River Formation of the Ocala Limestone Group of Eocene origin is overlain by a thin veneer of undifferentiated Pliocene and Pleistocene sandy sediments. In Alachua County, this geologic area typically extends westward from elevations of ±100 ft to elevations of 60 ft or below. The overburden covering the limestone layer typically extends from elevations of 50 ft to the surface, is highly variable and can consist of coarse sands as well as having discontinuous layers of dense clays that are remnants of the eroded Hawthorn Formation or can be clastic clays from the Pleistocene Period. In many areas, dense clay and limerock pinnacles extend upward from the limerock base of 50 ft to the surface. These dense clays are remnants of the Hawthorn Formation that historically extended westward across the entire County prior to the Pleistocene Sea level rise. The elevation of the Planning Parcel of 142–175 ft (Figures 3 and 5) indicates that the Site occurs within the upper boundary of the Cody Scarp.

Geologically and topographically, Florida is divided into several physiographic subdivisions to delineate the natural ecological surface features that occur in response to the underlying geology. Alachua County is divided into several well-defined

Physiographic Sections, Districts, and Subdivisions (based on H. K. Brooks, 1981[1]) as shown on **Figures 16** and **17**. In this coverage, the Planning Parcel lies along the boundary of the San Felasco Hammock Subdivision, which is the westward facing erosional boundary of the Cody Scarp and the Northern Highlands Plateau. The San Felasco Hammock Subdivision typically extends from elevations ranging from 100 ft to an estimated 150 ft. The Northern Highlands Plateau occurs at elevations exceeding 150 ft. The Project Site as shown on Figure 17 lies along the boundary of the Sea Island District and the Ocala Uplift District. The Sea Island District extends through North Florida into coastal Georgia and South Carolina. The Ocala Uplift District extends west and southwest to the Gulf of Mexico. Historically the Area of the Planning Parcel lies along a very historically active geologic interface.

Historically, Williams et al. (1977) divided Alachua County into physiographic zones or provinces to define geologic development (**Figure 18**). Within this classification, the western boundary of the Northern Highlands is defined as the Northern Highlands Marginal Zone. The zone represents the western facing slope of the Cody Scarp. Within this coverage, the Planning Parcel is located on the Cody Scarp on the boundary of the Marginal Zone and Northern Highlands. Brooks (1981) somewhat redefined the boundaries of those presented by Williams et al. (1977) and appears to have moved the base of the Cody Scarp farther to the north. The onsite elevation of 142–174 ft and presence of streams in the area indicates that the Hawthorn Formation exists within the Planning Parcel. West of the site is designated as the Western Valley Province (Figure18), which corresponds to the Haile Limestone Plain Subdivision (Figure 16). The existing vegetation on the site is typically dominated by species associations that inhabit dense clay soils characteristic of the Marginal Zone slopes and **NOT** vegetation characteristic of deeper sands of the Western Valley Formation.

The elevation profiles that represent west to east cross-sections through the County as provided by Williams et al. (1977)[2] are shown on **Figure 19**. These show the significant elevation changes that occur along the Cody Scarp represented by the Northern Highlands Marginal Zone that separates the Northern Highlands to the east and the Western Valley lying to the west. The Cross County Fracture Zone located within the Marginal Zone travels northwest to southeast through the entire County (**Figure 20)**. The Planning Parcel lies along the eastern boundary of the fracture zone. In this area, large stream-to-sink systems occur, which are further defined on **Figure 21.** These stream-to-sink systems include Turkey Creek, Blues Creek, Cellon Creek, and Mill Creek, all of which occur in the area of the Planning Parcel. There are small depressions on the Planning Parcel specifically within the western Isolated Seepage/Drainage System defined on Figure 4 that function as small surficial stream-to-sink areas but is not comparable in size to the systems mentioned above, which all flow into the ground

[1] Brooks, H. K. 1981. *Physiographic subdivisions of Florida.* Map. IFAS, University of Florida.
[2] Williams, Kenneth E., David Nicol, and Anthony F. Randazzo. 1977. *Report of Investigation No. 85, The Geology of the Western Part of Alachua County, Florida.* Bureau of Geology. Florida Department of Natural Resources, Tallahassee.

farther west of the Project Site. The onsite system is most likely a series of shallow sinks that route surface and subsurface flows into the ground then toward Turkey Creek along the top of the dense subsurface clays. These areas probably do not route water into limestone of the Floridan aquifer. The headwater areas of the major stream-to-sink systems originate within the Northern Highlands and flow west into the fracture zone represented by the Northern Highlands Marginal Zone and the Cody Scarp then into the large sinkhole areas. No streams in Alachua County flow across the fracture zone and into the Western Valley; they disappear into the ground first.

High Aquifer Recharge Areas

The Planning Parcel shown in relation to the confinement and recharge areas of the Floridan aquifer is provided on **Figure 22**. A shown, the Planning Parcel occurs along the boundary of the confined and perforated zones. Within the confined zone, varying layers of clayey surface sands and dense subsurface Hawthorn clays overlay the Floridan and surficial aquifers. For sites underlain by these dense clays, downward percolation of Surface Waters to underlying aquifer layers is retarded or prevented. Typically, waters falling on the surface in these areas flow downhill to wetlands or flowing Surface Waters and are transported down hill to larger bodies of water before vertical movement in subsurface aquifer systems occurs. In this situation, the Floridan aquifer is generally protected from direct inflows of contaminated Surface Waters. Within the Perforated Zone, subsurface clays are discontinuous with large depressions often filled with permeable sand or intermittent layers of clay. In this situation typically recharge of the aquifer can occur but downward percolation rates are often slow.

The general area of the Project Site is shown to be in a High Aquifer Recharge Area of greater than 12 inches per year (Figure 22). However, these results are somewhat misleading in that the entire Planning Parcel and surrounding area has substantial coverage of surficial clays, and in these areas, water tends to run off and not percolate. The presence of dense subsurface clay suggests that rainwaters falling on a site enter the ground and travel laterally across the top of the underlying subsurface clays to down hill low lying, depressional, or excavated drainage systems and do not generally result in vertical flow to the Floridan in the immediate area of the Planning Parcel.

Within the unconfined area of the Floridan aquifer where Pleio–Pleistocene sands overlay the Ocala Limestone group, Hawthorn erosional clays are present, but clay coverage is discontinuous allowing some flows through sand to occur directly to the aquifer. Within the perforated zone shown on Figure 22, the clay layers associated within the dense Hawthorn clay formation are perforated and layered; however, pinnacles of limerock and clay can reach the surface. In those areas, sinkholes quite often form, and surface water steadily flows directly to the Floridan aquifer. The perforated zone that is, in part, associated with the western sloping face of the Hawthorn Formation (Cody Scarp) gives rise to several large stream-to-sink systems such as the Santa Fe River, Hogtown Creek, Mill Creek, and Turkey Creek, which receives drainage from the Project Site. Due to the general absence of continuous clay within the unconfined area (Western Valley Region),

characteristic streams do not form but sinkholes are numerous. In these areas, drastic vulnerability to detrimental surface inflows or runoff, precipitation, and other direct inflows to the underlying aquifers occur.

On the Project Site, the Site-Specific Geotech investigation showed that in areas where borings were performed that dense clays were present throughout the boring profile and these clays generally began within 2 ft of the ground surface. The close-up view of the Aquifer Zones for the Project Site is shown on **Figure 23** with the delineated onsite Wetlands and Surface Waters overlain on the aquifer protection zone coverage. This coverage generally shows that the perforated zone occupies the lower one-third of the site extending from the confluence of Schmidt Creek to along Turkey Creek to Brooke Pointe Creek (see Figure 4). In the central to west-central area of the Site there are two isolated seepage areas shown as Seepage Areas 1 and 2 (Figure 4). The schematic of the perforated zone boundary shown on Figure 23 more or less encompasses the bottom third of Seepage Area 1 and most of Seepage Area 2. Both Seepage Areas flow only during extreme rain events, but they flow north (wet) to south (dry) (Area 1) and east (wet) to west (dry) (Area 2). Water flows into the ground in the south end of Area 1 and in the west end of Area 2. Where water disappears into the ground, the habitat is much dryer than the upstream habitats. Flow in both systems originates on the designated confined layer and terminates into the ground within the designated perforated area. How accurate these graphical representations are can certainly be questioned; however, the graphic does correlate well with the hydrologic condition that has been observed on the ground.

The drastic vulnerability areas of the surficial and Floridan aquifers are shown on **Figure 24**. The Project Site is shown along the boundary where thick clastic marine sediments occur at the surface east of the site while the areas west of the site have Karst Limestone at or near the surface. A close-up view is provided as **Figure 25**, which shows a unique situation in the Site where limerock occurs near the surface within the Surficial Aquifer system. The Geotech borings did not reveal any rock present within the depth of the borings but limerock could be present and exposed within Turkey Creek, Brooke Pointe Creek, and Schmidt Creek. What is apparent on this site is that rainwaters that fall on the site generally run across the land surface to the creeks or filter into the ground and create shallow subsurface flows into the seepage depressions. Within the seepage areas there are very shallow relic sinks (as previously described) that have either dense clay at the surface or are sand filled with varying depths of surface sands. In the clay-filled depressions, water is retained at the surface for extended periods, but percolation does occur. In the sandy depressions, water percolates into the ground rapidly. In both depression types it is unlikely that Surface Waters flow into the Floridan in the vicinity of the Project Site. It is more likely that where waters flow into the ground, lateral subsurface flows occur along the top of the densest clays until water is directed to one of the perimeter Creeks. From the creeks, water flows to Sanchez Prairie where Floridan aquifer recharge occurs. A generalized schematic showing the general recharge conditions within the unconfined, perforated, and confined areas of the County and on the Project Site are shown on **Figure 26**. The locations of large known sinkholes and stream-

to-sink systems in the region are shown on Figure 21, but this coverage does **NOT** by any means include all the features in the area.

NRCS Soils Mapping

There are seven (7) soil mapping units shown to occur on the Project site (**Figure 27; Table 1**). The Pomona sand (14), Pelham sand (13), and Mulat sand (23) are typical soils of the flatwoods with Pomona sand having a spodic horizon occurring between 16 inches and 24 inches below the soil surface. The Floridana sand (22) is a depressional mapping unit while Kanapaha (7) and Millhopper (8) sands are soils of gently rolling uplands that are typically colonized by a host of mesic to xeric hardwood species. All soils have a clay confining layer occurring within the top 58 inches of the soil profile. All soils in the undrained condition have an expected seasonal high-water table that is within 24 inches of the soil surface if only for a brief period. The Millhopper sand is the only moderately well-drained soil while the Floridana sand, depressional, is classified as very poorly drained. The remaining mapping units are considered as poorly drained. The Floridana sand, depressional, is the only mapped unit considered to be a hydric soil.

Table 1. Drainage Characteristics of the Soils Mapped Within and Adjacent to the Project Site

Map Unit	Mapping Unit Name	Drainage Class	Hydric	Spodic Horizon	Clay Horizon	General Plant Community Type
7	Kanapaha sand, 0 to 5 percent slopes	Poorly drained	No	—	44–80"	Gentle Upland Slopes
8	Millhopper sand, 0 to 5 percent slopes	Moderately well drained	No	—	58–89"	Gently Rolling Uplands
13	Pelham sand	Poorly drained	No	—-	29– 80"	Broad Flatwoods
14	Pomona sand	Poorly drained	No	16–24"	43–84"	Broad Flatwoods
22	Floridana sand, depressional	Very poorly drained	Yes	—	30–74"	Depressional Areas
23	Mulat sand	Poorly drained	No	—	26–80"	Broad Flatwoods
99	Water	N/A	Unranked	—	—	N/A

The NRCS Feature Point Database is provided on **Figure 28**. The mapped coverage shows the location of many designated wet areas in the figure view as well as numerous sinkholes west and south of the Planning Parcel oriented in a northwest to southeast direction.

FEMA Coverage

The FEMA coverage (dated: October 2020) for the Planning Parcel and surrounding area is shown on **Figure 29.** The mapped coverage shows that the locally occurring FEMA areas designated as Zones “A” and “AE” overlay the areas of the onsite creek drainages. The present FEMA floodplain map is substantially reduced in coverage area of the site as compared to the 2004 FEMA database that was provided within the 2008 ERA (Attachment 4, Figure 11).

National Wetlands Inventory (NWI) and Alachua County Composite Wetlands Database

The NWI and Alachua County Composite Wetlands Database coverages are provided on **Figure 30**. Both coverages shown currently underestimate the existing extent of the onsite depressions and drainages on the Planning Parcel. All creeks are shown generally in the incorrect location by a dimensionless line instead of a polygon. The excavated agricultural pond and Schmidt Creek wetland are shown but offset from the correct location. The Alachua County coverage, which includes mapped hydric soil mapping units, shows more wetland acreage onsite; however, it overestimates the AG excavated pond coverage. Neither database identifies the small, isolated surface water depressions that occur and neither identifies the isolated seepage depressions designated as Areas 1 and 2 (Figure 4).

Ecological Setting of the Project Area Based on Published GIS Data

The Level IV Ecoregion mapping designations for Alachua County are provided on **Figure 31**. Within this coverage, the two (2) dominant general plant community associations in Alachua County are defined as Central Florida Ridges and Uplands (75c) and Eastern Florida Flatwoods (75d). The Central Florida Ridges and Uplands community is located east of the Brooksville Ridge (Figure17) and extends east to the Cody Scarp. This ecological community has also been described as Upland Hardwood Hammocks (Community #11) as defined within the *26 Ecological Communities of Florida* (Soil Conservation Service). These communities are typically dominated by evergreen and deciduous hardwood species such as sand live oak (*Quercus geminata* Small), southern magnolia (*Magnolia grandiflora* L.), black cherry (*Prunus serotina* var. *serotina* Ehrh.), pignut hickory (*Carya glabra* [Mill.] Sweet), sweetgum (*Liquidambar styraciflua* L.), and others.

The Planning Parcel is within the Eastern Florida Flatwoods Community (75D) and extends east of the Project Site. This community is also designated as Community #7– North Florida Flatwoods within the *26 Ecological Communities of Florida* (Soil Conservation Service). Typically, these areas are characterized by a generally flat landscape covered with a dense groundcover of saw palmetto (*Serenoa repens* [Bartr.] Small) and gallberry (*Ilex glabra* [L.] A. Gray) under a canopy of longleaf pine (*Pinus palustris* Mill.) or slash pine (*Pinus elliottii* Engelm.). This community type includes a mosaic of shallow cypress depressions and sloughs with acidic tannic water. The Planning Parcel lies along the boundary of two general community types and was historically dominated by “Mesic Hammock” vegetation occurring along the slopes of the three (3) creek systems, which is characteristic of the Cody Scarp and is not similar to the “Flatwoods” vegetation that historically extended away from the Creek margins across the broader slopes of the Site.

Florida Land Use, Cover and Forms Classification System (FLUCCS) and FWC Cooperative Land Cover Classification

The FLUCCS classification provided by the Florida Department of Environmental Protection (DEP) for the Planning Parcel and surrounding areas is provided as **Figure 32**, and the FNAI/FWC Cooperative Land Cover Map is provided on **Figure 33**. Both coverages divided the site into approximately the same general polygon coverages and habitat types. The polygon boundaries more or less correspond to the transition between pasture and forest or shrub habitats. The two coverages are defined differently, but the areas mapped are similar. The polygons are described in **Table 2**.

Table 2. Florida Land Use, Cover and Forms Classification System and FWC Cooperative Land Cover Classification Designations for the Project Site and Surrounding Area

FLUCCS	Category	FWC	Category
1100	Residential Low Density	**1110**	Upland Hardwood Forest
2100	Cropland and Pastureland	**1400**	Mixed Hardwood-Coniferous
3200	Shrubs and Brushland	**1830**	Rural
4200	Upland Hardwood Forests	**183313**	Improved Pasture
6100	Wetland Hardwood Forests	**2200**	Freshwater Forested Wetlands
—	——	**3200**	Cultural-Lacustrine

The coverages provided on Figures 32 and 33 and summarized in Table 2 represent plant communities delineated from aerial photography without ground verification. Both coverages in general reflect the Agricultural characteristics that occur on site.

Strategic Ecosystem Overlay Coverage

The Alachua County Strategic Ecosystem Overlay coverage for the Planning Parcel and surrounding area is provided as **Figure 34**. This coverage is based on the coverages provided by KBN/Golder (1996)[3]. The coverage shows that the Planning Parcel is not encumbered by a Strategic Ecosystem; however, several overlays surround the Site. The Hague Flatwoods Strategic Ecosystem is located north of the Site across US 441. The East San Felasco Hammock Strategic Ecosystem lies west of the Site and the Millhopper Flatwoods Strategi Ecosystem lies south of the Site.

The plant communities mapped by KBN/Golder (1987) that occur in the Strategic Ecosystems adjacent to the Project Site are shown on **Figure 35**. The KBN/Golder (1987) coverage defines the plant communities within the Hague Flatwoods and the eastern area of the Millhopper Flatwoods Strategic Ecosystems as Pine Flatwoods with Wetlands dispersed throughout the Flatwoods. These communities typically occupy the Physiographic Subdivision defined as the Northern Highlands (Figure 18) as previously

[3] KBN, A Golder Associates Company. 1996. Alachua County Ecological Inventory Project. Prepared for Alachua County Department of Growth Management, City of Planning and Development, Gainesville, FL.

discussed. The East San Felasco Strategic Ecosystem is shown as having primarily Mesic Deciduous Hardwood Uplands, which is the characteristic communities found on the Cody Scarp within the Northern Highlands Marginal Zone as shown on Figure 18. The Project Site historically was covered with Pine Flatwoods in the northern half of the site that transitioned to Mesic Uplands that occurred along the slopes to the Creeks. This is characteristic of sites that occur along the transitional boundary of the Cody Scarp and Northern Highlands Plateau. Unfortunately, the Planning Parcel has been extensively managed for cattle since prior to 1937 and there are currently **NO** habitats on site that would be defined as native, naturally occurring plant associations. The onsite habitats do not have groundcover, shrub, subcanopy, or canopy components indicative of the native type habitats. All habitats are significantly altered and successional Pine and Oak habitats. Similarly, all wetland habits have been significantly altered by cattle and logging and do not have the species composition that would be expected in native undisturbed forested Wetlands.

Alachua County Conservation Lands and City of Gainesville Parks and Conservation Lands

The Alachua County Conservation Areas that occur in the vicinity of the Project Site are shown on **Figure 36**. The coverage provided indicates **NO** County-owned Conservation Areas occur in the vicinity or directly adjacent to the Planning Parcel. The Alachua County Parks and Recreation Areas coverage is provided on **Figure 3**7. Based on the data, there are **NO** public recreation lands adjacent to the Planning Parcel.

Alachua County Historic Structures Database

The Historic Listed Houses and Structures that occur within the vicinity of the Planning Parcel are shown on **Figure 38.** The database shows that there are two (2) structures in the north corner of the Planning Parcel. These structures are designated as **AL04360** and **AL04361**. Structure AL04360 is described as a rectangular wood frame cottage referred to as Angel Gardens. The structure is described as "one of the few neoclassical cottages found in unincorporated Alachua County" and was constructed circa 1915. Structure AL04361 is described as a Folk-Victorian, wood frame, frame-vernacular cottage that was constructed circa 1930. From the database it does not appear either building is registered in a State or Federal Registry.

Alachua County Hazardous Materials Storage Facilities

The Hazardous Materials Storage Facilities currently monitored by Alachua County are shown on **Figure 39**. The coverage shows there are **NO** monitored facilities within this Planning Parcel. There are many monitored facilities associated with commercial businesses located US 441 northwest and southeast of the site. There is, however, an abandoned cattle dipping vat that is partially buried in the pasture located southwest of the historic structures locations (see Photos 11–15 and Figure A-1, Appendix A). There was a large barn in this area and cattle management facilities from prior to 1937 to circa 1974. Between 1915 and 1965 "cattle dipping vats" were used to dip cows in an arsenic solution to prevent a tick-borne disease called "southern cattle fever." Descriptions of

uses and remediation for “Cattle Dipping Vats” copied from the FDEP website are included, as follows (provided as written with format and grammar errors):

History of Cattle Dipping
Between the years of about 1915 to 1960, cattle dipping vats (CDVs) were constructed and used across the state of Florida as part of state and federal government initiatives to address the widespread occurrence of Cattle Tick Fever, an infectious disease caused by microbes that were spread by the cattle fever tick. This basic treatment program was carried out within most of the southern United States, Florida included, until the cattle fever tick was eradicated. The last infestation of cattle fever ticks in Florida was reported in the year 1960 on cattle from Palm Beach County. In 1961, the eradication program in Florida reached a successful conclusion.

How Did the Process Work?
In order to eradicate cattle fever ticks within areas where Cattle Tick Fever was prevalent, herds of cattle were subjected to periodic dipping in vats filled with water-based solutions containing arsenic or other pesticides at concentrations sufficient to destroy the ticks but not injure the cattle. Typical CDVs were elongate trenches between 4 to 6 feet in depth and having a drop-off entry on one end with a ramp at the exit end so that, once immersed or “dipped,” cattle could then easily walk out of the CDV. There was typically a drip pad and pen area for staging of the cattle where they were kept until their hides no longer dripped any solution.

Environmental Impacts of Cattle Dipping Vats
The environmental concern today is in regard to the residuals of treatment products used in the CDVs. When no longer needed, many CDVs were simply left in place, or at most were filled in with dirt and dried vat sludge that may have contained highly concentrated pesticides which can persist in the environment. At the conclusion of the cattle fever tick eradication program, there was no requirement to restore CDV sites to pre-construction condition, and so today former CDV sites may have environmental conditions that are not compatible with certain land uses. The most common pesticide associated with CDVs is arsenic, although DDT and toxaphene were also sometimes used. Any contaminated soil tends to be close to the vat, and groundwater plumes, if any, are typically not extensive but it is not possible to know the full extent of contamination without a field investigation.

Regulations for Cleanup in the State of Florida
There is no requirement in the state of Florida for a private landowner having a CDV on their property to take corrective action to address possible environmental impacts. However, a landowner can voluntarily take corrective actions (Section 376.306, F.S.) to address any potential environmental impacts. The department is available to provide guidance on properly assessing a CDV and on strategies for cleaning it up. If the landowner desires a Site Rehabilitation Completion Order from the department for such cleanup action, then the corrective action must be

conducted in accordance with the applicable requirements found in Chapter 62-780, Florida Administrative Code.

The current condition and location of the cattle vats is provided in the Photographic Atlas of the 2008 ERA report and are shown in the Photographic Atlas in Appendix 1 (see photo station location map [Figure A-1] and Photos 11–15).

Published Listed Species Occurrence Data and On-site Species Observations

Federal Review Pursuant to Section 7 of the Clean Water Act (CWA) U.S. and Department of Housing and Urban Development (HUD) Review

The proposed future development of the Schmidt Planning Parcel will involve very minor impacts to altered and constructed (man-made) degraded Surface Water Habitats. If Federal Wetland review of this site were required pursuant to **Section 404 of the Clean Water Act (CWA),** then review by the U.S. Army Corp of Engineers (ACOE) of the impacts would be required and the ACOE would request consultation with the U.S. Fish and Wildlife Service (FWS) through **Section 7 of the Endangered Species Act (ESA)** to address possible effects on Federally Listed Wildlife species. Turkey Creek is not a navigable water therefore is not considered as **Waters of the United States (WOTUS)** thus the ACOE has **NO** regulatory jurisdiction over Wetlands or Surface Waters on this Site.

All Wetland and Surface Water impacts proposed would be reviewed by the SRWMD and through the **Environmental Resource Permit (ERP)** process. Review by the Florida Game Commission (FWC) and subsequently by the FWS may occur if the development would *likely adversely affect* Listed Species that use the site. These reviews are conducted during the development review process and not during Land Use or Rezoning activities. However, during non-development application procedures, the Planning Parcel is required to be reviewed with respect to the potential effects that the future development would potentially have on Federal or State Listed Plant and Animal Species that occur or potentially occur within the boundaries of the Planning Parcel or adjacent offsite habitats.

The following report format specifically addresses Endangered Species review of the Planning Parcel and adjacent areas that would be specifically required by HUD for application requiring federal assistance for low-income housing, etc. This Project has no planned low-income housing provisions, but the HUD review procedure provide a template for Listed Species review of Projects of this size and ecological location. This Project may require alterations to the FEMA floodplain and subsequent map revisions. The Listed Species review required by HUD is also the same procedure required by FEMA for Map Revisions; therefore, the procedure provided below has multiple applications for Federal and State development applications. No City in Alachua County or the County itself has a specific procedure outlined for review of Listed Species Impacts. The procedure followed here, and the summary information provided, has been

used by ERC for successful permitting review of many Projects within Alachua County and other counties in North Florida.

With respect to the requirements for Listed Species Review defined by FWS, the Florida Fish and Wildlife Conservation Commission (FWC), and the Development Regulations of the City of Gainesville, City of Alachua, and Alachua County, most listed species regulations involve occurrence and protection of unique, high-quality, undisturbed native habitats or habitat that retain the characteristic of the historical native plant communities. As such it can be stated that,

> The Planning Parcel or any Parcels directly adjacent to the Planning Parcel do not contain any remaining Native or Natural Plant Communities or associated habitats that do support or could support any long-term viable populations for any large range requiring endangered or imperiled species known to occur within Alachua County, Florida that would be adversely affected by the proposed Project Development. This does not mean that transient use of the site by Listed Species does not occur. However, the site does not contain suitable forage or nesting habitat to support populations that have very specific habitat requirements or have large ranges for mating or forage. The Site and all habitats have been significantly managed for cattle since before 1937. All habitats have been significantly altered by cattle use and conversion to pasture such that **NO** true resemblance to the native habitat and species occurrence exists. Further the animal species that use the site and adjacent floodplains will continue to use the site after development occurs as all Creek and associated Riparian and Upland buffer habitats will be placed in a **Conservation Easement.**

The onsite habitats were historically dominated by two primary native Florida plant communities to include:

(1) **Longleaf Pine-Slash Pine-Wiregrass Flatwoods:** This is a Mesic-Pine Flatwood habitat that is fire maintained by natural fire occurrence on a 2–3-year cycle. This habitat type has historically been removed from this site and the surrounding area by past construction activities as well as clearing for pasture and silvicultural activities. In Alachua County, once the plow layer is disturbed and the roots of the historical vegetation are cleared and burned, these historical habitats never return to its native form. Instead, the sites become invaded by laurel oak (*Quercus hemisphaerica*), which is a native nuisance species that becomes the dominant canopy, subcanopy, and groundcover components and excludes colonization of the more desirable native species. Loblolly pine (*Pinus taeda*) replaces longleaf pine (*Pinus palustris*) as the dominant pine species. The groundcover is almost 100% covered by seedlings and saplings of the woody canopy species; therefore, there are **NO** areas of diverse herbaceous cover present. These successional communities are the dominant plant communities that now exist in the County and on this site. Their succession and persistence are evident by examination of historical aerial photo coverages and have been verified by performance of field surveys that confirm the successional, persistent, and widespread distribution of this community.

(2) **Mesic-Hammock:** This is natural native Mixed-Hardwood Mesic plant community that is characterized by a diverse mix of deciduous hardwood species to include swamp chestnut oak (*Quercus michauxii*), pignut hickory (*Carya glabra*), sweetgum (*Liquidambar styraciflua*), black cherry (*Prunus serotina*), sugar hackberry (*Celtis laevigata*), box elder (*Acer negundo*), American hornbeam (*Carpinus caroliniana*), eastern hop hornbeam (*Ostyra virginiana*), Carolina holly (*Ilex ambigua*), and eastern roughleaf dogwood (*Cornus asperifolia*). Evergreen canopy species are present but at low densities and include redbay (*Persea borbonia*), sweetbay (*Magnolia virginiana*), cabbage palm (*Sabal palmetto*), and spruce pine (*Pinus glabra*). These communities rarely burn, are mesic in nature, and often occur on slopes. Within Alachua County, these communities are uniquely associated with the Hawthorn Formation along the Cody Escarpment extending from elevations of 75 to 150 ft. Typical soils include the Arredondo fine sand and Bonneau fine sand, which are Ultisols and have a discontinuous subsurface clay layer. In addition, Cadillac and Jonesville soils (Alfisols), which have subsurface clay layers, also occur within this plant community. The Pedro soils (Ultisols), which have limestone exposed at the surface or is close to the surface mixed with clay, occur in these habitat areas located to the west of the Project Area. These soils are in areas of limerock outcrops, sinkholes, caves, and chimneys and support Mesic-Calcareous Hammock vegetation. Similar to Sandhill and Flatwoods habitats, when these areas are plowed and converted to pasture the historical community does not regain dominance and the habitat generally becomes overrun with laurel oak (*Quercus hemisphaerica*) or water oak (*Quercus nigra*).

Many of the imperiled reptile species in Alachua County are associated with native Sandhill habitats, which are currently now only very rarely found in its historical pristine condition, and these natural historical habitats have been totally removed from the area of the Project Site and did not historically occur within the boundaries of the Planning Parcel. *"Therefore, development of the site as proposed will not disturb or destroy any Critical Habitat in this area or adversely affect any naturally occurring native habitat."*

The remaining sections of this Listed Species review will provide documentation to support this conclusion. The documentation includes onsite pedestrian review of all areas of the Planning Parcel on multiple field days as well as extensive review of all Listed Species GIS databases that have been prepared by the Local, State, and Federal governments for Alachua County, Florida. In addition, a list of the potentially occurring listed species that may be present on the site and surrounding areas as well as a list of Migratory Birds known for the area was obtained via an online **IPaC** (Information for Planning and Consultation) consultation performed for the Project area on 29 August 2021. The results of this consultation are discussed in this report and are provided in its entirety as received from the FWS in **Attachment 7.**

General Review of City, County, State, Federal, and HUD Regulations that Govern Development with Respect to Imperiled Species, Significant Natural Communities, and Critical Habitat Areas

DMAI is applying for Land Use and Re-zoning Amendments to allow construction of new residential and commercial development within the developable areas of the Planning Parcel. Permits for new construction requires that State, Federal, and Local Listed Species Regulations are considered to assess the new development with respect to realized or potential Species or Habitat Impacts. All agencies as described must review all proposed applications with respect to determination of compliance with established Endangered Species Protection Policy.

The Federal Regulations Legislation that governs Listed Species impacts are defined within **Section 7 of the Endangered Species Act of 1973 (16 USC1531 et seq.)** particularly **Section 7 (16 USC1536)** and regulated via **Title 50 CFR Part 402.** This legislation is specifically implemented pursuant to **HUD Title 24 CFR §50.4 Related Federal Laws and Authorities (e) Endangered Species**. Further, HUD is required to evaluate the effects of the Project on **Critical Habitat** pursuant to **50 CFR Part 17 and Part 226.** HUD is also required to minimize any potential impacts of the Proposed Project on **Migratory Birds**. To implement the Federal Code, HUD developed a Manual[4] to provide guidance and direction for analysis of regulated resources that must be developed in compliance with HUD policy. To this end the Manual details the guidelines to follow for environmental review requirements for HUD projects.

Specifically, within this manual **Chapter 9. Environmental Review and Requirements** defines environmental procedures and **Section 9.5** defines specific **Environmental Report** requirements. Reference to Endangered Species is provided in the Manual, as follows:

G. Endangered Species (24 CFR 50.4(e))

1. Under Section 7 of the Endangered Species Act, HUD must consult with the U.S. Fish and Wildlife Service or the National Marine Fisheries Service (the Services) whenever a proposal may affect an endangered or threatened species or its habitat. A required consultation should be assumed for any site within the critical habitat (as defined in 50 CFR Part 17 and Part 226) of a listed species; consultation may also be required even if no critical habitat is present.

2. In areas where impacts on endangered or threatened species are a concern, all appropriate information regarding possible impacts of the project should be provided to HUD as early as possible. The Environmental Report should include review of published information, including but not limited to information on the Services websites regarding the possible presence and associated critical habitat of any listed species in the vicinity of the proposal and provide HUD with the results of the research. Furthermore, if a proposal is in an area of potential impacts

[4] *US Department of Housing and Urban Development. 2016. Multifamily Accelerated Processing (MAP) Guide. Office of the Assistant Secretary for Housing, FHA Commissioner.*

on a listed species or its critical habitat, any possible associated impacts caused by the proposal should be discussed in the Environmental Report. The lender and/or Environmental Report preparer should not contact the Services directly.

3. If the project activity could affect an endangered/threatened species or its habitat, HUD must make a determination of effect. HUD must seek concurrence of the Services on any "may affect, not likely to affect" determination and associated mitigation measures. HUD must initiate formal consultation under Section 7 of the Endangered Species Act for a "may affect, likely to adversely affect" determination. The lender may be required to obtain special studies such as habitat assessments, surveys, or biological assessments at the borrower's cost.

4. Consultation under Section 7 of the Endangered Species Act may result in more stringent conservation measures than would otherwise be imposed. The Regional staff can advise the lender where information on endangered species may be obtained.

5. The cost of mitigation to accommodate endangered species would likely be deducted from the warranted price of the land as an unusual site condition.

Requirements for Listed Species Review and Critical Habitat Impact Review

Section 7 of the **Endangered Species Act of 1973** (ESA) requires all Federal agencies to use their authorities to conserve endangered and threatened species in consultation with USFWS. This 'proactive conservation mandate' for Federal agencies is articulated in **Section 7(a)(1)**. **Section 7(a)(2)** contains a complementary consultation mandate for Federal agencies, as follows:

Section 7(a)(2) Mandate

Section 7(a)(2) directs all Federal agencies to insure that the actions they authorize, fund, or carry out do not jeopardize the continued existence of endangered or threatened species or destroy or adversely modify critical habitat. The Section 7 implementing regulations (50 CFR Part 402) specify how Federal agencies are to fulfill their section 7(a)(2) consultation requirements.

Section 7(a)(2) Responsibilities

Under the Section 7 implementing regulations (50 CFR Part 402), Federal agencies must review their actions to determine whether they may affect endangered or threatened species or critical habitat. To accomplish this, Federal agencies must determine whether any listed species may be present in the Project Area and whether that area overlaps with critical habitat. If one or more listed species may be present in the action area—or if critical habitat overlaps with the action area—agencies must evaluate the potential effects of their action. If no species or their critical habitat are present or affected, no consultation is required. Consultation will be either informal, ending with written concurrence from USFWS, or formal. Formal consultation concludes when USFWS delivers its biological opinion to the Federal agency.

Agencies must confer with the USFWS per **Section 7(a)(4)** of the ESA if any action is likely to jeopardize a species proposed for listing or to destroy or adversely modify proposed critical habitat. Critical habitat is a term used to define specific geographic areas that contain habitat features that are essential to the survival and conservation of Endangered or Threatened Species. Critical habitat areas often require specific management strategies to maintain or establish an existing habitat in a condition that supports or potentially supports an imperiled species. To determine whether either of these are likely, agencies may follow the same approach that is used for listed species and designated critical habitat (that is, evaluate the likely effects of their actions on any proposed species that may be present in the Project Area and on any proposed critical habitat that lies within or adjacent to the Project Area). To this end, this report is provided to evaluate the potential effects that the Project may have on listed species using extensive field analysis integrated with multiagency GIS data review of the Project Area and the local vicinity surrounding the Project Area.

Summary Information Regarding Regulation of Threatened & Endangered Species in Florida

There are several agencies that have been delegated the authority to protect and preserve the threatened and endangered flora and fauna that occur within the State of Florida. The FWS maintains a list of species afforded special protection by the ***Endangered Species Act of 1973 (16 U.S.C. 1531)***. The list is published in the ***List of Endangered and Threatened Wildlife and Plants, 50 CFR 17.11-12***. FWC maintains a list of the protected animals occurring within the state by authority of the ***Florida Endangered and Threatened Species Act of 1977 (Section 372.072, Florida Statutes [FS])*** and ***Chapter 68A-27, Florida Administrative Code (FAC), Rules Relating to Endangered and Threatened Species***. The specific policy of the Florida Endangered and Threatened Species Act of 1977 is declared as follows:

> **Section 373.072(2): Declaration of Policy**—The Legislature recognizes that the State of Florida harbors a wide diversity of fish and wildlife and that it is the policy of this state to conserve and wisely manage these resources, with particular attention to those species defined by the Florida Fish and Wildlife Conservation Commission, the Department of Environmental Protection, or the U.S. Department of Interior, or successor agencies, as being endangered or threatened. As Florida has more endangered and threatened species than any other continental state, it is the intent of the Legislature to provide for research and management to conserve and protect these species as a natural resource.

The list of threatened and endangered animals protected by these laws is published in ***Section 68-27.003, .004, and .005, FAC***. The regulation of listed marine animals was historically delegated to the Florida Department of Natural Resources (FDNR); however, has since been reorganized into the Florida Department of Environmental Protection. The ***Preservation of Native Flora of Florida Act (Sections 581.185, 581.186 [in part] and 581.201, FS)*** passed in 1978 declares a public policy of the State of Florida regarding native flora, as follows:

> **Subsection 1: Legislative Declaration**—The Legislature finds and declares that it shall be the public policy of this state to: provide recognition of those plant species native to the state that are endangered, threatened, or commercially exploited; protect the native flora from unlawful harvesting on both public and privately owned lands; provide an orderly and controlled procedure for restricted harvesting of native flora from the wild, thus preventing wanton exploitation or destruction of native plant populations; encourage the propagation of native species of flora; and provide the people of this state with the information necessary to legally harvest native plants so as to ultimately transplant those plants with the greatest possible chance of survival.

To this end, the Florida Department of Agriculture and Consumer Services (FDACS) regulates the threatened and endangered plant species occurring within the state. As specifically authorized by ***Chapter 5B-40, Preservation of Native Flora of Florida, FAC,*** the ***Regulated Plant Index*** is published in ***Section 5B-40.0055***. The Game Commission periodically releases a publication that summarizes animal species regulated by the Florida Fish and Wildlife Conservation Commission and the USFWS. The publication is titled *Florida's Endangered Species, Threatened Species, and Species of Special Concern*. The federal lists of plants and animals are published in ***50CFR 17.11-12,*** and the list of Florida's federally listed plant species is also published by the Florida Division of Forestry.

Several other lists of the endangered and threatened fauna and flora are maintained for the State of Florida. The Florida Natural Areas Inventory (FNAI) maintains a list that summarizes the status and distribution of both plant and animal species and natural communities within Florida. The FNAI is managed by The Nature Conservancy in cooperation with DEP. The lists compiled by the FNAI contain many species that do not occur on the State or Federal lists. The FNAI list as compiled is not subjected to the time-consuming administrative process required for listing for State and Federal protection. Therefore, these lists often reflect the up-to-date true status of species that may be in immediate peril. The FNAI species that are not State or Federally listed are not given legal protection.

An inventory of the statewide distribution of potentially threatened and endangered species was initiated in 1973 by the Florida Committee on Rare and Endangered Plants and Animals (FCREPA). The group published a several-volume series that contains detailed descriptions, distributions, and academic evaluations of species considered to be in peril. The FCREPA list contains many species in addition to the State and Federal lists; however, these additional species are afforded no legal protection. The FCREPA series offers the best compiled review of the biology of the imperiled biota of Florida to date. Beginning in 1986, revisions of the FCREPA volumes were initiated and continue to date.

To aid in review of the imperiled species that occur in Florida and the State and Federal Regulations that govern their management, these publications are available:

- Endangered and Threatened Species Act of Florida, Chapter 372.072, FS
- Rules Relating to Endangered and Threatened Species, Chapter 68A-27, FAC
- The Preservation of Native Flora of Florida, Chapter 581.185, FS
- Preservation of Native Flora of Florida, Chapter 5B-40, FAC
- Florida's Endangered and Threatened Species, December 2018

Alachua County, by authority of **Chapter 406.Natural and Historic Resources Protection** Specifically **Article *3, Significant Plant and Wildlife Habitat,*** and ***Article 4, Listed Plant and Animal Species Habitat***, of the Unified Land Development Code (ULDC) regulates development in habitats where listed species occur or could potentially occur. Provisions within Articles 3 and 4 allow the County to require that up to 25% of the upland portion may be required to be protected and set aside as primary conservation or Critical Habitat. Areas protected under Articles 3, 4, and 5 are designated as Conservation Management Areas and are further regulated via rules outlined in ***Article 17, Conservation Management Areas (ULDC)*** and potentially require that the property owner establish a Conservation Easement for the specific areas within the Project Site. The owner is further responsible for development of a Management Plan and perpetual management of the area.

The City of Gainesville via provisions of **Article VIII. Protection of Resources. Division 2. Natural and Archeological Resources** regulates development within Listed Species Habitats and native plant communities defined as Critical Habitats. ***Sections 30-8.13 (D) (1-3). Significant Natural Communities*** provides specific guidelines for protection of unique native plant communities and ***30-8.13(E) (1-4). Listed Species.*** has adopted the County's template for listed species protection and provides protection of listed species and listed species habitats. Protective mechanisms include provision of Conservation Management Areas with associated management plans as described in ***Section 30-8. 14(A-L).*** Neither the County's nor the City's land development codes describes the protections warranted for individual species or habitats. These protections are defined on a case-by-case basis often in cooperation with the responsible federal or state regulatory entity.

The County through **Chapter 78. Countywide Natural Resources Protection Code (ULDC)** has designated large habitat zoning overlays defined as Strategic Ecosystem with regulations that now extend into all Municipal Boundaries. Strategic Ecosystems are outstanding examples of Natural Plant Communities of sufficient size that they warrant protection through establishment of Wildlife Corridors or Conservation Management Areas. Within Strategic Ecosystems that have been ground verified to establish community quality, set asides of up to 50% of the upland area occurring on a Project Site may be required to be conserved and eliminated from any development activity. The County regulates Strategic Ecosystems pursuant to **Chapter 406. Article 5. Strategic Ecosystems**. The City of Gainesville adopted the County Code and regulates Strategic Ecosystems pursuant to **Section 30-8.13. (F) (1-3).** The County recently amended its upland protection Code to apply to all municipal areas within the County to include the

City of Gainesville. On 15 July 2021, the County adopted **Chapter 78. Countywide Natural Resources Protection Code** for application within the limits of all towns and cities within the County to include the City of Alachua. This code also addresses protections for Listed Species Habitats, Significant Upland Communities and Strategic Ecosystems.

Results of City, County, State, and Federal Listed and Imperiled Species Database Reviews

Eagle Nest Locator and Wading and Waterbird Rookery Databases

- American Bald Eagle (FNAI G5/S3)

The results of the query of the Eagle Nest Locator Database and Water and Wading Bird Rookery Sites Database are provided on **Figure 40**. The results show that there are **NO** nests or extant rookeries within one (1) mile of the Project Area. Construction of the site will **NOT** disturb any primary or secondary protective buffers for these features. There are Wetlands or Surface Waters on site that provide forage habitat for listed wading or waterbirds; however, there is **NO** nesting habitat on site for these species. There was an historical wading bird rookery **No. 605113** north of the Project Site within the GRU-Deerhaven Power Plant Site; however, this site is considered extirpated with **NO** activity reported since the 1970s. Rookery **No. 605012** is northwest of the Planning Parcel; NO activity status is available, but no protective buffer would affect the Project Site. Eagle nest **AL056** west of the Project Site was last reported active in 2009. However, the Project Site lies well outside the distance of any Primary or Secondary Protective Buffers established by law for these nests. Development of the Site will have minimal impacts to severely altered Surface Water areas that will be offset by creation of large storm ponds that will be used by any water-requiring species.

Bald Eagles Nesting Sites—Project Effect: "No Effect"
Wading and Waterbirds
Rookeries / Forage Areas—Project Effect: "No Effect"

Federally Listed Species Occurrence Range Database

Federally Listed Bird Species

- Red-cockaded Woodpecker (Federally Endangered; FNAI G3/S2)
- Florida Scrub-Jay (Federally Threatened; FNAI G2?/S2)
- Wood Stork (Federally Threatened; FNAI G4/S2)
- Eastern Black Rail (Federally Threatened; FNAI G3G4/S2)

Results of the FWS Federally Listed Bird Species database search for the Project Site and surrounding area are presented in **Figure 41**. Effects determinations are provided for each species, as follows:

Red-cockaded Woodpecker

The known existing and historical ranges of the red-cockaded woodpecker (RCW) in relation to the Project Site are shown on **Figure 42**. RCWs require well-managed, fire-maintained old growth pine flatwoods habitats for nesting and forage. In addition, relatively large expanses of this habitat type are required to support a breeding population. RCWs require large mature trees with red heart fungus within the heartwood for successful nesting. There are large pine trees in the area that may provide a suitable nesting area; however, the habitat to support this species, which is typically very specific, **DOES NOT** occur within the Planning Parcel or adjacent areas. Both the data from the FWS Observation Database and the FNAI Element Occurrence Tracking List indicate **NO** RCWs have been observed on the Planning Parcel or in this area of the County. The existing FWS RCW occurrence observations are shown in relation to the Project Site on Figure 42. The database shows that RCWs historically occurred in areas of the County north of the airport and south of Waldo. However, these are historical colonies that have been extirpated. There are **NO** known colonies remaining in Alachua County. There is **NO** habitat on site to support this species. These data show that the current range of RCWs lies a considerable distance from the Project Site with a population occurring on Fort Blanding in Bradford and Clay counties northeast of Alachua County. RCWs were not indicated in the IPaC Consultation (Attachment 7).

Red-cockaded Woodpecker—Project Effect: "No Effect"

Florida Scrub-Jay

The Florida Scrub-Jay Consultation Area along with delineated habitats and known observation locations is provided as **Figure 43.** The observations provided refer to studies performed during a 1992–1993 statewide survey. With respect to the Project Site, the closest historical known location lies within the Cedar Key Scrub located ±80 miles southwest from the Project Site. There is a large population within the Ocala National Forest within Marion County southeast of Alachua County. There is **NO** scrub-jay habitat on the Project Site and the Project will **NOT** affect any scrub-jay roosting or nesting habitat.

Florida Scrub-Jay—Project Effect: "No Effect"

Wood Stork

There were **NO** wood storks seen foraging on the site or any area around the site during the field review. However, wood storks will occasionally frequent this site, but the onsite Surface Waters offer minimal temporary habitat for forage for this species and **No** nesting habitat is available. The Planning Parcel lies west of the Historical Regulated Forage Buffer for the River Styx Wood Stork Colony **(Figure 44)**. However, this colony is **NO** longer active and is considered extirpated. Wood storks forage in several habitat types to include local stormwater basins. The Surface Water habitats that will be removed because of the Project are man-made Agricultural ponds and intermittent, very small depressions all of which have received substantial historical pollutant loads from cattle and Ag runoff. The habitat loss is minimal but will be offset by large storm basins

creation, which will provide littoral areas that do provide forage for this species when designed correctly. Therefore, there will be **"No Net Loss"** of available habitat for this species in response to development of the Project Site.

Wood Stork—Project Effect: "No Effect"

Eastern Black Rail

The eastern black rail was listed as a Federally Threatened Species on 9 November 2020. This species is distributed within the eastern and southeastern United States and requires wetland habitats and transitional habitats between wetland and upland grasslands for forage and reproduction. The eastern black rail has been reported in Alachua County in the past, primarily associated with Paynes Prairie and adjacent emergent ponds and wet prairies. The most recent reports of eastern black rail sightings in Alachua County are summarized in the *"Checklist of the Birds of Alachua County"* maintained by the Alachua Audubon Society, which contains results through 21 September 2020 and contains the following summary:

> BLACK RAIL—Unknown status, possibly rare resident, e.g., Paynes Prairie, 9 Apr 1986, 1 Jun 1988, 18 Dec 1991, 5 Sep 1997. One breeding report, early 1900s: adult with three young, Paynes Prairie, early June.

There are **NO** reported listings after September 1997. There are **NO** Wetlands or Surface Waters located on the Project Site that support forage or breeding for this species.

Eastern Black Rail—Project Effect: "No Effect"
Project Effect: "No Effect" on Federally Listed Bird Species.

Federally Listed Reptile Species

- Eastern Indigo Snake (Federally Threatened, State Threatened; FNAI G3/S3)
- Gopher Tortoise (Federally Listed as Candidate Species in Florida Range, State Threatened; FNAI G3/S3)

Eastern Indigo Snake

The Project Site is within the historical and extant distribution range of the eastern indigo snake (**Figure 45**). The indigo snake inhabits a broad range of habitats in Florida but prefers gopher tortoise burrows or pocket gopher burrows within xeric habitats. There is **NO** natural native Xeric habitat within the Project Site with all historical Mesic to Xeric areas within and adjacent to the Project Area being significantly disturbed, and the native habitat type **NO** longer exists. There are **NO** gopher tortoise or pocket gopher burrows that occur on the Project Site. The Project Site is surrounded by low-density residential development along the southeast, south, and west perimeters. The Project Site is surrounded by residential access roads as well as a high-volume regional access road along the north and east perimeters designated as US 441 and NW 43rd Street, respectively. Turkey Creek, Schmidt Creek, Brook Pointe Creek, and their associated Wetlands and Floodplains all provide habitat for indigo snakes. However, all areas are subject to predatory activities by dogs from adjacent residences, as well as extensive

cattle, hog, and coyote activity all of which have deleterious effects on indigo snake populations. However, all these habitat areas will be protected from development and placed within a Conservation Easement.

There is also a likelihood that indigo snakes may be transient occupants on this site using the Creeks as transit corridors between off site habitats. Indigo snakes are seen along the margins of prairies and Wetlands and within the well-defined Hydric and Mesic Hammocks that occur along the margins of the onsite creek systems but travel to and from these habitats is unlikely and significant roadways act as a major barrier between the Project Site and offsite habitats. It is probable that indigo snakes occur on site; therefore, the site should be developed consistent with the ***Standard Protection Measures for the Eastern Indigo Snake*** *(USFWS August 13, 2013).* To determine the probable EFFECT that development of the Project would have on the eastern indigo snake, the FWS "**Eastern Indigo Snake Programmatic Effect Determination Key"** was consulted. Use of the key indicates that the Project would **"Not Likely Adversely Affect" (NLAA)** the eastern indigo snake. The Project is covered with relatively poor successional habitat that has substantially less than 25 acres of natural Xeric Habitat and **NO** Occupied, Potentially Occupied, or Abandoned gopher tortoise burrows present; therefore, the potential effects on the population are minimal or insignificant.

Eastern Indigo Snake—Project Effect: "Not Likely to Adversely Affect" (NLAA)

Gopher Tortoise (Gopherus polyphemus)

In Florida, the gopher tortoise and its burrow are protected under state law. This species has now been designated as a Candidate Species for Listing in its range located east of the Mobile River and Tombigbee River in Alabama. West of these rivers, the gopher tortoise is listed as Threatened in areas of Alabama, Mississippi, and Louisiana. Gopher tortoises generally occur in sandy, dry habitats with sparse canopy and abundant low growing herbaceous vegetation. They are commonly found in sandhills, pine flatwoods, scrub, scrubby flatwoods, dry prairies, and several other generally dry habitats. On sites where natural fire has been suppressed, growth of dense woody trees and shrubs make it difficult for gopher tortoises to move about and find suitable food sources. Because gopher tortoises share their burrows with over 350 other species of animals, they are considered a keystone species. There is **NO** gopher tortoise habitat located within the Planning Parcel and no tortoises were found during several field surveys. Dense clay soils near the surface substantially inhibits burrowing by tortoises on this Site.

Gopher Tortoise—Project Effect: "No Effect"

Federally Listed Amphibian Species

- Striped Newt (*Notophthalmus perstriatus*) (FNAI G2G3/S2)
- Frosted Flatwoods Salamander (*Ambystoma cingulatum*) (Federal Threatened, FNAI G2; S1/S2)

Striped Newt

The Project Site occurs within the historical range occurrence of the striped newt and has historically been reported in Alachua County and adjacent counties (**Figure 46).** The striped newt is a Xeric-adapted species that typically inhabits fire-maintained scrubby flatwoods, sandhill, and scrub habitats. The striped newt is commonly associated with gopher tortoise habitat and is frequently found within burrows. This species depends on natural, ephemeral, isolated Wetlands for breeding and reproduction and is extremely sensitive to the impacts that are cosmopolitan in this area, which include extensive soil disturbance, fire suppression, road construction, and disturbance of gopher tortoise burrows. It is unlikely this species occurs on site due to the absence of natural, ephemeral, emergent Wetlands on the site or in adjacent areas due to the past disturbance in the area.

Striped Newt—Project Effect: "No Effect"

Frosted Flatwoods Salamander

The frosted flatwoods salamander is not designated as occurring within the Project Area. This species is not shown to occur within Alachua County or adjacent counties in any State or Federal Database for Alachua County or the Project Area. There are **NO** historical reported species occurrences shown on any database within the Project Site boundaries and **NO** known occurrences have been reported in the area of the Project Site. The habitat for this species does not occur in the Project Area.

The frosted flatwoods salamander is a federally listed threatened species. The salamander inhabits Slash and Longleaf Pine Flatwoods having a wiregrass (*Aristida stricta*) groundcover with breeding occurring in small ephemeral ponds. Historically, two (2) occurrences reported closest to Project Site have occurred in Bradford County, which is many miles north and east of the Site north of the Santa Fe River. The frosted flatwoods salamander was reported from Cypress Domes in Bradford County on 5 May and 1 December 1979. Subsequent sampling of the site where the species was reported occurred in 1993; however, **NO** individuals of the species could be found. Although the historical distribution of the species included Alachua and Bradford counties, the species is considered as extirpated from these counties with **NO** known extant populations occurring within Alachua, Marion, Duval, or Bradford counties. Within Florida, the current known distribution is believed to only include Franklin, Wakulla, Liberty, Jefferson, and Baker counties. Regardless of the current distribution, there is currently **NO** onsite habitat that will be disturbed that is suitable to maintain this species.

Frosted Flatwoods Salamander—Project Effect: "No Effect"

Federally Listed Crustacean Species

- Squirrel Chimney Cave Shrimp (Federally Threatened; FNAI G1/S1)

The squirrel chimney cave shrimp is a transparent cave-dwelling crustacean that is about 1.2 inches long. It was found in Squirrel Chimney in Alachua County in 1953. Since that time, it has been collected less than a dozen times and was last collected in 1973.

Collection efforts in 1994–1996 of Squirrel Cave and several local cave systems revealed no sign or traces of the shrimp. Squirrel Chimney is a nearly vertical limerock chimney within the Haile Limestone Plain geographic subdivision in northwestern Alachua County. This chimney has several possible undocumented connections to other underground systems. This habitat is very specialized in the County and requires surface connections to subterranean caves. There are **NO** comparable habitats in the vicinity of the Project Site.

Squirrel Chimney Cave Shrimp—Project Effect: "No Effect"

Migratory Birds

The following migratory birds were documented within the **IPaC** consultation provided as **Attachment 7**. Migratory birds are designated for FWS consultation and require protection for projects subject to Federal Jurisdiction. During Section 7 consultation, the FWS must evaluate the potential effects the project may have on migratory birds that potentially use the areas in and surrounding the Project Site. The birds that occur on this list are of particular concern because either (1) the birds are listed on the FWS "Birds of Conservation Concern list" or (2) they warrant special concern in the area of the proposed Project Site. Based on the information contained within the **IPaC** Report, there are **NO** Critical Habitats in the area of the Project Site under the jurisdiction of the FWS. Brief comments related to the potential occurrence of the Migratory Species that potentially occur in the County are provided within each species' section, as follows:

- **American Kestrel (*Falco sparverius paulus*) (State Threatened, FNAI G5S2):** This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA. Breeds Apr 1 to Aug 31.

  Comment: The southeastern American kestrel is a State-listed species, and a permit is required to take a nesting location; it has a 450-ft Protective No Disturbance Buffer extending from nesting locations. Several kestrels were seen on and adjacent to the Project Site during the field surveys. Onsite habitats provide dead snags, and oldfield areas exist that support forage for this species. There are open habitats that provide forage for this species. Adjacent residential properties surrounding the Project Site also provide habitat for this species. Development of the Site will occur primarily in pasture areas or dense early successional habitats that provide limited forage for this species. Development will result in large open space areas and areas that provide stormwater treatment. These habitats will provide continual forage area for these species. Most of the nesting habitat for the onsite kestrels occurs within the boundaries and buffers of the streams. These areas will not be developed and will be maintained in its current condition within a Conservation Easement.

  American Kestrel—Project Effect: "Not Likely to Adversely Affect"

- **Bachman's Sparrow (*Aimophila aestivalis*) (FNAI G3S3):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds May 1 to Sep 30.

  Comment: from the "Checklist of the Birds of Alachua County," Bachman's sparrow is an uncommon resident of Alachua County that is considered vulnerable in the State of Florida. This habitat specialist generally requires fire-maintained mature to old growth natural longleaf pine forests that are not significantly affected by forest management. Sites that have mature, well-maintained pine forests both on the site and in adjacent areas are the required preferred habitat. These birds also require a well-developed mature herbaceous groundcover with limited shrub and hardwood groundcover and mid-story components. This habitat type does **NOT** occur on the Project Site or in surrounding areas.

  Bachman's Sparrow—Project Effect: "No Effect"

- **Bald Eagle (*Haliaeetus leucocephalus*) (FNAI G5S3):** This is not a Bird of Conservation Concern (BCC) in this area but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. Breeds Sep 1 to Jul 31.

  Comment: there are **NO** eagle nests that will be affected by the project. There is **NO** forage habitat on the Project Site that support feeding and foraging of eagles. See discussion in Bald Eagle Nest section above.

  Bald Eagle—Project Effect: "No Effect"

- **Great Blue Heron (*Ardea herodias occidentalis*):** This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA. Breeds Jan 1 to Dec 31.

  Comment: The great blue heron is commonly found throughout wetland habitats in Alachua County. It requires wet habitats for forage and nesting. The great blue heron is present on site and primarily uses the man-made agricultural pond as forage habitat. This pond will be replaced by larger acreage stormwater ponds that also provide substantial habitat for forage for this species. The proposed project will result in a net gain of open water surface water habitat.

  Great Blue Heron—Project Effect: "No Effect"

- **Henslow's Sparrow (*Ammodramus henslowii*):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds elsewhere.

  Comment: Henslow's sparrow is a rare winter visitor in Alachua County and requires well-developed coastal marshes for breeding. In addition, the sparrow

may use natural uncultivated grasslands for forage and breeding. The habitat requirements for this species do not exist on the Project Site.

Henslow's Sparrow—Project Effect: "No Effect"

- **Lesser Yellowlegs (*Tringa flavipes*):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds elsewhere.

  Comment: This species is a waterbird that forages and breeds in brackish and freshwater Wetlands. Additionally, the species will use wet ponds, mud flats, and a wide variety of wetland habitats. The proposed Project will not result in a net loss of forage habitat for these infrequent transient visitors.

  Lesser Yellowlegs—Project Site: "No Effect"

- **Prairie Warbler (*Dendroica discolor*) (G5T3S3):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds May 1 to Jul 31.

  Comment: This species is defined as a common fall transient that is uncommon in spring and rare in winter in Alachua County. This species prefers upland shrub habitats or other successional habitats such as oldfield; however, open space appears to be the significant requirement of the habitat. The Project does not provide this habitat type. This Project Site contains successional shrub habitat and substantial areas of open pasture. The shrub habitats will primarily be preserved as well as a substantial amount of oldfield and pasture within buffers preserved in the Conservation Easement.

  Prairie Warbler—Project Effect: "No effect"

- **Red-headed Woodpecker (*Melanerpes erythrocephalus*):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds May10 to Sep 10.

  Comment: The red-headed woodpecker prefers open savannah type deciduous woodlands with open understories as its primary nesting and forage habitat. In Alachua County it is defined as a common summer resident but is uncommon in winter. The Project Site has a subcanopy and canopy that is evergreen or tardily deciduous, is very dense, and a groundcover that is, in areas, impassable. This is not the required or preferred habitat of this woodpecker.

  Red-headed Woodpecker—Project Effect: "No Effect"

- **Short-billed Dowitcher (*Limnodromus griseus*):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds elsewhere.

  Comment: This species is described in Alachua County as a rare spring transient and irregular transient in late summer and fall. These are primarily saltwater and

brackish waterbirds that do not breed in Alachua County. These birds prefer habitats unavailable on the Project Site or within the County.

Short-billed Dowitcher—Project Effect: "No Effect"

- **Swallow-tailed Kite (*Elanoides forficatus*):** This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. Breeds Mar 10 to Jun 30.

  Comment: The swallow-tailed kite is described in Alachua County as a rare spring resident. In Alachua County, the kite prefers nesting and hunting along riparian systems with tall mature trees and is often in competition in these areas with red-shouldered hawks and barred owls. They frequently visit and nest at the same sites from year to year with several pairs nesting in close proximity. The Project Site provides **significant** forage or nesting habitat for this species along the three (3) creek systems. As a part of the development agreement, these habitats will be placed in a Conservation Easement.

  Swallow-tailed Kite—Project Effect: "No Effect"

Additional Imperiled Species Listed by the State of Florida and the Florida Natural Areas Inventory (FNAI) Element Occurrence Database for Federal, State, and Non-Listed Imperiled Species

To provide for additional and more thorough review of imperiled species not listed by the Federal Government, additional data resources are evaluated to provide potential "Effects" analysis that the Project Development may have on locally occurring imperiled species. The Alachua County **"Summary of Rare and Regulated Plants"** provides habitat and listing information. It should be noted that in addition to species listed by the State and Federal governments, Alachua County through **Chapter 406** and **Chapter 78** and the City of Gainesville also consider species designated as **S1**, **S2** and **S3** by **FNAI** to be regulated pursuant to the Listed Species and Listed Species Habitats Land Development Regulations. **FWC** periodically publishes a comprehensive list of all State regulated plant and animal species. This publication entitled **"Florida's Endangered and Threatened Species"** (most recent publication Date: December 2018)

The FNAI maintains a list of all animals and plants that are listed or considered as imperiled in the State of Florida. This list, which includes all Federal and State Listed Species, is designated as the "Element Occurrence Database." The graphical results of the FNAI Element Occurrence Database search for the Project Site and adjacent areas is shown on **Figures 47.** The database shows **NO** listed species have historically been reported from the designated Project Site. There is **NO** onsite habitat that supports species with requirements for large ranges of native habitat or require very specific native habitat types. **NO** significant habitat areas occur on site that are known to support imperiled species. From the data collected throughout the State, FNAI has created probability polygons that show the potential ranges of species occurring in the area (**Figure 48**). These ranges of occurrence should only be interpreted considering that the

required habitat for the species exist in the area of interest (e.g., the Project Site). A Project Site may occur within a designated probability area but if the habitat does not occur then there is reduced chance of encounters with or occurrence of the designated species.

There are several imperiled species that may have been historically present within the Project Site and adjacent areas or may be potentially present as transient visitors to the site. However, the habitat requirements for these species no longer exist in the area. The FNAI database shown on Figures 47 and 48 does not show any reported species on the Planning Parcel. There is a host of reported beetle and ant species shown off-site east of the Project Site in the FMAI database. This is an unusual occurrence of reports and tends to suggest an entomologist lives, lived, or has had a monitoring Project in that area. However, with Conservation Easements that are establish in the post-project condition with provide substantial un- disturbed habitat to provide for continued existence of these bugs if they do indeed occur on the Planning Parcel. Species that may have historically occurred on the Planning Parcel or in adjacent areas are briefly described, as follows:

Mammals

- **Sherman's Fox Squirrel (*Sciurus niger shermani*) (State Species of Special Concern, FNAI G5T5/S3):** The fox squirrel typically occupies Xeric areas that are frequently burned and have numerous mature oaks and pines distributed throughout the habitat. They can also inhabit residential yards with large oaks and pines. They will move to avoid the direct impacts of development. Fox squirrels in disturbed Xeric habitats such as pastures are often found in large fence row trees where water troughs are located for cattle. If the water source is removed the squirrels may vacate the area in areas where surface water sources are not available. Fox squirrels **DO NOT** occur on sites located in the vicinity of the Project Site or within the Project Site. None were seen during the site survey.

  Sherman's Fox Squirrel—Project Effect: "No Effect"

- **Florida Black Bear (FNAI G5T4/S4):** The general forage range of the Florida black bear in and around the Project Site is provided on **Figure 49**. Within the area, due to the large areas of undeveloped habitats south and north of the Project Area, encounters with black bears would be considered as occasional to common. Areas where nuisance encounters with black bears have been reported are also shown on Figure 49. Several nuisance reports are shown for the general Project Area, and several reports are shown for the area in the vicinity of the Planning Parcel. On the Project Site, it is likely that chance encounters with transient black bears may occur but there is **minimal** black bear habitat present, and the development of the parcels will not affect Black Bears. Black bears are common on the City Property north of US 441.

  Florida Black Bear—Project Effect: "No Effect"

Reptiles

- **Eastern Diamondback Rattlesnake (*Crotalus adamanteus*) (FNAI G4/S3):** The eastern diamondback rattlesnake is found throughout Florida and generally may occur anywhere on the Project Site, especially within armadillo or other mammal burrows. There is suitable habitat on site to support growth and reproduction of this species. There is a substantial population of fruit-producing blackberry vines that attract ground-dwelling birds like quail that are prey for this species. There is habitat to effectively support small to medium size mammals and there is surface water on site to support small mammal and reptile species. In addition, the site is adequately covered with a groundcover of herbaceous species that provide food for small mammals and birds. The habitat is present for this species and will still be present following development of the site as proposed.

  Eastern Diamondback Rattlesnake—Project Effect: "No Effect"

- **Short-tailed Snake (*Stilosoma extenuatum*) (State Threatened, FNAI G3/S3):** The short-tailed snake inhabits xeric habitats, primarily Longleaf Pine-Turkey Oak Sandhills. The Project Site does **NOT** have native Xeric habitat types with open sandy soil. It is unlikely this species occurs on site or that a population can be sustained on site given the present and past land management practices. The species has not been documented on site (FNAI database), but the snakes live primarily underground and are difficult to census. Currently there is **NO** onsite habitat to support this species and significant residential and road development within the local area precludes the maintenance of a viable reproducing population in the area.

  Short-tailed Snake—Project Effect: "No Effect"

- **Florida Pine Snake (*Pituophis melanoleucus mugitus*) (State Threatened, FNAI G4/S3):** The pine snake is a rare inhabitant of xeric communities. There are **NO** preferred natural habitat types for this species remaining on site and there are **NO** areas of the site that have a population of gopher tortoise or pocket gopher burrows. Pine snakes prefer pocket gopher burrows and, less frequently, gopher tortoise burrows for refuge. There is **NO** onsite habitat to support this species and all habitat on adjacent sites have been removed.

  Florida Pine Snake—Project Effect: "No Effect"

- **Southern Hognose Snake (*Heterodon simus*) (FNAI G2/S2S3):** The primary habitat for the southern hognose snake is sandhill and sandy soil, open hammocks, and scrub. These native habitat types **DO NOT** occur on site or remains in areas surrounding the Project Site. This species has not been reported for the immediate area of the site and it is unlikely that a breeding population is present near the proposed development.

  Southern Hognose Snake—Project Effect: "No Effect"

- **Striped Newt (*Notophthalmus perstriatus*) (FNAI G2G3/S2)**
- **Gopher Frog (*Rana capito*) (FNAI G3/S3)**
  The Project Area occurs within the historical range of the striped newt and gopher frog. The striped newt and gopher frog are Xeric-adapted species that typically inhabit scrubby flatwoods, sandhill, and scrub habitats. These species are commonly associated with gopher tortoise habitat and are frequently found within burrows. Both species depend on natural, ephemeral, isolated Wetlands for breeding and reproduction. These species are extremely sensitive to the impacts that are cosmopolitan in this area, which include extensive soil disturbance, fire suppression, road construction, and disturbance of gopher tortoise burrows. It is unlikely these species occur on site due to the absence of natural ephemeral emergent Wetlands on the site or in adjacent areas and the absence of suitable fire maintained xeric habitat and absence of gopher tortoise burrows.

  Striped Newt—Project Effect: "No Effect"
  Gopher Frog—Project Effect: "No Effect"

Birds

- **Little Blue Heron (*Egretta caerulea*) (State Threatened, FNAI G5/S4):** This wading bird uses wetland emergent or wet prairies for habitats but is commonly found in excavated ponds or roadside ditches. There are wading bird habitats within the site or immediately adjacent areas. Stormwater ponds provide habitat for this species, and these will be abundant on site in the post development condition.

  Little Blue Heron—Project Effect: "No Effect"

- **Florida Sandhill Crane (*Grus canadensis pratensis*) (State Threatened, FNAI G5T2/S2):** Sandhill cranes are seen frequently around lakes and Wetlands in residential areas or roadside areas with maintained yard grass perimeters. There is nesting habitat for this species in the regional area but not on the site or adjacent properties. Sandhill cranes will forage extensively in well-maintained pastures and low-profile grasses is essential in forage areas for young sandhill cranes. There is **NO** nesting habitat for this species on the Project Site; however, forage habitat exists and will be maintained in the post development condition.

  Florida Sandhill Crane—Project Effect: "No Effect"

- **Southeastern American Kestrel (*Falco sparverius paulus*) (State Threatened, FNAI G5T4/S3:** The southeastern American kestrel is a State-listed species, and a permit is required to take a nesting location; it has a 450-ft Protective No Disturbance Buffer extending from nesting locations. Several kestrels were seen on and adjacent to the Project Site during the field surveys. Onsite habitats provide dead snags, and large oldfield areas exist that support forage for this species. There are open habitats that provide forage for this species. Adjacent residential properties surrounding the Project Site also provide habitat for this species.

Development of the Site will occur primarily in pasture areas or dense early successional habitats that provide limited forage for this species. Development will result in large open space areas and areas that provide stormwater treatment. These habits will provide for continual forage for these species. Most of the nesting habitat for the onsite kestrels will not be developed and will be maintained in its current condition within a *Conservation Easement.*

- ***Southeastern American Kestrel—Project Effect: "Not Likely to Adversely Affect"***

Plants

- **Godfrey's Swampprivet (*Forestiera godfreii*: FNAIG2S2; State Endangered):** This is an endangered shrub to small subcanopy tree that is found within the historical extent of Sugarfoot Hammock within the County. This is the historical plant community that once expanded south and north of SW 24th Avenue in the area of the intersection with I-75. Remnants of this Mesic-Calcareous Hammock still exist but the areal extent has been substantially reduced in recent years. Godfrey's swamprivet is currently found in the vicinity of SW 24th Avenue extending south into Celebration Pointe within the Hogtown Prairie and Sugarfoot Hammock Systems. It is not known to occur in the vicinity of the Planning Parcel however extensive searches were performed of the Project Site as part of this ERA and **NO** individuals were found.

  Godfrey's Swampprivet—Project Effect: "No Effect"

- **Variable-leaf Crownbeard (*Verbena heterophylla*; G2/S2; State Endangered):** This listed plant species, a member of the Asteraceae (composite) family, is found in mesic flatwoods and dry woods in several north-central and northeast Florida counties and is considered endemic to northeast Florida. It is listed as Facultative Wet by both the FWS and FDEP. This species occurs within the Northern Highlands Province of the County north and east of the Project Site. There is **NO** mesic or wet habitat on site that supports this species, and none were seen during the site survey.

  Variable-leaf Crownbeard—Project Effect: "No Effect"

- **Florida Spiny-pod (*Matelea floridana*; G2/S2; State Endangered):** This vine species, a member of the dogbane family (Apocynaceae), is typically found in mesic habitats. Florida spiny-pod may be encountered within various habitats throughout the County. This species is relatively common in Alachua County and occurs on the Project Site in several areas **(Figure 50)**.The locations where the plant is found will be protected by a *Conservation Easement.*

  Florida Spiny-pod—Project Effect: "No Effect"

- **Angularfruit Milkvine (*Gonolobus suberosus;* State Threatened):** This species is in the dogbane family and is a vine often found in the same habitats as Florida spiny-pod (they are, in fact, very morphologically similar when not in flower). This species occurs within various habitats throughout the County generally in drier sites than Florida spiney-pod. This species occurs in the area of the Planning Parcel, but none were observed during the field survey.

  Angularfruit Milkvine—Project Effect: "No Effect"

- **Cardinalflower (*Lobelia cardinalis*; State Threatened):** This species is found in wetland areas and is listed as Facultative Wet (FWS) and Obligate (FDEP). This imperiled species is rare within Alachua County but occurs within the northern areas of the Northern Highlands Province within the GRU Property. The plant has not been reported as far south as the Project Site in the County. It is a rare inhabitant of herbaceous and forested Wetlands.

  Cardinalflower—Project Effect: "No Effect"

- **Hooded Pitcherplant (*Sarracenia minor*; State Threatened):** This species is a wetland taxon and is listed as Obligate (FWS) and Facultative Wet (FDEP) by the federal and state regulatory agencies. This species occurs within the Flatwoods of the Northern Highlands Province located in the north and eastern areas of the County north of the Project Site.

  Hooded Pitcherplant—Project Effect: "No Effect"

- **Florida Toothachegrass (*Ctenium floridanum*; G2/S2; State Endangered):** This grass has been recorded and vouchered in several northeast Florida counties including Alachua County, which appears to be the southwestern limit of its range. It is a wetland species and is classified as Facultative Wet by the FWS and FDEP. It was not seen on the Project Site.

  Florida Toothachegrass—Project Effect: "No Effect"

- **Eastern Sweetshrub (*Calycanthus floridus*; G5/S2; State Endangered):** This small shrub has been found in the county within the Northern Highlands Marginal Zone. It is also identified around residential areas where it is planted for ornamental use. This plant species was not encountered on the Project Site but occurs around an old cemetery west of Hague.

  Eastern Sweetshrub—Project Effects: "No Effect"

- **Silver Buckthorn (*Sideroxylon alachuense*; G1/S1; State Endangered):** Silver buckthorn occurs in upland hardwood forests around limerock sinks and on shell mounds. Lack of suitable habitat greatly reduces the probability of this species occurring in the area of the Planning Parcel. It was not seen during the Site

surveys nor has been encountered during adjacent site surveys conducted in the past.

Silver Buckthorn—Project Effect: "No Effect"

- **Flyr's Nemesis (*Brickellia cordifolia*; G2G3/S2; State Endangered):** This upland species has been recorded within several miles west of the Planning Parcel on the SpringHill Properties and in San Felasco Hammock; however, it has not been observed on site. It grows in dry, upland pine-oak woods but it does not thrive in areas that have been clear-cut and converted to pine plantations as are common on the Project Site.

  Flyr's Nemesis—Project Effect: "No Effect"

- **Red-margin Zephyrlily (*Zephyranthes simpsonii*; G2G3/S2S3; State Threatened):** This species is a central and south Florida species and has not been vouchered for Alachua County; however, it has the potential to occur along roadside ditches and other damp grassy areas and has been reported as far north as Marion County. It is listed as Facultative by the FWS.

  Red-margin Zephyrlily—Project Effect: "No Effect"

- **Rainlily (*Zephyranthes atamasca var. treatiae*; State Threatened):** This wetland species is classified as Facultative Wet by the FWS and FDEP and has been vouchered in Alachua County; however, it has not been recorded in the area of the Planning Parcel. This taxon also includes the formerly separate species Treat's rainlily (*Z. treatiae*), which has been taxonomically subsumed into *Z. atamasca* var. *treatiae*.

  Rainlily—Project Effect: "No Effect"

- **Cinnamon Fern (*Osmundastrum cinnamomeum*; State Commercially Exploited):** Cinnamon fern is found in many of the wetland areas throughout the County and is a commonly found plant species in north Florida Wetlands and wet flatwoods. This is not an imperiled species; however, it is listed as Commercially Exploited in the Regulated Plant Index (Chapter 5B-40.0055 FAC). This fern is found on site.

  Cinnamon Fern—Project Effect: "No Effect"

- **Royal Fern (*Osmunda regalis var. spectabilis*; State Commercially Exploited):** Royal fern is equally as common as cinnamon fern and occurs in wetland areas throughout Florida. This is not an imperiled species; however, it is listed as Commercially Exploited in the Regulated Plant Index (Chapter 5B-40.0055 FAC). This fern is found in the onsite Wetlands.

  Royal Fern—Project Effect: "No Effect"

- **Needle Palm (*Rhapidophyllum hystrix*; State Commercially Exploited):** Needle palm is a wetland taxon that occurs in Hydric Hammocks, Mesic Hammocks, and Forested Wetlands. It is classified as Facultative Wet by the FWS and FDEP. It has not been recorded on the Project Site. This is not an imperiled species; however, it is listed as Commercially Exploited in the Regulated Plant Index (Chapter 5B-40.0055 FAC). It was not seen on the Project Site.

  Needle Palm—Project Effect: "No Effect"

Invertebrates

- ***Sugarfoot Moth Fly (Nemopalpus nearcticus):*** This is an unlisted but very rare insect that was originally found in the Sugarfoot Hammock area and hence was named for the site. Sugarfoot Hammock was a large expanse of Mesic Hammock habitat that historically occurred within and surrounding the Project Site. This habitat no longer exists on site. This moth has not been found in the area since it was originally described; however, it has subsequently been reported in the Gulf Hammock area.

  Sugarfoot Moth Fly—Project Effect: "No Effect"

Champion Trees

The locations of Florida Champion Trees documented for Alachua County are provided on **Figure 51**. The data indicates that **NO** champion trees have been reported for the area. Most of the historical large trees on the site have been removed through silvicultur3al and agricultural practices.

Biodiversity Hot Spots

The general distribution and probability of Biodiversity Hot Spots are shown on **Figure 52**. In this coverage, most data points are single species occurrence records, and predicted total species occurrences are based on habitat and observed species. The Planning Parcel lies within a mapped polygon area where biodiversity is considered normal background levels consisting of 0 to 4 focal species. This is primarily due to the extensive agricultural and silvicultural use that has historically occurred in the area.

Results of Field Survey

The general results of the field survey are provided on **Figure 53** where the GPS locations where site-specific data were recorded are categorized with respect to the general type of data recorded. The GPS icons on Figure 53 represent data collected at **2,721** locations within the Planning Parcel. The general existing conditions found on the Proposed Project Site are shown in **Appendix A** (**Photos 1** through **109**) as referenced to photo stations provided on **Figure A–1**. The common and botanical names of all plant species encountered during the survey are provided in **Table 3**. Listed species surveys to include gopher tortoise surveys were performed in all areas where GPS icons are shown on Figure 53.

Plant Communities and Land Use Occurring within the Project Site

From the GPS mapping data provided on Figure 53, an Upland and Wetland and Surface Water Plant Community map was constructed as shown on **Figure 54** for the entire Planning Parcel. The Plant community acreages for all polygons within the Planning Parcel are provided in **Table 4**. In general, all onsite plant communities are significantly altered from silviculture, drainage, excavation, filling, and historical development activities. Prior to 1937, the entire Planning Parcel had been cleared of all natural native Plant Associations for dairy and grazing operations. There are **NO** undisturbed Natural Communities remaining on the Project Site. To illustrate the past historical disturbance that has occurred within the Planning Parcel, the plant communities have been overlain on historical aerial photographs, as follows:

Figure Number	Flight Year
55	1937 aerial
56	1949 aerial
57	1955 aerial
58	1961 aerial
59	1968 aerial
60	1974 aerial
61	1979 aerial
62	2000 aerial
63	2005 aerial

A detailed summary of the Plant Communities and Land Use present on the Site was described and discussed with reference to photographs in the 2008 ERA report (Attachment 4). Based on the 2019 site-specific field review there were NO significant changes in the upland habitats or nomenclature that occurred since 2008. Therefore the 2008 descriptions of the general ecology and characteristics of the upland communities was determined to be sufficiently representative of the 2019 ecological associations and therefore will not be repeated in this ERA. Except for very few areas, the habitats occurring on the Site in 2021 are not significantly different than those found on Site in 1937 (see Figures 55–63) when clearing of the site for pasture was completed in most areas. From 2008 to 2021, the changes in the upland communities are related to decreased cattle grazing pressures, which has resulted in invasion of Pines and Oldfield vegetation such as briers into the fringes of the pasture. However, the dominant groundcover remains Bahiagrass. In 2008, rainfall had been significantly less from 2000 to 2008 than has occurred from 2017 to 2021, and this has affected the appearance of the various depressions on the Site compared to the previous time period. The 2008 Report contains descriptions of all wetland and upland plant communities as well as photographs of the habits and buildings and other structures that are present on the Planning Parcel.

Changes in Acreage of Wetland and Surface Water Habitats and Plant Community Associations from 2008 to 2021

Extensive surveys of all onsite surface water and wetland habitats were performed in 2019–2021 to assess the changes that occurred in these habitats since 2008. In 2008 an extensive delineation procedure was performed on the Planning Parcel to delineate the boundaries of all Wetlands and Surface Waters pursuant to Chapter **62-340. Delineation of the Landward Extent of Wetlands and Surface Waters. F.A.C.** The boundaries of all Wetlands and Surface Waters were staked or flagged and marked with sequential numbers, and position coordinates were located by professional surveyors. The surveyed lines were reviewed in the filed by the staff of SRWMD and approved. These lines were accepted by issuance of Conceptual **ERP08-0278** described previously. The jurisdiction flag's locations placed in the field in 2008 are shown on **Figure 64** with the delineated wetland and surface water polygons shown on **Figure 65** and tabulated in **Table 5** for the 2008 delineation procedure. At that time, the District did not exert jurisdiction on excavated ditches or flow channels constructed in uplands that had a mean seasonal water table located beneath the ground surface generally and by rule these features do not require mitigation to offset impacts. All these features were flagged and surveyed but the exempt features were not evaluated in the Mitigation Assessment. Currently by State rule, excavated ditches in uplands are exempt from mitigation. Within the County, City of Gainesville, and Countywide Wetland Ordinance rules, all constructed or man-made or created Wetlands and Surface Waters are exempt from regulation and mitigation. A discussion with respect to how the City of Alachua regulates Wetlands and Surface Waters will follow review and discussion of the 2021 field data.

The geographic and topographic position of Wetlands and Surface Waters on the Site did not change from 2008 to 2021. However, since 2008 there has been significantly more rainfall than in the decade prior to 2008. Following Hurricane Irma in 2017, which exceeded 100-year flood levels, all wetland and surface water areas on site were flooded to the maximum water levels possible. Small depressions in the pasture that were covered with Bahiagrass, pasture herbs, and oldfield vegetation in 2007 were flooded in 2017 and remained saturated or flooded at various levels throughout 2021. Extensive rainfall in the summer of 2021 has kept these depressions wet. The current jurisdictional map defined in 2021 is shown as **Figure 66** in relation to the 2008 boundaries. The 2021 Surface Water and Wetlands plant community polygon map is provided as **Figure 67**. The acreages for all Wetlands and Surface Waters are provided in **Table 6**.

The jurisdiction line along the Creeks did not change from 2008 to 2021 because the adjacent uplands are steeply sloped and very dry. Therefore, changes in rainfall from year to year do not affect the jurisdictional boundary. The jurisdiction line shown for the **Isolated Seepage/Drainages 1** (**Areas A** and **B**) and **2** (**Wet** and **Dry)** (Figure 4) changed within the area covered by the tree canopy simply because the floods in 2017 flooded previously dry depressions and killed the upland groundcover vegetation. So, the 2021 line shown reflects the 100-year flood boundary and high surface water elevations

that have occurred in these two (2) habitats since 2017. **Area 1** is composed of numerous small depressions situated within various thicknesses of clay soil that historically was not cleared for pasture. The depressions are connected by intermittent stream flow that arises from rainfall and seepage located in the north part **(Area 1-A)** of this system. The 2017 to present floodwaters connected previously isolated depressions that were determined to be upland in 2008. There are Wetlands (**polygons 30 and 31**: Figure 67) with muck soils north of the dry swale shown as **Polygon 6**. These wetland polygons have a water table continuously perched at or above the ground surface. The depressions located below **Polygon 6** are intermittently flooded only during periods of very high rainfall, have various thicknesses of sandy surface soils, and drain rapidly during periods of low rainfall. This Polygon area is defined as **Wetland 32,** but several depressions are best termed as Intermittent Surface Waters because there is no groundcover vegetation and soils may or may not be hydric, and during low rainfall, these depressions can become covered with upland vegetation. The boundary of these areas was defined by the obvious flood boundary that occurred. During the 2017–2021 re-delineation of the areas, the boundaries were not reflagged, but the jurisdiction boundary was established using the existing 2008 shapefiles and modified by ground verification with handheld GPS coordinates in combination with use of 1-ft LiDAR topo contours. This procedure was approved by Alachua County staff who field reviewed the new line and approved the location for County review permit purposes. Since all stream and designated wetland areas will be placed in a **Conservation Easement** as part of a development agreement, the District should have no issue with this approach as the provided buffer is generally 75 ft or greater and their regulated buffer is 25 ft average with a 15-ft minimum. Any discrepancy in the jurisdiction line would be more than accounted for in the average buffer provided.

To provide a basis for ERP permitting in the future, the Wetlands and Surface Waters were grouped into categories to describe the type of Wetland or Surface Water feature present in each designated polygon described on Figure 67. The descriptive Polygons are tabulated within Table 5 and photographs of each polygon are provided in Appendix A. These categories are briefly described, as follows:

1. **Brooke Pointe Creek:** The onsite areas of Brooke Pointe Creek are best described as *Disturbed Mixed Hardwood Riparian Surface Waters*. The Creek and banks are occupied by a host of deciduous hardwood species; however, there is very little wetland acreage associated with the Creek on site and is best referred to as a Surface Water. Most of the historical upper onsite floodplain has been converted to pasture. There are **NO** natural floodplain areas remaining on site. The north and west boundary of the Creek has been significantly altered by single family residents who have converted most the historical floodplains to intensively managed yards and planted with yard grasses.
2. **Turkey Creek:** The onsite areas of Turkey Creek consist of eight (8) mapped polygons that are best described as *Disturbed Mixed Hardwood Riparian Surface*

Waters. There are **NO** true wetland areas associated with the Creek on site. There are wetland habitats off site south of the Creek. The onsite areas have been substantially impacted by cattle and pasture management. Road crossings occur in several areas and residential construction and yard management south of the Creek have affected the type, nature, and function of the Creek in these areas.

3. **Schmidt Creek:** Schmidt Creek, as mapped on Figure 67, consists of a well-defined surface water stream represented by **Polygon 18**. This polygon extends from a west to east road crossing that has been in place since before 1937 south to the confluence with Turkey Creek. From the road crossing north Schmidt Creek is composed of several well-defined creek channels that flow in various directions through a *Disturbed Mixed Hardwood Seepage Wetland*. Muck soils are present throughout and the creeks route surface water from north of US 441 to Turkey Creek and originate in an upland Mixed Hardwood Seepage Slope that is located around the south and east perimeters of the Wetlands.
4. **Isolated Mixed Hardwood Seepage Wetlands: Polygons 30 and 31** are within a long landscape depression that is oriented northeast to southwest within the western third of the Project Site. Surface Waters originate in the area from upland runoff and groundwater seepage that seeps out of the ground and runs along a muck surface into several small defined stream channels. From **Polygons 30** and **31** water flows south into a partially excavated swale **(Polygon 6)** that was in part created by digging and scouring of Surface Waters during high rain events. Stream flows in this area are diminished by natural seepage into the ground throughout the extent of the polygons. **Polygon 13** is a small narrow surface water drainage that has historically been enhanced that routes water from **Polygon 31 to 30.**
5. **Isolated Mixed Hardwood Intermittently Flooded Seepage Wetlands and Surface Waters (Polygon 32):** This system has been designated as **Polygon 32** and during extreme flood events this floods into **Polygons 14 and 5**. The area is characterized by a series of isolated and connected shallow landscape expressions significantly affected by cattle. The vegetation in the area is primarily dominated by a dense subcanopy cover of deciduous hardwood species that are generally very small. Groundcover vegetation is sparse throughout all areas of the delineated polygon areas. During normal rain years, most of the area does not have surface water. Water seeps into the ground rapidly, and during periods of low rainfall upland vegetation quickly colonizes the entire ground surface. In periods of extreme rains, the area is differentially flooded as the numerous depressions drain at variable rates. Some hold water for extended periods while others drain rapidly. Only during extreme flood stages that are substantially above the average annual flood event would water flow south to Turkey Creek. There was no evidence in 2019–2021 that flow across the pasture had occurred.
6. **Non-Wetland Intermittent Surface Waters**: This broad descriptive category has been used to describe several small depressions, excavated ditches, small man-made ponds, and eroded swales created from overflow waters during periods of

high rainfall. These generally cannot be delineated pursuant to **Section 62-340.300. Delineation of Wetlands** and do not have characteristics of Wetlands but are delineated pursuant to **Section. 62-340.600(2) (b-d)**. **Surface Waters,** which primarily defines a flood boundary or excavation boundary. Typically, most of these areas are exempt from State mitigation because they are less than 0.50 acres, are isolated, and/or are excavated in uplands The majority of these areas were covered in upland vegetation in 2008 and are only intermittently flooded during periods of very high rain and can remain dry for several years even during periods of normal rainfall.

7. **Non-Wetland Swales:** The name of these features is intended to indicate that these areas are typically non-jurisdictional areas that direct water flow for a short distance and water flows into the ground. They only flow in response to rainfall. These areas were not claimed by the District as jurisdictional features in 2008.They shows signs of erosion and deposition but do not have wetland vegetation and have a normal seasonal groundwater table that lies below the surface except during flood events.
8. **Man-Made Surface Waters:** This category includes all Surface Waters that were excavated in uplands to include the three (3) drainage ditches defined as **Polygons 49, 50,** and **51**, an excavated fishpond **(Polygon 4**), and an excavated agricultural pond **(Polygon 3).** All are minimal quality habitats that have several surface water inflows of pollutants to include cattle wastes, greenhouse discharges, detergents from laundry facilities, and fertilizer inputs. The areas are characterized as Surface Waters and have little to no aquatic or wetland vegetation within the surface water or rooted in the ground. Direct impacts from cattle grazing, cattle walking, and uses of the areas as a drinking water source are apparent.

Surface Water Impacts Proposed in Response to Site Development

A Preliminary Site Development Plan proposed for the Site is provided as **Figure 69** Based on the Preliminary Site Development Plan there are surface water impacts proposed that total **1.551 acres** (**Figure 69**, **Table7**). No impacts occur to wetland habitats with impacts primarily restricted to significantly altered man-made and non-wetland surface water habitats. No Mitigation Assessment is provided at this time; however, the developer has agreed that to partially mitigate for the impacts, all naturally occurring Wetlands on the Site and the entire limits of the jurisdictional areas of Schmidt Creek, Brooke Pointe Creek, and Turkey Creek will be placed into a **Conservation Easement**. The draft Conservation Area is shown on **Figure 70** and totals **36.29** acres, which is 30% of the total Planning Parcel acreage. In addition to the Conservation Areas, there will be creation of substantial onsite Surface Waters maintained as stormwater basins (**Figure 71**). These basins, although not candidate to provide mitigation, provide a significant amount of surface water habitat that does compensate for the loss of the agricultural pond and other small intermittent Surface Waters. Therefore, there certainly will be **NO NET LOSS** of surface water habitat on the Site and that cannot be argued. For example, within the City of Gainesville, several hundred acres of treatment basins

have been created within Paynes Prairie for Wastewater Treatment. The Wetlands are referred to as the ***Sweetwater Branch Wetlands Park***. These areas would have substantially more nutrients, metals, etc., in the water due to the inflow of wastewater from the Sweetwater Branch Sewage Treatment Facility, which in this area, has a very high phosphorus concentration. No one would argue that this *Wetlands Park* did not provide substantial habitat for water birds and wading birds or any animals that require aquatic habitat for forage. These onsite stormwater basins will have a similar function. In addition, the basins provide substantial buffer for the conserved riparian and wetland systems.

Compliance of the Preliminary Development Plan with Environmental Regulation Requirements defined in the Objectives of the Conservation and Open Space Element of the City of Alachua Comprehensive Plan

The City of Alachua regulations protecting *Wetlands* are defined within **Comprehensive Plan Conservation and Open Space Element, Objective 1.10**, defined (in part) as follows:

> **Objective 1.10: *Wetlands***
>
> The City shall protect and preserve wetland values and functions from adverse, human caused, physical and hydrologic disturbances.
>
> *Policy 1.10.a:* The City shall utilize statewide wetland delineation methodology in accordance with Florida Administrative Code and regulations adopted by the DEP and the Suwannee River Water Management District.
>
> *Policy 1.10.b:* The City shall conserve wetlands by prohibiting, where the alternative of clustering all structures in the non-wetland portion of the site exists, any development or dredging and filling which would alter their natural functions. If no other alternative for development exists, the City shall allow only minimal development activity in those areas designated as wetlands within this Comprehensive Plan and that such development activity comply with the following performance standards:
